CATALOG

OF BOOKS ON NATUROPATHY

MEDICAL SCIENCE is undergoing a great evolutionary process at present. It is a movement away from the misrepresentations, contradictions, hoodwinkings, superstitions, charlatanry and quackery that characterize official or drug therapy, and towards the ministrations of drugless therapy that employs the forces of Nature as the only legitimate agents in preventing and curing human ailments.

Official medicine has for ages battered on superstition, simply because the unthinking masses of mankind are ruled with greater ease, and will part with their money with greater freedom through faith in fraud than for truth proclaimed by professional reason.

Strange that mankind should wish to be enslaved by its own folly, but such is the fact, and the folly of the multitude is the rich soil on which official and effete medicine has waxed fat for ages.

But a light is now breaking upon the world since mankind has begun to think for itself. It now perceives for the first time that official medicine has been alone interested in suppressing symptoms of disease, and has wholly ignored the causes thereof. It has discovered that drugs cannot cure disease, for even if a given drug can wholly suppress the symptoms of an ailment, the cause being left untouched, like a root of a plant that is not wholly extirpated, it will create new symptoms that will require new remedies to suppress them.

Man is not to be physically regenerated by being inoculated with the fashionable dopes of the hour, the poisonous serums, inoculations and vaccines. Produced for the most part from the agony of the torture trough, they are branded with infamy, and are a recrudescence of the Black Magic of the Middle Ages from which it was thought humanity had finally evolved.

Millions of people have within the present generation completely lost faith in the allopaths and their poisonous nostrums, and have had recourse to those who employ natural methods of healing, the Naturopaths, and have been healed of their physical infirmities.

Naturopathy is a distinct school of healing, employing the beneficent agency of Nature's forces, of water, air, sunlight, earthpower, electricity, magnetism, exercise, rest, proper diet, various kinds of mechanical treatment, such as massage, osteopathy, and chiropractic, mental and moral science. As none of these agents of rejuvenation can cure every disease, the Naturopath rightly employs the combination that is best adapted to each individual case. The result of such ministrations is wholly beneficent. The prophylactic power of nature's vibratory forces, mechanical and occult, removes foreign or poisonous matter from the system, restores nerve and blood vitality, invigorates organs and tissues, and regenerates the entire organism.

So large a number of people have deserted the allopathic school of medicine in favor of natural therapeutics, that some thirty thousand practitioners are devoted to this new cult of healing, and a large library of books has come into existence that cover every branch of the Nature Cure. We cannot possibly com-

pile a complete bibliography of Natural Healing, so vast is the output, but have prepared a catalogue of the best books on the various subjects connected therewith, which we take pleasure in presenting to the favorable consideration of our readers. If these books are diligently studied and their recommendations practiced, life will be more happy, more noble, more gracious and more long lived, and mankind lifted to a higher plane of civilization.

In ordering books, give names of those desired, and quote price as stated. All prices quoted include postage. Remittances should be made by Post Office or Express Company Money Order on Butler, N. J., or New York Draft, and addressed to Universal Naturopathic Service, Butler, N. J., U. S. A.

Part 1—BREATHING AND VOICE CULTURE

- Behnke, Mrs. Emil.—THE SPEAKING VOICE.....\$0.85
 Browne, Dr. L.—SCIENCE AND SINGING.....\$0.50
 Ciccolina, Sophia M. A.—DEEP BREATHING, or LUNG GYMNASTICS.....\$0.70
 Dunn, S.—SOLO SINGERS' VADE MECUM.....\$1.10
 Elsberg, L.—THE THROAT AND ITS FUNCTIONS.....\$0.35
 Guttman, P.—GYMNASTICS OF THE VOICE.....\$1.50
 Holbrook, Dr. M. L. — DEEP BREATHING.....\$2.20
 Kepler, J. — THE ART OF BREATHING.....\$2.23
 Kepler, J.—THE LAW OF THE VOICE.....\$0.35
 Kitchen, J. M. — THE DIAPHRAGM AND ITS FUNCTIONS. A timely treatise on the most important and least understood muscle of the body. The position, strength, and use of the diaphragm more or less determines digestion, respiration, evacuation, and other vital body processes.....\$1.10
 Lewis, Dr. Dio.—WEAK LUNGS AND HOW TO MAKE THEM STRONG. Illustrated. Corrects prevalent misconceptions of lung diseases, and gives explicit directions for their complete eradication.....\$1.70
 Mackenzie, Sir Morrell—HYGIENE OF THE VOCAL ORGANS. Vital suggestions for speakers, singers, and all who want strong, resonant, vocal organs, immune from disease.....\$1.25
 Medine, F. R.—WHAT AND HOW OF VOCAL CULTURE.....\$1.40
 Prasad, Rama—NATURE'S FINER FORCES. THE SCIENCE OF BREATHING. An occult interpretation of a function commonly considered as purely physical. The spirit of Oriental philosophy, gradually passing westward, has many beautiful and helpful truths to inspire the American warrior. Psychic Breathing is one of them—it means poise, reserve, power, peace.....\$1.70
 Stebbins, Genevieve.—DYNAMIC BREATHING.....\$1.70
 Trail, Dr. R. T.—THE HUMAN VOICE: Its Anatomy, Physiology, Pathology, Therapeutics, and Training.....\$1.00

- Von Boeckman, P.—CARE AND DEVELOPMENT OF THE LUNGS. A 54-page book, containing valuable information in regard to Muscle Building, Chest Expansion, Proper Breathing, etc. Special chapter for women. Illustrated by cuts and diagrams. Author has largest and most powerful lungs in the world—11½ inches expansion, 410 cubic-inch lung capacity. Book accepted by National Medical Library, Washington, D. C.....\$1.00
 Wagner.—HABITUAL MOUTH BREATHING.....\$0.35

Part 2—CHARTS AND MANIKINS

- Abrams, Dr. Albert.—SPONDYLO-THERAPY: A Synoptic Illustrated Chart.....\$5.00
 American College of Mechano-Therapy.—EIGHT CHARTS OF ANATOMY AND PHYSIOLOGY. Each, \$5.00. Whole set.....\$30.00
 Du Plessis, Dr. Jean.—CONCUSSION IN SPINAL THERAPEUTICS.....\$1.00
 Du Plessis, Dr. Jean.—IRIDIAGNOSIS. The only complete wall chart on the subject of diagnosis from the eye. It embraces all the points brought out by the various authors.....\$1.50
 Eale and Taber.—ANATOMICAL AND PHYSICAL ENCYCLOPEDIA CHART. (Osteopathic) Answers 5,000 Questions. Most complete and exhaustive chart of the human body ever published. For express use of physicians of all schools, dentists, eye, ear and nerve specialists, and medical students. An encyclopedia of anatomy and physiology; a digest of symptoms and diagnosis; a key to osteopathy, and all manipulatory treatments; a complete dietary. 19 comprehensive tables compiled by the most eminent authorities in every line.....\$5.00
 THE DISSECTED PHRENOLOGICAL CHART.....\$0.85
 FOWLER'S NEW PHRENOLOGICAL BUST. With upwards of 100 divisions in china. Newly-discovered organs added, and old ones subdivided to indicate various phases of action. Most complete bust ever published.....\$5.50
 Magnus, Dr. Hugo.—MANIKIN OF THE HUMAN SYSTEM. 16 inches high, in 5 divisions.....\$2.60

- THE "MAN WONDERFUL" MANIKIN, WITH MANUAL. (Erect, 1/3 life-size, 50 views.).....\$4.00

- THE NEW MODEL ANATOMICAL MANIKIN, WITH MANUAL. A combination of charts of portions of the human body, hinged so as to overlap and to be dissected in its entirety. Figure 1, half life-size, contains more than 100 views, and has many parts greatly magnified. Chromolithographed on cloth-lined material and in realistic colors. Open, 3 feet high; closed, about 18 inches. Comprehensive manual included.....\$10.00

- Meyer, Dr. G.—THE FEMALE FIGURE (complete).....\$1.50

- Muller, J. P.—CHART ILLUSTRATING "MY SYSTEM" OF BODILY EXERCISES.....\$0.50

- Palotay, Dr. Julius A.—PALOTAY'S CHEMISTRY CHART.....\$3.00

- Panzer, Dr. G.—CHART OF THE FEMALE FIGURE.....\$1.00

- SPECIAL OFFER.—One Complete Chart on Adjustment, Concussion, and Pressure.....\$1.00
 One set cures for old Chronic Cases of Rheumatism, Piles, Paralysis, Eczema, Goitre, and the Drink and Morphine Habits.....\$1.00

- Printed Booklet on the Science of Spinal Concussion.....\$0.25

- Printed Booklet on Where to Adjust and Concuss for all Diseases.....\$0.25

- Printed Booklet on the Cause and Cure of Tuberculosis.....\$0.25

- Printed Booklet on the History of Medicine.....\$0.25

- Total Value.....\$3.00

- 25% Discount......75

- Net Price.....\$2.25

Some of the diseases for which concussion is specially indicated are Goitre, Heart Disease, Prostatic Enlargement, Uterine Hemorrhage, Stomach Disorders, Locomotor Ataxia, Incontinence of Urine, Paralysis, and a long list of chronic and acute maladies so hard to reach with anything else.

We have seen case after case of Goitre disappear through Spinal Concussion, Enlarged Prostate reduced in a few days, and the very worst forms of Heart Disease and Aortic Aneurism disappear so rapidly that

The Philosophy of Fasting

A MESSAGE TO SUFFERERS AND SINNERS

By EDWARD EARLE PURINTON

HIS work is the product of an enthusiast along the lines of being. He is an explorer afloat on the ocean of existence, with a ready pen to record what he sees, what he feels, what he desires, what he hopes for. His mystic sympathies give birth to an iridescent philosophy that is ballasted by a sincere effort to shed from his soul-binding flesh its pains and impurities, that he may the more readily mount the eternal palace stairs of health and truth and beauty. He has discovered a Fountain of Youth where the ailing body may wash away its pains, troubles, weakness, blindness and rise like a god refreshed and ablaze with joy and ambition. He describes this fountain in these words:

"Fasting, *rightly conducted and completed*, is nearest a panacea for all mortal ills of any drugless remedy I know, whether physiological, metaphysical, or inspirational. Fasting, resting, airing, bathing, breathing, exercising and hoping—these seven simple measures, if sanely proportioned and administered, will cure any case of acute disease. And almost any case of chronic.

Mr. Purinton ought to know what he is talking about for he has actually experienced a fast of thirty days duration, and his book is a log-book as it were of his sensations. He says he "found God through this fast." His object was not merely to eliminate poisons from his body through fasting but to fast for health, enjoyment, freedom, power, beauty, faith, courage, poise, virtue, spirituality, instinct, inspiration, and love.

His book describes in detail how these fine qualities came into his possession through fasting, and in order that the reader may enjoy the same results, he gives twenty rules to guide the faster who undertakes the Conquest Fast, that is to say a fast of thirty days to endow mind, body and soul with the already-mentioned transcendent qualities.

We think every sick man or woman should read this book and take Mr. Purinton's experiences to heart. It costs nothing but a stern resolution to put in practice the fast so strongly recommended as a cure of almost every physical ailment. It will be admitted that a man who has arrived at adult age without having missed a meal whether his digestive apparatus wanted a holiday or not, must be laden to the gunwales with all the poisons of un-eliminated food products, whose fermentation is giving him untold misery.

For heaven's sake give your overworked organs a rest! Try the fasting cure and know a happiness that cannot otherwise be experienced this side of the Elysian Fields. And no better monitor, no better guide for such an experiment can be had than the book under consideration. Buy this book, read it, act upon its advice and thank both author and publishers for your happiness. Booklet descriptive of Purinton's Works on Philosophy, Mental Science, Efficiency, Health, Soul Life, etc., will be mailed for 5 cents in stamps.

Price in paper, postpaid, \$1.10; cloth, \$1.60.

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

we could hardly believe our own eyes.

Spinal Concussion must be considered by every drugless healer who wants the best to be had in his profession.

NATURE CURE SERIES

BY HENRY LINDLAHR, M. D., N. D.

President, Lindlahr College of Nature Cure; Founder and President Lindlahr Health Home, Chicago, and Lindlahr Health Resort, Elmhurst, Ill.

Nature Cure Philosophy and Practice

A SOLUTION TO LIFE'S GREATEST PROBLEM

A SCIENTIFIC TREATISE ON HEALTH, DISEASE AND CURE

Health follows observance of Nature's Laws. Disease is the result of disobedience of these same laws. Cure is the process of retracing and follows the observance of definite laws. In this greatest of all books on this subject, Dr. Lindlahr fully explains

The Laws of Cure and the Laws of Crises

No more comprehensible book has ever been written on disease and its cure. Every question is fully answered. Every argument that could possibly be advanced by the most exacting critic has been anticipated and met. There is nothing hidden; everything is revealed, and in Dr. Lindlahr's inimitable style, is made as plain as day. There is no excuse for the individual who fails to understand Nature's processes after studying this book.

"IT SHOULD BE ADOPTED BY THE DRUGLESS PROFESSION AS THE PREMIER AUTHORITY," says a well-known teacher and practitioner. "IT IS THE BASIS OF ALL DRUGLESS TREATMENT."

A B C of Natural Dietetics and Nature Cure Cook Book

BY DR. AND MRS. HENRY LINDLAHR

Are your ideas on the subject of dietetics clear? If not

Free Yourself from Mental Confusion

by purchasing this book.

For the past year, food has occupied the center of the stage in health circles. Numerous dieticians and food scientists, with books, pamphlets, newspaper and magazine articles, have thrown the field into a greater state of confusion than ever.

Dr. Lindlahr's Book Clears the Atmosphere

Every dietetic fad is exposed and every true principle explained from a scientific standpoint. It is a clear presentation of a truly simple subject. The principles of food chemistry and natural dietetics are reduced to an exact science.

To This Scientific Treatise on Food Values, Mrs. Lindlahr Has Added

over 950 choice recipes which make a vegetarian diet the most palatable, as well as the most curative and nourishing. Each recipe is marked in accordance with its value and the character of food elements which it contains. These recipes are the result of extended experiment and have all been tested for their curative and nourishing qualities in actual practice.

Either book sent prepaid on receipt of Two Dollars and Fifteen Cents.

Macfadden, B. A. — STRENGTH FROM EATING.\$1.50

Louisa Lust, N. D., Author of the Naturopathic Vegetarian Cook Book

May, Mrs. E. — **COMPREHENSIVE VEGETARIAN COOKERY.** 1,000 Tested Recipes. \$0.50
 Metchnikoff, Prof. Elie. — **THE PROLONGATION OF LIFE.** Optimistic Studies. \$2.20
 Moore, — **WHY I AM A VEGETARIAN.** Hygienically, athletically, aesthetically, ethically, this plea for satisfying food is without a peer in all vegetarian literature. The facts are unanswerable arguments, the thought is chaste and expressive, but, more than all, the manifest motif is a love for all animal creation. \$0.35
 Nichols, Dr. T. L. — **BEST SIX-PENNY COOKERY.** \$0.25
 Nichols, Dr. T. L. — **THE DIET CURE.** \$0.70
 Nichols, Dr. T. L. — **HOW TO COOK.** \$0.60
 Payne, A. G. — **CHOICE DISHES AT SMALL COST.** \$0.90
 Penira, Dr. J. — **FOOD AND DIET.** \$2.10
 Poole, Mrs. Hester M. — **FRUITS AND HOW TO USE THEM.** Superlatively the best discussion of the perfect food. Fruits have a wider sphere of usefulness than any other single nutritive element. Antiseptic, laxative, depurative, soothing, sustaining, they are being made a daily delight, by people who think. The book is the best guide to their use. \$1.00
 Purinton, E. E. — **THE PHILOSOPHY OF FASTING.** 1.00; cloth. \$1.50
 Schlickeysen, G. — **FRUIT AND BREAD: A Natural and Scientific Diet.** \$1.10
 Shaw, J. Austin. — **THE BEST THING IN THE WORLD: GOOD HEALTH, AND HOW TO KEEP IT FOR A HUNDRED YEARS.** Record of a 45-day fast. \$1.50
 Smith, Ellen G. — **FAT OF THE LAND AND HOW TO LIVE ON IT.** The title of the closing chapter, "In a Nutshell," is an epitome of the chapters preceding. The prose of everyday eating is transformed into the poetry of ideal nutrition. Every cognate question is measured by the main point, and such seemingly foreign topics as Cooking Utensils, Social Requirements, Bakeries, Alcoholics in Food, and Farm-Yard Slaughter, each yield their quota of truth. The chapters on Vegetable Oils, Fruits, and Nuts are especially apt. \$1.60
 Smith, J. — Trall, Dr. R. T. — **FRUITS AND FARINACEA: THE PROPER FOOD FOR MAN.** Illustrated. Lessened expense, increased vitality, prolonged longevity, and intensified enjoyment are inevitable results attending the adoption of this system. \$1.70
 Swain, Dr. Rachel. — **COOKING FOR HEALTH.** \$1.10
 Swain, Dr. Rachel. — **PRACTICAL HEALTH HINTS.** \$1.10
 Towne, Mrs. Elizabeth. — **JUST HOW TO COOK MEALS WITHOUT MEAT.** The author's experiences in the author's own style. A biography, a letter, a chat, a cook-book, and a sermon—all in one. \$0.25
 Trall, Dr. R. T. — **HYDROPATHIC COOK BOOK.** 226 pp., 93 illustrations. \$0.70
 Trall, Dr. R. T. — **THE HYGIENIC COOK BOOK.** No yeast, acids,

grease, condiments. Every recipe a bit of personal satisfaction. \$0.25
 Trall, Dr. R. T. — **SCIENTIFIC BASIS OF VEGETARIANISM.** \$0.35
 Tyler, Byron. — **RAW FOOD BOOK AND HEALTH GUIDE.** \$0.10
 Wallace, Mrs. C. L. H. — **366 MENUS.** (No fish, flesh, fowl, intoxicants.) \$1.10
 Weaver, Louise B. and Helen C. Lecron. — **A THOUSAND WAYS TO PLEASE A HUSBAND.** (Bettina's Recipes) \$2.00
 Wells, R. B. D. — **THE BEST FOOD, AND HOW TO COOK IT.** \$0.60

Part 5—HELPS FOR MOTHERS

 Dewey, Dr. E. H.—**THE NO-BREAKFAST PLAN AND THE FASTING CURE**. These two books, with others by the same author, are the most unique, radical, convincing and inspiring contributions to the modern study of modern life. Many of the theories are boldly defiant of the opinion and usages of the ages, all are directly antagonistic to the tenets of the ancient school that fathered the author himself. That the brain is not fed by food, that seeming starvation is the quickest and safest flesh-producer, that weakness and emaciation are commonly the results of over-feeding rather than the opposite—such propositions need proving. The professor proves them abundantly and incontrovertibly—to the reason. And that the senses are satisfied and gratified by the daily embodying of the strange beliefs, the compilers of the catalog are glad to bear witness. Individuals and families all over the country are delighted converts to the new creed—one that clears the body of the invalid, clarifies the brain of the business man, illumines the visions of the thinker, lightens the burden of the housewife, lessens the daily expense account, and prolongs a life whose present pleasures are intensified by natural means. You may not coincide unreservedly, but you will agree in the main, if you have enough independence and perseverance and purpose for a fair trial. \$1.10
 Dewey, Dr. E. H.—**THE TRUE SCIENCE OF LIVING**. \$2.35
 Douglass, R. C.—**SPIRITUAL EVOLUTION, OR, REGENERATION**. \$1.45
 Gaze, Harry.—**HOW TO LIVE FOREVER**. Death is a composite of Food and Fear; the one petrifies, the other paralyzes. If man knew how to exclude from his dietary all mineral, inorganic, and unassimilated elements, and

The new, calls men germ-gods that need only unfolding. And with the coming of the new conception and the living-out of the new belief, the old torturing gnomes of Superstition, Ignorance, Bigotry, Fear, Disease, Death, vanish forever.\$1.10

Part 9—KNEIPP SYSTEM

Geromiller, L.—**HYDROPATHIC TREATMENT OF FATHER KNEIPP.** 26 illustrations.\$0.60

Kneipp, Father.—**CARE OF CHILDREN.** This is an excellent translation of Father Kneipp's book in German, with same title. In this work Father Kneipp sets forth the happiness, responsibilities and duties of motherhood—and he also instructs mothers how to order their lives, and how to bring up their children correctly and righteously. This book gives simple but very effective directions how to prevent and cure all the usual diseases of children. Any mother who loves her baby should not fail to order this book—as by following the advice contained therein—instead of always

calling in the Doctor, and drugging the helpless little one—she will be enabled to nip every disease in the bud, and to combat successfully any illness arising, without asking advice of anyone else. Paper.....\$0.60

Kneipp, Father.—**MY WATER CURE.** A translation from Father Kneipp's famous, world-renowned German book, "My Water Cure." Father Kneipp's Water Cure has been tested for more than fifty years, and is at present known and adopted in every country of the world. The book called "My Water Cure," has been translated into a great many foreign languages, and is a complete guide to regain one's health—without the use of any drugs or medicines. Its 200 illustrations aid materially the applications of the various bandages, packages, compresses and other healing components included in Hydrotherapy. A great variety of diseases are gone through alphabetically,—their cause and development described exhaustively, and then the mode of application of the Water-Cure treatment is detailed very minutely in each particular case.

Part II. is the "Apotheca" in which Father Kneipp describes his herbal remedies, for he also advocates in many instances the additional use of various herbs in form of teas. All these herbs are described in his book, and to each description is appended the exact benefits to be derived from their use. A part of the book is devoted to the description of several kinds of strengthening foods, as Whole-Wheat Bread, Strength-Giving Soup and Honey-Wine.

Part III. of the book contains a large number of reported cures—all alphabetically arranged—with the exact mode of application in each instance; giving full particulars of the progress of each malady, manner of treatment and duration of cure. This part will prove of the very greatest interest to invalids and sufferers from all those diseases enumerated and described in this work. In conclusion, all the various Kneipp-Gushes, or douches, are depicted

Very Reverend Monsignor Sebastian Kneipp

with exact directions how to apply each one. Especial stress is laid upon the fact that this book covers everything pertaining to a Home-treatment. Any one pos-

The Kneipp Cure

A LITERAL TRANSLATION OF "MEINE WASSERKUR,"
BY VERY REV. MSGR. SEBASTIAN KNEIPP, PARISH
PRIEST OF WOERISHOFEN, BAVARIA. WITH 200
ILLUSTRATIONS AND A PORTRAIT OF THE AUTHOR.

THIS is a complete description of the world-famed Kneipp Water and Herb Cure by that celebrated apostle of hydrophathy, Sebastian

Kneipp. Father Kneipp, one of the world's greatest philanthropists, had been conducting a private hydrophathic clinic for the cure of almost every disease that afflicts humanity with extraordinary success, for a period of more than 45 years, when the thousands who had been restored to health through his ministrations, urged him to write a book on his method of healing, to the end that the world at large might learn of a panacea for its troubles. His system of cure was too precious to die with its originator, and this consideration prevailed upon the mind of the simple, generous healer, and the present book (which has passed through one hundred and fifty-five editions) is the result.

¶ Father Kneipp's theory regarding the water cure is that water of different temperatures, variously applied to the system, will **dissolve morbid matter in the blood. It will evacuate what is thus dissolved. It will cause the cleansed blood to circulate freely again. It will harden the feeble constitution, strengthening it for new activity.**

¶ Co-operative with his hydrophathic ministrations, Father Kneipp advocates the use of a dry, simple, nourishing household fare, not spoiled by art or condiments, and for drink, water only. He also gives minute instructions as regards breathing and clothing.

¶ The first part of the book is devoted to an explanation of the various baths, gushes, douches, compresses, packs, etc., covering the entire procedure of hydrophathic treatment, illustrated by numerous cuts.

¶ The second part is given over to a consideration of the medicinal plants used by Father Kneipp in his treatment of his patients, also illustrated.

¶ The third part of the book is composed of an account of the many diseases afflicting humanity, particularly those that are amenable to the water treatment. Many wonderful cures are reported, all of which are absolutely vouched for by the relator.

¶ It seems extraordinary that diseases can be cured by the simple means employed by Father Kneipp, which have baffled the most learned physicians, but the testimony is unimpeachable.

¶ This book has found its way through the whole civilized world and is worth its weight in gold. No one who believes in natural methods of cure can do without it. Translated into 48 languages and dialects.

Price, in paper cover, postpaid, \$1.10; cloth, \$1.60.

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

- sessing this book will be enabled, without the aid of anybody else's help to treat himself, his wife or children at home, without having need of recourse to any other remedies except those Natural ones indicated in this valuable volume. The low price is another strong point in its favor, and we cannot overemphasize the advisability of sending for this book—even before it is actually needed. - Lewis, Dr. Dio.—CHASTITY; OR OUR SECRET SINS.** This was the author's favorite book. In it he thought he reached the highest altitudes of his life. The salient point in connection with the work is this: that the heartiest commendation and support has come from the Presidents of Colleges and Female Seminaries, where such questions are most relentlessly tabooed. Every delicate phase of the sex-life is discussed, unreservedly and exhaustively. And women as well as men who are striving for purity and perfection cannot afford to be without such a guide. 320 pp.\$2.10

Bernarr Macfadden, Physical Culture Celebrity

Part 10—MANHOOD

- Conrad, Dr. E. F.—COITION.** This pamphlet in English or German, is a scientific monograph on the great importance of the sexual act as the very first step in human development. The author shows the evil of self-pollution in early life as responsible for sexual debility in after-life. He enunciates a theory that any woman can prevent conception, no matter how ardently embraced by the male,

A CAREFREE FUTURE

THE GOSPEL OF NEW LIFE, PHYSICAL IMMORTALITY, SUN, TROPICS, LIFE RENEWING DIET, ETC. A GLIMPSE INTO THE DEPTH AND DISTANCE FOR THE SELECTION OF MANKIND—FOR THE REFLECTION OF ALL—FOR CONSIDERATION AND STIMULATION

By August Engelhardt

In der Sonne ist das Leben gewonnen. In the sun is life won. This is the motto of the author of this work which preaches heliotherapy in its intensest form. Two young and enthusiastic Germans resolved* to flee the so-called civilized life of beer, pork, tobacco and bread to live naturally on tropic fruits on the island of Kabakon, in the Bismark Archipelago, in the romantic South Sea, and this work is the fruit of their meditations and the storehouse of their recommendations. They unequivocally declare that to live naturally on living fruits, means to accumulate life, strength and beauty. To do this in a land in the tropics where the sun-rays are vertical, means receiving the greatest amount of energy from the sun.

Besides the abundance of fruits, the warmth of the tropics precludes to a very great extent, the need for clothing, so that by living in a more or less nude state the body is continually bathed in air and light and like a vegetable, reaches its greatest

stature and finest development in the lands of the sun. The vigor and beauty of the native races in the tropics prove this. The area of their bodies exposed to the sunlight is the measure of their physical vigor.

The writer regards the coconut tree as the tree of life and identifies it with that tree of life that grows in the paradise of God.

Tropical life is a combination of sunlight, nudity and coconuts, and they contrast this with the life of fur coats, frost and roast meat of the temperate regions. Man was generated in the tropics. He feasts on flesh and fat in polar regions, on grains and vegetables in the temperate regions and on fruits exclusively in the tropics, therefore he is distinctly a frugivorous animal.

The book is further an appeal to all fruit eaters and friends of the natural way of living to establish the fruit-eating kingdom of the world, first in the islands of the South Sea and Cuba, and from thence throughout the tropical world.

Price, in cloth, postpaid, \$1.50; paper cover, \$1.10

One of the conspicuously hopeful signs of the new century is the interest that teachers, preachers, and parents are taking in the key question of life. Shunned and despised, and abused through the centuries, the deific part of man has been made the diabolic. Only the few towering figures in history have understood procreation of body, mind, spirit. The situation is changing. Evolution and revolution have agencies at work—pre-natal and post-natal culture, child-study, practical pedagogy, self-development courses, and, in the front rank, such books as the "Self-and-Sex Series." Delicate, pure, reverent, but strong, bold, virile, they touch and mould the life at the focal points.\$1.10

NATUROPATHY THE TWENTIETH CENTURY :: HEALTH RESTORATIVE ::

NATUROPATHY—THE MEDICINE OF THE FUTURE. By William R. Bradshaw.

The author shows the hostility of the medical trust to the professors of natural medicine as a modern example of the undying barbarity of license and monopoly to all those who would criticize its methods, or in any way seek to enlighten the world as to the fraud and misrepresentation that characterizes official medical authority. He exposes the mendacious statements of the medical official hierarchy that are calculated to maintain the reputation of the serum-therapists, the manufacturers of serums, inoculations and vaccines, those poisonous concoctions that both directly and indirectly are agents of extermination of the human species. He shows the utter uselessness of the Flexner serum for the cure of epidemic meningitis as an example of medical misrepresentation and inefficiency. Price, 20 cents.

MEDICAL TYRANNY IN NEW YORK CITY. By Benedict Lust, N. D., M. D.

This is an account of the persecution systematically carried on by the Medical Trust against naturopaths doing business in New York City previous to 1912. The author describes his own arrest for upholding Nature Cure, at the instigation of a mal-odorous female sleuth, a Mrs. Benecery, who in disguise as a patient came to his establishment and secured treatment in the form of baths and massage, for the sole purpose of testifying against him. He was arrested and fined for trying to save life rather than trying to destroy it. This one attack with lawyer's fees cost him over \$700, while former persecutions at the instigation of the same Medical Trust cost him \$3,000 expenses. This vulgar persecution, instead of making Dr. Lust relinquish his profession, only increased his determination to stand by his guns and foster rational progressive medicine by founding with the assistance of the members of the American Naturopathic Association a College in New York for drugless methods, for the Nature Cure, whose establishment is now within practical realization. This is a most inspiring pamphlet for the Naturopath. Prices, 10 cents, 10 copies 50 cents, 50 copies \$1.50.

DIET IN RELATION TO BRAIN, HEALTH AND EFFICIENCY. By Otto Carqué and Dortch Campbell.

This booklet is a brief for vegetarianism as a superior diet to animal food. The authors plead for the advantages of a vegetarian and fruitarian diet for man. A judicious combination of plant foods supply all that is necessary for the maintenance of perfect mental and physical health. Excessive cooking of foods reduces most of the mineral contents, the iron, calcium, magnesium, phosphorus, etc., that are absolutely necessary for the proper physiological functioning of our system, which are found in their most assimilable forms in vegetables, nuts and fruits.

Mr. Campbell has a word to say about building brain by diet, as he is an investigator of the subject of brain nourishment. He holds that the lack of mind endurance, or power to work with the brain, is due to the absence of the soluble phosphates that nourish the gray matter both of brain and spine. Foods that build the brain are lean meats, fish, milk, eggs, cheese, beans, peas, lentils, nuts, and certain kinds of fruits. Nuts are the best of all, pecans, filberts, almonds, walnuts and pinenuts. Price, 20 cents.

MEDICAL MONOPOLY, by Dr. A. E. Goodfellow, F. R. P. M., and THE IMMORAL TRAFFICS, by Charles Zurmuhlen, M. D.

The author argues, in Medical Monopoly, that the war of the orthodox medical school on the drugless healers is a confession that the medicine men wish to prevent treatment of the sick by any other means than by drugs. This conspiracy to drug mankind, whether the drugs are beneficial, or malign, is rightfully regarded as the sordid gratification of a jealous medical society's wrath at seeing their patients deserting them and going to the unpretending naturopaths whose ministrations cure, where the drug-vendors failed utterly.

The Immoral Traffics referred to by Dr. Zurmuhlen, that are undermining the health of the American people, are the liquor traffic, the white slave traffic, and the serum-drug traffic. He shows that a compulsory vaccination campaign in Dayton, Ohio, was followed by an epidemic of measles followed by an epidemic of diphtheria. He holds that the time has come when progressive, intelligent people should unite in a protective league to defend the people against the ravages of the regular doctors. Price, 15 cents.

A PLEA FOR PHYSICAL THERAPY, OR MEDICINE WITHOUT MEDICINE. By Otto Juettner, M. D., Ph. D.

The author of this pamphlet has no faith in the curative effects of drugs taken internally. He states that individually doctors disparage drug treatment. He says that the healing power of nature is the Alpha and Omega of all rational therapy. *Heilkräfte nicht Heilsäfte* is his motto. The physiotherapeutist is the physician of to-day and to-morrow. This argument is very useful in leading up to such standard works on the same subject, such as the "Return to Nature," by A. Just, and "The Natural Method of Healing," by F. E. Bilz, which are complete guides to health.

This booklet exposes the superstition that drugs taken internally can cure mankind of its ills. The very antagonism of the various schools of medicine, the pestilent vagaries, like the Witches Broth of the Dark Ages, are proofs of this. The Dark Ages in the medical world are still with us, for every physician admits, without hesitation, that drug-medication is uncertain and disappointing. "No intelligent physician nowadays," says Prof. Ernest Schweninger of the University of Berlin, "believes in the absurdities of drug medication." In physiotherapeutics alone, that is to say, in Natural Healing, can a sick man stay his march to the grave. Price, 15 cents.

THE SCHROTH CURE. By John A. R. Gray.

This is a description of the world's cheapest cure. Having cured his injured knee by the application of cloths steeped in cold water, he applied this remedy to all bodily complaints with great success. He added to this procedure the practice of eating dry food as a form of diet, the idea for which he obtained from watching animals feed, and the application of these two principles of cure added to fasting, constitute with many modifications, a regenerative process of eliminating poisonous matters from the system and restoring it to health. Price, 10 cents.

THIS standard work is an encyclopedia of the natural system of healing, regarded as a special school of medicine, no matter by whom practiced, and contains not only a description of the methods employed by the author at his famous Bilz Sanatorium at Radebeul, Dresden, Germany, but also the methods employed by all other pioneers of Naturopathy, so as to present a complete survey of natural healing science.

Rational therapy is a modern revolt from the allopathic methods of treating disease by use of internal medicine, which, whether homeopathic, or allopathic, only interfere

with the action of the vital force, and are provocative of a secondary illness, manufactured with the idea of supplanting the original one, and at the same time merely placate symptoms, and do not attack the cause of the disease.

THE NATURAL METHOD OF HEALING

A New and Complete Guide to Health

People have a wholesome horror of being poisoned by pills and potions, serums, vaccines and inoculations, of whose properties they know nothing, but fear the worst. Common sense and the havoc wrought by the superstitions of allopathy have introduced a new era of healing, and the professors of the natural method of healing are multiplying by the thousands, until, as Professor Bilz says, people are giving themselves up, hand and foot, to the blandishments of some quack or swindler who is flaunting in their faces the enticing flag of the "Natural Method of Healing." As all reality casts its shadow, so also the natural method of cure will have its mountebanks, like every other institution on earth.

Professor Bilz goes deeply into the philosophy of his subject, and shows how that crops without the natural forces of sun, air, rain, mineral food and tillage would perish, so also, if a patient is denied the natural means of healing, such as proper food, air, light, water, changes of temperature, so essential to his well-being, and is being constantly supplied with poisonous medicines, the process of cure initiated by the vital force, which is called upon to turn the morbid matter out of the body, will be paralyzed, and the patient will sooner or later suffer, at least, most seriously, if not to the extent of losing his life.

Professor Bilz places the lack of proper food at the head of all degenerative agents, for he considers that diseases are nothing else than irregularities produced during the process of food assimilation in the digestive organs, both by the degenerative influences of wrong foods, alcohol, tea, coffee, spices, gormandizing, lack of exercise, the wrong application of otherwise healthful agents, all constituting a formidable list of external depressive influences, that primarily cause a disturbance of food-assimilation, which leads to the most varied forms of disease.

In the two volumes that constitute the Bilz encyclopedia of healing, the subject matter is divided into two sections, viz., a consideration of the various diseases to which humanity is subjected, with a description of their treatment, entitled "The Natural Method of Healing and Its Merits," the second section treating more exclusively of Modes of Treatment in the Natural Method of Healing, both sections being arranged alphabetically. As may be expected, the beneficent uses of nutrition, diet, water used externally and internally, air, warmth, light, dwellings, exercise, rest, massage, sand baths, mud baths, electropathic treatment, packs and compresses, etc., are dilated upon, the whole furnishing a most valuable guide for the practical naturopath. The Reports of Cures show a list of over three hundred different ailments that yield readily to the natural system of healing. To the Kneipp Water Cure is accorded 115 pages of descriptive matter, ranging from the cure of cancerous ulcers to common colds.

The Schroth Cure, known also as Regenerative Treatment, or Dry Diet Cure, which consists of a partial withdrawal of food and drink, whereby the mucous deposits in the body, and various humors, become loose, and are easily expelled, which results in the production of fresh blood and vigorous humors in the body.

Kuhne's Cure, so called from its discoverer, Louis Kuhne of Leipzig, is also fully described. This cure is based on the theory that there is but one disease expressed in many forms, and caused by the accumulation of foreign substances, or morbid matter in the body. (See a full account of the Kuhne Cure in the Universal Naturopathic Encyclopedia, Directory, Drugless Year Book and Buyers' Guide, vol. 1, 1918. Published by Dr. B. Lust, Butler, N. J. 1,000 pages. \$10.00 postpaid.)

The treatments given at the Bilz Sanatorium make use of every method of cure that is recommended by experience. For example, the various Swedish systems of Curative Gymnastics are largely employed with immense benefit to its patients. All these are fully described. There are colored mannikin charts of a model man and model woman given, also colored charts in

folding sections of the eye, ear, nose, head and brain, mouth and throat, lungs and heart. There are also many full-page colored lithographs, showing vapor or steam baths, packs and wraps, curative gymnastic exercises, illustrations of the mouth and teeth, colored illustrations of the stomach in health and disease, colored illustrations of the art of swimming, a lithograph of all the various races of mankind, pictures of the Kneipp Cure, and a page of general exercises. There are over 720 illustrations scattered

throughout the text, showing every possible phase of natural healing, including a portrait of the author. There is a general index of 63 pages, also indices of reports of cures, and of illustrations. We recommend this standard work in every particular as a necessity to every Naturopath. Two volumes, bound in embossed cloth, and stamped in gold. Over three million copies have already been sold. Published in English, French, Spanish, Italian, German, Russian, Portuguese, Polish, Hungarian, Bohemian, Swedish, Danish, and Dutch.

Price, postpaid, \$8.50 without human figure charts. With charts, \$10.50.

Foreign editions, two volumes, \$10.50 postpaid

The people in the world who are really happy will feel a thrill of sympathetic understanding on reading these thoughts—the book is simply a syllabus of their own experience. And the millions that are wretched will get glimpses of radiating power

THE MEDICAL QUESTION

The Truth About Official Medicine and Why We Must Have Medical Freedom

Medical Laws vs. Human Rights and Constitution. The Great Need of the Hour. What Constitutes the True Science and Art of Healing

By A. A. ERZ, N. D., D. C.

HERE is a book that cheers one like a draught of ozone after having breathed the mephitic vapors of the philosophy of official medicine, that exploits the immorality of vivisection, and swears by the unscientific and useless products of the torture trough.

It consists of 600 pages, written by the trenchant pen of one who is master of his subject. It embodies the revolt of the latest and most efficient school of medical healing against the tyranny and ignorance of the drug doctors, who, while attacking symptoms, fail to understand the need of the higher practice of treating the causes of disease instead. The charlatanism and inefficiency of official medicine has reason to be envious of the successes of the natural school whose philosophic practices are here fully manifested.

Dr. Erz makes very clear his position in the art of healing. He is an enthusiastic Naturopath. He believes that when a man becomes ill, he should employ the natural forces of hydropathy, diet, exercise, sunshine, electricity, mechanical-therapy, massage, and all the healing agencies that have proven their worth as prophylactics, and their ability to arouse the inherent restorative power for health that resides in every organism. His information is illuminating in the highest degree.

In support of his statements, he quotes the opinions of the greatest exponents of official medicine who confess that allopathic medicine has produced more misery and premature death than famine, pestilence and war combined. As Billroth says, "Our progress is over mountains of corpses."

He proves that the American Medical Association, and the various State and County Associations affiliated therewith, form one vast engine of oppression, armed with legal power to harass, crush, and if possible destroy, the true saviors of mankind, the exponents of natural healing, whose activities naturally discredit official medicine. By legally securing a monopoly of practising medicine, **THEY ARE ABLE TO MAKE IT MORE OF A CRIME TO CURE A PERSON THAN TO KILL HIM.**

He shows how easy it is to understand why the unthinking legislator favors official medicine to the exclusion of the natural school of therapy. The psychological pressure of an institution, no matter how despotic its use of power may be, or how false and deadly its products are, that has its roots deeply rooted in history, is vastly greater on the unenlightened mind, than a true and noble institution that was born but yesterday—where man does not know conservatism rules.

Dr. Erz fully proves that the so-called remedies of medical research are violations of every law of nature, of health, of life, and a disregard of every principle of physiology, biology and therapeutics.

The people were never consulted about these laws, and never asked for them

They are the product of medical feudalism, which means intolerance, injustice and brutality, instead of charity, justice and dignity. The people should rise in their might and stay the infamous activities of these medical malefactors.

It is a startling indictment of humanity that its saviors are never recognized until the advance guard, and many of the main army, are killed, or trodden underfoot, and official medicine in America, the glorious Land of Freedom, is busy at this moment, as it has been for many years past, in hunting down the drugless practitioner, whose only fault is the fact that he cures patients by natural methods, where the vendors of rotten pus have signally failed. He is arrested, and heavily fined, or thrown into jail for the offense of practising medicine without a pus-vendor's license.

Dr. Erz rightly advocates the urgent need of a great Academy of Natural Healing to convince the thinking masses of the superiority of the Natural Healing System, and to protect it against all misrepresentations and abuses, and assure its efficiency and permanent success. Medical Freedom is the great need of the hour to prove that Nature's constructive laws overshadow all ignorance, superstition and ambition. As the exponent of a standard of drugless healing, and as a monitor, mentor, and defence of humanity from rapacity and superstition, such an institution would be of enormous value to mankind.

Dr. Erz's work is a standard contribution to the great propaganda of Drugless Therapy that is sweeping over the land. No drugless practitioner can afford to be without its inspiring companionship. It marks an epoch in the history of the grand science and art of Natural Healing.

The Finer Elements of Life

FATHERHOOD, THE NEW PROFESSION. *By Edward E. Purinton.*

Mr. Purinton regards Fatherhood as the New Profession. It involves three epochs. The first extends from marriage to conception, the second from conception to birth and the third from birth to maturity. The duty of the father during these three stages of paternity, the attraction of the right kind of baby soul: his behavior during gestation of the child, and the physical, mental and moral training to be given the child after birth, are outlined in this most valuable pamphlet. Price, 25 cents.

PROCLAMATION OF NATUROPATHY. *By Edward E. Purinton.*

Naturopathy, as apprehended by the author, is defined at length in this booklet. He states that Naturopathy is the perfected science of Human Wholeness, and that it includes all agencies, methods, systems, regimes, practices, and ideals of natural origin and divine sanction, whereby human health may be restored, enhanced, maintained. Mr. Purinton is a born transcendentalist, and many of his definitions of Naturopathy are to be read in this light. Price, 10 cents.

THE FUTURE LIFE. *By Edward E. Purinton.*

"What and where is Heaven?" asks the author. No one knows but every one thinks he knows. Being spiritual children, we must be content with theological picture books or metaphysical picture blocks. But it is by these that we can learn God's languages, and prepare to enjoy God's home. One man's idea may contradict another's at every point, but as each man's hope equally inspires him and leads him Godwards, all this imaginary charting of the skies but serves as a means to that end. In heaven, human distinctions vanish. There is no sense of time. Marriages are soul-unions without sex consciousness. Those only who have reached the heights of self-surrender on earth are rewarded with promotion to the highest planes of being. Price, 20 cents.

THE FINE ART OF GIVING. *By Edward E. Purinton.*

The man is most divine who feels impelled to share with his loved ones, or the world, all that he has, or is, or hopes to be. Any form of giving becomes a fine art when liberality and discretion, loyalty and justice, affection and aloofness are equally blended. It is not the size of the gift but its appropriateness, that determines the value. Consideration is given to giving money, time, sympathy, opportunity, service, truth and love as a fine art in highly stimulating paragraphs. Price, 20 cents.

PLAY. *By Edward E. Purinton.*

A philosophical disquisition on the psychology of Play. "Life at best" says the author, "is nothing more than a child's pretty play." We must play the game squarely. A man has no right to labor unless he enjoys it. The game of games is the game of life when you know you can win. The man who has found his work and is doing it to the full never asks for leisure to recuperate. Play in work, that is, find the pleasure in and of congenial work and make labor one great game. Ideally, it is as foolish for a man to take a vacation, as for a star, a flower, a brook, a breeze, or a bird, but the creatures are often a rose wanting to sing, a robin wishing the talent of fragrance, hence, the need of recreation to put us back into ourselves. Price, 25 cents.

GENIUS AND EUGENICS. *By Edward E. Purinton.*

This is a brief devoted to advocating that eugenics, or the breeding of perfect human beings, should be elevated to the precision and authority of a science. The author deplores the fact that while abnormal and subnormal children are treated by special methods and special teachers, the supernormal child, the flower and hope of the race, is left alone, forgotten and frequently abused, and always misunderstood, although most worthy of sympathy, care and training. He regards exceptional children as the greatest and best resources of a nation, and suggests that we should conserve and develop such resources. Price, 25 cents.

WOMAN'S WORK. *By Edward E. Purinton.*

The author's creed regarding the sexes is that man possesses the mental qualities while woman has a prerogative of the soul qualities of the race. Theology is masculine and usurps the place of religion which is feminine. The ministry of healing, comforting, serving, and sharing is feminine, hence, we need woman pastors. So also the author argues we need women scientists, poets, and apostles of tenderness, purity, kindness and temperance in all the affairs of life. This booklet is very stimulating to thought. Price, 20 cents.

THE LAUGH CURE. *By Edward E. Purinton.*

"Long faces make broad graveyards" is the motto of this booklet. The author explains at length just what a hearty laugh does, and on his way to do so says that it is the universal solvent of human woes. There is no little wisdom in most of his statements, and no doubt corrective cachinnation is a recipe that will drive away many a fit of the blues. Price, 15 cents.

PURINTON'S BOOKS ON EFFICIENCY

UNUSED POWERS. *By Edward E. Purinton*—This is the first of five brilliant essays that are clarion calls to the efficient life. The titles of the other four are How to Succeed, Freedom the Goal of Life, Daily Guide to Efficiency, and The Triumph of the Man Who Acts. In the present pamphlet, the author seeks to stir the unused powers of the easy going individual into action. His creed is that we are crippled by unused muscles, lungs, instincts, emotions, perception, faculties and ideals. That men are great as they force themselves to use themselves. That everybody is a potential giant, but is an actual dwarf. The ideas enunciated are lying around us at all times, but it is to the author's credit that he perceived them and has put them into a terse form so as to jolt the reader into making a move to redeem himself from his enslaved existence.—**Price, 25 cents.**

THE TRIUMPH OF THE MAN WHO ACTS. *By Edward E. Purinton*—Our author has an enthusiastic regard for the man who acts. This pamphlet is the friend of the man with a huge will and a holy zeal. It is the epistle of the man who desires to mass his forces on a set point, at a set time, for a set purpose. It explains how health attends the man who acts, how wisdom guides him, how hope frees him, how power moves him, how progress marks him, how fame follows him, how wealth rewards him, how love chooses him, how fate obeys him, how God blesses him, how immortality crowns him.

Modern days have placed the past with its uncertainties, in almost every line of endeavor. Yet, it is imperative that we use our God-given powers to promote our aspirations, for without action, it is impossible to achieve recognition.—**Price, 25 cents.**

HOW TO SUCCEED. *By Edward E. Purinton*—The author's theme is that success is the power of using one's self as Nature intended. The rewards of money, friendship or fame, are purely incidental. The measure of success is the expansion of individuality. There is a list of unhealthy ideas that make for failure, and for the cure of failure he gives the reader ten invigorating thoughts. All are excellent. The principal cause of failure in life is mental blindness. This is duly emphasized and these booklets are simply eyes to enable the reader to see himself blazing with success and fame.—**Price, 25 cents.**

DAILY GUIDE TO EFFICIENCY. *By Edward E. Purinton*—This is a compendium of the principles of efficiency, a boiling down of such advice as Mr. Emerson gives on a larger platform. There are twelve principles of efficiency given with a full explanation for the *raison d'être* of each. The first is that all men are made big or little by their motive. When a man allows himself to be blown about by every accident of fortune, he resembles a toy locomotive being pulled along by a string. Such men are inefficient, because somebody else does the pulling. But when a man starts to generate his own energy—look out, an express train is coming. Besides these principles of efficiency, there are ten physical operations recommended that will generate a day of power. These refer to breathing, exercise, diet, bathing, etc., oiling the machinery for the better utilizing the principles of efficiency first mentioned in the booklet.—**Price, 25 cents.**

FREEDOM THE GOAL OF LIFE. *By Edward E. Purinton*—"Freedom," says Mr. Purinton, "is the conscious power to express any, all, or none of yourself, when you will, as you will, because you will. Freedom costs more than any other boon of life, its price is infinite patience." This is true, for the ability of a musical genius to give free expression of himself through his art depends upon terrific work. There is a very fine definition of Freedom given in this booklet which is well worth the price of all five publications which every one that would be really free should possess. Don't fail to note this.—**Price, 25 cents.**

The whole set of five efficiency booklets postpaid, cost \$1.00

Send all Orders to:

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

and figures and proofs, many of them sensational, some almost revolting, are adduced in profusion and to the point. The anti-vaccination movement is spreading incredibly, and up-to-date knowledge, to say nothing of personal welfare, demands the including of the vaccination rationale, its history and results.\$1.00

Just, Adolf.—RETURN TO NATURE. Beauty, simplicity, directness, power, a book not written, but evolved, not a treatise, but a life-experience. Years of the severest bodily ills, utter failures on the part of all the Schools of Therapeutics, despair that instinctively turned to Nature herself, the dawning of the Truth, the realizing of its power, and the telling of it out of a full heart—such is the story of this plea for self-hood. You are not ready to read until you have studied the portrait of the man: most Nature Curists are materialists, but you feel, intuitively, that this man is an idealist, and that the mental motive is back of the purely physical means. The opening pages soothe rather than startle, breathing a peace and a conscious poise that are very essential before the radical truths that follow. Then with kaleidoscopic swiftness the thought becomes revolutionary, iconoclastic—sensational the ultra-purist would call it. For the sex organs are mentioned as plainly and as reverently as the lover tells of the lips of his betrothed. The Just Bath is perhaps the distinguishing feature of the different physical measures. Based on a personal study of animals in their native habit, it is absolutely without analogue in all the previous range of Hydropathy. Unlike any other single water-application, it has a direct effect on Digestion, Sex, Circulation, Secretion, Exertion, and Nerve Power—the elements most needing vivifying. In the opinion of the publishers "Return to Nature" is the simplest and the strongest work ever brought out in any language. Not so much the actual facts and treatments and proofs, though they are unique and invaluable, but the insight into the New Century thought is what makes the book indispensable to the thinker. If you possess, in every particular, pulsating, energizing, empowering Health, you might not be interested—for yourself, and at the present. But not one man in ten thousand does. At whatever stage you may be, simply locate yourself in the pages of a life-history like your own, and follow the book to the close. If you once get in touch with this man who has suffered, his vision will clarify yours, his heart-beats will quicken yours, and you will have the spirit of Mental Healing with the measures of the Physical, which is the ideal. Paper, \$2.00; cloth \$3.00 (German and Italian editions same price.)

Kuhne, Louis.—FACIAL DIAGNOSIS.\$1.60

Kuhne, Louis.—NEW SCIENCE OF HEALING. A convincingly concrete exposition of the oneness of all Disease, and the consequent basal uniformity of treatment traces ailments from the embryo to the corpse, and shows just how impure blood retains its deadly character through infinite multiplicities of external form. The work is a detailed account of Pathological Genealogy, set forth in colloquial phraseology, and appealing to the reason of layman and physician. The author is an acknowledged pioneer in the field of German investigation, his methods have been imitated by innumerable plagiarist Hydropathists, and "The New Science of Healing" is his most representative book. Translated into 26 languages. 420 pp. (3d edition.)\$3.00
Foreign language editions, same price.

THE Natural Method of Healing

By **F. E. BILZ**, *Originator and Founder of the
World Famous Bilz Sanatorium*

A Complete, Concise and Comprehensive System of Healing by
Natural Methods—An Encyclopedia on the Drugless
Treatment of Disease

Every Naturopathic Student, Drugless Practitioner and Every Household needs a set of these books. Over three million sets already sold.

Printed in two Volumes, bound in Green Buckram, Lettered in gold, and profusely illustrated in black and white, and with lithographed plates

A Ready Reference in any Emergency—Both Prophylactic and Remedial—Has to be seen to be appreciated—2000 pages, 700 Diagrams, and 21 Colored Plates.

Complete Male and Female Manikins, with accompanying Anatomical Explanatory Charts.

Published in English, German, French, Spanish, Russian, Italian, Bohemian, Hungarian, Polish, Swedish, Dutch, Danish, Portuguese, etc.

PRICE: \$10.50, postpaid. Set of two volumes, any language.

PARTIAL LIST OF CONTENTS—Volume I

Valuable Advice on first aid to the injured in accidents, drowning, suffocation, poisoning, lightning, sunstroke and fractures
Diseases of the blood and metabolism
How to rear healthy children
Twenty-six important rules to bear in mind with regard to the application of natural methods of healing
The brain and its diseases
Bread considered physiologically
How to breathe correctly
Breathing exercises and how to take them (illustrated)
Cerebro-spinal meningitis and its treatment
Cholera: Symptoms, development by stages and treatment
Colds: Their cause, prevention and treatment

The complexion and how to beautify it
Constipation: Its causes and cure by natural methods
Complete removal of corns by a simple and natural method
Croup: Its causes and cure by natural method
Reports of some remarkable cures through natural methods
Delirium Tremens: Its symptoms and treatment
Diet for the healthy
Diet for the sick and convalescing
Dietetic Cooking for invalids
Tables of food analyses with their percentages
Healing properties of fruit
Curative gymnastics (illustrated)

PARTIAL LIST OF CONTENTS—Volume I (concluded)

Headaches: Various types, their cause and natural remedy
Medicinal herbs and their therapeutic uses
The influence of the mind in the treatment of disease
Suggestive therapeutics and their application
The Kneipp (or Water) Cure for various diseases, and its method of application in specific cases
How to prolong life
Heliotherapy
Rheumatism: Its various forms, their causes and cure

Magnetic treatment and modes of application
Fever: Their cause and cure by natural methods
Mental diseases
Diseases of children
Diseases of the skin
Diseases of women
Diseases of the lungs and respiratory tract
Diseases of the blood and circulatory tract
Diseases of the digestive tract
Anatomical charts (lithographed in natural colors) of the heart, the lungs and the head, with accompanying explanatory keys

Describing How to Treat Disease and According to What Method

Clinical Reports of Cases with method of treatment and results

A full description of nearly three thousand different diseases

Written in simple language, and well illustrated; very clear to all

PARTIAL LIST OF CONTENTS—Volume II

How, and according to what method, should we treat and try to cure disease
What Man should eat and drink
Evils of the use of medicine
Various kinds of baths and their method of administration, including the application of water in specific cases
Nervous affections—their cause and cure
Obesity
Emaciation
Orthopedics; treating mechanical deformities
Peritonitis
Phrenology
Poisoning; Blood Poisoning
X-rays: Their uses and application
How to nurse the sick
Care of the teeth
Vegetarianism, and what it means
Natural methods of childbirth
Modes of healing by Natural Methods

Important observations on the use of packs, bandages, compresses, ablutions, affusions, etc., together with their modes of application under various conditions
Enemas: Kinds, uses and method of administration
Massage: Different kinds and how to give them with and without apparatus. (Profusely illustrated.)
Constitutional regenerative treatment
Steam, vapor, sun, light and air baths; how and when to give them
Venereal diseases; syphilis
Diseases of the rectum
Diseases of the spine
Diseases of the stomach and intestinal tract
Diseases of the kidneys
Diseases of the heart
Index
Male and female manikins (lithographed)

- Oswald, Dr. Felix. — **PHYSICAL EDUCATION; OR, THE HEALTH LAWS OF NATURE.**\$1.00
- Page, Dr. C. E.—**THE NATURE CURE.** The gist of the whole matter presented in concise, forceful, tactful style, "by a prominent member of the medical fraternity—the house divided against itself." An embodiment of the newest researches in the New Therapeutics.\$1.00
- PLANT ATLAS. Edition I.\$2.00
- PLANT ATLAS. Edition II. Colored Plates.\$3.85
- Platen, M. — **THE NEW CURATIVE TREATMENT OF DISEASE.** The therapeutic thought of the scientific world translated into the American vernacular. The book is written by a German, but it breathes American spirit; the "atmosphere," to borrow an artist's term, is pellucid, you don't have to grope through mazes of archaic circumlocution and technical terminology to reach the point. To begin with, Anatomy is not presented in the diffusely didactic orthodox style, that instructs a trifle, bewilders much, interests not at all. It is crystallized into eight anatomical plates, separable and dissectible, picturing the organs and systems of the human body in their entirety. With this as a basis, the author goes straight into the vital problems of everyday life—Eating and Drinking, and the other unrealized potencies that twentieth century thought is investigating. In a word, Prophylaxis is the key—not the dreading of the beneficent germ—scavenger, but the forbidding and the clearing of the corruption-mass that feeds him. Diseases, particularly those incident to children and to womanhood, are treated in detail and by various methods of Nature Cure. Given the knowledge this book imparts and the spirit that radiates from it, and one should never know what it means to be weary, or weak, or diseased. About 2,000 pp., many illustrations, 17 colored plates, 8 anatomical models. Two Volumes, handsomely bound. Full descriptive matter mailed on application.\$10.50
- German edition 3 vols.,\$15.00
- 4 vols.\$20.00
- Purinton, E. E. — **PROCLAMATION OF NATUROPATHY.**\$0.25

- ration of Health by Natural Methods Series)**\$1.00
- Reinhold, Dr. Aug. F. — **PRINCIPLES OF CURE.** Theoretically. Dr. Reinhold's Booklets are the classic Drug-Denunciation of modern times. Revolution, Renovation, Reconstruction are the clarion calls from every page. Not treatises for the tradition-blinded, mealy-mouthed, convention-bound hibernator in antiquity. Not cold-type dissertations, but live, throbbing, thrilling appeals for knowledge and freedom and health and nature. The author eats microbes, sleeps head down, courts "catching cold," and makes habits of other fatal feats. Moreover he tells you exactly why, and how it is that unthinking, perverse modes of life trisect a man's earthly span. As an animal, man should live to 125; he dies at 35. The why and the how not are most ably discussed. The books go to the extreme of radicalism, but that they reach the depths of realism is attested by many statements from the very physicians they so scathingly arraign.\$0.25
- Reinhold, Dr. Aug. F.—**PULMONARY CONSUMPTION EASILY CURED BY THE NATURE CURE.**\$0.25
- Rodermund, Dr. M. J.—**MURDEROUS FADS IN THE PRACTICE OF MEDICINE.** Written by the man who dabbled in the most virulent virus and then shook hands with family and friends, to the consternation of press and public. Vaccination is termed the "Prince of Frauds," and \$1,000 is offered to the first man who can demonstrate its accord with Nature and its beneficence in a single case. Expensive laboratories, a life-time of research, and unwavering convictions are the background for this bold defiance of professional ostracism. Other fads, fancies and foibles commonly accepted without question are stripped of their antediluvian fogger, their mystic chicanery, their authoritative setting, and the scanty remnants of truth are a pitiful witness to the world's perversions. 654 pp.\$3.50

THE SECRET IS OUT

A Treat for the Epicure

A Triumph of Culinary Art

LOUISA LUST, N. D.

The Naturopathic Resort "Yung-born" at Butler, New Jersey, and the Florida Yungborn "Quisisana" at Tangerine have long been famous for the originality and excellence of their vegetarian diet. Visitors have described the meals as "masterpieces of the culinary art," and many have sought to discover the secret of the succulent and delicious viands which grace our table. All the vegetables, fruits and nuts of a bounteous Nature seem to have combined at the touch of a magician's wand into a profuse variety of new and savory dishes which tickle the palate and bring the smile of inward contentment to those assembled round the festive board.

Selfishness has no place in Naturopathic ideals. Being willing, therefore, that our friends should have the secret of this dainty and nutritious cooking, Mrs. Lust has decided to place before the public the result of her labor and study of years in this particular branch, in the form of a complete Naturopathic - Vegetarian cook book, aptly entitled the

GOOD DINNER COOK BOOK

Vegetarian cooking takes on a new meaning after you have tried some of the recipes in this book and the gastronomic horizon of the vegetarian is broadened by new and unthought-of combinations, even the reading of which makes your mouth water with joyful anticipation. You are real mean to yourself if you don't get this book. Send for it to-day and give your friends a treat.

PARTIAL CONTENTS

Section 1—Cooked and Uncooked Foods. Section 2—Substitutes for Animal Foods. Section 3—Egg Plants, Potato Croquettes, etc. Section 4—Rice or Farina Fritters, Rice with Tomatoes, etc. Section 5—Mushroom Pie, Cabbage Pie, Spinach and Eggs, Stuffed Peppers, etc. Section 6—Soups and Gruels. Section 7—Vegetables and what may be done with them. Section 8—Sauces and their importance to a good dinner, etc., etc. Sixteen Sections with table of Food Values from reliable authorities.

Price, 75 cents; Cloth, \$1.00. Postpaid with a year's subscription to THE NATUROPATH \$2.25. Send all orders to

Part 19—PARENTHOOD

- AMATIVENESS. MATRIMONY. Each. .\$.0.15
 Ballantyne, J. W.—EXPECTANT MOTHERHOOD. Cloth. .\$.1.50
 Bunker, M. N.—PHYSICAL TRAINING FOR BOYS. .\$.1.10
 Cowan, Dr. John.—SCIENCE OF A NEW LIFE. A complete marriage guide. It treats of generation and regeneration of the human race, and has won commendation from the leading medical, educational, and religious critics. A few topics: Marriage and its Advantages; Age at Which to Marry; Law of Choice; Qualities Man and Woman Should Avoid in Choosing. Anatomy and Physiology of Generation, Children—Their Desirability; Pregnancy—its Signs and Duration; Diseases of Men; Diseases of Women; Sterility and Impotence; A Happy Married Life—How Secured, 402 pp., illustrated. .\$.2.50
 Elliott.—EDEOLOGY: PLAIN TRUTHS FOR ALL. .\$.1.50
 Fischer, Dr. Louis.—THE HEALTH-CARE OF THE GROWING CHILD. .\$.1.25
 Fowler, P. S.—CREATIVE AND SEXUAL SCIENCE. A compendium of facts and feelings, from the first meeting of the man and the maid, to the marriage of their children. Psychological and temperamental considerations are put first, as they should be always, and commonly are not. The impalpable realities of mind and motive are analyzed with a keenness that characterizes this author's work; the physical and physiological aspects are illumined fearlessly and fully, and every question of the unknown, uncertain ill-advised youth is more than met. 1,050 pp., illustrated. .\$.3.00
 Gestefeld, Ursula N.—THE WOMAN WHO DARES. A vivid picture of the real new woman; the one who dares defy custom, tradition, and the demands of a sensual husband, and who keeps inviolate the sanctuary of a wife's body. Legalized prostitution is

- the habit of husbands and the woe of wives. It is the beginning of most marriages, and the motive for many. It ages manhood, blights womanhood, curses childhood, and destroys the home. "The Woman Who Dares" is the first to voice what millions of her agonizing sisters have hoped and prayed for, since time began. The book is not a favorite at female seminaries. But it marks an epoch in the development of womankind. .\$.1.05

PHYSICAL CULTURE

A Magazine with a Soul

BERNARR MACFADDEN

Founder of the Physical Culture Magazine, America's most forceful advocate of drugless treatment.

The most personally helpful, most alive and most mentally stimulating magazine published.

PHYSICAL CULTURE teaches the weak how to be strong; the sick how to be well; the well and strong how to be more vital and vigorous.

DRUGLESS PRACTITIONERS

Should Read PHYSICAL CULTURE for New Ideas on Natural Treatment.

If you have never read **PHYSICAL CULTURE** you can scarcely understand what a live magazine is like. It covers the needs of every member of the family. Each number is packed full of personal, helpful information on building energy, stamina and red-blooded health. The Question Department alone is worth many times the price. Read this magazine. A single copy will convince you of its value.

PHYSICAL CULTURE on your office table will help to establish your standing.

Advertise in **PHYSICAL CULTURE** to increase your practice. Rates on request.

20 Cents Per Copy.

Subscription, \$2.00 Per Year.

Macfadden's Books on Health, Strength and Natural Cure

MACFADDEN'S ENCYCLOPEDIA OF PHYSICAL CULTURE

A Complete Library on Physical Culture and on Health, Strength and Beauty Building. Five Handsome Volumes, profusely illustrated. With these books in your office, you can be assured of not only thorough knowledge of anatomy and physiology, but you will also possess a reference work upon which you may absolutely depend for plain instructions for relief and cure in event of injury or attack by any form of illness. Every drugless practitioner should have this set of books on his shelves. Send for colored circular, and prices and terms, today.

VITALITY SUPREME—By Bernarr Macfadden

For men and women. Bernarr Macfadden's latest book on the attainment of the highest bodily vitality and physical efficiency. Special methods for the development of health, strength and endurance described and illustrated. 260 pages.

Bound in Cloth, postpaid, \$1.00

MANHOOD AND MARRIAGE—By Bernarr Macfadden

This work is devoted to the personal sex and marriage problem. It discusses frankly yet delicately sexual questions on a correct understanding of which is dependent happiness in marriage. Presents description of the nature, causes, symptoms, and instructions for treatment of sexual weaknesses and diseases of men. 364 pages.

Bound in Cloth, postpaid, \$2.00

HOW TO DEVELOP MUSCULAR POWER AND BEAUTY—By Bernarr Macfadden

103 full-page illustrations, actual photographs of the author. Shows how all parts of the body can be developed and strengthened.

Bound in Cloth, postpaid, \$1.00

OLD AGE; ITS CAUSE AND PREVENTION—By Sanford Bennett

This book is the author's story of how he regained his youth at past seventy, and tells of the system which accomplished his rejuvenation. A book for young and old, men and women. Over 400 pages. Bound in vellum de luxe cloth with numerous photographs and colored portraits.

Price, postpaid, \$1.50

FATHER, MOTHER AND BABE—By Anna Jenness-Miller

A book for the expectant mother. Tells how to insure the health of the prospective mother, the mother and the child. Detailed information on preparation for motherhood and care and hygiene of the child.

Price, postpaid, \$1.00

NEW HAIR CULTURE—By Bernarr Macfadden

Tells how to care for the hair, and how to remedy all complaints that affect the hair. 140 pages, 14 full-page illustrations.

Bound in Cloth, postpaid, \$1.00

STRONG EYES—By Bernarr Macfadden and Wm. Bates, M. D.

A new course of eye training without glasses, drugs, medicines or operations. How spectacles may be discarded, the eyes made strong and beautiful, squint corrected, and other abnormalities and defects overcome by educational eye exercises and other purely natural methods. Revolutionary truth upon this subject. Pictures by the score.

Herald of Health and Naturopath

Price, 20c copy
Subscription,
\$2.00 a year

THIS magazine, which is the professional organ of the American Naturopathic Association, first appeared in 1896 as *The Kneipp Water Cure Monthly*; then in 1902 it became known as *The Naturopath and Herald of Health*; and finally, in January, 1916, it became *The Herald of Health and Naturopath*. As the name indicates, this publication is the exponent of every phase of drugless healing. It is many years older than the Naturopathic Society, the name by which the American Naturopathic Association was first known, and which was founded December 2nd, 1902, in the city of New York.

The Herald of Health and Naturopath is the only journal published in the United States that espouses the healing of disease by the simple and natural methods, as opposed to the vile nostrums and superstitions of Allopathy, otherwise known as official medicine.

The Natural System of Healing alone has the courage to assert that Nature cures, that the only healing force is the *vis naturae medicatrix*, and not the potions, pills and powders of the empirics. It had its inception in Germany. Priessnitz of Gräfenberg, Kuhne of Leipzig, Schroth of Lindewiese, Bilz of Dresden, and Kneipp of Woerishofen, established sanatoria, and proved to a world sick unto death with swallowing paralyzing palliatives, of annihilating fermenting substances with chemicals, of suppressing fevers with poison, of relieving constipation with purgatives, causing the muscular system of the intestines to lose tone and elasticity, all practices antagonizing nature in her benign efforts to get rid of the offending *materies morbi* that is the cause of the specific disease, that the benign forces of sunshine, air, light, exercise, simple foods, earth cure, water cure, mental science, etc., are a thousand times more curative of the ills of mankind than the poisons of the allopaths.

The epoch-making work done by these great pioneers in Natural Healing is fully described in the pages of our magazine. The twentieth century will be known as the Century of Naturopathy. The long slavery of mankind to the bag of bones and feathers of the primitive medicine man, the Witches Broth of the Middle Ages, the vacuous "megrimms" and "vapors" of *le docteur a la mode*, the bleeding craze of our immediate forefathers, the drugging craze, and the present craze for serums, inoculations, and vaccines, has been broken at last, and many allopaths are now turning naturopaths, thus fleeing from the wrath to come.

The specialties in Natural Healing, no matter by whom introduced, receive most elaborate exposition. These include the German Water Cure; the Nature Cure or Naturopathy, which includes Diet, Hydrotherapy, Thermotherapy, Phototherapy, Heliotherapy, Chromotherapy, Electrotherapy, Psychotherapy or Mental Healing, including suggestive therapeutics, Mechanotherapy, or Massage, and Physical Culture, Osteopathy, Ophthalmology, Chiropractic and Spondylotherapy.

All these various drugless methods, and others not specifically mentioned, are parts of an immense whole that forms a body of medical principles and practice that are the very antithesis of allopathic medicine, which is but a system of ignoring the cause of disease, thus leaving it intact to break forth again. The system is an attempt to enable man to violate the laws of nature, and yet secure immunity from punishment for so doing by the vicarious virtues of drugs, serums and vaccines. This false system of finding "cures" for disease, by treating the effect, even if successful, would only result in our seeing a new series of ailments springing from the unextirpated roots thereof, each requiring a new artificial "remedy," produced in most cases with the infinite suffering of animals in the shambles of the medical laboratory.

The Natural Method of Healing, on the contrary, seeks to change the very habits of the individual by urging a return to nature in eating, drinking, breathing, bathing, working, resting, dressing, thinking, by making use of elementary remedies of nature, by correct physiological principles.

THE HERALD OF HEALTH AND NATUROPATH contains biographical sketches of all the prominent pioneers of Naturopathy, not only those of foreign countries, but also those of the United States. Biographies of Dr. Trall, Graham, Jackson, Kellogg, Walters, Page, Still, the originator of Osteopathy, Weltner, who enlarged suggestive therapeutics, Palmer, originator of Chiropractic, B. Lust of New York and Butler, N. J., the Naturopath, Drs. Lahn, Strueh, Lindlahr, Carl Schultz, Collins, Deiningner, Davis, Havard, professors of Neuropathy, Dr. McCormick, the Ophthalmologist, etc., etc.

These apostles of Natural Healing and their disciples are doing a wonderful work in the prevention and cure of disease, having reduced the death rate of over fifty per cent. under the old and false drug treatment to less than five per cent. by the drugless method.

THE HERALD OF HEALTH AND NATUROPATH is a magazine for the people at large, as well as for the Drugless profession. Each issue is full of ideas that will emancipate the reader from the tyranny of the drug superstition. It is the most desirable factor in the regeneration of the race.

Back volumes from the year 1900 on up to now, each volume, \$2.00, postpaid. Single back numbers, except current year, cannot be supplied.

Health Culture

Monthly Magazine

EST.
1894

Health Culture exposes the inconsistencies and arrogant humbug of much that is called medical science, but which in reality is not science at all, but based on experiments made upon the public and by torturing dumb animals. Nature never intended this, but expects everyone to keep to her laws.

ELMER LEE, M.D.
Editor

HAROLD WELLS TURNER
Publisher

Unite With Us for Health

One result of hyper-civilization is that it is damning humanity by successfully blind-folding the public so as to make her contribute to the up-keep of a profession that lives on her suffering. Eighteen million drugless advocates have refused to become slaves to that system. Step up, join hands and unite with us for Health.

STATISTICS prove that, in the United States, the average person is ill 18 days per annum. That means a person living to the age of 65 is sick 1,380 days or over 3½ years during his life. Assuming the person to be earning the modest salary of \$25.00 per week, this means a loss to him of \$4,550, which is quite a sum, but you have still to add to this the doctors' bills and you know what they mean, do you not?

WHY is there so much sickness? Why should a person waste 3½ years or more in bed losing money at this rate and why so few doctors who are sick? These are questions one naturally asks. We can answer them for you and tell what the cause REALLY IS. **IGNORANCE**, that's the answer, that is at the root of it. **YOU** are kept in ignorance while the doctor knows and so he takes none of his medicine, but gives it to **YOU**. He keeps well and you become **ILL**. You are taught little about your body and still less about the cause of disease, consequently when you have a pain or ache, you run to the doctor. **HEALTH CULTURE** teaches you all about the body, disease, treatments, cures, as well as the evils of drugs. It also tells you how to treat yourself successfully without using dangerous poisons and with a saving of \$4,550.

HEALTH CULTURE will give you thought control, and teach you how to become strong, virile, magnetic and attractive. Teaches the underlying laws of eugenics and sexology. Will teach you to live the Happy Life and how you may escape from bondage and sickness no matter how you have trifled with your health or what your environment is, or what your parents may have died of, or what your occupation. **HEALTH CULTURE** will teach you to climb to the healthy life and so become strong and successful.

HEALTH CULTURE is the most progressive health organ in the world and teaches the most up-to-date medical science based on Natural Methods, Common Sense Psychology and Diet. What an important part the food we eat plays in health and how little people understand it. Babies get thin and rickety when improperly fed. Children fall into decline through lack of nutrition. Nervous and highly strung people require those elements that create nerve power. A correctly balanced diet supplies the proper amount of fats, etc., and is absolutely necessary for health. Unless you maintain a good, all round diet you will sooner or later suffer for it. **HEALTH CULTURE** contains numerous articles devoted to diet, giving valuable information on the subject.

WE are interested in you and if you are in difficulties about anything connected with your health, remember we are at your service, so write to us fully. Our Question and Answer Department offers to every reader a privilege that few other periodicals do. **HEALTH CULTURE** fights drugs, quackery, serums, stimulants, useless operations, medical humbug, vivisection, vaccination, and everything likely to injure the health of the nation.

THERE is no reason under the sun why you should grow old and wrinkled as the years roll on. It is up to you to keep young and well. Men and women may be old and worn out at 30, if they have not followed the right course of living. We have thousands of followers of 70 years who are youthful and vigorous, having learned the true way of health. It is not a question of age, but your condition of health. We are sincere when we say that as you grow older and learn more, you should grow healthier and more youthful appearing. The Natural Methods ARE the best. No right-thinking person can have the slightest doubt about that and **HEALTH CULTURE** is just brim full of live wire information that tells you explicitly what to do to keep well and young.

Health Culture, \$1.50 per year, 15c a copy.

A symposium by twenty authorities, compiled by the Editor of "Health Culture." A few women are pretty, all may be beautiful. The distinction is nicely drawn, and the way plainly pointed out. A book every woman needs. \$1.10
 Wood-Allen, Dr. Mary.—ALMOST A WOMAN.\$0.35
 Wood-Allen, Dr. Mary.—WHAT A YOUNG GIRL OUGHT TO KNOW.\$1.10
 Wood-Allen, Dr. Mary.—WHAT A YOUNG WOMAN OUGHT TO KNOW.\$1.10

Advice, when helpful, should be cheerfully acknowledged and applied. The most advisable recommendation we can furnish is the addition of these books—a veritable treasure for Naturopaths and seekers of health. Dr. Benedict Lust, 110 E. 41st St., New York, N. Y.

Wood-Allen, Dr. Mary.—WHAT A WOMAN OF FORTY-FIVE OUGHT TO KNOW. Companion books to those of like title mentioned under "Manhood." Pure, purposeful, successful, happy womanhood, free from pain, and weakness, and sadness—this is the reward of Nature for living in conformity with her laws. Most women violate instinct, ignorantly, thoughtlessly, habitually; and the woe that follows is attributed to every cause but the right one. For clearing cobwebs and loosing shackles, the "Ought to Know" potencies are supreme.\$1.10

THE VITALISM SERIES

In which the Leppel Dietary System is Expounded

DIETETIC WAY OF HEALTH AND BEAUTY, THE. Deals with such popular fallacies on dietetic habits as "One man's meat is another man's poison," "It is a virtue to live on cheap foods," etc. Different dietetic systems are also discussed. \$0.25
 HINTS FOR SELF-DIAGNOSIS. —In "Hints" interesting information is given respecting the cause of the unsightly appearance of most men and women, and the methods are indicated by which diseased and ugly persons can be made healthy and good-looking.\$0.45
 MISSING LINK IN DIETETICS, THE. Discusses the importance of taking rightly combined and proportioned foods. Attention is also called to the unhealthy appearance of many vegetarian leaders on the altar of their animal cause thereof is given.\$0.25
 NUT AND FRUIT DIETARY, A. The properties of fruits and nuts in common use are given, with recipes and general rules. \$0.25
 SEXUALITY AND VITALITY. Affirms that the average man and woman sacrifice their vital powers on the altar of their animal passions. Cause and cure given.\$0.40
 SUITABLE FOOD AND PHYSICAL IMMORTALITY. The author explains in this pamphlet how she can, by taking specified combinations of foods, make herself either prematurely old or youthful looking. The vegetarian dietary is given which makes her yellow, irritable, and nervous. Eczema, boils, a blotchy skin, etc., can be as easily produced by her as these disfigurements can be cured.\$0.35
 THE TEA QUESTION. Describes the injurious effects of tea-drinking.\$0.25
 VITAL AND NON-VITAL FOODS. Twenty Lists of Classified Foods. Brief but to the point. Lists of food are given for the aspiring, who wish to feel more "fit" or to do their work more efficiently, also lists of food which induce or increase certain complaints.\$0.45
 WHAT IS THE DIFFERENCE BETWEEN THE DENSMORE AND LEPPEL DIETARY SYSTEMS? Interesting Letters and Testimonials.\$0.25
 The above 9 pamphlets for \$1.50

VITALISM BOOKLETS

By BENEDICT LUST, N. D., M. D.

Founder of the American "Yungborn" and Natural Life Colony, Editor Herald of Health and Naturopath, Pres. American Naturopathic Association, Dean American College of Naturopathy, etc.

Ten Pamphlets or Manuals used in the studies of the training of thought, the art of breathing and the art of nourishment, in Dr. Benedict Lust's School of Diet, American School of Naturopathy, Yungborn Health Resort, Butler, N. J., "Quisisana" Nature Cure, Tangierine, Fla., Natural Life Colony, Palm City, near Nuevitas, Cuba.

Awaken to Complete Consciousness.

Most people are unconsciously asleep even when awake. They are swayed by countless inclinations and propensities to satisfy which they incontinently yield their will. They are slaves of appetite. Only he is free who can do everything, but also can refrain from everything. He only is master of his fate. But to achieve mastery, such a man must cultivate his imperfectly developed brain centers, doing everything in full consciousness, with great concentration. Such is the lesson of this valuable booklet. Price, 25c.

Everything is Attainable through Training of Thought.

The burden of this booklet is that thought is a power, that everything is attainable through the training of thought. It essays an answer to the question—What is thought? Like electricity, it is a vibration. The vibration of a thought along a nerve contracts a muscle that lifts 100 pounds. Yet the thought was itself imponderable. Wonderful, mysterious force! That which weighs nothing can lift millions of tons of matter. Read this booklet to learn of this daily miracle of life. Price, 25c.

Man, Learn to Think.

Advocates the regeneration of weakened, depressed conditions in men and women by the power of energizing thought and correct breathing. The ladder of the higher life has for its steps thought, idea, wish, will, deed, repetition, habit. Thought originates the idea which in turn develops desire, and desire in time incites the will to action which, when engaged, becomes materialized in deed. The repetition of deed becomes habit, and many habits become character. Price, postpaid 25c.

The Limits of Fatigue as a Strict Law of Life.

This booklet is a fair warning that you are using up your store of energy faster than it can be replenished. You are writing, reading, speaking, eating, drinking, speculating, attending clubs, shows, dinners, concerts, doing everything to exhaust your reserve of vitality. You are afflicted with irritability, are too easily offended at others, and suffer from sexual exhaustion. You have tried every kind of cure without relief. Really all you need is rest. **THAT KIND OF A REST PRESCRIBED BY DR. B. LUST.** Moral: Read this pamphlet and get well. Price, 25 cents.

The Overcoming of the Financial Malady called Poverty.

Who would not be wealthy if he had the chance of being so? Wealth is no disgrace, unless the money has been stolen. Men risk their lives, their happiness and that of their family to get rich. This booklet shows that thinking procures everything. We live in a world of immeasurable wealth. It is bodily bloodlessness that comes from poor food, wrong food, flat breathing, lack of exercise, poisonous matter lodged in the system owing to inability of the organs to eliminate same. The booklet shows the close connection between alimentary and financial dietetics. Study and act upon its teaching. Price, 25 cents.

Becoming Numb: The True Cause of Cancer.

When a man is compelled to do without the foods he most needs, and is filled with matter he does not require, illness and degeneration will result. Thus, the individual cell is compelled DAILY to take up stuff for which it has but little or no use at all. It becomes constipated with poison subject to decomposition, thus the body begins to rot in the body. A consciously restrained amount of appropriate food which the body can easily dispose of, is the object of cure. It is explained fully in this booklet. Price, 25 cents.

The Helper in Distress.

This booklet is really a guide, philosopher and friend in all that relates to healthful, appetizing diet as the foundation of health. It advocates beginning the breakfast with breathing exercise, and then for breakfast, by way of doing without a breakfast which the author most earnestly recommends. He allows only an appetite teaser of Kneipp oat crackers with honey. This is reinforced with a little nut-prana, an easily digestible nut preparation, with a following of figs, dates and bananas. Grape juice is allowed at this meal. As to the delightful lunch and supper we must refer the reader to the booklet itself.

Having created an appetite for upbuilding foods, the author has a word to say about the excretion of waste products by means of a local steam bath; a true "helper in distress." Price, 25 cents.

The Conscious Diet as a Foundation for Health.

The object of this booklet is to prove that diet is for man what soil is for the plant. The reason why men do not develop all of the wonderful talents that lie dormant within them is because the body is too much contaminated with auto-intoxication, with the self-poisons that have taken possession of the organism. Food, it is shown, is not merely a question of what kind should be eaten, but is a study of what kind of a stomach it is going into. In early ages, men fought and exercised themselves so much that rank foods and strong digestion were necessary to keep the muscles in condition. Nowadays the brain workers, so numerous, require finely-selected, finely mattered foods such as fruits, nuts and tender salads, owing to the lesser vigor of their digestion. The booklet gives the rationale of this difference of menu and shows how through diet, breathing and training of thought towards health and wealth, happiness will result. Price, 25 cents.

Winds and Gases, Conditions of Weakness.

This valuable booklet is devoted to a consideration of one of those poisonous and paralyzing agents that tend to destroy one's energy and effectiveness in life, viz., flatulence, or gas, evolved from the decomposition of food in the intestinal tract. Most people eat too much, regardless of the fact that every bit of food too much will create putrefactive gases whose pressure and movements will cause swellings, will crowd organs from their normal position, will stagnate the blood, interfere with the activity of the brain, weaken the will, and change the entire character. Meals, or foods that produce these noxious gases, should be eliminated from one's dietary and it is the mission of this booklet to tell what foods should be eaten and what foods should be let alone, to avoid the disasters that come from the evolution of foul gases within the body. The mere catalogue of these serious troubles, which is given in the booklet, is a tremendous argument in favor of a non-flatulent diet. Price, 25 cents.

The Raw Food Table.

"Eat cold and you grow old, eat raw and you grow bold." Raw food has this superior merit that it contains both vitamins or electric energy, and the natural salts that supply necessary mineral elements and preserve the alkalinity of the blood. Raw food invigorates the blood-stream, and thus rejuvenates both body and mind. The nutriment is better than meat, eggs or milk fare, all of which overload the enervated man with decomposing poisons. The booklet gives a list of the most palatable raw foods, such as unfired bread, cauliflower, kohlrabi, early peas, cucumbers, radishes, turnips, lettuce, etc., and commends specific dishes carefully assembled, and fairly revels in fruits, oranges, bananas, apples, raisins; pine-apples, melons, pears, figs, strawberries, etc., and in nuts, almonds, walnuts, pine-nuts, hazelnuts, Brazil nuts, peanuts, etc. Price, 25 cents.

Dr. B. Lust, the author of these pamphlets, takes occasion in this last of the series, to make mention of some specific combinations of natural foods that are used in his Natural Food Emporium, New York City, and Butler, N. J., such as oat biscuits and apple sauce, rice boiled with apples, apple sauce and raisins mixed with ground almonds, or peanuts, oat biscuits and honey, green rye flakes, mixed with ground peanuts, raw cauliflowers and green peas, little red turnips, tomatoes, radishes and parsley, with cream, marmalade jam, or curdled milk.

Taken all together these valuable booklets are a means of developing individuality, strength of character, will power, and abundant health. They are powerful incentives to self-consciousness and self-healing in accordance with the laws of hygiene and the science of mind. They show why, even in spite of healthful treatments and remedies, people remain ill, and become no nearer being lords of themselves, by refusing to think optimistic thoughts. Their dominant message is the invincibility of correct thinking, joined hand in hand with correct bodily treatment, for the abolition of all mortal ills.

Price, in paper, 25 cents each; the whole combination set of 10 for \$2.00, postpaid

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

NATURAL HEALING AND NATURAL LIFE BOOKS AND PERIODICALS

THE ATTENTION OF THE READER is specially directed to this carefully selected List of Naturopathic Literature. These books are of the most transcendent importance to the human race. They deal, one and all, with varying aspects of the most vital subject on earth, viz., Life itself. Some of the books have had millions of copies sold, and it is quite within the truth to say that on an average every book here listed is intrinsically worth a hundred dollars, although the price ranges from a few cents to ten dollars. What is more valuable to a man than health? And the health that is sought for is obtained by the most congenial means—not by drugs that only stifle symptoms, but by means of the forces of Nature that seek out and remove the cause of disease. The Natural School of Medicine is making immense strides, and over 35,000,000 people in the United States, with 30,000 practitioners, are devoted to the cause. The Drugging Practitioners would fain try to suppress this young giant of Naturopathy that is destroying their prestige and throwing allopathy on the scrap heap, but of no avail. The people must and will have health, and, finding they cannot receive it at the hands of the allopaths, turn gladly to the Naturopaths who alone possess the Fountain of Youth. To read and ponder over this whole list of books devoted to Natural Healing is the duty of every Naturopath, and every lover of life. They comprise the true philosophy of health. This knowledge is health, wealth and power.

The Rediscovery of the Lost Fountain :: of Health and Happiness ::

FOR

Nervous Afflictions and Nerve-Exhaustion Including Mental Ills and Sexual Diseases

BY DR. EL LERNANTO, ESTERNO, FLORIDA

PRICE, \$1.00

CLOTH, \$1.50

The world is overrun with medical books already printed, with new and varied writings on the cause and cure of disease and the preservation of health, daily being added thereto. The extent and number of these books would almost lead us to conclude that the reservoir of human thought on this subject was well nigh exhausted. But still they come. Great hospitals, colleges, and medical and surgical institutes are constantly being established for study and research, for clinical practice and observation, and also for cruel vivisection and experimentation upon animals, to discover if possible the secret cause of disease and senile decay, together with their prevention and cure.

Then we have school after school of all kinds of practitioners and fads of healing, vieing and fighting with each other for first place in public favor, followed by thousands of patent medicines,—cure-alls for whatsoever ails you. And still the human family continues to be sick, to suffer and die with little, if any, abatement other than temporary relief or amelioration of pain. With all the supposed superior enlightenment of this age, and the fact that the gospel (as promised) is being preached to all nations, there is so far no substantial realization of that promise in Mark xvi : 18. "They shall take up serpents; and if they drink any deadly thing it shall not hurt them; they shall lay hands on the sick and they shall recover."

In view of this failure to realize these blessed conditions, how shall we conclude otherwise than that the true gospel is not being preached, nor the true method of cure and prevention of disease being practiced or taught? As we observe the daily increase of the lame, the halt, and the blind, with innumerable sick, and the carting away of the untimely dead, it is enough to turn the heart to despair, did we not know that all of this tumult of doctrine and doctors' prescriptions is but the void and chaotic condition presaging the making of all things new; that is, the establishing of true life and doctrine, involving the true method of healing and preventing of diseases, the abiding of faith in the coming of which is now being re-

warded in the presentation to the public of a treatise by Dr. El Lernanto (Dr. J. Augustus Weimar), entitled "Rediscovery of the Lost Fountain of Health and Happiness," published by Benedict Lust, Butler, New Jersey.

The scientific principles of overcoming disease and of finally attaining to the incorruptible flesh, have long been taught in the **Guiding Star** publications, as a distinct and universal science; but this is the first practical attempt to collate the curative phases into succinct form, specially applicable to combatting affliction. This reduces them to a system of mental therapeutics, which cuts at once the Gordian knot of all the intricacies that have so long puzzled medical scientists, going straight to the crux,—the direct and indirect cause of all the ailments the human flesh is heir to.

This book shows that of which the race is substantially ignorant; i. e., that the propagative sperm and germ of the male and female are the vital essences of life, and that upon the conservation of waste of this energy depends the health or ill health of the individual or of the race. Also that this potency has a twofold use; first, in the propagation and multiplication of the species; and second, that the husbanding of it to the extent of purifying the thought and desire from sensual indulgence, provides food and stimulus to mental as well as physical effort and capacity. It strengthens the man or woman to resist and overcome temptations, and moral and physical weakness and ailments as well. And it also enables one, through added mental potency, to assist others in doing likewise.

Over and beyond all this, we are shown that it is only by the absolute conservation of sex energy, and the consequent purification of sex desire, that we may become the children of the resurrection, who neither marry nor are given in marriage, but are as the angels in heaven. (See Luke xx : 35, 36.)

This most admirable treatise does not cease, as do most treatises upon this subject, by admonishing us as to what we should do; but recognizing that sex desire

is the most powerful of all the human passions, and that direct resistance is useless and destructive, we are instructed to combat it by substituting higher and more elevating thoughts; by aspirations for better and nobler thoughts; by the iteration and reiteration of ennobling and purifying sentiments, to he end that evil thought and desire will find no room nor congenial abiding place in our mental household.

In reality, we are thoroughly admonished and inspired to continually dwell in the upper apartments of our mental habitation, avoiding all mental excursions into the basement, which is sure to be overrun and polluted with vermin and the noxious contagion of mortal life. Or, if need be to flee to the house top of intellectual and moral aspirations, for the time is at hand to heed the Biblical admonition to "Let him which is on the house top not come down to take anything out of the house;" for the very good reason, we doubt not, that the things of the usually inhabited region of the mind have, by long association, become so contaminated with evil and worldly thought and desire in the memory, that they cannot be other than auto-suggestive, and dangerously seductive to him who would save his soul alive.

Sick or well, old or young, you need this book. No other writing will lead you so truly to the scientific cause and cure of disease, and so insure to you a joyous life and happy old age. Especially will it benefit the youth just forming the habits of life, pointing out to them the danger of idle and unrestrained indulgence in licentious thought, together with the most effective means of guarding against and overcoming, and placing before them in a clear and convincing manner, the rewards of health, happiness, and great mental powers to be gained by careful restraint. Not a merely superficial and outward restraint, but a restraint that goes to the root of the evil in the thought and the affections.

It teaches that thought and desire are substance, and that every pulsation of the intellect is building character for you,—mentally, morally, and physically, in direct accord with the nature of the thought coined therein.

Read it; heed it, and it will become to you a source of strength, welling up into a joyous spirit of mental and physical elasticity, a constant blessing to yourself and to all with whom you are in association. Paper cover, \$1; cloth, \$150, postpaid.

THE CONQUEST OF POVERTY

By Helen Wilmans

The most popular book in the range of Mental Science literature. It brings freedom to the mind, and through the mind to the body.

This book is in its seventieth edition. The demand has been so great that now we have issued a cheap edition that we sell at \$1.00 a copy for a short time only.

Address orders to:

WILMANS BOOK HOUSE
Box 74, Tangerine, Fla.

Herald of Health and Naturopath

A monthly magazine devoted to Rational Living and Natural Healing. It stands for clean living, common sense in diet, and the proper application of all modern systems of health building to the exclusion of dangerous Drugs and Non-Accidental Surgery. Has been fighting for medical freedom since the day of its first issue, over twenty-five years ago.

Subscriptions to all parts of the world \$2.00 per year, single copies 20 cents each. Back volumes, from 1900 up to now, per volume, \$2.00 postpaid.

BUTLER, N. J.

THE REDISCOVERY OF THE LOST FOUNTAIN OF HEALTH AND HAPPINESS

FOR NERVOUS AFFLICTIONS AND NERVE EXHAUSTION, INCLUDING MENTAL ILLS AND SEXUAL DISEASES

by DR. EL LERNANTO, ESTERNO, FLORIDA

OUR PREMISE:

As every organ and function of the brain (the organ of the mind, or intellect and will) has its corresponding organ and function in the body; consequently, the influence of a physician's mind, as well as that of the patient's, will act as a curative factor in mental (nervous) and sexual diseases; specifically, if the ABC method, as herein outlined and prescribed is adopted.

Even in physical diseases, the same influence, in conjunction with the material means, will hasten the process of healing, and will establish a state of health and happiness, never before experienced.

CONTENTS

	PAGES
INTRODUCTORY CHAPTER	
WHAT WE SAW, HEARD AND EXPERIENCED	5-10
CHAPTER A	
THE REAL SOURCE OF NORMAL PHYSIOLOGICAL HEALTH	
Ignorance of This Source, Prudery and Secrecy of the Subject, the Veritable Hades and Gehenna of Mortal Humanity—The Bane of the Twentieth Century and Despair of the Doctors—Medical and Drugless Schools—Necessity of Differentiating between Physical and Mental Diseases—A List of Abnormal Mental Outgrowths—Root and Cause of Disease—Neurasthenia and Its Symptoms Defined and Described—Strictly Female Diseases—Reflex Neurasthenic Symptoms in Females—Strictly Male Neurasthenia—Alterable Neurasthenia According to Constitution—Dr. English's Opinion Concerning "Spinal Irritation," or Spinal Cord Affliction—Inseparable Associated Neurasthenia—Baneful as This List of Neurasthenic Symptoms Is, Yet Do Not Despair—Man's Guiding Star (Poem) .	11-16
CHAPTER B	
HOW LIFE AND HEALTH ARE GENERATED	
Equilibrium of Mind and Body the Greatest Factor of Life and Consequent Enjoyment of Health—A Comparison—Materialism, Spiritualism or Mentalism—The Process of Mastication—The Process of Digestion (Churning and Dissolving)—The Process of Assimilation (Conveying and Absorbing)—The Juice-Substance of Food—The Alchemical Laboratory and Conservatory, Where the Real Source of Mirthful Health and Joyful Life Is Generated—The Glandula Vitae or Gland of Life, the Real Source of Pure Blood Making—The Conarium or Pineal Gland, the Seat of Sensual Determination—Change of the Arterial and Venus Circulation—The Office of the Heart, Lungs and Capillaries—Mental Equilibrium the Greatest Factor for Good Blood-Making, and Consequent Enjoyment of Health—The Office of the Myriads of Brain-Cells—The United Process of Conarium and Brain-Cells, and Origin of Humo-Vito-Electro-Magnetism—Ignorance Concerning the Secret Origin and Reservoir of Sperm and Germ—How the Brain Is Set in Motion at Birth—The Supply of Light (Pneuma or Electricity) and Heat (Psyche or Magnetism) to the Body and Brain—The Process of Alchemical Combustion Is the Law of Reciprocal Action and Relation of the Inner and Outer Man—How Mental Healing Is Made Possible, and an Absolute Fact—How Life Is Generated—How Uplifting and Beautiful Is Truth!—The Importance of Masticating Food Thoroughly, and the Equal Importance of Being Moderate in Eating and Drinking—Acute Dyspepsia or Indigestion—Chronic Dyspepsia—"What	

Shall We Eat and Drink?" of Less Importance, and Why—Mental Equilibrium More Imperative Than the Kind of Food—The Intellect Should Be First and Last the Director, Guide and Protector of the Body—The Seed, the Final Strength of Man, Animal and Vegetable—The Ultimate Potential Energy of Man's Being Is the Seed of Man—The Strongest and Deepest Passion in Man—Reading the Thoughts of Men—The Sperm of Male and Germ of Female the Veritable Essence of Mirthful Health and Joyful Mortal Life—One of the Most Weighty Matters of the Law of Life—The Sex-Essence the Greatest Power for Good or Evil in the Universe—"The Redemption of Our Body"—Droll, Ludicrous and Ridiculous!—Desire for Lower or Higher Life, Which?—"The Hidden Manna"—The Looms of God and the Mystic Web (Poem)

17-38

CHAPTER C

THE LAW OF SUBSTITUTION, ASPIRATION AND REITERATION—THE ONLY LAW BY WHICH LIFE-WASTING ACTS AND SENSUAL HAUNTING THOUGHTS CAN BE CONQUERED

A Ray of Light, a Fountain of Life and a Gold Mine of Joy—Fourteen All-Important Suggestions—Derivation and Definition of the Term Substitution, Aspiration and Reiteration—Their Depth of Meaning—Eighteen Indispensable Points of How to Apply to Oneself the Law of Substitution—A Testimony—The Science of Memorizing—Prominent and Deficient Faculties of the Brain—A Colossal Mistake of the School System—Cramming and Its Bad Effects—The Importance of Physiology, Phrenology, Chiromy or Chirosophy, Biology and Astrology—Cramming, a Method of the Middle Ages—What the Science of Memorizing Is, and What It Is Not—Master and Mistress of the Microcosm—Intellect, Will and Education—The Blessing of Forgetfulness—Thirty Examples of Substitution, Aspiration and Reiteration, with Important Comments—The Triumphant Song of Moses and the Children of Israel—Be Vigilant; Substitute Good for Evil; Repeat It O'er and O'er (Poem)

39-60

ADDENDUM I

Dr. Eliot's Prediction of a New Religion, and the "Strike" of Archbishop Ryan at the "New Religion," with Comments Preceding Both Clippings—The Etymological Significance of the Word "Religion," and What It Implies

60-62

ADDENDUM II

Rev. Dr. Goodson Declares "Religion a Failure"—Why We Differ With Him—What the Term "Religion" Implies—Rise and Fall of the Church in Every Age of the World's History in Correspondence with the Rise and Fall of Nations and Virtuals

63-64

ADDENDUM III

Rev. Dr. Stanley Declares Christianity Unfit for the Far East—Missionaries Advance Agents of Armies

64-65

ADDENDUM IV AND V

Prof. Larkin Finds Religion Threadbare and Suggests to "Throw Religion Out of the Churches"

65-66

ADDENDUM VI

Dr. Bushnell Announces, "Pauperism and Crime Annually Cost Six Millions" in America

66-67

ADDENDUM VII AND VIII

Dr. T. H. Kellogg Says, "We Will All Be Crazy By and By," Unless Mode of Living Changes

67-72

A Moral Diet is the foundation to perpetual health, morality and all reform

"Trophotherapeutics" is the art of curing diseases with natural specific food." (in Nature's own way) without the use of dangerous drugs.

Unfired Food and Tropho-Therapy

— BY DREWS —

A Text Book For Nurses, Physicians, Students and Mothers

It is a book embracing five volumes in one. It contains 325 pages, bound in black cloth and stamped in white foil. It is illustrated with 30 halftones and some etchings. Price \$2.00.

PART INTRODUCTORY

The matter under this head points out the snares and delusions in the present, disease breeding, system of diet and introduces a natural disease-preventing and disease-curing diet.

PART I.

UNFIRED FOOD contains 360 recipes for preparing and combining health perpetuating food in such a way as to make it most palatable, delicious, satiating and artistically dainty. It covers drinks, soups, salads, brawn-foods, cakes, pies and confections. This is the first book giving recipes for uncooked soups, flower salads and unfired pies and wedding cake.

PART II.

MATERIA ALIMENTARIA treats on the healing properties and medicinal value of wholesome specific foods. It contains all the American food analyses and European organic salt analyses published to date. The many simplified tables which classify food into specific remedies are most valuable and the first of their kind.

PART III.

TROPHOTHERAPY (Natural Food Cure) and Prophylactic (preventive)-Feeding, treats on the cause, cure and prevention of all common diseases. It tells how to remove the cause of disease, how to help Nature to re-establish health and how to perpetuate health by feeding on NATURE'S PANACEAN FOODS. It also contains a diagram for diagnosing diseases from the iris of the eye.

PART IV.

PROMISCUOUS SUBJECTS treats on hygienics, the value of sunshine, fresh air, breathing exercise, felicity and serenity of mind, fasting, social dinners, effects of food on morality, refinements and beauty, commercial foods, dairy products, infant feeding and drugs—drugs the cause of chronic diseases.

PART V.

ALIMENTARY BOTANY. Under this head 200 natural foods are described with reference to source, value, wholesomeness, flavor, use and preparation. This covers fruits, esculent flowers, herbs, roots, nuts, cereals, and legumes. This department ends with Cottage Garden Culture and a diagram with directions for an economical arrangement of a city garden.

This book is absolutely original in the style of its recipes. The ingredients of each recipe are arranged in a left marginal, bold faced column. A glance at this column tells you what you want and saves you the time of re-reading, underscoring and memorizing. Each recipe is provided with a column of weights to insure perfect results and save waste of material. This feature will be appreciated most by schools of Domestic Economy. You would be surprised if I told you how few utensils are required for the preparation of Natural food.

If you are interested in "Return to Nature" you cannot do without this book. It teaches the only moral diet known to science and is the most complete Nature Cure food book in print. There is no disease for those who feed on unfired food and the sick will get well by it. Unfired food is the foundation to all reform. If you will try it honestly for six months you will eat no more cooked food.

This is the first Food Book which treats on Trophotherapeutics (curative feeding).

SIDNEY C. TAPP, Ph. B., Kansas City, Mo.

Rational Fasting

Regeneration Diet and Natural Cure for all Diseases.

By ARNOLD EHRET

Synopsis of contents:

- I. *The common fundamental cause of diseases.*
- II. *Remedies for the removal of the common fundamental cause of disease and the prevention of their reoccurrence.*
- III. *The fundamental cause of growing old and ugly, of the falling out and getting gray of the hair.*
- IV. *Death.*

THIS is a severely scientific treatise on the rationale of fasting. The argument goes directly to the point and shows how the chronic stuffing of the body mucus-generating foods is the prime cause of disease, premature old age, and death.

Our author declares that disease is nothing else but a clogging-up of the smaller blood vessels, the arterioles and capillaries by mucus, by effete food-products. This clogging up leads to decomposition, to fermentation of the dead matter, that is nature's effort to rid the system of wholly offensive and boiled-dead food products. These decay partially in the living body, causing abscesses, cancer, tuberculosis, syphilis, lupus, etc. The decomposed material gives birth to microbes that are not the cause but the product of decomposition. They are only discernible in an advanced stage of the disease, and by their excretions, called toxins, they also poison surrounding tissues. The prescribed remedy for this state of things is to fast entirely from food, for a long or short period, according to the vitality of the faster.

The energy of the system when not engaged in digesting food attacks the decomposing mucus, slime, or paste, that over-indulgence in food stores up in the system, and cleanses the body from the offensive material.

Mr. Ehret declares war not merely on meat and alcohol, but on cereal and white flour products, being a fruitarian. Walnuts, figs, dates, oranges, bananas, do not generate in the system floral and faunal fermentive slimes and pastes that so readily decompose and produce death dealing diseases. Nobody who values health can afford to overlook this splendid pamphlet that discloses the natural cure for all diseases.

Price, postpaid, 50 cents.

Lords of Ourselves

By EDWARD EARLE PURINTON

Price, cloth, postpaid,
\$2.10; paper, \$1.50.

THE author calls this book "A chart of life on earth for souls that dare." It is a compendium of naturopathic philosophy spiced with curious, quaint and even contradictory views of life. His style is a compound of Whitman's elemental looseness, Oscar Wilde's biting sarcasm and sex-searching aphorisms, with a vocabulary that gets intoxicated with its own verbosity. He conducts a dissertation on thirteen different topics, to wit: Naturism, Humanism, Sleep, Travel, Play, Study, Stoicism, Romanticism, Prayer, Service, Music, Silence. These are the qualities necessary for those who dare be themselves and are commented upon by one that has a true wanderlust for exploring the abnormal, the poetic, the irrational, the musical, the morbid, the primitive, the occult, the beloved and the damned. Those who are Lords of themselves must possess a cosmic consciousness and are thrilled by a Bowery audience, rapturous harmony, or transportation to a distant star. Nothing is too bizarre, too far-fetched, or too unconventional for our author's philosophy. He is always looking for an opportunity to give conventionality a black eye. Boiled down to a phrase, his theme is Love and Life and his dissertations thereon are Purintonesque to the highest degree. Beyond this, nothing more can be said. Here and there, scattered through his pages are very rational views on health, food, sleep, baths, etc., proving our author is strongly in favor of a "Return to Nature" for physically and mentally distressed humanity.

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

What Medicine Knows and Does Not Know About Rheumatism

Its true Nature, Cause and Cure. A Comparative Study of the Essential Doctrines and Practices of the Various Modern Schools and Modern Methods of Healing. For the Promotion of Medical Freedom and Public Health.

By A. A. Erz, *Physiatric Practitioner*

THE author states that rheumatism is due to some imperfection in the supply of the nutritive elements required in assimilation and elimination by the system, which produces a condition of malnutrition and consequent retention of certain waste products amounting to auto-intoxication, or self-poisoning in some degree. He is assured that in these days of modern ways of living, life has become a complexity, and simple natural living is a lost art. So diet indiscretion and perverted habits of living, thinking, eating, breathing, exercising, drugging are responsible for rheumatism in common with many other disorders, and all contrary medical theorizing is nonsense, and a waste of time and effort.

The medical doctrinaires assert that "The infective agent upon which rheumatism is dependent, is unknown," that, "The bacteriology of the disease is still under discussion," and in spite of this confessed ignorance of the disease, pretend to deal therewith as though every fact connected therewith was established beyond a doubt.

Professor Erz gives a rational analysis of this ailment and shows that uric acid alone is not its cause. He points out that there are also abnormal accumulations of other poisonous acids found in the system during the disease. The fact that the saliva, perspiration and urine are highly acid indicates a state of general acidity of the serous secretions and the excretions which is evidently due to the lack of sodium, iron, lime and magnesium. There is also a lack of oxygen supply through faulty breathing, and a lack of constructive and eliminative minerals in the diet. These facts account for the general state of abnormal acidity of the system as a consequence of the retention of waste matter.

The author's analysis of rheumatism is given in extreme detail, and his remedy therefor is a splendid panacea, and is strictly in accord with the philosophy of drugless healing. Of course our readers cannot expect us to do our author the injustice of describing same, but the small price of the pamphlet will deter nobody from learning all about this most rational cure. The author gives an explanation of the science and art of rational healing in the same pamphlet.

Boll Weevil, or The Laws Governing Nature and Mankind

The Foundation of Rational, Cultural Life. A New Doctrine of Life and Healing for the thorough, basic and permanent cure of Plants, Animals, and Men, which have their origin in the degeneration of the blood and of the Humors. The new Agriculture and new Natural Horticulture

By Prof. Alexander Riggs

AS the orthodox boll weevil is the parasitic enemy of the cotton plant, so also the medical treatment of all human maladies is the destructive agent of physical and mental health. This is the thesis of the present work. The author regards the doctrine of medicine as a doctrine of delusion, and that it is a fundamental cause of human distress. He also regards the widespread use of devitalized foods, of foodstuffs deliberately defrauded of their mineral constituents, of their precious vitamins, as a prime cause of dis-

treass and disease.

¶ As the cotton plant, when grown on soil devoid of the proper fertilizing conditions, becomes a choice victim of the boll-weevil, so also the human organism deprived of its energy and vitality by means of impoverished foodstuffs, and illusive, mendacious serums, vaccines and inoculations concocted by savage cruelty to animal life, in mysterious secrecy, has its own form of boll weevil that must be destroyed by a strenuous campaign for proper food and the strangling of the octopus of official medicine.

¶ Our author points out the serious scarcity of low-priced, wholesome foods that will supply the organism with the most valuable nutritive salts, or blood builders. He shows that the lack of such salts causes a thickening of the blood that shows itself in ulcers, and many other ailments, besides a lack of energy and will power, and a predisposition to the attacks of microbes of all kinds.

¶ The work is a book of 150 pages in which the author dilates on the parasitic evils that prey on plants, animals, and men and is largely illustrated with pictures of boll weevils and insects that are mistaken for such parasites.

¶ Our author fears for the downfall of American industrial and commercial life in the near future as a result of the increasing impoverishment of farm products not supplied with proper natural fertilizers. The boll weevils of the cotton belt are the prophets of our degeneracy. In a patriotic attempt to stem such a disaster the author has prepared a medicament called Hygeia or Lava Tea, which contains all the nutritive salts that are lacking, or have been extracted from natural foodstuffs properly charged with such salts.

¶ The moral of the book is to live the natural life, eat only such vegetable foods as have not been boll weevilized by lack of their vital mineral qualities, whether by unscientific culture, or denaturing processes of manufacture. Visit natural cure resorts where drugless physicians make it their business to supply their patients with food and treatment carefully and skilfully co-ordinated to the needs of the individual.

Price in paper cover, postpaid, \$1.10.

The Secret of Health and Disease. The Greatest Discovery of the Age. A Cure for all "Incurable" Diseases—by the same author, 28 cents, postpaid. The two books together, postpaid, \$1.30.

THIRTY-THREE YEARS' EXPERIENCE

MILK DIET

As a Remedy for Chronic Disease

Sixth Edition, 286 pages

By **CHARLES SANFORD PORTER, M. D.**
Long Beach, Cal.

\$2.00, POSTPAID

One of the most valuable books that a Drugless Practitioner can have in treating Anemia, Constipation, High and Low Blood Pressure, Dropsy, Kidney Disease, Gallstones, and Ulceration of Stomach and Intestines.

Letters of advice, in difficult cases, \$1.00.
Write for diagnosis blank.

MALT-COFFEE

Finest quality Montana barley, selected with great care and malted during eight days in our sanitary factory. The beverage prepared from our malt is a pure, unadulterated malt extract of the highest nutritive value and contains about 70 per cent. malt extract. Shipped in strong, airtight packages (10, 25, 50 and 100 lbs.) at 8c per lb., f. o. b. Milwaukee. The freight for 100 lbs. is the same as for 25 lbs. Persons suffering from nervousness, stomach or liver complaint should drink our malt, which is highly recommended by leading physicians. It is not the same as roasted barley or roasted malt. Roasted barley contains no malt extract. **SAMPLE and CIRCULARS FREE.**

THE MILK CURE

By Philip Karell, M. D.

AMID the allurements of a thousand remedies (so-called) for disease, the milk cure takes high rank as a source of nutrition where the system refuses to assimilate any other form of diet. Dr. Karell in this pamphlet assures us that by means of an exclusive milk regimen, he has had the most gratifying success. He describes in full his method of treatment in many well-defined diseases.

He analyses milk, showing its composition of water, fat, albumen, sugar and mineral salts, making it a perfect food. By reason of the fact that digested milk leaves little residue, and contains little fat, it produces constipation in many people, which is corrected by swallowing a few tablespoonfuls of bran saturated in milk per day and eating boiled prunes and apples, with, or without, the assistance of an enema.

Dr. Karell has studied the milk cure from the standpoint of scientific feeding and tells us that milk is both diuretic and sudorific and therefore hastens to remove the fluids of the body, since poisons are secreted by the urine and in perspiration this effect is anti-poisonous. These poisons are mostly acids and the great efficacy of milk in general, results from its being an alkaline fluid of strong anti-acid power. Another fact is that milk renders the blood more alkaline, and the more free from acid the blood becomes, the more the body becomes resistant to the inroads of disease.

He points out that great care must be exercised to obtain milk from cows living in the open and not in stables, so that their milk will not sour readily. Good milk is neutral and does not react to testing, that is, it will neither redden blue litmus paper, nor make the red one blue. If milk reddens blue litmus paper it reacts sour, and therefore cannot be anti-acid, diuretic and sudorific, and anti-poisonous.

This is the most important analysis of the milk cure.

Price in paper, prepaid, 50 cents.

THE LATEST BOOK ON PHYSICAL THERAPEUTICS

"A Treatise on Medical Practice"

By Otto Juettner, M. D.

This new work is based on the Principles and Therapeutic applications of the Physical Modes and Methods of Treatment. (Non-Medicinal Therapy). With explanatory notes concerning the nature and technic of the different physical agents and methods employed.

The author's previous books were popular, ran through several editions and are out of print. This very comprehensive work embodies the results of a life's study and research. It is practical, up-to-date, and a positive addition to the armamentaria of the progressive practitioner. All physical methods of treatment.

Hydro-therapy, Electro-therapy, Radiology, Thermo-therapy, Vibration, Mechano-therapy, Light, Suggestion, Dietetics, Zone-therapy, etc., etc.

Cloth, 520 pages.

Price, delivered, \$5.00

WE GUARANTEE RESULTS

Why be miserable when you can be happy? Why be a miserable nobody when health is easily within your reach? Scores of happy, healthy people living in nearly every state of the Union owe their present good health to a stay at our Health Home. Many of them were seriously ill, a great many were skeptical as to Results—but in a short time they were convinced that they were at last on the road to health. If you are acutely or chronically ill, we can Cure You. By our Drugless Methods, Biliousness, Constipation, Catarrh, Nervousness, Indigestion, Obesity, Emaciation, Headache, Insomnia, Kidney, Liver, Stomach and Sexual Diseases, Rheumatism, General Weakness, are substituted by perfect health, increased vitality and the knowledge of how to retain what you have regained. We use only genuine Physical Culture Methods as Hydrotherapy, Curative Gymnastics, Massage, Steam Baths, Fasting, Milk Diet, Vegetarian and Special Diets, Outdoor Cures, Sun Baths, etc. Write for free booklet today. SCIENTIFIC PARENTHOOD

THE PERFECT CHILD

A COMPLETE COURSE IN EUGENICS

By WILLIAM WALKER ATKINSON

The result of the investigation of world's greatest scientists. This course contains the very essence of what science teaches on the various subjects as well as the practical results secured by countless fathers and mothers. Nothing given is vague or impractical.

It acquaints you with the scientific principles of the Anatomy and Physiology of Sex; Mating and Marrying; Marital Relations; Preparation for Parenthood; Pre-Natal Culture; Gestation; Care of Mother and Babe; the Well-Born Child; the Culture of the Child; the Physiology of the Child; Mind and Character Building of the Child; What Children Should Know and How to Teach Them; the Problems of Babyhood, Childhood, Youth and Adolescence and How to Meet Them; What the Young Man or Woman Contemplating Marriage Should Know; and every allied subject.

Plain, practical, sensible information regarding the sexual physiological organism and its functions, its laws, its uses. 8 Complete Lessons 35c. each, or \$1.75 postpaid; with year's subscription to NATUROPATH \$2.75

CLASSIFIED LIST OF GENERAL MEDICAL WORKS

WE publish the following carefully-prepared list of general medical works, which, while containing many standard books on such sciences as anatomy, physiology, chemistry, histology, physics, psychology, etc., also contains a presentation of the entire medical procedures of allopathy and homeopathy and much that is essentially naturopathy. The facts therein contained are all that is at present known of medical science, and constitute the larger part of a medical education.

No medical practitioner, whatever school he may belong to, can achieve professional success without a living knowledge of the contents of this library of medical lore. No real progress can be made by the physician without having one foot firmly planted on this wealth of medical philosophy, from which point of vantage another stride can be made into the unknown.

The raison d'être of naturopathy is to supplement this rich expression of medical fact and theory with its more advanced ideas as to the treatment of disease, and this fact makes this Directory as a whole a perfect exponent of the great art of healing. We give elsewhere a full list of medical works of a specifically naturopathic character, both lists forming a complete library of healing, such as is not to be found in any other published index of medical writings.

Every public library, and, for that matter, every private library, should possess all of the works herein tabulated, if one can afford to purchase them. All, or any of these valuable books can be purchased, postpaid, at the prices given.

THE ADVANTAGES OF RAW FOOD

By JULIAN P. THOMAS, M. D.

THE book is a reproduction of an address delivered before the Physical Culture Association of America by Dr. Thomas, its President. Many questions were asked the lecturer by the audience on all phases of physiology and nutrition, and the lecturer's replies were apt and very illuminating.

The point made by Dr. Thomas is that fire changes food from a living to a dead thing, and that the dead material entering the circulation settles in the joints, tissues and nerves, contracting and hardening them. This process continues until the walls of the arteries and veins are so hardened that the blood cells cannot get through them to nourish the ultimate parts of the body; therefore, chronic starvation occurs in every tissue of the body. Besides, the secretions retained by the inability of the unfed organs to eliminate them gradually poison the entire organism.

The proof of the pudding is in the eating. Dr. Thomas proved by the statements of many of his patients who were present, that his raw food diet had worked wonders with them. One man stated that he had gained thirty pounds in a short time by living on raw food, and had immensely improved his vital force. Another confessed that he had gained sixty pounds, and his employer increased his salary according to his weight.

Dr. Thomas has made out an unanswerable argument in favor of living on natural, uncooked food. All who wish to get rid of dead organic matter that has been accumulated in their systems, of mucus, uric acid, germs, bile, accumulated fat, chalky deposits, fermenting acids and gases, should read this book, so as to adopt a method of increasing his vital forces, as the only method of getting freedom from disease.

"The Advantages of Raw Food" is certainly a valuable book.

Price, in cloth, postpaid, \$1.50

THE NATURE CURE PUBLISHING CO., BUTLER, N. J.

Dr. Thomas argues that animals which subsist on raw food live from five to seven times as long as they require to develop, while man, living on cooked food, scarcely lives more than three times his period of development.

Dr. Thomas' theory is that cooking destroys vital cells intended to replace the cells that wear out in ministering to the activities of the body; they fill the consumer with vitality, and the system with disease and later cause death.

Of course, these rules are varied to suit each individual case, as dictated by a wide experience with such treatments, but the result invariably transforms a weak, unfed creature to a man or woman full of spirit and energy.

He first cleans out their systems, and then administers a bountiful supply of raw food, sufficient rest, exercise and fresh air. Combined, they effect a natural source of cure, producing, as a result, health.

MAL-ASSIMILATION AND ITS COMPLICATIONS

By JULIAN P. THOMAS, M. D.

THIS book is a record of discussions at six clinics, held at Dr. Thomas' Institute, to discuss the best method of keeping the body in good health. The personnel of the clinic included Dr. Thomas, the celebrated raw food expert; Dr. Jackson, a mental scientist; Dr. Smith, a family physician; Dr. Gilbert, a surgeon; and Dr. Jones, an osteopath, all of whom express their ideas freely regarding the arguments advanced.

The chances are that the condition of the reader is described and considered from various points of view, especially if mal-assimilation and lack of appetite be his trouble. Various patients appear before the clinic suffering from neurasthenia, constipation, heart trouble, insomnia, who are tired, despondent, anaemic, and thoroughly disgusted with life.

They have tried all kinds of drugs, have traveled and visited various mineral springs, have been adherents of Christian Science, Mental Science, and other forms of Faith Cure without relief. The various physicians prescribe different remedies, but Dr. Thomas conducts his method of cure on several of the patients right before their eyes.

His rules of health are thus summarized: 1. Fast, and eat nothing until your desire for food returns. 2. Drink plenty of water, quarts of it, if possible, at a sitting. 3. Take a daily bath, either a shower or a sitz bath, every morning. 4. Take deep breathing exercises. 5. Take light exercise for an hour, or walk five miles a day. Eat several cakes of unfired food at each meal. 6. Drink two or more quarts of milk per day.

This is the object of the book, which is full of vital information regarding the way to secure abounding health.

BOOKS ON NATURE CURE

RETURN TO NATURE. *By Adolf Just*—

Among the long list of naturopathic literature issued of late years from the press, this work stands out conspicuously as a star of the first magnitude in the naturopathic heavens. The author is known throughout the whole world as a pioneer of the simple life, a great-hearted humanitarian, at whose celebrated institution of Yungborn, in the Hartz Mountains in Germany, thousands of ailing mankind have been regenerated physically and morally by reason of living in intimate communion with Nature. This work is a modern amplification of the parable of the Prodigal Son, who after leaving a happy home, spent health and fortune in indulging in an artificial life amid the abodes of sin until, when despairing of life itself, he rose in a frenzy of pain and remorse and resolved to return to father Nature, whom he had scorned for many years. Our author recounts in simple language how man may return to health and vigor after having deviated from a natural life by false modes of life, false foods, false stimulants, and the cares and worries of life, by employing natural methods of healing, eschewing all drugs and many disastrous sophistications of civilized life. Not only does he employ the physical forces of nature in his ministrations to sick humanity, but Herr Just, with a just appreciation of man's most vital needs, claims that the true nature-cure system, penetrates with its healing power the innermost recesses of body, mind and soul. Recognizing the value of man being released from vice and crime, hatred and envy and charged with the marvelous healing effects of peace, joy and brotherly love, the author has interwoven with his philosophy of natural healing copious dissertations on the moral and spiritual philosophy of the Bible, the whole forming a unique volume of 300 pages, pregnant with healing truths.

There is a supplement describing the American Yungborn, founded by Dr. Benedict Lust at Butler, N. J., in the midst of the Ramapo Hills, some 38 miles from New York. Here, after its prototype in the Hartz Mountains of Germany, is located a center of healing power where Nature heals the sick and the semi-invalid with her refreshing and strengthening influences.—**Price, in cloth, postpaid, \$3.20; paper cover, \$2.00.**

A MESSAGE TO ALL DRUGLESS HEALING SYSTEMS AND A REMINDER. *By A. A. Erz, D. C.*—

Dr. Erz urges upon the different systems of drugless healing the importance of uniting all organizations of such practitioners into one central federation in order to obtain just laws, giving all approved methods of healing equal rights, with special privileges to none. He warns against making any compact with official medicine on the part of naturopaths, citing the case of a recent "backyard" compromise recently made with a few drugless practitioners who surrendered the right to welcome any new schools of drugless healing, and even agreed to join the allopaths in hunting down the adherents of such schools, in return for allopathic recognition. As a result the doctor's trust has now forced the drugless practitioners, who are in alliance therewith, to fight a bill of the independent practitioners which aims to provide two distinct boards of examiners, one for the drug doctors and one for the drugless doctors. What a dishonorable position to occupy in which the physiotherapists are compelled to fight their own school of healing!—**Price 15 cents.**

BACK TO NATURE AND TO NATURE'S GOD. *By Rev. Ferdinand Stierle*—

The author of this naturopathic tract is enamored of Just's book "Return of Nature," and is a fervent apostle of the natural life and natural methods of healing. The return to Nature presupposes a departure from Nature, and our author very clearly shows that men who in the beginning subsisted on ripe fruits and nuts and lived a natural life in company with light, warmth of the sun, air, rain, and streams, in a more or less nude state, soon sought out methods of gratifying desires, and indulged in an artificial mode of life, eating of the forbidden fruit of animal flesh, drinking intoxicating liquors, living according to their own desires and inclinations, so that instead of getting health, joy, peace and happiness, they only got sickness, discontent, sin, misery, yea a hell on earth. Mr. Stierle advocates the natural bath, that is to say, a bath of the pelvic region only, the rain bath and even the snow bath. He defines the proper application of light and air, wet earth and earth baths, and proper food and clothing, if the sick would be cured and disease prevented. **Price, postpaid, 20 cents.**

DEFYING DISEASE AND POVERTY

THE CARE OF CHILDREN IN SICKNESS AND IN HEALTH. *By Sebastian Kneipp.*

When one thinks of the danger of disease and death to which innocent children are subject, who inherit pain and misery by simply being born into a world so beautiful, but that conceals so much sorrow, a book like this, by that great apostle of hydropathy, Father Kneipp, that tells how children should be fed and cared for so as to reduce their liability to disease to a minimum, and then when they are actually sick, how his nature-cures come to the relief of the little sufferers without the use of poisonous drugs, is simply invaluable. In this book, parents are advised how to take care of themselves so as to produce eugenic babies. Advice is given for the care of children from birth to teething, from teething to school days, and for children during the school age. Every possible disease peculiar to childhood has its appropriate natural remedy fully described. A bill of fare for children is also included in the work. It is an indispensable guide for the proper conduct of children, and is therefore recommended as a household necessity.—Price, postpaid, bound in stiff paper covers, 55 cents; in cloth, \$1.00.

THE NEW PARADISE OF HEALTH: THE ONLY TRUE NATURAL METHOD OF HEALING AND LIVING.

By Adolf Just.—This is a dissertation of how man may be energized and healed of his many infirmities by a return to nature in the form of baths, by reveling in air and light, by employing applications of earth to the body, by eating unfired foods; in a word, sick humanity must return to the woods and live again as Adam did in the long ago, and, under the green canopy of leaves, or out in the sunshine, frequent the flowery meads and flashing streams. The Yungborn is no infirmary, hospital or medical sanitarium, in the ordinary sense of the word, but is a kind of recreation home with an opportunity for a true natural method of living and winning health and vigor, and where the preservation of health is taught. The pamphlet is a condensation of Herr Just's larger work noticed elsewhere and insists on the necessity of obeying the laws of nature. The methods of doing so, when fully employed, result in eliminating the poisons from food products, and the debris of worn-out tissues that the organs of the body are too weak to do, under artificial and false methods of life, hence the abundant joy of life, the elasticity, the elan of youth, the intense physical and mental happiness that follows the life prescribed by Doctor Just, or Doctor Lust, either at the Yungborn of Germany, or the Yungborn of Butler, New Jersey.—Price, postpaid, 25 cents.

THE DIFFERENCE BETWEEN CHRISTIAN SCIENCE AND MENTAL SCIENCE. *By Helen Wilmans Post.*

This pamphlet is a polemic for Mental Science as opposed to Christian Science. It is a report of a lecture delivered before the International Scientific Association by Helen Wilmans Post, at Seabreeze, Fla., in 1902, in which she hits the new creed many hard blows. She shows that it refuses the idea of personal God and substitutes therefor universal principle of life and intelligence, yet at the same time attributes the masculine sex to this principle. Jesus, therefore, cannot be the son of such an intangible entity, and is only a man, "a wayshower" for humanity, as proclaimed by the late Mrs. Eddy. She attacks the absurd doctrine that matter is non-existent, and shows that Christian Science cures disease, whether there is any disease or not; it heals bodies even if bodies have no existence. It is not a science, for it shuts off the power of thought and denies the use of the reasoning faculties, the use of which science imperiously demands.

Mental Science, on the contrary, is the science of mental unfoldment of intellectual growth. It bases its hope of man's ultimate and perfect redemption from all the ills of life, including disease, old age, poverty and death, upon man's ability to acquire knowledge through the deductions of his reasoning powers, acting on his experiences. Man's brain is the instrumentality by which he effects his salvation, which refers to being saved from the ills of the body, and not from the wrath to come, which, according to Mental Science, has no existence.

This new philosophy is not a religion, but a subjecting of everything to the control and judgment of reason. All religions are thus accepted or discarded.

Mental Science is one with Christian Science so far as it regards God as a mere principle; it is one with theosophy when that cult says man is a god; it is one with spiritualism when that cult says man is his own redeemer.

This pamphlet will be found very stimulating to philosophic thought.—Price, prepaid, 25 cents.

HEALTH and the BODILY FUNCTIONS

WHAT CONSTITUTES THE TRUE SCIENCE AND ART OF HEALING? *By A. A. Erz, D. C.*

—The modern return to the principle enunciated by Hippocrates that "Nature is the Healer," is the theme of this brochure. Dr. Erz traces the rise of the natural healing system in Germany, giving credit to Priessnitz, Schroth, Kuhne, Knipp, Bilz, etc., to Ling of Sweden, and to Doctors Trall, Graham, Kellogg, Page, Lust, Palmer, Still, McFadden, McCormick, Lahn, Davis, Lindlahr and others in the United States. In various ways they avail themselves of the curative energy of the Sun, Air, Light, Water, Massage, Earth Cure, Curative gymnastics, Electricity, Diet, Exercise, etc. As an outline of the philosophy of natural healing; as an explanation of the elementary remedial forces of nature; as a mentor for the proper study and practice of natural healing; as a seal on practices that have stood the test of time and have received the approbation of science; as a plea for the urgent need of a great Academy of Natural Healing; as the most desirable factor in the regeneration of the race, and as polemic for medical freedom, this essay should be in the hands of all Health and Truth Seekers, and every practitioner of Naturopathy. **Price, 50 cents.**

YOUR MEMORY—ITS FUNCTIONS, EXERCISE AND TRAINING. *By M. N. Bunker, D. C.*

—To various definitions of memory the author declares that attention is the one thing that makes the mental picture, or record, complete. The degree of concentration of attention on a given subject denotes the ease, or difficulty, with which any record may be later recalled, or recollected. Attention is either voluntary or involuntary. Voluntary attention is produced by the exercise of the will power. Involuntary attention necessitates no exercise of the will power, but depends entirely on curiosity or interest. The author also shows the vital need of association, either of similarity, or dissimilarity, in memorizing facts of any kind. He defines a process of training the memory and shows how necessary it is for the eye to see and ear to hear, so that when one has seen a picture, or heard a story he can reproduce the impressions in all their freshness. The author shows that the condition of the body has much to do with the workings of the mind and that a worn out body, physically, reacts to the detriment of the mind, while a prime physical condition renders the mind much more effective.—**Price, 50 cents.**

THE SECRET OF HEALTH AND DISEASE; THE GREATEST DISCOVERY OF THE AGE. *By John J. Ruegg, Counselor of Health, Food Specialist and Polaripathist*

—This pamphlet is devoted to a consideration of a new science of healing which the author explains is an application of the curative forces of nature in accordance with "the polaric, or unifying curative system." The curative forces of nature are those already well-known to our readers, but our author states that inasmuch as the nutrition of men, animals, and plants is only perfect when in accordance with the laws of polaric circulation, hence he calls his new and improved system of healing for both body and mind, the polaric system of healing, or Polaripathy. Polaripathy is a method of curing disease according to the laws of magnetic attraction and repulsion, secured by altering the acidity, or alkalinity of the blood by medicated hydropathic applications and baths of various kinds, of which many illustrations are given. The blood is fluid life and as such it is the sustaining substratum of all the polaric reciprocal processes on which our life is built up.—**Price, 30 cents.**

NO MORE SYPHILIS. *By Dr. Emil Mayer*

—Dr. Mayer contrasts the old method of treating syphilis, which relies on drug poisoning and undermines the health of the individual, with his own discovery which completely cures the ailment by natural means in the primary stage, thus saving the patient the second and tertiary stages, that are created by medical criminology and quackery, and result in hundreds of thousands of deaths yearly. Here is a pamphlet that every sufferer from syphilis should be in possession of. He will learn not only how deadly the disease is for himself but how it is transmitted to posterity, how murderous it is to his own offspring.—**Price, 20 cents.**

REINHOLD'S NATURE CURE BOOKLETS

The late Dr. A. F. Reinhold, who conducted a Naturopathic Sanitarium in New York City some years ago, was not only a highly successful drugless practitioner, but was the author of 37 different books and booklets on disease as conquered by the Nature Cure, all stating in the clearest terms the rationale of how to cure the various diseases referred to. As a whole, the various manuals regard disease, no matter how different its manifestations, as primarily a single ailment, consisting of abnormal material fermenting in the organism, which it ought to be the prime purpose of the physician to eradicate.

Dr. Reinhold made a deep study of his subject and was an enthusiastic disciple of Priessnitz, Kuhne and Kneipp, who worked wonders in Natural Healing, particularly in hydrotherapy, and has gone his teachers one better by improvements on their methods.

The very core of his philosophy is that all disease is caused by a fermentation of said poisonous matter in the blood and tissues, and he devoted all his energies to removing such matter from the system. The efficacy of his work, applied with skill and experience, fully justified his great reputation as a physician, and led to such a demand for his writings, that at his demise, only a few hundred copies of but seven of his pamphlets remained to his estate, a description of which we give as follows:

POSITIVE PREVENTION AND CURE OF TUBERCULOSIS, OR THE RESTORATION OF HEALTH BY NATURAL METHODS—

This is the most important pamphlet of the series and is an exposition of the natural system of curing disease, as opposed to the drugging system. The Natural School seeks to remove the causes of disease, whereas the drugging and inoculating school only seeks to suppress symptoms, and is careless of causes. This latter school does not seem to understand that by suppressing symptoms only, the causes of disease are more firmly rooted in the system, to reappear in fresh manifestations.

Dr. Reinhold extols the virtues of hydropathy, the benefits of massage, and the vitality-raising powers of sunlight, sleep, baths and a rational, vegetarian diet. The pamphlet particularizes those agents that rouse the lungs, skin, kidneys and bowels to increased activity. With the organs of depuration fully at work, a person cannot take a contagious disease, for disease only develops in a system already charged with poisonous products. **This new philosophy is the theme of this booklet, a principle that is shaking the drugging school of cure to its foundations.**

The author points out that not only are those natural forces which were employed by him in the cure of disease, of supreme importance in themselves, but their application is very enjoyable, being in harmony with the feelings of the patient. As a handy manual of Naturopathy, clear and carefully written, it is a most valuable publication. **Price, \$1.00.**

NATURE vs. DRUGS. MEAT DIET INJURIOUS TO MAN—

Dr. Reinhold argues in this pamphlet that, from the physiological structure of the human body, man was intended to be a frugivorous animal, if not wholly a vegetarian. He does not specifically condemn the use of eggs, milk and cheese, but we imagine that he prefers that these animal products should not be indulged in. He contends that if once a civilized nation adopts vegetarian practices, the alcohol and beer shops would, like those of the tobacconist, butcher, poulterer, fishmonger and chemist, have to be shut up.

He considers the Jews, who had grown brutal and degraded, and had lost all higher moral and patriotic aspirations through indulging their appetites in the flesh pots of Egypt, became physically and intellectually superior to their former selves by reason of having had to wander forty years eating manna in the desert.

He quotes a great many testimonies of historians, scholars, travelers and others regarding the vegetable diet. He proves that vegetarians, or meat abjurors should live in a healthful manner. He taboos white bread, sugar and fats, as well as alcoholics, tea and coffee, and refers to the testimonials of physicians in all ages regarding the longevity and physical vigor of those tribes of men who subsist on a vegetable diet. **Price, 25c.**

NATURE vs. DRUGS. HARM FROM OVEREATING—

The author starts this pamphlet by reciting an unpopular, but vital truth, that more people die of surfeiting than of starving. To fill our intestines with rich and artificially concentrated viands, leads to innumerable ailments. In the first place, the body receives more material than it requires and the surplus exists only to be removed by a great expenditure of vital energy on the part of the excretory organs, or if these organs be too weak from overwork, the material remains in the body to poison every function thereof. That this is the case in a vast majority of instances in civilized life, is stating a well-known fact.

The author traces the degeneration of the system through all the steps that receive their initiative in overeating. Not only does the richness and quantity of the food prove agents of disease, but when the food itself has been denatured of its most vital constituents of lime, nitrogen and many organic salts, absolutely necessary to sustain a vigorous health, by the process of milling and cooking, it will be seen how innutritious it becomes. The bran, or external husk of wheat, rice, corn, rye, etc., that contains these vital constituents is wholly removed, to tickle the organs of taste with the flour that contains only the starch of the grain. Besides this, the banishment of bran from the dietary causes destruction of the teeth and bones as well as a degeneration of the tissues. These defects chiefly subject us to contagion and fevers and the tissues being underfed, tear easily, giving rise to hernia, falling of the womb, floating kidneys, apoplexy, etc. It will be seen from the foregoing explanations that mankind is unconsciously engaged in **overeating in quantity and undereating in quality** of his food, and the consequence is a low state of vitality everywhere, and a greatly diminishing size of the human figure.

The moral of the author's indictment of our present habit of overeating is that we should eat all of our food in its natural condition, and such food would keep money in our pockets and the drug administering doctor from our doors.

There is no doubt that the question of food and how it should be partaken of, is only in its infancy. Vegetarianism is no longer a fad, but is now being regarded as the only possible escape for mankind from the thousand alimentary evils that now curse him wherever he goes.

The strongest races of mankind are those which live upon the most simple substances. The ancient Romans conquered the world on a diet of raw wheat and water. If people were only brave enough to sacrifice their appetites for the undeniably delightful flavors of cooked food, and revert to the spartan simplicity of our ancestors as regards diet, we should be infinitely healthier and happier.

Dr. Reinhold quotes the case of a man living well upon less than half a dollar a week. This man's diet consisted in the main of grains, fruits and nuts. He also ate a few vegetables, such as potatoes, beets, cabbages, turnips and parsnips, but found that the cost of the vegetables was three times as much as the grains. He preferred the grains and he indulged in fruit also. With a coffee grinder he was able to reduce wheat, corn and rye to palatable and digestible conditions. He found that a meal of corn flavored with apples prepared in different ways, cost him only one cent.

This goes to show that one can live on a high class of nutritious diet at the most minimum cost, and be richer, healthier, and happier, for the experience.

Price, 25c.

NATURE vs. DRUGS. KIDNEY TROUBLES—

This pamphlet is chapter 22 of a larger work entitled Nature vs. Drugs and refers in particular to kidney troubles, epilepsy, paralysis and contagion.

The pamphlet is an indictment of the drug practitioners who rarely or never think of the causes of disease, but who concentrate their efforts on suppressing the secretion of corrupt matter by the system, while the sooner the body is freed from these encumbrances, the body assumes its natural form.

The plain diet and simple water applications so freely recommended in this and other pamphlets, are sure to be of the highest value in the cure of dropsy, epilepsy, and many contagious diseases.

Kuhne's Facial Diagnosis, which was translated by Dr. Reinhold, indicates not only the cause of the specific ailment under consideration, but which also unerringly indicates the cause of future diseases, is referred to as a guide in attacking disease in general, years in advance.

Here is the pathological situation as outlined in these pamphlets. The drug doctors drive back into the system the disease from which the patient suffers, by attacking the symptoms thereof, hence we can well believe the saying of Billroth that "the progress of medical science is over mountains of corpses."

The Naturopath, without the use of drugs, greatly assists nature in eliminating the poisonous effete matter which gives rise to a specific ailment.

It is a simple fact that when some part of the bodily function is affected, it must be **cured**, and an attempt to cure by unnatural elements generally causes a condition so puzzling, that it is even beyond **natural** cure—and when nature, with its abundance of restorative powers, cannot cure, there is practically **nothing** that can. An ailment must be eliminated, not encouraged.

Which system of treatment most energetically appeals to the reason of the reader—the exhilarating process of Nature, or the experimental tactics of surgery, with its drugs, operations, and consequent fatalities? **Price, 25c.**

PULMONARY CONSUMPTION—In this pamphlet, the author discusses health and disease in the abstract, and then describes tuberculosis as a healing process. Coughing is one of the cleansing processes selected by Nature to purify the system. The cough proves the presence of abnormal material which the system tries to dislodge by the explosive efforts of the lungs to exhale. Loss of appetite is another measure of Nature to get rid of impurities by cutting off the supply of fuel on which the microbes feed. Night sweats are another element of elimination, to prematurely suppress which will endanger the life of the patient. Fever is a cleansing process as it burns out the excess of bad food, and thereby deprives the bacilli of their means of existence. But the fever must be kept within limits to avoid fatal results.

Lack of appetite and fever cause a loss of weight, but a point made by the author, and one that must be carefully noted by the reader, is that the amount of tissues to be formed when appetite returns, depends solely on the quantity of air inhaled. Hence breathe deeply always. **Price, 25c.**

CONSUMPTION CURABLE—This pamphlet describes how tuberculosis can be positively prevented and cured by methods of Natural Healing. The author takes the medical profession to task for its false doctrine that consumption is incurable. Nearly everybody has had tuberculosis at one time or another, a fact that is continually revealed by post-mortem examinations, which disclose the healed scars of former lesions, where Nature in a battle with the disease came out the victor. When one considers the harmful, unnatural and futile methods of treatment of the drugging school, there is justification for its pessimistic doctrines.

The writer advocates, in conjunction with this specific form of treatment, a purely vegetable form of diet, consisting of grain, nuts, fruits and vegetables. It is a satisfactory condition of nature's treatment that it demands nothing which even the poorest cannot provide, and when you compare the complex system of official medicine with the simple curative methods of the Naturopath, we are justified in saying that none of our readers can go astray by securing the information so freely discussed in these valuable pamphlets. **Price, 25c.**

PRINCIPLES OF CURE—This pamphlet refers to the principles of cure regarding disease in general rather than any disease in particular. It shows how the **pain-killers**, that is the drug merchants in the medical profession, are not **pain curers**, as the re-currence of the same pain after it is supposed to have been killed by the drugs is sufficient proof that their ministrations are prescribed on an utterly false basis.

The natural methods of cure are exalted by the author and rightly so, for his argument is that food, air and environment, should be of the proper quality and quantity to reinforce particular treatments for the rejection of effete matter from the diseased organism. Is it not ridiculous beyond conception to suppose that an allopathic physician by means of a few drugs can cure a disease that is brought about, is propagated, and will continue to be propagated, by a starvation diet in a congested tenement where the sleeping rooms never see the light of day! It is futile to attempt to treat diseases while such conditions remain to neutralize curative efforts. It is only the Naturopath that points out this tremendous necessity in the cure of disease, that the environment, as well as the other conditions of health prescribed by them, should be in harmony with Nature's efforts to produce sound bodies. **Price, 25c.**

NOTE—Consequent to the death of Dr. Reinhold, his widow took up her residence in California, and shipped thither all the remaining stock of her husband's books. The particular car on which the books were sent got mixed up in a railroad wreck, and it was eight months before she could recover the books which were finally delivered to her. In the meantime she was obliged to refuse orders for over 300 copies of these books, so great was the demand for them, in some cases five dollars being offered for a publication that sold for only half the price. Mrs. Reinhold has received hundreds of letters praising the books. Dr. A. M. Morrison, a Nature Cure practitioner of Los Angeles, at recent graduation exercises in his school, said that "Dr. Reinhold was one of the bravest and most intellectual souls he had ever met, and he prized his books next to the Bible—without exception."

We take pleasure in announcing that we have purchased all of the stock of Dr. Reinhold's works that has remained in his widow's hands amounting to about 300 copies. There are now no other copies of these books to be obtained anywhere save from ourselves, and this element of rarity enhances their value. No damage has occurred to the contents of any pamphlet, but a certain antique sentiment attaches thereto by reason of the fact that, as these pamphlets will never be republished and have undergone great danger of destruction, they will be prized as Souvenirs of a great Naturopath, worthy of a shrine in the library of every drugless physician.

BOOKS ON MENTAL SCIENCE

We have been fortunate in securing a consignment of rare books on metaphysical subjects by the late Mrs. Helen Wilmans, her late husband C. C. Post, and W. J. Colville, the Astrologer, that were published by the International Scientific Association of Sea Breeze, Fla., the home of Mrs. Wilmans Post since she came into fame as a writer and lecturer on Mental Science. We give a review of the individual books herewith.

THE CONQUEST OF POVERTY. *By Mrs. Helen Wilmans*—

This book is an autobiographical account of how the author rose from abject poverty to wealth by Mental Science. Discovering that thought when positive, is all compelling; but when negative, it has no power, she applied this knowledge in dealing with others and was successful. She came to know that the thing one believes he can do, he **can** do. This produced an opulent frame of mind that favorably impressed every one with whom the author came in contact. She proved that she was as she believed. By degrees she came to know that besides being an economic force, thought is also a healing force.

Thought is the world builder—it builds health as well as wealth. Her husband took sick with consumption. Christian Science was invoked, but its negations could do nothing, and she resolved by the power of positive thought she would not let him die. In that resolution, the movement known throughout the world as Mental Science was born. Her husband recovered, and she began to write a series of lessons on Mental Science and began to grow rich on the fees demanded for such lessons. From Chicago, the author and her husband finally located themselves at Sea Breeze, Fla., where they built a home on the ocean front under stately palms and, later, the Colonnades Hotel. The tide of wealth began to roll into their lives, its source being simply an overmastering desire for money to banish the fear of poverty. The author studied the law of accumulation that governs wealth. The law is to seek steadfastly the kingdom of heaven within us and not primarily wealth, which is simply one of its externals, and as such only dead matter. The weakest man has within him the powers of a god if he only will develop them. Man's innate mental opulence draws to it material opulence, but seek first the righteousness of mental opulence and all other kinds of opulence will be added thereto.

Life carries with it problems without number. One great problem, poverty, cannot be adequately solved if the victim feels constrained to be pessimistic, for without optimism, how can we even hope to gain the better side of life with its munificence!—Price, postpaid, in cloth, \$1.10; paper cover, 75 cents; special cheap paper, 55 cents.

THE LAST ENEMY TO BE OVERCOME IS DEATH.

By Helen Wilmans—The burden of this pamphlet is a startling prophecy that death, physical death, is to be vanquished. The words of Paul, referring to the spiritual death, are taken literally. Vital power is accumulating on the planet; every year adds to the aggregate length of human life. In each generation death retreats a little farther back; in each generation it is hated and dreaded more and more. Vitality is the enemy of death. Vitality overcomes disease. Vitality is life. The author was born with more life than usual. Mental Science is itself a token of the constantly increasing vitality now sweeping through all the avenues of existence, of the personal ability to overcome every form of disease, and even of old age and death.

The professors in the laboratories will not find an elixir of life; the vital power is expressed in thought. This is the faith of the author that the more intelligent in the scale of being a man is, the more deathless he is. It is in the generation of New Thought that the coming vitality expresses itself. The generation of new thought is the generation of new vitality. Medically speaking, the new thought is challenging the old beliefs in the power of disease, old age and death. And these old beliefs are answering—not by argument, not with reason, but with blows, the weapons of ignorance. This method of answering is fatal to themselves; it is exposing their weakness more and more, and is gradually dissipating the power heretofore accorded them in human belief. Their doom is certain. The newer thought of Naturopathy, the belief in the power of Nature's forces, the forces of hydropathy, heliopathy, electropathy, mechanopathy, air, diet, exercise, massage, fasting and sleep, as opposed to the poisonous thoughts of pills and potions, of serums, inoculations and vaccines, poisons deliberately injected into the living tissues, is a mighty truth for the hope of the efficacy of these forces, and a sure prophecy of their fulfilment.—Price, prepaid, 25 cents.

EXPOSITIONS of the IDEAL and REAL

RELATION OF THE IDEAL TO THE AFFAIRS OF LIFE. *By Helen Wilmans Post*—

This second lecture delivered at Sea Breeze, Fla., in 1902, is characterized by the same bold thinking and clearness of expression that prevails in all of the writings of the lecturer. There is no doubt that Mrs. Wilmans has the mind of a man in the body of a woman.

Here she dilates on the divine mystery of the ideal. She shows that "the poet is worshipped because he represents us in our higher aspirations. The poet and artist have always been the great educators of men, it is they that have put the highest and most complete polish upon human character. They disclose your genius by showing you their own."

As delineated by the story of "The Arabian Nights," the getting of wealth and the love of power are ideas on a far higher plane than mere vulgar display of riches. The desire is one of the finest manifestations of man's superb ideality. The method of accumulation may be sordid, but the desire is not. Wealth rightly used gives freedom. Freedom to express one's ideality. Freedom to express the sublime, the beautiful, the painful if need be, and the humorous in life. Like the giant escaping from the bottle of the Egyptian on the sea shore whose form filled the heavens, is the beginning of the development of Man's mighty Ego, and now for the first time in history the human brain begins to keep step with the infinite march of eternity. The unfoldment of the possibilities of the human soul has just begun. The desire for wealth is perfectly legitimate. Wealth means the difference between slavery and freedom. It means the development of the poet and artist, the prophet and philosopher; it means culture, refinement, personal grace and beauty.—Price, postpaid, 25 cents.

THOUGHT TRANSFERENCE AND MENTAL HEALING. *By Helen Wilmans*—

The author claims that thought is an actual substance, generated by the brain. The relation between the brain and the outside world is caused by the operation of self-generated thought, and the brain gets any kind of response it asks for.

The author has very positive opinions about thought-transference, which has been in operation for ages, long before Marconi made a public application by his wonderful invention of wireless telegraphy.

The wonder of thought transmission is just beginning to make itself really felt. Mrs. H. Wilmans, in the present pamphlet, is very earnest about promulgating this truth. She states that from our first imperfect knowledge of thought transmission came all the apparent wonder-working of hypnotism, magic, spiritism, and character reading.

Disease is not an entity; it is only a morbid condition. It is like darkness; let the light in on darkness and it disappears. Let the light of an intelligent understanding of truth in on a disease and it, too, will disappear.

The author believes that there is no limit to the powers of mind. She believes that the power of thought transference is going to enable us to correspond with surrounding planets.—Price, postpaid, 25 cents.

DRIVEN FROM SEA TO SEA. *By C. C. Post*—

A fascinating story, that has already reached its fifty-fifth edition, and is a record of real life representing the encroachments of corporate rapacity, backed by congressional legislation, on the homes and industry of frontiersmen, who with incredible toil had established themselves on the virgin lands of the great West, where they had hoped to live comfortable and independent lives as freemen, and gradually acquire the amenities and refinements of civilization. The actual facts and conditions are those that existed between 1875 and 1885 during the transcontinental railroad building era, and portray corporate robbery, chicanery, legislative bribery, eviction and murder, on the part of the railroad promoters. The principal scenes are laid in the hydraulic mining region of California. Col. Post has taken great pains to establish his facts from newspaper reports, public expressions of noted men on corporate aggression, legislative and judicial corruption, and reproduces facsimiles of railroad passes to legislators for services rendered.

Part II of the book is replete with important data useful to historians, writers, orators, and public men generally who are interested in the history of the period to which the story refers. There is also a reproduction of the celebrated "Huntingdon Letters" which came to light in the trial of the late Collis P. Huntington, railway president and multi-millionaire, at Santa Rosa, California, which at the time created a tremendous sensation because of the disclosures of the methods by which the immense railroad lands were granted.—Price, in paper covers, postpaid, 75 cents.

RESUMÉS OF IMPORTANT SUBJECTS

A SEARCH FOR FREEDOM. *By Helen Wilmans—*

This is an autobiographical account of a woman who searches for freedom from conventionality, from religious superstitions, from marriage, from the grinding drudgery of farm life as known sixty years ago, from everything that would limit or suppress the independence of the **I**, that is to say the **Ego** most concerned.

The author gives a long account of her life as a child, of how she was the nurse of the family, of her experiences at a religious school where she beat one of the teachers and was put into a dark cell for a week. She describes her two offers of marriage which she declined before marrying a doctor who afterwards became a farmer in California, and of the drudgery of cooking for 24 hired men, in addition to other distressing duties.

"Marriage," she says, "is slavery to both husband and wife all the world over. It is only a stepping-stone to the real, the true, the divine marriage. In this higher marriage the sex interchange will continue, but under the control of the intellect." Her statement is cryptic. She gives further light on the subject as follows: "The sex relation is even now in process of evolving to a higher grade than the mere begetting of children—namely—the quickening into active life of a world of vital intelligence, so high, and fine and potent, that we may not now even guess its power."

This is Malthusianism with a vengeance.

She deprecates "ordinary animal marriage." Her husband was a failure as a farmer. She tried to find comfort in religion but got into a discussion with some preachers who frequented her house, who could not assure her that her babies and other peoples' babies would be saved should they die before being able to exercise faith in salvation, and so be lost everlastingly in the tortures of an Orthodox hell. She called them cold-blooded sneaks, satisfied to eat, sleep and wear fine clothes, when nine-tenths of the people are on the down grade, sliding into hell. She told them to get out of the house, and threw their umbrellas, hats and canes out of the door, in advance of their going. It was at this moment that she "got rid of her religion."

We are not endorsing Mrs. Wilmans' emancipation, but simply outlining the story of her life. Her husband, while not at all religious, gave her no sympathy. He simply piled more work upon her. He has discovered a vein of quicksilver and she had now to cook for a gang of miners as well as for the farm hands. He regarded her as a machine to run day and night.

She determined to leave the farm at once. One of her two children was dead and the other away at school. She borrowed ten dollars from a friend and the next day after breakfast she slipped away on the stage for San Francisco, and when there, began the life of a literary free lance, her adventures from this point onwards being recorded in her book entitled "The Conquest of Poverty," the sequel to the present work.

The book must be read to be appreciated. It traces the growth of a soul that has come to realize, rightly or wrongly, that man can work out his own salvation and that Mental Science is the most potent truth we have. Like the theosophists she proclaims that each human body is the temple of a god within.—**Price, pre-paid, in cloth, \$1.60.**

HORIZONINGS. *By Edward E. Purinton—*

A booklet whose alternate pages are devoted to lyric songs in the style of Heine, and philosophic musings, respectively. As to the philosophic musings, they are those of a mystic who now and then comes down from the clouds and touches the firm earth. His affirmations are, to use his own language, "mere psychological pills." The soul correctives. Some of the sayings are cryptic—we wonder if he knows himself what he has said. Others contain a deeper meaning than the author intended. And so it goes. The poems are love lyrics if anything, and are selections from a volume of 77 poems, entitled "The Soul in Silhouette," by Mr. Purinton. They are characterized by great simplicity of thought, and a tender grace, and resemble flowers that decorate the parched highways of life. The titles are characteristic of the poems. "A Magic Secret, Dream of Vision, The Divine Feminine, The Kiss, and How the Dimple Grew," will show how the author's time is spent in the mystic world where he dwells. This age, which is so materialistic, needs ideal food for its sustenance. The food acts as fuel for thought, for realization, for recognition. We cultivate our ideals in accordance with the mind's eye.

The soul needs an occasional dash of sunshine, just like a flower needs the rain. Life is as changeable as the weather. There is a contributory cause for the variations in life, and we go about in accordance to those changes. The soul is happy when the stomach is fed, when the heart is strong, and the head erect. Otherwise, there is discord, for which there is a cure, and the steps to this cure can be found in Mr. Purinton's resumé of essentials for the springtime of life.

The author should be encouraged to write many more such books. We need many an excursion into the ideal land, to enjoy the rippling laughter of those bloomy shores.—**Price, 30 cents.**

THE LANE TO REAL PROGRESS

ASK THE DRUGGIST. By Edward E. Purinton—

This is an arraignment of Naturist and Druggist, as illustrated by the following monologue—

"Why do drugs fail to cure?"

Don't ask the druggist—he doesn't know. **Ask the Naturist.**

"Why does Naturism fail to convert?"

Don't ask the Naturist—he can't imagine. **Ask the Druggist.**

This reminds us of Gracian's saying that "One half of the world laughs at the other and fools are they all." The author delights in complementary phrases, placing druggist and naturist as the positive and negative poles of healing truth. He says: "the druggist has the wisdom of civilization, the naturist the wisdom of savagery, neither the wisdom of symmetry." Having got his subject on the run, as it were, he follows it up relentlessly. He defends the druggist with a series of enconiums that betray a suspicion of insincerity, and *per contra* abuses the naturist with a suspicion of being heartily in sympathy with his gaucheries. After complimenting the druggist for coaxing nobody, for guaranteeing a cure, for wearing an air of mystery, for working in a line with a patient's faith, for prohibiting little or nothing, for preserving an *esprit de corps*, he caps the climax by exhibiting the hostility of all naturists to one another." The follower of Just calls the Kneippist an old fogey, crude, materialistic and superstitious. The Kneipp adherent retorts that the Justian is lazy, irrational and impractical. Osteopaths and Divine Healers are at sword points; masseurs and athletes scorn each other; vegetarians and mental scientists hurl anathemas at each other. The doctors, smiling and unmolested, rifle the pockets of the dead.—Price, 15 cents.

OUR PLACES IN THE UNIVERSAL ZODIAC. By W.

J. Colville—The study of Astrology is one of hoary antiquity. We read of the magicians and astrologers at the court of the great Assyrian potentate Nebuchadnezzar, and of the star-gazing proclivities of the Chaldeans. The three wise men of the East, the three kings from Persia or Mesopotamia, who were led a long journey to Bethlehem to worship Christ, by His star that guided them safely to the manger where He lay, testify to a living interest in the ancient world in Astrology, the forerunner of our modern science of Astronomy.

Astronomy is a study of the mathematical and mechanical as well as the chemical and physiological aspects of the starry universe, while Astrology is a study of the psychological aspects of the same wonder world.

The centre of gravity of each of the suns, stars, planets and satellites, as it moves away from or nearer to, or among, besides, or around other heavenly bodies, alone interests the astronomer, but the astrologic psychic center of each individual, that is to say, his position in time and space on the earth at the moment of birth, belongs to astrology which determines the mutual aspects of the sun and planets of the solar system at the time of birth and their influences, near or remote, hostile or friendly to the individual, in whichever of the twelve houses, or constellations, he belongs to.

These houses or constellations have, from time immemorial, been known by the names of animals or man according as the various groups of stars are fancifully supposed to resemble. There are twelve constellations forming a great circle of the heavens and analogous to the twelve months of the year, and known as the twelve signs of the Zodiac.

The astrologic month begins on the 20th day of the month and ends on the 20th day of the following month. Thus Aries, the ram, begins on March 20 and ends April 20. The other constellations are known as Taurus, the bull, Gemini, the twins, Cancer, the crab, Leo, the lion, Virgo, the virgin, Libra, the balance, Scorpio, the scorpion, Sagittarius, the archer, Capricorn, the goat, Aquarius, the water-bearer, and Pisces, the fishes.

Mr. Colville gives a detailed account of the characteristics of individuals born under the constellation that rules the time of their birth modified by the position of the planets. It is really wonderful how well a man's characteristics and chances of success or failure in life can be determined by "the house" he belongs to. That the stars do influence human destiny has been the belief of man in all ages. There must be something more than fancy in a philosophy that has endured from the very earliest ages until now. We see in the word lunacy an indication of the moon's influence on the mentality of people of weak intellect, luna being the Latin name of the moon.

Anyone desiring to know himself, to discover in what direction his qualities of body, mind and soul prevail, should consult this valuable book. To know in what one is apt to excel, and to apply one's energies in the direction of developing such faculties is most valuable knowledge. The correspondence of man with the heavens is a proof of the essential unity of all creation and this point is elaborately manifested by Mr. Colville.—Price, postpaid, \$1.00.

TOPICS OF INDISPENSABLE IMPORTANCE

A HISTORY OF THEOSOPHY. *By W. J. Colville—*

Considerable confusion exists in the average mind of those who have given any thought to Theosophy as to what it is really all about, because of the varying opinions held by the devotees of the cult, but in the present work by Mr. Colville, in addition to tracing the history of the philosophy from ancient times to the present, he has made a successful attempt to correlate the varying dogmas into one coherent expression of theosophic truth. The word *theosophia* means Divine Wisdom, and, says the author, "to the Theosophist, God is the inmost life of man." He further quotes Prof. Ditson, who says, "We shall enter no Supreme Presence greater than man." The conclusion we arrive at is that man is deity, and that theosophy is a worship of this deity. Theosophy is one with Mental Science when it asserts that "the individual human soul contains within itself the latent ability to build and govern planets, but this concealed energy is only rendered available in the field of use through a long process of evolutionary development."

This then is the secret of theosophy; it is a bold assertion that man is a god. As a philosophy we are told that it is a modern incarnation of ancient Buddhist teaching of which the Mahatmas and adepts are apostles and holds the same doctrines of Karma and Reincarnation. But Mr. Colville traces theosophy to still more archaic sources, to the ancient Egyptians and to far earlier races of mankind, to races of commanding mentality that antedated prehistoric man, to fabulous eras when the gods were god-like men of superior achievements even to the Egyptians. The stupendous magical achievements attained by highly-developed individuals in Hindoostan, Ceylon and Thibet lend color to this claim that man is a veritable deity.

Speaking in the language of our author, theosophy is not the private property of any religion, or cult, but is the soul of all systems of religion, the outer tenets of which are scarcely more than veils thrown over the interior meaning.

Theosophy may be regarded as Buddhistic New Thought, as the renaissance of the old idea that man is a spark of universal existence, now fully equipped with the modern conception of Democracy that the All-Highest is I, Myself.

This certainly is Mental Science *in excelsis*. The ultimate conclusion of this philosophy is that not merely a few of us, but all of us, possess the Divine right to be gods, or at least imperial dignity.

This is a long step from the idea that "no one oversteps the narrow limits of humanity," or that, "we are all miserable worms of the dirt." Somewhere between these two extremes of opinion the truth lies hidden.

Just how far the reader will coincide with the transcendental speculations of the author will depend entirely on the quality of his mind and his own moral and religious experiences. Theosophy is certainly a very tolerant philosophy. "Let us not," says the author, "call each other idolators heathen, pagans, sinners, outcasts, or apply any opprobrious epithet to any. Let us make the Golden Rule our guide of practice."

This compendium of theosophy both as a history and as an exposition of its cardinal principles, is one of those books every educated man should have in his library, whether he believes in the teachings of the cult or not. While it is claimed that "theosophy knows absolutely nothing of slavish dependence upon an outside deity, who desires glory from men and threatens with everlasting misery all who abstain from offering incense at the shrine of this majestic potentate," yet there is a vast fund of religious truth contained in the volume, and many most recondite and marvelous speculations regarding the miracle of man and his destiny, such as might be expected from an assiduous worker in the great quarries of transcendental philosophy that are our inheritance from the wise men of a far-off time, the products of the terrifying Oriental imagination struggling with the vast problems of Life and Death.—Price, postpaid, \$1.60.

CONGRESSMAN SWANSON. *By C. C. Post—*

The late author was for thirty years an active participant in the reform movement of the United States as writer, journalist, orator, and organizer on great public questions, and had rare opportunities for familiarizing himself with the facts, conditions and persons depicted in his great story of Congressman Swanson. The book is a true mirror of the times in which the story is placed. The principal character is typical of the aspirant for congressional honors, who starts out to represent the laboring classes and ends by adopting the methods of the aspiring politician. The professional agitator and labor reformer come in for their share of exposure. In the recurring panics in the commercial world, with their financial and industrial collapses, the honest persevering mechanic rises to affluence and honor and the wealthy manufacturer becomes a tramp by the wayside. The story is a tale of love that lightens the background of economic ideas that were discussed in the Farmer's Alliance, Labor and Greenback movements of the period. As a picture of a great formative period in American history and as a story that is both interesting and instructive, this book is favorably recommended to readers appreciative of good literature.—Price, in cloth, postpaid, \$1.10.

NICOTINE, THE INVISIBLE ECLIPSE OF HEALTH

THE TOBACCO-SKUNK AND HIS DEPREDATIONS.

By J. W. Hodge, M. D.—King James' "Counterblast against Tobacco" has a modern endorsement of the most strenuous character in this pamphlet by Dr. Hodge, our modern knight errant who fights to the death against drug therapy, serum-therapy, the drug habit, and every vicious and poisonous practice that is enslaving and cursing mankind. The present philippic is directed against all tobacco fiends, whether smoker, chewer, or snuffer of the stink-weed. He denounces the use of tobacco as utterly obnoxious, detestable and loathsome, not only on the part of the tobacco fiends in general, but also denounces the healing profession, and those reverend "stink-pots" who also use tobacco, as men belonging to professions that aim to uplift and redeem humanity from its vices. There are consumed in the United States every year, seven billions of cigars, ten billions of cigarettes, and three hundred million pounds of manufactured tobacco, costing seven hundred and fifty millions of dollars. What an enormous waste of finances for a deadly drug!—**Price, 20c.**

THE USE OF TOBACCO A PHYSICAL, MENTAL, MORAL AND SOCIAL EVIL. *By J. W. Hodge, M. D.*

This pamphlet is a scientific exposition of the effects of tobacco on the human system. The author proves that nicotine, the deadly principle of tobacco, is a poison of such extreme violence, that a minute quantity placed upon the tongue of an adult animal will cause death in two minutes. The deleterious effects of tobacco on the digestive organs, blood, heart, brain and nervous system, optic nerve, brain, are fully described while its anti-social and immoral effects are also expatiated upon, proving tobacco indulgence to be a physical, mental, moral and social evil. Dr. Hodge does not believe that the tobacco-fiend can be reformed; he is too deeply wedded to his curse. His case is hopeless. The object is to warn the youths of the country who have not acquired the pernicious tobacco habit, against the vicious example set before them by their tobacco-using doctors, elders, teachers, and spiritual advisers, those reverend "stink-pots" who by means of their "holy smoke" are blazing a way for their Sunday School scholars to insanity and death.—**Price, 20 cents.**

THE PESTILENTIAL TOBACCO HABIT. *By J. W. Hodge, M. D.*

Dr. Hodge is really doing the present generation a great service in so fiercely condemning the filthy and disgusting tobacco habit, so offensive to one's friends and so pernicious to one's self. His denunciation of our tobacco-debauched civilization is outspoken in the extreme, and is not at all too severe, when one considers the fearful grip that cigars, cheroots, stogies and mal-odorously old pipes have upon the devotees of My Lady Nicotine. He believes that every citizen of the United States possesses an inalienable right to enjoy fresh air, uncontaminated by poisonous, unhealthful and offensive odors, and that the tobacco plague should be suppressed by force. Of course the tobacco fiends resent interference with their vile habits, as will also those "holy preachers" and "divines" who have blessed the fumes of tobacco as they ascend from their consecrated pipes and cigars, their vicious example being largely instrumental in leading young boys into a degrading practice which is the stepping stone to alcoholic intemperance. These three pamphlets are wholesome advisors, and the reader will gain greatly by procuring the set for perusal.—**Price, 20 cents.**

FREEDOM: A JOURNAL OF REALISTIC IDEALISM.

By Mrs. Helen Wilmans Post—This publication was until its demise, a few years ago, a powerful organ of Mental Science, being edited by that gifted apostle of mental freedom, Mrs. Helen Wilmans Post, of Seabreeze, Fla. The articles are of perennial importance, because the philosophy they preach is as fresh today as when published fifteen years ago. Those who desire to be the architects of their own destiny are recommended to secure as many copies of **Freedom** as remain on our hands. They may save you from the disasters of fool's luck, that makes a sport of the man that does not command his own destiny. If fate or luck makes a man, then adverse fame or luck can unmake him, hence so many failures in life. Get enthused with the suggestions of success and fortune that characterize this unique publication.—**Price for one copy, 25 cents; 5 numbers, each different, \$1.00. 10 copies mixed, \$2.00, postpaid.**

Bücher über Naturheilkunde

DIE AUFRISCHUNG DES BLUTES DURCH PFLANZENSAFTE. Von Benedict Lust, N. D., M. D. —

Ein für den beruflichen Praktiker der Naturheilmethoden, sowohl wie für den Hausgebrauch gleich wichtiges und nicht zu entbehrendes Werkchen, in welchem die den Pflanzen inwohnenden Heilkräfte in gedrängter Form zusammengestellt sind. Dieses Büchlein ist ein in des Wortes vollster Bedeutung getreuer Ekhard für jedermann in seinen tausend Leiden des Alltags, ein freundlicher und hilfreicher Berater in allen jenen Fällen, in denen mangelnde Zufuhr von Nährsalzen das Blut des menschlichen Körpers schwach und widerstandslos werden lässt; statt eines natürlichen Bekämpfers der sich im Körper aufspeichernden schlechten Säfte und Gifte, wird das Blut kraftlos und somit zum Bundesgenossen der sich im Organismus mehrenden zerstörenden Elemente. Einen unschätzbaren Vorteil gewinnt das Büchlein dadurch, dass es von den verschiedenen Kräutern sehr exakte Abbildungen bringt, denen kurze botanische Bemerkungen beigegeben sind. Die Gebrauchsanweisungen der einzelnen Kräuter in den in Betracht kommenden Fällen, zeichnen sich einer wohlthuenden Klarheit aus. Preis 50 Cents; portofrei 52 Cents.

ERFOLG DER OSTEOPATHIE. Von Elbert Hubbard —

In der Geschichte der Naturheilkunde hat in neuerer Zeit die Osteopathie zweifellos eine bedeutsame Stellung sich erobert, besonders in den Vereinigten Staaten, wo sie heute über eine bemerkenswerte Anzahl von Anhängern und Praktikern verfügt. Geschichtlich ist sie freilich leicht auf die in Deutschland bekannte wissenschaftliche Massage und Mechano-Therapie, Ortopathie zurückzuführen, deren spezifischen Charakteristika der Osteopathie eigen ist. In ihrer modernen Ausübung ist die Osteopathie vielfach ausgebaut und hat zum Begründer, Andrew Taylor Still, ursprünglich ein Landarzt, der im Mittelwesten durch manuelle Behandlungen bei vielen Kranken und Krüppeln Heilerfolge erzielte, und einen bedeutenden Namen erlangt hat. Ohne Zweifel verdient die Osteopathie Anerkennung als Hilfswissenschaft der **Naturopathie**, die ja auch Hydro- und schleimlose Diät als Hilfsmittel zur Erreichung von Heilerfolgen bezieht. Die vorliegende Schrift gibt einen Rückblick über die Entstehung der Osteopathie und dürfte viele Interessenten finden. Preis 25 Cents.

DIE KNEIPPKUR. Von Pfarrer Sebastian Kneipp —

Als unbedeutender und unscheinbarer Webergelinde, den Armut stets zu Gelderwerb zwang, zur baren Lebenshaltung, strebte der nachmalige Prälat Sebastian Kneipp unablässig danach, in den Priesterstand zu treten. Ein glücklicher Zufall wollte, dass der junge Sebastian auf seiner Wanderschaft einem Manne begegnete, der ihm Gelegenheit gab, seinem innigsten Ziele einen Schritt näher zu kommen, indem er nun in die Schule gehen konnte. Mit einem wahren Heisshunger stürzte sich der künftige Pfarrer auf das Studium, sodass er nach dem Absolutorium des Gymnasiums zu Dillingen (Bayern) sich selbst kaum mehr erkannte; aus dem einstigen frischen, robusten Webergelinde ward er ein siecher, kranker Mann. Die Aerzte konnten ihm nicht helfen und das Ziel schon in Reichweite, sah er seine Zukunft schwinden. In diesem Stadium fiel ihm Hahn's Buch über die Wasserheilkunde in die Hände, nach welchem er sich einer Wasserkur anvertraute und das mit dem besten Erfolge. Dieser Wasserbehandlung blieb er von nun ab zeitlebens treu; diese half ihm über die nächsten Jahre emsigen Studiums in München und Dillingen. In Woerishofen liess er sich schliesslich als Pfarrer nieder, wo er die Wasserheilkunde ausbaute und kräftige Propaganda für eine natürliche Lebensweise machte. In Woerishofen auch hinterliess er sein schönstes Monument, eine Kuranstalt nach ihm benannt, die jährlich tausenden und abertausenden Linderung bringt. Pfarrer Kneipp starb am 17. Juni 1897 in einem Alter von 77 Jahren.

In dem vorliegenden Büchlein sind für alle Krankheitsfälle rasch wirkende Hilfsmittel angegeben, die besonders für den Hausgebrauch berechnet sind. Dieser Ratgeber sollte in jedem Familienheime anzutreffen sein. Ein Ergänzungsbüchlein stellt das Heftchen „Kneipp's Thee“ dar, das in kurzer, jedoch klarer Weise die Zubereitung der verschiedenen Kräutertees anweist und von hervorragenden bildlichen Darstellungen der einzelnen Kräuter begleitet ist. Diese beiden Büchlein sind in der gedrängten Form der Lebensarbeit Pfarrer Kneipps, und zum Preise von je 25 Cents portofrei erhältlich. Beide zusammen für 40 Cents portofrei.

Durch Fasten und Diät zur Gesundheit

KRANKE MENSCHEN. Von Arnold Ehret — Wie eine Offenbarung

der höchsten und letzten Dinge über des Menschen irdischen Dasein in physischer Vollkommenheit, in göttlicher Harmonie mit den Naturgesetzen, unnahbar und trotzdem allen Anfeindungen alltäglicher Krankheiten und Leiden, wirkt die Lektüre dieses grundlegenden Werkchens, das, auf dem Pfade des Altmeisters der Natur- und Fastenheilkunde, Louis Kuhne in seiner "Die neue Heilwissenschaft" wandelnd, in seinem Author und dessen Erfahrungsschule und Lebenspraxis die schlagendste Illustration findet. Noch als Zeichenlehrer an der Oberrealschule zu Freiburg in Baden, litt Ehret an einem chronischen Nierenleiden, verbunden mit hochgradiger Nervenschwäche und Herzaffektion, gegen welche die medizinische Wissenschaft nichts auszurichten vermochte und unter deren Hilfsversuchen der Kranke keine Fortschritte machte, vielmehr seinem Ende entgegen zu gehen drohte. Der Lebensfunke in ihm glühte indes noch stark genug, um einen Heilversuch auf eigene Faust durch eine Fastenkur zu unternehmen, die ihm schliesslich in der Tat wiedergesunden liess. Damit war in ihm der Grund zu weiteren Forschungen auf diesem Gebiete gelegt. Mit einer hervorragenden Intuition und Deduktionsbegabung ausgestattet, spürte er den Geheimnissen der Zellenmaschine des menschlichen Körpers nach, und gelangte solcherart zur Kenntnis der den Gang derselben störenden Elemente. Die Schleimbildung und der Schleimgehalt im menschlichen Körper durch missverständnisse und irrtümliche, durch Tradition festgewurzelte Ernährungsweise, ist nach Ehret das Alpha und Omega der hundert und tausend täglichen Krankheiten, die die Menschheit foltern und martern, die aber durch eine intelligente Ernährungsweise ganz von selbst ausscheiden würden. Seine Theorie geht dahin, dass gekochte Kost unserem Körper keine zellbildende, blutstärkende Elemente zuführt, vielmehr als zelltote Nahrung in unserem Körper, vornehmlich schleimerzeugend wirkt. Auf dieser Grundlage tritt der Verfasser für den Genuss von Obst und Pflanzen aus der „Sonnenküche“ ein. Hand in Hand damit empfiehlt er regelmässiges Fasten, das den Körper von allen Säften und Schleimhäufungen befreit. Diesen Erkenntnissen folgend und sie in die Tat umsetzend, demonstrierte Ehret durch ein 49 Tage währendes Fasten, mit nur zehn darin enthaltenen Dursttagen, dass rationelles Fasten durchaus keinen Kräfteverfall herbeiführt, noch das Körpergewicht dadurch permanente Einbusse erleidet.

Von dem Standpunkte ausgehend, dass Krankheit nichts anderes ist als ein chemischer Zerfall, eine Zersetzung der Eiweisszellen, gibt Ehret folgende exakte Definition: „Krankheit ist ein Gährungs- und Fäulnisprozess von Körpersubstanz, oder von überschüssigem Nahrungsmaterial, das sich im Laufe der Zeit, namentlich in den Verdauungsorganen angesammelt hat, und als Schleimausscheidung in die Erscheinung tritt“. Es liegt auf der Hand, dass dieser Vorgang von negativen Düften begleitet ist, während die Natur dem Leben und der Entstehung neuen Lebens Wohlgerüche, also positive Düfte verleiht, wie zum Beispiel in diesem Sinne die Blütezeit der Pflanzen zu erwähnen wäre.

In dem Schlusskapitel beschäftigt sich das Werk mit dem Tod, gegenüber welchem der Author als Ursache die Maxime aufstellt, dass derselbe eine Krisis darstelle, in welcher der Körper noch eine letzte Anstrengung mache, Schleim auszustossen, ein letzter Kampf der lebendigen, lebenserhaltenden Zellen gegen die erstorbenen und tödenden Leichengifte; der Sieg der letzteren bewirkt naturgemäss eine Verstopfung und Lähmung der Zirkulationskanäle des Blutes, und somit auch des Herzens. Die Publikation in ihrer Gesamtheit ist ein monumentales Werk, dem die flüssige, leichte und doch schönheitsstrunkene Sprache, eine starke Ueberzeugungskraft, einen besonderen Adel verleiht. Der ursprüngliche Beruf, dem der Author angehörte, bürgt für den ästhetischen Wert des Buches. Eine höchst empfehlenswerte Lektüre, nicht nur, wie der Titel vielleicht besagen könnte, für kranke Menschen, sondern auch, und das besonders, für die Gesunden, die daraus viele Lehren für die Erhaltung ihrer Gesundheit ziehen werden. **Preis in Englisch oder Deutsch 50 Cents; portofrei 52 Cents.**

Ein weiteres Buch von Arnold Ehret, „Gesunde Menschen“, als Gegenstück zu „Kranke Menschen“ ist schon geschrieben und erscheint in Kürze.

GESUNDHEITSPFLEGE UND NATURHEILKUNDE.

Von W. Siegert — Der Verfasser bezeichnet die Schrift selbst als ein Mahnwort, das besonders an die Mutter gerichtet ist und gibt ihnen darin Anregungen, wie sie am Besten alle Krankheitskeime von ihrem Heime fernhalten können, oder in Krankheitsfällen auf Grund der Naturheilkunde schnelle und nachhaltige Heilung zu erzielen vermögen, ohne die kranken Organe erst durch Medizin zu beschweren und deren Zustand dadurch zu verschlimmern. Kurz gesagt ist diese Publikation eine Einführung in die Begriffswelt der Naturheilkunde, die fortschreitend neue Anhänger gewinnt und als die Aertzin der künftigen Menschheit berufen ist, wenn erst einmal die Schäden der medizinischen Behandlung weitesten Kreisen bekannt und von diesen erkannt werden. **Preis 25 Cents.**

DIE TABAKVERGIFTUNG. Von Dr. med. et phil. G. von Bunge — In diesem Werkchen zeichnet sich der Autor durch reiches Erfahrungsmaterial, das hier skizzenweise niedergelegt ist, aus. Die Frage der Nikotinvergiftung, deren Folgen, die sichtlichen, sowohl wie die häufig erst in der nächsten Generation hervortretenden, sind vom ärztlichen, moralischen und ästhetischen Gesichtspunkt behandelt. Preis 15 Cts.; portofrei 18 Cts.

EINE FRAGE PERSÖNLICHER FREIHEIT, Kurierfreiheit. Von A. A. Erz — Unerschütterlich, von heiliger Ueberzeugungstreue geleitet, bricht der bekannte naturopathische Schriftsteller eine Lanze für die Kurierfreiheit und geisselnd weist er auf die Missstände hin, die in einem freien Amerika es der medizinischen Klasse gestattet, dem freien Bürger vorzuschreiben, wie und von wem er sich in Krankheitsfällen behandeln zu lassen hat. Preis 15 Cents; portofrei 18 Cents.

Systematische Krankheitsbehandlung

DIE NATURHEILKUNDE BEI TIERKRANKHEITEN.

Von H. E. Lahn, M. D. — In Erweiterung der Schrift „Maul- und Klauenseuche und die Naturheilkunde“, das sich an die Landwirte wendet mit Fingerzeigen, wie sie den von ihnen gepflegten Tieren das Höchstmass von Wohlbefinden angedeihen lassen können. Und in der Tat füllt diese Schrift angesichts der vielerorts als unfähig angesehenen Behandlungsweise der Zahnmedizin eine recht fühlbar gewordene Lücke aus. Dieses Büchlein beweist, wie nahe das Tier der Natur steht und wie in Krankheitsfällen dem Tiere nur durch natürliche Hilfsmittel in kurzer Zeit volle Gesundheit wiedergegeben werden kann. Kein Landwirt sollte dieses Büchlein missen. **Preis 25 Cents; portofrei 28 Cents.**

DIE POCKEN. Von Oberst a. D. Spohr

— Mit dieser Broschüre, deren Inhalt sich auf Untersuchungen der Pockengeschichte bis ins 17. Jahrhundert stützt, bringt der Autor gegen das noch heute geübte Impfsystem ein erdrückendes Beweismaterial, das in seiner lückenlosen Geschlossenheit nicht mehr und nicht weniger als ein Todesurteil dieses nur Unheil stiftenden Aberglaubens darstellt, dem die Mediziner in unverständlicher Weise noch huldigen. Auf Grund zahlreicher Erfahrungen, die Spohr während des Krieges 1870—71 an seinen eigenen, an der Front stehenden Leuten gemacht, tritt er den Beweis an, dass die gegen Pocken gebrauchte, künstlich hergestellte Lymphe alles andere, denn ein hinlängliches Schutzmittel ist, vielmehr den Grund zu einer Reihe anderer Krankheiten wie Skrophulose, Tuberkulose, etc., legt. Die für die verschiedenen Pockenfälle und deren Begleiterscheinungen gegebenen Verhaltensmassregeln werden von jedem Pockenkranken mit Erfolg angewendet werden, und ohne Zuflucht zu dem den Organismus im übrigen noch mehr gefährdenden Impfen zu nehmen, Heilung finden. **Preis 15 Cents; portofrei 18 Cents.**

DER LEHM ALS HEILMITTEL. Von Fritz Anliker

— Der Erde Energien und Kräfteausstrahlungen sind in der intensivsten Form im Lehm konzentriert, ein Faktum, das der Menschheit schon lange bekannt und dessen sie sich bei Krankheiten der Tiere schon seit langem bedient. Der Schluss, dass die Eigenschaften des Lehms auch gegen menschliche Krankheiten von heilbringender Wirkung sein müsste, liegt deshalb nahe, und doch ist seine Anwendung in diesem speziellen Sinne verhältnismässig neueren Datums. In dem vorliegenden Büchlein hat Fritz Anliker die Applikation von Lehmumschlägen auf Grund seiner reichen Erfahrungen für die verschiedensten Krankheitsfälle, systematisch ausgearbeitet. In allen seinen Vorschriften legt der Autor absolute Prinzipientreue und bedingungslose Gefolgschaft der Naturheilmethoden an den Tag, indem er an einer Stelle sagt: „...Mit dem Lehm müssen aber auch die anderen natürlichen Heilfaktoren, wie Wasser, Luft, Sonnen- und Dampfbäder, Massage, Pflanzen- und Fruchtkost und Enthaltsamkeit des Alkohols mitwirken...“ Die zitierten, zahlreichen Behandlungsfälle illustrieren die Wirkung der Lehmanwendung auf das Eindringlichste. **Preis 50 Cents; portofrei 52 Cents.**

PHILOSOPHIE DER MENTALEN POTENTIALITÄT IM MENSCHEN. Von Johannes Heininger, D. D., Ph. D.

— In diesem Büchlein spürt der Verfasser den geheimsten Seelenregungen nach, deren Entstehen und Wirkungen der göttlichen Macht im Menschen zuschreibend. Fromme Denkungsweise gepart mit scharfer Logik geleiten Dr. Heininger hinab in die tiefsten Tiefen des mysteriösen menschlichen Herzens, alles Kantige und Eckige darin glättend oder aufdeckend. Nach einer gesonderten Definition der Begriffe, Subjektivität und Objektivität des „Minds“ (oder Lebens- und Seelengeistes), gelangt der Verfasser zur Deduktion des Willens, der auch den Gedanken kontrolliert mit all seinen magnetischen und elektrischen (Vibration, Radiation und Strömementwicklung) Eigenschaften, die Gedanken in sechs Klassen einteilt und deren Vollkommenheit, schliesslich das Herz oder die Schatzkammer der Gedanken darstellt. Eine Seelenstärkung für jeden Leser ist die Ueberleitung des Begriffes von Leid und Schmerz, in den Begriff der göttlichen Harmonie, die dem Kranken das Leiden erleichtert, den Sterbenden mit den Worten „Soli Deo Gloria“ Abschied nehmen lässt. **Preis 25 Cts.; portofrei 28 Cts.**

Beste naturopathische Zeitschriften

DER NATUROPATH, *Jahrgänge 1902—1914 (einschliesslich.)* —

Unter diesem zusammenfassenden Namen gelangte in diesen Bänden eine unerschöpfliche Menge des Wissenswerten und des Unentbehrlichen zur Veröffentlichung. Alles, was mit der Naturheil-methode in Beziehung steht, gelangt hier zu Worte und gibt diesen Bänden solcherart den Charakter eines umfassenden und gediegenen Lehrbuches, dessen keiner, der in dieser Wissenschaft tiefer zu forschen bestrebt ist, entbehren kann. Theorie und Praxis sind darin in harmonischer Weise gepaart und eröffnen besonders dem Lernenden grosse Perspektiven. Diese Bücher können gar-nicht genug empfohlen werden. **Broschürt per Jahrgang 12 Nummern \$2.00; gebunden \$3.00 portofrei. Einzelheft 25 Cents; 3 Hefte zusammen 50 Cents; 10 Hefte zusammen gemischt, jede Nummer verschieden, \$1.25 portofrei.**

AMERIKANISCHE KNEIPPBLÄTTER, *Jahrgänge 1896—1901 (einschliesslich.)* —

Diese Bücher stellen ein geradezu voll-kommenes Kompendium der speziellen Kneippsachen dar, die in zahlreichen Abhandlungen von den verschiedensten Standpunkten aus beleuchtet sind. Eine Unsumme von Forschungen und prak-tischen Erfahrungen auf diesem Gebiete sind darin niedergelegt, denen der Ver-lauf der Jahre seit ihrer ersten Veröffentlichung nichts an Frische nehmen konnte; deren Lektüre vielmehr in uns das Gefühl erwecken, als wären diese Aufsätze erst gestern in Druck gegangen. **Broschürt kostet jeder Jahrgang von 12 Heften \$2.00; gebunden \$3.00. Probeheft 25 Cents. 10 Hefte alle ver-schieden, unserer eigenen Auswahl \$1.00 portofrei**

DER HAUSDOKTOR —

Wenn die Naturheilmethode in den Ver-einigten Staaten zu einem Ansehen gelang, so ist das in erster Linie ein Verdienst des „Hausdoktors“. Unablässig, mit zähem Eifer, geboren aus der Methode innewohnenden Ueberzeugungskraft, focht und kämpfte er seit dem Jahre 1889 und noch heute steht er als Riesiger Knappe in glänzender Rüstung auf dem Schlachtfelde, das er nach so manch hartem Strauss gegen Intrigue und offene böswillige Anfeindungen siegreich behauptet.

Die im Laufe der Jahre im „Hausdoktor“ erschienenen Artikel sind durch-wegs von einem bleibenden Wert und der Verlag hat deshalb die Einrichtung ge-troffen, jeden Jahrgang zusammengeheftet Interessenten zu liefern. Es bilden dieselben eine Fundgrube von Ratschlägen und Anregungen für den Laien, sowohl wie für den Studierenden und ausübenden Heilpraktiker. Die Hefte dürften in keiner Hausbibliothek fehlen. **Preis per Jahrgang, 12 Hefte, broschürt \$1.00; portofrei \$1.25. Laufendes Abonnement \$1.00. Probenummer 25 Cents.**

GESUNDHEITSKALENDER für Freunde der Kneipp-Kur und Anhänger der Naturheilmethode. Von Dr. B. Lust —

Von diesem praktischen Ratgeber sind nur die Jahrgänge 1899, 1900 und 1901 erhältlich, die keiner, der mit der Naturheilkunde in irgendwelcher Weise in Be-ziehung steht, sich entgehen lassen sollte. Das Lektürenmaterial in diesen Bänden ist von auserlesener Gediegenheit und von eminent praktischem Werte. **Preis per Jahrgang, broschürt 50 Cents portofrei; die 3 Jahrgänge zusammen \$1.10 portofrei; gebunden, per Jahrgang \$1.00; die 3 Jahrgänge zusammen, ge-bunden, \$2.75 portofrei.**

ÜBER ZWECK UND WESEN DER NATURHEIL-KUNDE. Von A. Uhlig —

Eine im aufklärenden Sinne herausgege-bene Werbeschrift, die sich an das grosse Publikum wendet. Bescheiden und anspruchslos für sich selbst, versucht diese Schrift, den Leser in das Wesen der Naturheilkunde einzuführen und bringt zu diesem Zwecke eine gedrängte geschichtliche Uebersicht dieser heute zu einer mächtigen Organisation gereiften Bewegung, die viele Hunderttausende von Men-schen zu einer Gemeinde zusammengefügt hat und wachsend stets neue Anhän-ger findet. **Preis 5 Cents.**

BOOK REVIEW

APYRTROPHY DEFINED AND ITS AXIOMS

APYRTROPHY is the science that teaches the gospel of physical righteousness through intestinal cleanliness for perfect health, inclusive morality and happiness by means of feeding on natural unfired food, for which Dr. Drews gives the following axiomatic reasons, i. e.:

Dr. George J. Drews

That all natural unfired food can be so daintily prepared, so scientifically combined and elegantly served, that it appeals favorably to the palate and aesthetic nature of cultured man without reducing its wholesomeness;

—that primitive man thrived and developed in the absence of the culinary artifice which degenerates miscultured man;

—that a little knowledge of inorganic chemistry applied to organic chemistry is a dangerous thing;

—that organic chemistry is perfect, and that only misinformed man tries to improve on it to his detriment and sorrow;

—that God in the vegetable kingdom cooperates with God in the animal kingdom for mutual benefits;

—that all unfired esculent green leaves and roots can never produce auto-intoxication and its sequent diseases, because they do not ferment in the alimentary canal;

—that unfired nuts and cereals do not ferment when not combined with liquids other than saliva;

—that unfired fruits may ferment in the alimentary canal, but without producing any sequential diseases outside of the temporary distress;

—that the product of the yeast germ and other bacteria is almost harmless, when produced from unfired food, than the paralyzing toxins produced from fired food;

—that unfired-fooders need not fear germs and bacteria; because to them they

are a part of Nature's beneficent plan, for germs only become a source of danger when their nutrition is derived from fired food;

—that the yeasts and disease bacteria are all scavengers and thrive only on wastes and fired foods;

—that cooking prepares all food for the invasion of yeast germs and other poison-producing bacteria, and that the surplus of digested and absorbed fired food becomes the soil for all disease bacteria;

—that fired food can not be made normal by digestion, for it retains its abnormal character similar to waste in the blood stream and tissues, and this then becomes the food for the bacteria of diseases;

—that the high temperature which the fired food has been subjected to, has so changed the relation of many organic, basic and acid elements, that they have become inorganic and useless to the normal functions of the tissues, which then become engorged with wastes, and starve for want of proper elements;

—that, as the fired food ferments and decays in the alimentary canal, it produces toxins which not only paralyze the nerves of peristalsis, but also the functional nerves of all the glands within reach, and when these toxins reach the nerves of the heart, instant death is the result;

—that the toxin of fermentation so irritates the nerves of procreation, that it unbalances, even perverts, the sense of procreation, and in the female this irritation finally results in the total paralysis of the procreative function known as menolipsis and menopause. It is estimated that on an unfired diet, which does not produce toxins, that the average normal women should retain their menses till they are at least sixty years of age. There are women on record who have retained their menses up to seventy. The author personally knows a woman who, after a careful selection of her diet, regained her menses at sixty;

—that the troph who prepares unfired food for the table does not need to worry about cooking or baking, nor suffer from the heat or smoke involved; nor is the house-fly attracted by the odor of fresh fruits, roots or nuts, and even honey does not attract the fly unless it is diluted and allowed to sour;

—that in the northern winter the windows of the apyrtropher do not freeze up with ice;

—that the unfired diet saves the fuel expense for cooking and baking;

—that a sumptuous unfired fare may cost as much as the most costly vulgar fare; but a simple, wholesome, unfired fare, need not cost half as much as the cheapest fired fare;

—that the unfired food does not cause the body to have an offensive odor, nor are the feces and flatus offensive.

Apyrtrophy is also the basis of trophotherapy—the science that teaches how wholesome, unfired food can be used specifically as a means to cure diseases; and further,

—that unripe fruits only irritate (in a curative attempt), intestinal surfaces that are inflamed from the use of flesh and salt;

—that distress experienced after eating a new (generally wholesome) unfired food, indicates its eliminating properties, and that it is acting on some taint of disease;

—that every new, wholesome, unfired food in its season may manifest curative activities if a taint of disease, upon which it can act, is present, before the system uses it as nutrition;

—that all unfired esculent leaves and roots have curative properties and also tone the blood with alkaline elements, and that fruits and nuts balance the alkalinity produced.

Apyrtrophism is the doctrine and practice of living on unfired food for gaining and maintaining perfect health, keener joy of living, clearer mind, prolonged youthfulness and less drudgery for the troph who prepares the wholesome fare, as set forth by Dr. Drews in the year 1909, in his treatise on "Unfired Food and Trophotherapy."

UNFIRED FOOD AND TROPHOTHERAPY

By George J. Drews, Al. D., D. C., N. D.

Those who eat to live will be gratified to know that a new work has been published, devoted to extolling the virtues of unfired food, which combines a minimum of trouble in preparation, with a maximum of benign, alimentary content. The author is an enthusiastic devotee of latter-day manna as it comes from the hand of nature, which he strongly recommends not only to the healthy, but to those suffering from physical ailments, as an effective method of restoring youthful vitality, strength, endurance, courage, will-power and resistance.

He regards disease as caused by the fermenting of cooked food in the digestive tract and this fermentation paralyses the nerves that control the peristaltic contractions of the intestines, thus causing constipation and its attendant ills. This poison also penetrates to the nerves of the heart, lungs, liver, pancreas and kidneys, and especially to the organs of pro-creation, limiting, or suspending, their functions, and being, in fact, the source of all disease.

This argument is built up with great force, and man's natural foods are shown to be the fruits, succulent herbs and roots, nuts and cereals, which in their natural (unfired) form appeal to the unperverted sense of alimentation.

There is a comparison between the food values of unfired and fired food products to the disadvantage of cooked foods. Original recipes are given for apyrtrophic drinks, soups, salads, cakes and breads, sauces, desserts and dressings. The "return to nature" is absolute both as regards everyday alimentation, and the quality of natural foods as a remedy for disease. The work is a complete exposition of Trophotherapy. Price, in cloth \$3.15, postpaid. The Nature Cure Publishing Co., Butler, New Jersey.

A THOUSAND WAYS TO PLEASE A HUSBAND, WITH BETTINA'S BEST RECIPES

By Louise Bennet Weaver and Helen Cowles LeCron. Britton Publishing Co., 354 4th Avenue, New York.

A thousand books have been written on the art of cooking, ranging from the pretentious preparation of royal banquets to the democratic makeshifts of a chafing dish. These contain very formal, cut-and-dried instructions, conventional to the last degree, but it has remained for the authors of this book to approach the subject of cooking from the human standpoint, and let us see and feel the romance that is hidden in the subject.

When we consider that cooking and humanity are inseparable companions, we wonder why the human standpoint has not hitherto been exploited. There is no function in life that involves sociality to such a degree as people taking dinner together, and the joys of eating dainty viands can be extended to the art of preparing the menu, as any enthusiastic young bride will readily admit.

We are introduced by the authors to two dear friends of theirs, Bob and Bettina, who are just married, and who are healthy enough, young enough, and hungry enough to enjoy the gustatory delights that Bettina's fair fingers create. This attractive young couple occupy a nice house and are in fairly good circumstances, and the story of Bettina's dietetic triumphs for a whole year make the reader's mouth water to taste her dainty handiwork. We would give a good deal to be a guest at some of Bettina's luncheons, teas, porch parties, or motor picnics, not to speak of her Fourth of July, Thanksgiving and Christmas Day dinners.

The rose-colored lights of romance in the story conceal a serious purpose, that is, to give instructions how a thousand dainty,

practical menus can be realized, with such ability as any enthusiastic bride, with just a touch of the artist about her, can easily prepare for the delight of her Bob and their mutual friends.

The book is handsomely bound and decorated with numerous illustrations showing Bettina engaged in cooking or admiring her pies and preserves, with Bob as a delighted onlooker. Price, cloth, \$2.00. For sale by The Nature Cure Publishing Co., Butler, N. J.

ZONE THERAPY SIMPLIFIED

By Dr. J. S. Riley

Zone Therapy is a new and unique method of treating the ordinary ailments of humanity by means of pressures and manipulations of the fingers and tongue, and percussion on the spinal column, according to the relation of the fingers to certain zones of the body where the offending organs of the body are located. Zone-therapy is not mechano-therapy, nor in part chiropractic, nor yet a system of counter irritants, but is an absolutely new departure in therapeutics. The booklet that explains the rationale of this unique process of cure is accompanied by a chart showing the subdivision of the human figure into some ten longitudinal sections.

These zones were suggested by the five fingers on each hand. Lines are drawn along the centre of each finger, from the tips thereof to the shoulders, where such lines meet, and merge into similar lines drawn from head to foot, so that each half of the figure is divided into five zones, each indicated by the line being drawn along the center thereof.

Both halves of the figure are similarly mapped out, so that the whole ten fingers of both hands dominate the entire ten zones of the whole figure.

It may appear that so arbitrary a division of the body could have only an imaginary relation to the fingers of the hand, but we must remember that the body as a whole is a single organism, whose every organ is interdependent with the others and what will invigorate, or devitalize one, will similarly affect all. The plexus of the nervous system telegraphs vibrations, irritations, and manipulations, from one part of the body to any other part, and suggestions of this kind are invariably obeyed within the limits of the reactive powers of the system.

The author of this system of cure describes and illustrates each particular process of treatment. In the case of colds, or *la grippe*, he points out that the nasal passages affected are mostly in the first, or second zones, that is, the zones nearest the central line, and this means that the two inside fingers, the thumb and forefinger of each hand, are the ones to be manipulated.

The thumb and index finger of each hand are placed together, and are alternately firmly pressed around the ends and joints and nails by the other hand. The middle finger of each hand may also be included in the treatment. When you have squeezed the three fingers of the right hand for two or three minutes, change to the other hand, and in like manner, squeeze and manipulate the same fingers of the left hand. Continue this alternate maneuvering for ten minutes at a time. Repeat the process three or four times a day. This method of treatment, the author states, works like a charm.

A variation of making the pressure on the fingers is described as follows: Clasp the fingers of one hand by the other with a tight grip, and hold on for about a minute, then change back to the first method. Repeat this process with either hand clasped by the other, and so repeat the process back and forth for eight minutes. Repeat both methods several times a day. It will have a marvelous effect in curing the cold.

In like manner, varying treatments are described for the cure of asthma, cancer, constipation, epilepsy, eye troubles, goitre, heart troubles, piles, paralysis of all kinds, neurasthenia, neuritis, insomnia, tuberculosis, whooping cough, and many other ailments. Price of book, \$1.00.

Dr. Riley has also prepared a Chart on Zone Therapy, for affixing to the wall, which shows at a glance the various zones of the body, with a description of the methods to be adopted in treating the different ailments. Price of chart, prepaid, \$1.00. The Nature Cure Publishing Co., Butler, N. J., and Naturopathic Publishing Co., 110 East 41st Street, New York.

"ZONE THERAPY, OR, RELIEVING PAIN AT HOME," by Wm. H. Fitzgerald, M. D. and Edwin F. Bowers, M. D., (published by I. W. Long, Columbus, Ohio.)

This is a new addition to drugless therapy, and treats of such subjects as: Relieving pain by pressure, Headaches, Curing Goitre with a probe, Finger squeezing for eye troubles, Making the deaf hear, Painless Child Birth, Zone Therapy for women, Relaxing Nervous tension, Curing Lumbago with a Comb, Scratching the Head for sick stomach; Hay fever, asthma and tonsilitis; Curing a sick voice; A specific for Whooping and other coughs, How a phantom tumor was dissipated, Dr. White's Experience, Zone Therapy—for Dentists only; Zone Therapy—for Doctors only; Food for thought. These are all physiological methods of diagnosis and treatment that are new. The book can be ordered for \$1.60 post-paid from the Nature Cure Centre, Butler, N. J.

Herald of Health and Naturopath

MAGAZINE FOR NATURAL LIFE, RATIONAL CURE, PHYSICAL, MENTAL,
AND SPIRITUAL REGENERATION

DR. BENEDICT LUST, N. D., M. D., Editor and Publisher

THIS well-known organ of Naturopathy is now in its twenty-second year of publication, and more than ever does it appeal to Vegetarians, Physical Culturists, Students, Business men, and all who believe in the doctrines of Naturopathy as taught therein, which include Bilz Cure, Just Cure, Kneipp Cure, Kuhne Cure, Curative Gymnastics, Dietetics, Exercise, Electropathy, Heliopathy, Hydropathy, Massage, Mental Science and Therapeutic Suggestions.

¶ This magazine is a storehouse of the latest and best ideas, telling how to obtain health, beauty, power, success. In a word, it is the acme of Naturopathic knowledge regarding the science and practice of Nature's greatest healing forces.

¶ Medical Science, the world over, now recognizes the fact that drugs and serums, as agents of health, have lost their hold on the confidence of mankind through their sheer impotency to cure disease, and that a return to nature, as advocated in the *Herald of Health*, is the only means of obtaining and preserving that buoyant health which makes for physical, mental and spiritual vitality and happiness.

Yearly subscription, \$2.00; foreign \$2.50

Single copies, 20c.; foreign25

Back volumes of the *Herald of Health and Naturopath* from the year 1900 to the current year, per volume, \$2.50; cloth bound volumes 3.50

DER HAUSDOKTOR, Zeitschrift für vernünftige Lebens- und Heilweise, Dr. Benedict Lust, Editor and Publisher

A German Magazine for the family, for rational healing and natural living. This magazine discusses the same subjects and advocates the same progressive principles as the *Herald of Health and Naturopath*; only in German.

Yearly subscription, \$1.00; foreign \$1.50

Single copies, 20c.; foreign25

Back volumes of *Der Hausdokter* from the year 1889 to the current year, per volume, \$2.00; cloth bound volumes 3.50

Descriptive Catalogue of Naturopathic Books for 3c. in stamps. Address:

BUYERS' GUIDE

OF

NATUROPATHIC SUPPLIES

FOR SALE BY THE

UNIVERSAL NATUROPATHIC EXCHANGE

110 EAST FORTY-FIRST STREET, NEW YORK CITY

THE HERALD OF HEALTH AND NATUROPATH is a monthly magazine devoted to a popularizing of the great curative forces of Nature, by which alone are the causes of disease removed and not merely temporary symptoms abated. The insurance of health is the particular aim of this publication, which is enforcing its doctrine with all the vigor worthy of such a humanitarian enterprise.

It tells how a sick man may get well by a scientific application of hydro-path, photopathy (sun and electric light baths), electropathy, osteopathy, chiropractic, mechanopathy, massage, air and earth baths, neuropathy, curative gymnastics, breathing exercises, Kneipp Cure, Ehret Cure, Kuhne Cure, Bilz Cure, dietetics (including fasting), mental science, suggestion, psychopathy and every other natural agent for lifting man to a higher and happier plane of physical, mental and moral existence.

Apart from specific, acute and chronic ailments, there are millions of people seemingly well, but who in reality are made supremely miserable by the basic fact of all disease, the retention of waste matters and the decomposition that arises therefrom, owing to the fact that the organs of elimination, the intestines, liver, kidneys, skin, and lungs are unable for lack of vitality to remove such poisons from the body. Retention causes enervation, and enervation in turn increases retention.

The physical symptoms of retention, coupled with enervation, are acute sensitiveness to cold, catarrh, an excited pulse, laboring as if obstructed, as it really is. There is a coated tongue, a perverted taste, a loss of smell, constipation, headache, rheumatism, apathy, loss of appetite, loss of weight, and general toxemia. Changes caused by chemical decomposition and recomposition in the blood and tissues result in compounds known as glucosides, enzymes, ptomaines, and leucomaines, many of which are powerful poisons. The lowered vitality, the impairment of vital functions show that the central nerve power is taxed to the utmost, and the heart, embarrassed by the coagulated and decomposing elements of congestion, threatens sudden collapse.

In the mental region, the patient, especially if a woman, becomes hysterical, and is troubled with irritating sensibility, bad temper, impatience, unsteadiness, ranging from pietism to idiocy, insomnia at night and sleepiness by day, fault finding, cramps, nightmares, exaggerated tenderness and fits bordering on madness. The patient may, and often is, naturally good-natured, but in these abnormalities of conduct it is the enzymes, ptomaines and leucomaines that are getting in their devilish work.

The allopathic physician, true to his traditional training, will attack such symptoms with his pills and potions, with serums, vaccines, inoculations and drugs that

are chiefly poisons, and will succeed in many cases in temporarily stifling or suppressing the symptoms, but the causes being untouched, these only break out again with a renewed energy in mockery of the useless medication of the dilettente docteur à la mode.

The only possible cure for the ailment just described, the greatest disease of civilization, is the immediate and forceful scientific application of Naturopathy, of sun and air and exercise, of baths and massage and dieting, and electric treatment, of radiant light and heat, mental poise, with or without the use internally of herbal remedies.

This is the principal theme of **THE HERALD OF HEALTH AND NATUROPATH**, which is published monthly at 20 cents a copy and two dollars per year. Its advocacy of the prevention and cure of all disease is worth a hundred dollars per annum to its readers.

DER HAUSDOKTOR is the German edition of the **HERALD OF HEALTH**, the price of which is fifteen cents a copy and one dollar a year.

We have elsewhere published a list of Naturopathic Books published by Dr. Benedict Lust, and a still larger list of similar works by other publishers, the whole forming a **CHOICE LIBRARY OF NATURAL HEALING** of the highest possible value to mankind.

In this great science and art of Psycho-Physical regeneration, the following list of Foods, Clothing and Appliances are the weapons by which the Naturopath combats disease. We have explored the entire field of natural and manufactured health food products and have, with infinite trouble, selected the very best foodstuffs and beverages from the standpoint of possessing all the natural mineral salts and other qualities, which a sophisticated taste on the part of the public caused the manufacturers and exploiters to remove from modern foodstuffs. Subsisting for years on such denatured foods, people have become enervated with the results already described, and it is only by giving man his birthright of natural healing subsistence that he can acquire the vigor and hardihood of bygone generations devoted to the outdoor life.

These books, foods, clothing, articles de luxe and appliances are recommended and used by leading Physicians, Teachers, Healers, Nurses, Physical Culturists, Vegetarians and New Thought people in the United States and elsewhere. Our market for both buying and selling is the entire world.

We are prepared to do business on the following terms:

First: We require the payment in advance for all kinds of goods.

Second: In cases where we cannot send goods exactly as ordered, by reason of being temporarily out of stock of same, we will substitute a similar book, or foodstuff, or appliance, for the article ordered, subject to its approval by the buyer.

Third: Stamps are accepted in payment for orders under one dollar. For sums exceeding that, Money Orders or Draft on New York, drawn to B. Lust, Butler, N. J., must be the medium. All out-of-town checks must include ten cents extra to meet exchange rate.

Fourth: Full name and address of purchaser should be given with name of Express Company, if the goods are not to be sent by Parcel Post.

The last word in open air Living. The only Successful fresh air abode for any and all Purposes.

The only way to live a natural Life, is in a Heliobode. Ideal for Invalids or the Lover of Out-Doors.

DUPELL INTERNAL BATH

THE NEWEST AND MOST IMPROVED DEVICE FOR INTERNAL BATHING, THE ELIMINATION OF INTESTINAL TOXINS AND BACTERIAL POISONS GENERALLY

A Positive Necessity in Every Household in Which Good Health Is a Watchword

MORE and more people are daily realizing the wonderful value of internal bathing. It is a positive safeguard in many ways. As a remedial agent in constipation, chronic or occasional, and in auto-intoxication, the internal bath is an appliance of utmost value. This is particularly true of the Dupell Internal Bath because of its scientific improvements.

The DUPELL INTERNAL BATH is made of the finest para rubber, sufficiently reinforced to bear the weight of a man weighing 300 pounds. It can be operated by sitting on it or by gravity.

Every member of the family can use the DUPELL without any suggestion of uncleanness by having his or her individual rectal cone. Two cones are with each outfit.

The DUPELL is also used for vaginal douching. An extended cone, which is part of the outfit, is used. The DUPELL can also be used as a hot water bottle.

One of the very important features of the DUPELL is its convenience in the sick room for giving enema to bed-ridden patients. For this purpose alone it is worth many times the price asked.

AVOID OR SEEK TO LESSEN THE PERILS OF BACTERIAL POISONING

Bear in mind that putrefactive bacteria are everywhere present. In warm weather they attack meat and vegetables and other substances, and cause putrefactive fermentation. Putrefactive bacteria, in the air everywhere, find their way into the intestines, on the food eaten. The intestines, constantly maintained at body heat, serve as a most effective culture tube. Keep a DUPELL INTERNAL BATH in your bathroom, and regard it as a vital necessity.

Not until you have studied yourself, used a DUPELL INTERNAL BATH, and experienced the

wonderful health-restoring, invigorating effects, can you fully appreciate the great value of this simple apparatus. It saves doctors' bills, prevents loss of time from business, and avoids the necessity of taking nauseating cathartics. Safe, simple and easy to use.

Thousands of Men, Women and Children

would be freer from ills, would be happier, take keener interest in life, if the DUPELL INTERNAL BATH were in every household.

Constipation is one of the curses of every generation. It causes endless miseries. Its causative effects are far-reaching—sometimes resulting in death.

A well-informed writer says: "People little realize how much one's happiness or unhappiness depends on the proper action of the organs within the abdominal cavity."

The DUPELL INTERNAL BATH has all the best points of other internal baths, none of their faults, and exclusive features of its own.

Headaches
Intestinal Gases
Depression
Kidney Ailments
Disturbed Heart Action

La Grippe
Dyspepsia
Mental Lethargy
Various Fevers
Bad Breath

Boils, Pimples,
Irritability
Nervousness
General Lassitude

Flatulence
Impoverished Blood
Catarrh
Bad Complexion

Are a few of the ailments and conditions that arise from a colon loaded with waste and poisonous matter.

Bear in Mind That You Don't Have to Be Sick to Need a Dupell Internal Bath

The DUPELL is as necessary in the bathroom as your tooth brush or your hair brush. When you stop, think and understand your internal self, you will realize the importance and truth of this. There isn't a doctor alive who won't tell you that the occasional cleansing of the colon is highly beneficial.

The regular price is \$10, but to introduce the DUPELL INTERNAL BATH more quickly, we have made the price \$7.50 (express prepaid) for a limited time.

By purchasing a DUPELL INTERNAL BATH now you not only save \$2.50, but you get the newest and most improved Internal Bath—an apparatus worth, in result, its weight in gold. Send P. O. or express money order to

Porous Cloth for Underwear and Shirts, bleached or unbleached, per yard\$1.00

NATUROPATHIC CLOTHING, APPLIANCES AND SUPPLIES

It is not the kind of clothing that keeps the body warm, but of greater consequence is the manner in which it is woven. A heavy, closely woven fabric protects the body from cold less than a loosely woven fabric, for it is the air that lies between and in the meshes of the clothing and the body, forming a garment of air, that really keeps us warm. In very warm weather, fabrics with an open weave permit this air to be constantly changed, making the air next the skin of the same temperature as the air without us. Besides, it permits evaporation

Porous Linen, per yard\$1.00

of moisture, which is a very cooling operation, for whatever suppresses the evaporation of perspiration is extremely inimical to health, as the Black Hole in Calcutta testified.

Porous, China-grass, Ramie, linen mesh and "Yungborn" garments referred to in the following list testify to the fact that the skin breathes, and if suffocated by non-porous attire, suffers from asphyxiation.

In winter, the least possible amount of heavy clothing should be worn, so that the skin should be hardened to the changes of temperature.

In the prevention and cure of disease, a variety of flannel and line cloths, known as packs, compresses, and mantles, are used for hydro-pathic treatments that alleviate pain, soothe local inflammation, and elim-

Yungborn Cloth, per yard....\$1.00

inate poisons. The procedure consists in applying the cloths, first dipped in water of the right temperature, for the treatment of the case in hand, and folding them in four or eight ply, to the seat of pain or inflammation. Such a compress is kept on the body for a period of from half an hour to retaining it all night if the patient finds it agreeable to do so. If the water is cold, it gives a slight initial shock, but when the patient is closely wrapped up in dry blankets over the wet compress, he soon be-

gins to feel warm and comfortable, while the pain consequent to his ailment leaves him.

In cases where active manipulation is needed, the compress is frequently dipped in cold water as it feels warm, or it is kept cool and moist without being removed from the body, by being sprinkled with water squeezed from a sponge.

The Spanish Mantle is a kind of long flowing shirt or wrap, which, when wet, covers the entire body and is a powerful means of drawing poisonous matter from the corpus.

Yungborn Drawers\$2.75

Yungborn Undershirt\$2.50

Yungborn Outing Shirt\$3.50

Guaranteed Electric Light Plants For Homes, Hotels, Institutions

YOU can have your home, hotel or institution lighted with electricity, no matter how far you may be from city lighting service. Utility low-voltage plants are safely usable **anywhere**. The cost is extremely reasonable to begin with, and the work and expense of operating is inconsiderable. Electric lights are not only more convenient and economical than any other, but they are absolutely the safest.

Don't imagine that you can't afford electric lights, or that you need to understand all about electricity in order to run a Utility plant. We send you complete instructions for installation and operation.

are backed by the strongest Guarantee ever given with any Lighting Plant

A Utility Plant will prove a big-paying investment for the hotel or institution owner, because it will be a great magnet to draw trade. No traveler will think of stopping at the hotel lighted with oil lamps or a dangerous gasoline or acetylene system when there is an electric lighted hostelry in the locality.

12 to 200 Light Plants for Home and Hotel Lighting, \$130 and up.

250 to 500 Light Plants for Big Institutions, \$750 and up.

The plant shown below is one of our Junior Plants—battery, switchboard and generator, all mounted on one base. This is the ideal type of plant for small homes. Requires small space—is easy to install and operate, and demands but the minimum of attention. Even a ten-year old child could run this plant.

We can furnish the right type of plant to meet **your** needs—and we can save you money. Write:

FOODS AND FOOD APPLIANCES

NATURAL VERSUS UNNATURAL FOOD PRODUCTS

WHEREVER man lives on the simple, natural products of the vegetable world, he lives a healthy, happy life, but when he becomes carnivorous, and gorges himself with flesh, meat, and wine, tickling his palate with an over-supply of spices, highly fermenting nutrition, he becomes the victim of obesity, cancer, apoplexy, nervous troubles, auto-intoxication, premature old age, and early death. Man has indeed fallen from his high estate as an eater of fruits and nuts, and like the hog, devours everything that comes his way, fish, flesh or fowl, even enjoying decomposing game to please an artificially perverted taste.

Man has indeed eaten of the forbidden fruit of life, and is a brother to the beasts of prey and is filled with misery and disease in consequence. The stimulating meat diet, cooked so as to develop its most pungent flavors, tempts the consumer to eat too much and so become stupid, languid, fat and full of poisons, due to the fermentation and decomposition of food products that the overworked depurative organs are unable to remove.

Thus it is that a man who would not risk a dollar in a gambling transaction, gambles with his life to please his artificial taste. The rude health and gigantic strength that belong to the simple life are unknown to him. Eating of the wrong kinds of food and eating more than he can properly digest, without taking adequate exercise, and possibly sleeping for an hour after the mid-day meal, he is marked for early death. His only salvation is to stop eating all kinds of stimulating food, and adopt a menu of simple, natural foods, and the more nearly they are consumed as Nature has ripened them in the fires of the sun, the better for the individual.

Civilized man is degenerating. Look at the under-sized men and women one meets every day in the

crowded streets of our cities. The animals that most nearly resemble man, the most highly developed apes, live on a strictly vegetable diet. If compelled to subsist wholly on animal food, they would degenerate like mankind and soon perish. We cannot imagine the powerful apes possessing their health and vitality if compelled to eat meat, to drink alcohol, coffee, tea, cocoa, and to smoke innumerable cigars a day. Nor would they be so happy if they indulged in cocaine, morphine, heroin, coca cola, opium, arsenic and other poisons.

It must be remembered that while the organs of the body in youth can throw off the poisons generated by over-feeding, or by eating wrong combinations of food, there will come a time in the life of every individual when the excretory energy of the body fails in part, as the beginning of inevitably increasing failure, to eliminate such poisonous products, thus laying the foundation of the particular disease, or diseases, that will end life. This state of things calls for the use of a non-stimulating diet at the earliest moment, to counteract the results of the former erroneous dietary, and as part of the stern measures to be employed to restore the poisoned organism to health.

The following list of beneficial pure food supplies includes all the necessary materials of a vegetarian, or natural life diet, so helpful to dyspeptics and convalescents. Meats, tea, coffee, spices, alcoholic drinks and drugs of all kinds are excluded, and in their place are offered gluten and whole wheat products, cereal coffees, cocoas and teas, nuts of many kinds, nut butters and vegetable oils, non-alcoholic drinks, health foods and special preparations of foodstuffs to take the place of meat dishes.

Our mission is to guide man back to the use of the simplest and purest foods: to an all-nutritious, un-stimulating regimen devoid of poison, and calculated to enrich the system with supreme vitality.

DR. BENEDICT LUST

BUTLER, N. J. AND TANGERINE, FLA., U.S.A.

International Establishment for the Science of Healing
without Drugs and without Operations

Established September 15th, 1896. Enlarged, 1904, 1908 and 1912.
Consultation Hours: 10 to 12 a. m. Sundays, 10 to 12 a. m., 3 to 6 p. m.

Special Advice and Information in All Cases of Sickness, including by Letter

Great success without drugs and without operations; also in cases of internal malignant growths, tumors and ulcers, external gangrenous inflammation, etc.

A new and reliable method of diagnosis, both for actual disease and for predisposition to disease, through the *Science of Facial Expression*, without local examination, particularly in female and abdominal diseases.

Patients from all parts of the world. Prospectus Free.

The following works on the Kuhne System have also been published by Dr. B. Lust, Butler, N. J., and will be forwarded, on receipt of the publisher's price, postpaid to any part of the world.

LOUIS KUHNE, "THE SCIENCE OF FACIAL EXPRESSION." A handbook of a new system of examination to find the state of the disease, based upon original researches and discoveries. Fully illustrated. Has appeared in German, English, Spanish, Danish and Telugu. Price of the English or German edition, elegantly bound, \$5.00, or £1.

LOUIS KUHNE, "AM I WELL OR SICK?" A vade-mecum and adviser for everyone. Has appeared in German, English, French, Spanish, Portuguese, Dutch, Italian, Swedish, Danish, Hungarian, Telugu and Urdu. Price of the English or German edition 75c, or 3s.

LOUIS KUHNE, "THE REARING OF CHILDREN." A word of warning and advice to all parents and teachers. Has appeared in German, English, Portuguese, Dutch, Danish and Hungarian. 50c, or 2s.

LOUIS KUHNE, "CHOLERA, DIARRHEA, AND SIMILAR ILLNESSES; Their Cure and Their Treatment without Medicines." Has appeared in German and Portuguese. Price of the German edition, 50c.

DR. B. LUST, REPORTS OF CURES by means of the New Science of Healing without Drugs and without Operations, together with a Prospectus. 38th edition. Has appeared in German, English, French, Spanish, Portuguese, Dutch, Italian, Russian, Swedish, Danish, Greek, Roumanian, Polish, Bohemian and Hungarian. Gratis.

MRS. B. LUST'S NATUROPATHIC-VEGETARIAN COOKERY BOOK. The "Yungborn" Dietary. Only in the English language. Cloth, \$1; paper cover, 75c.

EVERY PROGRESSIVE, UP-TO-DATE PRACTITIONER

Whether Naturopathic, Osteopathic, Chiropractic or Medical should use and recommend

"SUNBEAM" PURE FOOD PRODUCTS

"THE WORLD'S BEST"

ALL practitioners recognize what an essential factor food is in maintaining health and in curing disease. That improper or non-nutritious food can nullify the most scientific practice. Therefore, since the **BEST QUALITY** food contains the **MOST NUTRIMENT**, "Sunbeam" being **THE WORLD'S BEST QUALITY**, is the food that you should always use and recommend to **INSURE** the best results. We cater to Naturopathic Institutes, Health Resorts, etc. It will pay you to call and see us, or write for information and prices on foods to meet your particular requirements.

AUSTIN, NICHOLS & COMPANY, Inc., NEW YORK CITY

THE LARGEST IMPORTING, MANUFACTURING WHOLESALE GROCERY CONCERN IN THE WORLD

Life-Rock Improves All Crops

A pulverized, volcanic magma, *Life-Rock* contains the ten (10) tissue-building mineral salts, viz.—sulphur, phosphorus, potash, sodium, magnesium, calcium, manganese, aluminum, iron and silica. It is something like Phonolite (German "Stonemeal"), but much better in several ingredients. Has aseptic, neutralizing function for infected soils, as well as invigorative and restorative powers.

Life-Rock is a remarkable plant-food, enhancing the size, color, flavor, and keeping-qualities of all crops. Eliminates cutworms and red spiders; arrests blights, rots and fungi diseases. Recommended for all uses, from house plants to all kinds of fruits, vegetables and cereals. Adapted for soils in all climates. Improves germination of seed. Highly indorsed by growers under glass, and by intensive farmers for soil invigoration and crop improvement.

Reliable agents wanted in all communities to take orders and explain the wonderful powers of *Life-Rock*, as proven by many authoritative testimonials.

Life-Rock is put up in various sizes, from 100 lb. bags down to 22 oz. cans, and prices are comparatively low. A trial package, enough to be used on window plants, etc., will be sent postpaid upon receipt of 25 cents.

Correspondence solicited. Write at once for particulars.

KNEIPP HEALTH FOODS

Father Kneipp supplemented his hydropathic ablutions for the cure of disease with a simple vegetarian regimen, prescribing only such cereals and garden produce as had not been robbed of their mineral constituents, so necessary to the health and vigor of humanity. There is nothing in the Kneipp list of foodstuffs, even where cooked foods are offered, that will disturb the digestion, but on the contrary they will impart the greatest strength and activity to the body. It is well in this artificial, pretentious and expensive age to have one sane, clear voice calling man to a repast so simple as that recommended by Father Kneipp.

KNEIPP PREPARATIONS

Coffee-Malt, Genuine Kneipp.—Perhaps the most popular of all the Kneipp foods. Pure malted barley, flavored with caffeine, roasted by a specially patented process, and sealed in one-pound sacks. Any chemist will tell you that caffeine, the dainty, volatile aroma, is very different from caffeine, the deadly poison; any dietist will tell you that both malt and barley are invaluable, the diastase of the one facilitating the assimilation of the other; and any rationalist will maintain, given a thorough trial, the inherent superiority of the malt-coffee over the pseudo-hygienic drinks foisted as coffee-substitutes. One pound, 20c; 2 lbs., 38c; 4 lbs., 75c; 8 lbs., \$1.50; 25-lb. case, \$4.50 50-lb. case, \$8.75; 100-lb case, \$17.50.

Egg-Noodles.—Father Kneipp's favorite dish. Unadulterated; made from best whole-wheat flour and fresh-laid eggs. Used extensively in sanitariums, but just as wholesome, palatable and satisfying for family and individual use. A delicious substitute for macaroni, spaghetti and like products of dirt and white flour. Pound box, 35c; ½ lb., 25c; three kinds.

Elderberry Wine.—Recommended originally by Father Kneipp, and latterly by many eminent physicians, sets the stomach a-hungering, the liver a-functioning. Has valuable sudorific properties. To be used as a beverage, tonic, food. Quart bottle, \$1.00; pint, 60c.

Honey-Wine (Mead). Father Kneipp. The nectar of flowers distilled for the nourishment of man. A direct bequest from the early Germans, and a famous factor in their sturdy strength and proverbial longevity. Tones the stomach,

promotes digestion, enhances appetite. Has a most salutary effect on blood, kidneys, and bladder. Honey is one of the few foods whose assimilation begins directly on entering the mouth. Noticeable heat and energy are its immediate effects, and in cases of intestinal or biliary difficulty, it is an adequate substitute for starches and fats. Quart, \$1.00; pint, 60c. Pure imported, quart, \$1.25; pint, 60c.

Oatmeal Biscuits.—Father Kneipp. —Prepared with oatflour and real Swiss milk-meal. One pound of the latter equals five pounds milk in nutritive value, and far surpasses in digestive properties. Children, convalescents, and dyspeptics may include these biscuits in their dietary with entire impunity, perfect confidence, and the most gratifying results. 25c the package.

Soup Flours.—Father Kneipp.—Not the scraps and refuse of other manufactures, seasoned highly, and labeled Frenchily, but the sturdy German pabulum of purity and power. We can commend these flours as incomparably better than the diluted, adulterated, dollar-tainted concoctions you see in the stores and the street-cars, and hear from later in some unexplained diseases, Grünkern flour, large package, 45c; small, 25c. Barley, bean, lentil, maize, oat-grits, pea, potato, rice, large package, 35c; small, 25c.

Baby Food.—Kneipp's imported, can, 40c; domestic, 20c.

Malt Coffee.—Pure malted barley. Original packages, 1 lb., 20c.; case of 100 lbs., \$17.00.

Domestic Malt Coffee.—Lust's. 1 lb., 20c.

Egg Noodles.—Whole wheat and fresh eggs. ½ lb., 25c.; 1-lb. box, 35c. In three kinds, soup, medium, and broad.

Elderberry Wine.—Appetizer, chologogue, sudorific. Quart bottle, \$1.00; pint bottle, 60c; dozen quarts, \$9.00.

Kneipp's Breakfast Tea, 40c; large, 75c.

Kneipp's Family Tea, 40c; large, 75c.

Kneipp's Aromatic Nourishing Tea, 40c; large, 75c.

A small trial package in paper bag of any of the three Kneipp Table Teas for 15c.

Kneipp's Honey Nuts.—Delicious and strengthening, ½ lb., 30c; 1 lb., 45c.

Kneipp's Honey-Wine (Mead).—Original German. Quart bottle, \$1.00; pint bottle, 60c; dozen quarts, \$9.00; 2 dozen pints, \$10.50.

Kneipp's Honey Wine (Mead).—Imported. Quart, \$1.25; pint, 70c.

Kneipp's Oat-Flour.—Best for growing children. 35c and 25c. Kneipp's Oatmeal Bonbons.—Coughcure and confection. Box, 25c.

Kneipp's Oatmeal Biscuit (with Swiss milk-meal). Package, 15c and 25c.

Kneipp's Roasted Flour Soup.—Highly nutritious. 2 portions, 15c; 4 portions, 20c.

Kneipp's Whole-Wheat Zwieback, imported, 45c.

Kindly mention Directory when ordering merchandise.—Information on any article listed without manufacturer's or dealer's name obtainable from Naturopathic Center, 110 East 41st St., New York

You Do Not Wish to Swallow Medicines

but prefer to regain and maintain your health by observing Nature's Laws as to proper living, proper diet, etc. That our foods are too poor in the necessary *physiological salts*, has always been claimed by our great Nature Cure physicians like Bilz, Platen, Kneipp, Lust and others. Therefore they gladly accepted the proven theories of the great *Julius Hensel* and put them to work in their daily practice.

Platen, in his famous work: "Die Neue Heilmethode" supplement, pp. 688-709 mentions the subject, fully describing the absolute necessity of the daily use of nutritive salts. Here are a few of his convincing arguments: *Hensel's* cardinal principle is this: The more ash and earth substance our blood contains, the better it will oppose decomposition, which means

that it will resist disease so much better. If we increased the mineral constituents of our blood, the degeneration of mankind would be greatly retarded; diseases due to decomposition of blood and lymph would be gradually diminished and disappear entirely. When to this feeding of mineral constituents to our blood be added the external applications of Nature Cure, diseases would much quicker and surer be changed to cures. Besides ordinary table salt, *Hensel's* hygienic food addition (called Nutr-Ad. in this country) should be found on every table. It contains those nutritive substances which are absolutely necessary to make normal, healthy blood, and its constant daily use will keep our blood from diminishing in mineral constituents. The more than 10 years practical experience with these plain earths and salts as Food supplements have in untold desperate diseases not only proven beyond a question the correctness of these nutrition theories, but also established the important fact that these preparations used daily by healthy people are great preventives against blood decomposition.

We offer you here these peculiar, effective and genuine *Hensel Food Supplements*, rich in both organic and inorganic salts:

Hensel Tonic, to increase the red blood cells.

Hensel Sal-Bion, to improve the blood serum.

Hensel Makro-Bion, for general weakness.

Hensel Ner-Bion, for weak nerves.

Hensel Er-Bion, for blood impurities.

Hensel Nutr-Ad., to be used with every meal.

Hensel Yoghurt, for catarrh of stomach and intestines, and to make yoghurt milk.

Hensel Schokomaya, for diseases of stomach and intestines when constipated.

Hensel's Cocoa are very rich in organic salts:

Upon receipt of price, we ship these preparations prepaid to any part of the United States and Canada. Send for our free literature. Discount to retailers.

Hensel Nutro-Cocoa, excellent for daily use in the family and for the sick.

Hensel Oat Cocoa, very nourishing, especially for children.

Hensel Banana Cocoa, fine for convalescents and weak stomachs.

Hensel Acorn Cocoa, great for those who incline to diarrhoea.

Hensel Sho-Ko-Ko, a very palatable ready cocoa; needs no boiling nor any addition. A full diet.

Price for each of the named preparations; 50c and \$1.00, prepaid.

Hensel Substitute for Coffee, should be used in every family. 35c.

No-Ko-Fe, a very fine drink, tastes like coffee, but is free from injurious caffeine. Very nutritious. 35c.

WHOLE WHEAT PRODUCTS

L. Lust. — Bread, Flour, Grain, Nut-Fruit Loaf, Rolls, Zwieback. So far as we know, these are the only entire wheat foods to be had in New York City. The Zwieback and the Nut-Fruit Loaf are adapted to out-of-town trade, and

the Flour may be sent by express. No sugar is used in the preparation of these health foods, a minimum of yeast, no lard, no white flour, and no adulterations of any kind. A crisp outer crust facilitates dextrinization and preserves the loaf fresh and moist for an unusual length of time.
 Bread, loaf, 10c; Flour, 5 lbs., 45c; Grain, 3 lbs., 35c; Nut-Fruit Loaf, 2½ lbs., 25c; Rolls, 2c each; Zwieback, 1 lb., 20c.

GENERAL LIST OF SELECT FOODS

Nutritive Vegetable Extract —
 Renders all food more digestible by adding the parts lost in its artificial preparation. For instance, white flour has lost the salts, phosphates and gluten that cling to the hull through the milling; potatoes are peeled and robbed of the strength ingredients nestling next the skin; vegetables are boiled into fibrous fatuities, while the good goes into the water that is thrown away. In short, the indispensable element that people can't see, they fail to value and make use of. This extract is tangible knowledge. \$1.00, \$2.00 and \$3.00 per jar.

What is Stamina? A new thought food. A food ready to eat. An absolute Raw Food. It conforms strictly with the Raw Food theory. Has not been subjected to heat nor the deadening effects of cooking. A Power food meal. Can be used as a Diet food exclusively. When going on a vacation, Hunting, Traveling or Camping, have a supply of "Stamina" with you and your food Problem is happily solved. Five to Six ounces furnish abundant food value, therefore makes living inexpensive and practical. It consists solely of crushed grains and Cereals combined with selected fruits and rich Nut Meats. Its true natural food character tends to assist the Human body in performing its natural functions and eliminates the cause of many ailments. The most natural prevention and cure for constipation.

Price in single one lb. Packages, 35c., postpaid, 41c.

Three lb. Cans, \$1.00, postpaid, \$1.15.

Cases of Six \$1.00 Cans, \$6.50, express prepaid.

Vegetable Milk — For bottle-fed children and for all invalids and dyspeptics needing a food containing extreme digestibility with high nutrition. 1.00 per can.

Galactenzyme Abbott. — Bulgarian Bacillus. For relief of intestinal fermentation. Bottle of 100 Tablets, 75c. Bouillon—liquid culture—12 vials, 75c.

Cocovena. — A most satisfactory substitute for the heavy, rich, expensive cocoas sold on the strength of a name. Composed of the purest cocoa and the best oatmeal preparation. Attested analysis, specified in the circulars, demonstrates the two prominent qualities—the nutritive and the assimilative. Prices, tins, 25 cups, 25c; 50 cups, 50c; 100 cups, \$1.00; 500 cups, \$4.00.

Dyspepsia Cakes. — A new and valuable food product, combining nutritive and therapeutic properties. Constipation, dyspepsia, and general atonicity of the digestive organs yield readily to the continued use of these tonic-cathartic nutritives. 50c per box.

Gluten Foods. — Government analysis proves most of the so-called Gluten and Diabetic Foods to contain more starch and other injurious elements than the average Pharisaical manufactures that everybody knows to be adulterated. This company has won official sanction of its methods and products, and is one of the few whose purpose seems to be as pure as their food is guaranteed. Biscuit, Breakfast Food, Crackers, Flour, etc.

Ko-Nut. — The best frying and shortening medium made. Pure vegetable fat, untainted by animal or other alien matter. Never gets rancid, goes twice as far as lard, heats a third hotter, has absolutely no waste, is thoroughly digestible, and is of a dainty nut-like taste, quite different from the soggy, infested loathsomeness of animal fats. The highest cookery experts commend it unqualifiedly, and the humblest housewives use it regularly. Cans, \$1.00, \$2.00, \$3.00.

Malt Food. — A distilled diastasic agent—pure sugar, pure albumen, pure peptones, pure phosphates. More of a fat, flesh and force-former than ordinary sweets and fats, and assimilated directly instead of taxing several already overburdened organs. A deliciously wholesome successor to syrup, sugar, butter, marmalade, and other common embellishments on the omnipresent "staff." Small can, 35c; large can, 70c.

Ideal Nut Food. — Three varieties. No. I, peanuts only; No. II, mixed; No. III, peanuts omitted. Nothing but nuts, and salt, and saloric—and experience. Better than butter, more fattening than milk, more strengthening than meat, and cheaper than any of them. Glass jars. No. I, 50c; No. II, \$1.00; No. III, \$1.50.

Dr. H. Lahmann, the great German Doctor who introduced the Vegetable Nutritive Salt Theory

Oatnuts.—All the kernel but the shaggy outer coat. The announcement of a new breakfast food nowadays is equivalent to an open insult—so many of them have robbed your pocket of shekels, and your duodenum of strength. Add some insignificant kink in manufacture, dig out some euphemistic title, design a unique cover, fill it with handiest adulteration, advertise it as a health food, and live in luxury while your gullible buyer wrestles with a rasped stomach, a clogged colon, and a paralyzed liver. We can countenance very few of the foods so widely sold, and commend almost none. "Oatnuts" is a gratifying exception, attested by personal use. For large nutrition, slight waste, small cost, and general excellence, it is an admirable success. 25c per box, or 2 for 45c.

Plasmon. — The only pure, soluble, digestible milk protein—Nature's nutrient. One teaspoonful equivalent to ¼-pound best beef in actually proven food value. Prescribed and lauded by the most eminent American, English, and German physicians and dietists. The history of "Plasmon" fails to show a case where, if used rightly, it does otherwise than digest, assimilate, and strengthen. Price-list testimonials, record of cases, and full description mailed on request. 1-lb., \$1.00; ½-lb., 60c; ¼-lb., 35c; Plasmon Cocoa, ½-

lb., 50c; Plasmon Biscuits, tins, 30c and 50c; Plasmon Chocolate, per tablet, 30c.

Tropon. — A vegetable albumen, ready for appropriation by the weakest stomach, and capable of sustaining life where similar preparations fail of peptonizing or dextrinizing. Convincing reports of clinical cases and satisfying statements concerning Tropon will suffice until you have made personal trial. Small box, 50c; large box, \$1.00; Iron Tropon, 75c.

Vegetable Bouillon.—Legumes are the vegetarian and valetudinarian successors of meat. The Vegetable Bouillon presents them in pure essence form, and free from the ptomaines that inevitably preponderate in meat-stocks and extracts. 50c and \$1.25.

Macerated Wheat. — Tyler's. A condensed combination food made from crushed whole wheat, nuts, fruits and other corrective foods. A highly concentrated food—very economical. Ready

Eat Your Way to Health

Use Tyler's Macerated Wheat and other raw foods like I did and get well.

Put iron in your blood and other organic mineral elements in your system so essential to life and health. That's why Tyler's Macerated Wheat with other raw foods is so successful in relieving constipation and restoring health.

After losing my health and trying many ways to regain it without success I finally discovered a combination of natural foods which very quickly started me on the road to health. For more than 17 years I have lived on Tyler's Macerated Wheat and other raw foods. In all that time I haven't had one sick day. Not an ache nor a pain. No colds. No headaches. I am past 67 years of age, but I feel younger than I did 25 years ago. I have more energy and physical endurance. I feel good and strong enough to see 100 years of age. For all this I must give full credit to my raw food diet the principal part being Tyler's Macerated Wheat. That's why I say "Eat your way to Health."

TYLER'S Macerated Wheat

Will do more than anything else to build you up in health—make you strong and vigorous—give you real life and energy—reduce blood pressure—lessen hardening of arteries—make your weight normal—make you feel like doing things, mental and physical.

A fair trial of Tyler's Macerated Wheat will convince you of its great merit. It very quickly relieves constipation which is the primary cause of nearly all diseases. Get rid of the constipation and your other troubles are bound to improve. Make yourself physically fit and you will make good and be happy—but you must have Health and a Clear Brain. You can have both by using Tyler's Macerated Wheat and certain other raw foods, which contain the organic elements necessary to completely nourish the human body—to restore health and keep you in health—to sustain at highest efficiency all the mental and physical powers. All this requires no extra expense. Usually it means real economy. You may not realize that one pound of Tyler's Macerated Wheat has as much nutritive value, and gives more human energy than three pounds of porter house steak and costs much less. Tyler's Macerated Wheat is composed of macerated whole wheat, nuts, raisins and other wholesome corrective foods. Prepared in a perfectly sanitary way and put up in just the right proportions to make a most perfect food for man. Altogether a very appetizing food. A food which contains the mineral elements our system requires, such as lime, phosphates, iron, etc., in their organic state and which are always found wanting in cooked foods. Aids digestion. Gives you a natural, normal appetite. Prolongs life. Prevents disease. Makes life worth living. Valuable suggestions given to prevent colds and rheumatism.

Read the following extracts from Letters:

They are just a few of the many we are constantly receiving.

"Your food has practically cured me of constipation, and I can't say too much in praise of it."

"At the end of the second week I could sleep better than I had for the past two years."

"Constipation disappeared and to my great astonishment other troubles so common to women, have vanished also."

"Suffered from headache 25 years—entirely cured by eating Macerated Wheat."

Names and addresses of above and others, perhaps one or more in your vicinity, given on request.

Trade Mark.

Invaluable for Nursing and Prospective Mothers.

There is nothing so good as Tyler's Macerated Wheat together with a little fruit and green stuff for relieving constipation and consequent ills which nearly every prospective mother experiences. Nursing mothers will find the Macerated Wheat of greatest value as it contains the lime, phosphate, iron, etc., in their organic state so necessary to produce rich, nutritious mother's milk—the ideal and correct food for the infant. For your own and your child's sake you cannot afford to do without Tyler's Macerated Wheat. Write for literature giving valuable information for mother's diet.

Send \$1.00 for three-pound can of food and Tyler's Raw Food Book and Health Guide; postpaid anywhere. Satisfaction guaranteed or money refunded

BYRON TYLER, 99 Gibraltar Bldg., Kansas City, Mo., U. S. A.

ESTABLISHED 1899.

to eat. 3 lb. cans. \$1.00. Prepared by Byron Tyler, 616 Wyandotte St., Kansas City, Mo. Cocoa, Nutritive (Nährsalz). — Recent experiments in the U. S. Army and elsewhere have proved chocolate and cocoa to be the quintessence of nutriment — so condensed indeed that none but the strongest digestion can appropriate and the most active body assimilate. The excessive fat clogs the liver and burdens the colon, and makes an otherwise ideal food quite impracticable for the average American. Three famous German dietists have, each in his own way, apprehended the difficulty and largely overcome it. The Hensel Cocoa (gold medal, Paris, Toulon, Berlin) contains fruit-salts which facilitate intestinal digestion and feed the nerves and brain; the Lahmann cocoa has certain vegetable vitalizers, and is perhaps of a lower valence; the

Bilz Swiss oat cocoa includes a digestible preparation of oatmeal, which intensifies, although diluting, the force-element in the cocoa proper. Pound tin (100 cups), \$1.00; ½-lb., 50c; ¼-lb., 30c. Same with oatmeal addition, ½-lb. package, 45c. Pound tin, 90c; ½-lb., 45c; ¼-lb., 30c. Plasmon Cocoa—½-lb. tin, 50c.

surface. The tuber, earth-grown and earth-fettered, may be fit food for the earth-workers, to whom muscle dominates mind, whose fore and top-brain is rudimentary, and whose horizon is defined by the first hillock. But the man who purposes, and hopes, and aspires, who is attuned to the music of the spheres, who is making his ideal the real—such a man finds in fruit the impalpably electrifying power of the Light-god, whither his face is turned. These wines are not glucose and chemical flavoring, but are the product of the genuineness that distinguishes imported preparations. Prices on application, ranging from 80c to \$2.00 the bottle.

BERHALTER HEALTH FOODS

KATHARINE BERHALTER
Vice-President

DIVERSEY PARKWAY
NEAR LINCOLN AVE.

CHICAGO, ILL.
U. S. A.

Originators and Producers of

**WHOLE WHEAT BREAD, WHOLE RYE BREAD
BRAN BREAD, WHOLE WHEAT FRUIT BREAD, MADE FROM
SELECT GRAINS, GROUND IN THEIR OWN MILLS; ALSO CAKES, PIES
AND OTHER GOOD THINGS. ALL FROM THE FORMULAS OF THE
BERHALTERS AND UNDER THEIR PERSONAL SUPERVISION.**

TRADE

MARK

BYOND question of a doubt, the Berhalters are the originators and producers of the finest and most complete line of Health Foods in the world. From a little store, opened at 309 North Avenue, Chicago, in 1908, their business has grown to its present immense magnitude. * Their great factory, located on Diversey Parkway, near Lincoln Avenue, Chicago, is a block long, and modern in every detail of its equipment.

The cleanliness and care with which Berhalter Foods are made would surprise and delight the most particular. The finest of wheat and other grains are ground fresh in their own mills for each day's output.

All who realize that it means perfect health to live in accordance with natural laws, and to eat Nature's Foods Scientifically Prepared, should investigate the work and products of the Berhalters. Catalogue and full information will be mailed FREE. Address:

IRIDIAGNOSIS

*The Science of Diagnosing
the condition of the body
from signs which ap-
pear in the Iris.*

For the convenience of students and practitioners, all the essential points of this science, together with pictures, drawings and key, have been compiled from the various works on the subject, and incorporated in a

WALL CHART

(34 x 222 inches)

This Chart is printed and lithographed on heavy, durable stock, with metal binding

CONTENTS

- 1—The relation of the Iris to the rest of the eyeball.
- 2—The structures composing the Iris as revealed by the microscope.
- 3—The surface-view of the Iris, magnified to show the most important marks and signs.
- 4—The blood-supply of the Iris.
- 5—The nerve supply of Iris, indicating how it is placed in connection with the entire nervous system.
- 6—Color changes—from normal to abnormal, and the process by which the normal color is restored.
- 7—Density changes—changes in the compactness of the texture of the Iris.
- 8—A complete map of the Iris: showing the regions of the Iris and the organs or parts of the body to which each corresponds.

A condensed tabulation of the allopathic uses of the drugs recorded in the Iris as well as the symptoms to which each gives rise. This data has been gathered from the latest works of various international authorities on allopathic therapeutics and toxicology.

In the text, the various marks and signs occurring in the Iris are divided into Color Changes and Texture Changes. The description and significance of each is given in detail.

No progressive physician can afford to be without this valuable diagnostic adjunct.

NUTS AND NUT PREPARATIONS

NEW NUT PRODUCTS

THE most nourishing, the most digestible. Marvelous for fat and blood-making, and for strength-sustaining properties.

Nuts furnish an essential constituent of a vegetarian diet. In their natural state, they are difficult of digestion, and cannot be used by many persons. We have discovered a method for rendering nuts easily digestible by even the most delicate stomach, in the preparations following.

Those desirous of subsisting on a nut diet in winter and who like to vary their diet with fruits, need not be reminded that grapes, pears, apples, oranges, bananas, etc., are always available. Then there are the dried fruits—apples, pears, prunes, dates, figs, apricots, peaches, bananas, raisins, currants, etc. To cook dried fruit, wash it thoroughly in clean water, then place it in a dish with enough water to cover it, and soak ten or fifteen hours; then, leaving it in the water it has been soaked in, put it on the stove and let it simmer gently until cooked. When nearly done, add sugar for individual taste.

Bromose makes fat and blood. This product is made of Malted Nuts, and is especially useful as a food for persons who cannot digest starch. Put up in tablets about the size of caramels. ½-lb. box, 45c; 1 lb., 85c.

Malted Nuts is a complete food, suited to all ages, and possesses the essentials of a perfect nutrient. This pure nut product

is especially desirable as a beverage or food for persons who desire a rapid increase of fat and blood. 1-pt. bottles, \$1.00; ½-pt., 55c.

Meltose is the latest triumph in the art of preparing cereal foods by natural processes, so as to render them capable of immediate assimilation. Meltose is delicately sweet in flavor, and may be eaten as freely as bread without injury. It should be substituted for cane sugar, syrup, honey, and all artificially prepared sweets. 1-lb. jar, 35c; 1-gal. can, \$1.70; ½-gal., \$1.00.

Protose, Vegetable Meat, resembles meat in color, taste, and fiber, and is the exact nutritive analogue of meat, containing about 25 per cent. more nutriment for a given weight. In form it resembles pressed chicken. 1-lb. can, 35c; ½-lb., 20c.

Nut Butter is a substitute for ordinary butter, presenting fat in the form of a perfect emulsion. Combined with water, it forms a delicious cream, and may be used for shortening of all kinds. It is a pure product of nuts, and may be eaten by those who cannot use ordinary butter. 1-lb., 35c; ½-lb., 20c.

Nuttolene, a rich, delicate, and palatable substitute for butter, prepared wholly from nuts. May be eaten by invalids who can not digest nuts in any other form. 1 lb., 35c; ½ lb., 25c.

Sanitas Food Candy, or Health Confection, made from Malt Honey, besides being an admirable substitute for sugar

RAW VEGETABLES AND RAW DIET

A list of uncooked foods, such as may be kept in store for sale, necessarily excludes a long list of green garden products that may be eaten fresh from the earth in which they grew. There are cabbage, cauliflower, onions, carrots, beets, cucumbers, melons, tomatoes, radishes, Brussels sprouts, pumpkins, parsley, asparagus, leeks, savory, lettuce, chard, etc.

Then there are the fruits—apples, pears, peaches, grapes, cherries, strawberries, raspberries, blackberries, currants, bananas, pineapples, figs, dates, prunes, apricots, oranges and lemons, all of which

are best when eaten raw, fresh from the hand of Nature.

All fruits of the earth contain nutritive mineral salts, absolutely necessary to health, and it is these salts that are washed out of the vegetable tissues by the useless and dangerous practice of cooking.

VALUABLE RECIPES

Slantic Ichor, a purely temperance beverage, contains no alcohol and is made strictly ac-

cording to the laws of Divine and natural healing. It is a drink which St. Patrick already used and enabled him to live 120 years. Slantic is from an old Celtic word, meaning the God of Health. Ichor was the name of the brew drunk by the heathen gods to preserve life. The recipe was obtained by the Rev. Father Wm. O'Shea, of Kansas City, Mo., who claims that it will keep men from the saloon and will solve the temperance and prohibition question. Being a sturdy man of grand old age, Father O'Shea bears witness at least that this creation has not been harmful to him.

The original recipe will be copied and forwarded to anyone, on receipt of \$5.00.

BATH CABINETS

Burdick Cabinet Co., Milton, Wis.

The Milton

The pearly, white enamel finish,
sanitary collarette, high efficiency
reflecting panels, perfect ventila-
tion, flush joint and seam construc-
tion by means of electric and
acetylene welding, produce a cabi-
net of great durability, beauty and
sanitation.

The Burdick Ventilating System
maintains an even distribution of
heat, preventing an accumulation
of heat in the upper portion of the
cabinet, eliminates the impurities,
and provides a method of absolute
control.

Dimensions: Width 34½ inches;
depth 39 inches; height 50 inches;
width of doors 22½ inches; ship-
ping weight 425 pounds; con-
structed in two sections for easy
installation.

Price: Complete as described, in
white enamel finish, and with high
efficiency reflecting panels, ad-
justable collarette, revolving metal
stool, 40-60-watt carbon lamps. F.
O. B. Milton, Wisconsin, \$225.00
60-watt tungsten lamps, extra,
\$7.50.

BURDICK RADIO-VITANT APPLICATORS

Applicator on Standard in Use
Can also be used as Local Baking
Cabinet.

1 Burdick Radio-Vitant Appli-
cator, with double metal walls,
asbestos interlining, rubber in-
sulated supporters, body finished in
dark green plush and hard rubber
enamels with nickel trimmings; 6
120-watt lamps (2 extras for future
use); 1 Adjustable Applicator
Standard; 1 Manual of Instruc-
tions, "Local Applications Made
Practical." Regular Price, \$35.00.
Special Introductory Price, \$21.50.
With Carrying Case, Mantle and
Compress, as illustrated, \$27.50.

RADIO-VITANT APPLICATOR TYPE "G"

TYPE "G," for general pro-
longed applications of light and
heat at moderate temperatures, and
for short intensive applications for
derivative and sweating effects.

Applicator is operated over the
hospital Cot by means of the type
"G" stand or over a permanent
treatment table by special spring
counter-balances.

The stand is easily movable on
the floor from bed to bed and Ap-
plicator is raised and lowered over
patient in bed with a simple mo-
tion of the hand.

A splendid upright Cabinet may
also be formed by coupling two of
the type "G" Applicators together
as shown in center figure on the
next page. A special feature of
this Cabinet is that no special
wiring is required.

Our "mogul" multiple socket is
recommended for permanent instal-
lation. For maximum results, 75-
watt nitro-tungsten lamps may be
used.

Dimensions: Length 45 inches;
width adjustable from 18 inches to
33 inches; lamps, 12 60-watt car-
bons, controlled by a two-circuit
switch. Weight 50 pounds.

Price, complete, \$75.00. Type "G"
stand, \$35.00. Ceiling counter-
balance, \$15.00.

Two Applicators for upright
cabinet, and including stool, cou-
pling sections, double weight can-
vass top, etc., \$155.00. "Mogul"
Multiple Socket, \$3.00.

RADIO-VITANT APPLICATOR TYPE "I"

TYPE "I," for application to
the various sections of body, as
trunk or hips and legs, is of the
same general construction as type
"G," only smaller. It has special
advantages not obtainable in any
other device for applying radiant
light and heat, for the special pur-
poses for which this outfit is in-
tended.

Cabinet "G"

Please note the important qualities of the

VACUUM-NEUROPATHIC TREATMENT, JUNOD'S HAEMOSPASIA, BIER'S HYPEREMIA.

The following sets forth in a concise manner some of the rare and invaluable qualities of the **VACUUM-NEUROPATHIC TREATMENT**, that are not possessed by any other, and which are so patent that their importance in eliminating diseased conditions are readily recognized.

This method, in addition to restoring the circulation of the blood to the diseased area, is an invaluable aid to our means of diagnosis, as it discloses, by the appearance of the blood brought to the surface, the pathological condition of the circulation and the underlying tissues. On normal structures, the treatment brings out a fine, healthy, florid color; but on all morbid parts, the color is unhealthy; it may be highly colored, angry looking red, denoting inflammation; or pallid, dead looking, of various dark hues, approaching absolute blackness, denoting congestion, stasis, deposits of debris, waste effete, and worn-out matter of the tissues, blood and nerve cells, etc., which clog the small blood vessels and prevent the blood, nutrition, from reaching the diseased area, all of which will be, by persistent, moderate treatment, dissolved and absorbed by the circulating media, and through the organs of the circulation and elimination, in nature's way, expelled from the body.

It is the only system that is able to break through the barriers to the circulation, met with in acute and chronic ailments, which is largely responsible for its many near miraculous cures of Pneumonia, Locomotor Ataxia, Asthma, Neurasthenia, Bright's Disease, Diabetes, Infantile and Adult Paralysis, Arterio Sclerosis, Vertigo, Hardening of the Spinal Cord and Arteries, Paralysis Agitans, and other serious, chronic, incurable (so-called) ailments of mankind. The blood does it all, and at the same and the one operation, supplies arterial blood and nerve vital fluids, nutrition, to the diseased area, the weakened nerves, tendons, tissues, blood and nerve cells, and absorbs the debris of worn-out tissues, nerve and blood cells, and, in Nature's way, eliminates the impurities, which are the causation, or result, of disease; an indispensable corollary, in eliminating disease and restoring health.

No other system possesses these necessary and essential features, the importance of which **Neuropaths** and **Pathologists** appreciate, and which are worthy of your careful consideration.

Our instruments are constructed on correct, scientific, mechanical lines, based on a practical experience, in their use of 50 years, which has brought them so near perfection, that their continual use under the most arduous and practical conditions develops no defects. They are always ready for immediate use and are fully guaranteed, and we invite your careful consideration of their construction and therapeutical utility.

Every physician should have our illustrated and instructive price list, which contains valuable information not obtainable elsewhere. We shall be pleased to mail it to your address.

Send postal for yours.

With the Emergency Outfit shown above and Sulphate of Magnesia (Epsom Salts), in one-ounce doses, which should always be given to cleanse the inner man and whiskey in one to four dram doses to stimulate the nervous system as required. The Physician is in a position to cope successfully with every case of Pneumonia, Meningitis, Pleurisy, Lumbago, etc.

The Physician's Emergency Outfit

which will decide Pathology and
Diagnosis for you.

Pump and Cups of Emergency Outfit

Cups, Nested to Place in Bag

Club Bag, to Carry Them in

The Emergency Outfit, Price, \$90

The Emergency Outfit, as shown above, consists of No. 90 Satchel Pump and Cups Nos. 3 to 11, inclusive. The Cups will nest together nicely and, with the Pump, will fit in the 16-inch Club Bag shown above. This makes a very convenient selection for the physician to carry to the bedside of his patient and use in case of **LUMBAGO, PNEUMONIA, PLEURISY, MENINGITIS, MASTITIS, INCIPIENT CANCER OF THE BREAST, CONGESTIONS, INFLAMMATIONS OF THE SPINE**, etc., the aching condition of the spine met with in typhoid and other fevers. All acute ailments yield readily to its potent influence. **BUT BE CAUTIOUS** not to treat too **HEROICALLY**.

Apply the cups mildly but thoroughly and persistently over and at the painful part and long enough to relieve pain, and repeat the application as often as the pain returns; usually one to four applications will suffice to cure—No medicine other than the Epsom Salts and whiskey need be given.—Prof. H. N. D. Parker.

The H. N. D. Parker Manufacturing Co.

Maryland Bldg., 1410 H St. N. W.

Washington, D. C.

ELECTROTHERAPY

The vibratory energy of the electric current, whether Galvanic, Faradic, Static, or Sinusoidal, is highly curative, and is one of the powerful adjuncts of Naturopathy. At first, electro-therapeutic batteries were of the brutal, violent type. These were followed by Galvanic belts that, after being used a short time, developed no current at all. Finally, both extremes were abandoned for machines of mild currents from the large Static machine to the pocket battery run by nitrate of silver.

One Thing Money Cannot Buy

By ROY WILSON BEAL

SOME folks imagine that the greatest thing in the world is a fat bank account and plenty of leisure time in which to spend the money. The blind man thinks the greatest thing in the world is to be able to see. The cripple thinks the greatest thing in the world is to possess a body free from deformities, aches and pains. The hungry man thinks the greatest thing in the world is to sit down to a table loaded with all kinds of good things to eat. The lover thinks the greatest thing in the world is love.

In fact, everyone thinks the greatest thing in the world is that which each most desires and is least able to obtain.

The greatest thing in the world is not money or power, automobiles or mansions; it is something money cannot buy. You may ask, "Is there anything money cannot buy?" Yes, there is. The most important, the most vital and the most necessary thing in life to have in order to be satisfied, contented and happy and able to enjoy life is to possess that "one thing money cannot buy."

What is that thing which money cannot buy?

It is HEALTH. Precious, vital, priceless health. Necessary alike for rich and poor. Attainable equally for young and old. The rich cannot be happy without it; the poor cannot be well without it. You cannot purchase it in a drug store, for it does not come put up in bottles ready to "take according to directions." Nor can you obtain it from the grocer, for it does not exist either in bulk or in packages. Those who have it rarely appreciate to its fullest extent its priceless value. Those who have lost it would give all they had in the world sometimes to get it back. A few are privileged to enjoy it without exerting apparently any effort on their part to keep it, but the majority of us

are obliged to work for it; first to acquire it and then to keep it.

Now the question naturally arises, "If I do not possess this greatest of all human blessings, where and how can I get it?" By simply devoting a few minutes a day occasionally indulging in "an internal bath" administered with the aid of a "J. B. L. Cascade." What is a "Cascade?" It is an appliance used for the administration of an internal bath and was invented by Dr. Chas. A. Tyrrell, who not only saved but prolonged his own life more than fifteen years beyond the time set by his own physicians to live and is alive and hearty today. Internal bathing is a short cut from illness to health. There is nothing laborious or objectionable about it. It is a simple, efficacious and quick method of ridding the body of those poisons which are known to multiply enormously in the colon or large intestine and directly or indirectly the underlying cause of most of our physical and mental ills.

The thousands and tens of thousands of testimonials on file in Dr. Tyrrell's office attest to the almost miraculous results obtained through the use of the "Cascade." If you will write to Chas. A. Tyrrell, M.D., 134 West 65th Street, New York City, mentioning THE UNIVERSAL NATUROPATHIC DIRECTORY, there will be mailed to you a booklet entitled "The What, the Why, and the Way of Internal Bathing," which describes in detail this appliance and how it has benefited thousands suffering from a variety of ills.

As a prophylactic means of avoiding serious or prolonged illness and as an aid in assisting Nature to restore the health of those who are ill, it has almost no equal in the realm of science. There is almost no condition of ill health that does not derive some benefit from its use. —Adv.

Semi-Flexing Shanks

PEDIFORME

All The Best Features Of All The Best Shoes Combined In One.

PEDIFORME means foot shape—uncramped anatomy.

Here's a shoe that has style and appearance—a decided improvement over all other orthopedic shoes thus far produced—a shoe that restores normal position and action to each bone and muscle—that removes the weight from the arch and distributes it to the true weight-bearing surface—the outer side of the foot. The Pediforme Semi-Flexing Shanks adjust themselves to the high arch—an exclusive feature not found in any other shoe.

PEDIFORME SHOES

Constructed on scientific and truly sensible principles, should be worn by every member of the family, including the baby.

THE RATHER-TURKISH BATH SPELLS HEALTH AND SUCCESS

A Turkish Bath in your bed for two cents, is what this invention means. Set up or take down this apparatus in one minute. Experts have investigated and tried it, and happily exclaimed that this is the missing link in the profession. No practitioner's equipment is complete without it. It beats the public baths all to pieces; is more sanitary, more agreeable and effective, besides the great economy. Here are a few patented features: It is collapsible, has rigid circulation, automatic discharge of foul air, adjustable to local treatments, is fire-proof. Dr. Conrad says: "It is six apparatus in one."

Guarantee with each bath. Ask for booklet N. Special introductory price, complete, \$18.00. Save money, buy now, and you have proven your own best friend. **DO IT NOW.**

HERBAL AND PHYSIOLOGICAL REMEDIES

KNEIPP'S HERBAL REMEDIES

THE use of herbs in connection with the natural remedial forces of Naturopathy may seem a return to the use of drugs.

but we must remind the reader that the use of herbal decoctions, extracts, washes, depuratives, purgatives, teas, oils and powders, while of immense benefit in disease when used as directed, possess no harmful results, like the ordinary drugs of the apothecary. All vegetarian menus contain foodstuffs that possess very definite medical effects. Indeed it is the lack of vegetable products possessing those mineral salts on which health absolutely depends, that is primarily the cause of disease in civilized life. If it is beneficial to include in our dietary whole-wheat mea (instead of flour), spinach, carrots, beets, asparagus, lettuce, cabbage, celery, onions, etc., primarily as chemical that is medicinal, foods why overlook those herbal gifts of nature that are complementary thereto, and that assist interiorly the energizing exterior treatments of Naturopathy?

As Father Kneipp says of them, they have, like the water applications, a three-fold aim, viz., to dissolve morbid matter in the interior, to evacuate it, and then to strengthen the organism. Both the interior and exterior cures harmonize and work together with perfect unity.

Disease thus attacked on both sides by natural weapons, that leave no painful after effects, but which are wholly beneficial, has no choice but to leave the body it distresses, just as in the old days the demon of disease was exorcised from the body it tortured, by superhuman power. The superhuman power over disease to-day is the three-fold agency of Natural Forces, Vegetarian Diet and Herbal Remedies.

for use over the scalp, for the preservation of the hair. Can be used also over the neck to fill it out, and for the throat. can be obtained.

- No. 4, Five-Wheel Roller, Bust Developer, \$3.50. The best developer made. By following the plain, physiological directions given, most satisfactory results.
- No. 5, Twelve Wheels, Abdominal Roller, \$5.00. For the use of men to reduce the size of the abdomen, and over the back. The handles give a chance for a good, firm, steady pressure.
- No. 6, Three Small Wheels, Massage Roller, \$3.50. Made in ebony and ivory, for use over the face and neck, for preventing and removing wrinkles, and restoring its contour and form.
- No. 7, Three Wheels, Facial Massage Roller, \$2.50. Like No. 6, made in white maple. In other respects the same.
- No. 8, Eight Wheels, Abdominal Roller, \$4.50. This is the same as No. 5, except with the less number of wheels. Is made for the use of women, for reducing hip and abdominal measure. With each Roller is sent Dr. Forest's Manual of Massotherapy, containing 100 pages, giving full directions for use. Price, separately, 35c.

A New Aid in the Cure of Constipation

PNEUMATIC DILATOR

**A Rectal
Exerciser
and
Prostatic
Masseur**

All parts of
soft rubber—
no metal.

Sent postpaid
on receipt of
\$3.00.

A—Bulb for inflating sacula; B—Flexible rubber colon tube; C—Soft rubber sacule; D—Valve with escape vent.

Use of Pneumatic Dilator

THIS instrument was primarily designed for giving rectal massage and toning the musculature of the lower colon.

Its function is not so much to dilate the parts, as to afford them a certain amount of exercise.

Any physician who has had experience in the treatment of chronic constipation knows that by far, the greater number of such cases are due to atony of the colon. This condition is particularly evident in the sigmoid flexure and rectum. These structures, due to loss of muscular tone, are incapable of full contraction, and accumulations of fecal matter resulting in impactions throughout the entire colon is the usual occurrence.

The effect of the pneumatic dilator is that of a mechanical irritant to stimulate the visceromotor reflexes and restore tone to the musculature of the colon. It also has the effect of massage treatment upon the mucous membrane and sub-mucous tissues by emptying out the intercellular infiltration, thus establishing better tissue circulation. No greater amount of dilation or stretching of the colon or sigmoid by the use of the dilator is necessary, as the effect is produced by the rhythmic action established through alternate inflations and deflations of the sacule.

TECHNIQUE. The Dilator should be used after an evacuation, or after the rectum has been cleansed by the use of a hot soapy enema. A super-fatted alcohol soap, or one free from alkali, is best for this purpose. In giving such an enema for the cleansing of the lower bowel, use a flexible rubber colon tube, inserting it about twelve inches. Inject one quart of soapy water at a temperature as hot as the hand can bear it. After the evacuation which the enema produces, use the dilator. To lubricate the sacule and colon tube of the dilator, use soap. Do not use oil or vaseline, as it will rot the rubber. Insert it about eight inches into the rectum, using great care not to force it. When inserted too suddenly, it is likely to double back or coil up in the rectum. Hold the bulb in the right hand with the thumb covering the escape valve. Press upon the bulb until the sacule is inflated, or until the patient feels the pressure. Perform this first inflation gradually, so that the sacule will have an opportunity to conform to the part. Now raise the thumb and allow the air to escape. Continue treatment by alternately inflating and deflating the dilator for from three to seven minutes. A little practice will enable the operator to manipulate the instrument to make its action correspond to the normal vermicular motion of the intestines. Daily treatment is advisable, until normal movements are established.

THE *Koesel'sche Buchhandlung* in Kempten, Bavaria, has made arrangements with the undersigned for the establishment of a general distributing agency of S. Kneipp's hydropathic works.

The immense success of S. Kneipp's system of hydropathic treatment and the enormous sale of his works throughout Europe will no doubt encourage the Trade to introduce these works on a larger scale to the American public.

The following books can be furnished in paper cover and in better binding: "My Water Cure," "Thus Shalt Thou Live," "My Will," "Codicil to My Will," "The Care of Children," "Plant Atlas," etc. Most of these standard German works have been translated into English, French, Italian, Polish, Bohemian, Spanish, Portuguese, Hungarian and other languages.—More particulars contained in Schaefer's catalogue, which will be mailed gratis on application. This catalogue also enumerates the remedies recommended in Msgr. Kneipp's works, such as: CURATIVE HERBS, *Roots, Berries, Leaves, Barks*, etc., put up hermetically in tin boxes. *Powders, Tinctures, Oils, Pills*, in small glass bottles.

Two Excellent Food Articles for daily use: MALT COFFEE and STRENGTH GIVING FOOD. From a large number of letters of recommendation, I quote the following:

"Your Malt Coffee is an excellent substitute for coffee in all cases of catarrhal disease of the bowels and stomach, where common coffee seldom agrees, viz., in cases of weak stomach and chronic diarrhoea. Furthermore, it is recommended for nervous people, as it does not have the irritating qualities of ordinary coffee; and besides, it deserves preference on account of containing real nourishment, whereas common coffee contains none. In all cases where physicians forbid the use of ordinary coffee, your Malt Coffee can be used instead with great benefit."—DR. ACULARIUS.

Boston, Mass., Nov. 17, 1913.

"Dear Mr. Schaefer: Last summer I was completely run down and unable to do any work. At that time my attention was called to the "Strength Giving Food" which Msgr. S. Kneipp so highly recommends in his works. I at once ordered a quantity of it. Its use has benefited me so much that I am now able to perform my duties and ordinary work as before my collapse."

REV. P. J. M. SCHLEUTER, S. J., *Holy Trinity Church.*

Messrs. Oberhäuser & Landauer, of Würzburg, Germany, are the Sole Manufacturers in the World of the Only Genuine Rev. Seb. Kneipp's Remedies. Customers are therefore requested to observe closely that all such remedies are done up in stamped wrappers bearing the signature of Oberhäuser & Landauer, Würzburg, as also the registered Trademark (the picture and signature of Rev. Kneipp) on every package. If, therefore, the packages are marked differently, our customers are warned that they are fraudulent imitations. General Depot for the United States of America: Kneipp Health Store Company, 110 East

41st Street, New York. All the following Herbal Remedies and Specialties are prepared in accordance with Rev. Seb. Kneipp's own directions, now under the supervision of his successors, from the very best herbs to be obtained. Rev. Father Kneipp recommended in conjunction with the Water Treatment for all diseases the simultaneous use of the hereunder mentioned specialties:

Kneipp's Eye-Bright (Augentrost) has proved itself most beneficial for diseases and inflammation of the eyes, caused either by purulent lesions or by weakness. To be diluted with 5 parts of water and applied 3 times a day to the sore eyes with a clean linen rag or absorbent cotton. Price 50c; postage, 7c.

Kneipp's Arnica Salve, used with excellent results, in soreness of the skin, eczema and recent small wounds. Price, 35c; postage, 3c.

Kneipp's Depurative Tea (Blutreinigungsthee) is the best depurative; it rids the blood of morbid matter and acts slightly upon the bowels. For a radical depuration of the system in case of eruptions, itch, lupus and cancerous affection, this tea must be used for quite a long while and suitable applications of water be made at the same time, to insure a radical cure. Each package contains directions for use. Price, 55c; postage, 5c; large, \$1.10.

Kneipp's Cholera Drops (Cholera-tropfen) are an excellent remedy for diarrhea and diarrhea with vomiting, cholera or cholera. One tablespoonful 4 or 5 times a day. Price, \$1.00; postage, 10c.

Kneipp's Pine Sprig Honey and **Kneipp's Fircone Honey (Tannen- und Fichtennadelhonig)**. Excellent for all ailments of the throat, hoarseness, coughs, colds,

etc., etc. Price, per bottle, 50c; postage, 10c.

Kneipp's Frangula Extract, a most excellent remedy in cases where persons object to taking pills, but where a regular stool is desirable. Children should take about $\frac{1}{2}$ a teaspoonful, adults from 1 to 2 teaspoonfuls. Price, 55c; postage, 10c.

Kneipp's Gout Embrocation (Gicht- und Rheumatismusmittel) is the best embrocation for gouty and rheumatic pain. Apply 3 times a day. Price, \$1.00; postage, 10c.

Kneipp's Antidiabetic Pills (Heidelbeerblätterpillen). Made from the extract of leaves of Bilberry. It is both an efficient remedy and easy to take. Used for "Diabetes mellitus", 3 pills 3 times a day. Price, 50c; postage, 2c.

Kneipp's Antidiarrhea Pills (Heidelbeerfruchtpillen). Made from the fruit of the Bilberry. Used in diarrhea, catarrh of the bowels or of the stomach. For adults and children, 3 pills 3 times a day. Price, 50c; postage, 2c.

Kneipp's Cough Drops (Hustenbonbons). These Cough Drops are made from the extracts of Father Kneipp's best herbs, and prove very salutary for coughs, hoarseness, catarrh of the throat, etc., etc. Price, 25c; postage, 3c.

Kneipp's Cough Tea (Hustentheee). This is an excellent remedy for all cases of catarrh of the respiratory organs; it cannot be too highly recommended to those who suffer from the chest, throat or lungs. We have seen the most obstinate cases of catarrh disappear in a few days, especially when the appropriate applications of water were made at the same time. Full directions inclosed in each package. Price, 55c; postage, 5c; large, \$1.10.

Kneipp's Pomade of Marigold (Calendulasalbe), for the cure of sores and wounds of all kinds. Directions for use on the box. Price, 35c; postage, 3c.

Kneipp's Whooping Cough Extract (Keuchhustensaft). This excellent remedy is prepared from Thyme and Chestnut extract, and is mixed together with other cough-stilling herbs. It gives immediate relief and effects wonderful cures in the most obstinate cases. Price, 50c; postage, 10c.

Kneipp's Bone Powders. Nourish the blood and the bones, strengthen the nerves. There is no powder used in any ailment which is as easy to digest as this one, so that even little children and adults with the weakest stomachs can take it without disturbance. From this property may be attributed the marvelous cures often produced in anæmic persons, scrofulous and rachitic children, and in cases of nervousness and nervous headache and vertigo. Kneipp has three kinds of Bone Powder: 1. The White Powder is the best remedy for nervousness, nervous headache, anæmia and vertigo. Price, 50c; postage, 5c. 2. The Gray Powder is the best remedy

for lung, kidney and bladder diseases. Price, 50c; postage, 5c. 3. The Black Powder is the best remedy for scrofulous and rachitic children. Price, 50c; postage, 5c. Children take a small pinch of powder, adults a quarter of a teaspoonful 3 times a day, during meals.

Kneipp's Cramp Drops and Cramp Tea (Krampfthee und Krampftropfen). The best remedy for cramps of all kinds, especially of the womb, and a good anti-hysterical remedy. Three times a day one teaspoonful of the Drops in a cup of Cramp Tea. Price, 55c each; postage, 5c.

Kneipp's Magentrost (Stomach Elixir). This excellent stomach elixir is prepared from the choicest and purest of Kneipp's herbs, and is used to great advantage in all stomach disorders. Will effectually cure Dyspepsia and Indigestion, Loss of Appetite, Acidity, Vomiting, Diarrhea, Spasms, Wind, Colic, etc. Sold in three sizes of bottles. Prices, 50c, postage 7c; \$1.00, postage 10c; \$2.00, postage 25c.

Kneipp's Nerve Tonic (Nerventrost), for nervousness and sleeplessness, according to prescription by Dr. Baumgarten, Würzburg. Price, per bottle, \$1.00; postage, 10c. The celebrated essay on sleeplessness and nervous affections by Dr. Baumgarten, in English or German, price, 15c., should be bought with each order.

Kneipp's Tincture for Travelers (Reisetropfen). Recommended by all who have used it. Price, \$1.00; postage, 10c.

Kneipp's Pectoral Syrup (Hustensaft). Made from the juice of the plaitain and extract of malt. A splendid remedy for coughs, sore throat, and all affections of the respiratory organs. Three times daily a teaspoonful. Price, 50c; postage, 10c.

Kneipp's Pocket, Home and Traveling Apotheke (Haus- und Reise-Apotheken) contains, practically arranged and prettily fitted up (in the shape of a cigar case), 8—16 articles, with exact directions for using all of them, ready and convenient for immediate use. Almost indispensable at home and abroad. Prices, \$1.00, \$2.00, \$3.00; postage 5c, 15c, 25c. Larger ones for home use in elegant cabinets, from \$10 to \$25.

Kneipp's Diuretic Tea (Wassersuchtsstee). A highly pronounced diuretic hydragogue. Its virtues have often been proven in cases of dropsy, diseases of the kidneys (Bright's Disease), and diseases of the bladder (stone, gravel). Each package contains directions for use. Price, 55c; postage, 5c; large, \$1.10.

Kneipp's Wormwood Eye Salve. This Honey Salve was used by Father Kneipp with the greatest success in cases of cataracts, weak eyes, etc., etc. Price, 40c, with accurate directions for use. Glass rod to apply the salve with, 10c. Price, together, 50c; postage, 6c.

NATURE'S BATH POWDER

RADIUMACTIV. An inexpensive Natural **MINERAL POWDER.** Can be used in any **HOME BATH TUB.** Endorsed by the American Naturopathic Association, and individual Practitioners.

The therapeutic value of radio-activity has been established. **RadiumactiV** is an aluminum-iron-magnesium silicate (lime, sodium, potassium), possessing decided radio-active and electro-magnetic properties, in that it has the following properties:

Its radical energy can be measured by the radiometer.

When burned in the flame of an arc-light, it imparts a carmine color, which is a distinguishing property of radium.

Discharging a negatively charged electroscope.

Magnetizes and imparts radio-activity to surrounding objects.

THERAPEUTICAL ACTION

An application of **RadiumactiV** promotes healthy circulation of the blood by stimulating molecular activity. It destroys pus and bacteria and liberates toxins, and by the specific action of its light, heat, electric and magnetic properties, changes the pathological conditions into healthy tissue. It revivifies cell protoplasm and prepares the way for the action of the phagocytes.

It lowers blood-pressure, increases sexual vitality, has a solvent action on gouty deposits, and influences sympathetic nervous affections, such as neurasthenia and allied conditions. It is strictly ethical and when used as indicated, it will bring results.

Being a radiferous substance, **RadiumactiV** is indicated in all painful conditions or disturbed equilibrium of living tissue, from pus infection to epitheliomata and malignant growths. The magnetic properties, when carried into the tissues by the radio-active energy, are antiseptic, cooling and soothing, creating, as it were, a double therapeutic action with the rays, establishing nervous and vascular equilibrium which hastens the elimination of toxins. It is indicated in acute and chronic **Neuritis, Rheumatism, Neuralgia, Pneumonia, Pleurisy, Pleurodynia, Sprains, Deep Seated Abscesses** (of septic origin), **recent Contusions, open Sores, Burns, Bolls, Felons, Skin Diseases** of whatever nature, **Pruritis**, (itching of any part), **Proctitis, Synovitis, Lumbago, Mastitis, Hemorrhoids**, and all **Catarrhal conditions**.

Diseases of the rectum and vagina are reached by means of capsules or suppositories. Prescribe hot baths in which a half pound of **RadiumactiV** powder has been used. These will be valuable in **Arterio-sclerosis, Rheumatism, Bright's Disease, Diabetes, Neuritis**, etc. They reduce the blood pressure, relax the arterial walls, stimulate cutaneous reflexes, equalize the circulation, and through the sympathetic nervous system, aid digestion, relieve abdominal stasis and constipation, promote metabolism, etc.

IT DOES NOT INTERFERE WITH OTHER TREATMENTS

Literature, Reference, Price List, and Free Sample for the Asking.

RadiumactiV, for Baths in the Home. Can be Sold and Directed in Connection with Treatments by Practitioners.

The RadiumactiV Company

31 SOUTH FOURTH STREET

COLUMBUS, OHIO

Kneipp's Wörishofen Herb Tea, or dietary, nourishing and strength-giving tea (Wörishofener Nahr- und Kraft-Thee). This very valuable nourishing and strength-giving tea was used by Father Kneipp to a great extent, and with constant success for weak patients, convalescents, anæmic persons, for improving the appetite and physical strength. The best substitute for any breakfast tea. Price, 55c.; postage, 5c.

Kneipp's Naturopathic Family Tea (Kneipp's Familien-thee) is the very best substitute for China tea. It is prepared from the choicest herbs, is guaranteed not to be injurious to the nerves and is much cheaper than the other. It is mixed and prepared to taste similar to Chinese tea and is served in the same way. We cannot recommend it enough to all housewives and dyspeptics. Prices, sample package, 50c.; postage 2c.; ¼-lb. package, 55c.; postage, 5c.; ½-lb. package, \$1.00; postage, 10c.

Kneipp's Liver Regulator No. 1 (Tonic Laxative I, or Wühlhuber No. 1). This is a strong purgative, which cleanses the stomach and bowels of all morbid matter. It must be rarely used, that is, only in cases of necessity. Put one-half to one tablespoonful in a cup of boiling water, let it draw during a quarter of an hour. This tea is taken either hot or cold at bedtime. Price, 40c.; postage, 5c. **Tonic Laxative No. 1,** made up in pill form, 50c.; postage 2c. **Kneipp's Liver Regulator No. 2** (Tonic Laxative II, or Wühlhuber No. 2). This tea has less purgative properties than No. 1, but acts especially upon the kidneys and the bladder. It is employed with great success in the beginning of dropsy and in affections of the urinary canal, also in acute pains of the bladder and the kidneys. It is prepared and taken in the same manner as No. 1. Price, 40c.; postage, 5c. Made up in pill form, 50c.; postage, 2c. Those persons who cannot take the Liver Regulator on account of its bitterness, may take instead:

Kneipp's Pills. They are free from all injurious aperients, being exclusively composed of herbal ingredients, and are universally considered the best for keeping the bowels open without weakening the stomach. These same herbal ingredients were used by Rev. Seb. Kneipp at Wörishofen in his treatments. The pills may be taken for years without injury to the system, and with only beneficial results. It is therefore easily explained why our Kneipp Pills are recommended by celebrated professors, medical men, the followers of the Kneipp Treatment, and by the public at large, and that they are preferred to any other pills or laxatives. The Kneipp Pills are the best and most pleasant laxative of the world. On account of their efficiency in most stubborn cases of constipation, indigestion, piles, giddiness, and all complaints of the liver, Father Sebastian Kneipp has given to Oberhäuser & Landauer, of Würzburg, the

exclusive right to denominate same with his name, and to attach his picture and signature, registered as a trade-mark. Price, 50c.; postage, 2c. **Directions for Use:**—1. To procure a regular opening of the bowels, which is particularly desirable with women, take 2 pills at bedtime (for the first time 3 or 4 pills are often necessary). 2. To prevent wind and spasms, take a pill in the morning. 3. To procure a thorough cleansing of the bowels, take 2 pills at bedtime and 3 or 4 pills in the morning. Persons of very strong constitution require in these 3 cases one or two pills more. The pills usually act after 12 hours, in some cases 24 hours. The best way of taking these pills is to swallow them as they are, or wrapped up in a wafer with some water.

Okic's Woerishofen Gout Cure is an unfailling safe remedy for gout, rheumatism (joints and muscular rheumatism), sciatica (hip pains), and sick headache. Two years ago I made a trial on myself and other patients, and every time with the best results. The Gout Cure is based on Father Kneipp's principles, and is, in the eyes of the law, neither a medicine nor a secret. It is used externally. Full directions with every bottle. Large bottles, \$3.00; small bottles, \$2.00. Can be sent only by express.

Okic's Woerishofen Tormentilla Soap.—The finest and best in the world. Okic's Tormentilla Woerishofen Soap is the best Toilet Soap of the age. It is not only cleansing, but also medicinal. It cures eruption of all kinds, chapped or rough skin, comedones, blackheads, dandruff, and especially salt rheum and eczema. A sure cure for itching piles. It makes the skin soft and tender, and is also very economical. To obtain quick and certain results in cases of freckles, salt rheum and all other skin diseases, let the lather dry on afflicted parts. Price 35c.; postage, 4c.; five for \$1.35 postpaid. The Okic's Woerishofen Tormentilla Soap is unadulterated and perfectly neutral, i. e., it is free from carbonic acid and caustic alkalies. It has the qualities of a good and mild toilet soap. Dr. C. Huggenberg, Examining Chemist for the Soap Manufacturers' Union, P. S.—My hand was very badly swelled, the result of a painful bruise. I saturated a piece of wet linen with the soap and tied it on over night. Next morning the swelling had all disappeared. S. M. W.

Okic's Improved Hair Invigorator (Lotion).—Okic's Improved Hair Invigorator is a sure remedy to prevent the hair falling out; it produces a luxurious growth of hair; it keeps the scalp clean and healthy, and strengthens and invigorates the roots. It is compounded of pure vegetable extracts, and cannot be injurious under any circumstances. Price per bottle, with directions for use, \$1.00.

Okic's Tooth Powder (Dentifrice).—Okic's Dentifrice is prepared of pure vegetable matter. It has

all the qualities of good tooth powder, containing nothing injurious to the teeth or gums. Price, 45c.; postage, 4c.

Okic's Antiridine.—This is a beautifier which banishes freckles, corrugations and wrinkles, makes the skin soft and smooth. Where other means fail, this often helps. It has the property of never destroying the tissues or irritating the skin. Only genuine when the box bears the names of the inventor and manufacturer. Price and directions for use, 45c.; postage, 4c.

Okic's Tormentilla Cream.—Best salve for all kinds of wounds, sores, rough skin, friction, etc. Price, 50c.; postage, 5c.

Okic's Mosquito Cure.—10c., postpaid.

Kneipp's Sloe - Blossom Extract. Best remedy for moving the bowels and purifying the blood of little children. 50c.

Kneipp's Bean Pod Extract, for gout and kidney diseases. \$1.00.

Kneipp's Loam Salve, for exanthema, impetigo, serpigo, old sores, etc., etc. 40c.

Kneipp's Toothache Drops. 30c.

Kneipp's Pitch Plaster, for lung and chest diseases, rheumatism, gout and lumbago. 20c.

Kneipp's Tapeworm Remedy, made of fresh fernroot, best and safest remedy for adults, \$3.; for children, \$2.; cures without fail.

Kneipp's Tormentil Sugar, for weak and sick eyes. Unexcelled conjointly with the water cure for atrophy of the optic nerves. 50c.

Kneipp's Frangula Extract, for all catarrhs of the respiratory organs. 50c.

Lanolin Cream, for sore hands, etc. 20c.

Lumbago Plaster. 15c.

Mana-Juice (Manasaf). Acts still milder than Sloe-Blossom. 50c.

Mustard Plaster. 5c.

Suet of Deer, for sore, foul feet. 20c.

Worm Chocolate for children. 20c.

Okic Woerishofen Gout Cure (Kneipp Formula), \$2 and 3.00

Okic Woerishofen, mosquito Cure. Each 10c., 5 for 45c.

PLANT EXTRACTS AND BATH ADDITIONS

Magic Bath for Rheumatism, Gout, Eczema, etc. Price \$1.25.

Box of 1 Dozen, \$10.00.

Shave-grass Extract. Price 50c., postage 10c.

Hay-flower Extract. Price 50c., postage 10c.

Oats-straw Extract. Price 50c., postage 10c.

Pine-sprigs Extract. Price 75c., postage 10c.

All the above extracts are manufactured from the very best herbs and are used for packs, poultices, vapor baths, sitzbaths, etc. They are imported from Germany, as the plants themselves would arrive here in a damaged state from their long transport.

OILS, POWDERS AND TINCTURES

Imported in tin boxes or bottles, containing 100 grams each, packed by the only authorized manufacturers of Kneipp Remedies, Messrs.

The Magic Bath Preparation

Has received the endorsement of many eminent physicians. Dr. Benedict Lust says, "I am using your Magic Bath Preparation with remarkable success in my sanitariums in Butler, N. J., and Tangerine, Fla. It has a most wonderful effect in hastening the elimination of poisons in rheumatic cases. The patients claim a feeling of remarkable revitalization after a Magic Bath. This remedy should be more widely known."

Superior to Turkish and Mineral Baths

Dr. B. O. Kinnear, a prominent physician in one of the leading Sanitariums in the United States, says, in part: "I consider The Magic Baths superior to any of the well-known Springs so extensively advertised; also, as a hygienic measure to be regularly or occasionally employed by persons in fair health, I consider them superior to Turkish, Russian or Vapor Baths; being able to enjoy them in your own bathtub, the possibility of contagion of Tuberculosis by inhaling the breath of other patients who may be afflicted with this terrible malady is entirely eliminated."

The Magic Bath produces more profuse perspiration, and is therefore more depurating or cleansing in its effect. It does not relax the system, but produces a tonic effect and a delightful sensation of vigor. It secures perfect equalization of the circulation, glandular activity is increased, elasticity and power given to the muscles, and a permanent, stimulating and tonic influence imparted to the system, a condition at once conducive to the enjoyment and prolongation of life.

DESCRIPTION: The *Magic Bath* is a *Health Bath*, prepared from Herbs and Vegetable matter. Results are quick and permanent. Testimonials from prominent people sent on request. It is registered and protected, put up in Three Oz. Bottles. Labels, Green and Black; every bottle is sealed with a stamped Seal (Red). See that it is not broken. It is guaranteed under the pure Food and Drug Law, Serial 4858.

It is not sold to Druggists, but can be obtained from the Sole Agent in your City, or direct; sent postpaid upon receipt of price, \$1.00 per bottle; 1 dozen, \$10.00.

DR. SCHÜSSLER'S BIOCHEMICAL TREATMENT OF DISEASE

The Twelve Tissue Remedies of Biochemical Treatment otherwise known as "Cell Salts."

This new treatment of disease based upon Biochemistry, is gaining rapidly in acceptance by leading physicians, and many of the intelligent public everywhere.

These tissue builders are really cell food—not medicine—not drugs—absolutely harmless. They are absorbed by the system when needed, and thus, effect cures.

Dr. Schüssler based his theory upon the following considerations:

The human body is made up of cells. Various kinds of cells build up the different tissues and organs of the body. The difference in the cells is largely determined by the kind of inorganic salts which enter into their composition. These are the inorganic constituents of the body; the salts of iron, magnesia, lime, etc., which build up its tissues. Because they are the tissue builders, both the structure and vitality of the body depend upon their proper quantity and distribution in every cell.

These Tissue Remedies are inorganic cell salts, prepared by trituration, to reduce the particles to such a degree of minuteness that they may be absorbed by the delicate cells wherever needed.

Health is the state of the body

when all the cells are in a normal condition, and they are kept in this state when each of them receives the requisite quantity of the needful salt for its upbuilding.

Disease is an altered state of the cell, produced by some irregularity in the supply to the cells of one of the inorganic tissue salts. Imperfect cell action results, diseased tissues and organs follow, and all the phenomena of disease are developed.

The cure consists in restoring the normal cell growth by furnishing a nominal dose of the cell salt requisite to the restoration of proper molecular motion. To do this successfully, it is necessary to know what salts are needed for the upbuilding of the different tissues and for their normal action.

By giving a tissue remedy in such a dose as can be assimilated by the growing cells, most wonderful and speedy restoration to healthy function is brought about in every case of curable disease.

All diseases that are at all curable may be successfully dealt with by means of the tissue remedies properly prepared to the needs of the organism.

It is claimed by some that the whole success of Homeopathy is attributable to the fact that the remedies used, often contain some of these cell-salts.

The cell of each tissue group receive their own special and peculiar cell salt; for instance, those entering into the promotion of nerve cells are Magnesia, Potash, Soda and Iron; of bone cells, Lime, Magnesia and Silica, etc., etc., which are, as a rule, extracted by the body from the food we take.

There are twelve Tissue Remedies—the twelve inorganic salts found in the ashes of the body—all essential to the proper growth and development of every part of the body. They are those of Lime, Calcarea Phosphorica; of Iron, Ferrum Phosphoricum.

Phosphates of Potash, Kali Phosphoricum; of Soda, Natrum Phosphoricum; of Magnesia, Magnesia Phosphoricum.

Chlorides of Potash, Kali Muraticum; of Soda, Natrum Muraticum; of Lime, Calcarea, Sulphurica.

Sulphates of Soda, Natrum Sulphuricum; of Potash, Kali Sulphuricum.

Fluoride of Lime, Calcarea Fluorica and Pure Silica, Silicea.

THE CHIEF USES OF THE TWELVE TISSUE REMEDIES

Kali Phosphoricum

The great remedy for all forms of nervous debility. It is indicated in all diseases or symptoms arising from want of nerve power, brain exhaustion, neurasthenia, sleeplessness, want of energy, irritability, lack of confidence, gloomy forebodings, morbid fears, hysteria, hypochondriasis, melancholy, etc. Nervousness, Neuralgia and pains generally, especially in those who are run down. Headache in delicate and excitable, nervous patients. Paralyzing pains in limbs. Also the remedy for every offensive

discharges, offensive ulcers, etc. It is the remedy for all nervous people, curing their headaches, neuralgias, sleeplessness, despondencies and pains.

Ferrum Phosphoricum

All ailments arising from disturbed circulation, fevers, inflammations, congestions; thus, whenever heat, pain, redness, throbbing, quickened pulse are present. The first stage of all acute diseases, colds, pneumonia, pleurisy, bronchitis, croup, diphtheria, diarrhoea, rheumatism, etc.

It is best and surest remedy for colds on the chest in children, whether simple, catarrhal affections or going on to pneumonia.

Nosebleed always calls for it, or any hemorrhage from any orifice of the body. It is an excellent remedy for wetting of the bed in children.

Magnesia Phosphorica

Chief remedy for nervous complaints of a spasmodic nature. All ailments with intense pains, darting, spasmodic, constricting. It is the great anti-spasmodic remedy; hence in convulsions, colic with flatulence, St. Vitus' dance, spasmodic cough, cramps, neuralgic palpitation, toothache, writers' cramp, etc. Chief remedy for babies' colic. In severe cases, dissolve in a little hot water, repeating the dose every fifteen minutes until relieved.

Calcarea Phosphorica

The great remedy for the young and growing. Indispensable during dentition and puberty. The tonic after acute diseases and for constitutional weakness, consumption, emaciation, bone diseases, and all ailments that prove obstinate. Slowly developing, weak children, chlorosis and difficulty during menstruation, leucorrhoea and pains during menses, especially in young girls. The great remedy for transition periods of life—dentition, puberty, old age.

Natrum Phosphoricum

that arise from an acid condition of the system. It is especially suited to young children who have been fed with too much sugar and suffer from acidity. Dyspepsia, acid risings, sour vomiting, greenish, sour diarrhoea, tongue is coated with yellow deposit and thick like cream. Whenever this condition is present, no matter what disease, this remedy will prove curative. For worms and complaints caused by their presence.

Calcarea Sulphurica

Acts on the connective suppurations, abscesses, mattery discharges, tubercular ulcers, rheumatism.

Kali Sulphuricum

A want of this salt causes a yellow, slimy deposit on the tongue, slimy, thin, decidedly yellow or greenish discharges, and peeling of the skin. Useful in any ailment where this condition prevails, especially if patient is worse towards evening, and in a heated room. Catarrhs from any mucous mem-

brane—head, vagina, etc.—when secretion is yellow and slimy. Frequently called for toward the end of a cold, when the discharge is profuse and comes up easy.

Kali Muriaticum

All ailments characterized by exudations, infiltrations, swellings, during the latter stages of acute diseases; thus, after or in alternation with Ferrum Phos. All ailments accompanied by a white or gray coating of the tongue, thick white discharge and expectorations, skin diseases, dysentery, etc. An excellent constitutional remedy for old chronic ailments, hereditary complaints and dyscrasias.

Natrum Sulphuricum

Acts on the cells of the liver and kidneys and regulates the amount of water in the tissues. Biliousness, headache and vomiting of bile, bitter taste, diarrhoea, gravel, sandy urine, intermittent fever, dropsy, diabetes, liver troubles, troubles arising from living in damp places.

Natrum Muriaticum

Is found in all the tissues of the body. Useful for all pains, such as indigestion, etc., when accompanied by either flow of saliva or increased secretion of tears, vomiting of water or clear mucus. Catarrhs with frothy, watery mucus or blisters. In all catarrhs where the secretion is clear and transparent. Headache, costiveness, intermittent fever with catarrh of the stomach.

Calcarea Fluorica

A disturbance of the equilibrium of the molecules of this salt causes a dilation and relaxed condition of elastic fibers, hence useful in varicose veins, hemorrhoids and vascular tumors. Also in hard, bony swellings. For piles, if they are apt to bleed; may be advantageously alternated with Ferrum Phos.

Silicea

Is useful in suppurations, promoting the formation of pus, maturing abscesses, while Calc. Sulph. comes in later to heal the wound; disease of the nervous system, paralytic symptoms, spasms, rheumatic pain in limbs, etc.

Useful also in Brain Fog. Acts as a conductor for the gray matter of the brain.

NATUROPATHIC CENTER,
110 East 41st St., New York, N. Y.

COMBINATIONS IN NATURE'S PROPORTIONS

Neurasthenia

Formula No. 1—Ferr. Phos., Kali Phos., Mag. Phos.

This tablet is indicated in all nervous affections, neurasthenia, nervous prostration, tendency to insanity, mania and other mental derangements. This remedy is not a nerve stimulant, but a nerve food, which will gradually build up the nervous system, producing permanent tone and strength.

Anemia and Chlorosis

Formula No. 2—Calc. Phos., Kali Phos., Ferr. Phos.

This preparation is useful in all cases of defective development, mental or physical. It may be used at any age of life. It is especially adapted in children's diseases, such as rickets, marasmus, early decay of teeth, etc. Indicated in adults where there is a general wasting of all the tissues, waxy appearance of the skin, palpitation, trembling and weakness, anemia of the brain from long-continued mental strain.

Acidity, Flatulence, Indigestion

Formula No. 3—Nat. Phos., Nat. Sulph., Silicea.

This tablet is indicated in all gastric disturbances, acidity, flatulence, dyspepsia, acid, sour risings, feeling of weight in abdomen, bilious vomiting, flatulent colic, headache, jaundice, and general derangement of the stomach or bowels.

Skin and Scalp Diseases

Formula No. 4—Kali Mur., Kali Sulph., Calc. Sulph., Silicea.

This combination is applicable in all skin diseases, simple or chronic, such as pimples, eczema, acne, erysipelas, crusta lactea, lupus growths, ring worm, scurfy eruptions on head and face of children, etc.

Coughs, Colds, Catarrh

Formula No. 8—Ferr. Phos., Kali Mur., Nat. Mur.

This tablet is useful in all cases of colds with fever or cold in the head, with watery discharge. Acute catarrh, rattling, hollow cough, difficult respiration, pain in chest.

Constipation

Formula No. 9—Nat. Mur., Nat. Sulph., Cals. Fluor.

This combination is indicated in obstinate cases, where the bowels are constipated without apparent cause, liver torpid, stools hard and black, headache, bad breath, bad taste in mouth, tongue coated.

Vital Weakness

Formula No. 6—Nat. Mur., Kali Phos., Calc. Phos.

This tablet is indicated in all forms of sexual weakness, and general impairment of the sexual system. It is especially applicable to all suffering from exhausting discharges, from colds, hemorrhages, diarrhoea and all similar drains, impotence, spermatorrhoea, lassitude and general debility, emissions followed by trembling and weakness. This preparation tones up the entire sexual system and tends to restore vigor and general health. It is not merely a "tonic" but a "Nerve Food," specially prepared for the above-named conditions.

Rheumatism

Formula No. 7—Ferr. Phos., Mag. Phos., Kali Sulph.

This remedy is valuable in all rheumatic conditions. Pains in limbs or arms—shooting or boring pains, fever, swelling of parts, lumbago, sciatica, muscular rheumatism.

Tonic (Nerve and Brain)

Formula No. 5—Calc. Phos., Mag. Phos., Ferr. Phos., Nat. Phos., Kali Phos.

This preparation is a general tonic in chronic wasting diseases, anemia of young, rapid growing people, in women weakened by too frequent child-bearing, in weakened conditions from acute diseases during convalescence, weakness from overwork, mental strain, brain fog and nervous prostration, general debility.

Biolasma

This is a combination of the Twelve Tissue Remedies in the same proportion as these cell salts are found in the human organism. It has been called the "Elixir of Life."

Efficacious in debilitated conditions; all female weakness or irregularities; also when there is a doubt as to the needful remedy.

How to order the Remedies

Do not fail to state whether you desire the 3x (for acute ailments) or the 6x (for chronic troubles). Order the combinations by number.

Prices for single Remedies

Doctor, are you Alive?

To the value of **PHYSICAL TREATMENT APPARATUS** in Drugless Therapy by the use of Electricity in the different modalities, such as derived from

High-Frequency Auto-Condensation

Sinusoidal Currents

Vibratory Massage

Therapeutic Lamps

Electric Light Baths

Electric Light Bakers

Obesity Apparatus

Kirotraction Tables, Etc.

We have them all of the best. We have made them over twenty years and know how to serve your needs. If you desire to improve your work and income 100%, call or write at once for literature and catalogs. You are invited to call at any time to witness the practical demonstration of modern apparatus in a fully-equipped institute. A free course of instruction to our customers.

I. HARRIS

Office and Demonstration: 45 West 34th Street

Suite 1002

Telephone, Greeley 1160

"It is by far the most profitable appliance I have in my office equipment,"

writes a leading drugless healer in a large Illinois city.

Hundreds of drugless healers in all branches of the profession endorse the **VIOLETTA** High-Frequency Instrument; not only from an investment standpoint, but also as to unsurpassed efficiency of operation and amazing results obtained.

No drugless healer can afford to be without it either as a money maker or means of effecting quick relief from many stubborn ailments which have resisted other methods.

High-Frequency Generator

is the most compact, convenient and thoroughly efficient machine of its kind ever produced. Extremely easy to apply as entire mechanism is contained in a single piece, permitting adjustments to be made without leaving patient. Current always under instant control—may be regulated while treatment is being given. Noisy and nerve jarring spark-gap eliminated. Can be carried to patients' home or used by patients themselves. Operates on alternating or direct current. Battery outfit supplied where current is not available.

Guaranteed perfect in construction and operation

FREE.

Write to-day for handsome chart giving technique with high-frequency current and Book of interest to every drugless physician.

KNEIPP'S CELEBRATED TOILET ARTICLES

For preserving the hair and to prevent falling out of the hair and formation of dandruff, Kneipp recommended the daily use of his celebrated Capillary Extract of Nettle-Root, to be had in three sizes: Bottles containing about 4 oz., \$1.00; postage, 10c. Bottles containing about 16 oz., \$3.50; per Express only. Bottles containing 1 liter, \$7.50; per Express only. In addition to using the Extract of Nettle-Root, Kneipp recommended the occasional use of either the Kneipp Capillary Oil of Nettle-Root, 50c., postage 10c, or Oil of Sweet Almond, 50c, postage 10c, or Oil of Burdock-Root, 50c, postage 10c (to be applied once or twice a week only). Price 50c, postage 10c. Full directions are enclosed in each package.

Kneipp's Gargle and Toothwash (Mund- und Zahnwasser), made of shave grass, scurvy grass, peppermint, etc., etc. Excellent for removing bad odors from the mouth, and is a refreshing and restorative mouth wash for the different diseases of the gum, of the cavity of the mouth and the pharyngeal cavity. One teaspoonful in one wineglassful of water three times daily for gargling and washing. Price, \$1.00, postage 10c.

Kneipp's Herb Tooth Powder (Krauter-Zahnpulver). This really excellent tooth cleaner removes the bad odor from the mouth, strengthens the gums and preserves the teeth. Price 40c per box, postage 5c. A good serviceable tooth-brush, 25c, postage 3c. Extra fine, 50c, postage 3c.

FOR THE CARE OF THE SKIN
WE RECOMMEND
KNEIPP'S PURE HERB SOAPS

To improve the effect of the soap one may use hot water and allow the latter to be partly absorbed by the skin, the rest you wipe off with a towel.

Kneipp's Foenum Graecum Soap.—Used for all impurities of the skin, like exanthemata, grubs, pimples, freckles, etc., etc. Per piece, 35c; postage, 4c.

Kneipp's Shavegrass Soap (Zinnkrautseife). — Used with great success for severe affections of the skin, serpigio, deep-seated grubs, pimples, freckles, liver-spots, etc., etc. This soap contains shavegrass, pulverized very fine, in large proportions, and thereby possesses all qualities of the same. Price 35c, postage, 4c.

Kneipp's Tormentillas Soap.—For general toilet use. Price 35c, postage, 4c.

Kneipp's Hayflower Soap (Heublumenseife).—Used for rheumatism, gout and scrofula. Per piece, 35c, postage, 4c.

Kneipp's Pure Salutory Soap (Reine Heilseife), with arnica and marigold, absolutely pure, a neutral soap answering all purposes. It does not prickle but keeps the skin fresh and soft. Price 35c, postage 4c. Any three pieces of above soaps for 60c, postage 12c. For bathing purposes, we can recommend the following:

The Celebrated Pfarrer Sebastian KNEIPP PILLS

are free from all injurious aperients, being exclusively composed of herbal ingredients, and are universally considered the best for keeping the bowels open without weakening the stomach. These herbs are used by *Pfarrer Seb. Kneipp at Wörishofen* in his treatments. *The pills may be taken for years without any injury to the system and with only beneficial results.*

The Pfarrer Sebastian Kneipp Pills are the best and most pleasant laxative of the world

On account of their efficiency in most stubborn cases of constipation, indigestion, piles, giddiness and all complaints of the liver, *Pfarrer Seb. Kneipp* has given to the undersigned only the exclusive right to denominate same with his name and to attach his picture and signature to their labels etc. and to have his picture and signature registered as a Trade Mark.

— Price 50c. — By Mail 52c. —

DIRECTIONS FOR USE

1. To procure a regular opening of the bowels which is particularly desirable with females take 1—2 pills at bed time; for the first time 3 or 4 pills are often necessary.
2. To prevent wind and spasms take one pill in the morning.
3. To procure a thorough cleansing of the bowels take 2 pills at bedtime and 2 to 3 pills in the morning.

 Persons of very strong constitution require in these 3 cases 1 or 2 pills more. *The pills usually act after 12 hours, in some cases after 24 hours only.*

The best way of taking these pills is to swallow them as they are or wrapped up in a wafer with some water.

The Pfarrer Seb. Kneipp Pills and all other Pfarrer Seb. Kneipp Remedies are only genuine when bearing our registered Trade Mark (picture and signature of Pfarrer Kneipp) and the name of the only authorized manufacturers

A BOOST FOR YOU Doctor of Drugless Healing

Even the Medical Doctors (M. D.'s.) and the leading medical journals of the world who a few years ago scoffed at the idea of constipation, auto-intoxication and intestinal toxemia being the cause of the majority of the diseases of mankind, now admit that 90% of all diseases are due to intestinal trouble and they are now recommending and prescribing the Colon Bath as a means of relieving bowel trouble.

SWEET'S COLON BATH cleanses the Colon or large Intestine and is a valuable asset to the Doctor of Drugless Healing. You wouldn't start to build a new house on an old site that was littered with debris and wreckage. Would you? No, you would first clear away the wreckage and build a solid foundation. That's what **SWEET'S COLON BATH** will do with your patient; clear away the fecal matter, cleanse the colon and put it into a healthy condition and give you a foundation to work on and a patient to work with.

The portable pad made of hard rubber, sanitary, easily sterilized and containing a chamber in which oil can be used.

Now a good flushing with warm sterilized water clears away the "wreckage," leaving the colon in a well lubricated and healthy condition.

SWEET'S COLON BATH is only part of our health promoter, as we have in our combination an Internal Bath, a perfect hot water bottle, an excellent douche bag or fountain syringe. Positively guaranteed for 2 years and with ordinary care will last for years longer.

If it isn't **SWEET'S COLON BATH** it isn't a complete Internal Bath, because one of the first essentials in an article of this nature is to know that it is Sanitary and can be easily Sterilized. No wood to warp, no paint to rub off, no metal to corrode or rust, no valves to break and get out of order. Instead, just a plain, clean, portable hollow hard rubber pad to connect with a good, big, rich comfy hot water bottle that will lull you to sleep at night to awaken in the morning exhilarated and refreshed, with a snap and ginger that spells efficiency, ready to look every human being square in the eye and thank the Great Master of the Universe, that He put it into the mind of man to invent an article that will restore to health that much abused organ, the Colon, the cause of so many human ills.

My dear Doctor—Will you help to spread the truth? You certainly can render an excellent service to your patients with a great good will.

Order a sample to-day. Make it a part of your office equipment. **SWEET'S COLON BATH** is the last word in internal bathing. It signifies Health, Strength and Happiness.

Write for our special terms and discount to Doctors and Nurses. Order Now. To-day. Watch for our advertisements in the Herald of Health. Read what Dr. Lust says of internal bathing in the editorial section of the Directory.

Naturopathic advice for home treatment regarding cures of maladies will be rendered upon receipt of \$2.00 in stamps or money order.

NATUROPATHIC EXCHANGE
Yungborn Butler, N. J.

Pfarrer Seb. Kneipp'sche Spezialitäten

sind aus den *Pflanzenmitteln* Sr. Hochwürden des Herrn Pfarrer Seb. Kneipp in Wörthshofen hergestellt und wurde von ihm in Anerkennung der Echtheit und Güte den Verfertiger dieser Heilmittel, der Firma Oberhäuser & Landauer in Würzburg, das *ausschliessliche Alleinrecht* für In- und Ausland zu deren Herstellung und Benennung erteilt, so dass laut Vertrag mit Herrn Pfarrer Kneipp *niemand ausser uns Heilmittel und Toilettemittel als Kneipp'sche* bezeichnen oder mit seinem Namen oder Bild versehen darf. Ge-

gen Nachahmer müssen wir daher mit aller gerichtlichen Strenge vorgehen!

Man merke: Alle Pfarrer Seb. Kneipps *Heilmittel* nehme man beim Kauf nur dann an, wenn sie die Firma: *Oberhäuser & Landauer*, sowie eine der auf dem Titelblatt abgebildeten *Schutzmarken* enthalten, welche allein für die Güte der Ware, sowie dafür bürgen, dass man wirklich die echten Pfarrer Seb. Kneipps Heilmittel erhält, da viel Missbrauch mit dem Namen Kneipp getrieben wird.

Vom Kaiserl. Deutschen Patentamt und in den Vereinigten Staaten sind uns gesetzlich geschützt: Bilder und Namenszug Kneipps und die Namen: Kneipp, Kneippshaus, Sebastian, Augentrost, Magentrost, Gichttrost, Hustentrost, Nerventrost, Bluttrost, Tormentol etc. für Heilmittel und Toilettemittel, Hustenbonbons, Fruchtsäfte und Kraftermittel etc., Alkoholfreie Weine, Kräuter- u. Beeren-Essige etc.

Die Pfarrer Kneipp Heilmittel und Toilettemittel sind keine Geheimmittel, sondern REINE aus den Kneipp'schen Kräutern hergestellte NATURHEILMITTEL

Pfarrer Seb. Kneipps Arnikasalbe dient als Heilsalbe bei Wundsein, Ausschlägen und für Wunden. Die Blechschachtel kostet portofrei 40 Cents.

Pfarrer Seb. Kneipps Augentrost wird benutzt als Augenwasser bei *Augenleiden* und *Entzündungen* der Augen, denen Augenkatarhe, schwüres Wundsein und Schwächzustände zugrunde liegen. Man wischt dreimal täglich die leidenden Augen aus, indem man ein leinenes sauberes Tuch oder reine Watte mit dem 5 fach mit Wasser verdünnten Augentrost befeuchtet! Fläschchen portofrei 60 Cents. Grössere portofrei \$1.10.

Pfarrer Seb. Kneipps Blutreinigungstee dient als Blutreinigungsmittel und wirkt wohltuend auf den Stuhlgang. Bei einer durchgreifenden Blutreinigungskur, die besonders bei Hautausschlägen, Hautjucken, Flechten und Gicht angezeigt ist, muss dieser Tee *längere Zeit* hindurch in Vereinen mit der *Kneipp'schen Wasseranwendung* gebraucht werden. Ein Paket mit genauer Gebrauchsanweisung, ca. acht Tage reichend, kostet portofrei 40 Cents. 1 Doppelkarton portofrei 70 Cents.

Pfarrer Seb. Kneipps blutbildende Tropfen — Bluttrost. Diese Tropfen dienen besonders blutarmen schwachen Personen und Rekonvaleszenten zur Hebung des Appetits und der Körperkräfte. 1 Flasche mit Gebrauchsanweisung portofrei \$1.10.

Pfarrer Seb. Kneipps Cholera tropfen gegen Diarrhöe, Brechdurchfall, Cholera und Cholera. Man nimmt 4—5 mal täglich 1 Kaffeelöffel voll. Das Fläschchen kostet portofrei \$1.10.

Kneipps Entfettungstee. Vorzüglich wirksam, 70 Cents.

Pfarrer Seb. Kneipps Familien-Gesundheitstee. Dieser bildet ein Vermächtnis des Herrn Prälaten Kneipp für die Familie. Er enthält nur deutsche Kneipp'sche Kräuter und ersetzt den echten chinesischen Tee, vor welchem er den Vorzug hat, dass er die Nerven nicht erregt und viel billiger ist. Durch die eigenartige Präparation und Mischung schmeckt er ganz ähnlich wie chinesischer Tee und wird ebenso wie dieser bereitet und getrunken. Es gibt Probepakete zu 10 Cents, sowie zu 125 g für 40 Cents und 250 g zu 70 Cents.

Pfarrer Seb. Kneipps Fenchelhonig. Anwendung und Wirkung wie die des Spitzweigerichsafts mit Malzextrakt. Preis der Fl. 35 Cents und 60 Cents.

Pfarrer Seb. Kneipps Fichtennadelhonig dient gegen lang andauernden Husten, Brustkatarh, Influenza etc. Das Fläschchen mit Gebrauchsanweisung kostet 60 Cents.

Pfarrer Seb. Kneipps Frangula-Extrakt. Unter diesem Namen stellen wir einen Auszug aus der Faulbaumrinde, dem Kreuzdorn und Rhabarber her, welcher vornehmlich auch solchen Personen dienen soll, welche keine Pillen nehmen können und ein *sicher und mild abführend* wirkendes Mittel für den regelmässigen Stuhlgang bedürfen. Erwachsene sollen abends vor dem Schlafengehen 1 bis 2 Kaffeelöffel voll, grössere Kinder $\frac{1}{2}$ Kaffeelöffel voll nehmen. Ganz kleinen Kindern gibt man als Abführmittel entweder etwas Schleebütentee oder Mannasaf oder Rhabarbersaft oder Kreuzdornbeeren-saft bei Bedarf 1 Kaffeelöffel voll. 1 Fläschchen kostet 60 Cents.

Pfarrer Seb. Kneipps Frühstückstee in Paketen zu 15, 40 und 70 Cents, besser als dieser schmeckt der Familiengesundheitstee in Paketen zu gleichem Preis.

Kneipp-Gallensteintee. Bewährtes Mittel bei Gallenstein- und Leberleiden. 1 Paket kostet 70 Cents.

Gehöröl. Bei Ohrenausen, Schwerhörigkeit und Ohrenkatarh tropft man täglich zweimal einige Tropfen in das Ohr und verschliesst dasselbe mit etwas Watte. Bei Ohrenkatarh oder bei Vorhandensein von vertrocknetem Ohrenschmalz lasse man vorher das Ohr mit lauwarmem Wasser dreimal täglich jedesmal dreimal nach einander ausspritzen. 1 Fläschchen Gehöröl kostet 50 Cents. 1 Spritzchen dazu 40 Cents.

Pfarrer Seb. Kneipps Gicht- und Rheumatismusteil dient als *Einreibung* gegen gichtische und rheumatische Schmerzen. 1 Flasche mit Anweisung kostet 60 Cents.

Pfarrer Seb. Kneipps Gicht- und Rheumatismustee. Dieser antirheumatische, antiarthritische, blutreinigende Tee dient gegen Gicht und Rheumatismus und wird gleichzeitig mit dem Pfarrer Kneipps Gicht- und Rheumatismus-Einreibungsmittel gebraucht. Das Paket kostet 40 Cents und 70 Cents.

Kneipp-Gummi-Lakritzbonbons. Diese vorzüglich schmeckenden Hustenbonbons haben sich vorzüglich bewährt bei Husten, Heiserkeit und allen Katarhen der Atmungsorgane. Sie sind zu haben in Blechschachteln zu 25 Cents und Springdosen zu 40 Cents.

Pfarrer Seb. Kneipps Heidelbeerblätterpillen benutzt man bei Zuckerharnruhr (Diabetes mellitus). Die Schachtel mit Anweisung kostet 52 Cents.

Pfarrer Seb. Kneipps Hustenbonbons. Diese aus den Extrakten der besten Kneipp'schen Kräuter hergestellten Hustenbonbons sind vorzüglich bewährt bei Husten, Heiserkeit, Rachenkatarh etc. Die Blechschachtel kostet 25 Cents.

Bestellungen sind zu richten an:

KNEIPP-CENTRALE .: BUTLER, NEW JERSEY

Pfarrer Seb. Kneipps Hämorrhoidal- und Magenpulver. Dieses Pulver benützen Personen, welche an *Hämorrhoiden*, *Windsucht*, *Gelbsucht*, *Blähungen*, *saurem Aufstossen*, *Sodbrennen*, *Verstopfung*, *schlechter Verdauung* und *Appetitlosigkeit* leiden. Eine Schachtel mit Gebrauchsanweisung kostet 65 Cents.

Beste Hustentropfen „Hustentrost“. Wirkung wie die des Hustentees. Flaschen mit Gebrauchsanweisung 40 und 60 Cents.

Pfarrer Seb. Kneipps Heidelbeerfruchtpillen dienen gegen *Diarrhöen* Erwachsener sowie auch von Kindern. Die Schachtel mit Anweisung kostet 52 Cents.

Pfarrer Seb. Kneipps Bibernelle-Bonbons. 20 Cents.

Pfarrer Seb. Kneipps Malzextrakt-Bonbons. 20 Cents.

Pfarrer Seb. Kneipps Spitzwegerich-Bonbons. Diese 3 verschiedenen Hustenbonbons sind mit den entsprechenden Extrakten kunstgerecht hergestellt und werden mit grossem Erfolg bei Husten, Heiserkeit, Brust- und Halsleiden, Katarrhen der Atmungsorgane etc. angewendet. Alle 3 Sorten sind in *Beuteln* zu 20 Cents zu haben und kann daher jedermann durch Probieren diejenige Sorte finden, welche ihm am besten zusagt. Die Spitzwegerich-Bonbons sind auch in *Blechschachteln* zu 25 und 40 Cents zu haben.

Pfarrer Seb. Kneipps Hustentee wird benutzt bei *Katarrhen der Atmungsorgane*, und dient auch Brust-, Hals- und Lungenleidenden. Pakete zu 40 Cents und 70 Cents enthalten genaue Gebrauchsanweisung.

Pfarrer Seb. Kneipps Kalendulasalbe dient als Heilsalbe für verschiedene Wunden. Eine Blechschachtel kostet 40 Cents.

Pfarrer Seb. Kneipps Keuchhustensaft. Dieser aus *Thymian* und *Kastanienextrakt* mit noch anderen hustenstillenden Kräutern hergestellte Saft dient vornehmlich Kindern bei dem lästigen Keuchhusten. Das Fläschchen mit Gebrauchsanweisung kostet 60 Cents.

Pfarrer Seb. Kneipps Knochenmehle. 1. Das weisse Pulver dient nach Kneipp gegen *Nervosität*, *Migräne*, *Kopfweh*, *Bleichsucht*, *Blutarmut*, *Veitstanz* etc. 55 Cents.

2. Das graue Pulver gegen *Lungen-*, *Blasen-* und *Nierenleiden*. 55 Cents.

3. Das schwarze Pulver für *skrofulöse* und *knochenschwache Kinder*. 55 Cents.

Von allen diesen 3 Sorten nehmen Erwachsene dreimal täglich eine grosse, Kinder dreimal täglich eine Messerspitze voll, während der Mahlzeit in der Suppe oder im Wasser etc. Preis per Büchse 55 Cents, 500 Gramm kostet \$2.00.

Pfarrer Seb. Kneipps Krampftee und Krampftropfen gegen *Krämpfe* des Unterleibes, besonders der Frau während des Unwohlseins etc. Man nimmt dreimal täglich 1 Kaffeelöffel voll Krampftropfen in einer Tasse voll Krampftee. Tee und Tropfen kosten je 40 Cents.

Pfarrer Seb. Kneipps Magenpulver. Wirkung und Gebrauch wie die des Magentrost. 1 Schachtel 65 Cents.

Kneipps Magentee. Vorzüglich bewährt bei Magenbeschwerden, schlechter Verdauung, Appetitlosigkeit, Blähungen, Magenkrämpfen etc. Zu haben in Paketen zu 40 und 70 Cents.

Pfarrer Seb. Kneipps Magentrost dient gegen schlechte Verdauung, Schwäche des Magens, Appetitlosigkeit, Uebelsein, saures Aufstossen, Erbrechen, Magenkrämpfe, Blähungen, Leibweh, Kater etc. Flaschen zu 50 Cents, \$1.10, \$1.20 und \$3.00 enthalten genaue Gebrauchsanweisung.

Kneippmittel zur Blutstillung ist hergestellt aus *Tormentillwurzel*. Man nimmt bei Unterleibs-, Hämorrhoidal- oder Lungenblutungen bis zur Ankunft des Arztes jede Stunde je einen Kaffeelöffel voll in etwas Wasser, bis die Blutung nachlässt. 1 Glas kostet \$1.10.

Kneipp Nerventee. Zur Beruhigung der Nerven bei *Nervosität*, *Schlaflosigkeit*, *Herzklopfen*, *Aufgeregtheit* etc. Das Paket kostet 70 Cents.

Pfarrer Seb. Kneipps (Nervenberuhiger) Nerventrost gegen *Nervosität* und *Schlaflosigkeit*. Preis der Flasche mit einer Abhandlung über *Schlaflosigkeit* und *Nervenleiden*, \$1.10.

Pfarrer Seb. Kneipps Reisetropfen gegen Magenstörungen auf der Reise. 1 Flasche mit Anweisung kostet \$1.10.

Pfarrer Seb. Kneipps Spitzwegerichsaft mit *Malzextrakt* dient als Husten- und Brustsaft. Flaschen zu 60 Cents und \$2.00.

Pfarrer Seb. Kneipps Tannenzapfen-Honig wird benutzt bei Halsleiden, Heiserkeit, Husten etc. Man nimmt drei- bis viermal täglich 1 Kaffeelöffel voll rein oder in Milch. Die Flasche kostet 60 Cents.

Pfarrer Seb. Kneipps Taschen-, Reise- und Haus-Apotheke enthält in herrlicher Zusammenstellung und hübscher Aufmachung (*Zigarrenetui-form*) 14—16 Artikel mit genauer Gebrauchsanweisung zum bequemen, sofortigen Gebrauch und ist fast unentbehrlich für die Reise und zu Hause! Höchst passend und wertvoll als Geschenk kostet eine solche \$1.00.

Grössere Taschen- und Reise-Apotheke mit Wegweiser \$2.00, \$3.00 und 4.00.

Grössere Haus-Apotheken im Preise von \$10, 15, 20 und \$25 in hübschen Holzschränken.

Pfarrer Seb. Kneipps Wassersuchtee dient als wasserreibendes Mittel bei *Wassersucht*, *Nieren- und Blasenleiden* (*Stein und Gries*). Paket mit genauer Gebrauchsanweisung zu 40 Cents und 70 Cents.

Pfarrer Seb. Kneipps Wermutaugensalbe. Gegen Augenirritationen und Augenschwäche. Das Gläschen mit genauer Gebrauchsanweisung kostet mit Glasstäbchen zum Einstreichen 50 Cts.

Pfarrer Seb. Kneipps Diätetischer Nähr- und Krafttee wurde von Pfarrer Kneipp in ausgedehntem Masse angewendet, so speziell bei *Rekonvaleszenten*, *schwachen* und *blutarmen* Personen, zur Hebung des Appetits und der Körperkräfte. Das Paket dieses vorzüglichen Nährtees kostet mit Anweisung 40 Cents.

Pfarrer Seb. Kneipps Wühlhuber Nr. I. Dieser Tee wirkt kräftig abführend und befreit den Magen und Darm von Schleim. Er soll nur selten genommen werden, d. h. nur wenn es nötig ist, abends vor dem Schlafengehen eine Tasse voll, indem man auf eine Tasse kochenden Wasser $\frac{1}{2}$ —1 Kaffeelöffel voll hiervon nimmt; nach $\frac{1}{4}$ Stunde langem Stehen sieht man durch und trinkt diesen Absud kalt oder warm. Die Blechdose kostet 50c., Pillen 52c.

Pfarrer Seb. Kneipps Wühlhuber Nr. II wirkt schwächer abführend als Nr. I, jedoch mehr auf die Niere und Blase, weshalb er speziell bei Anfängern der *Wassersucht*, *Beschwerden* beim *Urinieren* und *Brennen* in Blase und Niere etc. angewendet wird. Er wird bereitet wie Wühlhuber Nr. I. Die Blechdose kostet 50 Cents. In Pillenform 52 Cents. *Frauen-Tee*, nicht so stark wie Wühlhuber, 40 Cents.

NB. Wer Wühlhuber nicht trinken kann, was wegen des bitteren Geschmacks auch nicht leicht ist, wende statt des Nr. I und Nr. II stets die

Pfarrer Seb. Kneipps Pillen an; diese sind leicht und bequem zu nehmen und wirken wie beide Tees, da alle Stoffe des Wühlhuber Nr. I und II mit *Rhabarber* rationell darin verbunden sind. Die Kneipps Pillen wirken sicher bei schlechtem Stuhlgang und wegen ihres *Rhabarbergehaltes* dabei noch günstig auf den Magen, so dass sie sich vornehmlich zu langandauerndem Gebrauche eignen! Sie sind ein blutreinigendes magenstärkendes Abführmittel; enthalten nur reine pflanzliche Stoffe und werden deshalb benutzt bei anhaltender Verstopfung, schlechter Verdauung, Hämorrhoidal-Beschwerden und Blutanstauungen, besonders geeignet für Frauen bei Leiden, die ihren Grund in trägem Stuhlgang und schlechter Verdauung haben. Eine Blechschachtel mit 60 Stück und genauer Gebrauchsanweisung kostet 52 Cents.

Kneipp-Tee gegen Zuckerharnruhr. Dieser leistet ganz hervorragende Dienste. 1 Paket kostet 70 Cents.

Bestellungen sind zu richten an:

KNEIPP-CENTRALE .: BUTLER, NEW JERSEY

Pfarrer Seb. Kneipp'sche Toilettemittel

a) Für die Haarpflege gegen Ausfallen der Haare und Schuppenbildung empfiehlt Pfarrer Kneipp das

Pfarrer Seb. Kneipps Brennessel-Haarwasser. Dieses ist wohl das beste Toilettenhaarwasser der Gegenwart infolge der wohltuenden Wirkung auf die Kopfhaut und die Förderung des Haarwuchses. Es erhält die Haare locker und geschmeidig bei angenehmstem Geruch. Es ist zu haben in blauen Flaschen zu \$1.00, \$2.00 und \$3.00 mit Gebrauchsanweisung. Auch erhältlich in blauen Spritzflaschen zu \$1.50 und \$3.00. Wer ein sehr sprödes Haar hat, verlange das *fettthaltige* Kneipp-Brennesselhaarwasser in weissen Spritzflaschen zu \$1.75 und \$3.00. Der Liter kostet \$5.00 jeder Sorte. Bei zu trockenem Haarboden oder zu rauhem Haar benützt man dabei von Zeit zu Zeit

Pfarrer Seb. Kneipps Brennessel-Oel oder Pfarrer Seb. Kneipps Kletten-Oel, welche beide Sorten in Probefläschchen zu 30 Cents oder Flaschen zu 55 Cents und \$1.00 zu beziehen sind. Statt diesen kann verwendet werden *Brennessel- oder Klettenpomade* in Töpfchen zu 50 Cents

b) Für Mund und Zahnpflege verwendet man

Pfarrer Seb. Kneipps Mund- und Zahnwasser, hergestellt aus Zinnkraut, Löfelfkraut und Pfefferminz, dient zur Beseitigung des üblen Geruchs und bei verschiedenen Krankheiten des Zahnfleisches, der Mund- und Rachenhöhle als erfrischendes und belebendes Mundwasser. Man nimmt 1 Kaffeeöffel voll auf ein Weinglas voll Wasser 3 mal täglich zum Ausspülen und Gurgeln. 1 Glas kostet \$1.10.

Pfarrer Seb. Kneipps Kräuter-Zahnpulver. Dieses vorzügliche Zahnreinigungsmittel befestigt das Zahnfleisch, beseitigt den üblen Geruch aus dem Munde, reinigt die Zähne aufs beste, ohne denselben im mindesten Schaden zu bringen, da dasselbe keine Chemikalien oder Mineralien enthält, sondern nur rein aus Kneipp'schen Kräutern in feinsten Pulverisierung besteht. Eine Blechschachtel kostet 45 Cents. 1 Zahnbürstchen hierzu 30 Cents.

Oder das *weisse Kneipp-Zahnpulver* in Schachteln zu 45 Cents.

c) Für allgemeine Hautpflege benützt man eine oder die andere der

Pfarrer Seb. Kneipps Reinen Seifen. Unter diesem Namen bringen wir absolut reine, allen Ansprüchen vollkommen entsprechend neutrale Seifen in den Handel, welche also nicht prickeln, sondern die Haut geschmeidig erhalten. Wir stellen folgende Sorten her:

1. **Pfarrer Seb. Kneipps Reine Heilseife** ist eine hochvorzügliche *reine neutrale Kernfettseife* und dient als feine Hautwaschseife zum täglichen Gebrauch. Das Stück kostet 28 Cents.

2. **Pfarrer Seb. Kneipps Arnika-Seife** enthält den Auszug aus Arnika mit allerbesten neutraler Kernfettseife. Sie dient als gute Seife bei den verschiedensten Hautunreinigkeiten. Das Stück kostet 28 Cents.

3. **Die Pfarrer Kneipps Kalendulaseife** ist eine ganz vorzügliche Hautseife, welche bei den verschiedensten Hautkrankheiten, Ausschlägen, Mitessern, Sommersprossen, Rissigwerden der Haut etc. angewendet wird. Farbe: gelb. 28 Cts.

4. **Pfarrer Seb. Kneipps Foenum graecum Seife** gegen Hautausschläge und Hautunreinigkeiten. Das Stück kostet 28 Cents.

5. **Pfarrer Seb. Kneipps Heublumen-Seife** verwenden Personen als Badeseife, welche an Rheumatismus, Gicht und skrofulösen Zuständen leiden. Das Stück kostet 28 Cents.

6. **Pfarrer Seb. Kneipps Zinnkraut-Seife** dient gegen Mitesser, Finnen, Sommersprossen, Leberflecken etc. Das Stück kostet 28 Cents.

7. **Die Pfarrer Seb. Kneipps Tormentillseife** wird bei den verschiedensten Hautunreinigkeiten als vorzügliche Toiletteseife benutzt. Unser Fa-

brikat hat hohen Gehalt des heilwirkenden Tormentillextraktes und enthält die beste Kernfettseife, also nicht Kokosseife. Das Stück kostet 28 Cents.

8. **Pfarrer Kneipps Brennesselseife.** Diese Seife ist überfettet, daher sehr zart. Vorzüglich geeignet zum Waschen der Haare bei Haarausfall und Kopfschuppen. Das Stück kostet 28 Cents.

9. **Die Pfarrer Kneipps Kamillenseife** ist eine sehr weiche, überfettete Seife, sehr beliebt zum Waschen des Kopfes und speziell als Kinderseife. Das Stück kostet 28 Cents.

Diese Seifen sind auch einzeln und gemischt in Kartons von 3 und 12 Stück zu haben.

Tormentol ist das neueste und beste Mundwasser der Welt, besser und sparsamer als alle anderen marktschreierisch angebotenen Mundwasser. Dieses Mundwasser kann Zahn-, Rachen-, Drüsen- und Halsleidenden zum Ausspülen und Gurgeln der Mundhöhle und des Rachens gar nicht warm genug empfohlen werden. Ein halber Kaffeeöffel voll oder 60 Tropfen in einem Weinglas voll Wasser genügen zum täglichen Gebrauch. Die Flasche mit Anweisung \$1.10.

Kneipp-Tormentill-Cream findet Verwendung als kosmetische Hautcream, gegen aufgesprungene Haut, Wundsein, Wolf, Fusschweiss, Fussbrennen. Die Blechbüchse oder Tube kostet 50 Cents. Die Porzellandose 75 Cents. — NB. Man achte darauf, dass stets das Bild Kneipps auf den Packungen sich befindet! —

Als *Spezialmittel* gegen verschiedenartige Flechten empfehlen wir: 1. eine *Flechtensalbe* gegen nasse Flechten, 2. eine *Flechteneinpinselung* gegen Schuppenflechten (Psoriasis), 3. zum gleichzeitigen inneren Gebrauch bei beiderlei Flechtenarten zum Blutreinigen ein *Flechtenpulver*. Preis jeder Packung \$1.00.

Exodor-Fusschweissalbe. Das beste Mittel gegen Fusschweiss und dessen Folgen. Vertreibt sofort auch den lästigen Geruch ohne irgend welchen Schaden für die Gesundheit. In Porzellantöpfen zu 55 Cents.

Tiroler Kropfbalsam. Vorzüglich wirkend bei Blähbauch, Kropf und Drüsenanschwellungen, nicht fettend. In Gläsern zu \$1.10.

Gebirgs-Gesundheitstee und Alpenkräutertee in Paketen zu 40 Cents und \$1.00.

Echter Melissen-Balsam (Karmeliter-Geist). Ein bewährtes Volksmittel bei Ohnmachten, Uebelsein, Kopfweh, Magenschmerzen etc. ist zu haben in Fläschchen zu 55 Cents.

Herba Santa — Heiliges Kraut. Vorzüglich wirksam bei den Leiden der Luftwege und Atmungsorgane. Man kocht einen Esslöffel voll mit einer guten Tasse Wasser, lässt 5 Minuten stehen, seiht durch, versetzt mit Zucker, Honig oder Malzextrakt und trinkt so dreimal täglich eine Tasse voll. Das Paket kostet 40 Cents.

Asthmapulver „Atme leicht!“ Dieses wird benutzt gegen Asthma, Emphysem und Atemnot. Ein Kaffeeöffel voll von diesem Pulver wird auf einer Untertasse angezündet und davon der Rauch tief eingeatmet.

Die Blechbüchse mit Anweisung kostet \$1.00. Zweckmässig trinke man dabei noch Pfarrer Kneipps Hustentee.

Asthmatropfen sind tausendfach bewährte Tropfen, von denen man bei Asthma und Atemnot mit grossem Vorteil nach Bedarf 15 Tropfen auf Zucker oder in Pfarrer Kneipps Hustentee nimmt. Das Fläschchen kostet 40 Cents und 60 Cents.

Blut- und Bleichsuchts-Pillen „Wangenrot!“ Unter diesem Namen bringen wir mit Zucker überzogene Pillen, nach einem nur in unserem Besitz befindlichen alten Rezept hergestellt, in den Handel, welche gegen *Bleichsucht* und *Blutarmut* bei Mädchen und Frauen benutzt werden. Blechschachteln mit 200 Pillen, für über 1 Monat reichend, kosten mit genauer Anweisung \$1.55.

Bestellungen sind zu richten an:

BUTLER, NEW JERSEY

Die berühmten Pfarrer Sebastian KNEIPP-PILLEN

sind frei von allen drastischen Abführmitteln, enthalten *nur reine pflanzliche* Stoffe, welche als Schleim abführende, windtreibende, *magenstärkende* und den *Stuhlgang befördernde* Mittel im höchsten Ansehen stehen und durch Pfarrer Kneipp in Würzburg bei seinen Kuren angewendet wurden.

Die Pfarrer Sebastian Kneipp-Pillen sind das angenehmste magenstärkende und blutreinigende Abführmittel, welches existiert

Wegen ihrer *grossartigen Wirkung* bei anhaltender (habitueeller) *Verstopfung*, *Verdauungsstörungen*, *Hämorrhoidalbeschwerden* und *Blutanstauungen gegen Kopf, Brust, Leber und Milz* erhielten die Unterzeichneten von Herrn Pfarrer Kneipp das ALLEINRECHT zur Herstellung und Benennung mit seinem Namen.

— Preis 50c. — Per Post 52c. —

GEBRAUCHSANWEISUNG

1. Zur Herbeiführung eines einfachen, regelmässigen Stuhlganges, wie es hauptsächlich bei Frauen erwünscht ist, nehme man abends vor dem Schlafengehen 1—2 Pillen; das erste Mal sind oft 3—4 Pillen nötig.
2. Sollen die Pillen nur windtreibend gegen Blähungen wirken, nehme man morgens nur 1 Pille.
3. Soll ein reichlicher, mehrmaliger Stuhlgang erfolgen, nehme man abends 2 und morgens 2—3 Pillen.

Nur sehr starke Naturen brauchen in diesen 3 Fällen je 1—2 Pillen mehr. Die Wirkung tritt meistens in 12, manchmal erst in 24 Stunden ein.

Am leichtesten nimmt man die Pillen in der Weise, dass man dieselben wie sie sind, oder in etwas feuchte Oblate eingewickelt, mit ein wenig Wasser verschluckt. Die Pfarrer Kneipp-Pillen und alle anderen Pfarrer Kneipp Heilmittel-Spezialitäten sind nur echt, wenn sie die Namen der alleinberechtigten Fabrikanten

OBERHÄUSSER & LANDAUER, Würzburg, Deutschland

sowie unsere eingetragene Schutzmarke (Bild und Namenszug Kneipp's) enthalten.

Alleiniges Generaldepot für die Vereinigten Staaten

TANGERINE, FLA.

Some Prominent Graduates of Class 1907 Venus Academia (Old Eclectic College) of New York City

NOTES *and* REVIEWS

INTERNATIONAL ALLIANCE OF PHYSICIANS AND SURGEONS

Principles of the International Alliance of Physicians and Surgeons

Knowing that the medical colleges teach only a pathology of temporary and superficial symptoms, infection and bacteriology,—that these symptoms are grouped together for determining names of diseases,—and that the names are treated in a routine manner by text-book authority, and recognizing the necessity to regain the confidence of the public, the members, composed of all Schools of Therapeutics, believe it their duty to unite on a common platform to teach an advanced pathology that more definitely outlines the true condition of disease. Said teachings are to concur with the American Association of Progressive Medicine and are to determine the degree of permanent perversions of the physiological function.

It is further observed by the members of the International Alliance of Physicians and Surgeons that these permanent perversions are due to foods which disproportionate the acid and alkali secretions and by unconscious irritations produce reflex contractions—abnormal reflexes, which, through the influence of the great sympathetic nerve, result in contractions of cells, tissue and muscles.

These contractions pervert the physiological functions inhibiting cell dynamics, obstructing cell osmosis, and inducing periodical and permanent contractions of the sphincters, they impinge nerves; they also empty the capillaries, and induce anemia. These effects disproportionate the acid and alkali secretions, resulting in the generation of a weak electrical energy or resistance, until local irritation and inflammation develop malignant growths,—the factors of operations.

The present officers of the Alliance, who were elected at the last annual Convention held in Atlantic City, N. J., on October 6, 7 and 8, 1916, are: H. Morgenbesser, B. S., M. D., President; Joseph Safian, M. D., 1st Vice-President; H. Bick, M. D., 2nd Vice-President; Edward Carroll, D. O., 3rd Vice-President; C. E. Binck, D. O., 4th Vice-President; J. B. Prager, M. D., Secretary; and Dr. F. Pfau, Treasurer. The Alliance publishes its own official organ, *The International Brief*, which is a very able journal. Dr. C. F. Conrad is the Editor. The *Brief* is now in its 16th year and is very healthy indeed.

Physicians who have a diploma from a

legitimate school or college, qualified to practice, are eligible to become members of the Alliance. Merely send application with fee to The International Alliance of Physicians and Surgeons, N. Y. Office, 110 West 90th Street, New York City.

Do it now.

The Alliance is affiliated with the National Association of the Osteo-therapeutic Practitioners, incorporated under the laws of the State of New York and New Jersey. The principals of both Societies are the same. Dr. B. Lust is the president of the National Association and Dr. J. Hoegen is the Secretary and treasurer. Both Societies are prosperous.

* * *

THE BERHALTER IDEA

It just didn't happen that we have an Anthony A. and Katherine Berhalter, endowed with a genius for making Health Foods. For just as surely as the sunrise and sunset is brought about by the operation of a fixed and eternal law, so are the demands of humanity governed and controlled by that same law.

To meet humanity's needs and conditions of development, Columbus, Washington, Field, Lincoln, Bell, Morse, Edison, and others, have been regarded as the "men of the hour." And because during the past 25 or more years humanity has been awakening to the fact that the food they have been eating is not good; awakening to the fact that bread made from white flour has been robbed, for commercial reasons, of over 90% of the qualities that nature had put into the wheat berry for the complete nourishment of man, a man and a woman, with the knowledge of how to prepare nature's foods with scientific skill, were ready to supply this human demand.

On October 30, 1878, Anthony A. Berhalter was born at Ellensburg, Württemberg, Germany. The same year Katherine Novak (now Mrs. Berhalter) was born in Chicago. When these two people first opened their eyes on Earth's plane, they were separated by thousands of miles and there was no indication that years after they would be brought together as associates in a great work for the betterment of humanity. But "the Divinity that shapes our ends, rough hew them as we may" was operating, as it always has and always will continue to operate. At the appointed time these two people came together. They came together because for many years their thoughts and purposes had been directed

along parallel lines. Both had suffered from wrong habit of eating and living. Both had determined to correct this wrong to their minds and bodies by the discovery of how to scientifically make and so use nature's foods, as to build strong bodies and develop active and well-balanced minds. In this they succeeded. Their success was brought about through years of toil and research. Every book on the cause and effect of disease was purchased and read. Among the leading books were those published by Dr. Benedict Lust, of New York, and his monthly magazine was read and carefully studied each month. And so both Mr. and Mrs. Berhalter worked up out of ill health to perfect health; from ignorance of the proper food to eat and drink to a scientific knowledge of the demands of the human body; and they together worked out the formulas to make these health foods. Their gratitude for delivery from ill health found expression in the desire to have others share their good fortune. So, in the year 1908, they opened a bakery and store for the manufacture and sale of Berhalter Health Foods at 309 North Ave., Chicago. People came slowly at first to the little store, more by chance than anything else, for no advertising was done. But all who came returned, for they found there a new sort of food, more delicious and nourishing than any they had ever bought. The good news spread quickly about the neighborhood, and it was not long before that most of the people within a radius of many blocks thronged to the Berhalters for their supplies. Then came growth. People moved from the neighborhood and sent in orders by mail. Visitors who had tasted Berhalter foods in Chicago, on their return home sent back orders from distant states to the North Avenue shop for the foods whose equals they could find nowhere else. East and West the business spread across the map, until nine years after the doors of the little store were opened on North Avenue, Chicago, customers were being served in nearly every State in the Union. Then a handsome three-story bakery and salesrooms was erected at 1423 North Clark Street, Chicago. It was thought this new building would take care of all demands for many years to come, but in less than three years they were driving their bakery day and night to produce the foods for which an eager and educated public was clamoring. And as this book goes to press, a great factory, a block long, is being built on Diversey Parkway and Lincoln Avenue, Chicago, which it is hoped will meet the demand at least for some time to come. But it will only be a matter of time when Berhalter Health Food Factories will be built in other cities throughout the United States, for the demand for the Health Foods they make is nation wide.

The old saying that the way to a man's heart is through his stomach, holds true,

and it is often the case that the stomach is the quickest avenue of approach to his mind.

Through their delicious, wholesome, health-giving foods, the Berhalters have brought many sufferers to an understanding of Nature Cure. Every Berhalter store and restaurant is an educational center where the health seeker may receive information on Nature Cure and the natural life. The Berhalters are doing a great work. May the scope of their influence continue to extend.

COLON THERAPY

By J. H. Eager, Brooklyn, N. Y.

Mr. J. H. Eager

Colon Therapy is so important to the welfare of the human body that the great wonder is that a knowledge of the anatomy of the colon is not made a pre-requisite to the granting of a diploma to all aspiring to become medical practitioners, and yet, although of such paramount importance, only a very small number of students have had the physical courage to examine one, so repugnant is the odor which emanates from that part of a dead body.

Hence, it is not to be wondered at that a knowledge of the existence of a colon in the human body is known only to comparatively few lay, general readers.

Its activity is so essential and important to the health and well-being of each individual of the human race that it should be made the subject of a government treatise, to be freely disseminated.

It should also be made a subject of first importance in the curriculum of all schools and universities, and more of an essential requirement for the benefit of those aspiring to become teachers.

An opportunity is offered to school or university teachers to observe in a student the deteriorating transition from a bright and alert mental state to a retrograde one, where he becomes unexpectedly dull, and where the grasping of the lessons becomes manifestly laborious.

Observant teachers are perplexed at the temporary dullness of a hitherto bright

scholar, without even guessing at the cause, as they themselves are unacquainted with the dulling effect of constipation; whereas if they had been required before earning a diploma to make a theoretical study of the dire effects of constipation upon the mental faculties, they would have been far more useful instruments in the art of teaching.

While the scholars might be conscious of the fact that a great effort is required to carry out their studies, they might not, without a suggestion as to the probable cause of their backwardness, know the importance of keeping the drain pipes of their body active, and the serious consequences to their health if they neglect them.

Ignorance on the part of scholars of the existence of the colon, and the importance of it, plays in their life for good or ill, is not to be wondered at, in view of the widespread false modesty among the female members of the community.

The duty of parents in that regard is seriously neglected, but, when we consider their own lack of knowledge, it is not so surprising to find the younger part of the

The Eager Internal Bath

community entirely ignorant of the fact that the colon is not only a very important organ within their body, but that they know nothing whatever of the importance of keeping it active.

It is not so surprising that those financially interested in the business of disseminating knowledge relative to the need of an instrument for daily use by the average person for the purpose of cleaning the colon, find it not a little difficult to educate people and convince them, when they are confronted with adverse advice, authoritatively given out by the lecturers of the Board of Health, against the self-applied Internal Bath.

Can such advisers have the good of the public at heart, when they know that the pernicious habit of drug-taking plays havoc with the other organs of the body, and that by belittling the drugless practitioners on every occasion, they leave the public with nothing to depend upon but the many chemical compounds for relieving their ailments.

It is not the practice of the would-be medical monopolists to decry these drugs, because they know well that they not only administer them themselves, but sooner or later, the cathartic users will be sending for them when conditions more severe than mere constipation announce themselves.

Like the narcotic habit, which is often the result of a prescription administered by a reputable M. D. under, perhaps, serious conditions, without an accompanying caution against its repetition, the drug habit takes hold of the average person through a repetition of the doctor's prescription, when a dull, stagnant condition arises resembling that which existed when the doctor recommended the dose, which previously afforded temporary relief. The standing of the physician who prescribed a cathartic known to the patient, and which brought relief, gives character to the drug, and it is but natural that when conditions are seemingly the same, the patient should prescribe for himself the same drug, and thus the habit is implanted on the strength of the good standing of the M. D. who first prescribed it.

If the American business man would take a lesson from the higher class Chinaman, who employs a physician to keep him well—prevent sickness—the doctor, if he desired to continue to be employed, would teach his patient the necessity of keeping the colon active, the wherefore and the manner of doing so. Such a doctor would not recommend the use of Drugs to accomplish the desired activity of the colon, for the reason that he would know that a worse condition would sooner or later follow the debilitating effect of the drugs which preyed upon the other organs, by draining them of the fluids Nature had provided, for the proper accomplishment of the important functions of the organs.

While all medical authorities concur in the fact that in the colon is found the origin of the irritation which causes headaches, they are slow to educate their patients as to the necessity for keeping that drain pipe of their body clean and active; they know that the dangerous headache powders have been depended upon for relief, but do they advise against the use of such dangerous poisons?

The colon plays such an important office in the origin of disease when it is inactive, and such a beneficial action when it is performing its functions regularly, that the necessity for cleansing it without the use of drugs should be taught until the laity knows of the all-importance of the cleansing of that organ by drugless methods, and especially when such diseases as Typhoid or Malarial fevers are disturbing the health of the neighboring families.

People should be taught that the worst enemy of good health is the self-prescription of cathartics, the taking of which is

certain to be followed by a reaction involving a loss of vitality.

The constant or daily prodding of the sluggish colon with drugs is a very dangerous habit, and the public ought to know from reliable authority that if this pernicious practice is continued for long, it is certain to have serious results.

It is a matter of record in the history of Guy's Hospital, in London, England, that the doctors employed therein, following the teachings of Professor Metchnikoff, to the effect that the elimination of the colon during youth was the only hope for reducing the percentage of diseases arising from an unclean colon, operated upon a child there who was in the last stages of tubercular joint disease, and amputated the greater part of the colon, leaving only about nine inches, which remaining part they joined to the small intestines, and the child got well in a few weeks.

It goes without saying that the amputation of the colon would have no beneficial effect in the future, unless the remainder were kept active; hence, the most important feature lies in the practice of the individual keeping it clean.

When it is conceded by all medical authorities that 90 per cent. of all our ailments arise from a congested colon, we must believe that during the prevalence of an epidemic, such as Typhoid, Small Pox, Infantile Paralysis, etc., etc., those who become its victims were certainly in the first place the victims of a sluggish colon, and those living in the same environments, in the same family, owe their immunity to the fact that their colon was discharging its duty naturally, or possibly with the aid of a cleanser other than drugs.

If ever there was a parallel to the quotation "Robbing Peter to pay Paul," it is surely found in "Cathartics," for the cathartics prey upon the innocent, inoffending organs of the body, such as the gall bladder, the liver, the kidneys, the intestines, etc., etc., so as to furnish fluids with which to flood the sluggish colon and liquify the contents, so that they may be expelled and the body relieved of "that dull feeling," the sick headache, or other symptom of Constipation that prompted the taking of the Cathartic, which becomes a veritable robber of the fluids Nature provided for other uses.

So the process of "Robbing Peter to pay Paul" goes merrily on year after year, according to the ratio of vigor with which Nature had fortified the user until the "Last Straw" is eventually reached, when nature calls a halt and falls exhausted.

The Doctor who prescribes poisonous, irritating drugs, if an educated man, knows the deteriorating influence upon the human body; hence he deliberately attacks the welfare of the individual.

He knows the greater beneficial action of the Internal Bath Appliance, wherein

warm water is substituted for the "fluid" that his Poison Drugs have been drawing from other organs.

He knows that the water, applied directly at the seat of the greatest congestion, can have no debilitating or other injurious effect upon the patient.

He knows that the action of the Internal Bath, applied at the seat of the greatest congestion, liquifies the congested material more effectually than when fluid is drawn from the other organs of the body, and cleans the colon thoroughly and completely.

He also knows that the drug, by depleting the other organs, fails to clean the colon completely, but that there remains in the colon a dangerous quantity of auto-poisons which will be taken into the circulation, and eventually deposited at the weakest part of the body, there to start the inroads of disease that may cause a breakdown of the constitution and encompass the death of the patient.

The cleansing process that benefits by invigorating the colon is ignored, because the M. D. in charge "Does not believe in" the self-administered Internal Bath, which he **would** believe in, and would order administered, if his patient were a hospital case. His influence is thus exerted in favor of the depleting process.

I reproduce, below, the extraordinary physical benefits derivable and actually derived (for I write of a veritable personal experience), by Mr. A., a man of 72 years, who had used the Internal Bath twice daily for at least one year previous to June, 1914, when he was taken with pneumonia of the left lung, due to unusual exposure to a cold draught of air when sweating profusely.

I was granted the privilege of quoting his case, as he gave it to me.

Very shortly after the middle of May, 1914, he contracted pneumonia, from which he suffered for a week or ten days, when, on the 3rd of June, his stomach rejected food and his wife, becoming alarmed, sent for an M. D.

A careful examination revealed a temperature of 104°, respiration 36°, and discharge of rusty sputum. The doctor gave orders for the hiring of a trained nurse, and forbade his patient to go to the bath room, only two doors away, saying he would return in the afternoon.

The patient progressed so rapidly that just nine days thereafter, or June 9th, he went out on business and walked home, over a half mile.

The doctor discharged himself the 6th, after he had made five calls.

The patient felt no ill effects other than great weakness for a few days; he continued to gain in strength, and never suffered from the attack thereafter.

It is very questionable if this patient, at

the age of 72 years, would have recovered at all, to say nothing of the rapidity of his recovery, had it not been for the fact that he had used an Internal Bath Appliance twice each day for over a year, resulting in creating a pure blood stream, with an entire absence of auto-poisons.

Others can bring about just as healthy resistance power by the use twice daily of the Internal Bath, without a particle of danger.

The rapid accumulation of auto-poisons in the neglected colon becomes easy whenever the activities of the colon are retarded or neglected.

* * *

THE DUPELL INTERNAL BATH

The intestinal tract is the very foundation of animal life. Without the stomach and its digestive appurtenances man could not exist. When the digestion and elimination of the waste products of food go on in a normal manner, health, vitality and happiness are the result, but when these processes are interfered with in any way, either sickness or death results. The most formidable physiological evil in the world to-day is constipation, that is, retention of waste matter in the system beyond its normal health period, which gives rise to fermentation, which in turn provides a fecund soil for the growth of millions of malign, disease-producing microbes, whose poisonous excreta, together with the poisons chemically elaborated in the fermenting food waste, are absorbed into the blood, a process known as auto-intoxication, which gives rise to any number of the most dangerous diseases.

The digestive canal is some twenty-five feet in length and is lined up with a mucous membrane forty-five feet long, arranged in sacculated folds, and otherwise provided with millions of absorbents that absorb and convey the nutrition contained in the digested food to the blood. The normal section of this tube for purposes of nutrition extends twenty three feet from the stomach while the remaining twelve inches above the vent is the natural receptacle for the feces, but, in constipation, the entire large intestine is clogged up with the sewage of the system, which becomes dry by the absorption of the poisonous putrefactive material.

People suffering from constipation are anemic, sallow, clay-colored, or deadly white, and suffer from indigestion, biliousness, flatulency, uric acid, gout, rheumatism, piles, fistula, disease of the kidneys and bladder, and are also the victims of neurasthenia, loss of memory and general debility.

The doctor when appealed to, proceeds to relieve the clogging up of the system with a cathartic, mixed with belladonna, or opium, which latter drugs are meant to

hush the painful cry of outraged nature which the cathartic has invaded. Millions are now spent on purgatives that only attack symptoms in such a manner that offended, disgusted nature, loathing their presence, ejects them from the system by secreting into the intestines a large quantity of fluid matter, evolved from the blood by an excessive expenditure of nervous force.

Common sense tells us that this is an exhaustive, a most ruinous method of treating constipation. All that nature requires is the assistance of a little warm water, than which no medicine is cheaper. The DUPELL Internal Bath has been designed to convey this warm water to the place where it is most needed in a safe, convenient, and luxurious manner. The apparatus consists of a rubber reservoir from which a flexible tube, terminating in a rubber rectal cone, conveys the water to the colon when the receptacle is pressed upon.

The reservoir contains $3\frac{1}{2}$ quarts of water and the method of using it is as follows: The reservoir is first pressed softly so that only a small quantity of water is injected. Giving the water a few minutes to be absorbed, more pressure is applied, and after a time the patient may sit upon the reservoir and use all of his own weight to force the water into the colon.

When the water reaches the dried imprisoned feces, it is loosened from its attachment to the colon, and the mass is moved towards the exit by the expulsive action of the bowels. As the sudden flood of water is expelled it carries with it the inspissated feces, and the internal Ego congratulates itself on the delightfully refreshing manner in which the local disturber with its myriads of microbes has been dispossessed.

In health, the internal bath may be taken at least twice a week, but in cases of constipation it may be taken daily. After an experience of ten years no instance has occurred of any ill effects from internal bathing, but on the contrary it has been found to restore natural action and to act as a tonic stimulus on the muscles of the colon.

The Dr. Charles Company, 748 Fulton Street, Brooklyn, N. Y., is the sole agent for the Dupell Internal Bath. The regular price is ten dollars, but to introduce the bath more quickly the price for a limited period is seven and a half dollars.

FROUDE, CHAS. C., N. D., D. C., Post Office Building, 260 Fair Street, Kingston, N. Y.

Dr. Froude, who was born in 1888, graduated at the Universal Chiropractic College in 1914 and the American College of

Naturopathy, and is a member of the American Naturopathic Association, International Chiropractic Association, and the International Medical Freedom Association.

Dr. Charles C. Froude

He is a member of the firm of Froude & MacKinnon and is author of "Simplified and Practical Dietetics," of which three editions have been published.

* * *

FERRI SANITARIUM AT WHEATON, ILLINOIS.

This new natural healing resort has been opened by Dr. Ferri.

Dr. Ferri is the well-known editor and Italian pioneer in this country who publishes the magazine "La Medicina Naturale," and who is the author of the book "La Cura Naturale" and several other pamphlets. He is conducting a very successful institution for Nature Cure and Natural Life, principally Hydrotherapy, Diet, and manual methods at 152 North Ashland Blvd., Chicago and is a well qualified man for an institution of this kind on a larger scale.

The major practical experience in his professional work, Dr. Ferri, however, has acquired as doctor in his Health Resort in Chicago, and has been writing a number of treatises, pamphlets and books. In fact, he was one of the strong men in Chicago in the Naturopathic movement for the last ten years.

Dr. Ferri is well known as a loyal and active supporter of rational Naturopathic methods, who uses the good in all, and applies the treatment to suit the requirements of each patient. Fasting and diet are largely used in his methods, as in all ra-

tional, highly developed therapeutics, and therefore he has been so successful in the past. Doctor Ferri is married, and his wife is a true and able assistant in the ladies' department and the household of the Resort. It is a known fact that a large institution cannot be successfully handled by a Drugless doctor without the good assistance of an efficient wife, who is usually half of the success of the institution.

We know Dr. Ferri quite well, being familiar with his individual qualifications, and we feel that the enterprise will prove a great success.

We recommend this institution to our readers in Chicago and vicinity, feeling secure in the belief that visitors are always welcome.

A descriptive circular will be forwarded, on request.

City office is at 152 North Ashland Blvd., Chicago, Ill.

ERATH, MR. W. F., Rosebank, N. Y.

Sufferers from rheumatism, encumbrances of morbid matter, boils, abscesses, open

sores, hemorrhoids, goitre, and kindred ailments, are susceptible of being cured by the hot-air, or Turkish bath. Hitherto the public Turkish bath was the only available place where hot-air baths could be obtained, but such places are established for the use of people not suffering from any of the troubles mentioned, and besides patients would not care of themselves to invade the publicity of such institutions. It follows that such patients can only obtain

Mr. W. F. Erath

treatment from such practitioners as possess an apparatus for giving hot-air treatments or possess a hot-air apparatus of their own. This latter idea is at once the most private, most convenient, most economical, and most therapeutic, advantages that will commend the bath to everyone.

Rather Turkish Bath

Mr. W. F. Erath, of Rosebank, Staten Island, N. Y., has been a long sufferer from rheumatism and kindred diseases, and has visited many home and foreign bathing establishments without gaining any relief. The idea of indulging in Turkish baths at home, as being more enjoyable, more wholesome and more economical, than by attending public baths, so possessed him that he set about making a cabinet Turkish bath for home use, and after years of experiment, created the Rather Turkish bath, a marvel of perfection, simplicity and economy. By means of this bath not only himself, but many of his friends have been made healthy, strong and happy. The bath, as will be seen from the illustration, is of strong, commodious and artistic construction, and is a most effective agent of health. To be able to take a Turkish bath, with all the advantages the Rather bath affords, is well worth the price of same. By its use adverse pathological conditions are abated, and all debris of waste matter and poisons that clog the arterial capillaries are removed in Nature's way, by elimination through the eliminative organs, and diseased conditions are wholly eradicated. The possession of a healthy and happy life by means of the Rather Turkish bath is a consummation devoutly to be wished.

YOUR HEALTH SUPPLY COMPANY

Anyone visiting No. 912 Belmont Avenue, Chicago, Ill., the home of Your Health Supply Co., of which Dr. E. D. Hunsaker is president, will discover a prize in the form of a food preparation manufactured by this concern for the cure of that universal complaint, constipation. This is a combination of California fruits, whole wheat and bran flour, and other harmonious laxative vegetables, and pressed so that it will keep for months. Being a food and not a drug, it can be eaten at every meal as a palatable part of the menu. It is guaranteed to regulate the bowels and strengthen the intestinal mus-

cles. It has a higher nutritive quality than meat. Its use does away with the use of purgatives, pills and mineral waters, all of which give only temporary relief and leave the system in a worse condition than before. Dr. Hunsaker carries on an active mail order business in his food regulator, and sends a pound package prepaid for \$1.25.

THE HISTORY OF THE INTERNAL BATH

By Charles A. Tyrrell, M. D.

Inasmuch as I have the best of reasons for the statement that Internal Bathing is

Charles A. Tyrrell, M. D.

at the present time being regularly practised by upward of at least half a million Americans, it may be of somewhat general interest to examine into what is known of its origin, its reason and the recent stages by which it arrived at its present popularity and resultfulness.

Though popularly supposed to be a comparatively modern practice, its usage, in a crude form, is traceable many centuries back, for Pliny in his *Naturalis Historia*, A. D. 79, mentions it as being prescribed by the Ancient Egyptian Physicians to whom its investigation was suggested by the health habits of the Ibis, a bird of the Nile.

These Egyptian Physicians, by the way, were the first medical practitioners known to history, not excepting the Chinese.

And the ancient Egyptians, measured by their accomplishments, seem to have been a pretty healthy, husky people.

Although history does not give much light on the subject in more recent periods, it does mention a widespread use of this treatment throughout Europe in the early part of the Eighteenth Century, especially in France.

The recent resuscitation of this ancient remedial practice dates back to the early forties, when Dr. A. Wilford Hall of New York, after years of public speaking and the authorship of many religious and scientific works, failed in health, rapidly declined and was given by his physicians but a few months to live.

Dr. Hall was not a Doctor of Medicine, but of Philosophy and Laws, and a man of the highest knowledge and attendants. I knew him very well in later years and he frequently said: "Having had considerable trouble that way, the idea came to me like an inspiration that if I could keep the colon cleansed of waste matter, I would have at least a better chance of recovery."

Dr. Hall persisted in this treatment, using the crude and laborious method of a bulb syringe, and from that time until his death at the generous age of eighty-two, forty odd years after he had been given up, did his utmost to give the world the benefit of his personal experience.

I arrived in New York City in 1887, after an extended trip through India, China and Japan, and unwisely invested my entire capital in a commercial venture which failed.

More or less indifferent attention to my physical condition and the shock of this experience brought on a second stroke of paralysis on the left side (the first having occurred previously in Hong Kong).

Being helpless, I became an inmate of a hospital for a time; was then refused admission to another and fortunately knowing of some of the results of Internal Bathing I resorted to it regularly with such success that in 90 days I was walking about the city.

Impressed by the fact, however, that the method of taking these baths was then crude and imperfect, I decided to study, practice and improve on it. Hence, the invention of that appliance so long and favorably known as the "J. B. L. Cascade."

To do this properly and legally I quickly found that I would have to become a Doctor of Medicine.

Entering immediately a medical college, I took the four years' course and graduated with honors.

Not at all a bad commentary on the results of Internal Bathing, considering my condition the year before entering.

After graduating, I found my experience exactly akin to all those who must educate

the public, especially in a matter where most of us are so notoriously careless—Irrregularity.

But I knew from the experience of myself and others that the foundation of a great and revolutionary, though perfectly natural remedy was there.

And that once its results were generally known, no power could stop its rapid and universal appreciation.

And so I persevered.

From the smallest of beginnings, I found that every J. B. L. Cascade which I distributed brought me demand for others—that once the proper administering of the Internal Bath accomplished its result with one patient, he was generously eager to pass his experience along.

And so it grew, and has grown so astoundingly in the past twenty-years that I heartily agree with physicians generally when they claim that "the vast majority of human illnesses are directly or indirectly caused by accumulated waste in the colon."

That also is the direct cause of our frequent loss of spirits and lack of confidence; in other words, our fifty per cent. of efficiency.

You will never appreciate this properly except in the clear, eager, confident way you will always feel the morning after an Internal Bath.

We all want to be well and efficient and stay so without calling upon Drugs to help, if that be possible. There are, as I have said, hundreds of thousands who are already doing this by this purely natural preventive, and the numbers are steadily growing.

As a result of my success during the twenty-five years of my specializing on this, Nature's remedy, many imitators of my appliance and method have come and gone.

Successful inventions always have imitators (a tribute to merit), consequently I have several followers who, not content with pirating my ideas, actually appropriate the terms in which I describe my treatment. But there is only one tried and approved method of taking an internal bath, for there is only one "J. B. L. Cascade."

* * *

WHAT IS AN INTERNAL BATH?

Much has been said and volumes have been written, describing at length the many kinds of baths, civilized man has indulged in from time to time. Every possible resource of the human mind had been brought into play to fashion new methods of bathing, but, strange as it may seem, the most important as well as the most beneficial, of all baths, the "Internal Bath," has been given little thought. The reason for this is probably due to the fact that few people seem to realize the tremendous part that

internal bathing plays in the acquiring and maintaining of health.

If you were to ask a dozen people to define an internal bath, you would have as many different definitions, and the probability is that not one of them would be correct. To avoid any misconception as to what constitutes an internal bath, let it be said that a hot water enema is no more an internal bath than a bill of fare is a dinner.

If it were possible and agreeable to take the great mass of thinking people to witness an average post mortem, the sights they would see and the things they would learn would prove of such lasting benefit and impress them so profoundly that further argument in favor of internal bathing would be unnecessary to convince them. Unfortunately, however, it is not possible to do this, profitable as such an experience would doubtless prove to be. There is, then, only one other way to get this information into their hands, and that is by acquainting them with such knowledge as will enable them to appreciate the value of this long-sought-for and health-producing necessity.

Few people realize what a very little thing is necessary sometimes to improve their physical condition. Also, they have almost no conception of how little carelessness, indifference or neglect can be the fundamental cause of the most virulent disease. For instance, that universal disorder from which almost all humanity is suffering, known as "constipation," "auto-intoxication," "auto-infection" and a multitude of other terms, is not only curable but preventable through the consistent practice of internal bathing.

How many people realize that normal functioning of the bowels and a clean intestinal tract make it impossible to become sick? "Man of to-day is only fifty per cent. efficient." Reduced to simple English, this means that most men are trying to do a man's portion of work on half a man's power. This applies equally to women.

That it is impossible to continue to do this indefinitely must be apparent to all. Nature never intended the delicate human organism to be operated on a hundred per cent. overload. A machine could not stand this and not break down, and the body certainly cannot do more than a machine. There is entirely too much unnecessary and avoidable sickness in the world.

How many people can you name, including yourself, who are physically vigorous, healthy and strong?

It is not a complex matter to keep in condition, but it takes a little time, and in these strenuous days people have time to do everything else necessary for the attainment of happiness, but the most essential thing of all, that of giving their bodies their proper care.

People don't seem to realize, strange to say, how important it is to keep the body free from accumulated body-waste poisons. Their doing so would prevent the absorption into the blood of the poisonous excretions of the body, and health would be the inevitable result.

If you would keep your blood pure, your heart normal, your eyes clear, your complexion clean, your mind keen, your blood pressure normal, your nerves relaxed and be able to enjoy the vigor of youth in your declining years, practice internal bathing and begin to-day.

Now that your attention has been called to the importance of internal bathing, it may be that a number of questions will suggest themselves to your mind. You will probably want to know WHAT an Internal Bath is, WHY people should take them, and the WAY to take them. These and countless other questions are all answered in a booklet entitled "THE WHAT, THE WHY and THE WAY OF INTERNAL BATHING," written by Doctor Charles A. Tyrrell, the inventor of the "J. B. L. Cascade," whose lifelong study and research along this line make him the pre-eminent authority on this subject.

Perhaps you realize now, more than ever, the truth of these statements, and if the reading of this article will result in a proper appreciation on your part, of the value of internal bathing, it will have served its purpose. What you will want to do now is to avail yourself of the opportunity for learning more about the subject, and your calling for this book will give you that information. Do not put off doing this, but get the book now, while the matter is fresh in your mind. Address: Charles A. Tyrrell, M. D., 134 West 65th Street, New York, N. Y.

* * *

THE ZOE JOHNSON COMPANY

The Zoe Johnson Company, Wendell Bank Bldg., Chicago, Ill., handle a line of supplies for practitioners of all drugless methods. About the only difference between that company and the ordinary physicians supply house is that the Zoe Johnson Co. deal exclusively with Drugless Physicians and their line is essentially different in that respect.

This company was organized over two years ago under the name of H. D. Ulmer & Co. It is a thorough Naturopathic organization and specializes in the sale of all books and articles of interest to the Profession.

It is the desire and purpose of the Zoe Johnson Company to give the same service to the Naturopathic practitioners that the larger medical supply houses render to the medical organization. The company's policy is consistently Naturopathic and its

growth should be in proportion to the growth of the Naturopathic movement.

The company was founded on the idea that other considerations being equal, most Drugless Practitioners would prefer to patronize a house in sympathy with their principles in preference to dealing with a medical supply house. On this principle the Zoe Johnson Co. solicits the trade and friendship of members of all schools of natural healing. The company also asserts that it can save the Profession the inconvenience of ordering their supplies from widely different sources as they carry practically everything that a Drugless Physician has occasion to use.

The Zoe Johnson Company claim to be the only house on earth dealing exclusively with the Drugless Profession that carry a complete line of supplies. They have for sale all the books dealing with natural methods of healing, Naturopathic, Chiropractic, etc., also handle a good line of electro-therapeutical apparatus, treating tables and other equipment.

The company is confident that rational healing methods will increase greatly within the next few years and they believe that a house such as their organization represents should increase its usefulness in proportion to the advance of Naturopathy if accorded the support of the Profession.

* * *

THE LINDLAHR IDEA

One of the first Nature Cure Institutions to be established in this country was founded by Dr. Henry Lindlahr of Chicago in the year 1900.

This institution of humble origin has fought its way against terrific opposition to a position of prominence in the field of therapeutics. The scope of the work performed by this institution has undergone a number of extensions, but always has adhered closely to the fundamental principles governing disease and its cure.

The home institution is located in the heart of Chicago, a few minutes' ride from the famous loop district, situated on a wide boulevard and surrounded by many of Chicago's well-known institutions of learning.

The house itself is a large and stately mansion, one of Chicago's historic landmarks, thoroughly re-modelled and enlarged to suit its present purposes. The first floor of the main building contains the treatment rooms, and bath-rooms equipped with modern appliances for the application of water cure, baths, massage, osteopathic, chiropractic, neuropathic and other of the latest evolved methods of healing. On the next floor are situated the doctor's offices, pathological laboratory, general offices of the institution, large and spacious parlors, and the main dining room. The remainder

of the house is given over to bed-rooms for the accommodation of guests, sun parlors and air baths.

A few years ago it became necessary to enlarge this institution for the purpose of accommodating the growing number of applicants desirous of undergoing the Nature Cure. This led to the purchase of Huntington Manor in the beautiful suburb of Elmhurst, situated 17 miles west of Chicago.

The property comprises about 8 acres of land laid out in beautiful lawns, flower beds, vegetable gardens and macadam driveways. The extensive lawns are surrounded by woods containing the finest variety of trees of fifty years' growth; stately elm, shade maple and spreading oak along with fir, pine, spruce and many other selected trees blending in artistic combinations and contrasts. The borders of the woods are lined with many varieties of shrubbery which come into bloom successively during the spring and summer season.

Mr. Bryan Lathrop, the former owner and founder of Huntington Manor had a hobby for landscape gardening, and it was through his efforts that Huntington Manor became a park in every sense of the word.

Dr. Lindlahr has added to this, his knowledge of agriculture by treating the soil with the positive electro-magnetic mineral fertilizers on which depend the richness of food products from the viewpoint of natural dietetics. The vegetable garden which he has established on the grounds furnishes both health homes with the most luscious fruits and vegetables rich in mineral salts, and, therefore, of unusual medicinal value.

In 1916, it again became necessary to enlarge the institution and for this purpose the adjoining property to Huntington Manor was acquired, thus adding 12 more acres, and many buildings to the original property.

The employees of the Lindlahr Institutes number one hundred and twenty.

The Medical Staff consists of Dr. Lindlahr, the chief; Dr. Millis, House Physician; Dr. Carter, Asst. House Physician;

Lindlahr Sanitarium, Elmhurst, Ill.

Dr. du Plessis, and Dr. Ulmer, Asst. House Physicians and Chief Supervisors of the special manipulative work; Dr. Matthiesen, matron; Dr. Larson, Chief of Nursing Staff; Dr. Kilberg, Clinical Pathologist.

The general business of the institution is managed by Mr. Pilbeam.

The other employees consist of Nurses, operators, household help, engineers, gardeners, etc.

In connection with the institution is a training school for nurses and the College of Nature Cure. All of the nurses, operators and physicians are thereby trained within the institution. The plan upon which the school was originally operated, and which plan is still in effect, is to offer qualified young men and women an opportunity of acquiring an education in this work without cost or expense to them. They are given their room, board, tuition and a salary in exchange for the services which they render the institution.

The nurses' training course is three years practice and the college course in Nature Cure for the degree of doctor is likewise of three years' duration. It can be readily understood that there are always a greater number of applicants for places in the institution than there are accommodations for or for whom there is a sufficient amount of work. As a consequence, it becomes necessary to establish a course on a paid tuition basis. The College is now offering a two year course for those students who desire to earn a Doctor's Degree. There are likewise many applications for enrollment by graduates of other schools and systems of therapeutics, and for their accommodations, there have been established post-graduate courses of four and six weeks' duration. In order to accommodate these students, it has been necessary to acquire three other houses in the immediate neighborhood.

The work is growing to such an extent that more space will have to be added in the very near future. As there are but few institutions in this country devoted ex-

clusively to drugless treatment, it behooves every practitioner of natural therapeutic measures to acquaint himself with the **Lindlahr Idea**, as it is quite frequently the case that practitioners find it necessary to send patients to a sanitarium, and they should be sure that they are selecting one in which the ideas of drugless healing are upheld.

This institution is not subsidized, nor endowed. It is not supported by any religious creed or sect, nor does it support any sect, creed or cult. It is an independent non-sectarian organization built on the idea of service to humanity. It employs by way of treatment only those forms and methods which are in harmony with Nature's laws.

This then is the **Lindlahr Idea**,—to teach right living for the establishment of health; to teach health as the foundation of efficiency; to teach efficiency as the basis of true service to humanity.

* * * LOCAL APPLICATIONS MADE PRACTICAL.

By F. F. BURDICK, Milton, Wis.

The evolution of "Local Applications," from the days of "blistering," "cupping," "bleeding," etc., to the present time, makes an interesting page in medical history.

Every physician—whether specialist or general practitioner—has frequent demand for the most effective means of **Local Applications** for the relief of pain, congestion, infections, sprains, dislocations, hypertension, etc., and to increase local nutrition and stimulate reflex functional activity in sluggish organs.

Hot water bottles, electric pads, soap stones, vibrators, high frequency currents, and radiant light and heat, have all been requisitioned to service in this important field of therapeutic ministrations.

Light possesses many physical qualities which, when properly understood, readily give it **first place** among natural agencies for therapeutic applications. In fact, in these days of progress, few physicians are to be found, who have not experienced some of the splendid results of **Radiant Light** and **Heat** for the special purposes mentioned above.

Light is a vital stimulant, to vegetable and animal cells alike. Practically the same physical processes are obtained in both, under the influence of Light Rays.

We are all familiar with the effects of sunlight upon the dormant little garden seeds in spring time, stimulating them to leaf, flower and fruitage, within the short space of the summer months. But, we fail to observe the marvelous effects of light upon the metabolism of our own bodies.

The same vital force that tints the cheeks of the ripening fruit in the orchard, or aids

Lindlahr Sanitarium, Chicago, Ill.

Fig. 1

the growing plant in the garden to build itself from air, water and soil, will redden the blood in the veins of the anemic, and help build healthy bone and muscle tissue from good corn and potatoes.

In other words, the same light rays that prepare the solids in the soil for plant food and stimulate the tiny vegetable cells to growth and development, transform the green starch of the ripening fruit into grape sugar for us, and stimulate the digestive and assimilative functions to their fullest activity for normal tissue building and repair.

Properly applied, light is the most vital stimulant to the processes of nutrition within the realm of physical forces.

Reaction is obtained without the expenditure of vitality.

Light, penetrating the tissues, stimulates functional activities without exhausting effects, and is the ideal agency for combating the diseases of childhood and other conditions associated with low vitality. Because of this, infantile paralysis, in its

early stages, is being handled very successfully with proper light applications.

To place the subject of Local Applications upon both a practical and scientific basis, the writer developed the Radio-Vitant series of Applicators. They are constructed upon basic principles which make them the most effective and universal method for local applications known:

An even distribution of light and heat over the entire area treated, permits of continued application with increasing intensity, thus securing deep, effective penetration, without discomfort or danger to the patient.

Wide range of control, provides the most varied and positive technique, from a low graduated heat, when used as a "bed warmer," to the intense heat of the baking cabinet.

Perfect thermal insulation protects from all danger of burning patient or bedding. The value of this feature will be appreciated by all those familiar with the severe burning from hot water bottles, etc., in the surgical ward.

Fig. 2

They are light and portable, and can be easily carried to the homes of the patients, or to the hospital.

The universal features provide the widest possible range of adaptation to every part of the body and in all positions and modalities, including:

(1) **Direct Method.**

With the "Applicator" resting upon the supporters, (fig. 1) applications may be made to the back, chest, abdomen, etc., varying the height of the Applicator by extension of the supporters.

(2) **Indirect Method.**

Operated on the Radio-Vitant Stand, the applicator may be placed over any portion of the patient's body in bed (fig. 2) or sitting (fig. 3) with wide variations of technique.

(3) **Radio-Vitant Foot and Leg Bath** (fig. 4).

Fig. 3

The Light Rays, dilating the blood vessels of the feet and legs, divert the blood from the head, lungs, stomach, liver, etc., thus quickly relieving congestion in these organs. A sheet wrapped about the legs of the patient, with feet on Applicators, forms the retaining walls for the Leg-bath Cabinet. Bottom of feet should be protected by asbestos or other sandals.

(4) **Radio-Vitant Steam Compress.**

Too great value can scarcely be placed upon this modality.

The linen pad wrung from cold water, is placed in the container with the air tight covering (fig. 5). It is then placed on the chest, back, knee-joint, or other parts desired for treatment, under Applicator. The temperature of the compress is quickly brought to the desired point where it is

Fig. 4

held uniformly for an hour or more without changing.

(5) **Radio-Vitant Baking Cabinet.**

By folding a blanket about the lower edge of the Applicator or supported on the "Stand" and by using the three heats of 640 watts, the most excellent baking cabinet for inflamed joints and other diseased parts is obtained.

A black cotton covering for exposed areas absorbs light rays and moisture of the skin, making possible high temperatures without discomfort.

Perhaps the most interesting feature, however, about this new method of Local Applications is that the manufacturers have

Fig. 5

perfected dies, presses, and special tools, for building the various outfits in large quantities at less cost than ordinarily charged for an ordinary lamp in a Parabolic reflector.

It might be added that an interesting brochure has been written regarding **Local Applications Made Practical**, which is free. Address: F. F. Burdick, Milton, Wis.

LOUIS LUST'S HEALTH BAKERY
100 E. 105th St., New York

Many foods which are daily consumed have a disastrous effect on the body. People wonder why their hair comes out—why their teeth decay—why they have bad complexions—why they have headaches and many more serious troubles.

These things do not accompany health. Everybody recognizes that good food, exercise—sunshine—fresh air and a proper mental attitude are essential to health. While the importance of "good food" is acknowledged, the people of America are just beginning to learn what good food really is. Good food is good in every respect. It looks good, tastes good and does good, in that it supplies the chemical elements and other properties necessary to build the body.

Mr. Louis Lust

Whole wheat bread is good food.

Dr. Harvey Wiley Advises Women to Use Whole Wheat Product. Next to coffee, white bread is the Nation's greatest curse, Dr. Harvey Wiley, food expert, told a meeting of the Women's Section of the Navy League, "White bread is poisonous," he said. "Whole wheat bread is the only kind. If America had been nourished properly from the cradle up, the majority of men to-day would not be unfit for military service."

Thousands of Physicians and Dentists and many Sanitariums advocate whole wheat bread. Among many prominent advocates are: Alfred W. McCann—in The New York Globe; Dr. W. A. Evans—in The Chicago Tribune; Martin Delaney—in The Chicago American; Dr. Albert S. Gray—in The Daily News; Bernarr Macfadden—in Physical Culture Magazine; Phillip B Hawk, Ph. D.—in Ladies' Home Journal; Dr. Benedict Lust—in the Herald of Health and Naturopath; Dr. F. W. Collins—in "Mecca News."

The late Rev. Father Sebastian Kneipp endorses and recommends the exclusive use of pure natural Whole Wheat Bread in all his books written on this great Natural food movement.

Foods that prevent constipation, foods that build, foods not deprived of their mineral elements nor organic salts.

This Natural Whole Wheat Bread and many other genuine Whole Wheat Products, like Whole Wheat Fruit Bread, W. W. Muffins, Zwieback Crackers, Soup Meal, Bran Rolls, Bran Bread, and, also, the genuine whole wheat flour, are manufactured exclusively by **Louis Lust's Health Food Bakery, New York**, and distributed daily to agencies in greater New York.

* * *

MacKINNON, JOHN L., D. C., 260 Fair Street, Kingston, N. Y.

Born in 1888, Dr. MacKinnon graduated at the Palmer School of Chiropractic in 1916, and is a member of the Universal Chiropractic College and a partner in the firm of Froude & MacKinnon.

* * *

HISTORY OF THE "MECCA OF CHIROPRACTIC" HOSPITAL AND CLINIC OF DRUGLESS PHYSICIANS AND BLOODLESS SURGEONS

Dr. F. W. Collins, in 1911, in connection with the New Jersey College of Chiropractic, established a clinic for the poor at 1113 Washington St., Hoboken, N. J. The parlor of his home was used for the school, and the hospital consisted of the back parlor with one bed.

In 1912, Dr. G. E. Harley became associated with Dr. Collins, and a free clinic and hospital was opened in the Terminal Building, Hoboken, with one adjusting table, and the following announcement appeared in the Hoboken papers:

A free clinic has been established for the poor who desire to receive Chiropractic Adjustments in the new science of healing without drugs. Apply, Rooms 605-607 Terminal Building, Hoboken, N. J.

In 1913, the New Jersey College of Chiropractic was moved to 122 Roseville Ave., Newark, N. J., and incorporated under the laws of the State of New Jersey as an institution of learning. One room was devoted exclusively to free clinic patients under the direction of Dr. J. C. Saile; this room containing two tables. This clinic became so large that it was necessary to send out the senior students to the homes of patients that were afflicted and could not get out of the house.

Dr. F. W. Collins

The method pursued was this: two or three students were taken to these cases with one of the professors, and the case lectured on and left in charge of Seniors.

In connection with the New Jersey College of Chiropractic advertisement, the clinic was advertised in over thirty papers published in the State.

The clinics grew daily, and in 1915 it was necessary to open another room, using one for women and crippled girls, the other for men and crippled boys, with nine tables for adjusting.

In January, 1916, Dr. Saile resigned, and Dr. Matthew Robinson was appointed chief director of clinics.

The wonderful success of Chiropractic and Naturopathy in the curing of disease has spread throughout the State, and it was decided this year to form a corporation, and secure a site for a Hospital in Newark, in the Roseville section.

The charter of incorporation has been received from the Secretary of State, for the "Mecca of Chiropractic" Hospital and Clinic of Drugless Physicians and Bloodless Surgeons of the State of New Jersey, at 122 Roseville Ave., Newark, N. J.—Incorporated Under the Laws of the State of New Jersey, for the Purpose of

Conducting Clinics for the poor;

To establish Hospitals and Ambulance service in the Counties of the State of New Jersey;

To train nurses Chiropractically in the care of the sick by drugless methods;

To furnish Hospital and Clinical practice for graduate doctors and students to become drugless physicians and bloodless surgeons;

To give free lectures and demonstrations to the public on Chiropractic and drugless sciences;

To promote harmony and brotherly feeling throughout the State of New Jersey with all Chiropractors and drugless practitioners, the upholding of professional ethics and the furthering of Social Intercourse among its members.

Dr. Collins' book, "Chiropractic in a Nut-shell" will soon go to press. This is a unique work—nothing like it has ever before been published.

Dr. Willard Carver says, "although I do not believe in all of Dr. Collins' views, I believe him to be sincere."

Dr. Stretch said at the fifth annual banquet of the New Jersey College of Chiropractic, "Dr. Collins is the greatest drugless physician of the twentieth century."

Dr. B. Lust, at the annual pilgrimage of the Faculty and Students at the Yungborn, Butler, N. J., June 1916, said, "We have had many pioneers in the drugless healing art, but the man that has done more than all the pioneers, the man that has given more money and assisted in legislative work than all the others put together in the State of New Jersey, is Dr. F. W. Collins, and it gives me unbounded pleasure to introduce to you Dr. F. W. Collins."

Dr. A. Victory, in Philadelphia, in addressing some students at the Philadelphia College of Osteopathy, said, "Dr. Collins is an authority on the cure of disease, especially Infantile Paralysis, and we take off our hat to him."

Dr. Wallace Fritz, at the Convention in Atlantic City of Drugless Physicians, said, "It gives me pleasure to introduce to you a man who knows more about legislation than all the others in the State."

Dr. C. A. Burdette, Psychologist, says, "Dr. Collins Has a Master Mind."

Dr. C. F. Haverin says, "It was through the efforts of Dr. Collins and his money and influence that Osteopaths are recognized in New Jersey."

Dr. B. J. Palmer said, regarding the last Chiropractic Bill, that Dr. Collins would be the only man in the State of N. J. that could meet the requirements and pass such examinations as required by the Chiropractic Act.

Dr. Collins was selected by Thomas Flemming, the cartoonist, as one of the 100 prominent Newarkers, as Macbeth, with the motto "Throw Physic to the dogs. I'll have none of it. I am a Chiropractor."

Dr. Wire, an M. D., says, "I have heard doctors lecture in many Colleges, but there is only one real lecturer, and that is Dr. F. W. Collins."

Dr. Paczkowski, M. D., says, "To think we have to go to a Medical College for four years, serve interne for one year, pass a stiff State Board examination, and then come to Dr. Collins, a Chiropractor, to learn how to cure disease."

Miss Rose E. Tapley, the great moving picture actress, says, "Dr. Collins is a wizard at healing the sick."

Dr. Schneider said, after Dr. Collins' lecture in St. Cecilia Lodge of Masons, in Newark, "That man Collins is shaking the very foundation of medical theory, don't ever have him lecture here again."

more of practical Chiropractic than B. J. Palmer and all the rest put together."

Dr. B. Lust says, "Dr. F. W. Collins is a man who does things. We live in the same community and I am glad to count him as my sincere friend."

Dr. Arnold, at Butler, exclaimed to the delegation making the Pilgrimage to the Yungborn, "That is the Collins bunch. They are bright and intelligent, I am glad to meet them."

Prof. Jackson, Psychologist, says, "Dr. Collins is a Master in the healing Art."

Prof. Nelson Sizer, of the Wells Phreno-

New Jersey College and Hospital of Chiropractic, Newark, N. J.

Dr. B. A. Dresser stated to a class he was instructing in 1914, in the New Jersey College of Chiropractic, that he was a graduate of the Universal College of Chiropractic in Davenport, had taken special work under Dr. Sharpe of the Davenport College of Chiropractic, had been in the Palmer School of Chiropractic and talked with Dr. Palmer and watched him at work, but he said the greatest adjustor of all is your Dean, Dr. F. W. Collins. He is truly the King of Adjustors; we can all lift our hat to him.

Dr. Eugene Christian says, "As a lecturer and instructor, Dr. Collins has no peer."

Dr. W. Wallace Fritz says, "Dr. Collins has the knack to know how to control; his students stick and obey his every wish."

Dr. Blumer exclaimed, "Dr. Collins is a wonder."

Dr. A. E. Gregory says, "Dr. F. W. Collins is a constructive builder. He knows

logical Cabinet, says, "What You (Collins) know how to do, few can pass or excel; you would make a great surgeon, lecturer and teacher."

Dr. Delmar Eugene Croft, Psychotherapist, says, in the delineation of Dr. Collins, "You will excel as a Scientist, Surgeon, Specialist, Advisor, Organizer, Lecturer, Public Speaker, Writer and Manager."

Dr. Paul Von de Schoppe, character delineator, says "Dr. Collins will make his mark in the world by his intense feeling, vitality and energy. He has Perception, Occult Insight, Premonition, Creative Royalty, Impulse, Tact, Judgment, Zeal, Courage, Sagacity, Decision, Genius, Justice, Endurance, Determination and Force. He is a lover of the beautiful, is gentle, harmonious, sympathetic, full of Hope, Faith and Love. He is Receptive, Spiritual, Domestic, Benevolent, Willing, and Active—a man when you once know him, is to love him."

NATIONAL CHIROPRACTIC LEAGUE

The National Chiropractic League was founded by a number of prominent Chiropractors whose fundamental aim was to bring together the members of Chiropractic societies; all the Chiropractic Schools and colleges and all the students attending Chiropractic Schools and Colleges in the country. Already in its short career it may be stated to include 200 odd members. Officers elected for the first two years are as follows: A. Deininger, D. O., D. C., N. D., President, Dean of New York School of Chiropractic; Chief of Staff of Chiropractic Sanatorium; Vice-Presidents: L. Kaim, Ph. G., D. O., D. C., representing societies. B. Lust, M. D., D. O., N. D., exchange-vice-president, president American Naturopath Association, Editor of *Herald of Health and Naturopath*. E. A. Deininger, representing Sanataria. Mrs. B. Sears, representing Chiropractic students. Treasurer: Frank L. Tucker, D. C. Board of Governors Dr. A. C. Broline, Dr. H. Mitchell, Dr. H. Harris, Dr. J. S. Riley, Pres. Washington School of Chiropractic, Dr. M. Broberg, Chief of Broberg Institute. As Executive Secretary S. Gerschaneck, A. M. was elected to give his time and labors to carrying out all those aims and purposes for which the League was formed.

Object of the League

1. To advance the Philosophy, Science and Art of Chiropractic in every and all legitimate ways.
2. To co-ordinate and to systematize a uniform plan to obtain and to promote favorable legislation in all the states of the Union.
3. To undertake and to encourage and to support all campaigns for legislative recognition; to oppose unfavorable acts throughout the country.
4. To advance the standards of education and to establish minimum requirements in Chiropractic Schools and Colleges.
5. To spread and disseminate information concerning Chiropractic and its principles among the laity.
6. To advance and stimulate further growth of membership among its competent members.
7. To formulate and encourage high ethical standards in the profession.
8. To promote and establish additional local and state chapters or branch societies in every state and important cities, or strengthen those already formed which join the League.
9. To promote and to advance professional intimacy and to exchange institutional courtesy and ideas among and between all recognized Chiropractic Schools and Colleges.
10. To establish a library and Clearing House of Information, both for the Societies, Schools, members and the laity.
11. To condemn and disbar from practice those Chiropractors who are proven dishonest or incapable.
12. To conduct a registration bureau, covering every section of the country, thus aiding the practitioners to virgin fields and to

spread the gospel of Chiropractic into every city, village and hamlet of the country. 13. To provide a form of discussion, issuing bulletins of information and progress and publishing an official organ. 14. To aid in establishing free Clinics. 15. To enlist the moral support and financial aid of the leading men and women in the community, to spread the gospel of right living through Chiropractic. Membership to the League is open to every Chiropractor and to every man and woman who may in any way be interested in Chiropractic and in its endeavors to spread the gospels of the drugless profession. Address the Executive Secretary, 39th Street and Broadway, New York City.

* * *

THE NATURAL LIFE COLONY AT PALM CITY, CUBA

The Natural Life Colony, which was a dream for so many years and looked so many times as though it would never realize, has now become a fact. We are glad to announce to all who are interested in this project that the Colony Association has taken up 1,500 acres of land at Palm City, Province of Camenquey, Cuba.

After examining prospective sites throughout the United States, including the Pacific Coast, Florida, etc., we nowhere found exactly the conditions that we would like to have for a Natural Life Colony. We had to consider climate, location, soil, government, market, etc. The northern coast of Cuba offered us the best inducement.

In the first place, on account of its ideal climate, which is good all year round, neither excessively hot nor very cold, absolutely frostproof. This was one of the special points which discouraged us in Florida and California; particularly the frost that ruins a man's investment and labor in a night.

In the second place, the soil is of the very best. We do not believe in artificial fertilizers. Here in the rich Cubitas Valley we have an inexhaustible soil where horticulture and agriculture can be carried on all the year round. This soil will yield splendid foods, rich in organic vegetable salts. The Cubitas Mountains are extinct volcanoes and the lava from the eruptions has formed the soil. There is no better soil than the lava soil. There is not a better fertilizer than Nature's natural mineral fertilizer. Fruits, nuts, vegetables and salads raised in such soil prevent disease, because bodies raised on such food will be disease resistant; in fact the Nature Cure movement today teaches that in order to cure and prevent disease we have to treat the soil, putting into it what our bodies need and have it transformed by Nature into organic salts which are essential for normal Health.

The Colonists we are looking for and who have interested themselves up to now are those who believe in the strict natural

life as held out by our great pioneers and leaders: Engelhardt, Ehret, Just, Lahmann and Kuhne. Whoever studies the principles of these great masters and leaders in natural life and Nature Cure, knows what the Colony stands for.

At Palm City a man can have a strict cocovorian diet; he can have fruits, nuts, vegetables and salads; or he can become a general vegetarian as legumes are plentiful and easily raised all the year round.

The beautiful bays, islands, keys, salt water and fresh water and Nature in its grandeur and simplicity are open for everybody.

The section is so far only settled by Americans and Germans, has public schools, churches and transportation by water at present to the port of Nuevitas or Caibarien.

Those who wish to live on the water front can do so. Those who desire a higher inland location have plenty of opportunities to take up holdings.

The Colonists we desire are of two classes:

First, those who wish to stay permanently, taking up 5 or 10 acre tracts, planting fruits and nuts for home consumption and also the market. Cocoanuts, alligator pears, oranges, grape fruit and other tropical fruits bring good prices. Also some industries are contemplated along the pure food line so that the local products can be used by people in the North.

Second, those who come to spend an ideal and happy life and take up bungalows for homes for the winter or the whole year.

The bungalows will have a small acreage so a man can get his fruits, vegetables and nuts for himself right from the property.

The Association will sell uncleared, cleared and planted tracts, also ready furnished homes so that when the Colonist comes he finds a house ready for occupancy. There will be water and electric light supplied for all bungalows. The buildings will be so located that sun and air baths can be indulged in common or either on the beach or special reserved parks for the purpose.

We do not wish paupers and people who have the idea that somebody else will furnish them an existence in the Colony. Only honest, sincere people, with character, who have sufficient means to establish a home for themselves and are ready to work out their own salvation are welcome. Applicants who can take up homes or tracts and pay for in full when taking possession of land are only wanted at present.

THE NATURAL LIFE CENTRE
BUTLER, NEW JERSEY, U. S. A.

* * *

NEW YORK SCHOOL OF CHIROPRACTIC.

The New York School of Chiropractic is regarded by all the professionals as one of Art, Science and Philosophy of Chiro-

practic. It was founded upon sound Psychological principles of educational laws so that each and every one of its graduates may claim to combine all the theories and technical practice of Chiropractic plus broad cultural knowledge of all those subjects both directly and indirectly relating to the drugless profession. Every graduate is a thoroughly professional and technical authority. The School requires an actual attendance of eighteen months in a two year course. In its day department, regular classes are held from 9 A. M. to 1 P. M. During these periods the subjects given include the following: Anatomy, Physiology, Physiological Chemistry, Physics, Biology, Dietetics, Symptomatology, Bacteriology, Histology, Urinology, Practical Dissection, Microscopy, in a sequence both logical and natural. In the afternoon from 2 to 4 p. m. daily Clinical practice is given in our free Clinic attached to the School where innumerable men, women and children are treated daily. During the senior year the students treat patients personally, under the direct supervision of the instructors. In addition, not only by didactic instruction, but by actual practical labors in the laboratory, by scientific devices for proper teaching and study of Biology, Anatomy, Osteology, Physiological Chemistry and all those apparatus used by the Chiropractors are employed and demonstrated in the actual class room practice and clinical labors. In the evening, the same thorough attention is given; hours being from 7 to 10.30 with periods devoted to practice in the Clinic at the convenience of the School. Every instructor employed in the School must be and is an experienced teacher of many years of practical labors and in addition men, who have had many years of actual experience as Chiropractors. The School is located at 39th Street and Broadway, New York City; which is most centrally situated and most convenient to the transit lines both within the city and to the suburbs: A catalogue giving full details will be sent upon request to the Registrar; S. Gerschaneck, A. M. Our faculty is composed at the present as follows: A. Deininger, D. O., D. C., N. D., Dean—Professor of the Theory and Practice of Chiropractic. S. Gerschaneck, A. B., A. M., D. C.—Professor of Physiology, Bacteriology, and Biology. Elvira A. Deininger, D. O., D. C., N. D.—Professor of Palpation, Nerve Tracing and Adjustment. I. Harris, D. C.—Instructor of Electro Therapy. Frank L. Tucker, D. C.—Instructor of Hygiene, First Aid. F. Hirshland, M. D.—Professor of Practical Dissection at the Women's Hospital. D. Ferguson, D. C.—Instructor of Neurology. B. Lust, M. D., D. O., N. D., D. C.—Instructor of Naturopathy and Hydrotherapy. L. Kaim, Ph. G., D. C., D. O.—Professor of Chemistry and Toxicology. I. Pinz, M. D.—Instructor of Anatomy. E. H. Tunison, N. D., D. C.—Professor of Dietetics.

A RATIONAL MEDICAL SCHOOL Vetus Academia (O. P. M. College)

The Vetus Academia (O. P. M. College), formerly known as the Old Physio Medical College, was organized in 1898 by Dr. C. F. Conrad, who later organized the affiliated institutions, the Eclectic Osteopathic Institute and the National Eclectic Institute.

The Vetus Academy (O. P. M. College), was incorporated in 1914 and is registered with the Secretary of State in Pennsylvania and New Jersey. The Director's private office is located at 110 West 90th Street, New York City. For many years a New Jersey branch has been successfully conducted at 120 Palisade Avenue, West Hoboken. The system taught is eclectic, which means the best chosen from every branch of nature-healing, combined with the teachings of Europe's greatest naturopaths. Instruction in English, German and Swedish. The officers of the College for 1917 are H. Morgenbesser, B. S., M. D., President; J. B. Praeger, M. D., Secretary; Dr. F. Pfau, Treasurer. Vice-Presidents are: J. Safian, M. D.; H. Bick, M. D.; E. Carroll, D. O.; and C. E. Binck, D. O. Over a hundred graduates from the Osteopathy Department of this College have been licensed to practice Osteopathy in the States of Pennsylvania and New Jersey.

A successful future is predicted for all who graduate from this and the affiliated institutions.

THE REST HOME Virginia Beach, Va.

Miss A. L. Pratt, N.D., D.M.T., Graduate of Liverpool Royal Infirmary, England, 1891, Liverpool Maternity Hospital, 1891, Queen Victoria's Institute, London, England, 1901. The College of Fine Forces, California. E. D. Babbitt Sunlight Healing. A member of American Naturopathic Association, 1916 and student of Nature cure from the Lindlahr College of Nature Cure, Chicago. (28 years of Professional experience). Born March 18th, 1864, England. Miss Pratt and her assistants employ hydropathy, heliotherapy, massage, etc., together with health foods with signal success. The Rest Home is situated on the edge of the Atlantic Ocean, whose surf rolls ceaselessly on the beach. Four miles north by trolley is Cape Henry, whose hills of sand, rising sixty feet above sea level, furnish a recreation ground many square miles in extent; a natural solarium of tremendous potency in the cure of disease.

DR. SCHROTH'S ILLINOIS POST GRADUATE AND TRAINING SCHOOL FOR NURSES

The Illinois Post Graduate and Training School for Nurses was organized twelve

years ago for the purpose of demonstrating to the public and their students that any ordinary person can be taught all branches of nursing in two years' time instead of three which the hospitals require, and at the end of two years' training be more efficient and reliable than a three year hospital nurse. This, of course, is due to their special system of teaching and the elimination of the drudgery which is required of the hospital nurses.

Their nurses receive a thorough and complete training, and are employed as many weeks during the year as they desire, receiving from \$25 to \$35 per week for their services. Physicians prefer graduates of this school because they are thorough, reliable, and carry out orders explicitly. Another reason for doctors employing nurses from this school is that they do not want a graduate from a three-year hospital on their cases who has been taught to boost the hospital and the head physician connected therewith. Every doctor wants a nurse who is for him and one who is not going to give some other doctor a "lift" at his expense. This is another reason why we recommend nurses from the Illinois Post Graduate and Training School for Nurses, for they are taught to let the whole community know who the doctor is, that is the most reliable and liberal-minded and most fair with the patients, so that the public may profit by going to this liberal-minded doctor.

If there are none of these nurses in your community at the present time, it would pay you as a doctor to send in some prospective nurses to them, and when they return, you will have some friendly nurses in your vicinity.

Think this over. In the meantime, when in need of a nurse, you can send to their school at 546 Garfield Ave., Chicago, Ill., either by letter, telegram, or telephone Lincoln 2155.

DR. CARL STRUEH'S SANATORIUM AND HEALTH RESORT

By George Osgood

Devoted to the treatment of the sick by Natural Means, and not by drugs, it also offers unsurpassed advantages to convalescents and those who wish to recuperate amidst the most healthful and pleasant rural surroundings.

Dr. Strueh's institution is located near McHenry, Ill., a picturesque and prosperous little country town of some two thousand inhabitants. This part of Illinois is known as the **Fox River Valley** and renowned for its pure invigorating air, its scenic beauties, and its numerous inland lakes, which add pleasure to the outdoor life.

McHenry is only one hour's ride from Chicago, on the Chicago and Northwestern Railway, and also easily accessible by automobiles from all directions.

Dr. Strueh founded his Sanatorium ten years ago, and it is astounding to what proportions he developed his undertaking from the very smallest beginning. He received his medical education abroad, at the universities of Goettingen, Munich and Zurich, and in 1886 located at Chicago where he enjoyed a lucrative practice until he entered upon the Sanatorium work. He is of high standing in his profession and a member of numerous medical societies, such as the Chicago Medical Society, the Illinois State

cultivate a health inspiring spirit which is bound to greatly increase the effectiveness of the treatment.

The grounds could not be more beautiful. Everything is pleasing to the eye. The river front, with its beautiful grove of oak, elm, hickory and maple trees, the flower beds, the cottages and other buildings, amidst rural surroundings, combine to make an attractive and beautiful spot for the lover of Nature.

The **Method of Treatment** applied at the institution starts at the root of the evil and is meant to bring about a complete constitutional reconstruction of the body, for only in this manner a permanent cure can

Fox River, at Dr. Carl Strueh's Sanatorium, McHenry, Ill.

Medical Society, the American Medical Association, the German Medical Society of Chicago, etc.

Whoever has been a patient at Dr. Strueh's Sanatorium has been impressed by the pleasant, home-like atmosphere that prevails at this institution. And this means much to a person suffering from disease. We all know that the state of a patient's mind is of utmost importance. There is no greater obstacle to the progress of recovery than worry, and no more powerful aid than a cheerful disposition. It, therefore, is the policy at Dr. Strueh's institution to make the patient's surroundings as pleasant as possible and, by eliminating everything that is suggestive of a hospital,

be effected, not by drugs and other artificial means. Every artificial treatment is more or less symptomatic and as such admissible in incurable diseases where the object of the treatment is to ease the patient's suffering, and occasionally in which the symptoms require immediate relief.

However, to treat an established curable disease merely symptomatically, as a great many patients are inclined to do, is decidedly wrong. Symptoms are but the manifestation of the disease, not the disease itself, and to direct our efforts towards them, instead of their cause, is like chopping off the leaves of a weed to kill the plant.

We can suppress most any symptom by means of a remedy, we can produce sleep in a person suffering from insomnia by a dose of veronal, we can relieve a headache by administering aspirin, we can cause an evacuation of the bowels in constipation by a laxative, we can suppress the symptoms of rheumatism by administering salicylates, we can quiet a neurasthenic by sedatives, we can lessen the frequency of convulsions in an epileptic by bromides. But we do not cure in this manner.

If we discontinue the treatment, the former symptoms, as a rule, will reappear, and if we continue it, we may do the patient irreparable harm.

To act upon and strengthen this natural healing power is the object of treatment which is employed at Dr. Strueh's institution. And the means by which this is brought about are Mother Nature's unfailing remedies, consisting of proper feeding, out-door life, an abundant supply of oxygen for the blood cells, sun and air baths, water treatments, systematic exercise, or, in other cases, rest, massage, etc.

These are apparently simple means, and yet how powerful, if scientifically applied, i. e., in conformity with the requirements of each individual case.

At Dr. Strueh's Sanatorium the patients are in the condition to live the out-door life

Dr. Carl Strueh's Open Air Gymnasium, McHenry, Ill.

In order to **cure** a disease, it must be our object to abstain from symptomatic treatment as much as possible and engage the entire cell action in the repair work which has to be done, instead of burdening it with additional work which is incurred in the process of eliminating the drug.

The power that cures a disease lies in the patient himself. It is called the **Vis Medicatrix Naturae**, i. e., the inborn natural healing power which exists in every living body. It is the dominant force which in sickness as well as in health moves and regulates the circulation of the blood, the action of the lungs, the processes of digestion and assimilation, the function of the kidneys, muscles, nerves and so forth.

in the most ideal way. The sleeping cottages provide the most perfect ventilation and thus enable the patient to breathe pure air, during every minute of his stay at the institution, day and night.

The sun baths at Dr. Strueh's Sanatorium are given in the open and form one of the main features of the method of treatment. Two secluded enclosures, one for women and one for men, provide absolute privacy and the patient is at liberty to enjoy the full benefit of an ideal sun and air bath.

The **Diet** as applied at Dr. Strueh's institution is varied, according to the peculiarities of each individual case. In obstinate cases the dietetic treatment, as a rule, is commenced with a short fast whereupon

the patient is put on a milk diet or some other special diet, and gradually returns to a general vegetarian or mixed diet. Everything depends upon the individual case.

The **Water Cure** applied at the Sanatorium reminds one very much of Woerishofen, where Father Kneipp achieved such wonderful success with his Cure which since then is known as the Kneipp-Cure all over the world. The large meadow at Dr. Strueh's Sanatorium in the early morning is crowded with patients who are taking their barefoot walk in the dew-covered grass.

The physical exercises at the institution are given in the Air-Bath where the patients are not hampered by uncomfortable clothing, and are graduated according to the character and stage of the disease and the physical strength of the patient. Apart of these exercises there are ample opportunities for all kinds of out-door games and sports, boating, swimming and cross country walks. The patients also have an opportunity to assist in gardening and farming, if they so desire.

During the summer the institution is also extensively patronized by people who come here to spend a few weeks or months vacation under the most favorable and pleasant conditions, so entirely different from the ways at the ordinary summer hotel.

The writer will never forget the three months spent at Dr. Strueh's institution, and the thorough way in which he was cured from an affliction that had kept him an invalid for more than ten years.

* * *

TYLER'S RAW FOODS

Every drugless doctor, dietician, or advertiser who meets patients or writes letters to sick people is always faced with the question, what shall we eat; what diet will you prescribe for me; what kind of foods are indicated in my case? From the naturopathic standpoint there is only one answer; and that is, elementary, natural food. Here we are at once puzzled: what is elementary and natural food? Are the foods which I eat good foods, such as meat, eggs, well cooked, prepared restaurant or hotel foods, or not? Natural food is unadulterated, plain, simple products, which are eaten in Nature's state without any addition, without baking in any way or cooking. The more foods are cooked, the more vital elements are destroyed, the more they cause complication and disharmony in the digestive apparatus.

Professor Byron Tyler, of Kansas City, Mo., has solved this question. Since 1899 he has been helping thousands of people, not only throughout the United States, but also in foreign countries, with his natural foods. Being an invalid and sufferer himself, he made experiments and deductions

on himself. His instinct finally brought him down to the question that the food question is the first one to be considered if one wants to have health and strength. So he started to live on macerated wheat, fruits, nuts and vegetables. Today he is 70 years old, and his health, strength and vigor are those of a youth. His normal ration, as incorporated in his macerated wheat, also sometimes called pemican, is without a peer in this country. Consequently Professor Tyler is a leader and an authority on the food question. He has been endorsed as such by the Editor of the **Herald of Health and Naturopath**, by the Committee on the diet question of the American Naturopathic Association, by authors and writers along dietetic lines in this country and abroad. He stands also as a leader and an authority who can be trusted and relied upon. The writer of this notice personally knows many people who have been cured and many institutions where his foods are used with great success. The American Yungborn at Butler, N. J., the Southern Yungborn Quisisana, Tangerine, Fla., both use these foods extensively and they are always included in the regeneration diet menu. In the Pure Food Store, in New York City, 110 East 41st Street, these foods have been sold over the counter for the last 10 years, and satisfied customers have always come back and asked for them and recommended them to their friends. Universal satisfaction with these natural foods has given to them the best advertisement. Many a drugless doctor is puzzled and quite at a loss to get around the diet question. I would make the following suggestion to each one: write to Professor Byron Tyler, 818 Wyandotte Street, Kansas City, Mo., enclosing 10c for a copy of "Nature's Triumph over Disease." The 9th edition of this booklet is just out, and Professor Tyler will mail it to you, and it will give you instruction and information on the diet question, which will enable you to instruct your patients and be of great service to them so far as the diet question is concerned.

* * *

THE "VIOLETTA" VIOLET-RAY APPARATUS

We can now present for the first time a piece of apparatus which has been wanted by physicians, as well as laymen, for years, and is invaluable in every home. It is a portable High-Frequency outfit with all the therapeutic value of the large machines used in physicians' offices.

The **Violetta** Violet-Ray outfit delivers the true High-Frequency current that is of so much value. It is almost noiseless in operation and **absolutely safe**, as it causes no muscular contraction or unpleasant sensation of any sort. The weight being only 1¼ lbs. makes it ideal for portability. In

use the apparatus consumes less than $\frac{1}{4}$ of the current consumed by a 16 c. p. lamp. The instrument will operate on both A. C. or D. C. without special adjustment. Special battery outfit where no current is available.

The wonderful curative properties of the Violet-Ray is in the fact that it generates approximately 75,000 volts at 500,000 oscillations. This enormous quantity of electricity passing through the body during a **Violetta** treatment has a very sedative action on the body, aiding elimination, digestion, sleep, etc. The stimulation which results when the treatment is given through the clothing causes a healthy flow of blood to the part where local treatment is being given. And lastly, the **Ozone** which is generated is the greatest germicidal and disinfectant known. You have probably experienced the refreshing action of Ozone after a thunderstorm. All these beneficial effects are accomplished without the least unpleasant sensation on the part of the patient.

The Violet-Ray has been most successful in the following cases: Scalp Diseases (Dandruff, Alopecia) Skin Diseases (Pimples, Acne, Eczema), Rheumatism, Neuritis, Neuralgia, Lumbago, Goitre, and Catarrh.

A chart and booklet giving details of treatment is furnished with each instrument. Bleadon-Dunn Company, Manufacturers of Electro-Medical Apparatus, 208 N. Fifth Avenue, Chicago, Ill.

SOMETHING NEW

on a subject that is not understood by many people. This is the question of the relationship between SEX and the PHYSICAL and MENTAL HEALTH.

"The Abuse of the Marriage Relations"

written by an experienced physician, who has investigated this subject and has found it to be the origin of the most chronic diseases. This is also the cause of so many unhappy marriages. This is a very valuable book for those who are married or intend to get married; it will avoid considerable unhappiness and heart-aches. This book will be sent you prepaid upon receipt of 25 cents in stamps or coin. For 10 cents additional a sample copy of a unique magazine, "NATUROPATH," prospectus of the famous "YUNGBORN" Health Home in Butler, N. J., American School of Naturopathy and Hospital, Advice by Mail, Kneipp Pure Food Store, Books, etc.

B. LUST, N. D.
YUNGBORN, BUTLER, N. J.

IF YOU DOUBT THE MERITS OF NATUROPATHY

it is because you have not begun right. It is both unsatisfactory and unsafe to experiment in any line of Naturopathic treatment. This is peculiarly true of Physical Culture, Water-Cure, Dietetics and Fast-Cure.

We have established a Bureau of Advice through which beginners, learners and all hesitant folk may *know* before they act. To be most beneficial, any healing force must be applied so as to delight the patient—not dismay him. And our first object is to make the change from your old artificial existence to your new natural life so gradual, gentle and pleasurable as to win your volition Natureward as well as your vitality.

Exact prescription in the use of air, sun, water, vapor and similar Baths, Vegetarian, Fruitarian and Lahmannian Diet, Herbal applications and all measures of Natural Healing and Living. Fee \$1 single letter with detailed prescription, \$5 monthly treatment.

Subscribers to "The Naturopath" receive advice gratis through its columns. All others must enclose \$1 with symptomatic letter. State nature of your disease, duration and kinds of medication employed.

Naturopathic Bureau of Consultation, Butler, N. J., U. S. A.

GLOSSARY

AND

DICTIONARY OF NATUROPATHIC TERMS

WHILE it has always been the endeavor of Naturopathy to expound its teachings in simple language using terms comprehensible to the laymen and avoiding all such which need special explanation, a number of terms adopted from foreign languages have crept in and still other ordinary words have come to be used in more or less of a specific sense.

The following glossary will explain the more common words and terms.

- Adjustment**—The object of Chiropractic treatment. A thrust on a subluxated vertebrae for the purpose of restoring it to its normal position. **To adjust**—to correct a malposition of a vertebrae.
- Apyrtrophy**—Unfired food. The arts of preparing unfired food. The doctrine of unfired food.
- Astroscopy**—The study of stars in their relation to and influence upon human activities.
- Astro-Medical Diagnosis**—Diagnosis of disease conditions by Astroscopy.
- Biochemistry**—Life chemistry; the chemistry of living things. A system of treatment by the employment of so-called "cell salts." See Cell Salts.
- Cell Salts**—Twelve salts or tissue remedies used in the treatment of disease in the system of Biochemistry, the theory being that different disease manifestations occur as the result of the absence of one or more of the twelve cell salts.
- Chiropractic**—Literally, 'done by the hand.' A system of spinal adjustment. Treatment applied to the spinal column or special vertebrae thereof for the purpose of restoring normal position to malimposed vertebrae, the theory of such practice being that subluxations or malpositions of vertebrae cause disease manifestations through pressure on the spinal nerves.
- Crisis**—Used in Nature Cure to signify a critical period, a culmination. **Disease crisis**—the culmination of a disease process resulting in death. **Healing crisis**—in medical language an acute disease; in Nature Cure, the pinnacle of effort reached in nature's healing process resulting, under proper handling, in the expulsion of disease causes, the elimination of morbid matter and the restoration of health.
- Directo**—A naprapathic term. A specific thrust to a vertebrae the direction in which the thrust is applied being the important factor in establishing its effect.
- Encumbrance**—A term applied specifically in Nature Cure to describe an accumulation of morbid matter or foreign substance in the body which is interfering with normal activity.
- Gush**—A term used in Kneipp Water Cure. A specific application of water by pouring. Gushes are named from the part of the body to which they are applied, as back gush, upper gush, etc.
- Healing**—A process of nature in which the body reacts to disease producing elements. The restoration of normal function. The restoration of health.
- Healing Crisis**—See Crisis.
- Heliotherapy**—The use of light, particularly sun-light, in the treatment of disease.
- Herbalist**—One who sells or prescribes herbs or botanical remedies for the cure of disease.
- Iridiagnosis**—See Iridology.
- Iridology**—The science of the Iris of the eye. A system of diagnosing disease conditions by changes and signs which occur in the Iris. Sometimes called Diagnosis from the Eye.
- Lesion**—A term used specifically in Osteopathy to signify any abnormality of tissue or formation causing pressure on nerves and vessels. See Osteopathy.
- Ligatite**—A term used in Naprapathy to indicate a shrunken or tense ligament, or shrunken connective tissue. See Naprapathy.
- Morbid Matter**—Used specifically in Nature Cure to indicate disease breeding material, largely autotoxins, which accumulates in the body due to unnatural living.

- Naprapathy**—Literally meaning, to fix disease. A system of mechanical treatment directed to the spinal vertebrae for the purpose of stretching tensed spinous ligaments and shrunken connective tissue, the theory being that disease manifestations are caused by abnormal pressure on nerves exerted by shrunken connective tissue.
- Naturarzt**—From the German, meaning Nature Physician.
- Naturopathy**—A misnomer, literally meaning nature disease, but accepted to mean cure of disease through natural methods. It recognizes as the cause of disease interference with natural law and natural operation and as the cure the removal of obstruction and the elimination of the cause by natural healing reactions. In the process of cure, it makes use of all systems and methods that are in agreement with natural law and physiological operations. Its system of hygiene and prophylaxis is based on natural living and clean, wholesome habits of body and mind.
- Neuropathy**—A misnomer, literally meaning "nerve disease," but accepted to mean the cure of disease through restoration of normal nerve action. A system of manual and thermal treatment for the purpose of correcting disease manifestations through restoring normal activity to the nerves controlling the circulation. See page 702.
- Ophthalmology**—The treatment of eye diseases and their systemic results.
- Optometry**—The drugless system of correcting abnormalities of vision.
- Orificial Surgery**—A system of surgical treatment of the openings of the body and sphincter muscles for the purpose of releasing impinged nerves and for the relief of disorders occurring as a result of irritation from such impingement.
- Osteopathy**—A misnomer, literally meaning "bone disease," but accepted to imply a system of mechanical treatment designed to release bony impingement of nerves and vessels, the theory being that disease manifestations are caused by bony pressure obstructing normal nerve activity and normal blood flow.
- Pack**—A covering used in hydrotherapy, in which to wrap the body or part thereof. Packs are of various kinds,—Wet, Dry, Hot and Cold. The bandage usually consists of linen and the outer covering of wool.
- Phrenology**—The science of brain functions. A system of analyzing from the contour of the head, the mental, physical and emotional characteristics latent and potent in the individual. A system of character analysis and a foundation for vocational training.
- Physiologic (or Physiological) Therapeutics**—The use of therapeutic agents which are in agreement with the physiological operation of the body.
- Physio-Therapy**—The therapeutic use of physical agents, such as mechanical and manual, thermal and electrical measures.
- Phytotherapy**—The therapeutic use of herbs and botanical remedies.
- Somopathy**—Treatment of physical ailments. Largely the use of heat, cold and mechanotherapy specifically applied.
- Spanish Mantel**—A linen cloak or complete body covering used in giving a wet pack in hydrotherapy.
- Spondylotherapy**—A medical term for spinal treatment. A specific, symptomatic, mechanical treatment for the purpose of increasing or inhibiting nerve reflexes. An endeavor to accomplish by spinal concussion and mechanical pressure the effects produced by certain drugs.
- Subluxation**—Used in chiropractic to signify a displaced vertebrae. A vertebrae out of alignment.
- Talosophy**—The science of happiness.
- Thrust**—A chiropractic term signifying the action in the treatment.
- Trophotherapy**—Treatment of disease by the use of appropriate foods. The application of apyrtrophy to the cure of ailments.

A PARTING WORD

THIS DIRECTORY has been compiled with considerable labor and sacrifice on the part of the Editor and his assistants, as well as on the part of the printers thereof, and is the successful result of a cherished desire on the part of the publisher to contribute to the fullest extent to the prestige and popularity of a method of healing the ills of humanity for which, from the earliest years, he has entertained an immovable loyalty, and has made a business of practicing what he has preached, in face of tremendous odds and setbacks.

He thanks all who have supported him with their patronage: the doctors of drugless healing and those schools and institutions who patronized him with their advertisements. Those who have hesitated to patronize this venture in its inception, will, we think, support future editions, when they come to realize the great benefit such a Directory contributes to the Naturopathic profession at large, for in this case the benefit to the many is the benefit to the individual.

This volume of the Directory, the first, may be regarded as the foundation on which a superstructure of other volumes will be reared. The Editor's idea is to publish a new edition every two years, but he hopes and believes that the loyalty and co-operation of his confrères will permit him to publish the Directory annually.

Further, the Editor desires to say that, owing to the great expense and immense labor involved in preparing this work, and the lack of adequate publishing machinery for compiling the same, it is possible that mistakes will have been made in the lists of Practitioners presented, and in view of this, he begs every reader of the book who discovers such errors to so advise him, to the end that absolute dependence can be placed on the publication as a work of reference.

The Encyclopedia feature is intended to be a permanent feature of the work, and is susceptible of endless development. Just how varied the development will be, will depend entirely on the circulation of the book and the further co-operation that is necessary to make it a complete success. A hundred subjects might be discussed to show how the employment of Nature's forces can encompass the prevention and cure of disease. Valuable above everything else in life are the themes that may be exploited in our pages. Give us an opportunity of serving you by buying the Directory yourself and seeing that your brother practitioner obtains a copy. Have your professional card appear in our advertising columns, and talk of the Directory continually to both friend and foe.

April, 1918.

• Benedict Lust, N. D., M. D.

THIS, then, completes Volume I of the Naturopathic Directory, Drugless Year Book and Buyers' Guide for the years 1918 and 1919.

Into it, has been placed the conscientious labor of many willing hearts, hands and minds. It is their contribution to the noble cause of natural healing. It will stand as a monument to their endeavors, as well as a memorial to the great souls, the fathers of natural healing, who have passed on.

Let this, then, herald a new era—the era wherein man shall recognize the omniscience of Nature, and shall profit through conforming to her laws.

LIST OF ILLUSTRATIONS

PAGE	PAGE	PAGE
Frontispiece - Dr. Benedict Lust	Front, Side and Back Encumbrance	General encumbrance (Fig. 45)
Vincenz Priessnitz	Child, inoculated with tuberculin	General encumbrance, removed (Fig. 46)
Father Kneipp lecturing at Woerishofen	Normal human figure (Fig. 1)	Esquimos from Greenland (Fig. 47)
Father Kneipp and Pope Leo XIII	Whole body encumbered (Fig. 2)	Normal human form (Fig. 48)
Dr. Adolph Just	Normal human figure (Fig. 3)	General encumbrance (Fig. 49)
Dr. Carl Strueh	Normal human figure (Fig. 4)	General encumbrance (Figs. 50, 51)
Rev. Albert Stroebele	Front encumbrance (Fig. 5)	Solar rays (Figs. 52, 53)
American 'Yungborn,' Butler, N. J. (bird's-eye view)	Normal human form (Fig. 6)	Dr. A. Matijaca
Father Kneipp with the Archdukes Francis and Joseph Ferdinand of Austria	Front encumbrance (Fig. 7)	Laclanché cell (Fig. 1)
Dr. Lust's Naturopathic Institute, Clinic and Hospital	Front and side encumbrance (Fig. 8)	Cells, connected in series (Fig. 2)
Father Kneipp in his Consultation Hall	Front encumbrance (Fig. 9)	Cells, connected parallel (Fig. 3)
Prof. F. E. Bilz	Front and side encumbrance (Fig. 10)	Milli-Ampère-Meter (Fig. 4)
Dr. Katz	Front encumbrance (Fig. 11)	Motor Generator (Fig. 5)
Dr. H. Lahmann	Front and side encumbrance (Fig. 12)	Galvanic and Faradic batteries combined (Fig. 6)
Louis Kuhne	Front and side encumbrance (Fig. 13)	Currents and Modalities, loco potential (Fig. 7)
Dr. Lust in Woerishofen	Normal human form (Fig. 14)	Static machines (Fig. 8)
Rev. Prior Reilly	Side encumbrance (Fig. 15)	Charger to excite the Holtz machine (Fig. 9)
American School of Naturopathy	Side encumbrance (Fig. 16)	Sinusoidal current apparatus (Fig. 10)
Graduating Class, 1902, Am. School of Naturopathy	Side encumbrance (Fig. 17)	Sinusoidal current apparatus, diagram of (Fig. 11)
Charter Members, Am. Naturopathic Society	Pronounced side and front encumbrance (Fig. 18)	D'Arsonval Type, diagram of (Fig. 12)
Graduating Class, 1914, Am. School of Naturopathy	Front and side encumbrance (Fig. 19)	Tesla type, diagram of (Fig. 13)
Dr. Henry Lindlahr	Back encumbrance (Fig. 20)	Odin Resonator (Fig. 14)
Dr. Henry Lindlahr's Health College, front and back view	Back encumbrance (Fig. 21)	Hyperstatic Transformer (Fig. 15)
Calisthenics in Dr. Lindlahr's Health Gymnasium	Back and side encumbrance (Fig. 22)	Patient, undergoing auto condensation treatment (Figs. 16, 17, 18)
Dr. Carl Strueh	Back encumbrance (Fig. 23)	Application of Diathermy (Fig. 19)
Dr. Strueh row-boating near his Health Resort at McHenry, Ill.	Back encumbrance (Fig. 24)	Combination X-Ray Apparatus (Fig. 20)
Edward Earle Purinton	Back and side encumbrance (Fig. 25)	Combination X-Ray Apparatus, rear-view (Fig. 21)
Louis Kuhne	General encumbrance, chiefly on left side (Fig. 26)	Surface vacuum electrode (Fig. 22, 23)
Patient suffering from dropsy (Fig. 1)	General encumbrance (Fig. 27)	Insulated prosthetic electrode (Fig. 24)
Patient cleared of foreign matter (Fig. 2)	General encumbrance (Fig. 28)	Transformer of X-Rays (Fig. 25)
Bottles, illustrating fermenting matter	General encumbrance (Fig. 29)	Electrical apparatus delivering various electrical modalities (Fig. 26)
Form, normal, of human figure (Fig. A)	General encumbrance (Fig. 30)	Hydro-Electro bath (Fig. 27)
Form, abnormal, of human figure (Fig. B)	General encumbrance (Fig. 31)	Bi-Polar bath, diagram of (Fig. 28)
Form, abnormal, of human figure, caused by deposition of foreign matter (Fig. D. E. F.)	General encumbrance (Fig. 32)	Ozone inhalation (Fig. 29)
Human figure, deformed by foreign matter (Fig. G)	General encumbrance (Fig. 33)	Motor-points for electric stimulation, diagrams (Plates 1 to 8)
Human figure, freed from foreign matter (Fig. H)	General encumbrance (Fig. 34)	Cautery electrode handles (Fig. 30)
Baths, steam, home made (Fig. A)	Back encumbrance (Fig. 35)	Cautery generator (Fig. 31)
Baths, steam, home made (Fig. B C)	Front and side encumbrance (Fig. 36)	Glass, Fulguration Electrode (Fig. 32)
Baths, sitz (Fig. D)	Front and side encumbrance (Fig. 37)	Magnet, large eye (Fig. 33)
Patient, before and after treatment	Front and side encumbrance (Fig. 38)	Lamp, therapeutic (Figs. 34, 35, 47)
Human figure, showing effects of leprosy (Fig. 1, 2, 3, 4, 5, 6, 7)	Front and side encumbrance (Fig. 39)	Lamp, alpine sun (Figs. 36, 37, 38)
Human figure, showing application of abdominal bandage	Front and side encumbrance (Fig. 40)	Applicator "Radio Vitant" (Fig. 39)
Front Encumbrance	Front and side encumbrance (Figs. 42, 43)	Application of Radio-Vitant (Fig. 40)
Back Encumbrance	Normal human figure (Fig. 44)	Application of radiant light (Figs. 41, 42)

Proud flesh	399, 405
Scalds	411, 481
Shot, Extraction of, from	
wounds	413
Snake bites	419
Sores, open, Cause of....	501
X-Ray burns, idiosyncrasy	
to	689
Wounds, their treatment	
and cure without drugs	
and without operations	
406, 421,	481
Wounds, Fever accom-	
panying	407
Wounds, contused, in-	
cised, lacerated, punc-	
tured	409, 421
Wounds, Breaking open of	
416,	418
Wounds, Gunshot413,	415
X-Ray cancer, in patient	
or operator	687
Tying up blood vessels..	409

DEFORMITIES

Crooked back.....276,	278
Crippling....257, 265, 278,	443
Curvature of the spine.276,	
278,	470
Deformities	272, 278
Derbyshire-neck	370
Distortions	257, 272, 443
Feet, Distortions of....	257
Hands, Distortions of....	257
High shoulders	279
Hip disease....271, 443,	474
Humpbacks..257, 281, 288,	443

PARASITIC DISORDERS

Parasites	396, 397
Tape worm	396, 397
Worms	396, 397

POISONING

Contagion, Danger of....	259
Infection, Danger of..241,	
259,	264
Inoculation..254, 259, 333,	
370, 416, 482,	492
Nicotine poisoning.....	303
Poisoning, Blood	419
Poisons, metallic, Ab-	
straction of, by electri-	
city	575
Poisonous medicines	319
Tuberculin	333
Tuberculin, Girl poisoned	
by	541
Vaccination..233, 254, 260,	
370, 416,	452
Vaccination a fatal error	
507
