THE Reader is candidly informed, that the mention of *Infidel Societies*, by the Bishop of London, in his late excellent charge, was a forcible motive for digesting the narrative contained in this work. After the enumeration of its contents, in the title-page, it is fcarcely neceffary to infist upon this new, and important æra, herein described: *new*, because it delineates the first period in which the doctrines of Infidelity have been extensively circulated among the lower orders; and *important*, because the trial they have had, as it will appear in the sequel, has decidedly pronounced upon their weakness, and absolute incapacity to ameliorate or improve the state and condition of mankind.

Professor Robifon and the Abbé Barruel, it is acknowledged, have given an interesting account of fimilar focieties in France and Ger-

the firing of a neighbour's houfe shall be esteemed trivial indeed, in comparison with a mine that was ready to burst our under feet! With the existence of these English affiliations, it is probable, that, few of the higher orders were acquainted; but their extensive influence and energies, certainly communicate a degree of interess to the detail here given, as the first account of them.

The Author of this undertaking, having been involved in the dangerous delufion he now explodes, may reafonably be admitted a competent witnefs of the events which he relates; as may alfo the prefumption, that he has demonstrated the impracticability of the Infidel fcheme, not merely from fpeculation, to which former writers have been confined, but from facts deduced from real life and actual experience.

Like our predeceffors, we are then no longer under the neceffity of arguing without a living precedent; on the contrary, we have feen the principles

principles of Infidelity transferred from books to men; from dead characters to living fubjects; not among a few isolated or speculative individuals, but in numerous and compact bodies.

What was formerly a difpute, is thus brought upon a new ground; and from the heterogeneous composition of this upftart body, the question "Whether a Society of Atheists can "fubfift?" it is prefumed, may now be decided in the negative.

Agreeable to this statement, Mr. Robert Hall, of Cambridge, in the preface to his Sermon intituled, Modern Infidelity confidered, &c. observes, that the cotroverfy between Infidels and Chriftians appears to have taken a new turn : the influence of Infidelity upon fociety, he fays, is a point hitherto little confidered. The prefent exposure of these opinions, by one who has witneffed their most fecret operations; and the most unqualified expression of the views of those who espoused them, may awaken the rancour of Infidel fanatics; but this he prefumes, will be more than counter balanced by the approbation of the learned and foberminded of all Christian denominations. As for the probable defects of this work, in point of ftyle,

ftyle, or in the art of composition, my apology to the learned is, that it was written upon the fpur of the occasion, and *currente calamo*.

Perhaps the relative obscurity of these affiliations may have been the reason they were not sooner noticed; as, in respect to their locality in this metropolis, it must be confessed they bear some resemblance with the Parisian Fauxbourgs of St. Antoine, &c.

After the faithful delineation of facts, in this work, it is hoped, Infidels will no longer claim the character of Philofophers! If Philofophy has any connection with the conduct of the human mind, towards the *Chief-good*, it is not the Infidel, but the rational Chriftian, who has the beft right to that high diffinction; for, " the man who happily unites Philofophy with Religion, is the dupe, neither of fcepticifm, fuperfition, or fanaticifm."

Were I at liberty to mention *feveral eminent literary characters*, who have honoured this work with their attention, while in manufcript, it might be conftrued into an attempt to bias the public opinion; but, till that decifion is pronounced, the Author alone, is refponfible for the whole; I am therefore " ready

to

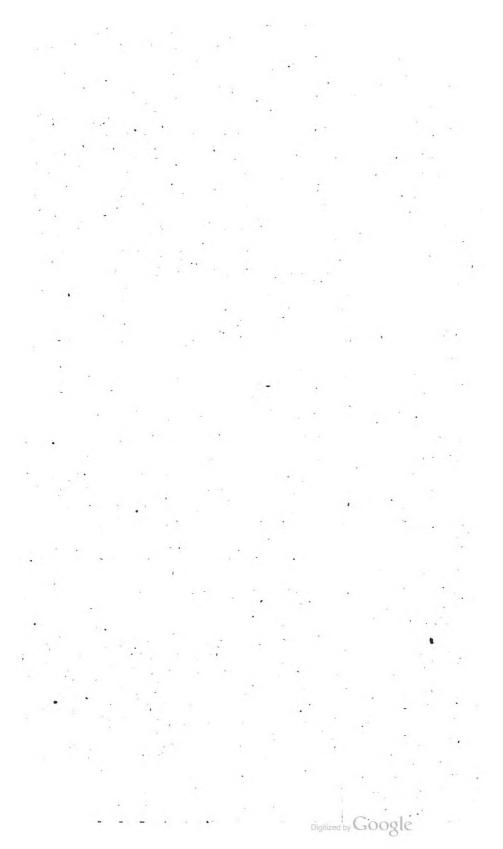

to prove any thing I have flated, if called upon."

# Quod Scripfi, Scripfi.

The importance of the fubject at large, might have been enhanced by fuperior abilities; but relative to its religious truths, I am not afraid of concluding with the exulting ftrains of the Roman Poet:

Jam exegi quod nec Jovis ira, nec ignes, Nec potuit ferrum, nec edax abolere vetuftas.

Upon fome remote and the immediate Caufes of the late Rife and Progress of Infidelity.-Patronage of the Age of Reason by the London Corresponding Society .- Mirabaud's System De la Nature .-Volney's Ruins of Empires .- Conversion of the Division-Rooms into the Mediums of Infidelity,

LO fuppofe the late inclination to infidelity, to have been the refult of cool inquiry, or rational conviction, would be a grofs libel upon the good fenfe of the country. On the contrary, the most prominent reason which can be given for this new propenfity is, that the public mind was taken by furprize, merely through the medium by which the evil complained of was obtruded by a certain fociety, affifted by the politics of the moment.

With these politics, it was supposed the new religion would blend and unite; and to the mif-B applied

applied zeal of this fociety, and its partizans out of doors, the fhort-lived increase of those opinions was owing.

Still there were other caufes which, though feemingly remote, had an immediate effect upon the minds of many who were waiting to avail themfelves of any public event to promote a particular object. It being a general tradition among Protestants, that the seat of the Roman Catholic religion was to be annihilated, it unfortunately occurred, that, as the French were fuccefsful, after the period of the revolution, in defpoiling that church, notwithstanding their general espousal of infidelity, their admirers still supposed them to be the inftruments of fulfilling their favourite prediction; and were fo much the eafier perfuaded to adopt French principles in religion, while they excufed the perpetrators of deeds, at which they could not but shudder, under the idea that the formerwere the felect agents of Providence; and thus, from the dereliction of one religious denomination, they were led, by an eafy gradation, to wifh for the destruction of all the rest.

From hence, under the idea of the inftrumentality of the French revolution, in the fulfilment of prophecies, religion itfelf became acceffary to deifm and atheifm ! Prophecies, relative to the deftruction of almost every kingdom and empire in the world, teemed from the British prefs, some of them in weekly numbers, till government, perfectly aware of the tendency of these inflammatory means, prudently transferred the prince of prophets to a mad-house.

It was natural for infidels, who had a revolution in view, to connive at those enthusias who believed in vulgar predictions relative to the destruction of Popery; it was natural also for the former to embrace fuch

fuch converts; but the attachment they obtained from those characters, who had the least remains of true religion, was of very fhort duration; as the general habit of ridiculing every thing before held facred, frequently created difguft, and occafioned a revolt from a party, who, notwithstanding all their professions about a general improvement of the morals of men, could not conceal the little value they fet upon *perfonal reformation*! just as if the aggregate of fociety was not made up of indivi-In fact, to have hinted any thing relative duals. to religious imprefiions, though with all the modifications of a Socinian, would have ftigmatized its author as a mere ideot, or driveller, among these modern fages and pretended reformers. The Rev. Henry Kett, in his striking application of the Scriptures in his History, the best Interpreter of Prophecy, feems to impute too little to the fecret and almost imperceptible operations of Infidelity through the whole course of the last century, especially in the interval between the publication of Bolingbroke's works, and the year 1776. This hiatus, not to keep my readers from the contemplation of more recent danger, I shall endeavour to supply in my postfcript, only observing at prefent, as the immediate cause of the late rife and progress of infidelity, that an Englishman in Paris, the head of a political party here, probably wifhing to revive his popularity in France, produced that last effort of religious Quixotifm, the Age of Reafon. The early predilection of the London Corresponding Society for , this performance, was the fole medium which, for the first time, made infidelity as familiar as possible with the lower orders. But the experiment thus tried, instead of confolidating the wild theory of its authors, has only furnished their B2 Chriftian

Christian opponents with the strongest grounds of objection.

It may now be faid, that the fplendid theories of Voltaire have been reduced to practice; the impaffioned eloquence of John James Rouffeau applied to the objects defignated by its author; and that the pertnefs and fourrility of Thomas Paine have been added: but all these efforts have been, and will still be found illusory, as will farther appear from a faithful statement of recent events, and fuch reflections as naturally result therefrom.

If the facts I am about to adduce were not well warranted, posterity would not believe, that in confequence of the publication of a rhapfody against the doctrines of Christianity, hazarded by a theoretical politician in 1794, and under favour of the French revolution, a very confiderable number of our countrymen adopted his notions; and became equally as violent for the extermination of the Christian religion, as for the remedy of those *circil abufes*, for which alone their fociety was at first eltablished !

Without experience of the fact, who would believe that while the infatuated difciples of the new philosophy were declaiming against their clergy, for mingling politics with religion, they themselves, employed millionaries to add deism to the democracy of their converts! Or, who would credit that every religious obligation, in civilized fociety, was refisted as priestcraft, by the same perfons who were the loudest in their demands, for what they chose to difguise with the name of a reform !

Perhaps this mania, in its first appearance, may be attributed to an implicit belief in most of its advocates, that the new philosophy would produce better effects upon the manners of fociety, than

the

the religion of their forefathers had done. But how frongly the *practice* of the philofophers has belied the *theory*, will evidently appear in the impartial examination of their public conduct, which, as propagandifts, would have been much more alarming, had their fecret activity been appreciated fooner.

It is still fair to admit, that the adoption of Paine's Age of Reafon was not agreed, to in the London Corresponding Society, without confiderable opposition, especially in the general committee; but as zeal fuperfeded judgment, in their difcuffions upon the fubject, the epithets of d-m--d fool, and d-m-d Chriftian, ultimately prevailed; and a bookfeller was foon perfuaded, by the heads of the party, to undertake a cheap edition of the Age of Reason, for its more ready diffemination through the divisions, at that time rapidly increafing in number every week : but after Williams, the bookfeller just alluded to, was imprisoned for this publication, his family received much lefs allistance from the fociety, than from mere ftrangers.

In the hour of its admiration, this rhapfody was ridiculoufly termed the New Holy Bible; a circumftance which fully evinced the intentions of Mr. Paine's partizans: in fine, the attachment of the party was carried fo far, that the bare circumftance of having the Age of Reason in a house, was deemed a collateral proof of the civism of the posfessor.

It may be urged, that this conduct of the fociety was never juftified by any act of the body at large: this is granted; but when it is confidered, that their inclination for deifm was fufficiently powerful to occasion a schifm, which produced a new fociety, under under the denomination of the *Civil* and *Religious;* it follows, that the preponderance of a party, in the original body, was equal to a decifion of the whole, and fixes the charge of a partiality to infidelity, beyond the poflibility of a doubt.

If farther proofs were wanting, I might urge the circumstance of the establishment of a test, by the newly formed body, in which, each member acknowledged the belief of the Holy Scriptures, and that Chrift is the Son of God; and this as a neceffary qualification for their admission. This fact alone, I prefume, would be fufficient for my purpose; to which may be added, that Bone and Lee, two feceding members, and bookfellers by profession, were proscribed for refusing to fell Volney's Ruins, and Paine's Age of Reafon; and that refulal confirued into a centure upon the weakness of their intellects. Still, nothing like a miraculous conversion of the London Corresponding Society is to be imputed to Mr. Paine's Anti-theological Work. On the contrary, their minds were prepared for this more popular performance, by the more learned and elaborate productions of Mirabaud's System of Nature, and Volney's Ruins of Empires: the latter, in point of style, is looked upon as the Hervey of the Deifts; the former; as the Newton of the Atheifts : and, as the System of Nature was translated by a perfon confined in Newgate as a patriot, and published in weekly numbers, its fale was pushed, from the joint motive of ferving the Author, and the caufe in which the London Corresponding Society were engaged.

Northcote's Life of David was also reprinted in a very fmall edition; and if this vehicle for degrading the Bible had been better received, it was in agitation to biographize all the leading characters

ters in the Old and New Testaments, as the most certain means of bringing the Christian religion into contempt.

Propofals were circulated for reprinting the whole works of Peter Annet; much being expected from the plainnefs of his ftyle; and his mode of reafoning against revelation by fcriptural quotations; but, owing to the dread of a profecution, not more than three weekly numbers, at threehalfpence each, made their appearance. The Rights and Duties of Citizenship, most remarkable for copying the blunders of Voltaire, was one of the last things, of this kind, ushered into public view; but being profecuted, and the publishers fentenced to two years folitary imprisonment, a final ftop was put to this mode of promoting fcepticis and infidelity.

The Beauties of Deifm; A Moral Dictionary; Julian againft Christianity; and, lastly, that paragon of French Atheism, LE BON SENS, Ou Idées Naturelles opposes aux Idées Surnaturelles, were in agitation to have followed. The latter, for its audacity and virulence, has possibly never been furpassed, and its last fection is probably no bad fummary of the whole.

" La religion, n'a fait en tout tems que rem-" plir l'esprit de l'hômme de tenebres et le retenir dans l'ignorance de se vrais rapports, de ses " vrais devoirs, de ses interêts véritables. Ce n'est " qu'en écartant ses nuages et ses phantômes que " nous decouvrirons les sources du vrai, de la " raison, de la morale, & les motifs reels qui doi-" vent nous porter à la vertu. Cette religion nous donne le change, & fur les causes de nos maux " & fur les remedes naturels que nous pourrions " y appliquer : loin de les guerir, elle ne peut " que les aggraver, les multiplier, & les rendre " plus

<sup>66</sup> plus durables. Difons donc avec un celebre
<sup>67</sup> moderne, la Theologie est la boite de Pandore;
<sup>68</sup> S'il est impossible de la refermer, il est au<sup>69</sup> moins utile d'avertir que cette boete si fatale est
<sup>60</sup> ouverte."

Impregnated with the principal objections of all the infidel writers, and big with the fancied importance of being inftrumental in a general reform, almost every division-room could now boast its advocate for the new philosophy. In fact, such a torrent of abuse and declamation appeared to burst from all quarters at once, that as the idea of a *Deist* and a good *Democrat* seemed to have been universally compounded, very few had the courage to oppose the general current. On the other hand, feveral persons really facrificed their private sentiments to the public opinion, merely to avoid the contempt every where bestowed upon those who dared to open their mouths in defence of principles and opinions, till then held facred.

Next to fongs, in which the clergy were a flanding fubject of abufe; in conjunction with pipes and tobacco, the tables of the club-rooms were frequently ftrewed with penny, two-penny, and three-penny publications, as it were fo many fwivels against established opinions; while, to enable the members to furnish themselves with the heavy artillery of Voltaire, Godwin, &c. reading-clubs were formed. But still, fo it happened, that those who defpifed the labour of reading, took their creeds implicitly, from the extemporaneous effufions of others, whofe talents were comparatively above their own. And yet thefe people were invariably in the habit of ridiculing Chriftians, in concert with the orators, for being blindly led by priefts.

After

Digitized by GOOGIC

After these notions of infidelity were in a manner established in the divisions, it is natural to suppose, that in choosing their delegates, those perfons were preferred who were doubly recommended by *their religion*, and their politics; in fact, this was so prevalent, that in the recommendation of any perfon to an office among them, it was common to distinguish him as "A good Democrat " and a Deiss." Or, to fix the character more ftrongly, to add, " That he is no Christian."

However, from this period, when the leaders began to force their anti-religious opinions upon their co-affociates, it is undeniable that their inteftine divisions hastened their diffolution more than any external obstacles.

I fhall now proceed to a detail of the recent places of rendezvous, as they were held by thefe perturbed fpirits, which, I hope, will not be deemed trivial. The once famed Robin Hood Society had feveral hiftorians in profe and verfe; and yet, unlike its fucceffors, it combined no *political* with its fo-called *religious* views. In its decline alone it bore the moft refemblance to the modern clubs, in the defection of many of its beft members, when the confequences of their difcuffions, acting upon the public morals, appeared to them in a different light from what they feemed at firft.

Of various new Societies, Field-Meetings, and Deputations.—Their Conduct and Progrefs.— Violence of the Clubbifts against the Clergy.— Effects of their Enthusiasm upon their Auditors. —Propagandists in the Benefit and Convivial Societies.

ONE of the first of these affociations was fixed in the club-room of the Green Dragon, in Forestreet, near Cripplegate, in the spring of 1795. That apartment was then occupied by a Reading Society, which was soon shallowed up in the vortex of the ensuing debate, and was so much crowded, in a very short time, as to render an entrance, as well as respiration, extremely difficult.

That no opportunity might be loft, a quefiion, fubverfive of the Christian religion, was alfo agitated, in the fame room, on a Wednefday evening; but being very thinly attended, it was found neceffary to pay both the fpeakers and prefident, out of the money collected from the audience.

On the other hand, the debate on a Sunday evening always drew a crowded audience, during a twelvemonth, in which it was continued at that houfe; when, upon the complaint of fome of the neighbours, that the landlord kept bad hours, (as the difputes above and below ftairs feldom terminated before one in the morning) they were compelled to leave the premifes, to prevent worfe confequences to the keeper of the houfe.

Their

Digitized by GOOgle

Their fittings were afterwards alternately held at a house in Windmill-street, Finsbury-square; and at the George, in East Harding-street, Fetterlane, which, being a very commodious room, the noife made by the clapping of the fpeakers, and the late hours kept by the company, occasioned a complaint, that, being immediately attended to, by a worthy officer of the ward, not far from the fpot, the club was removed to the Fountain, in Fetterlane, and again hunted from its new retreat, till they ultimately fettled at the Scots Arms, in Little Britain, and were as numeroufly attended as at any former period : here they continued the greateft part of the winter of 1797, but being compelled to leave it, through the magistrate's interference, the landlord was afterwards deprived of his licence for entertaining them. Its next ftage of existence was at the Golden Key, near Moor-lane, Moorfields; but here it attracted fo great a concourfe of attendants, that the landlord, dreading the confequences, warned them away: this was alfo the cafe at another house, near Union-street, Moorfields; till, adjoining to the British Winehoufe, near Hoxton, beyond the limits of the city-officers, they carried on their difquifitions, near two months, without meeting with any new embarrassment.

In the interval, between the fpring of 1795 and the period laft fpoken of, feveral other focieties, upon a fmaller fcale, had been fet on foot: one of thefe, the next, in point of promife, to that of the Green Dragon, was intitled, "The Moral and Political Society," who, like the former, converted their place of meeting, near Bunhill-row, into a Debating-room. A few revolutionary pamphlets, written and printed at the fociety's C 2 expence,

expence, were published, during the interval to which I have alluded.

Similar meetings were alfo held at a public house, near Grub-street; and another, near the quarters of Moorfields.

Another, and one of the last places of any note for the exhibition of infidelity, in the eastern district, was at a Hair-dreffer's in the High-ftreet, Shoreditch, where a theological queftion was debated, on a Sunday evening; but, as no money was taken at the door, the law, then in force, was evaded.

Several other fmall branches fpread themfelves in the neighbourhood of Whitechapel, Spitalfields, and Hoxton; but were not of fufficient notoriety, or duration, to merit much attention.

The Weft end of the metropolis, having in the mean while attained to a degree of rivalfhip, in confequence of an affociation, in Wells-ftreet, Oxford-road, where the members were permitted to recite their own productions; and another, on a Sunday evening, much more numeroufly attended, viz. the Angel, in Cecil-court, St. Martin's Lane. Those nearest the city were, in some meafure, deferted; but, as they closed their de-, bates fooner than those at the west end of the town, fome of the fpeakers contrived to exhibit at two places on the fame night: even the weather prefented but few obstacles. The visionary expectation of a new order of things, it is prefumed, often vibrated from the imaginations of the leading members to their fingers ends, and rendered them lefs fenfible of the operations of the elements than the vulgar herd.

The Wells-ftreet Society being diffolved, in confequence of fome difagreement among the members, the whole focus of Deifm and Atheifm

Digitized by GOOGIC

was concentrated at the Angel, in Cecil-court, St. Martin's Lane, where a mingled difplay of real talent and miferable imitation was continued, on the Sunday and Wednefday evenings, till Februry, 1798; when, without any previous notice from the Westminster-magistrates, as had been customary in the city, a period was put to this promifing fchool; the whole of the members, and others prefent, being apprehended, and, the next day, obliged to find fureties for their appearance, to anfwer any complaint, at the next Quarter-Seffion, at Guildhall, Westminster; but no bill being found, the bufinefs ended with the withdrawing of the recognizances of the parties, 57 in number; which would certainly have been doubled, if the police-officer's, fent to apprehend the club, had flayed till the bufinefs of the evening had commenced.

This meeting was then deemed wholly political! an idea which could have no other foundation than the filly appellation of citizen, made use of by the members; or the circumstance of its being attended by John Binns, who was apprehended. about the fame period this fociety was diffurbed, in company with Arthur O'Connor, in Kent. This unexpected ftroke of justice, however, put the last hand to the Sunday-night meetings, at the welt end of the town; the affociators in that quarter, after holding a few thin fittings, at a houfe near Compton-ftreet, Soho, being completely difperfed. Previous to the establishment of the club at this place, another had been continued a confiderable time, on a Wednefday evening, at a public houfe, the corner of Long-Acre, opposite Newport-Mar-Here, as well as at the other places, the ket. questions agitated were partly religious, and partly political.

In all thefe places, where anti-religious opinions were ftated, it was furprifing to obferve how ftrongly their novelty attracted the public mind. The perfection to which the orators had attained, by a long practice, was fuch, that had commodious apartments been opened in any of the neighbourhoods, occupied by working people, their can be no doubt of their commanding large auditories. The zeal and energy of the speakers, as there were few, very few, whole judgement was matured by time, had also great weight in making converts; for, among the lower orders of people, an extemporaneous harangue, against the ministers of religion, had an effect not eafily imagined. This was particularly noticeable about Spitalfields, when, as the French fystem of politics infensibly attached itfelf to the auxiliary ideas of prophefies, fulfilling on the Continent, it would be difficult to fay, where the effects would have ceafed, had time been given to obtain that confiftence wifhed for by the vifionary movers of those irritable bodies.

It may be objected, that these clubs were only frequented by low and obscure characters; but fuch, it may be remembered, were Mailinello, the Fisherman of Naples, the Cobler of Metlina, and many others: though the objection does not altogether lie against the focieties in question. They were, for a time, fanctioned by some perfons above the common rank; by their fortunes and professions in life. Among these, a singular character used to be remarked, being in the habit of attending in a large round hat, nearly the size of an umbrella, bordered with gold-lace; and he had other eccentricities, which he used to vary according to caprice. And to fortune and talents, might be added, an enthusias and the other second the second to the se

the most infensate to act against what was deemed a *fpiritual tyranny*, in the compulfory payment of church-rates; to the amount of a few pence per week! A favourite theme with fome of the club-orators; with one of whom, it used to be a common-place observation, that, " There " could not be a more awfuller fight in the world, " than to fee a Bishop rolling about in his cha-" riot." Of another of these enthusiasts it was mentioned, " That it was with difficulty he could " reftrain the most violent feelings, whenever the " prefent Archbishop of Canterbury passed under " his window." After these traits of club-characters, and among men with whom private affaffination was looked upon as no crime, one might think, that even what has been contemptuoufly called the pop-gun plot did not deferve that air of incredibility and mystery thrown upon it by fome writers.

Still as the reins were then held by government, very little was to be feared from any overtacts among these descriptions; though, if there temporary ebullitions of zeal could be deemed a fair criterion, this negative obedience might be imputed more to a want of power than of will. Vain glory, and a blind refentment, as filly as it is favage, often hurry men into the wildest extremes.-I am an Atheift! exclaimed one of those perfons, and, jumping upon a club-room table; here, faid he, holding up an infant, here is a young Atheift! Another, to fhew how little he regarded the Bible, obferved, at another meeting, " That " just before he came from home, he kicked fome-" thing before him, and, picking it up, what " fhould it be but an old Bible; that, till then, " he did not know he had any fuch thing in his " houfe!" A third philosopher, cenfuring the prefent.

prefent mode of education, obferved, "There "would never be any good done, till towns and "cities were built without a fingle church, cha-"pel, or any place of worfhip, in them!" Another member, being weary of the deliberations at which he was prefent, exclaimed, "What fignifics our "fitting here? let us go and kill all the bl-dy "prie/ts!"

I mention these instances, only as the effects of a party spirit, breathing sentiments by no means natural, but merely forced from the hot-beds of the clubs.

It fhould be obferved, that as apprentices were admitted into thefe affemblies; and, according to the modern notions of equality, eligible to the chair; fo fudden a transition, from domeftic inferiority to professional importance, often turned a weak head: and, if the fame extremities had been proceeded to as the religious fanatics of the last age were engaged in, the London apprentices might again have distinguished themselves, and the cry of no king followed that of no bistop, as a natural confequence.

But in hinting at a parallel between modern democratic zeal and the fanaticifm of the fixteenth century; of the latter I ought to beg pardon.— A degree of monftrofity, fufficient to make any humanized being fludder, feems to have been referved for the Englifh Clubbifts and Anti-Religionifts of later times.—I allude to a common toaft, which ufed to be received among them with acclamation, viz.

" May the last King be strangled in the bowels of the " last Pricst !!!"

In afcribing fo much of this intemperate zeal to party-fpirit, youth, and inexperience, every candid

candid mind will acquit me of any charge of partiality or mifreprefentation. An observation of Mr. Neckar's may probably confirm the propriety of the prefent application, by exhibiting a striking similarity between the modern Freethinkers in France and those in England: "We " now reckon, fays he, among those who oppose " a contemptuous fmile to religious opinions, a " multitude of young people, often incapable of " fupporting the most trivial arguments; and who, " perhaps, could not connect two or three abstract propositions: these pretended philosophers art-" fully, and almost perfidiously, take advantage " of the first flight of felf-love, to perfuade be-" ginners, that they are able to judge, at a glance, " of the ferious questions which have eluded the " penetration of the most exercised thinkers."

Inftead then of reckoning, as many perfons have done, upon the total abolition of Christianity, and fondly anticipating the *acquirements* of the next generation, as wholly Infidel, it should have been made a question, Whether the present generation of the French will retain its Infidel principles after its judgment is matured, and the hey-day of revolutions has subfided?

<sup>•</sup> But, to return; at the fame time that all thefe energies were called forth in the clubs, it became another branch of the duty of the members, and their partizans, to attend, perplex, and harrafs, by all poffible means, the itinerant preachers, in the vicinity of town. For inftance, during the fummer, of 1797, a very formidable party were organized, and affembled, every Sunday morning, at feven o'clock, near the City-road: here, in confequence of the debates, forced upon the preachers or the hearers, feveral groupes of people would remain upon the ground till noon, giving an op-D portunity

portunity to the unwary paffengers to become acquainted with the dogmas of Voltaire, Paine, and other writers, of whom they might have remained in ignorance; in fact, the fields were reforted to, by the new reformers, upon the fame principle as a fportfman goes in queft of game:— "We fhall be fure to find fome Chriftians in " the fields" was the ftanding reafon for thefe excursions.

So indefatigable were these propagandists in their labours, that, befides their attendance on the Sunday morning, in confequence of which the groupes would remain till noon, they were again affembled from three or four in the afternoon; and, if the weather permitted, retained till eleven at night; and this not in one but various parts of the environs of this metropolis. The cavilling parties, engaged in this bulinels, demurred at no diftance of place; being as ready to attend at Hoxton, Hackney, or Hornfey, as at their own doors. One of these bodies, I was afterwards informed, used to meet, every Sunday morning, in a garden near Bethnal-green, and, after fpending fome time in reading and commenting upon Paine's Age of Reafon, distributed themfelves for the purpofes above-mentioned.

In fine, this opposition from Deifts and Atheifts was carried to fuch extremes, that, in 1798, the magistrates were compelled to put a partial stop to field-preaching; till that period, as common and habitual in the eastern suburbs, as it had been in Moorfields, previous to the erection of Finsburyfquare. A measure prompted intirely, by the advantages taken by the Infidel party, to propagate their absurd opinions with more effect.

In addition to the redoubtable army beforementioned, marshalled for every kind of attack, both

noife and alarm of the Field-Difputants. Thefe confifted of Mystics, Muggletonians, Millennaries, and a variety of eccentric characters of different denominations: I call them auxiliaries, becaufe, their ridiculous mode of defending, or enforcing, their different tenets only increased the objections to the Chriftian Belief, in the minds of those perfons before unhinged by the fubtleties of Infidels; and thus, unintentionally, an additional weight was thrown into the fcale of the common enemy, by those who had a zeal, but not according to knowledge. Among the latter, were two preachers, called Jew-Quakers, from the circumstance of their having but one beard between them; one fhaving the upper, the other the under, lip only: to thefe may be added, a Bird-catcher, and a Basketmaker, both well known as Holders-forth, and, of courfe, having their admirers.

All these grotefque characters, the Deifts and Atheifts, juftly confidered as fo many Punchinellos, whom those who held the wires behind the fcenes might play off, as best fuited their purpose; a position which a superficial observer might not immediately perceive: but I recollect an instance, in the summer of 1798, at the conclusion of a Field-fermon, when it was remarked, that, the Deifts did not oppose the Arian preachers with the fame virulence as the Trinitarians. The full force of the observation was admitted, while it was urged; as a reason for this forbearance, that, the Infidels confidered the Arians as doing a part of their business for them.

But befides the fields, and the division-rooms, the Infidel-propagandists made use of another me-

dium for fpreading their principles, in which they were but too fuccefsful: this was in the various Benefit-Societies, within the circle of the metropolis. Here, after the bufinefs of the evening was over, the difciple of Paine was fure to introduce the fubject of religion; and, by thefe means, feveral copies of the Age of Reafon were circulated, from the reading of which many of its victims dated their converfion.

But this infiduous mode of introducing the Age of Reafon having been fuccefsfully refifted by fome of the Benefit-Societies, who have complained to the magistrates of fuch diforderly members; the latter, finding their temporal interests at take, and not being inclined, by the new philofophy, to facrifice *principle* for *interest*, it is fuppofed, will act with more cunning in future; it being through diffimulation alone, and that kind of it, which a Christian would difdain, by which these obnoxious members have escaped the erasement of their names from the books of the Society, and, perhaps, in more than one instance, engaged the magistrates to prevent their exclusion.

The introduction of democratic fongs was another part of the duty of these political missionaries; but their talents were not confined to Benefit-Clubs, their butiness was to worm themfelves into convivial focieties of every kind; where, though 'fcuffiles have frequently ensued, these delegates have often succeeded in erecting a party, or an interest, which, otherwise, would not have had an existence.

Upon the whole, the difgufting licentiousness, coarfeness, and brutal indelicacy, too frequently apparent in those field-disputations, more than counteracted every degree of utility attending them. It

has feveral times occurred, that, when two perfons, rather ferioufly inclined, have been difcuffing the attributes of the Deity, a third has abruptly interfered, with what he has fuppofed to have been a fhrewd queftion, viz. " How do you know there is any God at all?"

Having now done with the delineation of these diffortured features of humanity, I shall now proceed to give an account of the establishment of a place of public instruction; always an important object with the Infidel Illuminati. The next chapter will therefore shew how far that establishment was founded upon a judicious or a fanatical estimate.

#### Upon the opening of a Temple of Reafon in the Spring of 1796.

T had long been a favourite idea of the Club-Orators, and Field-Miffionary Difputants, that exhibited upon a proper stage of action, their eloquence would be irrefiftible. Favoured by the French Revolution, they fondly imagined the time, for the explosion of the whole fabric of Christianity, had at length arrived; and that, to convert all fects from the abfurdity of Christian notions, nothing was wanting but the opportunity which then prefented itfelf, for proclaiming the beauties of nature, and unassified reason to the world at large. Flushed with these expectations, a committee was felected to meet at a public houfe, in Jewin-street; when, after a few adjourned fittings, being affifted by two gentlemen of the law, fomething like a fociety was organized; a fund adequate to the undertaking was deposited, and the name of the affociation agreed upon, to be that of the Friends of Morality. To keep up the fpirit of this inflitution, it was ordered, that no perfon should be admitted, unless known fome months, by more than one of the members, and that exclusion should follow any act of immorality; but in confequence of the trouble that feemed likely to enfue upon the adoption of this regulation, these modern Cato's were foon compelled

pelled to give up a measure, at first conceived to be indifpensibly necessary to support the character of this new establishment.

It being juftly conceived that every member was not qualified to deliver lectures in public, it foon became an object of high debate, in the committee, whether the lecturers fhould or fhould not be paid for their labours. And as any refemblance to the allowance of a flipend to a real or nominal fuperior was looked upon as rank fuperfitition, or of ariftocratic tendency, it required all the influence of the two lawyers, to induce the majority of the members to agree to a claufe in their articles, to allow half a guinea to each lecturer, by way of compenfation for his trouble.

A committee of managers was also appointed; but a card and fome emblematic divice being found a neceffary appendage, an engraver belonging to the body was employed, who produced a plate, exhibiting Truth with a fpeculum in her hand, concentrating her rays upon the figure of Error, recumbent upon the ground. Some of the committee, whose taste was not congenial to the fine arts, thought the charge of half-a-guinea most exorbitant, while others supposed that the artist, being a member, should have contributed the affistance of his talents without fee or reward.

After feveral fruitlefs attempts to procure a commodious place of meeting, owing to a variety of objections from the perfons applied to, Nichols's fale-room, in Whitecrofs-ftreet, being taken at a rent of twenty pounds per annum: by the contributions and labour of fome of the members, it was foon furnifhed with feats, a tribune, &c. Books being the next object; to accommodate fuch perfons as chofe to read before the Sunday lectures commenced, the members were called upon to contribute contribute their flock for the public good, particularly fuch works as militated most ftrongly against Christianity; but it fo happened, for want of better knowledge, that fome of the books fent into the depository, were written in its behalf! A circumftance fomething like the conduct of fome of the rioters in 1780, who being called upon to go to fuch a house, as they were *Catholics* there, replied, "What are Catholics to us? We are only against "*Popery*!"

After this room was opened, and looked upon, bona fide, as a Temple of Reafon, the opening being announced by the pofting of bills, it was imagined that the fuperiority of Infidelity would inevitably appear. The hopes of the leaders were equal to any thing, and fome of them, almost perfuaded themselves, they were the very perfons defignated by Dr. Priestley, but a few years before, for the important and momentous purpose of fetting fire to the train to long accumulating under the Eftablished Church, from the fucceffive contributions of inflammable matter, by Arians, Socinians, and other Schifmatics. From this opinion, and the promifing æra of preaching the doctrines of Deifm, &c. in the fields, which was partly contemporary; an æra, which appeared to have been referved for the year 1796, portentous of the Millennium of Infidelity, and of which, the newly-opened Temple of Reafon was viewed as the immediate forerunner. It was therefore not ftrange that the most active members should expect to have their names handed down to posterity, as the reftorers of religious liberty, which was first to eradicate fuperfitition and flavery from this ifland, and afterwards, fupported by the French Revolution, make the tour of Chriftendom.

Refpecting

Digitized by GOOGLE

Refpecting the external economy of this new Temple, as the acts of prayer and praife were exprefly excluded, the defects of folemnity or imprefion upon the attendants, may eafily be conjectured. Simple as the worship of the Quakers, without their gravity, fingularity in drefs, &c. each perfon that mounted the roftrum feemed rather to be trying his talents than employed in any ferious undertaking; and, while the doctrines of the new philosophy, as far as they related to morality, were much too general to fuit any particular purpofe, the feelings of the impartial hearer, who justly expected the new religion would fuperfede the old, were invariably those of furprize and disappointment.

It was the endeavour of the most rational members, to confine the lecturers to the delivery of their fentiments upon morality, abstractedly, without reference to Christianity, or any other fystem : but this the majority of the members oppofed, well perfuaded, that, deprived of the most copious themes of argument, or rather declamation, they would entirely lofe the command over the paffions of their auditors, and, of courfe, become more infipid and uninteresting than any of the profeffions they were determined to condemn.

This being the temper of the chiefs of this new Temple of Reafon, the lectures there delivered were generally compiled from the writings of Voltaire, David Williams, and other authors, diffinguifhed for their rancour or prejudices againft Chriftianity. As for the decorum, indifpenfably neceffary in every kind of worfhip, or public inftruction, the strangers that attended this institution could not be lefs influenced by it, than the members themfelves; as, from the opening of the place, from ten in the morning till one, and on

E

on the Sunday afternoon, till the moment of the commencement of the lectures, the time was invariably fpent in farcaftic or facetious converfation. across the tables, between the members; and, from the noify approbation this entertainment occasionally produced, it was difficult to determine, whether amufement or aftonishment preponderated in the minds of the audience at large.

As these boasted philosophers were ignorant of the force of motives, and of fuch doctrines as influence the minds of individuals, it was not unaccountable, that a laxity of attendance among the members foon produced a fimilar difposition in ftrangers; fo that, notwithftanding the additional notice which the place attracted, in confequence of a diffurbance by fome intruders, and the statement of their examination at one of the police offices, in fome of the daily papers, the fociety, finding all their declamations " wasted upon the defert air," at length agreed to fhut up the Temple till a more convenient feafon; for, at that period, it was not thought impossible but that, in a few months, the preffure of external circumstances, and the co-operation of the New Apostleship, might occafion the conversion of St. Paul's Cathedral into a Temple of Reafon! No one forefeeing, that, in the fummer of 1799, the Theophilanthropic Temple, at Paris, would fhare the fate of its humble imitator at Nichols's fale-room in Whitecrofs-Street, notwithstanding the fupport of Thomas Paine and other eminent characters.

Thefe uncontroled experiments upon the lower orders of fociety in this country, among whom credulity is ever the ftrongeft, must completely invalidate the plea of Infidels against the restraint of the civil law, and the old pretence, that Christian

anity is obliged to the fecular arm for its fupport.

It may be asked, what power restricted the Theophilanthropifts in the performance of their worship at Paris? The government was not only in their favour, but the public mind had been training for years for the reception of their notions, from the writings of the whole tribe of French Atheifts, in which, as Mr. Courtenay observes, a constellation of genius feemed united. Thefe Atheistical tenets, he justly remarked, were diffused in every species of writing, and the dulcet poison was greedily imbibed in every part of Europe. The most poignant ridicule, the finest fallies of wit, and the most brilliant traits of imagination, threw a falfe luftre over this deceptious fyftem; the pernicious dogmas of their fchool captivated the attention, and were conveyed to the heart in the enchanting page of a novel, amidit the feigned adventures and paffionate endearments of lovers. But the luminous fcrutinizing genius of Montefquiou, the fplendid levity of Voltaire, the impaffioned and fascinating eloquence of Rousseau, the precision and depth of D'Alembert, the bold and acute investigations of Boulanger, the daring paradoxical fpirit of Helvetius, the majeftic fublimity of Buffon, the profound aftronomic refearches of Baille, the captivating elegance of Marmontel, and the imprefive condenfed thoughts of Diderot, have not, as the gentleman concludes, "unfettled the confecrated opinions of ages, nor thaken the venerable gothic structure from its very foundation." For, on the contrary, this many-twinkling meteor of Infidelity, after blazing its hour, has paled before the milder radiance and commanding luftre of the gofpel luminary, the doctrines of which, are not extraneous, but congenial to human nature.

The

The new philofophy, it is granted, may adorn the head, but these ennoble the heart. This wisdom may be allowed to bear the impression of human reason, but it will never pass current with weak and wounded humanity! It is formidable in books, but contemptible in life: in argument ftrong; in practice weak: a coin which may be kept for shew, but not for use: it is a counterfeit, and its detection, by the standard of experience, now enables us to fay, with a confidence approaching to mathematical demonstration, and oracular authenticity:

### "Thou art weighed in the balance, and found wanting."

Yes, ye Atheifts, it is true that our minds were confined in a narrow region, while our imaginations were delighted with the fmiling heavens above, and the rich diversity beneath. But what have we obtained of you in exchange? To the fruitful, though bounded view of hill and dale, has fucceeded the immeafurable defert! Amazement was our first fensation at the magnitude of the profpect; but now our eyes are appalled, and our hearts ficken at the famenels of the fcene. Here the heavens above are as brafs, and the earth as iron beneath our feet. Our ears are torn by the fcreaming of the bittern, or alarmed by the howling of the beafts of prey. The voice of the turtle is not heard in this land, and the time for finging birds never comes.

But again, to advert to the hiftory of this grand failure of Infidelity; that the fatal experiment was not tried upon a much larger fcale, is not to be imputed to the want of will in the perfons engaged, but to the falutary prevention which originated in another quarter: for no fooner was the opening of the place laft deferibed known in the country,

country, than a notice was given in that affembly, "That if any perfon, qualified as a teacher, could "make it convenient to leave town, a Society, at "one of the Weftern ports, could infure him from "1501. to 2001. per annum." Nor is it ftraining any probability to fuppofe, that every affembly of this nature would eventually have formed itfelf into a political body, the confequences must then have been obvious.

The project for diffributing the miffionaries of Deifm and Democracy about the country, it feems, had certainly been acted upon, to a certain degree, anterior to the period I have juft alluded to, when, as the Bifhop of London obferves in one of his Lordship's charges to his clergy, that, to his knowledge, the Age of Reason had been circulated among the miners in Cornwall. A degree of mischievous industry, unknown to the original propagandists of the continent, whose impious labours, as far as I have heard, terminated upon the staid,

Upon the common Prejudices in Favour of Debating Clubs; and the immediate Influence of the late Affociations, upon the Families and Connections of their Members.

**PERHAPS** the long practice of agitating civil and religious fubjects, in various focieties, has lent too much firength to the hitherto prevailing opinion, that fuch verbal difcuffions did certainly tend to the eftablifhment of truth, and the detection of error. But fpeaking from long experience, at leaft, ever fince Infidelity has been at iffue with the eftablifhed religion of the country, these falutary effects have been fo few, as to be fcarcely perceptible.

Indeed, the majority of attendants upon thefe places, both of former, as well as recent date, have been led, by fucceflive gradations, to doubt of the very fundamentals before admitted ! And he that began with fcruples, concerning fome parts of revelation, has commonly ended with queftioning the existence of a God ! Thus Circe transformed men into beasts, but Atheism converts them into monsters.

The fuppolition of a candid difcuffion in thefe affemblies is a mere farce; for in proportion as party-fpirit enlarges its fphere of action, candour is uniformly joftled out of its place. The number of hands held up, for or against a question, is always more attended to, than the weight of the arguments

guments in its favour; nor has any kind of ridicule been fpared by the Infidels to enfure fuccefs over the Chriftians, when other means have proved abortive.

It has been intimated before, that the London Corresponding Society, by adding Deifm .to its politics, engendered the feeds of its own destruction: and, in fact, many of the leading orators, as if they were aware of going too far, after depreciating the character of the Saviour, in their harangues, used frequently to add the ridiculous affertion, " That they believed Jefus Chrift was a " good republican." This mifchievous levity, this fuperficial disposition, was carried into every scene of private, as well as public life. Having , no tafte but for fcandal and declamation, among the multiplicity of publications which they fanctioned, no work upon the relative duties, no work inculcating moral or religious obligations to virtue, was either called for, or made its appearance. Volney's Law of Nature, or Catechilm of Reafon, published by Eaton, is the only exception to this charge : but as an unerring indication of Infidel propentities, in a hundred houses furnished with Paine's Age of Reafon, the former was not once to be found ! Neither Plato, Socrates, nor Antoninus, though praifed by Voltaire, had any charms for the turbulent disciples of Paine and. Mirabaud: and hence the advice of a parent or mafter, for the want of fome ftanding rule or authority, is generally weak and ineffectual; a defici-. ency frequently increased by the difference of opinion between a man and his wife. The woman, we will fuppofe, even from habit, prefers feeing her children dreffed, and at church, on a Sunday; but not to difoblige her enlightened hufband, who has read the Age of Reafon, this is a point fhe gives

gives up; the children remain all the forenoon in their every day drefs, or ftray into the fields, where they contract vicious habits; and thus, all the obligations that refult from a place of public worfhip; the influence of a copious hiftory of ftriking examples, and the fanctity and authority of ages is loft and evaded. But if a difpofition for reading is in any degree indulged, the fublimity of the facred Scriptures is perhaps bartered for the effusions of fome fuperficial or political pamphleteer!

In fact, the whole fystem of domestic economy feems reverfed, by the introduction of deiftical no-I have observed, that the heads of many tions. industrious families, who, previous to their illumination, made it an indifpenfible duty to appearabroad decently dreffed on a Sunday, would afterwards not only remain the whole day in their working dreffes, to fhew their contempt of the Christian Sabbath, but fpend it at home in fottishnefs and flupidity. And yet Paine's Age of Reafon, Godwin's Political Juffice, &c. have remained upon their fhelves, and full in the fight of their poffeffors during the whole time! Others, who before, were honeft and frugal, have become knavifh and luxurious; and while their tables were covered with all the varieties of the feafon, could, without fcruple of confcience, defraud their poorer neighbours of their just dues. In other instances, felf-mu der has put a period to thefe fatal deviations. from order and decency. Thus the minds, even of adults, after foaring for a fhort period in the vacuity which they were taught to confider as an en-. lightened region, undetermined what object to alight upon, have funk at length into the muddy pools of vice ; or having nothing 'more to hope for, embraced that dreary fcepticifm which cannot promife a fafe conduct through this temporary exiffence :

iftence; from hence, thefe unhappy fubjects have not unfrequently fallen into a fituation fo truly deplorable as to baffle every remedy, but have lived the aftonifhment of all who knew their wanderings, and died without regret!

Instead then, of the Millennium, which modern Infidels had promifed themfelves from the number of their converts, what has been the confequence? Their public and private efforts have equally failed; and, lastly, a number of their members have left them fpontaneoufly, convinced that their notions upon matters of faith could never be attended with any wholefome effects; a mode of conduct, as I have before observed, fimilar to that of many members of the once famed Robin Hood Society. Nor is there any thing which an Infidel ought to dread more than the reaction of his own principles upon himfelf, from his inferiors or his dependants : I have known a recent inftance of a fervant refufing to pay a just debt to his mafter; and, in reply to his reproof for fuch conduct, he pleaded his mafter's pre-inftructions! The latter it feems, had made him his companion to the Clubs, and had frequently told him, "There was no account to be taken hereafter of actions in this life."

There was another fpecies of inconfistency, which materially checked the diffemination of Infidel opinions in private families; that is to fay, the propenfity of feveral individuals to attend places of Chriftian Worfhip, though in the conftant habit of declaiming against them all! When fuch perfons were asked the reason of this conduct, their answers generally were, that they went merely for amufement, or, that the Preachers making excellent moral difcourfes, they supposed no harm could be taken; a tacit confession of the weakness of their own fundamentals: but not refting here, this pro-K

duced a firong propenfity in their children or fervants to doubt their fincerity in other refpects, and frequently gave the whole of their objections againft Chriftianity the caft and colour of prejudice. Now thefe involuntary teftimonies to the natural power of religion upon the human mind, may be urged fo far as to prove, that while Deifts and Atheifts are appealing to *Nature* for the juftification of their irreligious opinions, that fame *Nature*, is confirming the truth of the Chriftian fystem, by compelling them, as it were, to fanction certain acts of divine worfhip, in fpite of their opinions, and the fystem they profefs

#### Naturam expellas furcâ, tamen usque recurret.

Thefe charges I prefume, belong to that clafs of facts, which no fophiftry can remove; but, as many of them will neceffarily appear new, not having been urged by former writers against Deifm, let it be remembered, that Infidelity having never gained fo much ground before, among the common people, 'the fcope of obfervation was proportionately narrowed: for, till the Age of Reafon was adopted by the political focieties in the metropolis, Deifm, to fay nothing of Atheifin, was rather the affair of a few isolated individuals, than, as it has been fince that period, the concern of a confiderable part of the community. Another inftance of the weaknefs and inferiority of modern infidelity is, that manifest want of paffive, or fuffering, virtue, which feems to be a natural refult of the laxity of its principles. The Infidels therefore, had they continued a rifing fect, could never have been formidable; paffive virtue, in a civil or a religious body, being the fame as discipline in an army: wanting it, both would act without energy, or be fubject to a fpeedy diffolution.

tion. How unlike, then, are these philosophers to the Original Quakers, whom they are fond of proposing as a model to other Christian denominations! These Quakers, raised themselves into confequence by cherissing the virtue, in which their modern panegyrists are most deficient: the true ground of their increase was a perseverance, arising from motives universally discountenanced by Deists and Athesis, that is to fay, a hope of reward beyond the present life.

· In all the recent declamations against the Christian Religion, it is a principal charge that its minifters are the most fordid and temporizing beings upon earth. But how stands it with their accusers ? As far as facts can fpeak for themfelves, I answer, that, when their domeftic concerns, or finderity in what they profefs, does, as occasion offers, demand any facrifice of *interest*; principle is generally given up in its room, with very little fcruple; an affertion, which if neceffary, could be justified by a number of inftances. Chriftianity, on the contrary, daily exhibits its nobler facrifices of a present for a future good ; a virtue arifing from a temper totally incompatible with the Infidel fystem, which admits of nothing beyond time and fenfe, and thus excludes the poffibility of exercifing this duty towards man; and a due confidence in the Creator. Of the philofophers, it has been justly faid;

Mais ils n'élevent rien."

Proceeding upon these false principles, while modern Infidels have promised themselves happiness and unanimity in their families, discord has followed. Among others of this class, the man who has taught his children to avoid a place of worship, as a place  $F_2$  of

of infection, will neverthelefs fend them to Church, if education and an annual fuit (for which he could pay) are the conditions of their attendance; or rather than his new-born infant fhould lofe the prefent of a frock, the good graces of a godmother and a few goffips, he will fubmit to have it baptized, and fill continue to upbraid Chriftians, as the moft abfurd and inconfiftent beings in the univerfe !

Another, if a place is to be obtained under government, has no objection to receive the Sacrament as a qualification; and thus it happens that modern Infidelity inftead of reforming, tends to increafe the number of hypocrites!

As a farther proof of their profitution of confcientious rectitude, a recent inflance has occurred of the difappointment of a Benefit Society, in their wifh to exclude a member for boring them with Paine's Age of Reafon; and who, much to their aftonifhment, to obviate their complaints, did not refufe to take an oath before a magiftrate, and to profefs his belief of that Bible which it had been his conftant endeavour to difcredit!

From fuch temporizing conduct in parents and mafters of families, what muft be the inferences of the children? Will they regard the precepts which are continually at variance with the practice of thofe who recommend them? Certainly, whenever the Infidel attempts to realize his theories, he betrays the moft confirmed ignorance of human nature. A want of fympathy and commifferation is alfo a common failing with thefe pretenders, who have at the fame time fome theory or other, conftantly in their heads for leffening the evils in fociety—which defect may perhaps be imputed to the fyftem of fatalifm, pretty general among them. If an Infidel refufe to contribute to the neceffities of his brother, he may tell you he has no motive,

not

not being a free agent; and in this cafe may laugh at any reply that can be made to his objection. To infift upon the fuperiority of the Christian Religion, which fuggefts fuch a variety of motives for repeated acts of humanity and benevolence, would be needlefs; I fhall, however, state one instance: a perfon, known as a profeffor of religion, being folicited to join with others for the relief of a third perfon, confined for a fmall debt, at first started feveral objections; but, faid the folicitor, fuch a one, and fuch a one, have come forward, and can you as a Christian refuse to contribute? This being an argument ad hominem, which he was unable to refift. he gave liberally. But as the Book of Nature, fo much boafted of by Deifts, is not fo express upon this fubject as the Book of Revelation, fuch an appeal as I have just cited, cannot be made to an Infidel.

As it must be evident to every reflecting mind, that our hopes and fears are the ftrongeft motives of all our actions; to expatiate here upon the difference between ancient and modern Deifm would be unneceffary. To those not verfed in the ancient Pagan fystems, I shall only observe, that while *modern* Infidels are too wife to admit of any future rewards or punifhments, the ancients had their expiatory facrifices, purifications, retributions, and judgment after death. These doctrines, instead of destroying every medium which could affect the heart, or fix the imagination, prefented and propagated an infinity of ideas and motives of confideration; while the modern philosophy, urges and infifts upon nothing beyond a bare probability ! A motive which is often too weak to operate upon difciplined and exalted minds, and confequently is · not in the leaft degree qualified to arreft and fix the groffer and more perverted apprehentions of the profane profane and vulgar; even the Pagan Polytheifm, was as much fuperior to the inanity of modern Infidelity, as Chriftianity is to both of those fystems.

Thus we have had a fpecimen of philofophers, without philofophy, and reformers, unreformed: men, of whom, in the language of Jude, we may more truly fay, "Thefe are clouds without water, " carried about by the winds, wandering ftars, " raging waves of the fea, murmurers and com-" plainers fpeaking evil of dignities."

I should have observed, when speaking of the inferiority of modern Deifts and Atheifts to the ancient Pagans, that the notions of the former have a tendency to render every plan of education, vague and uncertain. For, being anxious to fupprefs any idea their children may entertain of a Being, or Beings, fuperior to men, they are neceffarily excluded from most of the benefits which the imagination derives from works of tafte and the history of antiquity. The fystem of modern Infidelity, if fuch it may be called, has not the leaft congeniality either with Polytheifin, or the Chriftian Faith. Equally defpifing Heroes and Demi-Gods, Saints and Angels; Infidels can never be elevated with exalted ideas of purity or fuperior excellence : and of courfe, befides being deprived of the pleafure of wandering in the flowery fields of ufeful and agreeable fiction, they may lofe all the motives to virtue and piety, which mulic, painting, and poetry, are well known to inculcate.

To every one of these degraded mortals, who pride themselves in being nothing more than mere organizations of matter, this fine appeal of the minstrel does most forcibly apply,

Oh! how canft thou renounce the boundlefs flore, Of charms, which Nature to her vot'ry yields?

The

All that the mountain's fheltring bofom fhelds, And all the dread magnificence of heaven,

Oh! how can'ft thou renounce and hope to be forgiven! BEATTIE.

Thus, all thefe low and obfcure puddles which I have defcribed, flowing through fuch a variety of channels, have at length fettled in the ftagnant pool of French Atheifm, which few have paffed in fafety, where many have perifhed, and in which many others may plunge, during the term of their existence.

But even this, like the deadly lake of Sodom, has its fruits, goodly to the eye, but mortal to the tafte; and perhaps the fpecious appearance of Atheiftic virtues was never more aptly illuftrated than by the remark made, upon the French philofophers, by the late Emprefs of Ruffia. See Profeffor Robifon's Proofs of a Confpiracy, page 52, 53, 54. The natural inanity, froth, and vapour, of thefe philofophical bodies, have appeared in various inftances, fince the period of their visible decline; the defection of a number of perfons, from the principles they profeffed, while in a collected flate, having proved, that they were only held together by the vociferation of a few flippant leaders, ignorant that *Religion is natural to civilized fociety*.

It has farther appeared, that many, even while they remained with them, fo far from being convinced

vinced by Infidel arguments, only wanted fome perfon upon whofe judgment they could rely, to bear them out in renouncing the whole, or the principal parts of their new creed. And this recantation, it feems, was long declined by others, left their *civifin* fhould be called in queftion; *Deifm* and *Democracy*, as it has been obferved before, being deemed infeparable qualifications.

Thus, as in France, fupported by external agency, the meteor, which they falfely denominated, the Light of Nature, might longer have continued to aftonifh the multitude; but even this admiration muft have ceafed, when they found its rays afforded no genial warmth; that it led them into a tracklefs void, and, after exposing them to all the forms of adversity in this life, left them without hope of recompense beyond the grave.

But, of the Christian fystem it has been elegantly faid,

" Religion is a gen'rous lively flame,

" That brightens, not deforms, the human frame :

" A lambent light, around the heart it plies,

" Not like a fury, threat'ning in the eyes.

" No four reftraint, no forc'd concern it wears;

" No public fighs, no oftentatious tears;

" No felf-applauding boast, no love of strife ;

" No fpleen against the blameles joys of life.

" As far from these are Piety's sweet charms;

" As fettled courage from confus'd alarms;

" As folid Reafon's calm confiderate train,

" From the wild frenzies of a moon-ftruck brain."

Upon feveral recent Caufes of Scandal upon the Eftablished Religion.—Uncommon Increase of Itinerants.—Lady Ann's Preachers.—Visiting Preachers at Workhouses.—Societies for relieving the Poor at their own Habitations.—Character of the late Rev. Mr. Richards, Curate of St. Sepulchres.—Rev. R. Southgate.—Origin of the Swedenborgian Worship.—Popish Emigrants,

NE of the principal evils, the fubject of the prefent complaint, originates in the increasing and unprecedented number of preachers in what is called the Methodiftic line, or at least, in the Calvinific department of it, patronized by a Lady, the fuppofed fucceffor, to the Counters of Huntingdon, and hence commonly called Lady Ann's preachers. This defcription, befides fuch of them as obtain appointments within doors, are generally to be found haranguing the paffengers on a Sunday, during the fummer-feafon, in the Spa-Fields, or in the avenues leading to Islington, Hackney, &c. most of them beardless boys, and mechanics or labourers by profession, whose ignorance of their mother-tongue is not to be equalled, fince the bufinefs of out-door preaching was lain down by Oliver's preachers.

Many of the former, well known to perfons acquainted with them before their metamorphofis, have contrived to appear out of doors, decorated in a gown, before they were well miffed from their

Г

fhop-boards! What qualifications are deemed neceffary to authorize fo fudden a change into a clerical habit I have never been able to learn, unlefs volubility be miftaken for elocution.

That feveral of thefe upftarts were apprentices at the time they commenced their minifterial career, particularly one of them, who fancied he was fent to call the Jews, (in Duke's Place) is a fact notorioufly known. Hence the most naufeating egotifm, and the want of every requisite, except affurance, are fufficient to make religion its fift (in the eyes of the undifcerning) acceffary to its own difgrace, without the additional ridicule of Deifts and Atheist, who are happy in the opportunities of charging the follies of a few upon the whole profession.

Numbers of the fame clafs, as to ability, have alfo obtruded themfelves as miffionaries to foreign parts. One of thefe, now a carman to a tradefman near Smithfield, was abfolutely fhipped for Sierra Leona, foon after that colony was eftablished, but was obliged to return in confequence of a difagreement with the natives.

Though not generally known, it is no lefs a truth, that feveral of the workhoufes, in this metropolis, have been ufed as places of training and exercife for, fome years paft, by thefe fanatical adventurers. Some of them, for what they term exercifing *their gifts*, abfolutely give the poor women in thefe houfes a few halfpence, on a Sunday, to purchafe fnuff, tea, &c. which is again charged to thofe who employ the preachers, as a part of their ordinary expences,

At fome of the workhoufes, according to the difpolition of the governors, the viliting preachers receive fmall gratifications for their labours; for inftance, a poor creature, now in the habit of attending Clerkenwell-workhoufe, generally receives a

glafs of gin, as the reward of his vifit, and is farther allowed the privilege of trucking with his humble auditors for the houfe allowances of pudding, cheefe, &c. with which he fills his pockets, upon his return home from what he calls his fermon! This is the fame perfon mentioned in page 19, in the double capacity of bird-catcher and field-preacher.

Till a regulation happily took place, a few years fince, fome men of this character used to force themfelves upon the malefactors under fentence of death. In conformity with the complaint, here advanced, it has been the opinion of feveral judicious observers of the manners and morals of mankind, " that " great hurt has been done by the fanatical conver-" fation, the vifionary hymns, and the bold and im-" pious applications of the Scriptures, by fuch " people above defcribed, when attending con-" demned malefactors. It cannot be denied that, " in confequence of the most culpable prostitution " of facred things, many daring offenders against " law and, juffice have had their paffions and ima-" ginations fo worked upon, and have been fent into " the other world in fuch raptures, as would much " better become martyrs, innocently fuffering in a " glorious caufe, than criminals of the first mag-" nitude." In fine, the conduct of these immoral preachers of religion appeared in fo odious a light, a few years fince, that it induced the magistrates of the city of London to confine the office of attending upon the prifoners in general to the Ordi-- nary of Newgate; but, being refuted there, I can fee no reason they should gain admittance into the workhoufes.

A poem, called the Literary Cenfus, which I have before me, thus defcribes fome of the characters, who are the conftant means of heaping fcandal upon the established religion.

In a note to page 88 of this pamphlet, I find the opinion of this ingenious author, upon the multiplication of these fanatical schifmatics, exactly fimilar to the impressions I had previously entertained, from a consideration of their conduct; I have therefore taken the liberty of transcribing it at full length.

" The incalculably rapid increase of these lo-" cufts, and the obloquy their frantic demeanor, " ignorance, and vulgarity, entail upon true reli-" gion, and the respectable part of the clergy, " render the interference of the legislature indif-" penfably neceffary. Mr. Mainwaring, to his credit, has " exerted himfelf, as far as the power vested in him " by law will permit, to suppress this unfufferable " nuifance; but, as the law ftands at prefent, the " hands of magistrates are tied, and they scarcely " dare refuse a licence to the most contemptible ".blockhead, who believes, or wifnes to make " others believe, he has received a call. I am " credibly informed, and I honour the gentleman " for his conduct on the occasion, that the magif-" trate whom I above named experienced fome " difficulty in rejecting the application of a mean " defpicable wretch, who, upon being queftioned " what profession he followed, proved to be a bellowsblower

" blower to a forge, and was fo fhockingly illiterate, " that he could not even tell the letters of the " alphabet. The fubjoined lift, of fome of the " recently-ordained retailers of the Gofpel, was " communicated to me, by a worthy and religious " friend, and will ferve to illustrate the propriety " of the preceding remarks:

Mr. Norton, Mr. Wilfon, Mr. Timothy Hinds, Mr. Saunders, Mr. Colfton, Mr. O------, Mr. Downes, Mr. Hickup, Mr. Staunton, Dealer in Old Clothes, Grinder,

" Almoft, ad infinitum; not lefs than 397 having " taken out Preaching-Licences, at the New " Seffions-Houfe, Clerkenwell, in the courfe of " the years 1796-7."

The author goes on to observe, "That, having "once touched upon this subject, it would be "an act of injustice to difmiss it, without observing, "as it accounts, in a great degree, for the vast "number of upstart teachers and doctrines for "which this country is pre-eminently diftinguissfh-"ed, that, there is, in this metropolis, a *ci-devant* "Coal-heaver, notorious for no qualification upon "earth, but confummate impudence and incor-"rigible ignorance, whom, I am given to under-"ftand, is in the receipt of nearly £1000 per "annum. He is proprietor and fac totum of two "chapels,

" chapels, and has lately purchased the elegant " mansion of the late Dr. M-\_\_\_\_h, with grounds " and appurtenances; in addition to which, he " keeps his carriage."

Two months after I had determined upon fketching out an account of the fcandals occafioned to religion, by illiterate enthuliafts; and, after I had proceeded thus far in the execution of my defign, I learned, with pleafure, that this fubject of complaint had been noticed in the Houfe of Commons: on Monday, Februry 3, M. Angelo Taylor gave notice of an intended motion; and in which, he afked relief in the cafe of licenfing preachers; urging, that, within a very fbort time, he had been applied to, and obliged to grant a licence to a boy of feventeen years of age, as a Preacher of the Go[pel !

I may now add, fince writing the laft remark, the additional fatisfaction of finding my obfervations, upon the wretched ignorance of these itinerant preachers, fully confirmed by the Report from the Clergy of the Diocese of Lincoln, convened, the first time in August last, for the purpose of confidering the State of Religion; Printed for Rivington, St. Paul's Church-yard, and Hatchard, Piccadilly.

In this valuable production, one of the leading caufes of the dangers arifing to the church and government of this kingdom, and the alarmingincreafe of profanenefs and irreligion, is juftly imputed to those Methodists, fuch as I have defcribed in London, "who attend and encourage "a wandering tribe of fanatical teachers, mostly "taken from the lowess and most illiterate classes "of fociety; among whom are to be found, ra-"ving enthusiasts, pretending to divine impulses, "of various and extraordinary kinds, practifing 8 "exorcifms,

Digitized by GOOGIC

" exorcifms, and many other forts of impoftures " and delufions, and obtaining, thereby, an un-" limited fway over the minds of the ignorant " multitude."

This third and lowest class of perfons, to whom the name of Methodifts is ufually given, it is also observed, are neither qualified by education for the office of teachers, nor bound by the declaration of any fixed principles, nor reftrained by any fense of decency or shame; and fo various are their abfurdities, that they feem to have no point of union, except a determination to calumniate the established Clergy, which defign they execute with unrelenting violence and malice, at all times, and in all places. " Some " of them, it is repeated, practife exorcifms, and " capricious forms, and modes of it, utterly in-" confistent, not only with religious gravity but " with morality and decency: they have alfo " frequently denounced the reprobation not only " of particular perfons and families but of whole " villages, and publicly execrated the churches, " as being nothing but a heap of ftones."

This report, evidently dictated by a fpirit of moderation and veracity, farther imputes " the " propagation of thefe mifreprefentations and im-" impoftures to the private affemblies, known by " the name of Claffed Meetings;" but it does not dwell upon the unprecedented influence of the leaders of thefe *bands*, as they are called. The latter are, to all intents and purpofes, Father-Confeffors, in their way; and though generally lefs informed than the preachers, to which office they occafionally afcend, yet thefe men are profeflionally called upon, to hear the fecrets of families, and to determine upon, and direct fuch intricate movements of the mind as would juftly require the

the fkill of an acute philosopher, or a judicious divine; but, being filled by illiterate zealots, their manner of questioning young perfons, relative to their fensations arising from attachments, &c. &c. has not feldom been the fubject of observation

and cenfure. More information respecting the extraordinary miffions of Lay Methodist-preachers, in the country, may be copioufly collected from the Evangelical and other Magazines, still in circulation, under the head of Religious, or Miffionary Intelligence. Perhaps these are neither of the lowest nor the most mischievous description; however, all must tend to fhew, that, " the interesting statement of facts" contained in the Report of the Diocefe of Lincoln is " really applicable to a great part of " the kingdom," and that the complaint ferioufly calls for the attention of the Legislature, by the inlet which it gives to Socinianifm, Deifm, and even Atheifm. And, farther, that, " the fame means " might, with equal efficacy, be employed to fap " and overturn the ftate, as well as the church; " of which fome flagrant inftances have not been " wanting."

If the fame fcrutiny, thus happily begun in the Diocefe of Lincoln, fhould be applied in London, we fhall then find the fame defigns of thefe low and bigotted Sectarifts branched out into a thoufand fhapes. One of their methods, not generally known, and in which fome of the most illiterate bear a principal part, is, in qualifying themfelves for a more public ministry, by visiting the fick-poor at their own houfes; being employed, by various focieties, rather with a view of making profelytes than to alleviate, as they profes, the temporal wants of the indigent and fick : for, if the perfons visited hear their exhortations with patience, half-

Half-a-crown is the utmost reward of their attention; and the visits and the donation may be repeated twice or thrice. But if, on the contrary, no disposition is shewn to adopt the *particular* mode of faith, professed by these humble Missionaries, (I speak from certain knowledge) instances have not been wanting, when they have departed without leaving any evidences of their charity !

Now, while, by the operation of these profelyting agents, false religion is palmed upon the unwary for the true; and, while the mere endeavour to increase a party borrows the name of piety, it is evident, that a constant fource of scandal, against the established church, is kept open, and daily adding to those uncharitable divisions, of which Infidels are ever ready to avail themselves, for depreciating religion in general.

It is much to be lamented, that fo many opportunities prefent themfelves to thefe fanatics; it is, perhaps, one of the incurable evils attendant upon a numerous population. However, that much might be done to counteract them, even in the metropolis, is clear, from what has been don'e already. The memory of the Rev. Mr. Richards, Curate of St. Sepulchre's in this city, is still fresh in the minds of his parishioners: his diligence, during thirty years refidence, in vifiting, relieving, and admonishing, the lower orders of people, both within and beyond the bounds of his parifh, has made an impression on the minds of all that knew him which will never be effaced. Unbleffed with any brilliancy of parts, or a captivating address, his fteady and indefatigable per-," feverance, in the line of his duty, alone enfured him that fame, which he never fought after.

Though truly humble in his deportment, fo far from exposing him, to infult, his conduct and ap-H pearance

pearance would frequently call forth the warmeft wifnes for his welfare, as he paffed through the ftreets. He was, indeed, gentle and eafy to be intreated, and was frequently known to rife from his table, to attend any fudden call for his fervices. He died fo truly lamented, that, as many perfons can teftify, there were very few dry eyes at the period of his interment in his own parifh-church.

But, with very little income befides his curacy, it is not to be fuppofed the many that partook of his bounty owed their obligations to him alone. As I am informed, feveral well-difpofed perfons, convinced of his integrity, deposited their alms with him, to be diffributed at his difcretion: an office which he had the faculty of executing without letting the receivers feel their inferiority, though it was never unaccompanied by fome fuitable admonition. A Reverend Gentleman, in giving evidence upon the trial of Jane Gibbs, at the Old Bailey Seffions, for September, 1799, mentioned his own precaution of wearing an unpowdered wig, becaufe Clergymen could not pafs along the ftreets without being infulted. A most furpriling affertion ! for though the late truly-pious Curate of St. Sepulchre's ufed to be remarkable for a plainnefs of drefs, almost bordering upon meannefs, and wore a white bushy wig, the populace were fo far from infulting him, that even the butchers in Fleet-market, and the very lowest and profligate characters in the parish, have borne his admonitions with temper and refpect; and this, in the moments of excels. Severe examples, no doubt, would have been made of any perfon attempting to have trefpassed against this truly good man, beyond the bounds of decency or good manners; an inftance of which, was never known to have occurred.

But

But independently of the influence of perfonal virtue, the populace of this city has never degenerated fo low, as to juffify the unheard-of precaution of Dr Ford, which, if well founded, would have given fuch of our Gallic neighbours, as have thrown off the Christian religion, an idea, that we were in a very hopeful way. The contrary, I believe, thousands as well as myself are ready to testify.

It fhould have been mentioned, that Mr.Richards, having no children, though married, took one of the girls out of a large family belonging to one of his parishioners; not to bring her up as a menial fervant, as might have been expected, but whom he caused to be educated as one of his own; and, after his decease, she was the companion of his pious relict, his constant imitator in acts of piety and condescention.

But befides the public and private duties of his own parifh, Mr. Richards, for a confiderable time, was engaged in the painful and difcouraging tafk of officiating at Clerkenwell-Bridewell. Here, his admonitions in the pulpit were always feconded by acts of kindnefs to fuch prifoners as fhewed any figns of contrition and amendment; a ftamp of fincerity and condefcention on his part, which was very feldom loft upon the objects with whom he was engaged.

The late Rev, Mr. Richard Southgate, of St. Giles's in the Fields, was another of thefe valuable characters. He was, fays one of his biographers, " in the daily habit of viliting the retreats of fick-" nefs and mifery, and the moft abandoned and " profligate in the holes and corners of that parifh." And yet, like Mr. Richards's parifhioners, they treated him with that good manners which they paid no one elfe. It fhould be obferved, that H 2 the pooreft of the Irifh, who form a principal part of Mr. Southgate's late parifh, though Catholics, treat a regular Clergyman with confiderable refpect:

Before fuch conduct as this, how wretched a figure muft the Infidel maxim make, "That every "prieft is either a knave or a fool." A conduct which muft for ever filence the objections both of Infidels and fanatics, by demonstrating, in the strongest manner, that a pastor of an exemplary life, is " an incalculable bleffing." Perhaps, with others, who have borne the appellation of evangelical preachers, the late Rev. Mr. Berridge was a pastor, justly esteemed a bleffing to his people.

The real friend and companion of his parishioners in the country, Mr. Berridge's charity and officious attention was the most impressive recommendation of the doctrine which he delivered from the pulpit. In fact, one would think the bare recollection of the natural and acquired abilities of fuch minifters as Meffrs. Berridge, Percy, Peckwell, &c. would force a bluth for the comparison between them and Lady Ann's preachers ; but, for the credit of the caufe, this Lady would be thought to fupport, it is hoped that, in future, fome education will be a first and not a SECONDARY confideration for these young men, at present decorated as fcholats, while, inftead of being apt to teach; their friends pity, and their enemies deride them: fo that the injunction once delivered to fome others, viz. " to tarry at Jerufalem till their beards were grown," feems particularly applicable to their ftate and condition.

Innovations, in matters of faith, always weaken the obligations of religion, and fometimes fcandalize its profeffors; of courfe, the opinions of Baron Sweden-

Swedenborg, approaching nearer than any others to modern Infidelity, may be fuppofed to have adminiftered in proportion to the objections of Deifts and Atheifts. What muft thefe think of a fect, who, under the appellation of Christians, explain away the doctrine of the atonement, the refurrection, and the day of judgment? Let them be told, that, from the canon of the New Testament, this new fect have excluded all the Epistles, which they clafs as private letters ! That with them the day of judgment is more a figure than a fact: that it commenced about 1758, in the printing and publication of the judgment of Emmanuel Swedenborg, to condemn, collectively, all the doctrines of the Old, or Trinitarian, church.

These and several other opinions, held by the disciples of the New church, would certainly meet much of the approbation of Infidels, as some of the most eligible means of bringing Christianity in general into discrepute.

The principal article of this felf-called New church, it fhould be obferved, is juft as Old as Muggleton and Reeves; who, after the protectorfhip of Oliver, were the firft who publifhed, that the whole godhead is circumfcribed in the perfon of Jefus Chrift, ftill retaining the human form in heaven; the belief of which, and not repentance, both Muggletonians and Swedenborgians enforce upon their followers, as the *firft* and most effential condition of gospel acceptance.

Notwithstanding all the recommendation of a pompous worship among the new feet of Swedenborgians, the fantastical disposal of the two officiating ministers in one chapel, and the drefs of the pastor in another, imitating a *Chef de Famille*, among the French theophilanthropists, a new liturgy, and the substitution of the name of the temple temple for that of church, fo flow is their progrefs in making profelytes, that to prepare for a decent retreat, fome of their leaders have published an opinion, that it never was the defign of the illuminated Baron, to found any new mode of public worship upon his doctrines.

But notwithstanding this hint, and a previous failure at the West end of the town, another temple has been opened in York-street, St. James's, namely, the late Roman Catholic chapel; into which, if fome perfons should enter, while the minister (according to a former custom in the temple, near Hatton-Garden) is reading with his back towards the congregation, the place may still be taken for what it has been, and tend to confirm the vulgar opinion of a refemblance between this New church, and the Old church of Rome.

Having failed of fuccefs in the Eaftern part of the metropolis, which abounds with religious perfuafions of all denominations, mechanics, and others, with lefs learning and leifure to make inquiries, than the inhabitants of the Court end of the town, it requires no gift of prophecy to predict the fate of the New church in York-ftreet, St James's. As for the apology, that it never was the will of the Baron to eftablish a new form of worship, after a feries of unfuccefsful attempts for twelve years paft, it is nothing more than a clumfy attempt to make a virtue of neceffity. The real caufe of this preparation, for a decent exit, is in the doctrines themfelves, which have too much of the metaphysics for the head, and too little 'energy for the heart; and of courfe are not adapted to obtain any lasting interest with the generality of men, after their novelty has fubfided. Nor can they produce that change upon the profligate, which fucceeds to ftronger motives, congenial with the natural ideas which uncontaminated

nated judgments entertain of the refults of virtue and vice: a change, which notwithstanding always follows a cordial belief of the doctrines generally taught by the Old Church of England; but which the New and enlightened Church, is led to confider as " a tiffue of shocking abfurdities."

As the origin of Swedenborgianism in this country differs from that of any other religion that 'I know of, a little farther digreffion may be excufed. In most cases, new fects have been collected by the fuperior address or elocution of the original founders. Thus, in the inftance of Methodifm, the powerful appeals made to the minds of num--bers of people, grounded upon the doctrines of the Church of England, did really excite and perfuade great bodies of them to adopt its principles, feeling their mental interest in so doing. Not so, the founders of Swedenborgianism, a feet, which literally originated in a printer's job! being hatched in the parish of Clerkenwell, near the spot where the Baron had his obscure lodging, viz. at a hair-dref. fer's, in Bath-ftreet, Cold-Bath-Fields, while he refided in this country. Its next appearance was in an alley. in Little Eastcheap, partly in the modern and fashionable form of a debating fociety : but, inftead of preachers collecting the people, thefe people were fo hard run to collect preachers, that for a confiderable time the office was generally confined to the printer alluded to, and one of his relatives. After fome of the Baron's works were translated, and published in this city, the idea of quickening a heavy fale might have had its weight in the attempts to make them the basis of a new mode of worship. The celebrity of the Baron was, in the next place, diffuled by the publication of the Magazine of Heaven and Hell; and a Romance, calculated to introduce

troduce his, or rather the principles of his editor's, among the ladies; fo that with the fubfequent labours of fome ingenious men, and the affiftance of a few of the wealthy, in opening Temples at Manchefter, Birmingham, &c. they have hitherto contrived to keep the name of the fect alive, notwithftanding fome fteps have been taken for withdrawing altogether from any farther exhibition in public. Yet, if appearances are to be trufted, the moft heterodox opinions that ever bore the name of Chriftianity, will not trouble the orthodox much longer.

This pageant, this pantomime of religion, having no fund of fupport, but a flender annuity in the lives of a few wealthy individuals, can never defcend to pofterity, nor exift but as an additional article in the catalogue of fome Alexander Rofs's Hiftory of All Religions. From appearances, one would fuppofe this fect already verging towards bankruptcy, as it is not long fince a fubfcription was opened to reprint the works of the Baron, in which the fmall fum of one penny a week was not unacceptable.

How are the mighty fallen !

The late difposition for a more extensive fusiferance of the Roman Catholic religion, and especially the relief of the unfortunate Emigrant Clergy, has not only been the fubject of bitter invective in the clubs, but out of them, fome zealots, bearing the Christian name, have gone fo far as to publish heavy censures upon the late Rev. W. Romaine, merely for collecting alms for the Emigrants. People of this cast, and those professing Infidelity, withed to fee all the ancient animosities between Protestant and Papist, revived in the prefent war. To inflame the Protestants against a government that entered into an alliance with Popish powers; and, lastly, with the Pope himself, was a favourite undertaking;

dertaking; but here, exclutively of political motives, thefe calumniators, were not aware, that their own partizans in irreligion, the French Robefperians, by proclaiming death an eternal fleep, and other enormities, had left their opponents no medium to choofe between Atheifm, and the old eftabilihed religion of the country. The new philofophy then, by its unqualified oppofition to the Catholic religion, was the indirect caufe of all the protection, the latter has fince met with from the enemies of the republic.

Glad, indeed, would have been the partizans of Atheifm, could they have perfuaded Diffenters, and others, that the Proteftant religion was really in danger. But, unhappily for them, while they were fpreading alarms of the growth of Popery. fome of its chapels in the metropolis, were actually thut up, for want of their ufual fupport from abroad. And thus, from the charity of the Englifh Clergy towards the Emigrants, the enemies of both were reduced to the neceflity of branding an exemplary virtue with the character of a vice !

In concluding this narrative, I have the confcious fatisfaction, that I have removed none of the ancient landmarks between things facred and profane; that I have administered to no new fect or division; and that my defign, however weakly executed, has not been to deftroy, but to build up; to ftrengthen the weak, and confirm the feeble. But did fectarians, who build fpeculative opinions, even upon the ancient foundations, previously reflect, they could have little hope of benefiting mankind. If they fail in their attempts, they only reap thame and remorfe; and, if they fucceed, it is probable, that they lay the foundation of new feuds and diffentions; and, like the madman mentioned in the Proverbs, "fcatter firebrands, arrows, and death."

Having now gone through a detail of all the late branches of modern Infidelity, without the leaft known deviation from matter of fact; and having fhewn that the focieties owed their diffolution principally to the reaction of their own maxims and opinions, I fhall now leave the application of thefe facts to the country at large,

But, as there are numbers, who ftill indulge the ruinous fentiments of Deifm and Atheifm, and only wait for an opportunity of rallying their fcattered forces, I fhall now offer a few more reflexions upon the operation of those fentiments; not merely as they have hitherto been argued from, in books; but as they have occurred in real life, fince the habit of difbelieving the Christian religion has been fashionable. In these reflections I flatter myself that I shall demonstrate the blindness of Infidels, in perfisting to shut their eyes against the clearest convictions of truth and reason.

# GENERAL CONSIDERATIONS.

On the Influence of Infidel Opinions upon Society; anfwering the various Objections of Modern Deifts and Atheifts against the Doctrines of Christianity.

Non leve momentim apud nos habet confenfus omnium, aut timentium inferos, aut colentium.

HERE is, undoubtedly, a fecret caufe, why the most convincing arguments, hitherto urged against modern Deism and Atheism, have failed of effect, biz. a general perfuasion among the illuminated, the new pretenders to philosophy, " that, under " fome fystem of government more favourable " than the present, their doctrines will certainly " display their superiority, in exterminating these " vices and individual calamities, which, during the " present order of things, must remain as they are."

Now, without waiting for this imaginary period, the best mode of investigating the folidity of this affertion, will be to examine what progress has been made in this supposed scale of perfection.

SENECA.

As Infidels have a natural antipathy to miracles, they will the more readily admit, that every fpecies of reformation has its gradations; the progrefs, therefore, that you have already made upon a part. of the community, is the beft criterion to enable us to judge of your probable fuccefs upon the whole.

To come to matter of fact: During the five years in which the diffemination of your opinions has been comparatively free, Have any of you been able to convince the whole circle of your acquaintance, a whole house, or a whole family, of the falfity or irrationality of the Christian doctrines ?

If to thefe interrogations you are compelled to anfwer, No; Where then is the probability of your fucceeding upon a larger fcale ?

The Roman fatyrift, Juvenal, has obferved, that a fingle houfe will fhew whatever is done or fuffered in the world; it then follows that, if the little Theatre, upon which you have acted, had been enlarged, it would only have exposed you fo much the more, to the hiffes and infults of a difappointed audience. In fact, the recent flutting up of the great Theophilanthropic Theatre in Paris, though fupported by all the ftrength of the Republican government, is a convincing proof, that no inferior attempt will ever fucceed, effectially in a country, which, in opposition to the comparative levity of the French, has borne the proud diffinction of "A " nation of philofophers."

Defitute of every kind of public worship, beyond a mere fête or shew, I would ask you, what impression this is likely to make upon sullen and untoward dispositions? Levelling all distinctions between facred and profane, you, alas! have no history either to feize the imagination, or interest the pasfions. But, without this, be your public institutions

or your Religious Fêtes ever fo fplendid, ftill, as Pliny faid of the Circean games; *Nihil novum, nihil varium, nihil quod non femel fpectaffe fufficiat,* muft ever apply to fuch exhibitions. Not fo, either the doftrines or dogmas of the Christian Religion, they

doctrines or dogmas of the Chriftian Religion, they are fuited to every neceffity, and adapted to every difpofition. Even the diverfity and variety of fenfes, attached to the different parts of the facred Scriptures, are the ground of unanimity upon general principles; they fix the attention, they excite the difcurfive faculties in the mind, or they elevate or fuftain it under adverfity; while the cold and undiverfified fymmetry, which your fyftem of *reafon* would fuggeft, grows wearifome by its famenefs, and difguting from its uniformity. Indeed, while you muft acknowledge, that the "paffions are the elements of life," your introduction of a fyftem, which tends to quench, or deftroy them, is one of the moft glaring of inconfiftencies.

We, you fay, only with to cultivate and improve the faculty of reafon; this leads to the charge of another abfurdity and inconfiftency in your conduct as philosophers, which I shall immediately confider. Is it poffible that the cultivation of reafon fhould be your principal object, while you are actually deftroying or undermining the ftrongeft incitements to the exercife of the reafoning powers? I am aware, that in confequence of your prejudices, you will not readily comprehend this charge ; but I will explain myfelf. The great truths of Religion, which fix and recall the wandering fenfes and affections of men, you endeavour to refolve into vain fears and ufelefs chimeras. Those fentiments, which powerfully ftimulate the mind to a calculation of the probable effects of moral good or evil, you deride as folly and enthuliafm! You must know that a volatility and inconftancy of mind is common to youth ; and

and that it is indifpenfably necessary to fix this vos latility, before the faculty of laying down premifes, and reafoning from conclusions, can be introduced. You fhould know alfo, that the attachment of pains and penalties to the non-performance of these conditions is neceffary to excite men to action : but inftead of the ftrong motives of everlafting happinefs and mifery, as they are expressed in the Scriptures, what are the inducements of your code? The Reafon and Fitnefs of Things ! the perfuasion that virtue is its own reward; that human actions are neceffary; that man is accountable to man only for any of his actions ! As thefe are charges which you can neither palliate nor deny, will you have the effrontery to affert, that the laxity and indifference attending thefe notions have not an indirect tendency to annihilate the neceffity of reafon or calculation? Men who cannot be interested in your creeds, beyond giving them a bare affent, can never fuppole themfelves under the neceflity, either to compare or judge of the probabilities, or improbabilities of any other fystem; and principally because, beyoud the opinion of the world, they have no ftake to hazard.

On the other hand, the Chriftian, however mean his natural abilities may be; however weak and unpractifed his reafoning faculties, if once roufed from his vices, or fupinenefs, by the awakening voice of Religion, it is more than a hundred to one, if his reafoning powers are not much improved by the change. It then becomes his irrefiftible intereft to reafon upon the confequences of emerging from, or apoftatizing into, the ftate from which he had been awakened. In fact, he not only becomes a Naturalift, but he may exalt his faculties ftill higher, by contemplating the nature and attributes of Deity; or those intelligences fuperior to man 1 a fphere to which

which the poor alienated Infidel has no excitement. The Chriftian, in the former flate, like the prodigal fon reftored to the houfe of his father, truly enjoys an intellectual feaft; while the Infidel, a fugitive, and an outcaft, and efpecially, if he be a fenfualift, may be faid to feed upon the highs with the fivine, Deluded men ! and is this the flate of degradation for which you plead? Reafon, you affert, is the great object for which you contend; and yet, rejecting the doctrine which can belt allay and tranquillize the impetuous paffions, and forfaking that calm region where its voice can only be heard, you deftroy the means by which you fhould arrive at the end propofed! That many of you are not reafoners, at leaft from your own principles, cannot be denied. But what was the primeval caufe of this exertion? Most of your leaders, originally professing the Christian Religion, are indebted to its faith and doctrines, for the primum mobile, which gave the first impulse to their rational faculties; first excited and fharpened the talent of inveftigation : nor would they have been able to wound Religion, if they had not first stolen her arrows.

Perhaps, the thunders of that religion, you now deride, were the means of arrefting fome of you in a courfe of fenfuality, which would ultimately have fmothered every latent fpark of ratiocination then dormant in your minds; and does it thus become you to depreciate the only medium, by which you have rifen to your recent diffinction? Still, this abfurdity, peculiar to modern Infidelity, does not reft here; for degenerating into downright ingratitude, like an offspring perfectly unnatural, you chiefly fuftain your character by defcanting upon the vices or frailties of the parent flock; beyond the fphere of declamation, you cannot exift. The reformation you pretend to advocate, would be your ruin. Like

Like the animalculæ, bred upon the filth of creation, you delight in clinging to the weak fide of humanity. You have no fustenance which you do not derive from its wounds. No foundation which is not built upon the ruin of others. Your confequence is enhanced by their degradation; and vour unanimity derives all its force from the divifions, you are the first to create or extend. Thefe charges, harsh as they may appear, I am not difpofed to fix in the malignity of your nature, but rather, in an over-weening vanity and affectation of knowledge. But as this mania has almost exclufively taken poffession of young minds, it may behove you to reflect upon the influence these feetical opinions may have in future upon your own happinefs, as fathers, hufbands, and other relatives. Ceafe, then, to boaft of perplexing a few weak minds by a hackneyed firing cf common place arguments, or drawing a multitude, by the torrent of your declamation: the majority of your objections to the Christian doctrines, as it will prefently appear, are grounded upon prejudice, and the want of a proper difcrimination.

First, I observe, that what are called the atrocious cruelities of the Bible Hiftory, are in the mouth of every objector who has read Paine's Age of Reafon, without perufing the Anfwer of the Bifhop of Llan-But even granting the full force of the Indaff. fidel's objections, without infifting upon the purity of circumstances in God's government of the natural world, fo judicioufly urged by the learned Bishop, I would fain know, what influence these histories of cruelty have upon the generality of Chriftians? The acts complained of, were moftly perpetrated by Princes; from whence there is little danger of their examples upon the people; upon the fcore of inability : and befides, these acts are placed

placed at fuch a diftant period, and are neceffarily, involved in fuch a peculiarity of circumftances, as to produce very little, if any effect, upon the manners of civil fociety.

If the Infidel will still urge, that this inefficacy of example is equally applicable to the acts of piety and benevolence recorded in the Scriptures, I answer, that upon the latter, the minds of men are fond of dwelling with complacency and delight, and will frequently revolve them in their recollection; while deeds of comparative atrocity are passed over with indifference, and feldom, or ever made the fubject. of meditation, nor even recurred to, without neceflity; or, in the course of their reading or worfhip. To prove the charge brought by Infidels, it is incumbent upon them to flew that these denominations of Chriftians, who have drank the deepeft of Scripture knowledge, have perpetrated the greatest proportion of barbarities. Unhappily for Deifts and Atheifts, the contrary has been the fact, as the Papifts, to whom the reading of the Scriptures has been the most part prohibited, have been almost exclusively the perpetrators of the enormities, uncandidly charged upon Christians in general.

The natural cruelty of the Mahometans, is another argument in favour of the humanity of the Christian fystem; notwithstanding the opinion of Infidels, that the former approach the nearest of the two, to the standard of reason.

But, religious perfecution, though not peculiar to the Christian Religion, attaches to bigots of every defcription; confequently it is an imputation, from which *unbelievers* are by no means free. Helvetius, one of the most eminent of the modern materialists, observes, "there are few men who would "not employ violence to engage the world to adopt K "their

" their fentiments, if they had it in their power." A ftronger truifm than this could not have been pronounced, had Helvetius been an eye-witnefs to all the petty malignities made ufe of by his fucceffors to the prefent day. Very little experience, among this kind of people, is quite fufficient to fhew, that a perfecuting fpirit is not peculiar to the Chriftian communities.

Modern Infidels frequently calumniate our religion, in oppofing the forbearance of Pagans to what they call, the perfecuting fpirit of the Chriftians; a vice from which they fay, the former were quite exempt. But to undeceive fuch perfons, I fhall prefent them with the following inftances of the contrary of their affertions, felected by a recent writer in favour of Chriftianity.

Afpafia, having been accufed of impiety, owed her father's life to the interceffion of Pericles, and the tears he fhed while pleading her caufe.

Anaxagoras, of Clafomenæ, was in danger of lofing his head, for afferting that the fun was a huge mafs of hot iron.

Diagoras, of Melos, had a talent fet upon his head, for ridiculing the religious mysteries.

Protagoras, having questioned the existence of the gods, only escaped death by flight.

And, laftly, Socrates was compelled to drink poifon at Athens, by an express law of that city, against any perfon who should be the introducer of a new god.

But leaving the ancients to inquire, whether modern Infidels would not be as violent perfecutors as any others whom they accufe, and even greater than Christians have been; this, I prefume, may be determined by a few plain questions, and their anfwers. First, fince it is evident that the hopes and comforts of Infidels are bound up in the pleafures

Digitized by GOOGLC

pleafures and enjoyments of the prefent life; is it not undeniable, that any perfons, propagating a fyftem which tends to difturb their purfuits, interrupt their enjoyments, or leffen their confequence, muft render themfelves odious?

Is it in the power of the laws to fupprefs or controul the private hatred, or animofity, of Infidels against their opponents?

Is it not also probable, that calumny and contempt will be made use of to ruin the credit of such perfons, who may innocently suppose the present life not to be the *ultimatum* of all their hopes and happines?

But while Chriftians might thus expose themfelves to the perfecutions of Infidels, the probability that the latter would not be perfecuted in return; or that their retaliation would be confiderably lefs in proportion, than that of the former, is evident from various confiderations. For inftance;

The Christian, expecting a hearing before another tribunal, may bear with many offences and repeated wrongs; and, therefore, will be lefs liable than the Infidel to retaliate an injury upon his neighbour, or enemy.

He may also be quickened in this spirit of forbearance; by the confideration, that he obeys one of the positive commands of the Gospel; and that, by the patient endurance of other men's faults, he shall the better ensure the forgiveness of his own.

And, upon the fame belief, he may even go farther, by returning good for evil.

Now, as Infidelity acknowledges neither motives nor objects of this kind, its objections to Chriftiahity, upon the ground of cruelty, or perfecution, are proved to have no real foundation in fact.

We have alfo been told, ihat the wifdom of a nation may be feen in its proverbs. To the advantage of Christianity, then, we may remark, that the Mahometans have an adage, expressing that, "He who forgives an injury, does well; but he "that revenges it, does better." A maxim this, which, however it may assimilate with Infidelity, militates against both the letter, and the spirit of the Christian religion.

Having done with the charge of perfecution, I must advert to the Infidel's opinion of the Reason and fitnefs of things, which they recommend as a ftandard to try the abfurdity of Christian doctrines ; and which, if we could give them credit, thefe gentlemen have the exclusive privilege of exhibiting to advantage. , If fo, how is it that their demonstrations have been repeated, years after years, without effect; and that people in general ftill reject their folutions of the phenomena around them? How is it that your notion of the origination of all things from a confused mais of atoms;-that there is no other God than the universe; that all the men and animals, which deftroy each other, are only parts and modifications of the fupreme Being ;--that matter first fet itself in motion;-that man's fuperiority to the brute refults entirely from his organization ;---that he is like a piece of mechanifm, or a plant, and that when he dies, all dies with him :- I fay, what is the reafon that these opinions of yours, gain no more evidence than they have done, though they have wanted none of the advantages of rhetoric or elocution to recomend them to the world? How is it that these leaves, from your tree of knowledge, fo flattering to human vanity, meet with no more admirers? How is it that the great mass of people do not join iffue with you in the

the fupport of those opinions, which are to free them from the fetters of their education, and the preffure of fuperflition and tyranny? But above all, How is it that your doctrines cannot deliver men from their perfonal vices and defects, and the predominance of evil habits and paffions? You must acknowledge that, after all your perfeverance and indefatigable endeavours to enlighten them, they do not comprehend the magnitude and importance of your schemes! otherwise, they could not reject them! What then becomes of your Reafon and Fitnes of things? This question must refolve itself into one of these folutions; "Either you " are not fit to teach; ---or it is not fit that mankind " should be fo instructed."

The fuperior efficacy of the Christian doctrine upon the minds, even of fuch men as are, or have been, immerfed in vice and folly, cannot be difputed, but by those who are enveloped in prejudices, which I have found as prevalent among Infidels as any description of Christians whatever.

One of the principal obftacles to your inftruction, I find to be, that flattering notion of Mr. Paine, " that every man's mind is his own church."

Some of you are ready to deify Mr. Paine for this difcovery;—but let me tell you, he was not the first that broached this deleterious nostrum; it was in the mouths and writings of almost all the festarists that distracted this kingdom, between the reigns of Charles the First and Second. It is a principle, virtually acknowledged by the Quakers, and was very pointedly urged and infissed upon, by a perfon in the last century, known by the appellation of Cobler How; in a pamphlet entitled, "The Sufficiency of the Spirit's Teaching;" and in plain fense, means very little more, than that every

every man loves to be led by his own whims and fancies, as foon as ever he becomes a Diffenter from the established order of the church. This explanation, I think, is well warranted by the conduct of those who have, from time to time, adopted the principle of *felf-fufficiency*.

In fact, fo far from anfwering the end propoled, either by Infidels or Sectarifts, I have generally obferved, that when this notion is reduced to practice, inftead of being fufficient for the teaching of all, it has been the principal reafon why none have been fufficiently taught! In cafes of common life, men naturally alk the advice of others, but here, in a concern of the last importance, every man's knowledge is supposed fufficient for himfelf.

In no fingle point whatever has the ignorance of Atheifts and Deifts appeared fo glaring, as when they affect a capacity for Bible criticifm. Mr. Paine's observations, under this character, might be corrected by many fchool-boys. With him, neither metaphor nor allegory is allowable in religion! The Book of the Revelations he condemns at once as a book of enigmas; at the fame time, the 19th Pfalm, which is almost a complete allegory, is, in his effimation, a Chef d'ævre! In fact, if the ftyle of our religious instructions could be fquared, according to the demonstrations of Euclid, at which Mr. Paine feems to hint, all his reproach upon the Quakers, about "a drab-coloured creation," as the refult of their tafte, would, with equal propriety, apply to himfelf. Several of Mr. Paine's notions are borrowed, but his criticism is all his own.

The finall number of Chriftians, in comparison with the great majority of Pagans and Mahometans in the world, is an *objection*, I will not call it an *argument*, almost idolized by Deists and Atheists.

ists. It is, I acknowledge, formidable in its first appearance; but, on a close infpection, it foon lofes its confequence. I will not only admit the relatively fmall number of Christians in the world, but that they are equally fmall among ourfelves, fo few there are who live up to the fpirit of Chrif-This conceffion, however, makes notianity. thing against the universality of the Christian Religion, but rather tends to its establishment, becaufe, among Pagans and Mahometans, there are, on the other hand, many who, living above the dictates of those false fystems, are, in the best fense, true Chriftians. Hence, as it is expressed in Acts x. v. 34, 35. "God is no respecter of persons, but " in every nation he who feareth him and work-" eth righteousness is accepted with him."

Christianity, then, is more of a principle than a profession; yet any perfon who could undervalue the written word, upon this account, would juftly fall under the cenfure of the Apoftle, Romans, chap iii. v. 1, who infifts upon the advantage of " Chiefly, that the Jews over the Gentiles, " because unto them were committed the Ora-" cles of God." And unbelievers fhould notice, that the fame reafoning, ufed by the Apoftle, all through the fecond chapter of the Romans, is exactly applicable to those perfons who, at this time, enjoy the light of revelation, and others who possels it not. Vain then, are the efforts of Infidels, as they fay, to fimplify Religion; and futile the attempt to magnify Reafon, by fuppoling the Light of Nature, and the Revelation of the Go/pel, to be one and the fame ! Volney, for this purpofe, refers me to the remains of Egyptian antiquities; I examine them, and am difappointed. As well might the bigotted Papift appeal to the exterior and venerable appearance of fome Gothic ftructure; which

may be furveyed by the rational with a figh, while it is worfhipped by the fuperfitious: the former, penetrating its inmost receffes, might fcrutinize the character and principles of the original accupants. The observations of the latter, would probably extend no farther than the monuments, the ramifications of the columns, the ftoried windows and the length of the aifles! And, as in many old manfions, fome apartments are kept locked up, under the pretext that they are haunted; fo, the pretended mysteries of ancient Paganism, like the rooms in these old mansions, are found, upon the opening, to contain very little, befides antiquated duft, or ufelefs lumber.

And now, oh! ye Reformers of ancient opinions, if your leaders are thus fuperficial and ignorant, how is it with those that are led? The latter, for implicit faith, are not furpaffed by any of the Chriftians you condemn. Among thefe, as faith is defigned to establish an object, it produces and preferves unanimity. Among you, as your negative belief is only calculated to remove every reftraint, except individual whim and caprice, difcontent and difcord ultimately follow. Where all wifh to command there is none to obey. Thus you neither " enter into reft yourfelves nor fuffer others; you can "neither feek peace nor enjoy it." Within your own pale, having no crimes or failings which you dare condemn, you are compelled to feek them in others! Where every one is a malefactor, none can assume the office of cenfor or judge. Where nobility of mind, is not admitted, all are confidered as bafe; and, having no scope for acrimonious propensities at home, this reftraint only tends to fharpen the daggers you prepare for others, and render them still more destructive. No longer, of any confequence to each other, you can hope for no im-1 portance,

portance, but in proportion as you diffinguish yourfelves by the inroads which you make upon religion, as your common enemy.

Like the Indian warriors who recommend themfelves by the number of fcalps they bring in, fo must you exalt yourfelves, or fink into abfolute infignificance. Similar to the fallen spirits, you have no longer any confolation but in manifefting your enmity against all who have not involved themfelves in your revolt. Unwilling to ferve in the Heaven of Religion, you feem determined to reign in the Hell of your own licentiouf-'nefs; and, having broken from your original orbit, the harmony and brightness of superior intelligences, no longer excite in you, the correspondent sensations. of delight and concord.

This parallel, founded upon no fiction, but upon a fober truth, I shall carry no farther, than to obferve, that while the fallen spirits are admitted to be eminent for their knowledge, you, not deficient in pride, are the most conspicuous for your ignorance.

Into fuch a community as theirs, who would with to enter, or who, made fenfible of its fpirit and tendency, would wish to remain? What credit or fafety can be expected where, religion being excluded, all the bad paffions are let loofe, or but feebly confined by the flender tie of human convenience? Will those who look upon every action, as the refult of a felfish or interested motive, respect either merit or virtue in others? Where virtue has no interest, it has, of course, no influence. Where depravity is under no check, excellence is of no value. Where superiority creates no generous emulation it is the caufe of envy. And where benevo-"lence fails to excite gratitude, it only ftings the receiver with a malignant, or uneafy fense of his inferiority, and the motives of the donor are construed into fel-

felfifhnefs. Perhaps this is the reafon that, among the difciples of the New Philofophy, *Public Charities* are looked upon a *Public Robberies*. The vifionary reformers of the prefent day have alfo an idea that the flate can positively prevent *perfonal* and *individual* wretchednefs!

The genuine philosopher will not be furprized at the contention, and privation of real happiness among herds of men, equally pretending to philosophy! If petty stables and antipathies, in the literary world, have justified the poet's observation of the natural enmity of wits and authors, a number comparatively small, what is to be expected from a whole community of would-be wits and rival philosophers? Till modern philosophy came in with its moral equality, other civil bodies used to be composed of head, feet, hands, and other fubordinate and correspondent members; but here is a community that wishes to be all head !!! Under the contemplation of this chimerical idea, it is difficult to name the fensations which it excites.

Before Deifm and Scepticifm became fashionable, or were rarified into Atheilm; and particularly, when the former was here and there, the opinion of fome speculatist, or folitary enthusiast; ftanding in the fame relation to multiplied Infidelity as natural, to artificial fociety; the fpirit of piety, like the ruftic virtues and artlefs fimplicities of unpolifhed life, would fortimes accompany its wanderings. Unconnected with the " corrupt majority" it might then breathe its guilelefs effusions, to him whole temple it conceived " all fpace," Still, under the mildeft defignation we can beflow, this is a branch, indigenous only to the waftes of fociety, and can never be grafted To descend from upon the common flock. figure; the most innocent of Infidel'opinions, once liberated from the brain that conceived them, and left

left to operate, as they recently have done, upon large and mixed multitudes, can never be accounted for; the multitudes being ever difpofed to carry these theories to extremes never thought of by the theorist, in whose closet they originated. The circumstance of these domestic opinions being acted upon, by a political revolution abroad, as I have before hinted in the introduction to this work, has also given them a feature, altogether unknown in the annals of this country.

It is a mere quackery, in religion or morals, to prefcribe reason only, as a specific for the numberless diseases of the human mind, Wax is hardened and diffolved by the fame fun. Nor are all men, as the Atheifts dream, equally disposed to virtue and probity, or even capable of the fame intellectual attainments. If it were not deemed a crime, by Infidels, to quote Scripture authority, one might fend these modern smatterers in philofophy to that excellent Parable of the Sower, in the New Testament, in which they may find an infallible theory of the moral capacities or incapacities of the human kind. Though I should not have referred them to Parables, by any means, had I recollected their common prejudice against those parts of the Gospel, as being purposely intended to obscure, and not illustrate, the truths they should convey! A mode of reasoning they would not dare apply to the Fables of Æfop; though as our Lord makes no, use of the personification of trees, birds, beafts, &c. between the perfpicuity and fimplicity of the one and the other, there is no comparison. The perverted tafte of Mr. Paine, for literal inftruction only, has led his imitators to think little of those superior, and more ftriking modes of imprefing doctrinal truths, exhibited in the Parable of the good Samaritan, and others contained in the New Testament. Yet L 2 that

the fubject of regret, than aftonishment! Even the reading of prophane hiftory, through the medium of your opinions, but too frequently ftrengthens very hurtful prejudices. General charges and infinuations against religion, and religious men, are not unfrequent among Historians, efpecially the moderns. But before you proceed. upon fuch shallow grounds, it is necessary to weigh the decifion of one of your own oracles, Mr. David Hume. The practice of arguing against any profession, from the abuse of it, comes from you with a very ill grace, after he has afferted, that, " This fophilm is one of the groffeft, " and, at the fame time, the most common to " which men are fubject." He also observes, that, " the hiftory of all ages offers examples of " the abufe of religion; but those who would " thence draw an inference to the difadvantage " of religion in general, would argue very rashly " and erroneously. The proper office of religion " is to reform men's lives, to purify their hearts, to " enforce all the moral duties, and to fecure obe-" dience to the laws and civil magistrate. While " it purfues thefe falutary purpofes, its operations, " though infinitely valuable, are filent and fecret, " and feldom come under the cognizance of hif-" tory. The historian, therefore, has fcarcely any " occasion to mention any other than that adul-" terate species of it, which inflames faction, " animates fedition, diffinguishes itself upon the " open theatre of the world, &c. and he may " retain the highest regard for true piety, even " while he exposes all the abuses of the false. " He may even think he cannot better flew his " attachment to the former than by detecting the " latter

" latter, and laying open its abfurdity and per-" nicious tendency."

To proceed farther, with refpect to the mental indevotion of the new philosophers; if the mind can conceive a continual effervescence, or figure to itself a family of children in perpetual warfare with their parents, it might have fome idea of the temper and disposition of modern Infidels towards the Great Creator. While Christians thank him for their creation, the former do not think their prefervation worthy an acknowledgement! In fact, deeper in degeneracy, than any of their predeceffors, through having more light, they have made themfelves intire ftrangers to the spirit, or exercise of devotion towards any object of fupreme worthip. Averfe to praife, and only alive in cenfuring the harmony and beauties of Creation, Mr. Edmund Burke's idea, of " the heart " of a thorough-bred metaphylician, the cold " malignity of an evil fpirit, and not the frailty " and paffion of a man," is by no means harfh, when applied to you !- To the fond hopes and endearing conceptions of the Christian, you naturally, oppose the petrifying refutance of the Torpedo! Thus fallen, your mention of the names of a Socrates, or Antoninus, is a profanation. To país over your degrading fentiments of the Divinity, not the regions of Siberia and the gardens of Hesperus can produce a stronger contrast, than the chilling influence of your opinions, fet in competition with any kind of worship, or internal reverence, of which we can conceive!

"Go, then, contracted Infidel! withdraw thy-"felf ftill farther from the views and comforts of "thy fellow-men. Still, confined within thy own "narrow fphere of reflection, perfuade thyfelf thou "art not made for immortality. Avail thyfelf, "then, by any means, of all the advantages of "the

" the prefent life: add to thy effimation of every " perishable good; and, stifling sympathy for the " fufferings of others, let thy own accommodation " fupercede every other confideration. Regard-" lefs of the awards of posterity, leave it to poets " and orators, to dignify the defire of immortality, " as the paffion of great minds: tell them, the " philosopher, who calculates the result of human " actions, is not to be duped with pompous " phrafes. Reply to them, that, thoufands have " perished for their country, at Rome and Car-" thage, whole names are forgotten. Perfuade " thyfelf, that vices, rather than virtues, tend to " immortalize a name; and, that the records of " history prefer those who have defolated the Tell the advocates for humanity, that " earth. " the majority of Heroes have been Tyrants; and " to others, leave the folly of fowing where they " fhall never reap.

"From the darkeft corner of the intellectual world, thus continue, like the envenomed fpider, to envelope thyfelf, and all intelligent beings in the cobweb-chains of neceffity. Believe, if thou canft, that every action, as well as the means for obtaining its object, is impelled by a first caufe: and that even the hand of a murderer is only a feeble link in the great concatenation of events ! Go on,—but I will withdraw from this precipice, from whence we cannot look down, but with horror and dizzinefs."

Having now fhewn the invalidity of the expectation of Infidels, that any change of the political fyftem would be more favourable to their opinions than the prefent; that, under the pretext of improving the faculty of Reafon, their neglect of proper means to ftimulate and apply it, has a certain, though indirect, tendency to deftroy the end propofed.

Having refuted the charges of cruelty, and a perfecuting fpirit in the Christian Religion, and urged leveral arguments to prove its humanity, fuperior to the Mahometan or Infidel fystem.

Having made it appear that the condition of Infidel Society, is neceffarily a ftate of warfare and competition, fubverfive of good order, difcouraging to merit, and defititute of proper motives to excite emulation, or prevent a degeneracy of principle and practice : Having fhewn the danger and novelty of relation, in which these societies were placed by political events, the Quackery of Reafon as an universal medicine in morals, and the groundlefs prejudices of unbelievers against the parables of the New Testament.

And laftly, having demonstrated their total want of devotional tafte, or veneration of the Supreme Being, or any form of worship, I shall for the prefent, profecute thefe charges no farther.

If it be faid, that I have lighted up the beacons of alarm, it is granted; but I have invoked no perfecution, nor imprecated any greater punishment upon the opinions I explode, than the contempt, and the caution, this exposure must necessarily produce.

Detached from any *political agency*, the momentary triumphs of individual, or collective, infidelity, are neither to be envied nor feared. It is a painful. pre-eminence, and Infidels well know it, when they again wifh that to be true, which they had perfuaded themfelves was fulle ! Nor let the reader be furprifed, that I have claffed Atheifts and Deifts indifcriminately : for the common practice of Infidels, to cover themselves with the name of *Deifts*, is a mere pretext, calculated to efcape the more odious appellation of Atheifts, For those who will not admit of God's moral government of the world; nor allow mortals any knowledge of his attributes; 10

or who deny, the immortality of the foul, I fay, whatever fuch perfons may think to the contrary, their notions can never prefent to the minds of the impartial, any other ideas than those of doubt, and a privation of every degree of worthip or affection; if they do not even exhibit an object of abfolute averfion or contempt: fo that between fuch Deifm as this, and ftark Atheifm, there may be a nominal distinction, but no difference. This idea was very justly appreciated by the Bishop of London, in his Charge to the Clergy of his Diocefe, in 1794. Speaking of the French; they were, faid he, "pre-"tended Deifts, but real Atheifts. And although "the name of a Supreme Being was fometimes " mentioned, yet it was feldom mentioned but with "ridicule and contempt. They acknowledged " nothing beyond the grave; and they ftigmatifed " all opinions different from thefe, with the names " of fuperstition, bigotry, priestcraft, fanaticifm, " and imposture.

These dangerous opinions were rendered more illusive, by the great names that fanctioned them ; · but as none of them are more familiar than that of Voltaire, I would caution the young and unwary, against any feductive influence upon this head. It. is wrong, in the Infidels, to oppose, as they do, the difbelief of the French Wit, to the belief of Chriftianity by the immortal Newton. For, granting that Voltaire deferved the panegyric of a German Nobleman, who entitles him "the divine Magician " whole breath diffipated the thick cloud that " covered all Europe, and observes, that happier " in his attempts than Orpheus, he did not ftop at " humanizing the furies, but metamorphofed the " monsters of intolerance, fanaticism, and blood, " into humane and fociable beings :" I fay, unlefs it could be proved that these monsters, against whom this giant of French literature exerted himfelf

himfelf, were the legitimate offspring of Chriftianity, these pompous phrases mean nothing, But till the tolerating spirit of Protestants, and the perfecuting genius of the Church of Rome, be proved one and the same, the Christianity believed by Newton, and difbelieved by Voltaire, will remain as effentially different as light and darkness.

The Rev. Mr. Fellowes, in his Christian Philofophy, with others I could mention, are of the opinion, that the late enmity of the French Infidels, against Christianity in general, was at first excited by the *particular* enormities and corruptions of the Romifh Church, "which accumulating for cen-" turies, at last produced a monster, which devoured The Deiftical philosophers might, " its mother. " fays he, have haftened its birth, but they had no " fhare in its formation. Had they been the ef-" fential caufe of the decline of Christianity, the " fame caufe exifting still, would have prevented " its revival; but the beft informed travellers affure " us, that Infidelity itself is declining, now the " caufe, which produced it, is no more."

More, and undeniable evidence of this decline, and the confequent revival of Chriftianity in France, has fince been brought forward by the invitation given by Bonaparte, to the return of the Clergy; the opening of a greater number of churches, and his own attendance in perfon, at divine worfhip. The conductors too of the public prints, who, during Robefpierre's tyranny, had profeffed themfelves Atheilts, though all of them may not be fincere in their recantation, acknowledged their faith in Chriftianity, in the courfe of March, 1800; a circumftance, fufficiently indicating the altered flate of the public mind in the French nation.

Now, as a collateral proof of the remarks by Mr. Fellowes, which were written in 1798, it feems this

decline

decline had made fuch progrefs in the fummer of 1799, as to occafion the flutting up of the Theophilanthropic Temple, and the opening of feveral churches in the French capital. But without refting upon these events, as facts, there are several natural reafons, from which a true philosopher may infer, " that the Chriftian Religion, ftripped of its " abuses, will take a deeper root than before, in " the minds and affections of the French people. " Nor is it unworthy of remark, that the late Rev. Mr. " Fletcher, of Madeley, wrote a letter from Macon, " in Burgundy, in 1778, in which he observed, that " Popery would fall in France in this or the next " century." He adds, " I make no doubt, God " will use those vain men (the Voltaires, Rousseaus, " Mirabeaus, &c.) to bring about a reformation " here, as he used Henry VIII. to do that work " in England: fo the madnefs of his enemies " will at last turn to his praise and the furtherance " of his kingdom."

I fhall only observe, that of the permanence of this approaching change, no rational doubt can be entertained. Having borne the last and most violent thocks of Apoftacy and Infidelity, no hope now . remains for the Infidel, that the light of Christianity shall ever be extinguished, but with time itself. The veil of pretended philosophy has been torn afunder, and its features exposed to shame and derifion; while the beauties of Religion have increafed feven-fold. This bright conftellation having received its impetus from the hand of the Divinity, no human effort can refift its progrefs. That it may penetrate the darkeft regions of the earth, ought to be the fincere with of every man, who has the least pretence to found reason or underftanding.

## POSTSCRIPT.

Chronological Sketch of the Origin, and Progrefs of Infidelity, in England, anterior to the French Revolution.—Remarks upon Protefor Robifon.— New Illustrations of German Literature.—Beautiful Translation from Profefor Ramler.—Vindication of the Sedition-Bills.—Declining State of Democratical Politics.—Physical and Moral Superiority of the Aristocracy in every Nation and Government.

AS it is natural for the mind, when taking a view of any multiform, or mighty mafs of matter, to inquire from whence, or by what means, it accumulated, fo, in reflecting upon the late increase of Infidelity in this country, I was led to conclude, that the development of the various fources of this evil could not be indifferent to a curious investigator of men and manners.

However indifputable the Rev. Henry Kett's affertion may be, "that the ideas of Infidelity, "which had been long floating in the world, were "first embodied into a practical fystem of wicked-"nefs, by Voltaire, and others," I must still beg leave to fix its æra in England, long before the writings of Bolingbroke made their appearance; this I must afcribe to a period of history, which bears a nearer refemblance than any other to recent transactions in France, viz. the period of the civil wars,

between

between Charles I. and his Parliament. Then churches were converted into ftables, or ruins, and their minifters driven into exile; while their fucceffors were divided into various fects, alternately fupporting the most abfurd, impious, and extravagant, opinions, whose variety of creeds naturally tended to the diferedit of all religious authority.

During this period, I fay, it cannot be doubted, but as one extreme always produces another, fo the impiety and fanaticifm of the fixteenth century were as properly the parent of the Infidelity that fucceeded it, as the late maffacres and profcriptions in France were confequences of the rejection of the milder doctrines of the Gofpel; and the refult of a decree, that " death is an eternal " fleep!"

That much Infidelity did fucceed the civil wars of Charles I. was most visible in the licentious reign of his fuccessor; and may also be gathered from the many treatifes written against avowed and unqualified Atheism before the close of the fixteenth century: even the learned Dr. Henry More did not think the Atheism of that time beneath his attention.

This monflrous feature, in the religious hiftory of this country, did not efcape the French writers; Boffuet in particular feems to treat Free-thinking, " as the laft refuge of minds tired out with reli-" gious wars, and the revolutions to which they " gave rife."

Charles II. Monfieur Grofley obferves, " either " through a fecret attachment to the Roman Ca-" tholic religion, or from views merely political, " favoured the Free-thinking turn of his fub-" jects."

James II. to increase a toleration that fuited his purpose, fuffered all the Latudinarians, among the Noncon-

Nonconformifts, to efcape notice ; and, in the reign of William III. it is obferved, that Shaftefbury and and his admirers thought very freely upon religious fubjects.

In 1696, John Toland published his Christianity not Mysterious; a work publicly burnt in Dublin, as soon as it appeared; but, flying to England, the author and his book were left unmolested.

Encouraged by this reception, in 1699, he publifted the Life of Milton; in which, infinuating his doubts concerning the authenticity of the Old and New Teftaments, he next anfwered his numerous objectors; in another work, intituled, Amyntor.

The ineffectual opposition made to these writings, by the inferior Clergy, affembled in convocation in 1702—(See Life of Toland prefixed to his Works, in 1725) only tended to increase their popularity and reputation.

In 1705, the Works of Lord Herbert, of Cherbury, were first published in English.

In 1713, Collins's Difcourfe upon the Rife and Growth of a Sect, called Free-thinkers, ferved to increase the confequence of that party; the more fo, from the number of replies made to it by Dr. Bentley, and other Clergymen.

In 1716, it may be fuppofed, that Free-thinking had made fome progrefs in the genteel or literary world, as a very fentible and well-written pamphlet made its appearance in behalf of the belief of a providence, &c. addreffed to the Wits, at Button's Coffee-houfe; not Addifon, Steel, or Arbuthnot, it is fuppofed, but fome of the minor geniufes.

In the reign of George I. Socinianifm, fo near a-kin to Deifm, was difclaimed by that monarch, who, as head of the church, publifhed a proclamation, prohibiting the diffemination of fuch 8 writings

writings as were favourable to the new opinions concerning the Trinity.

The New Annual Register, for 1782, observes, "that the first and most formidable attack upon the Christian religion was made by Lord Herbert, of Cherbury. Collins, was afterwards followed byToland; and Tindal's Christianity, as Old as the Creation, fucceeded to Morgan's Moral Philosophy; then came the more fubtle performance of Christianity not founded on Argument."

From Bishop Gibson's Pastoral Letter, in 1729, though principally directed against Woolston's Treatment of the Miracles, and the publications of Chubb, which immediately fucceeded, and continued till 1749, it appears, that no respite was fuffered to take place. It fhould also be obferved, that, between 1730 and 1744, the first period being that which produced the famous controverly of the Refurrection, and the celebrated pamphlet, the Tryal of the Witneffes : there were three editions of a Deiftical Answer to the fame, by Mr. Peter Annet; befides two other pamphlets written by him, viz. the Refurrection Reconfidered, and, lastly, the Refurrection Defenders stripped of all Pretences. Thefe things, from the conveniency of their price, and the zeal of the party who diffributed them, who, no doubt, confidered themfelves as a rifing Sect, certainly had their weight in fhaking the pillars of popular opinion, among the middling and lower ranks of men.

Under the reign of George II. " the philofophy " of Shaftefbury, became fo far predominant, that, " for a number of years, no book was more uni-" verfally admired, or more generally read, among " people of tafte and fashion, than that nobleman's " Characteristics."

Thefe

These were fucceeded by the publication of Lord Bolingbroke's Eflays, about the year 1754, by his friend Mallet; of whom Dr. Johnson obferved, "that he discharged the blunderbuss, the "noble author had left loaded, against the religion "of his country." Queen Caroline, it is also reported, was favourably disposed towards these heterodox opinions.

In Monfieur Grofley's New Obfervations on England, in 1765, he obferves, that Catholics, Church of England men, Methodifts, &c. all make a common caufe against a Sect which every day gains ground; I mean *Free-thinking*.

Relative to the original Debating Societies, perhaps the ultimate celebrity of the Robin Hood, the first of these dangerous Schools of Eloquence, or the impatience of fome of its members to appear in print, was the cause of the profecution of Peter Annet, one of its members, and his fentence of one year's imprisonment in Newgate, with an expositive in the pillory. Nor had the final dispersion of this Society, about 1773, fearcely taken place, before the Infidel fystem was transferred, with increasing attractions, into the closet, by the fashionable reception of the writings of Hume, and the daily improvements of Voltaire, D'Alembert, and the French philosophers in general.

The affociation at the Robin Hood, it cannot be doubted, had left the feeds of Infidelity deeply rooted in many of the members, who recollected the fpeeches of Annet; Dr. Lucas, of Duolin; and other orators of no mean talents. Among thefe people, the profecution of Annet was a frequent fource of converfation; while the kindnefs he experienced, from the amiable and ever memorable Archbifhop Secker, was forgotten, or only confined to the knowledge of a few.

During

\* During Annet's imprifonment, in Newgate, that worthy primate, I have been told, fent to make fome inquiry into his pecuniary affairs, and offered fome comfortable affiftance, which Annet, far advanced in years, did not live to enjoy; and from the following paffage of the prefent Bishop of London's Review of the life of Archbishop Secker, it appears, that Mr. Annet was not the only object of fuch generous treatment on the part of the primate. " Whenever any pub-" lications came to his knowledge that were " manifeftly calculated to corrupt good morals, " or fubvert the foundations of Chriftianity, " he did his utmost to stop the circulation " of them: , yet the wretched authors them-" felves, he was fo far from withing to treat " with any undue rigour, that he has more " than once, extended his bounty to them in " diftrefs." The translation of the whole works of Voltaire, and their repeated publication in fixpenny numbers, was also the means of putting the public in poffession of his plaufible dialogues between a Christian and an Honest Man, a Caloyerian, &c. And these were again multiplied, when the complete fets being fold off, the remains were a fecond time diffeminated among an inferior order of readers, by their exposure upon the bookfellers stalls, in common with fecond-hand magazines, at no more than one penny a number.

As under parts to the principal acts of Infidelity, upon the grand ftage of literature, it might have been obferved, that, for near a century paft, Blount's Oracles of Reafon, Collins on the Free-thinkers, &c. have lain upon the bookfellers ftalls, courting the infpection of paffengers; and that, after the public had been accommodated, accommodated, in the fame way, with the wafte paper of Morgan, Mandeville, Annet, Chubb, and all the fecond race of Infidels, near half a century; by way of a more refined entertainment, the circulating libraries were fupplied with the Eloifa and Emilius of John James Rouffeau, and other translations from the French, equally subversive of good morals. To the literary abilities, above vulgar ken, we may add, those of Gibbon, the historian; The Apology for the Life and Writings of David Hume, and that impertinent parade about his domettic virtues, fo fmartly replied to by the late Dr. Horne; and, next to thefe, we might reckon the cheap editions of the Philosophical Dictionary, by Voltaire; printed at London and York.

Upon the whole, from the recollection of the remote concatenation here adduced, it may be prefumed, that Infidelity had attained a degree of *relative antiquity*, and thus imposed upon many, who would have rejected a *novelty*, as hazardous and questionable.

But, after all, where Infidelity has failed of complete fuccefs, many upon whom it has operated have been, at leaft, brought under Socinianifm, the *Frozen Zone* of religion, even if it can deferve the name; for, before Dr. Prieftley had attained to his paft celebrity as a *divine*, this opinion undoubtedly had its effects in deadening the human heart. But, when his improvements upon it, were dignified with the name of *philofophy*, the warm tide of intellectual life immediately ceafed to flow. The character of a *materialift* was fixed, and all the benignant fources of genuine Christianity, which might have been expected in this quarter, were hermetically fealed.

It was this great chemift who reduced all the ideas of the grand enemy of the human race to a mere "per/onification of human pallions," from whence, and fimilar refinements in what was called the "corruptions of Christianity," a difcuffion of queftions, in the debating focieties, on a Sunday evening, previous to 1781, fubverfive of all the fundamentals of our religion, operated as a fufficient jultification of the Sunday Reformation-Bill, paffed in that year, which, by prohibiting the taking of money at the doors, put a temporary ftop to the increase of Infidelity in the lower orders.

But this hydra had too many heads to be cruſhed at once; for, in 1786, it was remarked by Archdeacon Paley in his Moral Philofophy, "That Infi-" delity is now ferved up in every fhape that is " likely to allure, furprize, or beguile, the imagi-" nation, in a fable, a tale, a novel, or a poem, " in interfperfed or broken hints, remote and ob-" lique furmifes, in books of travels, of philofo-" phy, of natural hiftory, in a word, in any form " rather than that of a profeffed and regular dif-" quifition."

As to focieties which fubfilted in the interval which I have gone over, that in Margaret-ftreet, Oxford-road, was the next, both in the order of time and in its publicity, to that of the Robin Hood. But neither the gentleman, then known by the appellation of the *Prieft of Nature*, and who delivered Deiftical lectures in his chapel, in 1775-6, nor his congregation, fhould, by any means, be ranked with those pestiferous clubbists of late date; although it unfortunarely happened that his renewal of a dangerous profession of false philosophy continued the concatenation of Infidelity nearer to the æra of the French Revolution, which,

which, afterwards co-operating with those principles, increased the number of English Infidels beyond all precedent.

From the period when the above-mentioned lectures, in Margaret-freet, had clofed, till the publication of the Age of Reafon; Deifm, and the heterodox opinions of the times, feemed to have taken up their last refuge in a pretty numerous circle, near Hoxton, among a kind of Infidel My/tics, known to ftangers, from the circumstance of broaching their fentiments in fome writings and public places, by the appellation of Ancient Deifts, as well as from the profession of their belief in the eternity of the univerfe, &c. This place, being attended by fome perfons above the common line of life, finally operated as a kind of vortex, which naturally attracted the reftlefs and diffatisfied of every fect within its circle. Here human learning was declaimed against, as one of the greatest enemies to human happiness or the improvement of the intellect, and dreams, visions, and immediate revelations, were recommended as a fubilitute! The faculty of foretelling future events was alfo infifted upon; the difcernment of fpirits, by the phyfiognomy, the voice, the gait, &c. together with the poffibility of converfing with departed fouls. In fact, those pretences were carried to far, that any visitor, not in the habit of hearing fupernatural voices, or not informed of the common occurrences of the day, by the ministration of Angels, would have been treated as a novice and a difciple of the loweft form.

. It was by no means unnatural, that this affemblage fhould be made up of Alchymifts, Aftrologers, Calculators, Myftics, Magnetizers, Prophets, and Projectors, of every clafs. In fact, this community feemed "to embrace all the ec-N 2 "centric

" centric modes, fectaries, vifionaries, fanatics, " enthulialts, rationalists, and every other name, " into which affectation, whim, folly, or caprice, " divide the populace.

Several of the members of this fociety have diftinguifhed themfelves, in their habits and manners, truly eccentric; but, as a defcription of them would be too long for the prefent purpofe, I fhall only obferve, that, there was fo little of real religion in their composition, that it almost immediately yielded to the ftronger impulse of the French Revolution, and terminated in the general conversion of the members into politicians and inquirers after news.

What has occurred among fucceeding affociations, fince the period last mentioned, has been fufficiently noticed in the former part of this work.

Relative to Professor Robison's History of a Conspiracy, &c. I shall now observe, that, after the minute details, given by him and the Abbé Barruel, of the object of the French and German affiliations, no perfons, unless they are totally absorbed in prejudice, can any longer affect to look upon the relations of these authors, as being raked together, merely to serve a partypurpose.

Without the evidence which they have adduced, it certainly would demand fome ftretch of credulity, to admit that Deifts and Atheifts have affociated, near half a century, for the fole purpofe, as Voltaire expresses it, to "*Ecrazer l'Infame*," viz. Crush the Wretch, Christ! However, the only difference between the English and French Infidels, is, in the term of their existence; the latter had arrived at maturity, while the former, being anticipated in their view, a falutary check was opposed to their progrefs,

progrefs, before they were capable of feeling their ftrength.

Every good member of fociety, now enjoying the benefit of a ftate of internal tranquillity, or comparing it with the ftorms and convultions of a neighbouring kingdom, will, next to Providence, blefs the means of his prefervation; and, penetrated by the advantages he enjoys, they will at leaft infpire him with a tacit juftification of measures, at first, perhaps, deemed harsh. I mean, those measures which have been adopted by a vigilant government, and which have, undeniably, prevented the diforder and confusion which must have otherwise ensued.

The blind tools of a party, and fhallow politicians, may continue declaiming againft what they deem unneceffary violations of the forms of the conftitution, as if the executive could at all time be useful without a difcretionary and a difpenfing power.

It is to very little purpofe, that fome people argue, that, the modern democratic party has really or apparently received the fanction of fome refpectable names in this country, both in and out But if any fuch perfons have of the fenate. flattered themfelves, that a Parliamentary Reform was the real object, and not merely the *stalking*horfe of the focieties, their want of information is really to be pitied. They must have known very little of the hatred borne to all the privileges of birth or acquirements, or of the frenzy, which fometimes raged in the brains of their humble friends in the city, and eaftern fuburbs; or how impatient they were of the tardy proceedings in St. Stephen's Chapel; the fafety and continuance of which was principally owing to an augmentation of the affociated Volunteer-Corps. Of courfe they must be ignorant of the obligations they are under

under to those who directed this military force, and actually prevented the madnefs of democracy from a phaeton-like affumption of the reins of government; from whence the whole island might have been kindled into a combustion more deftructive than the infurrection of Jack Cade, or any of the diforders of his fucceffors. I will even hazard the fuppofition, no Volunteer-Affociations being formed, that republican frenzy had proceeded fo far as to corrupt the Guards, and feize or maffacre the whole Houfe of Commons; or as many of them as they found fitting; could thefe madmen fuppofe any men, or fet of men, would have accepted of the government at their hands, reeking with the blood of the Senate? I truft there are none, who bear the name of Britons, fo loft to the dignity of the national character, or of a caft fo fanguinary or degraded. Of courfe, hating both the treafon and the traitors, the flocking deed would have reverted, with tenfold vengeance and remorfe, upon the heads of the perpetrators; while its refults must have juftified the most afflicting, and, perhaps, unheardof recrimination. I intimated, that the fafety of the fittings of the Houfe of Commons was owing to the formation of the Volunteer-Corps, while democracy raged in this metropolis. I repeat it: for, notwithstanding not more than one perfon, as far as I recollect, has been convicted of feducing the foldiery from their allegiance, fuch attempts, among the Clubbifts, were not cafual, but part of a fystem constantly acted upon. To mingle with, and to treat, the foldiery was as much a part of the duty, while the Clubs existed, as it was to meet at the division-rooms; and reports of progrefs, in this undertaking, were conftantly made and applauded.

I may neither have the abilities to pronounce, nor the consequence to substantiate, a panegyric upon eminent characters; but as the effects of measures are the best comment upon the abilities of the men who produced them, let us farther suppose, for argument fake, that, after the recent adoption of French revolutionary principles in this country, the government had delayed the punifiment or prevention of any overt-act, till matters' had proceeded as far as they were carried in 1780! Will any of their accufers, then, take upon them to fay where the confequences would have ended? I will now hazard a contraft: the popular tumult of 1780, without any national views, and without any leaders to direct its movements, eventually coft the lives of two hundred perfons; while the more recent defperate fcheme, to overturn all the conffituted authorities of this kingdom, has been baffled, by the mere imprifonment of lefs than half that number, many of whom were afterwards liberated.

That government in difperfing these focieties, and hindering their re-organization, have acted upon the principle, that " prevention is better than punishment," I believe might be justified by fome who have fmarted most feverely for their attachment to republicanifm. The diet, and not the imprisonment, in the Houfe in Cold-Bath-Fields, being their principal complaint. But even this was not permanent; it being now fome months fince the few confined for feditious practices have been put upon the allowance of state-prisoners, while their wives and families, in order that the innocent might not fhare the punifhment of the guilty, have had an allowance from government of half-a-guinea, and fifteen shillings, per week.

But it is not impossible to add to the testimonies brought by Profession Robison, as to the real views of the felf-named philosophers: the following paffage in the late Lord Orford's Letters, written in 1765, and which could not be brought forward to promote the views of a party, may now ferve our purpose with double effect:

" The Dauphin, fays he, will probably hold " out very few days. His death, that is, the " near profpect of it, fills the philosophers with " the greatest joy, as it was feared he would en-" deavour the reftoration of the Jefuits. You will " think the fentiments of the philosophers very odd " ftate-news; but, do you know who the philofo-" phers are, or what the term means here? in the " first place, it comprehends almost every body; " and, in the next, men, who, avowing war against " Popery, aim, many of them, at a subversion of " all religion ; and still many more at the destruc-" tion of regal power. How do you know this? " you will fay; you, who have been but fix weeks in " France, three of which you have been confined " to your chamber. True: but in the first period " I went every where, and heard nothing elfe; " in the latter, I have been extremely vifited, and " have had long and explicit converfations with " many who think as I tell you, and with a few " of the other fide who are no lefs perfuaded that " there are fuch intentions. In particular, I had " two officers here the other night, neither of them " very young, whom I had difficulty to keep from " a ferious quarrel, and who, in the heat of the " difpute, informed me of much more than I could " have learned with great pains." Vol. V. p. 123.

In addition to the more recondite collection of facts, which the Profession has felected from the German language, I shall next notice a Memorial, written

in 1733, upon Secret Affemblies: Vide, Des Hern Baron Von Holberg's ubrige Kleine Schriften, Copenhagen printed, 1755. In this work, fays Baron Holberg, "I deemed it neceffary to pub-"lift my Philofophical Confiderations upon the "fubject of Secret Societies, becaufe it is no-"torious, that, at this period, feveral of them exift "in various parts of Germany, the propagation "of whofe extravagant opinions feem calculated "to excite defpair rather than devotion."

But whatever might have been the precife object of these Secret Affemblies, the striking fimilarity, which the Baron traces out between the caufes that led to the death of Charles I. of England, and those we have witnessed preceding the late French Revolution; I fay, whatever the views of the former might have been, he makes it appear, that, the proceedings of the English regicides in that reign, like the recent commotions in France, caufed fome alarm, and the adoption of measures of precaution in some of the neighbouring ftates. We fee, fays Baron Holberg, (in his Conliderations before-mentioned) from an Ordinance, published, Wintermonat, December 24, 1655, that our gracious Sovereign, Frederic III. stiffed the Secret Assemblies, of that period, in their birth; not fo much on account of the falle doctrines which they taught, but for fear of the bad confequences ufually refulting from fuch private meetings; the effects of which, we had learned by experience. And farther, that what was, at firft, only the bufinefs of the Clergy, or the Police, at length required the affiftance of the Military.-The grand Rebellion of England, the Baron goes on to fay, has supplied us with proofs of the effects of these divisions. That tragedy, which has occasioned fo much prejudice to Religion and the

the State, had the fame kind of beginning, viz. Secret Affemblies, Attacks upon Public Worfhip, Prophecies, The expectation of the Millenium, An equal division of Property, or the possession of all things in common. Gleicheit unter Menschen zu steften, viz. the Institution of Equality among Mankind and the like !!! His Danish Majesty, therefore, thinking it necessary to use a timely preventative of the evil of Secret Societies, issued the following Ordinance against them:

"Wir Friedrick der Dritte, &c. thun hiemit " kund und zu wiffen : Da unfere Vorfahren fo-" wohl, als wir, es bestandig unfere vornehmste " Sorge haben feyn laffen, dafs das heilige und " wahre Wort Gottes rein und lauter erhalten " und bewahret werde, fo haben wir doch er-" fahren, wie der Meister der den Weizen mit " dem Unkraut zu unterdrucken und 'zu werder-" ben fuchet, das heilige Predigtampt und Mi-" nisterium in Verachtung zu bringen suchet, in-" fonderheit dadurch, dass er durch heimliche und " schadliche Zusammenkunfte, die so es nicht bef-" fer verstehen, von unserer Kirche, und dem " gebrauchlichen Gottefdienst abzuleiten verfuchet. Daher is unfer ernstlicher Wille und " Befehl, an alle hohe und niedrige Obrigkeit, " dafs fi darauf Acht haben, fo, wie fie es vor " uns zu verantworten gedenken, &c."

To the following effect:

That no doubt might remain, whether any of the Secret Societies, hinted at by the Baron, were political, it is fufficient to indicate, that, within a very few years after, he thought them a proper fubject for Satire in his Comedy, intituled, Der Politiche Kangieffer, or, the Political Pewterer; of which, from Gottfched's German Theatre, I attempted an English translation, for private amusement, some time fince. Gottsched, it should be observed, caused it to be translated from the Danish, between 1746 and 1750, under the title above-mentioned; but, from fome fimilarity of the piece, with our Upholsterer, I chose to give it the title of the Democrat cured, or, the Upholflerer The Baron defcribes the Club, of of Dantzick. which the Hero is a leading member, with fingular humour and propriety, especially when contrasted with the views and capacities of fome, who have borne the name of Reforming Societies, in this metropolis. He also plies him with fuch a fucceffion of embarraffments, in confequence of his being imposed upon, with the belief that he is chosen a Burgomafter, that he is only faved from deftroving himfelf by an explanation made to him by a Mr. Worthy, to whom, till then, he had refused to give his confent to marry his daughter, in confequence of his being no politician! In the dénouement of the piece, the author makes him order

order the burning of all his political pamphlets : and he leaves the stage, after most appositely obferving, " It is true, one may eafily condemn a " government in theory, without having any idea " of the practical part. So, to have a general " notion of a Sea-chart, and to understand the art " of navigation, are two things effentially different. " In reading political tracts, it is also easy to ob-" tain a facility in speaking upon a variety of " fubjects; but much more than this, is neceffary " to understand the constitution of a country. " From what has befallen me to-day, every per-" fon, of the fame rank in fociety, may derive "an exemplary conviction, that a man, who has " no other capacity than that of cenfuring his " fuperiors and governors, mult be totally unfit " to administer in their places. For an illiterate " Mechanic, to take upon him the office of a " Statefman, is just the fame as if the latter " fhould affume the profession of the former with-" out any previous inftruction."

Thus far, as to the fimilarity of caufes and effects, and the general opinion of the friends of good government, relative to Secret Societies, in England, France, and Germany. As to the *variety* of the means, adopted in those countries, for promoting their purposes, and the *few* made use of by the English Societies, the latter was probably for want of time; especially, if the opinion, "That the English generally improve " upon the discoveries made by the French," can apply in this particular.

And, as an additional inflance of this difpolition, and the nefarious profanation of talents made ufe of to promote it, my readers may take the following tranflation from the French, felected from an Imitation of the Pfalms of David, in poetic profe, and like them in the Englifh, and fome other Rubrics, infiduoufly adapted to each day of the month:

Upon the abufe of French and German literature, I fhall dwell no longer. To this there are many brilliant exceptions, particularly, a pamphlet, publifhed in 1794, entitled, Blick auf die Franzosiche Revolution—Von einem Freunde des Volkes und der Regierungen." As far as this untranslated "View of the French Revolution, by a friend to mankind and governments," exhibits the origin of that inexhaustable event, in causes, never likely to occur in England, I shall quote a few passages, after premising, as the most oftensible part of my apology for so doing, that no farther knowledge

of the author may be neceffary, than what is to be collected from the following note at the bottom of page 112. Alluding to the French Emigrants, it is there faid:

"Since there are nobles of the prefent day who perfuade themfelves, that none but perfons of equal rank have a right to decide upon points of honour, we wifh to remind them, that our author is no lefs known by his fword than his pen; that he is no ftranger in the Cabinet or the field; and that, in refpect to birth, he might challenge the most ancient and illustrious houses."

" It would, fays this noble author, be a glorious " example to the world, fhould a great nation " awaken inftantaneoufly, after many ages of fervl-" tude and indifference, and, with true magnanimity, " trace fociety up to its original fource, found its " rights upon the principles of eternal juffice, and, " at the fame time, poffers fufficient wifdom to keep " them under the dominion of reafon, confining " even liberty itfelf within inviolable limits.

" But who is capable of cementing an union " between extremes fo diftant from each other, as " inflexible prudence and violent enthuliafm? It " is highly probable, that a nation, giving itfelf " up to the guidance of philosophers, would be " wanting in that energy, which alone is capable " of overturning the thrones of defpotifm and pre-" judice. This energy, is the fole inheritance of " the paffions. On the contrary, if this nation " fhould confift of men, animated with the fpirit " of liberty, men, who had encountered and fuper-" feded every difficulty,- can it be supposed, that, " while flushed with fuccess, they will listen and " implicitly adhere to the difpaffionate voice of " that reason, which places true liberty under the " dominion of the laws, and fixes the welfare of " civilized

" civilized fociety, in almost an intire facrifice of " the natural independence of man?

" The fame genius which plans a revolution " fhould conduct its progrefs; the fame hand " that breaks the fetters of a nation should be " fufficiently powerful to reftrain its paffions; but " the revolutions of states, however fagaciously " planned, are fubject to fo many accidents, and " attended with fo much ambition, and private " interest, that they frequently take a bias, in di-" rect opposition to the views of the first mover. " This was eminently the cafe with the French " Revolution, the origin of which, we mult feek " not in its visible epoch, but look back to times " far remote."

I fhall wave this author's unqualified invectives against the French Emigrant Noblesse, as the caufe of most of the calamities of their country; to introduce his energetic description of the fall of Robespierre.

" At the moment this pamphlet is going to prefs, " Robefpierre, is overthrown by a clap of thunder; " his guilty blood flows upon the fpot where that " of the benevolent Louis, Marie Antoinette, and " feveral others, was shed. Divine justice feems " to have referved him for this fpecial retaliation; " this alone purfued him, and men were merely " paffive in the execution of its fentence. Hu-" manly fpeaking, the condemnation of Robef-" pierre was by no means legal; even his murder-"ers were partakers in his guilt, though they " accufed him of original, unatonable, and even " improbable crimes. In fact, his death feemed " to have been demanded by the howling of the " Furies, and merely a confequence of the appli-" cation of his own principles, and that denial of " refponfibility, which led to the execution of the " King.

This author, a strenuous advocate for the constitution of 1791, as a proof of the futility of all democratic revolutions, is forced, unintentionally, to pay a compliment to the British Constitution, through his panegyrics upon that which approximates towards it, the nearest of any: and he, at the fame time, demonstrates the vanity of every attempt to deviate from that line, to which, even the French nation, is neceffarily returning. If the politics of 1791, fays he, fhould ever obtain a predominance, after a thousand factions have had their day, they will infallibly convince the French, that their true happiness, is equally as distant from a licentious liberty, as from an authority without bounds or limits.

have thus contributed to the gradual, but certain extinction of that hot fpirit, which has caufed fo much alarm to the lovers of good order and that fubordination, by which, it can only be fupported.

In the first place, every degree of confidence which the London Corresponding Society reposed in the nobility and others, who, for a time, gave into the idea of universal fuffrage, and annual, or triennial, parliaments, has been rapidly declining ever fince their Affociation refused to come into the measures of the Whig Club; the proposal of which, by the latter, engendered that diflike which afterwards increased in proportion as the Reforming Societies imbibed the doctrines of *civil* and *moral* equality.

Secondly, divisions and mutual distrust among members, occafioned by the punifhment of fome of the number, the dread of the fame fate, and the great lofs of time requifite for ferving the various offices. But another circumstance which contributed to haften the crifis of the diffolution of this body, was, the introduction of the United Men into the metropolis, in 1797 and 1798; or rather the toleration of fuch perfons in the London Correfponding Society, as joint members of both ! I fay the toleration, becaufe the known violence of the former, caufed them to be eved with fo much fufpicion, that one division of the London Correfponding Society, was denied admission at the house of a member, only for writing a letter to one of the United Societies.

The grand arcana of this new eftablishment was always acknowledged to the *initiated*, "as to form "a diversion in favour of the enemy, in case of a "landing." Many perfons also undertook to learn the French language, no doubt, with a view of facilitating a communication.

That the United Men should be obnoxious to numbers of the London Corresponding Society may not be easily credited by strangers; the fast, however, which I have stated, must be admitted; for, if both of these associations were hideous or unnatural, still, a diffimilarity, might exist between them; such as is hinted in a German History of Apparitions, one of whom is described as being so exceedingly terrific, as to affright other street.

Notwithstanding, as the procuring and learning the use of arms were the ground work of the association of the United Men, numbers of the London Corresponding Society, who did not reliss the London Corresponding Society, who did not reliss the daring measures, very prudently withdrew from both associations. The government's knowledge of these feveral circumstances, is, in my opinion, a fufficient vindication of the necessity of the Bills against Sedition, and the Suspension of the Habeas Corpus Act.

But farther, no accurate observer can possibly be ignorant, how much the herding principle has been checked by an unprecedented price of provisions; I fpeak only of the lower class: the beer-houses which, previous to the late rife of the necellaries of life, used, in working neighbourhoods, to be filled three evenings out of the fix, have been gradually deferted. The passengers, who, in the piping times of peace, were frequently obstructed, can now pass, unmolested by ballad fingers, and drunken fquabbles in the fireets, while the number of night charges at the watch-houses have decreased in proportion : and this accidental alteration of circumftances, by compelling mechanics and others to fhare their porter at home with their families, has prevented many of them from being introduced to the Infidel or Political Societies, at the public houses. As for the seceding and repentant clubbifts;

bifts, many of them are not a little aftonished at their credulity, in being led away by men, only intent upon the difplay of their oratory, or filling their pockets at the expence of the public opinion. Nor will it foon be forgotten, that fome perfons of opulence, who had been clamorous for democratic diffinction, were afterwards implicated in charges of monopoly and opprefion; and, that during the late exceflive dearth of provisions, the principal part of the public charity did not flow from men, before in the habit of haranguing the populace upon their *real grievances*, but from others, generally in opposition to fuch principles and proceedings ! Another final mean of damping the revolutionary fpirit, in the Societies I have been fpeaking of, was the recollection, that in their corporate economy, viz. in the petty administration of their affairs, though there were no millions unaccounted for, yet there were many and repeated defaulters, and dilapidations of a leffer amount, clearly demonstrating that Citizens and Ministers in miniature, forming the Executive Committee, or acting as Secretaries, have been the first to fecure their own interests. And farther, when called to account for this un-citizen like behaviour, have even denied the right of refponfibility, and withheld or deftroyed the documents which might have been brought against them !

But, notwithstanding these lessons, a delirium feems to have attached to, and never to have less the divided remains of English Democracy, till it received the shock of Bonaparte's constitution ! Otherwise, the voice of Reason, added to the former changes in the French government, must have been heard; or even those revolutions would have filently destroyed all the ideal and imitative frames, which the Constitution-builders had been laying for

for years on this fide of the water, and have forced them back upon their own, though by a negative preference.

But in fpite of the difcouraging fpecimens exhibited to the London Corresponding Society and their adherents, viz. by their Executive Committee, and other mimic ministers; while they flattered themfelves that the foundations of Republicanifm ftood fure in France, a cure was always expected in the old revolutionary mode of changing men. It was to little purpose that the focieties were deterred from meeting: that their difpirited leaders had withdrawn themfelves, or were fcattered far and wide in different prifons; the Republican principle, they contended, still remained inviolate and incorruptible ! But where ? Not among the Nobles who had ceafed to call Plebeian meetings, as the latter fuppofed, to confult with them !----not among the dependants upon these Nobles, who had secend from the Senate, and enhanced their crimes in ceasing to harrafs the Minister :-- not among the Commercial men in the City of London, whole intereft it was to continue his fupport; but it was to France, that they still looked for the fruits of the Tree of Liberty, which was to be yielded to them alfo in due feafon. A fignal victory, obtained by the Auftrians, or any of the Allies, feldom damped the hopes of Democracy; this was looked upon, as no more than the pruning of the branches, neceffary to make them fhoot again with fresh vigour, If a commander was guilty, or accused of correfpondence with the enemy, he was only deemed a canker-worm, who wanted to eat away the root. If crowds of Emigrants or Priefts were adjudged to death, it was ftill necessary to destroy them as fo many locufts or caterpillars, who would have deyoured the leaves; or, if whole branches of this

precious tree of liberty were carried away to engraft upon other trees in Italy, Egypt, or the Indies, still all was well; or, if the State Gardeners murdered each other, in consequence of their difagreements about the manure, or the mode of dreffing or fencing this hopeful fcion, still no difference was made. Robefpierre, it was thought, would certainly bring it to perfection. It was af-. terwards transferred to the Briffotines, the Sieyes, and others, who continued to clip, and even ftunt its branches; ftill, as the root was supposed to be found and vigorous, and that it would again fhoot out with all its energies, when the managers could agree among themfelves, thefe retrenchments created no alarm. Every fucceeding Gardener, it was prefumed, would mend the fault of his predeceffor ; and when it was put under the care of Bonaparte, then was expectation, for a moment, wound up to its higheft pitch; yet no fooner had his new plan ripened into birth, than the falling off was inexpreffible! Conjecture now feemed loft, and the zig-zag flashes of opinion, emitting a dark and dubious glare, refused to be confined to any given point. The multitude that fet out to follow the French revolution, whatever courfe it might take, though before fomewhat confused by the many languages it had fpoken, were now at their ne plus They were exactly in the fituation of those ultra. timid animals, who, preffed and perplexed by the shouts of the hunters, know not which course to purfue. In fact, it was now necesfary, at all events, to return; for as the Archimedean ground of France, upon which all the world was to have been moved, had vanished, and only prefented a yawning gulph in its place-there was no alternative. And to those who had recovered their reason, in ever fo fmall a degree, it was now evident, that the

the shelter still afforded by the British oak, was infinitely preferable to any exotic substitute whatever.

But independent of these facts, which no sophiftry is able to palliate, and which no dexterity of movement can evade, the relative merits and demerits of Aristocracy and Democracy, I think, may .be illustrated from fome confiderations not hitherto explored; and which, I prefume, must place the weakness and infufficiency of the latter in a new point of view, and beyond all contradiction. To proceed; if we compare the ruling members of the body politic, to the fuperior faculties in the human frame, it will appear that there is a natural correfpondence, and apposite relation between the lowest and worst passions in individual existence, and the tumultuous motions, the furor, or the panic fears of democracy in the great world, or organized fociety; while Ariftocracy, from its flability, and the fuperior enlargement of its views, naturally approximates to Reafon, and the cardinal virtues of Prudence, Juffice, Temperance, and Fortitude; and thus, abstractedly confidered, is, in fact, the wildom and maturity of human fociety, in opposition to its rashness, its youth, and inexperience.

For an experimental conviction of the evanefcency, and abfolute nullity of a Democratic form of government, we need not look at France, where it has recently withered even in the hands of philofophers, but turn our eyes to the petulancy and littleneffes, frequently attendant upon parochial adminiftrations; and for no other reafon, but becaufe the adminifrators are chosen as it were by lot, out of the body of the people. These annual rulers, when vested with a " little brief authority," are often fo much elated by the fudden change; that the confequence they affume, not being educated to rule, nor Q habituated habituated to command, is fuch, as to render themfelves perfectly ridiculous or contemptible; to fay nothing of their too frequent acts of inhumanity, which have fo often called for the interference of fuperior courts, more enlightened, and confequently more humane judges. Thus, if the proceedings of the committee-rooms had been as public as those of the bench, the farcafm of the comic muse would have found an ample fubject in their difcuffions and awards.

If we reduce the experiments of Democracy to a narrower circle, notwithstanding fome of its advocates have told us, that the head of the government flould refemble the prefident of a commonclub, not *hereditary*, but removeable at the pleafure of the members, the *fovereign people*, we fhall ftill find the theory at war with the practice. Let us examine the internal economy of the numerous popular focieties under the name of benefit clubs; Are they not fubject to perpetual fquabbles, growing, as it were, out of the facility of crimination? Are not their concerns generally managed by a fmall junto, and their difputes generally fettled by the clerk? No member is he, but only a fervant to the fociety : yet to his opinion the majority mostly pay a deference, merely on the supposition of his fuperior abilities! Is not fome one, in these cafes, the indifpentible character who must temper their acrimony, foothe their jealoufies, and mitigate their awards? Thefe are undeniable facts. A governing Democracy then, even in miniature, is a non-entity which can have no permanent existence but upon paper, or in the imaginations of those who mingle and confound theories for tried facts.

But, after all, if any thing is wanting to fatisfy speculatifts, who hold a contrary opinion, let them

try Democracy upon their own families, and they will there find it the proper parent of mifrule and perpetual difcord. And as I have fhewn it to be that, in a conftitution, which the paffions are in the human frame, Ariftocracy is, and muft be, the *Reafon of a State*. As fuch, it poffeffes the indefeafible right of pre-eminence. I do not fay it can exift independently of Democracy; it has as much need of the ftrength and enthufiafm of the people, as they have of its prudence and ftability. But as the paffions in an individual fhould ever be fubfervient to reafon, it is equally juft, that the paffions of a nation fhould be conftantly fubjected to the controul of the more noble and fuperior faculties of the body politic.

If the late degeneracy of the French nation, into the madnefs of Democracy, has given us just caufe of alarm for our domeftic tranquillity, its fublequent approximation, under the prefent Grand Conful, towards that Aristocracy we have just sketched out, should allay every apprehension upon that fcore.

The points of refemblance, in the fituation of various branches of fociety, and the interests of clashing parties in this country, are not likely, after what has paffed, to fall into a fimilar direction with those of France, immediately preceding the late revolution. Even the difaffected, with the failure of eight years of experiment full in their faces, and the confequent degradation of the French revolutionary spirit, are deprived both of precept and example. They are, in a manner, bound hand and foot, and thrown into the gulph of doubt and uncertainty. To recover from the flock, therefore, which the centre of all revolutions has fuftained, must be a work of time; and, before the public mind can be roufed into action, it will rather re-Q 2 quire

quire a fecurity against future fufferings, than an indemnity for the past.

In fine, the confequences of the French revolution may, for a long period to come, prefent themfelves at the elbow of every project for political change or innovation; being perpetuated in thofe outrages of feeling, which cannot foon be forgotten, they are imprefied upon the minds of men, in characters which cannot eafily be erafed. On the other hand, thefe characters may even defy the power of obliteration, being too deeply indented in the earth, in the graves which have been dug for the millions who have fallen.

But though, all through the course of this work, I have infifted upon the impotence of the Democratic and Infidel focieties, unconnected with higher influence, or external agency; and though their' meetings are no more holden; ftill, as fcattered individuals, they are fufficiently numerous to do confiderable mifchief; the Atheiftical class in particular feem mostly incorrigible. Incredible as it may appear, they are all looking forward for a millennium of their own ! And, notwithstanding the repeated failures of the French philosophers and revolutionifts, the English Atheists blindly infift, "that civil fociety is in a progreffive flate of im-" provement, to which every government, by its "weaknefs and crimes, is unavoidably contribu-"ting; the final end of which, will be the diffolu-. " tion of them all; and that the time is fast ap-" proaching, and will infallibly arrive, when man " and nature will be perfect in all their relations, " and the former will be able to live without go-" vernment, without laws, and without fubmif-"fion !!!" In England, thefe fanatics call themfelves the difciples of Mirabaud and Godwin. Upon the German Continent, one of their most notorious

notorious leaders is Professor Fichte, late of the University of Jena; for a particular account of whom, vide Appendix to Vol. IV. of the Anti-Jacobin Magazine, and the German Journals for 1799, one of which, thus strikingly contrasts the unexampled audacity of the new impiety, in an Epigram from the words of David—" The fool hath " faid in his heart"—

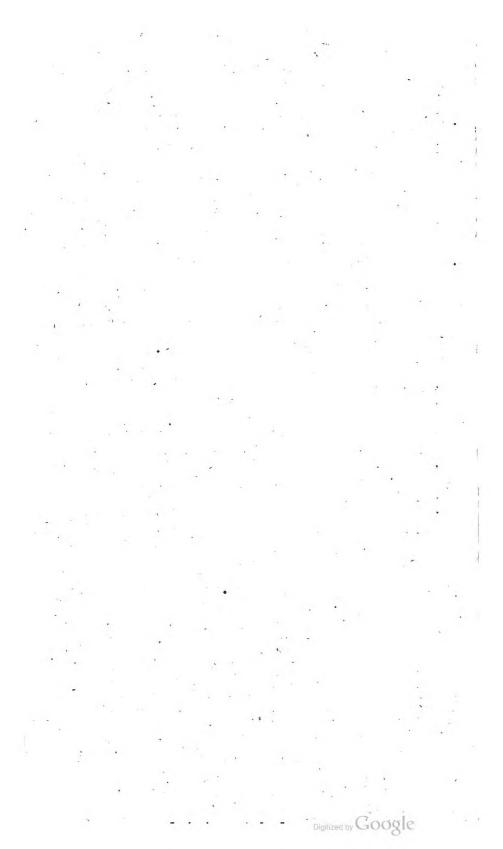

> The ancient Atheift, dreading to impart His impious creed, conceal'd it in his heart; But modern Atheifts, fearlefs of the rod, In words and deeds, proclaim, "There is no God !"

Being warned, in facred writ, of these scores, that were to appear in the last times, we know, from the fame authority, that their end is destruction, and that their folly shall be manifest to all.

But though, in a moral view, the anti-religious opinions of Infidels muft meet with accumulated contempt from the Chriftian world at large; yet, as those who entertain them are all, without exception, tinged with revolutionary politics, and naturally detest every establishment, the utmost caution continues necessary on the part of government, to prevent any combustion or real grievance, of which these incorrigible members might avail themselves, to involve the community, as agents, in the profecution of their invidious designs.
