CHAPTER I

There has been the need for a book of this kind for some time. The world of humanity has been aroused by reports of what they at first called flying saucers, because in the sky the light struck them in such a way that they appeared to be round, like a saucer, and they were moving so fast a good view could not be had of them. More recently it has been seen that some of them are quite large and long in shape, like a ship, not round like a saucer.

But still they are mysterious objects to the inhabitants of the planet Earth, and there has been both fear and scientific interest expressed in regard to them. The answer to all questions

is very simple, especially now that mankind has developed flying ships of their own. These are air ships from other planets. But the question has remained, why are they coming over the earth, are their designs sinister, or are they friendly? For a long time there was only fear expressed, because the people of Earth had become so accustomed to wars between nations, that war was the first thought in their minds. How sad this is, and entirely contrary to the truth.

Some of us have managed to contact certain members of the human race, who were of high intelligence, and whose minds were eager to know the truth and the reason for these ships of the air descending so close to the planet Earth. Some of our Space Craft have landed, and we have managed to talk with some of the more spiritually evolved members of the human race, but the vast majority of men are still worried when they hear of these ships.

RELATIONSHIP WITH THE EARTH

It is the hope of the writer of this book, that all fear may be overcome by a presentation of the true situation by one who really knows at first hand, being a traveler in space ships, as well as an aerial traveler without any kind of vehicle but his own body. I am that kind of Being, and am the Ruler of a Planet near the earth. Every planet has a Ruler, and the name that is used for the Ruler may shock some of the devoutly religious of Earth, who do not understand. We are called Gods, and there is one for each planet.

The human race has believed for eons of time that their planet was the only one inhabited. When men looked up into the sky and saw the shining stars, the moon, and sun, they thought that all these beautiful objects were created for the benefit of the people of earth, and were comparatively small objects, as they seemed to be, to the naked eye of man. Even now when marvelous telescopes have been invented, man

knows very little about the planets which appear in his telescope.

So before we enter into the subject of space ships, it is necessary to discuss planets. Space ships are used for travel between the planets, so now we shall study the planets—only those of the solar system in which the earth is a planet. Each planet is a small part of the solar system, and the solar system is only one of many solar systems, which all together make the universe. The universe is only one of many universes, which all together are beyond the imagining of the mind of man.

Close your eyes, relax, and try to imagine anything extending in all directions without any ending. This is the universe of universes. How small and insignificant is a solar system in comparison, and how extremely small is one planet of a solar system. What we are now concerning ourselves with, is the planet Earth and its sister planets.

RELATIONSHIP WITH THE EARTH

All the planets are globes, as is the earth, but the globes vary greatly in size. There are many which are very much larger than the little planet Earth. Mars, Jupiter, Venus, to mention a few. Astronomers, at the present time, are learning much about the planets that they never knew before, but it is still comparatively little. The distances between the planets is not very great, and can be easily traveled by space ships, which are very much more advanced inventions than the airplanes of the earth. They are noiseless, and their power is derived from the atmosphere, and is pure and without odor.

For centuries man has believed his Earth to be the only inhabited planet. Certain conditions of warmth, moisture, soil, etc., were considered necessary for the life of any being resembling man or animal. He has made two mistakes. In the first place, all living creatures do not need the same conditions that man does; in the second

place, man's scientific instruments do not accurately register the conditions that prevail on each planet.

The truth is, that almost every planet is inhabited by beings very similar to man. There also is vegetable and animal life. In fact, few of the planets are barren and uninhabitable.

Besides this, many of them have civilizations which far surpass that of any nation on the earth. It is known by your historians that there have been civilizations on earth that have fallen and disappeared. Archaeologists are now making discoveries which show that there were marvelously advanced civilizations on the earth, which for one reason or another were destroyed, and disappeared from the face of the earth. Their marvelous cities are being uncovered, and much is being learned about the lives of those ancient peoples.

Wonderful civilizations like these are now flourishing on many of the planets in this solar

RELATIONSHIP WITH THE EARTH

system. There are some more backward than the Earth, but they are few. The majority are equal to the Earth, or in advance of it. Man has begun to question, "Why should the Earth be the only inhabited planet?" The answer is, it is not.

Now man is endeavoring to obtain information concerning the planet Mars and the moon. There is much talk about the atmosphere of the moon, and the soil. Some scientists say the soil is only dry dust, which is blown about by the wind. Others contradict this and say it is rich and could be productive. All study is for the purpose of using the moon as a defense base from which to hurl bombs on the enemy. How sad this is! Instead of living together in peace, harmony and brotherly love, the human race, in all parts of the Earth, is either fighting with physical weapons, or competing with one another for the gaining of wealth and luxury. It is all fighting and war though of different kinds.

How different it is on the planets in the neighborhood of the Earth, those of whose inhabitants the Earth people are so much afraid. They judge only by themselves, and therefore believe the inhabitants of these planets to be warlike and greedy, as they are. So when occasionally a space ship is seen, it is assumed that its purpose is to harm the inhabitants of earth.

RELATIONSHIP WITH THE EARTH

CHAPTER II

This writing is for the purpose of dispelling this erroneous idea. We are reaching out the hand of friendship and man believes it is holding a bomb. Instead of this it is an offer of information and assistance in the building of space craft, for ours are far in advance of the noisy, clumsy, flying ships of the planet Earth. The few understanding ones of Earth would be pleased to have our cooperation and would pass our information to the others who are of a scientific turn of mind.

The first thing is to learn how to use the energy that is in the atmosphere. This runs our ships and is always available without cost. The

next thing is to learn to make the craft a somewhat different shape than the present airplanes. The present planes are beautiful as they fly high in the air looking like great dragon flies sailing with spread wings, but the shape of our ships is much more practical for the purpose for which they are used—flight.

But the very first thing to accomplish is to overcome man's suspicious attitude and win the trust and friendship of humanity.

This must be done by spiritual teaching, and the knowledge of our philosophy, which is more than philosophy to discuss and exercise the mind on, it is the breath of life to us and we practice and live it. I shall now explain this knowledge.

It is very much like the New Age teaching of the earth. This New Age teaching is Truth, but only a comparatively small number of the people study it, and not all of them practice it. We believe with all our hearts that there is a Mighty

RELATIONSHIP WITH THE EARTH

Power, invisible to all eyes, that is the cause of all life and the sustainer of it.

We do not give It the name of God, we call It Life Eternal. We feel Its Presence all around us, in us and acting through us. I am one of those we call Gods. We are very advanced in the art of living. We are able to perform miracles, as you call them. These are all natural phenomena. We who are Gods do not need space ships for our travels, we can move rapidly through space by the forces that are in our bodies. And we do not need to move in order to see, hear and know all that takes place everywhere.

Each planet has a God who has created the planet. It is so of the Earth. You people of Earth have a wonderful God who has created the planet Earth. He loves all His creation just as we all do. It has been said, God is Love and that is true of all Gods. All the planets near the earth have Gods of love and the in-

habitants of the planets in turn love their Gods with all their hearts, minds and strength.

It would be impossible for the people of these planets to deliberately injure any living being. They all live lives of love and joy, for true love is joy. No one who feels that love and joy could ever hurt another living thing. This is what we are trying to make man understand. If mankind would drop their destructive ways, they too would live lives of love and joy, without conflict of any kind. All would be peace and plenty.

Oh, if man would only understand and he shall understand after reading this book and others, which shall tell of the experiences of enlightened men, who have seen the space ships and talked with those who came to Earth in them. These illumined ones have had great trouble in making their fellow men believe their reports of their experiences. Man is notably reluctant to accept any new belief or idea, he

RELATIONSHIP WITH THE EARTH

clings tenaciously to his old established beliefs and practices.

But this shall soon change, for the pressure of Truth is becoming too great to be resisted. It is not very long now, as time is measured, before mankind will accept the fact that there are other inhabited planets, and the fact that the inhabitants of those planets near the Earth not only can visit the Earth, but are visiting the Earth. More persons will be seeing the space craft and, as the old human saying goes, "seeing is believing."

That has been the great trouble with humanity, they have put greater reliance on their physical eyes than on their mental understanding. It is well known that the report of the eyes cannot be accepted as it seems to be. A trite example is, the railroad tracks do not come closer together in the distance. Investigation and knowledge has proven that fact. Investigation and knowledge must be applied to every new

experience, no matter what it may be, whether pleasant and desirable or unpleasant. The truth should be searched for and when found accepted. Turning the back and looking away from a fact, will not change or remove it.

Enough persons have encountered space ships from other planets and talked with those in them to make it an established fact. Now the next thing to do is to investigate and find out what and who they are, and why they are visiting the planet Earth. This writing is a simple and frank presentation of the truth of the situation, but man must investigate with an open mind and find the truth of the matter for himself.

CHAPTER III

The question is, how to do that. It is simple to answer. Most of the ships have been appearing in the United States of America, for this is the country most able to follow directions in building these craft. It will require money and skilled scientists to build them. The method of drawing the power from the atmosphere is not difficult, but it requires scientific minds to understand it. There are plenty of such minds in this great country. But there are not so many minds that are without prejudice.

It is strange, but it is a fact, that brilliant and well educated scientists are among the slowest people to accept a new thought or idea. It is a

rule with them to accept no new concept until it has been proven. But how can it be proven, if it is shut out without investigation just because it is new? How strangely the minds of even the most intelligent men can act. It is said that Socrates went about with a lantern searching for an honest man. So we might search for an unprejudiced man. It is indeed rare to find any member of the human race, man, woman or child entirely without prejudice. However we do find some who will listen to reason, and who can be persuaded to finally accept new concepts. It is our hope that one scientist may be found, who is intelligent to a high degree and without strong prejudice. We have faith that this shall be.

Besides these two qualifications there is a third that is necessary; he must be able to receive instruction spiritually by telepathy. That is the way this writing is being done; some call it dictation in the mind. The communication

RELATIONSHIP WITH THE EARTH

between giver and receiver is very close. It is often so close that the one receiving believes he is thinking, and the words are his own. He has no knowledge that another mind from another dimension of life is speaking into his mind.

Man calls this inspiration. Musicians and painters are inspired in this way, by impressions received from higher dimensions, which are above the ordinary man's understanding. This communication is very easy between planets of this solar system. We feel sure that we shall find a scientist of this type whom we can inspire in the invention of a space ship similar to ours. It will be new to him, but it will not be really new.

All originates in the One Great Source, which is expressing everywhere, in everything. This Great Source is Life, and from It flows Life in every expression. We who are called Gods are expressions of Life, which flows from the One Great Source, and takes form.

I shall give myself as an example. I created this planet and breathed the breath of Life into all the inhabitants, whom I also formed. But the power and ability to do this were not mine, I received the power and knowledge from the One Great Source. This is what Jesus meant when he said, "Of myself I can do nothing, it is the Father within me who doeth the works."

That is the truth of all Life in one sentence. I say the same of myself, for acting in and through me is a higher Being, and above and in him is a higher Being than he, and so on back to the Great Source of all Life. All the planets, solar systems, and universes were created in this way. You who are reading this were created in this way. Nothing was created in any other way. Life originated in the One Great Source, which had no beginning, and shall have no end. We cannot imagine what It is like, it is beyond our imagination. We only know that It is, and that without It nothing would be.

RELATIONSHIP WITH THE EARTH

The space ships were created in this way, and in this way man can create them if he so desires. For desire is a necessary step in the creation of anything. Without desire nothing comes into existence. Strong, steady, unwavering desire is a must in all creation. It must be without doubt. There must be a sureness of accomplishment that nothing can shake.

That is the way man has evolved and unfolded. That is the way the lower forms of life have evolved. They do not reason, they do not think as man does, but within them is an unconscious desire for something more. They change from a lower form to a higher, more complex form, with a higher state of consciousness. By a strong desire man can accomplish anything, for it is not he who accomplishes, but the power of the Great Source of Life that is in him, and in all that is. Without Life nothing could take form and be active.

So we of the planets near the Earth offer

our assistance to the Earth, but without the desire and acceptance of man nothing can be accomplished. With desire there must be love for that which is desired. Love is the source of all creation. One must love ones work in order to be successful. All great scientists love their work. They will devote many hours, without rest or sleep, when they feel that something is being accomplished, or about to be brought to light. Those persons who work only for money are weary before the day is over.

So in order for us to give man the secret of our space craft, we must find at least one scientist of the highest caliber, who can receive that which we have to give. How joyfully we shall give instruction when it is desired. How much love we shall pour into the work along with our knowledge. Our space ships can be copied, or perhaps even improved upon. Who knows?

Intercourse between the Earth and the other

RELATIONSHIP WITH THE EARTH

planets is the result which will follow the construction of these ships of the air. From visits to the other planets man will see how life can be lived in brotherly love, and what joy, peace and plenty, both spiritual and physical, will result when love rules instead of force.

CHAPTER IV

Oh beloved ones of the Earth, our hearts ache when we see the misery, poverty, and greed upon the Earth. All is force and struggle. With us all is peace and harmony. It is our strong desire to see the people of Earth living also in love, with plenty of material gifts for all, nature responding to the love that will fill the atmosphere. Our love we send to you, our help we offer to you, we pray it be accepted. If man could only see our beautiful planets and realize that the same beauty, joy and peace could be his on the planet Earth, he would surely make every effort to attain this wonderful joy and peace.

RELATIONSHIP WITH THE EARTH

It is the peace of God which passeth understanding. It is in the center of every living being, ready to come forth into the outer life. This it cannot do in the midst of hatred and selfishness. In divine love there is the peace which will revolutionize the world of man. It may seem that I repeat this too often, but repetition is necessary in order to anchor the point in the minds of mankind.

Now you have been told what to do and what not to do, the next thing is how to do it. It has been said, and rightly, that one cannot love to order, love is spontaneous. Yes, but it can be brought forth by acting in the way love calls for. Do unto others as you would have them do to you. This does not mean for the purpose of having them do the same to you. No, it is simply a gauge for action, and when this is practiced love will follow. Be honest in all your dealings, give a little more rather than a little less. This old motto means exactly what

it states, here is no return promised. But there is a return after practicing this for some time; love will be felt for the ones one has dealings with, and they, subconsciously will feel that love and return it.

This is the recipe for peace on earth, goodwill toward men. You upon the earth have just celebrated the birth of your beloved Master Jesus who loves all mankind with a love that transcends all darkness, and brings the light into all hearts and minds that will open to receive it. During the time of Christmas much love flows forth from the hearts of mankind. The giving and receiving of presents is done in love and peace and little children are especially recipients of this love and joy.

Oh, if this blessed time could be always, what a different place the Earth would be. Peace would replace battle, love would replace selfish greed. This is what the other planets wish to help the Earth people to attain and keep. There

RELATIONSHIP WITH THE EARTH

is some love now, and the problem is to expand it, to make it flow out in all directions with depth and sincerity.

CHAPTER V

We believe that visits to her sister planets; tours of inspection; conversations with the inhabitants; visits of a week or more in order to make friends; would open the eyes, hearts and minds of the inhabitants of Earth so that they would desire to follow our example.

Desire is the first step in any accomplishment. A strong, eager desire will be followed by an effort to learn how to attain that which is desired. This will be followed by action. With love in the heart for the Great Source of all Life, Love and Peace from which all blessings flow, humanity will become one with the similar beings on the other planets in this solar system.

RELATIONSHIP WITH THE EARTH

There are many more solar systems, but love begins at home and from there goes out to other systems beyond us. As I have said before, much depends upon your scientists. Most of you will be astonished to hear that already there are scientists on the earth who are receiving instruction from our planet — the one on which I dwell. They do not yet know that what comes to them as inspiration is coming from scientists of another planet.

Some of the more spiritually minded ones realize that they are in communication with a higher source, but they do not know that the source is another planet. They will be informed of this soon now, for everything on the earth is being speeded up. The spiritual atmosphere is being purified and the light is beginning to drive out the darkness. There will soon be a great upheaval all over the planet Earth. This is unavoidable.

In order to let the good come in the evil must

be driven out, the two cannot exist together. Selfishness must disappear and love can then enter in. But, and this seems strange and contradictory, the cleansing must be done with love. The vigorous action hurts and destroys, but the vigorous action of cleansing comes from pure, divine love. This is beginning on the earth now and will continue for some time, growing stronger and more painful.

The dwellers on my planet are not taking any part in the cleansing, that is, as you might say "none of our business." Our work is to help in the reconstruction that will follow the cleansing, and as has been already stated, we are now inspiring, helping, and informing those spiritually able to receive our communications.

This book is one of our means of communication. It is intended to reach many thousands of people, who are ready to receive information if it is simply and clearly stated, and above all,

RELATIONSHIP WITH THE EARTH

honest. This book is all of that and we know that it will receive a hearty welcome.

My love and blessing is in every word; the love and blessing of the one who writes is in every word; and the love and blessing of all my people is in every word; for they know that this is being written. Those who read it will feel that love, even though it may be unconsciously, and it will give them understanding, and warm their hearts. This is not boasting, it is a calm statement of fact. Other little booklets which have been dictated by members of The Great White Brotherhood through this instrument, have received a very hearty welcome, and we have no reason to believe that this will be any different.

So, as you read, you are receiving benefit both mentally and physically, for my vibrations are flowing from the atmosphere around this book all through your being. The publishers and

the printer also have received these vibrations, and have added to them their own, which are high. This is true of all spiritual books, but few persons know this.

What marvelous times are coming after the cleansing period is over on your dear planet Earth. After the cleansing period, which will be a time of great suffering and anguish, the skies will clear, the Sun of Righteousness will shine over all the Earth and the Great God of Earth will reign supreme. Every human being will feel the Life and Love from the Great Source of Being active within his human form. The Christ Self will speak and act in everyone.

But since man has been given free will up to a certain point, the time of the coming of this release from misery and entrance into pure joy depends on man himself. His mind must be cleared of misconceptions and his heart must be filled with love. We of the planets near the

RELATIONSHIP WITH THE EARTH

Earth can help him to replace the misconceptions with Truth, and that will bring love into his heart.

CHAPTER VI

The first step to take is to let all the inhabitants of Earth know who we are and why we are visiting the Earth in our space ships. Some already know this and are heart and soul desirous of receiving us and hearing what we have to tell them. This is a focal point from which the knowledge will spread in all directions. It is already spreading. Groups of people on the Earth have come together for the sole purpose of making contact with our ships and receiving the message of those on them. This has been accomplished by means of tape recorders. Before this there were instances of ships landing on the Earth and communication being made

RELATIONSHIP WITH THE EARTH

with individuals who were open minded and eager to receive them. Books were written and something was accomplished in arousing interest, but it did not spread far enough or fast enough. Something more had to be done and now is being done.

We have been able to go close to the Earth and our messages are received on tape recorders. These tapes can be mailed to great distances; other tapes can be made from them and sent out in other directions, and so the information is really spreading.

Now the doubters have raised a question that is a very reasonable one. How can those from other planets speak the language of the people they contact, without foreign accent, as easily and smoothly as a native. Surely they do not all speak English on the other planets. These tapes must be made by words spoken by dishonest individuals on the earth.

This is a reasonable question and the answer

is simple. We on the other planets do not have to learn a new language word for word as you do on Earth. Even you Earth people have some persons who have what are called photographic memories. They remember what they have read, a whole page at a time, not by hearing but by sight. When they return home from a sightseeing trip of weeks duration they remember it all as pictures in their mind, unfolding one after another in sequence. Musicians remember the printed notes and the sounds of whole symphonies; singers remember both words and music. Your babies do not come into the world talking, they learn by listening to the adults and older children around them.

Now you understand how we are able to speak your languages without difficulty. We come close enough so that we can hear you talk. We are often invisible to your human eyes, and we can hear and see you. It is necessary, in order to communicate with you, that we should be

RELATIONSHIP WITH THE EARTH

able to speak your language. So, to meet the necessity, we learn your language. It is easy for us for we have what you would call phenomenal memories. We never forget anything that we wish to remember.

You people of earth can learn to do all of these things for already some of you can do them. But the one great and important thing that we want you to do is to learn to send out impersonal Divine love. On the planets near the Earth we do that and it has become second nature to us. Instead of using force to accomplish our desires we send out love, which is the greatest power in the universe. When we desire to build a city, for instance, all those engaged in the project, before they begin, send thoughts of pure love to one another and keep those thoughts sustained throughout the whole time of planning and construction. This causes everything to move so smoothly that it seems as if the city almost builds itself.

If there is disagreement it is settled by quiet, reasonable discussion and soon the best plan is followed. This is only an example of the power of love. In quarreling and trying to force your opponents to adopt your way, confusion exists and much time and effort is taken to accomplish that which should be easily done.

Life is Love, Love is Life, and Life and God are one and the same. Life is everywhere, in everything, for it is existence. In the depths of creation Love reigns supreme, though on the surface it may seem to be lacking. The reader may think that we have left the subject of space ships, but this is still on the subject. That is the way our space ships are built—with love. The ideas for the invention of these very successful “birds of the air,” as we lovingly call them, all came to us in love, never in bickering or dislike of any one. All great inventors have loved their inventions and those for whom the inventions were made.

RELATIONSHIP WITH THE EARTH

Love is the explanation of our visits to the planet Earth. That is the only reason for our coming. We can see the terrible turmoil and confusion on the Earth caused by man's mistaken idea that force rules and overcomes all that is wrong. This is far from the truth, for force itself is entirely wrong. Nothing lasting has ever been accomplished by force. We have learned that by thinking and reasoning, for we are reasonable beings. Man is supposed to be a reasonable being but the fact is that he is not. He is governed by his emotions almost entirely. Emotions cause prejudice and prejudices cause emotions. Of course there are good emotions, and love is one of these and the most powerful. But in order to be powerful it must be pure, Divine love not the possessive emotion that is sometimes, in fact often, called love.

The love that I am speaking of is entirely unselfish. It is the pure Love of God which will flow through any human heart if it is open and

CHAPTER VII

unobstructed by wrong mental images. You may not think that we are human, but we are very like you, we have minds to think and hearts to love, and we use them to good purpose.

You have minds and hearts but it seems to us who watch you that you do not use either. You must learn to use both mind and heart if you wish to untangle the mess that you are in. We love you as we love every living being, and again I say we are ready to help you in any way we can. The first way would probably be to teach you to build really good space ships. Yours are noisy and they polute the air with harmful smokes and gases. We fly without noise or smoke.

RELATIONSHIP WITH THE EARTH

After you have built some like ours you will be able easily to visit our planets as well as the moon. But not for purposes of war, but as friendly visitors desiring to understand the lives of their neighbors. The time is past when the little earth was seemingly a large globe, and travel from one place to another was on foot or horseback or in horse drawn vehicles. Now distances are short on the surface of the Earth and also short between the Earth and other planets. Perhaps I have repeated this too often, but I hope to make it sink into the minds and hearts of those who read. Then they will spread the truth among their friends and acquaintances with good results. Education is what is needed at this time.

Education is the purpose of this little book. There is not much to say but what is said is right to the point and means a great deal. After this assurance of our friendship you who dwell on the Earth will have no fear when we visit

your planet, and since we speak your language fluently we will be able to plan together how to educate the mass of people on Earth so that they may desire peaceful living without conflict of any kind, either physical or mental.

This little book is easy to read and is only an opening wedge, so to speak. It is a forerunner of more erudite ones to follow. Those which follow will be books of science and will be concerned with the building and operating of space craft. The dictation of these will be from scientists to scientists.

With these words I bid you farewell. My love and blessing is with you in all your endeavors. My name would mean nothing to you, but those who are sensitive will feel my love and blessing.
