follows : On the morning of the 27th of April, Mr. Samue B. Parmelee, of Wallingford, found himself minus some \$1,700

and a valuable gold watch with chain, and a diamond ring,

which he had placed in the drawer of a bureau the night

elairvoyant, Mary Rich, who resided at Durham, with a view

to the recovery of the missing property, and was told that it

had been abstracted from the drawer by an Irish servant girl

in his house, who afterward, on becoming alarmed, had burned

the money and thrown the watch, two gold chains, and a ring,

Mr. Parmelee found the watch and other jewelry at the bottom

of the well as the clairvoyant had described, and also found a

The theft was then charged upon the servant girl, who fully

confessed it, and stated that she had disposed of the property

facts above stated, and wove a chain of evidence of the reality

of clairvoyance which it would seem that no really unpre

Greeley. Without claiming for him any absolute perfection, we venture to say, that no man of Mr. Greeley's years, setting down the disadyahtages he has overcome as nothing, has performed a greater or more varied humanitarian labor. We venture to say, with equal assurance, that, taking a careful observation of his life, private and public, to test him by, no man could have performed the aforesaid labor with larger conscientiousness and integrity of purpose, or with more generally firm and intelligent convictions. We speak decidedly, but not more so, we think, than some twelve years of intimate acquaintance with our subject will warrant."

Mr. Greeley is regarded, in the article under notice, as standing at the head of the practical reformers of the day. We are told, what we believe, that " no other man, to our knowledge, has struck right and left and all around against error, without respect to its fashionableness or obscurity, so bravely, so uncompromisingly, and so steadily as Horace Greeley."

Mr. Greeley's radicalism being considered, the writer remarks :

"One might well have supposed, that the often radical denunciations of evils and crafts Mr. Greeley has most assailed were well fortified in public esteem and prejudice ; but they have so tended, for the reason, we must believe, that the reformer has generally been found, upon a fair hearing. are certain to triumph. They have tended thus, also, for the reason, that Mr. Greeley has never been a turn-coat, nor a halting, doubtful, or indifferent leader. Taking hold of the plow, he has not turned back in the the patronage of the SHEKINAH to all our readers. furrow. He has stuck to the text of his convictions, however thorny and uninviting the way, preferring to be there with a forlorn hope, than in the front of victory with hypoerisy on his lips. It has ever been, and ever song by C. D. Stuart, are Articles VII. and VIII. will be, true, that the masses incline to fearless, faithful leaders and teacharenas of politics and religion. The masses have a supreme contempt for broached his theory for us to judge of it. The article is full a changeling. Mr. Greeley has been no changeling, hence the devotion for him of thousands who are, more or less, attached to his many-deviced standard."

Glancing at the politico-reformer aspects of Mr. Greeley's life, Mr. Stuart thinks it worthy of note that so prominent what is called spiritual, in our poetry, a mere philosophic moralizing? beauty in his hands, and the dignity of aspiring manhood gleaming on its and radical a reformer should also have been conspicuous as The subjects which compose the substance of our illustrations are not dusky forchead. This fact, says Mr. S., can only be accounted for by supposing that party names do not always cover the principles they nominally represent. Mr. Greeley's personal character is eulogized as above aspersion or reproach. In regard shadowy, vague, and dreamy if he will, his touches lay bare all the varied In embodying the forms of Labor represented in that Crystal Palace, to his eccentricities, so called by some, we quote from Mr. and multiform varieties of being. The mysteries of life and death, of time have spoken of use and of beauty. And it should be remembered that Stuart's sketch :

we desire to say a word. Our opinion is, that the public has nothing to do with the characteristics or idiosyncrasies of an individual, except they are publicly offensive. Mr. Greeley's personal peculiarities are often sought, by small minds, to be made a handle of, for purposes of ridicule or of the rising and the setting Sun of Life," otherwise. They are called (his dress, walk, etc., for instance) eccentricities, put on purposely for notoriety. Now we presume to say, in the face of the whole world, that we know better than this. Mr. Greeley's dress, walk, etc., are as native to him as his breath. That he is noticeable for points in figure, head, costume, and manner, we admit, but only naturally, and never offensively. We have known him intimately for over twelve years ; have had ample opportunity to observe him in public and in private, in the mixed assembly and at home; and he is one and the same in all places ; ready wherever found to alleviate distress, rebuke evil, give money to the beggar, or loan it to a friend; and we defy any man to pro- tributions to this department of science and art. Article IX. is number one of an able essay on American an appeal to God for the legitimacy of Labor. It was felt to be something ers. It is so on the track of battle, in the path of martyrdom, and in the Poets, by H. H. Clements. He has, as yet, not sufficiently in which the most jubilant pulsations of the human breast might fitly blend of "fiery fervor," We quote a paragraph :

"The spiritual in poetry is an experience, and not an emotion. It is its Industry. It was a confession of the blessing which was wrapped up in greatest but most undefinable essence-a prophetic intuition which reads the primeval curse. "What is to be left for Anthems," and the "Concordia," which the lovers of music human fingers, when almost every thing that Man can do is accomplished among our readers should not fail to examine. These have by one of these inanimate, yet strange and almost unconscious agents ? I say, no general development of this kind ever induces general suffering in the end. But equally in fault is he who, in such an Exhibition of Industry, turns away with contempt from every thing that is not useful, according to his sprinkled dome, where the Divine Intelligence, working for illimitable ages, has mingled the materials of use with the expression of beauty ? What he not wonder that the leaves should put on such pomp for the dying year, and that such useless things as flowers should line the traveler's dusty way? The justification of the beautiful is in an instinct of the human

But, again, regarding the Crystal Palace as representing the Civilization

of the Age, we see what are the present position and relations of the In-

dustrial Classes. I have said that the festival of the last week was the

coronation of Labor; and so it was-and doubtless Labor is honored, and

its dignity is recognized in this age as never before. But, my friends, it

is one thing to honor Labor in the abstract, and it is another thing to rec-

ognize the claims and allow the rights of the Laborer. Men may make

a kind of mythological impersonation of Industry, and express a great

enthusiasm for it-just as they do for national architecture, or interesting

poverty, or any other romantie conception-and yet recognize but very

feebly the humanity and the interests of the drudge or the craftsman. It

as well as the achievement. And that conception will be realized. The loers are to be bonored.

But, once more, looking upon the Crystal Palace as a mirror of our present civilization, we certainly discover much to cheer the Philanthropist and the Christian. It illustrates great progress, peace, and unity. Ships excite war. But, my friends, if this is expressed in this great Temple of Industry, consider for a moment its concomitants. Cast your eyes over permitted, patronized. This illustrates what is yet to be done, and the kind of warfare yet to be waged.

You see, then, what a conflicting, mixed, indecisive epoch ours is, if we take the Crystal Palace as representing the prevalent and the active ideas of the time. And yet the good is emergent, increasing. Such an Exhibition would not have been possible fifty years ago. . It enlarges our ideas

of Christianity in the world. It teaches patience and faith Truth and Righteousness do not break forth in sharp and sudden shocks. Secretly they work down in the deep heart of things, leavening the lump. Gradually they proceed, like the issues of the morning, in which we detect no That contrast is the first suggestion that naturally arises, upon taking a plodding, superintended toil; and does honor to these. Oh! it is but a meager result to gather from the to have dominion over the world-the dominion of Trath and Goodness, present opportunity simply the impression of wonderful achievement, or and not of mere force. Silently these conceptions have worked in the soil of events, until now we have this beautiful Palace of Industry-a flower unfolding out of the ages, rich with the vigor of good men's progress, and brilliant with the coloring of their lives-and yet itself, we trust, but as a bud and prophecy of far finer and better results.

But finally, my friends, I detect a still deeper significance in the spectaacross the sky, how natural is it to exclaim, "What is man, that Thou art ceit the ship once was, and the steam-engine, and the glorious printing-

> DISCOVERY OF A ROMAN SAECOPHAGUS .- Some workmen recently employed to excavate the foundation of a warehouse in the Minories, London, struck upon a large stone chest, to which a cover had been fastened. Expecting to find some concealed treasure, they broke the cover, and the chest also; but in this they were disappointed, for they found only a leaden coffin, containing a skull and bones. Fortunately the Rev. Thomas Hill heard of the discovery, and lost no time in having the sarcophagus, with its leaden coffin, placed within Trinity Church. The entire length of the stone sarcophagus is about 6 feet, its width about 2 feet, and the depth about 1 foot-7 inches. The cover is saddle-backed, or roofed, and in front is ernamented with foliage. The entire face of the sarcophagus is sculptured. In the center, within a circle, is a youthful male bust, clothed in a tunic. The face, which is turned sideways, is marked with a strong individuality, which conveys an idea that it was meant to portray the person deposited within. The rest of the front of the coffin is filled with a striated incuse pattern, very common on Roman sarcophagi. The cover was fastened with two strong iron clamps at each end. On removing the cover, the lid of an ornamented leaden coffin was exposed to view. It was overed with a beaded ornament and escalop shells, like examples found in past years at Colchester and in London, only that the pattern was somewhat differently disposed. Within the coffin were the remains of a young person, imbedded in lime, who, from certain indications in the skull and teeth, it is considered was not more than eight years old. The lime and the bones are to be carefully examined on a future occasion. It is intended to advise the parish authorities to deposit the sarcophagus and

Came more sweet and deliciously thrilling, And charmed more wondrously-Withdrawn from the world's warm plaudits-Whispering of hope to me ! Till my spirit wandered thy captive Away from its temple of pain, Where such visions of beauty came o'er it As never may come again.

I saw the dear home of my childhood, No tempest had reached it there, And I knelt by my Spirit-mother For the blessing of her prayer ; There were bowers of perennial roses, Where no thorns of sorrow could be, And there came a band, so radiant, To welcome an angel in thee !

Let us now inquire for a moment regarding the practical effect which orthodox preaching has upon a community. Do we see the arts and sciences thereby advanced, or the feeling of universal brotherhood which quillity of mind was seen in the peculiar complacency of the countenance. SPIRITUAL IMPRESSIONS.

About two and a half years ago, a gentleman of this village, well known to its inhabitants as an honest, upright, and industrious man, pursuing a useful and profitable business, was taken sick in consequence of exposure to the weather while attending to his occupation. His sickness was only of few weeks' duration and ended fatally. On the morning of and then professional means of subsistence. We had been married : what has not Can by no chemistry unite : Thus from the Eternal we were brought To meet again in earthly light.

We met as stom tendeth ever, True to its kindred atom dear, Fast bound by law that can not sever, And ever drawing still more near.

And as those atoms close in one, In beautiful duality, So, Lady, when our course is run, In time or in eternity,

Our souls shall mingle and unite In fairer forms and perfect love, And angels, in their high delight, Shall crown our marriage from above.

Thus shall a friendship just but rayed Upon our lonely pathway here, Prove that God's purposes are made In mystery their fruits to bear.

We'll soon throw off this frail disguise Ot earth and matter, place and time, And read, in each the other's eyes, The high, sweet truth of love divine.

From holiest heaven's serenest springs, Our purest pleasures shall arise; Oh ! haste the bridal hour that brings The immortal marriage of the skies.

We'll spend eternity of love In bridal joys that ne'er decay, And wisdom, brightening from above, Crown our eternal wedding-day.

Well might Shakspeare exclaim, " Man, proud man-dressed in a few in dreams in other causes. For laudable as the efforts hitherto have been to provide a scientific theory covered from the affection. for the "manifestations," apart from the spiritual one, they have all signally failed. It would appear from the late report, that it is on the fact that the committee's labors have not yet been blessed with a communication from any stray spirit of their own religious opinions, that they base their conclusion that all must necessarily come under the head of what may be termed demonology. Of course, had they met with a good orthodox Congregationalist spirit, such would have been received with open arms as a messenger from the court of Heaven, and on no light errand either. When such does occur, as no doubt will be the case ere long, I trust, on obtaining some definite information regarding the heaven of their party, they will publish the same to the world as in duty bound, and I for one will canvass for subscribers to the work. Indeed, at no distant day, I hope to see clergymen and freethinkers going along "arm in arm." Already there have been many noble instances with reference to this subject of courageous, Episcopal Church, Hartford, Connecticut, a man of high literary attainments and most exemplary character, being also very popular throughout spirits," that if it be admitted that spirits are able to visit us at all, it would to do so, as it seemed unreasonable to suppose that they should not also and can bite as well as bark; and, what is more, he can scent a loafer as far retain their affection for relatives and friends left behind on earth. DREAMS.

Dreams can be procured by whispering in the ears when a person is asleep. One of the most curious as well as authentic examples of this kind has been referred to by several writers. I find the particulars in a paper by Dr. Gregory, and they were related to him by a gentleman who witnessed them.

The subject of it was an officer in the expedition to Louisburgh, 1685, who had this peculiarity in so remarkable a degree, that his companions in the transport were in the habit of amusing themselves at his expense. They could produce in him any kind of a dream, by whispering into his ear, especially if this was done by a friend, with whose voice he was familiar. At one time they conducted him through the whole progress of a quarrel, which ended in a duel; and when the parties were supposed to be met, a pistol was put into his hand, which he fired, and awakened by the report. On another occasion they found him asleep on the top of a locker, or bunker, in the cabin, when they made him believe he had fallen overboard, and exhorted him to save himself by swimming. They told him that a shark was pursuing him, and entreated him to dive for his life. He instantly did so, with such force as to throw himself entirely from the locker, upon the cabin floor, by which he was much bruised, and awakened of course.

After the landing of the army at Louisburgh, his friends found him asleep in his tent, much annoyed by the cannonading. They then made him believe that he was engaged, when he expressed great fear, and showed an evident disposition to run away. Against this they remonstrated, but at the same time increased his fears by imitating the groans of the wounded and dying ; and when he asked, as he often did, who were down, they named his particular friends. At last they told him that the man next himself in the line had fallen, when instantly he sprung from his bed, rushed out of his tent, and was aroused from his danger and his dream together by falling over the tent ropes. A remarkable circumstance in this case was, that after these experiments, he had no distinct recollections or fatigue ; and used to tell his friend that he was sure he was playing some trick upon him.

A case entirely similar in its bearing is related in Smeille's Natural Hisory, the subject of which was a medical student in the University of

THE NEW ERA:

Is published every Wednesday morning in Boston, in the folio form, and is printed on good paper with fair type. It will be a vehicle for the facts, philosophy, and practical suggestions of Spirits and human correspondents, and for such editorial matter as the changing circumstances of the times and the needs of the public shall seem to demand. It shall be a free paper, in the best sense of the word : free for the utterance of all worthy and useful thought-free as Life, and Love, and Wisdom are free. It will spontaneously avoid all sectarianism (except to give it criticism), and will be

This paper will be published one year without fail, as the funds have already been provided by the extra subscriptions of some noble friends of this movement. Subscribers, therefore, may be sure of getting all the numbers they subscribe for. It is hoped that the friends of our cause will do as much in the way of extending our circulation, as others have done by, their money. I therefore invite the immediate and hearty effort of all the friends in behalf of this enterprise and of this new truth. TERMS-\$1 50, in advance.
