The Journal is published six issues a year with the assistance of the Associates, at the Director's home, 1103 Bobolink Drive, Vista. It is printed, 36 pages an issue. The Foundation was incorporated under California law, May 21, 1951, #254263, and has been in continuous existence since then. Address all correspondence to the PO Box. The Journal is included in the Foundation membership of $7.00 a year. Single copies and back issues of the Journal are now $1.50 each. If you don't care to join you may receive the Journal by donating $7.00 a year or more to the Foundation. The Director's wife, Ms. Judith Crabb, is office manager and Secretary-Treasurer.

Purposes of BSRF: This is a non-profit organization of people who take an active interest in unusual happenings along the borderland between the visible and invisible worlds. In the words of the late Meade Layne, founder and director of BSRA from 1946 to 1959: "BSRA publications are scientific in approach but employ few technical expressions. They deal with significant phenomena which orthodox science cannot or will not investigate. For example: The Fortean falls of objects from the sky. Teleportation, Radiesthesia, PK Effects, Underground Races, Mysterious Disappearances, Occult and Psychic Phenomena, Photography of the Invisible, Nature of the Ethers and the problem of the Aeroforms (Flying Saucers). In the year 1946 BSRA obtained an interpretation of the phenomena which since has come to be known as the Etheric or 4-D interpretation, and which has not been radically altered since that time. This continues to be the only explanation which makes good science, sound metaphysics and common sense."

The chief present concern of the Foundation is to make this kind of unusual information available as a public service at reasonable cost. Headquarters acts as a receiving, coordinating and distributing center. An important part of the Director's work is to give recognition, understanding and encouragement to people who are having unusual experiences of the borderland type and/or are conducting research in any of the above fields. For consultation on borderland problems, or for spiritual healing through prayer, write or phone 714-724-2043 for help or for an appointment. Donations and bequests toward Foundation research programs and expenses are welcome.

The 24-page list of BSRF publications is available from Headquarters for 50¢ in coin or stamps. This includes mimeo brochures on borderland subjects, tape recordings of Mr. Crabb's lectures and of members of the Inner Circle, talking through trance-medium Mark Probert. Write to BSRF, PO Box 548, Vista, California 92083 USA.
ACCELERATE THE SPIRITUAL AWAKENING OF MANKIND

Clips, Quotes and Comments by the Editor, from "Coming of the Guardians" and from "Psychic"

In January 1952 our Founder-Director, Meade Layne, received from BSRAssociate Ralph Holland copies of some very unusual spirit communications. The "spirits" identified themselves as operators of Flying Saucers originating on Venus and Mars Etheria. These "spirits" claimed to have lifted the Christ idea of Brotherhood to the interplanetary level, by assuming a guardian role in the evolution of mankind here on planet Earth.

Because Holland was a mechanical engineer for one of the large rubber companies in Akron, Ohio he preferred that his telepathic communications be released under the pseudonym of Rolf Telano. He had a professional reputation to maintain. Meade complied and the Telano communications were embodied in BSRA No. 3, "The Coming of the Guardians" ($3.00).

We are now in the sixth edition of this 90-page work. On page 38, in the Telano material, we read: "The task of your Guardian races is threefold. First and foremost is to accelerate the spiritual awakening, and the resulting ethical and moral development of the Adamic races. Second is to closely watch their scientific progress, aiding that which is beneficial, retarding that which is detrimental, and temporarily halting that which is disastrous. Third is to watch the evil influences which may prompt some of your people to take harmful actions... These three different tasks are being handled by three different groups... The scientific phases are in the hands of the Etheric Nors, specifically a sub-branch known as the Viknors. They are the recognised masters of the physical sciences, and for many ages past it has been the custom of the other races to call upon them for aid in scientific matters.

"One group of them also formerly inhabited the material plane of your planet. They are now on Mars and Venus Etheria, with the greater part of those who are engaged in the present operations coming from the latter place. Most of the Flying Saucers are operated by them..."

We believe that the material which follows, from the June, 1973 issue of "Psychic" magazine, is an excellent example of the continuing program of the Viknors and their associates to "accelerate the spiritual awakening" of mankind -- not through orthodox religion, pretty largely a lost cause -- but through science and a direct at-o
URI GELLER

Geller's psychic and psycho-kinetic powers manifested at an early age. As is usual in such born sensitives, it was some years before he realized that such powers were unique and not common to everyone. He also assumed that such powers were entirely his own when he began demonstrating them publicly in Israel in 1969. By that time he had recovered from wounds received as a soldier in the Six-Day War between Egypt and Israel in 1967.

Dr. Andrija Puharich heard of Geller's amazing demonstrations of psycho-kinetic power before Israeli scientists and went to the Holy Land to see for himself. The American scientist is also a Kahuna initiate. He was introduced to the Pagan powers of the Hawaiian Gods in the 1950s by David Bray; so Puharich apparently served as Geller's awakener -- awakening him to the reality of the invisible Forces overshadowing him. The Kahuna persuaded Uri to come to America for more scientific testing and for public demonstrations.

AN AGENT OF THE GUARDIANS

So now we have among us an Aquarian Ager who is apparently a conscious agent for the Guardian forces guiding the forward evolution of mankind. Judge for yourself, from Uri's answers in "Psychic":

"First, I'm not a psychic because I think psychics use their own forces. So I don't think that this power is coming from me but that it's being channeled through me. I believe this force is an intelligence that causes things to happen through me; that it operates through me for some reason. Until about one-and-a-half years ago I didn't even consider the possibility of an outside force. It wasn't until I met Andrija Puharich in Israel about two years ago that I began to think more about an outside force.

"I also believe we are somehow being prepared for some other work, perhaps in some other place not necessarily this earth. What I am able to do is maybe part of a much greater plan than concerns more than the earth and mankind, like the universe. And when I say being prepared, I don't believe we ever die. I believe that the body dies but that we continue as energy and as ourselves."

Nov-Dec 1973 RR, Page 2
PSYCHIC: "Are you talking about some cosmic plan and God?"

GELLER: "I believe in God and I believe that God is the plan."

PSYCHIC: "That takes in a vast area."

GELLER: "Sure it does. And I do not exclude spirits or other existences in our universe. I'm just following my pattern of life; when things happen I let them happen. . . Now I believe this whole thing that is happening -- what I'm able to show people -- is part of a complicated plan to give all of us proof of what can be done, preparing us for greater things in our development. They are just signs that more things are going to happen, that we are capable of greater things.

"My feelings and theories of this thing concern a super civilization that learned how to understand and control time -- the past, present and future -- and that evolved beyond our comprehension. They could have left a control unit -- like computers -- which have a mission and help direct people to accomplish it. And I think this mission concerns us for sure, as well as a lot of other people.

"But let me emphasize that I don't think this is God, since I believe God is way beyond that. Also, things are so programmed that they can't change them, only work within the structured program.

GOD IS THE WHOLE IDEA OF CREATION

"I was not brought up in very religious surroundings, and I've never gone to a synagogue, but I've always known that God exists. Today, from my experience and from what I'm now able to do it's even greater. To me it's similar to what happened to some of the astronauts who landed on the moon or traveled in outer space. It seems their trips caused experiences that made them more aware of God and the universe. My own experiences have been extended over a longer period of time, that's all."

PSYCHIC: "Does this include the theory of reincarnation you implied earlier?"

GELLER: "Yes, and I believe that if you don't finish your work on earth in this lifetime, then you're going to have to come back in another one and finish it. I also believe that there is no going backward from what you have accomplished; you only go forwards. You might stay at one place for a long time, but you never go backwards. I believe you're given all the chances you need until you accomplish what it is you set out to do. When you leave your body on earth, if you've finished your job, you don't have to come back, and you enter a different dimension and do other work there."

ANDRIJA PUHARICH
AT LEFT is pictorial proof of Uri Geller's psychokinetic powers. This is a sequence of stills taken from Super 8 movie color film shot by James Grayson Bolen, editor and publisher of "Psychic"

"The fork, which Bolen personally verified as being intact before the demonstration, gradually becomes pliable in mid-section in Geller's hands as he rolls his thumb and index finger over it. The fork finally breaks apart, the prong part falling to the ground. Note how the prong section clings slightly to the handle just before it drops away, suggesting that the stainless steel metal momentarily became plastic-like."

Keys, coins and other metal objects become bent and/or broken in Geller's hands, or in the hands of their owners! With Uri's hand held lightly above theirs, and the owner feels nothing, neither heat nor cold nor other energy while the phenomenon is being produced.

PSYCHIC: "Have the controlled tests at Stanford Research Institute substantiated your abilities?"

GELLER: "I don't think that's for me to answer. The scientists who were around me and saw me do things, who controlled me, know I'm
real. So it's up to them to substantiate it and what they see from it. At this point I suspect they know it's really happening, but not how it works... Personally, I don't think they will know how these things work for a hundred years. But I do think that the first step will be made when somebody invents a device to actually measure what this is, like waves of energy or whatever is taking place...

THE LAW OF MIND OVER MATTER

GELLER: "... So there must be some kind of rule or law that operates about the observation of these things. When I bend a fork, if you watch it immediately after I bend it, it will continue to bend. ... The biggest thing I did (at "Time" magazine editorial offices in New York) was bend a thick key they brought me. It was taken away quickly and that's the last I saw of it. But a lady phoned me from Time and said that the key continued to bend after I left. I was excited to learn that, but they never mentioned it in the article..."

PSYCHIC: "It's been reported that at Stanford Research Institute materialization wasn't able to be recorded on film. Why?

GELLER: "I don't know, but we tried. It's something that takes more time and the right conditions, though."

PSYCHIC: "We also received reports that cameras often broke down or something happened during your breaking or bending attempts, as well as dematerialization experiments, and that none of this was recorded on movie film. There is speculation that you caused it. Did you?"

GELLER: "I don't know; I wasn't uncomfortable around the cameras and really wanted something to be filmed. Remember, though, that the experiments were conducted under conditions I wasn't accustomed to and it was a totally different situation for me.

"My normal way is to walk up to a person, hold the thing, and put my hand over it to make something happen. Under the scientist's conditions it was very difficult; I wasn't allowed to touch objects or anything. But even so, things did break and bend there, and they saw it. I wasn't able to do it in front of the camera; so they weren't able to get it on film. But they were able to get other things on film, such as telepathy experiments."

This is an interesting problem. Who controlled conditions at the Stanford lab so the metal bending demonstration could not be recorded on film? Was it the Guardians, for reasons of their own? Or was it heavy static from the minds of the angry scientists, determined not to have any graphic pictorial evidence of psychokinesis? The fact that other researchers, such as Mr. Bolen, have gotten pictorial evidence of Geller's psychokinetic powers, would indicate the latter. Perhaps it will be a hundred years before scientists learn that their own negative attitude toward the independent powers of the mind nullifies or destroys the results of their experiments, even as they make them! And how triumphant these nattering nabobs of negativity are when they announce that no positive evidence could be obtained!
The very fact that the film cameras broke down at critical times was proof of the Stanford scientists' own psychokinetic powers, used in a negative way, if they only realized it!

GELLER: "I ask myself, why does it (PK) happen in unimportant places, in front of just anybody; but when it's important for me to prove it to people at SRI, then I doesn't happen under the conditions they must record it happening? Maybe it's not supposed to happen for them yet, I don't know. But I do know it's really frustrating and depressing for me."

PSYCHIC: "Do you think that the laboratory conditions are a psychological barrier for you?"

GELLER: "I don't know. But in big audiences, say more than three hundred people, I can demonstrate almost all of my abilities. Nobody is telling me what to do on stage, like I'm told in the laboratory experiments. I just go on and do what I feel like doing because I know people have come to see something, which is positive for me. Also half of the audiences are usually women, which is important to me because I like to have them around; they're always somehow good, they're seldom negative.

PSYCHIC: "You tell your audiences that you need people around for these things to happen. Why?"

GELLER: "Because I've never broken a spoon or fork alone, there's always one or two or more people around. It might be that I'm taking energy from them in some way. (It might be also that the controlling Entities won't waste time and energy doing phenomena for Geller. RHC.) I also must feel that the people are right -- positive and wanting it to happen -- and then it happens. . . positive people and crowds are very encouraging for me and more than likely something will happen."

Here Geller illustrates a very necessary but painful lesson for life-negative scientists: If they would research the powers of the mind, they will have to recognize the Power of Positive Thinking, and practice it!

CONTACT WITH THE GUARDIANS

Also in the June, 1973 "Psychic" is an article by Alan Vaughan, "The Phenomena of Uri Geller", much of it based on interviews with Dr. Puharich, as well as personal observations of Geller's powers.

"In December 1971 Puharich was in the Sinai desert with Geller, and was complaining that sand was getting into his movie camera. Puharich had left the camera case behind at his home in Ossining, New York. The next morning at 5:30 he got a call from Geller who said that there was a camera case in his room. 'So I rushed over,' said Puharich, 'and looked at the damned thing and it was the camera case which I'd left six thousand miles away in Ossining, New York, locked in an equipment closet and it was my case with the markings. Furthermore when I got back to Ossining about eight months later, it was not..."
there. So that was my first evidence that Uri was capable of transporting physical objects over long distance by unknown means. And subsequently he's done this many times."

The next story told by Puharich to Vaughan revealed the Guardian forces overshadowing Uri and his work.

"'I found out there was some kind of intelligence behind Uri but I couldn't pin it down. So I pushed Uri into giving me some proof of what's behind this whole business. He dematerialized the inside brass cartridge of a Parker pen that was locked up in a steel box, and it was gone, disappeared. Two days later Uri said, 'Andrija, I'm going to get the proof you want.' After a drive in the desert to a field, Puharich heard some cricket-like sounds. 'And there in the field is what people call a UFO -- a disc-shaped, metallic object with a blue light flashing on top. I said, 'Ah, now I
have some evidence!' I had fast night film in a super-eight movie camera and I started shooting. Uri said, 'You can't go near but I have to go aboard.' From fifty yards away I see him entering this thing; I think, 'Well, goodbye Uri, I'll never see you again.' I keep shooting. Ten minutes later he comes out, holding something. I look at it and it's my brass cartridge from the inside of my Parker pen with my markings on it so I know it's mine. So that was convincing to me. So I said, 'Oh boy, now I've got a movie of a UFO, of you entering and now I've got this physical proof that something from two days ago came through. I've got a case.' But then the cartridge in the super-eight movie camera vanished, dematerialized in about ten minutes. There went my film evidence. So I don't really have any evidence, just a lot of weird experiences, nothing tangible."

The word of Dr. Puharich is enough evidence for the editor of this Journal, and for thousands of Flying Saucer believers the world over who have crossed the "cosmic barrier" -- as the late Bryant Reeve called it. Anyhow, we have plenty of pictures of Flying Saucers. One of the best is that reproduced on the preceding page, from the Frontispiece in "Flying Saucers Have Landed", by Desmond Leslie and George Adamski, The British Book Centre, New York, 1953.

It is your editor's belief that Puharich's film evidence for the reality of a UFO was dematerialized for his own protection. As a bridge-builder between the scientific and metaphysical worlds he still has much to do in this life. Other researchers with that kind of evidence have suffered abuse, character assassination, violent accidents, suicide or kidnapping. In any event, the authorities would not have allowed Puharich to keep his evidence. If he would not give it up voluntarily, professional government burglars would steal it from him.

In his article in "Psychic", Vaughan tells us that astronaut Ed Mitchell was at Puharich's Ossining, New York home when Uri Geller was demonstrating his psychokinetic powers for Bolen and others. Uri caused the hands on Mitchell's watch to move ahead about an hour and a half while the astronaut was holding it cupped between his hands. Uri has promised Mitchell that the camera he left on the moon will be apportioned to him some day, when Geller's Forces are ready to do it! If and when it is done, it will be quite a challenge to the academic flatheads.

Mitchell, by the way, is Editor-at-large for "Psychic" magazine, surely one of the best of the slick borderland journals being published today. James Grayson Bolen, editor and publisher of "Psychic" says that his goal is "Exploring the Extended Nature of Man and the Universe". The bi-monthly magazine is beautifully printed, lots of color and illustrations. Each issue features an illustrated, in-depth interview with some outstanding person in the field of parapsychology. Subscription rate is $5.50 per year. Address all inquiries to PO Box 26289, San Francisco, California 94126.
Douglas Price: "I shall begin where I left off. What I told you last was about a child in a ruined house. What I will tell you now is about some one who was shot in a Light Artillery Division. He was standing where I stood (on the Lower Astral Plane). I saw the huge shell burst under his feet. He was blown right up in the air; but some one caught him as he fell, lifted the shattered body and took it to those of whom I told you, where it was again put together; then it was laid to rest."

We must assume here that Rev. Price is talking about the Etheric Double, not the physical body of course. On the Kabalistic Tree of Life the Etheric Double is represented by the Moon center, Yesod.

D.P. "What was done I could not see, but somehow the shape of the man was restored. He looked as if made of some light, gauzy stuff. I wanted to ask Leadbeater but was prevented. He saw me standing by and saw that I had no work; so he promptly provided me with some, which took me away from where he was working. Then I came to a place where many were hurt through an explosion. Tons of ammunition were blown into the air; what that means I hope you may never realize. It was a scene of horror indescribable. I could do nothing, as I thought, but some of those Helpers were there almost immediately and they showed me how to get to work.

"I was then lifted in a kind of current and was able to lift some of those who were not mangled too much. Those who were almost blown into fragments I could not touch, they were gradually gathered by the Helpers who understood building bodies."

Strong visualizing power is needed here, to see the form completed. This is Hod on the Tree of Life.
"The Shining Ones put them in the place of rest of which I told you previously. All this is what I see; I must tell you exactly what happens. Everyone of those poor, mangled ones has given his life for country and Fatherland -- Germans just as well as British or French. Don't ever forget that! Our British are fighting for right and justice. Germans are also fighting for what they think is right. All of them are like driven cattle -- no sense of responsibility but to obey and to help to save the Fatherland.

"When I first came over I thought the Germans were much more subtle and clever than I now find them to be. They never do anything of their own initiative; so that our men have much advantage in that way. Now you must please remember this: I cannot tell you all that I see; you cannot put on record some of the things I most wish to talk about.

GLORY UNSPEAKABLE IN THE DISTANCE

"Heavenly flashes come to me in the midst of all this horror. Were it nor for this I should indeed say that there existed a hell of which even Dante in his wildest flights of imagination had not conception. Yet even in the midst of this, I have been brought to see that all things work as part of the great divine plan. Where I once found a blank and dismal abyss yawn before me, I now find glory unspeakable in the distance; not the cant of orthodoxy, but the real heavenly consciousness.

"Now my sight is widening daily. I glimpse but vaguely still the meaning of His wondrous love. Oh, why did I not know it sooner? What could I not have done? I feel that it is given to me now for some helpful purpose. If I can only work here as I want to do, I can in some measure undo many things that I wish undone. What, after all, do the things of this earthly life matter, when there are such wonderful and beautiful things in front of us, if we have only eyes to see? What can it matter, after all, if one does not have more money than one can possibly spend? One has to realise that there are many other things well worth while -- all for the taking! I once thought I was a very ill-used individual and very much misjudged; now I do not think so at all. I know so much more what it all means and why. So it comes to this -- we may not like the things that we have but many of them are useful..."

LEARNING TO FLY

"Where I see Leadbeater there are also some of the Shining Ones. They are still soothing the poor, distracted sufferers. What they do afterwards I cannot see. When we look, it is as though a cloud were in front of our eyes. Had I known more of Theosophy I think I should have been better able to cope with the work required of me now, in that I could more easily get about. It is still difficult for me to realize that I can fly, so to speak. When I want to reach a place, I need not take a penny tram-car, but just think of where I want to go! I went on one occasion to India to your Headquarters, and saw there some of the work being done by Annie Besant. She is

Nov-Dec 1973 RR, Page 10
working under difficulties at present (1917), but she will later on see results she does not expect, in that India will rise as a great nation in the not very distant future."

A: "Do you think so?"

D.P: "Yes, I can almost say I see it. When Annie Besant is out of her body, I speak to her sometimes. She also has taught me much. but her work is so constant I do not try to interrupt. I try to teach people here something of what I once did not believe myself, I also want to impress on you that you are not to take anything I say for truth, if you do not think it reasonable. There are many things here strange and new to me. I cannot always understand when I see these wonderful things being done, such as I told you Leabeater does. There is so much room for study along these lines, so much room also for trying to impress this new and wonderful thought on the world."

A: "I want to ask you a question. Do you know who wrote an article on the 'Continent of Death' and said it would be nice if there could be a couple of mails weekly from the Other Side?"

D.P: "I did. Now I am giving you the mails! I cannot give you quite all that I see. I can only give you what is allowed..."

NO TIME FOR PRAYER

"Some more parsons are here besides those of whom I spoke last time. They are in the midst of prayers and have asked me to join them. Why should I do so? I said. I do not think that prayer without work is of much use. When wounded and dying men are lying in heaps round us, there is no time to pray.

"Just now we carried some of them on improvised stretchers to the Shining Ones of whom I told you. This is Russia, where the revolutionists are busy. Some of your people were there -- you were there also. About an hour ago there was a great explosion on our western front. Several men were trying to move an ammunition wagon, and a shell struck it and many were blown into fragments. Some more of the Helpers came. I did not see Leabeater, but I did see Annie Besant. She took many of them herself to places of rest... People come along here come along much as they used to when I was a shepherd of souls -- not always a good one, I fear, but one who was always willing to help in time of trouble.

"To me it is utterly terrifying to see what I have seen tonight! What cruelty lies dormant in the hearts of men, only waiting to be roused like a savage beast of prey. Oh, does noe ever realize what these forces are when let loose? Unbridled passions of the worst and lowest kind! I cannot look on these sights of horror for long. I cannot soothe my weary, tired body with prayer as do these other men!"

A: "But you said you glimpse the divine plan behind all?"

D.P: "But there are times of black and awful despair, when I almost..."
look into hell itself. Can you think one could be happy under those conditions? No! But still I hear the voice of One who calls to me from the heights I have not reached, telling me to struggle on and that help will come when I have earned it. This I feel to be true."

A: "Do you remember where you were?"

D.P: "Yes, I told you that there was an explosion. I saw men blown up into the air and shattered into fragments. I was called away and you were tired. Now I shall go on with the mail. There are great happenings at present in many places. More ships have been torpedoed than you know, and many lives lost. Some of them were kept afloat until succour reached them in the shape of rescue boats. When I saw this I quickly tried to swim to the rescue of some but the distance was too great. I might have realised that I could fly! However I got there by some means and found many Helpers there before me.

A: "Do you remember that last time you spoke of seeing such horrors?"

D.P: "I saw many of those sights, until I could bear no more; then I was told that I might rest until I had recovered calmness. Why I was shown these things was, I suppose, to teach me the meaning, or some part of the meaning, of the Great Plan now being worked out.

**HANDICAPPED BY SKEPTICISM**

"I cannot help thinking of many things of which I used to talk so glibly; now I see how silly I was. For instance, I used to say there was not much use in speculating about a future existence. Now I wish I had speculated a little more. I could have begun life here with less handicap; I could then probably have known how to do a great many more things and could have helped much better... Always there are dying ones to be helped to die; this I can do now, being shown what is necessary; and my experience as a priest comes in useful. They beg for Extreme Unction and the rites of the Holy Church long after they are really dead. Then they go to sleep calmly in some
instances. In others, they want me to go on praying. I explain that they are not in the presence of an angry Jehovah, and are quite at liberty to settle down and make themselves comfortable.

"But all are not like that. Many of them are quite eager to go on with the fight, in fact they do! One I have seen go on fighting, as he thought, for weeks! What kind of conditions he was preparing for himself I don't know; but he seemed to enjoy dodging the bullets. Many more that I see, cannot believe that they are out of their bodies.

"Just before I go, I want to tell you that there are a number of battalions of Australians at work on the western front. Some of them have done nobly. All of them one is proud to know. They do not in the least seem to know what fear means. When they led the charge recently they fell in hundreds, but still kept on. They are making history for future generations... Social reconstruction will be a tough problem for solution when peace is at last declared."

A: "Will that ever come?"

D.P: "Not, I think for months yet. We have not yet fully learned our lessons. It is for us to make the way easier for the weaker ones. We, in Australia, know little of the privations undergone in those countries where our men are still fighting and yielding their lives for England's sake and for Australia's honour..."

F.F: "Have you ever seen any evidence of people returning to birth?"

D.P: "No, I do not believe that they do return."

F.F: "Oh -- of course they don't usually return for long periods."

A: "Have you ever talked to Leadbeater about it?"

D.P: "Yes."

A: "And he has not convinced you?"

D.P: "No. I have not seen any proof."

F.F: "How do you account, then, for people being at such different levels? -- Some being so much more advanced than others? Don't you think it is because they have had more earth lives?"

(No reply, no comment from Rev. Price on that question.)

A: "Well, you say that Theosophists work well over there, Leadbeater for instance?"

D.P: "Yes -- they all work well, but I do not class Leadbeater with the other Theosophists that I see.

A: "You mean that he is so much more advanced?"

D.P: "Yes... When I passed on I felt as if I had thrown off a cumbersome robe. It was a great relief. I was quite conscious almost immediately of all going on around me. Then Leadbeater helped me, and now I am working under him."

Nov-Dec 1973 RR, Page 13
ETHER SHIPS

New Insights on an Old Problem

by

Trevor James BSRA

When BSRA founder Meade Layne gave the name "ether ships" to UFO's in his epochal monograph THE ETHER SHIP MYSTERY, he builded better than he knew. Modern thought and practical research both received a strong impulse towards that body of Cosmic law in which lie the keys to the UFO mystery in all its diversity. As the decades reel past, etherian physics emerges as a crucial tool in shaping the human future.

When ML generously hailed my 1958 book "They Live in the Sky" as the "death knell of the old order", I was not only flattered, but flabbergasted. Such a tribute from a man whose knowledge and wisdom I respected was completely unanticipated. The plain truth is that in 1958 I did not understand why a man of ML's occult erudition could be so enthusiastic about my stumbling work. In those days, postulating, and then establishing empirically that UFO phenomena included both biological aeroforms unrelated to space ships, and ships containing entities with malefic intent toward mankind did not win me many friends. Support from ML, and corroboration from the Inner Circle of my essential findings, was in these circumstances most welcome and comforting.

Nov-Dec 1973 RR, Page 14
Fifteen years later, one can appreciate that ML's gaze was directed to the future. His occult background in modern esoteric Qabalism let him see where my pioneering work might lead, and I simply did not have the advantage of such a perspective. I had to wait years for unfoldment, with much grinding struggle. What I am setting down here is nevertheless a salute to Meade Layne. Nobody in the history of Ufology has equalled his prescience.

---------------

One of the most important facts to grasp in connection with UFO's is that heat is the Fourth State of Matter, and not merely a vibratory means of affecting the solid, liquid and gaseous states of matter - the officially recognized triad. My infrared photographs, being made with infrared film (sensitive to invisible radiation) demonstrated that there is a range of form and substance standing above the aeriform state of matter and interpenetrating the aeriform state. One cannot ocularly perceive heat directly, so heat-sensitive materials have to be employed to objectify these otherwise invisible aeroforms. A steady training of the physical vision to extend it slightly, combined with occult exercises to form the organs of perception in the astral body, will eventually provide marginal but nevertheless direct perception of these heat creatures first photographed by me in the summer of 1957.

The remaining aspect of the experimental work is getting such aeroforms to manifest where you are - to bring them "down to Malkuth" in the Qabalist's expression. The experimenter must find a way to make himself or his site of operations, stand out from the random psychic racket of planet earth.

Nov-Dec 1973 RR, Page 15
This was achieved through protracted repetitions of the Star Exercise - a tried and true procedure from rudimentary ceremonial magic. In terms comprehensible to anyone with even a slight knowledge of vital energy or "bioenergetics" as it is now called, one makes of oneself a bioenergetic beacon, radiating patterns of energy - rhythmic impacts in the ethers that will attract elemental forms much as a lighthouse attracts moths.

At the upper border of physical nature, in the sphere of the warmth-ether, one enters a highly functional and powerfully biological realm where objects are not gravity-bound, but rather, levity-bound, i.e. tending to fly away to the periphery rather than be drawn to the center of the earth. These objects move with lightning speed, and do not necessarily conform with purported laws of heat and light as they are presently promulgated by official sources. Such objects can be unequivocally recorded on film emulsions and also on videotapes. Their elusive character - their non-terrestrial nature, as it were - is demonstrated by their frequent disappearance from film emulsions while a newly developed film is drying. I have lost many incredible critters this way, including one monster proceeding alongside an airliner wingtip at 35,000 feet.

All this indicates that "they" are extremely difficult to catch. Only by mingling esoteric knowledge with modern photochemistry did it prove possible to capture them repeatedly on both stills and movies. Understanding the extreme dynamism of the warmth ether was indispensable to this work. Years of experience taught the value and the validity of classical etherian physics, and the Nov-Dec 1973 RR, Page 16.
life-killing encumbrance of so-called classical physics and its stationary ether (singular).

As an on-the-spot detector for the objects, Dr. Jim Woods and myself had to employ yet another aspect of esoteric knowledge - the Eye Beam or Visual Ray. Now that Kirlian photography is catching up with Wilhelm Reich and Rudolf Steiner - at least getting into the fringe of their work - the Visual Ray no longer seems quite so staggering a part of experimental work as it did in the late nineteen fifties. Renown awaits the Kirlian photographer who first objectifies the Visual Ray.

Formal knowledge conceives of the human eye as a passive device, always depicted as analogous to a camera. In actual fact, the eyes emit coherent beams of chemical ether, which unite into one major beam guided by the master eye. The eye is therefore just as much a radar set as it is a camera, for it is the Visual Ray that puts consciousness out into space. Our procedure was simple: Use the sports-finder on the camera to frame the surrounding terrain, sending the Visual Ray out through the center of the sports finder. Once one is aware of the existence of the Visual Ray, this remarkable bioenergetic agent can be used as a most effective "feeler" into the imperceptible physical where UFO's have their physical habitat. Impacts are instantly conveyed by the Visual Ray when it intersects any highly charged body. "There is no need to actually see the object in the regular visual range. Indeed, our methods were designed from the outset to capture the UFO's in situ, i.e. in the invisible."
We were really chasing ML's "ether ships" with methods rooted in the realities of etherian physics. Success came not because we were men of genius, but simply because this approach was and is lawful. This is the reason that two men, without outside financial assistance, were able to record many times - and in a mutually corroborative fashion that defies contradiction or dismissal - bioforms existing in the realm of heat-substance, "heat-stuff" in ML's expression.

In this same supersensible bailiwick we also found, and objectified, space ships. Conclusions could be reasonably drawn about their propulsion from these photographs. The major conclusion permitted is that the vehicles are propelled by manipulations of the ethers, and especially the warmth, light and chemical ethers. Both the bioforms and the spaceships plied the same invisible realms in accordance with the same laws. Naturally, in their sporadic visits to the visible spectrum, bioforms and spaceships have been mutually confused since the days of Kenneth Arnold.

We confront new laws in this work. We sought to harmonize our work with those laws.

The big-name investigators with the big budgets persisted in looking in the wrong place and in the wrong way for the keys to the mystery. In addition, they have always been neurotically overborne by their compulsive aversion to anything rooted in basic life processes. The UFO's inevitably lead there.

(To be concluded, with illustrations, in the next Journal.)

OLYMPICS
A YEAR OF RECONCILIATION

By Olga Connally

With Christmas in the air again what could be more timely than to consider the Christ-inspired writings of Mrs. Connally, captain of the U.S. women's track and field team in the Munich Olympics, her fifth. These are from the Sports section of the Los Angeles "Times", Sept. 20, 1972.

"The Olympic spirit, if it is sought only in the atmosphere of conquest, will never thrive. In my opinion it has to be replanted into a wider sphere, which allows more fertile fields for growth. I would like to see every Olympic year proclaimed a Year of Reconciliation.

"Although various conventions and symposia are being held all the time, I believe that if international Olympic congresses of scientists, physicians, economists, ecologists, sociologists, educators, philosophers, writers -- and festivals of arts could also be programmed throughout the world for every Olympic year, the unity within the Family of Man would be steadily improved.

"In such an atmosphere, perhaps even statesmen and politicians would be more willing to discuss old disputes and new frictions. The Olympic spirit that only flickers among a few thousand athletes for three weeks every four years could flare high among millions of people for the entire 12 months of the Olympic year.

"I am not sure whether the International Olympic Committee, which is accustomed to operating within the tight little island of its own aristocracy and wealth, would be willing to broaden its vision and share the Olympic organization with the United Nations and different governments in such a dramatic expansion. Yet, what a potential for peace!

"Whatever else may evolve, the Games in Montreal (1976) will be another clash among nations and their social systems in sports. Should the United States participate? I hope we will... But during awards presentations I would like to see the flags eliminated, and instead of the national anthems I would prefer the playing of some musical composition which elevates the Brotherhood of Man. In-
Instead of medals I would like to see works of art created by the world's artists especially for the Games presented to the winners...

"America has never run from a challenge. And we have been challenged heavily in Munich. Our entire social attitude towards Olympic sports must be evaluated. The Olympic sports are called 'amateur', but for practical purposes amateurism is dead. Indeed, at this moment the emphasis on amateurism serves only as a division which upholds the supremacy of the three leading games in the United States -- football, basketball and baseball -- over other less publicized sports. Nearly all the finalists in Munich were superbly conditioned, meticulously coached, full-time athletes. Those who came as hobbyists received no concessions from the judges, no mercy from the spectators. There was no room for old-fashioned amateurs in the 20th Olympics. The competition amounted to a non-bloody war, and I believe that rather than trying to deny that we should face up to it...

"We simply cannot meet the challenge in Montreal unless we recognize that the international competitor in weightlifting is as great a champion as the superstar in professional basketball. There are no major sports and minor sports. There are only sports that receive very much exposure, and sports that receive none.

"The three biggest professional sports in our country receive wide, grass roots support because everyone envisions stardom at the end of the road. There should be stardom at the end of the road of all Olympic sports. And so, ideally, it should be simply a matter of an individual's choosing the kind of physical challenge that suits best his or her physique, temperament, and personal philosophy or sense of aesthetics. I think that understanding this is a matter of mass education and should be reflected in newspapers, sports pages and by other media.

"There has to be a two-level approach to the challenge. Of crucial importance is greater involvement at the community level, where the citizens, local governments and local industries give a financial as well as motivational support to Olympic sports of their choice... Some European countries subsidize their programs from the profits of national sports lotteries. Perhaps California could try a state football lottery.

"The communities' apathy toward amateur sports together with the lack of facilities and expert coaches as well as the lack of financial backing, once appeared insurmountable. But that was before Munich. Perhaps the American pioneering spirit and ingenuity will once again come through before Montreal... "

Clips, Quotes & Comments

ANTI-GRAVITY RESEARCH WITH ATOMIC TESTING

West Auckland, New Zealand "Leader", Sept. 6, 1973 - "Captain Bruce Cathie, of Te Atatu, is the discoverer of a scientific equation which could have almost unlimited application in all fields of science. He has been able accurately to calculate the dates of French nuclear testing (at Mururoa) and he believes the equation could help produce a 'selective' laser beam which could be programmed to penetrate certain substances exclusively.

"Airline pilot Mr. Cathie describes his theory as a 'unified field equation' based on Einstein's classic -- E = mc squared. 'Though I am the first one who has ever published this equation,' he said, 'they are aware of it in top scientific circles.'

"He has published two books which examine the effects his equation could have on mankind and a third, which he is now writing, will probe the subject further. He has written agreement with the results of his research from two scientists in New Zealand and Australia, though he declines to mention their names because of the controversial nature of many of his conclusions. 'These scientists would like to see this information made public.'

"Cathie believes much of the world's knowledge is kept in the hands of a select group of people who would be capable of taking control of world affairs if they kept it secret. 'Unless this knowledge is given to the world freely, they could form a world government.'

"He stressed that a world government would be a good thing, but only if it was operated with the knowledge of all the countries involved. He said the most important information was in the hands of nuclear powers which wanted to suppress their knowledge.

"Their atomic testing is being carried out not to produce atomic weapons, but more in order to research the anti-gravitational sciences which makes everything we know about power production and related subjects obsolete.' Cathie said countries which carried out atomic tests were 'on the threshold' of mastering space travel. 'Once they have this knowledge, everything we now know becomes obsolete.'

"He has been asked to 'keep quiet' about the results of his own research by some overseas scientists, but has refused. 'They asked me to go secret with them.' One of his beliefs is particularly unpopular with world power groups 'because it would make the financial structure totter a bit. The earth is a source of unlimited energy. It is charged with trillions of electron volts which are being replenished continuously.' He says a country's economy is based on distribution of energy resources, and the prospect of unlimited energy would upset the world's financial structure.

"'You can imagine the implications of that,' he says."
"ANTARCTIC BASE FOR NUCLEAR TESTING"

Auckland, New Zealand "Sunday Herald", Oct. 7, 1973 Paris-NZPA Reuter - "France may use the Antarctic island of Kerguelen -- about 2500 miles southwest of Perth, Australia -- as its new nuclear testing base. Work is now proceeding on the island for a possible relocation of France's huge, new, 'world-strategy' base in the Indian Ocean.

"If the French Government decides to switch to underground nuclear tests because of world public opinion over its use of Mururoa (Tahiti) atoll it is possible that the Antarctic base may be used."

"The French have already built a space telecommunication station on Kerguelen Island which will serve as a direct link with their nuclear submarine fleet."

The two preceding news items were forwarded by Capt. Bruce Cathie, pilot of New Zealand airlines and author of the books, "Harmonic 33" and "Harmonic 695", the only books that have come out with anything really new in the Flying Saucer field in the last ten years! Cathie discovered that there is a world-wide Flying Saucer grid, source of power and lift for some of the UFOs. He also was amazed to learn that the existence of the grid was known to a certain elite group of earth scientists, and had been known to them for at least 20 years! Certainly in the early 1950s; and equally important, these scientists are in direct communication with the pilots of some of the UFOs so joint experiments can be carried out.

Because of the highly secret and obviously unethical nature of the operations of this elite group, it is obvious to your Director that they are in touch with the pilots and higher officers of the Invaders, not the Guardians spoken of in the opening article of this Journal. So the war for control of the planet, and of mankind, goes on, with the picture a little clearer for those who can see it.

"It appears that the island of Kerguelen is an ideal place to carry out atom tests," writes Cathie. "The geometric position en-
sures that Light, Gravity and Mass harmonics can be obtained in order to convert Mass into Energy. Test site latitude is 49°30' south. Longitude is 69°30' east, which would give Light Reciprocal Harmonics. Harmonic of speed of Light=143888 (144) see my book, 'Harmonic 695'. The Reciprocal Harmonic of Light = 695. Longitude of Kerguelen = 69°30' = 69.5° = 695.

"Latitude of 49°30' = 49.5°. Logarithm of 495 = 69461 or 695. Nat/Tans. 49°29'30" = 1.1705. Mass Harmonic = 1703. 3/495 = 17043. A slight variation of latitude at centre of Kerguelen island would give Light Reciprocal and Mass Harmonics."

Bruce Cathie, 28 Sherwood Ave.
Te Atatu, Auckland, New Zealand

WHAT'S NEW? WHAT'S COMING?

"What is new down your way? We feel that with all the UFOs being seen everywhere and the country in Washington DC in the shape it is -- we wish George Van Tassel and YOU would put out a special bulletin on what's coming. We forget all the prophecies!"

Ms. A.E.D., Magalia, California

The Solar Logos, creator of our little universe of sun and planets started taking a Cosmic initiation about 1910. This Ever-Present Being has His ladder of progression, just as we have ours. This increased pressure to move, to grow, to change could only result in a vast shake-out of the solar system. The most obvious effect of that here on this planet was World War I and the series of conflicts between the Forces of Light and the Forces of Dark which follow. What we are really doing here on earth is developing and practicing our God-like powers, on each other. There's a lot of pain involved but on the whole it looks like a pretty sensible arrangement considering the character, or lack of it, in the people committed to this institution.

One of the functions of the hidden planet Vulcan is to boil the crud to the surface, of both individuals and of nations. Then it is the function of the known planet, Pluto, and its forces, to shatter the crystallizations of evil as they are exposed to the Light. It is Nixon's fortune, or misfortune, to be in the position of catalyst. Apparently he is the one person in the nation who could best serve the Forces of Light in bringing the hidden corruption of the nation to the surface. It seems logical that he will stay in office until that goal has been achieved, to the satisfaction of the Guardians.

The other "awakener" right now is the Flying Saucers, the UFOs. Whether the spacecraft seen are those of the Guardians, the Invaders or those of our own U.S. Air Force, the self-complacent, conceited human beings seeing them are being shook up, disturbed, awakened, to another reality. If they can be kept awake long enough there might even be a re-birth of Christ consciousness in their hearts! In my...
opinion, one of the most important aspects of this planetary cleansing is preparation for a reappearance of the Christ, the World Teacher, at the physical level.

THE BOIL-OFF IN MISSISSIPPI, AND ITS RESULTS

"On June 12th it was ten years since my brother Medgar was shot in the back by an assassin in Jackson, Mississippi. When Medgar fell in 1963 it was no coincidence that he was leading the Negro struggle for voter registration. Many others -- black and white -- were to die or be maimed before our voting rights were reasonably secured. Neither their deaths nor Medgar's were in vain. Out of all this pain and suffering and hard work has come tangible progress and the joy of human beings who, for the first time can live in dignity.

"It was Medgar more than any other Mississippian who set the tone and marked out the pace for the rest of us. He sealed with his blood his promise to our folks -- while they were still chained by poverty, disease, fear and a blackness that was despised by so many -- that one day they would march out of captivity into the promised land of freedom and deliverance. No matter how brutal the provocation, Medgar refused to resort to violence or hatred in the struggle for justice. He realized that neither was right nor smart. Until his last day on earth he continued to judge men and women as individuals and not as racial categories.

"It was always harder for me to accept these truths, especially after Medgar's death. When I picked up the fallen banner, the impulse for revenge was very strong. But Medgar's influence permeated all of us and we realized that to depart from his non-violent philosophy and his dream of racial integration would have been a travesty against all he had worked and died for. Now, ten years later we have kept faith with Medgar's legacy. We have built while others destroyed or threatened to do so. We have worked together -- black and white -- wherever and whenever we could. We have in short, built a living memorial to my brother Medgar through the Fund which bears his name. We have transformed Fayette from one of the nation's poorest regions to a place where change is taking place, where justice is not an empty phrase, where concrete progress may be witnessed each passing month.

"This is the most fitting tribute to Medgar's memory. If you agree, I hope you will support the Medgar Evers Fund with as generous a contribution as you can spare in these difficult times. That will help us to continue our vital work in Fayette. It will also enable us to built among our fellow Americans a greater appreciation of the philosophy which Medgar espoused so eloquently in word and deed. He and other martyrs of the human rights struggle died for all of us; only by fulfilling his dream during our lifetime can we best perpetuate his memory."

Charles Evers, President, the Medgar Evers Fund, Inc.
150 East 58th, New York, NY 10022

Nov-Ded 1973 RR, Page 24
THESE GUYS WERE REALLY SHOOK UP!

News clips on Saucer sightings have flooded in here and we are really grateful to you Associates for this tangible evidence of the biggest UFO flap of the 1970s -- so far. One of the best is this one from the "National Enquirer" of Nov. 4, 1973:

"The incident occurred early on Sept. 8 while two Army MPs were on routine patrol duty in their car at Hunter Air Force Base, an obsolete base near Savannah, Georgia scheduled for complete shutdown soon. Burt Burns, a former helicopter crew chief, said they first spotted 'a cluster of lights in the sky about 2000 feet up. The lights tracked across the sky flashing red and orange, blue and white'.

"The UFO disappeared behind some trees. But 15 minutes later, at 2:45 a.m., the UFO returned, the MPs reported. After hovering at one end of the deserted runway, its lights flashing brilliantly, it began moving toward the MP's patrol car, driven by MP Randy Shade, 23. 'When it got closer, we could see the lights were clustered underneath a metallic-looking, saucer-shaped body,' Shade said. 'The Saucer didn't make a sound. I couldn't see anything like portholes or windows. It was scary. We just sat there amazed.' Then they took off in a 100-mile-an-hour chase across the deserted Air Force base.

"'I thought it was going to hit us,' Shade said, 'or at least smash the blue police light on the top of our car. I kept my foot on the gas -- we were going or a 100 -- and concentrated on keeping the car on the road. But I could hardly see through the windshield because of the red and white flashes of the saucer's lights, just a few feet above us.'

"'I was terrified when that saucer chased us,' said his MP partner, Burns. 'I was crouched under the dashboard just waiting for it to hit our rooflights. The saucer itself wasn't lit but we could see its outline clearly in the glow from the flashing, pulsing lights underneath it. It couldn't have been more than a couple of feet above us. I reckon the saucer's size at 50 to 75 feet across.'

"For nearly a mile the patrol car dashed across the outer taxi-way of Hunter AFB. The UFO so unnerved Shade he swerved off the roadway at a right-angle turn and stopped on the grass. 'The UFO then went back up to tree-top level and skimmed off into the distance,' Shade reported."

The Hunter incident was only one of a wave of UFO sightings in the Georgia-Alabama area that went on for 48 hours! Why should so much of the current UFO flap have occurred in Southern states? Perhaps it's the slave-holding, Bible-belt mentality of the South that is most in need of being shaken up, of being brought into the 20th Century.

A confirmed sighting from Northern California, at Fortuna:
"Seven of us saw a UFO, Oct. 5, 1973 about 8:30 p.m., house on top of hill, Annahy Drive, Fortuna. Birthday party supper. I saw it

Nov-Dec 1973 RR, Page 25
from the table, through the window and we all ran outside. The moon was at crescent, to the left of this big, moon-like object, larger and closer than the moon. It looked like a big, October moon at full but with a shadow-like force-field showing. This had bright dashes like iron filings on paper over a magnet, all lines clear and distinct at first. The UFO was moving north and the force-field effect disappeared when it was over Ferndale. All lines disappeared and it became a fuzzy glow, fainter and fainter, finally dissolving when it got out over the sea. Another family member driving up from the south arrived at the home just after the UFO had completely disappeared. He had the crescent moon at his back and saw only the round, clear object in the sky, thinking it was the moon. He wondered about the shadow effect, never having remembered seeing anything like that before. To me it was a force-field, not a shadow. No news of it in our papers."

Ms. G.D., Fortuna, California

UFOs, SPIRITUALISM AND THE MEN IN BLACK

"I have received word from Brad Steiger that he has concluded another manuscript entitled: The Reality Game, and ties UFOs, Spiritualism and the MIB together, to be released in 1974. A couple of my own articles from newspaper accounts regarding the Piedmont, Missouri UFO Flap will be published by Dr. Daniel Fry's Understanding Magazine, October issue. I disagree with your contention regarding the Missouri UFO sightings, especially in Piedmont in relation to U.S. Air Force experimental craft. Maybe elsewhere but definitely not there!

"My personal field of investigation and research deals exclusively with UFOs in relation to hostility, the Men In Black, the spiritualistic and Satanic influences directed from other sources. I have had my own personal experiences with the supposed MIB, but this has neither caused me to discontinue my own research nor to ignore the subject of Flying Saucers altogether. I have paid a heavy price because of Ufology, Mr. Crabb, but it only motivates me more than ever before."

G.J.Z., Menard, Illinois

The mission of the U.S. Air Force is to patrol and protect the skies over the United States. Let us take Air Force brass at their word, AF surveillance equipment can detect the movement of any craft in our skies. We know from personal experience that any suggestion of UFO activity over our home in Vista brings helicopters here within minutes. So if the Air Force claim is true then UFOs which hover a given area for long periods of time without interdiction by AF helicopters or planes must be AF equipment. Or we can take the alternative solution suggested by Capt. Bruce Cathie from his observations in New Zealand, that joint research programs are underway between alien spacecraft and the Air Forces of certain earth nations. Certainly, when UFOs return to a given area night after night, and Am-

Nov-Dec 1973 RR, Page 26
erican citizens by the dozens drive to the spot and watch and wait for hours to see a repeat of the show, such alien spacecraft must have a set of recognition signals by which they are allowed to operate unhindered by U.S. Air Force equipment. Actually, this cooperation and coverup goes back a long, long way.

UFO RESEARCHER HARASSMENT

"If you were watching TV on NBC, Monday, Oct. 15 (we were), you witnessed what must have been a very satisfying confirmation that UFO do indeed exist, and that the 'experts' are no longer laughing. Suddenly they are on the other side of the fence! However, the whole thing spells a lot of trouble for us, unless we act to circumvent it. That trouble, as usual, will come from the same source it always has -- and it will aim at one thing: now that my Flying Saucers magazine has been vindicated, it is quite likely that they will have one more stab at killing it. They've tried many times before. Once, at the outset, with our publication of Fate Magazine's first issue containing the story killed by the Air Force brass in Amazing Stories (1947); and again when both Kenneth Arnold and I were 'audited' by the Internal Revenue Service, and peculiarly enough, each had to pay $1800 in 'tax deductions disallowed'; and several times later on when one issue was grabbed from the newsstands and another was 'confiscated' because we had printed a $100 bill on the cover of Search (it was entirely legal by an act of Congress!); to say nothing of numerous other harassments."

Ray Palmer, Amherst, Wisconsin 54406

Ray's solution to the harassment is to now offer a 24-page Newsletter, in four colors, through 3rd Class mail to borderlanders for only $2 a year. If interested, write to the above address. The Watergate scandals have made us familiar with government snooping and thievery, and entrapment of unsuspecting citizens; but Palmer's education in such matters began in 1947!

A visitor to Ray's office identified himself as a government agent. (Who knows? Was it CIA, FBI, Air Force CID or Man In Black?) The conversation was directed to the news wonder of 1947, Flying Saucers. Ray brought out and displayed Flying Saucer fragments, sent by Harold Dahl from the Maui Island, Washington sighting of June 1947. The fragments were returned to a file folder and dropped in Palmer's files. He then excused himself from the office for a moment. After the interview was over and the visitor had left, Ray checked his files. The government agent had stolen the UFO fragments.

EARLY INVOLVEMENT OF BSRA

Because of his extensive background and experience in occult science, Meade Layne, our founder-director was chosen to come to grips with the 4-D or metaphysical aspects of the Flying Saucer phenomenon. One of the earliest of BSRAssociates was Roger Graham, a Chicago phy-
sicist and science-fiction buff who was well acquainted with Ray Palmer. Graham, or Palmer, took some of the those Maury Island UFO fragments to an assay firm for spectro-chemical analysis. Here are the results as forwarded to Meade and published in "Flying Roll":

High Percentages: Ca (Calcium), Fe (Iron), Zn (Zinc), Ti (Titanium)
Middle Percentages: Al (Aluminum), Mn (Manganese), Cu (Copper), Mg (Magnesium), Si (Silicon)
Low Percentages: Ni (Nickel), Pb (Lead), Sr (Strontium), Cr (Chrom.)
Traces: Ag (Silver), Sn (Tin), Cd (Cadmium)

"Sixteen elements in all," wrote Graham, "all on the same side of the valence scale, with no oxygen, chlorine, or other combiner with it. This precludes any possibility of its being natural. It also seems to me places the stuff outside the range of ordinary combinations known to man, since Ag, Sn, Cd and Zn are blended with Fe, Mn, and other high temperature metals."

WHAT SAYS THE YADA?

Continuing the quote from the December 1947 "Flying Roll":
"Dec. 20, 1947. Present: Dr. P.C. Cosman, James Opdyke, Miss Lane, Meade Layne, Mark Probert (medium). Prior to the Control taking over, ML has been reading aloud the report on spectro-analysis of material said to have fallen from a Loka or Disc (the Maury Island, Puget Sound UFO of June 24, 1947). The medium suddenly became agitated and the Control took possession abruptly. This control is known only as Mr. X, but has shown himself to be highly intelligent and widely informed. He has been at least 300 years on the 'other side' and spent many of his earth years in the Tibetan monastery of La Tse. (Later, X revealed himself as the Yada di Shi'ite.)

Dr. Cosman: "Come in, Mr. X, you are welcome. You have control of the body. Can you talk to us?" (transfiguration of medium's face)
Mr. X: (impatiently) "Go on, please, go on! Repeat what you were reading, please."

Meade Layne repeats analysis quoted above.

Mr. X: "That combination ought to make it plain to you that these materials have been brought together out of the Ether. Also note that they are free from dirt (chemical ash). This is a synthetic material. You will find that such material could not have been shot up from the earth (by volcanic action) nor could it come from meteors. We have told you often -- there are worlds within worlds, and when conditions are right and the time is proper the Ethereans bring into action this ether-constructed matter and project it into your material world. This material could be used for the skin of planes. It is highly heat resistant; (it could be used for) ships and all kinds of war potentials. Its specific gravity is high; it is very dense; and it is highly resistant to bomb action. IT COULD BE USED TO WARD OFF
THE EFFECTS OF THE ATO-BOMB, THE GASES WOULD BE ABSORBED."

Meade Layne: "Will it stop Gamma rays?"

Mr. X: "Yes, I do mean that this material will resist the effect of the Gamma ray. Yes, certainly you can verify that experimentally."

The UFO fragments analysis is also given on page 107 of "The Coming of the Saucers" by Kenneth Arnold and Ray Palmer, published by Palmer in 1952. The fragments, heavy and almost black, were discharged from a 100-ft. diameter Flying Saucer hovering 500 feet over the beach of Maury Island, Puget Sound, the afternoon of June 24, 1947. Harold Dahl estimated that tons of them fell on the beach, in the water and some struck his harbor patrol boat, damaging it. His dog was killed by a falling fragment. His son was struck on the arm and badly wounded. Dahl's boss, Crisman, was a science fiction buff and admirer of the Cavern world material appearing in "Amazing Stories" magazine, written by Richard Shaver and published by Ray Palmer. Dahl and Crisman sent a cigar-box full of the smaller UFO fragments to Palmer to back up their story of the sighting.

Army Intelligence officers were called in on the sighting in July 1947 after Ken Arnold went to Tacoma, Washington to investigate it for Palmer. They were given UFO fragment samples also; so in addition to the UFO fragments stolen from Palmer's office files by a government agent, there was this other Maury Island evidence of the reality of UFOs in the possession of our government as early as 1947. The fragments are probably now in the possession of the U.S. Air Technical Intelligence Command at Wright Field, Dayton, Ohio. In New Zealand, Capt. Cathie was told by a U.S. Air Force officer that our government has a staff of thousands of scientists at Wright Field, on a 24-hour a day basis, investigating the UFO phenomenon, and has had since the early 1950s. It's a foregone conclusion that they have cracked the secret of UFO lift and propulsion long, long before now!

WHEN DID THE UFO COVER-UP BEGIN?

In "Coming of the Saucers" Ray Palmer observes that the American Intelligence community was alerted to Flying Saucers at least six months before the famous Ken Arnold sighting of June 27, 1947. This was because the Army Air Force officers and other government agents who called on him seemed already well-informed on the subject; they also were ready to put into operation a carefully planned program of cover-up. Dan Fry dates it back to December 1945, following the disappearance of Flight 19 of Navy torpedo bombers off the coast of Florida in the now famous Bermuda Triangle. In his Atlantean Fire Crystal talk, Dan says the intensive government investigation of the disappearance of the Navy planes was the beginning of the Central Intelligence Agency. Whether the CIA actually began then or later developed out of the World War II OSS (Office of Strategic Services) isn't important. What is important is the occult connections of its leaders. General Wild Bill Donovan, head of the OSS, was a devout
Irish-American Catholic, and one of the chief "brains" behind the organization and management of the OSS was Wall Street banker Douglas Dillon, a Polish Jew by ancestry. Here again is the suggestion of the Ages-old unholy alliance between the Roman Catholic Church and their fiduciary agents in Europe, carried over into modern times by the western branches of the House of Rothschild. Behind them in the shadows are the two priesthoods, the Sanhedrin and the Jesuits. Dillon was central to the conversion of the OSS, a super-secret spy agency of World War II, to the Central Intelligence Agency, a super-secret peacetime spy agency. Later he was Secretary of the Treasury under Jack Kennedy.

SLEEPERS AWAKE! 1952.

The Guardians made a really serious attempt to awaken the leadership of the nation to their presence and reality in July 1952. UFOs appeared singly and in groups over the Capitol and the White House for hours one Saturday night. The appearance made headlines across the nation. Even President Truman read them, and asked for an explanation from Air Force experts. Chief propagandist Capt. Ed Ruppelt was sent to the White House to quiet the President's fears by telling him the lights seen in the sky were the result of ground lights being reflected off the bottom surface of a temperature inversion over Washington. This satisfied Truman and he went back to sleep. The secret government of the United States had decided that the President had no "need to know" the contents of the Flying Saucer Bureau's secret files.

The contents of those files and their cover-up "top secret" classification were well known to the Guardians, however; thus the logic of the Guardian statement to the Williamson contact group in Arizona, Aug. 31, 1952: "Certain great powers in your world wish to see us go away or see us destroyed. Neither will happen. These powers fear us, and when you fear anything you hate it. All planets have come to help certain ones on Saras (earth). Those of right mind are one with us! We will not harm anyone, only their own thought can do that. Evil destroys evil! Bounceback! (or as we would say, Karma) Certain seeds have been placed on Saras. To the apples we salt, we return."

SLEEPERS AWAKE! 1954.

Then in the spring of 1954 the Guardians made an even more determined effort to awaken America's leaders to the reality of the UFOs. Martian Saucers landed at Edwards AFB in the California desert and dozens of Very Important People were invited to the Base over a period of weeks, maybe months, to personally see them. We believe this is one of the main reasons for President Eisenhower's vacation trip to Palm Springs that spring, an easy, 100-mile helicopter flight away from Edwards. Later, the Probert Contois told Meade Layne that the President did not personally go out on the runway to see the UFOs,
his close advisers were against it. Through binoculars, no doubt, he could see the UFOs, and could also see his advisers moving around among them for close inspection.

It was BSK Associate Gerald Light who wrote to Meade Layne of the situation at Edwards AFB, or Muroc Dry Lake as he called it, and said a tremendous controversy was raging among the VIPs as to how much of this should be revealed to the American people. Later, the Probert Controls told Meade that the greatest pressure against any revelation, on the part of the President, came from Wall Streeter Barney Baruch and from "certain high officials of the Roman Catholic Church". Be it said to Ike's credit, he remained loyal to the Industrial-Military-Religious oligarchy which planned and financed his campaigns, and never broke Security on the Flying Saucer story. The $64 question now is: Was then Vice-President Nixon one of the VIPs who made the pilgrimage to Edwards for a look-see at the Visitors?

**WHAT IS WATERGATE A COVER-UP FOR?**

"With the Watergate show going on. What is the Show a cover-up for? Is something brewing elsewhere that we have missed?"

R.D., Clarence, Iowa

Here are a couple of answers, one from an Associate and the other from the daily paper:

"And how about King Richard's latest? I have a German neighbor (here 17 years) who says if they let him get away with this, that's just how Hitler got started. Does the House have guts enough now to impeach?"

B.Z., Harbor Beach, Michigan

**ALAMEDA, CAL., Nov. 3, 1973, (AP) -** "President Nixon might 'manufacture' an international crisis and launch a military 'coup' to maintain himself in office, Rep. Fortney H. Stark (D-Calif.) said Friday. But Stark, a longtime Indochina war opponent and former banker, said a takeover would fail because Mr. Nixon would not have rank-and-file military support. Stark spoke to about 250 supervisory personnel at Alameda Naval Air Station.

"'Considering the President's irrational behavior and the existence of an aristocratic military elite in this country, it is not conceivable that a military takeover could be attempted,' Stark said. 'The President could easily manufacture an 'extreme national emergency', tell his generals to take command and send Congress and the Supreme Court packing. But there are too many good officers who put the country ahead of self and politicians. They would rebel against the commander-in-chief and keep the republic from falling into military hands.'"

Germany in 1932, the Philippines in 1972, Chile in 1973. Can it happen here in the U.S.A? Let us hope not!

MYSTERY OF THE BERMUDA TRIANGLE:
PEOPLE, PLANES AND SHIPS DISAPPEAR
WITHOUT A TRACE IN THE CARIBBEAN
TOURIST AREA

in the area, they began disappearing as well. They too, in most cases, gave no distress signal.

In May, 1968, a submarine disappeared, and in July, 1969, five ships were found west of the Azores. All were deserted.

The documentary evidence is overwhelming. But what is going on in the Bermuda Triangle? What is causing crews to desert their ships and planes to vanish without even a cry of distress?

Many experts believe that some occult phenomenon might be at work. How else does one account for a ship loaded with passengers disappearing on a day when sailing conditions are perfect, without sending an SOS, and without leaving a trace?

THE BERMUDA Triangle includes the area within the lines drawn on the map
by CLIF LARSEN

The Bahamas, along with most other popular Caribbean vacation spots, are located in the notorious Bermuda Triangle, an area where a series of the strangest disappearances in history have taken place—and are still occurring.

The Mystery of the Bermuda Triangle was the subject of Dan Fry's lecture at Esther Ellsworth's highly successful Understandorama seminar, Oct. 28th. We were told that a huge Atlantean Fire Crystal is under the ocean in that area, but still effective, still energized periodically by natural power sources. That period seems to peak every December-January.

Remember the Transporter Beam of the television show "Star Trek"? The Beam was an electronic device for moving members of the space ship down to the surface of a planet and back up again, instantaneously. Well, Mr. Fry says that the Atlantean Fire Crystal was built

Map locates various areas in the South where reports have been made as to the sighting of UFOs.

San Francisco "Examiner", 10/5/73
to perform a similar function: instantaneous transportation of merchandise or cargo from the surface of the earth to huge space ships hovering hundreds of miles overhead.

Because the Crystal is indestructible, and because it is energized from natural sources, it continues to function, under water, over 11,000 years since the great, worldwide catastrophe we know of as The Flood.

NO INVESTIGATION OF UFO SIGHTINGS BY THE AIR FORCE

United Press story accompanying above Saucer photo said: "But military spokesmen at Georgia's two main air force installations, Dobbins Air Force Base in Marietta and Warner-Robins Air Force Base, said there would no investigation of the sighting reports... Georgia civil defense public information director Colonel Douglas Embry said all the UFO reports have been logged 'but we don't do anything with them or publicize them. They seem to have gotten enough publicity already'."

THE VARO EDITION OF "THE CASE FOR THE UFO"

Gray Barker, president of Saucerian Books, Clarksburg, West Virginia 26301 (PO Box 2228) announces that he is bringing out a reprint of the Varo edition of M.K. Jessup's "The Case For The UFO". $25.00 retail but a net price for a limited time only of $12.50 to Flying Saucer researchers. Gray speaks of Jessup's suicide in 1959 but we believe now the UFO researcher's "suicide" was arranged by agents of Murder, Inc., with headquarters in Washington, D.C.

Our Guardians arranged for us to be given Jessup's copy of the Varo edition of his book when we stopped at Virginia Beach, April 1960, to visit Bryant and Helen Reeve. Jessup had left the book with them before he went to Miami for his rendezvous with death, saying that he had to get out of Washington. It had become a police state! We didn't realize how "hot" the limited Varo edition of "The Case For The UFO" was (25 copies) until our Washington hostess, Clara Louise

Photo of alleged UFO was taken by publisher Chester Tatum near Camilla, Ga.
John, demanded that we turn the book over to her and her boy friend. He looked the government agent type, sharp, backslayer, in his mid-thirties, driving an inconspicuous Chev sedan. Clara Louise, editor and publisher of a Saucerzine, "The Little Listening Post", was a witch in her mid-fifties! Now, it is obvious that the "boy friend" was indeed a government agent, detailed to keep us under surveillance while we were in the nation's capital. He didn't seem to have anything else to do, no visible means of support.

With so much pressure on us to give up the UFO book the best thing to do seemed to be to get it out of our possession; so we drove to the Arlington Post Office and mailed it to ourselves here in Vista. The book never arrived here. We are now sure that Clara's boy friend tailed us to the Arlington PO, went in afterward and demanded it from the postmaster, "in the interests of national security" no doubt.

This 007 tried to buy us off after hearing my UFO talk at Theosophical headquarters there. Only a handful of people were present. He said we were working for peanuts. We can use you in our program." I was given a downtown Washington address and told to stop by there the next day, to which I readily agreed. Judy's heart dropped a mile. But I had no such intention, of course. The next morning we thankfully packed up early at Clara Louise John's, ignored the agency address, and took off for our

(San Diego City College, Sept. 27, 1973)

Women's Wire

By Diane Shea

Thursday at noon, over one hundred students assembled in Room A201 to take a one hour trip to Tibet. The lecture on Metaphysics, was free to students, sponsored by the Performing Arts Workshop. The faculty advisor, Alicia Crowe, invited Dr. Riley Crab to speak. Dr. Crab is a doctor of Metaphysics in the Society of St. Luke the Physician. He shared his first hand knowledge of psychic healing and rare slides of Tibet.

Seeing some of the old slides, as well as the more recent ones, circa 1950's (before the communists moved in) helped to put changes in Tibet into more than a political perspective. It seems as though the magic, long practiced by the monks in Tibet, had fallen to the level of private property rights, down through the ages. Power corrupted them. The monk who could perfect the magic, would tell his followers that he would be back in a few years, and where to find him, and then die, willing all his worldly goods (quite a few for a monk!) to some future child. In a few years time, in another part of Tibet, the followers would go to find the master. When found, in the form of a child, he was able to remember his former life, identify objects, and take his place once more as the master. From what Dr. Crab said, the state of Tibet in the '40s and '50s was disgusting. So spiritually, as well as physically, they were ripe for a community take-over.

There was a spontaneous round of applause when Dr. Crab showed a slide of a Tibetan woman with her three husbands; showing that the consciousness of City is right on with Women's rights. This custom is made workable by the fact of their remoteness, causing husbands to be absent for 3-4 months at a time, on packing trips. The family had one son.

Dr. Crab spoke at great length about Tulku's, a person who is able, while living on this physical plane, to create another body of light.

Preparing this other body for his consciousness to use, when the body now in use is worn out. He stated that he believed that this is what Jesus and other enlightened beings did. But you can only speak of it to the non-initiates in parables.

In spite of the heat and the overcrowded conditions (indicating an active interest in more programs of this type) it was a good hour, well spent.

Thanks to the Performing / Workshop for bringing this stimulating speaker to our campus.
next lecture engagement, with Lois Jessop's New York Saucer Information Bureau. We were glad to get out of the Police State, too!

At this point in time we wonder how many promising UFO researchers have been bought off in this or similar ways. Capt. Bruce Cathie had an offer from American scientists in New Zealand to join their group, at a lucrative salary. He refused, of course. Others have actually become government propagandists. The heavily negative, hopeless tone of their research conclusions is one key to their duplicity. In the case of the late Clara Louise John, our Washington hostess, we wondered for whom she was "listening" and for how much?

NEW CLASSES IN THE WESTERN MYSTERY TRADITION

Sunday afternoon, 1:30 p.m., Nov. 25, 1973 we start a new series of lectures on the Kabala at the METAPHYSICAL CENTER, 758 West Highland Ave., San Bernardino, California. The Center is the service project of Ben and Barbara Hanks. We expect to present one lecture a month there on the study and practice of occult science. Opening talk title is: "The Three Great Occult Traditions". They represent the triune Power, Wisdom and Love of the Solar Logos. They stemmed from Atlantis. We see them today in the Pagan power practiced in Indo China, the Wisdom religions of the Orient (Buddhism, for instance), and in the Love and Brotherhood principles developed by the Essenes and the Gnostics in the early beginnings of Christianity in Antioch and in Alexandria. The talk is illustrated. There will be some Workshop practices in concentration, relaxation, rhythmic breathing, etc. Donation has been set at $3 per person.

LETTERS FROM CHRISTOPHER - An English schoolboy, drowned at sea in April 1943, tells his mother of rebirth out of the flesh, and of the Birth of the Christ-child in his heart as he takes up the service of rapping with English, Russian and German soldiers who have suffered similar, violent rebirths. Most important is Christopher's description of learning to use color keys and color rays to heal the wounded, shattered emotions and minds of those he tries to help. It takes an expert blending of positive colors to neutralize the fear and hate in the auras of victims of war. Christopher's interplanetary trips to Mars and to the Sun behind the sun, Sirius, are of especial interest. On Mars Etheria, Chris and his younger brother Lancelot, observe development and use of Color-Ray Keys in Etherian laboratories. These ideas were brought back to use in their own Color Therapy here on Earth Astral. Book is illustrated with picture of Chris, drawings, indexed, 110pp... $4.95

FLYING SAUCERS AT EDWARDS AFB, 1954 - Compilation of BSRA material on the secret landing of UFOs at the California base, including Gerald Light's letter to Meade Layne describing his trip there, also Inner Circle comment on the same and on anti-gravity. Illustrated with pictures of Flying Saucers... $1.50

Nov-Dec 1973 RR, Page 35
TULKUS, A TIBETAN INITIATION - The only way to get out of the world alive is to construct a Solar Body or Body of Light with the mind and use that as an immortal vehicle of consciousness. Tibetan Lamas perverted this doctrine, this "thirst-quenching beverage of immortality", as Blavatsky called it, into a self-reincarnating maintenance of power and wealth as heads of their monasteries for hundreds of years, thus stifling all growth in that tragic nation. This makes fascinating and instructive reading to students of the borderland. This is the Way of the Yogi, in our Kabalistic Lesson Series. Illustrated. $2.00

On Cassette tape, $5.50; on 5 in. reel, Monaural, 3 3/4 speed. $5.50

CLOSED CLASSES WITH THE YADA - These Classes offer an unparalleled opportunity to start occult studies and follow through with a Master teacher, the Yada di Shih'ite, speaking through Mark Probert in San Diego in 1967. CLASS NO. 3 is now transcribed. It includes such subjects as: All Is Suggestion, The Futility Of Charity, Back Up Suggestion With Action, Counteracting Negative Suggestion, The Excess Acidity Of Mediumship, Psychic Sensitivity, Know The Body First, Purifying The Breath, How To Awaken The Sleeping Creator, Total Reaction To Thought, Human Helpers In The Animal Kingdom, The Animal Part Of Sex, The Marvelous Freedom Of "I Am-ness", You Do Not Live In Your Body, Sound Is Thought, What Is Time? Illustrated. $2.00

On Cassette tape, $5.50; on 5 in. reel, Monaural, 3 3/4 speed. $5.50

BEGINNING AND CLASS No. 1, $2.00; CLASS No. 2, $2.00; Cassettes and Monaural tapes same as above except that Beginning and Class No. 1 require separate tapes at $5.50 each or $10.00 on 7 in. reel.

THE OTHER MEANING OF CHRISTMAS - This gives the hidden side of the Winter Solstice Festival with its five-fold cosmic cycle of Nativity, Conversion, Baptism of Sorrow, Transfiguration or Upliftment, Betrayal and Crucifixion. 41 pages, illustrated. $1.50
