THE UNIVERSES OF GOD

The Centre is the Core of all Creation—the Holy of Holies of God.

THE FIRST UNIVERSE with one Solar System surrounding the GOD-HEAD, is that of the First and Greatest Adept, the Greatest of the Sons of God—The Lord Jesias.

THE SECOND UNIVERSE is next—the Universe with Two Solar Systems, the Universe of Women only.

THE THIRD UNIVERSE—The Universe of Men, with only Three Solar Systems.

THE FOURTH UNIVERSE with Four Solar Systems, The Universe of Men and Women.

THE FIFTH UNIVERSE with Five Solar Systems. The Universe given over to The Power of Thought.

THE SIXTH UNIVERSE of The Little People with Six Solar Systems.

THE SEVENTH UNIVERSE devoted to The Science of Mathematics containing Seven Solar Systems.

THE EIGHTH UNIVERSE—The Great Laboratory of GOD Himself—in which there are Eight Solar Systems.

THE NINTH UNIVERSE—The Great Universe devoted to the Worship of GOD. There are Nine Solar Systems in this Universe.

THE TENTH UNIVERSE for the Study of Theology with Ten Solar Systems.

THE ELEVENTH UNIVERSE of Mechanism with Eleven Solar Systems.

THE TWELFTH UNIVERSE—the Final Universe—the Outer Ring of the GOD-Head, with Twelve Solar Systems.

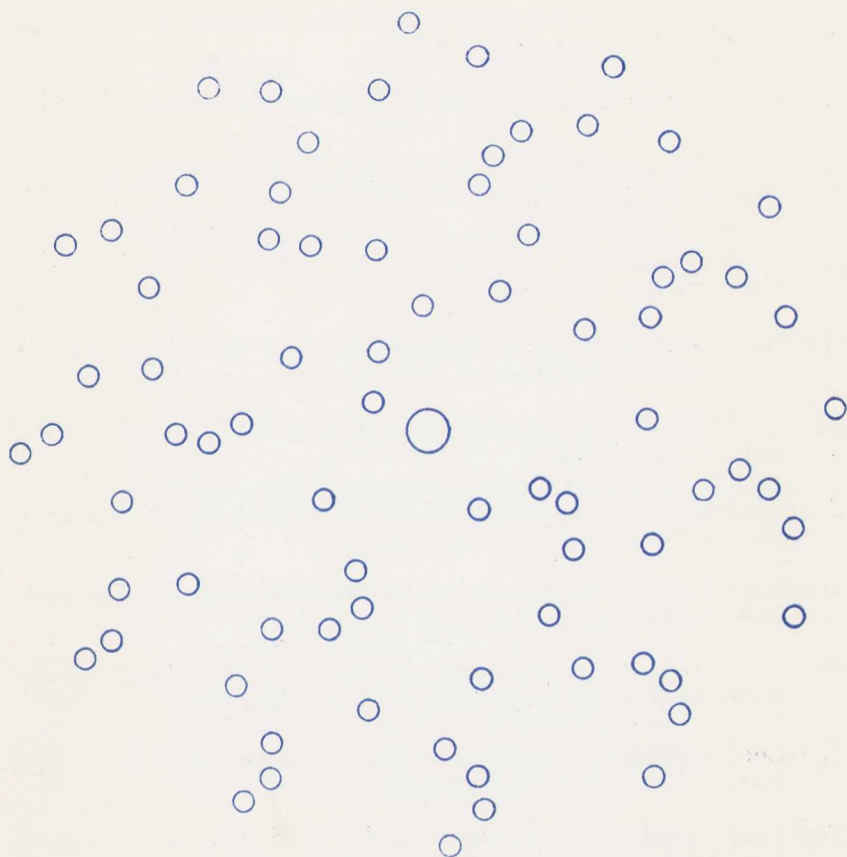

The publications of the Group of Solar Teaching are issued under the authority of the Lord Mikaaal.

The Winds of Truth, by the Lord Michael, preceded by the Yanihian Script describing the birth of the Earth Planet—its first inhabitants—the fall of man—the Twelve Great Cosmic Rays of God.
My Son, by the Mother of Jesus, revealing the true life of Jesus of Nazareth from birth to death.

The Twelve Solar Planes of the Twelfth Solar Planet, by the Lord Mikaaal, revealing the life of the androgynous inhabitants of the Solar Planet or Sun.

The Universes of God, by the Lord Mikaaal. The Twelve Universes of God surrounding the Core of All—the Home of God.

THE UNIVERSES OF GOD

THE CENTRE IS THE UNIVERSE OF GOD

The above drawing represents the Solar Creation of the Godhead. The outer—the Twelfth, with its Twelve Suns or Solar Planets; is the Universe in which the Planet of Earth is hung.

THE UNIVERSES OF GOD

THE ADEPTS OF THE HIERARCHY OF GOD

- The Lord Jesias, who controls for God the Great Cosmic Atruhm (Radium) Ray of Life and Love.
- The Lord Ahmēnah who controls for God the Great Cosmic Bhamha Ray of Sight.
- The Lord Ithuriel who controls for God the Great Cosmic Crisneth Ray of Nature Growth.
- The Lord Franchalah who controls for God the Great Cosmic Hakhanh Ray of Mysticism.
- The Lord Makhimsih who controls for God the Great Cosmic Shinhoth Creative Ray.
- The Lord Mlyhyhia who controls for God the Great Cosmic Krinhalha Ray of Knowledge.
- The Lord Arhura who controls for God the Great Cosmic Minhihih Ray of Perfume.
- The Lord Rahaal who controls for God the Great Cosmic Lukhanic Medical Ray.
- The Lord Aahnatah who controls for God the Great Cosmic Motsumh Ray of Magnetism, Heat and Electricity.
- The Lord Kahanah who controls for God the Great Cosmic Grinhilam Ray of Recording and Foresight.
- The Lord Azrahaehl who controls for God the Great Cosmic Kralohnoh Ray of Art, Music and Colour.
- The Lord Mikaal who controls for God the Great Cosmic Faenic Ray of Power.
- The Lord Shanvis who controls for God the Lesser Cosmic Ray of Sound which once was wielded by Samanah. This Son of God has only recently been raised from lesser Adeptship of Yanini and appointed to the position of Lord of the Thirteenth Ray of Sound. The Ray of Colodhon is now known as the Fourteenth Ray of Samanah. This great Cosmic event has only just taken place in the period known to humans of Earth as May 1941.

CHAPTER I

To-day I shall begin upon a *Solar Teaching* which I have not given you before. I intend to go slowly, it will be briefly written as the other teachings, and spread itself out over a term of time. It is with regard to the Universes of GOD. So far, your World is under the impression that the planet on which you live is one or part of one *Universe*. It is not so! there are *Twelve Universes*; formed by *That Great and Adored Godhead*. I do not expect you to grasp this stupendous fact yet, but the understanding will grow upon you in time. This part in which your Earth is hung is of the *Twelfth Universe of GOD*; and I intend to describe to you as nearly as I can the formation of these *Twelve Universes*, surrounding the Universe of God. We shall begin by the One in the Centre, the *Core of All*, which is the *Universe of GOD HIMSELF*; round that *Core* there are the "circles" of the other *Universes*, growing out and out until Twelve have their being. Yours is the last which GOD breathed into being, the *Twelfth Universe*, and in which I told you are Twelve Solar Systems, I have described twelve of the Solar Planes of the Twelfth Solar Planet in the Twelfth Universe in another book. But there are not Twelve Solar Systems in the others. In the *Eleventh Universe*—there are Eleven Solar Systems. In the *Tenth Universe*—there are Ten Solar Systems. In the *Ninth Universe*—there are Nine Solar Systems. In the *Eighth Universe*—there are Eight Solar Systems. In the *Seventh Universe*—there are Seven Solar Systems. In the *Sixth Universe*—there are Six Solar Systems. In the *Fifth Universe*—there are Five Solar Systems. In the *Fourth Universe*—there are Four Solar Systems. In the *Third Universe*—there are Three Solar Systems. In the *Second Universe*—there are Two Solar Systems. In the *First Universe*—there is One Solar System; and right in the *Heart of the Twelve Universes of GOD*—dwells GOD—*He—Himself is the SUN of His Universe*. Now, to understand the happenings in the *Cosmos*, one must go back right to the very beginning of Time—for a moment. Try, if you can, to stretch your minds backward, to make them elastic; and, then you will see GOD alone, in *His One Tiny Holy of Holies—His Tiny Universe*. Then *That Sweet GOD* desired to create something bigger; then it was that the *First Universe*, outside the *Holy of Holies* was formed, born of the *Breath of GOD*; and gradually that *Great Hand of GOD*, throughout the ages, stretched itself—building Universes; and yours is the last to come into being. The enormity of this is a thing that the human brain cannot understand. Think of the masses of planets, stars and luminaries in the Universes of which your Planet of Earth is part, and, which lies in the Twelfth Universe itself, a twelfth part only of the *Creation of the GODHEAD*. There are planets, stars and lumin-

aries and Solar Systems in other Universes too. I am going to describe, very briefly—only briefly, these Twelve Universes to you. So very many people of Earth are under the impression that theirs is the only planet in the Universe peopled with human life such as you; my children! there are thousands upon thousands of planets with human life: some of the planets the same as your own, many only similar in appearance to your own Earth as well as to your human frames. There are some planets with extraordinary—to you—living beings, the like of which you are completely ignorant; types of life never heard of by you, and where the vegetable life and flower culture are infinitely more beautiful than yours; there are some infinitely lower too, such as the Planet of *Grasahlah*, which has been described to you briefly. You must bear in mind that now throughout the *Great Cosmic Creation of GOD*, there runs a streak of the Black Ray of Samanah begun thirty-eight millions of years ago by Samanah; some call him Lucifer, others the Devil. That once great son of GOD has so disjointed and mangled certain works of his *Eternal Father*, that the beauty created by his Father is no longer there. That is why many things upon your planet and others are ugly and distorted; they have been touched by the Black Ray of Colodhon. Let us try to see all this from the *Mind of God*. He breathed into being the Twelve Universes, and the planets and stars were illumined by a *Beam of Heaven*; and, one by one GOD peopled these planets from *His Dear Breath*. There sprung into being vegetation, floral-life of such exquisite perfume and design, and bird-life so magnificent in colouring and beauty, that it passes the mind of man in understanding; that was as GOD breathed it; and then came Samanah with the scorching breath of the Black Ray; until that Black Ray touched your Planet of Yanini as it was then named. In Yanini, vegetation and flower-life had nothing else than that of beauty in it; there were no thistles, no spikes or thorns upon roses, no nettles that stung, no berries that were poisonous, no weeds that bind and choke tender growths; all these came from the Black Ray. These things which I have just mentioned were never made for the “protection” of the plants and flowers; beauty does not need protection, its own beauty should be of sufficient protection. This *Twelfth Universe* is the last Universe of GOD; it grew bit by bit like a band of beauty; and in that band GOD placed some planets of extreme beauty, such as Hahinsch which I have already described to you; and some are not beautiful at all; the Planet of Samanah—Huvilah (not Kuvilah—the Moon) by name, is an example. These are of the *Twelfth Universe*; and Yanini, beloved land, is of the Twelfth; places of such beauty as this are never lost. If you could have stood at a distance, as I have done, and viewed Yanini as it was formed in all its loveliness, you would have seen an illumined Planet which glowed in the *Twelfth*

Universe as a great jewelled star; that star is no longer visible, but Yanini still exists in the Universe—its etheric counterpart is in spirit; as is everything else, as well as the Yanihians who dwell there; it can no longer be destroyed by fire. Think of this Twelfth Universe as the outer encircling band holding the Creation of GOD together, as a circlet encircles the finger; think of it again as Silver Circlet of Love, holding the things of His dear Breath for Him. There will be no more Universes breathed into being; this is the last one—the Twelfth. I will tell you more of this great Cosmic subject at our next Group sitting. GOD keep you.

CHAPTER II

THE HOME OF GOD

In GOD'S Name I greet you, my children.

My purpose to-day is to speak on the same subject as last Sunday, THE UNIVERSES OF GOD; and I will begin with THE CENTRAL UNIVERSE—THE CORE—and, after that, work outwards. Think of a sheet of paper, with a central circle and twelve other circles surrounding it. I will speak of the Central One to-day. It is THE UNIVERSE OF UNIVERSES, THE UNIVERSE OF GOD, sometimes we have spoken of it as *The Holy of Holies*; now you know it by its proper name. In this *Central Universe of That Adored Father-Mother*—this Core of all the other *Twelve Universes*—dwells GOD. In that Little Place—for such it is, compared to others, dwells GOD alone. The tremendous *Force* of that *Divine Personality* is such that others could not dwell with HIM in *The Holy of Holies* because there is no equal to HIM. GOD needs to live alone; He needs space, because that *Great Electrical Force* given off by GOD would be dangerous to any other being, that is why others could not dwell with HIM. *The Power* from that *Divine GODHEAD* is dangerous to spirit and certainly to humans; it would decimate you, and for that reason GOD must live alone. And yet, He is not a lonely Figure. He is for ever in contact with *His Great Son—Jesias, who is the only one who can enter GOD'S Home and get close to GOD Himself—save one other*. In the hub of the *Great Universes*, lies Beauty, Perfume and Colour, and there dwells GOD. I want you to realise that this Universe in which you live, the *Twelfth Universe*, is *only one*; there are Eleven others, and they surround the *Universe of GOD*, as circles, as bands or as the Rings of Saturn; that will give you a better idea of how to place the *Twelve Universes of GOD*. And now let us think of the *Home of GOD*. I would have you imagine that you are entering a silence—a hush, and, that that hush has colour; as if you were passing into the heart of a moonstone. You could not go there in the human body nor in the spirit body; and only those belonging to the *Hierarchy of GOD* can go there, we who are highly sensitive to the vibration of that Beloved Father-Mother; the *Vibration of God's Home* is electricity; no wonder man has not been able to discover the Source of Electricity. Think of the brilliance of the Light in THAT CENTRAL HOME, so brilliant that you could not open the eye to its blinding beauty; even the *Hierarchy*, who have the three-cornered eye, have to shade their eyes with the hands. The Light is blinding, it is decimating; and the sense of perfume which assails the senses is indescribable, it is of such unutterable beauty; one can “feel”

the intense hush, just as sometimes you on Earth can "HEAR THE SILENCE," it is so quiet. The sense of hush in *GOD'S Universe* is like that silence, but magnified a thousand-fold. There is only one sound from outside the Holy of Holies, and which reaches to the four corners of the Twelve Universes; and that sound is the beating *HEART of GOD*; it is like the flutter of the wings of a bird, the cadence of music in the zephyrs; the beating Heart of *GOD* is colour transformed into sound, it is soft and gentle. And from this *Central Universe of the GODHEAD*—*He* can see all the Solar Systems, planets, stars and luminaries throughout His Universes. Those Beloved Hands hold the threads of everything, that the stupendous work can be carried out from the *Home of God*. Next week I shall speak of the *First Universe of the Great Son of GOD*. To-night, as your bodies rest upon your couches, your spirits will leave that shell, empty, and each one of you will come with me to *Yanini*; it may be permitted that you bring back the memory of this; do not be disappointed if you do not. GOD bless you.

CHAPTER III

THE FIRST UNIVERSE OF JESIAS

My beloveds. The last time we met together I spoke to you of the **UNIVERSE OF GOD**, and I tried to describe **THE Central Universe of GOD**, the *Core* of all the *Twelve Universes* which lie beyond. To-day I will now deal with **THE UNIVERSE OF THE FIRST-BORN SON OF GOD; THE UNIVERSE OF JESIAS**. I described these Universes to you as circles around the *Central Core of GOD*. I would not have you think that the width of all the *Twelve Universes* is the same in each one; it is not, not one of them is the same width as yours; the *Twelfth Universe* is the widest. Within the thin band of the *First Universe of Jesias*, lies the *Universe of God*; this **HOME OF GOD**. There is no Solar Planet in the Central Universe of the **GOD-HEAD**; God is the only **SUN**, and the brilliance of the **LIGHT** from that **SUN** is sufficient to lighten all the *Twelve Universes*. One striking difference between these *Central Universes* and yours, is that when you look out at your night sky you seen countless planets; but you would see none in the *Universe of GOD* and precisely two in the *Universe of Jesias*. It was only as time grew that the Beloved **GOD** expanded His Universes, and that is another reason why yours is of such beauty. In the *Jesiam Universe* only two planets were breathed by that *Beloved GOD*. Of these two in the *Universe of Jesias*, one is the *Solar Planet* and the other is inhabited by a race of very high spiritual beings, not human, and this planet did not come into being until the *Twelfth Universe* was completed. You must try and close your eyes to all preconceived ideas of light and colour, because we are now dealing with a Universe of unspeakable beauty and perfect brilliance of sunshine: there is no night, no sense of tiredness, all is perfect. You do see in your Universe a stretch of grey in the skies, but in the Universe of *Jesias* there is none such; a cloud never passes, the atmosphere is soft and perfumed, it is the colour of pale amethyst of never-changing loveliness. The *Jesiam Universe* has a perfume of its own, and resembles the Perfume of the *Lily of the Valley*. This Great Son of **GOD**, whose original home it is, passes back at certain periods to the *First Universe*; it is used by Him as the doorway to **GOD**, for speech and converse with his Father. The lesser planet to which I have already referred, is small, about half the size of yours, and is people by beings who are not Solar; they are Hierarchical spirits but not of the Hierarchy. It has a population of nearly six million people. As I have said, it began long *after* the beginning of time. There is no child-birth there. If **GOD** wants someone to go there, then that soul is breathed there by *His Own Beloved*

Mouth. It is a Planet of exquisite beauty, a hushed and quiet place, undisturbed even by thought; sin is unknown. Its extreme space makes for freedom of action—freedom of mind, and, in this One Solar Planet as in all other Solar Planets, GOD has now ordained that the same Sons of GOD shall now hold sway *in all the* Solar Planets of the *entire Universes of GOD*—for God. Samanah was there before his fall, and now his place is taken by another. This *Universe of Jesias* is like an exquisite small jewel: is it not true that sometimes the smaller gems have more beauty than the larger ones? This *Universe* shines as a small tourmaline tinged with amethyst. Think of it as something quiet, peaceful. On the Sabbath of next week I will describe the *Second Universe of GOD*.

His blessing be with you all.

CHAPTER IV

THE SECOND UNIVERSE OF WOMEN

I greet you all, my children. I will continue my talks on the *Twelve Universes* which surround the *God-Head*. I have spoken of the *Universe of GOD* and the *First Universe of Jesias*. I will speak very briefly on THE SECOND UNIVERSE. It will see strange to you, my children, when I tell you that the *Second Universe* IS UNDER THE CONTROL OF A WOMAN, *Mariya*, or as she is better known to you, Mary of Nazareth. The *Second Universe* is a place of extreme beauty, small, because it is *inhabited by women only*, none of the male part of GOD have ever set foot there. This Universe, with its planets and their inhabitants, is slowly emptying. The beings on all the different planets of this Universe—of which there *were four hundred and fifty-two planets* — are all women under the guardianship of this woman MARIYA. There is no birth and this Universe is slowly dying out. The inhabitants were breathed there by GOD Himself, that the purity of the Woman Side of GOD should find expression for the first time as *woman*. In form they are akin to the women of Earth; and yet so different, they are not so solid in formation—more like the women of *Yanini*. The 452 planets were divided into different races; all, however, of one colour, pale—as the *Yanihis*, yet differing in appearances. They spoke different languages; their method of dress was not all the same. All, however, were dedicated to one purpose, the demonstrating of the Love Side of GOD to His Worlds. The people of this Universe, then, knew naught of the Male Side of GOD because no male existed in this Universe. Thus to women came the great test, “*The Test of Separation*”—existing without the assistance of the male half. You women of Earth who know what it is to be *united to the other half of you*, can demonstrate true love in your own lives when the male part of your own soul is with you; try, then, to realise how difficult it was for the women of this *Second Universe*. Yet they had to go through this test; the first test that GOD gave to His children was given to women. *There was never any sin in the Universe of Women*; a portion of GOD’S great Creation of intense beauty. Let us try and think of this Universe, as your own, if you will! On the Earth Planet the days are divided into 24 hours; in the *Universe of Mariya*, no such thing as darkness ever existed, no night, only perfect day; and, too, the ether is coloured as in the *Jesiam Universe*, but in the tint of *Aquamarine*. It is only yours—the Twelfth Universe, which has no coloured ether. The *Aquamarine* was, unconsciously associated with her who came to Yanini as Mariya. There dwells a perfume over the whole of the

Second Universe, it is as the perfume of a deep red rose; the rose existed then, *and the perfume of Love existed long before that*. This little *Second Universe* is narrow in its width, no wider than a million of your miles; it is a little band around the *Holy Universe of GOD*. Beside the 452 planets there were luminaries in the sky; for *GOD* enjoys beauty as well as you; He likes to see the little flickering lights shining through the aquamarine haze. You can only see yours at night, but they are still there during the day-time. They had a speech in the planets, but in a language unknown to you. Their form of worship was, and still is very beautiful, consisting of circles of worship—for the rites are performed in the open air, a large circular sward of grass is formed, or other places cut in the hillside and open to the sky, where the people foregather for the intense worship of *GOD*. They do not stand or sit, but lie prostrate before *HIM*; they are in close touch with *GOD*. This form of worship is common to all the planets, thus all know of the *Vital Truths* and are in close touch with one another; not as your international methods of communication, but by thought transference. These planets of the *Second Universe* are closer to one another, each one knows of the happenings of their neighbours, and I can tell you that this method of communicating is a "solid" reality. The *Second Universe* still exists, but there are now only thirty-seven planets—the rest have gone back to God, Who breathed them into being. Only women inhabit those which remain, and still that great *Woman* guards them. I leave you in the care of *GOD*.

CHAPTER V

EXPLANATION OF THE ORIGIN OF SIN

I am not continuing my descriptions of THE UNIVERSES OF GOD to-day, because, having heard you discuss certain things, I will deal with those matters which are problems to you, and so doing, will help you to understand more fully my talks on the *Twelve Universes of GOD*. Firstly, you have wondered how the Twelve Adepts came into being, or to be more correct still—Thirteen Adepts. The Beloved Jesias came into the First Universe; the Love Part of GOD was made manifest and the *Beloved GOD* ordained that Power should come into being, *for Love and Power are one and the same thing*, and into the First Universe came I, Mikaal, my most unworthy self. The Adored Master and myself dwelt there alone, and at a later period in the SAME Universe—the FIRST, were breathed by GOD the other eleven of my brothers. The other thing I want to speak about is *Sin*—the origin of Sin, and when it came into being for the first time. The seed of sin, which had nothing to do with Samanah at the time of which I now speak, came from the *Third Universe*. In one of the Planets of this Universe there dwelt a race, and a portion of this race made their homes beneath the surface of the earth, to escape, for a time, the brilliance of the *Solar Rays*, and this was the first time that *darkness* was discovered by man. No sin existed in spite of the darkness, and in their underground gardens a great scientist decided to experiment with the growth of things WITHOUT Sunlight; and there came into being a curious fungoid growth, striped, deep purple in colour. God beheld it, and He said, "*That must go, that is not beauty.*" Then there came the desire from these people to consume this fungoid growth, it was similar to your mushroom; and, FROM GOD, FROM THE HOLY OF HOLIES: "NO! I FORBID THE CONSUMPTION OF THAT GROWTH, FOR IT IS NOT BEAUTY." The people wiped all memory of it out of their minds, but in the extermination of this memory, one or two were left behind, and a young lad passing by said, "*I wonder why GOD does not want us to eat it?*" he glanced around to see if anyone was there, and, as there was no one, he took a mouthful; GOD saw this, and for the first time in the Universes the seed of sin was born. The consuming of the growth was in itself not a sin, *but the sin lay in the disobedience to the Command of GOD*. Samanah was a great son of GOD—once, and was largely responsible for the *Third Universe*, and he saw the lad consuming the fruit. The lad was reprimanded by Samanah, as he was by GOD, and lost his sight and speech; but for the first time did Samanah cast his eyes on sin, and it made

such an impression on the mind of this great son of GOD, that right down the ages he could not forget it. The thought never left him; he bore the mark on his own soul BY THINKING ABOUT IT. That latent stain on his soul *burst into flame in the Twelfth Universe* and jealousy was born. I will speak on the Third Universe on the next Sabbath at the Group Sitting.

CHAPTER VI

THE THIRD UNIVERSE OF MEN

In GOD'S Name I greet you my children. I propose to-day to give you a short discourse, if I can manage it in your language, on THE THIRD UNIVERSE OF GOD. The Third Universe has always been inhabited by men. There were 42 inhabited planets and no women ever existed there. The birth of children took place by the breath from high spirit; these male inhabitants took to themselves a quality utterly unknown to you, they became mothers as well as fathers. This is going to be extraordinarily difficult for you to understand, my beloveds. These children, then, were born of the breath and the conception took place from high spirit into the body of the man, and the child was born from between the ribs of the parent. You must understand that the physical formation of these races differed from yours—it was not so solid. In the birth of these children by the male species in this Third Universe, lies the origin of the nipples on the breasts of men, for they suckled the babes as women do on Earth now. The lives of these children, as their parents, were given over to the pursuit of intellect, thus love had nothing to do with this birth, they accepted it as an experiment in their studies of the intellect. The whole life of man was given over to learning in this Universe, and, as time went on the brain became as something to be fostered in knowledge. The domestic life was a secondary consideration. Every child born was male, there were no female children; this was by a decree of GOD, the reason for which you would not understand. The blending of the Third and Second Universes is very close, for all the women in the Second had their soul halves in the Third Universe of men. It was an experiment of GOD; He created the Second Universe of women, the Love Side of Himself—and then the Third Universe of men—the Mind Side of GOD. Those 42 inhabited planets were not so dense in form as your own. Each planet was devoted to certain aspects of the intellect, one for medicine where all worked as surgeons and doctors, another planet devoted to music in all aspects of that art, and so on. One can only say, if one would dare say such a thing of any work of that Adorable GOD, that this separation of the male and female was, even to the Mind of GOD, a little disappointing. *It is impossible to separate the two sexes. Love and Knowledge must dwell together.* And so the Beloved GOD passed to the creation of the *Fourth Universe where men and women dwelt together for the first time.* The stature and build of the men of the *Third Universe* was greater than yours, not one was less than six feet in height, in fact a man of six feet was looked upon as short. That great

Son of GOD who watched over this Universe was *Mlyhyhia*, and he learnt for the first time that intellect, if not coupled with Love is useless. But there is one great fact I want you to remember; this Universe was the birthplace, foundation and root of all your knowledge to-day; had that Universe not been dedicated to Knowledge, you would be a race of unreasoning beings. Doctors, poets, musicians, scientists, found their birth in this Third Universe. It still exists, for no Universe of God can be removed; BUT THERE ARE NOW EXACTLY SIX PLANETS LEFT, still inhabited by men; the others have passed to that *Adored Creator*. The width of this Universe is small, only two million of your miles wide, twice the width of the *Second Universe* of women; both very small compared to the *Twelfth Universe* in which hangs the Planet of your *Earth*. The ether is of a pale green in colour, therefore there is a continuous and perpetual twi-light, except in the middle of the day, when the Sun is brilliantly blinding, which hurt the eyes after being accustomed to the twi-lit conditions, and that is the reason why those inhabitants made their dwelling places beneath the ground (a matter of which I have already spoken in the talk before this one), to get away from the brilliance of the *Solar Rays*, and in that form of dwelling sin came for the first time; disobedience to GOD. This is the Universe where the forbidden "fruit" was eaten for the first time. The perfume of the *Third Universe* is of sandal-wood, a spiced perfume. The *Twelfth Universe* is the only one which has no perfume. Do not mistake me when I say that the inhabitants of the *Third Universe* lacked love; they could not help themselves, IT WAS ORDAINED BY THE WORD OF GOD. Being born into that Universe without love was a tremendous test through which the peoples had to pass, and it was only through great learning that they acknowledged GOD. They thought, as you do, that they were the only type of being —OR YOU DID UNTIL YOU MET ME. So, my beloved ones, I have revealed to you, by permission of that Adored GOD, another of His Universes. GOD keep each one of you in His care.

CHAPTER VII

THE FOURTH UNIVERSE, MEN AND WOMEN TOGETHER

I told you in my last talks that the Second and the Third Universes were inhabited by women and men only. Now in The FOURTH UNIVERSE OF GOD, which I shall speak to-day, men and women came together for the first time, but as separated beings. Many there were then, who found their soul halves, some did not. I want you to eradicate from your minds anything of Yanini—for the present, because it was in Yanini as well that men and women came together in the Twelfth Universe. GOD had tried a Universe entirely populated by women and another populated by men, and he saw with that All-seeing Mind, that neither could work. He saw that it was necessary that the two sexes should come together, Love and Mind; thus in the Fourth Universe came the two sexes together for the first time. They did not live as you do, they were human in form and substance, yet more ethereal, as in Yanini. Races of great beauty lived in the planets of this Universe. They were great GOD lovers; they held Him in intense reverence, and the practice of Spirit-contact was an ordinary Practice in their daily lives, for advice from spirit was needed then AS IT IS NOW. There were no such things as kings, princes or dictators; these did not exist until the *Twelfth Universe* came into being. The inhabitants of the planets of the Fourth Universe were governed by an Overseer, placed in that position by the free vote of the people much as is used in your democratic lands on Earth to-day. It was a democratic form of Government then that these people had, but—and this is the important thing—they went to GOD, the *Supreme Head*, for everything; He was REAL to them. Your King represents the unity of the free nations of Britain. In the Fourth Universe GOD was their Unity. Eating came into use for the first time; we know that there was very little food consumed in the Third Universe, and that fungus was soft and easily dissolved in the mouth, and I have told you what happened as the result of the eating of that fungus growth. Eating was as you know it—in the Fourth Universe, but no animal flesh was consumed, only fruit and vegetables. The inhabitants had teeth, not separated teeth as you possess, but an upper and lower solid ridge, as knife-blades; decay was unknown. Children were born, and in nearly all Universes up to the Twelfth, conception took place by the breath, and the tiny one was born between the ribs of the mother; but this no longer exists in man to-day. This Fourth Universe was ordained by GOD to be entirely devoted to one type of learning—medicine, and methods of healing in all its branches for the human races; many of

these methods survive to-day in your world and others, which were founded in this Fourth Universe; many other ideas are lost. They were wonderful surgeons, because it was there that one particular disease began, and that is cancer; it had its birth in this Universe. That great Cosmic Lord, Rahaal, is Watcher over this Universe. The ether was coloured as an iridescent pearl, and when one looked out one saw the light as if the Sun were caught and trapped in the jewels of the ether. The planets were beautiful meeting grounds for soul-halves; for there were many who knew, recognised, and acknowledged, and were told. There were 187,000,000,000 planets, all inhabited; it was, as one might say,—a very crowded Universe. There are precisely 67 inhabited Planets in this Universe now. There is slight darkness in the night skies but it was thickly clustered with stars and planets, very much closer than yours and was a canopy of jewels. That is a very short description of the Fourth Universe; **EVERY ONE OF YOU CAME FROM THERE**, breathed into that beautiful place and now you are born into the Twelfth Universe. You have passed through all these experiences, but all memory has passed into oblivion, none is left in your present super-consciousness. The next Group sitting will be on Wednesday at the usual time.

CHAPTER VIII

THE FIFTH UNIVERSE OF THE POWER OF THOUGHT

My beloved ones, I greet you. It is my intention to-day to very roughly describe THE FIFTH UNIVERSE OF GOD. This will seem strange to you and certainly very difficult to explain; because the *Fifth Universe of GOD is empty*. Once upon a time, thousands of millions of years ago, there were many planets in this Universe; now there is not one, no planets, no stars, no celestial life, for all have gone back to GOD. We call the *Fifth Universe*—THE GREAT SILENT UNIVERSE. Try to imagine an immense stretch of Universe or sky—if you can understand it better by calling it such—3,000,000 miles in width—utterly empty, unpeopled. Try to think of the vast silence. If you could go there, as I often do, as a speck of life in the vastness of this unutterable peace and solitude; see the great sea of amber-tinted ether with a faint perfume of musk, and then, in that silence, *think* of that great silence, and, then, listen to the silence. You know, my beloved children, each one of you can, in a much lesser degree, try this experiment for yourselves; go out and gaze into the night skies which will convey to you the illimitable silence of “space;” and, if your hearing is attuned to the swirling masses of luminaries, you will hear such a symphony of exquisite loveliness. The planets spin and roll like a child’s top at varying velocities, becoming higher and lower at times. But in that *Great Fifth Universe*—a precious Universe, all have gone back to that *Adorable GOD*; there remains nothing but an utter and complete silence, nothing is visible but this musk-perfumed, amber-tinted ether. Sometimes, however, this silence is broken by a voice in this vast void—a voice of one of the *Messengers of GOD*, to report some happening in a planet in some other Universe,—then goes forth this voice in a language differing from any other language in the *Universes*; a clarion call—and this, at times, is the only sound echoed in *The Great Fifth Universe of GOD*. Now I will tell you about the people who once lived there. They were men and women in outline as you, but most unlike you in many respects; they were not of great stature—about your size, but there was one great difference, their bodies were not flesh tinted as are yours, but were covered with a transparent silvery “flesh.” The whole of the boney structure was visible to the eye of another; it was as if each one had the X-ray vision which could penetrate dense matter. All who inhabited this Universe, male and female, had their heads covered with dark hair; there were no golden haired people. Shall we say that this Universe was one of the experiments of *GOD*? It was an intensely spiritual race who inhabited all the planets of this

Universe, they were all as one race, not like the many races on your one small Earth planet; they spoke one tongue, their manners and customs were alike on all planets. It was in this Universe of GOD that the POWER OF THOUGHT was cultivated above everything, they knew and realised to the full that thought and mind—not intellect—was one of the most powerful gifts of GOD which He gave to the peoples of the Fifth Universe; thus they dedicated their whole lives to the study and practice of the POWER OF THOUGHT. There was no sin, although sin found birth in the Third Universe, sin skipped the Fifth Universe, sin could find no place to root there, and, in consequence, this blessed race of people lived so close to the very GOD Himself that they were enabled to pass back to the *Great Breath* from which they had their birth; and now in this great Universe—alone, is left behind a whisper, a perfume of the very Soul of the people; this could only happen where the being were nearly perfect. There have been others as perfect, but only very isolated examples. The vegetation of all the planets was scarlet, the eyes of the people were of the same colour and the beloved brother of mine, who watched over that Universe, was *Ahmênhah*—he of the Scarlet Eye of Sight. It has been difficult for me to describe something which no longer exists, with the added difficulty in dealing with a very spiritual dimension of life in your tongue. My children, there is no reason why you should not dedicate your lives to the *Power of Thought* as is done in many other planets; those of this Universe, the Twelfth, do not understand this, yet it is not impossible. A few of you do realize this power which lies dormant; you must awake to this great power which must be active in the Beam of Love. Communing with other planets can be brought to fruition, now that yours will be slowly returning to GOD.* Why not? You all understand your radiograph; the waves of ether are partially understood by you, (and there are others as yet unknown to you) which you and other planetary beings can use for inter-planetary communication by the *Power of Thought*; there is no barrier. It will come, AND THEN YOUR LITTLE SCIENTISTS WHO TRIED TO COMMUNICATE WITH MARS, its real name is *Thumbah*, WILL FIND THAT THEY HAVE BEEN WASTING THEIR TIME FOR THERE IS NO HUMAN LIFE THERE, ONLY INSECT LIFE ON THIS PLANET OF MARS. But there are planets which are peopled waiting to communicate with you by this great *Power of Thought*. GOD bless you my children, we shall meet again at the next Group sitting.

*Since September 29th, 1941, Earth has advanced eighty-six miles nearer to the Solar Planet.

CHAPTER IX

THE SIXTH UNIVERSE OF THE LITTLE PEOPLE

I propose to-night to give you a brief description of THE SIXTH UNIVERSE OF GOD. Firstly, try to remove yourselves from the lives you are now living, and become, as it were, a Universal Spectator and look down upon this *Sixth Universe* which I am about to describe. This *Sixth Universe*, then, is a place of exquisite beauty, one of the smallest of the Twelve Universes of the Godhead, being only 1,000 miles in width, this comparatively narrow strip holds 4,072 Planets, of which only 65 are inhabited, but not inhabited as your Earth Planet. The planets of the Sixth Universe are very much smaller than yours; and even Earth is almost imperceptible in the *Twelfth Universe*. Those who inhabit the *Sixth Universe Planets* are the *Root Races* of those beings known as the *Little People*, and all the *Little People* of all planets in *Creation* had their being from this *Sixth Universe*. Try and imagine taking a visit to these planets where everything is so small—all is in miniature, and all of them are devoted to the development and growth of flowers. They are places of extreme beauty and the *Little People* are of a DIFFERENT EVOLUTION FROM THE HUMAN RACES, lower, but none the less beautiful. I have spoken before in the Sanctuary and in my book *The Winds of Truth* about the races of the *Little people*, but there is one thing I have not mentioned before to you, and which should be stated, and that is—THERE IS NO SIN AMONGST THEM, there is no deviation from the Great Love Law as it is given them to understand, in either the male or the female. You of Earth know very little of this race of beings who do such wonderful work for GOD and who help to make your lives happy and your Earth beautiful; people scoff at the very idea of such things in your “enlightened” World. Some of these *Little People* have the power of discernment; they do not understand GOD AS A PERSON AS YOU UNDERSTAND HIM, but they obey implicitly the *Nature Masters*, whom they love with all their hearts’ love, but they do not have such a personal love as you. Let your mind go back in thought to this *Sixth Universe of The Ever-to-be-Adored GOD*; it was there that the Races of the Little People had birth from the *Beautiful Mind of GOD*. It was in the nature of another experiment of GOD. He had seen the reaction of the HUMAN evolution to His Laws, and He felt He would create another race of beings and see THEIR reaction to *His Great Laws*; and so these Little People inhabit yours and other planets. To see them is difficult; their life is, as I have already said, of a different evolution, a lower evolution in some ways, some people, however, do see them

and are often afraid to mention the fact because of the ridicule of the disbelieving and ignorant. Their work is the cultivation of flowers; they work in groups, different groups are attached to different groups of flowers; they work in your gardens and come into your houses, where love calls them; you know of one in this house of mine and there are others in the Sanctuary, many have seen them. They are capable of expressing love, but is a different love from the human love, more like the animal, and, like the animal, they never withdraw the love once they have given it; so different from humans. In this *Beloved Sixth Universe* the ether is perfumed, as near as I can describe it, to the sweet perfume of the honeysuckle; the ether is also coloured a pale golden yellow, a perpetual sunlight is always exposed to these planets of intense beauty. The ether is a little more solid than yours, and the Little People use this for flight; they have wings as the butterflies you know, not, as many people think, as "angels." There is nothing of a mystery, nothing of an esoteric nature in the lives of the *Little People*; they know the work they have to do, they also are aware of their capabilities and carry out their work in strict obedience to the Nature Masters for the *Adored GOD*; root, seed and bulb life are all cared for by them. They live in the Etheric part of Creation, but they are soul-less in an individualistic sense; they are aware, in a wordless fashion, Who created them; they cultivate the blossoms, they tend the meadows and the growing wild flowers, they make the countryside beautiful for you; learn to love them, my children, do not scoff at them, they dislike ridicule and they feel it deeply from human beings AND resent it. If you cannot accept the existence of this race, that is a personal matter for you alone to think about; if you do, give them love, then they will become your great friends indeed. Think of this *Universe* as a miniature Universe, some of the planets are no larger than the collection of countries known as *Europe*; how small, but how exquisitely beautiful; and see through this Pale Golden Ether how the Sunlight glitters in the iridescent flecks—inter-blended with the honeysuckle perfumed sweetness; then listen to the highly pitched voices of the *Little People* ringing through this Coloured Perfumed Ether in an ecstasy of joy in their work for *Eternal Beauty*. There is no night there, only a softened golden twilight. See their lives wholly given over to tending the gardens, and the blossoms of God; you would then understand where the beauty you love so much comes from. I leave *This Great Jewel of the Sixth Universe of God* for you in your quiet moments to think about, a *Jewel* so foreign to most humans, but none the less SO real. *GOD* be with you.

THE SEVENTH UNIVERSE OF MATHEMATICAL SCIENCE

To-night I intend to give you a short description of THE SEVENTH UNIVERSE OF GOD. *The Seventh Universe* is one of the greatest in size and, in *some* respects, in evolution. You might call it the UNIVERSE OF SCIENCE; men and women dwelt (and still dwell) there and both played their parts as scientists and investigators into science. This Universe, then, was devoted to science in its many aspects; mechanical science and engineering, metallurgy, the science of chemistry and electricity, in fact there was no science which was not studied by the inhabitants of this *Great Universe of GOD*. It will give you some idea of the size of this Universe when I tell you that there were over 8,000,000 planets—1,000,073 inhabited by men and women and children and 7,000,000 not inhabited. I want you for a moment to place yourself entirely upon the Intellectual Plane and forget the Love Plane. This Universe, then, was the birth place of *Mathematical Sciences*, and for all branches of Science. I might say, if one dared to word it so, that this Universe was another of the “experiments” of *GOD*. The minds of the peoples were, for a space of time, entirely deadened to love; their intelligence was developed to a very high degree, and, all the famous mathematical scientists of your Earth planet came into being in the *Seventh Universe of GOD*. Your men of science, think (among the many trivial things), that they have discovered the atom. This was discovered 144,000,000 years ago and it was then known as Mahines; the Lesser atom known as Mahinian, known to you as the Microcosm of the *Macrocosm*, the Lesser of the Larger; that is just a trivial example. I want you to remember, my children, that I speak of this Universe collectively, all the planets differed just as some of the planets in your Twelfth Universe differ, but with one great exception; every planet in the *Seventh Universe* was entirely devoted to the study of the Sciences; and the planets in your Universe are the sum total of all that have gone before. There is another thing I want you to grasp; no particular Cosmic Ray was concentrated upon this Universe; there is no *Ray of Science*, only one Cosmic Ray can be said to be Scientific as you understand the meaning of the word, and that *Ray is the Ninth Ray*—the *Deep Royal Blue Motsumh Ray of Magnetism, Heat and Electricity* of my beloved brother *Aahnahtah*, and *Aahnahtah* was thus placed in charge of the *Seventh Universe* by the *Adored GOD*. The love part in the make-up of the inhabitants was submerged, and this gave scope for the complete development—to such untold heights—of the “mind” part; thus their heads grew out of all proportion to their bodies; you would look upon

them as deformed. So the intellect advanced, whilst the heart withered as the shrunken kernel of a nut—of no use. Nevertheless, it was a great Universe inhabited by men, women and children. In some respects it was common to the Moon Planet—Kuhvilah, where the inhabitants visited a Gynecological Laboratory and drank of the liquid prepared for conception; the children were born in the same way. Even now you in your world are trying to produce it again; I pray God it may never come to pass. The people of the *Seventh Universe* had a great love for GOD in an intellectual fashion, but they were unaware of the *Great Love Side of HIM*. Between men and women love was unknown, they wedded entirely for the betterment of their work; they could perceive, as it were, a similarity of “design” in the minds of each other, and thus were they wedded and agreed to pass their lives together, but, without love. Therefore, my children, from the lives of the people of the *Seventh Universe*, there are two great lessons for you to learn; the first being—that the intellect must be subservient to the heart, and the other lesson is—the acknowledgement that GOD IS THE GREAT SOURCE OF ALL THE SCIENCES; that science is not a man-made thing. The little men and women who have dared to “tap” the Great Brain of GOD and say it is their work, when they are only instruments, are in reality picking up here and there portions from the Great Mind of the Ever-to-be-Adored GOD; it is not of themselves at all. The adulation of intellect is folly; I would not have you behave as fools, I would have each one of you balanced, but when the period comes in a human’s life that intellect pushes out the love of the heart, then, to say the very least, it is unfortunate and opens the door to unhappiness. THIS IS WHERE MANY OF YOUR CULTS ERR; they do not look to GOD for Love, these intellectual cults are rampant all over your World to-day, they are slowly pushing out Love again, they are going back to the *Seventh Universe* state again, and I do say, that if the intellect is expanded at the expense of the heart, then GOD help them. One would not dare to say that anything created by the *Mind of GOD* was a failure; the *Seventh Universe* was not a failure; it was, again, in the nature of an experiment, and, shall we say was found wanting—wanting in the other Great Aspect of GOD—Love. The forcing of the brain to learn is a pernicious habit, it takes place in your schools, colleges and universities, and what is the result? the growth and increase of lunacy in your World; forcing the brain beyond saturation point. Humans born as imbeciles are, almost all of them, souls born in the *Seventh Universe*, over-developed in mind, and they have brought that part into this *Twelfth Universe*; thus has the warring of the heart against the mind produced imbecility—no

fault of the child, but a debt to *GOD*. The people of this Seventh Universe could have developed the love for *GOD*, but they preferred intellect; they had free wills as you, freedom of working for *GOD* and loving Him. The Seventh Universe is still in existence and their debt to *GOD* is still being paid out. The ether of this Universe is coloured, it has an extraordinary shade, somewhat of the orange, but not pleasant; it began as golden, but, by the thoughts of the people it became a burnt orange; the perfume of the ether is closely akin to one of your antiseptics, it savours of the laboratory of science; most unpleasant. You will now understand all these Universes coming into being as a *GREAT PLAN OF GOD* in a vast period of time, that they were experiments of the *GOD-HEAD*—His Beloved Creation. He willed it, to see for *His Beloved Self* how the children of *His Heart and Breath* would react. Some of the experiments turned out to be glorious; man can deflect the *Pure Purpose of His GOD* by his actions in his freedom of will—this freedom lies within the *Great Law of Love*; man is not an automaton, this freedom is a gift from *GOD*, but man in his selfishness can, I say, deflect it, and has made a most *Glorious Pattern* into an entangled mass. You, who love your *GOD* and follow the *Little Silver Threads of His Silver Son*, keep for ever before you that great saying of The Master, “not my will, but Thine;” do not let your individuality become submerged, unless you submerge it in the *Preciousness of GOD* and then it is enwrapped in a Cloak, a *Beautiful Thing*. That is all I have to say to-night, my children. We shall meet again at the same hour on the Sunday to come. Farewell.

CHAPTER XI

THE EIGHTH UNIVERSE OF THE GREAT LABORATORY OF GOD

I am going to-day to describe THE EIGHTH UNIVERSE OF GOD. I want you to think of This Great Universe as the GREAT LABORATORY OF GOD HIMSELF. In this *Great Eighth Universe* one of the largest of the *Twelve Universes of GOD's Creation*—He, and none other experimented with all the Cosmic Essences; the handling of this *Great Power* none other in the whole Creation possesses. In this Universe, not only one of the largest but one of the greatest, 1,000,000 (one million) of the planets were inhabited and there were actually 3,000,000 uninhabited; that will give you an idea of the width of this Universe. GOD, that GREAT AND ADORED ONE, experimented with the inversion and the refraction of the Light Rays as they poured in superabundance upon this Universe. He experimented with a portion of a Cosmic Ray on some particular Planet—not all, and He found out the effects of the Infra-Red, Violet and other lesser rays including the Ultra-Red which man knows naught of. Some of these are familiar to you and that is why I particularly mention them that you may understand. There was one Group of Planets placed by the DIVINE GOD under the *Bhamah Ray—the Yellow Ray of Sight*—of *super influx*, and the result of the concentration of this Ray was most extraordinary; the eyes of the inhabitants of this particular Group of Planets became affected—the eyes which had hitherto been blue, brown and grey as yours—all turned to scarlet, the beings grew in stature and all became endowed with one of the greatest gifts—the vision of spirit or, as you call it, clairvoyance; I prefer to call it “spirit vision.” Another Group of Planets were placed in the concentrated influx of the *Motsumh Ray of Magnetism, Heat and Electricity*, and the result of this experiment was almost chaos. These things showed to the DIVINE GOD—if He did not already know it—that should man ever be placed in the direct beam of these *Great Cosmic Ray Forces*, man could not be held responsible for his behaviour; he would not be an imbecile, but he would not have control over his body. It was discovered that, with the outpouring of this *Motsumh Ray*, humans could no longer stay on the solid earth, that the human body levitated and oscillated, in an extraordinary fashion, consequently the *Great Motsumh Ray* in its concentrated form was reduced in the *Eighth Universe*, and God Himself regulated the outpouring of this to man. An another Great Figure came into this Universe, to be so close to His Father, being, as He is, so much a part of His Father—*Jesias—The Beloved*; He came to soothe the people of this Eighth Universe, He, the Great Silver Son, the Ambassador of

GOD, came to these people to give them support, *for THEY WENT THROUGH CATACLYSMS OF EVERY TYPE FOR GOD.* I want you, my children, to think of GOD, if one dare word it so, so Compounded as to be the *VERY FOUNTAIN HEAD OF ALL THESE GREAT COSMIC FORCES*—pouring them out on His beloved people; they had to contend with it, and they bore these experiments with great fortitude—in Love, and yet, one could say it upset the equilibrium of the planets. Only one planet of this Universe was placed in the concentrated Essence of the *GREATEST OF ALL RAYS*—the *Atruhm Ray*, and *what happened was not destruction of the planet, but it ceased to revolve, and then dropped into space.* It was thus that GOD saw demonstrated the immense power of this *Atruhm Ray*; and the *Motsumh Ray*—the ray of *Aahnahtah*, drew the Planet back again into its appointed place in the ether, and by the withdrawal of the concentrated *Atruhm Ray*, the Planet gained its equilibrium and began to work again. If a human came into the direct beam of the *Atruhm Ray*, which is from the very Heart of GOD, that human would be decimated, and that is the reason why GOD made these experiments for *Himself*, and therefore He knew, as none other, what each of the planets in *His Twelve Universes* could stand through these experiments and discoveries. When a Person is compounded of *THE VERY LIFE FORCES OF THE WHOLE OF CREATION*, it is necessary that *THAT PERSON* should discover how the planets and the people living on them react. At this period there was a *Thirteenth Cosmic Ray* of which you have not heard before; it was the *Cosmic Ray* of *Samanah* before his fall. In the *Eighth Universe* however, this *Lesser Cosmic Ray* was in use as the *Ray of Sound*, and it has recently been decreed by God that it shall be put into use again, May 10, 1941. Try to concentrate on the vastness of this Universe, then hear the echo of the sound in this *GREAT LABORATORY OF GOD*, calling to all the planets in the Universe. The *Eighth Universe* was full of noise, it would give one the idea of a huge workshop, an extraordinary place, and it is here that the remaining Sons of GOD of the *Lesser Hierarchy* came into being. I will speak of these to you later. Thus, this *Eighth Universe* came into existence through the *VERY GOD HIMSELF, HE, THE ADORED ONE* came from *HIS HOLY OF HOLIES* to do this work; no man saw Him, but they knew of Him, the peoples of this Universe were aware of *THAT GREAT PRESENCE*, and they were willing to go through whatever trials He gave them, *through sheer love of Him*; this great race were very spiritual and very beautiful in figure and face. Not one but was in touch with spirit. *You of Earth as well as many others of the Twelfth Universe, except in a few isolated men and women, have lost the gift of keeping in close touch with spirit, of seeing spirit; you are as an island in the Cosmos,—detached and lonely.* Imagine a whole planetary

system where all this "deadness" is done away with, where everyone listened to the Voice of Spirit; *the constant living in the Light, Love and Guidance of GOD*. I spoke of one of the Experiments of GOD, the inversion of the Light Rays; three of the planets in this Universe submitted most willingly to *live in darkness for a period of time*, and darkness came; but these souls understood, and looked upon it as a great privilege to partake in another experiment with their **ADORED GOD**, and other planets looked out on these experiments, they perceived a constant movement of these worlds in space, it was a familiar sight to them. Your Earth and others in your Universe appear static, except for the appearance of a "shooting" luminary now and again and the "twinkling" of another, but they have movement as your Earth has; but this movement is not apparent to other planets in your Universe, owing to your having fallen away from the Solar Planet, the **TWELFTH SOLAR PLANET OF THE TWELFTH UNIVERSE**, *the very source of Light and Movement*. If you were privileged to see (as the beings of the Eighth Universe) the signs and wonders in the heavens of their own Universe, the constant revolving planets, you would have an insight into the tremendous **WORKMANSHIP OF THE ADORED GOD**. To some of the planets of the Eighth Universe the Sun never shone, others were bathed in Sunlight, some had extreme heat others extreme cold, whilst many were temperate. All the peoples were quite happy because they were cognisant of the part they were playing in the Great Universes-to-be. They were aware that other planets from the **GREAT MIND OF GOD** were to profit by these experiments; *you, in the Twelfth Universe, are profiting by them and the love shown by these people to that GREAT ONE was intense*. The ether hung as an Amethyst Light, and a perfume of great beauty—akin to your lavender—permeated the whole Eighth Universe, a place of utter beauty, love and activity for *The Beloved GOD*. No son of God was placed in charge of this Planetary system by GOD, it was a Universe given over to things of a highly experimental nature, none but GOD Himself could be in charge, and that is why the races were beautiful and spiritual, men and women of exquisite form. Ugliness was unknown, it could not exist within the nearness of GOD. The planets of the clement conditions were clothed in a vegetation of a deep yellow colour, and the flowers which grew very tall were of intense beauty and perfume. There is one great difference between the floral life of the Eighth Universe and that of the Twelfth; in the Eighth they were all, without exception, white; there existed no coloured blossoms at all. The planetary system of the Eighth Universe was in close touch with the Solar Planes and very close to GOD, therefore life was almost perfect. May you feel the warmth of *That Great Hand of GOD*.

THE TENTH UNIVERSE OF THEOLOGY

CHAPTER XIII

I propose to-day for a few moments to give you a very brief account of THE TENTH UNIVERSE OF GOD. This Universe is not so great and not so large as some of the others. There were precisely 863 *planets inhabited out of the one million planets* created by GOD, and there are still 84 *planets inhabited*. The lives of the peoples of this Universe are devoted to the STUDY OF THEOLOGY, or one might term it the ‘*Science of the Study of Comparative Religions in the Universes of God*,’ of the revelation and recognition of the religions of other Universes, knowledge of which is brought to them *by spirit*. Even in the Twelfth Universe there are thousands of different forms of religions; think of those in your own small planet. How much greater the study for those living in the *Tenth Universe*, where they studied the many thousands of religions from other Universes which would take an eternity, but the *main* interest of the people of the Tenth Universe is in the knowledge of the religions *of their own particular Universe*—the seeking to unfold the Greatness of GOD through Theology. Some humans will see *Him* in a flower, others as a formless mass—a chemical mass, others as a *Divine Figure*. GOD has Form, and He made you in *His Own Beloved Outline*. GOD IS A PERSON, A VERY REAL PERSON. Can you imagine a Universe, as this Tenth, existing for millions of years—along the same lines of thought? GOD knew of this Science—for it is a Science, my children. Most of the religions are man-made. In this Tenth Universe they have great Theological Colleges, and the lives of the people are very largely lived—particularly in Ten of the planets—in a life of prayer—in a life spent in silence—for days at a time in retreat. That which would strike you would be the silence which overhangs everything. This *Tenth Universe* is greatly loved by GOD, although the inhabitants could not claim to be in direct touch with GOD—as *some of the others can*; those of the Tenth Universe were seeking to find GOD through intellect. Some others of the planets in this same Universe were given over entirely to the intellect—without the heart: and by so doing they did a great service to GOD, revealing to that DIVINE MAN that intellect, *when it is not coupled with the heart, is a cold, hard thing*. Of the people—they are men and women like yourselves and of about the same stature. Their method of procreation of children is not the same as yours, conception being more of a scientific experiment. The chemists and scientists of this Universe had devised a substance made in tablet form, which is swallowed by the woman, thus causing conception, and the

child is born from between the ribs on the heart side of the body. There was no love, they did not know of love as you know it between one another, but there was a very great friendship. The children—to the parents—were of secondary importance; the work of study must go on. They are very fine agriculturalists and many of the inhabitants of the Tenth Universe came from VENUS, where they are, as I have mentioned before, a highly agricultural race, in fact the greatest in the *Universes of GOD*. You can see Venus situated in the Twelfth Universe, but, Venus existed long before the Twelfth Universe, as did many others; they left the Twelfth Universe guided by the HAND OF GOD, to help the men and women of the Tenth Universe. The ether is similar to yours, it is nearly colourless, but not quite; it is of pale blue colour, almost invisible, but it is there; you can see it as you walk through it. I want you to think of this Tenth Universe as the birth-place of the Science of Theology, brought to such a pitch—a *man-made Theology*. You know, my children, you cannot find *GOD* in *Theology*; it has the appearance of a dissecting table—to see what *GOD* is made of, to see His reaction and His Movements. Yet, Theology had to come, it brought to mankind deeper thoughts about the MIND OF GOD. This then, was a period to worship *GOD* in a different way. Thus was Theology born. I shall be with you again on Wednesday of this week. May GOD ALMIGHTY be with you.

CHAPTER XIV

THE ELEVENTH UNIVERSE OF MECHANISM

There is a book in your Bible which goes by the name of Ecclesiastes; I want you to look up these words which will be found in the first chapter: "*And there is no new thing under the sun.*" I want you to remember those words now that I am about to speak to you to-day of THE ELEVENTH UNIVERSE OF GOD. This great Universe—another of the largest—one might term the UNIVERSE OF MECHANISM. Every mechanical and electrical invention which you have, and are likely to have in your World, and many other inventions that you have never heard of, *first came from the Eleventh Universe; not one of your mechanical, electrical and scientific inventions are new at all.* In this *Eleventh Universe of GOD* there were 1,500,000 *planets*, and the peoples of every planet were mechanically minded, women as well as men. The knowledge of mechanics and the use of machinery was brought to a far greater pitch than yours is to-day, or ever likely to be, for as I have already told you *your Earth is now to return to God.* You have machines that fly, so did they. They invented machines to till the land, ships and land vehicles all drawn by mechanism; in fact, mechanism was brought to such a pitch that men ceased to walk, they travelled from place to place by a machine fixed to the foot, something in design which approached your skates; that is the nearest to it that you have ever reached. The inhabitants were *GOD* *fearers*, and when I say that I mean it; for it was in this Universe that the *Creed of the Jews was born—the Creed of Jehovah* which they have adopted. It was called "*the Creed of the GOD of Wrath*" in the Eleventh Universe, and this idea of a wrathful punishing *GOD*, made them live upright lives—*through fear.* *GOD DOES NOT WANT HIS CHILDREN TO HOLD TO THAT BELIEF*; but in this mechanical Universe there was little love for *GOD*; they had no love for one another; their law was a strict rectitude for the man-made laws, *much as it is in some phases of your life to-day*; in fact, it was brought to such a state that the *Great Law of Love* was a strange Law to them. There was very little beauty in the lives of the people, although there is a certain beauty to be found in metals—in the colour and atomic structure of metals—if nothing else. Out of the 1,500,000 planets originally placed by *GOD* in this Eleventh Universe, *ONLY TWO INHABITED PLANETS ARE LEFT.* The lives of this race of people, women as well as men, were spent in laboratories; they were people with so-called "*advanced*" ideas of thought; invention was looked upon as a great Science, thus, they were all bent on inventing things. I, Mikaal, have listened to

people on Earth say, "Dear me, such and such an idea is a thousand years before its time." And then one thinks of the Eleventh Universe, and one sees creeping throughout your planet, and others, the inventions of thousands of millions of years ago; one smiles pityingly, and then one knows that the *gift of looking back into these past ages has not been given to you of Earth*. I have already told you in my book *The Winds of Truth* that the Lhamanhans, or, as that race of people are sometimes known to you, the Atlanteans, which existed on your planet about 4,000,000 years ago, flew in heavier than air machines; I also said that "mechanism has ruined your Planet," and that "if it were not for engineering there would be no war." It was in the Eleventh Universe that war first made its appearance. There was one great difference in the application of the power mechanism used by the people of the Eleventh Universe and your own—yours are mostly man controlled, theirs were not, *all* were controlled by a scheme of wireless waves, the human element did not come into it at all except in the design of the mechanism. Warfare was long and bitter, *at least 863 planets in this Universe were almost decimated by war*, and the repercussions of these happenings are felt in your Universe—the Twelfth, because wars in your Planet and others became the "tools" used by Samanah. The Eleventh Universe was not entirely without beauty—the women were of great physical beauty, they were tall and stately, similar to those who lived in the time of King Arthur. They stood six feet in height, and the men too; golden haired were they and beautiful, and yet, *all were stained with the mechanical mind, even the children could not escape from this*. Children were born of the breath. Try to imagine this huge Eleventh Universe as a seething mass of machinery, you have seen a somewhat similar sight portrayed on your cinematograph, such scenes faintly depict a corner of a planet in this mechanically minded Universe, great hives of industry; the clanging of metal, the whirring of the machinery in numerous machine shops covering underground areas, can you imagine the noise which passed out into "space," the whole earth reverberating with the vibration of mechanism, countless planets as seething workshops? And for what profit? Another invention was the submarine which they perfected, but not as yours; these were great liners which travelled beneath the seas, no ships sailed on the water. All metals, all mechanisms do not like the Light of day. Railways, workshops, laboratories, stores and the dwelling houses of the people, all were beneath the ground level, the only sign of human life on the surface were those compelled to till the land for food produce, and child-life, whilst their parents were buried out of sight. An extraordinary age, a horrible age; yet, it came.

GOD, *The Adored One*, permitted it. You must always remember, my children, when thinking and speaking of these truths that I give you, that God placed the *great gift of free-will within the reach of all His children*, He would not say "*DO NOT*," but He did say "*choose between the man-made engine or Myself*." And so the lust of power came to this Eleventh Universe, *which man himself chose*; machines instead of GOD. Your little Earth is perilously near to this condition. This age marched on until at least half the planets destroyed themselves by mechanism. The danger of a mechanised age is that the *machine becomes the master of the man*. Metallurgy was never meant by God for man to use for war. NEITHER WILL HE HAVE YOU AS ROBOTS. I could tell you a great deal, much of which is bestial in its nature, but I shall tell you no more. You men and women of Earth, who are inclined to admire machinery, *think of That GREAT GOD*. This World of yours will go back to hand-made work, woven with hands of love—love woven into the threads. Your land will be evenly divided; there is enough, more than enough to support the needs of all, it will be divided into small holdings for man's own working; instead of acres lying idle, belonging to one man, it will be shared and the hand of man will cultivate it without the aid of machinery, he will do his own ploughing. The Universes of GOD are treading backwards, the Twelfth going back into the Eleventh, the Eleventh to the Tenth Universe, and so on, right back to GOD. All planets passing back into the very Core of the Twelve Universes, the Holy of Holies. That is what we mean when we say "you are going back to GOD." The last Universe to be made is the Twelfth. His Sweet Peace be yours. I shall speak on the Twelfth Universe of God next Sabbath.

CHAPTER XV

THE TWELFTH UNIVERSE—THE LAST

To-day we come to the last of the *Universes of GOD*—THE TWELFTH—the culminating point of the UNIVERSAL CREATION OF THE ADORED GODHEAD. This *Twelfth Universe* is one with which you are more or less familiar, because your tiny Planet of Earth is supported in the Twelfth Universal ether. This Universe has within it a curious admixture of all the Universes of that *Beloved GOD*; from the Eleventh right back to the Second Universe. The planets in this *Twelfth Universe* hold races of mankind who had their beginnings in the others. The Mechanical Universe—the Eleventh has, for instance, left its mark in the Twelfth, because, not only is your Earth mechanically minded but there are 500 others where the lives of the people are very largely influenced by mechanism; many of them much further “advanced” than your own. I have spoken of the Universe of Women, the Universe of Men, that of Theology, the Universe of Medical Services and the Universe of the Little People, and others, and now *The Twelfth, which is the last*, in the great comprehensive scheme of the *Great and Adored Father-Mother*—and, one might say, that this is the last of all the great Experiments of GOD. For that alone is this Universe great and it holds much beauty, the Peak of that beauty being YANINI; there were others, such as Simaha. This Twelfth Universe holds others, as Grasahlah, a Planet which has sunk to degrading depths, the dreadful bestiality of which has brought tears to the *Eyes of GOD*. It has also held planets whose people had types of government ranging from one-man dictators upwards, you will notice that I say “upwards.” The Twelfth Universe is the greatest in size and has within its keeping the largest number of planets—and all, all, my children, have come from the *Breath of GOD*. This Universe is the only one whose ether is without colour, the ether is invisible and the cause of this is easy to understand. Try to think of the admixture of mankind, all in various degrees of progress, the vibrations of whom become muddled, that there is no stability in the Twelfth Universal vibration at all. STABILITY OF CHARACTER REGISTERS VIBRATION IN COLOUR; each one of you have auras of different shades of colour. *All must be smooth and peaceful to register the highest colours*, and the Twelfth Universe is not. I have dealt with colour in my book *The Winds of Truth* and it is one of the greatest of all subjects to study. It came to my notice that a misunderstanding arose as to sin being first born in the Twelfth Universe 38,000,000 years ago

when I wrote on the *Thirteenth Ray of Colodhon, the Black Ray of Samanah : when there had already been war (which you look upon as sin) in the Eleventh Universe, millions of years before the Twelfth Universe came into being. I will explain. In the first place, you must remember that sin has vibration; and sin vibrated singly in the Third Universe. Samanah, as I have already told you, saw this, it left its mark on his soul and a degree of horror with that memory which he was never able to throw off; so the seed of sin was sown in the mind and heart of Samanah. Then came the Eleventh Universe with war. There is a saying in your world “ *Coming events cast their shadows before them* ” and it was in that Twelfth Universe 38,000,000 million years ago that Samanah sinned, but the seed was already sown in the Third Universe; one might say that the rumbling of the storm-to-come was heard in the Eleventh Universe. This Eleventh Universe manifested only a degree of sin; sin, there, was a *personal* matter, and it was not until the Twelfth Universe that sin became a *Universal thing*, when it truly raised its ugly head. The sin of the Eleventh Universe was nothing to do with Samanah. It was the first glimpse of sin by Samanah, a great son of GOD, when sin had its birth; *The Eleventh Universe was devoid of love, they lived mechanical lives*; and that was the first open door which Samanah used, hinged by jealousy, the foundation of your errors of Earth. My children, JEALOUSY IS AT THE BOTTOM OF ALL SIN, its poisonous fruits are greed, envy, poverty, ignorance, fear and many others. This Twelfth Universe is, in many respects, a thing of beauty; your own Planet is covered with the *Beautiful Mind of GOD* in nature growth, and the night skies show His Handiwork; yet, ugliness has left its stain. Man himself can choose between good or evil. You have touched the fringe of the Eleventh Universe, and now you are compelled by the Pendulum of Time to pass through the Eleventh, because all must travel *back to GOD*. The revealing of these Great Truths usher in the *Great Silver Age of GOD*—the incoming New Age. You of Earth have touched mine, the Twelfth Universe, and now the planets of this one must gather themselves together to go back to GOD; the Twelfth into the Eleventh, the Eleventh into the Tenth, right back to PERFECTION. Look at the explanatory diagram of the Twelve Universes of GOD, you will see the outer circle of GOD’S Great Creation, then comes the Eleventh and so on. In *The Winds of Truth* I once spoke of “ *The Outer GOD-HEAD*,” this is the First Universe which surrounds the HOLY OF HOLIES OF THE BELOVED GOD—The Universe of Jesias and my most unworthy self; I mention this because I have heard many people

*Now the Fourteenth Ray of Samanah.

question it. That is the answer. There is little else that I wish to say on the Twelfth Universe. I have spoken very briefly on some of the planets which may be given for your reading one day. The Twelfth Universe is the most thickly populated—the most numerous in the “Lights in the sky,” it holds *Twelve Suns—the Solar Planets*, details of one of them—my own—have already been published in “THE TWELVE SOLAR PLANES OF THE TWELFTH SOLAR PLANET.” Twelve is a *Great Sacred number of GOD*. It is a privilege to be in this Twelfth Universe, to be amongst the tiny humans dwelling in the last Creation from *The Great Hands of GOD*. You know, my beloved children, there comes a time when even *That Beloved GOD* must rest; He has been creating ever since the beginning of Time, and the Twelfth Universe is the last from that *Great Mind*. So yours is the first to go back to Him, that is why it is a great privilege for you to be here. You of Yanini who lived on this Planet 6,500,000 years ago—in a state of utter perfection of human life, you go back to the state of Yanini, and thank *GOD* for it. *GOD* bless you all.
