ENDLESS MISERY. BY A. B. MOORE

Let those who believe in God's partial love, Speak never again of heaven above ! For if endless woe is true, as they tell, 'Twill surely change that heaven to hell!

For who could be happy in heaven, and know That father, and mother, and children must go To regions of misery, there to remain, With "serpents" and "devils," and never again her and her friends, now called on Hannah Enjoy the calm sunshine, that peace of the soul, Which reaches from God, and encircles the whole Of creation's domain, from the East to the West, All mortals to save, and all sinners to bless.

What husband or wife in heaven could dwell,

Whose companion of earth, was wailing in hell ? What fath r could view, in that " ocean of fire," A daughter thus doomed to miseries dire, Forever to burn in that dark, seething flood, And yet believe the truth, that God can be good ? What mother could dwell in heaven content. And yet see her child in a hell of torment, E'er surrounded by "devils" and dark demons grim, On oceans of sulphur forever to swim, With sharp-pointed spears and torches of fire To scourge the poor soul with infinite ire, And not cry aloud with anguish of heart, My God! from thy heaven, O let me depart? With my fond, doting child, O God, let me dwell, For thy heaven to me is worse than a hell !

The angels in heaven, the saved and the blest, Could never be happy, and never at rest, While one single soul is condemned to remain in a region of woe, forever in pain. Is the God of all truth such a being as this, To create some for misery, and others for bliss ? To form man of the dust, to make him a worm, And then cast him to hell forever to burn? To make him imperfect, and subject to sin, And then make a hell to e'er keep him in ? To give him an agency, making him free, To be what he knew he never could be ? So send him a Savior, imperfect to save All mankind that die and pass to the grave ?

Such are the creeds that mortals have believed---Such are now taught, and as truth received ! All Nature, and reason, and Scripture declare Such teachings are false, wherever they are ; While endless misery is ever an error, And creeds that teach it, eternal terror

We have been not a little astonished at the position taken by some who have participated in the recent discussion of the school question. A large part of the argument of Messrs. Ramsey, Sage, and King before the court in Cincinnati means, if it means anything, that Protestant Christianity is a state theology in this country. Others who have written on the that have ever existed among men. Have they well considered the tremendous overturning of American society, and the utter reverhistory, which are involved in the adoption and application of their theory? What do these gentlemen mean? In a moment of intellectual rashness, fired by a zeal that would liberty a principle against which heroes have fought, on whose cruel altar martyrs have bled, and whose historic enormities are sufficient to startle the world; a principle that never did anything for Christianity but to corrupt and weaken it as a moral power; a principle which the political fathers who organized this government swore before high Heaven should never rule this land.

We design in this article to place on record an earnest protest against the whole theory cept the conclusion that, if the state *ought* to have a theology, then it ought to use all the where and everywhere; and that, too, whethmeans which are necessary to maintain and er it be applied to men, women, or children administer it; and that, too, as against all The history of the world shows that the state opposing forces. We then go for putting it can do religion no favor so great as that of into effect. The state should see to it that simply letting it alone. Going beyond this, the state passes out of its province, and always does vastly more evil than good.

Let it be granted, as we do most cheerfully grant, that a sound theology in the heads and hearts of the people is a very important and much-needed influence in relation to civil governments; and it does not follow that the state is the proper party to take care of this theoloferms of effective life. Religion and the Bible in the Schools.

The agitation of this subject is extending, and now bids fair to enter into the thoughts of the people, more than ever before ; somewhat to the annoyance of the protestant sects, who have had the entire moulding and ject. The friends of the bible, and religious training of the children and youth of this country. This discussion, too, is awakening enquiry as to the book itself, and its claims as an infallible and final revelation from God, and a true record of his dealings with mankind. If the Bible could be placed in our schools standing alone upon its own merits, but few would object. The objection entertained by progressive minds, may be found in the fact that nearly all our schools are under the control of the sects of Protestantism, who accompany the reading of the Bible with their peculiar religious instruction, urging it upon the youthful mind as an infallible book, and as authority to be unquestioned by every human soul. Aside from this, few care to specially oppose. The main objection to our common schools, is to be found in the fact, that although intended for secular instruction alone, they have been perverted from the true idea, and are being used for sectarian purposes and the advance of the orthodox faith. This cannot be denied, in fact it is now claimed to be their right and duty to do so. All understand how easily the youthful mind is influenced in almost any direction, particularly in the religious. To iHustrate this, we give the following, which we find in the Western Christian Advocate, the leading organ of the Methodist church-We think the argument a very good one, for a Protestant. with his abhorrence of Romanism, and we ask in all consistency, will not the same argument hold good for the Catholic, who in sincerity, and with equal earnestness opposes Protestantism. And again, we ask, if the same argument will not apply with equal force and power to the Spiritualist who stands equally opposed to both, and who sends his children to school for the purpose of acquiring not a religious, but a secular education? To illustrate our ideas, we present the complaint made by our Methodist friends :

dren, that the good Father, is subject to anger, wrath, jealousy, etc., and that sins may be pardoned. The Father is not a Spiritualist, but is a decided free thinker, and was very angry at the discovery of his son's conversion to Orthodoxy. Anger after the fact however is not as powerful to prevent this calamity as discretion before the boy is lost to liberalism and progressive ideas.

"I had met other cases similar to this, and was considerably impressed by this new discovery, for it confirmed the idea already in my mind, that every child who goes to a school under sectarian influence, is , in whole or in part to the orthodox faith Some students by constant exercise of reason might resist these influences, and come out unscathed, but those who would do it are few. No direct effort is made, perhaps, but for the sake of order, students present at religious service (in our common schools) listen to prayers, and expressions of ortho-dox opinions, until little by little they become ac-customed to those things, and thus by processes wholly concealed from the students themselves, they are led away by imperceptible stages, until one day the parents are surprised to find their children con-verted to the contracted views of orthodoxy."

It will be seen by our readers, that no in-

ustice is done to our orthodox friends, in making the slight changes as above. We can but rejoice in the agitation of this subinstruction in our common schools, assume in their arguments upon this subject that this is a Christian Government, and a Christian Nation, and hence, it is the duty of the state in some way to impress upon the mind of the children, the teachings of the Christian religion. In connection with this subject, we ask a careful perusal of the article on our first page by Rev. Samuel T. Spear. We hope all our readers may be as deeply interested in its perusal as we were.

Religion in the state schools is a matter f course, where church and state are united; but in such a nation as ours, where the two are strictly independent, religion in the schools is, to say the least, a strange inconsistency. Regret it as some may, the secularization of the state in this western land is a fact-that is the American idea. That the secularization of our state schools is also involved who can honestly deny? The American principle, for which many a battle has been fought, is the principle of toleration-or of that which this creational word but imperfect- passing resolutions, building churches endow- brains opportunity for grander realization ly expresses, perfect religious liberty. That principle we do not practice so long as we read a Protestant Bible in the unwilling ears of a Roman Catholic ; so long as we read the New Testament in the ears of an unconverted Jew ; so long as we thrust any book-revelation upon him who professes to believe in natural religion only, or to believe in none. We may speak of the precious treasures which have come to us from the past; but let us remember that consistency also 'is a jewel,' and national honor and fidelity to pledges better than

Last Sunday Miss Nettie M. Pease again leetured morning and evening to attentive audiences. On account of the extreme coldness, the congregation was not large in the morning, but deeply interested by the lectures in the consideration of the following subject : "THE MISSION OF THE BEAUTIFUL." The Lecture was preceded by the following appropri-

ate invocation : God of the beautiful, we know that thou art Enshrined in each being, enthroned in each heart God of the beautiful, all things speak of thee; From the stars of the sky, to the gems of the sea God of the beautiful, thy glories unfold In the light of the sky, its purple and gold. God of the beautiful, thy power we have felt, And low at thy shrine, have reverently knelt God of the beautiful, teach us through beauty,

To walk in the straight narrow pathway of duty. God of the beautiful, inspire and uphold us, And in thy warm arm's forever enfold us.

Miss Pease speaks again next Sunday afernoon and evening-The conference meetings held every Sunday

afternoon at 6 o'clock, are awakening interest. The question discussed Sunday 3d inst. was, "Can sins be forgiven, or is there any escape from the penalty consequent on wrong doing ?" Last Sunday the question considered, "Is there a principle of absolute evil in heavy interest to the capitalist; in other the universe ?"

We would recommend to our friends where half a dozen can be brought together to institute these circles for investigation. Frequently interchange of thought may be proluctive of as much good as lectures, and always profitable to those who participate.

Triumphant-The world moves.

We have only space enough left in our colamns before going to press to announce that on wednesday 5th inst the Regents of our State University voted to open its doors for the admission of women to all its priviliges. We do feel like shouting Victory, Victory. Which is about all we can say to-day. We feel a great satisfaction in having been permitted to work for many years in a private capacity, and the last two years by the pen, in these columns for the accomplishment of this object. Oh it is glorious to be permitted to labor and suffer if need be in this great contest between error and truth. We feel that the age of which the poet wrote in the following lines is already

near. "How beautiful will lite be then When earth can cry, behold my men! And woman in her perfect state Be womanly, and yet be great."

The practice of abstracting the produce of the laborer and accumulating it in the hands of the few has obtained in all stages of civilization; but the mode of this practhen will give you brief articles upon the tice is continually being modified by the

ty. The practice had its origin, and lowest forms in the depredations of savage tribes, the stronger always plundering the

weaker or more defenseless; and as man became more civilized the sword of the conqueror, on a larger scale, established the law that might is right, and the laboring or producing classes acknowledged the law from necessity and not from a sense of its justice. And a long, sad scene of desolating armies, burning cities and triumphal processions carrying the wealth of

conquered nations, with their inhabitants in chains, passes before our vision as we look into the history of the past.

The common sense of mankind now denies this barbarous idea of right, and no longer permits the destruction or privilege of private property by military power. Yet the idea that might is right in the acquisition of wealth still exists in practice, though not in its former form of brute force. It exists now principally in the form of capital and commerce. In our own country we have outgrown that exectable relic of the middle ages, the law of progeniture, which still exists in Europe; yet capital enables one man to appropriate a large tract of land to himself, thus curtailing the natural right of the husbandman to the soil, and compelling him to pay a words, taking the product of the producer and giving it to the non-producer. True, this is not done in the savage style in which William the Conqueror seized the lands of England, and appropriated them to his followers; but it is still the law of might; not the might of the sword, but the might of circumstances.

The exorbitant rates of interest that capital imposes on labor is another modified form of the old idea of might. It is folly to deny this under the plea that a man need not pay it unless he chooses. To prosecute his business or save his property a man may be under the necessity of borrowing money, and, of course, under the necessity of paying the interest. The poor man is thus as effectually compelled to deliver his hard-earned money to the capitalist as the mountain traveller is to deliver his purse to the highway robber. The one is an outlaw by common consent; while the other, if he makes a few worthy donations at the close of his life, when he can no longer enjoy his ill-gotten wealth, is exalted to the skies for his virtues and voted into the canon of saints as the ideal of the coming christian manhood.

Shall Rome have Our Children?

BR REV. R. H. BAYLESS.

I called upon a family the other day, and learned that a boy about sixteen, a member of the family, had been attending a Roman Catholi: school for a few months-only about six, and was already firm in the belief of *transubstantiation*, and that the priest can pardon sin. He had told his father a few days before that all the world could not move him from those convictions. The father is not a Christian, but is a decided Protestant, and was very angry at the discovery of his son's conversion to Romanism. Anger after the fact, however, is not as powerful to prevent this calamity, as discretion before. The boy is lost to Protestantism, at least for the present. I had met other cases similar to this, and was con-siderably impressed by this new discovery, for it confirmed the idea already in my mind that every Protestant child who goes to a Romish school, is dra away, in whole or in part, to the Romish faith. This may be a little too strong, but there is no exception to it, so far as my own observation extends.

"But how about the pledges that religious op ions of students shall not be meddled with ?" He answered : No direct effort is made, perhap but, for the sake of order-a little Jesuitism vo see --- for the sake of order, students must be presen at religious services, listen to ave marias, invocation of saints, and guarded expressions of Romish opin ions, until, little by little, they become accustomed te these things ; and thus, by processes wholly con cealed from the students themselves, they are led away by imperceptible stages, until one day the parents are horrified to find their children Romanists.

danger." And it is plain, from this showing, that the probability that a student will pass any considerable time in a Roman Catholic institution and not become wholly or in part a Catholic, is very small. It is not in human nature, at the student time of life, to resist the combination of influences which Jesuitical priests and nuns understand so well how to use. One night as reasonably hope to live in Iceland and not feel the cold. Sleepless vigilance ; tireless work ; fanatical zeal, concentration upon one point ; methchurch, and as artful as they are able to win to their faith the young and unsophisticated children, when Protestants are evermore putting under their power What is more inevitable than the result I met the other day ? respectful godlessness-of the hours which follow it. But even if the reading of the Bible in the schools were more than an empty form-if it were a service fruitful of blessing-there are other considerations which we, as American citizens, could not honestly disregard. We have already refered our readers' to the article on first page relating to the divorce of church and state, which has made America conspicuous in the history of human governments. The author therein speaks of the state's reception under its own care of the great business of education ; or, rather of the di-

THE CHILDREN.

The following beautiful poem was written by Charles Dickens:

When the lessons and tasks are all ended And the school for the day is dismissed And the little ones gather around me, To bid me good night and be kissed : Oh, the little white arms that encircle My neck in a tender embrace! Oh, the smiles that are halos of heaven, Shedding sunshine of love on my face

And when they are gone I sit dreaming Of my childhood too lovely to last: Of love that my heart will remember, When it wakes to the pulse of the past, Ere the world and its wickedness made me A partner of sorrow and sin: When the glory of God was about me, And the glory of gladness within.

Oh, my heart grows weak as a woman's. And the fountains of feeling will flow. When I think of the paths steep and stony, Where the feet of the dear ones must go; Of the mountains of sin hanging o'er them Of the tempest of Fate blowing wild; Oh ! there is nothing on earth half so holy As the innocent heart of a child.

They are idols of hearts and of households; They are angels of God in disguise; His sunlight still sleeps in their tresses, His glory still gleams in their eycs: Oh ! these truants from home and from heaven. They have made me more manly and mild! And I know how Jesus could liken The Kingdom of God to a child.

I ask not a life for the dear ones, All radiant, as others have done, But that life may have just enough shadow To temper the glare of the sun : I would pray God to guard them from evil, But my prayer would bound back to myself; Ah ! a seraph may pray for a sinner, But a sinner must pray for himself.

The twig is so easily bended, I have banished the rule and the rod; I have taught them the goodness of knowledge, T hey have taught me the goodness of God: My heart is a dungeon of darkness, Where I shut them from breaking a rule; My frown is sufficient correction : My love is the law of the school.

I shall leave the old house in the autumn, To traverse the threshold no more; Ah ! how I shall sigh for the dear ones, That meet me each morn at the door! I shall miss the "good nights" and the kisses, And the gush of their innocent glee, The group on the green, and the flowers That are brought every morning to me,

I shall miss them at morn and at eve, Their song in the school and the street : I shall miss the low hum of their voices, And the tramp of their delicate feet. When the lessons and tasks are all ended, And death says, "The school is dismissed !" May the little ones gather around me, To bid me good night and be kissed.

house keeping. It is astorishing with what zest she will commence at a batch of bread or with what vigor she will attack a dusty carpet. I am a little ashamed to say it, but it is a truth and I compel myself to write down truths. I have been contrasting Kate with Helen, Helen is so grand, so above all common people, she is so far-I must confess it-my superior in all matters of judgment. and she is so large in all her ideas of life, and of action that it is quite a relief to find this little brisk practical body so close to my life. And then Helen is so calm and always has such an air of conscious strength that one feels a little bit humbled, at least I do, being a man and assuming the position of a man.

Aug. 1.- A great question has been pressing upon me and I feel I must face it. Kate has given me so much real delight that I am wondering what the relation may be between us. I can't deny to myself that I love her in some sort of way. It is not that tender love that a brother gives a sister, is it something dearer? I ask this in face of Helen's sweet gentle brave presence. 1 ask it because I am not a coward and I dare ask it. I believe half the misery of the world comes from cowardice; men will not look things straight in the face. I thought this out as I lay this morning in the still twilight. Kate is useful, she is sprightly, she is pretty. She makes my house happier, she gives me real comfort. She can do for me what Helen can not do. I have never wished to face those questions relating to my connection with the world. I have hated all those theories of universal love, expressed through humanity. But now I know that Kate loves me, I see it in her eye, I feel it in her presence. Is there a possibility of one man's satisfying two natures? I say this in face of my Helen's sweet life, which just now is doubly precious to me. If not, why is Providence not wise enough to keep those lives apart that must bring suffering to each other. I got so puzzled over those questions that I was forced to go to Helen. I illustrated my case, and did not bring it home, but she was ready for me as she always is, and said, sitting in her arm chair There was James of Nisibis, who wore garlooking to the west. But the use of criticism, the need of protest as to the com-parative worth of that which has as yet been won, is at the same time obvious. We welcome this critical reflection recently offered by a correspondent: "It is well to insist upon free thought; it is better to think seriously and studiously. Free thought in some instances signifies much freedom and very little thought ; but indifference is more fatal to intellgence than chains, racks, fagots, all the implements of persecution." The point is well taken. It is proper to say to Americans generally, "You have given a great emphasis to your Adjective : it is time

Herberti Spencer's Philosophy.

Of the many great men, which the present century has produced, but few have rendered he has made himself obnoxious to the wrath of the elergy, and to the sharp, carping criticisms of all who follow the lead of the priesthood. It is not our purpose to detail all these objections, or to restate all of Mr. Spencer's positions. Nor is it necessary for the gist of all clerical opposition to his works, is found in the supposition that he inculcates the idea that all forms come into being in acdirect creation by an Almighty person.
