DEFINITION

Scientology is a new slant on life. It is, also, an applied philosophy. Philosophy means the study and love of wisdom, or knowledge of the causes of things. Scientology is knowledge that is of especial use to you in helping you to increase your ability to communicate in any situation and in helping you to expand your interests.

WHAT SCIENTOLOGY/A NEW
SLANT ON LIFE SAYS ABOUT

3

Communication

It could be said that, if you would get a person into communication, you would get him well. This factor is not new; but concentration upon it is new, and interpretation of ability as communication is entirely new.

If you were to be in thorough and complete communication with a car on a road, you would certainly have no difficulty driving that car. But if you were in only partial communication with the car and in no communication with the road, it is fairly certain that an accident will occur. Most accidents do occur when the driver is distracted by an argument he has had, or by an arrest, or by a cross alongside of the road that says where some motorist got killed, or by his own fears of accidents.

When we say that somebody should be in present time, we mean he should be in communication with his environment. We mean, further, that he should be in communication with his environment as it exists, not as it existed. And when we speak of Prediction, we mean that he should be in communication with his environment as it will exist, as well as, as it exists.

A man is as dead as he cannot communicate. He is as alive as he can communicate. With countless tests I have discovered, to a degree which could be called conclusive, that the only remedy for living is further communication. One must add to his ability to communicate.
