Issue **Ability** 41

CONGRESS WOWED BY NEW DATA, PROCESSES

With the largest professional attendance at any Congress yet the Radiation Congress is described in terms of amazement by old -time D.Scns. They are saying that Ron's lectures at this Congress were like a short A.C.C. Unit more than what you'd expect at a Congress, where there are beginners and people entirely new to Scientology.

The newness and comprehensiveness of data given by L. Ron Hubbard here was the outstanding feature of the Congress along with some LRH Group Processing that set some of the boys back on their heels. You would do well to get a good hold on a set of these Congress tapes and run those sessions of Ron's many times through. You'll get some clues, in addition to some of the best processing ever taped. It's very straight on the button.

Ron covered Radiation and the situation fully in the first day and included a complete report on the research that has been done especially over the recent many months.

On the second day the answer to insanity and psychosis. The lectures concerned the relation of these things, if they are to be called things, to agreement. Included were the new definitions with which an auditor can take apart the problems of sanity vs. insanity in a new way.

The third day Ron presented the new considerations of AWARENESS and gave the scale of havingness, never before released, out of which the largest part of the processes and procedures in Advanced Clinical Unit 15 and 16 have come. Here the subject of the Sub-Zero Tone Scale is just about totally wrapped up.

The group processes, by the way, are all straight out of the new definitions and the new scale.

RESEARCH PROJECT JOINED

The Congress Members themselves, coming from all over North America, are to be congratulated on their good Congress. They handled the very potent material and new processes very, very well.

Congress members were invited to take part in a research project of extreme importance in the handling of radiation. The response from the members was excellent and the project is now well along its way. The "Roentgen Quiz" in ABILITY Issue 40 is one small part of the program. Under investigation at this time is the further improvement of certain chemical aspects of the clearing of secondary radiation effects in the body. Indications in this are good.

MEMBERSHIP PARTICULARS

Issue 40 gave you the news on the single membership set-up. The HASI grew up to the point where it had to be streamlined and we finally did what we have long planned and made membership standard. Instead of having General, Special, Professional we have HASI MEMBER. It's in the direction of less classifying and so is more real. The HASI, long a solid reality to people on five continents, is now getting ever more real.

And we're going to get a couple more continents. There are still some very live continents lying around here.

Here are the full particulars on the membership streamline.

It's all HASI. There is one membership and it is called the HASI Membership.

Membership in the HASI costs $15.00 per year.

All members will now receive the PABs from L. Ron Hubbard (The Professional Auditor's Bulletins). These are issued twice a month and are top information priority.

American Members will receive ABILITY Magazine from Washington, D.C.

British Members will receive Certainty Magazine from London.

The DISCOUNT on books and tapes is now to be 20% for all HASI Members.

Since in the past Certainty and ABILITY have not been duplicating each other as to content, both will now change to some degree. In many cases the same articles will appear simultaneously in both. In all cases all essential information and special features will be covered in both.

SCIENTOLOGY

THE FUNDAMENTALS OF THOUGHT

by L. Ron Hubbard

THE BASIC BOOK
OF THE THEORY AND PRACTICE
OF SCIENTOLOGY
FOR BEGINNERS

$1.00

This book by the founder of Dianetics and Scientology is the basic and complete text of the subjects. It is written with extreme precision and simplicity, and was originally undertaken as a Translator's Edition of Scientology. It has been translated already into many foreign tongues and is expected before long to be available in some form in every country on Earth.

It contains not only the basic information necessary to a good grasp of the fundamentals of life, but also a simple, very workable set of processes which the reader can use to his personal benefit as to increase of ability, well-being, and to the raising of his "I.Q." and such things as earning power and poise. It improves, very simply, one's ability to live.

TAPES AND PLAYERS

The tapes of this amazing Congress are going out fast to auditors and groups. Priced at a special LOW, and with the new member's discounts now in force, we intend to get the material on these tapes to everyone, even if we have to get you the tape-playing equipment at below cost to us and way below ordinary "wholesale".

This is a ten-star tape package and your group can easily reach it at the price set by your Distribution Center in Silver Spring.

The full price for the 13 hour Radiation Congress package is just $94.50. With your member's and your group discounts it's a steal.

Don Breeding of the Distribution Center, who handles all tape recording and reproduction of tapes, has now done something about the other end of the line. His tapes of the Radiation Congress, put on experimental new equipment through a hi-fi radio mike he built for Ron, proved very successful.

At the other end of the line, however, people have problems with the playing of good tapes, the problems being the bad performance of the tape playing equipment generally available. Comparative junk that costs hi-fi prices, but is not high fidelity but mere furniture, is practically the rule in that field.

The fact is that your group doesn't get as much from the tapes when the player is poor as it would from a good player. And they don't keep coming. If your group is at all large you need an amplifier capable of filling up some space. If you want them to come back for more you need the tops in equipment.

In Issue 39 we told you about the setup. What Don did was to go around Washington, famous for its discount houses (no "fair trade" laws in D.C.), and round up components for a tape-playing equipment that would satisfy the highest requirements, with no regard whatever for brand names, but only for performance.

Demonstrated at the Congress, this system proved out as not only a home player system but as a public address player that would fill the Hall of Nations, a very roomy old place. Here is what it consists of: A Fisher PR-6 Preamplifier for $12.49, a Bell Model 212C Amplifier for $50.00, a Viking Model FF75 Tape Deck for $62.87, a Tandberg speaker for $58.16. The complete system is available from the Distribution Center for $180.00 (our price to you is $3.00 less than the total of the components!).

This package includes no cabinetry except for the handsome Tandberg Speaker in its own cabinet. The components are plugged into each other with ease and you could have a lot of fun making

your own cabinet or buy one when you get around to it.

Editor Sanborn asked Don Breeding what it would cost someone to go out and buy such a tape playing system in the ordinary market and got the answer that you couldn't, because this is a tape player and hi-fi amplifier and speaker and what people can buy on the market is a tape machine which is relatively a piece of junk. So that's the way it is.

For music, by the way, this system is marvellous. Your editor has heard an awful lot of hi-fi systems and this is the best he's heard.

It is suggested that you can get this equipment on a gradient scale, buying first the Fisher PR-6 Preamplifier and Viking FF75 Tape Deck for $75.36 and using any available speaker, such as a radio, then get the Bell Amplifier and Tandberg Speaker later.

It's a terrific bargain. By all means get the full system right away, however. You'll be pleased and your group will be pleased. You can sure do a lot with this equipment.

FOR TRAINING INFORMATION WRITE RICHARD F. STEVES, DIRECTOR, ACADEMY OF SCIENTOLOGY, 1812 19th STREET, N.W., WASHINGTON, D.C.

FOR PROCESSING APPOINTMENTS AND INFORMATION WRITE DR. JULIA LEWIS, DIRECTOR, HGC, 2315 15th STREET, N.W., WASHINGTON, D.C.

HGC USES "STAR SYSTEM"

The Hubbard Guidance Center continues and increases in results.

One of the secrets of HGC success is the "star system" by which Dr. Lewis simply takes the best auditors, or steals them, from anywhere they happen to be, and makes staff of auditors the best in the business.

One veteran star HGC auditor, for instance, is Fernando Estrada, who has served as Acting Director of Training at the Academy for several weeks recently and is now back on post at the Center.

Well known to the field and to many Congresses as a fine auditor and instructor, Fernando could easily go into any of several professional athletic clubs in any one of several sports and is ready to start a ball game anytime.

This spirit of game might just possibly have something to do with the results that keep showing up on Fernando's preclear's charts.

THE ACADEMY OF SCIENTOLOGY

At the Academy of Scientology in Washington the first professional course is the H.C.A. It is by far best if one has already engaged upon the adventure of Scientology through the books, through some processing, through some group experience, before his professional course. The HCA Course, now taught by D.Scn. Richard F. Steves, who is Director of Training at the Academy, is very condensed and intensive, very elementary, very thorough. There is no time to sit back and take a breather during this eight-weeks course. That is one of the reasons why one should have looked over the subject before his professional course.

Training at the Academy does not completely end at graduation. It is really a professional society in which one makes use of a great many services not the least of these being correspondence with your former instructors about the various problems of doing the Scientology job in the field. This assistance from the Washington staff is practical and valuable to the auditor.

The evening professional course is now taught by H.G.A. Marilynn Routsong, an auditor since the first course in Los Angeles in 1950 and a graduate of the 15th A.C.C. Leading to a professional certificate the evening course is designed to make it possible for anyone to get his training while holding down a full-time job in the daytime until completion of the course. Marilynn's enthusiasm for auditing and her comprehensive understanding of Scientology are well known to auditors everywhere.

THE PROBLEMS OF WORK

by L. Ron Hubbard

SCIENTOLOGY APPLIED TO THE WORK-A-DAY WORLD
