## "PSYCHIANA"

(The Teaching Which Is Bringing New Life to a Spiritually Dead World)

### Lesson No. 20

By

DR. FRANK B. ROBINSON

Fellow American Society Psychical Research; Author "SHALL WE KNOW EACH OTHER BEYOND THE TOMB?" "CRUCIFIED GODS GALORE," "LIFE STORY OF FRANK B. ROBINSON," "WHAT GOD REALLY IS," "IS THE STORY OF JESUS CHRIST FACT OR FICTION," "GLEAMS OVER THE HORIZON" "YE MEN OF ATHENS," "BLOOD ON THE TAIL OF A PIG," and Founder of "PSYCHIANA."

Dear Friend and Fellow-Student:

I am sorry that our journey together through this remarkable Spiritual Realm must come to an end. All things in this material world come to an end sooner or later, and I assure you that it is with a feeling of intense regret that I leave you for the time being. Our journey and our associations together have been pleasant. The thousands of students all over the world who have studied under me have been a source of continual joy. Many of them have helped me more than they realize and judging by the thousands of letters I have received, I perhaps have been able to be of a little assistance to them too.

No one realizes any more than I do the importance and the sacred responsibility of having thousands of people all over the world depending absolutely on me for proper guidance. The confidence displayed by these thousands of students will never be violated. I have never given them wrong information as far as I know. I do not claim to be perfect, nor do I claim to be possessed of any supernatural power of any kind. I do claim that I might, perhaps, through years of earnest search have received a picture of Spiritual Truth which could not be obtained by others who would give less effort to their search than I gave, and yet I am more than ever convinced that Spiritual Law is natural law. I am more than ever convinced that only our ignorance of the great God-Realm prevents our making use of the marvelous Spiritual Power this Realm contains. There is nothing supernatural in the universe nor is there anything miraculous in the universe. In my private study are files after files literally teeming with letters received from Students. These letters state in unmistakable language the actual material benefits which have been received through this Course of study with me. Among those letters are to be found reports of remarkable cures. There may be found in those files happenings which perhaps might be called miraculous by those who do not understand Spiritual Law. But, I still contend that no matter how unusual many of these cases are, they still are but perfectly natural when viewed in the light of the Power lying inherent in the great Realm of God.

Essentially there is first of all a spiritual being, and the part of you that really matters is invisible. This invisible part of you is a very definite part of the great Life Principle which fills all space and without which no created thing could

exist at all. Now being a part of the invisible Life Principle, you must see that this part of you which really is the true and the real part of you must of necessity have at its disposal all the power and wisdom of the Realm of God. Yes, and more than that—it must have, being a part of this Spiritual Realm, all of the power for actual manifestation that is contained in the completeness of this Great God-Law itself.

Let me illustrate a little further, if I can. Try to imagine a large reservoir filled with water. The reservoir supplies a large city with water. Coming direct from the reservoir are the large mains, and these feed smaller mains, which in turn feed the pipes into thousands of houses. There is only one body of water and that is in the reservoir, perhaps miles away. Now when you turn the faucet, the water flows. This is the same identical water stored in the vast reservoir and more than that, there is a direct connection of water between your faucet and the great body of water in the reservoir miles away. If that connection is obstructed, the water will not flow to you. You can safely see also that all the power of the water in the reservoir is directly connected with the water in your house. If someone colors the water in the reservoir miles away, the water coming to you in your home will be colored, proving, of course, that there exists a permanent water connection between the source of the water supply and the outlet of the water supply which is in your home. You will instantly grasp this illustration, and if you will also look beyond the Spiritual Realm in the same light you will see at what I am driving.

We know the invisible, creative, cosmic Realm of God exists. We also know that you live as a direct evidence of, and through the Power of this great, unseen cosmic God-Law. Now, this being a fact, do you not see that the unseen part of you which is the real part, must be in definite, permanent and living connection with the great reservoir of Spiritual Power from which you draw your life? If it be a fact and if it is a fact that the Power we call God is the Creative-Law which in some way, at some time or other first brought the Life Spirit to this earth, and which presence caused it to manifest on this earth, it must follow that you yourself, no matter who you may be, must be in definite presence and living connection with the greatest Power, which the Spiritual Realm contains. This is a staggering thought and yet it is the truth of life as it exists. It is perfectly true that you cannot open the faucet in your house and receive as much water as can the fire hydrant on the next corner, but that is simply because your pipe is smaller, consequently the pressure is cut down. But the water in the hydrant and the water in your house both come from the same reservoir. One comes with force enough to throw it over the top of a building and the other comes with force enough to fill your bathtub. The size of the pipe, or rather, the size of the outlet limits the volume of water and the volume of pressure passing through that pipe. The same identical thing applies in the Spiritual Realm. If you are practically impotent as far as Spiritual Power goes, then you may depend upon it that your pipe is too small. Your outlet is limited and before great Spiritual Power can manifest you must put in a bigger pipe. You must enlarge the outlet.

Usually we hear a man, whom thousands of people follow, called a tremendous Spiritual Power in the world, and we look at this man and say, "My, if I only had the power he has." Do you not see that this man would have no Spiritual Power at all or very little unless the outlet were large, and, as in the case of water, there can be no vacuum pipe? **JUST AS FAST AS THE WATER RUNS OUT, AN UNLIMITED SUPPLY IS DIRECTLY CONNECTED WITH**

## IT AND THE FASTER IT RUNS OUT THE GREATER THE VOLUME OF SUPPLY.

You will see this illustration, I know, and I want you to live your life in the full recognition of the overwhelming and majestic power which can flow to you in unlimited measure and which will flow to you the very moment you open the faucet and let it come. Many of your ideas, especially in regard to religion have been upset in your studies with me and the fundamental principle of so-called New Psychology has been exploded. All the New Psychology had to offer was based on the "subconscious mind." We have seen, however, that there is no such thing as a "subconscious mind." We have also seen that there is throughout all space a far more potent and dynamic power, the manifestations of which have been erroneously credited to this "subconscious mind."

As we have travelled along on this little journey together, we have seen the great cosmic God Presence through which every work has been done. I have brought to your attention instances of healing and other instances which have demonstrated the presence of a Power, which Power is universal and which Power must be, from the very nature of it, at the disposal of every normal man or woman in existence. Jesus, the prophet, used this Power if he ever used any power at all, for there can be no Power greater than the Power of the great God-Law. Certainly, this Galilean carpenter had no monopoly whatever on this Power, for, if he did, then you and I would not be able to use it today. Therefore, if the Power about which we have learned is the very same Power this Nazarene used, then it must be a fact that if we understand this Spiritual Power as he understood it, we should be able to duplicate the works that he did. Many things were credited to him, which things he never did, but I am talking here only about those things which he actually did. We have seen further that the theory of any power lying within is utterly at variance with the facts as they exist, and quite to the contrary we have discovered that instead of the Power coming from "within" it comes from WITHOUT.

### THE GREAT WITHOUT

It is easily understood how the people of Christ's time utterly missed the directness of the message he brought, and it is easy for me to understand how the simplicity of the message went a thousand miles over their heads. We have seen that the mighty God-Law has ever been at the disposal of every created soul day and night. You could not remove the presence of the God-Law from this world for one instant without all life on it becoming immediately DEATH, and remember DEATH is but the absence of LIFE. All you have to do at any hour of the day or night is to turn to this great Spiritual Realm and there you find it, no matter what the hour may be, and, if it be there, then we may use it, for it would be foolishness to try to conceive of a universal God-Law which could not be found and used always and at any time. We have, also, seen that it is not possible to apply this wisdom, intelligence and Spiritual Power of the God-R Realm to a human life and have things contrary to our highest desires manifest. We have seen that if this great Spiritual Power is needed to bring into manifestation in our lives either health, success or happiness, this Power being God, no one will question its ability to do those very things.

Now, in this Lesson, I am going to take you back into the realm of the cosmic ray. I am doing this because it would be very easy to underestimate the importance of this staggering discovery in its relationship to the great Spiritual God-Law this Course of instruction attempts to disclose. From the very first

moment I heard of the discovery of this marvelous interstellar ray or power, I thought I saw immediately a definite proof that my idea of the God-Law was correct. I might add in passing that long before cosmic rays were heard of, I had written concerning the existence of a Spiritual Power which filled all space and had no limitations whatsoever. The only criticism that I see at this time which might be directed at me would be the criticism that I am attempting to bring the Spiritual Realm of God down to the level of a material thing; but I have told you in this Course of instruction that there is nothing supernatural in the entire universe. I have also told you that if this Spiritual Realm, with whatever God there might be, is so far removed from us that it cannot be contacted until we die, then it cannot be of much use to us now. It is true that I am endeavoring to bring the unseen Spiritual Power of the God-Law within the grasp of every human being, here and now, and that certainly is as it should be; for that would entirely change the picture for every created soul. If you and I were convinced by unimpeachable evidence that there did exist throughout space the Intelligence, the Power and the Wisdom which was the God-intelligence that caused every created thing to be in the first place—if I can convince you of that—then I have brought down and put within your grasp the secret, not only of the universe, but of life itself.

This is exactly what I am doing. Furthermore, I am borne out in my contention by the findings of the world's greatest scientists who have experimented with this marvelous cosmic ray. Let me add here that too much is not yet known about this ray, and I am of the opinion that the scientists before they have finished their investigations will admit with me that this cosmic force, or energy is an intelligent, thinking force or energy. They admit now that it is the cause of every created thing and if that is not bearing me out in what I have written, then I do not know what it is doing.

I received from Dr. Millikan's secretary at the California Institute of Technology, Pasadena, California, four of the latest bulletins on the cosmic ray. One of them is printed by the United States Government and is taken from the Smithsonian Report for 1928. This report was made by R. A. Millikan and G. H. Cameron. I shall refer to that report again a little later in this Lesson. By the way, the publication number of this booklet is No. 2936 and it may be obtained by writing to the United States Government Printing Office at Washington, D. C. I want to impress on my students here the absolute enormity of the possibilities tied up in the discovery of this world of cosmic energy. I see a lot in these discoveries; in fact, I see the solution to life's problems; and I see the startling fact that instead of the answer to these multitudinous problems of life lying in some so-called "heaven" beyond the sky, they lie even at our very doors. No scientific discovery has been made instantly for a long time. We had such discoveries and experiences in Greek and other mythologies, but very few of them have ever sprung full grown out of a human brain. Usually these discoveries creep upon us unawares, and the first thing we know we are using some marvelous power or discovery; at the same time we are unable to state what it is or from where it came. I am just as fully convinced, as I am dictating this to you, that the world is on the threshold of the discovery of a perfectly natural Spiritual Power which, when fully understood and used, will put every natural thing on this earth into man's own hands. It has taken a long time to come to this period of scientific belief; but it is here and as the old, worn, tattered fragments of "supernaturally-revealed" religion have been weighed in the balance and found wanting, men and women have turned their eyes to nature and to life and there they are surely,

although slowly, finding the answer which is an answer that everyone can grasp. Instead of believing every old pagan religious teaching that comes along, men and women are turning their eyes not to the preachers and priests for spiritual enlightenment, but to the psychologists, the scientists and the thinkers. Many of them are willing to admit that everything these religionists tell us about the hereafter may be true, but in the absence of any proof of any kind we do not choose to believe them. Many there are who do not doubt these wonderful stories, but at the same time there can be no possible objection to finding out what science has to say regarding this created scheme of things.

You cannot prove that any of the world's crucified saviors ever had a miraculous birth, supernatural conception, supernatural resurrection, or supernatural ascension into heaven. If you believe that, you must do so by a stretch of the imagination, or by a blind faith. Certainly there never has been adduced the slightest scintilla of evidence that those stories are true. On the other hand, we do know that there does exist a cosmic energy of some sort or other which cosmic energy comes from the interstellar spaces, and when I say "interstellar spaces" I shall ask you to remember that the light from yon stars and yon Milky Way took many thousands of light years to reach this earth; so when I talk about interstellar spaces, I am not talking about a trip to Europe or anything on that order, but I am talking about millions and billions of light years away. Our little minds cannot even comprehend what a light year really is. We know that it is the distance travelled by light in one year; going at the rate of 186,300 miles a second; but when we begin to multiply by thousands and millions, it is slightly beyond the normal mental comprehension of man; but man is even mastering such distances and it is conclusively proved that this cosmic energy does exist through all space and does come from the interstellar regions. The eyes of the scientific world are turned on this discovery, and well they may be, for if my theory be borne out by these scientists—and it is being borne out—then can you not see that, with a fuller understanding of this energy, thoughts which stagger you, the solutions to all Creative Life processes may very easily be in our own hands? Remember, it is only about ten years since German scientists discovered these cosmic rays, although prior to that "penetrating radiations" near the earth's surface were brought to light by McClennan, Rutherford, and their collaborators, who found that the rates of discharge of electroscopes could be very markedly reduced by surrounding them with successive screens of lead several centimeters thick, thereby showing that rays existed in the atmosphere capable of penetrating such thick screens and therefore these rays were appropriately named "penetrating radiations." Active credit for most of the research, however, belongs to Dr. Robert A. Millikan and Dr. Carl D. Anderson, his associate, who, supported by funds from the Carnegie Foundation, have relentlessly and tirelessly investigated these rays and given to us scientific, and therefore provable data concerning this invisible energy. One might call cosmic rays "mysterious force rays" bombarding this world from the interstellar spaces. As Dr. Millikan, at a lecture in the East, recently stated:

"They may be likened to infinitely small machine gun bullets travelling at enormously high rates of speed. Cosmic rays are something like light rays but of very much shorter wave length. For comparison, we may regard the wave lengths of radio broadcasting as the longest in the scale. Next comes the rays of visible and invisible light, infra-red and red, getting shorter and shorter through the different spectrum colors to violet and ultra-violet. X-rays are still shorter in wave length and the gamma rays which are given off by radium have been thought

up to a short time ago to be the shortest of all. But the cosmic rays have a wave length which is much shorter even than gamma rays and infinitely more powerful. The stupendous power of these newly discovered cosmic rays manifests itself in various ways. Some idea of the vast force of these visitor rays from outer cosmic space may be had by comparing them with the gamma rays of radium. Gamma ray particles leave the radium mass with such force and speed that sheet-lead armor several inches thick is required to stop them. Cosmic rays, however, require a lead armor plate sixteen feet thick to stop them. Expressed in volts of electrical energy the power of these new rays is even more startling." Measurements made by Dr. Millikan in his laboratory in Pasadena show cosmic rays to have an energy of one thousand million volts. I shall ask my students, if they can, to try to conceive of this interstellar energy bombarding this earth. An energy of one thousand million volts, so you must not try to tell me that there is no unseen, dynamic force in existence beside which all other forces fade into insignificance; if you do, I shall ask you to show me a more powerful force than this cosmic force which is known to have an energy of these one thousand million volts. I would like my students to lay this Lesson down here and try to realize this stupendous fact. There is just one argument, or one thought, which will come into your mind at this point; that is, if this statement be a fact, then why are we not conscious of such a dynamic power? In answer to that thought or question, let me state that being conscious of anything is merely a matter of having it called to your attention by some means or other. In this Advanced Course of "PSYCHIANA" I have shown you specifically and definitely the existence of the greatest unseen cosmic Power the world has ever known. The little exercises I have given you to do have been designed to show you how to personally contact this force, Power or Spirit. You did not know, perhaps, when you were doing these exercises, their extreme importance; but when you recognized the fact that you had been projecting your thoughts into an energy of one thousand million volts intensity, then you certainly were linking up with your thoughts an energy so dynamic that it has never been duplicated in the history of mankind. So, you see, after all, there is a scientific explanation of the things I have said to you in my previous Lessons. The vast majority of my students have had implicit confidence in me and have believed me. As a result of this simple belief, my files are literally teeming with gratifying letters from my thousands of students all over the world. I will confess to you that no living soul has ever completely grasped the intensity of the ocean of Power lying within the reach of everyone of us, for it will take some time before the greatness of this great God-Law is fully comprehended; but from different parts of the world telegrams and letters have come to me by the hundreds stating in no uncertain terms that some little connection has been made with this great, dynamic cosmic Realm. All the religious beliefs in existence are quite insufficient to shatter one little bit of evidence, and, if I do not have that evidence then certainly no man alive does have. No matter where you are, let me say to you that after some years' experience with this teaching, I am in a position to state beyond the shadow of a doubt that this cosmic God-Realm does exist and can be used by you in the accomplishment of whatever proper and right thing you desire.

Dr. Millikan states that probably these rays are the cause of the things manifested physically and materially upon this earth. If that be a fact, then once more I am borne out in my understanding of the great God-Law. Prior to the discovery of these rays with their energy of one thousand million volts, the highest voltage that had ever been measured was that of the gamma rays of radium which produced about eight million volts and the highest voltage ever

produced in the laboratory by artificial lightning has been around five million volts. In an Associated Press report released through the papers recently I find the following statements, headed by this caption:

### "WORLD UTOPIA IF COSMIC RAYS ARE HARNESSED"

"The source of this terrific power ray is believed to originate in the vast outer reaches of our star-filled universe and can, according to the scientists, be accounted for in only one way. It must be produced by atomic energy.

"What is atomic energy and how can it be produced? The atom, believed to be the smallest unit of matter, can be thought of as the building block of the universe. All gases such as nitrogen and oxygen which go to make up the air we breathe; all liquids of which water is the best example, and all solids such as iron, rock, wood, are made up of different kinds of atoms differently arranged in a larger unit called the molecule. Different kinds of atoms have different weights, the same, for instance, as different kinds of animals. Atoms which go to make up gases weigh the least, atoms of liquid weigh more and atoms of the heavy metals, and silver, gold and platinum weigh the most. The atom itself is made up of a central heart or nucleus which has a positive charge of electricity surrounded by negatively charged particles called electrons. The heart or nucleus of the atom is made up of positively charged particles called protons, together with approximately one-half as many electrons.

"Scientists are already able to blast away the outer electrons of the atom with electricity. When this is done to neon atoms, the energy emitted by the negative electrons rushing back to their nuclei take the form of orange colored light which is a familiar sight now along most any city street in the form of neon advertising signs.

### "ONLY THE BEGINNING"

"This, however, is only the beginning. The real atomic energy is locked up in the heart or nucleus of the atom so tightly that enormously high voltages of electricity are required to tear it apart. When this heart of the atom is blasted open and reassembles itself again to form a new substance, so much energy is released that it makes our present-day sources of power seem like the brush of a butterfly's wing compared to a dynamite blast.

"Some idea of this tremendous explosive energy locked up in the heart of the atom may be gained by studying the high voltages which would be given off in the transformation of one substance to another. Twenty-seven million volts would be set free in the change of hydrogen gas atoms to atoms of helium gas. One hundred and sixteen million volts would be produced in the change from hydrogen to the still heavier oxygen atom. Two hundred and sixteen million volts would be given off in the change of hydrogen atoms to those of silicon, a metal. Five hundred million volts would be the result of changing hydrogen to iron and the 1,000,000,000 volts shown by the newly found cosmic rays would be the energy which would be generated in the change of hydrogen atoms to those of silver.

"Is there, then, a race of super-beings out in the depths of space somewhere that has evolved perhaps 1,000,000 years longer than we have, and discovered secrets of making gold and silver from hydrogen gas or other substances? Are they perhaps trying to use these cosmic rays to signal to scientists on the earth? Are they wondering why we do not understand their signals and respond to them?

## "IS UTOPIA OF POWER COMING?"

"One thing sure, if we do succeed in catching and harnessing these tremendously powerful cosmic rays, or, through studying them, learn how to release and control atomic energy, we may be sure that heat, power and light will then be as free as the air we breathe. Automobile engines that now weigh many hundreds of pounds will be replaced by engines which would need to be no heavier nor larger than a pocket tin of tobacco. If the atomic energy locked in one cubic inch of coal could be released and controlled it would light, heat and turn the wheels of industry of New York City for a year. Warfare would be done away with, for beams of atomic energy could be used which would be powerful enough to literally blast a whole continent off the face of the earth, or split the earth itself wide open.

"With atomic energy made available, any substance could be used for what we now think of as fuel. Atomic disintegration of rocks or water would yield tremendous power, and very small quantities would suffice to create all the energy that could ever be used by all the people on the earth. Aviation and radio would take tremendous strides. A man could strap an atomic engine weighing but a few ounces on his back and fly through the air as fast as air friction would allow.

## "NEUTRALIZE FORCE OF GRAVITY"

"With such power it would be possible to neutralize the force of gravity so that the air would be as safe or safer than the ground. The food question would be solved, since, with unlimited electrical power, crops could be grown as fast as desired with artificial ultra-violet light, perhaps from seed to matured plant in a few hours. Travel would be as simple and inexpensive as breathing and people could readily follow warm weather south in winter and be self-sustaining regardless of economic conditions.

"Dr. Millikan and his associates are already hard at work in research, and plans are to study the cosmic rays in many different parts of the world and at all possible levels of altitude.

"Research, so far at the California Institute of Technology in connection with cosmic rays, has taken the one form in the study of photographing the paths of cosmic rays through what is called a 'cloud chamber,' a large room made of glass and containing moisture-charged air or gas. The cosmic ray leaves a visible path of water droplets. Of 1,000 photographs taken and developed, 34 showed cosmic ray tracks.

"During the experiment, the cloud chamber was in the sphere of influence of a powerful electromagnetic field, and the cosmic ray paths showed curvatures indicating that the tiny particles were capable of being attracted by the electromagnetic force applied to them. This would indicate that cosmic rays are of similar nature to light and X-rays, and makes a good beginning for further study. It was also noticed in the experiment photographs that when a cosmic ray hits an atom in the cloud chamber both positive and negative particles were given off, showing clearly that the heart of the atom had been shattered by the impact, the first step in the release of atomic energy. What will be the next step?"

Taken from Associated Press report.

I think my students, after reading the above, will at least grant the possibility of this great cosmic energy being a thinking or intelligent energy. Remember we do not know everything yet about what we have called "cosmic rays," and it may very easily be that these scientists are experimenting with the greatest

Spiritual Power the world has ever known. It may be that this old world is on the verge of finding a scientifically true explanation of the great God-Law, as I have taught it in these Lessons.

In a prior Lesson I called your attention to the penetrability of what was called a "neutron." These neutrons are probably at the heart of this vast cosmic energy, and if this be a fact, then who can question the ability of these cosmic rays with their thousand million volts of energy to throw into play some unseen or spiritual force or power or energy which can and will and does in due time bring into existence material conditions necessary.

In 1925, Doctors Millikan and Cameron obtained indisputable evidence of a penetrating radiation which must be of cosmic origin. According to the booklet released by the United States Government, No. 2986, these experiments were conducted at Muir Lake, California. Without going into the technical end of these experiments, let me state that the electroscope used by these scientists showed with certainty the determinations of the absolute amount of the penetrating radiation. The statement is made in this booklet. "ALL THIS CONSTITUTES PRETTY UNAMBIGUOUS EVIDENCE THAT THE HIGH-ALTITUDE RAYS DO NOT ORIGINATE IN OUR ATMOSPHERE, VERY CERTAINLY NOT IN THE LOWER NINE-TENTHS OF IT, AND JUSTIFIES THE DESIGNATION 'COSMIC RAYS,' the most descriptive and the most appropriate name yet suggested for that portion of the penetrating rays which come in from above." In 1925, these scientists visited a small lake in Bolivia the altitude of which was 15,000 feet. The most crucial tests were there used and readings, etc., were taken. Special attention was paid in these experiments to find out whether or not the mountain area is more or less effective than other portions of the country in sending these rays into the earth. On page 223 of this Government bulletin we find the statement that cosmic rays are produced by definite and continually recurring atomic transformations involving very much greater energy changes than any occurring in radioactive processes. On page 227 of this same bulletin we find this statement: "THIS WHOLE WORK CONSTITUTES, THEN, VERY POWERFUL EVIDENCE THAT THE SORT OF CREATIVE, OR ATOM-BUILDING PROCESSES DISCUSSED ABOVE, ARE CONTINUALLY GOING ON ALL ABOUT US, PROBABLY NOT AT ALL IN THE STARS, AND THAT EACH SUCH EVENT IS BROADCAST THROUGH THE HEAVENS IN THE FORM OF THE APPROPRIATE COSMIC RAY."

I am introducing this evidence here merely for the purpose of showing my students beyond a shadow of a doubt that this Cosmic Realm of creative energy does exist. You will notice that all through my Lessons I have consistently used the words "Life Spirit." I have done this because I believe there exists a God-Spirit which was and is responsible for every created thing and for every material condition. I do not believe there is a thing, or there can be a thing in existence whether man-made or not, which did not have its origin in the great spiritual GOD-REALM. Now, having proved beyond a shadow of a reasonable doubt that scientists have established the existence of a cosmic energy so powerful that it has a voltage of one thousand million, is it too much of a stretch of the imagination to ask you to believe that this Realm of unseen spiritual or cosmic energy is the GOD-REALM? I do not think so. Certain it is that there must be a reasonable and a natural explanation behind things as they exist. It would be foolish to accept the attitude of many religionists that we are not supposed to know these things. Their history and their origin is not such that it would in-

spire me to put much confidence in such a statement as that. That is a cowardly way of admitting ignorance. It is also a cowardly thing to do to tell the human race that it was born in sin, shapen in iniquity, and without the spilling of blood there can be no remission of sin. All one has to do is to study the great heavens above to know that there can be no truth in such statements as those. In the first place, they are not reasonable; in the second place, they cannot be proved; and in the third place, they are revolting to the mind of a normal human being. At the risk of being called an infidel and an atheist, I chose to purposely and deliberately throw into the discard such teachings as these; in throwing over these teachings, I find a new Realm opening up. I find there a Realm that is illimitable. I find there a Realm which my reason dictates to me might very easily answer the entire tangled problem of creation; as I experiment in a spiritual way with this great cosmic Realm, I find my theories are changing themselves into proved facts. With the discarding of the old allegorical stories of god, I find a new story and a new vision of God—not as some mystical, mythical, miracle-working individual seated in the sky, but I find a vision of an operating Spiritual Power which is creating every moment of the day and night and which sustains you and me moment by moment on this earth. More than that, I find the existence of a Realm of Spiritual Power which, when fully understood, might very easily answer the question we would all like answered—that of life and death.

I do not think my students can do better for the next few weeks than to try to realize the fact that they are surrounded by a most dynamic, unseen cosmic Realm, which Realm is so powerful in itself that scientists in their coldblooded manner of analyzing have definitely decided that its energy may be measured in terms of volts and have definitely established that this energy equals one thousand million volts. At this point, let me go back to the question which will invariably arise in your mind until you understand it. That question is, "Why am I not conscious of this staggering volume of spiritual energy?" If you understood yourself as you are, you perhaps would be conscious of it. Take a brick, or a lead pencil, or some other inert mass. This mass was brought into existence primarily by the cosmic Realm of God. Now, compare yourself, all your activities and your marvelous piece of physical mechanism with this inanimate object; then ask yourself what kind of a cosmic Power is it that causes you to be the marvelous thinking, intelligent being that you are. We know that in a piece of lead or steel, electrical bundles of energy are chasing themselves around with the speed of an express train. We know that we can reduce the physical body to a little water and a few lime salts; but would you attempt to tell me that an aggregation of water and lime salts creates the motivating power behind the human body? That power is an originating power; that power is a thinking power; that power is an invisible power which cannot be explained away by either water or lime salts.

There is, my friend, whoever you may be, a very definite connection between you and this great creative cosmic REALM OF GOD, for that is all it is. That connection is established and may be continued, as I explained in a previous Lesson, through your thought realm. What part of your brain do you think it is that thinks? Physicians will tell you that your mental activities are confined to only a very small portion of the outer layer of the brain; but, if the brain itself be responsible for your actions, your thoughts, and your life, then what stops it? I have seen perfectly normal brains preserved for many years. I have seen the heart of a chicken pulsating in a glass jar entirely removed from the chicken itself. There was no brain there. It is foolish to think that life or actions have

their origin in anything physical, for that is not a fact; nor indeed can it be a fact. The great creative processes of life itself are conceived in and exist in an unseen **REALM OF POWER**. This is the realm I allude to as the "God-Realm," or as I often call it, the great "Spiritual Realm." Now, in our search for the fine things of life, you at least must admit to me that there certainly is enough power in this great cosmic Realm to bring into existence for you here and now the things necessary to your happiness. If it were possible—and it is possible—that from a vaporous nebula whirling around in this **COSMIC REALM OF GOD** a planet was created; then would you say to me that no Spiritual Power exists capable of bringing to you the few things you need to make your life happy, healthy, and successful? Take the case of disease. What is that? There can be no disease when the perfect cosmic Realm of God exists, for this great Power is a building power and not a destroying power. It is a life energy and not disease or death in any sense of the word. Then ask me from whence comes this disease and this death; I answer you—**THROUGH AN IMPERFECT KNOWLEDGE OF THE POWER OF THE GREAT COSMIC LIFE-REALM**. As the years go by and as we give this great cosmic God-Realm a chance to work in our lives, we find that it does work. In other words, we find that by applying the law governing this great God-Realm, we achieve the results, and the only limitations that can be are the limitations we impose upon ourselves by our disbelief in the realm of the great cosmic God-Law.

I want to say to you now that it is entirely impossible for you to call into play the cosmic Realm of God with the desire for success and have failure manifest. Someone once said, "Think failure and failure will manifest." Little did the one who made this statement realize that he was stating one of the most profound of all Spiritual Truths. It is not possible for you to think success and have failure manifest if you really think **SUCCESS**. You may have to shake off a few old traditions in throwing the power of the cosmic Realm into action for the attaining of the things you desire, but it is well worth while to do so. You are a lost sheep as it is now. There certainly is no relief for you in the religious teachings of the day; if it be a fact that mansions are being prepared for you in the sky, you know very well that those mansions can be of no benefit to you here and now. You are thrown back, whether you like it or not, to a natural Power which must exist here and now for you. Now the question is—are you willing to be intense enough and earnest enough to actually spend time enough to release your thoughts into the great cosmic Realm, never doubting until the desired things manifest? And here let me state that the degree of intensity and earnestness displayed is the measuring cup of the results to be achieved. This is a matter for you individually to decide. I can visualize ahead fifty or one hundred years and I can see men and women absolutely depending upon the cosmic Realm and absolutely using this Realm for the instant manifestation of things which today would seem to be abnormal and beyond the wildest hope of possibility of obtaining; but we are moving rapidly these days and if you will but realize that this great God-Law can be instantly contacted by you at any hour of the day or night, then it is only a matter of time and the intensity of your desires before you know better and have proved the existence of this marvelous realm.

I want to close this Lesson by stating that the Law of the Spiritual Realm in a nutshell is thus: "**ACCORDING TO YOUR BELIEF, IT WILL BE DONE UNTO YOU**." Remember I am not asking you to believe in a mythical god in the sky, for there can be no scientific belief in that kind of a being. I am asking you to manifest belief in a proved cosmic Energy-Realm which your reason can

easily grasp and which your common sense tells you might very easily be able to do for you the things you desire. You do not understand the processes whereby these results will be achieved, and neither do I; but, if you really want to find out whether or not this great God-Realm exists, then let me urge you to put yourself and your thoughts where they can respond. If I would say to you, "I am going to take you with me to New York City next week," and you would say to me, "There is no such a place as New York City," certainly you would never get there. Instead of trying to argue with yourself that there is no such a Realm as the great spiritual God-Realm, why not take it as an accepted fact—and it is an accepted fact—and throw yourself unrestrainedly every moment of the day into this great Power-Realm. As you work, or no matter what you may be doing, do it with the consciousness that you are in definite contact with the great God-Realm which created you and which created every other created thing. Do not make the mistake of thinking that you will contact this Realm by physical means, because you will not so contact it. You will contact it by mental, or spiritual means and the only means of Spiritual Power you have in you is the Power of your thought Realm; so just be quiet and practice the existence of this mighty Realm and practice the consciousness of your union with it.

This Lesson has taken you farther, I think, and given you a better understanding of spiritual conditions than you have ever had before; so read it and reread it, and do not be afraid to openly commune with this great God-Realm, for, strange as it may seem, the spoken word is the motive power behind the spiritual thought; in other words, the thought is the bullet which penetrates the Spiritual Realm, but the spoken word is the dynamite, or the nitroglycerine which discharges the cartridge, so speak your desires into the great cosmic Realm of God, and those desires will sooner or later come back to you in actual form.

So now I leave you with the future being held by you in your own hands. Where you go or what you do depends entirely upon you. Here is the great Realm of God. Here exists Spiritual Power enough to make you an overwhelming victor through life. Here, in this great Realm, exists a wisdom far superior to any man-made wisdom, for this wisdom is God. Here, in this Realm, exists a peace far deeper than any man-made peace can be, for this peace is God. Here, in this great Realm and in your own hands, lies an infinite love far greater than any man-made love can be, for this great love is God. There lies also achievement, success, wealth, and healing, and everything the human soul can desire lies in the great Realm of God. I have put into your hands the key that unlocks that door, if any key be needed, and am going to leave you with the knowledge you possess, which knowledge is more than sufficient to throw into play all the cosmic powers of the great God-Head, no matter what your circumstances may be and no matter what of life's gifts you desire. Standing behind you and over you, and all around you, and under you for your protection and benefit, is the great Power of the God-Law. Can it be that you desire a personal God? Then, to the extent that you change your own personality like that great personality of God, will this God appear to you to be a personality; but do you not see that you do not change God from a Creative Spirit into a little personality? All you really do is to change your little personality into the likeness of this great Spirit of God.

I should like to prolong this Lesson, in fact, I should like to talk to you about this great Realm for one solid month, or for a year; but that, of course, is impossible, so I am leaving you at this point and wishing for you the courage and

the confidence necessary to take this great God-Power with you wherever you go and use it for the manifestation of whatever it is you need.

My thoughts run back this morning to the words of a very beautiful hymn which seemed to be quite appropriate in view of the fact that we are bringing our little journey together to a close. Regardless of the fact that the hymn was written by a Roman Catholic priest and regardless of the fact that it may be found in some of our church hymn books, I am going to use that hymn in closing, for it conveys in no uncertain manner the thought I want to leave with you. This beautiful poem was written by Cardinal J. H. Newman, of the Roman Catholic Church. He was marooned on a vessel one night near his native city. Not a breath of wind disturbed the smooth bosom of the ocean and the boat lay becalmed until such time as enough wind came up to carry it into port. Standing in the bow of that silent ship his mind being on things of God, as it should have been, this beautiful saint penned the following words which will live as long as time endures, and time has no end:

Lead, kindly Light, amid th' encircling gloom,

Lead Thou me on:

The night is dark, and I am far from home,

Lead Thou me on!

Keep Thou my feet! I do not ask to see

The distant scene; one step enough for me.

I was not ever thus, nor prayed that Thou

Shouldst lead me on;

I loved to choose and see my path; but now

Lead Thou me on.

I loved the garish day; and, spite of fears,

Pride ruled my will: remember not past years.

So long Thy power hath blest me, sure it still

Will lead me on

O'er moor and fen, o'er crag and torrent, till

The night is gone;

And with the morn those angel faces smile,

Which I have loved long since, and lost awhile.

The great probability is that I shall never meet even a small percentage of my students face to face. Many of them come to Moscow to see me and many of them I am unable to see. But, whether I ever see you or not, I want you to forget all about this little life of mine with whatever influence it may have, and I want you to place all your hopes, all your confidence and all your desires in the Power which so long has blest you and which Power surely will lead you on o'er moor and fen, o'er crag and torrent, till the night is gone; and with the morn we shall probably see many angel faces smiling, for what that morning will bring we do not know now, for we see as in a glass darkly, but you just depend upon one thing and that is this: when the morning of full knowledge breaks that knowledge will disclose just one thing, and that one thing will be the closeness and reality of the presence of God. I bid you good-bye.

Ever your friend and teacher,

*Frank B. Robinson*

## EXAMINATION QUESTIONS FOR LESSON NO. 20

These examination questions are for your benefit and you should know the answers to all of them. If they are not clear to you, read your Lesson again and again until they are clear.

1. You (the invisible part of you), being a part of the invisible Life Principle, must have at your disposal all of the power for actual manifestation that is contained in the completeness of the great God-Law itself. How is this truth illustrated in Lesson 20?

2. What would be the consequence if the presence of the God-Law were to be, even for one instant, removed from this world?

3. What is a light year?

4. Compare the penetrating force of the cosmic ray with that of the gamma ray, which ranks next to the cosmic?

5. Compare them with reference to the voltage produced by each of these two rays?

6. What is atomic energy and how can it be produced?

7. Instead of the old allegorical stories of God, we have now an entirely different vision?

8. In making use of the God-Law, what is the "measuring cup" of the results to be achieved?

9. If you really want to find out whether or not this great God-Realm exists, what course is recommended?

10. One should not be afraid to openly commune with the God-Law. The spoken word, as well as the spiritual thought, has its function. How is this illustrated?

11. Where stands the great power of the God-Law with reference to you? And for what purpose?

12. With what well-known hymn is this final Lesson of the course brought to a close?
