COMMUNICATION CENTER OF DIANETICS AND SCIENTOLOGY
806 NORTH THIRD STREET • PHOENIX, ARIZONA, U. S. A.

NIBS TO ENGLAND !

L. Ron Hubbard Jr., D. Scn., D. D., is London-bound with his wife Henri to take over as Director of Training.

His mission is to raise and standardize the quality of auditing in Great Britain. In addition to the HASI course leading to HPA which he will teach with the help of British instructors, Nibs, as he is known, will institute a special course.

The new course he will teach at HASI headquarters is the B. Scn. course, never before taught in Great Britain. It is three weeks in length and costs only 35 Pounds. Applicants must already be HPA's. Taught live by Nibs, the course features the best processes. The student's case gets much attention. The student is awarded his Bachelor of Scientology only if he passes the examination at his course end.

Ron, Sr., has sent Nibs over to London with the goal of taking any rough edges off the HPA course and of bringing every HPA trained so far through to B. Scn. L. Ron, Jr. happens to be one of the most skilled auditors and best informed theoretician in Scientology. Nibs has had some fifteen ACC courses and has studied Dianetics and Scientology since 1952.

Ron, Sr. expects every HPA to attend, during the next three months, the B. Scn. course. That is why it is cheap and that is why Nibs was sent.

As Nibs will also teach the HPA course, we expect the London office will be a busy place!

U. S. B.SCN. COURSE SUPPLANTS A. C. C.

For the next few months the functions of the Advanced Clinical Course are being taken over by the B. Scn. course. With Nibs in London, the ACC becomes the B. Scn. course in Phoenix.

Taught by Dr. Richard Steves, the B. Scn. course will continue to be the senior Phoenix course until after the June Congress. The next ACC course leading to D. Scn. and taught by L. Ron, Sr., will begin later in the summer. A B. Scn. will be requisite to entrance in the ACC.

The B. Scn. course is open to HDA's, HCA's, and HPA's (British HCA). It is an arduous course 5 to 10 weeks in length. Its text is the "Creation of Human Ability". Its goal is a cleared auditor. Its cost is $500.00. To a few HDA's and HCA's with earlier extra training it is being offered at a reduced rate. The requisite to the B. Scn. course is an HDA or HCA. A B. Scn. is necessary to further awards in Scientology. The degree of Bachelor of Scientology is awarded by the Hubbard Professional College under the authority of the State of Arizona.

Now that we have the know-how, we must have auditors who are well trained. A top rank auditor should have training as an HCA, as a B. Scn., and as a D. Scn. The HASI has now standardized with the three courses. The HDA-HCA course is eight weeks in length and costs $500.00. The B.. Scn. course is 5 to 10 weeks in length and costs $500.00. The D. Scn. course (the ACC) is six weeks in length and personally taught by Ron - costs $800.00. The student is expected to gain considerable experience between his courses.

OPERATION "FORT KNOX"

Some time ago a millionaire Phoenix visitor asked L. Ron how he planned the future finance of Dianetics and Scientology. L. Ron answered him with a solution which his friends at the conference thought was facetiousness.

"The optimum solution, by First Book definition," said Ron, "would be to own Fort Knox and to have every skilled auditor in the world on a steady payroll, each one auditing groups and important individuals until we had the job done."

Time since has revealed startlingly that L. Ron evidently meant it!

For five years we Dianeticists and Scientologists have learned that our Ron generally sets out and does what he says he will do. Many of us have been in the error now and then of thinking or enthetaing, "Well, he's done it now. This idea he has is impossible. His confounded optimism will ruin all of us yet." And then the accomplishment.

Now on Operation "Fort Knox" we may or may not be safe in assuming this is really out of the land of probability. We are arguing against Ron's five year record of doing an impossibly difficult financial job. We have learned that the task of keeping Dianetics and Scientology going, without grants, aids, or bonuses, totally on its own steam, past the greedy paws of the many who would have grabbed it for profit, has been, contrary to belief, a high caliber job of financing on Ron's part.

Dianetics and Scientology organizations across the world require about $150,000 a year to keep running. L. Ron has floated this almost single handed every year since 1950. That income is not the total income of these sciences, by far. It is just the basic sum vital to keep organizations going. It's outgo, not income. Of this Ron takes no salary.

As $25,000 a year is the income usual for the class of millionaire, being the interest on a million, we see that we have been part of organizations valued at six million. Starting with almost nothing, if L. Ron can build and continue six million dollars worth of organizations in five years and have their corporation assets intact as of now, we must be working in the financial genius class. This evidence, on the clear face of account books to hand, makes rather amusing the crazy rumors current in the last five years about Ron's business ability. We have to look at this to evaluate Operation "Fort Knox".

Does he mean to accomplish this new plan? Look at its cost. Our five thousand auditors would be drawing between $50 and $100 a week each from the HASI and HDRF. This is a payroll total of $375,000 per week, or $18,500,000 a year. Add comparable operational expenses and we see we would need $25,000,000 per year.

On the other hand, the organizations and all auditors would be free of the economic-approval-by-the-public-merry-go-round of modern life and by auditing without fee other than organization pay could get the job of clearing Earth done.

Further, with a Scientologist at the elbow of every important functionary on Earth, Scientological ideas of constructive peace would be certain of success.

Operation "Fort Knox" would be a wonderful solution. Are we going to do it?

Look what has happened in the past three months since the idea was proposed by Ron:

1. Ron has sent out two survey expeditions to examine a future self contained valley home for Dianetics and Scientology.
2. A top figure in the radio production industry has been retained by the HASI.
3. Three electronic patents of items capable of revolutionizing radio, TV have been patented by the HDRF in the past week.
4. A uranium strike of proportions sufficient to startle the AEC has been made by a Scientologist working under the Church of American Science.
5. The HASI has financed a survey of "meteorite craters" in a remote part of Arizona.
6. A nationally known scientist is working with Ron on cancelling H-bombs before they hit. Success on this has been reported.
7. The HASI has bid on a Department of Defense contract to proof all U.S. troops on brainwashing.

8. The HASI and HDRF have just moved into a $150,000 building on Third Street in Phoenix.

9. Ron is rumored to have ordered the construction in his projected new office of a peculiar transmitter-receiver which runs on no Earth-used wave length.

All these events, happening fast as they do when Ron touches the green light button, seem to spell some hope for Operation "Fort Knox". Some of the items above mean income well in excess of $25,000,000 a year if they materialize.

If Operation "Fort Knox" goes into effect in one year or ten, this civilization could not help but change for the better. It means every trained Dianeticist and Scientologist would be secure for life independent of preclears or the society.

When your reporter asked Ron if he was serious about Operation "Fort Knox" he grinned and said, "We'll have to plug away the way we're going for a long time yet."

Well, he got together six million dollars worth of organizations for Dianetics and Scientology in five years against all odds and grabs. And he wrapped up the science at the same time.

Now the question is, are we really going into Operation "Fort Knox" or is he fooling?

I've thought he was fooling before!

tom esterbrook

ROUTE TWO

Route Two is quite a bag of tricks: this, you, too will discover, when you get your copy of the "little black book", better known as "The Creation of Human Ability", now in the process of being printed.

We, here in Phoenix, were privileged to "sneak preview" this "thing" and discovered R2, contained therein, was fabulous indeed.

Ron has packed R2 with the full treatment - from the firecracker to T.N.T. - in fact its 75 separate commands are, each and every one, subtle gems designed for only ONE purpose - "to CRACK CASES".

Many are naive little "sleepers", others covertly worded to inveigle the unsuspecting preclear in way beyond comfortable "ankle depth" before he has the opportunity to gather his wits.

Still others hit broadside, with precision and sheer suddenness.

There are more that are jewels of "delayed action" and quite covertly lead the preclear toward outright Pan-Determinism.

All in all it is a new and cleverly erected bundle of tools to add to your collection for inducing your P.C. to forsake the dubious security of his own fat head.

Another thing you will observe about R2 is that it is solidly built around Ron's 6 basic steps - from Two-way Communication to Spotting Spots in Space. Rather than ruin your fun by telling you more I suggest you corral your "tough boys", tie them down, pull R2 out and commence firing.

rex delaney

ABEREE- YOU SAID IT

There are several wildcat publications in Dianetics and Scientology which occasionally author slanderous material. Publishing dull rumors not based on any fact, corrupting materials, and mainly read by psychotics, the BDR, the Aberee, and Dianotes, to name three, continue to innuendo without data that "There's something wrong with Dianetics and Scientology." Braggingly unprocessed, the editors vary from outright nuts to covert "authorities".

The HASI's CECS, on discovering that several auditors had been harmed by these publications, has decided, despite their tiny circulations, to take action.

As kicked-out HASI employee Alphia Hart of the Aberee was evidently incorrect in his accounting when he fled the organization, the CECS is reported to be lowering the boom.

THE WAY RON WORKS

Many people have questioned me regarding Ron's research and investigation into the human mind. The funny thing is that the majority of the hundreds of research cases on whom he worked to give us the principles for building a better world were never aware of who he was or what he was doing. They had never heard of Dianetics or Scientology. All they knew or were aware of was that they felt better, their bad eye sight or maybe the limp in a once injured leg, was gone.

Wherever we have been it has always been the same - in England, Belgium, France, Germany, Spain, or here in our United States - rich or poor, young or old, diseased or insane, there has always been the hidden man, woman, and child behind the scenes who were helped and who, but did they know it, were contributing to the furtherance of a science. To me, the most important foundation upon which Dianetics and Scientology is built was stated in the First Book - that is, "Man is basically good." I know of no one who believes this as strongly as Ron does. It is my feeling that this alone in times of contemtuous press, financial difficulties, the betrayal of friends - times when it seemed that all he had built was crumbling to pieces, kept him going, kept him persisting to his goal of helping MAN.

In Phoenix after the fall of Wichita, a producer with whom Ron had worked in Hollywood came to see us at our small apartment. He was offering Ron what would seem to the ordinary man like ice cream and cake for eternity. After picturing this dream in the clouds, he said to Ron, "Now, really, do you think this Dianetics, this research of yours, is worth it?" Ron sat for a very long time - silent, his eyes closed. Finally after what had seemed like hours he opened his eyes, and said, "Yes! Yes I do." After his producer friend left, I asked him why he had taken so long to answer. He replied, "I was watching pass before me a parade of all the people I had helped, their expression one of hope and faith in the goodness of the future. Nothing can be worth more to me than that."

And that's the way he is. His belief in the innate goodness of Man, in being able to bring this and Man's abilities to the fore continues him in his research. It enables him to communicate to anyone despite their physical disability to do so, or any language barrier.

His preclears are all over the world. The time he has spent processing is too vast to enumerate. Even he does not know the hours; he works and there is no time to him. This used to be very disconcerting to me. I remember one time in Spain, I had spent the whole morning shopping in the market and the whole afternoon preparing dinner on one oil burner and a charcoal fire. This was a difficult process for one used to super markets and a gas range. Ron had gone to the park. Dinner time passed. The food got soupy from reheating and the charcoal supply got nil. My patience wilted and I went to the park. I found him sitting at a side walk cafe, a middle aged Spaniard with him. He motioned me to sit down and be silent. He was processing. The fellow had been in the Russian army, had fought in the battle of Stalingrad and then had been forced into servitude in Siberia. His legs had been so badly frozen that they would not bend at the joints. This peglegged walk was to carry him through life and to deny him work because of his slowness. After Ron had finished, we invited him home to dinner. He walked naturally again. His realization of what had happened to him did not come until he walked to the door to leave. He suddenly stopped and began shouting "I walk - I walk".

There are many such people and many more - you in the field have not been idle either these five years. Maybe someday we can realize Ron's Project. Very few know about it, but someday he hopes to have every auditor in the field "who is worth his stuff as an auditor" on the H.A.S.I. payroll. They would be given some person - some one in high government position, someone in the arts, someone in religion - people who are in the public eye and who supply thousands morale in the forms of good public works, books, paintings, humor, spiritual aid, to birddog until they submitted to processing. These auditors could then simply process and prowithout depending upon public approval or financial support which is dependent upon public approval. Maybe someday we can accomplish this. It is a goal worth working toward. We too, will have a better world someday.

It is Ron's dream and yours and mine.

MARY SUE HUBBARD

HOW'S IT GOING?

How is your local project coming along? If you've just about got your town or country cleaned up you may be wondering - now what? If you're running out of projects LET US KNOW BY RETURN MAIL. We've got plenty of projects for Dianeticists and Scientologists!

We want to hear from you about what you're doing there in your town. News is coming in regularly from all over the world about what Scientologists are doing, and most reports report four or five things going on at a time. There's HCA training, there's professional practice, group processing, public lectures and group processing combined, there are projects which get out to the public where the public is.

In many places children are getting their daily sessions right in the classroom. One Scientologist got a fire department rating and a call-box and started chasing fires and giving assists. He saved many lives, and put an awful lot of charred and smoked-out people back on their feet and smiling before the firemen got a chance to break a single window.

Several Scientologists are doing something about "juvenile delinquency" in their areas, and as you know, this is a real problem, even if it's not even vaguely the problem the papers sell it for.

One project that goes on all the time is not really a project at all, but just a natural result. Here in Phoenix, for instance, at one restaurant the kids behind the counter told me the other night, "who wants to wait on CUSTOMERS? It's a lot easier and more fun to wait on Scientologists. What do you call it - processing? That's what we have to do to customers now. You have to say 'How are you' about five times before you get an answer. That's what a 'comm.-lag' is. Isn't it."

You have this kind of an effect around town and it's one way to improve your community. By communicating.

Another assist that is being given the society is hospital visits - going around cheering up the patients with two-way communication and speeding their recovery.

We want to know how you're doing because whatever you're doing we've got more things you can do.

Whatever you do, don't attempt to do ONE THING AT A TIME.

Most projects Man undertakes go by the boards NOT on lack of concentration and "singleness of purpose", they fall on the very weakness of being the "only thing we're trying to do".

"All we want, is to end war." And war keeps happening regular as a German Cuckoo clock. And wars keep getting less and less interesting, duller and duller, and more and more frequent.

Your preclear who wants only one thing in life - to meet his car payment, or to meet his father, or to get rid of his five o'clock shadow - he's the eternal preclear.

The way Life works is not by estimating chances and then taking a good bet - Life works best in this universe when there's something to do, and the more you cut down on the something to do, the smaller the estimates get, and on down it goes to CAN'T DO NOTHIN', AIN'T GOT TIME.

The way theta works in this universe is: if you fail at one, set up two. If you have only one project that interests you then get five more and a funny thing will happen. You'll have more fun and get more done with every one of those one-plus-five projects than you ever imagined having with that one you started with.

Attention span is a game thetans always play in this universe. It's an attention-span-universe. There is the dwindling down of attention. There is the expanding and exploding outward of attention. The way a thetan goes down into the dwindling spiral is simply to estimate his abilities in QUANTITY and then back down his knowingness to fit inside that quantity.

A thetan actually does not have any quantities, he has the quality of being able to create, be, do, have, change, destroy quantities. He does this by communication.

Don't wait for your "case level" to arrive at some height. Just bust in and do some things, and do the arriving. Anyone familiar with the little book you'll be seeing soon, "THE CREATION OF HUMAN ABILITY" - anyone who gets real familiar with what Ron has codified in that volume will have no doubts about the Survival of Scientology.

We're not asking anyone to get in and help Scientology be safe - it now enjoys such a level of safety from harm that it would take some ingenuity to think up a danger for it. What we in Phoenix are talking to the field about is not help. It's invitation to come on out and play. We've got a planet rolling around here somewhere and we've got all kinds of games to play.

"Creation of Human Ability" is a book of playmates, in which the human race is invited to participate. There are some games down there below 2.5 that we may be spoiling for people here and there.

Well, that's life. Maybe we're just lazy. That scale down around 2.0 and below is an awful lot of serious, hard, self-sacrificing, dedicated work, and it takes experience and it takes stickyness. Nothing wrong with it - it's an opinion. But there is enthusiasm - and what games you can play! Sure - we'd like to hear from you.

John Sanborn

PHOENIX PROCESSING

A future issue of ABILITY will have an article on processing results which will interest you. All preclears coming in for processing by HASI staff in Phoenix and for the five-hour intensives given personally by Ron are tested before and after processing by D. Scn. Julia Lewis. The tests include a full battery of standard psychometries, Temperament Analyses, I.Q.'s, and Scientometries, including Tone Scale tests and reaction-time and Aptitude Tests. What has been showing up with great regularity on these tests is completely unheard of in the field of psychological testing.

It is not supposed to be possible to get a marked change in any of the standard psychometries. I.Q.'s are ruled by the iron hand of NO CHANGE. Ask professional psychometricians, you will find this to be true and to be stated with a conviction that cannot be mistaken for shyness.

They say you can't change human beings. On this fact they base their rites and ceremonies of office. They are neither happy nor unhappy about this discovery. But they obey without question. It might seem odd to a Dianeticist or Scientologist; but that's the way it is.

We'll give you a report in an early issue of ABILITY about the before - after tests given with Phoenix HASI intensives. We can't give you any clue from our findings as to why the psychometricists have so long believed there can be no change. Evidently it's simply a matter of not looking.

The tests we have at hand show a great deal of change in cases. One case showed up on the "before" test with an I.Q. very far below that of the auditor who gave him the intensive, and the "after" showed that the auditor had pulled him up and then shoved him up to considerably better I.Q. scoring than his own.

To be truthful, I.Q. tests don't have very much to do with LIFE - but a change in I.Q. is interesting, with campus fashions being what they are today.

●●●●●

SCIENCE OF SURVIVAL, BY L. RON HUBBARD IS NOW AVAILABLE in plenty. This book, which costs $5.00, is the basic book of Human Evaluation, and contains the famous CHART OF HUMAN EVALUATION, which is a MUST for the Professional Auditor, and should be in the possession of every Dianeticist and Scientologist. This is not the book you show your friends - it's THE BOOK THAT SHOWS YOU YOUR FRIENDS!

TAPES CAN BE RENTED

The dissemination of materials, which goes straight along the line thrust forward by the 1955 victories of investigation, research and testing in the field of LIVE COMMUNICATION, changes have been put into action on all HASI communication lines.

One of these is the dissemination by Scientologists of information and instruction - both the introductory and elementary level and the advanced professional level in Phoenix and in the field.

In Phoenix, live lecture, instruction and student-to-instructor direct communication has replaced the tape-recording VIA, and instruction is now faster and surer. In the field, where tapes have been always made available to groups and to D. Scns. with Right to Train, tapes will continue to be available. However, with this change:

The only tapes now FOR SALE are the Professional Course Lectures, training and information package, which is standard and basic. Other than this package people in the field will no longer be buying and "building libraries" of magnetic tape recordings. One tape will be BOUGHT, and then from there on the field will get it's tapes by sending in the already used tape with one dollar, and another tape will be sent, which, when used, will be also exchangeable for ANOTHER, etc., et cetera, etc.

This will serve to make the information line lighter, less massive, faster, and more up to date as to direct communication with the HASI, and with what Ron and Scientology is doing.

All new advances in Dianetics and Scientology have, for well over a year, been advances which bring greater stability to these sciences, and hence readier communication and ease of acquiring them. There has not been a major overturn of method, there has not for a very long time been a really notable change in the basic processes used.

There has been greater simplification, there has come greater predictability from the very beginnings carried forward in these recent years of Earth.

At this time what we have is stability, whether we like it or not. If we might wish for this same territory to be closed into wilderness so that we could look forward again to this adventure, nevertheless, it is not closed to us now, and this situation calls for action way beyond what we have had until now.

We now have a game before us, not of finding out what will make Man a live player -- we have the game now commencing of actually and actively making Man into this live player we sought.

In looking over our researches into the basics of Life we find our uppermost subject to be Communication as now formulated and codified in the 51 Axioms of Scientology, and along the top of this line of attack we find LIVE COMMUNICATION.

D. Scn.'s, B. Scn.'s, H.C.A.s, H.D.A.s - all the trained and active Scientologists and Dianeticists in the field, however remote the field, are going to be putting more and more LIVE, extemporaneous, and alert communication out into a mankind which is correspondingly as starved as this science is rich in the freedom to know and to communicate.

All new HASI decisions and plans are made in this intention and toward this goal.

REAL ESTATE

Here is a piece of property that looks interesting: it's about 56 miles from Phoenix, 2000 and some-odd acres, and everything brand new. There's a 6-bedroom ranch-style house (everything there is in Millionaire Supreme architecture, and interior decor). There are two large duplex apartment buildings. There's a big, new, rambling style hotel beautifully equipped. There is an airstrip on the property which is marked on all air charts. There's now being hauled in a very good crop of long-fiber cotton of a variety that is grown only in India and Arizona. The whole plant is fully electrified, the gas works, and has its own water pumped from a number of good wells. A principal Arizona highway runs through a corner of the property. There are ample stables for the horses and for Belknap's burro, Cinco. There's a cocktail lounge and a grocery store on the highway nearby. There's a railroad depot. A modern housing development is being planned nearby by a leading Arizona financier.

The former owner would not allow children or pets and charged $15 a day, and this didn't tend to make fortunes, so he abandoned it. The down payment on the place, which is valued at $6,000,000 is, to the HASI, $50,000. It is available at a price very, very far below the assessed value. This has been offered, and is available only to Scientology, and is offered because of Scientology.

Think we might be able to get something like this? Esterbrook says he's not skeptical, and you'd be surprised how skeptical B. Scn. Tom can get sometimes!

ANOTHER VIA UNMOCKED

Latest and newest advance in the training of auditors in Phoenix was announced today by Ron. Tape recordings will no longer be used in Phoenix by A.C.C. or H.P.C. in training. All lectures will be "live" and thus two-way communication among students and instructors, and between Ron and students, is greatly increased.

Tape recordings will continue to be used in the field by groups and by D. Scn.'s with the HASI Right to Train.

This plan has been paying off in terms of rapid instruction and increase of student competence, as over the past few weeks more and more "live" lectures have been replacing the tapes.

Ron is regularly addressing all students in addition to the daily Staff-A.C.C. conferences in his office. D. Scn. L.R.H., Jr., instructor of A.C.C., Dean Belknap of H.P.C., and D. Scn. Richard Steves, instructor of H.P.C.'s advanced B. Scn. training are all directing and instructing more closely, directly and instructively with this method of training.

H.P.C.

Next ABILITY will tell all about the new program of H.P.C., which, with its new schedule, is accomplishing basic (HCA -HDA and advanced B. Scn.) training and producing such excellent auditors. This is taught by Dean of H.P.C. Burke Belknap, who conducts the basic course, and D. Scn. Dick Steves, who conducts the new advanced H.P.C. Course, leading to the degree of B. Scn.

Eight weeks. $500.00 for the Basic Course (HCA - HDA). Requisite for the Advanced (B. Scn.) course is the degree of HCA or HDA, obtained since October 1st, 1954 from Phoenix, or from a D. Scn. with the right to train. To them the cost is $285.

The B. Scn. and HCA - HDA courses start every Monday at 8 A.M. in Phoenix.

PROJECT CELEBRITY

ABILITY assures all hunters that reports, names, progress, and all other material concerning Project Celebrity will not be published anywhere. We will carry no announcements of who is going after the elegant quarry offered in ABILITY Minor 2, or of which of the celebrities have been requested. To those who have already chosen we wish excellent hunting.

To the celebrities who have been chosen we extend our congratulations.

The people whose names you read in the celebrity list are a very lonely race. They are the Only One. Upon their being "The Only One" they have gambled their very survival. You can find in almost every press release from one of these people that they are not only in need of auditing, THEY ARE KEENLY AWARE of the need for auditing.

A great many of them have tried "an analyst" or "a rest cure" or some other device But they don't kid themselves about these things - what they are looking for is some straight communication.

You might as well be informed of this fact - that your quarry is looking for you, a lot harder than you are looking for him. Might as well give the guy a hand.

PSYCHOLOGY BILL WHIPPED

The American Psychological Association lately took the worst beating of its career at the hands of the HDRF. Trying to get control of all mental healing in Arizona, the APA got a bill (House Bill 81) into the legislature and got it supported by fifteen noted Arizona legislators. It was scheduled to outlaw mental healing by anyone but psychologists of "proper degree"

The HDRF, under Ron's direction, went into action, catalyzed the operation, and crushed the bill, getting it thrown out by popular acclaim.

Poor APA. It's beginning to look like psychology really WAS Nineteenth Century. May it rest As-ised.

CONGRESS JUNE 3,4,5,6

The dates have been set and the place secured for the 6th International Congress of Dianetics and Scientologists, which at the moment we are calling the 5th Anniversary Congress. It will be held in the Little Theatre, known to hundreds of Congressgoers as the pleasant and spacious building which is part of the new Phoenix Civic Center. Most Dianeticists and Scientologists feel that this building belongs to them, as they have been here for several congresses and every congress has brought them to a larger ownership of environments and this building is a sort of favorite anchor point for all of us.

Ron is already planning for this congress, and an occasional hint suggests that we better all be there on time, because Ron's really got something to tell and some processes to give us. If you've never had personal group processing by Ron, all anyone who has can say is, "Wow, you ought to get to the Congress!"

The mail is still coming in, that tells us how much everyone accomplished at the last Congress. The general experience of the Congressgoers has been "Ron, you changed my life SO MUCH in those sessions and those lectures!"

Next issue of ABILITY we may be able to give you some preview of the 6th Congress. One thing we can tell you right now is you'll have a lot of fun. And you'll find yourself communicating more with more people! See you in June! Dates of the 6th International Congress are June 3, 4, 5, 6.

THE JUNE CONGRESS WILL BE THE ONLY CONGRESS GIVEN IN NORTH AMERICA THIS SUMMER . . . . . NO "DUPLICATE" CONGRESSES, AND NO OTHER CONGRESSES AT ALL UNTIL DECEMBER! . . . . . .

SCANNING BANNED

Very suddenly and with no warning whatsoever, it was dropped into the friendly, professional, optimistic atmosphere of the daily Auditor's Conference in Ron's office at 806 that auditors throughout Southern California - well - that auditors, people who audit, have been routinely, regularly, remarkably, using at the end of sessions - even sessions ending in 1955! --- have been "scanning the session".

D.D., A.C.C. grad., J. Burton Farber, was immediately and summarily dispatched to the Coast to correct, abrogate, and officially deplore this ancient practice. He winged westward the next day, and should now have accomplished his mission.

But you, ABILITY reader, can militate against this practice, too, wherever you are. We hope it is a strictly Californian practice, but let's be sure.

In Britain it's called "sketching the session".

You will find that the auditor who gives the preclear an abundance of acknowledgement all through the session - lots of "okay", "fine", "yes", "good", "what happened then", "what are you doing", "that's fine, okay", lots of immediate acknowledgement of the preclear and of what the preclear is doing, will not leave his preclear parked anywhere in the session. The preclear only gets parked where there is no communication, and no acknowledgement. You can use as an end-of-session exercise something like straightwire, such as, remember the first auditing command, something they wouldn't mind forgetting about the session, and they will free on this basis. But if you pick up and acknowledge every communication and every attempt of the preclear to communicate, he won't be in any particular need of any kind of present-time exercise at the end of the session because he will be in present time anyway. If you start scanning the session he will start getting the idea that there must be something wrong, and he's feeling good, and he will only wonder what is supposed to be wrong with the session.

RIGHT TO TRAIN

We have two new names to add to the list of those who have the right to train toward certification in Dianetics and Scientology.

D. Scn. Ann Sharpe, 4923 Stimson St., Houston 23, Texas, and D. Scn. Henry (Rick) Maurer, 2701 W. Sunnyside, Chicago, Ill. These Scientologists are both recent graduates of A.C.C. and have met the special requirements demanded by the HASI of those who train.

And a late bulletin tells us: Add to these D. Scn. H. Charles Berner, 1130 Center Street, Highgrove, California. He has also just received the Right to Train.

h.a.s.i. invited

Two conservative civic organizations in Arizona have each one invited HASI representatives to become members of their best committees.

MARCUS TOOLEY, D.Scn.

The cover picture this issue is of Marcus Tooley, D.Scn., D.D., and director of HUBBARD ASSOCIATION OF SCIENTOLOGISTS, AUSTRALIA. Marcus is an extremely able and vigorous Scientologist, graduate of the Doctorate Course in Philadelphia, and of the Advanced Clinical Course in Camden. He is a D.Scn. with Right to Train, and has been very active and successful in training professional auditors in New Zealand. An accomplished public speaker, Marcus Tooley has lectured wherever there are people in New Zealand, and has plans for the whole Down Under area which are cheerfully vast. He is one of the better human beings on Earth today.

CELEBRITY CHAIRMAN APPOINTED

Project Celebrity has now as its Phoenix Chairman D. Scn. Richard F. Steves. He is the HASI correspondent for the project, and it is to Dick that you should write all your questions and reports concerning the actual progress of this hunt.

When you select your game from the Celebrity lists, write to Dick and keep in touch with him regularly. He will have valuable information and will answer your questions promptly.

D. Scn. Steves has very considerable past experience with the stalking, approach, bagging, and trophying of people in many facets of the public eye.

ability magazine extends dire threat

Better get good, solid, sound Subscriptions and Memberships before we decide! We're sure to decide something very soon about Subscriptions and Memberships that will give all the advantage to established subscribers and members.

Right now ABILITY MAJOR goes out to those who have Gift Memberships to HDRF. ABILITY MINOR, on the other hand, the twin and cohort of MAJOR, goes only to those who have good, sound, PAID Subscriptions and Memberships to the HASI and HDRF.

You who receive this issue, for instance, are all set. You've got it made. Unless you let your subscription or membership slide into Marilynn's LAPSED file, you're right in there pitching.

But think of your poor, lost friends who are not getting this. Do them the service of telling them this grave news of what now is, and what will subsequently be!!!

●●●

All instruction in Phoenix is LIVE.

Tapes have been set aside here as an instruction medium and will be used only by D. Scn.'s training in the field to keep processing standard. Coached and drilled continually by L. Ron, Phoenix instructors have now been enjoined to make all their lectures and instruction live. The student receives some twelve hours a day now of live lecture and auditing.

detective hired

Pursuant to the hint in "Dissemination of Materials" (see last issue) on squirrel hunting, the HASI has employed a detective agency in London to investigate BDR Mac Millan.

The "Bristol Dianetic Review", a squirrel sheet in Great Britain has continued unauthorized release of material and libelous attacks on the HASI for some time. Little read, the BDR is yet of some interest to the HASI since so many lies must have some unseen motive.

The agency hired has orders to disclose any criminal past or connections of the editor.

●●●

AT THIS TIME, EVERYONE WHO BECOMES A NEW PAID MEMBER OF THE HASI OR HDRF AND ANY MEMBER WHO RENEWS, WILL RECEIVE FREE ONE COPY OF THE BOOK EDITION OF "DIANETICS: THE ORIGINAL THESIS", BY L. RON HUBBARD.....
