What Can an Auditor Do?

by L. Ron Hubbard

What can an auditor do?

In the first place, to answer the question fully, we'd have to look over what can be done for Man. And the answer to that of course is *plenty*. We have to look at what's wrong with him and where the case can be entered, the case called Man. And an auditor can practically do anything in any area of that field.

Almost anything you can think of in terms of Man's associations and activities could be bettered by an auditor. We look at it that broadly and we recognize that here and there somebody has been a bit shortsighted. They say, "Well, we can process somebody and make him well." How about processing an organization and making it function? How about the introduction of order into any confusion? You pretty well have the skills of an auditor categorized there: introduction of order into confusions.

Confusions can exist over the entirety of the Eight Dynamics. Now if these confusions can exist over this broad a sphere, we see we've taken in an interesting area. The area is not without variety. And when we say Eight Dynamics, introduction of order into confusion of, we get an idea of the total scope of an auditor.

Now when we start narrowing this down to practicalities, we find some fascinating areas. And auditors have a good reality on these lesser areas; But on the large area, they'd say "Oh well, no. That looks alright as a mathematical formula, but it certainly doesn't make any sense where my activies are concerned." Too big. So we have to find the reality of the situation.

And what do auditors in reality believe they can do? Well, anybody that calls himself an auditor has some confidence, or at least *hope*, of helping some individual to gain better health, better outlook, better ability, and greater freedom. That is about the lowest entrance you have for an auditor.

Now that's certainly on an individual basis and you address the First Dynamic in somebody else. That is always of course the safe way to handle it, because thetans evidently aren't all a big glob which somehow or other broke off from one another, they are individuals.

If you handled all the individuals you would have the thing whipped, and you would get the usual program. Actually you get in essence what I believe to be a sound program too. You pick up any individual in view and put him in good shape and you will find that the area and zone around this individual tends to calm down and become more orderly and more confusion seems to blow off things. This person is a member of a group and you give him some processing and the group is a little less enturbulated. And then by example you can get another member of the group and disenturbulate him a bit and you can go on through a group and you could damp all the confusion out.

When you take a nation, however, of 40 million or 80 million or 170 million or something like this, 200 million, that's an awful lot of single individuals and obviously this many single individuals would be beyond the capabilities of us... or would it be?

They used to say 8 million angels could stand on the head of a pin. Pasteur came along later and said 800 trillion germs could stand on the head of a pin. So all of these germs being so *numerous* you obviously can't do anything to them because you couldn't track them all.

It's the numerousness rather than the invisibility. A thetan, who is essentially a thing of no mass, no dimension (no real, finite location and so forth), is totally capable of confronting another thetan. He gets lazy and sloppy and thinks he has to have mass in the line some place to confront. This is not the most horrible thing a Thetan thinks he can do. The most horrible thing he thinks he can do is to confront a number of things, all of which have different determinisms. He knows he can track one, and if you solve one without getting chopped to pieces yourself, you can solve these three..."Yeah, but," you say, "on a national scene?"

Do you know that if you doubled your money every day, you saved a penny the first day, and you doubled your money each day thereafter, do you know how much money you would have saved in 30 days? Work it out sometime, because would be quite a revelation to you.

And this tells us then that if we had a geometric progression working out there the whole works would be finished up in 30 days. You get the idea.

Obviously we can do something for one individual. But equally obviously going at one individual plus one individual we couldn't possibly do anything on a national scale, could we?

We discover this "big-failure" sort of look of "Let's do the whole nation." You, one person, that's all, and you're going to do the whole country, you, all by yourself.

Let's look at a shorter view, at this family. Let's look at the smallest variety of family, just husband and wife. If we thoroughly address either the husband or the wife, magic: the other person disenturbulates.

If we're looking at a whole world we can look up the line to five, six dynamics there. We can see that we could have *some* influence upon *some* part of *each* one of those dynamics to some slight degree regardless of quantity.

You can't find really a single sector anyplace in any direction that an auditor would look for the application of his skill where he cannot find the first leg up. So basically an auditor's skill is limited first and foremost by his own reality on what is.

He can handle anything as an auditor that he feels to any degree he can be at cause over. To *any* degree. He can do anything for anything that he can think of doing something for. And with the individual auditor this is the limitation of his skill. If he knows something is he can do something for it because he can at least compare its factors and move slightly in that direction.

A fellow can stand right in the middle of the street and have a firetruck about to run over him and if he says that firetruck is totally unreal to him and he can't do anything about it he won't even move out of the road. Where an individual is not addressing the possibility of doingness on *some* part of *some* dynamic *somewhere*, he's being run over by *every dynamic there is everywhere*. Isn't that an interesting view.

A preclear gets so that he can brace himself up against some part of the physical universe. He knows what he knows out of his own cognitions, he's able to face up to things and think about things. But you're not asking a preclear to handle anything. You're just asking him not to be handled. You're granting him freedom.

When you making an auditor, when you're training an auditor, when you're handling auditors, you're doing something entirely different. You are asking somebody the first moment that they make the faintest direction toward helping, altering, changing or improving anything to walk a road which ends with running the engrams out of God. You're asking him now to do something all the way up the line to doing everything everywhere. At least getting the possibility of doing everything.

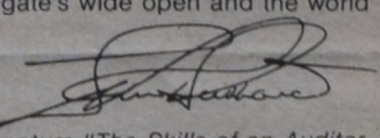

Therefore you have skill being available, a person being willing to exert skill as an auditor to the degree that they can conceive of the existence of things over which there is some slightest possibility of someday in some part being cause.

Now what does that take in? That would be a *long* list. In fact that would be a list as long as the whole world is wide, written in tiny script.

Every once in a while as an auditor you feel apathetic, and feel you're not getting on with it. Well, don't think it's so unnatural because you're walking up a ladder that goes up eight dynamics all the way. And as your perimeter broadens, and as your idea of realities broadens, each level somewhere you're going to hit the degredation of the moment when you decided you couldn't do anything about it in the past.

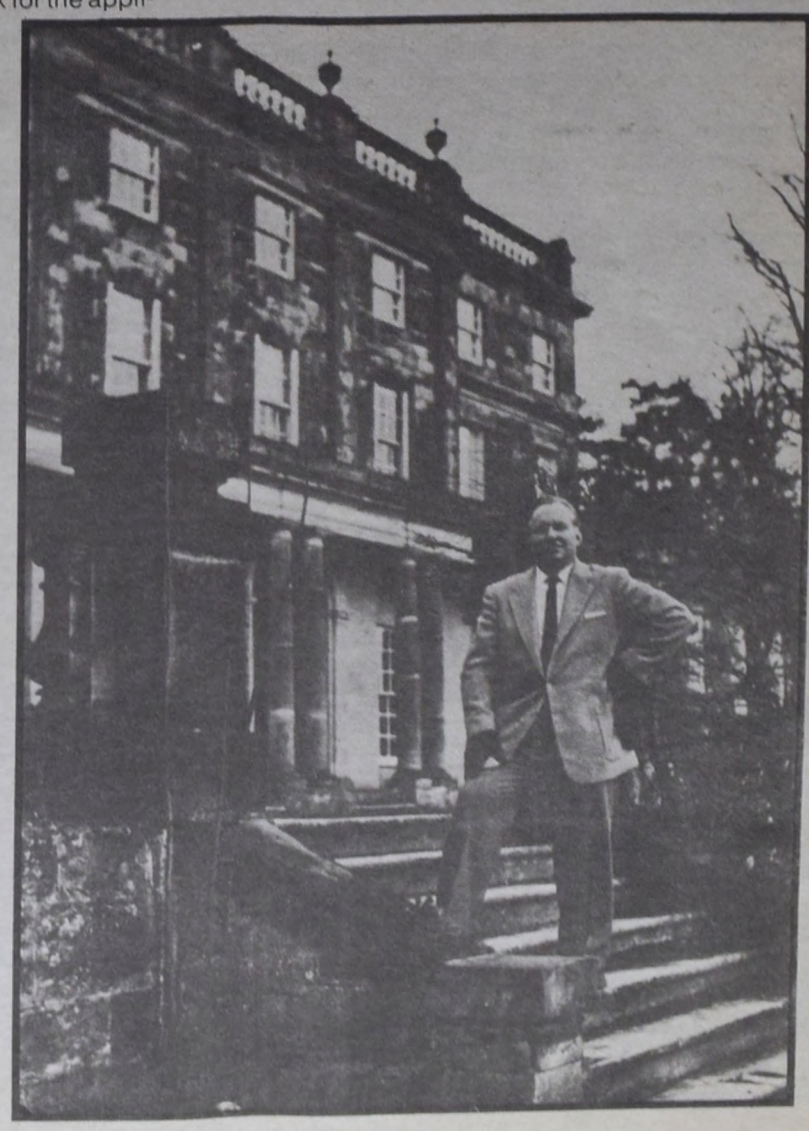

So just don't worry about it. For heaven's sakes understand it. And realize that the skill of an auditor also contains the skill of handling his own reactions. And when he even knows what his own reactions will be in trying to tackle something that can't *possibly* be handled, why he can handle that too.

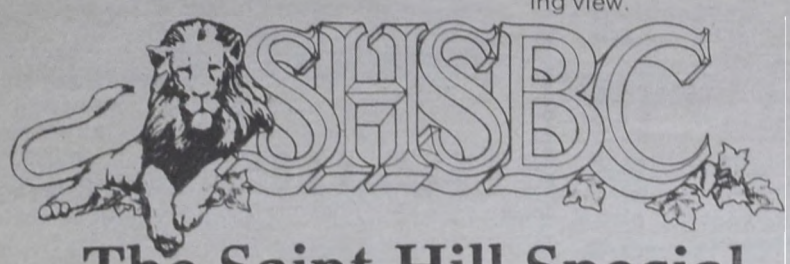

So I guess the gate's wide open and the world is yours.

Expansion Wins!

Trained Scientologists Apply the Tech Around the Planet!

In the policy letter "Keeping Scientology Working" L. Ron Hubbard said, "We have some time since passed the point of achieving uniformly workable technology.

"The only thing now is getting the technology applied." (copyright® 1965,1970,1980,1982 by L. Ron Hubbard. ALL RIGHTS RESERVED.).

Our fellow Scientologists all around the world have been bringing about some great wins by getting Ron's Tech in use. Actions by Scientologists such as these are bringing about a cleared planet and a salvaged civilization!

EXPANSION INTO PIONEER AREAS

Areas new to SCIENTOLOGY– pioneer areas–are getting their first taste of Ron's Tech and what it can do. Here are wins from two such areas:

JAPAN— Arrangements with a large company were made to sponsor a study pilot to demonstrate the workability of LRH Study Tech. This study pilot has just been completed on a group of school children in Tokyo to rave results. The children had before and after tests–both OCA (Oxford Capacity Analysis) and Japanese tests on the school subject they were bogged in. The Briefing Course Graduates conducting the pilot worked with each child in his area of difficulty using the E-Meter and the results were phenomenal! The average improvement was 30% on the Japanese school tests on the bogged subjects. This was the result of using the E-meter for just 2-5 hours with each child! The Japanese company and parents of the children were flabbergasted. They had never been able to get results such as these! They were also amazed at the accuracy of the OCA. The parents couldn't believe how well the OCA tests described their children!

"The Briefing Course Graduates conducting the pilot worked with each child in his area of difficulty using the E-Meter and the results were phenomenal! The average improvement was 30% on the Japanese school tests on the bogged subjects."

This Japanese company now wants to take responsibility for fixing up the whole education system by opening up an LRH Study Method School under the Scientologists' supervision. The Scientologists will train Japanese supervisors who will then train children and adults on LRH Study Tech!

And further... four other Scientologists in Tokyo are starting delivery of the Success Through Communication Course, field auditing, testing, and other services! These Scientologists are connected up to those who did the study pilot.

These are great breakthroughs into the most upstat country in the Far East!

YUGOSLAVIA: Not only are we actually moving in and doing expansion activities in Asia, but we are becoming more active in Eastern Europe, behind the "Iron Curtain". A Scientologist recently undertook a project to go Zagreb, Yugoslavia, as he had been in communication with a couple of people there. He went there and delivered the Success Through Communication Course to a few people. The Success Stories he sent back were great! The result: three Yugoslavs are in the United Kingdom now studying the Student Hat and after some more training will return to open up their country to LRH Tech!

This same Scientologist will also be travelling to Czechoslovakia later this year to help expand the 15 member group that has been operating there for some time!

BOOK ONE NEWS!

Dianetics: The Modern Science of Mental Health, "Book One", continues to spearhead the international LRH Tech boom! For example here's a sampling of some recent news from the US:

Philadelphia Org recently trained an ex-army man on Book One (he came in from of one of the Org's ads for persons to train as DIANETICS™ counsellors). By applying what he had learned, he blew the socks off his ex-commander, a Lt. Cmdr., who is now totally enthused. This opened the door to the 2100 GIs under his command to have Book One auditing.

In Los Angeles at the Los Angeles Org's Test Center on Hollywood Boulevard where there is a huge picture and advertisement for Book One, new public have been coming in at the rate of 1,500 a week. In one day alone recently 480 people were introduced to DIANETICS and SCIENTOLOGY tech at that one test center! The manager of a restaurant next door was so intrigued he came in to see if DIANETICS tech could help him! He was whisked away into session with a Book One auditor, lost a somatic (uncomfortable physical sensations coming from the reactive mind) and was able to stand up straight for the first time in years! He and his brother are now on course at the Los Angeles Continental Organization.

The Los Angeles SCIENTOLOGY® Church's Hollywood Test Center. Over 450 people were introduced to DIANETICS™ and SCIENTOLOGY tech here in one day recently

GOOD NEWS!

Good News is rolling in to *The Auditor* office really fast, and the above is only a small part of what people are creating with LRH's Tech! Watch for more articles in *The Auditor*, and keep in mind:

"If it isn't reported in THE AUDITOR, it didn't happen. Send it in and make it a fact."

Briefing Course Graduate Heads Successful Boarding School

Class VI Dr. Alan Larson presides over a Delphian School Graduation.

"Trying to get from A to B in any major project one runs, on a daily basis, into all the reactive phenomenon you learn how to deal with on the Briefing Course," says Class VI Dr. Alan Larson, headmaster of the Delphian School, an international boarding school located on a 1,300 acre site in Sheridan Oregon.

"Before Delphi was founded I was auditing 50 hours a week; then I was the C/S for a large-ish HGC, so I was using my SHSBC data around the clock. It's safe for me to say that I need, rely upon, and *use* the Briefing Course data at least as intensively now as I did then."

The Delphian School (popularly known as "Delphi"), now in its seventh year, is run entirely on LRH Study Tech. Students study on checksheets and packs created from the ground up by the school's staff (all Scientologists). The courses were developed so that Delphi students would not be subjected to any suppressive educational material produced by psychologists and sociologists.

In addition to the now over 150 students expected in regular sessions this fall, Delphi's summer session has taught large groups of students from Japan to Mexico in study tech and English as a second language. One teacher from Japan noted, "This is the first time I have enjoyed studying so much. I have been an educator for many years and if I had known this method before, my students would have had far less trouble in their studies."

Dr. Larson reflects on the value of training on the Briefing Course: "It's almost incomprehensible to me that people are in such an awful position as having to fight there way through life without using the SHSBC data. The idea of managing an organization, or creating a shcool, or raising a family without having the data of the Briefing Course is really shocking.

"When you think about the difference between what it's like knowing all that data and what it would be like *not* knowing that data, you can understand a lot more about the kind of trouble people have. People without the data are having to fight for their lives in a way that's just not necessary when you have the data."

"As an example— a new student will, typically, arrive and present a valence, a solution, and, if you allow it to happen, the student will spend his time in the school spiffing up, watering down and painting rouge on that valence. He will use the school to find out how to sharpen that valence up. Being an auditor and knowing the tech allows you to say, to yourself at least: this kid has got to learn who he is. There's no point in addressing the problem that valence has. That will not get this kid out. You've got to go underneath that and find the thetan, talk to the tehtan and get the thetan to understand that it's a thetan scene we have here and not a valence scene.

"This happens all the time with students. If you aren't able to spot the fact that they're throwing their education away on a valence, that's what they'll do, for in many cases they're not far enough up the Bridge to have spotted that for themselves. That's an in-life vital ability the fluency of which I certainly got from the Briefing Course. The ability to see it and deal with it—that's an auditor's ability, that's a trained-in ability."

An Education on the Briefing Course Makes Stats Go Up!

Another great week! Class VI Sandy Schwartz (Public Executive Secretary of Highland Park Mission) shows off some key graphs to Ed Mooney (Mission ED, Class VI), and Roger Noll (ASHO trained Class IV and HRD Auditor).

Sandy Schwartz, Public Executive Secretary at Highland Park, Illinois Mission– the number one Mission in Eastern US this last year– uses her Briefing Course data broadly. "It's been about two years now since I graduated and I still feel it's the best cycle I've done in my life. No matter where I go or what I do I have the basic data to operate on. I don't do everything perfectly but because I have a strong foundation I can learn from mistakes much more rapidly than people I've observed who haven't done the Briefing Course. It makes life act like a giant interneship, giving me the mass on the Briefing course tapes when I see the real thing in life. I can quickly assimilate what's happening and be able to understand that piece of life with infinitely more understanding. Therefore my KRC is very high in relationship to the amount of actual experience I've had. It's always seemed to me that as an auditor I've gotten four to ten times the amount of experience learning how to audit as a Class V or VI, as opposed to auditing with the data I had as a Class IV. It takes *less* time to become good auditor via the practice.

"I still have the ups and downs in life that occur when you are willing to go out and tackle things and take on more than you can chew, but there's absolutely *no* doubt that each and every time I'll come up all the more powerful for it, which is something I've observed in Class VIs who were *really* made into uncompromising products.

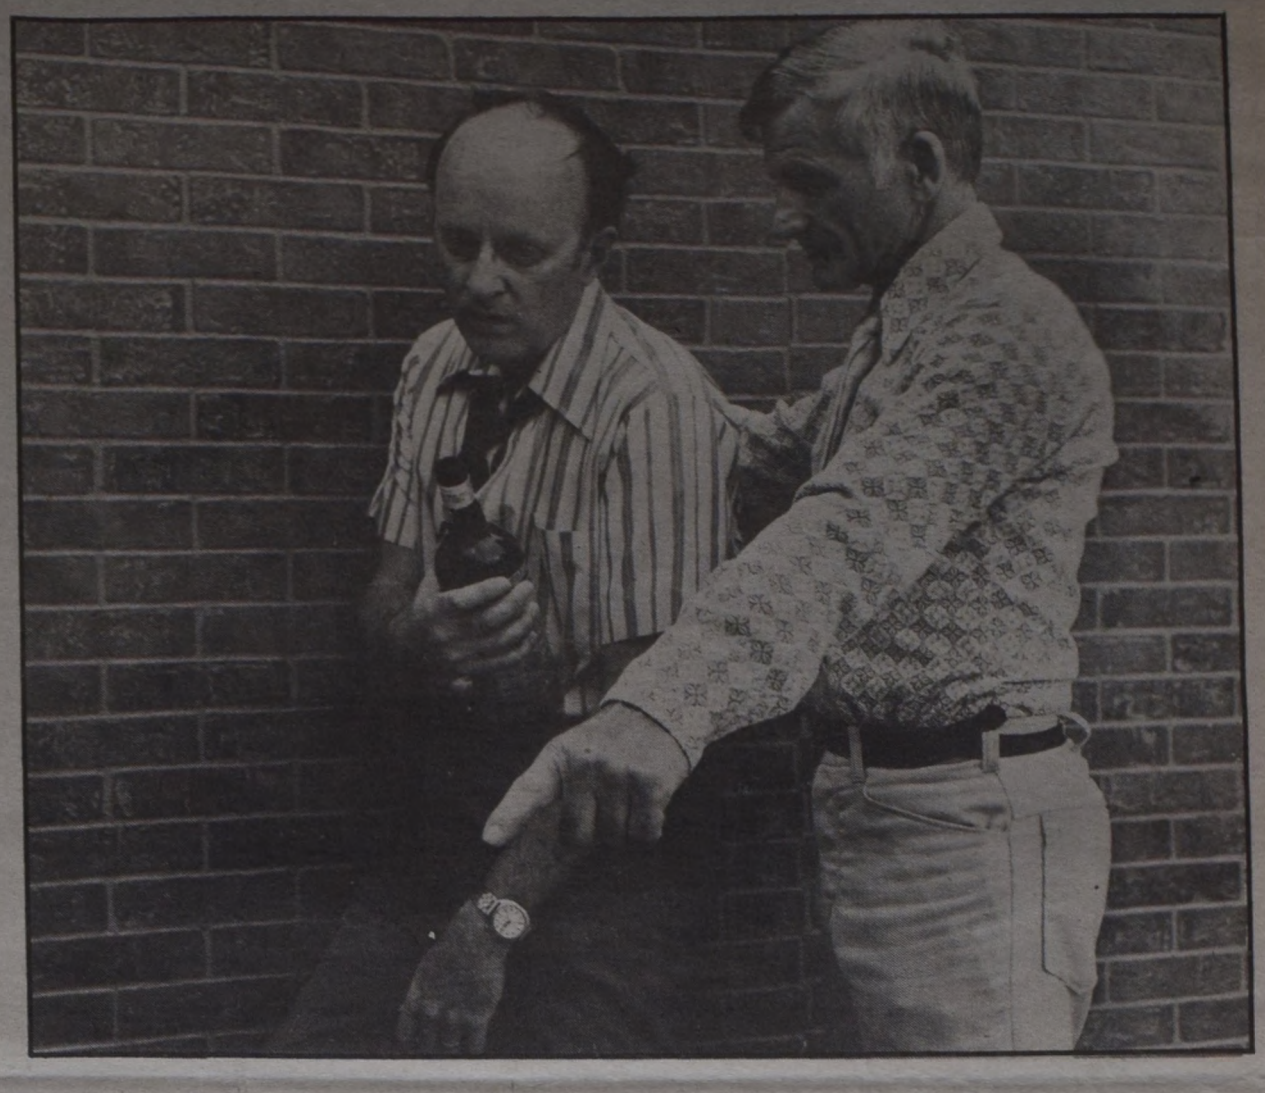

"I'm now working with another Class VI, Ed Mooney. There is hardly a situation that comes up that isn't covered on the Briefing Course, from dissemination to a pre–Scientologist up to Level VI. I refer to six folders full of Briefing Course tape notes almost every week.

"I look forward to doing the VIII Course to polish it off.

"I asked an ASHO staff member once– why do I get so much respect from the crew when I walk through ASHO, and he said, 'because you are one of *our* Class VIs and we really watch out for and take care of our products.' It kind of made me feel like a celebrity at ASHO. That seemed right to me, so that's why I consider ASHO to be *my* org."

Focus on Success

The Incredible Saint Hill Special Briefing Course

I have done over 30 courses in Dianetics and Scientology and this is by far the most rewarding, most valuable, most comprehensive, and most vital course I have ever done. Technically I have a full and basic grasp of all the data, including exact knowledge of the sequence of developement. I feel like I have been with Ron all through Elizabeth, Witchita, Phoenix, England and beyond. I have full data on the whole track and what it consists of. All this from the BC.

With regard to my wins on the BC it is basically one win in life— you have tons of strange ideas about how life and your mind works. Even after getting processing a person isn't a lot better off as he doesn't know *how* we got to be as we are— in studying the BC I learned how the mind works, how we got to be as we are and the "laws" of life. this has given me a lot of certainty and I can handle my life easily, I can grant beingness and handle people around me.

Nuri Tardiff enjoying one of the over 300 taped LRH lectures on the Briefing Course.

Knowing the data on the BC has put a lot of order into my thinking as the lies have dropped away and the truth of man's existence is apparent.

—Gerett Wikoff

Once upon a time I was embarking on the Road to Truth. I was travelling down the Road, looking for Truth–truths– understanding– the Whys and Wherefores, and how to you do this? and why is it that way? And what makes them act that way? And, I don't feel just right– I wonder how come.

On and on I went– like a small child looking for a guiding hand, and someone to furnish me some answers.

In 1962 I went to St. Hill England for the Briefing Course. I stayed 12 weeks, and had to return home due to airlines not allowing pregnant women to fly after a certain period in the pregnancy.

In 1964 my husband and I and the two kids went to England, this time completing the BC.

The data was staggering. I found *tons* of answers–I just ate it up.

I incorporate what I learn into my own knowingness, so that it becomes a part of me *modus operandi* [operating basis]. I use it in my daily living. There is a gigantic storehouse of the knowledge on the SHSBC. It blows tons of misunderstoods. It itsa's this and itsa's that— answers, answers, answers.

The biggest win for me personally from doing the SHSBC is that I *GOT* IT—from Ron. He put it there for all of us to get, and use, and *I GOT* it, and I USE IT.

You can't get all that data, really understand it, and not use it. It becomes a part of your new way of living. And you use it to handle your fellow man. You understand them much better, and can *help* them much better– and that's the name of the game!

—Millie Galusha

Administratively I now have a full understanding of the philosophy of organization, due to several organization tapes included in the BC data as Ron discovered the tech. With this I know that I can bring about a better and better 3rd dynamic of Scientology.

I have got a thorough knowledge of ethics tech and how to apply it, and a much deeper understanding of why it is and its usefulness.

But most of all, the BC has given me a personal, human understanding of LRH— I know who he is, where he came from, and what he is doing on this planet. These were questions I had forgotten I had, and which I thought might never get answered.

Ron holds no data back from us. No one wishes us to share in it more than he does. he has made it available for all who want it— right here on the SHSBC.

I have a new and deeper respect for all Ron has done. And for the sense of humor he kept along the way.

Yes, you really get to *know* him on the BC. It's fantastic.

—Julie Grimes

LRH's data, the course, the supervisors, the other wonderful students and all the back up admin personnel here at ASHO have lo and behold turned me into an auditor! Surprise! —evidently to me only— *they* knew what they were doing all along— keeping the service coming, helping me solve any problems and surrounding me with their pure intension and affinity so that I could really expand and acknowledge my purpose of wanting to help people.

The Levels A-F make the SHSBC the fast way to become an expert auditor and I find my untrained OT friends feeling as I did previously, and routing onto the BC now, to discover how the tech works and to become their own best auditor for Solo NOTs.

I thoroughly recommend the SHSBC as among the most interesting and rewarding things to do in a life time. The others, of course, are the other half of the Bridge!

—Dale Clerk

I'm having the best time on the Axioms! I'm looking again at the commonplace realities— is-nesses— accepted by the human race— perceiving the amazing inversion we've all fallen for, and laughing my way out of them! I'm mocking up what whould *really* be done about varous things if one truly wants to handle them and it's hilarious!

—Dee Gee Carpenter

Learn to *Fly Solo!*

at the Hubbard College of SCIENTOLOGY®— ASHO

Find out how to solo audit and get moving up onto the OT Levels. The Solo Courses– Part I and Part II– give you the knowledge, skills, and confidence you'll need to audit yourself solo on the incredible upper levels of SCIENTOLOGY® auditing: the OT Levels. The Solo Courses contain vital data on auditing and life from the vast amounts of tech on the Saint Hill Special Briefing Course plus special bulletins and drills on auditing oneself solo.

On Solo Part I (delivered at ASHO and Class IV Churches and organizations) you'll become familiar with the parts of auditing, and learn how to expertly run the E-Meter.

At ASHO on Solo Part II, under ASHO's expert course supervision, you'll go in session for your first metered solo auditing! When you're really winning in your auditing, the ASHO C/S awards you your wings, and you're ready to solo audit on the upper levels with certainty! Training on the Solo Course at ASHO is easy! You get the same top supervision and service that makes the Saint Hill Special Briefing Course at ASHO so famous.

Successes from the Solo Course at ASHO

The training has handled totally a not quite handled ruin that kept hanging around plus several others that I though could only be handled on advanced courses only. I have never been so stable, my postulates work every time with no counters even considered. I fully really understand the mechanics of the MEST trap, therefore it can't get me again like it has so many times in the past.

It is definitely an overt (a very cruel one) to have all the fantastic processing I've had with out the training so I won't get trapped again.

I've never been this blown out before, because I understand more than ever before on the new Solo Course. Thanks Ron.

—Bob Toohey

I'm experiencing the case gain Ron speaks of on the first study tape as appertaining to training. I've changed my mind 180°– one goes up the Bridge in the course room.

When someone asks what one's case level is, I'm beginning to think the more accurate response would be to say what class auditor one is!

—Dee Gee Carpenter

Get on the Solo Course now! Call the Registar at ASHO Day at (213) 660-5553 to reserve your place.

The donations for Solo Course Parts I and Parts II are listed in the insert with this issue.
