Brotherhood Doctrine

ARTICLE 1: We believe in a Universal Spirit, Divine Architect, Supernal Intelligence and Cosmic Law, which guides and directs all created things.

ARTICLE 2: We believe that all things came into being through the fiat, or Word of the Divine Intelligence.

ARTICLE 3: We believe that man was once perfect, in unity with the Supreme Intelligence, but fell from his high estate.

ARTICLE 4: We believe that man's purpose in being, is to so order his life that he will come into at-one-ment with the Divine Spirit.

ARTICLE 5: We believe that man continues to live, life after life, until he masters, or overcomes life, and goes out no more.

ARTICLE 6: We believe that all creation is moving toward a great goal of perfect harmony and order, which will some day be attained.

ARTICLE 7: We believe that the Sun of God has manifested in the material world as a light in darkness, to show the way to Illumination and Oneness with the Divine Spirit.

Interlocking World Spaces

By

The Supreme Voice
(DR. M. DOREAL)
(Part One)

Dimensions are separated by qualities and curves of space. In addition to that you will remember that in a previous discourse on matter I said that comparative to their size, there is as much distance between the electrons composing an atom as that which lies between the planets of our solar system. In comparison to the size of the electrons and its nucleus, a solar system is merely a gigantic atom.

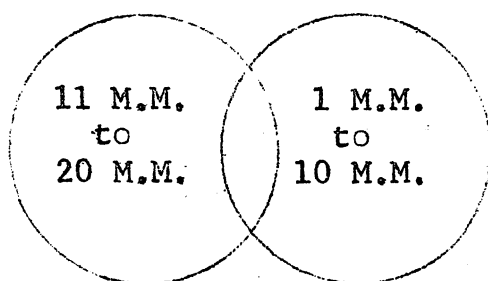

Let us examine, in thought, a piece of chalk - if we could become small enough, we could pass through the spaces between the atoms and electrons of the chalk, and each electron would seem to us to be millions of miles away. Yet, because we are on the same octave of vibration, in the material world the chalk appears solid to us. We know that certain things can penetrate solids; that light pours through the glass of the window, because the vibration of light penetrates between the interstices of

the atom without being deflected by it. The apparently solid matter that lies around us, and of which we are a part, is actually no more solid than the ether which lies between the planets. The air we breathe is composed of atoms also but so diffused, and seemingly intangible that we do not feel it as solid matter. That is the reason we feel the wind. We can feel the bombardment of the particles of matter in the atmosphere as it strikes our bodies and some particles actually pass through our bodies. Potentially and scientifically it is possible for there to exist in the same space, various forms of matter, each manifesting on different octaves or planes of vibration. In other words, the space that we are in might be literally in the heart of a mountain, or, in another octave of vibration might be in the ether of space, suspended between other planets. Interlocking worlds may be present, unseen, because of their difference in vibration.

Compare these to our own planet and the planets that revolve around our own primary. It is possible for two or more earths to be occupying the same space, but separated by vibrational quality. There might be other atoms, vibrating on a different scale or plane, which would be matter on its own plane, as this is on our plane, each interpenetrating the

other. Now it is also possible that in what we call empty space, between the planets, on other octaves of vibration, there are other planets, because our light is all reflected within a certain octave of vibration. We cannot see them because the quality of the energy of the sun which is reflected to us as light, passes through other forms of matter, without being diminished by its passage, while the light that passes through our form of matter may be deflected by the other interlocking world without being reflected, or diminished by its passage through our matter. The occultist knows that there are worlds within worlds.

We will say that this circle is our earth. Now, it might be that interpenetrating through a part of our earth is another earth of another vibration. Say it vibrates from two vibrations per second. We will say that another one begins at 11,000 million millionths and

CO-ORDINATES
OF INTERLOCKING WORLD SPACES

goes up to 20,000 million millionths. Each of those can occupy exactly the same space, but because every quality of their being is entirely different in nature, neither can be aware of the other.

The Brotherhood Newsletter

Dear Students and Friends:

We are hoping for some sunshine after our past weeks of snow, rain and cloudy weather. Even though we love the snow and appreciate the much needed moisture, we also love the sunshine. The sun is known to the deep metaphysical student as the gateway to the greatest of the heaven states. The energy and radiance of the sun gives life to the earth. Without its radiance all things on earth would perish. It is natural that we should love the sun and glory in its rays of energy.

The Brotherhood is expanding and growing in membership all over the world. We are especially pleased with the growth of membership in the Avatar Unit of Study. We wish to especially thank you students who have made large contributions to the Avatar. Although there is no charge for these monthly lessons somehow we do have to meet the expense of their publication and postage. Since 1930 when Dr. Doreal first began his correspondence work, there has not been an increase in the cost of the College and Church lessons. The Church lessons of course, are free-will contributions with a minimum of \$1.00 per month. The College Lessons are \$5.00 to join and \$3.00 per month as long as you are receiving lessons.

We, the staff, are very proud we have not been forced to raise these prices as set by Dr. Doreal. We again wish to express our appreciation to the students of the Brotherhood, who have so generously contributed. We know that each and every contributor is greatly blessed on all four planes of existence.

Long ago, Dr. Doreal designed a pin in symbolic form to be worn by Brotherhood members. It is in the form of a double triangle of gold on a field of blue. It is surrounded by a circle of gold, with the Crux Ansata on each side also in gold.

This little pin is very beautiful. It is made of solid gold and has wonderful vibrations of peace and protection embodied in its symbolism. It makes a wonderful Christmas present for Brotherhood members.

In Cosmic Harmony,

ASTRO CHEMICAL ANALYSIS

By DR. M. DOREAL

This very scientific book gives the Astro-Chemical Analysis of the twelve different chemical types according to their Astrological signs. Through chemical and spectroscopic analysis, twenty-two elements are distinguishable in the human body. One hundred persons born under each sign of the Zodiac were examined in the formulation of this analysis. The Astro-Chemical Analysis is combined with a knowledge of bio-chemistry and endocrinology and definite analysis of the type.
