PLANET MERCURY SENDS GREETINGS

This is the second in a series of writings concerning the space ships of the planets in the solar system of which the Earth is part. I shall give you my name and the name of the planet that I rule, It is one and the same, Mercury. It is not a strange name to mankind, for centuries ago it was known to man as the name of One who was called the messenger of the Gods. He wore a cap, on each side of which were wings, and on his feet were wings, while in his hand he carried a staff around which a serpent was wound.

He moved very swiftly through the air carrying messages from one God to another in the solar system. The earth people of that day knew nothing of solar systems. They thought that the earth was flat and the stars, moon, and sun

PLANET MERCURY SENDS GREETINGS

moved above it; but they did have some information concerning the Gods and Goddesses above the earth, although much of their belief was erroneous.

At the present time on Earth, man is also mistaken concerning the other planets about the Earth. To him they have been uninhabited, and the stories told about the Gods and Goddesses have been only fables, charming and beautiful subjects for the pictures of great artists, or for statues and beautiful poems. They were not believed to be fact—real, living beings.

I can assure you that they are real, living Beings, and always have been such. The Earth is only a small planet in a system of planets which is called the Solar System. It is one Solar System among many in the Universe and the Universe is one Universe among many Universes. I, who speak to you, am the God or Ruler of the planet Mercury, which has my name. It is a small planet very close to the earth. You may be disappointed to know that I do

PLANET MERCURY SENDS GREETINGS

not have wings on my cap or on my heels, nor do I carry the caduceus. I do not need these to fly with. I can fly through space without the assistance of any wings or mechanical aid. I do, however, at times use a space craft in order to have with me others from my planet. It is the same as people on Earth traveling together.

The space craft that we use are not all alike, there are a number of shapes and sizes. The first that modern men saw with the sun shining on them, looked round and concave, so they called them flying saucers. They were not exactly the shape they appeared to be as they moved swiftly over the Earth. Later, others were seen which were long and "cigar shaped." These long ones were seen to land on the earth and discharge smaller ships of a different shape. Some were round and some the shape of a mushroom.

It has been said—and truly—that hundreds of space ships flew over Washington, D.C. at

PLANET MERCURY SENDS GREETINGS

one time. Many people saw them, but the government has always suppressed the news of the appearance of these craft. More and more individuals have been seeing them, usually over open space, plains, and flat prairies, though occasionally over the mountains, or even over, and close to, a city street. The visits of these craft are no secret, try though the government may to make it so.

There is also a plan which no inhabitant of Earth can stop—and it is for the benefit of the inhabitants of Earth—and that is for a series of writings such as this. One little book from each planet. This is the second one, and one by one the others shall follow. This one shall deal with Mercury.

Our planet is small, but it is throbbing with life and activity. The climate is mild and beautiful. The air is pure and clean for there are no poisonous sprays used, there are no fumes given off from our vehicles, in which the people travel from place to place on the planet, or from the

PLANET MERCURY SENDS GREETINGS

great space ships which carry us from planet to planet.

This can no longer be said of our sister planet, the Earth. Not so very long ago the air of the Earth was as pure as ours, but alas, it is now dense with fumes which are called smog. But the readers of this book know too well that this is so. We shall now turn our attention entirely to the planet Mercury.

The government might be called paternal, for one ruler is always at the head of it, but you might call it fraternal for the people discuss and decide many things—in fact almost all of the laws that govern the planet, for laws are necessary in any civilization. There is only one race on the planet and all is one nation. I must admit that this makes government much simpler than it is on Earth.

The weather is not the same evenly all over the surface of the planet. Heat and cold vary from one location to another. Most of the planet has what you would call a moderate climate,

PLANET MERCURY SENDS GREETINGS

while some parts are warmer, and others cooler.

Farming is carried on with success in most locations, and even the cities have gardens of beautiful flowers, and the streets are all lined with trees. This can be found in many places on your Earth even now, but the cities are becoming bleaker as the population increases and in many of them trees and flowers are not found.

I feel sure you would enjoy a visit to Mercury, and you would be welcomed most cordially and taken on tours of the planet. We have many very fine hotels, where you would find comfortable and beautiful rooms for the guests, and most delicious food. Those who greeted you would be your hosts, and your tour of the planet would cost you nothing. You would be sure to have a happy time, and would see nothing to rouse your sympathy and make you unhappy, as is the case when touring certain parts of the Earth.

There is no poverty on Mercury and no excessive wealth. There are no classes of highly

PLANET MERCURY SENDS GREETINGS

educated, and ignorant. All are educated and intelligent. This may be almost beyond your imagination, but it is the truth. I shall tell you what is the cause of this idyllic life.

It is what the angels sang to the Earth on the day that Christ was born, "Glory to God in the highest and on Earth peace, goodwill toward men." We on Mercury live this in our daily lives. Our hearts sing always, "Glory to God and love to our fellows." We feel that all of us are brothers and all are equal. All have equal rights, there is no privileged class or underprivileged class. No one is hungry for anything, either physical or spiritual.

We of Mercury are looking forward expectantly to the time when the scientists of Earth shall have accepted our help in constructing a space ship such as ours. Then the people of Earth can come to us as we now go to them. They can fly easily and quietly from planet to planet visiting, and accepting our brotherly hos-

PLANET MERCURY SENDS GREETINGS

pitality. For we feel that we are your brothers and sisters—we know that we are.

It makes our hearts ache to see the cruelty and greed of the Earth people and their destructive treatment of the planet, which was so beautiful. Our hearts never ache for anyone on our planet for all is peace and happiness.

We can hear you asking, "Has this always been the condition on Mercury?" The answer is, "No, we passed through a very unhappy period, very similar to that which the Earth is going through at the present time. Some individuals who were in business—for there were businesses of various kinds — looked about at their fellows and thought of ways to take advantage of them, thus accumulating more money, with which to buy luxuries for themselves at the expense of their trusting clients.

This was the beginning of a situation such as you have on Earth at present. We forgot God, from whom all blessings flow, and thought only of ourselves. Some were grasping, so others

PLANET MERCURY SENDS GREETINGS

retaliated, and thus began a long period of time in which we lived as you on Earth are living now. Some of the people lived in great luxury, while others had not enough food to nourish their bodies, and not enough good clothing to keep them warm. This condition became worse, until I, who was the supreme Ruler of the planet, and the ones who had advisory positions in the government, realized that something must be done to stop and change this deplorable situation.

So we met together and went into the stillness of deep meditation, opening our hearts and minds to receive the instruction which came to us from the Life within us, which flowed from the Source of all that Is. Then we saw clearly where the trouble lay.

We called on all the leaders in every town and hamlet to do as we had done; get together in deep meditation and let the Life, or God, within them give them the answer, for when they in this way understood, and could see what

PLANET MERCURY SENDS GREETINGS

was the cause of the trouble, they then would receive inspiration from the Voice within them directing them in the proper procedure. It was necessary to warn the people of the danger which threatened the whole planet because of the greed and selfishness of a few individuals, which was spreading like a disease and drawing more and more active business into these nefarious practices.

Fortunately for our planet there were no large cities but many small towns. The governing officials of each town called a meeting, explained the situation, and warned the people of the danger to the population as a whole because of the greed of a few.

They lifted their hearts in prayer to the Great Source of all Being, which was the Life within each one of them. They prayed for guidance, and it was received and followed. Many illumined Souls on Earth have individually practiced this in their own lives, meditating daily, or of-

PLANET MERCURY SENDS GREETINGS

tener, several times a day, raising their consciousness into the spiritual realm and receiving the answer, which changed perplexity into certainty, and a clear course of procedure was followed. This which has been done, and is being done by individuals in their private lives, can be also followed in the government of cities and countries.

The officials of the government could follow this plan, and the individual citizens could call for the blessing and help of the Great Source of all Life, to open the hearts and minds of both leaders and followers, so that wisdom would be the guide. Wisdom and love always go hand in hand.

You who are reading this can practice this in your own lives, for yourselves and for your government. Send forth love over all the Earth, bless all the nations, beginning with your own private life, then your country, and finally all the Earth.

This is the way the planet Mercury was saved

PLANET MERCURY SENDS GREETINGS

from the extremes of poverty and wealth, from greed and brutality, and war. We can advise you people of the Planet Earth because we have saved ourselves from a like condition. We are grateful, when we look onto the Planet Earth and see the misery and crime there, that we are able to give the nations and the individuals the true story of our own experience. What we have done you can do. It may be more difficult, because the remedy has not been applied as soon as we did, but it can be done.

At the present time we see a tremendous uplift among the inhabitants of Earth. Light is shining in the darkness and is spreading fast from the United States of America, where freedom was the aim of the Founding Fathers of the country. Their example has not been followed by those who came after them and there is much poverty and crime in the country but the spark that they lit has never died, and now it is growing in size and brightness.

In the midst of the turmoil and the horrors

PLANET MERCURY SENDS GREETINGS

in the world of the Earth, a great power for good is increasing, fed by the love and devotion of thousands—no, millions of dedicated ones. They are those who have been receiving the New Age Teaching, and who are practicing that which they have learned and believe with all their hearts.

Saint Germain was the instigator of this movement, which is spreading over the Earth, but Jesus the Christ, who came onto the Earth centuries ago and gave his life for mankind, was the savior of mankind, at a period of time when it seemed that mankind and the Earth itself must perish.

There are many forms of this teaching, many leaders and many groups. It may seem strange that One from another planet should tell you this, but sometimes a stranger sees more clearly, and without any of the prejudice that has handicapped those living in the midst of a situation.

All these active groups are guided by Teach-

PLANET MERCURY SENDS GREETINGS

ers from the Great White Brotherhood, though some of them do not know this. They have fanned the spark of brotherly love that still smouldered on the Earth, and we can now see the light brightening and spreading in many parts of the Earth, but especially in the United States of America.

In earlier days the oppressed citizens of other countries fled to America in search of freedom, and there they settled and made it their home. But, alas, those who had fled from persecution began to persecute others of different religions, who had followed them. At that time there were only separate colonies on the Western continent, all settled by people who had come in search of freedom to worship God according to their belief.

But the beliefs of the people who sought freedom differed in minor ways and, as it had been in Europe, it now was in America, the stronger persecuted the weaker and there was no freedom that was universal.

PLANET MERCURY SENDS GREETINGS

There still is no true freedom anywhere on the Planet Earth. But the love of freedom and the desire for it has never died. The light is shining in the darkness and increasing, not diminishing. We can see that very distinctly.

A glorious future is destined for the Planet Earth. Those who are prophets can see it, and they are not few, but man himself must awake to the situation and become active. Anyone with ordinary intelligence can see that wars should cease, crime should cease, poverty should not be, cheating and chicanery should not exist.

The papers are full of distressing accounts of robbery, murder and rape in the cities, and war between the smaller nations in which the larger nations are implicated. But the population as a whole makes no effort to remedy the condition.

On every coin that is used by the people these words are clearly stamped, Liberty, In God We Trust, and E Pluribus Unum which means, From Many One. These words were

PLANET MERCURY SENDS GREETINGS

in the hearts and minds of the founders of the nation and every child has heard them.

Now in this century of the Earth a great movement is spreading, beginning in the United States of America and spreading out in all directions to all parts of the globe. Groups of people are coming together to worship God, whose love and power are the basis of all creation. There are different ways in the various groups, of receiving and giving forth, that which in every case comes from the Great Spirit which is the cause of all life, love and peace.

Some groups practice decreeing, which is a repetition of phrases full of love, demanding cleansing of the Earth and its inhabitants, and replacing that which is untrue and destructive with Love and Truth. Other groups come together to receive teaching from Great Masters who speak through the leaders of the groups.

Besides the many groups there are individuals who are receiving the words of Truth from the

PLANET MERCURY SENDS GREETINGS

higher realms of Life, and writing them to send out to all who are searching for Truth and illumination. There are many who are searching, and many who have found, for the time is now ripe. This small writing is given in that way. I, Mercury, receive the thought and the words from a higher Source, and the one who does the manual writing receives the words from me. It is very simple. With this writing much love is given, for love is that which accomplishes all good works. When there is love there is also light, and wisdom and joy are the result. The foundation of all is complete faith in the living Source of all, which in most countries is called God. *(Mind)*

Whatever word may be used to designate this great force, it is one and the same force. That which is life everywhere, and love everywhere, expressing in all forms and creations. Life is the foundation, and love is the key, to all that is constructive, and we must not forget faith, which encourages and strengthens those who

PLANET MERCURY SENDS GREETINGS

work in the vineyard of life. Faith is very necessary.

Beloved ones who read this little booklet. You are seekers for the Truth of life. Your hearts are full of love for humanity. Have faith in the Great Power which guides the destiny of every living being, be it man or little bird. The birds build their nests and raise their young ones by unthinking faith. Men accomplish marvels by thinking faith.

All great inventors have faith. Their faith is strong and unyielding. Disappointment after disappointment is conquered, and faith is still strong in their hearts. Sometimes the one who began the work does not succeed, but the work is taken up where he left off, by another worker in another generation.

All mankind is one. No one lives alone. It may seem so on the surface, but within all is one life. One energy pours through the whole; one great power, the power of love, holds all together as one.

PLANET MERCURY SENDS GREETINGS

This we on the Planet Mercury have learned by hard and bitter experience, for we had sunk to the depths as you on the Earth have done. Greed, war and destruction were rampant all over our planet. It became so bad that something had to be done. There is a saying on the Earth, "Mans extremity is God's opportunity."

This is true, and in desperation we turned to God for help. When I say we, I am speaking of the population of the planet and all, both population and ruler are one. I had done all I could to reach the hearts and minds of the people, and make them understand what was happening because of their greed. But they would not listen until they were in extremity.

Then they stopped, looked and listened. Then they asked for help. They raised their minds to the Source of their beings and prayed for help in their desperation, and help came. The Lord of all creation answered their prayers as He always does when prayers are sincere and unselfish. All troubles can be overcome by honest,

PLANET MERCURY SENDS GREETINGS

sincere prayer. We urge man to listen to us and follow our example, for the result was even beyond our expectation.

Now you know why the people of the Planet Mercury are living lives of complete happiness, with plenty of the material goods necessary for physical sustenance, and all the beauty and joy of spiritual life.

Now that you have read this and understand something of the history of this planet, the next thing is for you to accept our invitation and visit us. When you travel over our planet, as our guests, visiting our towns, our factories, schools, libraries, and most important our private homes, you will be ready, when you return to the planet Earth, to begin in earnest to follow our example.

Theory alone is worthless, practice is needed in order to bring results. But before the people of Earth are ready to accept what I have been telling them and practice it on their planet, they must let us take their leaders in our ships to our planet as our visitors.

PLANET MERCURY SENDS GREETINGS

I will give you an idea of what is to be seen on our beautiful planet. Remember, it is a small planet and there is only one nation and one race. Our ship shall go directly to the capitol. It is a beautiful building, but not more beautiful than your capitol at Washington, D.C. We enter and find nothing very different from your capitol.

We leave and go to a court of law where a trial is under way. Here there is a striking difference. There is a judge and a jury but there are no lawyers. There are two men who have had a disagreement concerning a piece of property—about the boundary line between two homes. Each one was given an opportunity to speak, without interruption. A stenographer took down all that was said. Then the judge and the jury withdrew to another room which is called, "The room of consultation." There they discussed the situation, by first carefully reading the stenographic record, and then any member of the jury who wished to speak raised his

PLANET MERCURY SENDS GREETINGS

hand and the judge called his name. He gave his opinion, which was taken down by the stenographer. If another disagreed, he was recognized by the judge, and he spoke.

This was continued until everyone who wished to express his opinion had done so. There was no oratory or flowery language, no effort to put either of the contestants in a bad light. All were calm and quiet in giving their opinions.

We with our visitors do not wait until the case is decided, for it will take some time to read all the records of the jurors opinions. When all these have been studied the judge will give the deciding verdict. There has been no verbal fighting, no oratory, only quiet expressions of opinion. The judge is well versed in the law, for there are laws which are scrupulously followed. Sometimes, if there have been many contrary opinions by the jurors, it may be several days before the judge gives his verdict.

Now we shall get into our conveyance and go to another small town. We are not traveling

PLANET MERCURY SENDS GREETINGS

in a space ship, but in a conveyance not very different in appearance from your automobile. However, there are differences. The fuel, like that of the space ship is drawn from the atmosphere and there are no noxious fumes pouring into the air. We drive out into the country over smoothly paved roads. There are beautiful trees, grass, and flowers in all directions. In the distance we see mountains whose tops are capped with snow. We pass through several small towns. The people live in pretty little houses, each individually planned. In front and around each there are flowers, and behind there are sometimes vegetables and fruit trees. Much of your own planet used to be like this, but there is not much like it now.

There is no large city anywhere on the planet Mercury. Even in these small towns there are parks and playgrounds for children. Of course there are schools and shops. Everywhere the air is pure and sparkling and the sky blue, for it is not raining on the day we take you to visit

PLANET MERCURY SENDS GREETINGS

us. We do have rain at times for without it the planet would be a desert. We have learned how to draw the clouds and produce rain when it is needed. It is said that your American Indians can do this, and the white people have occasionally brought rain from clouds that have gathered, but it is not regularly practiced.

There are not many restaurants or hotels in our towns, usually one of each, for that is enough to accommodate the travelers who are passing through. Our party goes to one of the hotels and finds it clean and comfortable. In another town we eat at the restaurant and find the food not very different from that to which you are accustomed.

But we have invitations from several families, in different towns, who would like you to be their guests for a day and a night. You spend a day and a night with each one. Some of them have young children, others are older persons and have what you on Earth call teen-agers. You have pleasant conversations with all these

PLANET MERCURY SENDS GREETINGS

families, you eat their food, and you enter into some of their games and pastimes. They treat you like old friends, and you feel perfectly at ease and return their friendship.

We could fly easily from this planet and tour another planet but the plan for you is different. Your trips will all originate on the Earth and go to another planet each time, not from one planet to another. In this way you can judge the distance each planet is from your home planet, the Earth.

We all have strong hopes that you will accept our offer to teach you how to build a space ship like ours, so that you may travel from planet to planet and tour the entire solar system in a leisurely way. It will be like the tour of Europe, Asia or Africa that some of you fortunate ones make, not like a hasty guided tour of a few weeks, catching hasty glimpses of noted art galleries or beautiful scenery.

No, the plan is for you to linger long enough to really know the people and customs of each

PLANET MERCURY SENDS GREETINGS

planet and make friends in each one. With your own ship you could do this. You could engage guides as you go from place to place. These would be professional guides such as there are in the countries of the Earth. They would know the history of the nation and all the places of interest.

They would relieve you of all the troublesome part of travel, but you would not have to hurry, you could stay as long as you wished when you were interested, and if you were not interested, move on.

If you landed on a planet and found at once that you did not like it, you could enter your ship and be on your way to the next planet.

This is a carefully thought out plan, not only by the rulers of the planets, but by the Great White Brotherhood, which has communication with the people of Earth whose minds are open to them. They can prepare the minds of their students so that they can receive telepathic communication direct from us.

PLANET MERCURY SENDS GREETINGS

That is the way this booklet is written. I am speaking to the writer by telepathy, and she receives each word in her mind and writes it. It is very simple. All that is needed is willingness on the part of the receiver, and the ability to send on the part of the speaker. Telepathy has been spoken of as a telephone between worlds. This is an apt description of it—a wireless telephone.

Any one of you could receive messages if you had the desire to do so and the love which would give the incentive. When you pray to your Father in heaven, you are both the sender and the receiver of a telepathic message. There is nothing supernatural about it, it is entirely natural.

But to return to the plan. The plan is that each planet shall first of all communicate with the Earth by means of little booklets like this one. This is the second. Each planet shall be represented by a booklet. Do not think that the receiver may have made mistakes. The trans-

PLANET MERCURY SENDS GREETINGS

mitter will look after that. If a mistake were made he would quickly flash a signal into the receiving mind and have the words changed. Every word in this writing is just as I have sent it forth, and it shall be so in every booklet.

We are also communicating with you by visiting you in our space ships. Many of you have seen these ships and some of you have conversed with those who are in them. There have even been instances when the Earth man has been taken on board and shown over the vessel, or in a few cases, actually taken to visit a planet. People are losing their fear and many are becoming very much interested in the ships which hover over the Earth or land upon it.

But more persons can be reached by means of these little booklets. Many more can be reached. They will go into the crowded cities where the ships seldom appear. Persons of all ages can read them for they are being written in very simple words. Invalids confined to bed

PLANET MERCURY SENDS GREETINGS

can read them when a friend or relative receives one.

Only infants and tiny tots will be unable to read them, and the parents can talk to the little ones who are old enough to talk. It is well known that a tiny child asks many questions and has a mind eager to learn anything new.

So now I have told you what the plan is. This is not the last booklet, many more will follow it. This will be distributed as the first booklet is being distributed, by those who are dedicated to the service of God and man.

How beautiful the Earth could be, for it was very beautiful when it was a new creation. Think of the most beautiful landscape you have ever seen and imagine all of the Earth like that. All was like one big, glorified park. Man was put on this beautiful planet, told to increase and multiply, and to care for the Earth, the plants and animals.

Alas, the demon greed entered in, and now the soil is being poisoned and the animals and

PLANET MERCURY SENDS GREETINGS

birds killed. Greed is the worst sin there is. It is the opposite to love. Love never destroys, it is always constructive. It is the cause of great inventions, beautiful pictures, delightful music; everything that brings happiness and peace. Greed is a destroyer and causes war and poverty.

We on the planet Mercury know this, not only in our minds, but in our whole beings, for we have experienced it ourselves. That is why we are so very anxious to warn our brothers on the planet Earth, and to urge them to listen to us, for we know that of which we are speaking.

So now we of Mercury have had our say and will give our place to the next speaker from another planet.

Our love and blessings are always with the people of Earth, for we are all the children of the One Great Creator.
