The "Truth" as presented was formulated by excarnated intelligences from the earth plain to the Fourth Assension of progression in the world of spirit, up to the highest and most exalted souls in the Dominions of the Deity. The book is an educator of all souls incarnate and excarnate suffering in the lower states of servitude in spirit life, and a wonderful preentation of the value and truth of man's future state of existence and progression after the change called death-explaining why there is no death. It is a clear-cut portrayel in all its simplicity of the master of truth.

The center of the design represents a human face, the highest type of in telligence; the face is encircled by the band of darkness symbolizing the ig telligence: the face is encircled by the band of darkness symbolizing the light norance and superstition of humanity: this is broken by the rays of light from the center of intelligence which pierce the darkness and join the light of the golden leaves beyond. Each leaf symbolizes one of the principles of nature on which progression is based. This design is set in the center of a pure white field, symbolizing purity, while its position in the center of the square is a symbol of justice.
