INTRODUCTION.

Astrology has been practiced in all ages of the world, but like every other belief, it has its cycles; these cycles varies with the intellectual freedom of man,—flourish—as the human race becomes more enlightened, and as the human race rolls back into oblivion, Astrology and its devotees cease to exist, and the foundation of all science thus dies, temporarily, to await another tidal wave of advancement; again to rise and again to fall.

Astrology has always been studied with a view of penetrating into the futurity of the human race, and the length of life, the diseases which one will be subject to, and the time of sickness has undoubtedly been studied more and is better understood at the present time than any other branch of the science, but so little has been writ-

ten and handed down to the present generation that we are greatly in need of a more modern work of reference upon the subject. The rules laid down by Lilly and Ptolemy have been copied by all later writers and we may say with a good degree of accuracy that about all that is generally known of Astrology can be found in the works of these two men.

In the present treatise the authors do not claim every paragraph to be original with themselves, but they do claim that such as has been gleaned from ancient authors and all original ideas has been placed in such language that the merest tyro may read and understand.

It has been our intention in the present treatise to give all that is generally known and confirmed by facts, both old and new ideas concerning Medical Astrology, in order to form a ready reference work for the professional astrologer, and at the same time, to be interesting and instructing for the beginner.

Many drugs have been omitted for the lack of space and proof as to their proper place in the list, which we hope will be added to and the list largely increased in the future.

The chapter on the "action of drugs"

has been compiled from all sources, and the reader will find under this chapter the organs of the body acted upon principally, the time of action, and the principal characteristics of the different drugs most extensively used.

All drugs mentioned must be used in their homeopathic form, for he who believes in Astrology believes in the law of dynamic influence, therefore must believe in the dynamic force of chemicals.

Should the present work prove of benefit to those who peruse its pages and assist them in gaining a broader knowledge of Astrology, and at the same time, broaden the field of astrological knowledge the authors desires will be accomplished.

W. & H.

RULER OF HEALTH.

The ruler of health, commonly termed "Hyleg", is either the Sun, Moon or the Ascendant, and is found by the following method: after erecting the figure for the desired time, first, see if the Sun is located in the 1st, 7th, 10th or 11th houses of the figure, if so it must be taken for the ruler of health, but if the Sun is not located in these houses then look to the Moon, should it be in any of the above houses it will rule the health; but should neither Sun or Moon be found in any of the above houses, then the ascendant will rule the health. Again, should both the Sun and Moon be placed in the above houses we must judge by them both, but the most powerful one will have greater influence than the weaker. Should the Sun and Moon be of equal power, we then judge of the Sun in a male nativity and the Moon in a female nativity; but in the latter instance the afflictions of either the Sun or Moon will have a powerful influence in causing sickness, while the evil directions between the two are decidedly dangerous.

From an Astrological standpoint we look to the Sun, Moon and ascendant for indications of good or bad health, or as astrologers term it, the Hyleg—the giver of life. From the rules laid down by the ancient astrologer, and which are generally accepted by modern artists, we find that the 4th house rules the grave, or the end of life; the 6th house is termed the house of sickness; while the 8th house is the house of death. From the above we readily see that the 6th house and its ruler will assist in pointing out the kind of sickness which one will be affected by; therefore the 6th house and ruler are important factors and must not be overlooked in ascertaining the kind of disease one may be affected by. Should the ruler of the 6th house be posited in the 1st house, or rising at birth, and afflicting the ruler of health usually denotes a frail constitution and a great deal of tedious sickness during life, but does not necessarily indicate an early death unless other evil testimonies are found; should the ruler of health be located in the 6th house and afflicted we judge much the same.

The 8th house and ruler points out to

us, according to their aspect with the ruler of health, what kind of a death a person will die; whether violent,—by accident, drowning, by fire, water, hanging, etc., or a natural death,—from old age, painless, etc., should we find the ruler of health afflicted by the 8th or its ruler; ruler of health in the 8th and afflicted, ruler of 8th in the 1st and afflicted, are testimonies of a violent death.

The 4th house and its ruler represent the end of life, and point out the condition of man in his latter years of life, and not particularly referring to the grave. Should we find the cusp of the 4th house and its ruler well aspected and strong, we judge that the latter part of life will be fortunate and prosperous, but unfortunate and afflicted the reverse.

Thus we see that the 4th house and its ruler are of much smaller importance than the 6th and 8th in our treatise, but the afflictions of the 4th strongly assist in causing sickness to end fatally.

We look to the 6th house and its ruler for the nature of sickness, and to the ruler of health and the 8th house and ruler at the time of such sickness, whether or not

such disease will prove fatal.

CAUSE OF DISEASE.

As before mentioned, either the Sun, Moon or the ascendant rule the health, and the aspects to the ruler of health by other planets indicate the time in life when one will suffer from ill health, and the 6th house and its ruler assists in pointing out the nature of such sickness. Therefore, when we find the ruler of health afflicted by evil directions at any time during life we conclude that when such direction culminates, the native will be troubled by ill health at that period, the nature of which we judge from rules given under "diseases of the planets, and signs".

However bad the aspects may be between the rulers of the 2nd, 9th, 10th, 11th and other house, will not cause sickness but refer to the financial and other affairs of life. Hence, we often find a person coming into possession of a fortune, while perhaps they die at the same time with consumption; showing plainly that health and finances do not always travel hand in hand, and the Astrologer must not judge them so.

In the horoscope we find several causes

of sickness, the first and principal causes are the primary, secondary, periodical and progressive directions of the planets.

Of the directions, we find those of Saturn and Mars are the most powerful in causing ill health, they cause mostly diseases of the body, (although Mars often affects the mind;) they cause measles, ague eruptive fevers, consumption contagious epidemics, asthma, gangrenous ulcers, etc., while Uranus, Mercury Moon (and to some extent the Sun) affect the mind, causing idiocy, insanity, inflammation of the brain, headache, etc., while Uranus afflicting the Moon by direction causes a desire to commit suicide, but the native usually lacks the courage.

The afflictions of the Sun or Moon usually causes measles, eruptive fevers, croup hurts and injuries, bleeding, broken bones and weakness in the eyes. Jupiter causes jaundice, billiousness, liver complaints, gangrene, and other ailments as given in "diseases of planets and signs". Venus causes gravel, female trouble and general disorders of the sexual system, and if in ill aspect to Saturn, Mars or Uranus, she causes venereal diseases.

MEDICAL ASTROLOGY

Of the transits, we find those of Saturn and Uranus (and Mars if afflicting the ruler of health at birth) will cause ill health according to the sign such transits occur in; but the transits of Jupiter, Sun, Venus, Mercury and the Moon do not affect the health unless evil directions are operating at the time, in this case transits of the Sun and Mercury over the ruler of health tend to aggravate sickness. The transits of Saturn over the ruler of health usually causes rheumatism, gout, lumbago and kindred ailments brought about by getting wet, over-lifting. Uranus transits over the ruler of health, much the same as Saturn, causes falls, sprains, hurts from machinery, etc., according to the sign the transit occurs, and the good or evil aspect of Saturn and Uranus at birth.

DISEASES OF THE PLANETS AND SIGNS.

Each planet has a certain number of degrees in the zodiac of its particular nature; the planets nearest the Sun rule the greater number, thus; Mercury rules two, Venus two and Mars two; the remaining planets only one. We give below the signs and their ruling planets.

Aries	is ruled by	Mars.
Taurus	" "	Venus.
Gemini	" "	Mercury.
Cancer	" "	Moon.
Leo	" "	Sun
Virgo	" "	Mercury.
Libra	" "	Venus.
Scorpio	" "	Mars.
Sagittarius	" "	Jupiter.
Capricorn	" "	Saturn.
Aquarius	" "	Uranus.
Pisces	" "	Neptune.

Each sign of the zodiac also rules a part of the body, beginning at Aries, thus;

Aries rules the head and face. Taurus the Ears, neck and throat. Gemini the

MEDICAL ASTROLOGY

arms chest and shoulders. Cancer, the Lungs and breast. Leo the heart and back. Virgo the bowels and stomach. Libra the Reins and abdomen. Scorpio the sexual system. Sagittarius the hips and thighs. Capricorn the knees. Aquarius the legs and ankles. Pisces the feet.

The signs all have diseases of their own nature and according to the part of the body they rule; although a planet weak and afflicting the ruler of health from Aries often produces weakness in Libra or in other words, the sign opposite the afflicting position is often affected, and sometimes the sign in square aspect is affected. For instance, Saturn and the Sun in conjunction in Capricorn causes weakness in the parts ruled by Cancer, and sometimes in Aries and Libra, and so on with the other signs. We give below the diseases of each sign.

DISEASES OF THE SIGNS.

DISEASES OF ARIES.

Headache, toothache, fevers, both acute and chronic, Epilepsy, apoplexy, inflammation of the brain, catarrh, etc.

TAURUS.

Croup, diphtheria, sore-throat, asthma,

bronchitis, and other throat trouble.

GEMINI.

Accidents in the arms, billiousness, flatulence, nervous diseases, pleurisy, rheumatism and inflammation in the arms and breast.

CANCER.

Pulmonary Consumption, Dispepsia, dropsy, cancer and false pleurisy.

LEO.

Convulsions, fainting, palpitation and rheumatic affections of the heart, and eruptive fevers.

VIRGO.

Diseases of the stomach, dispepsia, colic, worms, diarrhoea and dysentery.

LIBRA.

Affections of the back, liver trouble, lumbago, sciatica, kidney trouble.

SCORPIO.

Principally affections of the sexual system, venereal diseases, rupture gravel, piles and female diseases.

SAGITTARIUS.

Injuries and broken limbs, rheumatism, intemperance. (a large majority of Sagittarius people have broken limbs some time in life.)

MEDICAL ASTROLOGY

CAPRICORN.

Affections of the knees, such as sprains broken bones, rheumatism, and supposed by some to produce leprosy.

AQUARIUS.

Broken limbs, rheumatism in those parts, varicose veins, nervous twitching of the legs and feet, and blood diseases.

PISCES.

Diseases and injuries of the feet, such as gout, childblains, rheumatic pains and cramps in the feet and toes, corns, bunions and diseases caused by wet feet.

The fiery signs rule principally diseases accompanied by fever. Earthy signs produce croup, colic, diarrhoea, etc. Airy signs, pleurisy, nervous and blood diseases. Watery signs, cancer, dropsy, gangrene, gout, cramps, rheumatism, scurvy, colds, etc.

DISEASES OF THE PLANETS.

Each planet produce diseases peculiar to their own nature, but a great deal depends upon the sign which a planet may be located in, but by refering to the diseases produced by each planet and then refering to the diseases of the sign which the afflicted planet is located in we can

MEDICAL ASTROLOGY

then form a pretty good opinion as to the nature of sickness.

DISEASES OF THE SUN.

Eruptive diseases, measles, smallpox, scarlet fever, diseases of the brain and heart, inflammation of the eyes, cramps putrid fevers, gangrene, fainting.

MOON.

Apoplexy, insanity, diseases of the brain, bladder and urinary troubles, gout, rheumatism, scrofula, dyspepsia, colic, biliousness, diarrhoea, gangrene.

MERCURY.

Diseases principally of the brain, vertigo, inflammation and dropsy of the brain and defects in the memory, hallucinations, insanity, and also causes colds and catarrh.

VENUS.

Diseases of the sexual system, venereal diseases, female diseases, diabetes, gravel, and kidney trouble.

MARS.

Measles, scarlatina, shingles, erysipelas, itch, smallpox, chickenpox and other eruptive diseases, fevers, headaches, and hemorrhage of the lungs and sexual system, venereal diseases, abortions, etc.

MEDICAL ASTROLOGY

JUPITER.

Scurvy, cramps, pleurisy, diseases of liver. weakness in the back, colds and diseases caused by poor blood, and often causes constipation, piles, etc.

SATURN.

Ague, malaria, tooth ache, neuralgia, earache, rheumatism, gout, lumbago, dropsy, constipation, consumption, etc.

URANUS.

Complaints caused by bathing, sudden changes of weather, getting wet, such as croup, colds, asthma, rheumatism, gout, lumbago. cramps, diseases of the brain, insanity, and desire to commit suicide.

NEPTUNE.

Similar to Uranus, rheumatism, gout, cramps in the feet, childblains, and scurvy.

We notice from the above that some of the planets produce diseases similar to other planets. Thus: Mars causes eruptive diseases, while we find the same produced by the Sun and Moon. Venus causes ailments of the sexual system, we find the same under Moon diseases. Saturn causes gangrene and dropsy, while Jupiter and the Sun produce the same. Neptune, Moon and Saturn rheumatism.

JUDGMENT ON DISEASE.

We now come to the reading of the horoscope or horary figure in order to form an opinion as to the nature of sickness, how long it will last, and whether or not it will result fatally, or leave the patient weak and debilitated.

In judging of sickness from the horoscope we have only to erect a figure of the time of birth, and find the "ruler of health" and calculate the directions operating at the time, and give judgment by the rules given under "diseases of the planets and signs". If we find the ruler of health afflicted by the ruled of the 6th or 8th or other inimical testimonies, and this affliction passing from the ruler of the 6th to the 8th, and no good testimonies occurring, we judge that such disease will terminate fatally, but should the rulers of the 6th and 8th be fortunate planets, it will not end fatally unless the patient be very old and feeble; again, should Jupiter cast an aspect to the evil configuration, even a square or opposition to Saturn, or

Venus cast any aspect when Mars is afflicting, such ailment seldom ends fatally unless the patient be old.

The most evil directions are those of Saturn to the Sun and ascendant, and those of Mars and Mercury to the Moon, such directions often end fatally; the afflictions of the Sun, Moon, Jupiter and Uranus to the ascendant (if the ascendant rules the health) are not so powerful in producing death.

Regarding the age, the Moon and Mercury act most powerful under the age of 15, Venus and Mars from 15 to 25, Sun and Jupiter from 25 to 50, and Saturn and Uranus in old age. Although Saturn has a powerful influence at the age of 30, 45 and 60. while Mars and the Sun act very powerful at the age of 19, 27 and 38.

In judging from a Horary figure, we have a very stubborn matter to deal with. Judging of sickness, is quite different from giving judgment on finances, law-suits, journeys and other affairs, and I would advise all astrologers to use a little care in giving their opinion from a horary figure. I have found the following rules almost indispensable in this respect.

MEDICAL ASTROLOGY

1. It is best to only answer the question for the patient; should the patient be a child then we may judge from the parents questions.

2. If the question concerns accidents or poisoning take the time of their occurrence in preference to the time of asking the question.

3. If it be an attack of apoplexy, fits, cramps, delirium, etc., use the time of the first attack.

4. Don't give a hasty judgment, if you find Jupiter causing the ailment don't promise the patient relief as soon as the aspect is passed, but give the direction its full time; and if Jupiter be located in fixed signs the ailment will not be dangerous but tedious.

Sun, Mars and Mercury diseases are violent and governed by the motion of the Moon; at times the patient is given up and in 24 hours they may be greatly improved, and again to relapse. Diseases caused by Saturn, Venus and Neptune gradually get worse and get better gradually.

In judging from a horary figure we find that Jupiter, Saturn or Neptune af-

MEDICAL ASTROLOGY

afflicting the ruler of the 1st or the Moon causes colds, rheumatism, grippe, and aggravates asthma, consumption, etc., while the Sun, Mercury or Mars afflict the ruler of the 1st or the Moon we find apoplexy, headaches, cramps, colic, etc., which are violent leaving the patient unconscious. Uranus afflicting the ruler of the 1st or Moon the mind is generally affected and the patient desires to commit suicide, imagines some one trying to poison them, symptoms rapidly flying from one part of the body to another, spasmodic.

Should we find the Sun ruling the ascendant and afflicted by Mars we often find apoplexy, and other symptoms accompanied with high fever and violent pain, abortions, bleeding to death, and loss of consciousness from pain, symptoms come on rather suddenly. The Moon rising and in opposition to Mercury we have noticed picking at the bed clothes, jumping spells, hallucinations, thinks some one trying to capture them, strikes, bites and howls when any one comes near them; refuses to talk, at other times they talk continuously; spasmodic pains so violent as to drive the patient insane, and

often causing them to make silly and out of the way remarks. Saturn and Mars afflicting each other often cause broken bones, sprains and falls from animals, but sometimes cause disease according to the signs they are located in. (people born with Saturn and Mars in conjunction seldom ever escapes broken limbs some time in life, especially if located in Gemini, Sagittarius, Capricorn or Aquarius).

Having shortly summed up the manner of giving judgment on the nature and length of disease, we would again warn every one against giving judgment from transits alone, consider well the position and strength of all the planets concerned in the sickness, and then calculate the directions and promise recovery or otherwise at time of their culmination.

The following rule for judging of time in horary figures is given in "Simmonite's Horary Astrology," which we find to be the most accurate. "Should the aspects be cast from movable signs and angles of the figure we judge days for degrees; If from succedent houses and angles, weeks; Cadent houses to angles, months; from common signs to angles, weeks; common

signs to succedent houses, months; fixed signs to angles, months; fixed signs to succedent houses, and from common signs to cadent houses, years. Mixed aspects, say months for years: for months, say weeks; for weeks say days."

NOTE—Planets in north declination and latitude act more powerful than when in south; and all are most powerful when rising.

DRUGS RULED BY THE PLANETS AND SIGNS.

The rule usually followed by the great army of ancient and modern Astrologers in judging what each particle of matter, such as plant and animal life is ruled by is simply taken from the nature of such objects. For instance, nearly all birds and beasts of prey are placed under the dominion of Mars. But their rule does not hold good when they place the lion under the rule of the Sun, where some of them also place the horse. They have taught that all quiet and non-carnivorous birds and animals are under the rule of such planets as Venus and the Moon, etc.

Judging of plant life, they assumed that Mars ruled everything hot in taste, such as mustard, pepper, radish, etc., and Venus ruling those sweet by nature and producing beautiful flowers, and so on

through the list. In this manner they placed poppy under Saturn, and aconite under Mars.

Common sense contradicts the greater part of this theory. Should we follow this rule we must place man under the rule of the Sun. Why? Because he assumes dominion over object which he comes into contact with. But broach such a theory to some of our Astrologers and they will make sport of you, and explain that man is ruled by different planets, according to the hour of birth, and should he have his choice of the hour in which to be born, he would be born under either of the nine planets. Now let us apply the same rule to the horse, lion and other animals; man is no more than the most intelligent of beasts, therefore has no more right to claim he may be ruled by any and all of the planets than the animal has; the same rule applies to plant life.

Does not Astrology teach us that seed sown when the Moon is in certain signs, and when some signs are rising are more fruitful and do better than those planted at other times? If such is the case, poppy would not grow if not planted under

Saturn; pepper would die or be worthless if planted under the Moon or Venus.

Such a doctrine is mere supposition and misleading, and should be forgotten as soon as learned. Let us investigate the influence of plants when their essence or tincture is taken into the human body, and pay no attention to their looks and taste in a state of nature, and we will find that many, if not the greater number of drugs are ruled by the signs.

It is true that each planet affects the body in a manner peculiar to itself, but even this is variable and uncertain, and much depends on where the planets are located. For instance, such planets as Mars and the Sun in Aries will produce different ailments than the same planets would if located in Virgo or Scorpio, and such ailments would require different chemicals to correct them. Should we accept this theory, we must look more to the signs than to the planets in choosing the remedy. Further investigation along this line may confirm the theory that the planets are most prominent in pointing out the cause of disease, while the nature and length lies more in the signs.

MEDICAL ASTROLOGY

In giving the drugs ruled by the signs and planets many must necessarily be omitted for the lack of proof as to their respective places in the list. We must remember that two drugs made from almost the same substance do not act the same; viz, Nux Vomica and Ignatia are both forms of Strychnine, but their action is not alike by any means,

Drugs which act best under

ARIES.

Aconite, Arsenic, Arnica, Chamomilla.

TAURUS.

Kali Bichromate, Mercury, Lachesis and Capsicum.

GEMINI.

Stramonium, Colocynthis, Sulphur and Ignatia.

CANCER.

Calceola Carbonica, Silicea, Alumina and Graphites.

LEO.

Spigelia, Ferrum, Phosphorous, Coca and Digitalis.

VIRGO.

Nux Vomica, Charcoal, Pepsin Aloes Ipecac and Podophyllum.

MEDICAL ASTROLOGY

LIBRA.

Pulsatilla, Conium, Lycopodium and Coccus.

SCORPIO.

Cantharis, Phosphoric Acid, China and Sepia.

SAGITTARIUS.

Camphor, Ammonia, Coffee, Antimony and Hepar Sulphur.

CAPRICORN.

Rhus Tox., Colchicum, Creosote and Helleborus.

AQUARIUS.

Staphysagria, Opium, Natrum mur. and Iodine.

PISCES.

Dulcamara, Drosera and Tartar Emetic.

NOTE— In the ‘diseases of planets and signs’ we mentioned that afflictions occurring in one sign would affect the signs in square and opposition to it, and in many diseases the remedies mentioned in these signs is also useful. For instance, in diseases of Scorpio, the remedies mentioned under Taurus, Leo and Aquarius may prove useful, and so on with the other signs.

We find that the planets have a few

remedies which invariably remain with the planet; such as Pulsatilla with the Moon; Sepia with Venus; Belladonna with Mercury; Aconite with Mars; Veratrum album with the Sun; Bryona with Jupiter; Rhus Tox., with Saturn; Opium with Uranus; and Dulcamara with Neptune. These drugs should be looked to in all afflictions.

WHEN TO GIVE MEDICINE.

Very little has been written upon this subject from an Astrological standpoint, and the ordinary physician usually administers his chosen drug as soon as he can prepare it; in some instances the drug has the desired effect, while at other times the drug has no effect or is immediately vomited up by the patient. Many physicians have no doubt witnessed this phenomena, but wasted no time in learning the cause of it.

The Homeopath usually believes in administering his drug between the proxysms and not during the dangerous periods, in spasmodic affections; they have also, a favorite time of the day when to give medicine, at time of retiring, on rising, or between meals, but not to be

given within an hour before or after meals.

We have learned that many of the drugs administered when certain planets and signs rise have little or no effect; and are often vomited up immediately after taken. Should you doubt this, give a patient Chamomilla when Jupiter is exactly on the ascendant, and also try it when Sagittarius ascends, or Jupiter in aspect to the ascendant. Simmonite says, medicine given when the ruler of the ascendant is retrograding will be vomited up again by the patient, we have not yet proved or disproved this theory; but would prefer to administer all drugs when the signs ruling them, or the ruler of such sign is rising or in good aspect to the ascendant, or in other words, give drugs ruled by positive signs and planets when such planets and signs are rising. and negative drugs under negative planets and signs; as homeopathic drugs work through sympathy and not by antipathy.

Many astrologers believe in the ancient theory that each hour of the day is ruled by one of the planets, independent of the rising sign, the hour beginning with sunrise. In this manner the Sun is supposed

to rule the first hour of Sunday (from sunrise); Moon that of Monday; Mars, of Tuesday; Mercury of Wednesday; Jupiter on Thursday; Venus on Friday; and Saturn that of Saturday, each day beginning with sunrise. The order of the planets in this scheme is supposed to run thus; Sun, Venus, Mercury, Moon, Saturn, Jupiter, Mars, and beginning again at the Sun. We cannot imagine why this order is used, nor why Uranus and Neptune it not entitled to a place, and should advise all to test it before accepting it.

Dr. Reed, in a late work entitled, "Cyclic Law" advances the theory that the ebb and flow of the tides form the negative and positive parts of each day; the flow producing the positive period, while the ebb produces the negative. He claims to have verified this from considerable experience and observation. The tides may be calculated for Chicago as well as for New York (the influence) when it may be expected to act. However true the tidal theory may be, such is not so powerful as the rising sign, but should we get a rising tide, with a sunrise on Sun-

MEDICAL ASTROLOGY

day morning, with Leo rising, then the three would work in harmony, but the three occurring at different hours, prefer the rising sign; second the tidal wave, and last, the ruling hour.

By following the above rule when to give medicine, we may be may more in a position to administer drugs when they will act quickly and in a beneficial and curative manner.

DISEASES AND THEIR TREATMENT.

In the following pages we give the treatment of the most common ailments which every one may meet and experience some time in life. Under each ailment we give the most useful remedies in CAPITAL letters and following it in the same paragraph are the symptoms which point to the use of the remedy. But in choosing a remedy for an ailment sometimes two or more drugs may seem to be indicated, but by referring to the chapter on "action of drugs" we may then be able to choose the proper remedy. Again, all the drugs mentioned here should be used only in their homeopathic form, and in the 3th or 6th dilution, excepting such drugs as Charcoal, Lycopodium, Sepia and Dulcamara, which are supposed to be of little power below the 30th. Powders are the best form for family use. All the drugs mentioned herein can be had from any homeopathic pharmacy.

EMOTIONS.

Bad effects from fright.

ACONITE.—Patient has palpitation of the heart and imagines they will die; fear remains after fright, anxiety, restless.

BELLADONNA.—If fright has caused convulsions, especially in children; patient screams; twitching of the limbs, feverish.

COFFEE.—Great excitement, trembling, fainting, cannot sleep; fright from sudden pleasant surprises; very nervous.

OPIUM.—Fright followed by twitching of the limbs; convulsions: unnatural sleep, delirium; involuntary evacuations.

GELSEMINUM.—Diarrhoea from fright.

GRIEF.

IGNATIA.—Patient is full of suppressed grief; weak, empty feeling in the stomach; spasmodic fits caused by grief.

PHOS. ACID.—Great indifference to the affairs of life; dislikes to talk

COCCULUS.—Sadness, tendency to start, especially at night; headache from grief; watching over sick friends.

LACHESIS.—Talks much, changing the subject often; tight pressure around the neck is unbearable; worse after sleep.

PULSATILLA.—Melancholy, with weeping

sadness: disgusted with everything.

ANGER.

CHAMOMILLA.—Children get into a rage, loose their breath and go into spasms.

COLOC.—Diarrhoea from anger; refuses to talk or answer questions; indignant.

NUX VOMICA.—Violent, ill tempered persons who are unwell after anger; irritable and wishes to be left alone.

VERTIGO.

In this condition everything seems to be turning around, and the patient seems to be turning; the best remedies are

ACONITE.—Vertigo when rising from a seat, looking up or stooping; cloudiness of the eyes and loss of consciousness.

ARNICA.—If caused from a blow or fall; dizziness; nausea; better when lying down.

ANTIM. CRUD.—Vertigo from overloading the stomach; tongue coated milk white.

BELLADONNA.—Vertigo with vanishing sight; sparkling before the eyes when moving; rush of blood to the head.

COCCULUS.—Vertigo when sitting up in bed, or riding in a carriage.

MERCURY SOL.—Vertigo and dimness of sight only in the evening; worse when

lying on the back; objects turn black.

PULSATILLA.—Vertigo from disordered stomach; from grease and pastries; worse in the evening, and in rising from a seat.

NUX VOM.—If caused from overwork mentally; constipation or the abuse of stimulants or patent nostrums.

HEADACHE.

ACONITE.—Violent headache; fullness and heaviness in the forehead; vertigo when rising from a seat. Sun pains beginning in the morning, increasing till noon, and decreasing as the Sun goes down, ceasing during night; on left side principally.

ALUMINA.—Throbbing pain; better when lying quiet; headache from constipation.

CAMPHOR.—Pain in the cerebellum; after sunstroke; better when lying down; staggering; dizziness; worse on motion.

ARNICA.—Principally over the eyes; if caused from a blow or fall; darting pain; face and head hot, body cool; vomiting.

ARSENICUM.—Periodical headache; great weight in the forehead; beating pain; vomiting after eating or drinking; constant thirst; anxiety and fear of death; worse during rest and better by motion.

BRYONIA.—Pains begin on waking in the

MEDICAL ASTROLOGY

morning; pain as if the head would split; worse from motion; wants to keep perfectly still; lips dry, parched and cracked.

CALC. CARB.—Chronic headache: pain in the forehead; throbbing pain in the morning and continuing all day; feeling of coldness in the head: worse by motion.

HEPAR S.—Croupy cough; rattling, choking cough; worse after midnight.

HYOS.—Dry, spasmodic cough; worse at night, and when lying down; relieved by sitting up; bluish color of the face.

IPECAC.—Dry cough; children almost suffocate when coughing; vomiting.

MERCURY SOL.—Dry cough; spitting of blood; worse at night and in wet weather.

PHOS.—Dry cough; worse from talking and drinking; tightness in the chest.

PULSAT.—Dry cough; worse at night, and when lying down; going off by sitting up.

SULPHUR.—Loose cough; expectoration of greenish lumps having a sweet taste; worse in the morning.

See Colds, and Croup also.

CROUP.

ACONITE.—In the first stage; high fever and restlessness; after exposure to cold west wind; great pain on swallowing.

BELL. Flushed face: dry, barking, spasmodic cough: jumping during sleep.

CHAM.—Croup with hoarseness; wheezing and rattling of mucus in the throat; short, dry cough, worse at night and during sleep.

CUPRUM.—Violent, spasmodic coughing spells; short, dry cough, arresting the breathing; suffocating spells.

DROS.—Short, hacking cough; sensation of a feather in the throat; patient places hand on stomach when coughing; voice has a deep base sound; spasmodic spells.

HEPAR S.—Loose, rattling, choking cough; violent fits of coughing, as if the patient would suffocate; drowsiness.

LACHESIS.—In advanced cases; the slightest pressure on the throat and larynx causes spasmodic cough; worse after sleep.

SPONGIA.—Crowing, barking cough; slow, wheezing respiration; suffocating fits; better with head bent back.

ASTHMA.

ACONITE.—Shortness of breath; inability to breath deeply; worse when asleep.

ARSENIC.—Shortness of breath; suffocating attacks; worse at night, and when lying down; fear of suffocation.

BRYONIA.—Frequent, dry cough; stitches in the chest; worse on motion.

HEPAR S.—Attacks come on during the night, and with rattling, choking cough; worse during cold north-west winds.

IPECAC.—Spasmodic asthma; short, panting breathing; worse on motion.

PHOS.—Loud and panting breathing; fatiguing cough; loss of voice.

VERAT. ALB.—Violent attacks in cold weather, and in the morning; cold sweat on the head and forehead.

SULPHUR.—Worse during sleep, and in the evening; tightness across the chest; constant heat on the top of head.

SORE THROAT.

BELL.—Inflammation, burning and dryness in the throat; sensation of a lump in the throat; principally on right side.

LACHESIS.—Sore throat; sensation of a lump in the throat, with a burning sensation; worse after sleep.

MERCURY SOL.—Stitching pain on swallowing; worse at night and in wet weather

PHOS.—Sore throat from smoking.

PLEURISY.

Sharp, cutting pains in the chest and side, usually continues from $3\frac{1}{2}$ to 7 days, and accompanied with fever.

ACONITE.—Piercing, sticking pains in the chest; inability to lie on the right side; high fever and great thirst; restless.

ARNICA.—After injures; stitching pain in the left side; patient complains of bed being too hard.

BRYONIA.—Stitching pain; great thirst; pains aggravated by breathing and from motion; splitting headache.

MERCURY SOL.—Soreness, burning and stitching pain in the right side of chest; worse at night; when lying on right side.

PHOS.—Piercing pain, mostly on left side; tightness in the chest, with dry cough.

RHUS TOX.—If caused by getting wet, or over-lifting; shortness of breath, and worse during rest; better by motion.

SULPHUR.—When complicated with pneumonia; short, dry cough; stitches in the chest; worse on motion.

VERAT. ALB.—Painful constriction of the chest; cutting pain in the chest and side; bluish color of the face, with cold sweat.

FALSE PLEURISY.

MEDICAL ASTROLOGY

Similar to pleurisy, but more of a rheumatic affection, and often mistaken for pleurisy. Not generally accompanied by fever, while pleurisy is.

ARNICA.—Stitching pain, mostly in left breast; breathing is painful.

NUX VOM.—Sticking pain in the ribs; worse from breathing, and from motion.

PULSATILLA.—Sticking pain in side, only when lying down; pains rapidly shifting from one part to another.

PALPITATION OF THE HEART.

ACONITE.—Violent beating and palpitation of the heart, especially after fright.

DIGITALIS.—Palpitation worse from motion, or on lying down; sensation as if heart would stop beating if one moved.

PHOS.—Tightness across the chest; palpitation worse after eating and drinking.

SPIGELIA.—Unusually strong beating of the heart; the beating can be heard; increased by sitting down; by bending forward, and in the evening.

LOSS OF APPETITE.

CHINA.—Loss of appetite; aversion to food everything tastes bitter; after sickness.

HEPAR S.—Stomach easily disordered; useful after abuse of mercury and quinine.

NUX VOM.—Bitter taste; aversion to food, coffee and tobacco; craves brandy.

PULSATILLA.—Putrid, bitter taste; aversion to fat food, meat, bread or milk; loss of appetite from abuse of tobacco.

MORBID APPETITE.

CINA.—When troubled with worms; ravenous appetite; hungry soon after meals.

SILICEA.—Patient feels hungry but cannot eat when they try; constipation.

STAPH.—Ravenous hunger after eating, and when the stomach is full; desire for tobacco, wine, etc.

See under *dispepsia* also.

DISPEPSIA.

ANTIM. CRUD.—If caused from overloading the stomach; tongue coated white.

ARNICA.—After injuries; eructations tasting like rotten eggs; vomiting after eating.

BRYONIA.—In hot weather; from drinking cold water when overheated; smell of food is intolerable.

CALC. CARB.—Weight in the stomach; cannot bear anything tight around the waist; everything tastes sour.

CARBO VEG.—All food disagrees; sour belching, and burning in the stomach.

CHAM.—Bloatedness in the morning; ach-

ing pain in the stomach.

CHINA.—Stomach feels full and tight; aversion to food; weak and debilitated.

LYCOPodium.—Canine hunger; disgust of warm food; bloated after eating; heartburn; desire for oysters.

NUX VOM.—Bitter taste in the morning; cramp-like pain in the stomach, worse after meats; suitable after stimulants.

PULS.—Tongue coated white or yellow; fatty food, pork, sweets and ice cream disagrees; nightly diarrhoea.

SULPHUR.—Acidity of the stomach; feels weak and faint about 11 A.M.

For acidity of the stomach, give SEPIA or SULPHUR. For heartburn, CARBO VEG-CHINA and NUX VOM. For aching and burning in the stomach, ARN.—ARS.—BELL.

HEARTBURN.

CARBO VEG.—Water brash, especially at night; burning in the stomach.

CHINA.—Heartburn after every meal; great fullness after eating.

NUX VOM.—Belching of bitter fluids at night; vomiting after meals.

SEPIA.—Burning in the stomach.

PHOS.—Belching of bitter water; very sleepy after dinner.

COLIC.

BRYONIA.—Pinching pain in the stomach; bilious vomiting after eating or drinking.

CHAM.—Spasmodic pains in the stomach; caused principally from strong coffee.

COLOC.—The principal remedy for cramp colic, particularly if patient bends themselves double, or lies down putting the entire weight on the stomach, which relieves; pain the stomach as though it were squeezed between stones.
