From the Shekinah LOST AND FOUND. BY FANNY GREEN.

[Julius Parker Whipple, a beautiful boy, of nearly six years old and a child of my brother, just before his departure, addressed his parents almost in the precise words imputed to him in the verses below. He spoke without allusion to the subject having been made by any person. Was it inspiration that prompted those sweet words of comfort, for what, indeed, could such a little one know of death ?]

He woke, a-breathing sweetness, Like the fairest among flowers, And his young life, in its fleetness, Wafted perfume upon ours.

And he left a sweet evangel, That stirred his quivering breath, Where he met the blessed angel, That we have known as Death.

"O weep not, dearest mother, Though your boy must go away, For I leave my little brother : He will bless you every day.

"O mourn not, precious father, Though I seek the Spirit-land; For good angels round me gather, And they take me by the hand !

"Now the bright earth has grown dreary, They enfold me to their breast; Oh, when I am so weary, How pleasant will be rest !"

The death-shadow fell sweetly On the drooping evelids' close, And we crossed his pale hands meetly, For a long and last repose.

Then to his grave we bore him, And we laid him down to rest, With the green grass springing o'er him, And the snow-wreath on his breast.

And the grave that had his keeping, Oh, it looked so dark and lonely, That we could not cease from weeping, But for thinking of that only.

Yet the tears have made our vision To the great Life-promise truer : Open now the Vales Elysian, And the dwellings of the Pure.

And the voice of that young angel, With its music from afar, Still is whispering its evangel, Like the singing of a star.

Spiritualism in and about Shoreham.

EXTRACTS FROM A LETTER FROM J. W. ATWOOD. I have not, for some reason, received the SPIRIT-UAL TELEGRAPH regularly. It came awhile, then stopped; then made its appearance again. If the numbers in July and August can not be sent, or have been forfeited on my part financially, or for discipline through spiritual direction, then I shall not expect to receive them. One effect of not receiving the paper regularly has been to make mc less covetous of them : that is, I have given more of them away than I should. Since I wrote you in July I learn that Spiritual Manifestations occur in Stowe, Arlington and Fair- | example." haven. I have pretty direct assurance of there being two mediums in Middlebury, one a tipping, the other a rapping medium. The tipping medium holds his hands over the stand or table-lightly touching itand it begins to rock and continues with such force as

THE D'ORVAL PROPHECY.

RICHMOND AND BRITTAN'S DISCUSSION.

MR. EDITOR: You may remember that, not QUESTION-Can the Mysterious Phenomena, now occurring in various parts of the United States and elsewhere, and known as the Spiritual Manifestations, be properly accounted for without adlong ago, in giving in your paper the transactions of the New-York Conference, an extract was furnished from the pages of Cahagnet, a French author, exhibiting a conversation held by him with what purported to be the spirit of Mons.

Mallet, touching the so-called D'Orval Prophecy. On a further perusal of that writer's work, in the second volume, I find that a learned French philosopher and magnetizer, profoundly skilled in the Hebrew, Greek and Latin languages, and passionately fond of the study of the occult sciences, who visited M. Cahagnet for the purpose of an interview with the old monk, or solitaire, D'Orval, through this medium, or ecstatic, the young woman, Adèleelicited the following statement from her, and conversation with the recluse. She said, after being magnetized, and the prophet summoned, and the usual adjuration to depart if he were not the person asked for: H. D.

"I am certain that he is the man. He appears to me endowed with singular goodness. He bears the stamp of gentleness on each feature of his physiognomy. He is not stout, far from it, he is very thin; he has very hollow eyes, a prominent forehead, sallow complexion, as if he had been subject to privations, or fatigued by deep study. He is surrounded by a very beautiful light. He tells me that he made his exit from the earth more than two hundred years ago. But you are not aware," observes Adèle, "that time being with them no more, it is very difficult for them to mark it."

"Does he still believe in the fulfilment of his prophecies, concerning France and the destruction of Paris ?"

"Yes; but he says, with M. Mallet, that there will be much less mischief done than he predicted."

"Was he mistaken as to the dates ?"

"He thinks not; but possibly he might; at any rate these dates will be odd numbers, 5, 7, or 9." "Who, according to him, will succeed the repub-

lic ?"

"The young prince in question." "I believe that this solitaire is mistaken. In short,

what means this cock and this lion spoken of in his prophecy ?"

"It is an alliance that he will contract with a friendly power, representing force by the lion and purity by the lily." "Does he think that war between those who have

and those who have not will exist?" . "It already exists : it is those who have who make

war on those who have not." "But those who have not, will they make war on

those who have ?"

"Certainly-and they will prevail."

"What then will happen ? Will the republic reign ?" ".... not more than it reigns at present; it will be terror, such as now r.... (reigns); you will have wished it to r . . . (rcign), you will have given the

nitting the agency of Spirits in their production?

OD-FORCE .- FACTS.

LETTER VIII.

DEAR SIR: I am in excellent humor this morning, and I will steal the march on you by writing you another letter before seeing another of your replies. Not having to stop to set you right, something valuable may be looked for. As the "Manifestations" may be made to play an important part in this number, I call attention to the first case of willing dead matter, on record. History relates that the sorceries of Simon Magus consisted, in making trees grow where he pleased (it so appeared to the beholder) in passing through the streets attended by the ghosts of the departed, in passing through the air from place to place, (like Mr. Gordon the medium,) and in making chairs and tables move about or change places in the room as he willed or desired them. He was called a sorcerer and condemned by the apostles; and the fathers of the church have left just enough on record of his doings to show us that, the strange manifestations of Simon were, in part biological-in part "second sight," and in part, the same physical signs that attend our mediumsmoving chairs and tables—by will or desire. He also made a sickle

reap without hands, very rapidly. The facts related by Dr. Kerner, in the Seeherin of Prevorst, are of a similar character. A Mr. Hahn had taken up residence in a castle in Silesia, and with him was a French soldier named Kern. Strange sounds were heard in the room and in adjoining rooms. Their furniture was moved about, caps, napkins, candle snuffers and other articles were raised from the floor or stand and dropped again. A napkin rose up from the floor to the ceiling over-head and slowly fluttered down again; also, a basin of water was suddenly emptied of its contents, while heating for the purposes of shaving. Flashes of light were seen darting from corner to corner of the room, while these things were occurring. Kern left, and the phenomena ceased; he was a me-

dium undoubtedly for these occurrences. What is singular, this castle was finally destroyed by lightning, a few years after, and a skeleton found in the cellar, confirmed the belief that spirits were engaged in the capers as they had been seen about the premises. Kern saw the ghost of hi dog one day come into the room-when the poor fellow was locked in the barn still alive. I explain the above facts by the magnetic condition of Kern and probably the decomposition of a dead body in the cellar beneath, had something to do with the manifestations. The place seemed also to be highly electrical, as the castle was destroyed by lightning. notice two classes of facts of a physical character. The first seems to be the work of vacuum, the second of mental attraction and repulsion.

The od-force must be kept in mind as I pass on. A boy, a medium put his hand over the top of a pump-the pump-handle moved, and brought water. On removing his hand, the pumping ceased. The pump, all know, acts by vacuum. The od-force of this magnetic boy passed from the hand to the water below-it being of the nature of light -and moving about 200,000 times as fast as air-its sudden passage through the air to the water below, would move the air upward and form a vacuum. If a spirit aided the boy, (and one professed to attend him who wrote his name "Hog Devil,") did the spirit operate through the boy's will and hand on the od-force ? or did the spirit take hold on the pump-handle and work it? Why did not the spirit work the pump when the boy moved his hand from over it? or could not "Hog Devil" pump, only as the boy-aided by some indefinable somehow-connected with his hand? This lad on going up stairs near some corn, the ears were set to flying about as if suddenly struck by an unseen force, some ears passed out the window. The od-force from the boys hands passed suddenly to the corn and scattered it about, is probably the right so-

Let us take another class of phenomena. A lady, a powerful medi-

degree deprived of her gravitation ; when standing he would extend his hand and put his fingers against her's, and lift her from the floor; this phenomenon is the work of the same force-only in this case Kerner's will, though unconsciously acted through the medium of the nerveaura, and moved the body of the woman up and down. She could not be sunk in water when in this condition. In experiments on magnetic persons-in the biolological and impressible state-I have seen them attracted by the hand, and drawn from their seats, in spite of their wills to the contrary. Persons in the biological state may be so attracted to a staff, or a chair, as to be unable to drop it; it clings to his hand like one magnet to another. I once saw a subject fixed to his chair, and the chair to the floor-and a stout man who tried to lift him succeeding in raising the chair from the floor-but it clung to the subject while he lifted only the subject. This is will-magnetism-and you object to it, as irrelevant. Recently a lady in our region was told, while asleep, to visit a sick person some miles off; the medium went; fell into her trance state, and she appeared so singular that the family were alarmed, having had no notice of her coming; and they called in some men to carry her out of door, and lo, her chair stuck to the floor ! they could not lift her-she was suddenly very heavy. My explanation is that she connected herself to the floor by will-through the od-force. Yours would be that the spirits held her down-but how? by od-force-or biologically?

I must now return to the medium, who seemed to attract chairs and ables as she passed by them. Engaged in the laudable business of studying anatomy, she had a subject whose spirit insisted on being buried. The raps, while studying, would come on the table, and on a dry skull lying on it, and also on the book before her. They had been engaged n dissecting, one day, and the ladies left the room first; before the doctor left he changed the position of the subject-laying one hand across the breast, and the other by the side. During the night the ladies thought the old woman entered their room in person, and various occurrences were related of what passed. But on comparing notes, the medium saw the ghost-not as they last saw it-but as the doctor left it, with one arm across the breast and the other by her side. The door remained locked, and the subject was undisturbed, and the inevitable conclusion was that they had not been visited by the dead subject, but had seen her by a biological impression through the mind of the doctor. They saw her just as he left her—hence they took their image or ghost from his mind. Here we have a clear case of one mind unconsciously operating on another, and producing the image of a ghost in the mind of the person that seemed to be real. And yet the medium, when seeing it, thought herself awake and conscious. If the spirit could reënter her body and walk into the room, through a locked door, she could have borrowed a hoe and buried her own body-the thing she seemed to be clamoring about. If she took up the body and carried it in, she had strength to bury herself-any man would have loaned a hoe and pick for so reasonable a purpose, just to spite the doctor for being engaged in such a monstrous business. You say that the spirit impressed the mind of the medium-but the impression followed the mind of the dissecter who last saw the subject, and clearly fixes the occurrences between him and the medium. When the dissection was finished, the bones were put into a kettle filled with lye and lime, to clean the bones, and set to boiling. The raps became so loud that it raised a riot in the neighborhood-the medium was alarmed--the sounds came around the room--on the sides of the house-articles in the room were moved about, and a bureau full of articles approached the boiling kettle. You say the spirit was offended because her bones were being boiled.

This is my explanation : The od-torce, says Baron Von Reichenbach, is developed in graves by decaying bodies. A case occurred in which a sensitive patient saw a ghost—over a recent grave. He took another clear-seer to the spot; she only saw a light flame-an odic-light about six feet high; the other transformed it into a ghost; the subject felt the effect of the od-force on approaching it. The Seeherin of Prevorst was always affected when near a grave; many other persons have the same sensations—and the horse is always sensitive near graves, and sometimes acts as wildly as Tam O'Shanter's gray mare, "Meg." The Baron had the body disinterred, and the quick-lime removed, and the ghost and od-light both disappeared—thus unfolding a mystery that has been the terror of all ages among the ignorant and timid. Now, put these facts with my ghost-story. The bones and flesh immersed in lye and lime, and put to boiling, effected a rapid decomposition of the parts, and the od-force-as in the Baron's case-was rapidly evolved; the medium being charged with the fluid. Also, we get a combined force, that clearly accounts for the uproar about the woman's boiling bones. Another fact: A dry skull used by the ladies was seen one night floating in the air around their bed. It occurred again, and a brother of one of the ladies came and caught it, and returned it to a safe place. When it stood on the stand, it would be seen trembling, as if alive; when the face was turned from them, it would never turn around while they looked at it; the moment they furned away it would face them. My explanation is, that the skull being a natural conductor of the od-force, it became charged with it—in life the currents naturally run toward the face, and when charged from the medium they naturally run in that direction, as the currents do in the needle or magnet ; when turned around, they run in the same direction of course. The medium on turning her face from the skull, and looking in an opposite direction, changed the course of the currents which affected the skull and it would then turn and face her by the attraction upon it. This medium, in a magnetic state, when at rest in bed, still had a connection with the dry skull, and, charged with the vital currents of her own brain, it was attracted as one magnet attracts on another, and having found the center of gravitation, it floated around the bed and over it-as the earth floats around the sun. Various bones in her use have been attracted to her bed, and when returned to their place they would find their way back. You have my explanation of these strange occurrences.

derstand the medium says it makes his hands and arms feel numb, and he does not like to act as medium. The rapping medium is an Iirish girl, living in a family in the village of Middlebury. The circumstances of her development are as follows : Mr. and Mrs. C. went to New Haven, to get communication through a rapping medium, and expressed a wish that the rappings might come to their house. Some time after this, when the family had retired to rest one night, Mr. C. and his wife heard three loud knocks, as they supposed, on the outside door below, (they slept up stairs,) and thinking some one desired admittance, Mr. C. went down and opened the outside door, but could neither see or hear any one. He then returned to bed, and while talking with Mrs. C., three loud knocks were same results; she then went into the room where this Irish girl slept, (below,) and inquired if she heard any one rap at the door ? She said she had heard the three raps two or three times, but it seemed to come from a diploma from a similar institution here; is a classioverhead. At this Mrs. C. suspected it was the Spiritual rappings; she asked, if there were spirits present, to make three raps. No response. By this time Mr. C. had arrived, and he made the same inquirystill no response. Then Mrs. C. desired the Ir'sh girl to make the same inquiry; she being timid did not like to, but Mrs. C. insisted, saying, perhaps she was the medium. The girl asked the question, and immediately came the three raps, whereupon they began to communicate by means of the alphapet.

Since writing the above I have been informed by a neighbor, that there have been three mediums developed in one family, within a few days, in old Ticonderogo. "Old Ti." has been renowned for her fortress in the annals of our country, in keeping at bay a foreign enemy, on the waters of Lake Champlain. It has been renowned, likewise, for its vices of gambling, drinking, fighting, cheating, and for many collisions in law, &c., &c., insomuch that it has received the supposed appropriate, yet unenviable, name of "The Key-hole of Hell."

I am happy to say of it, however, that it has altered very much for the better within two years, as I am informed. It has now a flourishing division of the Sons the spirits have commenced there, and she may ultimately become as renowned in the cause of Spiritualism, as she has been for her fortresses and her vices. We hope so.

We would inform our correspondent that his papers are regularly mailed in the New York Post-office, and the reason he has not received them all, is more likely to be found in the awakening of some Post-master or clerk to the subject of Spiritualism, than any intended discipline through Spiritual interference. We trust our hopeful brothers can not read many of them without being developed above the plane which | the light. covets what belongs to his neighbor.

THE SPIRITS IN VIRGINIA. WHEELING, Va., Nov. 7, 1852.

DEAR BRITTAN: We are progressing here finely as could be expected; mental questions are now readily answered through mediums from New-York, who came here by direction, and when their health is recovered, will do much good. We are now just making our first break on old orthodoxy. In a few days l shall have some astounding certificates before the public. We have one case that heads off all quibbles. I will state it, and I wish it published with the request that the New-York Observer will allow its readers similar statement.

uate of a medical university of that country, holding cal scholar and has devoted much time to scientific pursuits, has in his family two mediums, his wife and a young lady residing with them. On several occasions writings were obtained, purporting to be done by spirits. From the start he has been slow of heart to believe, and only yields when compelled. He therefore feared that it might be that the medium became magnetized and unconsciously performed the writing. He was determined to prevent any such

placed a clean sheet of paper in it, locked it, took the key and placed it in a small basket containing some silver money, put the basket in his drawer, locked the drawer, put the key of the drawer in his pocket, and told no person where he had placed the key. At The money was carefully examined and the basket well shook. He called his wife, and stated the fact, and then replaced the money in the basket, and the basket in the drawer. Still he was not satisfied. He

but in vain. Again it was locked, and the key in his pocket. He then went to the suppor table; his wife of Temperance within its borders, and all its vices are and the girl sat with him : when done he wout up fast disappearing. Now we are able to record that stairs, opened the bureau, and found the key in the basket lying on the top of the money. The trunk was then opened and mysterious writings found on dry twenty-four hours after the paper was taken from

the trunk. The entire family are willing to be qualified that these statements are literally true; and that but one key for the trunk and one for the bureau is in the house.

Further tests are now in progress, and shortly the Doctor's own certificate will be given to the public. forgot to say that the girl is a member of the Methodist Church.

We labor under a great difficulty; the people wil not inform themselves. They resist rather than seek Yours, for the truth, JOHN B. WOLFF.

um, on retiring to bed and extinguishing the light, was attended by singular demonstrations. An old musket was brought into her room from a back chamber, with a lot of old cartridge boxes. Her pillow was taken from under her head and thrown at a person standing on the stairs. A tumbler, on the stand near her bed, was never touched; also a watch with glass crystal, and a band-box with a bottle of cologne water, were never disturbed. When the bottle was taken from the box, it was upset and put in confusion like other matters. Her trunk, filled with her clothing, standing in her chamber was set to bounding, first one end then the other would rise from the floor and come down with force, as if moved by an invisible hand—an unseen force. Considerable straw was pulled from her bed, through a very small hole in the tick, and also heard again, as before. Mrs. C. went down, with the to see it. That paper, I am told, published a former the clothes hanging in the room during these capers would move from the wall and swing to and from the wall as if moved by a fluid, or ain Dr. B., of this city, formerly of Germany, a grad- in motion. The gun, rusty and magnetic, would be easily and highly charged with the magnetic od-force of the lady (for Von Reichenbach has demonstrated that the od-force of magnetic persons is identical with that of the horse-shoe magnet) and drawn by attraction toward herself. The glass tumbler, being a bad conductor-although it imbibes the odforce and becomes magnetic, yet in a less degree; and here we see why the tumbler, watch and cologne bottle were not moved about by her mental magnetism. The pillow was charged with the same force and sent toward the person who was scared and in the negative state. The fluid passing from her body, hands and eyes, charged the clothing on means, and accordingly the trunk was emptied; he the wall and of necessity put them in motion. The fornites of smallpox, or contagion, of cholera or plague is absorbed by clothing, and letters, and give these diseases to persons after some months have elapsed Plague may be transmitted in a similar manner. The fact that these occurrences took place after the light was extinguished, I think, finds a suitable time he went to look for the key, when be- its explanation in the fact that the current of this od-force or nerve hold, it was not in the basket, nor yet in the drawer. aura was not opposed by the waves of light from the candle-they would oppose each other, just as one current of water would oppose another. Did the spirit carry that gun out of the chamber to her room ? Then why did they not upset the tumbler, break her cologne bottle, and returned by himself and examined the whole drawer, the watch ? for this spirit, as you will see, owed the medium a spite.

Below stairs, in the same house, with the same medium, in the evening, a chair was thrown through the air—a settee was rocked—a bureau moved toward her as she passed by it. As she passed suddenly through a room, chairs and a table moved into the line through which she passed as she passed the second door, a stick of wood in a deep box fell on the the paper. And he states that the fluid used was not floor, near the track she passed through. This is apparently the work of vacuum and attraction combined. These articles, occupied as they were by the family, and probably the medium, the chairs and settee would be charged with the fluid and moved about by the attraction of a stronger magnet. All this, and no "thunder clap?" Surely; for it is clear that the medium by giving attention and sitting down and turning the od-force in another direction, gets small "claps of thunder" or "rappings "---but the fluid when moving about loose rushes into the best conductors and they are attracted accordingly. Is this more strange than to see one horse-shoe magnet attract another-or move large pieces Kerner states that the Secherin, when in the magnetic state, was in a fore we could look up, the column of light-if there was one-had vaniseed.-Ex.

The above facts are well attested, and I think can be relied on. I have not given all, and keep names, of course, from the public, as the medium wishes to avoid any public connection with such strange events.

I mentioned these facts in The Tribune, last winter, and got severely chastised for it. This I took coolly and kindly-as I am a natural martyr and love to suffer for righteousness' sake—and in this case I enjoyed the consolation of a severe scolding from one of the best-looking women in Ohio-though she be a medium. I desire to injure no one's feelings, but want all the light for the TELEGRAPH that can be given, with injury to no one.

I shall continue my notice of physical facts. Yours truly,

B. W. RICHMOND.

METEORIC PHENOMENON.-We have been reminded by a statement in the Wheeling Times of a curious phenomenon which we witnessed last Monday week. We were passing along Culpepper-st., about half after 8, P. M., when we saw a sudden illumination, as if from a flash of lightning. Looking around, we beheld a long narrow column of reddish-colored light, spanning the whole heavens. from North to South, which, however, disappeared in less than a second after we first of iron or steel-and yet no will-force is acting at all in the magnets. observed it. A few minutes afterward there was a second flash of light, but, be-

"Let every man be fully persuaded in his own mind."

NEW-YORK, SATURDAY, NOVEMBER 27, 1852.

REPLY TO DR. RICHMOND.

NUMBER VIII.

DEAR SIR: The Spiritual Manifestations comprehend a great variety of facts essentially different from the phenomena of gravitation, material magnetism, electric affinity, and the dynamics of imponderable fluids. This is made manifest by the almost universal skepticism, with respect to the facts themselves, which we find to prevail among learned men. The professors in our colleges and men of distinguished scientific attainments generally-indeed almost all who are profoundly versed in the mysteries of the material universe have, by their determined opposition, intimated that such phenomena as we ascribe to spirits do not come within the sphere of physical causes. The laws of attraction and repulsion, the power of the magnet and the processes of chemistry, instead of furnishing a satisfactory solution of the modern mysteries, have lead the most erudite men to reject the facts, or to ascribe them to fraud and delusion. This general unbelief, among those who have deeply studied the laws of material nature, is most significant. It plainly shows that, in the opinion of those best qualified to judge, the facts wholly transcend the capacity of physical agents, and this is rendered the more conspicuous by the very first attempt to apply your hypothesis to particular examples.

Here allow me to remind you that physical phenomena, or such as are ascertained to depend on merely physical causes, are essentially the same in different ages and countrics, wherever the same material instrumentalities exist. The phenomena of electricity, as they occur in the earth and atmosphere, are what they were centuries ago, although they occur more frequently in some countries than in others, and are more startling and terrible in warm than in cold climates; yet in their nature, they are essentially the same the world over-if, perhaps, we except the Shetland Isles! In like manner vital electricity is, and was, as much a constituent element in all men in every period of the world's history,

as it now is in those whom we call 'mediums.' We may as well suppose that the ancients existed without blood and without brains, as without vital electricity, and such other forms of imponderable matter as are necessary to the development of animal and human life. Thus, if the Baron's od-force is essential to the mysterious functions of life, volunand through all time.

great forces in Nature to many grand and important purposes of life. hand remained over the top, it would have flowed continuously, the But our discoveries have not served to augment the resources of Nature, or to energize the springs which govern her stupendous movements. All have been no motion of the lever or piston. that science has done, or can do, is to observe and classify outward phenomena and illustrate their relations to cternally existing laws. The utmost limit of all our attainments has not witnessed the slightest insame everywhere, and their effects are substantially the same. Nor am so prevalent in this country, are dependent on these physical causes is offensive to reason, and inconsistent with the facts and the laws on which they depend. Men have been sufficiently physical and electrical in all ages to produce such manifestations, if they depended alone on the instrumentalities referred to.

purpose, though the illegitimacy of the union must be self-evident. The and a table moved into a line " behind her. ourselves in much the same position that we are now curious facts presented in your first paragraph are explained, you say, These phenomena you ascribe to VACUUM, and in, with respect to absolute Truth. Our progress in ' by the magnetic condition of Kern, and probably the decomposition yet who does not know that no vacuum is formed, of a dead body in the cellar." But allow me to remind you, my dear or can be produced in this way. If the thing but still the more we know, the wider the margin of sir, that no explanation is given. Merely saying that you refer the were even possible, any other person, as well as the Unknown appears. The higher we rise in the mysterious occurrences to the magnetic state of Kern, or to some undis- the medium, passing through a room with the scale of intelligence, the more fully do we see how covered energy peculiar to 'dry bones,' proves nothing whatever but the same velocity, would produce precisely the same monstrous character of your assumption. That the living, conscious results. One body passing through air will disspirit of the man-who probably experienced a violent death*-was atplace the atmospheric medium as readily and tracted to the spot, and manifested his presence by physical effects, is thoroughly as any other body of the same magnot at all improbable; and the probability of such an occurrence re- nitude and momentum. Air is so rarified that distance from the human, as to science and love. This ceives strong confirmation from a multitude of similar examples equally it is not a very sluggish element, and it would be truth appears more and more evident forever. well authenticated. Moreover, that the spirit might have psychologized | quite likely to ' keep up ' with the lady, unless Kern, and presented the image of his dog before him, in order to re- she traveled much faster than people do this way; mind him that the poor animal was "shut up," and perhaps suffering especially as the surrounding atmospheric pres-

from hunger or thirst, is, no doubt, quite possible. But to presume sure of fifteen pounds to the square inch, would that Kern unconsciously evolved a visible magnetic dog from his brains assist it along, with a force equal to about twelve and projected him out of doors, and that the creature was first seen as he or fifteen tuns on the entire surface of the body came into the room to his master, instead of on going out from him, is to of air displaced. But this marching of all the zation, and said that it was, and had for fifteen years make a draft on our credulity that we are forced to dishonor. You do household furniture after a medium is not, in not attempt to demonstrate that a highly magnetic state of the system your judgment, more wonderful than that a horse-shoe magnet should attract large pieces of is adapted to produce such singular effects, or that Kern was in such a state at the time of their occurrence. You do not undertake to show that even the bones of dead men have a power that living men have not. But you assume this, and more-everything is assumed, and everything is power to attract wood; it will not 'move the bureau ' nor ' lift the trunk ;' it will not repulse improbable to the last degree. If the phenomena depended on the magnetic state of Kern, they would doubtless have followed him when he feathers, so as to send them down stairs; neither left the castle. To conjecture that they were produced by the decomposition of the human remains, is at once to ascribe powers to the dead body which you boldly deny to the *living spirit* ! Such notions are only taught in the school of Materialism. If the bones of one man generated power.

a power sufficient to move the furniture in the old castle, the number deposited around St. Paul's might be expected to evolve force enough to move the church edifice down Broadway as far as the Battery ! The fact that the castle was subsequently struck by lightning, if it

proves anything, proves the very reverse of what you suppose, namely, that it was not "highly electrical "-that it was in a negative state. Wherefore, on a certain occasion, the accumulated electricity of the atmosphere was discharged at that point, and the building was destroyed.

Your fact in Odic-hydronamics next claims attention. You affirm that, when a certain "boy put his hand over the top of a pump, the pumphandle moved and brought water;" and you suppose that the od-force descended from the boy's hand and displaced the air, thus causing a vacuum by reason of which the lever moved, &c. The explanation, sotary motion and sensation, it must be generally diffused and coëxtensive called, indicates a great want of attention to the mechanism of the with animal and human existence; and hence the manifestations, if pump, or, otherwise, the od-force infringed the principles of mechanics chiefly dependent on this agent, would be likely to occur among all men and the laws of atmospheric pressure. Had the od-force displaced the atmosphere in the pump, causing a vacuum to exist, the water would

Scientific discoveries have enabled us to make an application of the not only have risen and opened the valve, but, so long as the medium's weight of the atmosphere inside being thus removed; and there would

Before leaving this case, permit me to suggest several questions, which, as you claim that the Baron sustains your theory, you may be able to answer. 1. If the od-force is "of the nature of light," why crease of power in these potential agents. Light and electricity are the | did not the sun, when at his meridian and shining into the top of the pump, produce a 'vacuum' and cause the water to be discharged ? I aware that electrical eels have any powers, at the present day, that 2. Do you learn from Reichenbach's Dynamics that the od-force has did not belong to their remote ancestors. Doubtless electricity is now power to expel the atmosphere from the place where it exists? 3. Does precisely what it was when Jesus compared the splendor of his coming the Baron demonstrate that the od-force has power to converse and to to 'the lightning which cometh out of the East and shineth even unto | write its name? and did it give the same name at Vienna that it gave the West.' To assume, therefore, that the mysterious phenomena, now the boy in Ohio? 4. Does the Baron also prove that corn is a good conductor of the od-force?

will it 'scatter the corn, nor ' pull the straw out of the bed.' We must, therefore, ascribe such phenomena to the operations of a different When you say, in substance, that a staff, chair or other object, will cling to the hand of a biological subject, by virtue of the same principle as to call for reformatory truths. They consider that operates in the magnet, I deny the assertion and affirm the thing to be impossible. Moreover, I promise to make the error of the

you attempt to fortify the same by any impor- ceive. tant evidence. The other unlocated facts, (?) mentioned in the same connection, could not have been produced by any other form of material magnetism aided by the human will in the body. If you think otherwise, make an argument in support of your hypothesis and I will venture to attempt its refutation.

statement apparent to every capacity, whenever

The remarkable facts witnessed by, and in presence of, a lady who was pursuing a course of anatomical studies, I shall notice at length hereafter. For the present I defer it, because the case is one of peculiar interest and some matters of moment appear to have been omitted in your statement. I am led to adopt this course from a late personal interview with an intelligent friend who is somewhat familiar with brethren capable of acquiring and as destined to acthe facts to which you refer, and whose version differs in several essential particulars from the one contained in your letter. I can not resist the conviction that the publication of such startling occurrences should be accompanied with the testimony necessary to secure their acceptance by all candid readers. Facts that can not be rience to show that a new system of society was wanted authenticated should not be introduced in a scientific discussion ; nor should important facts be suppressed, merely to gratify a fastidious delicacy that holds in subjection to itself the highest | shaken and replaced by something better-and this is interests of science, and the soul's reverence for the creation of a new Heaven. Their spirits have the most sacred realities. A simple statement, concerning the occurrence of phenomena which address themselves to the senses, can not, in any manner, commit the author of such statement to my theory or yours. The person who testifies is in no way responsible for our conclusions, or those of the public at large, any more than the witness is answerable for the judgment of the light they have. Such are some of the views of Shacourt, or for the more questionable decisions of kers respecting charity. Moreover, they believe that, popular opinion. Now as you desire " to suffer for righteousness' sake," allow me to suggest that you had better out with the whole truthcall the witnesses and give us a connected statenent of all the material facts-thus will your martyrdom' be glorious and 'your consolation' complete. With a lively interest in the general subject of our correspondence, and assurances of personal regard and esteem, I am

knowledge for the last fifty years, especially as remuch there is to be learned. Herein consists the prophecy of the eternity of our spirit-existence, viz: the more we acquire of knowledge, the greater appears the field of thought yet unexplored, of action vet unoccupied. The divine is ever at an infinite

A letter from St. Louis, stating the condition of the public mind in that region having been introduced. there was much conversation respecting the care and forbearance which the believers should exercise toward their skeptical brethren.

Mr. Evans, of the New-Lebanon Society of Shakers, spoke of the progress in natural science and of civilipast been, the impression of that people, that a Spiritual demonstration would ensue upon such progress, as a necessary step in progression from Material to Spiritual Science. The speaker fully concurred with iron or steel. In my humble opinion it is quite the sentiment expressed by spirits, viz : that we should another affair. The horse-shoe magnet has no not receive by authority, but by an interior perception. The experience of Shakers had led them to the conclusion of the spirits, and the remarks of Mr. P. that the more we thus acquire the less we feel puffed up with the conceit of knowing much. Another result of their experience is the conviction that men have in their society spirits who correspond to their state, and that therefore we should be careful to see that what is communicated is not more adapted to please than to instruct us. Also, that the best guard is to consider

ourselves as in an endless series of progression, and to examine ever carefully, whether our state be such themselves bound to live up to their best light, and they scruple not to confess their imperfections and short-comings; in order that they may be open to the approaches of better spirits. They look to their reason as the sure test of the truth of what they re-

They have witnessed spiritual facts during the last eight years among all their societies-manifestations far exceeding those of the Mosaic and early Christian churches. They have kept these things secret but have preserved careful records of them, extending to many thousand pages.

They have had many different forms of manifestations, clear-seeing mediums, speaking mediums, &c. They have found, however, that the communication always is tinctured by the character of the medium. They have found the best teachings to come through those persons who live the most careful and elevated lives, as to purity and humility. They have in some cases had communications which they have found to be erroneous, and have had to correct their conclusions by reason and experience. Many other excellent results have flowed from these facts; among them, especially, the charity which looks upon all men as quire a higher state than that they think they have acquired. They had been spiritually apprised of the events that are now transpiring, and that gives them confidence to believe the prophecies not yet fully accomplished ; according to which much more is to be expected than has been seen, very much more; only the first letters of the alphabet have as yet been given. The friend adduced many things from human expe-

The absurdity of your hypothesis is not mitigated in the least by the for its suddenly leaving its place in the "back chamber," and marching assumption that the will controls the agents employed in the manifestations. Indeed its inconsistency with the known laws of matter and mind is thus rendered more apparent, since there have been men of unyielding nerve and iron will in all ages. The heroes of the olden be deemed very strange, but in the light of your explanation we are time, whose giant forms were encased in burnished steel, as they went | taught that when a gun is charged with od-force it is all perfectly natuforth to

"----lick The gory dust from off the feet of war,"

must have been the best possible human electrical conductors. But I need hardly remind you that they were not media for the peculiar phenomena you propose to elucidate. Nor are the men of vigorous constitution and strong vitality, the persons in whose presence the Manifestations chiefly occur. The fact is undeniable that the media, with occasional exceptions, are electrically negative. Many of them are very delicately organized, and a large proportion are little children, while strong men, in whose bodies the greatest amount of vital electricity is elaborated in a given time, are rarely visited by the mysterious powers Thus the facts are plainly opposed to your assumption, and can not even by a possibility, be coërced into the service of sustaining a theory that violates the eternal laws of Nature and Reason, as clearly as it denies the claims of the Spirits.

In concluding these general observations, on the nature and capacity of natural forces, I can not suppress the remark that, the foregoing considcrations appear to subvert the hypothesis applied to the particular facts narrated in your last letter. It is of little consequence whether we deny the facts outright, or resist the great lessons which they manifestly teach. The results, so far as they affect human happiness and the interests of science, are not essentially different. Scientific men have been accustomed to demand facts in all their researches after truth, and they have hitherto professed a willingness to accept such conclusions only as legitimately depend on well attested phenomena. Of late, however, the gun into the lady's apartment, you wish to know "why he did not the supply greatly exceeds the demand, and facts are now at a discount. When the facts obviously point to a spiritual source, men of science because he knew better; all common sense people are accustomed to mind, that whatever we shall communicate to you, either become strangely taciturn, or they prefer to diversify their mental exercises by indulging in wild, improbable and romantic speculations. Before passing to a summary review of the contents of your last letter, I must not omit to observe that, your facts and references are, for the most part, extremely indefinite. You rarely give names or localities, and in your allusions to authors you never mention the page, and seldom indicate the title of the book. In speaking of persons and occurrences, be kind enough to give to each-though it be an

.----airy nothing---A local habitation and a name."

This at least will somewhat divest your facts of that air of fiction which attaches to some of the statements already made.

Your effort to marry the theory to the facts will answer an important have occurred.

You next cite some very remarkable phenomena, alleged to have occurred in the sleeping-room of a lady. An "old musket" was, in your opinion, "highly charged with the magnetic od-force of the lady," and this accounts-we are assured on the authority of my medical friend-

into the room where the medium had retired for the night. We have heard that loaded guns sometimes go off, but this one came to-the lady. Under ordinary circumstances, such behavior on the part of a gun would

ral. It was "rusty and magnetic" and, therefore, easily charged at a distance. Most rational reason ! But the cartridge boxes-usually made of wood and leather-were they also "rusty and magnetic" that they followed ? or was it from long companionship and the power of habit? The reader may be curious to know whether it was from force or affection that the boxes accompanied the gun? It was supposed to be settled, some time since, by scientific observations and experiments, that bodies in opposite states-with respect to the imponderable elements that surround or permeate them-exhibit attraction; but your hypothesis makes the phenomena depend on other causes. The magnetic attraction was not exhibited until a partial or total equilibrium was established, by the odic emanations which proceeded from the person to the thing. Moreover, you affirm that the od-force charged the pillow also, notwithstanding feathers, if I mistake not, are but a poor conductor. Will you explain why the pillow was so violently repulsed-was thrown from the

ludy, and down stairs, while loading the gun caused it to move in an opposite direction-to be attracted ? I have been present on several occasions when the table was so powerfully excreised that two strong men could not restrain its movements. Now, if ponderable objects, and especially fire-arms, are liable to become so over-loaded, the danger of using them will be found to be much greater than has been generally supposed. A double-barreled gun might perhaps be so heavily charged as to shoulder a small man and walk off with him ! especially if the through Mr. E. P. Fowler. It was communicated by ward tendency of all men. In conclusion, he wished man was distinguished for a strong will, and the gun happened to be means of the alphabet-putting down letters opposite to correct a popular mistake as to their views of mar-"rusty and magnetic." Upon the presumption that a spirit conveyed to certain motions of a very heavy table, around which riage. They do not condemn it as a means of procreupset the tumbler, break her cologne bottle and the watch ?" I reply, handle glassware more cautiously than they do guns, cartridge boxes, even though it may (perhaps it will) often seem dictatrunks, etc.

Again, as the same medium " passed suddenly through a room, chairs drawn by fellow humans from relative facts, even as

Mr. Partridge says he supposes we shall forever find observations.

Very cordially yours, S. B. BRITTAN.

OR THE INVESTIGATION OF SPIRITUAL PHENOMENA [WEEKLY REPORT.]

NEW-YORK CONFERENCE.

FRIDAY EVENING, Nov. 5, 1852. The session of the Conference was less numerously he weather

Dr. Hallock presented a fragmentary document received by a circle, on the previous Thursday evening. follows:

"First: Friends, we wish it distinctly borne in torial, should be received by you only as conclusions

to protect those who would fully lead lives of Reform. He spoke with much confidence of "the good time coming." Our highest conceptions of good are to be taught them even in definite and practical things as to the new future. They have been taught to love one another in practical fact, and to consider this the measure of their love toward God, and they find no other test. If men think themselves highest, in the scale of holi-

ness, they should remember that the Hottentot, rightly judged, may be as warmly commended. Men should be judged according to their conduct, in the degree of every people in the world have more or less of Truth and Good among them. And what they look for is the assembling of all these scattered truths and goods into one universal sysem of charity and true justice among all men on the earth. He said there was here. in this Conference, a nucleus of unity, which he thinks will not go back, but forward. He says " you will not need to be visited by Teachers ; you will be taught and will learn of yourselves. He said many things of comfort, adduced from the experience of the society of Shakers. They find more attention on the part of visiters to their meetings since Spirit-manifestations began, than ever before. He says the next generation will be influenced by the new facts: and they will soon return, or get into the normal state of man, viz : actual, open intercourse with spirits and its legitimate results in character.

In reply to a question as to evil spirits, he said their impression was that, as there is endless progress in good, so there may be endless progress in evil. They ittended than usual, on account of the inclemency of do not allow themselves to say that this impression is Truth, or that they may not lose it hereafter, but such is their impression. He said they did not harmonize with Davis, in alleging the unconditional upthe circle was formed. The communication was as ating the race. Offspring are as legitimately and properly propagated as plants and animals. But this belongs to the natural state of man. They hold with the Apostle that the natural must precede the spiritual. Jesus said to Martha, " I am the resurrection," by which they understand that he had passed from the natural to the spiritual state, though still in the body, you reason, only perhaps with greater periscopic and in this state they "neither marry nor are given in marriage

When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to sco in vision and know in the	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings	 impressions by holding a letter from the unknown person against her forehead. 5. Essays on important questions of Social and Political Economy. 6. ORIGINAL POETRY AND MUSIC. 7. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to	 impressions by holding a letter from the unknown person against her forchead. 5.  with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to claim his victim ! But Hope from her bright abodes witnessed the distress of the poor Youth and had compassion on him; and taking an wrial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. 	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to sco in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." Oh Manhood ! how various and fearful are the conflicts which await thee in thy rough pilgrimage ! Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide thee in thy wanderings ! 	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "I twill answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure ; the last less than expected or justly due, but becomes in use on account of its availability, of equal	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs	 impressions by holding a letter from the unknown person against her forehead. 5. Essays on important questions of Social and Political Economy. 6. ORIGINAL POETRY AND MUSIC. 7. REVIEWSEspecially of such works as illustrate the progress of the world in natural, political, social, and spiritual Science. CONTRIBUTORSRev. James Richardson, Jr.; O. W. Wight; C. D. Stuart; Horace Greeley; Hon. J. W. Edmonds; V. C. Taylor; J. K. Ingalls; D. M'Mahon, Jr.; Wm. Williams; Señor Adadus Calpe; W. S. Courtney; Francis H. Green; Sarah Helen Whitman; Annette Bishop; Mrs. Lucy A. Millington, and others. Several distinguished minds in Europe are expected to contribute occasionally. The contents of the Shekinah will be wholly ORIGINAL, and its mechanical and artistic execution will be second to no Magazine in the world. SHALL IT HAVE A PATRONAGE WORTHY OF ITS OBJECTS AND ITS CHARACTER? TERMS-The SHEKINAH will hereafter be issued Monthly, at \$3 per annum, or \$1 50 for one complete Volume, to ke finished in six months. The year's subscription will thus form two Volumes, containing some six hundred pages of fine letter press, and twelve portaits. Hereafter the work will be forwarded to no one until the subscription is paid. A discount of 25 per cent. will be made to Booksellers and Periodical Agents, but the cash must accompany the order. The following Booksellers are general Agents for the Shekinah and Spiritual Telegraph, and will sup- ply all the books in the above list at publishers' prices : Bela Marsh, No. 25 Cornhill, Boston, Mass. Benjamin P. Wheeler, Utica, N. Y F. Bly, Cincinnati, Ohio. Samuel Barry, S. W. corner of Fifth and Chestnut- street, Philadelphia. Dr. A. Underhill, No. 4 Ontario-street, Cleveland, Ohio.
 with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to claim his victim ! But Hope from her bright abodes witnessed the distress of the poor Youth and had compassion on him; and taking an aerial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood ! how various and fearful are the conflicts which await thee in thy rough pilgrimage ! Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide thee in thy wanderings ! At Mid-day the elements awoke and played their awful numbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands 	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this: As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "It will answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure; the last less than expected or justly due, but becomes in use on account of its <i>availability</i> , of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE!	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to claim his victim ! But Hope from her bright abodes witnessed the dis- tress of the poor Youth and had compassion on him; and taking an verial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood ! how various and fearful are the con- flicts which await thee in thy rough pilgrimage ! Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide their awful numbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands to Heaven and besought the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reed in the sweeping gale. But the voice of the pe- titioner was unheeded : and the vital tide rushed back frozen to the heart, while the words of prayer died on	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "It will answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure ; the last less than expected or justly due, but becomes in use on account of its availability, of equal usefulness. SECOND PRONLEM.—IN THIS PERSON SINCERE! Formula I will to know. Result: The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the cidolon.	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs are facts, growing out of the undeveloped condition of man in the wisdom of nature. Now, these wrongs, which are facts, are false to man, untrue to his good, inharmonious with reason, and inconsistent with im- provement. They are facts, and they are falsehoods; they are truths, and they are errors. They are facts as occurrences, as false posit	 impressions by holding a letter from the unknown person against her forehead. 5. Essays on important questions of Social and Political Economy. 6. The soul of the strong man was shaken, and the stalwart form trembled like a reed in the sweeping gale. But the voice of the pe- titioner was unheeded: and the vital tide rushed back frozen to the heart, while the words of prayer died on his palsied tongue. He was ready to relinquish all as lost, when an invisible hand arched the threaten- ing cloud with a glorious bow. M	FOR APOCALYPTIC PHENOMENA. Mr. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "I t will answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure ; the last less than expected or justly due, but becomes in use on account of its availability, of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE! Formula I will to know. Result: The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the cidolon. THIRD PROBLEM. What will be the result of the present Hungarian movement upon the nations of Europe. The formula, result and solution will be as specified in a former	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him into a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it falsifies the relation which pure sympathy required. As man becomes disgusted with man, so will he become estranged in his feelings of sympathy; and as he becomes estranged in his sympathy, so will he neglect the means which are essential to his development and happiness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with pernicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of humanity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are deceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equitable position of harmonious relation to his brethren and food. All history is rife with wrongs, and these wrongs, which are facts, are false to man, untrue to his good, inharmonious with reason, and inconsistent with improvement. They are facts, and they are falsehoods; they are truths, and they are errors. They are facts as occurrences, as false positions, or positions in confluences untrue to human enjoyment.	impressions by holding a letter from the unknown per- son against her forehead. 5.  with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed—and was horror-stricken, for Despair was present to claim his victim ! But Hepe from her bright abodes witnessed the distress of the poor Youth and had compassion on him; and taking an aerial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood ! how various and fearful are the conflicts which await thee in thy rough pilgrimage ! Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide their awful numbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands to Heaven and besought the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reed in the sweeping gale. But the voice of the petitioner was unheeded : and the vital tide rushed back frozen to the heart, while the words of prayer died on his palsied :congue. He was ready to relinquish all as lost, when an invisible hand arehed the threatening cloud with a glorious bow. Most welcome was the cherished	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experiments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "It will answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure ; the last less than expected or justly due, but becomes in use on account of its availability, of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE! Formula I will to know. Result: The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the cidolon. THIRD PROBLEM. What will be the result of the present Hungarian movement upon the nations of Europe. The formula, result and solution will be as specified in a former communication.	human intellect, and he who studies it finds simply the reflection on his mind. METTLER AND LADY, have for some years applied Clairvoyance, and other kindred agents, to the treatment of the sick, and will continue to make Clairvoyant Examinations, and to give such diagnostic and therapeutic suggestions as are required
 with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to claim his victim ! But Hope from her bright abodes witnessed the distress of the poor Youth and had compassion on him; and taking an aerial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arrose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood ! how various and fearful are the conflicts which await thee in thy rough pilgrimage ! Grand and terrible is the inagery of tempests on Life's cea, but who can curb the storm or guide their awful numbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands to Heaven and besought the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reed in the sweeping gale. But the voice of the petitioner was unheeded; and the vital tide rushed back frozen to the heart, while the words of prayer died on his palsiel (ongue. He was ready to relinquish all as lost, when an invisible hand arched the threatening cloud with a glorious bow. Most welcome was the cherished	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experiments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this: As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples: FIRST FROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an eidolon, as a living, visible man, says, "It will answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure; the last less than expected or justly due, but becomes in use on account of its availability, of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE! Formula I will to know. Result : The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the cidolon. THIRD PROBLEM. What will be the result of the present Hungarian movement upon the nations of Europe. The formula, result and solution as before specified. The imagery, as symbolic, may be infinitely varied, but a	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will be become estranged in his sympathy, so will be neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I havo said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby inbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs are facts, growing out of the undeveloped condition of man in the wisdom of nature. Now, these wrongs, which are facts, are false to man, untrue to his good, inharmonious with renson, and inconsistent with im- provement. They are facts, and they are falsehoods; they are truths, and they are errors. They are facts as occurrences, as false positions, or positions in con- flict; but they are deceptions i	impressions by holding a letter from the unknown per- son against her forehead. 5. DR. J. R. METTLER AND LADY, have for some years applied Clairvoyance, and will continue to make Clairvoyant examinations, and to give such diagnostic and therapeutic suggestions as are required in the successful practice of the healing art. TER MS :—For Clairvoyant examinations including prescriptions, §5, if the patient be present, and §10 when absent. When the person to be examined can be the present by receso
with thy deceitful blandishments! Go! thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the eye had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to claim his victim ! But Hope from her bright abodes witnessed the dis- tress of the poor Youth and had compassion on him; and taking an aerial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood! how various and fearful are the con- fiets which await thee in thy rough pilgrimage ! Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide their in thy wanderings ! At Mid-day !he elements awoke and played their awful mumbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands to Heaven and besought the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reed in the sweeping gale. But the voice of the pe- titioner was unheeded: and the vital tide rushed back frozen to the heart, while the words of prayer died on his palsiel tongue. He was ready to relinquish all as lost, when an invisible hand arched the threaten- ing cloud with a glorious bow. Mos	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experiments, to have discovered and demonstrated the Golden Rule for producing and solving, with absolute certainty, all Apocalyptic Phenomena. It is this : As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still going, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listening to its motion, puts one after another into his pocket. On receiving the last, he says, "This is not current, and will not pass." A voice, or an eidolon, as a living, visible man, says, "I t will answer your purpose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure ; the last less than expected or justly due, but becomes in use on account of its <i>availability</i> , of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE! Formula I will to know. Result: The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the <i>cidolon</i> . THIRD PROBLEM. Shall I recover from this sickness ? Formula, result and solution will be as specified in a former communication. FOURTH PROBLEM. The imagery, as symbolic, may be infinitely varied, but all perfect, and what would necessarily remain u	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will be become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will he neglect the means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I havo said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs are facts, growing out of the undeveloped condition of man in the wisdom of nature. Now, these wrongs, which are facts, are false to man, untrue to his good, inharmonious with reason, and inconsistent with im- provement. They are facts, and they are falsehoods; they are truths, and they are errors. They are facts as occurrences, as false posit	impressions by holding a letter from the unknown per- son against her forehead. 5. Essays on important questions of Social and Po- litical Economy. 6. He was ready to relinquish all as lost, when an invisible hand arched the threaten- ing cloud with a glorious bow. Most	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this: As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples : FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remitances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says. "This is not cur- rent, and will not pass." A voice, or an <i>eidolon</i> , as a living, visible man, says, "I twill answer your pur- pose just as well." The solution : The running watch is Time. The three pieces of coin are in time three remittances, and sure; the last less than expected or justly due, but becomes in use on account of its <i>availability</i> , of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE? Formula I will to know. Result: The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person-maming him or her. Solution : The person is not sincere, and is as the <i>cidolon</i> . THIRD PROBLEM. Shall I recover from this sickness? Formula, re- sult and solution as before specified. The imagery, as symbolic, may be infinitely varied, but all perfect, and what would necessarily remain	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will be become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will be neglectthe means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs, which are facts, are false to man, untrue to his good, inharmonious with renson, and inconsistent with im- provement. They are facts, and they are falsehoods; they are truths, and they are errors. They are facts as occurrences, as false positions, or positions in con- flict; but they are deceptions in their influence on mind, and errors in thei	impressions by holding a letter from the unknown per- son against her forehead. 5. Essays on important questions of Social and Po- litical Economy. 6. ORIGINAL POETRY AND MUSIC. 7. with thy deceitful blandishments! Gol thou false prophet, and speak to the winds—I will listen and believe no more." Overwhelmed with the consciousness of his wrongs, the Youth buried his face in the folds of his mantle and was silent. When the first sudden paroxism had subsided, he uncovered his face and looked up—but Hope had departed. On a barren, blackened rock—around which the scanty herbage was seared and blasted—sat a gloomy figure, whose form, features and expression presented an assemblage of unearthly horrors. The body was bent and convulsed with mortal pangs; the visage was dark and terrible as the shades of Erebus; the cyc had a sullen glare, and every muscle writhed with the unspoken revelations of pain. The Youth gazed — and was horror-stricken, for Despair was present to elaim his victim ! But Hepe from her bright abodes witnessed the dis- tress of the poor Youth and had compassion on him; and taking an arerial form, invisible to mortal eyes, she approached and whispered a sweet prophecy in his soul. The horrid phantom which had congealed his quick blood vanished in an instant, and the Youth arose with a grateful and confiding spirit, and he was clothed with the strength of his Manhood. Oh Manhood! how various and fearful are the con- flicts which await thee in thy rough pilgrimage! Grand and terrible is the imagery of tempests on Life's en, but who can curb the storm or guide thee in thy wanderings! A Mid-day the elements awoke and played their awful numbers on the rending strings of Nature's great Harp. And a lonely Mariner raised his hands to Heaven and besought the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reel in the sweeping gale. But the vica tide rushed back frozen to the heart, while the words of prayer died on his palsiel :ongue. He was ready to relimquish all as lost, when an invisible hand arched the threaten- ing cloud with a glorious bow. Most welcome was the cherished symbol of his early joys	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. Grand and terrible is the imagery of tempests on Life's rea, but who can curb the storm or guide their in thy wanderings! At Mid-day the elements awoke and played their awful numbers on the rending strings of Nature's great Hayp. And a lonely Mariner raised his hands to Heaven and besonght the invisible powers that they would grant him deliverance. The soul of the strong man was shaken, and the stalwart form trembled like a reel in the sweeping gale. But the voice of the pe- titioner was unheeded : and the vital tide runshed back frozen to the heart, while the words of prayer died on his palsiel congue. He was ready to relinquish all as lost, when an invisible hand arched the threaten- ing cloud with a glorious bow. Mos	FOR APOCALYPTIC PHENOMENA. MR. EDITOR : I claim, after a long series of experi- ments, to have discovered and demonstrated the Gold- en Rule for producing and solving, with absolute cer- tainty, all Apocalyptic Phenomena. It is this: As is the formula to the will, so is the Apocalyptic result to the object desired. This covers the entire ground, theory and result, and is absolutely sure. Out of a thousand experiments, I will state a few, as examples: FIRST PROBLEM FOR SOLUTION. A person wishes to know whether he shall in due time receive certain sums of money expected, and in how many remittances. The formula I will to see in vision and know in the name of Jehovah whether, &c. Here is the formula into the will. The Apocalyptic result. In vision the person is winding his watch, and out of it, the watch still go- ing, drop, one after another, three pieces of coin—the third smaller and not current. He has, without effort, received them into his hand, and, wondering, looking into his watch, winding again and again, and listen- ing to its motion, puts one after another into his pock- et. On receiving the last, he says, "This is not cur- rent, and will not pass." A voice, or an <i>eidolon</i> , as a living, visible man, says, "I twill answer your pur- pose just as well." The solution : The running watch is Time. The three pioces of coin are in time three remittances, and sure; the last less than expected or justly due, but becomes in use on account of its <i>availability</i> , of equal usefulness. SECOND PROBLEM.—IS THIS PERSON SINCERE? Formula I will to know. Result : The person is seen in vision, with a beautiful face and double brain, or serpent's tongue, or as a cat, and a voice says, It is the person—naming him or her. Solution : The person is not sincere, and is as the <i>cidolon</i> . THIRD PROBLEM. What will be the result of the present Hungarian movement upon the nations of Europe. The formula, result and solution as before specified. The imagery, as symbolie, may be infinitely varie	human intellect, and he who studies it finds simply the reflection on his mind. He who studies wrongs becomes imbued with a relish which jostles imperceptibly the natural balance of his judgment, and converts him in- to a creature after the image of his own meditations. A base example is wrong influence; no matter if it disgust or please the reader, the influence is wrong. Man should not be disgusted with man because it fals- ifies the relation which pure sympathy required. As man becomes disgusted with man, so will be become estranged in his feelings of sympathy; and as he be- comes estranged in his sympathy, so will be neglectthe means which are essential to his development and hap- piness. All history is made up of false pictures—false to human good, although matters of fact in the doings of mind. False images, or histories of antagonisms, impart no virtue, but beget their own impression, their own wrong, in the mind of the reader; for, as I have said, either approbation or disgust places the mind in hostility to the improvement which is requisite to his increased bliss; hence so much of history as alienates man from man, is thereby imbuing his mind with per- nicious examples, or exciting disgust of his fellows, is, no matter how true in fact, false to the good of hu- manity; false to the harmony of mankind; false to the felicity of the man, and false in its claims upon the reader for encouragement. Matters of fact, then, are falsehoods; truths are de- ceptions; for ignorance and folly are facts, and these facts deceive and lure man from the just and equita- ble position of harmonious relation to his brethren and God. All history is rife with wrongs, and these wrongs, which are facts, are false to man, untrue to his good, inharmonious with renson, and inconsistent with im- provement. They are facts, and they are falsehoods; they are truths, and they are errors.
