VISITORS FROM SPACE

The Fellowship of Golden Illumination

EUGENE H. DRAKE, Director
1014 So. Lake Street, Los Angeles 6, Calif.
FOREWORD

The data compiled herein is presented to those interested in the subject of visitations from space by beings of superior intelligence with the hope that they be alerted to the fast changing conditions as they affect this planet.

Even tho the atomic warfare never takes place, the fact that several nations are firing such test bombs of destructive magnitude, is creating great mental harm with individuals as well as monstrosities of diabolical activity that will come into manifestation at a later period and in this respect alone warrants cessation.

Vibratory waves are penetrating into gas belts in the crust of the earth which are bringing increased earthquake disturbances; effecting the atmosphere causing a repetition of storms and floods, the melting of the polar caps, but worse of all is the hate pattern being built up in the consciousness of peoples the world over.

Creative law is being violated by this activity, threatening humanity everywhere.

Black Magicians can do nothing but destroy. They do not know how to build, only to tear down. Psychotic minds are unconsciously aligned with them.

The Elder Brothers from Space, the forces of the White Brotherhood are here in greater array than any time since man walked the earth. They have the answers.

We salute them.
VISITORS FROM SPACE

SPACE SHIPS - DISCS - FLYING SAUCERS

BY

Eugene H. Drake,
Los Angeles, Cal.

For a long time space craft have had this planet under observation. We have been in contact with them since 1930. At that time we were in Santa Monica, and contact was made in a large field where the Santa Monica City College is now located. Only during the past few years have they chosen to reveal their presence.

These space ships, with their discs or flying saucers, as some call them, had their commanders so desired, could have and still can, take over this planet at any time. However, they have no desire to interfere with our life here. They only wish to assist us in arriving at a clearer understanding of the immutable laws governing this and all solar systems and to help us build a more wonderful, beautiful and peaceful civilization.

Some of these space ships are huge in length and diameter. One of the parent ships in the upper regions above this planet is at least 7000 feet long, 500 feet in diameter, with a crew of approximately 2500 beings, consisting of the officers in charge, with pilots, navigators, observers, technicians, scientists, and other members required in the operation of this ship and many smaller craft being used in their visitation plan.

These ships with their intricate mechanism are powered by a form of electromagnetic force. They are heavily armed.
with powerful ray weapons. They can operate at tremendous speeds. They cruise about 27,000 miles per hour, our timing. Although when traveling through outer space from one planet to another, they use speeds far in excess of this. They do not carry fuel such as our planes use but are able to convert energy of light into electro-magnetic force, to propel their craft. Through the use of ray machines they can erect a vacuum-like condition above and around their craft to enable them to move up or down, sideways or reverse their direction, or hover visible or invisible; to convert their craft into a fluid-like state, beaming it to where they want to go in a very short period.

They come into our atmospheric belts from their planets not in solid form but in an ethereal form. Upon entering our atmosphere they, through their superior knowledge, change the atomic elements in the construction of these ships and materialize them into the density which they are now using. The beings on these various craft are also passed from the ethereal to a dense form of matter and appear to materialize. By speeding up the vibratory frequency of the atoms of the elements of which these craft are made, as stated before, they can move with great speeds invisible to our physical sight, and when they desired slow them down and congeal this atomic energy to a more solid form. There are elements known to them of which our scientists have no knowledge or understanding, which they use and mold in whatever form, idea or shape they wish.

The fact that we of earth have been exploding atomic bombs, and plan to use them with hydrogen or cobalt bombs in warfare, is one of the reasons why these space visitors have come into our density. For these vibratory waves have disturbed the ethereal atmosphere around this planet, punching holes
as it were in the same, and these waves have penetrated lines of magnetic force and spiraled up to other planets of our solar system. They have also disturbed the etheric substance in what we call the lower and upper heavens around the earth and the etheric beings occupying these realms or worlds, which are as dense to them as our cities are to us. Many of these inhabitants have been moved to portions of the stratosphere where explosions do not disturb them.

Therefore, these space craft were sent to investigate such activity. Anything disturbing the etheric atmospheric belts around this planet also effect the other planets of the solar system; each being part of the whole.

The Commander in charge of this expedition to whom I have been talking, advised that any wide scale atomic or hydrogen bombings will necessitate the use of powers beyond our conception to eliminate laboratories, airplane plants, planes, and such plants where such bombs are made and assembled, and the planes carrying them, as well as take in charge the beings controlling such destructive activity.

Many of these space visitors are from Venus, Mars, Saturn, Jupiter and Uranus, altho some of them are coming now from other solar systems, working in harmony with those whom we call Elder Brothers of this solar system.

This solar system is in charge of a Great Cosmic Being who directs all life under the Great Creative Plan. The Elder Brothers or Etherians work under His direct supervision.

Civilization will not be permitted to be destroyed as it was almost during the struggle between the Titans and the Atlans, Lamurians prior to the sinking of Lemuria and Atlantis.
Should they land in our midst we would quickly realize how inferior we are, how much we must learn of life, brotherly love, of which we talk a great deal but practice little, and of the laws governing creation.

An increasing number of space craft have assembled in the upper regions over this planet. The beings on them number more than two and one-half millions, with millions more on the way. They are assembling for the increased violence on the earth, the speeding up of the so-called cold war, and also to keep the atmosphere cleared of radio-active vibrations. Not that they are particularly interested in saving us from our own created destructive activity, but to preserve the earth itself, of which they are the guardians, and to establish a new civilization as needful during every New Age.

They have the situation now under their control. They have plugged up the holes in our atmosphere. They have sent what we call fire-balls blazing thru our air to purify the same of radio-active particles and to prevent further vibratory waves traveling to the other planets. Rather confining the same to the where they are originating.

There are a great many different types and classes of Space Craft in the fleets above the earth. We would say over 250 kinds. The Fleet Commanders use ships of the 7000 foot length class. Sub-Commanders those of about 5000 ft. long. All of them heavily armed and protected against attack. As stated before, they are manned by beings from the planets mentioned. The far side of the earth's moon, the side not seen by people of earth or by astronomers, is often used as an assembling point.

The Space Craft are mostly cigar-shape
and reflect a silvery-golden color. Some of the discs are flat, some global, reflecting a silvery light. The energy which surrounds these craft when in motion gives forth such colors as blue, green, reddish blue, orange and lavender.

The escort and fighter type craft are several hundred feet long. Some 100 feet, 25 to 15 feet in diameter. They carry from 20 to 50 in their crews, are driven by cosmic energy, converted into electro-magnetic power.

Another type of craft resembles a doughnut, carry a crew of about 50. These are used as laboratories. They are circular, 125 feet across, about 25 feet thick. Here all data is checked, analyzed, and transmitted to other craft. Atmospheric conditions are scientifically studied. All magnetic vortexes charted.

Another type is 100 feet across, circular, 25 feet thick, capable of carrying about 20 each.

The global type have several levels or decks. These are also observational ships, electro-magnetically driven.

Smaller disc shaped craft range from 50 feet across down to 15 feet. Some are 15 feet thick, others only 7 feet. They carry crews from 8 to 2 persons. These are some of the craft that come close to the earth checking on all plane plants, landing fields, laboratories, plants where bomb parts are made and assembled, and also where mining operations for uranium are conducted.

Another type, controlled by larger craft range from 15 feet across to others only 6 feet. Others only two feet across, shaped
like tops. Some of these smaller craft have been mistaken for fire-balls. These top-like objects are made of an electronic substance whirling at such speeds they seem transparent. These are used for photographic purposes by which the inside as well as the outside of any object or substance is photographed. These are controlled by magnetic beams similar to our radar. Such pictures taken are viewed on board the space ships on what we would call space mirrors or screens, but theirs are vastly superior to anything we have constructed.

They have a visi-scope which they can focus so minutely as to look not only into a room where people are but right into their brains, watching the pulsations when they are talking or thinking. The brain cells throw off colorful lights as they vibrate. Some vibrate but little. The right side of many earth people brains are almost in a dormant state.

They have an instrument that is about a foot square on the top, and then is bell shaped (somewhat like a green pepper), flat on the bottom, which they set in the middle of a craft, and from the light energy picked up from our atmosphere by this instrument it begins to oscillate. The top section moving clock-wise. The other parts of the bell portion moving both counter clock-wise and clock-wise. As this movement increases in tempo waves of light energy are pushed out in the ship and beyond its walls for considerable distance and these waves are of many colors. This motion vibrates so fast that the craft sets up a slight humming sound, and under control of the operator shoots out into space at terrific speeds. This is the color seen by earth people as the craft travels through our atmosphere.

We have called these smaller craft and
discs by many names, such as flying saucers, "fire-balls", "foo-balls", or vortexes of electro-magnetic energy. Some such conditions do exist in our atmosphere, but they should not be confused with any of the craft referred to herein.

Every part of the earth's surface where destructive war activity is centered has been viewed, all air-fields and plants charted, also all laboratories. All areas where uranium and other minerals are being mined for use in the manufacture of atomic or hydrogen bombs listed. All world leaders are under their surveillance. All so-called secret meetings, plans, operations, designs are known to these space beings. Invisible watchers are in the midst of all meetings, noting, recording and photographing all that takes place that has destruction in mind. Through the use of the visascope they can check on every phase of our life.

As the mission of these craft is a helpful and peaceful one, no harm is intended to any earth beings unless a hostile move is made against them. They are now in contact with certain individuals who have taken up physical embodiment on earth to work with these space beings in the unfolding of the New Age Plan, to assist in the building of a better civilization.

Should any hostile action be taken against them they will quickly remove the same. By using certain cosmic forces which they are thoroughly familiar with they would easily disintegrate any such hostile craft before it or any of its guided missiles are discharged. Airplanes would also be prevented from leaving the ground for such an attack. Pilots and operators could be placed in an unconscious or sleep state unable to perform
any functions, and forts, plants or operational points disintegrated through demagnetization. Hostile planes could be enveloped in a field of force that would suspend them helplessly in the air. They would also quickly take in charge and using such powers unknown to us of earth, pick up the leaders directing such hostile actions against them into the 4th, 5th, 6th, and higher dimensions, into the presence of the Space Beings. People would say they must have disappeared in a blaze of high vibratory light. They would make their own ships invisible traveling in the midst of the hostile planes without being detected. This information should serve to convince earthlings how futile these efforts would be against beings of such superior intelligence. It would be wise for earth leaders and people to concentrate on ways of peace and brotherly love rather on war and destruction.

Many of these smaller craft will be seen in the near future, during the period of great stress coming upon the earth. Some of the larger space ships may be seen also. Their appearance will serve to awake millions that there are beings of far superior intelligence to earth people on other planets.

When the new races are established in North and South America, in Africa, Australia and New Zealand, people of earth will have the actual experience and opportunity of seeing some of these Beings in dense forms; learn of their great wisdom and power.

If we would realize that our astronomers have photographed solar systems and galaxies with millions of planets, millions of light years from the earth, we must accept the fact that intelligent beings are dwelling and actively engaged in their form of life expression on a great number of planets. They are occupied by beings whose atomic cell and organic structures are somewhat different from
ours, in which they are able to function in their atmospheric conditions just as we do in the earth, and from what we are told could learn a great deal.

Many of our scientists, musicians, poets, etc., have received much of their understanding from higher minds both carnate and discarnate who have drawn close and impressed upon their consciousness ideas which they claim as their own. This intelligence originated in the higher spheres of consciousness and was given to them that humanity be benefited and civilizations lifted to more wonderful expression. Many wonderful inventions have been seized by unscrupulous people, capitalized upon for their own personal gain with little real thought for the upliftment of humanity, except they had the financial means to purchase the same.

Many visitations have been made to the earth since its formation and cooling by these Elder Brothers of Space, and during periods of wars and great tribulation. This is not the first time that the earth has been at the doorway of a great Golden Age. In the history of earth's civilizations there have been several. Five times the earth has stood in the path of destruction, and several times it has been thrown out of its original orbit. It is not now in the orbit it began its first movement in space.

This is the end of a great cosmic cycle of 2-1/2 million years, as well as an age cycle, and a period cycle, so drastic changes are due to change the inhabitants of the earth as well as the earth's land areas, as well as its position in the heavens.

Our heaven and earth are being moved along with the other planets of our solar system through space at a tremendous speed.
into another part of the great universe, into the auric field of a Central Sun, invisible now to our astronomical instruments. This will alter the face of the earth bringing up now sunken bodies of land, like the old Murian continent, until the water area of the earth is greatly reduced. The atmosphere around the earth, the lower heavens, is now undergoing and will continue to undergo changes until a new heavens or atmosphere surrounds it, vibrating at a higher more refined degree.

These flying discs or saucers have been seen in most every country on the planet. Many hundreds of such observations have been noted in the past few years. Many were not seen at all. Many pages of these sightings could be filled—made by reputable individuals. Many were seen in the daylight which refuted the idea of falling stars, fire-balls, etc. Many were seen fairly close up. Some pictures have been taken of them showing a density like our own planes.

They have been sighted in many states of the nation, in Canada, many countries of South America, Korea, New Zealand, Australia, Italy, France, Germany, Russia, Sweden, Norway, England, Spain, Siberia, Japan, and several places in Africa, over uranium mines, and elsewhere.

Almost a century ago a phenomena of lights were seen in England and became known as the Durham Lights.

The newspapers were filled with stories of mysterious cigar-shaped airships in 1897 seen in various parts of the country. It was reported that the lights and men on board were clearly seen.

On May 25, 1893 a magazine called "Nature"
quoted a curious phenomenon being observed on the wintery cruise of H.M.S. Caroline by a deck officer on watch. The lights were of an unusual nature. Some were spread out. Others appeared enmass. They bore towards the north and disappeared about midnight.

Some authorities have endeavored to explain away these sightings as looming mirages caused by layers of inverison haze, saying they could duplicate such a manifestation in their laboratories. Perhaps they are correct in their laboratory deductions, but they cannot begin to duplicate even in a meager manner the metal used in these space ships or the ability of Space Beings to maneuver them in the way they do and at the speeds they have been clocked at; all the way from 300 miles to over 18,000 miles per hour.

To correct a mass of incorrect information given out about space ships, stars, planets, solar systems, etc., we will endeavor to give our readers some facts.

These space ships are composed of a kind of element which does not show on our spectrum, which is harder than any metal we of earth have been able to manufacture, yet so light that two men could lift one of these discs of 50 feet in diameter. That inside of the space ships they have bunks that one can push back into place, fitting so tightly into the inner surface of the craft that one cannot see any evidence of them being there. Each ship has its panel board, we will call it, consisting of the various push-buttons used for the operation of all mechanical objects on board. Their radar like screens, reflecting mirrors, visascopes, visa-phones, radio directional lights, electro-magnetic mechanism to pick up light rays concentrating them thru crystals into gyroscopic instruments that create the waves of light energy referred to before.
Ray machines for magnetizing or demagnetizing any object, creating of vacuum conditions or patterns, and for projecting beams of light force from ship to earth or elsewhere.

At this time these space ships and discs are setting up landing tubes and broadcasting centers all over the earth. The landing tubes are about 20 feet in height, composed of electronic substance, invisible, on which a discs will settle and remain stationary against a force of wind of other factors. The broadcasting centers will be of similar substance, also invisible, but capable of sending beams of energy waves over the earth, along which will travel thoughts of peace, love, joy, harmony and justice, and as humans pick up these thoughts both during sleep and awakened state they will begin to react thereto and put into expression such ideas. This will be one way to break up the destructive thought pattern that every nation of the earth is now spreading upon its inhabitants through various channels.

The Commander of one of these Space Ships, known as Aramia, is 5 feet 10 inches tall. Very dignified. Solidly built, fairly broad through the shoulders. His hair is long and golden. The cheeks are pink, eyes large and blue, his chin strong. He has a very pleasing expression. He wears a tight fitting tunic of pearl shade silk, with gold and blue trim, the collar of which is three inches high, open a little at the throat, with gold tabs at the ends. On the shoulders of the tunic are golden epaulets—somewhat similar to the "boards" worn by naval officers. He wears tight fitting trunks of same material, pearl silk, with a golden zipper up one side of the calf. His shoes are a soft golden metallic material. While his manner is gracious it is very commanding. One can feel the magnetic force emanating from his person. His command ship is from the Planet Venus. It is
cruising some 75,000 miles above the earth.

He informs me that it is about 7000 feet long, 500 feet in diameter, with 1500 beings on board. The skin of the ship looks like aluminum or stainless steel, reflects a silvery-golden light. It has two entrances, fore and aft. In the nose is a long panel board with many push buttons, a view or space mirror, a picture-graph, a sound wave detector, a visa-scope, a visa-phone, a small radio like instrument which is in direct atunement with the Planet Venus. There are several seats before this panel board at which the various technicians sit when the ship is in operation. We might call these beings the pilots, co-pilots, navigator, engineer, radio and sound technicians.

The crew is composed of Venusians from 36 to 42 inches tall. They are well proportioned. Their skin is a light cream color, covered with fuzz-like hair, like the down on a peach. Their eyes are large and blue, with hair blonde to golden, brows fairly heavy, arched, but little. They go about their work silently, eyes flashing, at times smiling. Their uniforms are light blue, close fitting, tunics and trunks, with shoes of the same material fitting tight around the ankles. Many have gold ornaments on their uniforms, indicative of rank.

The Commander Aramia advises that these little people are a specific racial type on Venus, and that a race of little men and women are to be found on Mars as well, while on Saturn they have a race a little taller but heavier and more gross in appearance. On Uranus and Neptune are races of giants. The little men of Venus and Mars are highly skilled in the handling of mechanical and electrical machinery. You might even call them wizards when you consider their ability and knowledge.
This ship is operated in several ways. One of them is utilizing the cosmic magnetic force in the atmosphere. This energy is microscopic, white in appearance, and more explosive than uranium. The ancients called vryil. It is picked up by a series of coils and converted into power units as the energy is concentrated thru crystals as they move thru our etheric belts or atmosphere. When traveling in outer space from the earth to other planets or between planets they move along lines of magnetic force at blinding speeds.

The magnetic vortex that extends outward from our poles in cone shape is several hundred thousands miles in length, reaching beyond the moon, and when these space ships come into our earth's orbit they come down thru this magnetic vortex toward the earth from the north toward the north pole; and this magnetic force enters the earth from the north pole, travels thru the earth southward, into the vortex of the south pole, while the energy from the south pole vortex travels over the face of the earth into the north pole vortex. Therefore, these ships can come from the moon into the earth's magnetic field in just a few hours.

By the use of certain instruments they can create a vacuum around and before the ship, thus having no friction or resisting force to overcome. In other words they travel in an atmosphere of their own creation. There appear to be tubular vents along the outside of this craft evidently thru which they, by sending bursts of magnetic force on one side or the other can maneuver it in any direction. Also in this vacuum they can remain stationery.

As it is now cruising about 75,000 miles above the earth many smaller craft report to and are directed from this source. Smaller discs can be taken aboard the mother ship by
landing on the top, then lowered inside.

The operators of these craft when reporting stand at attention before one of the officers or the Commander and make their statements telepathically. They salute by extending the right arm, palm up, the hand slightly above shoulder height. When the Commander gives an order telepathically to any of his crew one can feel the vibratory effect of this thought beam, and the force with which it is directed seems to electrify those to whom it is sent, as they snap into activity at once.

No maps or charts are used. When a certain area is to be viewed they sweep the area with a ray beam that travels on the earth picking up thru a top-like object which is whirling at a terrific speed photographs of ground, outside as well as the inside of buildings, and these are shown on their view or space mirror together with any sounds or conversations. Was astounded to see buildings, plants, airfields, and people working inside of them, as if televised, and heard the voices too as they came thru the sound wave detector, just as heard over earthly radios. When these voices or tones are converted into picture-graphs we behold pictures of that which is being said or discussed. These come through rapidly and with clarity. So no matter in what language the conversation may be in, these picture-graphs show what it is about.

All thought is universal and convey form, and when qualified by instruments, such as this picture-graph, indicate the trend and purpose of the conversation. When we send a telepathic thought to another person it travels in picture form on waves of etheric substance, is picked up by our sensorium and readily understood.

This ship and all others in the fleet are
shielded against any interfering radar waves of earthlings, or other space ships not in harmonious accord with the fleets working in the orbit of the earth. Inasmuch as our earth and solar system is entering the density of the Central Sun Vela, space craft from other solar systems will begin to inspect the earth closer, and unless their attitude is friendly the solar space patrol challenge them at once.

The Commander smiles when the thought is directed to him,

"Are there beings on other planets of this solar system?"

He replies,

"In this vast universe thousands of planets have living beings on them. They do not all resemble earth people, any more than earth people resemble each other in color, height or facial characteristics. Some resemble earth people very closely. Some beings are part human and part animal. These are beings in the lower phases of evolvement. They too fell from grace or a higher status by mating with lower animalistic forms, even as some of the first beings on earth, called the suns of Light, who married or mated with sub-human people."

"Your scientists and astronomers are not quite correct in their deductions and ideas about the planets of this solar system; about other beings not being on them, or thinking there might be only some lower order of living organism existing on them."

"It seems they have decided that according to the analysis of our atmosphere on Venus, by some of their special instruments that there is little if any oxygen and no sign of water vapor. Hence, they believe the surface of our planet must be like a desert, with dust or some strange gaseous formation in our clouds. That the temperature of these visib-
l e clouds or cloud layers vary as much as 0 degrees at night to 140 degrees F. in the day. That the surface temperature would indicate that it might be as high as boiling point. So without any apparent oxygen, no water vapor, unfavorable temperatures, there could hardly be any life on Venus like that on the earth. They are mistaken. No astronomer thru such instruments as you have on the earth has ever been able to see our planet itself, nor can they say their instruments are picking up any direct radiation from the planet but only from visible cloud layers, and they are not sure that such do not come from other sources in space."

"I assure you, that we do have life on our Planet Venus. Our people resemble earth people very closely. Our cell structure vibrates at a higher rate than does yours, but we eat, breathe, and digest our foods, though somewhat different than earth fruits and vegetables, yet they sustain us. We know how to assimilate these foods to the best advantage. We have water and vapor in our atmosphere. We do not have as many people on our planet as we had ages ago, but aside from the sub-human group, being part human and animal, and the race of little people, our people are much more highly evolved than your most advanced scientists and educators. We do not eat flesh foods of any kind. In that one department alone we are far beyond you earth people who are still cannibalistic. When you cease to kill for food, then you will cease to kill each other. Why should any being wish to take the life of a fellow being, or to eat the flesh of any living creature. You are still not human, only in the state of becoming human. You have lost control of your civilization as well as yourselves, and it remains to be seen whether you will be able to regain it, without our help. For in your present destructive frame of mind you are moving fast toward the destruction of yourselves, your civilization, and if not pre-
vented might even cause the destruction of this planet and create such stresses among the planets of this solar system as to disrupt the whole system.

The earth is the most unprogressed planet of this solar system. Some day through the purification of the golden-lavender rays of this Central Sun and other electrical-magnetic forces from still other sources billions of your so-called light years away in space, it will become a bright star in these heavens. Later it will become a sun, assume other planets have when its usefulness has been exhausted."

"Light travels at far greater speeds than 186,000 miles per second. You estimate this speed as this energy which becomes light on entering your atmosphere pushes itself from one point of entrance to another by your instruments. But, you are finding that waves of magnetic energy, also light, can travel many times faster than that. The planets of this solar system are not as far from the earth as your scientist estimate and believe. The rapidity in which the rays of light energy travel cannot be estimated for the connections governing the force that sends light, change. Your sun is dependent upon the electrical forces centered within it. There are many many suns, some thousands of times larger than our sun, but each sun is dependent for its brilliance upon the direct electrical forces of the spaces that concentrate upon it."

"Space is not a tomb or a vacuum, but is teeming with life, atomic and electrical, originating so far beyond this solar system that minds cannot grasp such immensity. Contributing forces have to be reckoned with. They may consist of electrical currents which, meeting produce force. They may also consist of fluids in the atmosphere. Light travels in ratio to the condensing power of the receptacle of a
particular wave of light energy. Some can receive and register certain speed waves, others are capable of condensing and receiving a much higher rate of speed. Your sun, our sun is capable of registering a million waves of electrical forces while the moon registers only a few. Thus the sun becomes the greatest electrical center of light waves in this solar system. Saturn has her own condenser of light as has Jupiter, while Mars, like earth is indebted in part to the sun. The sun, however, is not a body of liquid fire as the ancients used to think. The sun is a huge magnet, and the rapid vibrations from the same generate electro-magnetic waves of energy which you feel on earth, and when penetrating your atmosphere do create light and heat. The angle at which these waves enter your atmosphere determine your seasons.

These Venusians appear to be very highly advanced spiritually, mentally and physically. Being so pure in their thought they seem almost angelic. Their love power is intense and blends harmoniously with the vibrations of electrical waves of energy sent out pulsating in all directions. There are women on board this space craft. The second in command is a woman, and a very beautiful one too.

As she comes to where the Commander and I are standing, he turned to me and said:

"This is Estralon, our second Flight Commander. She has a ship of her own."

She is about 5 ft. 4 inches tall. Has the creamest pink complexion I have ever seen on any girl. These Venusians all look so young it is difficult to tell their ages. Her large blue eyes were like mysterious pools of sparkling waters, full of enchantment. She is wearing a uniform not unlike the one worn by the Commander Aramía, which reveals a very trim figure. I imagine she weighs about 115 lbs. While I could not understand what she is saying
to me in her Venusian tongue, telepathically, I am able to co-ordinate her delightful musical voice tones comprehensively.

I noticed the other women on board, all in uniform, carrying out various tasks, yet none of them could compare to Estalon in figure and beauty.

Her love power is intense as I am held in its radiance. I just seem to melt into her presence for a moment as her magnetic aura blends with and overshadows my own. I could only nod my head as she is presented to me, as I am still shaken from head to feet by the dynamic wave of love in which she had enveloped me.

"She will conduct you on an inspection of the ship and enlighten you further," said Aramia.

As she is talking and indicating the different kinds of ray machines, she stops suddenly and putting a hand on my arm looks at me again with that tender sweet smile so radiant and powerful, that I drift momentarily away in consciousness to a garden filled with a gamut of beautiful flowers.

"This mechanism is a demagnetizing ray gun which is used to disintegrate any foreign objects that might interfere with our flight, such as sizable meteor particles. Also used to deflect rays from an opposing force, such as a space craft from another solar system who does not enter this system in friendship."

It is not shaped like one of the guns you see on earth on either plane, ship or ground, but is rather a short tube through which a ray is projected by oscillation at a terrific rate of speed, for a considerable distance, which demagnetizes whatever the beam is directed on.
"This mechanism is used to create a vacuum around our ship which enables it to remain stationary in this density. We can also use this form of energy when moving through space at high speeds. This pushes aside lines of magnetic force which would create friction when crossed. When we travel along lines of magnetic force we do not need this so greatly."

Turning to another machine, she says,

"This one is used to expand vibratory rays of energy which as it increases in tempo is pushed out in colors, such as red, blue, yellow, reddish-blue, and lavender. The higher the frequency the more refined the color. Yellow or golden-lavender is the color you will observe coming from the Central Sun Vela, which I shall show you in our space-scope.

"And, this machine picks up the white energy in your atmosphere, concentrates it thru these highly polished and various shaped crystals, which immediately sets up motion, then this motion is focused thru several instruments some clockwise, some counter-clockwise, which enable us to project our craft in the direction we want it to go, by directing this colored energy through various jets. Our discs are not weighed down by heavy loads of fuel, and when we are moving thru your atmosphere our bodies are magnetized so they become light also, thus we are able to move in such tight circles, at such sharp angles, arcs, and at speeds that would paralyze your senses."

This machine, as we referred to before, has a number of various size coils, looks somewhat like copper only of a lighter shade. These pick up the white substance, vryil, which they claim is more explosive than uranium, by atenes, and as Estrolon states is concentrated to some odd shaped highly polished crystals. She let me look through a visa-scope, focused to a
nth degree, which shows the motion of these light particles as they move in between and through these crystals, into other instruments at terrific speeds, hence this energy is pushed out of various openings around the craft, setting up a slight humming, showing various colors, as viewed by earth people.

"Some of our discs have movable rims. A near central portion moves clockwise; the exact center being stationary. The other or outer rim moving counter-clockwise, setting up what you on earth would term a gyroscopic balance, enabling the disc to turn at 90 or 180 degree angles, to make tight arcs or circles, to dip and twist if necessary while traveling at speeds ranging from a few hundred to many thousands of miles per hour, your reckoning."

"Other discs are controlled entirely from a much larger disc by beamed energy, like your radar. These also have movable rims, and some are without any beings on board, but have mechanism similar to the type shown you before, the (bell pepper type) we will call it."

"The metals used in the construction of these disc craft are those which we have on our planets. They are of a kind that do not show on your spectrum. They are as elements fused through an electro process that makes them so durable, also so light, that we can construct or form an entire disc in one operation. In this way we can construct a disc in size from 2 feet in diameter to any size we desire, say 1200 feet or even 14,000 feet. We build a space craft, without any sections, welding, seams, etc., in a like manner, of any length we desire."

"If your people or leaders on earth were not so destructively minded we would give you detailed information as to how this is accomplished."
But, that must wait until you learn to live in peace with one another, then if you of earth have proven worthy of the trust and knowledge we may enlighten you."

"I feel like a particle of dust before the superior wisdom and grace of this young lady.

"Space craft have been making landings on the earth for many hundreds of years. There are many references to them in your ancient writings. They built and used them during the time the now sunken continent of Mu was in its height of progression, also used on the continent of Atlantis, who erected space platforms in the stratosphere. There are five of these platforms still revolving around the earth in its orbit. So you will understand that space ships are not new to the earth, nor the idea of space platforms either.

"The first beings on your planet earth were landed by space craft. They were selected by the Elders Brothers for their purity, wisdom, ability and strength from those volunteering from other planets, not only of this solar system, but from others belonging to what is known now as a Cosmosden or Federation of planets of other solar systems. Their instructors were from the planets Mercury and Venus, who when their period of instruction had ended returned to their respective planets. Other planets are now being peopled in the same way now.

"Some planets slow down in vibratory frequency to the point where habitable life cannot be maintained. Later such planets come to energized activity again thru the concentration of electrical waves of light being focused upon them by Exalted Beings in charge of such activity. Some planets become suns. These attract other bodies to them and form another solar system.

"Every living creature upon any planet ab-
sorbs and gives off currents or fluids of electricity. How this is given off and how absorbed comes under a chemist's observation. But it is an established fact. These little currents of electricity do not float off and evaporate like dew, but they reach out and connect with others, so your atmosphere is charged with electric forces generated by the connection of the human and the animal."

"And this is again connected with the greater power beyond your atmosphere, till the whole becomes so charged with electricity that it is not only seen but felt, when it takes the form of 'heat lightning'. The air has become so rarified by the rays from the sun that these little electrons blend and move together in visible form. After excessive lightness and expansion these electrical forces become detached from each other, concentrate again, then cuts thru the air in zig zag pattern; the result a thunder storm, which cools the air. This is what often takes place in the atmosphere around the planet, but far out into space lie the clear and tranquil ethers, stretching away beyond astronomical sightings and knowledge, intangible without limits, yet withal real."

"Each planet has its district or orbit in which it travels held there by magnetic force lines, and in the ethers each separate group of planets which you call a solar system revolve. There is no record that your earth has ever left its orbit to travel in the orbit of another planet, tho there is record that it has been out of its orbit to the point where it wobbled like a crippled being. As it is now spinning on its axis it is changing its position of polarity, which is setting up a wobbling motion. The time will come when you will have the star Cephus as your new polar star. By that time the beings on the ea-
Earth will have advanced to a great height in purity, and that is what was really meant when the Great Teacher Esu, whom you call Jesus, said to Peter, his disciple, "Henceforth, your name shall be Cephus. Upon that (polarity) shall my truth be established and it shall not pass away."

"Not only do the planets of this solar system have people on them, but your moon has also, though they have been compelled, due to its barren condition, especially, the side which you see thru normal vision, to live underground. They have instruments or machines for the generating of their own light, heat, and oxygen, and rarely come to the surface. They raise their own food stuff, and are in advance of your civilization. You would be surprised to know, I am sure, that you have beings living deep under the surface of your planet, especially, is this true around your south pole. These people are known to us as "Rainbow Beings." They live deep below the surface and have a type of civilization far superior to your own, with many intricate types of instruments for the development of their own light, heat, oxygen and foods. A number of ray machines have been developed by them. There are other races which deteriorated. The Rainbow race are a portion of the old Murian civilization which went underground during the struggle between the Titans and Atlans. Some went in space ships to Tibet, some to the moon and became marooned there. Some were able to land on Mars.

"On the far side of the moon, the side never seen from earth, is another race of people. There is vegetation on that side, and this is the side that many space craft operate from. So earthlings do not get the wild idea that you can land on the moon and control it and your earth, for you will find other beings, more highly advanced, already on it, minding their own affairs and not attempt-
ting to control the earth. You of earth still think and act like infants, so we must bear with you, watching you as you go stumbling along, helping you when you appear to be having great difficulty, not only to walk, but to stabilize yourselves."

"There is an ancient civilization living underground with entrances in Mexico, and not such a great distance from Mexico City. They often come to the surface and mingle with the people, but aside from a few mystics, the people of Mexico do not know this, and they would have a difficult time, if they did, to locate the entrances to their underground cities.

"Space craft have landed for hundreds of years in various parts of your earth where some of the mystic brotherhoods abide, and where these underground civilizations still exist. At every New Age, when the earth and its inhabitants go thru such great changes, we of space come to your assistance, as we are in this instance, in great number to sustain those who have been atuned to the forces of the light, to work with the great mystic brotherhoods, and older races, to keep the earth moving along in its journey of becoming more illuminated, more wonderful in its expression, more peaceful, more lovable."

"There are some space craft from the Planet Jupiter also working in harmony with us."

Later I met some of them. These Jupiterians are very dignified and stately. The leaders are very tall and dark skinned. They have peculiar facial expressions unlike those of any other planet. Their eyes are large, soft and very brilliant, dark brown in color. Their faces are long, one-half longer than people of earth. Some of them stand seven to 12 feet tall. They are very well built acc-
ording to earth standards. Their women are very beautiful, graceful and well formed and are considered some of the graceful of the planets, even tho they have this odd facial characteristic. Their skin is very smooth and radiant. Some of the men wear beards."

One of these Jupiterians, Berasa by name, about nine feet tall, revealed a great deal about the life on that planet and gave me an insight into their deep spiritual natures, their wonderful ability as creators or rather I should say, exponents of the perfect type of creation. For it seems, that to Jupiter the other planetary leaders turn for advice and guidance in cosmedonic affairs.

These Jupiterians are not so very different from those of Mars and Saturn, whom I had the pleasure of meeting later. They have a wonderful interpretation of the Creator's love and power, and express it in their lives. They have great debating societies where the law is expounded and questioned—Creative Law, and a higher understanding of life is thus attained. The auras of the people of Jupiter is a wondrous beautiful thing to observe. Those to whom their friendship is given may account themselves as blessed indeed.

The creative mind is very strongly in evidenced with them. The power to produce. From this planet is exhaled the wonderful creative atmosphere of ideas that flow in greater force to the earth than to any other planet closer to them. The power to visualize things, to conceive new conditions, new environments, new methods of working out ideas are being injected into the earth vibration from the electrical work shop of Jupiter, and so they have joined with the planetary forces in bringing stronger ideas and ideals to earthlings at this time. For they declare earth people need to be impressed with a greater sense of justice in order to dissolve the heavy vibrations now crushing
out the Light and Love of the Creator, and to
implant the seed of greater freedom among the
people, and the strength of the New Age Wisdom.

Estralon is saying now, as these ideas are
going thru my mind:

"Upon all planets are beings which were cr­
eated spiritually free and no being was given
authority to control or bind another individ­
ual in its expression. For restraint creates
struggle and friction in striving to be free,
and if this is not correctly directed then
friction becomes violent and destructive. Wit­
ness this on your planet over wide areas.
Leaders in many nations are binding the peo­
ple in virtual slavery, not only physically,
but mentally and spiritually. Your politic­
ans strive to regiment the voters. Governme­
tal leaders regiment your youth into milita­
ry service, into wars created and fermented by
corrupt politicians and munition manufacturers,
all in lust for money and power.

"Even in your worship, your church leaders
subjugate their congregations into ritualist­
ic services and ideas that have no basis of
truth under Creative Law. The Creator is Ra­
diant Light, Spirit, and should be worshipped
as such; not as a god of vengeance, or war, of
destruction, but as a God of Glorious Light,
Love, Peace, Power and everything beautiful.

"All things were created in positive and ne­
gative polarity, but each works in harmony
with each other. In energy the negative force
is cold, the positive hot, and you cannot ha­
ve light until these two are blended together.
Therefore, the negative, now turned toward mis­
creation and destruction must be harmonized
with the positive and LOVE is the motivating
oil to be used to make this operation smooth
and successful.

"Earth people are prone to worship and idol-
ize other individuals, war leaders, politicians, heads of governments, kings, rulers, church dignitaries, and needed therefore, to have saviors to lead them into a higher concept of the great creative laws. On Venus and the other planets of this solar system we worship the Creative Presence in all forms of expression and as the authority in all, with no other standing between us and that Presence. During this New Age you will throw off the shackles now binding you in ignorance of this great law and so worship the Creative Presence direct in all light, activity, and wisdom. Power and glory belongs only to Him. Man never did have the authority to usurp it unto himself. Only to express love in service unto others."

We had now stopped before the space-scope. Estralon turned it toward the Central Sun Vela and slid a colored plate into it, this enabled us to look at the terrific radiation emanating in and thru the nine solar systems now moving into its aurium. The aurium is full of golden light. This is why this Aquarian Age is called a Golden Age.

The other eight solar systems, besides our own, are moving into this aurium at widely different angles in their respective orbits. It has taken about 100 years of our solar time to move to the edge of this aurium and during the next 888 years will move around the Central Sun in this aurium, and then for another period of 100 years will gradually move out of it and begin its long journey thru six solar light ages into far distance space, to the outermost limits of its orbit swing; then will begin a long trip back over six more solar light ages to the Central Sun. All during this period this portion of the universe will be revolving around a still greater Central Sun, and these in turn around a Medi-Sun so far out in space that
a thousand times greater reflector than the 200 inch one on Palomar could not pick up its radiation.

Both Aramia and Estralon state that the Great Creative Universe around which all other universes are continually revolving is so far out in space, quad-trillion upon quad-trillion of our light years could not even begin to express its distance from the earth.

New solar systems, new planets and stars are continually being created and taking up their positions or orbits affixed by magnetic lines of force in these various universes and cosmedons. Some planets die out, as the atomic structure weakens, only to flare up again ages later as new energy is built up within it or is focused upon it from sources far beyond it in space. Some planets become suns, some stars become planets, and so life moves along in varied forms through out the Creative Universes.

A radiant lavender light vibrates outward from the center of this Central Sun Vela and harmonizes with the golden light of its aurium, and thus, as Estralon stated before, the Golden-Lavender Light is the Light of the New Aquarian Age.

We turn this space-scope on Jupiter, Mars, Saturn, Neptune, Uranus, also on far away Pluto, then over to Mercury, Venus, Aspid, Vulcan, to Sidelius, Nevo, Krona and Absethleon. Pluto has been mistakenly called a planet. It is only an asteroid. One of five such broken off from the Planet Krona, which was partially destroyed, and whose diameter is now about 15,000 miles. This was a most unusual experience. This space-scope can be adjusted so as to pick up planets so far out in space that it is difficult to define or classify them. Some of the planets we could look right down thru their cloud canopies to the planet itself. This must
be how they watch what is taking place on
the various planets, and more especially, the
earth.

The visa-scope is used for more minute
observation at much closer ranges. With this
instrument you could look into the secret
files of an enemy, see what their destructive
war plans are, as well as tune in on some li-
brary and read any books desired, without be-
ing obliged to go in person. To visit any
museum and see the paintings of the masters
while sitting in your home. More accurately
than if televised by us. Certainly would like
to know how this scope is built. Objectively
it seems to consist of a number of lenses and
crystals very highly polished and arranged in
such a way that they can be focused at either
close or distant range, and as minutely as we
could with a microscope of tremendous power.

This one is set in a square box like aff-
air, and as you look into it you adjust it
from the outside by pressure on certain litt-
le buttons. Really remarkable what you can
see with it. You can look thru walls, brick,
cement, iron, glass—into people's bodies, see
how each organ functions. This would be won-
derful for locating growths or diseases. In-
to the brain to observe the thought patterns.
One could readily note whether the individual
had criminal tendencies or not. Examine the
auras of any person, and note the mode of life

She also showed me another instrument, the
use of which on earth would change our lives
greatly. It is called for want of a better
name a "Solar Time Machine". This can be ad-
justed so one can look into the future and see
what any person, or persons, or nations would
be doing tomorrow, next week, next month, or
ten, twenty or thirty years from now, or even
for a thousand years. It can also be adjust-
ed to look in reverse back thru the past into
the primordial substance where all activity
is recorded and examine accurately what tran-
spired in various parts of the earth at that
period or any other period.

For example she focused it until I was able
to look back at the highest evolved period of
the Murians who lived on the now sunken con-
tinent of Mu some 80,000 years ago. Was ama-
zed to see the high state of their civilizat-
on. Their beautiful wide expanse cities,
with tall buildings, pyramids, flying machin-
es and space craft. Their solar lighting and
heating centers. The great solar reflectors
that picked up the sun-energy and beamed it
over wide areas in the form of light and heat,
as well as energy. Their many kinds of plan-
es—sled, bat wing, tubular, global, disc,
and many others. We looked closer into their
life activities, their temples, art centers,
health centers, industrial centers. The id-
ias we have today of our progression would
be dwarfed alongside of what I am seeing now
thru this time machine.

I asked her,
"What happened to so wonderful a civiliz-
ation?"

Estralon adjusted it down to about 25,000
years ago. We see great explosions, whole
cities in ruins, followed by heavy earthquak-
es with outlying portions of the continent
beginning to sink, result of these earthquak-
es. An atomic warfare had started between
the Atlantians and the Murians. Corrupt for-
ces had gotten control in both nations and
continued friction had resulted in an atomic
war. This set off explosions in the gas belts
in the crust of the earth creating earthqua-
kes of magnitude, heavy storms and other dest-
ictive activity with Mu sinking.

"Much had been done by certain wise leaders,
mystics, who had established centers in other lands and sent there those whom they could trust to carry on the knowledge, wisdom and life that was being fast destroyed by these two opposing forces," said Estralon.

"How like the present situation on the earth, with the forces of destruction and construction alined against each other in every nation on earth; and as then, so now, certain wise men are again picking out thru careful selection individuals who can carry the torch of wisdom for the coming generations, placing them in sparsely settled areas where destruction will not touch them, that the finest shall not be lost in event the present situation gets beyond control. At this time, however, these groups will have the added assistance of our space visitation. For we are landing and making contact with the many brotherhood, mystic leaders and some of their chosen workers."

Were our leaders able to look into this time machine and see what their blundering childish acts are creating and what will happen to the earth, its people, civilization, etc., they might at once turn from their wilful ways into more constructive activity for peace.

Estralon and Aramia both state, almost in unison:

"We whom you call space beings are not deceived by your window dressing (using your own language)—peace talks, for we are in possession of the facts. We know the secret plans in the vaults of all nations. We know the people of earth want peace with all other people. We know that certain leaders do not want peace, except as they can dictate it. We know that your group of nations have lost control of the situation and are not able in their divided activity to bring about peace. Because, within their own ranks they are not in agreement. We
know the basic principles set forth when this group was organized was not actuated by holy premises, therefore, will not endure any more than your past League of Nations.

"In your own language, earthman, you cannot leave a rotten apple in a barrel and not have the whole barrel of apples affected, even cause the barrel to become rotten too. Your leaders are deceiving no one but themselves, but the sad part of it is they would rather destroy a civilization, even a planet than stand in the light of right principle and action. Therefore, we, as stated, will not stand by and see this earth destroyed as it was in the previous atomic war, even though many of your people hardly warrant better.

"We Space Beings, your Elder Brothers, shall if necessary, use powers beyond your knowledge to preserve the earth and those who will be chosen to become leaders in the New Age dispensation.

"Mark it well, you leaders of destruction, and we know well who you are, we are a patient people, yet we shall move swiftly to purify the earth of your kind when the Supreme Commander gives us the command."

The power that this Commander manifests is so far reaching and great that I am as one transfixed. I give thanks unto these Elder Brothers of Space who have come to the rescue of the children and forces of the Light.

...........090...........

In our next booklet "Life on the Planets" we will endeavor to explain how the people on the various planets of our solar system look and live; the kinds of homes, buildings, temples and their cities. Their philosophy and religion.
