THE JOURNAL OF BORDERLAND RESEARCH  
Edited by Riley Crabb, Director, BSRA

A Publication of:  
BORDERLAND SCIENCES RESEARCH ASSOCIATES  
FOUNDATION, INC.

PO Box 548, Zip Code 92083, Vista, Calif.

The Journal is published at the rate of eight or nine issues a year, with the assistance of the Associates, at BSRA Headquarters, the home of the Director, 1103 Bobolink Drive, Vista, Phone A.C. 714-724-2043, the Foundation was incorporated under California law, May 21, 1951, #254263, and has been in continuous existence since then. Address all correspondence to PO Box 548, Vista, Zip Code 92083. The Journal is included in the Association membership of \$5.00 a year. Persons who do not care to join the Association may receive the Journal by donating \$5.00 or more a year to the Foundation. Single copies of the Journal may be purchased for \$1.00. Mrs. Judith Crabb is the office manager.

PURPOSES OF BSRA

BSRA is a non-profit, informal organization of people who take an active interest in unusual happenings along the borderland between the visible and invisible worlds. In the words of the late Meade Layne, founder and director of BSRA from 1946 to 1959, "BSRA publications are scientific in approach but employ few technical expressions. They deal with significant phenomena which orthodox science cannot or will not investigate. For example: the Fortean falls of strange objects from the skies, Teleportation, Radiesthesia; PK Effects, Underground Races, Mysterious Disappearances, Occult and Psychic Phenomena, Photography of the Invisible, the Nature of the Ethers, and the problem of the Aeroforms (Flying Saucers). In the year 1946 the Associates obtained an interpretation of the phenomena which has since come to be known as the Etheric or 4-D Interpretation, and which has not been radically altered since that time. This continues to be the only explanation which makes good science, sound metaphysics and common sense."

The chief present concern of the Association is to make this information available as a public service, with Headquarters acting as a receiving, counseling, coordinating and distributing center. A list of BSRA publications is available on request, send 25¢ in coins or postage stamps.

## DRAMA IN THE MEDICAL WORLD

By J. A. Morrill

Under our great enterprise economy, famed for its industrial wealth, its cartels, its power politics, its kickbacks, and billion dollar grants to buy anti-communist friends, there have emerged wealthy and powerful political action associations. These are organized for the purpose of safe guarding and advancing the material welfare of their membership through co-operative action. These organizations maintain highly paid lobbyists in the nation's capital to prevent the passage of legislation they regard as inimical to their interests, and work for the passage of legislation favorable to their interests. The public interests seldom receive any consideration.

Outstanding among these behemoths of political skullduggery is the American Medical Association, probably the most powerful because its tentacles reach out from the capital into every town and city in the United States, holding in their hands the power of life and death. Too often the angel of death haunts the hospital corridors where patients suffering from the most cruel diseases are being treated.

We are not criticizing those individual members of the AMA who lead dedicated lives, and give generously of their time and skill often at personal expense. We are discussing the problem of cancer, and our criticism is that of the high command of the AMA responsible for its policy. In this field, individual AMA members have been placed in straight jackets. It seems quite apparent the only weapons they are permitted in the fight against cancer to use, are those three recognized as standard by the high command. These are the surgeon's knife, X-ray treatments, and radium. Cobalt is also sometimes used. Some case histories reveal that these forms sometimes spread cancer instead of stopping it. Incredible as it may seem, no further research is being made to find other successful treatment. The American Cancer Society notwithstanding all the millions of dollars tossed into its lap by the trusting public, as yet has nothing to offer except its shop worn slogan, "Come through with a check and a checkup" which literally means that surgery is the answer. Surgery, popular with the profession because it brings fatter fees, sometimes brings about a cure, but it proves to be only a temporary one in many cases.

Outside the AMA, independent doctors, realizing the futility of surgery, X-rays, and radium as a cure for cancer, that chemotherapy must hold the answer; and therefore have been conducting research and experimentation in this field. Over the past years they have come up with some remarkable effective treatments for this disease. All of these have been effectively suppressed in the U.S.A. by the AMA using their chore boy the F.D.A. and the P.H.S. Until today, patients had to journey either to Canada or to Mexico to obtain these advanced forms of treatment.

This almost incredible story is just now coming into the public view in books, giving the intimate stories of the persecution of the promoters, outstanding among which are the Dr. Hoxey medication, Dr. Koch's Glyoxlide, Dr. Lincoln's treatment, Krebiozen, and Laetrile. Also from Canada came Dr. Hett's serum formula. We will touch here just briefly upon the struggle that these men had against overwhelming odds.

## HOXEY

Dr. Harry Hoxey operated a cancer clinic in Dallas, Texas, coming into the lime light in 1949. He really got under the skin of the AMA because thousands of patients flocked into his clinic and a remarkably high percentage were cured. Some arrived on stretchers and left by their own power. The Senator Tobey investigating committee visited the clinic and gave it the green light. He won a liable suit against Dr. Fishbein, Secretary of the AMA, but his victory was short lived, for while he was hailed into court and tried on technical grounds, he was also deprived of his licence to practice. We understand that today he is operating a clinic in Mexico. A former patient of Dr. Hoxey's, a post surgery case, given a new hold on life, told this writer that the outstanding feature at the Hoxey clinic was the atmosphere of cheerfulness and optimism which prevailed among both patients and attendants. The former went there with the conviction that they would get well, and most of them did.

## KOCH

William F. Koch M.D. professor of histology and physiology at the University of Michigan was one of the first non-conformists to attract the ire of the AMA. A member of the old school of medicine had made a study of cancer, its cause and treatment his life work. In 1918 he developed Glyoxylide an oxidative catalyst as a treatment for cancer. Given intramuscularly and reacting in the blood stream as a catalyst, it broke down and then destroyed the toxins upon which the cancer virus fed, and thus weakened the virus itself. This treatment at the same time broke down oxidation. The success of this treatment is revealed in its wide spread use by independent doctors in many states from the Atlantic to the Pacific. About this time, Dr. Koch was twice tried in the federal courts on charges originating with the AMA of the fraudulent misrepresentation of his remedy. In his defense, he presented on the witness stand an impressive array of doctors, nurses, attendants, treated patients, and relatives all testifying to the good affects of his treatment. At both of these trials, the jury refused to convict, and therefore action by the AMA banning Glyoxylide brought an end to the use of this useful drug in the curing of cancer. Discouraged, he went to Brazil at the invitation of the government there to head their public health service in wiping out jungle fever.

## LINCOLN

The Dr. Lincoln treatment for cancer made headlines and the Congressional Record when Senator Charles Tobey of New Hampshire, in his speech early in 1950 announced that his son Charles Tobey, Jr. had been cured of cancer at the Lincoln Center at Medford, Massachusetts. The treatment was described as an inhalater and a bacteriological phage. These terms sounded quackish to AMA ears, as indeed they branded him a quack. Nevertheless, this remarkable treatment did work in the cure of cancer.

## LAETRIILE

Dr. Ernest J. Krebs, Sr. of San Francisco spent thirty years of his life during his practice of medicine in the study, research, and experimentation trying to find a real cure for cancer. During the last ten years, his son Dr. Krebs, Jr. gave almost his entire life to this work. In studying the reports of other researchers he came across a report issued by Dr. John Beard of Edinburgh, Scotland revealing a new theory as to the origin of cancer to the effect that both the origin and cure lie within the human body as the unitarian-trophoblastic cell theory. This cell in its form is a duplicate of the cancer cell itself, but its primary function is to give sustenance to the em-

bryo during its first fifty-six days, after which it is destroyed by the enzymes through the periodic gland failure, in which the cell would be receptive to malignancy. The treatment then is duplicated by the enzymes originating with the pancreatic glands.

This chemical element was found in the pits of apricots, a type of cyanide which effectively controlled the cancer cells, but had to be combined with another element to prevent injury to the surrounding tissues. This he found, and the finished serum was called laetrile. For the first test on humans, he took an injection into his blood stream and found that he had been successful. There were no harmful side effects. In 1958, having been denied the green light by the AMA, in spite of favorable tests that were submitted, laetrile came to the attention of the McNaughton Laboratories in Montreal, Canada. Canadian doctors experimenting with this new remedy, were amazed with the favorable results that were obtained. Today, the McNaughton Laboratories are producing this new serum, and it is available under prescription from qualified physicians.

#### KREBIOZEN

Krebiozen, the most recent cancer treatment and probably the most controversial of them all, came to the public attention when presented to the FDA for the green light in the U.S.A. This medication, also based on the theory of the origin and treatment originating within the human body, began with Dr. Stevan Durovic in Yugoslavia. It is extracted from hormones and enzymes found in the blood stream of horses, and submitted in the form of a powder from which the serum was made. Dr. Durovic came to Chicago in 1949 on the advice that he consult with Dr. Andrew C. Ivy of the University of Illinois who rated high in American Pathology and held many degrees from institutions of higher learning. In Dr. Ivy's report, he stated that tumor growth was arrested in 52% of 2934 patients who took Krebiozen — 95% of whom were in the terminal or last ditch stage prior to that treatment. He also said that only 12% do not improve. In other reports, patients claim that their pain goes away. Doctors who have used it say that tumors go down and that the patients appetite improves. In spite of these impressive reports, the FDA ignored case histories that were presented, and based their verdict on their own so called laboratory tests to the affect that Krebiozen has no value in the treatment of cancer. However, the last chapter has not yet been written in the story of Krebiozen.

#### HETT

The most tragic figure in this unfolding drama, is that of Canadian born Dr. J. E. Hett. He spent more than fifty years of his life as a general practitioner and dedicated his life and work to the study of the cause and cure of cancer. He started his research work about the year 1903. In 1911 he went to Europe to compare notes with researchers there and to study their methods. In 1931 he produced and began using his formula, a serum given interveinously. By 1953 he had published a book entitled, "Cancer, Its Causes, Prevention, and The New Treatment". It was a summing up of his life's work in that field. By 1950, Dr. Hett was still practicing medicine, and his remedy was used only to some extent in the Pacific Coastal area. It was during the same year that this writer contacted a French doctor practicing in San Diego. Dr. Couche, then in his eightieth year, who had been associated with Dr. Hett in the treatment of his cancer patients, told of a remarkable record of cures and relief of pain in the treatment of many cases. This was even in cases where the virus had invaded the bone structure. Meanwhile, the AMA had taken notice of this treatment and resolved that it must come to an end. The closing chapter to Dr. Hett's long and useful life of dedicated service to the relief of human suffering is summed up in a quotation from a letter written May 7, 1964 from a prominent L.A. physician who was using the Dr. Hett formula

in 1950. "It may interest you to know that Dr. Hett was severely persecuted and jailed and had to fight to clear his name because he was using this treatment. I visited Dr. Hett four times and was very impressed with his method. Unfortunately, the Medical profession of today considers everything except the standard methods as "Quackery" and makes it almost impossible for a doctor who is a member of the AMA to practice anything except the standard method which unfortunately does not always produce uniform results in the cure for cancer!

This climaxing episode brought to an end the professional career of Dr. Hett. His only crime being that his life saving medication, produced in Canada, had strayed across the border into the forbidden domain of the AMA who wanted no cure for cancer outside of their own hands. He had been approached by some American interests offering a considerable sum for the exclusive use of his formula. This the Dr. declined, fearing the adulteration or sabotaging of his remedy. There is no question as to the effectiveness of this treatment. In this book, Dr. Hett quoted several case histories with almost uniform results. First the relief of pain, then the checking of the virus. It also was a test for the presence of the malignancy of cancer. For as the first injection of the serum produced immediate chills and fever where there was a malignancy. So far as we know, this serum perished with the death of Dr. Hett.

The outstanding revelation presented here is that a well financed, well organized group for political action can acquire greater power and influence than the government itself. Not only did the AMA suppress the distribution of these effective cancer cures in the U.S.A. but there was the case of the Senator Tobey investigating committee headed by Attorney Benedict FitzGerald and staffed by recognized specialists in the field of chemistry and pathology. After an exhaustive investigation of the various cancer remedies in use in the early 1950's they gave the green light to the Hoxey cancer clinic, Koch glyoxylide, Drosnes-Lazenbey, Lincoln, Inhalent therapy and Krebiozen. Their report, turned over to Senator John Bricker who had succeeded Senator Tobey, was never presented to the U.S. Senate Body. Why not? Copies of the report however have been made for the public in pamphlets and booklets.

I would like to call the attention of my fellow BSRA friends to the measure introduced by Senator Paul Douglas of Illinois. This Bill, Senate Resolution 101, publicly challenged the Federal Food and Drug Administration's Competency and honesty of purpose on the Senate floor, and submitted 80 pages of documentary to support his accusations. I would suggest that you write to your Senator urging passage on this bill.

Also, I bring to the attention of our readers, what promises to be a nation wide organization called the International Association Cancer Victims and Friends and dedicated to the right of life. Their purpose is to secure the qualified medical doctor the right to use whatever therapy for cancer that he deems advisable and which his patients may request. This organization is headed by Cecle Pollock Hoffman of 4742 63rd St. San Diego, California 92115.

Mrs. Hoffman knows whereof she speaks. She was a victim of the standard treatment used by the AMA doctors. This was unsuccessful, the virus became active again and she became a terminal case, with one foot in the grave. Happily she learned of the treatment called Laetrile, but she had to go to Montreal, Canada to get the treatment. Fortunately, she had the means to get there and was cured. For further information concerning this project, write to Mrs. Hoffman directly. Enclose 25¢ to cover for the expense of her brochure entitled, "If It Is True That Cancer Can Be Controlled, Why Isn't It?"

HOW TO DEAL WITH ANXIETY, PSYCHIC ATTACK

AND OTHER EMOTIONAL PROBLEMS

By The Yada di Shi'ite

Once in a while an occult scientist would visit one of the early Mark Probert Seances, and would ask penetrating questions which drew profound and thought-provoking answers from the leader of the Inner Circle. Such was the Seance of October 1952. (BSRA 9-C, Transcripts 16 thru 20)

- - I would like to know about anxiety. I would like to know about the method of tempering anxiety.

YADA: You are living in strenuous times, so you say, but if you look back you will find there was never a time it was not strenuous. Always a time when things were better. Why? Because it is only natural to forget pain and remember pleasure. If we want to live more comfortably we must first try to think more. Many individuals are averse to change. They walk about and it is classified as zombiism.

What is it that is so entirely important that destroying your own self is needed? You say 'I have all those things but I have not enough of green god'. So if we are not provided with enough substance we create pressure on the nervous system, muscles; pretty soon nervous system not work, heart feels badly, and then you pass away and leave everything here, leave wife here, house, children, still there with the same problem that has been your difficulty. If you would think this way you must realize that you have time to do all that is necessary in the hours that you work. Work a certain amount of hours and no more. Then go and have a change, working in what you call play, for that is work but is more pleasant and you relax completely and you say to your mind — tell your muscles to relax — and you search around for the various muscles. Now in doing this you cannot think of tomorrow or the next hour or two so you think only of muscles and tendons — to relax nerves — to quiet down and stop beating your body to death. Fifteen minutes every day and you will not have to go to a psychiatrist, and you will not have to go early to the undertaker.

Now man necessarily fears that which is called death, but in my language there is no term for death. The word is life — and that is consciousness. And you must seek to keep, to stay conscious in all that you do. You may go into what is called the sleep state but this does not mean that you are unconscious — it means simply that your state of awareness has stepped to another field of action, and if you can hold your consciousness right on through to the dream state, then you may also travel all through space time. Now because I am aware of your interest in what is called projection — in the dream state there is no aka cord attachment when one makes free into the dream world and then enters the physical awareness still in the dream body. There is no aka cord. What do you think of what I have said so far?

- - I know it all — can we consciously know it?

YADA: But you cannot do it? Do you know why? On coming into the physical world you create for yourself a sense body and in this sense body lies the attribute of what is called hypnosis. Suggestion and senses. All of them are subject consistently to suggestion and so you have taken this suggestion, and not only you but the greater majority have taken the suggestions that you cannot do this or that. You can do it. If you can then you can live, and the best way to live is to clear your consciousness that you cannot do this or that. Give this to yourself. Many want to live our lives for us but no one wants to pay for it. All of life in the physical world is a matter of suggestion.

Sometimes that which is called the mind — controller or psyche — wants to escape from the tyranny of the physical world and the pressure that is brought to bear on the physical machine, it does that by closing off the communication with the physical vehicle. Perhaps only in that part you will have a breakdown. A disease which in time will attack the whole organism.

- - I have a genuine interest in knowing — is there any value in this psychotherapy? — Are these real memories?

YADA: They are real memories. In that which is called spirit communication which is what we are now doing, there is really no two worlds, only one world. You are living in it and so am I. It is consciousness, this is a creation of the one world. A manifestation of the one world. And many things come to take place in its endless forms of phenomena. By that I mean to say a medium or sensitive can cause himself to become in rapport with a thought form created by another, or created by himself, and then a certain part of his mind, his thinking mind, will close off, and not tell him that it is his own creation and this creation can attack him.

You can create a thought form that is so solid you can make out of this a servant, or you can turn it into what you call a devil and it can attack you. You are so many of you interested in what you call sex — you can create a thought form that you can be attacked by sexually. You can also call upon a discarnate being and carry on sexual relations with that one. You may not possibly say the inner truths to the general masses, for they would abuse them. The power of man as a creator is beyond your present fondest dreams. You can contact and converse with the dreams of the so-called dead, for there are no dead except those that refuse to learn. You go into sleep state — your sleeping body can communicate with beings in my world — in the highest realms. They can move to or go to also into a form of sleep, and go into your world and communicate with you, and they can do it consciously or you can do it consciously. It is better for you all to do it consciously.

- - The technique of control of discarnate beings — why can some of them be under control and not others? How would you suggest a more dominant control of other discarnate beings in the projected state?

YADA: I would like to understand you fully so I can be careful what I say, because it is serious. I do not want to say anything that may lead astray. Do you have wish to control or dominate another's psyche?

- - Not necessarily. But for the advancement of knowledge and experimental work.

YADA: I would suggest that you not try to control, but that you permit that one to control. Wait for his permission to do, but not even then, not unless this one has a

complete understanding of what you are attempting to do.

- - But there are times when other discarnate personalities wish to control you, and if you do not wish them to control you, how can you control them so they cannot control you?

YADA: That is better. Psychic self-protection. First always keep control of yourself. Keep a positive thought — do not let your mind keep a negative thought at all. In this you are constantly making suggestion for proper control — to protect yourself. And this may seem like superstition originating out of beings somewhere called savage tribes — By the use of mantrams — there are certain words you can use and passes with hands you can make that will keep all outside entities from your body. Have you tried any mantrams?

- - But it has to do with conscious control in the projected state. We know that through the power of suggestion we can control our destiny — we can control many things — but there are many times when the power of suggestion refuses to move certain discarnate beings and I apparently have no control over them, so I know there are other ways and means.

YADA: It is because they know more of the law than you do. First you must have full control of your own conscious will. When another wishes to stand in your way, or attack you — you go to the attack — you move toward them — even though they may stand their ground. And you walk them down — for you know the full power, the full law, not only no other discarnate but no other projected being can stand in your way. Have you tried the use of breath upon these?

- - No, I haven't.

YADA: It is one of the greatest forces for destroying that which is before you and is opposing you. It is the force of breath and you picture in the mind this universal force which has brought all into being — you picture this as a destroying force — as a force of fear — and you go like this (blowing out his breath and thrusting it out before him with his hands). — In your time, what you call time, in my civilization there came among the people a little beggar boy who turned out to be sent to try to save Yuh civilization. He used breath to perform many of his so-called feats of magic - - which is not mysterious, it is a natural way, but man today in your world knows not in this. He has lost so many of his powers. Breath-Brahma — the essence of life — of creation — you use it. I will tell you more. I will talk to the boy (Mark Probert) and he will write it and send it to you. . . . Concentrate only on love — on understanding one another. You will go long, long way in what is called consciousness.

#### POLISH PROPHET NAMES HARMONY GROVE

"Bill Pomeroy, the San Francisco construction tycoon who is on a world cruise aboard his yacht, Nereus, dropped anchor a few days ago in the Polish port of Danzig. Just before he left, a letter written by a Pole living in nearby Gdynia was smuggled aboard. Written in laborious longhand, it read: 'Dear sir -- Thank you very much for the visit with yacht beautiful Nereus. Dear sir, it is better abandon California, in 1967 it will be total under water. Only in Harmony Grove, near Escondido -- salvation!' They know something in Gdynia we dont?" This item appeared in Herb Caen's column for August 5, 1964 in the San Francisco "Chronicle". We have no Associates in Poland or any Communist country!

## "THE ART OF TRUE HEALING"

By Dr. Israel Regardie

Students of Occult Science, and especially those of the Kabala, can be thankful that Dr. Regardie brought the rituals of the Order of the Golden Dawn with him to the U.S. in the 1930's, and sold them to Aries Press in Chicago, as this material is a mine of occult information. Lately, this English ex-Kabalist has chosen to reissue his "Art of True Healing", based on Kabbalistic Science, and has favored us with a review copy. Below is the first chapter.

Within every man and woman is a force which directs and controls the entire course of life. Properly used, it can heal every affliction and ailment to which mankind is heir. Every single religion affirms this fact. All forms of mental or spiritual healing, no matter under what name they travel, promise the same thing. Even psycho-analysis employs this power, though indirectly, using the popular word libido. For the critical insight and understanding which it brings to bear upon the psyche releases tensions of various kinds, and through this release the healing power latent within and natural to the human system operates more freely. Each of these systems undertakes to teach its devotees technical methods of thinking or contemplation or prayer such as will, according to the a priori terms of their own philosophies, renew their bodies and transform their whole environment. None or few of them however, actually fulfil in a complete way the high promise made at the outset. There seems but little understanding of the practical means whereby the spiritual forces underlying the universe and permeating the entire nature of man may be utilized and directed towards the creation of a new heaven and a new earth. Naturally, without universal co-operation, such an ideal is impossible for all mankind. Nevertheless, each one for himself may commence the task of reconstruction.

"How, then," is the crucial question, "are we to become aware of this force? What are its nature and properties? What is the mechanism whereby we can use it?"

As I have said before, different systems have evolved widely differing processes by which the student might divine the presence of such a power. Meditation, prayer, invocation, emotional exaltation, and demands made at random upon the universe or the Universal Mind, have been a few of such methods. In the last resort, if we ignore petty details of a trivial nature, all have this in common. By turning the fiery penetrant power of the mind inwards upon itself, and exalting the emotional system to a certain pitch, we may become aware of previously unsuspected currents of force. Currents, moreover, almost electric in their interior sensation, healing and integrating in their effect.

It is the willed use of such a force that is capable of bringing health to body

and mind. When directed it acts magnet-like. By this, I mean that it attracts to whomsoever employs these methods just those necessities of life, material or spiritual, that he urgently requires or which are needed for his further evolution.

Fundamentally, the underlying idea of the mental healing systems is this. In the ambient atmosphere surrounding us and pervading the structure of each minute body cell is a spiritual force. This force is omnipresent and infinite. It is present in the most infinitesimal object as it is in the most proportion-staggering nebula or island universe. It is this force which is life itself. Nothing in the vast expanse of space is dead. Everything pulsates with vibrant life. Even the ultra-microscope particles of the atom are alive; in fact, the electron is a crystallization of its electric power.

This life force being infinite it follows that man must be saturated — permeated through and through with spiritual force. It constitutes his higher self, it is his link with godhead, it is God in man. Every molecule in his physical system must be soaked with its dynamic energy. Each cell in the body contains it in its plenitude. Thus we are brought face to face with the enormous problem underlying all disease. The enigmatical problem of nervous depletion.

What is fatigue? How can there be depletion if vitality and cosmic currents of force daily pour through man, simply saturating his mind and body with its power? Primarily, it is because he offers so much resistance to its flow through him that he becomes tired and ill, the conflict finally culminating in death. How is puny man able to defy the universe? Nay more, offer resistance and opposition to the very force which underlies, and continually evolves in the universe? The complacency and confusion of his mental outlook, the moral cowardice by which he was reared, and his false perception of the nature of life — these are the causes of resistance to the inward flow of the spirit. That this is unconscious is no logical obstacle to the force of this argument, as all the depth psychologies have demonstrated. What man is really aware of all the involuntary processes going on within him? Who is conscious of the intricate mechanism of his mental processes, of that by which his food is assimilated and digested, of the circulation of his blood, of the arterial distribution of nourishment to every bodily organ? All these are purely involuntary processes. To a large degree also are his resistances to life. Man has surrounded himself with a crystallized shell of prejudices and ill-conceived fantasies, an armor which affords no entrance to the light of life without.

What wonder he ails? What wonder he is so ill and impotent, helpless and poor? What should there be surprise that the average individual is so unable adequately to deal with life?

The first step towards freedom and health is a conscious realization of the vast spiritual reservoir in which we live and move and have our being. Repeated intellectual effort to make this part and parcel of one's mental outlook upon life automatically breaks down or dissolves something of the hard inflexible shell of the mind. And then life and spirit pour in abundantly. Health spontaneously arises, and a new life begins as the point of view undergoes this radical change. Moreover, it would appear that the environment attracts just those people who can help in various ways, and precisely those amenities of life which had been longed for.

The second step lies in a slightly different direction. Regulated breathing — quite a simple process. Its necessity follows from the following postulate. If life is all about one, all-penetrant and all-pervasive, what more reasonable than that the

very air we breathe from one moment to another should be highly charged with vitality? Our breathing processes we then regulate accordingly. We contemplate that life is the active principle in the atmosphere. During the practice of this rhythmical breathing at fixed periods of the day, there should be no strenuous forcing of the mind, no over-taxing of the will. All effort must be gentle and easy; then skill is obtained. We let the breath flow in while mentally counting very slowly — one, two, three, four. Then we exhale counting the same beat. It is fundamental and important that the initial rhythm begun, whether it be a four or a ten beats count or any other convenient one, should be maintained. For it is the very rhythm itself which is responsible for the easy absorption of vitality from without, and the acceleration of the divine power within.

Immutable rhythm is everywhere manifest in the universe. It is a living process whose parts move and are governed in accordance with cyclic laws. Look at the sun, the stars, and the planets. All move with incomparable grace, with a rhythm in their inexorable times. It is only mankind which has wandered, in its ignorance and self-complacency, far from the divine cycles of things. We have interfered with the rhythmic process inhering in nature. And how sadly have we not paid for it!

Therefore, in attempting to attune ourselves once more to the intelligent spiritual power functioning through nature's mechanism, we attempt, not blindly to copy, but intelligently to adopt her methods. Make, therefore, the breathing rhythmical at certain fixed times of the day when there is little likelihood of disturbance. Cultivate above all the art of relaxation. Learn to address each tensed muscle from toe to head as you lie flat on your back in bed. Tell it deliberately to loosen its tension and cease from its unconscious contracture. Think of the blood in response to your command flowing copiously to each organ, carrying life and nourishment everywhere, producing a state of glowing, radiant health. Only after these preliminary processes have been accomplished should you begin your rhythmic breathing, slowly and without haste. Gradually, as the mind accustoms itself to the idea, the lungs spontaneously will take up the rhythm. In a few minutes it will have become automatic. The whole process then becomes extremely simple and pleasurable.

It would be impossible to over-estimate its importance or efficacy. As the lungs take up the rhythm, automatically inhaling and exhaling to a measured beat, so do they communicate it and gradually extend it to all the surrounding cells and tissue. Just as a stone thrown into a pond sends out widely expanding ripples and concentric circles of motion, so does the motion of the lungs. In a few minutes, the whole body is vibrating in unison with their movement. Every cell seems to vibrate sympathetically. And very soon, the whole organism comes to feel as if it were an inexhaustible storage battery of power. The sensation — and it must be a sensation — is unmistakable.

Simple as it is, the exercise is not to be despised. It is upon the mastery of this very easy technique that the rest of this system stands.

\* \* \*

"The Art of True Healing" was a collector's item for years but is now being re-issued by Helios Book Service, 8 The Square, Toddington, Nr. Cheltenham, Glos., England, price 8/6d or \$1.75. The contents include the use of the Middle Pillar technique of visualization and rhythmic breathing that is the basis of the Practical Kabala. Yet it is presented in such a way that no previous knowledge is required nor any excursion into the depths of occult science.

## BIRTH CONTROL IN HISTORY

By V. Leff

From "The Humanist" April 1964

Sex without fear of pregnancy? The controversy rages in the correspondence columns of our Sunday newspapers. In these enlightened days people are still capable of saying in all seriousness: 'I am not a Catholic or particularly religious, but I regard these practices as morally wrong and inimical to a happy marriage relationship.'

A Catholic doctor such as Dr. Anne Biezanek faces strong criticism by advocating and teaching methods of birth control. And despite widespread advertizing and the legal sale of contraceptives many people in our country are confused or uninformed. In Connecticut it is still forbidden to open a birth control clinic, and in France it is illegal to sell contraceptives to women. However, the sale of male-type contraceptives (permitted as a protection against venereal disease) reaches the figure of more than twenty-one million a year in France.

While moralists, philosophers, and religious people of all creeds have debated the subject for centuries, ordinary people everywhere have searched desperately for the solution to a very cruel conflict. Regular sexual gratification is physically and emotionally needed by most people, but in satisfying this natural need great misery can be caused to women burdened with too much child-bearing. Poverty and hunger is still a world problem because of over-population and the future looks very grim if the attitude to birth-control does not become more realistic.

With this great social problem as a framework, the story of the endless search for effective means of birth control is vividly illustrated by many examples in a recently published book, "Contraception through the Ages", written by Dr. B. E. Finch and Hugh Green (Peter Owen, 25s).

The authors remind us that it was not until the seventeenth century that Leeuwenhoek, the Dutch microscopist, saw spermatozoa in the seminal fluid of human beings; only then was there a scientific foundation on which base the practice of birth control, replacing the trial and error methods used for thousands of years.

The extraordinary variety of measures used in ancient times were based on a mixture of shrewd observation and blind faith in magic and suggestion, but in spite of the many failures social pressures have constantly driven people on in an attempt to help themselves out of their difficulties. As far back as prehistoric times there is evidence of the people trying to avoid having too many mouths to feed. 'In a cave at Combarelles scenes are sketched on the wall from the lives of those who had made these caves their homes. One of these is of a man and woman engaged in the act of coitus, and the male seems to have covered his penis with some form of coat.'

A typical example of how necessity is indeed the mother of invention is given in the case of Australian aboriginal tribes who live closely together on land which can nourish only a small population. To keep the numbers down, some youths in each generation are operated on to make them infertile. An investigator in the nineteenth century discovered that some of the young girls of a Queensland tribe had their ovaries removed and then served as prostitutes for the men of the tribe.

In most of the examples given from all over the world and in all periods it is usually women who have had to undergo often humiliating, disgusting, and frequently painful and dangerous means of preventing conception. Their endurance and patience is a measure of the horror with which they viewed the difficulties of unregulated parenthood.

#### WOMEN'S RIGHTS AND ANNIE BESANT

In an interesting chapter on contraception and the law Annie Besant is rightly held up as a memorable champion of women. Defending herself with Charles Bradlaugh against a charge of depraving public morals, she spoke for many generations of women: 'Mothers plead with me to save their daughters from the misery they have themselves passed thru.'

Some of the rough-and-ready measures of birth control described in the book were effective, but nevertheless, despite the brutalizing influence of fear and ignorance, the urge for greater humanism in their lives has always moved people to new endeavors. The authors suggest that there is at least one instance in history when all nations and classes have been united in the same cause, and that is to control effectively and safely the fertility of the race by a method that is painless, and the aim has been to find an effective oral contraceptive'.

The chapter dealing with this particular search is the best and most inspiring section in the book. From the Solomon Islands to Europe, from the Cherokee Indians to the Eskimos, from the ancient Greeks to present-day Americans, all types of concoctions have been tried, made from herbs, roots and tree-barks, among many things, and now from hormones to synthetic chemicals. Many of these are described with a fascinating glimpse of the chain of investigations which finally produced the modern triumph known today as the 'oral contraceptive'.

No woman today should have to suffer through the exercise of the natural sexual drive. The more information that is made available, the sooner all women will have within their reach the freedom and dignity to which they are entitled. Governments are engaged with the problems caused by over-population, and cheap and easy birth control has a social significance of great importance, but it is still an individual responsibility and each person must take a share.

This book is not a complete social history of the subject, but by increasing knowledge and doubtless stimulating further interest it serves to promote social welfare and the equally important end of individual human happiness.

#### BIRTH CONTROL VOTE DELAYED IN OAKLAND

Oakland, Calif., March 4, 1964 (LA Times): The Alameda County Board of supervisors held a two-hour hearing Tuesday on a grand jury recommendation for an "aggressive" birth control program among welfare recipients but postponed a vote on the proposal until March 26. Supervisor Robert E. Hannon of Castro Valley strongly opposed such a program. He claimed it is an improper function of government, that it would amount to sponsoring "free-love" clinics and that it hasn't cut down welfare costs where it has been tried elsewhere in California. Hannon is one of four Catholics on the five-member board. The proposal was referred to the board's health, education and welfare committee, headed by Hannon, for  
(Continued on Page 15)

## THE VORTELLA PROJECT

By Egerton Sykes

In the following are given details of one of the most important scientific achievements of the decade, together with a list of ancillary projects now in hand. The first Vortella is now on the point of completion. It stands about ten feet high, has a dozen or more miles of electric wiring in it and represents the culmination of several years work and investment. In it we have the answer to the ever rising cost of jet aircraft with their enormous fuel consumption, as also of the steady increase in the length of runways.

As could be expected such a scientific break through has met with but a cold reception from the pundits, who are unwilling to admit that it is only their ignorance of basic scientific principles which prevented them from inventing it themselves.

Those seriously interested can write to "Vortella" care of the Editorial Offices of PENDULUM, 31 Kings Road, London, S.W.3.

### VORTELLA (A brief summary)

The name of the "Vortella" (a combination of the words "vortex" and "umbrella") has been given by the inventor to the apparatus for lifting and propulsion in the air, and also for the propulsion in the outer space, which is described below.

In the air this is done by producing an air vortex, and consequently a fall of air pressure, in front of the Vortella, and thus giving rise to the force from the normal ambient atmospheric pressure at the opposite side. The secondary, but still very important effect of this vortex, co-axial with the vortella, is the formation of a toroidal vortex. In this the air moves from the front of the Vortella towards the zone of the reduced pressure, due to the centrifugal force, where it is deflected by the latter towards periphery, wherein the air flow turns forward, thus leaving the zone of the centrifugal force and moves there centripetally, as a result of the pressure of ambient atmosphere from the back of the Vortella and from its sides. Thus the air flow about its axis.

So long as the pressure upon the back of the Vortella just balances the weight of the aircraft, and the latter thus remains suspended in the air, the vortex consumes only the power required to cover the losses due to the air friction and its viscosity. When, however, the aircraft moves axially, the toroidal vortex ceases to be self-contained, even theoretically, since it sucks in the air from the front of the Vortella and exhaust it from the back, thus acting partly as a conventional screw propeller, consuming in this way the power required for the propulsion in the proper sense, in addition to the losses.

Like the conventional screw propellers, the Vortellas should be installed in pairs with the opposite senses of the rotation of the vortices, in order to prevent the over-turning effect upon the aircraft.

Much more effectively than by mechanical propellers with appropriate forms of blades, the vortices of the Vortellas can be produced by means of rotating magnetic fields generated by polyphase electric currents, entraining (in accordance with the Lenz law) the air which is ionized (and consequently made a partial conductor) through the action of electric field of high intensity. In principle, this is similar to the action of polyphase current in the ordinary induction motors. The difference will only be in the frequency of polyphase current (of the order of 3000 cycles per second, instead of 50 cycles) and the necessity of the high voltage for the ionization in the case of the Vortellas, which of course, is not required in the induction motor. By this means it should not be difficult to reduce the air pressure in front of the Vortellas by 75% in relation to the atmospheric pressure, which will produce the propelling force of  $7\frac{1}{2}$  tons per sq. mt. Therefore the Vortella propelled aircraft would not require any wings, since the surface of the gondola alone will provide more than sufficient area for pressure.

In its construction, the Vortella can consist of a column of discs, made of glass, perspex, or another suitable insulating material, with copper nets sealed therein, separated by airgaps maintained by appropriate distance pieces. These nets form the H.T. supply terminals of the opposite signs, thus producing this high intensity electric field bringing the air into rotation, and thus producing the air vortex, is generated by a more or less conventional polyphase winding, enveloping the column of the discs at the periphery, with a fairly wide distance between the conductors, so as to leave sufficient space for the air motion. In order to provide a more suitable shape to the vortex, the discs of the column are made of a smaller diameter at the front of the Vortella, increasing gradually towards its back (thus forming a kind of truncated conoid).

The conversion of the electric power in a conventional form, generated in the aircraft, into the form required for the Vortella, can be produced by a set of conventional electronic valves or controlled semi-conductors.

In the outer space, the action of the Vortella will be substantially the same as in the air, but of course, with the reduction of the ambient atmospheric pressure, the pressure of the air will be more and more supplanted by the electrical pressure, and the air vortex by supplanted by the vortex of ions. Since the density will be lower, the required field velocity and the frequency of the current will materially increase. On the other hand, the high voltage for the ionization will be required less and less.

Thus the Vortella can be used for the lifting of the craft vertically from the ground, propelling in any direction in the air as well as for the travelling in the ionized layers and in the outer space.

#### A LIST OF PROJECTS IN THE LABORATORY

1. Control of crystallization and chemical reactions
  - (a) Technological applications, such as desalination of sea water, converting graphite into diamonds, etc.
  - (b) Biological and therapeutics, including experiments on live tissues and also experiments on small animals, and eventually experiments on larger animals, including human beings. This will require a larger version of the present apparatus, a more direct association with the medical research establishment from the very beginning of these experiments and, when it will reach the stage of experiments on larger animals, a complete transferring of these investigations to the appropriate institutions.

2. Vortella (An apparatus for the propulsion of aircraft and spacecraft, including the direct vertical lifting from the ground).
3. Power generator, converting the heat into electric power, without moving machinery.
4. An electric Loom, where the weaving is done by electric forces, without the using of moving mechanisms.
5. Heat Pump, for heating, cooling and ventilating buildings, and also for refrigeration.
6. Variable Speed Electric Transmission Gear. To be used in the automobiles, diesel electric trains, and also in the ship propulsion.
7. Apparatus for the electric power separation and for the smoke abatement.
8. Some spectroscopic investigations relating to the theory of gravitation.
9. A radiotelescope and radar based upon the Whirl Theory of light and matter.

Note: It is proposed, after demonstrating the feasibility of the basic methods of these research projects, to attract the participation of other scientists and institutions, who will carry out further investigation.

All these research projects involve using polyphase alternating currents. The Laboratory is equipped with generators of such current for a wide range of frequencies, from a few cycles to 400 megacycles per second.

#### OAKLAND BIRTH CONTROL VOTE (Cont. from Page 12)

study before the March 26 meeting. The grand jury recommendation was endorsed by officials of the county's Planned Parenthood League, which operates private birth control clinics with financing from volunteer contributions. Dr. Donald Minkler, medical director for the league, maintained that preventing unwanted children from being born is a governmental responsibility. He conceded fear that county-supported birth control will increase immorality is an "honest concern". He contended, however, that such a program would not affect morals nor attempt to deal with the problem of illegitimate births.

#### WITHOUT BEGINNING OR END

". . . If you could realise yourself as being without beginning and without end, then you might commence to do things worth while. It is a wonderful consciousness, that consciousness of eternity. Small troubles seem indeed small to him who things of himself in terms of a million years. . . Do not think of yourself as having lived a million years or a trillion years, but as truly immortal, without beginning or end. The man who knows himself to be rich is richer than the man who says that he has a certain amount of money, be the amount large or small. So rest in the consciousness of eternity and work in the consciousness of eternity. . . "

SOME REASONS WHY RUSSIA MARKED TIME  
ON MORE MANNED SPACE FLIGHTS

A Letter by a Danish BSR Associate,  
Hans Lauritzen, to a Florida Borderlander

Mr. Clarence Van Vredenburg  
Editor-Director SENSITRON SYSTEM OF TF SKILLS, COUNSELING  
Box 1126  
St. Augustine, Florida  
U.S.A.

Esteemed Clarence Van Vredenburg:

Thank you very much for your letter of June 15, 1963. Already in the summer of 1961 I received your letter together with your Sensitron System Manual 2. I did not understand so much of it at that time, but even if I have travelled to new places, I have kept your writings with me, and today I understand better what you mean.

You write: "Stop-thoughts are the common thoughts." Yes, when people have a problem to solve, they are of the opinion that it is necessary to concentrate on it. They concentrate on it by a continuous keeping of their attention on the question or problem. They fear to lose the problem from their mind or attention. They concentrate just like tightening a muscle; by that they lock the problem up, so that they cannot form any thoughts. When finding the solution to a problem, we have to relax the brain; we ourselves just have to wait and see how the brain automatically finds some resolutions. Your system of "Consciousness, Difference, Exposure, and Response" is very good.

You write: "Thought Energy is the control of all other energies." Our universe is filled with so many different forms of energy, that we cannot find a common formula for them. Electromagnetic energy is the control of all physical matter (atoms), and physical matter is emitting electromagnetical energy. Electromagnetic energy is an association of physical matter with infinite mass (electro) and of magnetism with double polarity (kind of kinetic energy). The universal free kinetic energy (a kind of double polarized magnetism) controls all movements of all physical matter, and physical matter is emitting free kinetic energy (both single polarized as magnetism and double polarized as repulsive force).

Thought Energy is not directly associated with matter. Matter cannot directly emit Thought Energy. Many people are of the opinion, that thoughts are the result of different constellations and arrangements of the atoms and molecules in the brain and nothing else. But since telepathy now is officially recognized, or just on the point of being recognized, it must be clear to everybody (as it has been for researchers for years), that a special thought energy must exist. But where should it be placed in our system of energies?

It cannot be placed yet; we know too little about it still. It seems that it is to some extent related to double polarized magnetism. I call this magnetism. Usually this term is not generally accepted as it cannot be measured directly; we can only see

some of the effects such as gravitation, repulsive and attractive forces.

Double polarized magnetism is issued during the orbiting, rotation and pulsation of the particles. When particles receive or absorb double polarized magnetism, they increase their rate of orbiting, rotation and pulsation. The universal free kinetic energy comes from all sides of the universe and goes in all directions; some of it is absorbed when passing through matter or at least its movement is slowed down.

The particles act as transformers, because the kinetic energy is transformed into single and double polarized magnetism. An object near the surface of the earth receives less kinetic energy, because the earth has absorbed a great deal. An object out in space receives more kinetic energy because it comes from all sides, and this object can emit more single and double polarized magnetism. Thought energy seems to act as double polarized magnetism, but as it only can be sent out from intelligent beings, it must, to some extent, be tied up with the life fields of living cells.

#### ORIGINATION

Now we have to put the question: Is the origin of the thought-energy the cosmic free kinetic energy, which has been transformed in the particles of the cells and again transformed by the life fields or maybe only modulated? If so, it is a matter of course that this thought-energy also can have a certain influence on the physical matter, at least the same influence that ordinary double polarized magnetism has. The effect of this double polarized magnetism which has been transformed is rather weak, and as the thought-energy seems to be even weaker, its influence on physical matter is nearly negligible. Therefore it is essential to find out, whether an increase of the influx of cosmic free kinetic energy into the living brain cells will increase the power of thought-energy. Humanity found this out many years ago. The answer was affirmative.

When the distance between a man and the earth is increased, the shielding effect of the earth will be lesser, he will receive more cosmic free kinetic energy, the power of his thought-energy will be stronger, so strong that it has an influence on physical matter. If he fears that the windows in the cabin will break through, they will break through. If he fears that some unknown force will destroy the instruments and the furniture, some unknown force will destroy the instruments and furniture.

This phenomenon happened to the first Russian astronauts, who were lost in space because some unknown force destroyed the cabin and instruments. As you probably know, some radio amateurs caught an emission from a Russian spaceship, where a man said that something strange had come into the cabin; and even if it was invisible, it was destroying the instruments.

Later on the Russians learned, that it was necessary to hypnotize the astronauts, so that they only thought of the things they had to do. The Americans knew this beforehand on account of the experiences with pilot reaction in high altitude. The pilot's thought power increased so much, that his consciousness sometimes extended to where he even had the impression of being outside the cockpit looking to all sides. He was able to see himself inside the cockpit!

So all American astronauts have been hypnotized in order to avoid such things. But if man has to travel farther away from the earth, his brain power will increase correspondingly, and the slightest fear or thought of something unpleasant can destroy himself or the spaceship. It is supposed that even if the astronauts are hypnotized, such things will happen. So the brain of the astronaut has to be continuously controlled,

so that he only thinks and acts as he should..

#### ROBOT ASTRONAUTS?

The only way to do this is to build into his brain small radio sets, which are controlled from earth. Now we have a human robot, who only thinks and acts as the radio set commands him to do. Unfortunately, this is the only way to travel outside the earth to the moon or planets, though maybe in the future we will find something else.

At the congress of the International Astronautical Federation in Paris this summer (1963), United States researchers admitted freely all this but the inhabitants of our planet seem to have understood nothing of it. American scientists will experiment along this line, but the Russian premier, Khrushchev, has said that Russian researchers have given up on this problem.

It has been established that thought-energy has a certain influence on other energy forms; but on the other hand, other energy forms have a certain influence on thought-energy! It is the merit of the present civilisation that it is now able to establish the complex interactions between the many different energy forms.

You write: "Let us stop living by words which make people foreigners to each other. We have an American college which teaches relations of words to facts, and student I.Q. there has risen 15%." I agree with you. The present way of communication by words is certainly not the highest way of communication for a higher intelligence. I do not mean that words are superfluous; we will always be in need of them for common expression in the daily life. But when we have to pass on complex scientific information, we cannot make other persons understand what we exactly mean. . . Because words are always subjective and not objective as many people think. . . Behind nearly every word we will find hidden a subjective understanding, and not only this, but many words have in themselves a strong expression of subjectivity, something artificially created without any relation to nature.

We have to develop a geometry and trigonometry of complex symbols containing the description of scientific development, so that man's subconscious will not be clouded with misunderstanding, as is the case with words. The symbol way of expression will pass information over to the subconscious. In that way his whole intelligence will concentrate on the higher wisdom in the symbol, giving the same reaction from individual to individual.

You mention our Danish Doctor of Philosophy, Poul Goos. I have read several of his books, for instance "Hinsides ver verden", which is built on "New Worlds Beyond The Atom" by Langston Day. Last year I visited Poul Goos and got a test in his laboratory, after which I bought a DelaWarr apparatus, Mark VIII. Unfortunately I have had lesser time at my disposal, so I have not reached far in personal examinations.

Sincerely, Hans Lauritzen, Hojdegradet 30,  
Valby-Copenhagen, Denmark

## MAN, THE BIO-MAGNETIC ANIMAL

By Joseph F. Goodavage  
From "Fate" July 1964

A New York City gynecologist and cytologist, Dr. K. E. MacLean, is the first M.D. to use an electromagnetic activator in the treatment of advanced cases of cancer. So far, although he has confined his treatment strictly to those cases which are considered "hopeless," the results have been remarkable.

"Cancer cannot exist," MacLean claims, "in a strong magnetic field." The interesting side-effect of repeated exposures to magnetism, on human beings aside from its beneficial effect as a cancer treatment, is the restoration of pigmentation in the hair of many of his patients — in most cases from a silvery white to its former natural color.

Dr. MacLean's full head of hair is dark brown; he has been exposing himself to a 3600 Gauss magnetic field daily for about five years. He is tall and athletic-appearing and looks to be about 45 years old. He is 64.

His discovery could revolutionize the present concept of the aging process. For the first time, Einstein's energy-mass equation has been applied to the practice of medicine. MacLean's application of a magnetic field seems to relieve pain from any cause and to help speed the human organism's return to normalcy. He has shown it to be equally effective in treating most kinds of arthritis, rheumatism and bursitis. After five years he has not discovered a single adverse side-effect from exposure to a straight-line magnetic field.

There is evidence, however, that when the human organism is exposed to two lines of powerful magnetic force intersecting at right angles, the effect can be disastrous.

Physicists and electrical engineers discovered this remarkable fact during experiments with intense magnetic fields used to energize particles in an early atomic experiment at Holyoke, Mass. According to unconfirmed reports, several technicians died as a result of exposure to two lines of magnetic force which were set up in X-cross fashion.

### BICMAGNETIC INFLUENCE ON LIFE

From "Pendulum" June 1964: In December 1963 we sponsored Gail Woodham, 1703 Holly Oaks Lake Road West, Jacksonville, Fla., in a "Science Project", showing the effects of a common magnet on a family of white mice. Dr. Gordon of Orlando, manufacturer of Electromagnetic instruments, Dr. Rowland of the Rowland Laboratories, and myself. I prepared the basic findings and tests outlines. We together assisted Gail, whose father built the necessary equipment, and assisted Gail with this very technical project, was very proud of Gail when in the 900 entries in The Science Project, Gail's "Magnetic Effects on Life" Project came in with third prize and Honors. Prior to The Duval project, the Chairman of The Duval County Board of Public Instruction Committee of Judges wrote to me asking that I serve with the other Doctors and Professors on a Committee of Judges. I declined as I could not, I felt, as a sponsor of one of the larger projects. It would not have been right for me to be in a position of Judge, in all fairness to the other Students' Project Entries. Dr. Gordon brought a complete short motion picture here and presented a showing for Gail of how the magnet effects animals, and how it can be used in treatments. Dr. Gordon is now in charge of a program for

retarded children, and is using the Electromagnetic Treatment program to help them. Mrs. Jacqueline Kennedy, President Kennedy's fine wife, is interested in this project also. As you know the late President's early child suffered from a similar complaint. The project showed that in the south pole field of a magnet the mice were sloppy, fat, untidy and careless, and contracted complaints. In the north field they repaired the complaints, were sharp, sensitive, well mannered, careful of their young and quick to learn. This may in some respects show the effects of the magnetic forces on people, and what is to be found in outer space in the space probing by man.

#### "VITIC", THE PHYSIOLOGICAL EFFECTS OF CARBON AND MAGNET

The helpful affects of magnets and magnetic fields was one of Meade Layne's earliest concerns in the borderland field. His first article on it was in Round Robin, Vol. 1, No. 3. This was later incorporated into a brochure with other material on this fascinating therapeutic subject, and with significant observations by the Inner Circle, in a BSRA brochure titled "Vitic". This is now BSRA No. 11 in our publication list and sells for 50¢. Meade learned about Vitic in reading Brian Brown's "The Dynamic Power of the Inner Mind", Doubleday, Page, N.Y., 1924, and Brown in turn picked up most of his information from A.E. Baines' "The Origin and Problem of Life", published in 1921 in London by Routledge & Sons and in New York by E.P. Dutton.

Baines was concerned with the aging process in man and especially "the gradual failure of generation of nerve force". He was an Egyptologist, too, and often visited that section of the British Museum.

"In the bygone days of Egypt's greatness," Baines writes, "scientific attainment was confined, or almost confined, to the priestly communities, and they kept it from the outer and unlearned world under the veil of an elaborate symbolism. Even then it appears likely that the search for the Elixir of Life had begun. . . When, therefore, I noticed that a statue of one of the priests was shown holding a cylinder in each hand, my curiosity was aroused and I determined upon investigation. That the reigning Pharaoh was similarly equipped merely suggested reasonable concession on the part of the priesthood, and in no way negated the supposition that the cylinders or short rods had some purpose or function of an important nature. . . Diligent enquiry of the authorities at the Museum elicited the astonishing fact that nothing was known of the purpose or meaning of the rods. . . Years of experiment followed. . . finally it was found, by accident, in carbon. Hard carbon such as is used in arc lamps will give out a certain amount of force which, experience has taught us, is not to be distinguished from nerve force. But if the carbon is treated in such a manner as to cause a violent disturbance of its molecules and then specially hardened, the force evolved by it is greatly augmented, and the rod becomes a real source of power, a power that is so readily absorbed and stored by the unipolar ganglion cells that a five-minutes charge remains effective for at least twelve hours. . .

"In an article in 'The Practitioner', in June 1914, Dr. J. Horne Wilson wrote of this discovery of mine: 'In this connection (nerve deafness), I may mention that a rod of carbon, which has its molecular condition altered in a similar way to that of iron when it is converted into

a magnet, has a most remarkable effect on the body deflections. If held in the right hand it produces an off-scale positive deflection, and an off-scale negative if held in the left hand. If held in contact with the right side of the body for five or ten minutes, it makes the hand-to-hand deflections strongly positive, and has exactly the opposite effect if held on the left side of the body. What this force is I do not at present pretend to say, but it has a marked influence on the electrical condition of the body, though no direct influence upon the terminals of the galvanometer. It evidently charges the body with a force akin to nerve energy, as it is retained for a much longer period than electricity is.

#### BOTH STIMULANT AND SEDATIVE, THE CARBON ROD

"In another article, in 'The Medical Times' of July 25, 1914, the same author wrote: 'This form of energy will raise the nerve currents to normal. The rod held in the right hand acts as a stimulant without any depressing after-effect, and in the left hand as a sedative. Under its stimulating influence the nervous system is generally benefited; mental fatigue rapidly disappears, and morbid conditions such as neurasthenia, insomnia and feeble action of the heart readily yield to it.

"The second cylinder shown in the left hand of An-Kheft-Ka was probably of minor importance and was not of the nature of carbon, as that would have neutralized the charge. It was, I have little doubt, fashioned from a piece of magnetic iron ore. Magnetism applied to the left side of the body stimulates the heart action, but only so long as the body remains within the magnetic field. The properties of magnetic iron ore -- and perhaps these properties -- were known to the Chinese in olden times, and also to the earlier Greeks who, as likely as not, gained their knowledge from the Egyptians. If two rods are held, the carbon in the right hand and the permanent magnet in the left, the effect is accentuated; but while the charge imparted by the carbon endures for some twelve hours, that exerted by the magnet ceases to be operative upon relinquishment."

Included in the Vitic brochure are two interviews with members of the Inner Circle, through Mark Probert, in 1949. The Yada di Shi'ite affirmed that both carbon and magnet should be used, one in each hand, to complete the circuit, but his approval of its use was qualified: "To many this use of the carbon-magnetic mixture is good; to others it is not good -- because you are attracting to your body metallic vibrations. . . Some find it highly poisonous to the system; to others it is rejuvenating."

At another seance the Control was asked if carbon alone was effective? "No, because then you have only the negative energy. For some people it is not good, for the carbon emanation gets into the system and acts as a stimulant too high for them, and prevents their sleeping." He was also concerned about some people holding the carbon in the left hand because of "too strong a drawing on the heart".

"The magnet is the acting force upon the cells of the body," the

Control continued, "and it attracts the carbon. There is an emanation surrounding the carbon. As long as you do not enter into the magnetic field the carbon emanation has affect; but when you do come into that field, the emanation has a strong pull; the magnet pulls the emanation into the body. If you are holding an electric wire and have no ground, it does not make a complete circuit; so, the carbon is the 'ground' for the magnetic current."

"Then there is such a thing as a magnetic current?"

"Yes, there is a magnetic current, not electric. Your original current once came about through what I call static electricity. . . "

#### FROM COUNT WALEWSKI'S "CAUCASIAN YOGA"

Associate Margaret Meehan kindly furnished us with these appropriate and significant quotes from the Count's rare manuscript. She was moved to offer this to us after lecturer and Associate Heather Buckley brought an improved version of a magnetic converter to the Science Fair at the Harmony Grove Labor Day Convention. More about that later. Right now let's see what Count Walewski has to say about Vitic.

"IX L ARCANES. Recharging nervous energy. A way used in ancient Egypt for strengthening of currents of energy within the body. It was shown in the figures, using the second Master Arcane exercise. Two rods clasped in the hands of standing figures, were the grips of tremendous power, akin to electricity (secondary electricity), which when the grips were held in the hand released this energy into the body, to be stored in unipolar ganglia, and spinal fluid, raising the potential of energy 100%, and lasting for a day and a night, 24 hours.

"The rods were two in number and of different compositions. One generally to be used in the right, another in the left hand. One having the power of the Sun, another the power of the Moon.

"The Sun rod of Power is composed of hard coal (carbon) specially hardened, in which the structure of the molecules is changed the way the molecules of iron are changed when converting iron into magness. (To convert iron into magness, the structure of iron molecules is changed by re-crystallization process, hardening, then it will retain the magnetism.) The process of hardening is heating to high temperature and then instantly cooling by submerging in water. (The rods of hard coal prepared for the electric arc lamps are excelent as Sun rods of Power.)

"The hardened rod of coal can be inserted in a copper tube, with both ends open or closed. (Length of rod six inches, diameter one inch or according to the grip of the hand.)

"The Moon rod of Power is composed of hard lode stone, or pressed lode stone, (it may also be a rod of magnetized hard iron or steel -- magness. The Moon rod of Power can be inserted in a zinc or tin tube with both ends open or closed. (Length and diameter same as Sun rod.) The Moon grip or rod works as a kind of catalyst, to bring the Sun grip or rod into more powerful action.

## THE POWER OF AURICHALCUM

"Grips and rods of power were known and used in the most remote times," continues Walewski, "and secrets of preparation of them were known to few initiates. The mysterious metal (bronze) auricalcum has tremendous power, and is composed of five metals, each having a definite color, white, black, red, blue and yellow. It is radioactive, and in it hides the mystery of immaculate conception. Proportion of the metals is even. Then comes electron, composed of gold and silver, (40% gold and 60% silver), then a combination of silver 75% and zinc 25%; combination of copper and zinc, and also copper and tin. (Many combinations of bronze you can make figuring out planets and their relations and properties. Sun, gold; Moon, silver; Saturn, lead; Jupiter, tin; Mars, iron; Venus, copper; Mercury, mercury. Also minerals, coal, lodestone, beryl, amber, tourmaline, rock crystal, hematite, etc. (Here text contains drawing of two figures using rods, one figure is standing with a rod in each hand, one is sitting in the Egyptian meditation position, on a chair, back erect, feet flat on floor, hands on knees, with rods on knees. MM) The Egyptian master system postures for recharging the nervous energy, one should be relaxed and following the direction of the Sun. Objects shaped in different symbolic forms are also used throughout the world, like Babylonian maies (iron with silver inlay, with horned human head and head of the bull). In Tibet is used dorgee, etc."

This is from the first and probably only edition of Count Walewski's "A System of Caucasian Yoga", Library of Congress Catalogue No. 55-11356, Copyright 1955 by The Falcon's Wing Press, Indian Halls, Colorado, all rights reserved. The 127 page book is a facsimile reproduction of the Count's handwritten manuscript, with over 150 diagrams and illustrations by the author.

The editor's preface states: "Count Stefan Colonna Walewski's outer life was that of a well-known collector and dealer in oriental art and antiquities and in anthropological curios. His shop, Esoterica, was not only a famous New York connoisseurs' landmark but the gateway of another world, in which magick, demons and talismans were as real as subways and neon signs. The Count firmly believed that he attracted these strange objects to him by a sort of higher magnetism of which he knew the workings; and his unrivalled collection seemed to prove his point.

"Few knew, however, that behind Count Walewski's constant kindnesses to his fellow man and his expert knowledge -- the two main facets of his external life -- there lay an intense inner life and search for life's most hidden secrets. Few knew that before the 1920s, in the Caucasus mountains (between the Black and Caspian seas, on the border between Turkey and Russia) he had been vouchsafed some of those secrets by two initiates of a rarely encountered secret society, which combined indigenous doctrines and those of yoga with teachings stemming from a mystical tradition of ancient Zoroastrianism. Walewski never saw his teachers again, and he himself assumed no personal credit for their teachings, which were merely handed on to him under oath not to reveal the source. Their instructions, received in Persian and Russian, were

transcribed in a manuscript notebook from his own notes by the Count, when he later arrived in America, coming first with a Polish diplomatic commission. The English of the transcription is halting and the orthography often incorrect as Count Walewski possessed but an imperfect knowledge of English at that time.

"However, we have considered it best to give the reader the manuscript in facsimile rather than any 'improvement' on it, which will destroy or at least vitiate its unique character. There was all the more reason so to present the work when, shortly after releasing it for publication and disposing of the manuscript to a private collector, Count Walewski passed on, leaving no one who could possibly answer all the enigmas connected with the system of development discussed in it. Neither the publisher or editor can assume any responsibility for the views hereinafter expressed nor necessarily endorse them. They are presented solely as shedding light on a little known island of ancient views preserved in the border regions between East and West and as a documentary contribution to a special field of religio-magical literature.

"The following pages are exact reproductions of the Walewski manuscript on Caucasian yoga and secret doctrine -- teachings the very existence of which was not known at large to either Europe or America. There is now less chance than ever of their even continuing to exist, as the parasitic fungus-like growth of Lenin's anti-democratic, Communist counter-revolution seeks to destroy all spiritual or religious thought within its borders. Hence the recording of these ideas, techniques, and teachings in permanent form can at least serve to prevent utter destruction and oblivion for a little-known island of human thought and investigation.

"It is worth while to feel that the Count's patient collecting and recording of rare information was not for naught, and that in these pages we also possess a tribute to a man not merely skilled in his unusual field of specialization, but a man who had a good word for all his fellows and revealed to those who were fortunate enough to know him well, a great heart."

C.A. Muses  
Colorado, 1955

#### SET YOUR MIND AT REST

The Walewskis, the Blavatskys, the Edgar Cayces, the Max Heindels come and go but the Mysteries go on forever. Each generation of mankind can and must create its own versions of the Mysteries of existence suited to its needs. These precious documents -- and the Mysteries are priceless -- serve their purpose among the Teacher's followers and then are hoarded away or gather dust in private libraries. Regret them not when they are lost. This crystallized wisdom has little inspiration for succeeding generations. The Secret Doctrine must be continually updated; always remember that yesterday's magic is today's science! What was lost in the Caucasus mountains in the Russian revolution of 1917 is alive today in America. From the Inner Planes Walewski's initiate teachers are free to inspire their students of another day, now incarnated in American bodies in 1964! And who is going to stop them?

## THE EVER-PRESENT "INNER CIRCLE"

Our own Guides, Initiates, Adepts, Guardian Angels -- whatever you choose to call them -- can and will load us down with all the occult information we are capable of handling, and more! Open the door and the flood of Light overwhelms you. This Vitic information and the device for concentrating it in the body are a perfect example of such guidance.

It was no accident that Heather Buckley was moved to bring her borderland gadget to the Labor Day Convention. It wasn't just coincidence that Margaret Meehan told me there of her precious Walewski "manuscript" and offered to copy out the significant portions relating to Vitic and send them to your editor for inclusion in this Journal. Heather told us that details for the magnetic converter or charger came through a medium in the Pomona area, and that it was originally designed by Dr. Anton Mesmer, who held clinics in Vienna and Paris and published his first work on the effects of magnets on living organisms in 1766! However, the information through the Pomona medium did not include the use of the carbon or Sun rod to complete the circuit; for this we can thank Meade Layne and the Inner Circle.

### VITIC

## HOW TO MAKE THE "VITIC" DEVICE

The drawing on the preceding page is pretty much self-explanatory to the handyman. Your director put one together out of scrap parts in a couple of hours. The Sun Rod of hard carbon is not shown in the drawing as this is separate, though I found it handy to make a wooden trough across the front end of the wooden base to hold the carbon when not in use. Then the unit is all together.

If you have any ideas about obtaining 3600 gauss magnets for this device, better forget 'em for the time being. We priced a 3600 gauss Alnico magnet at a Los Angeles magnet company. It was over \$500! The Mesmer design suggests that the magnets be strong enough to pick up at least  $2\frac{1}{2}$  lbs. We settled on a pair that cost wholesale about \$9 each.

It may be that Alnico is the modern version of the ancient Aurichalcum -- or blend of metals suggested in the Walewski manuscript. Alnico is made up of certain combinations of Aluminum, Nickel and Cobalt. These metals by themselves are non-magnetic, but just before World War II some genius discovered that these three metals, mixed together in powdered form, could be highly magnetized while in a molten state! And the magnetic field is permanent; it doesn't lose strength as does an ordinary iron bar or horseshoe magnet. This is why we recommend using Alnico magnets in our Vitic and they are the most expensive item.

Graphite is a harder form of carbon and may be more efficient than carbon in this specific application of building up a quick charge of "mana" or vitality in the body. Welding shops have carbon and graphite rods, also motion picture supply houses -- the carbon arc rods for the projection machines. An inch in diameter, or  $\frac{3}{4}$  in., about six inches long is a good hand size.

Remember, this is borderland research and no standards or significant body of data has been established yet. You are on your own, just as with the Multi-Wave Oscillator of Lakhovsky. The best part about Vitic, though, is that it produces no interference with radio, TV or other electronic equipment. This is a higher or different order of energy, electronic in nature but impossible to capture and measure with standard equipment.

We used pine boards for our base and stand, and chose Alnico magnets with holes drilled or cast at the top of the curve, as shown in the drawing. This made it easy to mount the magnets and it also allows them to be swiveled around to any setting for experimental purposes. The distance between the magnets and the wire loop around the Moon rod are all speculative. We know these approximations are good enough for a beginning because the dozens of people tried on it so far have almost without exception felt an increase in nerve energy within a minute or two.

Mesmer's design called for a perfect circle of bare copper wire, #12 gauge or larger, with a quarter inch gap at the top. My immediate reaction to this was an attempt to produce a one-loop coil, similar to the Lakhovsky belt, and for the same purpose, to set up oscillations in

the magnetic field. The need for oscillating or pulsed current in body chemistry was established 40 years ago by Dr. Abrams. So we use heavy insulated copper wire and overlap it about an inch, thus creating a true coil. It doesn't really matter if the wire is steel or copper, bare or insulated, but if the ends touch and are uninsulated, this shorts out the coil and makes it useless.

#### THE MOON ROD

Walewski's instructions call for an iron rod covered with copper. This combination isn't likely to be commercial available, at least it wasn't at the steel supply companies in Los Angeles. They suggested having steel rod copper plated, which doesn't come cheap. 3/4 in. cold-rolled steel rod can be purchased at machine shops and hardware stores, also copper tubing large enough to slide the rod in. Another way is to paint the steel rod with a couple of coats of copper or bronze paint. This is what I've done. Mesmer also suggested copper-covered iron rod.

#### HOW TO USE "VITIC"

Individual human needs are so different and varied that no predictions or authoritative instructions as to most affective use can be given. Some people are in such a condition or are so sensitive to this magnetic-carbon energy that they react to it as soon as they are in circuit. At the Labor Day convention one woman was on crutches because of a leg injury from an automobile accident. Her right knee was in pain. She told us that as soon as she put her hand on the Moon Rod of Heather Buckley's gadget, the pain in her knee disappeared. The pain returned soon after she took her hand off. Heather didn't have the Sun Rod of carbon to complete the circuit, even, or it probably would have been more effective.

It is most likely that you should sit or lay in as relaxed a condition as possible while in circuit. If nothing else, you'll be more aware of the subtle energy as it flows in through your hands and wrists. Sit comfortably on a sofa with the magnet stand close beside you so one hand can rest comfortably on the Moon Rod. Let the other hand lay on your lap or thigh with the Sun Rod held loosely -- so there is as little tension as possible. Take your mind off of what you are doing by watching TV, talking to friends or reading. If you were tired before getting in circuit, after a few moments you'll realize that much of the tiredness seems magically gone. This has been my experience and that of others. So Vitic does seem to be a ready, potent and inexhaustible source of vitality or mana.

This nerve energy derived from magnet and carbon seems to be a balancing force. A BSRAssociate with years of experience in radionics built one of these Vitics and experimented on friends. He took readings on them and discovered various chronic conditions. To his surprise, when he put each subject in circuit with Vitic the condition seemingly disappeared! At least he could get no resistance to his finger on the rubbing plate. This meant a zero or neutral reading for that condition at that time: And another thing, if you experiment with this before going to bed, don't be surprised if you get so charged up with vitality you can't sleep. That was our experience the first few nights.

## METER READINGS ON "VITIC"

Our first opportunity to make some measurement of the effects of Vitic occurred at our BSRA Workshop in Los Angeles, Oct. 2, 1964 at the Hermetic Science Center, 138 N Manhattan Place. Mrs. Eleanore Person had been given a Mathison Electro-Psychometer, a highly sensitive galvanometer which registers minute voltage changes in the human body. We had no way of measuring the magnetic output of the Vitic device but We should be able to show a difference -- before and after -- with this.

I set the instrument on the "B" Scale and took a reading on each person as they came into our Faraday Cage Workshop. Then each was put in circuit with Vitic and another reading taken. Of the 14 measured or tested, eight showed a change on the Falling scale and six showed a change on the Rising scale. The first figure after the name is the "Before Charge" reading; the second is the "After Charge" with Vitic:

FALLING	BC	AC	RISING	BC	AC
Agnes Underwood	2.01	2.00	Florance Verrico	2.45	2.58
Eleanore Person	2.50	2.20	Jack Waer	2.00	2.16
Riley Crabb	2.32	2.10	Rose Lundquist	2.10	2.20
Lydia Howard	2.05	2.01	Bertha Sale	2.40	2.69
Rene Person	2.375	2.30	Oliver Howard	2.03	2.05
Reio Nagel	2.30	2.20	J. Berlanga	2.075	2.15
Mr. Jonasson	2.50	2.20			
Mrs. Jonasson	2.325	2.19			

The fact that Dr. J. Horne Wilson, in his experiments with carbon in 1914, got right or left readings which went off-scale, indicates that he was using a much more sensitive instrument than we were. Our tests that Friday night did seem to verify Dr. Wilson's report of 50 years ago and the Psychometer readings tend to support what almost everyone reported, that they felt some physical reaction after being put in circuit with Vitic.

We hope that many of the Associates will take up this new borderland research tool with enthusiasm and start testing themselves and those of their friends who are willing to be "guinea pigs" in the search for Truth in this area. Reports will be published in the Journal. Heather Buckley has promised us a transcript of the Seance where Dr. Anton Mesmer came through to describe his device. This will be in the November-December Journal.

For those of you who want to take part in this Vitic project, and who cannot spare the time and trouble to locate the necessary parts, we'll assemble them all in kit form for you, post and tax paid for \$30.00. This will include the three pieces of the wooden stand, the Lakhovsky circuit, the necessary nails and bolts, a steel Moon Rod, a carbon Sun Rod, and a pair of horseshoe Alnico magnets of the necessary strength, and also a copy of the diagram on page 25 to guide you in assembling it.

Just keep us posted on the results of your experiments.

# CLIPS, QUOTES & COMMENTS

---

## HE PREFERS VITIC TO MWO

"Personally, while feeling the passage of the high tension flow from the antenna of the Multi-Wave Oscillator, I found no beneficial effect. On the other hand, the Associate with whom I obtained the MWO realized definite improvement. He has kept up the use and told me lately that he is feeling steadily better and lays the improvement to the use of the outfit. Some years ago I had frequent conferences (thru a medium) with one who was said to be Madame Blavatsky. During the course of these talks she dismissed the subject of electricity as of little value in comparison with a study of magnetism. That in the study of magnetism lay the secrets of many valuable matters. I am led to refer to this because I recently obtained relief, and apparent cure, from a troublesome irritability of the bladder by the use of a magnet. Other treatments had been of no value. I made no report of this until the fact was definite. The use of the magnet was experimental and came from the suggestions of a Chicago University specialist in the subject, relayed to me via various Biomagnetic reports and some correspondence.

Associate A.N. Onymous  
Dixie, U.S.A.

This letter from an elderly Associate was dated Sept. 3, 1964. It certainly provides an interesting and stimulating commentary on the material in the preceding pages of the Journal. Interestingly enough, we've had many reports of successful and continued relief of irritating bladder and prostate conditions from exposure to the MWO. In the Vitic device we now have a borderland gadget that is far less troublesome to build and to operate. How effective it is remains to be proven.

## ANSWERS FOR AN ANXIOUS ASKER

- "1. Are the seances of Mark Probert still being held and would it be possible for me to have his address?"
2. The Inner Circle was to have written a book, The Rise and Fall of Man. Has this book been written; what is the title and how much does it sell for?"
3. Mr. Crabb states that in 1960 he made contact with the Inner Circle and I would like to know if he still has this contact and what are the latest teachings?"
4. We have just heard that a new sun is forming in our Galaxy. Have you any information on this?"

Garda Sieg  
Ft Lauderdale, Florida

1. Yes, Mark and Irene Probert are still holding public seances every Friday night when they are home, at the same apartment address, 931 - 26th St., San Diego, California. They also hold private seances

on request and for a reasonable fee. If you can't be present in San Diego for such, your written questions can be read by Irene and answered by the Inner Circle through Mark, and the whole seance recorded on tape and sent to you. Write to them directly about details as everything is now handled by them through their Kethra E Da foundation.

2. Yes, the book was written and issued in two parts in 1950 under the title of "The Magic Bag" in mimeographed form. Last year Mark and Irene finally succeeded in having it reissued, in one printed book, with hard covers and containing black and white copies of Mark's color paintings of most, if not all, of the 16 members of the Inner Circle. This sells for \$7.50 a copy. Order the book from Mark and Irene Probert. BSRA does not handle it.

3. Yes, I believe the Inner Circle was and still is the Power behind BSRA, and that individual members of this Circle can be contacted by visualizing them and by calling their names. I believe it is their job to respond to such calls because they have said so many times. How much or how little can be communicated to you or to anyone is a matter of individual sensitivity and preparation. With the help of other Associates we have succeeded in transcribing the 1960 notes referred to and now have them mimeographed as a BSRA brochure, available to anyone who wishes to review our efforts and to judge for themselves whether genuine contact was made. We decided to call it "An Attempt at Cosmic Mediumship". This latter term is used by Dion Fortune to describe an active, fully conscious blending of minds, as against the passive, trance condition of physical unconsciousness of the medium. This new BSRA brochure is 42 pages, including introduction, and sells for a dollar.

4. Yes, in the early Probert seance material, the Yada di Shi'ite and other members of the Inner Circle did occasionally refer to the coming great change in our Solar system, that it would become a Supernova, a blazing, brilliant star in the Milky Way galaxy. This would be a Cosmic initiation for the Being who created our little system of planets. But how soon this would be in terms of our earthly time the Yada would not venture to guess. My own hunch is that it is hundreds of years in the future.

#### THE SUN TAKES A MATE

More detail on what actually may be in store for us during the Great Change of our Solar system can be found in Dino Kraspedon's "My Contact With Flying Saucers". On page 52 in the Chapter "God, Matter and Energy" the Visitor gives an interesting glimpse of magnetic attraction and repulsion at the Cosmic level:

"The new Sun is a body of monstrous proportions which will shortly become visible in the direction of Cancer. It will not, however, emit any light as the light of a Sun only becomes intense when it enters into a secondary magnetic field such as our solar system. It deforms space around itself, and generates currents which give rise to its brilliance. If it were luminous beforehand, its light would set up a force of repulsion, and it would be deflected from its path. With no luminosity it becomes subject to the pressure of our Sun, but its own momentum will

ensure that it enters our system. It will first be seen as a reddish light, later turning blue." After reaching the area of the large planetary bodies, it will encounter the repulsive force of the Sun, but in its rear it will then have the weight of large bodies, also imparting a force of repulsion to it in the opposite direction. The force of the repulsion of the planets behind it, the light it gives off and its great mass will cause the present Sun to move farther away from the magnetic center of our system. Then the two Suns will settle down in their new orbits, the one of greater mass and lesser light being nearer the center.

#### WE'LL BE MOVING OUT!

"The two Suns in the solar system will create difficult problems. The orbits of all the planets will be changed. Mercury will move into the area between the present orbits of Venus and the Earth. Venus will move out to a position between the present orbit of Earth and Mars. The Earth will feel the effect before the new Sun settles down in its definitive orbit. As the luminosity of this body increases, the pressure of this light will cause the Moon to move out of its orbit, and it will settle in a position that will turn it into a planet. With this displacement it will take with it part of the etheric mass of the Earth, which will impart to it a stabilised movement. (In "Secret Doctrine", H.P. Blavatsky says that the Earth and the Moon now share one Etheric Double. RC) The Earth, in turn, under the pressure of the twin Suns, will move out into the area now occupied by the planetoids (between Mars and Jupiter. RC). In short, there will be a general displacement of all the bodies belonging to our system. Pluto will be ejected from the system, and will wander through space until it finds some new haven."

#### A SHOWER OF ROCKS

We may pick up a new moon, one of Mars' satellites, says Kraspedon's Teacher; but if it comes in against the rotation of the earth it will shatter against our protective Etheric shell and shower Europe, North Africa, Asia Minor, southern North America and northern South America with 50 lb. rocks "which will lay waste these areas. After that, everything will become normal again and we shall have a new sky in which to travel, and you will have a new Earth."

"When will this take place," asked Kraspedon, "in the distant future?"

"It will be very soon, toward the end of this century. . . Many people will vanish forever from the face of the Earth but a small community, obedient to the laws of God, will remain, and present suffering will cease. There will be peace and abundance, justice and compassion. . . The Sun which is to come will be called the Sun of Justice. . ."

Cataclysmic changes in the solar system and between the planets prophesied above may have taken place more often in the past than orthodox science is ready or willing to admit. Immanuel Velikovsky's scholarly and awe-inspiring "Worlds In Collision" was published in 1950 and elicited enthusiastic and favorable comment from the Inner Circle when Meade Layne mentioned it. Apparently the Mayans went underground to save themselves from such an end. All this is covered in the latest BSRA Seance brochure, 10-K, 1950 Series, now ready for release.

## IN MEMORIAM

We had been looking forward to a visit with Regional Director Wm. S. Dugan and his family, from Galveston, Texas, during the Labor Day Convention at Harmony Grove. On their way west Wednesday, Aug. 26th their Cadillac left the road near Lordsburg, New Mexico and rolled over three times. Bonnie Jean, 6, was killed instantly. Mrs. Iris Dugan was in coma over 30 hours before passing on. The other daughters, Darrell Lynn, 18, and Iris, 16, were pretty badly battered but are recovering rapidly, and Bill suffered a broken collarbone and bruises. A memorial wreath from BSRA and the Board of Directors was despatched for the burial services in Galveston, Sept. 1st, attended by over 300 relatives and friends.

The value of our philosophy is amply demonstrated in times of shock and loss like these, where feelings of grief and anguish are balanced by knowledge of the irresistible rhythms which drive us in and out of the flesh, beyond that comforting assurance that we are not alone on either side of the Veil! The family had attended many a seance at Mark Probert's apartment in San Diego, and had entertained the Proberts at their home in Galveston. The Dugans were well acquainted with the Inner Circle and Bill and the girls look forward to contact with their mother and Bonnie in the near future. Following is the prayer that sustained him in the pain-filled hours in Hidalgo Hospital, Lordsburg.

"Oh, God, Great Creator of the Universe, thank You for all our  
Many blessings, keeping the ones we need and sending  
The rest on their way.

Bless in love all our loved ones and more especially Iris Patience  
And Bonnie Jean who we love so dearly. May they progress and  
Have everlasting Light. Bless them in love forevermore.

Let the Great Light shine on all of us on both sides of the plane,  
Guiding our every desire and every act, revealing to us the  
Way our feet should travel, and the pattern our lives assume.

Bless us all in love and may the God-power pour down upon us  
As we sit and know that we are a part of God.

Bless you in love, oh Great Power of the Universe. Bless in  
Love all Angels, Arch-Angels, Spirits and departed ones everywhere.  
Our blessing in love goes out to everyone.

Amen.

## REPORT ON THE LABOR DAY CONVENTION

We had a grand time meeting again with Associates and fellow borderlanders at the Grove and most of the credit for a variety program of good speakers and lecture-demonstrations goes to our co-chairman, and Vice-president, Florance Verrico. Many of these are on tape and we hope to get a list of recordings and subjects drawn up and published in the near future. Transcribing them and cutting stencils for publication is another matter, requiring time and help we do not have at present. Attendance at the Labor Day gathering was off considerably

and expenses were higher, so we went in the hole almost \$80 on this one.

INCOME: Donations	\$488.91	EXPENSES: Harmony Grove	
Memberships,		40% of donatinnns	\$195.54
& sale of lit.	<u>80.50</u>	Honorariums	300.00
	\$569.41	Food, transp., printing,	
		lecture tapes,	<u>153.09</u>
			\$648.63

Anyhow, it was fun; we won new friends, and influenced some people. There are no plans for any further BSRA meetings at Harmony Grove this year. Nothing has been decided for 1965 either as there has been a conservative reaction to our progressive program by the older members of the Harmony Grove Spiritualist Association. In view of this it might be well for us to change our program to fit the changing times and travel more in 1965. We have standing invitations from several parts of the country, to go there and meet with Associates and fellow borderlanders who find it inconvenient or impossible to come to Southern California.

#### UNDERSTANDORAMA AT HARMONY GROVE IN NOVEMBER

Our friend and Associate, Bob Crichton, is planning another Understandorama at Harmony Grove for the weekend of Nov. 14-15, 1964, with a full program of New Age speakers. These include Flying Saucer contactee Maria Graciette Elliot, the authority on Zoraster and Sanscrit wisdom Dr. Bode, Gayne Meyers, and Col. Arthur J. Burks, also Hal Wilcox and Dr. Nelson Decker.

By the way, Col. Burks' newest book on metaphysics and philosophy is just off the presses of the K Publishing Company, Parkside Station, PO Box 16247, San Francisco, California, beautifully written, beautifully printed, 172 pages, \$5.00 a copy. Order from the Colonel or from the K Publishing Company.

#### "COLOR AND MUSIC IN THE NEW AGE"

Speaking of books, the latest from the pen of Corinne Heline on the correlation of sound and color is out, \$2.50 a copy, soft covers, 117 pages, New Age Press, Inc., 1544 Cerro Gordo St., Los Angeles 25. In Part I Mrs. Heline gives the Astrological Correlations between colors and the Signs of the Zodiac; Part II is concerned with the Mystery of White and Black; Part III tells of New Age developments in Color Therapy, Color Psychology and Color Music; Part IV suggests color-music for the Four Sacred Seasons and their climaxes: The Spring Equinox, the Summer Solstice, the Autumn Equinox and the Winter Solstice, with appropriate compositions of Handel, Wagner, Mendelssohn, Bach and Schubert for each. Part V deals with "Nature's Inner Plane Ceremonials" and Part VI with the reactions of certain Sensitives to Wagner's "Die Valkyrie".

#### "BORDERLINE, THE MAGAZINE WHICH DARES THE UNKNOWN"

At long last Southern California has a legitimate magazine which, I hope, will pre-empt some of the borderland areas which have been the sole domain of our Journal of Borderland Research. After long years of such juvenile questions as: Did Atlantis exist? Have you ever lived before? Is there such a thing as Telepathy? I gave up reading "Fate

Magazine" a long time ago. One would have thought that with all their earnest searching since 1946, Curtis Fuller, Mary Fuller, Ray Palmer, et al, would have found some positive answers; but no, their editorial quest is still unchanged.

"Borderline" takes the refreshing attitude that some of these things are true and have been proven; let's go on from there. An Associate handed me a copy of Vol. I, No 1 at Harmony Grove, the September issue, 60¢ a copy; \$7.00 a year, published monthly by Sherbourne Press, 7863 Melrose Ave., Los Angeles 90046. Executive Editor is Sydney Omarr, a Hollywood astrologer, I believe. Astrologer Carl Payne Tobey is a contributing editor. The magazine is Digest size and 130 pages.

Associate Fred Kimball is the subject of a 12-page article by Carl Randall, "The Man Who Reads the Mind of Animals", and it's a good one. The lead article is really an editorial on the Borderland by the grand old moral rebel of the 1920s, Henry Miller! Joseph Goodavage has an article on the pre-visions of Kennedy's assassination, "We Tried To Save the President". Gerald Heard gives a "History of Psychical Research". Frank Edwards tells of how he "Told the Truth and Was Banished", and an unsigned article "Astronauts and ESP" claims that "astronaut John Glenn received telepathic (ESP) messages while circling the earth in a satellite: these messages enabled him to return safely to earth. The messages reportedly were not 'word messages' telling him what to do -- but were 'picture communications,' showing Glenn how to accomplish his return. . . BORDERLINE was told: 'The Air Force will, on an official level, deny that ESP is being seriously considered and investigated at this time. But, unofficially, the program continues.' . . It is planned to utilize ESP to communicate with 'unknowns' which might be encountered when a Moon landing is accomplished. . . Academicians highly placed in the government are trying to block these efforts (to publicly finance an ESP program). . . The Soviets, as of now, are ahead of us in research into the use of ESP in space programs."

#### THOSE LAKHOVSKY CIRCUITS AT WORK

"About the Lakhovsky wire circuits, there is no other way to account for the consistently maintained energy I receive. I wear one all the time as do several others I know, all of whom report amazing results. One man past 80 finds it peeps him up too much, so he wears it intermittently."

Howard D. Clark

#### FLYING SAUCER SPEEDS AGING PROCESS

One of the most factual, best edited Saucerzines to cross our desk is Robert J. Gribble's "N.I.C.A.P. Reporter", monthly, published at 5106 So Findlay St., Seattle, Wash. 98118, \$1.50 a year, 8 pp mimeo. Here's the fascinating lead item from the September issue, a clip from the Albuquerque, New Mexico "Tribune" for June 29, 1964:

Girl Who Saw UFO Is Growing Taller -- Is it normal for a 10-year-old girl to grow 5½ inches and gain 25 pounds in a single month? Mrs. Max Stull said today that her 10-

year-old daughter, Sharon, has done just that during the past month. Mrs. Stull said she is worried because her daughter's growth began just one month after the girl suffered eye burns while gazing at a strange, egg-shaped object in the sky here on April 28. Sharon was treated at Bataan Memorial Hospital at the time for eye and facial burns. The child said at the time that her eyes began to burn after she spent five or 10 minutes watching the UFO from the Lowell School grounds. Mrs. Stull said today that her daughter has recovered from the eye burns, although she still must wear dark glasses in the sunlight and can only read a few paragraphs in a book before her eyes begin to smart again. The daughter's personality and habits have changed during the sudden growth. "A month ago she was just a child who liked to play with dolls," Mrs. Stull said. "Now she is suddenly mature and grown-up, cooks meals by herself, cleans house and takes care of the younger children." Sharon, at the time she saw the UFO, was 4-feet 8 in. tall and weighed 85 lbs. Today, Mrs. Stull's daughter is 5-feet 1½ in. tall and weighs 110 lbs. -- and is still growing fast. Mrs. Stull said Sharon has outgrown all her clothes and quickly outgrows new clothing and shoes. "I'm so confused I don't know what to believe." Sharon, who will be 11 in October, sat quietly as reporters interviewed her mother. Asked how she felt, Sharon replied, "I just feel funny." Mrs. Stull said that a scientist from Tucson, C.E. Lorenzen, visited and talked at length with Sharon one weekend. A Los Angeles physician offered to examine and treat the child free of charge if the family can get her to Los Angeles this summer. She and her husband are not financially able to do this. Sharon has never been checked for possible radiation burns. "I know she definitely saw something in the sky that day, but I don't know what. It has been a nightmare ever since, wish she'd played hooky that day."

#### THE LOS ANGELES WORKSHOP

No definite results yet in our Project Mind-Over-Matter at the Hermetic Science Center, 138 N Manhattan Place. We meet the first and third Friday evening of each month, 8 p.m. Donation \$1.25 toward hall rental and refreshments. We are reviewing Dr. Andrija Puharich's "Beyond Telepathy" chapter by chapter, as a working text. A regular routine of concentration exercises, relaxation and breathing has been set up; the purpose is to build a powerful charge of mana to activate the sensitive electronic equipment built by the Director for the Project.

As our group unity and purpose build up we will be less and less interested in having metaphysical shoppers stop by just for the hell of it. One such character showed up Friday night, Oct. 2nd. Our routine must have pulled the Veil aside for him, just enough to give him a glimpse of some of the beasts in his own subconscious, a Dweller on the Threshold; for just while we were in the third part of the routine he shattered the Silence by jumping up; he mumbled some apology about "having to pick up a relative", and headed for the door, fast. If there had been any prospect of a successful demonstration that night, he wrecked it. It won't take many experiences of this kind to convince the serious Associates in the Workshop project that if we wish to get past a certain point in our efforts, we'll have to close ranks. Meanwhile, if there are any of you willing to make the necessary sacrifice to get a similar Workshop project going in your area, let me know.

NEWLY PUBLISHED SEANCE MATERIAL

BSRA NO. 10 - K, Part 4 of the previously unpublished 1950 series in which Sister Theresa Vandenberg and Noya, two of the four women members of the Inner Circle, give their views on life from the other side, one as a nun from 19th Century Brooklyn, the other as an American Indian. Discussion of cataclysmic activity and what causes it between Meade Layne and Professor Luntz, and a host of other subjects from Lesbianism to proton smashing, from the real meaning of the Virgin Birth to the real cause of Cancer, by the Yada di Shi'ite, Lao Tse, Ramon Natalli and the women. Other subjects include the Higher Self, women's rights, Christ, accident-prone, Etheric Guardians, nature spirits, elementals, detachment, self-realization, chemical rays, cyclotrons, Dr. Koch, guilt-complex -- 8½x11 mimeo, 49 pages, post & tax pd.. \$1.00.

"An Attempt at COSMIC MEDIUMSHIP" -- by Director Riley Crabb, contacting members of the Inner Circle for a trial period of four months, August through December, 1960. 36 pages of notes on the problems of telepathic communication and of managing BSRA, plus a five-page introduction explaining the tell-tale characteristics of messages from different Planes, 8½x11 mimeo. . . . \$1.00

BSRA NO. 11 - VITIC, THE PHYSIOLOGICAL EFFECTS OF MAGNET AND CARBON  
This 13-page brochure put together by Meade Layne is now 50¢ if you want it this way, but after we add the Vitic material in this October Journal and the coming Nov-Dec Journal with the Dr. Mesmer seance notes and other important info on magnetics, it'll be \$1.00.
