

# THE BEACON LIGHT HERALD

ATASCADERO, CALIFORNIA, APRIL 1, 1947

25¢ a copy, 6 copies for \$1.00, 25 copies for \$3.50; Subscription \$3.00 a year

## SCOUTING

We have been much interested in the reaction to our January Beacon Light Herald; I sense that most of you feel the time has come for decisive action, as I do; and that you would like me to outline a definite plan and program. Up to date, that has been a physical impossibility; with 3 indictments hanging over my head I couldn't make a move; they are now all dismissed. Two car accidents, and a breakdown in health, again crushed my plans to do something. There have been a few other happenings I don't care to put into writing, that have had a demoralizing effect on any action I cared to take. I will say this: they were gross betrayals on the part of some of our readers which completely wrecked my build-up of a definite program. Personal ambition and a lust for power is strong in some people, and it is 'rule or ruin'. One individual poisoned a whole group of our readers and administered a body blow to me physically and mentally as well as financially. This preceded my breakdown, and was a very big factor in it. Perhaps you can understand now why I hesitate to form a group. However, I have a quick pick-up, and am much improved in health.

I have no definite plan for a colony, for several reasons; the first step would be dependable helpers. I am already carrying a load beyond what any man should carry; and my prayer is, 'Oh Lord, when you send me the necessary help I'll get busy.' First of all, I need a stenographer. I plan to take a trip in early spring, possibly a series of trips; first, I want to take a trip up to northern California and call on as many of our subscribers as possible, make a survey of what they have, what they are doing and what they need, and then try to coordinate these scattered people on a co-operative basis, that is, a pledge to help each other, and then arrange to have them get together two or three times a year. For instance, we have readers in Mariposa, Sonoma, Placerville, Applegate and Grass Valley. Now, these people should be brought together to know each other. First, I would make a trip calling on each one; if they have a spare bedroom we should like to know whether it is available for any of the group as they travel. I believe the result of this trip would be that I could be a definite help to most of them, or to put them in touch with the help they might need.

Then I want to make a survey of northern Nevada, within 50 to 100 miles of Reno; then another trip would take me into Utah and Colorado. I am in hopes of taking one of these trips as soon as I have heard from some of you people; let me know if you would like me to call, and if you have a spare bedroom; would like to contact as many of the California readers as possible, so if you would like me to call on you, let me know right away. How far north we could get on the first trip depends on the work, and the amount of help. Remember, my only purpose is to help you people, I have no axe to grind, I am not forming a colony, I just want to knit together those of our readers who desire to help each other. We shall possibly make several trips during the coming months, and then shall decide on a location for our headquarters, probably in the center location of our various readers. I should prefer to be in Nevada.

The number of trips and the distance I travel depends on the amount of co-operation I get from you people. I am not asking for money, I am asking for co-operation, for mutual protection during the upheaval that will stagger your imagination. If you are merely curious, don't write me; my prime object is to help prepare you for the storm, physically, mentally and spiritually. I am your servant; times are too serious for monkey-business. I derive no benefit from these trips, it would be much easier for me to dig in and forget everybody. As a matter of fact I tried to do that, after my disillusionment, but it just won't work, it is in my blood. I would much prefer that you people should dig in where you are, instead of joining a big group. Remember, my definite place will crystallize as the result of my trips, and your co-operation.

we outlined this plan some 15 years ago, so it is nothing new; I think it was in The Beacon Light for 1933 or 1944. My plan would be to have a central meeting place in each state, so that we could draw these groups together periodically, everyone within a 100 mile area. These central groups should have sleeping accommodations so that visitors could stay over night. I want to see that our readers survive the coming storm; many of you don't seem to realize what you have to do. For instance, some buildings will not stand the earthquakes that are coming; existing buildings must be strengthened or others provided. Some have no money to do anything with; in that case we would put it up to our readers, and tell them the story. Some of you have money, and could help those less fortunate. All I want to know at present is, whether you are interested in this program, for this program is going to be carried out, whether you personally are interested or not. Your letters showed that most of you are definitely interested, even anxious. I shall make no provisions for Southern California, it is too hazardous.

So, on receipt of this message, get in touch with me and express your ideas and opinions. In '42 I sold my car and gave the proceeds to those on trial in Washington; I must again get a car; I must have comfortable traveling, the truck is too hard on me, big army tires are like driving on solid tires. I do not desire luxury, but conditions must be easier for me, less strain, if I am to carry out my program. Many have stood on the sidelines so far; well, the time has come to get into the swim. Write me, as briefly as possible, your reactions to this message. I am especially interested in someone who will act as leader in certain localities; we of course will keep in touch with those leaders, and hold them more or less responsible for the welfare of those readers in that group, and keep me advised if any need help, physical, mental, financial or spiritual.

As we told you, the time has come to prepare. Don't get panicky, there is no need for that; you have the necessary time for preparation. The spring months should be spent in preparation. If you have to make a move, go through your belongings and lighten the load, eliminate all that is not necessary. I am in hopes that we shall eventually acquire a 2½ ton truck, dedicated to the service of our groups. Some of our readers are elderly people; someone will have to take charge of their moving. Then again we need to be independent of trucking outfits, because the labor element is too uncertain. We must have our own transportation for the crops we raise or the goods we produce; eventually commercial trucking will not be dependable.

I look for stocks to recover considerable, and then crash worse than ever. The first week in August looks rather significant in that respect. We shall have more to say about this later on. When you see stocks going up, that's the time to unload; but you will have to watch our lunation readings for details, but I do know the boat will rock considerable in the first week or 10 days of August; and so, make no move of any kind until at least the last 10 days of August, if August is your moving month. July will probably be better, but I look for a tremendous migration to the country this summer or fall. And if you are living in a large city I would suggest that you join the trek. By long-distance planning we can help you, but I definitely would unload stocks and shares and bonds this summer. And there is an indication of a substantial drop of those things in the first 10 days of August, likely around the 5th or 6th. I do know it will be depressing and explosive, two extremes. You see, we have the same planetary configurations as that when the first atom bomb was dropped on Japan. Later on we will tell you what department of life it is likely to strike; I do know it will be sensational. As I said last month you have the whole of '47 to get ready and to dig in. We believe '48 will be leaving it a little late; of course it depends on your individual charts. If you need astrological advice, write to John H. Calvin, Box 63, Desert Hot Springs, Calif., we haven't the time.

#### CALIFORNIA

When the last message went out, I fully expected a number of letters asking why I did not approve of California; and this is right and proper. First, ever since we published THY KINGDOM COME, I have been convinced that the east and west coasts would be unsafe, and with special emphasis on Florida. Some have wondered why, in view of that, I considered going to Elsinore. I was definitely led to Elsinore, but I was told it would only be a stepping-stone.

First, we learned very valuable lessons in that abortive attempt, of the necessity of a severe screening of people who claim they want to join others in mutual protection; I had some most disastrous betrayals from those who had read my message for years, and this aided and abetted by a man who makes the most extravagant claims of any teacher I know of — and I have met most of them.

Second, when we were arrested in '42, we were at a very low ebb financially; three months in jail and a trip to Washington didn't help matters. Then came the trial, in '43, of the 26 defendants; I had been one of the original 30, but dropped from the 3rd indictment. We got frantic appeals for financial help from some of those on trial; we sold our car, and other possessions, and realized some \$1500; this we divided among the most needy, in weekly or monthly payments. We wrote them that they could depend on so much a week, or a month, as long as the trial lasted; we looked for a long siege, and were not disappointed, for we had the charts of four of the defendants, and I found them a reliable guide as to the time element. The \$1500 was soon used up, and so we appealed to our readers; altogether we raised another like amount. But this long siege left us somewhat embarrassed financially.

Well, the Elsinore deal enabled us to straighten out financially; so there were the two reasons we had to go down there; of my own choice I did not want to go, as I could not see safety in that direction; but I didn't see these two reasons. I might have known that when I was told to do a thing, there were reasons, and they were good, past experience has taught me that. We are now out of debt, and we are going to stay that way; and I advise you to do the same, do not assume any obligations from now on, for the road is going to be rocky. But long before tidal waves begin to sweep our shores, our large cities will be unsafe; you notice the ever-increasing disasters of all kinds, plane crashes, train wrecks; yesterday an explosion in Los Angeles claimed 15 lives. These are not all accidents, many are planned, and they will increase in number and intensity.

You recall last November we said the anti-Christ element had gotten all they ever would get legally, now the country had turned to the right, and that from then on they would practice violence. Turn your eyes toward Palestine for a moment; the Zionist has been working for a Jewish homeland in Palestine, by peaceful and subtle methods, and they have gotten as far as they can with those methods, so now they practice terrorism. I have watched that same gang in action here in America, as relating to Gerald L. K. Smith and others; Chicago, Detroit, Denver, Los Angeles; the same pattern, by the same crowd. But this is only the beginning. Did you ever see a prairie fire, when two fires met? Well, that's an illustration of what you can expect when the forces without and the forces within meet; the forces within are softening us up against the day when Russia will strike. I didn't say 'might', I said 'will'. And if you want to be caught in that inferno, I have no objection; my duty is to warn you, and this I am doing regardless of your opinion. What you think, and what you know, are usually two different things.

Then there is another element; there will be some very disastrous earthquakes throughout the world, and California will more than get her share of them. I believe that San Francisco and the Bay region will be among those to suffer most. I am convinced that earthquakes will destroy many of our large dams, and among them Boulder Dam. Do you realize what will happen when the huge dams go out? With the weak kneed Governor we have in this State, civil war will be more severe than if we had a real American as Governor. Earl Warren was one of the first to attack men like myself who were exposing the enemy; he used de Aryan and myself and others as a spring-board, while Attorney General, to spring into the governor's seat, and it worked. But I want you to remember that Earl Warren is a broken reed to lean on when civil war and sabotage come; he is and always has been a compromiser. And if I can avoid it, I don't want to be caught in that trap.

And last, but not the least, when Russia comes down through Alaska — and we have said so for the last 15 years — she will bring the atom bomb with her; I am convinced that she has it even now, and there is no question but what she will use it in an attempt to knock America out quickly. To do so she will have to destroy the industrial centers; I believe she will attempt to make a beach-head here in California, landing troops from the air. With civil war, and sabotage, and bombing from the air, that may not be so difficult. And so the highly industrialized cities of the Coast will be her target; Los Angeles will be one of the greatest prizes, if not the greatest, due to the oil industry and the aviation industry; without oil and aviation America is sunk. And so I am convinced that Los Angeles will get special attention. Another great factor is the great shipping into and out of Los Angeles.

A few days ago there was an item in the press, Chicago date line of Feb. 17th; it is an interview with one of the atom bomb scientists, Dr. Edward Teller; he said the atom bomb of the future will be a thousand times more destructive than the bomb that levelled Hiroshima; instead of 8 or 4 square miles, 3 or 4 hundred square miles might be destroyed at a single blow. I had said an atom bomb in Los Angeles would kill everything within 50 miles. Now, what would happen to the many spiritual groups located within 100 miles of Los Angeles? These men think their location is safe; they may be right, But I don't think so. Go down to New Mexico, where the atom bomb plant was built, and talk to the natives there of the queer things that have happened to people living in that vicinity after they dropped their first atom bomb. It was used in the desert; apparently its influence extended over a tremendous area; and there have been mysterious deaths ever since, and the end is not yet.

But you say our planes would stop them before they reach here? Well, that's a very optimistic frame of mind to be in. Russia has thousands of American bombers still in their crates; and you can rest assured she will turn them all loose at one time. She will strike when we least expect it; and it would be a physical impossibility to check all her ships, or even half of them, because of the surprise element. Even though it did not attack human beings, all foodstuff will be destroyed in the fields and orchards over a very large area. Dr. teller said 'I have no doubt that other nations have or will have the secret of the atom bomb.' He also said the chief danger of atom bombs will be due to radio-activity; they discovered that in New Mexico, and they discovered it again in Japan. We said the atom bomb could destroy the whole of humanity.

I have long been convinced that not more than half of our population in America will survive; for there is still another element, and that is the Great Rock spoken of in our book, THY KINGDOM COME. Recently ex-Governor Earle of Pa. said that within 5 years, 10% of the people of the United States would be dead from atom bombs. If you haven't a copy of THY KINGDOM COME, get it, you need it; and you also need a copy of NATIONAL DESTINY, with special emphasis on Part 2, The Modern Book of Daniel. These two books will give you a more practical and more realistic picture of the future. (Price is \$1.00 each.)

And still another factor, Russia will not need airplanes to send the atom bomb; I have been collecting news items for some time, mostly on the Pacific Coast; two this month, both in the Los Angeles area. Burbank, Feb. 5; Skimming roofs and tree tops, a derelict radio controlled missile crashed between two houses; it weighed 350 lbs. and was 10 ft. long. There were no planes overhead; four explosions were

heard in the sky. Feb. 12, a similar incident in the Huntington Park area. Friends, we must take a realistic attitude; the top ranks of the army realize what they are up against, and are worried.

On Jan. 14th, in New York, Lt.-Gen. Ira C. Eaker warned that the first battlefield of the next war will be the industrial cities of the United States. He also said that not later than 1950, any of the industrial nations of the world would be able to produce a super-rocket with a range of 3,000 to 5,000 miles, traveling with a speed of 3,000 to 5,000 miles an hour. I have a lot more similar items, mostly from scientists and military men who know. And so I am convinced that to remain in any large city is like trying to fight a buzz-saw; I do not see how our large cities can survive, with so many hazards to contend with. I recently read, in *Showers of Blessings*, a statement by the Editor that the next war would be in 1996; well, I see no evidence to sustain that position, everything is up to concert pitch now, the boil is ripe, and ready to burst; Russia couldn't hold off that long if she wanted to, she is going to be forced to make a decision.

1948, '49 and '50 will be tragic years; and so if you want to survive the coming storm and see the new order ushered in, I would suggest that you do something in the way of preparation; but I don't see how anyone can make any preparation in or near our large cities, because of the many hazards. Now we are being swamped with letters, asking us if this place is safe, or if that place is safe; and the answer is I don't know, I can only give you general directions, namely, to keep away from the coasts and keep away from large cities, and strive for an elevation of not less than 2,000 ft. If you live in California, go the other side of the Sierra Mountains, for I am convinced that as described in *THY KINGDOM COME*, tidal waves will be a big factor to be reckoned with. I also know that each colony, or community group, will need a man or woman at its head with a rare spiritual insight, plus some executive ability; spiritual insight and guidance will be absolutely essential, head knowledge alone, while it is valuable, will not be sufficient. I say this because I have contacted many self-styled leaders who were mere infants when it came to grappling with this situation.

I want you to weigh up the various factors I have mentioned. Another thought is, don't depend upon your farm for feeding you right along, for even the farmer is going to need storage to carry him over at least one year; storage for food, clothing and fuel. It can be mighty uncomfortable without fuel, as the British people have discovered this winter. If you have any further questions, we will answer them through this medium; we cannot answer all your letters. I hope I have covered the ground this time. If you have friends you wish to warn or convince, send them a copy of this message. Due to paper shortage we do not print many extra copies.

BEHIND THE IRON CURTAIN: A series of articles in the Hearst papers, by George Moorad, noted foreign correspondent; the following are extracts, which will strengthen the things I have said, namely, that we are not 'going to have' war with Russia, we are at war with Russia; only we poor saps don't know it. ". . . My friend, the diplomat, is not an American, but he has lived in the United States, and has had long experience in Berlin and Moscow. He said: "Try to explain to Americans that relations with Russia are not bad. There simply are no relations. . . Tell Americans that you cannot bank good will with the Soviets. Each deal is complete in itself; there is no credit carry-over. . . If Americans can understand these things, and mix generosity with GOOD STIFF RESISTANCE ON VITAL ISSUES ALL ALONG THE LINE, then we can gradually arrive at tolerable relations."

"The autumn of 1945 found me again in China. Timed perfectly with the fall of Japan, the iron curtain CLANGED DOWN ON MANCHURIA. We had little luck the first six months. The Russians were furious when Rear Admiral Thomas Settle's flagship paid a courtesy call on Dairen. Several American patrol planes from Southern Korea were fired upon. In Chinchow, the Chinese army spokesman finally told us tartly:

"It should be plain to you why you can't enter Manchuria. The Russians REGARD YOU AS ENEMIES."

*\*\*as American correspondents and diplomats began the old familiar battle to enter Soviet-occupied territory.*

#### PREPARATION

Since the first of the year we have had a steady stream of visitors, and the volume of mail has about doubled; and the theme is the same: "What can I do about personal preparation?" Well, most of you are entirely unfitted to make preparations for yourselves; Babes in the Woods would describe nine out of ten, you lack the realization of what you have to face. On the other hand, the same class of people are not willing to be disciplined; and without discipline you are a menace to yourself and everyone else.

I am convinced that we are a nation of outlaws; rebels. We talk a lot about the Bible and about God, but most of our decisions are made without the guidance of either one. And I am now talking about professing Christians; many of you have gone the rounds of the existing groups, and found fault with every one of them. Of course, some of the groups are very questionable, I will admit. Several have mentioned the Brotherhood of the White Temple, headed by Dr. Doreal; here is a letter that says "I have investigated Doreal of Denver; too much altitude and regimentation." I am planning to pay Dr. Doreal a visit and see for myself what he has; theoretically I would say he has the best setup. Later on, if we have the space, we will give a thumb-nail sketch of some of the groups.

There are some groups headed by sincere, well meaning people but who are not fitted to play the role of leading a group; there are others who are absolutely selfish and self-seeking, and out to fleece those who are gullible enough to trust them. If you ever need discrimination, it is now, especially you who say we shouldn't criticize or judge; for you are good material for a sucker list. I prefer to see people dig in independently, that is, paddle their own canoe; I don't want the responsibility of a lot of rebellious people, and to be accused of every crime in the calendar by them; because I would challenge their ego. Rest assured of one thing; if I ever head a group, there will be strict discipline, for I know that without discipline no group can succeed. Order is the first law of heaven; and if you think you can get along without it you are crazy.

A well disciplined home is a place of harmony and peace and happiness; a home lacking in discipline is a place of discord and strife. So now make up your mind what you want. I am willing to lay down my life for a sincere, consecrated group, but I am a hard-boiled egg when it comes to prima donnas. If you have had your own way throughout life you won't like it with me, so don't even bother to write; I want nothing to do with anybody who does not subscribe to the 'Thy will be done' formula. If I were to form a community, the first thing I would want would be people of character; then I would look around for money, but without the first, the second would be no good. I have turned down a lot of easy money from people who like to run things and people; I am not interested in that type. In the first place they are not worth saving. Noah didn't take any trash into the ark; and when Abraham struck out and took only the best, those who were sincere and wanted to work in harmony with God and His laws. And so a rebel would be a menace to everybody. I believe in liberty under law, but some people don't know the difference between liberty and license, and they have to be taught that difference the hard way.

I feel very sorry for the elderly people who, in the nature of things, must depend on others; they pull on my heartstrings very strongly. But until I get about half a dozen people who are willing to take orders, assignments, and carry them out to the letter, I am not willing to do anything. I don't want any emotional religionist; I want a few efficient people, who will dedicate their lives to service to God and humanity.

AMERICA SPEAKS has been in an oxygen tent for the past year, partly due to the paper situation and partly to lack of help; AMERICA SPEAKS is one of the most outstanding papers of its kind in America, and contains more meat than any of its competitors and should not be languishing in an oxygen tent; however we are doing the best we can, and hope to get back on a monthly basis soon. I get letters from people who are full of bluff about weathering the storm where they are, when I know they haven't a Chinaman's chance of so doing; the coming storm is going to be severe, and it needs must be, because until the average individual gets the stuffing knocked out of him, he is not willing to submit to the laws of God. Some of you have said I am too severe; and yet most of my life the chief criticism has been that I am too easy. That was the charge made against me when I was forced into bankruptcy.

Today we are a degenerate nation; not quite as bad as what you find in Europe (although bad enough), for there are great souls here in America who are acting as the leaven in the bread. Nevertheless, this nation must be purged, if it is to survive. The future belongs to Israel America; we must realize that we are modern Israel. England is doomed, and will rest beneath the ocean before the storm is over. I know there are many people in America who believe the Israel message but believe that England is to lead; in my opinion, like the whole of Europe she has gone too far to the left to come back. England has abundance of coal, yet the nation is paralyzed for the lack of it because the miners are too lazy to mine the coal; that's State Socialism in action. I worked in the coal mines of England as a boy nearly 50 years ago; I know something of their problems.

So you can forget the rest of the world, including England, for as the Irishman said, their future is all behind them, England is doomed; forget your British-Israelism, forget your Union Now. The only union you will see will be that of Canada and the United States; Canada will volunteer to become a part of the United States, the attack by Russia will convince her that she cannot stand alone; and that is in the divine plan, that we shall be one. And if you believe in the Israel message, quit talking that we shall go back under the Union Jack, for we never will. The promises of the Bible for modern Israel will be fulfilled here in America; and those who teach otherwise are false leaders.

Many have written about going to South America; my advice is, Don't; in most cases you will face tragedy. The greatest protection in the world will be here in the United States, providing you have sense enough to leave your large cities; the plight of Europe and England due to lack of coal should convince you that during the coming summer you should put away enough fuel for two or three years, unless you have sufficient timber on your own land; for the time will come when there will be no transportation, and you are likely to freeze to death unless you have enough fuel. If you depend on coal, get busy this summer; and the lease you should have is enough for two winters, and then maintain that level. We are rapidly approaching D Day in America; when the call goes out for a general strike, that's the signal for a revolu-

tion, and every Red rat in America will begin to sabotage. As a matter of fact they are getting in a little practice now, for I am convinced that more than half of the accidents taking place are due to sabotage. The purpose is to make you jittery, to surrender yourselves into their hands. I am also convinced that many mysterious plane crashes are the after-effects of the dropping of the atomic bombs on Japan; the destructive forces liberated with the dropping of those bombs will make themselves felt for a long time to come, on men and machinery. I am convinced that when planes run into those forces in the air, they crash; and these crashes will continue for some time to come. A scientist recently said that one bomb dropped on Los Angeles Harbor would make Los Angeles unlivable for a hundred years. You might as well fight a buzz-saw as try to combat that.

Again I say most of you don't know what you are up against in the way of preparation; and if you don't know, you had better listen to somebody who does. If you plan to join a colony, investigate first, not afterwards; be convinced of the sincerity of the leader, and then be convinced that you are willing to submit to the rules and regulations of that group; be convinced that the leader is honest, many of them are not, as some of the pitiful letters we receive testify. However, don't look for infallibility in any leader, there are none such, even the best leaders are human. But you have a right to expect that they be honest and sincere and efficient, the first two are no good without the last.

Remember, it is not too soon to make a start; and you will be convinced of that fact before the month of August is out. If you have money, spend it on a plant that will feed you during the storm; if you can't manage a plant, go in with somebody who can. But, step carefully, and know what you are stepping into. Most of the letters we receive are from people who have already been fleeced. Most of you will find your letters answered in our monthly message, we simply cannot keep up with the correspondence, that alone is more than a full time job for two people. We will answer any legitimate question through this channel; we have tried to cover all the ground.

And remember, God is not going to take care of nitwits and fools and morons. And just a word to those who have wealth; you have a tremendous responsibility. We get letters almost daily from elderly people, 60 to 80, who have lived a life of service in most cases, who are now at the mercy of the coming storm. You can do much in providing a safe haven for those people. If you want to take care of a group such as that, we will help you, show you how to go about it. But remember, your time is very short. You are going to lose your wealth anyway, it cannot survive the coming storm; and as I said before, you will be convinced before this summer is over, the handwriting is on the wall.

Of course there must be some younger able-bodied men and women to take care of these old folks, supply them with their fuel and food, for I don't believe any old age pensions will survive, as our present monetary system will go with the crash. Our mission is twofold; first, to warn you of the coming storm, and show you how to prepare for it, physically, mentally and spiritually; and second, to warn you against the land-sharks and racketeers who are out to get your money. There are many such, and they carry a very pious front, but it is like a Hollywood movie set, nothing but front. My remarks are based on many tragic letters I have received, from people who have lost faith in humanity, as well as their substance. Some of them seem to think that I should make good their losses; I don't know what process of logic they are using, inasmuch as many are people I have never heard of before. Some of these same people told me that I shouldn't criticize, when I tried to warn them; that's the slogan of the crook: Don't pass judgment on me, I am honest. Isn't that the tactic of Russia today, the whole world is picking on her, she says.

#### COMMUNITY LIFE

In the January number, we gave you a rough sketch of our ideal of what a community should be; in fact I will put it a little stronger; the picture I painted is a rough sketch of what the new order will be. Then, in the March number, we gave you the idea of rugged individualism. Well, both these set-ups will exist; and you have very little time to decide which you will accept. We get letters from some of you who are whistling in the dark to keep up your courage; that's all right with me, my duty is to warn you; if you choose to disregard that warning, that's your funeral. Some of you have written in, and quite a few at that, asking me to form a colony or community. Well, after the hell of the last 12 years, I don't feel as though I want to battle with a lot of contentious, rebellious people. I would be a strict disciplinarian, and there would be no monkey-business from anybody. I would be like the skipper of a ship. The Captain of a ship is dominated by certain rules and regulations. I have a very good friend who has a chest covered with medals and ribbons; he is a Captain in the Merchant Marine. He said, "If you were to come aboard my ship, I wouldn't know you; I am strictly impersonal, for if I ever let down the bars I would have mutiny aboard the ship within a few hours." Sailors are like a pack of wolves today, thanks to the unions.

tion, and every Red rat in America will begin to sabotage. As a matter of fact they are getting in a little practice now, for I am convinced that more than half of the accidents taking place are due to sabotage. The purpose is to make you jittery, to surrender yourselves into their hands. I am also convinced that many mysterious plane crashes are the after-effects of the dropping of the atomic bombs on Japan; the destructive forces liberated with the dropping of those bombs will make themselves felt for a long time to come, on men and machinery. I am convinced that when planes run into those forces in the air, they crash; and these crashes will continue for some time to come. A scientist recently said that one bomb dropped on Los Angeles Harbor would make Los Angeles unlivable for a hundred years. You might as well fight a buzz-saw as try to combat that.

Again I say most of you don't know what you are up against in the way of preparation; and if you don't know, you had better listen to somebody who does. If you plan to join a colony, investigate first, not afterwards; be convinced of the sincerity of the leader, and then be convinced that you are willing to submit to the rules and regulations of that group; be convinced that the leader is honest, many of them are not, as some of the pitiful letters we receive testify. However, don't look for infallibility in any leader, there are none such, even the best leaders are human. But you have a right to expect that they be honest and sincere and efficient, the first two are no good without the last.

Remember, it is not too soon to make a start; and you will be convinced of that fact before the month of August is out. If you have money, spend it on a plant that will feed you during the storm; if you can't manage a plant, go in with somebody who can. But, step carefully, and know what you are stepping into. Most of the letters we receive are from people who have already been fleeced. Most of you will find your letters answered in our monthly message, we simply cannot keep up with the correspondence, that alone is more than a full time job for two people. We will answer any legitimate question through this channel; we have tried to cover all the ground.

And remember, God is not going to take care of nitwits and fools and morons. And just a word to those who have wealth; you have a tremendous responsibility. We get letters almost daily from elderly people, 60 to 80, who have lived a life of service in most cases, who are now at the mercy of the coming storm. You can do much in providing a safe haven for those people. If you want to take care of a group such as that, we will help you, show you how to go about it. But remember, your time is very short. You are going to lose your wealth anyway, it cannot survive the coming storm; and as I said before, you will be convinced before this summer is over, the handwriting is on the wall.

Of course there must be some younger able-bodied men and women to take care of these old folks, supply them with their fuel and food, for I don't believe any old age pensions will survive, as our present monetary system will go with the crash. Our mission is twofold; first, to warn you of the coming storm, and show you how to prepare for it, physically, mentally and spiritually; and second, to warn you against the land-sharks and racketeers who are out to get your money. There are many such, and they carry a very pious front, but it is like a Hollywood movie set, nothing but front. My remarks are based on many tragic letters I have received, from people who have lost faith in humanity, as well as their substance. Some of them seem to think that I should make good their losses; I don't know what process of logic they are using, inasmuch as many are people I have never heard of before. Some of these same people told me that I shouldn't criticize, when I tried to warn them; that's the slogan of the crook: Don't pass judgment on me, I am honest. Isn't that the tactic of Russia today, the whole world is picking on her, she says.

### COMMUNITY LIFE

In the January number, we gave you a rough sketch of our ideal of what a community should be; in fact I will put it a little stronger; the picture I painted is a rough sketch of what the new order will be. Then, in the March number, we gave you the idea of rugged individualism. Well, both these set-ups will exist; and you have very little time to decide which you will accept. We get letters from some of you who are whistling in the dark to keep up your courage; that's all right with me, my duty is to warn you; if you choose to disregard that warning, that's your funeral. Some of you have written in, and quite a few at that, asking me to form a colony or community. Well, after the hell of the last 12 years, I don't feel as though I want to battle with a lot of contentious, rebellious people. I would be a strict disciplinarian, and there would be no monkey-business from anybody. I would be like the skipper of a ship. The Captain of a ship is dominated by certain rules and regulations. I have a very good friend who has a chest covered with medals and ribbons; he is a Captain in the Merchant Marine. He said, "If you were to come aboard my ship, I wouldn't know you; I am strictly impersonal, for if I ever let down the bars I would have mutiny aboard the ship within a few hours." Sailors are like a pack of wolves today, thanks to the unions.

Well, I wouldn't expect things quite so bad as that, but there would be bound to be trouble-makers in any group, and it would be dangerous to indulge in sloppy sentiment. If I allowed myself to be influenced or have someone play on my sympathies, it would wreck the ship. Whether you realize it or not, we are faced with a really tough situation, and most people will not get the realization till it is right upon them. For even a very small community, a handful of people, the very least one could get by with is \$50,000; for you have the following to consider; land to purchase, a generating plant for electricity, water supply, buildings and equipment, and last but not least, food and clothing. \$50,000 wouldn't go very far. Of course it depends a lot upon what the land could produce.

I do know one thing; those of you who today are well blessed with this world's goods are going to have deepest remorse when you come to think of what you could have done with your assets. However, as I said before, that's your funeral. I have been like a voice crying in the wilderness for a long time. You have the balance of this year to dig in and prepare for a long siege; your stocks and bonds and assets of all kinds will be gone. Of course with plenty of money one can dig in much more quickly than those who go out and pioneer with their bare hands; but the time element is very short, that is, comparatively speaking. We are making definite plans of our own, and are going to look over some sites, perhaps even before you get this message; but at present I am making no provisions for a group; as a matter of fact, I couldn't if I wanted to, I haven't the means. I should like to be located and settled before this summer is over; but that's a big job along with putting out two messages a month. If the good Lord wants me to provide for others, He will have to open up the way; I am not seeking it, definitely, for the reasons I have stated above.

### R U S S I A

I have many times told you that astrology is the most reliable time marker I have found. Yes, I know many Bible students who claim the same thing; Blessing, of Denver, makes some very extravagant talk in that direction. Yet he says the next great conflict is in 1996. In the chart of Soviet Russia, Uranus is in the 4th house, in Aquarius, not a very good place for Uranus in a nation's chart, for it indicates a nation that is seething with discontent and restlessness, especially as Mercury is adverse to that point, as is also the Sun; Sun and Mercury conjoined, adverse to Uranus. And on the midheaven are Neptune and Saturn, in opposition to Uranus and square to the Sun and Mercury; certainly a very vicious chart.

It is interesting to see Jupiter in the 8th, for this is the only thing that has sustained Russia so long, that is, under her present regime. The 8th represents other people's money; she was all ready to fold up, when Lend-Lease came to her aid; there is Jupiter in her 8th, in action. Now it was a foregone conclusion, when this new regime was set up, in 1917, that it would eventually crash, with such a vicious chart as we have outlined, and that it would only take some evil directions aspecting this vicious combination, to bring it to a head. As practically all these planets we have mentioned are in fixed signs, Leo, Scorpio and Aquarius, you can expect the crash to come when major malefics move into fixed signs.

As I write, and this is February 21st, we find Saturn in Leo; it is 1 degree on April 1st, retrograde, and Pluto some 11 degrees. At present Pluto is in good aspect to Jupiter in the 8th, so all kinds of things are being poured into Russia; she is still getting lend-lease; still getting help from UNNRA. At present Uranus is 18 degrees of Gemini; now Russia has Uranus 20 degrees of Aquarius, and so in May of this year Uranus will be in good aspect to the natal Uranus of Russia. To me, that indicates tremendous preparations going on behind the iron curtain; the chances are you will never get confirmation of this, nevertheless it is going on, although if you watch your papers very closely something may leak out. But I want you to bear in mind that in April, May and June of this year, Russia will go into high gear, preparing for something: what? And bear in mind also that Pluto will be in good aspect to Jupiter, the great benefic. Do you need two guesses as to what Russia is preparing for?

Another indication, Jupiter has been in the 1st house of Russia for nearly a year; so these preparations didn't start now, but it is culminating. At present Jupiter is retrograde, and in the Russian chart it will conjoin the Sun and Mercury, and square Uranus. To me this indicates a rather dangerous condition within the borders of Russia, a great unrest. In the chart of the United States, for instance, that would not mean so much, because we don't happen to have Uranus in the 4th with so many vicious afflictions to it, as we have already pointed out with Russia; and bear in mind that Jupiter is in the 8th. During the next 12 months Jupiter will form several afflictions in this chart, in addition to that of Uranus; the latter comes up in May. And by the way, May is likely to be a very lively month throughout the world. Here is an indication of stiffening of resistance to those who have been ladling out to Russia.

Now to my way of thinking, the stage will be set in the next few months for what Russia is planning. Pluto of course must get away from that good aspect on her midheaven, and Saturn must also pass that point. This it will do in July; and incidentally, these two transits of Pluto and Saturn on her midheaven are helping to lay a solid foundation for the coming offensive against us. After that, it is a downhill slide for Russia, for these two planets will form, first, a conjunction with Saturn, then a

square to her Sun and Mercury, then opposing Uranus in her 4th. These are not the only factors, of course, but you can't laugh off a transit of two major malefics on the midheaven of the chart, of either a nation or an individual, especially one with so many planets in fixed signs, five all told.

And so we see the indications of tremendous preparation in Russia, tremendous activity, all eagerly bent towards one goal. Of course nobody is being told the truth about these activities, neither within nor without. Russia realizes that she cannot hold her own people in check much longer, too many saw the outside world during the war. Let's look at another factor; the progressed Moon in the Russian chart will soon enter the 1st house, and by the way, at present it is trine to Uranus in the 12th, secret preparations, great activity, under cover, behind the iron curtain. It will take about  $2\frac{1}{2}$  years to go through her 1st house. Now Mars moves a little faster than the other malefics, and so every time Mars goes through a fixed sign it stirs up this Russian chart as you would stir up a fire in a fireplace. During May and June Mars will pass through Taurus (Russia's 7th house), and forms some very nasty aspects. Watch the papers in May and June, especially when it squares Uranus, around the middle of June; and then again in October and November. This time it will be passing over the midheaven, crossing Neptune and Saturn and an adverse to the Sun, Mercury and Uranus.

Early in '48 the progressed Moon will be in the fixed sign of Scorpio, and of course it will aspect Neptune, Saturn and Uranus in this Russian chart. Saturn will remain in the 10th house of this chart for approximately 2 to  $2\frac{1}{2}$  years; and during that period it forms some powerful world-shaking aspects. For instance, in August of 1947 it crosses Saturn; in September it squares or adverses. If people could only see behind the scenes this summer, the cries of horror would be heard round the world. But astrology enables us to look behind the scenes. In September and October Saturn will be exactly in opposition to this Uranus. Now Russia is an Aquarian country, and these malefics in Leo certainly do not portend anything good for her, as a matter of fact it indicates that all she is planning for others, will come to herself; namely, wholesale destruction. How nicely this dovetails into the 38th and 39th chapters of Ezekiel. Astrology and the Bible combined make a powerful weapon; and as both emanate from the same source, why shouldn't they go together?

This has been a difficult sketch to draw, because I am covering so much territory, and yet trying to boil it down, and still make it readable. When anything is unsound, or rotten, and lacks foundation, an aspect of Saturn brings the thing to a head; and that's what Saturn going over this midheaven is doing to Russia. Russia can't delay much longer, she must strike, or blow into a thousand pieces; you can bluff only so long, and then you must make good your bluff, or pass out of the picture. And so Russia is quietly giving the works to all the small nations of Europe, picking them off like clay pigeons one at a time, thanks to Mr. Roosevelt, who gave her the tools to work with. She has whipped all these satellite nations into a powerful machine, headed by Russia, as described by Ezekiel as the great northern confederacy of nations.

Russia, through bluff, has gained just about all she is going to gain; her bluffing will end this summer, definitely and for all time; in other words, she has a few minor conquests to make but she will not get them through bluffing, she will have to fight for them. Turkey and Egypt are two of those conquests that she needs, and she has just about gotten to the point that she is ready and willing to fight for them. Italy will be pretty well consolidated in the Russian fold before the year is out; Greece is trembling in the balance, and cannot hold out to the end. And what can Britain do to save her; what can America do to save her? If we attempted to, we would only precipitate the coming clash; this, America cannot do, she is not on a wartime footing, and it would take at least a year to get her there.

And so the small nations of Europe have no one to look to; they are doomed. And Russia cannot stand still, she has got to make these other conquests, to make it stick; and here are some of the things she has got to do; she has to finish her conquest of the Roman Catholic Church, and destroy her as a world power, which she has been for many centuries. And as we have stated many times before, the Roman Catholic Church is the model that Mussolini and Hitler and Stalin used to set up their totalitarian form of government. Rome does not ask for anything, she demands; all who seek world power do that. Rome's ambition, for centuries, has been to be the supreme ruler of this world, and she has stopped at nothing to gain her ends.

Incidentally, the chart of Pope Pious 12 and the chart of Russia have much in common; Uranus in the 4th, in the royal sign of Leo, a fixed sign, of course, but exactly opposed to Uranus in Russia's chart; two dogs after the same bone. The only difference is, Rome used to have power, but it is only a mere skeleton of yesterday, whereas Russia has more power than any nation on earth today; and so the Roman Catholic Church doesn't stand a ghost of a chance. Of course the softening up process has been going on in Italy for a long time; as a result Rome has lost her grip on the people of that nation to a very large extent. The Communists have exposed the humbug and the fake and the trickery of the Church of Rome; but what the people don't know is that what the Communists say about Rome is also true about Russia, and that they are jumping from the frying-pan into the fire. Evil will destroy evil in this case; the Church of Rome cannot possibly survive in the new order, she definitely belongs to the old order.

Now, folks, don't you see that America should be nationally-minded? With all the good intentions in the world, they can do nothing for the people of Europe; feed a few starving people, yes; but most of that is going into Russia. We are applying palliatives; we cannot cure, we cannot rescue; but we can mind our own business; we can prepare for an event that is now inevitable, as described by the prophet Ezekiel and as indicated in the Bible in the heavens, astrology.

Russia will hold a gun to Turkey's head; resistance means getting her brains blown out. There is nobody who can help Turkey, and Turkey knows it; Russia already controls the Baltic Sea; she is definitely headed towards Palestine; who do you suppose is at the back of the terrorist methods of the Jews in Palestine? Russia, of course; that's the softening up process for Palestine, she must get the Suez Canal, she must take Egypt before she reaches Palestine. After Turkey falls into the net, look for the other two. I shall come back to this subject from time to time as the charts unfold, and give things in detail; all I am doing now is to give you a rough sketch, because it is important that America realize that certain events must come to pass.

We have laid the foundation, or rather Roosevelt laid the foundation for you while you were sleeping; and he gave into the hands of the great anti-Christ nation the tools and the weapons to carry out her unholy scheme. No, friends, it isn't going to be 1996 before Russia strikes, it will be all over within five years; and I am giving myself a good margin when I say five years, because these charts tell me that '48, '49 and '50 are years that will bring action.

Now I have been warning you in the last few months that the time has really come to prepare for the storm; and my motive in giving you this article is to give you additional evidence, that you may realize the necessity of doing something pronto; that your time element is short, very short; that the same kind of evidence as that of the Russian chart and the Roman Catholic Church, are in all the national charts. And to come down still finer, you see these world-shaking events reflected in the charts of individuals. When the blow finally comes, people will try to run for cover, like a scared cottontail that you pick up with your headlight when driving at night. That's no time for preparation, that's the time when you will need the preparation, but no time to make it.

Some months ago we gave a brief summary of the chart of the United States, and told you of the significance of Uranus crossing Mars and squaring Neptune; these indications parallel what we have said about Russia, as far as it is concerned; certainly it is not an indication of peace, on the contrary it indicates war. As space occurs we will apply the same yardstick on other key charts; the point I want to emphasize is, if you are to be saved, in most cases you are going to save yourself. As St. Paul said, we must work out our own salvation, in fear and trembling, and that's exactly what you are going to do regarding the approaching climax to the closing of this Piscean age. True, some people will be lucky, and have others provide for them; even then they must make decisions. Somebody must lay aside food for them to eat during the storm ahead; and the day will come when America will need somebody to give her food — and there will be no one to give it. Don't be like the Foolish Virgins; begin to prepare for the storm that is coming inevitably, and that soon.

\* \* \* \* \*

**HONEY:** Last month we told you about our Honey; here is a note from Dr. George Starr White, who bought a Can: "That honey would not last U long IF people knew U had it and KNEW HONEY! Inclosed is my check for twenty dollars' worth more!"

Some want to know if we sell in smaller quantity; yes, we will send a gallon prepaid to anyone in California for \$5.00; outside of California you will have to pay the express charges; but it is good honey.

**VITAMIN A:** Several readers have inquired about Vitamin A Tablets; we don't have any, because we have foods rich in Vitamin A at a fraction of the cost of the tablets. Broccoli is the daddy of them all, 30,000 units. A 12 oz. package of Broccoli Powder is \$1.25 prepaid, or a 5# Jar is \$6.00 F O B Atascadero. Swiss Chard is 17,000 units; you may have the Swiss Chard Powder at same price as the Broccoli.

**FOOD TO GERMANY:** Many of our readers are of German extraction and are sending food to relatives in Germany, practically all of whom are suffering from malnutrition; and the most valuable things you can send them are Rice Polish and Kelp, either powdered or tablet form, for these foods contain that which their system needs. It doesn't look like a very appetizing diet, but the point is, these people are suffering from malnutrition; and it is not a question of catering to their palate, it is a question of supplying what their diet is and has been lacking.

I would suggest sending some Chocolate Joyana, and then tell them to make a hot drink of it, mixing a big spoonful of Rice Polish with each glass; and you will see an improvement if that is carried out every day. Beans, macaroni and spaghetti and so on are more filling, but they are not more satisfying. And I especially recommend this to those who are sick caused by malnutrition; as a matter of fact this applies just as much to people in this country as in war-ridden Germany.

For complete Food Price List, see AMERICA SPEAKS; if you are not a subscriber send for sample copy, 25¢

**LEMON POWDER:** Most of our foods are increasing in price; for instance, JOYANA is now \$3.69 for a 5# Jar; but for some strange reason there has been a reduction in the price of Lemon Juice Powder. We can now ship you a 5# Can for \$4.50 prepaid, a reduction of \$1.00. Nearly everyone needs more Lemon than they are getting.

**FOOD FADDISTS:** The following is a sample quotation from similar letters we receive:

" . . I enjoy very much the Beacon Light Herald and agree with you in nearly everything, but what does that matter. Best wishes to both of you. But I don't want to go into a colony and have some food faddist tell me what to eat and drink. However I would like to go into some nice colony with good sensible people. I need such a place right now. With kindest regards and best wishes, - - - "

I sympathize with the gentleman regarding food faddists; but what is a food faddist? As a matter of fact, there are very few professing Christians who approve of the diet that the good Lord intended us to live on. Most of them consider Biblical laws regarding eating as freakish; nevertheless, if we as a people want to enjoy good health, we must observe the laws of God regarding eating. The whole world today has adopted the Babylonian system; and when we attempt to go back to the laws of God, people don't approve. If I had a colony, I would be a hard-boiled, two-fisted disciplinarian, exacting; for a thing is either right, or it is wrong. If it is right we should do it, and if it is wrong we shouldn't; just that simple.

**MY HEALTH:** I see you good folks are very much interested in my health condition. For the last year I have been getting urinalysis reports; and the last two read normal, with the remark, This is very unusual for a man of 62 and you are to be congratulated. Well, as Mr. Roosevelt used to say, we planned it that way. I consider this very good, in view of the afflictions in my chart at this time, progressed Moon in the house of sickness, just past the square to the radical Moon and now approaching the opposition of Neptune in the 12th. I am not bragging, but this looks encouraging to me. My greatest trouble is the psychic drain on my vitality; I think the doctors call it enervation. That is to be expected, with the influences in my chart as they are. Perhaps Jupiter in the 6th may have something to do with that; however, planets alone do not bring health, it takes sensible living and the right food combinations. My comeback has been quick, and it has been brought about by right food combinations, plus plenty of rest.

**THE APRIL LUNATION** will not be included with this, because most of April was covered in the last month's reading, the first three weeks, in fact; and your May message will reach you around the middle of April, in plenty of time to pick up from April 20th to May 20th.

## BOOK REVIEWS

**CONSTIPATION, ITS CAUSE AND HOW TO TREAT IT:** By Dr. Robt. G. Jackson.

I suppose that constipation is about the most common complaint that plagues the human family; in this little brochure, Dr. Jackson explains the why and wherefore of constipation. When you find the cause of any disease, you have found the cure. He says that as a young man he suffered terribly with constipation, but at 80 he was as normal as a child; from which I judge he must have known about constipation. Having traveled the same path myself, and checked his formula, I do not hesitate to offer this little book to you. The price is 60¢.

**BLOOD PRESSURE:** By the same author.

In these days of high-pressure living, high blood pressure naturally goes with it. In this booklet, Dr. Jackson tells you in effect what high blood pressure is, and what causes it. Again, when you find the cause, you have found the cure. Here is a book that will enable you to put your finger on the cause of your trouble. It is written in easy, understandable language that even a child could understand. Like the rest of his works, there is no padding with words, he comes direct to the point. Price \$1.10.

**THE MOON:** By Dane Rudhyar.

Rudhyar is one of the best of the modern writers on the subject of astrology. This little book is devoted to the cycles of the Moon. The Moon is like the minute hand of the clock, it has the most rapid motion. The Sun is like unto the hour hand.

If you would learn to interpret your own chart, this little book will help you. We consider it an ideal textbook for beginners, and even advanced students. Cloth bound, and sells for \$1.00.

**CHANGE OF ADDRESS:** Every month we get back copies of our paper and Herald, because our readers neglect to notify us when they move. Please bear this in mind and do not fail to notify us of any change.

**ANOTHER THING:** Today's mail brings a card from a Bank official reading "Please do not send any more printed matter to - - - ; - as she has been dead for two years and her estate closed." Every once in a while we get word that someone on our mailing list has been dead a long time; of course the Post Masters should return such mail, marked "DECEASED", but they don't. In this case she was on our complimentary list. Should anyone reading this, be getting mail from us sent to one who has passed on, please return it, marked "DECEASED". Thank you.

WILLIAM KULLGREN, ATASCADERO, CALIFORNIA
