A Table of the Moon's Age for every Day throughout the Year 1803, whereby, with the Help of the next General Tide Table, the Times of High Water at all the Places mentioned above it are shewn by Inspection.

An Explanation of this and the following Table:

First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection.—*Example, Jan. 11, I find the Moon to be 19 Days old, and over against 19 in the 1st Column I find 6 h. 12 m. in the 2d Column, 4 h. 42 m. in the 3d; which are the Times of High Water at all these Places mentioned above in the 2d and 3d Columns on that Day. Et sic de cæteris.*

ROYAL FAMILY, &c.

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III. June 4, 1738	Duke of Sussex, Jan. 27, 1773
Prince of Wales, Aug. 12, 1762	Duke of Cambridge, Feb. 24, 1774
Duke of York, Aug. 16, 1763	Princess Mary, April 25, - 1776
Duke of Clarence, Aug. 21, 1765	Princess Sophia, Nov. 3, - 1777
Ds. of Wirtemberg Sept. 29, 1766	Princess Amelia, Aug. 7, - 1783
Duke of Kent, Nov. 2, - 1767	Queen Charlotte, May 19, 1744
Prs. Augusta Sophia, Nov. 8, 1768	Princess of Wales, May 17, 1768
Prs. Elizabeth, May 22, - 1770	Dfs. of Brunswick, Aug. 11, 1737
Duke of Cumberland, June 5, 1771	Duke of Gloucester, Nov. 25, 1743

SOVEREIGNS of EUROPE, their Accession, &c.

Kingdoms, &c.	To whom subject.	When born.	Began to reign.
England, &c.	George III.	June 4, 1738	Oct. 25, 1760
Russia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Charles IV.	Nov. 11, 1748	Dec. 1788
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Prussia	Fred.-Wm. III.	Aug. 6, 1770	Nov. 16, 1797
Denmark & Norway	Christian VII.	Jan. 29, 1749	Jan. 14, 1766
Sweden	Gustavus IV.	Nov. 1, 1778	Mar. 29, 1792
Germany	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Holland	William V.	March 8, 1748	Oct. 11, 1751
Popcdora	Pius-VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor-Emanuel		June 4, 1802
Ottoman Empire	Selim III.	July 17, 1761	April 7, 1789
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 6, 1759
France	Bonaparte	Aug. 15,	1800

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to pass of the Gold Coin.

Wt. allowed.		Full Wt.		SILVER.		Full Wt.	
GOLD.	dwt. gr.	dwt. gr.		dwt.	gr.	dwt.	gr.
Guinea	- 5 8	5 9 ³⁰ ₈₀	A Crown,	- - -	19	8 ¹⁶ ₃₁	
Half Guinea,	2 16	2 16 ⁶⁴ ₈₀	Half Crown,	- - -	9	16 ³⁴ ₃₁	
Third of Guin.	1 19	1 19 ¹³ ₈₀	Shilling,	- - -	3	20 ³⁸ ₃₁	
			Six Pence,	- - -	1	22 ¹⁴ ₃₁	

According to the above proportions it appears, that the value of a lb. of silver is 62s. or 3l. 2s. and of a lb. of gold is 44½ guineas, or 46l. 14s. 6d. Also that the oz. of silver is 5s. 2d. and the oz. of gold 3l. 17s. 10½d. So that the value of the standard gold is 15 times that of the silver, and 1-14th more.

A TABLE of TERMS and RETURNS for 1803.

Hilary Term begins *January 24*, ends *February 12*.

Returns or Effoign Days.	Exc.	Ret.	App.	W. D.
In eight Days of <i>St. Hilary</i> , - - <i>January 20</i>	21	22	24	<i>Mond.</i>
In fifteen Days of <i>St. Hilary</i> , - - - - <i>27</i>	28	29	31	<i>Mond.</i>

Hail, blooming Year! Heaven ne'er deny thy Smiles
 To our great Monarch, and his happy Isles;
 May his wife Counsels every where succeed,
 Whilst all his Foes with Grief do inward bleed;
 We, safe at Home, in Peace, yet fierce and bold,
 Tho' Janus brings this Month Increase of Cold.

Whence flows the hidden Springs of Nature's Store,
That this Month seems to open; rather more
Replenishing than others, Ponds and Ditches,
As Misers fill their Money-Bags with Riches?
But this is surely for a secret Store
Against th' approaching Spring, that's never poor.

Rome's regal Romulus this Month did name,
 In Honour of God Mars, from whom he came;
 Aiming thereby thus to perpetuate
 The (brittle) Glory of the Roman State;
 It is a rigorous Month, wherein the Ram,
 With blustering Storms, receives the radiant Sun.

Happy the Man whose Soul exerts his Birth,
From Heav'n extracted, scorns the Chains of Earth,
But upward mounts, Spite of imprisoning Clay,
And views the quiet Realms of genuine Day.
Here Nature 'midst the shining Orbs is seen
Enrob'd in Glory, and exerts the Queen:

Here rules in State majestic, and from hence
Sheds on the Earth a distant Influence.
Let plodding Sots in trifling Works engage,
Recount the Actions of the World's great Stage;
For Ages past in dusty Volumes pry,
And trace Mankind back to their Infancy.

A noble Scene invites my Thoughts to roam,
 Not what is past but that which is to come ;
 As far as Poets yield to the Prophet's Name,
 Her Place above the Arts Astrology doth claim.
 Astrology ! O Science, all divine,
 What Praises can be spoke that are not thine ?

Observations.

We may expect to hear of many notable Exploits acted upon the Theatre of the World; some daily employing and straining their Wits to accomplish their evil Ends on their Friends and Neighbours. A little Spark kindles a great Flame. Let former Precedents be a Monitor to us and the rest of the World.

- 1 Lord Howe beat the French fleet 1754
- 7 Belleisle taken 1761
- 8 Seven Bishops sent to the Tower 1688
- 10 Geo. I. died 1727
- 16 Battle of Dettingen 1743
- 17 Addison died 1719
- 18 Mahomet died 631

By which an open Way to Man is giv'n,
 To search the Depths, and read the Will of Heav'n ;
 Our Souls, while thus employ'd, are like the Space
 On which we do our Contemplation place :
 No Storms so high to reach your Regions, swell ;
 Nor we, nor Sky, the Fury fear, which each foretell.

But some will urge to tell them, if we can,
 How senseless Stars can act on thinking Man?
 Were not the Soul close in the body join'd
 To this her Prison in strong Chains contin'd:
 Did she not hence her Notices receive,
 Become susceptible of Joy and Grief.

Did she not wholly to the Body owe,
 Whate'er she feels, whatever she doth know ;
 We then might wonder that the Stars make Fate,
 That Matter can on Spirits operate.
 When gath'ring Clouds contract the Hemisphere,
 And Damps descending, clog the lazy Fear :

Observe but then the Motions of the Eye,
 Where the Soul's Movements you may best descry;
 Through these, her Windows, you may plainly view
 The Goddess's Flag beneath th' elemental Dew;
 But when the weary Mists at length are fled,
 And now no more the ethereal Plains are spread.

Observations.

Five Conjunctions of the Planets happen this Month, which doubtless will have considerable Effects.

4 New River bro. to London 1614
 5 Old Parr died, ætat. 152 1635
 8 Admir. Benbow died 1702
 11 Lord Duncan beat the Dutch fleet 1797
 15 Bishops. Lat. and Rid. burnt. 1535
 — Ma Antoinette Qu of France beheaded 1793
 19 King John died 1216
 20 Admir Belcher can away 1744
 22 Sir Clo. Shovel lost 1707
 24 Battle of Agincourt 1415
 25 King Stephen died 1154
 26 Bible translated into English 1537

28 November hath XXX Days.

When light'ned Air transmits the vivid Ray,
 And ev'ry Heart welcōmes returning Day;
 The vigorous Spirits to the Eye resort,
 And urgent Joys around the Temples sport;
 But granting that, we still must own the Mind,
 Be free, unsubjugated, unconfin'd.

Th' Empire o'er himself to Man is given,
 Outward Events to th' Influence of Heaven ;
 Hence deep Designs we often frustrate see,
 Nor wisest Plots can baffle Fate's Decree ;
 Decrees of Fate, writ in the Stars, we know
 Not to elude, but break the coming Blow

Observations.

We, the People of England, are, I hope, in as good a Condition as any other Nation in Europe; and so I conclude, God preserve his Majesty, and all the Royal Family, and grant him a long and prosperous Reign.

- 1 Henry I. died 1135
- 2 Mariners comp. invented 1300
- 4 One hundred and thirty sail of Dutch ships taken 1664
- 12 Cromwell made Protector 1653
- 29 T. Becket murdered at Canterbury 1171
- 30 Royal Society of London instituted 1660

A Compendious Chronology of the most principal Epochs and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Christ.

	Julian Period	Anno Mundi	Ante Christ
T HE Creation of the World after the Jews - - -	952	1	3760
The Common Epocha of the Creation	765	1	3950
The same by the Greek Emperors -	787	1	3926
The same in Mr. Bedford's Scripture Chronology - - -	706	1	4007
The same in Bishop Usher's Annals -	710	1	4004
The Deluge, or Noah's Flood -	2362	1657	2351
Porphyrius's Caldaic Epocha - -	2480	1717	2200
The Assyrian Monarchy by Nimrod -	2665	1960	2048
The Birth of Abraham - - -	2714	2009	1999
Joseph sold into Egypt - - -	2986	2281	1728
The Israelites 400 Years Servitude in Egypt	2819	2114	1894
The Kingdom of Argos founded by Inachus	2857	2152	1856
The Birth of Moses - - -	3143	2438	1571
The Kingd. of Athens founded by Cecrops	3157	2452	1556
The Israelites Departure out of Egypt	3219	2514	1494
Their Entrance into Canaan, or the Jubilee	3258	2553	1459
The Destruction of Troy - - -	3530	2825	1483
The first Sabbatical Year - - -	3260	2557	1451

OF THE
ECLIPSES

That will happen

This YEAR, 1803.

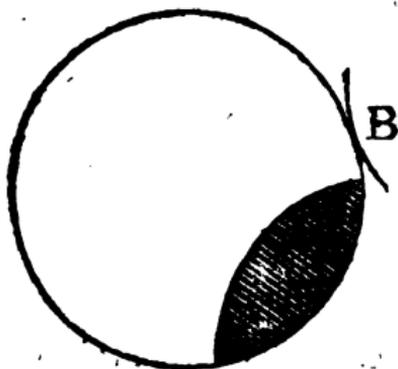

WITHIN the limits of this year there will be two Eclipses of the SUN; and as they fall about six months distance from each other, namely, one before the Sun's Apogee, and the other after, we cannot have any Eclipses of the Moon this year, as the learned KEPLER has remarked in his *Epist. Astron.* p. 881; for which reason also, such Solar Eclipses are seldom visible in these parts of the Earth; but, however, I find at the second of these Eclipses, the Moon is so far gone North of the Ecliptic Line, as to exhibit to us a visible Eclipse of the Sun, and that as large as any we often have under such circumstances.

THE first of these Eclipses happens on *Monday* the 21st day of *February*, at 9 at night, consequently invisible to us, and not to us only, but even so to all *Europe*, *Africa*, and *Asia*. In the Great Southern Pacific Ocean, this will be a very great Eclipse, even so as to be total at or near the *MARQUESAS*, which is a group of Islands in the said great Ocean, lying in 139 degrees of West Longitude from *London*, and about 10 degrees of South Latitude; the most considerable of these Islands are, *St. Christiana*, and *St. Pedro*; *Capt. Cook* was here in his second voyage, in the year, 1774. This Eclipse will be visible at the *Society* and *Friendly* Islands in the aforesaid South Sea and parts adjacent.

THE second of these Eclipses, will happen on *Wednesday*

day, the 17th day of *August*, in the morning, and if clouds interpose not, visible (as I said before) in this Kingdom, when a Fourth Part of the *Sun's* Disk will be obscured, as appears by the following Type and Calculations.

The Apparent Time at *London*, of the

	D.	H.	M.
Begin Aug. -	17	5	55
Middle - - -		6	42
End - - - -		7	32
Duration -		1	36
Digits Eclipsed -		3°	12

This Eclipse will begin on the right hand of the *Sun's* Limb, as at B in the Type above, and it will end near the *Sun's* lowest point of his Limb; here note also, that the above delineation is the appearance expected at *London*, at the time of the middle, and will very nearly serve the rest of the Kingdom.

On *Monday*, the 31st day of *October*, in the evening, the *Moon* will eclipse the star *Eta*, one of the *Pleiades*, which is a star of the 3d magnitude, and if the air is clear, it will be visible here. The immersion at *London* will be at 49 min. past 5 in the evening; and the emersion will take place at 37 min. past six o'clock, app. time.

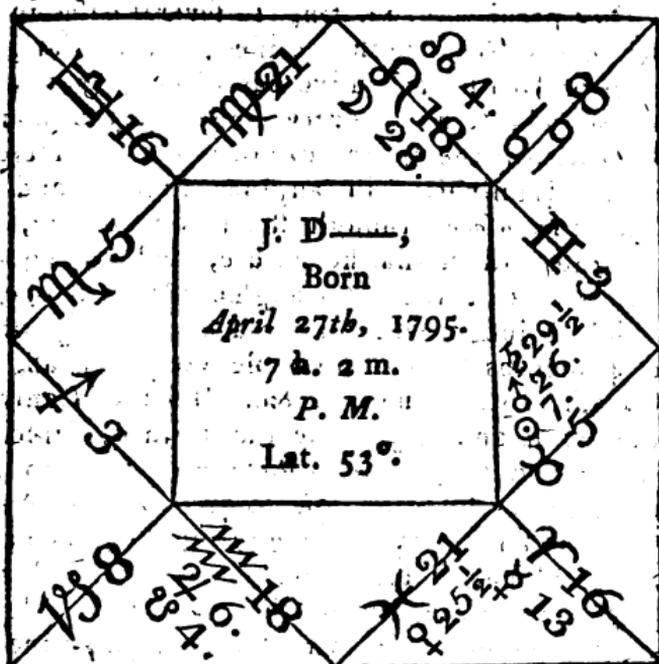

The *Moon* will eclipse others of the seven stars that evening, and nearly at the same time; but then some sort of telescope will be necessary to observe them. *Note*, The two great superiors, *JUPITER* and *SATURN*, are now very fast separating from their conjunction, as seen from the Earth, which conjunction happens but once in 20 years. *Jupiter* has got to the Eastward of *Saturn*, as may be seen by the naked eye, and will soon leave him far behind.

behind. On the 1st of *January*, 1801, M. PIAZZI, Astronomer at *Palermo*, in *Sicily*, discovered another primary Planet belonging to our Solar System. It has now been observed in *England*, and found to move between the Orbits of *Mars* and *Jupiter*. It is about half as large as the *Moon*, and seems to perform its period round the *Sun* in about four years and a half. It is named *Ceres Ferdinanda*, in honour of the goddess, Patroness of *Sicily*, and the reigning monarch of that Island and *Naples*. It appears as a Star of the eighth magnitude, therefore much smaller than the *Georgian* Planet, which was first discovered by Dr. HERSCHEL, in the year 1781, which moves very slowly round the *Sun*; being not in a less period than about 82 years.

GENETHLIACAL ASTROLOGY.

A Curious Nativity, astrologically investigated, and sent to me by my honourable friend Mr. JOHN WORSDALE, of *Donington Northorpe*, near *Boston*, in the county of *Lincoln*, who intends publishing a large Treatise on the Science of ASTROLOGY, both in its Genethliacal and Mundane Parts, by Subscription. The Tracts published by this Author on Astrology some years ago, are to be purchased of the Booksellers in *Newark*, *Sheffield*, *Lincoln*, &c.

My friend calculated this Nativity when he lived at *Spanby* near *Folkingham*; and as it is a remarkable Figure in many cases, I here give it to the Public, not doubting but it will give pleasure and satisfaction to every person who is inclined to spend his leisure hours in these Sydereal Speculations. The Figure in itself is of a violent nature and tendency, which considered with the nature of the directions for Death, must of course augment the evil in an eminent degree; in the Figure both the Luminaries are in aphelical places, but the *Sun* claims the Hylegiacal Power without dispute. The following directions I assign for the Death of this Native.

DIRECTIONS FOR DEATH. Yrs. Mo.

⊙ ad parallel of ♃ in the Zodiac -	21	3	
⊙ ad parallel of ♂ in Mundo, C. D.	22	8	
⊙ ad parallel of ♃ in Mundo, C. D.	24	7	
⊙ ad parallel of ♃ in the Zodiac -	25	1	
⊙ ad * of ♀ in Zodiac fine Lat.	25	10	
⊙ ad Body of ♂ in Zodiac - - -	26	4	DEATH,
⊙ ad Pleiades fine Lat. - - -	26	5	
⊙ ad Body of ♂ in Mundo - - -	26	10	
⊙ ad Zodiacal parallel of ♂ - - -	27	8	
⊙ ad □ of the ♃ in the Zodiac - -	28	11	
⊙ ad Body of ♃ in Mundo - - -	29	4	
⊙ ad Body of ♃ in Zodiac - - -	31	7	
⊙ ad parallel of ♂ in Mundo, D. D.	34	6	
⊙ ad parallel of ♃ in Mundo, D. D.	35	8	
⊙ ad Aldebaran fine Lat. - - -	40	5	

The foregoing directions are made by true and natural motion, and are demonstrable on the Globe; though there might have been many more, yet I conceive these are sufficient to prove the truth and verity of this sublime

Science. My predictions relating to several cases in this Figure of Birth have been verified, particularly the great danger of Death the Native has already met with; for it will be admitted by every one that the position carries along with it the appearance of violence. Here we find both the Luminaries in angular stations and oppressed; for the *Moon*, though she is not Hyleg, yet she is constituted of a malific nature, and consequently contributes not a little to augment the stroke of Death, which I judge will take place at the age of 26 years and 4 months. It is probable you may ask the cause of Death, with its nature, &c. To this I answer, that the rays of ♃ and ♀ precede the train of directions that will kill; and as they will have no power to save when the *Sun* comes by direction to the body of ♂, we are (according to PROLEMY) to judge from them the nature of the disease, which, to say all in a few words, will most undoubtedly be a *poisonous* disease, that will affect the lungs, &c. Some may possibly ask, why I do not allow the *Sun* to the Zodiacal parallel of ♄ to cut the thread of Life, being followed by his mundane parallel, and the mundane parallel of ♂? This I confess is a proper question to be asked; and in answer thereto I shall only say, that I do not believe the Native will be indisposed under the influence of those directions, because the rays of ♃ and ♀ fall in with them, which certainly destroy their killing power. Thus you see I here give you proper directions to the *Sun* as Hyleg, that will cut in two the thread of Life, without making use of the Ascendant, as some have done; but here I shall add that the Horoscope meets the ♀ of ♂ and ♄ a little after the ☉ meets the ☐ of the ♃; so that we may here observe two of the vital places oppressed at the same time; not that I allow the Ascendant to have power to kill, only in cases similar to this. For when the Ascendant, not being Hyleg, comes by direction to the hostile rays of the Malevolents, and the *Sun*, or ♃, the proper Apheta at that time, being directed to violent rays, then beyond all doubt Death must be the consequence, even if the Hyleg meets with the weaker hostile directions at that time. I may probably say something hereafter on the Nativity of a young man, who is a near neighbour of

mine,

mine, and shew you what directions I allow for his *Preferment, Marriagè, and Death*, with the time when those events will take place; he was born, *October* the 25th, 1781, at noon; I believe I need not make mention of the good effects of the Directions of the Mid-heaven, and *Sun*, to the bodies of Υ and ♀ , in his Figure of Birth, as their natural importance is visible to every Student in this Science. In his Zodiacal Constitution, the *Sun* is certainly the Giver of Life, and consequently must be directed for Death, its time and quantity. Some time ago I calculated the Nativities of several eminent Persons, agreeably to the Precepts of the great *PROLEMY*, though I acknowledge I have no business to meddle with them in this place, as the time of Death is very nigh at hand, and will of course shortly prove that the principles of *ASTROLOGY* are *certain*, and founded on the immovable basis of Truth. Wherefore, to *HIM* alone that ordereth and disposeth of all things according to his *DIVINE WILL*, and that created the *HEAVENS, EARTH, CELESTIAL PLANETS, and STARS*, and that calleth them all by their names, and that maketh them to differ from each other in *GLORY*, and that giveth of his free will and pleasure, the knowledge of divine and natural things to the Sons of Men, be ascribed all possible praise, glory, power, dominion, and thanksgiving, both now and for evermore
Amen.

Mark the Events that are portended by
The ever Sacred Volumes of the Sky;
By Pray'r to God, let us his help implore
In time of need, till we shall be no more.

Astrological Observations for the Year 1803.

THE WINTER QUARTER,

Or, The Sun's Transit through ♋, ♎, and ♏.

THE Winter Quarter begins this year on *Wednesday, December* the 22d, 1802, at 51 min. past 11 o'clock in the morning; at which moment 25 deg. of ♋ arise in

in the East, and 28 deg. of \uparrow are on the Mid-heaven. The \odot is in g of \uparrow from Cardinal Signs, and is also hastening to a \square aspect of \uparrow , from Cardinal Signs and Angles; but g by a retrograde motion falls back upon the Sun, and comes to a conjunction with him in about 9 days. The p is also applying to a \ast aspect of \uparrow , and comes next to a Zodiacal \square of h , from \uparrow and m . Thus I find stands the face of the Heavens, which is, I think, no ways very favourable to some countries, notwithstanding a peace has been lately concluded; for the effects of the great Conjunction of *Jupiter* and *Saturn*, which are now operating in force, and have been so for a long time back, still signify feuds and contentions, with jealousies, and the like; which this ingress also implies. The effects of this baneful conjunction has, I am sorry to say, been already too much felt in this country, by the prevalency of pestilential and contagious Fevers, which have been almost universal, and dreadfully felt in some places, to the distress of many families which it denoted; it also denoted great floods and inundations of waters, which I am happy to say, was not felt in this Kingdom, but it was most dreadfully so last Autumn in foreign parts, namely, in *Italy*, *France*, and *Germany*, &c.; and as to War, that scourge of Nations, at the writing of this, has departed from our Coasts and Land, but it has since dreadfully raged in the West Indies, especially in the Island of *St. Domingo*; also in *Turkey* and *Egypt*. I expect the ensuing winter, to hear of much robbing on the highways, house-breaking, and the like.

THE SPRING QUARTER,

Or, *The Sun's Transit through v , g , and ii :*

THIS Quarter begins on *Monday*, the 21st day of *March*, at 20 min. past one o'clock in the afternoon, at which time 11 deg. of Ω ascend, and 22 degrees of v are on the Meridian. The Sun is in a direct g of \uparrow , as he has been of h , but a few days ago; and in about 9 days more he comes to a \square aspect of δ , and from Car-

dinal Signs. The Υ ab ζ φ ad Δ δ et γ η . Thus stands the Face of the Heavens at this vernal ingress. This seems as if it would be a very active Quarter, so that there will be very eminent and active doings going forward, perhaps some sudden and unexpected divisions amongst the great powers and rulers of the world; they are possess'd with many doubts and fears, in which I expect *Holland*, *Russia*, and the *French Republic* are particularly concerned; neither will *Spain* and *Italy* come off scot free, nor yet the *Turkish Empire*. I find there will be great murmurings and discontent of the common People at the actions of their Superiors. Many places will yet be made sensible of the effects of planetary energy, both in this and some succeeding years. I hope and wish all may continue well in *England*, and its connections; and that the famous City of LONDON may have Peace, Health, and a flourishing Trade.

THE SUMMER QUARTER,

Or, the Sun's Transit through ϖ , Ω , and \mathfrak{M} .

THIS Quarter begins on *Wednesday, June the 22d*, at 2 min. past 11 in the morning; when 17 degrees of Π are on the Med. Cœli, and 20 degrees of \mathfrak{M} are on the Eastern angle, hence φ is Almuton thereof, and in a * aspect of η . The Υ is in Ω in the 11th ab * φ , ad ζ of δ . The two Superiors Υ and η are on the cusp of the Ascendant, in \mathfrak{M} , a sign of the earthly triplicity, and within 12 deg. only of each other. However, I must say, that this is a more promising ingress than the former, especially to this Nation, inclining men's minds to peace and concord; but not so to every nation, for *Virgo* is the Ascendant of *Paris*, and other parts of *France*, as well as some other places, hence I expect broils and disturbances, tumults, and the like; neither is the sword sheathed in earnest every where! I hope our great men will be cautious, and endeavour to preserve us from a future war, at least for some time, for there is still reason to fear. I hope no contagious distemper may break out again, either

amongst men or beasts, and that the fruits of the earth may come to perfection, as this *conjunction* of *Jupiter* and *Saturn* in *Virgo*, seems to aggravate.

THE AUTUMNAL QUARTER,

Or, *The Sun's Transit through ♎, ♍, and ♋.*

WE are now come to the last ingression scheme of this year, which commenceth when the *Sun* enters *Libra*, and introduces the Autumnal Quarter, which this year happens on *Friday*, the 23d of *September*, at 50 min. past 12 at night, at which time 14 deg. of φ are on the med. cœli, and 6 deg. of Ω ascend in the East. All the Planets I find, are under the Earth. The Υ ab \square of φ , et \square of η , et $*$ of ζ and δ . I shall have no reason to insert a long judgment upon this Figure of the Heavens, as in general, the positions follow the fate of the former, part of the year; there is nothing material here, but what has been remarked before, except the *Sun*, who has lately past the δ of η , which seems to denote animosities between the Governors and great Men of some foreign Nations, &c. I have reason to fear the highways will be much infested with Thieves; and that there will be much robbing and stealing all over the Kingdom, during this quarter and the ensuing winter.
