From the Manuscript Record of Rev. J. B. FERGUSON SPIRITUALISM IN NASHVILLE, TENNESSEE. Continued from No. 174. SPIRIT-COMMUNION AN EDUCATION.

WE have many and varied proofs of this proposition, but we select the following because it is near to our observation. The writer of the articles that follow, twelve months since, found it extremely difficult to pen the briefest letter to his parents. Meanwhile he has become a more than ordinary medium for spiritual communications and healing, and writes with a facility and power such as commands the respect and commendation of the most advanced minds in our community. Modest, almost to timidity; of unobtrusive demeanor, he engages your interest and attention by every word he speaks, while the very spirit of cheerfulness and hearty good-will breathes its atmosphere wherever you meet him. I allude to GEORGE W. HARRISON, 8 youth of Nashville, Tennessee, daily engaged in active duties upon the streets and wharf of the city, and who, during his engagements, enjoys a regular intercourse with Spirit-minds, hears the music of their heavenly voices, receives their hourly advice in his doubtful experiences, and can, at almost any hour, set down purposes are successful, our highest recreation and happiness must and pour forth such strains of truth and hope as the specimens we give below. Of his age, I would remark that his beard has

His development has occurred almost entirely without the aid o a circle, or even a second party; while his experience is rich in the evidences, external and internal, of a high order of spiritual attendance. J. B. F.

DEITT'S LAWS REFLECTED IN MAN---AN ENDLEM OF FUTURE PROGRESSION Oh man I whose life is God, and whose destiny is linked with eternity pause thou here in thy course, and permit the lofty conception of an unfolding Providence, to subdue thy nature to obedience. Divest from thee the attributes of a misguided nature, fraught with an error o fearful growth; but be thou free-yet free in mind and liberal in thy judging. The past ages present but fearful evidences of man's misdi rection, when all the ennobling virtues constituting his true nature were almost entirely obliterated. S .-- Youthful friend, when wilt thou learn wisdom? Knowest thou the immortal Spirit, and if not developed, its advance and progressic will be so much retarded when entering the superior state.

M.-But have they no recreations or enjoyment in your sphere, as in ours? How can you live cherishing the one desire when you perceive all your efforts rejected with scorn?

S .--- Recreation has two meanings. The mortal definition, whe own selfish purposes. Recreation with an immortal Spirit, is seeking to make others happy. This is the acmo of happiness in our blissful sphere. Hence, recreation and enjoyment with us is to elevate all. But you ask, Do we not tire? Mortals may tire; but the immortal spirit, never. Our duty is to enlighten all. This we seek, and if our come. Can you now perceive the difference between worldly recreations and the true, spiritual enjoyment? The immortal spirit never wearies because its pure purposes tend to enlighten and advance all; to raise

S.-Behold ! do you not see a stream of electric life flowing in it many dissemmating currents to the inhabitants of your sphere? Do not its pure branches encompass the whole earth, and cast its gentle influence over all? Yea; every country has within its boundary a part of this stream of truth, wisdom and spiritual love. THE SECOND BIRTH. BT R. H. BROWN, MEDIUM.

ALL the medical attendants had given me up. It was night, nd for hours I had tossed in anguish on my burning bed. A fever raged in my blood ; intolerable pangs tormented me. The long, dark night crept slowly by. The moon, pale and wan, went down, and the cold and dreary darkness melted into morn I heard the watcher's whisper, "He is dying !" A cool win

lished principle, and truth is regarded as nothing? Hence without storm around, that hope may pass as a cheering light-a beacon-that apartment-their whispered words-the ticking of my watch which lay on the bureau, and the faint tolling of the bell without, all were distinctly heard.

Gradually a terrible idea stole upon me. I tried to fight it off; but it would come and stand before me compelling my assent. I am not dead, but in a trance, and, oh, God ! they will bury

Filled with horror, I again strove to speak-to cry out, to move, but in vain My will was powerless, its scepter had been taken away, its commands were no longer obeved.

For hours-it seemed years, I lay filled with terrible apprehensions: I listened to every sound, and my fears clothed the slightest noises with horrible significance. My imagination reveled in gloomy anticipations, and I pictured to myself again and again which awaited me in the grave.

They appareled my body for the tornb : despair took possession of my soul, and, yielding up all hope, I resolved to bravely meet my fate-suffer and die. This was followed by a feeling of apathy almost amounting to unconsciousness. How long I lay in this state, I know not; but after a time my attention was attracted by a curious change which was progressing within me. A cluster of beautiful colors, blue and purple, mixed with fringes of golden and silver light seemed floating before my closed eves. ened, until by its light I beheld bending over me, dim and indistinct, a form-it was the form of my beloved; but my eyes were closed and I could not speak to her. The light grew stronger, and at length the whole room wherein I lay dressed for the grave, was illuminated, and I beheld all things about me with the greatest distinctness, but my eyes were still closed, and I could not move hand nor foot. My wonder at this novel phenomenon was increased when I observed that my sight was not confined to the line of vision, or what would have been the line of vision had my eyes been open; I could see on both sides of me and behind me, through the back parts of my head, equally well, and at the same moment. But this peculiarity did not so much astonish me as another which now began to exhibit itself. The walls of my room seemed to grow transparent, and I saw the green fields without, and the groves, hills, dales and streams, for miles away, flashing in the light of day. All sensation had now left me; I no longer felt the tears that fell upon my face, or

a soul, how seldom art thou left to exp trammeled ! And you, oh man, recognize no higher law than the one dictated to you within your church, and obey no procepts save those taught you by an ambitious leader whose mind, spiritually, may perhaps be more contracted than your own. Conscience, free and unbiassed, is God's law bestowed on man; and its dictates are divine precepts which make man subservient to the will of his Heavenly Futher.

You may call this infidelity, yet you prove not the assertion. You may persecute the supporters of this principle, as the Jews persecuted Christ, yet you place no obstacle to retard its advancement. 'Tis God's messenger, 'tis truth's vindicator, and 'tis man's spiritual compass that guides him to his dostiny. Oh! that all would seek the kindred society of congenial thought. But time, though bearing in its mighty and rapid tide mementoes marking ages of fallen and degraded intellect, will have emblazoned on its surface an emblem of illuminating brilliancy; peace, the offspring of divine affection, though smothered from existence by the bitter wranglings of selfish and discontented man, will be heard in the silent hours of millennial harmony, wafting heaven's exalted words of purity from the dominions of eternity ; that each may feel a nearness to his God, and a univorsal sympathy towards his brothers. Could I speak in tones of thunder to my kind, I would arouse them from their sleep of listlessness, and beseech them to shake of the fearful shacklos that have bound their race in misery, and bid them coöperate in the work that has already redeemed many from the dark

thraldom of ignorance. I would tell you in tones of candor, that you know not how beneficial are the ties of mutual sympathy extended toward a common humanity.

We would not depreciate any doctrines that are truthful and have an enuobling tendency; yet we would have you investigate with a olearness of perception such as should characterize all the human family who have instilled within them the unquenchable spark of divinity, or who regard their capacities as above those of the brute. Man is placed on an eminence. Worlds of active yet inferior existences move at his command. He feels his strength, and his intuitive faculties point out to him his glorious destiny. His thoughts are ever expanding, and upon their immortal wings he is carried on, and ever on. into the realms of the infinite. "But," says one, "what proof have we of this?" I answer, the evidences are many. Look to thy birth-see there life but in its germ. But what is life ? 'Tis God ; and its very nature insures its cternity. But some would say, "I know the soul is immortal but what proof have you of its eternal safety ?" Its safety is its greatness. The law of the Deity is the law of progression from its birth to its transition, and is an evidence of its future life. Why should we debar Spirit of the privilege of advancement, when the most inferior atom contained in the universe draweth on to higher perfection? You would ask, how are we to obtain the advanced privilege of developing ourselves? I would suggest that you keep a free mind, and be not over careful in keeping contracted forms that are unhealthful to the growth of the soul ; no man is thy guide, if the information he gives be not congenial. But study communion with thyself, and condemn not

thy neighbor should he take a different path, lest in doing so thou mayest spiritually harm and debase thyself. September 9, 1855.

DIALOGUE, THROUGH G. W. HARRISON.

[EXPLANATION.—The questions and answers were given through the same medium. He was frequently interrupted, but ever resumed at the word or sentence whereat he left off. All was given without a trespass upon his daily duties, at such moments of leisure, and whenever he was ready.]

MEDIUM .--- I see before me many bright and pure countenances, that

mould all minds alike, before gaining its desired ends? S.-The soul is created by God alone. The mind draws its existence from the soul. Thoughts are the impressions emanating from the immortal soul within. You will understand me not to mean that evil thoughts and bitter feelings draw their existence from God; for impurity can not emanate from God. This idea is not established upon the law of order. You can not take out what is not in. You can not

learn wisdom and purity from ignorance and wickedness. M.-Explain: I can not understand why the mind becomes evil and wicked, if thoughts and actions owe their sway to God or perfection. S .--- Thon understand rightly what I wish to inculcate, and engrafi it deeply on your mind. The impressions emanating from the divinity or soul though pure when first entering the rudimental sphere, are but the germ to be gradually expanded or developed. Instance the impressions we call Reason, Order and Mind, which attributes constitute what is termed the impress omanating from the Divinity. It enters the rudimental sphere to become developed; and as impressions approximate nearer the desire for advancement, it distinguishes good from evil. But it is open to be operated upon by the evil influences that surround. If you mix pure water with impure, does it not partake of the impurity of the substance with which it came in contact? So the pure divinity created in you by God partakes of the evil of worldly appetites.

M .--- But toll me, Spirit-friend, why surround that which is pure when first originating from God, by the evils you refer to, and thus stop the growth of purity and goodness? Why submit the gift from the great fountain of wisdom and love, to the contentious strife of mortals and the injustice of one man to another? for great, indeed, is the grossness

of our mortal nature. I can now fully realize, and draw, the comparison between the inhabitants of earth and the pure and beautiful beings whose whole nature seems blended in love and purity, and whose sole occupation and desire is to raise the degraded nature of man and instill in his bosom toachings which will ultimately fit him as a dweller in the Spirit-land.

S .- Strive, O strive, mortal to obtain the bright future, which is so near your grasp! Know you not that evil is essential to good-to develop the spirit for its future greatness? The vicissitudes and trials of life on earth lead to the development necessary to that which awaits your immortal existence. Hence, were there no evil, where would be the incentive to good ? Were there no obstacles surrounding, mortal would not appreciate the good that lies beyond them. The great Father has endowed all with proper capacities for discrimination between right and wrong. Have they not a superior reason within to guide them to good actions and to happiness? Look at a ship. Has great developments of spiritual intercourse, is that it places the she not a compass by which the skillful mariner may guide her off dangerous reefs and whirlpools, and thus save her from the fearful vortex of ruin? So also has the mind a compass. It is Reason. It points out the waters of peace and happiness, where no rocks lie concealed, and no whirlpools await for thy destruction. Then why cast aside this noble compass, to be tossed upon the tumultuous waves of evil, and driven by the changing winds far from the peaceful haven? These winds are as the momentary appetites and impressions of thy worldly nature, which ultimately wreck you in uncertainty, and depress

the once buoyant and pure nature God instilled within you, while you

M .--- But I understand you to say, the mind is limited ? S .- The spiritual mind has limit; that is, its pure attributes, if not

If God delegated it to one mortal mind, came and breathed upon me, and then a hand of ice seemed and denied it to another, then shouldest thou be led by others; for no clutching at my heart. A sharp electric shock shot through my reason would be engratted within by which to judge as to truth or feeble frame, and my limbs tossed and quivered for an instanuntruth. heard with my ears the words spoken at my bed-side, but I knew when they spoke, for I beheld the motion of their lips, and I understood what they said, for I felt their words sounding in my soul, like the silent voice of my own thoughts.

How long this strange state lasted I know not, but at length all things vanished. I no longer saw the form of my beloved, the room in which I lay, nor the landscape without ; a bright, golden cloud seemed to overshadow them and me. I beheld them no more.

Then I heard a voice speaking from out of the midst of the cloud, saying, "Blessed are all the children of death, for they shall be redeemed.

I heard the words of the voice, and my soul was filled with awe within me, and I beheld amid the sea of golden light in which I seemed to float, an angel standing beside me; his eyes were fixed upon mine, and his hand rested upon my brow. 'A strange numbress seized all my members, and looking steadfastly on the eyes of the angel, I became unconscious, and knew no more.

Slowly I returned to consciousness. The same golden Kaht loated about me, but soon it rolled away like a curtain. The angel was gone, and I was yet in the room where I "fell asleep." I stood upon my feet; beside my bed and upon it lay my body, cold, motionless and dead. Fear and surprise filled my soul; the novelty of my position terrified me. I knew not whether I was in the body or out of the body, whether the cold. pallid, motionless form that lay before me was myself. or whether t was I who stood upright beside, gazing upon it. I said. I will solve this mystery. That body which is my own will obey the mandates of my will.

I concentrated my mind and tried to raise the cold, dead form which, clad in the garments of the grave, lay before me. I tried, by the power of my will, to make it sit up and look about, but my will had no power upon it. I raised my hand to my head: ah! this body obeys the commands of my will; yet what am I, where am I? exclaimed my soul in wonder and amazement.

Some one now entered the room-it was my brother. I dvanced to meet him; I spoke to him, but he neither saw me nor heard me, yet I stood close by his side and might have touched him. I was perplexed and troubled-thoughts "beyond the reach of my soul" crowded upon me. I felt as though my reason was about to loss its seat. Then it was that I heard a voice saying, "Fear not, thou art born again." I turned and beheld approaching, with smiling countenance, one whose form I had seen long years before consigned to the silent tomb. He clasped my hand, a divine welcome fell from his lips, and he drew me gently away.

MAHAN'S MODERN MYSTERIES. CHAPTER IV.

THE AUTHOR'S "TEST PRINCIPLES" EXAMINED.

In this chapter it is our purpose to review the several propositions by which Professor Mahan proceeds to try the claims of the Manifestations to a spiritual origin. He is somewhat methodical in his general manner of treating the subject, but his perception of natural causes and metaphysical distinctions is confused and unreliable; his statements are often ambiguous, and his reasoning illogical; while his conclusions are, for the most part, carelessly and abruptly drawn. In his estimate of the phenomena he neither follows ontological principles, nor does he strictly respect the dogmatic authority of the speculative, scholastic theology. He exhibits a desire to preserve friendly relations with the world and accredited science, on the one hand, and the church and popular divinity on the other. These counter attractions keep him about as far from Heaven as he is from terra firma. To determine the nature and source of the phenomena, he proposes to Spirit in man belongs to the supernatural creation, he will thereapply his own arbitrary rules, which are neither clearly expressed nor understood. This is a complete inversion of the true order. The facts of Spiritualism are not to be tried by the standard of this or that man's opinions, nor can we reasonably expect to determine their source and significance by a vague statement which. at best, is but the sepulcher of an idea.

With this brief introduction, let us proceed, seriatim, in the examination of the author's "test principles." That the reader may as far as possible perceive and comprehend the grounds of the several propositions which constitute his platform.

I. No facts occurring in the world around us, are to be referred to any supernatural or *ab extra* spirit causes whatever, which facts can be accurately accounted for by a reference to causes known to exist in this mundane sphere.

It is difficult to infer the author's intention, or his-real posi tion from this statement. He talks about natural, supernatural and spiritual things, in such a vague way that we are left without any definite conception of his idea or purpose. He speaks from a cloud, and leaves us to guess where he is and what he is there for. A dark, crooked and unfrequented path may be quite as safe as any other, if the traveler finds it necessary, above all things, to elude pursuit and to escape observation. There is certainly no approach toward the light in the foregoing statement, and for the present we are left to feel after the author in the dark. His first proposition is quite too indefinite, as it appears to the philosophical mind. either to serve the author's purpose, or to convey any distinct impression of his meaning. He uses terms so loosely, that scarcely a single idea is precisely expressed. How many things, for example, the Professor is disposed to include in "this mundane sphere." we know not : the province of natural law is nowhere defined; and the ab extra Spirit-causes-such are allowed to exist in foreign parts, but not permitted to show themselves about here-are neither named, numbered, nor located. This leaves us ample room to conjecture what we please, but as this wide field is not yet "fenced in," we can scarcely hope to confine the proprietor to his own premises, though we may venture on the experiment.

The last part of the proposition under review may be supposed to materially modify what precedes it : but the qualifying clause, probably, was not designed to limit the general scope and purpose of the whole, so much as it obscures the meaning. If we are right, number one of the author's "test principles" may be more clearly expressed thus: None of the phenomena cognizable by the senses as erercised through cornercal organs, are to be referred to supernatural causes, or to any spiritual agency superior to the unintelligent forces of the natural world, and the powers of the human mind in its mundane relations. Nature. in these days, has become a powerful institution, especially since the advent Odyle. Nevertheless, our author manifestly believes that Nature has limits somewhere-that certain things which men attempt to conceive of or talk about, may reasonably be supposed to transcend the capacity of what are usually denominated natural forces, and hence are to be comprehended in the writer's realm of the "supernatural." He does not pretend to deny that certain ab extra Spirit-causes do exist, but he totally rejects the idea that they produce any such mysterious effects as are now constantly occurring on the natural plane of our existence. It is true that such causes were once operative within "this mundane sphere." In primeval ages God ruled the world ; wonders were performed by ministering Spirits and Angels, and men were inspired from supersensual and divine sources. But, according to this professed Christian philosopher, no facts in these days are to be referred to ab extra Spirit-causes. All such causes have done operating in this region. The Spiritual Powers have leave to retire, and busy themselves in shaping the embryotic forms of new systems, and in training the adolescent worlds that are not yet qualified to take care of themselves. As for this world, it is supposed to be able to go alone; the children of men can inspire themselves now, or go without inspiration, and Nature is so far developed as to work the greatest wonders without extra force or spirit-without God ! Thus far, if our author's Theism does not attempt to limit the present dominion. Prof. Mahan is chiefly disposed to venerate the God of history and tradition. He doubtless believes that the Deity we read of had directly something to do with the governpurposes he was long since virtually superseded. It is no mis- ing beyond the sphere of external nature, and the unaided operatake of ours that the enemies of Spiritualism entertain such irra- tions of the human mind on earth. If they are, indeed, so extional and irreverent ideas of the Supreme Being and his administration. But we are deeply surprised that men claiming the why have they encountered such a general and determined oppoauthority of a Divine commission to expound the spiritual myste- sition? respective limits. This proposition suggests an important question, and the answer seems likely to reduce our author's second "test principle" to something less than a cipher, so far as it is particulars. On the other hand, these facts may conform in all presumed to be adapted to his present purpose. Now, this is the question : "Is the human soul or Spirit comprehended in Nature ? Does it appropriately belong to the department of natu- plainly manifest the relation of effects to causes : but we are reral things ? or, is it supernatural ? For all the purposes of this quired to reject all such claims. The author says, "Such facts criticism, we are quite indifferent respecting the decision. Our reverend friend may answer ad libitum. He may assign the suppose them to be the result of mundanc causes, which are yet human Spirit a place in either one or the other of the two great to be discovered." The "unknown cause" may claim to be departments of Being-we care not which-and he will be equally sure to expose the fallacy of the second principle in the foundation of his argument. If he is pleased to decide that the in recognize the presence and action, "in this mundane sphere," them apparently lifeless, and at the same time bear our unof beings gifted with supernatural powers; and accordingly, he shackled spirits upward and away into the " heaven of heavens;" must admit that the operations of the human Spirit, through the it may dissipate the midnight darkness, and even come visibly to body and on the objective forms and substances of the natural world, are so many illustrations of a power that is above Nature. This point in our argument may be briefly comprehended and enced; and yet, Rev. Professor Mahan would have them reject

clearly illustrated by the following brief syllogism : 1. Men are known to possess and exercise in this world--in greater or less degree-certain occult powers, supersensual percephis argument, we will quote in full, and in their proper order, tions, and "Spiritual gifts." which demonstrate their relation to transmundane existence.

2. Man, in his interior or spiritual nature, is supernaturally endowed and instructed.

3. Admitting the truth of the foregoing propositions, it neces sarily follows that many things which men are accustomed to do and to experience, during the continuance of the life on earth, may by properly referred to what our author denominates supernatural or ab extra Spirit-causes.

On the contrary, if it be affirmed in answer to our question that the human Spirit is more properly included in the natural creation, it will plainly appear, that in referring certain occult phenomena to the agency of human beings, in a spiritual state, we do not refer such phenomena to supernatural, or ab extra Spirit-causes. This, also, will admit of a syllogistic demonstration. thus:

1. Men have souls or Spirits in this world, and are capable exercising, under a variety of circumstances, the mysterious powers of the spiritual and immortal nature.

2. The human soul belongs to the natural creation.

3. Therefore, in referring the mysterious phenomena of our time to the Spirits of men, we assign natural causes for their occurrence.

Now, President Mahan will not attempt to question the truth of the first or major proposition in either of the foregoing examples. Indeed, a large portion of his book is essentially devoted to an illustration of the idea we have thus briefly expressed. The second or minor proposition must be accepted in one case or the other, for the obvious reason that the human Spirit is necessarily either natural or supernatural. Finally, if the first and second propositions be admitted, the acceptance of the third-the conclusion is rendered inevitable.

III. When particular causes are known to exist, all effects within and around us are to be attributed to such causes, effects resembling and analogous to those known to proceed from such causes, effects especially which occur in circumstances where such causes may be reasonably supposed to be present. The objectionable features of this proposition are so well dis guised that the statement appears fair at first sight; but on reflection, we discover that it is rather specious than sound. Effects are the outward signs or sensible expressions of their specific causes. Subtile elements and silent forces are thus revealed to us in the pictorial illustrations of a wide-spread natural symbolism. The fallacy in the foregoing proposition consists in the assump tion that similar effects proceed from the same causes. It is important to observe that similar effects do not indicate the presence of identical but of analogous causes. What if a large proportion of the spiritual phenomena resemble, in some of their essential features and aspects, other facts--already ascertained to depend on mortal agency, or on the dynamics of imponderable sub stances. This is precisely what we might reasonably expect to find, inasmuch as all material and spiritual creations are intimately connected with each other, and co-related to the same Infinite First Cause. But when we enter the wide sphere of subordinate causes, and their specific effects, we find them innumerable and infinitely diversified. And here it is only by a close observation of the several particulars wherein they are either similar or dissimilar, that we are enabled to make a scientific classification, and to trace outward and sensible phenomena to their interior and invisible laws.

extra causes whatever, or to the agency of disembodied spirits, when such facts are similar and analogous, in their essential characteristics, to other facts which once appeared equally mysterious and unaccountunknown to us

The position of our author, so far as it is defined in his fourth test proposition, is a most singular one for a Christian ministe to occupy. He assumes that if any new facts occur, the causes

of which are as yet unknown, we must pertinaciously resist all Here the writer again recognizes the distinction between the attempts to refer them to spiritual sources, so long as we can natural and supernatural, but does not attempt to define their trace a distinct analogy between them and any other facts which have been accounted for on purely natural principles. They may differ from all merely physical phenomena in many essentia respects to the known characteristics of certain intelligent beings, whom we have long and intimately known, and to whom they manifestly lie in the track of scientific discovery, and we must Spirit, and talk to us as friend with friend ; it may take hold o the great forces of material nature, and suspend the consequences of their action; it may exhibit a mysterious insight into the secrets of the dead; it may paralyze our mortal bodies, leaving us in human and angelic forms, clothed with the immortal splendors of their deathless estate. All this have thousands experi

> the evidence of their own senses, and uproot, from their inmost souls, a conviction that is strong and deep as the love of life. According to this author, it is most important for us to purge our souls of all that we know of heaven; of our immortal life, and of spiritual and divine natures. This done, only one thing remains. We must all wait patiently to discover "mundane causes,' having dismissed the radiant throng from our presence with less ceremony than is due to mortals.

> V. To establish the claims of Spiritualism, its advocates must show (1.) that the facts which they adduce are wholly dissimilar and unanalo gous, in their essential characteristics, to any facts resulting from any mundane causes, and (2.) that the occurrence and characteristics of these facts can be accounted for, but upon one exclusive hypothesis, the agency of disembodied Spirits. If similar and analogous facts do arise from purely mundane causes, it is a violation of all the laws and principles of science and common sense, to attribute these phenomena to any ab extra cause whatever.

reform. This whole statement is utterly preposterous. In order to sus tain the claims of Spiritualism, we certainly can not be required to show that the facts are in no way analagous to any other facts that ever occurred on earth, and were found to have been pro duced by unspiritual causes. The author's assumption that this is properly demanded at our hands is absurd to the last degree. There is an obvious analogy between the phenomena of animal and vegetable life. Now, if we are disposed to insist on the reality of animal existence, must we first prove that animals are in all respects unlike plants, and that they in no way resemble anything else in God's creation ! We presume not. In fact, should any man seriously offer such a suggestion, among men of ordinary intelligence, he would be laughed at. And yet the first Presi dent of Cleveland University gravely proposes what is still more repugnant to reason. He would not only have us prove that different genera have no likeness; but he insists that there shall be no resemblance in the phenomena produced by beings of the

same genus and species. According to our author, the Spirits of departed men must say and do things which are "wholly dissimilar and unanalogous, in their essential characteristics," to any thing that men were ever known to say or do before, or we have no evidence that they are Spirits or men at all ! And such is the alse philosophy and slipshod logic which Spiritualisn

I have visited Paris, and held converse with the living history of centuries both there and in London. How much I have seen that is beautiful and sublime I can not here rehearse. You must not measure the magnitude of all these things by the growth of my soul, I have not seen, nor sought to see. If we gaze even on the grandeur of planetary systems and the unrivaled splendor of the stellar heavens and see no beauty there; if no emotions of adoration and praise, inspired by the wisdom of the Divine Author, thrill the soul's slumbering chords, we do not see---indeed we scarcely live. FREE LOVE AND SPIRITUALISM.

WE are indebted to Judge Edmonds for a copy of his letter on Free Love and Spiritualism, addressed to the New York

Gentlemen :- Since my return from the country, where I have been spending some portion of the summer, my attention has been called to so seriously on the religious faith which I, in common with many others, have embraced and do dearly cherish, that I am confident you will not regard me as impertinent or intrusive in seeking an opportunity to defend that faith from the imputation thus cast upon it.

The article I refer to professes to be an account of the "Ceresco Union." so called, and of letters from Mr. Warren Chase and Mr. T. L. Nichols. defending the principles of that "Union," as legitimately flowing from Spiritualism and tending to the doctrines of Socialism and Free Love. and in which it is said, among other things : " Of course, as Fourierists, or Individualists, or Spiritualists, they repudiate marriage as an arbitrary institution, and accept more or less the "free-love philosophy." It may be, for aught w. these centlemen and their associates of the "Ceresco Union" do entertain the doctrines here imputed to my spirit. Nevertheless, what has not elevated and expanded them, but I utterly deny that they are or can be doctrines embraced by any "enlightened Spiritualist," or that they can find any warrant in the oure and elevating teachings of the spiritual philosophy.

Spiritualism has from the beginning had to encounter much of misrepresentation from its opposers, and it is not to be wondered at that it should also have to encounter much real injury from its professed followers. As long as we were few in number and generally contemned. there was but little inducement for insincerity, to covet our wealth and profess our doctrines; but as our numbers are rapidly augmenting all over the country, we must not be surprised at our experiencing the fate with which even the pure religion of Christ has been visited by pretenders. Nor have we a right to expect, amid the difficulties and discouragements attending the inauguration of a new faith, that all who are silling to embrace it, can be at once imbued with a full knowlegde and understanding of all its sublime and beautiful truths, however honest

Our author concludes his statement of "test principles" with the following brief paragraph, in which he complacently assures us that they are all correct and unanswerable.

The validity of these principles will be universally recognized as self eviden t. Their applicability, as fundamental tests of truth, to our preent inquiries, is equally manifest and undeniable. Their validity has been universally acknowledged by Christians, in reference to all miraculous attestations of the claims of Christianity to a Divine origin and authority.

On the several propositions discussed in this chapter, Professor Jahan founds his argument. In an important sense they constitute the law by which this mock trial of Spiritualism is regulated. These are the "principles" which are said to "be univer. sally recognized as self-evident." Is it not rather "self-evident" that they are all false? If " their validity has been universally acknow ledged by Christians," it follows that a cordial acceptance of these

principles "as fundamental tests of truth" is one of the conspicuous signs whereby Christians may hereafter be known and distin

DUAL CHARACTER OF BOOKS.

SINCE the general introduction of the new philosophy, it has been admitted by the best minds that many books have a dual character not known at the time of inditing them, even to their authors; others by intuition are so constructed. Thus we find the story of Sam Slick may be read, either as a mere Yankee story, or as a most erudite work on Political Economy ; for no essay ever produced more fully elucidates the phases of individual character consequent upon colonial governments as off-shoots of monarchies, than does Sam Slick, as represented by the blue noses ; while the power of observation which takes the place of education with the peddler, is equally the consequence of republican institutions. Nor does the contrast rest here, for the judicature of Canada, and the causes of these differences, are fully set forth and hassingly

Many histories have this dual character, for while they portray the facts they also give an intuitive discussion of the causes. Truthful history is seldom found without this peculiarity.

With the Bible this truth is pre-eminently observable, and any well educated Deist who reads the Bible and afterwards becomes converted to Christianity, will, when reading the Bible again, discover that the evident beauties and instructions which duty to abandon all temporal duties, and devote themselves to that task then appear palpable on its face, were overlooked at his former readings. Throughout we find the Scriptures so constructed as as to give new thoughts and truths at every reading subsequent to new phases of progression.

This must be true of all inspired writings, or they would lose their usefulness in a single generation, instead of presenting new beauties to progressed readers. Who can read Swedenborg sectarianism of the day, were disposed to make war on all religious forms and ceremonies; and it was something of a task for them to learn without perceiving that much of his writings has only been un- that John Knox was not the wisest man in the world, when he tore derstood within the last century? Mental philosophy has occupied the students of Germany more than those of other nations, and many thousands of words added to their language, register the truth that a corresponding number of ideas consequent upon progression in this science, may now of a great inequality of wealth, of power, of position and of social conhave expression ; and these new thoughts were born with the dition among mankind, have deemed there was no redress but in a com. corresponding words to express them.

All this we offer as a prelude to a truth with which we are strongly impressed in relation to the Poems of T. L. Harris, and more conclusively its dual character, until we now see and know performing its task, and they are learning that it is no merit with them it to be one of the best and most didactic instructors to the true Christian and believer in spiritual truths.

We may possibly be better understood by the following proposition, viz: suppose the title page to be removed from several among our fellows-blessing them that curse us, doing good to them

been attempted-that a few only of the general truths have been given which may yet flow from the exhaustless store-house of the Spirit-world, I shall be with you by the last of October, but whether we meet and that the intelligence which is directing this mighty work is pausing in its revelations until man can, by realizing the existence of spiritual intercourse, be fitted to receive them.

This fact comes to us from numerous sources, and it has been to the most judicious, long a source of deep regret, that so many in their haste have jumped at conclusions before the teachings could be finished, and thus substituted their own imaginings for the truth as it is in God. But much as we may lament this, how can it be avoided, so long as the instruments used are of necessity imperfect, and give to others as imperfect as themselves that which has unavoidably thus a taint of earthly imperfection? It is unhappily true that thus it is, that much which Spiritualism would teach has been perverted. But is it sound philosopby thence to infer that nothing good can flow from it ? that because the ignorant and uninstructed are used as instruments, thence to declare that no good can come out of Nazareth? That because some believer misunderstand the teachings, therefore the teachings are wrong?

May we pronounce the mission of Jesus a fallacy because one believer betrayed him and another denied him? Was the mission of the Apostles to give of the spirit by laying on of hands, an error, because one of their followers offered money for the gift ? May we denounce the decalogue because the Sadducce deemed it lawful to bear false witness for his neighbor, and unlawful only when it was against him? May we turn with scorn from the Christian religion, because within the last eighteen hundred years, fools and fanatics have at times perverted or misconceived its holy teachings?

Yet such, unhappily, is the rule by which the superficial observer measres our faith. And the fault is not entirely his ; we are ourselves somewhat to blame for this, and it becomes us to beware how, by our inconsiderate haste, we give ground for this grievous misunderstanding of us. I have seen men-and women, too-who, on being told to give to the world, without fear, the truths revealed to them, have deemed if their alone; and I have had it urged upon me by some over-carnest zealots that because I could speak and write, therefore I should abandon my profession and my family, and surrender myself entirely to the work of preaching the new faith. It took time to enable those people to understand that our religion was one that entered into every act of life, and tended only to make us careful to perform every temporal duly. So, too, I have seen those who on being taught that there were errors in the

So. too, I have met with those who, being taught to abhor the domination of a religious hierarchy, could find no refuge but in a hostility to all order or religious government, and it would require time and perhaps experience to teach them that anarchy is ever the legitimate parent of despotism.

So, too, I have encountered those who, lamenting the injurious effects munity of property, and they have had to try the experiment before they could learn that such a state of things is utterly incompatible with man's nature, and in conflict with his duty to his fellow.

And I have heard and read of those who, on being taught the fundamental principles of Spiritualism, to love God and our neighbor as ourselves-ave, better than ourselves-have honestly deemed themselves obedient to the Divine command when they yielded rather to the animal than to the spiritual impulse of affection. With such, to learn their error. would doubtless be a work of time; but even with them time is to love that which is attractive to them, but that obedience to the command consists in loving that which is repulsive-not mercly in loving

The speaker sincercly desired to see more persons take part in them. Many with whom he had been in the habit of con- TELEGRAPH respecting the death of a gentleman in Newport, R. I. He versing, had facts in their possession, which he knew would be very said he knew it to be true. He likewise related some facts connected interesting to all present, and he carnestly entreated such persons to with his own experience, which, in substance, have also recently appeared make it a matter of duty, to relate those facts before the meetings. He again recommended the exercise of charity, and urged all to avoid that it is worse than useless to attempt to deceive Spirits. Mr. G. was anything that might be construed into an attack upon existing institutions, or upon individuals, since there can be no true progress in relation to Spiritualism, or any other subject, so long as denunciations are indulged in.

DR. WARNER then referred to what he considered an interesting subject, which was brought before the Conference on the Sunday previous, him more anxious than he otherwise would be, to convince his friends in relation to the communication of intelligence by Spirits, independent of the truth, and he knew that Spiritualism has made him a better of the medium, or any other person in the circle. Intelligence from California proved and have been unable to decide, from the facts of their own experience. whether there is or is not such a thing as independent spiritual communication. To such he would say "go on with your investigations." When he himself arrived at that point, he still kept on, until he experienced satisfactory evidence on the subject. He was, like most others, exceedingly skeptical at first, but considered it his duty to account, upon known principles, for all the facts that presented themselves to his mind ; and consequently he resisted the spiritual hypoth- ful communications may be received from Spirits, without being affected esis until he experienced facis that transcended any known principles by the mind of any person in the form. The next impression he had respecting it was, that it was some kind of sensation from the body, not understood ; but of discussing reformatory subjects ; but owing to the want of courtesy when he found there was intelligence connected with it, he coucluded it and a lack of interest on the part of some members, he, with others was a voluntary or involuntry intelligence from the mind of the medium or some other member of the circle ; so he demanded as a test, that the attended the meetings of the Spiritualists at Stuyvesant Institute, manifestations should occur in his own room, with his door locked, and where he had heard persons who had been Infidels, with no hope of a with nobody in the room but himself, reasoning that if the communicating power was Spirits, they could as well produce the manifestations they had become convinced of the immortality of the soul, and that in his room, with no one present but himself, as with a medium. Facts and Remarks.

CASES OF PROVIDENCE.-Some three weeks ago we took occasion to refer, in proof of one phase of Spiritualism, to the experience of Rev. Wm. Huntington, as related in his auto-biography entitled, " The Bank of Faith." For the purpose of exhibiting further specimens of the testimony in favor of Spiritualism, which may be gleaned from the experience of our opponents, as well as to show that demonstrated instances of spiritual or divine guardianship are by no means confined to the present or to ancient times, we are induced to add the following from the umerous analogous cases in Mr. Huntington's experience. He one time borrowed a guinea of a man, promising to pay him on a certain evening, when the man was to call for the money. In his destitution of all resources, Mr. H. prayed in undoubling faith that the money might be furnished him in time to pay the debt. On the day of the evening when the money would become due, he made a journey, and preached, not doubting that he would return with the sum required-especially as an interior voice seemed continually to say to him, "Faith is the substance of things hoped for." He, however, returned home without the money, and was in great perplexity to know why his interior promises had not been fulfilled. Still the inner voice persisted in repeating "Faith is the substance of things hoped for." The gentleman who oaned him the guinea soon came in, and just as Mr. H. was going to apologize for not having the money to pay, the gentleman said, "I come to desire you not to think of paying the guinea, for I have made you a present of it." Thus, without his knowing it, the guinea had been given to him in the heart of his creditor, who took this means to pay in temporal things for the more valuable spiritual treasures he had received from Mr. H.

ANOTHER CASE .- At another time Mr. H. was traveling on foot, and was out of money, when he felt a strong interior impulse to tarn off from the foot-path in which he was walking, to a wagon road, though the walking there was not near so good. He obeyed the monition, and had not been walking in the wagon road more than half a minute when he found lying in the road a sum of money sufficient to supply his wants during the journey.

A THIRD CASE .-- Mr. H.'s wife once fell sick, and her nurse, on coming to the house, soon discovered that they had no tea. She reported the fact to Mrs. H., who said, as by an interior prompting, " Hang on the kettle." "That would be of no use," said the nurse, "as there is no tea." "Hang on the kettle," repeated Mrs. H., "and we'll see." The nurse obeyed the order and before the kettle boiled, a neighboring woman, who had never been in the house, and had scarcely ever spoken to the family before, came in and brought them a quantity of tea. When orthodoxy sneers at Spiritualism, it should know that it is directing the shafts of its ridicule against facts like the foregoing which have occurred among the members of its own household.

PHYSICAL MANIFESTATIONS .- Mons. Jos. Barthet, known to our readers by his accounts published some months ago, of the sudden and mysterious appearance of books, medals, pictures, etc., in the hands of a medium in New Orleans, has recently been traveling north, observing the spiritual phenomena in the presence of diverse mediums. He relates some of the results of his investigations in the French depart ment of the New Orleans Bee, from which we translate and condense the following particulars: At the house of Mr. Brooks, in Buffalo, a large piano sat with the key-board facing the fire-place. Against the wall, over the fireplace, was a clock, the door of which was closed. Miss Brooks, the medium, sat with her back against the hither side of the in strument, and facing the spectators in the room. Though the stance was in

darkness, it is certain, says Mons. Barthet, that Miss Brooks could not have reached the strings or keys of the piano, much less could she have reached the clock against the wall above it ; and it is also certain that she did not move from her seat during the performances, as she was either talking or singing all the while, and a change in her position would have been instantly perceived. While she was singing, the piano played an accompaniment. Frequently the keys would peal forth a sound as though a finger or small stick had been suddenly swept across them almost the entire range of the octaves. Questions were answered by a lifting of one end of the piano, and striking it rapidly and heavily on the floor. The bell of the clock was also used to rap out the answers giving different sounds, the vibrations being now clear, and now deadened as if the bell were in contact with a foreign body ; and the ticking of the clock would now cease and now commence again, as if the hand of an intelligent agent were meddling with the pendulum. The in visible performer having rapped out "good night," a light was brought and the clock was found in its place with the door closed; the top of the piano was shut down, whereas it had been up before, and the keys were all out of their places, their ends forming a zig zag line by project ing one beyond another. At Mr. Davenport's, in Buffalo, at Mr. Maxwell's, in Philadelphia, and at Mr. Conklin's, in New York. Mons Bartnet witnessed an unificatations aqually wonderful, but these we omit for the sake of brevity.

PROVIDENCE IN SMALLEST THINGS .- Why not a providence, either immediately from the Divine Spirit, or mediately through angels, spirits, and men, in smallest as well as greatest things, seeing that smallest and greatest created things are equally inferior to the Infinite? Judge upon this subject from facts like the following: An intelligent and religiously disposed man with whom the writer is thoroughly acquainted, while in circumstances of pecuniary depression, found it necessary to remove his family and furniture to another residence. Not having sufficient money to pay the cartage of all his furniture, he concluded to move the lighter articles by hand, and for this purpose he employed a small two wheeled hand-wagon such as are used to carry young children along the streets. The vehicle was so fragile as to seem in constant danger of breaking under the somewhat heavy loads which it was found ecessary to place upon it; but the man knowing that its services were highly necessary to him for the performance of a certain amount of labor, kept interiorly and trustingly praying that it might hold out until its work was done. Several times its wheels creaked and bent and seemed on the point of breaking, but still they continued to perform their office. The last load was piled upon the fragile yebicle conveyed to its destination, and discharged. The man then to'd his little boy to bring in the wagon, but the boy, on going to it, cried out, "The wagon is broken, father." On examination it was found that the rim of one of the wheels was smashed in ; in such a way that it must have been done at the very last revolution of the wheel, as the wheel could not have made another revolution without jolting and thus revealing what had bappened to it. A power similar to that which moves tables and other physical bodies seemed to have held the particles of that little wheel together until the very second that it had performed its uses, and then withdrew and permited it to break !

TRANQUILLITY.

A POEM FROM THE INNER LIFE. The following poem is especially commended to our readers for the elevating, purifying, and tranquillizing sentiments it contains.

A LAY I would sing of Tranquillity's mission, > From heaven translated to earth's weary breast. Where it germs the first hope of a better condition, When Humanity learns the full meaning of rest. I would sing of its source in the Infinite Man; I would tell how it phases and sparkles with joy

As it bursts like the rainbow, impatient to span The great arch of life's endless and deathless employ.

I would tell the poor sluggard, nerve-palsied and dead, To each impulse of joy from activity shed, Brooding over despair till life ebbs by degrees Through each vampired vein sapped by sensuous ease, That no indolent sits in the halls of repose, That no parasite vine round her bright altar grows. As I long to outpour I seem barren of thought, Yet I feel that wild measures are unto me brought From some unlettered page. I am conscious of laws Interweaving that mind with my own, whence it draws All of grandeur and beauty, of hope and desire, All of upward and onward resolve and aspire, Every movement of heart, every movement of brain, Every effort that seeks some foul wrong to restrain, Every sense that uphcaves in my innermost soul With a throb for the ills which it can not control.

But I may not full utter-man only can feel, Whilst his spirit is fettered and bound in its frame. I receive inspiration, but cannot reveal What it breathes, what it tells, or the fount whence it came How it teaches of rest in the movement of brain, How it teaches of rest in activity's glow. How it teaches of rest in the endless refrain

Of endeavor when life shall with love overflow. I am chained, I am bound by an outward constraint; I may feel, I may know, but I never can paint-I can never unfold to the outer world's grasp What the Spirit alone through its yearnings can clasp ; How that centre unfolds both beginning and end; How that centres all strength unto outermosts lend; How that all things created are bound by a law. From their centres all strength and all soul-life to draw : How in man throes of conscience are radii sent From love-centres to quicken and mould each intent : How all effort out-flowing from innermost will Represents but the law of the fountain and rill; How the Infinite Heart and the Infinite Brain Through this law reaches life in the outermost plane, Whilst degrees are unfoldings of love in its stage Of progression from youth to the flood-tide of age; How each thought that flows out through a channel of use Is an angel sent down to correct an abuse, From that love-breathing Center whose Infinite Will Measures out till the thirsting heart drinks to its fill. An Angel dwells ever in God's holy light,

(So I read in the Book-in that record of time.) An Angel is filled with all power and might (So I read in the Book-in that writing sublime.) An Angel is blessed with that infinite peace That surpasseth all knowledge (so readeth the Book) And his joys never end but forever increase

As the river swells out from the onflowing brook. What the life of an Angel? my spirit here cries,

What the jcy of a life 'midst God's own harmonies? What the scenes of enchantment through which they must pass Whose free'd souls reflect him as an imaging glass? Do they toil with the brow? do they toil with the hand? Do they dig? do they delve? do they uphcave the land? Do they sow? do they reap? do they plant in the spring? Do they sickle the grain for the fall harvesting? Do they audibly utter the pulses of love Unto souls that reply with the notes of the dove? Do they effort their thoughts? do they outwork each hope ? Does each flow'ret of love to a life blossom ope ? Or does action stagnate in a sensuous dream? Is a ripple unknown on life's currentless stream? Here I pause, for my spirit has lost the refrain, And through prayer must it find inspiration again. All of joy (as I learn from the Spirit returning) All of joy in yon heaven for which man is yearning ; All of joy in those mansions where Angels reside Wells from love gushing out in an unebbing tide From that Heart of all hearts, from that Infinite Fount Whose pulsations of mercy no time-heats can count Whose life is forgiving, creating, renewing, Unfolding, uplifting, supporting, enduring, Into all who receive him implanting his soul Till man's self-hood is conquered and yields its control When the Angels receive him they bear him away With their swift-winged feet to the confines of day, Where Humanity dwells in the borders of Time Darkened out from his light by the shadows of crime. There arrived, they unfold him with soft winning grace, In revealment at times of an angelic face-In revealment at times through a mystical spell Binding heart unto heart as tongue never can tell : In revealment at times through a musical strain : In the dew-drop, the hare-bell, the summer's soft rain ; In the details of life ; yet far nobler than all, In the tear that wipes out a frail brother's worst fall. Such is life in yon Heaven where Angels reside, And where peace is release from all self-hood and pride : Where all joy is in giving, supporting, sustaining By means of that life they are evermore draining From his Heart of hearts, from his Mind of minds, From his Soul of souls which no weariness finds In supporting, sustaining, uplifting, releasing, Renewing, refreshing, advancing, increasing, Till all effort is lost in the sense of delight Streaming down through the soul with an intenser light. As it owns the great law of obedience and knows That Tranquillity springs from the self-hood's repose. In the strain I have sung in this inspired song I have unfolded truths which no jest can destroy ; I have sung of true rest as we journey along Gathered only in effort and ceasless employ-Not of energies steeped in the senseless desire Of upbuilding the self-hood, or pampering lust, But in giving up self for a higher aspire In receiving God's strength in return for our trust. When this destiny comes to the fettered and bound ; When this triumph of faith over self-hood is found ; When this truth is implanted in man's weary breast, That from God is creation, from him alone rest; When the soul is uplifted to see the great law Of God working through man as it never yet saw; When the mind is released from all pressure of care By the conscious perception that Jesus is there, Moulding every intent of the heart and the brain-Then shall peace and delight come to usward again, And the mind shall expand with new vigor of thought, And the heart shall run over with feelings unsought, And the cry shall come up from the sense-darkened land, That the day of renewal is nearly at hand, When old earth from its throes like that storm-driven bird. Bearing back the glad tidings that land had appeared, Shall return to the Eden from whence it first came, With the olive branch wreathing its glorified name !

LIFE IN THE SPHERES.

WE are indebted to a dear friend who resides in Jackson, Mich., for the following communication, received a few weeks since by a circle of Spiritualists in that place. The invisible Spirit-author claimed to be Lord Byron. The communication reads well, but the critics will probably find it difficult to accept it as an emanation from the great Poet.-[ED.

In human life

Developed as the great Creator wills, There are almost as many phases as Would need the sands upon the ocean's shore To number, and each phase must be described Before the history of life within The spheres of being manifold, shall be Entirely written! And the first of spheres Is that of mortals, as they live and act Upon the earth, material and gross, You now inhabit.

Then they part from earth (As earth is understood by mortal men), Not part indeed, but leave the form behind ; Lay it aside, and take the better shape Which angels wear. as mortals often dream And poets seem to see.

And then again, Successive changes come, as came the first, Deaths follow deaths, and from the lower spheres To higher realms, and aims the life doth rise With each succeeding change. But, mortal, know! No death is feared except the first! but Hope Instead points to the hour of change, as that Of more ecstatic life. Far in the spheres Beyond the mortal, there is felt and known The distant glimpse and radiance which comes From the superior to the lesser light-Life in the spheres is governed much and feels The mighty influence of such facts as these, As in the mortal life the hearts of some Devote to their Creator, constant rise O'er each adversity.

Thou dreamer! when Thon dreamest wildly and then dost dismiss As all irrational thy dreams, 'tis then Thou nearest gain'st a knowledge of the truth, But only in faint glimpses, for there is A use, a purpose, and a meaning in The whole of what thou see'st.

BYRON

JOHN WESLEY A SPIRITUALIST .-- FURTHER EXTRACTS FROM HIS SERMONS. "Is it not their [the Spirits'] first care to minister to our souls ?"-They may assist us in our search after truth, remove many doubts and difficulties, throw light on what was before dark and obscure, and confirm us in the truth after godliness."-" They may warn us of evil in disguise, and place what is good in a clear, strong light."-" They may gently move our will to embrace what is good, and fly from that which is evil."--" They may, many times, quicken our dull affections, increase our holy hope and filial fear, and assist us more ardently to love Him who has first loved us."

"May they not minister also to us, with respect to our-bodies, in a thousand ways which we do not understand ?"-" They may prevent our falling into many dangers which we are not sensible of, and may deliver us out of many others, though we know not whence our deliverance comes."---" When a violent disease, supposed incurable, is totally and suddenly removed, it is by no means improbable, that this is effected by the ministry of an angel." "And perhaps it is owing to the same cause that a remedy is unaccountably suggested either to the sick person, or some one attending upon him, by which he is entirely cured."

"A pious writer observes, there is a threefold CINCLE of divine Providence. The outermost circle includes all the sons of men. He causeth his sun to rise upon all. With an interior CIRCLE, he encompasses the whole visible Christian church ; all that name the name of Christ, all that worship God in SPIRIT and in truth."--- "Whoever is not happy, yea happy in God, is not a Christian."-Is not God a spirit ? and therefore to be 'worshiped in spirit and in truth ?'

"'I saw a new heaven and a new earth.'-' He that sat upon the throne said,-Behold, I make all things new." "-" Every part of the earth will naturally produce whatever its inhabitants want : or all mankind will procure what the whole earth affords, by a much easier and readier conveyance. For all the inhabitants of the earth, our Lord informs us, will then be equal to angels; on a level with them in swiftness as well as strength ; so that they can, quick as thought, transport themselves, or whatever they want, from one side of the globe to the other."-"For all the earth shall be a more beautiful paradise than Adam ever saw."---" He that sitteth upon the throne will soon change the face of all things, and give a demonstrative proof to all his crealures, that " " his mercy is over all his works." "The horrid state of things which at present obtains, will soon be at an end. On the new earth, no creature will kill, or hurt or give pain to any other. The scorpion will have no poisonous sting; the adder no venomous teeth. The lion will have no claws to tear the lamb, no teeth to grind his flesh and bones. Nay, no creature, no beast, bird, or fish, will have any inclination to hurt any other : for crucity will be far away, and savageness and fierceness be forgotten. So that violence shall be heard no more, neither wasting or destruction seen on the face of the earth. The wolf shall dwell with the lamb, and the leopard shall lie down with the kid: they shall not hurt nor destroy, from the rising of the sun to the going down of the same. But the most glorious of all will be the change which then will take place on the poor, sinful, miserable children of men." CHRISTIAN.

his skepticism.

GRAPH, under this title-" DEATH CORRECTLY ANNOUNCED BY SPIRITS." Dr. HALLOCK narrated a circumstance illustrative of the manner in

which truth explained itself, and in evidence of genuine Spirit-communication. On one day of the previous week, a gentleman from west of Iowa city called at his house, where the subject of Spiritualism was introduced. Although his western friend belonged to the Methodist Monday evening he requested Dr. Hallock to go with him where he picture in our next issue. could witness some manifestations. Feeling impressed that the man

would get some satisfactory evidence on the subject, Dr. H. went with Stuyvesant Institute.

A STRANGER said that five years since, two gentlemen went to Calithe state of their likenesses at the time they were obliterated, was in-

that these two gentlemen expired at the time their likeness were obliterated.

When the speaker commenced the investigation of spiritual manifestations, he did so more for amusement than anything else; but he soon discovered that it was a subject which deserved to be treated with seriousness. He related with considerable feeling, facts with reference to a deceased grand-ohild, which were calculated to prove that truth-

RESCUED FROM BEING BURIED ALIVE .- Rev. T. L. Harris, while in New Orleans, in February, 1854, was requested to attend the funeral of Mr. Augustus Wang. After promising compliance with the request a powerful spiritual influence came upon him, and he was impressed to say that the Spirit of Mr. Wang was still connected with the external form, and in a degree conscious of what was going on. He requested that the funeral of Mr. W. should be deferred, telling his friend that at the end of a day and a half the spirit would be entirely free from the form, previous to which, however, he would probably not make many manifestations of life, through the body. These sayings being communi cated to Mr. W.'s family, they took him from his coffin and laid him in bed, during which process he discovered faint though distinct signs of life. Mr. Harris had told a lady to take Mr. W. by the hand and tell him that he (Mr. H.) was conscious that he had not left the body, and would see to it that he was not buried alive. The lady did 20, whereupon Mr. W. distinctly pressed her hand. He lay from that morning until the nex day at two o'clock, P. U., when Spirits announced that he had left the body, and marks of decomposition soon after ensued.

CURIOUS WARNING .-- We are permitted to glean the following partic ulars from a communication written by a lady (Mrs. M.) to Mr. L. N Fowler of this city. The lady wishes her name suppressed in any pub lication which may be made of the facts herein detailed, but Mr. Fowler assures us that her veracity may be strictly relied upon. She relates that as she was one time riding on horseback to meeting, she was stronly impressed that she was in imminent danger, and must dismount without delay. As her horse, however, was a very gentle one, and the weather was cold and the ground covered with snow, she concluded to still more emphatic form, and this time she would have obeyed had not

some persons been coming on behind her who would have laughed at her supposed folly. She however took her foot out of the stirrup to

ensure greater safety, when the horse immediately and unaccountably began to spring violently from one side of the road to the other, and soon dashed her from his back down a steep descent against a stump and knocked her senseless, and afterward she was so ill as to nearly mounted, the accident would have been avoided.

SPIRITUALISM AND ITS SEQUENCES.

MESSRS. EDITORS :- Although popular ministers and the popular press generally refrain from touching upon the subject of Spiritualism, or, if anything is said, only slur against it as if it were too supremely absurd to be worthy of notice, yet it seems to be attracting the attention of every intelligent person throughout this part of the country, and obtaining favor accordingly.

I have never witnessed the Spirit performances, such as the "rappings," "tippings," etc. Who does not believe that such things are done, must believe "all men are liars." But I have, with a mind unprejudiced, and although somewhat skeptical, open to conviction, studied well its teachings; and my opinion of it is, that while Spiritualism is without the egregionsly absurd inconsistencies, the superstitions and pernicious conceptions of future existence, and the weak, indiscriminate moral teachings of many of the now popular theological doctrines, it endorses every pure and holy sentiment, and comprises every reasonable dogma that they contain ; and it is in harmony with itself and with Nature. It teaches us ourselves, our relations to universal Nature, our duties, and our destinies.

I believe that all those who are in search of Truth, whose judgments are unbiased by narrow creeds, and whose minds are unperverted and consciences uncontaminated by contact with the evil influences of this degenerate world, can not fail to appreciate, and will fully embrace, the truly noble, glorious and elevating principles of Spiritualism. Here can be found pure waters, fresh from the Eternal Fountain, wherein to bathe the weary coul and cleanse the sinful heart. bounded. S. H. HERRING,

Mr. Randolph's Lecture in Brookiyn.

P. B. RANDOLPH will deliver a lecture on Wednesday evening, October 10, at the Brooklyn Institute, corner of Concord and Washington streets, Brooklyn. Subject-"The Meaning of Words." This is said to be beyond all question the best lecture ever given by this gentleman, and is the last but one to be given by him hereabouts, as he is to leave shortly on a lecturieg tour East and West. Our friends abroad who have not heard Mr. R., and may desire to, may have that pleasure by addressing a line to this office. The peculiar philosophy developed by Mr. R. is well worth consideration, and as a public speaker he stands high in the opinions of thousands who have heard him.

peated to the emperor the following lines, which are a quotation from
a very ancient book that contains a prediction of all the states through
which mankind must pass, from the beginning to the end of time:
'The fox is not of the race of lions ; the lamp has not the brilliancy of
the sun, nor of the moon; the lake can not compare with the sea, nor
the little hill with the lofty mountain. The atmosphere of prayer dif-
fasing itself over the surface of the earth, shedding its fertilizing dews
upon the germs of happiness, and divine blessings causing everywhere
maivelous change, ail people shall advance in the path that leads to resto-
ration."

The book from which this passage is quoted, is an object of the deepest veneration among the people of the castern part of Asia. Formerly it We beg our friends not to deem it abrupt or unkind in us if the paper is discontinued did not exist in their languages ; " thus it was inaccessible to us," say the since our mailing clerk keeps the books in accordance with the general system we have Thibetians. But by the command of Kien-long it was translated into adopted, and can exercise no discretion. The proprietors never know, except by Chinese, and from the Chinese into the Mandchou tongue. Afterward it was trauslated into the Thibetian by the two native doctors, Tobka-Cheriyedouze and Ti-Kynirigatamby: and again into the Mongolian, by Rabimba-bivadzeioude. "A benefactor of mankind," says a Chinese author, named Hou-lin, "devoted to the cause of religion, and anxious for the spread of the holy doctrines, not only gave his time and attention to this object, but also contributed means sufficient to print the book in these four languages : the Chinese, the Mandchou, the Mongolian and the Thibetian. He dedicated this religious work, thus piety rendered illustrious. The religion of Buddha, that treasure to humanity, shall live through all time, spreading far and wide its benign influence, driving war and pestilence before it, and causing the voice of the famishing to be heard no more."

In this same book we found an account of the creation in six days; of the fall of man, together with a prediction of his future restoration. What is there related concerning the Saviour or Redcemer under the name of the incarnated Buddha, is often identical with the history of Christ .- The Crisis.

HOLY LIFE .- The beauty of holy life constitutes the most eloquent and effective persuasive to religion which one human being can address to another. We have many ways of doing good to our fellow-creatures, but none so efficacious as leading a virtuous, upright, and well ordered life. There is an energy of moral sussion in a good man's life, passing the highest efforts of the orator's genius. The scen, but silent beauty of holiness speaks more eloquently of God, and duty, than the tongue of men and angels. Let parents remember this. The best inheritance a parent can bequeath a child is a virtuous example, a legacy of hallowed remembrance and associations. The beauty of holiness, beaming through the life of a loved relative or friend, is more effectual to strengthen such as do stand in virtue's ways, and raise up those that are bowed, than precept, command, entreaty or warning. Christianity itself. I believe, owes by far the greater part of its moral power, not to the precepts or parables of Christ, but to his character. The beauty of that holiness which is enshrined in the four brief biographies of the Man of Nazereth, has done more, and will do more, to regenerate the world, and bring it to an everlasting righteousness, than all other agencies put together. It has done more to spread his religion in the world, than all that has ever been preached or written on the evidences of Christianity.

An Indian legend has it that on a quiet full-moon night the Great Spirit led the wicked ones of a certain tribe thither, and when they saw the glorious beauvy of the crystal water, they thought to bathe themselves in the moon-kissed fountain, but sank to rise no more. "There!" said Strange. "I'd rather sing that hymn than own Amrica. I'll trust the Lord to take care of my wife and children." He continued singing and preaching, and preaching and singing ; and the Lord, said the lecturer, did take care of him, and his children after him.
