PREFACE

The purpose of this book is to enlighten the student or seeker of truth along the many questions oftentimes asked by one. These questions are answered on the basis of Principle which is the foundation back of everything and can be elaborated upon according to the student's understanding, from which he may benefit or get his own answer.

The use of the word "Universal," used in many of the questions represents the totality of Intelligence, which the world calls God. Also Universal Consciousness represents the Universal Intelligence without circumference.

QUESTIONS AND ANSWERS

God, as we have been taught, is the holiness of all and outside of Him there is nothing; meaning all wisdom, all intelligence, and all power and all creative. Universal Consciousness means the same.

Universe means not just our solar system but space without circumference in which dwell billions of our solar systems.

The Royal Order of Tibet is interested only in revealing what is thought to be mysteries so that they may be used practically in the present field of life where man may understand his fellowman by understanding the laws which rule all creatures, thereby awakening from the dream-life to the reality which leads to Mastery.

It is an Order based on the highest and the simplest teachings in the field of Mastery and anyone applying the teachings by living them will prove to themselves the statement made by the Order, "that Mastery is obtainable without denying themselves anything, but learning to balance up oneself. This means going back to normalcy, for that is Mastery."
