Part VI. How to Rule the Stars.

Examination Questions.

1. Show how, while we can not prevent the heat and cold, wind and rain, we nevertheless largely rule them through devising means by which they do us little damage and assist to realize our aims.
2. Why does a soul come into human existence at the time the positions of the planets map the corresponding dynamic structures in his astral body?
3. By what is determined how progressed aspects of the planets will affect the individual?
4. What two things are involved in every condition in the individual's life?
5. What factors within ourselves determine how we are affected by the failure of a bank in the neighborhood?
6. What relation has the release of desire energy to the events and circumstances which enter a life?
7. In what way is an understanding of the manner in which progressed aspects operate a great aid to true morality?
8. Why, if we are to be of greatest benefit to society, must we recondition the thought-cells within the astral body which attract misfortune?
9. Of what is the birth-chart a cross-section map?
10. Is the character at a period after birth exactly mapped by the birth-chart, or have other characteristics been added?
11. By what process can more important events be attracted into the life?
12. Through what process can more fortunate events be attracted into the life?
13. When stellar-cells and structures which have been conditioned by pain release their desire energy what is attracted into the life?
14. When stellar cells and structures which have been conditioned by pleasure release their desire energy what is attracted into the life?
15. Is it the type of energy being broadcast in the sky at a given time that affects us, or is it something within ourselves?
16. By what in the birth-chart are the lines through the astral body that act as aerials to pick up planetary vibrations of a specific character mapped?
17. Just what is meant by Conversion?
18. What is the general process of Conversion?
19. Only at what times do events of importance come into the life?
20. If the thought-cells reached by a new energy supply were conditioned to feel distress, will they work in an entirely beneficial way when they receive, as mapped by a harmonious progressed aspect, a new supply of pleasant energy?
21. What is the method of manipulating the physical environment in the effort to rule the stars?
22. How can the principle of conversion be applied when progressed aspects are present?
23. What is the method of using mental antidotes in the effort to rule the stars?
24. Indicate how rallying forces can be utilized in the effort to rule the stars?
25. How can the character vibrations of objects and places be used to assist in the work of ruling the stars?

Part IX. How to Think Constructively.

Examination Questions.

1. Upon what ability does constructive thinking depend?
2. In what manner do the cells of the human body act as miniature electric batteries?
3. What is the function of the nitrogen compounds in the nucleus of the cell in relation to energy production?
4. With what are carbon compounds combined in the manufacture of powerful explosives?
5. From whence do the nitrogen compounds derive the terrific energy which they liberate?
6. What proof is there that the giant protein molecules of the body produce electrical energies?
7. What cells of the human body are best adapted to the production of high potential electrical energies?
8. What makes the nervous system both a broadcasting and a receiving set?
9. Through what process can man control the rapidity which nitrogen compounds within himself releases radiant energy and thus tune in on the vibration desired?
10. What part does electrical stimulation of a gland play when some progressed aspect is operative in a person's birth-chart?
11. In what manner does the gland then stimulate a particular type of thinking?
12. How can one determine, in large extent, what planetary energies and what thought energies he will pick up, radio fashion, at a given time?
13. What is the electrical function of sleep?
14. Through what electrical process do stimuli from the outside world and desires from the unconscious mind make it so difficult to keep the attention directed to some selected train of thinking?
15. Why does too much loss of sleep result in death?
16. Why is Directed Thinking the hardest work in the world?
17. How can Directed Thinking be cultivated?
18. Why cannot Directed Thinking be prolonged too greatly?
19. Of what value is it in Constructive Thinking to have a number of harmless pleasurable interests?
20. How does the expenditure of desire energy on imaginary accomplishments affect real accomplishments?
21. Why, when a pleasurable emotion is experienced, such as that arising from hearing good music or reading good literature, should something concrete be done about it?
22. Why, when anger is present, should one immediately engage in some hard constructive work?
23. Why, when any negative emotion tends to gain attention, should the mind be interested in something other than self?
24. How can one learn to like keeping the thoughts constructively engaged at all times?
25. By what kind of practice is the will weakened, and by what kind of practice is will power gained?

Session V
Branch of Science - Metabolic Psychology
Part IX. How is Thinking Constituted?

Examination Questions

1. Upon what ability does constructive thinking depend?
2. In what manner do the cells of the human body act as miniature electric batteries?
3. What is the function of the nitrogen compounds in the nucleus of the cell in relation to energy production?
4. With what are carbon compounds concerned in the manufacture of powerful explosives?
5. From whence do the nitrogen compounds derive the formative energy which they liberate?
6. What proof is there that the glands produce metabolism of the body products?
7. What cells of the human body are best adapted to the production of high potential electrical potential?
8. What makes the nervous system both a transmitting and a receiving cell?
9. Through what process can we control the tendency which nitrogen compounds within himself release radiant energy and thus act as the vibration desired?
10. What part does electrical attraction of a gland play when these products are operative in a gland's function?
11. How can we control the tendency which nitrogen compounds within himself release radiant energy and thus act as the vibration desired?
12. What is the electrical function of a gland?
13. Through what electrical process do glands from the outside world and the inner world the information which is as difficult to keep the attention directed to a selected form of thinking?
14. Why does the mind have the ability to select a desired form of thinking?
15. Why is directed thinking the hardest work in the world?
16. How can directed thinking be maintained?
17. Why cannot directed thinking be prolonged too greatly?
18. Of what value is it in constructive thinking to have a number of nervous system's interests?
19. How does the expenditure of electric energy on temporary accomplishments affect real accomplishments?
20. Why when a physiologist studies an experiment, even as that arising from turning food waste or feeding food into a stomach, should normally concentrate to do so?
21. Why when a person is present, should one immediately engage in some form of constructive work?
22. Why, when any negative emotion tends to gain attention, should the mind be interested in something other than itself?
23. How can one learn to like working the telephone conversationally engaged at his work?
24. By what kind of practice is the will weakened, and by what kind of practice is will power gained?

Part X. How to Cultivate Subliminal Thinking.

Examination Questions.

1. Where is most of man's thinking done?
2. What happens when a man attempts to choose a number at random?
3. Indicate how a number apparently chosen by chance always represents some significant factor within the unconscious mind.
4. What causes laughter?
5. What causes some always to be willing to disparage the character of others?
6. Why do people become so prejudiced in favor of any person or cause they champion?
7. Why do we laugh at the blunders of others?
8. Why do people never like those whose wit causes others discomfort, even though they may laugh at the witticisms?
9. Why do people like those who poke fun at themselves?
10. What Drive is back of the traditional Jewish joke?
11. What Drive is back of the Scotch joke?
12. What Drive is back of the clowning of the vaudeville stage?
13. What is the cause of swearing and crying?
14. Why are names that should be familiar temporarily forgotten?
15. How may a sense of guilt lead to an accident or sickness?
16. Instead of permitting the primitive desires to express as animal impulses, what should be done with them?
17. What is the cause of hysteria?
18. What is the first thing a person troubled with hysteria should realize?
19. What is the nature of the reconditioning process which the hysterical person should undertake?
20. Why do people fail to perceive happenings of the astral world?
21. Why are the hours of sleep particularly adapted to acquiring information from the astral world?
22. In what way should those who are subject to disturbances due to over sensitivity recondition themselves?
23. How can the incoming mail be used as objects for practicing the development of the ability to gain information during sleep?
24. How can places it is intended to visit later, such as where lectures are given, be used to practice gaining information during sleep?
25. Mention some historical instances of something valuable being received during sleep.

Part X. How to Cultivate Subliminal Thinking.

Examination Questions.

1. What is most of man's thinking based on?
2. What happens when a man attempts to choose a number at random?
3. Indicate how a number appears chosen by chance always represents some significant factor within the unconscious mind.
4. What causes laughter?
5. What causes some always to be willing to disparage the character of others?
6. Why do people become so prejudiced in favor of any person or cause they champion?
7. Why do we laugh at the blunders of others?
8. Why do people never like those whose wit causes others discomfort, even though they may laugh at the witfulness?
9. Why do people like those who joke too at themselves?
10. What drive is back of the trend toward Jewish jokes?
11. What drive is back of the Jewish jokes?
12. What drive is back of the clowning of the vaudeville stage?
13. What is the cause of swearing and cursing?
14. Why are things that should be laughed contemptuously forgotten?
15. How may a sense of guilt lead to an accident or sickness?
16. Instead of punishing the guilty, doctors as a rule inquire what is the cause of the patient's condition?
17. What is the cause of hysteria?
18. What is the first thing a person troubled with hysteria should realize?
19. What is the nature of the reconditioning process which the hysterical person should understand?
20. Why do people fail to perceive happenings of the actual world?
21. Why are the hours of sleep frequently adapted to acquiring information from the actual world?
22. Is what we should know those who are subject to disturbance due to over-activity recondition themselves?
23. How can the incoming world be used as objects for practicing the development of the ability to gain information during sleep?
24. How can power be increased to what extent, such as where lectures are given, be used to provide genuine information during sleep?
25. Mention some historical instances of something valuable being received during sleep.
