MYSTERY

OF THE

THIRD EYE

The Light Revealed

This was a Lecture on 26th April, 1964, delivered by Ra-Men-Ra, the Voice of the Masters, through Gladys J. Spearman-Cook.

HIS IS A SUBJECT THAT HAS experienced much discussion, but very little investigation from the point that it is not rightly adjusted or fully understood. To the professional world it is the pituitary gland, which they believe plays a very big part in the adjustment of the body; but any further, not much. To the Occultist, the Third Eye that gives to the soul the mystery of SIGHT; but to the Mystic, the mystery of the Life Spirit, or the fast moving

vehicle, that is vying for power as the approaching EGO. Therefore the temple of Lakme where the Bells of yesterday toll forth their message for today. Then of course we must not lose the understanding of the Eye of Aldebaran, situated between the Eye of the moon-god on the left, and the Eye of the sun-god on the right, with the third Eye as the Eye of the Bull awaiting re-adjustment as the birth of the Solar Lord from his Sire Cronos. It is here that the physical eye quickens the pulses according to how much these sensory principles are tuned to give unto the dancing Ajna, the seductive action to woo her lord into birth. By this the dance of the Willis take place, and the beam is re-adjusted, and the bull starts to plow. The bloodstream goes up to the head and makes this circle at a point where there was the fontanelle of the child, and which becomes the shaven tonsor of the monk: they keep it shaven and open so that there could be a connection with the Heights and that there was no animal tissue in the form of hair to intervene between them and their Lord: that was their theory. There is a great deal attached to this, so do not discard it, and do not ridicule it.

Now when this is dancing into its full action there is a continual revolving and a-dancing of the mind up into the Heights, touching Ain Soph; picking up the abstract and dancing down again; and it is all by vibration.

But what we have to fully understand is the fact that both these bodies, the pituitary and pineal, the 6th and 7th Chakras or fiery Wheels, are dormant until set into motion by development of mind through active study and expansive thinking. But what the soul has to make sure of is that the Virgo mind, both fixed and fluidic, is not playing for self-importance in orthodox righteousness, and holding the fort by continually hedging, never allowing you to get any further than the second decanate of the Earth construction, hence you are never able to dance up to the Heights, because she never allows you to get free; which means that she keeps to the old mind ideas, and never lets go.

THE OPEN EYE

THIS Mysterious Japanese picture, *The Fire Quest*, captures the extreme mystery of the awakening of the 7th Chakra, the Sahasrara or Lotus, the Pineal. Here the Spirit is seen to awake and the soul henceforth receives the inflow of Power through the open Fontanelle, the circle of Willis, which descends through the pineal which in turn issues forth of its Dew to mix in holy "marriage" with the pituitrin of the Ajna or 6th Chakra. If the soul has by mind awakening and personal sacrifice raised his sensitivity to this 7th plane, then the Powers of the Third Eye are his, and as the Prophet and Seer of old, he leads the World, a Light in the Darkness, albeit unknown to them.

THE TEACHINGS OF UNIVERSAL PHILOSOPHY, by James Averill, 16 & 14

Editorial ♦ ♦ ♦ The Road to Live

MANY a new reader must have said to himself why should I have to do all this, or why should I have to sacrifice this and that? Little does he know who that 'I' is, nor of that which he is composed. Wrapped and buried in his coats of animal skin the average man sees only the beast garment he reflects and has created. The meaning of mind is the action of his mundane brain, according to him and naught else. The cycle of self is womb to the tomb, and pleasure and more ways to exploit desire is his bent. What does Universal Philosophy offer to counteract the vice of earth? Why should a new reader become its supporter?

EVERYWHERE hospitals, with their attendant disease, split-minds, as well as many a deformed child in its care, are increasing daily; the necessity for drugs is becoming so great that last year over 800 million sedatives were subscribed by the National health Doctors of Britain together with 350 million stimulants and 250 million tranquillisers.

If a few days were spent anywhere in the Western World in hospitals, old peoples homes, in spastic and mental establishments as well as visiting a few more devastating sights of deformed humanity, it would not fail to stimulate the question.

"Why in God's name should all this take place?"

Why do statistics show that in spite of better drugs, hospital care etc., ill-health is vastly on the increase?

What am I doing today that will reap a sudden and bitter harvest tomorrow?

Why is all this happening?"

But if that man searched more widely he would find that many a more disturbing thing is happening, as is daily reported in the Times and others of its standard.

But why call on a God or indeed blame a God for man's state of chaos?

Does a man call on God and blame him when he sees a field of potatoes growing in the fields when he had expected to reap wheat?

No, for he knows if a man sows potatoes no Law of any universe will cause wheat to grow.

If a child eats an abundance of cakes and cream does a mother stupidly call on a God to ask why such a thing is happening when the child becomes sick?

Does a farmer who refuses to obey the rule of husbandry suddenly curse a God when his farm becomes a dust bowl?

If not these then why should any man blame any other thing being or agent as being the cause of his own condition other than his own action?

UNIVERSAL Philosophy teaches the awe-inspiring truth that man is the

fontanelle entrance of the Circle of Willis (see diagram on page 13, col. 2) and be set aflame by the act of ignition and perpetually fuelled by the seminal fuel at the base of the spine.

This is the mystic allegory of the Dragon who spits out Flame out of his mouth. Thus in awe it enables the man to receive the Atomic Proton Nucleus and set alight and release the energy of the Proton powers itself, the very thing that the atomic scientists are seeking to capture in mundane earthy state.

This is Man's Heritage. This is his Purpose. He is a Stellar channel for the

take uphill all the way, alone in the heights of mind, the winds of mind inflow dynamic and continuous, the road ever unknown and untrod, but the Path and Destined Road of every man to get out of the valley of the animal-man creation.

Not one who has tried to conquer the ordinary daily habits of self will say that this description is one bit exaggerated.

A Hard Road?

A Long Way?

A Steep Hill?

Yes all the way but the only path for man to extricate himself from the rotting pollution that is rapidly creeping into all flesh as disease of mind and body, in man, animal, and vermin. How far far better to willingly have the guts and courage to consciously fight under the guidance of a Teacher with Teachings of such richness and abundance than to live a few short years of a round of doubtful pleasures with a heritage of mindlessness, stagnancy and stench of body, with an unendurable pain to follow. But in the latter case it would not end there as it would take many lives of terrible karmic struggle and fight with intense suffering to conquer the effects that those few licence-free years left.

THIS is the Message that Universal Philosophy gives to all who read this for the first time.

Which is the road to choose?

Disintegration through decay disease drug and death, or Integration through the unity of Mind and the dissolution of body in the chemics of alchemicalisation, the very Proton Flame of Mind Light cremating the density of the flesh and raising its atomic life onto a new plane of manifestation?

And the longer the choice is put off the harder will the Road become and the heavier the shackles of iron, self-will. So all who have the courage to start to become responsible as Cosmic Channels should not hesitate.

Surely all can see the richness of this road, with all to gain and 'nowt' to lose?

There is no place for a personal god or personal egoism but the humble learning of the Cosmic Laws for if man is composed of Its Atoms of Spirit Life then by what right has he to hold them in subjugation; and any mind opinion of earthy construction or form i-want imprisons them and man takes on a false 'face.'

UNIVERSAL PHILOSOPHY IS THE ANCIENT JASPER ROAD OF SPIRIT RICHNESS WHEN MAN UNITES INTO MIND, THE SOLAR LOGOS.

Next Month

THE SECRET OF THE SOLAR INBIRTH

TEACHING how man can draw in the Cosmic Elements and unite with his own generative powers, and, via alchemicalisation, build Mind-Intelligence, bringing forth the power to Agg. The driving Force of the Super Mind.

vehicle of a system of Universal Creation by the very Elements of the Cosmos; that the very atomic elements in man and nature are composed of imprisoned spirit life; that through his powers of Breath and Life he can draw down into his body the vibrational Rays of the Outer Worlds of the Milky Way; that he is endowed with a special fuel force—his seminal or ovum seed—which if pipe-lined up the spinal column as the kundalini can build a plane of Intelligence which as a separate Creation of Being can become the channel for the free Entry of Spirit Life without the danger of it being imprisoned.

All this is taught and far far more wonderful truths are hidden immediately from the perceptive grasp of the new seeker. But if that above were not enough to answer why every new reader should not become a reader and active supporter of the Teachings of Universal Philosophy it teaches one more Truth, yea! ten times more awe inspiring than any.

It teaches that not only is the creation called man the holder of special holy fuel as his seminal or ovum seed but that he as such creation has the power to direct and create special conditions of action and mind whereby he can generate as a sparking plug in a car an ignition which sets afire the Atom. This very action enables man the creator to be the channel of the Proton Cosmic Life entering the Earth's atmosphere to inflow direct into him through the

transmission of Pure Spirit life, the proton dust, the Cosmic Rays, into the Flame of the Solar Mind via the human crucible.

THE Teachings of Universal Philosophy encourage each man to be his own fighter, to have the guts and courage to face himself (see picture on page 8, col. 1), to be prepared to be stripped skin by skin of the tendencies still alive but under the ground as vermin life. Very very few indeed have this courage as their sense of Ego is far too great. Every pupil is taught the necessity to have as pure a channel to hold of this Inflow from the Outer world as it is able to command. It is taught above all of the simple laws of Nature and Cosmos so that as the Occult Farmer or Husbandman he knows of what to sow and the time of the Heavenly Seasons of when to sow which seed.

The vital necessity is to know of the Witness of the Stars. Thus his first duty is to learn of them and his own map. As the husbandman of old each man becomes responsible for his own welfare, health, service and mind acumen; knowing of his Destiny as the agent of the cosmic rays he takes the action necessary to avoid all illnesses mental or physical which would handicap his Pathway.

The road is not for the rich and righteous but for the rough and the ready, the willing worker of the fields of self. Like Edmund Hillary and Tensing found Everest it is a tough hard road to

THE THIRD EYE

Continued from Front Page

This she can do, and does, until she carries her man-child in her womb, and then she awakens and seeks, if only out of ego, to lay it at her lord's feet. Yet if she should become as unto Titania in the Midsummer Nights Dream, she will hold the boy unto herself, and bring Puck, the roguish mind, (see plate, this page, col. 1) up to the high bank where the wild cowslip grows, and fall sadly in love with Bottom, the animal-passions of the beast in the depths of delight, (see plate, this page, col. 4). It is amazing of what a left-hand turn can produce in the vision of illusion.

PUCK
the roguish mind

To do this, the seed wood forth from the pineal unites with the pituitrin excreting from the pituitary, and becomes the sperm sent forth from the yod of God to feed the soul in its self-supporting right as the son of Man. This goes down to the depths and becomes the new found theory of possibility to the personality below. This makes its way down through all the seven Natures, which are in themselves the nucleus of the blood-stream, the homo of the man.

So it can be seen, that if man does not nourish his own blood-stream, which is the unity between heights and depths, he is unbalanced, and is living down in the depths with the mino-taurus, his own idols, which he erects as his own self-supporting god. This is the golden calf as created by Aaron.

If the pineal can be seen as Polyphemus, the many shining, or creation of many states of shining, that of TIME, or the root of Being becoming polished, then the student may understand a little better the

So the first angle we had better play with is the possibilities of this mysterious "wee" body, from a point of the physical attributes, and what it gives unto the soul in its etheric life-giving properties.

Remember that most of this is working in the etheric, and that is what is going to be the trouble in the future; man with etheric sickness that is having its effect upon the physical; but they will not know what is wrong with them at all. So they will merely be given drugs or electrical treatment. That is what is going to happen; trouble with the etheric body; not the physical at all.

Unfortunately not very much is known beyond the fact that it is situated in the sphenoid bone in the pituitary fossa, or sella turcica, and controls the hormones of the body. But actually it is the **SOLE ANSWER** to the majority of the problems at the present moment; for it being the offspring from the sight, if blind, all goes lame.

The Pineal & Pituitary

THE medical world believe that this gland produces the hormones; that is not so; these are produced by the pineal, the Norm or the pomegranate, and passed onto the pituitary; for the whole of the glandular system is a linked-up-chain that works, often by osmosis, each in conjunction with each other. (See the plate of the brain on this page).

That is why, if one constituent is deficient or excessive, the balance is upset, and the cells suffer. These glands pick out from the blood the solar essence to repair the secretion of the gland, and this is Ra in his Af boat sailing through the waters bringing alchemicalization to all the tribes and the hosts in the nations of the soul.

Nothing can pass through the walls of the blood stream without 'breaking' the bloodstream or 'breaking' the forms of the cells, or the cells of the veins; it merely passes through from the spleen, and has to do with the changing from that of the Spirit into the physical.

Now why have they not thought of that? Why are they talking about osmosis? They talk about osmosis of the brain, and they talk about osmosis in the placenta, passing through a solid wall, yet it passes through! Why did they not get some idea of how, why, or wherefore? So the whole system of the glands is linked up together.

big black rock, now highly polished and the basic creation of man himself.

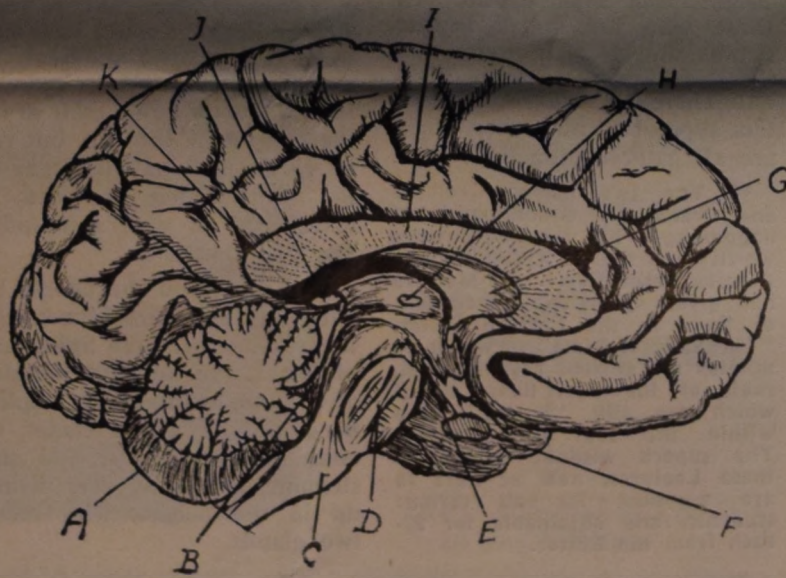

This is mythically the rock that has been collecting the wealth of wisdom over the ages; so it goes to indicate that what was gathered in the Medo-Persian era*1 was but the basic of the experiences of life that man had to gather to create the creature called man. But his work was to expand it into a state called MIND which was the spiritually raised-up man; but unfortunately he looked in the direction of illusion, and built an accentuated desire body instead.

Therefore he is not revolving the Drosos Dew, which is the life-giving essence of the fiery EL, being the very nucleus of God himself, Truth, Life; man born of the Christos radiance; and now as he comes to the state of Relativity, (see diagram on page 6) he is finding himself in a state of drought.

This Os is in his very depths, in the very nucleus of his "fire," his seminal fluid; and unless he brings this "serpent-fire" up to the heights he really is going to be a roaring state in the depths. This is what is happening. Man has to revolve it and bring it to the heights; he has to bring it

*1 MEDO-PERSIA

All readers should realise that the expression Medo-Persian is referring to the early ages 4,000—3,000 B.C. The Scribes, in writing of Mystical Wisdom, ever deliberately misled by using events of history to hide the mystical message of Spiritual Teaching. To have the secret of deciphering the Scriptures gives a Sage hidden powers and it was to guard this that the Scribes shrouded the Spiritual truths in false historical data.

THE ANIMAL PASSIONS

WHAT angel awakes me from my flowery bed?

So cried Titania as she awoke. The mystic Shakespeare perceived much, for once the titanic forces of the Stellar or Cosmic Rays of the spirit, become enticed into the clutches of animal desire, then indeed well may the virgo temptress mind cry out, "what angel (thought)..." What thought, indeed, has so trapped the soul that all the former sensitivity of the intuitive mind were abandoned and instead of sensitivity rising to perceptivity, the See-er, the virgo intuition turned to the harlot side and the only vision that came was Bottom, "the animal passions of the beast in the depths of delight." (See text on front and this page, col. 1).

into a state of mind. (See the plate on page 4, column 2).

All this great Wisdom ended with the Ides of March, that foretold through the dilemma earthed in the catastrophe of Rome and the evils poured into the earth at that time. This is the mystery of the Terminal-god, and which man must solve through these two mysterious Chakras, that are not yet the universal action of life. These are of the prize to be achieved.

The glands are the chemical laboratories of the body, and the cell the laboratory workers, and they are ever extracting from this mysterious substance the sodium chloride to transform into hydrochloric acid. To obtain this in a laboratory would be very difficult, so it shows what a wonderful mechanism man and his soul really is.

The reason why this cannot be produced in a laboratory is because it contains the Fire of the Great Solar Deity produced from the seed; the hormones that come out from the upper chamber.

So now you can see what it means for false hormones to be given to any soul, and why they then lose their mentality through it.

In the case of the pituitary being damaged, it produces diabetes insipidus, which results in obesity, lethargy, premature senility and the atrophy of the productive organs. If that is so, then what will electrical treatment produce? By the diagnosis, complete collapse of all glandular action. So the point for us to enquire into now, and which all humanity is crying out for, what is the cause of this calamity to the human faculty of life? The answer lies in that which was set into operation in the Medo-Persian era, and was never righted.

Taurus was never given its right birth. All its wealth, unexpanded, was passed on to Aries: all again was passed on to Pisces, and all again passed on to Aquarius. (See the note on The Passage of the Equinoxes on page 13).

Now it needed one soul to be able to install into matter the wisdom of androgynicity, which, although it would not take place now, it would do so in 2,000 years time. And one soul did it. So Taurus has been retrieved.

And it only needs one soul to be able to claim it; and, what is more, to suffer it and establish it, and when one soul can do that, then the Darkness is overcome. Now it is going to take place because it has been mastered, and it becomes part of the LAW. That is the thing; the changing of the LAW.

THE THIRD EYE

Continued from Page 3

The White Wall of Thebes

MIGHTY learning then took place, which connected the sight of the two eyes in their intercourse to over-stimulating the third Eye through expansion on the corpus callosum, the white wall of Thebes, (see the plate of the brain on page 3) and is the message of the Scriptures.

"If thy eye offend thee, pluck it out" (Matt. 5 v. 29), for the sight extends even to the stars, as the eyes are the window of the soul, as seen by Osiris covered with eyes.

Therefore when we say that the eye is not the source of light, but the instrument of it, we are defining the organs now in question, and what they can produce. Thus the ten parts of the visual apparatus in the expansion of ten, or the seven heads with ten horns in Revelations, is analogous to the Pythagorean tetractys as David raising the ARC, and bringing fresh sight to the Israelites. Thus restored harmony in the sight of Saul.

At the period now under scrutiny the great curse of the "TRAFFICKING OF MEN" had been taking place; thus causing an over-spilling of the Waters, resulting in eunuchism rising high. This brought the disease of the black horses, (see the plate on page 5, col. 4) the dreaded disease of sex that has resulted in a slow decline of the Race, that which should have risen in the Piscean era through the wisdom left with man from the Embodiment of A.D.33. *1

But it only resulted in Creed and Dogma raised by Papalism, causing the true message to become buried in the depths until some soul could raise up into growth. Man, through the Medo-Persian, or Taurean epidemic of ecstasy, brought into birth by the inflowing of the fiery Element of Mars after the inundation of Venus, turned to sex indulgence: thus emptying out the Water-Pot of its fiery seed.

Therefore the Norm or Pomegranate is bare, and the desire of a voracious appetite and thirst has resulted. This with stunted children is the further result of the disease to

*1 In March 1964 a special Article was published in which the true happenings of the events of the Piscean Age and its Teachings were related. Readers are requested to read it and if they have not a copy to hand to send for one to the Publishers. (Editor).

come, and all that has resulted out of the royal Era of the Equinox of Leo, the birth of the Solar Lord from his Sire Kronos.

Now we come back to what the Scriptures were telling man in the first Chapters of Genesis. (2 v. 24). Therefore shall a man leave his father (Saturn) and his mother (Moon) and shall cleave unto his wife as Capricorn and Cancer, the Sun and Moon in unity, thus producing children of the mind.

This was strongly marshalled in the New Testament by the Jesus in the descending Embodiment, and strongly, yea, vehemently advocated by Paul, whose tragedy had been the female seduction.

The pituitary, with the pineal, the 6th and 7th fiery Wheels, lorded over by Ouranos and Neptune, control the luscious Waters of Life; and are the mystery of the leaven and unleavened bread, which must, or not, according to the moment, rise, causing all glands to function in unity.

This is not only the balance of growth, hence the connection with the Life Spirit Nature, but is the Palm Tree

APPLES OF HESPERIDES

THE Labours of Hercules are tales of dynamic struggle which at one time or another initiate must go through. The last of these struggles is the final effort to raise the kundalini or serpent power up the tree or spinal column until it comes up over the top of the Head and awakes the 7th Pineal gland, the Drosos Dew, and issues for the wisdom of Mind Intelligence so vital to the building of the Solar Light. This is the interaction and fight between the powers of Taurus and Scorpio and the passing through the latter's eighth house.

with its fruit high up in the heavens. Yet if all fails and falls down to the depths, which it invariably has to do in Relativity, especially if the soul has too much down in the twelfth, the re-adjustment for the time can either produce a giant from the Cyclopes*2 fallen to the depths, or the Evil Eye of the Graeae*2 coming up from down below. (See the plate on page 4, col. 4). The moon in its lowest depths.

Man who is not ready for androgynicity will go on in the way that the law has been set: man cannot suddenly turn. But if a man can see the truth in it, and is urged to carry forth androgynicity, then he must prepare himself; but only when he is ready.

Although we advocate it, we are not saying "YOU HAVE GOT TO DO IT."

We are merely saying, "If you can understand it, if you can accept it, all right, accept it, and go on with it. But if you cannot, then wait until you are ready."

But it does call upon all men to control their ways, their thoughts, and their ideas. (See the main article of June, 1964).

The 12th house is where the soul has been continually slipping and allowing certain amounts, time after time, to go down below into the Taurean depths of the labyrinth, and the soul there of course is now highly imbued with the possibility of the Cyclopes forming or the Graeae coming up.

It was the Work of the School to gather together all those that needed it and were wanting to be pulled out of themselves, and to be faithfully led by her (the Instrument) so that they could adjust their heights and their depths. All those who had much in the depths of the 12th house had got to be helped to bring them out. There are other Schools of this type, but not where they are all gathered together.

*2 The two names Cyclopes and Graeae are Greek names of happenings in the adventures which occurred to Odysseus and Perseus respectively. Ra-Men-Ra has given special interpretations of these in the Lecture Series, "The Saga of Time" in which he unfolds the ancient psychological, roots of the past lives, all of which are still "buried" deep within the soul reincarnating. The superb wisdom taught in these Lectures, now at Part 70 are a must for all serious students, and obtainable for 2/- each from the Editor.

This was the work of this School, and faithfully carried out by the leader, in trying to adjust the souls, rich with wealth from the ancient past, by feeding them with wisdom. This would not only balance their sight, but awaken their faculties through wisdom already known unto them; thus help them to recover their wealth from the labyrinth of the Mino-taurus or golden calf.

TONGUE OF THE GRAEAE

THE greek myth of the Graeae taught of the immense powers at the very base of the seed of woman the nature forces in matter, which instead of being used to build and construct so as to nurture the world as the midwife of Mind, and call down outer-world Forces have been used to destroy and possess. Here one such evil twist prevalent in all, men or women, shows the immensely vindictive and venomous state of a 'woman's' tongue, the very opposite of the Word. (See this page, col. 3).

The New Horizons

ONCE recovered could raise the wisdom up to such heights, as to have lifted the world up out of the dangerous groove it had fallen into. This WAS DONE by the work of the founder, but not to the blossoming that could have ensued, if one, who should have assisted, had not become a fallen phaeton. One who drove the chariot of the sun, but fell to earth catching all alight as he fell; which she had to extinguish, as well accomplish the task alone.

But she stood the course by becoming the Mary Magdalene, the woman with the Spikenard ointment, the salve of illuminative compassion, thus helping her Lord of the Pleiades to come off the Cross, and she stepping on. Thus ever living up in the heights with these two glands.

It was this fire that was raised up by Moses and Aaron when they sought to lead the world of Taurus up to the heights in Aries (again see the Passage of the Equinoxes, page 13): but all was so badly saturated by Crete, the land of the "butchers of flesh," that only the Hebrew priests as the Levites understood and brought to fulfillment. Yet you have only to read the Works of Samuel and Kings to see what dire tragedy resulted in the upsurge; to finally bring its evils in the Bloody kings of Ahab, and the drought of Isaiah, Jeremiah and Ezekiel.

Then Daniel followed with its deluge and eunuchism, and Nebuchadnezzar's, then Jonah with his endeavour that brought hope to the Race, and the twelve minor prophets that sought to re-adjust. All left the Messiah, or wealth to be installed into the Desire Body of the world, in a state of dereliction, and although completed, has left the Waterman in drought, (the Age of Aquarius) with his pomegranate devoid of seed, and his pituitrin disorganized. Hence drugs, a voracious diet, and thalidomide children.

The only answer to all this is the balancing of the two eyes through wisdom.

Looking into the past, seeking into the Root and the cause of the idiosyncrasies, enigmas and desires, through the myths and the legends which define the story of heroes struggling against the encroaching dilemma. The whole of the myths portray of this wisdom, and if carefully studied, can reveal the fight they have gallantly made to try and retrieve the Age of Taurus. The Era ripe with wealth and abounding with genius.

Now this has been revealed, it no longer is a secret or a mystery, but becomes the saviour of the world by its balm of truth, and spikenard of illuminative wisdom. Thus the Bells of

the temple of Lakme are ringing once again. It is this, when the kundalini as sex fire is sent up to the heights by the mind adjustment that quickens the pulses in the circling delirium of the Willis (see the plate on page 13, col. 2). Thus causing the antennae to jump high, and reach up as seen in the magnificent choreography of the Giselle Ballet. This is its foundation story, hence the hold it has had with the world since its creation.

Here is a myth or legend put to music that has roused many to leaven bread; the radiant heights of the uplift of the Shew-bread. So where have the great mysteries of the Hebraic wisdom gone to? Have they been destroyed by the erroneous pomp of Papalism?

The True Pioneer

WHAT has happened to the sacrifice of the heroes who "ate" up the evil that the world could be purified?

Those such as Miriam who worked with the Levites and gave of her seed that they could raise up the Naga Fire, but unfortunately became riddled with leprosy?

Mary Magdalene who gave her seed, that the Embodiment could be earthed and radiated in the maelstrom for some other heroine to nurture into life in the Aquarian Age?

All of these know when they undertake this task, that the

result, although as the mother of God, results in death of the physical, and being raised up to the queen of Heaven (see the front plate).

This is the profound mystery of Woman and her Seed; that gathered from the depths to nurture the male to bring forth his sperm, and him to sperm her of the mind thro' the "third eye," so that she begins to generate the wisdom and he goes on sperming in ideas and raises up in purity and mind wisdom.

These are the royal Harlots that become the woman clothed with the sun and the crown of twelve stars on her head. And finally have written on their forehead, MYSTERY BABYLON THE GREAT, THE MOTHER OF HARLOTS AND ABOMINATIONS OF THE EARTH. She drunken with the blood of the saints, and raised up by her love for humanity. And when I saw her I marvelled.

Now that may be a little advanced for some of you, but that is what many of you are crying out against. You are with partners who are not giving you mind-sperming or mind-generation. That has been the calling-out through the ages.

You need the active mind of the other: one is what you call the negative, and the other is the positive. And here we come back to the understanding of the theory of attraction and

repulsion. You have to remember that man is all vibration.

Unless the male is germinating, the seed of God is lost, but it was never intended to be as male and female gender, but male and female principles to sperm one another in mind intercourse; thus producing the man-child of Solar light.

Man brings down the sperm from God; she raises up the magnetic from the depths and blends the two together. She is the continuation from the depths. He is the soul that has been brought into birth, bringing down the Sperm of the Godhead, and in the unity of the two, whether in the physical or through the mind, there is the unity of heights and depths once again. Can you grasp this?

Man is not seeing himself as vibration; he is only seeing himself as flesh and blood, and desire.

He has to realise that he is a vibration of mind, and that only; because the very thing within him that is thinking,—if it is not the beast,—then is the spirit.

It is the spirit that is thinking on the higher vibration.

This now only being reimbursed by the method adopted all through the ages in lifting up one's mind to God, the Acme of Truth, that there can be an inflowing of the Waters from the raised up fires. This generated up to the heights through the stairway of Cacus, the road of Ursa Minor,

THE BLACK HORSES

THIS plate most accurately portrays in every symbol that the 7th chakra Powers of Neptune have turned the soul turtle and he is now wallowing in the perversion of the animal passions. The Dew of Fluidity and Fertility has turned into emotional debauchery and the prize of Mind-Intelligence has been forfeit. The horse—always a symbol of the generative fires—which had risen up as the Pineal, the Unicorn, now lives in a sea of emotional desire swamped completely, unable to hold the powers it had called down into his being.

through the action of the fiery wheels after the soul had stripped and become penitent as seen by Isaiah as he sat by the brook Kidron (see the plate on page 9 of the March Gazette). Here he sent the raven back and forth until the Dove appeared with the message of fecundity.

All this is the beast raised up in the ten horns, or cardo expansion of the seven heads or sensory principles. That when the soul beholds, it sees with the balanced eye of sun and moon, that Saturn can be scythed and retrieved. All those that are saturated with fornication, to strip the twelfth and balance the wisdom taken and lost in the dung of the whore.

One who is prostituting the wealth of the heights.

Now is the time for man to lift up his head and seek deeply and well; now is the time to come out of the labyrinth through Jacob's ladder in a balanced way, for the Solar Ray is descending and seeking to water and sperm all who are ready to embrace the cruel and scathing truth that the majority in the world are unbalanced. And the answer is to get balanced through the wisdom.

To those who have much to learn and seek to abide by, then turn to the promise of the Christos in Matt. 12 when it was declared in verse 5

"Have ye not read in the Law, how that on the sabbath days the priests in the temple profane the sabbath, and are blameless?"

They over-spill, but are not blamed for they are rich, and much better off than the man who is of drought through hidden pleasures and righteousness.

There is a great depth there for those of you who are struggling and this applies very much to the young ones. Yes! you are going to find there are times, when you are trying to bring all to the heights, that there is an over-spilling. All right. Don't worry about that. The thing is, to have in your mind the deliberate purpose of self-control.

Ra-Men-Ra is a name of the Voice of the Teachers that speak through Mrs. Gladys I. Spearman-Cook. The Egyptian name Ra was a symbol of their Sun God or Central Spiritual Energies. Thus the name indicates Those who have involved from the Spirit, lived in and mastered Matter and returned to the Source from whence they came—a journey open to all. Thus Ra-Men-Ra is the Voice of the Masters. (Editor).

FIRST of all let us take the Gnostic wisdom of Taurus. In the tracteries of tradition you will find that man, when he emerged from his primitive state, was inspired by the awakening of his higher consciousness, and by the call of the Stars, his Stellar heritage. As you know, you are being fed by the Holy Ghost, the Dove which is coming from the Stellar influences, and as you absorb these into your midst you, too, are becoming linked with the Stellar heritage. They are the planes of Spirit which you can ascend to when you leave the earth. Man absorbed knowledge from their Book of Revelation and mystery, or the Book of God, and he gradually came to realise how intimately he was related to the celestial sphere as a living link between heaven and earth; and that the rising and setting of the stars, not only affected, but created the seasons of the year and many mysteries needing interpretation.

The Realisation

TAURUS is the sign that first gave to man the real understanding of such wisdom. For Egypt came under the sign of the Bull, and Moses under Aries. But as you know, the Equinoxes precede reverse to the solar. The solar are anti-clockwise, and appear as if they were going backwards. (See the chart of Relativity on page 13, The Passage of the Equinoxes).

As far back as you can trace the mind of man, his knowledge,—growing out of his meditation on the stars and the symbols and signs of the immutable laws of heaven,—has remained fixed as they reach you today. Upon them the science of Astrology was founded, and though so sadly misconstrued by the ignorant, it will be lifted from darkness and will again take its place in the Light of the incoming Era.

The mathematical foundation of this science of the stars is so solidly based on a general theory of Nature, from which it is inseparable,—that it will survive forever; for

"It is in the imperishable rock of Numbers that the fadless footprint of astral science was first set like the mighty seal of an eternal compact made between Urania and the Law."

It is the wisdom of the Supreme that guides the stars; sympathy and attraction between man and stars operate through the astral. But it must be seen that Astrology is not a combination of myth and symbol for the credulous to quibble over or the modern priesthood to deny; for every sign, every symbol, is a divine bond or union with a Divine Truth.

There is no uncertainty in this; man's intellect and intuition pierce the past and prove the immortality of tradition and its symbols.

Maha Maya

SO now we enter into the 2nd house. But first of all we will look at the World Chart. (See diagram on page 7, col. 1).

You see the 2nd house called 'neck.' There is the sign of Taurus ♉, and there in it you see Venus ♀ which we are going to discuss tonight.

But all the time there is going to be a polarity of magnetism that is going to go on from the 2nd to the 8th house; a swirling backwards and forwards of magnetism which, at the same time, is going to pass right the way round the edge of the chart, so that by the time you reach the 8th house, the dragon will have raised itself up to what is called the 'inundation,' and would cause the 'deluge,' and is

TAURUS THE BULL

"I come not to destroy the law... but to fulfill it."

the meaning of the deluge and the inundation of Egypt. And the flight of man into Egypt is the flight of the Venus (in the Mary state) into the wisdom with the child in her arms, that she could give it activity.

And this is, of course, where you have to change all your conceptions through religion and orthodoxy entirely into the real wisdom of the mystics.

So try and visualise that all the time the polarity is going to go backwards and forwards—from Taurus to Scorpio—to bring the dragon rising up in the heights of the being, the activity, the fire of the soul, the kundalini. This is very scientific and has nothing to do with fortune-telling; it deals entirely with the wisdom of the heavens, the magnetism of the earth; the rotary movement; the powers that change in man bringing alchemicalisation.

So now you know the house that we are going to pass into. It is the house that is full of the delights of life; it loves inertia; it is like the bull—it gets into a field and there it will not move;—but its Ruler is Venus, and we are going to try and understand now all about Venus.

When Venus is in the map of an Initiate who has been a great soul, but who has been suppressed in affection by the Yogi or preceding hermit, or had disappointment in genuine

love, there will always be found an affliction of Venus, which is the polarity necessary for the higher expression of universal love and wisdom.

Venus is of extreme importance in such a map and, if well aspected to Uranus, gives a leverage in the unseen world which no other planet can approximate. For instance, Venus in a watery sign indicates a strong relation to the Light, and awakens the Astral in the human.

The Astral is the involution, which, when it is awakened, has correspondence to your evolution.

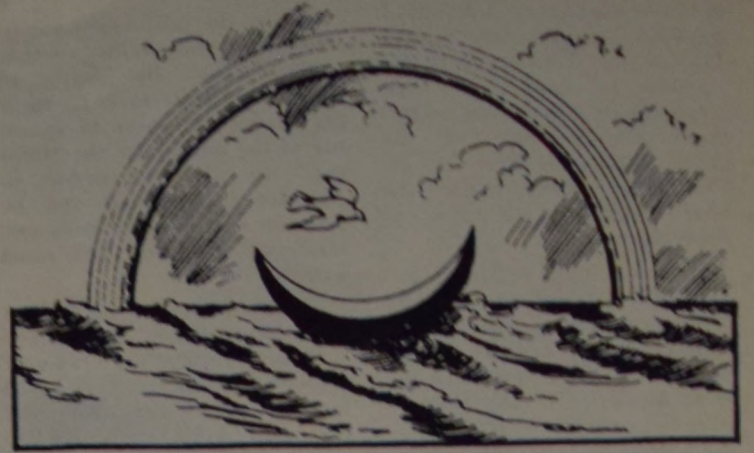

When the progressed chart is pivoting on the natal, Venus is,—if spiritual force predominates,—imperatively Justice-bringing, being the turning of the tide energised by the tides of the super-ruler Neptune. Venus is Love; Uranus is higher Love; and Neptune is higher still; and after that comes the Unknown.

The mission of Venus is Love in its purity; yet Venus is also a symbol of the "Creative Word," and is metaphorically spoken of as the instructor of the Giants, energising the creative work of the geniuses when placed in her own powerful and virile sign of Taurus the Bull.

The Giants, of course, are those within you that have grown enormous, but have never come to a state of balance; those great powers that need putting into operation.

Whereas it has been the excrecent growth,—that is, intercourse outwardly, bringing inundation,—in the future it is going to be the blending of the male and female principle within the soul; and it is slowly going to turn from one to the other.

Before a soul can really give light to the earth, they have to be in argument within themselves, in order to bring about the

THE SOLAR ARC

THE Ancient Druids knew the wisdom of raising the Arc of the mind and this plate shows how it is the Wren or Dove of the Word, wisdom, can raise up the arc of the mind or area of vision, bringing the emotional powers of the lunar earth force under control to receive the sustenance of Spirit. This is particularly the struggle of the three earth signs of Taurus, Virgo and Capricorn, with their polarities, Scorpio, Pisces and Cancer.

blending of the male and female principles; no longer held by desires of the earth.

The Lotus Flower of Purity

MANY do not consider Venus as being very important; this is because they fail to recognise that you as humanity receive much of your life-blood through Venus, she being not only your sister planet, but her Lord is your Regent. I am going to try and prove to you how Venus has been the womb of the Earth; perhaps you might know it better as Mother Nature.

The Lotus, her very emblem, and which contains the seed within itself, has ever been of your adoption; the Virgin Mother of your mythology. Did not the Archangel hold in his hand the Lotus and present it to Mary in the Annunciation.

The Angel is the Word, the incoming Word, when you suddenly have aspiration and inspiration. You become aware that it is time to make renunciation so that you can lend yourself to the higher purpose of life. This is your feminine principle receiving the Word of greater unfoldment, which you all receive in time.

That has been the down-draft of purity, the Archetypal Embodiment that you have been receiving, and it has been welling up inside you, and you are filled to the full, and in the filling-to-the-full, the Word brings its purity into your very midst.

Therefore you have Lotus and Water as two of your most ancient symbols, the Lotus

being called the Barque of the Gods or the Sanctum Sanctorum;

"THE TEMPLE OF THE LIVING GOD."

The Lotus not only being purity, but that of nature, which opens only to the rays of the Sun, and has been referred to by the ancients as *some Transcendent Presence with the fragrance and beauty of a thousand heavens mingled into one.*

The Lotus, the symbol of Venus, to the Hindu was the most exquisite of all flowers, and typified the mother; yet to the Egyptians the Barque of the Gods, the Argha, the vessel of God, that bears a soul safely over the waters; the Shekinah, symbolised as a "blaze of glory" surrounding God when he created.

And so it is the Downdraft as simplicity and beauty that is ever coming down to man, and he takes in his own way and transforms what contains, within its very midst, the germ of God. Then God was not looked upon as a man, as man unconsciously does now, but as a mystery not to be profaned, surrounded by She who is the Mother of all things; and even She, born from His side, is of this Essence.

In the earliest archaic ages, no impure thought ever mixed with the symbology, and their idea of His spiritual life, was filled with a light, almost indescribable and incommunicable. (See the front plate).

The Change of Mind into Light

THAT is a part of the work of the Initiate, to redeem and reclaim pure primitive conceptions, coarsened and made gross by the materialism of your present day. And that is the unfoldment, the Word that must come forth by those who have absorbed the Word, to put what they hear into a new expression, to put it into a modern phase of experience; not in its old formation, but to give it new life, that which will help the modern man to find unfoldment.

The secret clue to solving mythology is physiological, for the outer ring is Astronomical; because the imagery in which the primitive ideas, and even later, were expressed, was figured first in the heavens, with its foundation water or blood as the flesh-making source.

Astrological Lectures

ALL who would have a full and comprehensive knowledge of this astrological wisdom, would do well to obtain the full list of lectures as delivered by Ra-Men-Ra in the School's teachings. These to be appreciated have to be enquired into, for they contain the whole of the wealth that astrological wisdom can deliver to a truly zealous enquirer. Not anything was left untouched in this enquiry, and these alone open the way for the mysteries to be enquired into in a safe and sound way. No one need be afraid of the mysteries in the way that these have been brought forward for they are simple, deductive and truly comprehensive in teaching the soul of the greater purpose that can come forth from the endeavour.

Every month Extracts from these lectures will be published to encourage readers to invest in them. They are advertised on page 3 and can be bought in part or whole.

I want you to realise that everything that is, today, had its foundations in the beginning, in all those things which you consider primitive and Pagan. Those very things that were first earthed in this Manvantara are with you today as something which has slowly evolved, evolved-out-of.

So Ashteroth that was considered a Pagan goddess, is today nothing more than the Virgin Mary,—that which has become refined within you;—and if you can get that within your mind you will have the clue to the whole of this lecture.

It was Mena, Menka, Menat and Ma who was the wet nurse in Egypt, and who, in a mystical sense, supplied the flesh-making fluid. Her name also means Dove, the bird of breath or soul, the Holy Spirit, whom you call the Holy Ghost.

As you change your mind you change your flesh-content, you change your organs, you change the very juices of your body; Menka being all that which has given birth to all the cells within your body. (See the plate on page 6, cols. 4 and 5).

Here you see the Moon upon the waters of life, and the rainbow ark is your mind that is rising up out of the waters through the Moon's endeavours; your lunar state embracing the Solar. The dove represents the downdraft or the Word that flies down to man when he can change the raven into the dove. Until then, he will ever be receiving only the black, because he will never know how to put it into its true concept; but once he is able to put it into its true concept, he is an open vessel to receive the Dove, the Holy Eucharist. All men are searching for the Holy Grail; and this is the Holy Grail.

spirit from morning till night; that is the solar rays, or cosmic rays, whichever you like.

The outcome of the Dove that became an Eagle; the child in the manger, giving the soul the right to Seership.

The child in the manger is your child in the manger; the Holy Ghost that is filling up within you, bringing forth your Sonship, your Horus, your Godhead that you, one day, can be one with the Father; your Jesus, your Jesus state.

Do not get lost over this symbol it represents the descent into the or head of the Jesus one after he was Christed. This is not Jesus of religion; this is the initiate that endeavours and struggles, and makes unfoldment by renunciation, and becoming worthy to receive of the Three-in-One, the One-ship, the knowledge in the One-ship, because he has so prepared himself, so uplifted his mind, that he becomes an Iesus.

And he was found saying that it was not his individual self that spoke, but the Father in him, and it is said, he returned to his own country in the power of the Spirit. The Father and the Spirit were which had descended into the of the Adepted One, as the head of the Sun of Righteousness; or Shemesh, with healing in his wings or rays; the wings symbolising the A Wen or Holy Spirit.

The spirit within you has so grown to a fullness that it can then respond to the inflow of the Hierarchies, and you and the Hierarchies become one in the speech.

The one that has made himself so perfected, so cleansed, so ready to receive the Master's Truth; because it is through the Master of the Pleiades that the Great Truth enters down into man, that he has healing in his wings or rays.

That which has entered into the circle of the mind; and there you see the mind radiant with the Sun; not a lunar self that lives for self, that is ever seeking to fill the stomach; but the soul that is filled with the Solar. And you will see here how Taurus is the very sign that receives the first inflow of this wonderful power; and that is why so many Taureans are rich with gifts.

It is when that received is torn asunder by the soldiers of your soul,—they who are seeking "plunder," and they become infected by the effort of their action, that, that was, becomes, through its purpose as giver and channel for evolvment. And what you passed on, automatically becomes your copyright in immortal indelible ink. God within your midst, through the womb of Venus, the Holy Ghost.

As you turn from self and send the kundalini up the spine so that it becomes the lubricant of your brain, giving unto all your chakras activity, then you are going to become the one born of the Solar light. But until then, the soldiers of your soul will be tearing all asunder, tearing the Robe.

THE SOMA PNEUMATIKON BODY.

Astrology—Readers' Charts THE AGE OF RESPONSIBILITY

Self-Help to Self-Heal Through Astrological Wisdom by James Averill

"Such as study Astrology are the only men I know that are fit to study physic—physic without Astrology being like a lamp without oil." (Culpeper).

THE more readers fearlessly study astrological wisdom the more will they have the ability to rule their lives and direct those of their children. On page 10 Ra-Men-Ra opening his Healing Column has given us a challenging Truth as to the cause and difficulty of diseases generally, and all those who are prepared to enter the lists to fight to get back to the Realms of Spirit will find encouragement in the wisdom delivered.

The finest way to start the journey to become our own healers would be to look into our own charts and to seek to find the dangers of ill-health that might arise. And once each person has his birth chart available simple rules and principles applied will direct him to take herbs of a kind that will promote harmony and keep him in good health.

Correct diet free from all animal foods and as much uncooked food as possible are the first essentials, but this article is not aimed to assist dietary troubles but solely to discuss the best and simplest way to take herbs through correctly assessing the factors in the birth map.

Culpeper, the best known herbalist of the last centuries, recognised, as his quotation above shows, that the study of Astrology was essential to know which herbs each person should take to harmonise and promote good health.

He was taught in the spirit of the ancient schools, and realised that without the guidance of the Stars it was like the blind leading the blind.

Guiding Principles

IF the student knows of the basic principles below he will at least be directing his mind towards the best method; but there can be no greater guiding Light than that from Spirit and all seeking guidance should gain their inspiration and direction solely from them.

Experience is a wonderful Doctor, and years of practical application will undoubtedly provide extensive understanding which will enable persons intuitively to know which herb will help. But Spirit direction is paramount and none should seek an answer without first seeking their aid, AND obeying it.

It should ever be born in mind that it is not wise to mix herbs indiscriminately without making sure that the herbs in question have of the right Temperament. Neither should too many herbs be mixed together, generally three at a time or less be the best method.

This above all cannot be over emphasised. Each soul is a unique jewel: rule by thumb is not possible: each chart must be taken individually and each fact considered. Under the guidance of Spirit, Harmony can be established. The paragraphs that follow are the guide ropes that will help to achieve the pathway of Spirit Unity.

FIRST, fortify the body with a herb of the Sun suitable in Temperament, for this will help to strengthen the Heart, and the Heart in the Body is the giver of Life as is the Sun in the Heavens, and by this, connection is made to this great Source of LIFE.

SECOND, take a herb of the nature of the Lord, or planetary

ruler of your Ascendant. No herbal remedies should be given without this Ascendant Herb as the ascendant rules the physical body, and this is the first body to heal.

THIRDLY, the 6th House is called the house of sickness and herbs of an anti-pathic nature of the ruler of the 6th House Sign—or of any intercepting sign if many planets are in it—help to correct inherent weakness especially in time of sickness.

FOURTHLY, herbs ruled by Mars and Saturn, excellent though they be need of wise direction care and understanding before being used.

FIFTHLY, if the midheaven sign is powerfully supported then make use of his herbs.

SIXTHLY, naturally where sickness is present the immediate need is to take herbs to help to eradicate the cause and alleviate the effects.

SEVENTHLY, it is particularly important to note all the natal aspects and planetary placements as these are the foundations of the disharmonies and ill-health of the future.

These basic principles provide guidance but they are not the only principles to follow when you have your chart to consider, and when you recognise the wisdom of taking daily your herbal refreshment.

In addition to the consideration of the natal chart it is very important to consider the Progressed Moon, its movement through the Signs and houses and its aspects to the natal planets either adversely or to advantage.

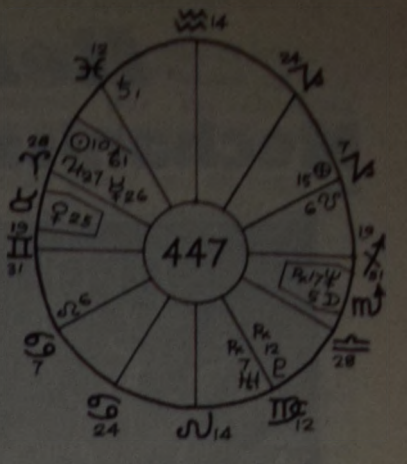

The general principles are these:

FIRST, a herb in sympathy with the ruler of the sign the progressed Moon is in, should be taken;

SECONDLY, where an adverse aspect is being made, such as a square (90°), semi-square (45°), sesqui-quadrant (135°), or quincunx (150°), or where there is opposition taking place, then a herb of that planet should be taken to help nullify the 'stirring of the Lunar' which is happening;

THIRDLY, where there are aspects to advantage, such as a trine (120°), a sextile (60°), a semi-sextile (30°) or a conjunction aspect, then a herb in sympathy with the Sign that aspected planet is in, should be taken, so that it is given every support to draw forth only the best of it, in correct measure.

These progressed rules are for guidance, and there are always exceptions such as this example. If Mars was square to Uranus at birth an adverse aspect to Mars or Uranus would naturally activate the birth square, and it would be very unwise to give the Mars strength with a herb ruled by it, as this would only spark off the natal square to Uranus; thus it would be best in such a case

to give a Venus herb of anti-pathic nature to help neutralise and cool the passions that could arise by the progressed Moon square aspect.

Practical Application

NOW to apply these rules with the example charts available. We take first in our studies 447, a child aged 3 months whose Mother is an enthusiastic astrological seeker.

She wrote: "Many thanks for my baby son's birth chart. It is very helpful. I notice that you give his progressed moon's position for his first birthday as in conjunction with Neptune in Scorpio in the 6th. Would you tell me can this be expected to bring a health condition if I don't do something to avoid it, and if so what? It sounds like damp affecting the kidneys or the genitals to me or am I way out?"

As the child is so very young it will be under the influence of the Mother, and it is to her chart that real guidance should be sought for all general purposes. She should take herbs liberally, especially if she is feeding him, for then harmony, help for the nerves, and strength for her additional task shall be given her.

However from his natal chart it is plain that this young man may be liable to suffer with kidney and urinary difficulties, and possibly bedwetting in future years, as can be seen from Libra ruling the 6th house and the Scorpio influence intercepting, with the Moon and Neptune in it. The Mother will have to watch the Scorpio influence especially later around puberty. Glandular trouble may be expected particularly around the throat, as Taurus is in the 12th with Venus, its ruler, and Libra's, there too. This 11th house with 4 planets in Aries, a Fire Sign, including the Sun, is a very important factor.

There are two air signs, on the Midheavens, Aquarius, and on the Ascendant, Gemini, yet he has no planets in any air signs at all, signifying that he must in this incarnation try his hardest to build a Higher Mind away from the earthy desires of Taurus-Scorpio, hence the Path of Destiny in the 8th. However in this short space only the barest details can be given.

At this moment with the Moon passing through Scorpio, herbs of a Venus nature antipathetic to the Mars ruler of Scorpio will help to smooth and harmonise any difficulties especially as this youngster has 4 Fire planets and there is great need to unify the Venus-Neptunian Polarity.

But it is to help to build and strengthen the mind that is the prime purpose and from his earliest youth Mercurial Herbs should be taken.

Hence Venusian Herbs, such as Buchu, Ura Ursi, Golden Rod and Vervain; Mercurial Herbs, such as Fennel, Sweet Marjoram, Sculcap, Lily of the

World Chart Diagram

HERE is shown the World chart with the Cardinal Cross as the central cross, Aries, Cancer, Libra and Capricorn. It is the understanding of this ancient Wisdom and the acceptance that the Signs represent differing Cosmic Forces that can blend and flow through man that will enable all Mankind to seek of these Great Beings and honour the Divine energies from them. (See page 6, column 1).

The Bird here is referred to as the Wren and belonged to ancient Druidism; it was the emblem of three-in-One, the Word of the Creator fleeing into the Ark, which you see as the crescent Moon, or feminine womb, for refuge from Typhon, the Arabic name for Deluge, meaning Satan or idle hands.

And it enters into your feminine presence, your feminine principle; and she dances around doing all sorts of peculiar things to express what she is filled with; but it enters into there to get away from the deluge that can come forth when man gets too filled with the Tat, or too filled with the

Reminiscences

Mechanisation versus Wisdom

ONE OF THE BIGGEST PROBLEMS facing the Mystic today is the changing world, for if his age ranges around that of 65 he would have been one who would have known the old hansom cab, horse drawn buses, electric tramcars and the rigorous ringing of church bells on Sunday, with every man, woman and child donned in their Sunday best, either to hurry off to fill those fully filled pews, or take the evening stroll with all dignity and zest, to air off their new hat or tailored coat. He even would have still remembered the tingling of the bell on

Sunday afternoon of the muffin man, or the woman selling "fine large" watercress, winkles and shrimps. Then for the coins of 1½d. he would have received a large bunch of watercress, that today, bound round with a gaily coloured elastic band, would demand the price of 1/-. And certainly not from a street vendor crying out his wares on a Sunday afternoon, but a heavily crowded shop on the previous day.

This is the world that these souls, few and far between, are looking out upon, and asking themselves the question :

IS the violent rush and tear of the harassed public, the screaming and screeching planes overhead, and the jazz and fanatical Beatle boys of film and television, the intended plan of the Great Powers ?

Had they, the lords of All-Life, who still exist whether man believes it or not, ordained these vastly changed circumstances ?

Or are they the outcome of an Embodiment intended in A.D. 33 of the Piscean Era to bring man that of the royal wisdom, that would in the Age of Aquarius have united the two phenomenal forces of Electric and magnetic, and raised him up onto the plane of mind intelligence ?

What does the Future Hold ?

THE changes that have swept over the world since the first world war are so enormous that the aged are lost, and find it very difficult to reconcile all into their outlook as that of the Age of progress.

Whereas man had to wait for time and season to obtain certain commodities of food, now it can be obtained in cellophane wrappers quite freely from any food emporium from a luxuriously and temptingly arrayed refrigerated showcase.

Yet the world, although rigorously under the hustle and bustle of a venusian desire ridden influence—where every store or shop is vieing for each other's customers, and the at-

mosphere bespeaks of competition at its most feverish height, and every soul is surrounded with variety and plenty—is not a happier place.

For the Mystic will cry out desperately for the day of yesterday, when life was slower, and time and season supplied him with his daily needs ; then peace and love still reigned to some very great extent, and he could find that atmosphere and vibration that he needed to penetrate the finer depths, and bring forth that which would help the world revolve and dance with spiritual joy.

Yet why is it so, when we understand that the world is evolving and man is more progressed ?

To the young, they would not understand this ; they only

know this world of crowded buses, push and get on if you can, shops crowded with people spending money too easily earned, and buying eagerly shoddy goods of synthetic materials that can never at any-time absorb the character of the soul, and be passed from one to another with kindly gesture.

They automatically look upon the world of yesterday as something well forgotten ; a world of narrow-minded prigs who certainly would never have approved of their free licence and test-out marriage before the baby arrived.

This is what the Age of Aquarius has issued in, and what the Mystic and highly sensitised art lover is having to face. For Aquarius is the phenomenal influence of the Abstract in its REAL intended inflow of the Neptunian Waters. But has only arrived in the abundance of materialism, of which this sign can hold being ruled by Saturn, and easily destroy whatever beauty was gained from those rich and talented creators of the Piscean era. (See the note on The Passage of the Equinoxes, page 13).

For literature and music rich with wealth, poetry and Scriptural phrases that lilt the tongue and raise the mind to worlds outside this realm of understanding, no longer have any existence in the world today. And whereas the enquirer after truth would search feverishly through every dark and dingy bookshop to find some hidden gem from the past, today are restless noisy youth seeking through the same area which have become either betting booths, or a row of washing machines churning out the week's wash at an unbelievable rate.

Now the great question for the few who have reserved their intellectuality, and value it above all else, is ;

"What is going to happen, for the world cannot go on as it is. Man cannot live without wisdom ?"

It is even obvious to the Aquarian minded jay walker, that the competition of daily life, high wages, super-sonic air

THE ROYAL JELLY

THOSE taught to struggle and raise up the mind thoughts out of the rut and weed of self-desire will soon recognise the importance of this picture. Its symbolism shows most accurately and so perceptively of how it is only by constant thinking, probing, questioning, and being alert,—especially to the small everyday things—that will enable the earthy feminine mind to be raised upwards into the world of the abstract mind.

The Bee is a symbol of a soul who has only one purpose in its life and that is to feed its Queen with the finest food it can create. When man turns as purposefully to the task of feeding the Spirit with as equally Royal a food, then he too will rise up to the Abstract of the 4th Dimension. The first step is to be as the bee, ever active, ever unselfish, ever in service and always having the best of the objective. So will the body as the Temple of the Spirit become sensitised and a channel for the inflow of the Greater Mind.

action, disease and drug, cannot continue at the rate they are doing. Sometime or another there is going to be a halt, but how ?

This is where only the Mystic understands, and then not all. Aquarius being the age when mystery must prevail, if only in the hidden few, must somewhere in its present ugly portals hold the ONE who knows and understands the wisdom of pouring into the under-current of the maelstrom, the higher LAW ; that which will in time have so raised up the lower planes, that the true influence of Aquarius will suddenly blossom forth.

There must be progress, but as to whether it should be at the rate it is now or not, is something hard to detect. For is the world opening up the inner confined fiascoes of the Taurean era that were never given mind light ? That which passed onto the Arian Solar birth with all the evils of Crete and Medo-Persia arabian-night debaucheries. (See note on page 3, col. 3).

To again pass into the Age of Pisces where the Solar Deity descended into the Desire Body of the world, and began the purification that was to be continued in Aquarius by man himself accepting the Cup of responsibility. (See the plate, this page, cols. 1 and 2).

The Sargasso Sea

IF so, then the so-called progress is going to be short lived, for man should have taken advantage of this period of mechanical creation

with its limited hours,—which is giving unto him more leisure time and freedom to think,—to open up those inner portals of stored-up exhilaration in mind expansion, through study and investigation.

For the higher influence of Aquarius is of wisdom and intelligence not yet known to any, it being of the outer-world planetary inflow.

And what has been put into operation at the present and called progress, could have risen to heights far beyond the understanding of those ancient Persians and richly endowed Egyptians, whose heritage the soul is now richly embodied by.

So, although the Water-pot came in only as a synthetic carton, it was filled with rich wealth that has been poured out ruthlessly onto turgid ground, and has turned into a blood-stained under-current, that will in time rear its head, and demand its recompense.

This has resulted in the prophecies of the prophets being fulfilled, and man has emptied out ruthlessly the wealth that could have been his God-send when this mad frenzy was over, ... and over it will surely be, but in which direction ?

But this is typical of man, whether playboy or initiate, for invariably they learn the hard way, and perhaps in the long run, the best. For it grows roots that are sturdy and strong, and the world is not really doomed, but going through throes, that as searing as they are and will be, are but the dawning of a better day.

THE WEEDS OF SARGASSO

AGAIN this plate captures every facet of Truth. Here the soul has the courage and guts to look into the well of truth ; there it sees its own self living as the demon of desire, debauchery and destruction ; the Cup of mind as the cup of responsibility has been abandoned to the serpent of the deep, and all the hitherto strength of resolve and utterance—the beard—is held prisoner in the waters of Sargasso, the quicksand weeds of I-want. The crown of mind growth has been cast on to one side, and all the soul does is to live in the depths of its past roots, a victim to the repetition of the pleasures learned in past lives through the personalities of each succeeding incarnation. All is so true a picture of the average man and woman of today, but they know it not, and have not the courage to look.

While man has been floundering in the sea of Sargasso, the magnetic waters of the negative aspect of the sign, the LAW has been busy and lost no time. (See the plate on page 8, cols. 1 and 2). For a time will come when man is going to sober up, and the undercurrent set by the Greater Powers will come forth more copiously, with the mercurial influence of the sign, (see note on "Passage of the Equinoxes" page 13, cols. 3, 4 and 5) demanding the attention of one and all.

And the mysteries, which have been so ruthlessly abandoned for space ship plunder, will come back into their own; and man begin the journey of learning the wisdom of uniting the two currents and seeking for the ariel mind.

But we must not hope for this too hurriedly, for man knows nothing about uniting depths with heights; (see the plate, this page, column 3) and without a doubt will have to start re-awakening his supermind from the sarcophagus it has been plunged into. And here we come back to the ancient Egyptian mystery of where the soul or Ba was raised up from the tomb, given life by Nephthys and Isis his dual feminine spouse, or virgo mind, and set upon the path of the awakened soul.

It cannot be until the last decanate of Aquarius when the southern fish is completely drawn up out of the waters. Then Saturn will be ready to ride the dolphin into the royal Capricornian heights (see the note on "Passage of the Equinoxes," page 13, cols. 3, 4 and 5).

This means that all the wealth deep down in the waters of the past magnetic depths will have been blended in with the Electric waters of Neptune, and the way prepared for Kronos the fallen deity of mankind to become transformed into Kristus.

Teacher of the Higher Law

THIS is a very hopeful picture, though well delayed; but as sad as it may be in its present birth throes, perhaps a better grounding and foundation for the man who, through the ages, has been salted with all the red dye that Edom could produce. He will by then find the abundance palling, and him seeking desperately for the mind that has eluded him.

For when it is fully accepted that man is solely mind and not flesh, it becomes quite obvious that a time must come when he is going to cry out for help, and seek feverishly for that which he has denied of himself. (See the plate on page 8, cols. 4 and 5).

Yet it cannot be denied that it is a ruthless and searing time, with quite possibly the worst yet to come. But with hope lying in the under-cover as wisdom to come forth, then what could appear as a very black future has been forestalled by the mysterious Agent who always comes up in every Age as the redeeming factor.

The inertia of the world was broken up as it was demanded by the Greater Powers, and although much blood was spilt for such to be accomplished, it was established. This gave the higher Powers as the greater LAW right of entry, whereby they could work as an inflowing stream in a silent undercurrent, and slowly raise man up to his rightful status. This is the knowledge that only the Mystic understands, for it is

the intense depths of the mysteries, and links with the establishment of wisdom.

Some of this may appear very mysterious to the lesser initiated, but these are the mysteries that man has forgotten, but cannot destroy or rule out. Every Age they have to come forth, and spoken of quite clearly in the Bible, but not in the way that man can see too clearly.

It was one of the reasons why the Pharisees sought to destroy the Jesus who was giving wisdom greater than they, for by that he was bringing forth a Law greater than what they were setting; thus breaking up their ideas.

So when a Teacher of wisdom can bring Wisdom greater than that already established, they open the door for the higher LAW to enter. This is seen very clearly in Mar. 11 v. 18,

"And all the people were astonished at his doctrine."

This is where the mysteries and the Scriptures go hand and hand.

Whatever the Age, or what-

ever man decrees, he can never rule out the mysterious, for that is the higher status of what he is placing into form from that received from the Higher Spheres, as the nucleus brought forth from the depths of the Unseen. When this is given a thought—and man cannot rule out phenomenal inflow upon which he depends—even the most material minded cannot deny that there is something in it. For that mysterious Nucleus that defies all solving by human minds is ever there and present at every flood, disaster and catastrophe.

Therefore if all this can be viewed in its right light and true prospective, it will be seen what a wonderful MIND is somewhere at work, and how every move, direction and whim of man is weighed up and used in the balance to produce the right ingredient to counteract the evil he could bring forth in his folly and ignorance.

So although many of us will have departed this earthly life before the inflowing stream of wisdom at the present moment

begins to show signs of blossoming, let us later on from our realms in the upper world, hope to look down on a world that is slowly coming forth like a penitent child. And know that we in our humble endeavours played our part towards its changes.

Mind Development Group

NOW to close let me make known our deductions upon the understanding of Sensitivity, the Adrenals, Jacob's ladder, and the mystery of the Dead Cow being buried at the root of the grape vine. (See the special announcement on page 8 of the June Issue, 1964 and on page 14 of this issue)

Well, as many of you may have guessed, SENSITIVITY is brought into birth, not by just developing in a circle, but by slowly discarding all the worldly things in life and embracing the outer-world forces of higher wisdom.

But to do this man has to fortify the vessel to receive those higher powers, otherwise he will go through the same difficulties as all others who sought to embrace the powers of Neptune. This means bringing the lunar waters up to the vibrations of the Neptunian waters; therefore it means making a complete revolving within ones own self, and here is the mystery of the serpent swallowing its own tail. (See the plate, this page, col. 3).

PURE SENSITIVITY is registered in the upper testes behind the nose, showing the importance of diet, thus keeping the sinus clean from waste and mucus.

Here we come to the remarks that are being made in the medical column, especially where the Scorpio is concerned. But this is a subject that is still too deep for most, so the best advice for the majority is clean living, pure diet, plenty of herbs and water, with study set upon those matters that will raise up the ideals and intentions of the soul.

THE ADRENALS are the glands that rest upon the kidneys, and play a very important part in the building up of the energies of the soul. They really are the turbine engines, and when plenty of water passes through the kidneys, it can be seen how it helps to turn the "water-wheel," thus create energy.

It has ever been found by the medical world, that where profound inertia is present, that by a course of pure water and a rest in hospital under their care, that the inertia was broken up, and the patient given back their energy.

It is from the generation of these glands that the Seed or depth of the soul's ancient wealth is drawn forth, for every gland in the intensity of its glandular juices holds the vibration that belong to the soul in its different stages of ancient growth. These all have linking with the mechanism of the mind.

This is where drugs taken to rectify this and that action of the glands take away from that one the struggle they should make in trying to overcome excess, or lack of action, where they are concerned.

This is the idea of herbs, to help the soul balance up in a natural way the correction needed, whereas drug nullifies or over stimulates, and puts other glands into discord.

JACOB'S LADDER represents the climbing of the mind up the unfolding sensitivity of the Chakra or fiery wheels of the spinal column. These really belong to the etheric body, but have linking with the sets of nerves down the spine that branch out to every part of the physical body (see the plate of the spine, page 13, col. 1). Yet again, all have linking with the seven bodies; and as the soul or etheric body, has its nature in the blood and lymphatic glandular chain.

Hence the error of blood transfusion, but until the soul can overcome the karmic states of the past, there will be no alternative; unless they are in the position to fight for their principles. But again, this is where the outlook of the whole world must change and become lifted up.

As the soul so makes effort through the mind and raises the sensitivity of these bodies, will they make unity with the positive planetary vibration and planes of space and outer-space; those, which at the present moment, they are building up in the negative through the activity of the mind. (See the plate of the Bees, page 8, cols. 4 and 5). This is how the musician and poet draw from the heights their genius as outer world rhythm.

Therefore this brings us to the understanding of all being HERE and NOW; for the soul can only reach these planes through the MIND and not SPACE TRAVEL.

The mystery of THE DEAD COW being buried at the root of the grape vine. In reality this is no mystery but what did take place if the poor creature should perchance die, or as far as that goes, it was any type of animal that would serve the purpose.

The viniculturist theory would be that the cow, in rotting into the ground and feeding the roots of the vine, would put into its growth and fruiting all the fecundity that a cow does produce in her life. Thus feeding the ground as a form of humus.

The esoteric explanation was the feminine principle that had gone to seed being buried, and a new "wifely" vibration brought forth, that the vine of life could be nourished and activated into growth.

Of course it must be realised we can only just touch upon each subject, as space will not allow for more. Whereas in the circle much discussion takes place through everyone plying their results from their concentration; and nothing could be more amazing when an elderly lady sitter of 77 brought forth a complete linking with outer-space vibrations, and said,

"I do not know whether this was my own mind."

So it shows that it is not just youth with their vitality that produces mind, but man with experience; for our greatest contributor on Wednesday evening lectures is in his 80's, and his exposition of the Bible is amazing.

SO THERE IS HOPE FOR EVERYBODY.

THE QUEEN OF THE HEAVENS

THERE is not one small detail of this picture which does not accurately portray the secret teachings of the ancients; every point indicates an essential action by the seeker in order to become what the whole symbolises, Man becoming as the Bride unto the Spirit Planes of the Spheres, a Bride unto the Christos.

First the soul has raised itself up until it is practising what it preaches, the heights of perceptivity placed into practical application. Its generative powers now as the Kundalini Force feeds the body and mind with that richness of power which alone allows the mind ceaseless activity without the necessity of earth sustenance. This is seen by the serpent's fangs spitting its "juice" into the neck, meaning thereby that the raised kundalini or generative seed once the chakras are active will become the feeder of the vital thyroid energy which is the only fuel to feed the mind flame, hence the reason why many are suffering from thyroid deficiency, because in the past they have raised this kundalini power and have returned in this life to emotional sensualism and desire, thus cutting off from the thyroid the source which alone will energise it. Behind the 'Queen,' or now royally regarded and revered Temple of the body, is the pillar, that of the link between the very depths and the very heights, earth and spirit, showing by its frieze the 7 upraised Urael of the Serpent Fire. He who is as the Preserver of the Sacred seminal Seed, a Vishnu. The Birds are the free flight of the Word in the mind of the soul; the crown the birth and establishment of the Abstract mind plane which the soul now has built as its new 'home'; the peacock's feathers are the Seer's Eyes of perceptivity; the long hair the magnificent wealth of mind wisdom gathered by the soul in its struggles to extricate itself from matter. The rich and royal castle is the greatness of the establishment built in the planes of mind, with the many roses showing the tortuous pathway of thorns that the soul had to pass through to learn the Compassion so necessary to be of the Spirit. Could any picture so capture the beauty, harmony, richness and royalty of such a journey?

DISEASE

SO many write to us regarding this sickness and that sickness, and in answering we prescribe the herbs suitable to bring HARMONY and BALANCE to the bodies that are being afflicted, then endeavour to explain, according to the Law of Astro-diagnosis, what is the cause of the disease. Most sickness is due to the soul making delay on their road of growth; but then, that does not just refer to this life, but the many lives the soul has been pursuing down the road of TIME. Quite possibly in one life the soul has lived for entire pleasure, or even evil. Circumstances having caused the personality in that life to commit acts that you, as the personality for this life, would never have dreamt of doing, and would even amaze you if you knew; but you have. And this would account for certain planetary positions in the chart which now are causing sickness.

It means that what the soul did sometime or another—and never righted or cleared it—now distorts and affects the physical body. Not just a mind or inner body distortion, as it was once, but has permeated through every part, and now centred itself upon the organ ruled by the thought or action in question, or where a lot of planets are situated.

The Astrological Causes

FOR instance, a soul who has been defiant and self-willed over many lives, could quite easily arrive in this life and find himself deaf in one or even two ears. Yet at the same time I know of a woman who went deaf through carrying out a number of abortions when she was younger. This is a lot to do with where the planet Saturn is placed.

In this case it was in the sign of Pisces, in the 5th house, that of the house of children. In that of the former in the sign of Gemini in the 10th house where they should have been giving their mind and will over to the higher Powers that they could be a channel of service, for they had Uranus in the 6th house, the house of the Virgo mind. They had great wisdom hidden within, but were quite contented to keep it on the plane of psychicism, thus HOLDING UP THE PLAN OF THE GODS.

In the one who was stone deaf, with Saturn in the fifth, they had Uranus in the 10th house in Leo whereby they were to radiate the highest form of Mother love, and not a state of domination. This only ended up in abortions, for all the ancients evils of desire took hold of them and they became destructive.

While the self-willed one... with Uranus in the 6th and Saturn in the 10th... lost their

body, causing the discord called sickness. For many of you say, I am a vegetarian, I have lived very carefully and nothing to regret, and here I am with this state of sickness.

I have pointed out how all is coming forth from a collective state from the past lives and this refers to both good and evil.

Now we have to see the soul being ruled and guided by twelve signs; these are helping the soul to become moulded by the higher Powers that it can rise up and carry out the plan of destiny.

In a soul's chart some of the signs are more prominent than another; when there are a lot of planets in one sign, sickness and disease, caused by certain actions of the mind, can affect the limb controlled by all those planets. This is why we often ask you for your birth time, to see why you should be

afflicted in such a way.

But it is only the collection of karmic states over the ages that have never been corrected, that, in coming to its final body, that of the physical, now is afflicting the state most prominently housed by the powers.

For instance, a lot of planets in the sign Sagittarius would, when that one was not in complete harmony with the law, find their hips and thighs affected in the form of rheumatism, or even accidents. Or a lot of planets in Gemini, the nerves or bronchial tubes affected as well as the thymus gland. But remember it is not the planets themselves, but the soul in discord learning under their planetary influence to try and bring balance to that which is now in chaos.

The last states just mentioned would only find unfoldment through bringing all to a state of mind growth. But as already stated, it is not just one life, but many lives; and what may be the illness in this life, has been started many lives back, but now come to a culmination.

If only this could be understood a little by the medical world, and not just drugs and pills ladled out, the pathological side of the difficulty would be met.

Yet we have to see their point also, for they must in a hospital have thousands of individuals passing under their hands, and if they were to stop and study each one to the degree that we try to, only five or six would get through.

Many souls are far more advanced than they realise, and it is these higher super states that are being sadly restricted, and very often congested by karmic states of will, vanity and egoism, or even conventionalism in this life, that can cause such states as strokes; or the negative side of the ascendant to flare up in sickness.

We are doing all we can to try and get home to the many the truth regarding themselves, but it is not easy, for so many are still influenced by old orthodox ideas, even though they say they are not.

So do understand when we answer your letters, that we are

Ra-Men-Ra's Healing Prayer

Given for the first time on 7th June, 1964, when the Book of Names of outside patients was blessed by him and then returned to the Altar on which it had rested during the giving of the Sunday Lecture.

We seek of the Holy Spirit that It goes forth to heal those that are seeking in all humility, that there can be the unity between those within the Temple and those without, that there can be the spreading of Love, the spreading of the Powers of Truth, and that these will become enlightened and embalmed by their faith in the Unseen.

We call upon the Great Ones that they, in their faith, shall have expounded unto them that whereby there is a need for them to discard, for them to expand, for them to embrace, and for them to bow in humility; for then the bodies will become in harmony and they will see the way of the Spirit. We leave these in Thy Care.

Amen. Amen. Amen.

hearing through not listening to the heights and bringing the wisdom of Uranus down to help mankind. They merely went on calling down the powers, which resulted in them stoning themselves.

So now by this you can see how we view sickness, because we know that it is due to bodies—of which man has seven in the degree of unfoldment—being at discord through some state of self-will in some life or another.

This is being very simply put, when really far more complicated information could be added; but I have tried to bring it down to a very simple way of seeing it, owing to the many writing from abroad who have very little understanding regarding the make-up of the

soul. Not the body, but the soul, or the consistency of that part of the being that has lived from the beginning of time, and ever goes on becoming.

For in every life a new personality is created by the soul for its new journey, and in the first seven years the mother of the child plays a big part in the creation of this active state. For it is under the guidance of her Moon that the young life is moulded, or, if no mother, by the one looking after the babe. Therefore by this we can see the importance of motherhood; but this is not the point now.

What we are seeking into is the major cause of disease, and how it has resulted in fastening itself onto a certain part of the

DIVINE ALLEGORY

by Mr. Waugh

In the June Issue 1964 the first article of Mr. Waugh's "Know Thyself" appeared on page 7. This is the second of his articles sent in by the kindness of one of those who attended his lecture over 50 years ago, Mrs. Ellinor Brown, who, writing in her covering letter said, "it corroborates as you do the esoteric meaning of the bible and the importance of the mind." We hope that his work will live again in helping our readers to study the deeper wisdom with fresh vision. (Editor).

Few, very few people have read the Bible, yet, how many there are who will argue upon it, and by so doing, act unfair to themselves and to the writings they condemn, or support. I use the word support, for it is equally as unjust to maintain the truth of something one is ignorant of as it is to condemn it.

How many if asked the gender of the man "ADAM" could answer correctly? Yet how necessary, if one is to understand the teachings of these writings that have been handed down to us from ancient times, that we should have a true opinion as to the first principle of them.

Aristotle's definition of "First Principle" is "Cause." The word "Man" is one of the first principles of the oracles of God mentioned by the writer of Hebrews where he says

"Ye have need that one teach you again which be the first principles."

To teach truth it is necessary to use allegory, for young souls have not sufficient experience of life to desire truth, yet, must have something simple to understand during their spiritual childhood; hence we have fables which contain truth under the literal word.

It does not follow that because the Bible is a fable that it is not true, for it is not possible for a fable to exist unless there be a truth to base the fable upon, and it is this truth we are to study in the following pages.

The first, and most difficult lesson to learn, is, that the word "Man" in Divine Allegory does not mean the physical male human being; the physical female human being has an equal right to the word as the male, also to the word "Adam," and not only to Adam but to every other name used in the Bible, such as Noah, Abraham, David, Solomon, or Christ.

I wish this to be firmly understood, that, whenever I use any of these names, I use them as Man male and female and their

name Adam or Noah or Abraham, David or Christ, just as the case may be, that I am writing about.

Symbols of Thoughts

WORDS are only symbols of thoughts, yet they are idols to the person whose mental concepts are limited to sense impressions; To free oneself from the bondage of sense is not an easy task.

Plato, writing on the danger attached to the discovery of the use of letters, writes thus in the dialogue "Phaedrus,"

"For this invention will produce forgetfulness in the minds of those who learn it, through the neglect of memory, for that through the trusting to writing, they will remember outwardly by means of foreign marks, and not inwardly by means of their own faculties."

So you have not discovered a medicine for memory, but for recollection, and you are providing for your disciples the appearance and not the reality of wisdom.

For hearing many things means that without instruction they will appear to know a great deal, although they are for the most part ignorant, and will become troublesome associates to converse with, through thinking themselves wise instead of being so."

Writing further, on the same subject in "Cratylus" on the possibilities of words, states,

"That it is possible by the use of writing to assign the image of a man to a woman, and possible, on the contrary, to assign the image of a woman to a man, by presenting to the sense of seeing without understanding."

This is what the writer of the Divine Oracles of God has done. Josephus in "Josephus against Apion" Book I, Section 22, quotes Aristotle as saying "The Jews are derived from the Indian philosophers, they are known as Pundits. Their work was the producing of

Allegory or the hiding of Truth by the pounding or pruning of words, that is, using words having more than one meaning.

The word "Man" has been used by them in this way. In the Sanscrit "Man" means "to think" which is a condition of Mind, that is Mind Active. Mind and Matter were personified to teach truth; Mind, active, was Masculine, Male, Man; Matter was passive, feminine, Woman.

In the Greek Myths we get the Earth Mother. Plato in "First Alcibiades" says

"A man therefore is a being different from his body."

And by a course of reasoning comes to the conclusion that "The being which rules the body is a Man."

When speaking on the cause of sex he says that the Man who through some cowardly act reincarnates in a female body as a result of that act, thus keeps separate the Mind, Man, from the body, and giving us to understand that the mind of a female is Man as well as the mind of a Male.

We thus become conscious that the word Adam is not the name of a physical human being, not the name of a physical Man but the Allegorical symbol word for the Mass Mind of all the inhabitants of the earth.

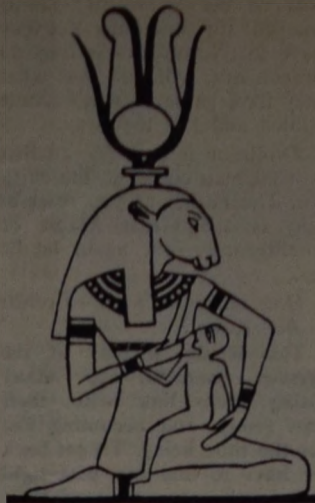

OSIRIS

Josephus, who, at the fall of Jerusalem, had the only copy of the Old Testament in his possession, says in the preface to the "Antiquities of the Jews" that the Bible is written in three forms, some parts darkly and enigmatic, some under a decent allegory, and some parts plainly and expressly.

Living contemporary to Josephus was "Philo Judeas" whom Josephus says "was a man not unskilled in philosophy." We have had Philo's writings handed down to us where he treats very fully on the Allegorical truth of the Hebrew Scriptures. Modern critics of Philo say that he is vague and inconsistent. That he is vague is perfectly true, for, the Esoteric truth can never be written, it has to be understood; a growth of the mind out of particulars, that is forms, into Universals, that is, ideas.

Plato makes this plain in "Phaedrus" where he says that "In every written discourse, on whatever subject, there must necessarily be much that is sportive, and that writing can never be more than a reminder for those who already know."

ISIS

Modern critics of Philo have not realised that matter contains nothing beyond the power to reflect what already exists in the head of the observer. What we see lies not in the thing we look at, but behind the person looking.

When this is realised then much of Philo's apparent vagueness will disappear. A very brief acquaintance with Philo's writings will prove the untruth of his inconsistency; in writing upon "Man made in the image and likeness of God" he says;

"And let no one think that he is able to judge of this likeness from the characters of the body, for neither is God a being with the form of a man, nor is the human body like the form of God, but the resemblance is spoken of with reference to the most important part of the soul, namely the Mind."

And again "Jacob, therefore, being an experienced man, that is to say, being "Mind,"

And again "When the Mind which is in us, and let it be called Adam."

And again "Meaning by the term man, not the compound being as I have said before, but the God like creation by which we reason."

And again "But Samuel was perhaps in reality a man, but he is looked upon not as a compound animal but as mind."

And again "This is Moses, the purest mind."

These are only a few of the many instances where Philo very definitely and consistently asserts that the word "Man" means "Mind," and that the names of the men are the allegorical symbol words for the Mass Mind of the whole race of human beings, for, writing on Enos he says, "This man the Chaldeans name Enos, but this name when translated into the Grecian language, means "A Man" he having received the common name of the whole race for his name.

For the student of Allegorical truth a study of Philo is a very necessary preliminary. Once the knowledge that the word man is to be understood in the Plural then much of the apparent inconsistency of the literal record is understood.

The story of Esoteric Truth

One of the chief keys to the understanding of the Esoteric truth is the second Epistle of Peter chapter 1 verse 20 where the writer says;

"Knowing this first, that no prophecy of the scripture is of any private interpretation" meaning by this nothing written by the prophets must be under-

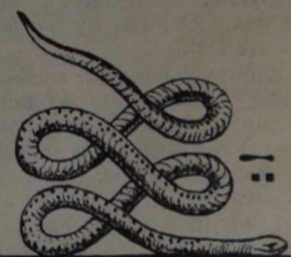

stood as having any reference to any private individual man, or city, town, or country, but must be understood in its universal form as referring to the whole of humanity, the Mass.

That the prophets wrote thus is endorsed by Aristotle, who in his "Treatise on Rhetoric," chapter 5, which deals with the necessity of speaking language with purity, writes;

"And it is because the chance of mistake is less, that prophets express themselves in Generals on their subject."

The study of Generals is one of the principles of Grecian Philosophy, and it was during the period when Greek Thought was being manifested that the Hebrew prophecies were written somewhere between the years 1000 B.C. and 300 B.C.

I will give one instance where the incident is recorded in the same manner as, man male and female and their name Adam, that is commencing with the singular and ending with the plural; it is found in 1st Chronicles, 26th ch. and 31st verse.

SERPENT

"Among the Hebronites was Jerijah the chief, according to the generations of his fathers. In the fortieth year of the reign of David they were sought for and there were found among them mighty men of valour at Jazer of Gilead."

We thus see that the name Jerijah is the esoteric symbol word or name for a Group of men and not for a single person.

There exists in thought, just as in music, a condition which we know by the name of Harmony.

SOCRATES calls right thinking, making music, and tells us that all his life he wondered if he had obeyed his prompter correctly, and tried his hand at composing poems to be sure that it was not that kind of music he had to produce.

Finding that he was not fitted for that, he turned again to music of the Mind and produced such chords of Thought that enabled him to step out into the great unknown with a peace of Mind which gave to death the appearance of a Friend and Benefactor; surely a worthy example, if not how to live, at least how to die.

We are not all endowed, like Socrates, with a strong physical constitution but we all have to make the same journey as he, and the best use one can make of life is to learn how to die as he died.

Socrates' thoughts however are not for the multitude.

PLATO says that it is not safe for the Mass to possess a true idea of God; this being so, what I have written about the word "Man" will not appeal to the Mass who must ever remain subject to the senses; it will however appeal to the "tenth" which Abraham gives to Melchisedec, King of Salem.

(Genesis 14, v. 20) and (Hebrews, c.7, v. 2-4).

THE THIRD EYE

Concluded from Page 5

That was what was being taught by the Jesus at that time, because there was so much righteousness on the part of the Pharisees, who said there were those in the Temple who, when they were just about to bring the wisdom on the Sabbath Day, over-spilled.

Thus he continued, do you think that he will not lift up the sheep fallen into the pit, and if so, how much better then is a man than a sheep? verse 11, 12. These are not righteous words, but truths that had to be revealed from a multiplicity of words drowned by the pomp and arrogance of Papalism.

Popes raised up for power and circumstance; but not to do the work of the Father, by raising up the fallen and nurturing the widow in her loss, but raising a cult that has disorganised the calendar of the gods and left man high and dry in doubt and despair.

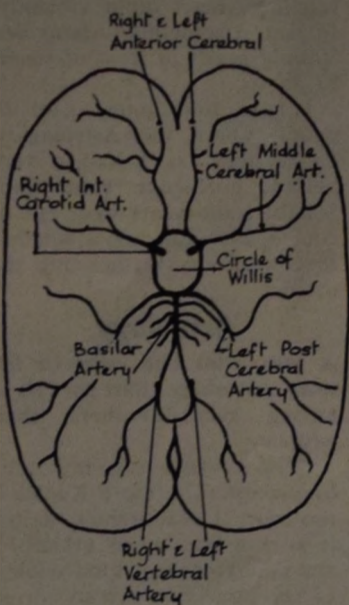

The Working Centres

NOW we come to the finale when we say that, if the pituitary and pineal are affected by the derelict state of the fiery Wheels, and all glands are interblended, then what has happened to the Thyroid that lies in the front of the neck and secretes a secretion called thyroxine, and is the first control of thought, speech and action when so many are only governed by the press button occupation?

Then the Parathyroid gland that lies on either side of the throat, controls the level of calcium and inorganic phosph-

ate in the blood when so many are now complaining of leukaemia.

Then what about the Thymus that lies in the lower part of the neck and chest, whose secretion controls, not only the development of the reproductive organs, but blends heights with depths. Hence the priests breast plate, or ephod of twelve stones blended in purity; for if this is damaged the muscles become toneless and weak.

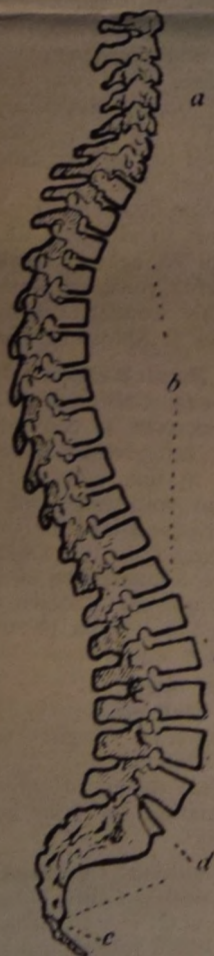

THE CIRCLE OF THE WILLIS

Then we get the Suprenals lying on each kidney. These being the hydraulic pumps that supply the adrenal cortex to the whole of the blood issue, and prepare the work of liver, pancreas and spleen.

The metabolism organs of action strength, purpose and rebirth; with the pancreas holding the greatest secret of all, the creation of insulin which gives the soul its fiery intent, motive and energy to become.

It is these that become deficient when the seed is bare in the seventh, when all the seed has been drained out by desire. Therefore it is a vicious circle of the serpent (see the plate on this page) who is biting off its own tail through the lack of balance and fiery nourishment which was destined by the soul in its creation: but now lacking in knowledge regarding the glandular functions that have become completely disorganised through the road pursued in ignorance. Hence the twelfth house planets.

There are those who have, through the mystic cult of the ages sought to raise the kundalini upwards and found the answer to life, for they at last had realised that man was not of the flesh, and that his way lay through the way of the mind as the raised up spirit. But they had not brought the knowledge taken to a balanced conclusion, which would result

PASSAGE of the EQUINOXES

IN order to understand the movement of the great Aeon of Time, the passing of Ages has always been calculated according to the Stars. Each year the exact point of the Sun crossing the celestial equator is observed to move backwards in its circular movement some 50 seconds the Precession of the Equinoxes (60 seconds each minute: 60 minutes each degree: 360 degrees a circle). Thus it is calculated it takes approximately 2,160 years to move through 30 degrees which equals an Age or the passing through of an Equinox. The Celestial circle is divided into 12 great Constellations the 12 Zodiac Signs, and subdivided into 36 lesser Constellations, each of ten degrees, a decan.

It is in the terminology of these constellations that great passages of Time are referred, and during the passing through of them their influence is shed on mankind. It is through them that Mystics teach of the influences and events that man will experience in the future, the Bible being full of references to these past Ages. It is in this way that Mrs. Spearman-Cook refers on page 9, column 1. As the Ages precess the lesser Constellation periods are met.

In this Age of Aquarius commencing in the year 1880 as the chart shows, as it is moving backwards the last

Decan is met first. The three decans in the order of their being entered are named Cygnus the swan, beginning in the year 1880, Pegasus the flying horse in 2600, and Pisces Australis, the Southern Fish in the year 3320 A.D. The Age of Capricorn will then commence in 4040, its first decan to be entered being Delphinus the dolphin, followed by the decan period of Aquila the white eagle in 4760 and Sagitta the arrow in 5480 A.D.

So it can be seen that it will be in the years 3320, at the commencement of the last Aquarian decanate when the wisdom of the Southern Fish will be drawn forth out of the magnetic Waters, and at the end of its 720 years of influence its Saturn or Kronos ruler will leave Aquarius to enter

riding on the Dolphin. One simple interpretation of this is when the very mind awareness at present held rivetted to the emotional delights can be raised out of these waters, then Man the Mind—as the Heights or highest point of conscious awakening—can ride forth as master of the emotional seas when the Capricorn Age starts. Then the Influence of the Celestial Dolphin reigns as the soul who though still in the remnants of emotionalism is ever coming up out of the waters to breathe in and be nurtured by the Solar Radiance.

The chart helps to show how in entering each new Age, the polarity or opposite Age influences, and what happened in those days, must necessarily be felt. It is having the wisdom to know how to manipulate these awakening roots of those ancient days that is so vital to the initiate.

The Myths and Legends contain the very accounts of the troubles and difficulties that Mankind then went through and this is the Reason Ra-Men-Ra, the Voice and Teacher through Mrs. Spearman-Cook, has been and is still giving Lectures every Sunday teaching of their true interpretation and how they are applicable to the modern day.

The Editor.

in a gradual bringing forth of the Third Eye.

It is this that man is facing now that he is having to strip on the road of Relativity; but the tragedy is, he is blind and deaf to the real cause, the blind and unbalanced state of the human soul. Yet the Scriptures are alive with this truth, and answer the many questions put forth by the thinking individuals.

The sooner man gets down to studying his basic creation, and how it was derived, then seeks to cast off the convention and orthodox anathema of the Age, the better; for by that he will solve the problem that is getting extremely acute, and prevent the entire loss of his mind and individuality. He has got to face it some time or another, whether now or later on. For the Race has been forced to turn the bend, so reality will come sooner or later.

This is but a foundation of what can come forth: now it is open for investigators to think and realise that the answer to this is the unbalanced state of the Race through desire, conventionalism and greed warping the outlook. For here again, when the Christos was asked for a sign, he referred them to the prophet Jonah and his struggle to come forth from the belly of the whale where he had got caught in desire and righteousness. And how Nineveh repented and rose, but the worm was still there, so withered his reform.

So that is what is going to be put right now; the desire-nature of man. And what is going to happen is the greed and ravenous state of voracious

THE GRIP OF THE SERPENT

NONE can deny that the world is dominated by the out-of-control wild states of passion and sensualism, with man merely bowing and scraping to the Serpent of Desire. Ere long, too late, he will find that the debauchery encouraged by religion and state has resulted in the loss of mind with disease and desert increasing everywhere, and man no mind intelligence to stem the flood tide of decay.

appetite at the present time, causing sex; and food is going to cause all the glandular system to go out of gear. Man is going to find himself with all states of blood difficulty; everything breaking down in the glandular system; and once that breaks down man will find it hopeless to deal with his mind.

Now it is not just a time of repenting, but man facing reality, or else the complete loss of

the glandular system, and the law demanding some more drastic course of revival. For now a turn has been made it cannot end with disintegration, but the soul being forced into balance, thus rebirth, and this can only be through dire suffering and sorrow, mentally and physically. This will be aided and accentuated through the FIERY INBIRTH surging through the soul, and burning up the evil, and balancing the soul.

This is what man has been seeing as the destruction of the world by fire; the destruction of the old world, and the birth of the new. The world balanced and radiating with light as a new Jerusalem. For no man can radiate and dance with joy when he is unbalanced through distorted ideas and evil intent.

(INCLUDING ADVICE GIVEN ON HERBS)

THE WATERS OF DEATH

by Winifred Dearden

THE STATE of the children's teeth is a national disgrace, according to the dentists; and members of the medical profession agree. Both bodies are almost unanimous in advocating the addition of a chemical called Sodium Fluoride to the water supplies, because they believe that through "measured doses of one part per million," the tooth enamel will be strengthened and dental decay cut in a quite miraculous manner. Other members of the community are equally unanimous in their disapproval and apprehension at this high-handed measure, thus earning for themselves the labels of "cranks" and "obstructionists."

Medical and dental officers exhibit such a grim determination to have their way in this matter that people are beginning to wonder what more besides altruism may lie behind this highly organized DRIVE to dose, not only the children, but the whole nation, whether it likes the idea or not.

There are facts about this chemical that never see the light of day in the propaganda literature circulated by the "pro-fluoridators"; facts substantiated by responsible doctors and dentists from all over the world who have dared to disagree with the voice of authority.

For Sodium Fluoride is a waste-product of the aluminium industry, and not at all the same thing as CALCIUM FLUORIDE, often found present naturally in some countries' water, as is lime and chalk etc.*1

Sodium Fluoride is cumulative in effect, lodging in the kidneys and other organs over a period of time. Sufferers from diabetes, kidney, liver, blood and bone diseases,

especially Paget's Disease in the aged, would be the first to be adversely affected by this poisonous substance.*2 for poison it is and widely used in pesticides and insecticides. It is 15 times stronger than arsenic*3 and half a teaspoonful in a tumbler of water would cause death.*4

This chemical, once introduced into the water supplies would infiltrate into all boiled foods and drinks, i.e. vegetables, tea, coffee etc. and even the official pamphlets advise housewives against leaving the kettle "on the hob" and making gravies with the water in which vegetables have been boiled, because the fluoride content is thus raised above the "safety level."

It is to be hoped therefore that the Planners will not succeed in adding yet another poison to the already fear-some list that today adulterates our food, but that we may ultimately join the many countries of Europe and some of the Commonwealth who have rejected Fluoridation as a dangerous and unethical experiment on the people's health.

*1 CALCIUM fluoride is a natural element; Sodium fluoride is an artificial laboratory product, a violent cumulative poison, which causes fall of blood-pressure, respiratory failure and general paralysis, as well as attacking the protoplasm.

*2 THIS statement is supported by a Wimpole Street, London, Doctor who made a statement to the London Anti-Fluoridation Campaign, 49, Fulham Broadway, S.W.6. Readers are requested to get in touch with the Secretary for all the leaflets in support of this.

*3 THIS was announced by Dr. Charles Brusch, B.S., M.D., Director of Cambridge Medical Center, Massachusetts, U.S.A., and this and other equally damning evidence is obtainable from the Greater New York Committee Opposed to Fluoridation Inc., 342 Madison Avenue, New York, 17, U.S.A.

*4 TWO medical Research Workers at Oxford in their experiments, the findings on which were published on October 25th, 1963, in the British Medical Journal, came to this and other equally alarming conclusions.

THE VOICE OF LEO

ON 19th July a special music programme to celebrate the solar entry into LEO, will be held at the School of Universal Philosophy and Healing, 6 Phillimore Place, W.8., prior to the Sunday lecture at 6.30 p.m.

A selection of Johann Straus II's Best Loved Waltzes will start just after 5 p.m., followed by Beethoven's Symphony No. 6 in F Major ('Pastoral') Opus 68. It portrays the composer's impressions of a peaceful countryside full of activity and harmony. One of the greatest examples of serenity and colour in symphonic music.

Readers are specially requested to join us on these special evenings when Unity between Spirit and Earth helps to send forth New sustenance into mankind. The more who can support this the greater can be the universal benefit.

THE MECHANICAL INTELLECT

THIS is the modern 'death-ray' spoken of and prophesied by so many but of shape none dared to tell. But it is too plain to the thinker for he surely can tell the result of being in the hands of the modern textbook doctor, scientist and mechanical boffin. It is they who will dream up some new drug or chemical far more devastating than the present fluoride and past thalidomide. What new "blessing" will be produced by the money-mad commercial molochs who hypnotise the masses by their advertisements, enticing the mindless to buy their drugs, foods, drinks and chemicals until soon the human will become the ersatz Pinocchio dead to the call of Mind or Spirit.

Editor's Comment

THE short Article by Winifred Dearden highlights a far greater and more fundamental problem than the question of the lethal danger of the water supplies owing to the fluoride impregnation by the spiritually 'dead' chemical policy which now dominates some public authorities. She herself foreshadows this in her concluding remarks referring to the 'fearsome list' of poisons that modern society are being forced to take through the mass adulteration of land and all that feeds thereon.

The fundamental problem that soon will dominate the world will be the rulership of whole nations by the secret minds of chemists, scientists, doctors and other so-called technically qualified men, whose soulless ideas will be directing and killing the spiritual sensitivity of millions. Already drugs, chemicals, insecticides, are taken daily by millions in complete ignorance of what is taking place OR the effect that such absorption will eventually have on the physical body.

That there could ever be an effect on the other bodies within the physical sheath is not even recognised as possible by the majority, and certainly not by the soulless technicians that are the initiators of such schemes.

This increasing mass direction of the synthetic and the destruction of Nature's own ways is being encouraged by the commercial vice-grip that is now paralysing the minds of the vast majority of the farmers

and those that are allied to their products, the food merchants.

Yes! fluoridation and ANY other scheme that accepts that Nature's own way is not sufficient and seeks to introduce chemicals etc., in order to try to aid nature, are insidious elements the danger and suicidal policy of which cannot be measured.

Many are seeking as to what they can now do in order that they can at least take every possible precaution, and corrective step, to minimise the effects that are already on their way. It was thus seeking that an answer came that at least helped to give a beacon of Light to an otherwise dark abyss.

Mother Earth, the Divinity of Nature, has within her cloak secrets of which modern man is completely unaware. In her are Powers

that will come forth to take corrective action drastically so that the utter destruction of Nature herself cannot happen. There is within her Laws one vital Law, the LAW of RESURGENCE.

This inherent quality in Nature enables Her to ever give birth to the antidote to neutralise the interference so caused.

Such a Law operates continually but its speed of action is determined by the vibrational level of the plane in which it is manifesting. As the Earth density and solidity is held in a snail's grip then thus the action of resurgence will be slow, and the LAW will not immediately manifest to correct the evil cast upon her.

The answer is to take herbs, nature's natural protective food, and especially those which will help the kidneys, reins and bladder, as well as herbs ruled by the Sun. Herbs such as Agrimony, Dandelion, Wood Betony, Golden Rod, Buchu,

and Sun Herbs such as Angelica, Bay leaves, Centuary, Marigold, Mistletoe all aid in correcting any poisons in the system.

THE TEACHINGS OF UNIVERSAL PHILOSOPHY

by James Averill

UNIVERSAL PHILOSOPHY IS NOT MERELY A NEW understanding based on ancient wisdom but a living vibrant Way of Life, continuous, ever Evolving. It is to help those new to the Teachings that this pamphlet has been written so that an understanding of them may be gained, but it is not meant to be exhaustive.

The Human Spark

THE Cyclic growth of Man, as Mind, and Woman, as Matter, is primarily accepted as a Cosmic Evolution with the multitude of the microcosmic human minds as being the cells of the whole. This basic belief, called by some as Reincarnation when in the Earth, necessitates each man being equally responsible as an equal representative of the Godhead with each as an essential unit to unite the Cosmic Energies, the Stellar Rays, with the Nature Life of Earth, so as to build a Mind Awareness as a state of Intelligence. So it would enable there to be a report to the Central Godhead so that out of the Unknown there would come forth of the LAWS of how this intermixing is done. Until there is some willing worker to test and try this interblending, its laws are unknown and "darkness is on the face of the deep."

Man the MIND—the hu-man is the humus or ground man growth or minute reflection of Man the Mind—is the united whole of all the Stellar Forces or Cosmic Rays, the Proton Life that enter and energise the Earth's sphere, the Electrons or Woman. In order to present this into an understandable and simple conception the Ancients, or Shepherd Kings, divided and taught of the 12 Great Constellations, or groups of Stars, whose energies flow and feed the Nature growth with life power. These are the 12 Great Zodiac Constellations, the Hierarchies.

To present this simply and scientifically the whole 12 are diagrammatically envisioned into a circle of 360° degrees each of the 12 being of 30° segments called Signs each of which are subdivided into 10 degree sections called Decans. Each of these Decans have a special Constellation group as a ruler and thus there are Twelve Great Constellations as the 12 Thrones and the 36 lesser Constellations as stages of unfoldment.

It is accepted through the study and interpretation of Astronomy, and Astrophysics its daughter, that the Cosmic Energies that persistently bombard Matter are not only the Feeders of Earth but the essential Feeders of Man the Mind, as well as therefore the hu-man. This Hu-man stage of growth has to learn to channel and become the working uniter of these Forces. The Way and How of doing this has been known throughout the Ages as the mystical science of Alchemy, the Search for the Holy Grail, the Philosopher's Stone. This is the building too of the mystic heat, which becomes the Kundalini Fire, and eventually the Solar Flame.

Universal Philosophy's whole Purpose is to teach how this is done and how each individual hu-man spark—speck though he be—must play his essential part in the building of Man the Mind through being prepared to learn of "man know thyself" through building his own mind awareness out of his brain multiplicity.

Ways of Investigations

THIS is the reason why Universal Philosophy is based FIRST on the working knowledge and Truths of these Cosmic Energies ever since the earliest stage of the genus Man; these are the Laws of Astronomy and Astro-physics, as they should be taught. ITS SECOND limb is the knowing and living of the Energy Interflow of these Powers through the hu-man agency,—the Science of Alchemy, as heralded through the ancient teachings

BIRTH OF THE WINGED MIND

THE Earth raised up and the Word become Flesh. The Christ Child free at last as the mind that can wander supported by the body, which no longer earths it by a backward or downward glance: the limitless boundaries of the Spheres are the soul's prize to tap the Rhythm of the Spheres, and as the footstool of the Buddha another imprint of Wisdom is implanted into the World.

of Medicine. THE THIRD limb of Universal Philosophy is the Science of Astrology, the wisdom of this amalgamation of the Cosmic Energies with the Nature Forces, the how and the why of their working as seen over the Past Ages, as well as the present and future Centuries. This IS the WORD which is ever as the silent Witness to guide and direct man, and MAN in the throes of darkness.

Universal Philosophy is the Science of Life: its Teachings are only deep to those in the depths caught in the imprisonment of old mental conceptions, orthodox viewpoints and intellectual barriers. If a state of free mind enquiry can be obtained then there can be built up a free Unit of Mind so as to be the unfettered uniting of these Cosmic Energies and Nature Forces, the Father and the Mother, Spirit and Matter, Prot-

on and Electron, so as to conceive and produce Mind, their SON or SUN.

To know of the past Ages is also to know of each individual man's growth. To study it individually and collectively enables each man to gain not only a knowledge of the past causes which have led to the present effects but to have the powers to build and direct the present causes into future effects and thereby evolve. So it is, therefore, that Universal Philosophy's first great limb teaches of the past wisdom, interpreting it from the True Light of the LAWS, that have formed from this Stellar-Nature growth; the Science of Astronomy.

In every new Age or Equinox there

Woman the Earth, the sole purpose of the creation of the genus man.

Whilst the hu-man, the mind-animal, is uniting in a sexual animal state he is not unifying the Cosmic Energies with Earth as a Mind growth. Instead he merely multiplies and adds unto the growth of the human intellectual mind and heavily weights it with added analyses until so many particles are obtained the very mass number destroys the powers of Creative Energy with which each man is endowed, his Life Seed. Through the male and female genders, the personality existences as sensible life, all that the hu-man growth does is to build and increase the mass roots of feelings and sensations until they become so enormous that the Stellar Forces are lost and isolated in the animalism of the hu-man, and Man the Mind disappears.

Universal Philosophy teaches that this personal gender state of growth was the much talked of FALL by all religions, philosophies, myths and legends. So it is that the Cosmic Marriage or Interblending of the Nature feminine forces with the Cosmic Masculine Energies necessitate a denial of this continual generation of feelings and sensations, the subjugation and volatilisation of the physical 6 senses, the marriage spoken of by religion and the Celibacy taught by Universal Philosophy.

Practical Application

THIS introduces the reader to the practical daily working of Universal Philosophy, that of Alchemy. Man's physical body is the miracle product and outcome of the 7 sensory planes, via interblending of the Cosmos and Nature. Its working parts and its functions are entirely shrouded by animal materialism. These link with the Seven Planetary Lords which rule the 12 Signs.

Aesculapius the historical Father of Medicine was the greatest teacher of Alchemy the hu-man growth has ever known. It is this second limb or branch of Universal Philosophy that carries an urgent Message. Each person must learn of how to work his own machine, and how to keep it in the best condition, especially to-day when the animal hu-man's sensationalism and materialism has led to drugs and chemicals, that not only putrefy, poison and paralyse the Earth and its natural functions, but also the hu-man's inner bodies of the inner sensory planes. So it is that so many of the Universal Philosophy's Teachings give of practical medical advice not as from the medical fraternity, who are merely textbook students, but from the MIND. It is here in this second limb is taught the vital necessity to recognise each man as a sacred unit, each responsible for drawing down and directing the Stellar Powers into mind by uniting them with the nature powers. This is known as the Starry Spheres entering into the Lunar growth to produce the Solar Mind, the Cosmic MAN.

Since the beginning of Time there have been many who have evolved from the animal-nature growth via the man into Mind, thus releasing the Stellar Energies and creating a Cosmic MIND. This MIND, built out of the released Stellar Energies by those who mastered the sensory magnetic pull of animalism, is ever directing and helping the presently held Stellar particles to become released and reunited with their Source. These are the Spheres of the Masters, whose joint Voice is the natural "God" to whom the genus man looks for guidance and direction. It is these Forces that are the Planes of Spirit that all Teachers of Every Age endeavour to tap so that the Voice can re-enter the Earth's Sphere to revivify and direct the Imprisoned Stellar particles. This they can only do through some agency on Earth so that therefore it necessitates that such a channel must be a Master of the 7 Planes so that they can be sufficiently attuned to receive of the Masters Voice, the Solar MIND, the Buddhahood or Christos. Then there is issued forth the Logos or Word from the Stars, ASTRO-LOGOS.

The Science of Astrology enables the laws of relativity to be seen clearly. As the Equinoxes precess so at each New Age the roots of the polarity Equinox
