healing is accomplished by other Christians through reliance upon divine power, they remember that the Master, when told by one of his disciples that another was casting out devils in his name, who followed not after them, said: "Forbid him not: for he that is not against us is for us."

As to the question of the reality or unreality of matter, pain, and sickness, it may be stated that, according to Christian Science, matter is a mortal concept, gained through the physical senses, of the ideas or manifestations of infinite Mind. As the physical senses are imperfect, this false material concept is to be corrected through a purified consciousness, attained through spiritual growth. Christian Science teaches that God is a being of infinite goodness and power; that He is the sole creator; and that all that He made is good. This being so, the necessary conclusion is that an infinitely good God does not create evil; that God is not the author of sickness, but that its apparent existence is due to a false concept of His perfect creations. Therefore, Christian Science teaches (Science and Health, p. 468) that "Spirit is the real and eternal," and that "matter is the unreal and temporal."

The united testimony of many thousands of intelligent people who have become adherents of Christian Science is, that through its teachings and daily practice they have been enabled to attain to "a knowledge of the immanence of God and in daily fellowship with our Lord" in a higher degree than anything they had ever before known. And it is this knowledge and consciousness of the divine presence which has enabled them to overcome many mortal discords and displace evil with good.

[William J. Bonnin in *Southport* (Eng.) *Visiter*.]

Christian Scientists have nothing but respect for those conscientious doctors who labor so unselfishly for their fellow-men. It is upon the hypothesis that disease has a material origin, and that it is accordingly to be destroyed by material means, that medical science has undertaken its gigantic task, its interminable research and unending experiment. It is quite possible to respect loyalty and devotion to this belief as to the origin of disease, and to honor the many virtues that so often go hand-in-hand with it, without subscribing to the belief itself: and that is the Christian Scientist's position. He is convinced from experience that all causation, including the origin of the phenomenon known as disease, is mental. He believes that through sin came death into the world, and, as a necessary deduction, all forms of sickness as well: that to heal sickness scientifically, in a manner to deserve the name of healing, and not of mere mending or substituting, the actual cause of the sickness must be reached, and wrong or sinful thinking give place to true thinking or knowledge. This is to let that Mind be in one "which was also in Christ Jesus," and it is in this way that God helps man to help himself.

Mrs. Eddy has written (Science and Health, p. 40), "Science removes the penalty only by first removing the sin which insures the penalty. This is my sense of divine pardon, which I understand to mean God's method of destroying sin." I read in this morning's paper that a cure for the morphia habit had been accidentally discovered. It consists in drinking every half hour a decoction of dried leaves found somewhere in the Malay peninsula. Now does the belief commend itself to any inhabitant of what the reverend gentleman calls "the kingdom of intelligence" that an all-merciful God refused to help, say, the poet Coleridge to help himself, because some obscure natives in Malay had not then chanced upon certain dried leaves and tried to make tea from them? A very great number of slaves to the drug habit have been freed through an understanding of Christian Science, and have proved the everlasting power of Truth; and though these may be told that for not preferring to trust to dried leaves from a Malayan jungle rather than to the omnipotence of the living God, they are intellectual outlaws, they are not disturbed thereat, for they have gathered the meaning of Paul's words, "Hath not God made foolish the wisdom of this world?"

[Henry Deutsch in *Irish* (Minneapolis, Minn.) *Standard*.]

Our critic is candid enough to admit the fact (which of course he cannot dispute) that Christian Science is affording to people that which for some reason—whatever it may be—they have not been able to find in any other direction in which they have sought; that it is healing the sick and that it is lifting to the contemplation of things spiritual and religious those who have been sunk in the slough of despond of atheism and agnosticism. He might go farther, if he were willing, and find thousands who have exhausted every other means to recover health, without success, until they found it in Christian Science, and who in their search have not neglected the use of suggestion, hypnotism, and allied agencies, which this critic says are the foundation of cures in Christian Science. The fact that Christian Science has cured, and does cure, a large number of cases where those last-mentioned agencies have proven ineffectual, is a sufficient answer and irrefutable proof that his theory is wrong as to the means by which Christian Science cures.

Notwithstanding that it is apparent from the tone of his article that he considers his religion the only pure religion, he is, nevertheless, compelled to admit not only that there are thousands who claim to have found a religion or a creed they believe better than his, but, above and beyond that, he can find the proof of cases in large numbers where Christian Science has brought to men and women the solace and comfort and the knowledge of God that heretofore had been sadly wanting in their lives—all their previous creeds and religions to the contrary notwithstanding.

Our Master knew too well that mere words alone—bare theories, doctrines, and dogmas—were not sufficient to prove his authority or the soundness of his position. He established in his time the rule or Principle by which the soundness of a claim could be tested. To the disciples of John he said: "Go and show John again those things which you do hear and see: the blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them." And again: "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also: and greater works than these shall he do."

When the Principle of Christian Science was revealed to Mrs. Eddy, she knew that it was not sufficient to say that she believed, or merely to declare certain doctrines and dogmas. The world at that time, as now, had been surfeited with words instead of works. She knew that her theory had to be proven, and so today, after forty years, Christian Scientists are standing not merely on the profession of a certain creed or the exploitation of a particular doctrine, but upon the proof—in thousands of cases—that its truth can be proven and demonstrated in practical application in daily life here and now.

Christian Science is a demonstrable religion. It is Christian because it is based wholly and entirely upon the Bible and the works and words of the Master; and it is scientific because it is the exposition of certain definite fixed rules by following which the relation between God and man, and man and his fellow-men can be definitely demonstrated and proven, and by which the commands of the Master can be consistently obeyed and followed, not only in part, but in whole. The Master sent his disciples not only "to preach the gospel," but "to heal the sick." Christian Scientists are doing both, and in the way of the Master's appointing, to wit: through the power of God—Spirit.

[Jesse Pickard in *Rochester* (N.Y.) *Democrat.*]

It is noteworthy that the Christian religion is founded upon the superiority of the spiritual over the material and can only thrive when demonstrating this superiority. The miracle of yesterday is the commonplace of today, and yet the materialistic thought is ever ready with a bland incredulity to resist the very progress which raises men from self-imposed limitation.

Christ Jesus taught and demonstrated that a right knowledge of truth, a correct mental state or communion with God, a proper prayer, would save the sinner, heal the sick, and raise the dead. If Christian Scientists are endeavoring to follow his precept and example with apparently increasing success, it means much to humanity. From a Christian standpoint, "Why should it be thought a thing incredible with you, that God should raise the dead?"

[George A. Law in *New Haven* (Conn.) *Union.*]

The teachings of Christian Science do not include a denial of sin, sickness, and death as a part of the experience of this human material existence. On the contrary, Christian Science teaches the recognition of the need of practically and effectually coping with these disturbers of the peace and harmony of man. In Christian Science these disturbances are necessarily classified differently than in other systems of healing, because of the fact that Christian Science is a religion.

The Principle of Christian Science is God. And as God is Spirit, Christian Science healing is therefore in no sense material, but is a spiritual healing. It results from compliance with God's spiritual laws. It is therefore in no way governed or affected by any material laws. The marvelous instantaneous healing works which Jesus accomplished by means of this same omnipotence of God were performed in accordance with spiritual laws and in direct opposition to laws of matter. Though there is abundant available evidence to satisfy the most skeptical that Christian Science has repeatedly healed every disease which flesh is heir to, it it is not claimed that at this time a sufficient understanding of this healing Principle has been attained to meet every case. Christian Scientists are perfectly willing that the record of Christian Science as a healing agency shall be compared with any other healing system.

[Charles M. Shaw in *Blackpool* (Eng.) *Times.*]

Our critic speaks of the "cheap dismissal" of pain and suffering in Christian Science, and assumes that it blandly ignores their value in spiritual development. Had he read the text-book, Science and Health, he would have learned that the position of Christian Science on this subject is exactly that which he defines as the Christian view. He says: "It [pain or suffering] was the warning voice that something was wrong and needed adjustment. Its intention was always remedial, to prevent the mischief going farther, and to demand the application of the remedy." On page 265 the Christian Science text-book says, "The loss of earthly hopes and pleasures brightens the ascending path of many a heart. The pains of sense quickly inform us that the pleasures of sense are mortal, and that joy is spiritual. The pains of sense are salutary, if they wrench away false pleasurable beliefs and transplant the affections from sense to Soul, where the creations of God are good, 'rejoicing the heart.'" And a multitude of quotations of similar import might be given if necessary. The implication that Christian Scientists pay no price for their spiritual advancement is thus shown to be without foundation, and is in singular contrast to the complaint of another critic that Christian Science is ascetic in its practice.

Attempts are made to justify such criticism as I am dealing with on the ground that Christian Science teaches the unreality, the nothingness of pain. If unreal, how can it be salutary? Undoubtedly there is seeming contradiction here to the superficial thinker. But the contradiction is only apparent, as I shall endeavor to show. The fundamental truth of Christian Science is that "all is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). This Mind, being omnipotent, omnipresent, omniscient, perfect Love and holiness, there can be, absolutely, no reality in what is opposed to it, viz., evil. There are some "orthodox" thinkers who reconcile their beliefs in the reality of evil with the infinity of God by the supposition that He has in some way "limited" Himself, but to most men this is an inconceivable proposition. Christian Scientists therefore give no place to evil except as a negation—just as darkness is the negation of light. So that the varied forms of evil—sin, sickness, and death—have a "relative" reality: that is, they are real only to human sense.

But material sense is not the means of apprehending nor of receiving abiding reality, as the following Scriptural passages plainly show: "The natural man receiveth not the things of the Spirit of God;" "I know that in me (that is, in my flesh,) dwelleth no good thing." Evil is real enough to human sense, real as darkness, because it is the absence of Truth and Love; but in relation to God and Truth it has only a negative existence. And so Christian Science teaches that knowledge of the truth destroys evil—as Jesus declared: "Ye shall know the truth, and the truth shall make you free;" "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." It is on this basis that the works of healing and of regeneration are done in Christian Science. But the overcoming of the material sense of things by knowledge of the truth involves constant effort, prayer, watchfulness, and self-abnegation. Yet this is not salvation by "works;" it is truly of grace, the grace contained in the revelation that man is the image, the child of God, and in the assurance that the resources of divine Love are available in every effort he makes to realize his sonship. "Work out your own salvation . . . for it is God which worketh in you."

Christian Scientists are bidden to seek and strive to enter the narrow path of life; it is, therefore, not correct to speak of the "very ease and assured pleasantness of the way in Christian Science" in this connection.

[E. J. Simpson in *Grady County Express*, Chickasha, Okla.]

We are told by John that "God is love." Christian Scientists believe this; therefore they cannot believe that God, divine Love, sends affliction, woe, and suffering. Christian Scientists believe the words of their Master and Wayshower, Christ Jesus, when he said: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Then again, after his resurrection, when thought was as clear as sunlight, he said: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

In the practice of these Biblical works, Christian Scientists are certainly making an honest effort to live close to the Christ. The sick are being healed, sinners reformed, homes beautified with the harmony of love, man's spiritual sonship as the image and likeness of God is being recognized, and the old pictures of an angry Father replaced with the new-old gospel: "God is love."

True life is the realization of the higher virtues—justice, love, truth, liberty, moral power—in our daily activities, whatever they may be.

CHARLES WAGNER, in "Simple Life."

AMONG THE CHURCHES.

KANSAS CITY, MO.

Some of the incidents connected with the loss by fire [Jan. 29] of our First Church edifice in Kansas City will perhaps be interesting to the Field. The cheerful Christian spirit displayed by the members of the church and the congregation over the loss of their church home, and the eagerness displayed in the general desire to take immediate steps to rebuild, seem ample proof of the demonstrative side of their faith. While the fire still raged arrangements were completed for the use of the Auditorium Theater in which to hold services the following day, Sunday. At the same time the officers of Second Church were vainly trying to reach the officers of our church to place the use of their beautiful edifice at our disposal. Monday evening following the fire, we met in Second Church and unanimously decided to rebuild at once. The new edifice is to have fire-proof floors and gallery, with steel girders supporting the roof. A very satisfactory sum was subscribed toward the building of the new edifice.

The letters received upon this occasion from the authorities of Second and Third Churches of Christ, Scientist, breathe a spirit of love beautiful to experience and so satisfying as an expression and outcome of our faith. Several years ago, when the members of the Jewish synagogue were without a place of worship, our church extended them the use of First Church edifice; but their need had been met, so that they did not accept our proffer. However, this offer was bread cast upon the waters, and the magnanimous manner in which they have extended to us the free use of their very beautiful temple for our services is surely the bread returned after many days. We append the letters exchanged between our brethren of the congregation B' Nai Jehudah and our church committee. Such an exhibition of the spirit of brotherly love is truly inspiring.

Correspondence.

Kansas City, Mo., Jan. 31, 1910.

James N. Russell, First Reader, First Church of Christ, Scientist.

Dear Sir:—Your letter of Jan. 31, requesting the use of our temple, received. I have submitted the same this date to a special meeting of our board of trustees, and they desire me to extend to your church their sincerest sympathy in its great loss, and assure you that we are only too glad to give you the use of our temple building so far as it does not absolutely conflict with our own uses. With this in view, I am authorized to tender to your church the use of said temple building for the balance of our temple year, ending in June next; said uses to cover the auditorium and annex for Sunday and Wednesday evenings, and Sunday afternoon, subject only to such uses of our congregation for holidays and similar purposes and upon due notice to your church. We regret that we are unable to give you the use of our Sunday School annex or auditorium for Sunday morning, on account of use of same by our own Sunday School. We would not think of charging any rent, and would only ask you to defray the actual expense of janitor, light, organ power, and heat. We trust that you will be able to avail yourselves of our building.

Very truly yours,
The Congregation B' Nai Jehudah,
By DAN LYON, *President.*

Kansas City, Mo., Feb. 1, 1910.

Dan Lyon, President of The Congregation B' Nai Jehudah.

Dear Sir and Brother:—Your generous offer—that we may use your lovely appointed temple of divine worship for the ensuing four months free of charge, and as if it were indeed our very own—brings us joy unspeakable. Our loss is so minimized by this outpouring of the Spirit of God that words are inadequate to express our appreciation of your noble and kindly purpose, which reminds us that all things work together for good to those who love God, for it is the golden rule of heaven come down to earth. Deeply are we grateful for this spirit of brotherly love which lightens all mortal burdens and transforms our earth into heaven. Truly there is but one God, and what joy we might all experience if His nature were understood to be love, and man's greatest joy to be loving. We will gladly conform to your suggestion of defraying the expense of janitor service, organ power, light, and heat. We desire to commence using your temple next Sunday evening, Feb. 6.

Yours in brotherly love,
Committee.

[The following editorial clipping, from the *Kansas City Journal*, is also of interest in this connection.—EDITOR.]

One need not commit himself to the doctrines of Christian Science to admire most sincerely the manner in which the adherents of that faith are meeting the actualities of the recent disaster which wiped out the beautiful church edifice at Ninth and Forest. The Science brethren know how to face facts as well as other folk, and to face them with a smile is the bravest and most inspiring courage that can be displayed. All persons who are possessed of an iota of Christian charity must sympathize with the congregation which lost its church home, and must admire the Spartan courage which enabled the homeless worshipers to gather smilingly under an alien roof and carry through their uplifting service on "Love" as though nothing had happened, without a single overt reference to the calamity which had befallen them the night before. Possibly a faith that regards Christian Science as heretical would be taxed to preserve such a poise under such circumstances, and there are lessons involved in the situation which others might learn with pleasure and profit.

[Written for the *Sentinel.*]

THE PROVING.

RUTH INGRAHAM.

How do I know my immortality?
When each morn brings to me a joy so deep—
As deep and full and strong as deeps of sea,
Thrilling and filling firth and gulf and bay—
The purer tides of Life itself fill me!

How do I know that God is Love? Why all—
All that I hear or think or feel or see—
Proves Love the only power and permanence,
Makes this the one thing sought of every man,
Each in degree of his development,
In blind, mistaken ways, or ways of light!

How do I know the Lord Christ's words are true?
When works prove now, as then, their certainty;
When the obedience of a willing faith
Endows me with a measure of his grace,
Makes me the instrument of heavenly power,
And, with a humble, rapturous gratitude,
I see his miracles beneath my hand!

O doubting one, would there might come to thee
The inward sense that long hath satisfied
My soul, once yearning, seeking, doubting, too!
Believe Truth for the works' sake. Take on faith—
The little thou art ready to perceive:
Then do the truth thou knowest—and this done,
Thou shalt be taught the truth thou need'st to know.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

MRS. EDDY'S HISTORY.

I HAVE not had sufficient interest in the matter to read or to note from others' reading what the enemies of Christian Science are said to be circulating regarding my history, but my friends have read Sibyl Wilbur's book, "Life of Mary Baker Eddy," and request the privilege of buying, circulating, and recommending it to the public. I briefly declare that nothing has occurred in my life's experience which, if correctly narrated and understood, could injure me; and not a little is already reported of the good accomplished therein, the self-sacrifice, etc., that has distinguished all my working years.

I thank Miss Wilbur and the Concord Publishing Company for their unselfed labors in placing this book before the public, and hereby say that they have my permission to publish and circulate this work.

MARY BAKER EDDY.

MEDICAL LEGISLATION.

THE question of medical legislation which has for its purpose the curtailment or prohibition of all practice of the healing art except that by the so-called regular schools, is up again in one or two of the states, and has called out serious protests from those who can see in such legislation as is asked for by the doctors nothing but an effort to invade the individual liberty of the many for the benefit of the few. Among those newspapers which have commented on such proposed legislation is the Ithaca, N. Y., *Journal*, from whose editorial columns we quote as follows:—

If medical science savored less of empiricism, if its professors and practitioners were more nearly agreed in their diagnoses of disease and their methods of treatment, if those who rank as authorities would less frequently burst into print with statements that all the rest are mistaken and only they are right, if there were fewer disagreements and a more rigid adherence to the theories and rules that are laid down in the books, we might eventually be led to believe that those who write on this subject speak with the voice of authority. As a matter of fact, the whole system of medical science seems to be in a state of flux, as witness the changes in practice that are continually being made. . . . It would be interesting to know how far they have been influenced in this direction by their observations of the thousands of cases in which Christian Science practitioners have restored to health and vigor those who have been pronounced incurable by their physicians.

While the *Journal* holds no brief for the Christian Science practitioners, it frankly admits that it sees no useful purpose that will be subserved by the passage of such a law as the physicians have asked for. It believes that every man and woman has the right to choose whom they will employ in case of sickness, and it holds that the allopathic school has as much justification in asking for legislation to protect the people from those who practise homeopathy as it has in asking for laws prohibiting the practice of Christian Science. It believes that such a statute would be an unwarranted and unjustifiable interference with the rights of the individual and a severe blow at personal liberty. For those who look upon Christian Science as a delusion, there will always be enough physicians within easy reach, and no member of the Christian Science cult will ever offer the slightest objection to their employing regular doctors if they desire to do so. All they ask—and this they demand as their right—is the privilege of exercising their own preference if they are attacked by sickness.

The doctors can afford to be patient a little longer. If Christian Science, in its application to the cure of disease, proves to be ineffectual, it will not long survive the test to which it must inevitably be subjected. If it is in error, it will fall of its own weight. If it demonstrates its power to heal the sick and restore to health those who are bearing the burdens of disease and are daily tormented by the grim specter of fear, it will survive, even as the doctrines of the Christ upon which it is based have survived all the ravages of time. No human power can stay or turn back the tide of its infinite helpfulness.

Fortunately for the cause of personal liberty, those who are behind these bills are not making any headway with them, because it is becoming more and more apparent to the lawmakers that there is no popular demand for such legislation, and that the better class of doctors are not in favor of legislation in connection with their profession other than such as would keep their ranks free from those who profess to be what they are not and those who would disgrace it by criminal practices.

When we remember that there is scarcely a city, town, or village in this country in which there is not some person who has been healed by Christian Science, and that many of these persons had been "given up" or pronounced incurable by some "regular" physician before they turned to Christian Science, it is not to be wondered at that class legislation which has for its title, "An act to regulate the practice of medicine," but which behind that cloak is in fact an effort to create a trust, is not in favor with the plain people; and this has been brought to the attention of their legislative representatives in too convincing a manner to be disregarded.

ARCHIBALD MCLELLAN.

THE PROMISE TO THE CHILDREN.

ON the day of Pentecost, that great awakening to the spiritual facts of being, Peter gave a long address to the people who from all parts of the world were present in Jerusalem, and he quoted the psalmist's words: "Thou hast made known to me the ways of life; thou shalt make me full of joy with thy countenance." Peter also said, "The promise is unto you, and to your children." It was not long before this that the great Teacher himself had made special provision for the children in his blessed ministry, when he said, "Suffer the little children to come unto me, and forbid them not: for of such is the kingdom of God." Again, we read that when he healed the sick, the blind, and the lame in the temple, the children shouted his praises, while the priests "were sore displeased."

At the present time as never before, thought is turned to the children with a view to bettering the conditions under which they shall grow up. It is generally admitted that the moral tone of our cities is unwholesome for childhood, but no one can show a good reason why this should be so. If the moral tone in the home is what it should be, the child must be safe wherever he goes, all the seeming forces of evil must disappear before his pure thought; but here we may well recall the passage in Hebrews, "Thou madest him a little lower than the angels, . . . But now we see not yet all things put under him."

Of old the Israelites were bidden to teach their children diligently and constantly the laws of God, as the only means by which health, happiness, and prosperity could be secured. Where this was done the results were wonderful, as in the case of Joseph, of David, of Daniel and his companions in Babylon, and in many other instances. This training can and should begin with the earliest hours of a child's life; even before his lips can frame the simplest words he may begin to feel the power of Love and Truth and be taught to choose good and not evil at every step of the way. To make this training count for the utmost, the glorious realities of spiritual being must ever be kept before the thought, that of parent and child alike. The smallest child can reflect enough of divine Truth to be healed thereby when material means are of no avail, and the proofs of this fact are daily increasing wherever Christian Science is known.

All great reformers who strive to do much for children do it because they have at least a glimpse of divine pos-

Digitized by Google

sibilities for the child, and the more they know of man's true possibilities the better for all concerned. Wordsworth says,—

> The youth, who daily farther from the east
> Must travel, still is nature's priest,
> And by the vision splendid
> Is on his way attended.

But we cannot agree with him when he says,—

> At length the man perceives it die away,
> And fade into the light of common day.

No! "the vision splendid" is the vision of the Christ, and it is for every day and for all the years. It is the "gift" of which Peter spoke, and it is being realized in its fulness through the ministry of Christian Science. It makes the worn and weary mortal "become" a child, even as Jesus said, and it prepares the child to play on the serpent's den, as the ancient prophet foretold, fearing no harm nor finding any when "the earth shall be full of knowledge of the Lord, as the waters cover the sea." Our revered Leader says (Science and Health, p. 62) that children "should become men and women only through growth in the understanding of man's higher nature." Then every good thing promised in the Scriptures will crown their lives.

ANNIE M. KNOTT.

NOT A SPARROW FALLETH.

THERE are many theological writers these days who undertake to explain the acknowledged injustice of material law, as the expression of a divine order, by dwelling upon the largeness and scope of God's intent. Said a cultured Christian man recently, "The elemental powers expressed in lightning, earthquake, flood, etc., are beneficial and necessary to man in his collective capacity. They cause loss to the few, but bring safety, health, and happiness to the many. No one is to blame for these disasters, and no power exists which can prevent them."

Such a conviction respecting the divine order might be consistently entertained by those who think of the Deity as subject to human limitations and incapable of devising an order of expression which would bring justice and joy to all and suffering and sorrow to none, but for those who declare that God is infinite in wisdom and power to believe that His government is such a makeshift of good and evil is certainly an astonishing incongruity, and this belief presents the greatest possible contrast to the teaching of Christian Science as expressed by Mrs. Eddy in "Unity of Good" (p. 52), where she points out that the destructive elements, poisons, rabid beasts, etc., spring from the falsehood of evil. Those who think of these things as manifestations of divine law would be authorized to stand in the presence of a catastrophe like that of Messina and exclaim, "Behold the works of God!"

This thought of the unimportance of the individual interest, its entire subordination to racial development, appears again in the denial of personal immortality, the assertion that "men perish to the end that man may survive," and it is with respect to this logical outcome of the belief of life in matter that Tennyson so pathetically voices the human protest against unfeeling "nature" in the LV. Canto of "In Memoriam." Depressing though it be, this conclusion must find acceptance with every materialist who has the courage of his convictions; but when one turns to the divine idealism of Christ Jesus, he is impressed with the fact that the Master linked the destiny of man to the destiny of God, whose thoughtful and unfailing interest in the welfare and happiness of His every child is revealed in the Master's words, "Are not five sparrows sold for two farthings, and not one of them is forgotten before God? . . . Fear not therefore: ye are of more value than many sparrows." He represented God as "the everlasting Father," a phrase which involves the safety and continuity of man no less than the safety and continuity of God. He identified his every follower's future with his own. "Because I live," said he, "ye shall live also;" and in multiplied statements he assured them that instead of being the unimportant incidents of a fleeting day they were the children of the eternal.

Christian Science repudiates the thought that God is interested only in the welfare of the race, and that He legislates for it without regard to the rights and happiness of individuals. It condemns the teaching which holds Him responsible for the asserted laws and forces that bring death and disaster to innocent human beings, and in this it is supported by those demands of justice and consistency which every worthy concept of the divine nature begets. "God is the Life, or intelligence, which forms and preserves the individuality and identity . . . of men" (Science and Health, p. 550), and it is this realization of man's individual exaltation and immortality as a divine idea, a son of God, which breaks the mesmerism of human sense and enables us to lay hold rejoicingly upon the life eternal.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Brockton, Mass., Feb. 17, 1910.

Dearly Beloved Leader:—May I take a few moments of your time to express to you my gratitude for the change in the explanatory note in the *Quarterly?* As I read the letter from the Publishing Society, announcing the change from "authorized by Christ" to "divinely authorized," I realized as never before "the power of the Word" (Miscellaneous Writings, p. 398), as read from the Bible and our text-book at our services, and I prayed with my whole heart that I might be a clear channel for this "divinely authorized" word to reach the hungry ones who come to our services. If all Readers realize that every word read from the Bible and our text-book is "divinely authorized," much healing will follow. Upon my return from our meeting last night I received a call to help one who was seemingly in great pain. This morning the message was: "She fell asleep in a few minutes, and slept like a child." What we owe you for the knowledge that "my word . . . shall not return unto me void," is beyond language to express.

May I take this opportunity to tell you that which I long denied,—how much I love you,—and to thank you because Christian Science has healed me physically, mentally, morally; has brought me from a life of chronic invalidism, infidelity, without faith in God or in man, into a life of health, usefulness, love for God and man, that can be found only in Christian Science. I rejoice to know that God, divine Love, is blessing you and blessing the world through your revelation of Christian Science. If this letter breathes a little of my love and gratitude, I shall be grateful.

Lovingly, humbly,

MRS. LUCY E. DOE.

Jersey City, N. J., Feb. 19, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—As we, the members of First Church of Christ, Scientist, Jersey City, N. J., assembled in annual meeting, it was evident that above and beyond the interest in elections and plans for progress, was the desire of all to carry on that meeting in strict harmony with a democratic form of government; that each member was rejoicing to be, at this time, loyal to you, and striving earnestly individually to assist in preserving our beloved Science in its purity. The great and beautiful lessons of the past troubled months, the tender, strong thought that has never wavered in fearless and efficient service to the Field, of the Board of Directors of The Mother Church in Boston,

Digitized by Google

arouses us to renewed consecration and self-overcoming, that we may in our measure be a prolific, helpful branch of the dear Mother Vine.

Dear Leader, we are grateful indeed that your hand has again pointed the way. In loving obedience, loyalty, and unity,

First Church of Christ, Scientist, Jersey City, N. J.
MEREDITH PERRY CHASE, *Committee.*

Kingston, Ont., Feb. 11, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—The members of First Church of Christ, Scientist, of Kingston, Ontario, Canada, wish to express their love and gratitude to you for the loving care and watchfulness which you have kept over us. As the demand is made by mankind for something higher, you are always ready to point out the source of supply, including the wonderful awakening along the line of church government. For this and all other blessings for which you have been the medium, we wish to prove our loyalty by following your guidance and reflecting more of Christ, Truth.

Yours in truth for the members,
ALICE H. SPARKS, *Clerk.*

Portland, Ore., Feb. 17, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Assembling last night for a church meeting, the members of this branch church voted unanimously in favor of sending a message of love and loyalty to you, our faithful and loyal Leader. We wish to tell you of our obedience to The Mother Church, and our support of it, its Directors and Manual, deeming this to be of the utmost importance to the welfare and progress of any branch church of Christ, Scientist. We feel that obedience to that Leader whom we have seen is proof of our love for God whom we have not seen, but of whose presence and power she has so clearly and faithfully taught us, and—better than all—has shown us how to prove for ourselves.

Lovingly and loyally,
Second Church of Christ, Scientist.
ESTELLE PRICE, LUELLA FANNING,
MOLLIE E. WALCH, *Committee.*

Belfast, Ireland, Dec. 6, 1909.

Loved and Revered Leader:—The occasion of our admission to membership in The Mother Church seems a fitting season to send an expression of our love to you and of gratitude to God for Christian Science. Fifteen years of active work in connection with the orthodox church had left us still hungering and thirsting for an understanding of God which would exemplify the magnificent promises of the Bible, silence the discords of earth, and reveal the harmonies of heaven. About fifteen months ago we took up the study of Christian Science, desiring to know more of the truth which should make us free. Our first demonstration, without treatment, was the perfect restoration of my wife's hearing, after eight years of chronic deafness. She had been treated by two skilled physicians, and had been pronounced incurable by a third. This beautiful healing was brought about simply by reading the text-book of Christian Science and by reasoning with God. Many minor but much valued demonstrations were worked out from time to time by ourselves and our children, until there came the one which will always stand out in my consciousness as my "Peniel," where I wrestled with error until "the angel of his presence," restored my soul and gave me the spiritual sense of being. This meant the perfect restoration of our baby boy of nine months, when on two occasions in one night my wife was deceived into the belief that he was dead, after he had been in convulsions, followed by most alarming conditions. With "an absolute faith that all things are possible to God" (Science and Health, p. 1), I took the babe in my arms, and declaring the allness of God, I was enabled to banish the belief in sickness, and to restore the babe to his mother, sound and well.

Words fail to describe our joy and thankfulness at these glorious manifestations of Love's abiding presence, and our humble desire is that we may be kept "stedfast, unmoveable, always abounding in the work of the Lord." We cannot close without a further expression of gratitude for our splendid literature, which is one of the numberless channels through which divine Love is daily supplying our need. With tenderest love,

Very sincerely yours,
GEO. H. STEWART,
MRS. RACHEL STEWART.

Santa Barbara, Cal., Jan. 27, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—It has been my privilege, during the past three years, to serve First Church of Christ, Scientist, of Santa Barbara, Cal., as First Reader. Now that this term of service has come to an end, I want to thank you for the by-law which says that new Readers shall be elected every three years. The blessings of this work are too great to confine to the few. I want to thank you for the Lesson-Sermons. As a Reader I have been able to see more clearly the deep spiritual significance of these messengers of Truth, and the necessity of persistent study to gain their high moral meaning and what that does in healing sickness and sin. All branches of our church work have a deeper and richer meaning than ever before, and I am sure I shall be better able to support the Cause you have labored so incessantly to protect. This tenure of service has been the gift of a united membership, and not only has there been hearty cooperation on the part of the Second Reader, but of the entire congregation. This I feel is in accord with what you wrote years ago in reference to the unity essential to the furtherance of the Cause of Christian Science. I am sure that the two good people who now occupy the post of church Readers will enjoy the same united support.

A letter is but a meager expression of my gratitude to you, our wise spiritual Leader. Ever since I partook of "the clear, correct" teaching of Mr. Kimball, under the auspices of the board of education in 1903, I have endeavored to show my gratitude as you express it on page 207 of "Miscellaneous Writings, where you say: "Drink with me the living waters of the spirit of my life-purpose,—to impress humanity with the genuine recognition of practical, operative Christian Science."

Faithfully yours,
EDWARD W. DICKEY.

El Reno, Okla., Feb. 21, 1910.

Loved and Loving Leader:—Permit me to express my appreciation for the recent change which your loving wisdom has introduced in the closing words of the explanatory note in the *Quarterly*. The words "authorized by Christ" all faithful students comprehended in their impersonal import, and they were words of profound spiritual truth: but the substitution of "divinely authorized" strengthens the explanatory note in the scope of its comprehensiveness, and appeals with greater illumination to those who are just beginning to sip the sweetness of your marvelous teaching and instruction. The unfoldment of wisdom is indeed wonderful.

Very lovingly,
E. J. SIMPSON.

THE LECTURES.

MORRISON, ILL.

Monday evening [Jan. 10] the Auditorium was comfortably filled by an enthusiastic audience to hear Prof. Hermann S. Hering's clear exposition of the fundamentals of Christian Science. The speaker was introduced by Mrs. Minnie Maxfield Sands, First Reader of First Church of Christ, Scientist, of this city, who said in part,—

In the Bible we read this: "Wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding. . . . For they are life unto those that find them, and health to all their flesh." "Understanding is a well-spring of life unto him that hath it." All mankind wants life and health. All mankind desires understanding of God, the author of all life, all being, the only creator and power. The religion aptly called Christian Science presents the demonstrable truth, wisdom, and understanding of God and His universe, including man, and in such a reasonable and logical manner that it appeals to little children and to men who may examine it on the highest plane of human comprehension. It appeals especially to men who are great enough to be humble, to perceive the real and act upon it, who are compassionate, helpful, truly kind and Christian.—*Morrison Record.*

NEW YORK, N. Y.

A lecture was given by Frank H. Leonard in the edifice of First Church of Christ, Scientist, Jan. 31, before a large audience, some two or three hundred people standing throughout the entire lecture. Mr. Leonard was introduced by Charles A. Dean, who said in part,—

Christian Science itself needs no introduction at this hour. It has come to this age and found the world ready for the practical, demonstrable Principle which it teaches, and now it is widely heralded throughout our own and foreign lands. Mrs. Eddy, its Discoverer and Founder, and the author of its text-book, "Science and Health with Key to the Scriptures," has made the following statement (p. 570): "Millions of unprejudiced minds—simple seekers for Truth, weary wanderers, athirst in the desert—are waiting and watching for rest and drink." As one of the means of reaching these ever increasing numbers and laying the foundation for their own further inquiry, the governing body, The Mother Church in Boston, has instituted a board of lectureship, and it is our privilege to have with us this evening a member of that board, one who by his own personal experience as well as by study and research is eminently qualified to expound his subject.

Correspondence.

LONDON, ENG.

On Jan. 27 a crowd of nearly three thousand persons completely filled Queen's Hall and gave earnest and appreciative attention to a lecture on Christian Science by Bicknell Young, given under the auspices of Third Church of Christ, Scientist. The lecturer was introduced by Mrs. F. A. Mocatta, First Reader, who said in part,—

We are met here tonight to learn the truth about Christian Science, and to sweep away some of the cobwebs of misconception and misrepresentation which accumulate so thickly around this great subject. Christian Science has today unnumbered thousands of earnest adherents; men and women throughout the civilized world rejoice and are exceeding glad because of the health, because of the joy, because of the freedom they have found through Christian Science. Humanity is beginning to awake from its long dream of bondage in sin and sickness, and is reaching forth for perfection in all things. This age is beginning to appreciate and appropriate the treasures of divine Truth.—*Correspondence.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Wilmington, Del.—Judge William G. Ewing, Avenue Theater, 3 p.m., March 13.

Paris, Tex.—Miss Mary Brookins, Opera House, 3 p.m., March 20.

Shellman, Ga.—Mrs. Sue Harper Mims, Auditorium, 3 p.m., March 20.

Littleton, Col.—Judge Septimus J. Hanna, March 21.

Winchendon, Mass.—Bliss Knapp, Town Hall, 7:45 p.m., March 21.

Kansas City, Mo.—William D. McCrackan, M.A., Second Church, 31st and Troost avenue, March 22: Third Church, Morton's Hall, Main street and Westport avenue, March 24: First Church in Second Church Edifice, 31st and Troost avenue, March 25.

Hammond, Ind.—Hon. Clarence A. Buskirk, Towle Opera House, March 24.

La Junta, Col.—Frank H. Leonard, Opera House, March 24.

New York, N. Y. (Second Church).—Rev. Arthur R. Vosburgh, Church Edifice, Central Park West and 68th street, March 24.

Newton, Kan.—Frank H. Leonard, Masonic Hall, March 25.

San Diego, Cal.—Prof. Hermann S. Hering, Sunday afternoon, March 27.

Reading, Mass.—Bliss Knapp, Masonic Hall, 3 p.m., March 27.

Independence, Kan.—Frank H. Leonard, Beldorf Theater, March 28.

THE CHRISTIAN SCIENCE MONITOR.

[In connection with the press and distribution work in Denver three copies of *The Christian Science Monitor* are being sent daily to the county jail. None of the officials are Christian Scientists, but the following letter from one of them indicates clearly that the leaven of Truth is working through the *Monitor*.—EDITOR.]

County Jail, Denver, Col., Dec. 11, 1909.

Mrs. J. Anna Barnard, Denver, Col.

Dear Madam:—Just a few lines, to say that we of the above institution find in the *Monitor* a long-felt want, especially for a place of confinement such as this, where the inmates can become conversant with current topics, both local and foreign, without confronting garish head-lines—featured murder cases, and elaborated divorce proceedings, etc. It gives those who are familiar with, or perhaps principals, in the foregoing cases, an insight to the better happenings without being compelled to peruse the criminal history of the past twenty-four hours. The rational condensed version of daily events, together with its fair, impartial review of matters political and questions of national import, makes *The Christian Science Monitor* the most desired daily reaching us at this time.

It is an unbounded relief, on turning to the editorial page, to find facts coupled with logic on questions universal, and not the meager, petty, jealous bickerings of a local controversy. This of the daily; while we found the Thanksgiving issue, as a holiday edition, replete with historical instruction.

Yours for a long continuance,

B. T. HARDCASTLE, *Clerk.*

TESTIMONIES OF HEALING.

After many years of waiting, I desire to add my testimony to those coming from the field. Twelve years ago I was absolutely destitute of any religious belief. It had been eighteen years since I attended church, except perhaps on a few special occasions. In fact, I was very bitter against religion, as what I had been taught about God made me hate instead of love Him, for He seemed to be the embodiment of injustice rather than love. It made me feel defiant to think that God had brought me into this world, filled me with a nature predisposed to do wrong, and then arranged to inflict eternal punishment if I did not yield my individuality to doing those things which seemed unreasonable for me to do. I could not accept the theories taught in the churches which I had tried in early life. I had been christened in one church, raised in another, becoming a probationary but not a real member, joined another, and also attended still another for about two years,—all this before I was twenty-four. After that I quit.

At the age of forty-five I was very profane, addicted to smoking, an occasional drinker, fond of gambling, and I drifted into any and all of the usual pleasures of a man who takes life easy. Now, all these things are of the past; not only the habits, but all desire for these things has departed since I have learned what man really is. I had always despised profanity, but all attempts to free myself from the habit failed. This habit left me first, and smoking went next—I forgot it. Gambling held the strongest charm, but what formerly seemed perfectly fair and square now seemed like stealing—I could not take another man's money simply because I held a better card than he. I did not want it, and so the game had no further attraction. Drinking—well, I had no use for that either; I needed what intelligence I could reflect, free and clear from entanglements, and so one night, after I returned from a Wednesday evening meeting at The Mother Church, I went to my cellar, loaded all my cherished liquors into a basket, carried it out on the rocks behind the barn, and one by one dropped the bottles to destruction.

During a time of great trial Christian Science came into my home, and although physical healing was not realized, I learned something of what its teaching is, and I realized its practical, common-sense basis, which I could not only understand, but prove. I knew it was the Christ-teaching revealed to this age, even if I did not realize the one thing I so greatly desired. I found myself drawn to this new (to me) religion with an irresistible love, with a strong desire to press on and learn more of it. Later on, other friends and relatives who tried Christian Science failed to get the healing, and some returned to medical treatment. Of course I saw many small proofs, such as cures of colds, fever, etc., but there was always the argument, "Well, they would have recovered anyway." I was still in the Thomas class, and must see the nail prints for myself. It was an indisputable proof that I wanted, in order to explain why I clung to something so foreign to my former habits of thinking. During these five years I attended The Mother Church in Boston, heard the marvelous testimonies each week, believed every one of them (because I knew it was possible), but not one single case or indisputable proof came to my personal knowledge.

At that time I was called to what was believed to be the death-bed of my only sister. The doctors (leading specialists from Boston) had left her, saying that it was only a question of hours. She was absolutely in death's cold grasp when I entered the room to bid her farewell. I asked permission to stay with her, promising to call her husband when needed, and worn out with watching for weeks, he consented. Her family was bitterly opposed to Christian Science, but I had brought my copy of "Science and Health with Key to the Scriptures" with me, and sat by her bed and read and prayed through the night. In the morning my sister was better, and in two weeks she was well. That was six years ago, and she is alive and well today. Since then I have had many proofs of the power of Christian Science "to unclasp the hold and to destroy disease, sin, and death" (Science and Health, p. 412).

I have written at this length to show that there is something more than the mere physical healing of the sick which draws men and women to Christian Science. It is the wonderful power of divine Love which draws them, else I could never have withstood those five years of bitter trials and disappointments. Now I can truly say that if Christian Science never healed a single case of sickness, and offered no hope of heaven beyond the grave, that the peace of mind which it gives—the quiet and harmony, the freedom from worry and care, as compared with my former mental condition—would be more than ample inducement to hold me in its sweet embrace. Surely none is so great as our God,—the God revealed in Christian Science as a Being whom we can love, not fear; that we can call upon, not flee from; that we can trust, not doubt; one to whom we can be grateful and not resentful, for every time we turn from the material to the spiritual we receive "roses for ashes."

Today finds me grateful to God that, notwithstanding our many years of disobedience to Truth's command, we find the arms of Love still open to receive us; grateful to Christ Jesus our Wayshower, for his pure life and teachings; grateful to our beloved Leader, that through her perseverance, study, and love, she has not only been able to discern the Christ-healing, but has so freely explained and communicated this grand truth to this age.

FRANK B. HOMANS, Hyde Park, Mass.

With a heart full of gratitude I testify to the healing and spiritual uplifting which myself and family have had in Christian Science. My little daughter, when one year old, had a fever which left her with a serious ear trouble. For ten years she suffered with a discharge and deafness. She was growing worse all the time, until she was said to be in a tuberculous condition. Physicians could do nothing, and a specialist said the ear was organically affected. At a moment when she was suffering greatly, I went to the telephone and called a Christian Science practitioner, asking her if she could do anything for my child. Her response was the Master's declaration, "According to your faith be it unto you." I replied that I had no faith, and that I was much discouraged. She said she would treat the child, and from that day to this, over five years ago, my daughter has had no return of the pain, fever, or abscesses, and is now at the age of fifteen, a picture of health and symmetry.

When I said I had no faith, but wanted to try everything, I did not realize that I had left God until the last, as so many do! How often I had broken the First Commandment, and yet I wondered why my prayers had never been answered. How often I had trusted to non-intelligent matter, and how little power I attributed to God. How the Father must have loved me to give me this blessing! We are a family of seven and are all Christian Scientists. My husband has been healed of fever, appendicitis, back trouble; in fact, discords of all kinds have been met for us in Christian Science, and our two little ones know no power or help but God. We are so grateful to our Leader, Mrs. Eddy, for showing us how to understand the Bible and apply its teachings to the needs of others as well as ourselves. I have proven what Christian Science can do, so I know it to be the truth.

MRS. ALICE M. BROWN, Fayetteville, Ark.

I wish to express gratitude for my healing, which is now practically complete. In December, 1907, I was supposedly on my death-bed, the chance of recovery promising only a

Digitized by Google

useless life, since I could not walk or lift my hands. My cousin went to a Christian Science practitioner, who told her of the power of Truth to conquer the fear of death, and I had instant relief; but not knowing the help I could receive, I continued under medical treatment and had a very slow improvement.

In July I became interested in Christian Science, in the hope that life would look brighter in its light, and soon I learned how wonderful are its teachings. I then began to take treatment, and made rapid progress toward health. I can now walk six blocks without getting tired, that being the farthest I have tried to go; and can use my hands normally. I was not told of the practitioner's help until after I became interested in Christian Science; but the day of my marvelous relief from pain was quite clear in my mind, and I know that the truth saved me from passing through the experience called death. I give this testimony in gratitude to God, and to Mrs. Eddy, who has made life appear in its true light.

MAUDE CATHERWOOD, Chicago, Ill.

It is with deep gratitude that I make this statement of my healing in Christian Science of what in *materia medica* is called gall-stones. I was taken quite suddenly with what seemed a very serious form of the illness, accompanied with excruciating pain; but after several hours' treatment in Christian Science, the suffering was overcome. The next evening, however, there was a return of the symptoms, with great suffering, seemingly more aggravated than before. Finally a physician was called, who gave a hypodermic injection. After this, a Christian Science practitioner was asked to take the case, and under her treatment there were no more symptoms of the disease. It was all overcome most beautifully with two treatments.

MRS. LIDA M. CARTER, Salem, Ore.

For years I was subject to severe attacks of rheumatism, and suffered intensely, sometimes for weeks together. After taking up the study of Christian Science, over ten years ago, I was entirely free for some time. Then the disease returned, seemingly with renewed vigor. After several attacks, which were overcome through Christian Science treatment, it assumed a chronic form. I tried for some time to treat the case myself, then went to a practitioner for help. The healing was not quick, but it was sure, the treatment extending over a period of several months, during which time I did not, however, lose a day from my work. I was at that time in the train service of a railroad company.

I can truly say that for the past three years I have been entirely free from this disease, and words fail to express my gratitude to God, and to Mrs. Eddy for Christian Science, the study of which has greatly enlarged my mental and moral vision and has made the Bible, which was formerly incomprehensible to me, the most precious of books. I am also, day by day, growing into a fuller and more perfect realization of the source of all supply.

CHARLES A. MICHENER, East Oakland, Cal.

I wish to add my testimony of gratitude for Christian Science to those in the *Sentinel*. For six years I have had Christian Science treatment for myself and family, and it has always healed us of every disease or trouble for which we have sought its aid. Among other things were toothache (which was healed almost instantly after it had been raging two hours), earache, besides throat, bowel, and female trouble. I also had Christian Science treatment prior to the birth of my two youngest children. In one case the treatments were entirely absent, and the labor lasted only an hour. In the other case the birth took place shortly after telephoning the practitioner. Another case of healing for which I am very grateful was that of an eruption on the lower part of the face of one of my children. This was entirely healed under Christian Science treatment and left no scar whatever.

Christian Science is a daily help to me, and I am very grateful to Mrs. Eddy, its Discoverer. I am deeply appreciative of all the Christian Science literature. I subscribe for the *Sentinel*, and for five years have sent them, when read, to relatives and friends through the mail, also handed them to persons who would read them without prejudice, and I always hear favorable reports from them. I have also subscribed for the *Monitor*, and the first week I received it I loaned it every day where it was read by one person who seemed to be opposed to the other Christian Science literature. I shall do all I can to help this best of newspapers.—MRS. ADA MAY PETTIT, Mason City, Ia.

[Translated from the German.]

Although brought up in the Christian faith, and led by sorrow and heavy blows of fate early to seek God, yet my Christianity failed to give me peace, for I seemed to be under the pressure of adverse circumstances which followed me like a nightmare wherever I went. Only a few months ago I was led in a remarkable way to Christian Science, which revealed to me that which I lacked and for which I had been seeking, namely, Truth! Christian Science brought me peace and light, and a nervous disease of years' standing has been almost overcome; difficult business conditions have bettered, and I have learned to know and understand the omnipotence and omnipresence of divine Love as never before.

I write this testimony with a heart overflowing with gratitude for the Founder of this religion of truth and love. I am deeply grateful for the help derived from "Science and Health with Key to the Scriptures," and for the beautiful and inspiring services which have helped me to find and grasp the truth. In the hope that some seeker may be led where he will find the truth, and with it all that he may lack, I write this testimony.

GUSTAV ERHARD, Frankfort on the Main (Offenbach), Germany.

[Translated from the German.]

In addition to my husband's statement, I would like to express in feeble words my deep-felt sense of gratitude for having been led to Christian Science. Through years of continued misfortune, one blow following another in quick succession, I was brought physically and mentally so low that at last a nervous disease took possession of me and never left me for five years, defying the most skilful endeavors of the best physicians. Finally I fell into such a condition that I had neither hope for the future nor courage for daily needs. Although brought up in a Christian way from early youth, and although I sought help from God and comfort in His Word, still I lacked steadfast faith. Doubts and fears were my daily tormentors, which in lonely hours brought me to the verge of despair.

In this state I came to Christian Science, and there found loving sympathy and a clear comprehension of our sad story. Such a clear understanding of Christian Science was reflected upon me that my entire life was placed on quite a different basis. I found firm faith, an understanding of the ways of our Father-Mother God, and a demonstrable grasp of Truth such as I had hitherto found nowhere else. Under this blessed influence my meager strength was renewed, and confidence and hope replaced dejection and hopelessness. All drugs disappeared from my little table, where they had been at hand both day and night, as I had believed I needed them to combat the diseased conditions, and my health improved perceptibly, although the outward difficult circumstances seemed to con-

Digitized by Google

time. This problem was, however, soon wonderfully solved, and on the very day when help was most needed, so that we were nearly overcome with wonderment and gratitude, happy to be living in this age, when our divinely favored Leader, Mrs. Eddy, has been enabled to give again to the world the works and the ministry of our Master and Saviour, Jesus Christ, which for many centuries had been hidden by a darkened view of Life.

May many more like ourselves, sustained by Christian Science, help others yet in darkness to the knowledge of the truth and the joyousness of happy children of God.

FRAU LOUISE ERHARD, Frankfort on the Main (Offenbach), Germany.

After a long hard struggle in my Christian faith, praying almost unceasingly that conditions might become better (according to mortal mind, everything was going wrong), I had but a faint hope that all would come right some day. I, however, thought I should never live to see it, as my health was failing with the long mental strain. I was tired and weary of life as I understood it, and was longing for the rest that I thought could only come by laying down this mortal body in death. But how different my life has become, since there lived a Christian Science lady not far from me who seemed to know me better than I knew myself. We met a few times and talked, and I was drawn to her so that when burdened I went to see her. In about a week after going to her for help, I was made a new creature, old things having passed away. I was free, instead of a nerve-wrecked mortal. I had longed to go to heaven, and now heaven had come to me, for we pray, "Thy will be done in earth, as it is in heaven." My Christian faith has been changed to understanding (with plenty of room for unfoldment), and I am able to demonstrate the truth for myself and family of five.

Never since we were healed in Christian Science have we had medical aid or drugs, and with such an uplift that I felt as did David of old, that I was "in a large place," where the future is the present, for there is no present, past, or future with divine Mind. I once lived for the future, but now I live for the present and have both, and still new blessings and thoughts unfold to us as we can grasp them. I have at last found the truth for which I hungered, to see the power of God manifested as I believed it should be, according to the teachings of the New Testament. My Christian friends think I have gone off on a by-way, but I can say from my heart, "Father, forgive them; for they know not what they do." I feel that I am sailing on the ocean of divine Love, and I am very grateful for this truth which makes good real and evil unreal. Fear of evil once held me in bondage, but now I know that God has all authority. I send this with love and gratitude for the first brave heart who dared to stand on Christ's promises and who has revealed through "Science and Health with Key to the Scriptures" this truth to all.

MRS. AMELIA SPENCER, Norton, Kan.

I send this in grateful acknowledgment of the many blessings which have come to me through the study of that most wonderful book, "Science and Health with Key to the Scriptures" by our dear Leader, Mrs. Eddy, along with the Bible. It is quite impossible to express the joy and peace that I feel, for the spiritual awakening has been most wonderful. I am thankful that I live in these days of revelation, demonstration, and full salvation, and I thank our heavenly Father, who has given to our dear Leader the unction of the Holy Spirit, to lead us up to the pure ideal.

In October, 1903, my sister wrote to me from America, expressing a strong desire to have me with her, as she was living alone. I had been mistress in a manufacturer's warehouse in Sheffield for thirty-eight years, but I gave up my position, and in ten days from the receipt of my sister's letter I was safely landed in her home. We were both very much changed, as we had not seen each other for thirty years. My sister was a loyal Christian Scientist, and although I did not understand this teaching I would question and criticize. But the dear people of the local Christian Science church won my heart. I said to my sister one day that if Christian Science could heal me, so that I might put off my glasses, I would believe in it. She calmly replied that "all things are possible" to those who believe. I had worn two pairs of glasses for thirty-two years, and without them I was practically blind. However, the faithful study of Science and Health, with the Holy Bible, was my stronghold, and I did the work myself. At first every object seemed double, a most painful condition to sense, but I rested on our Leader's assurance that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

My demonstrations have been wonderful. The ills that have been met and overcome are an injured shoulder, through a fall from my wheel; dropsy; a skin affection; and rheumatism, which was healed instantly. Financial difficulties also have been met, and I am pleased to say that divine Love has used me in the healing of others. In 1904 my first copy of Science and Health was presented to me by some dear Christian Science friends in Evanston, Ill., where my sister resided, and this book I found to be a mine of gold. Hungering and thirsting after righteousness, I continued to dig away. I felt like the man who found treasure in a field. When I left England my other sisters were disconsolate, but I said, "I am only going on a mission, and when it is ended I will come home again." In time a deep yearning to see them again took hold of me, and God bade me, as it were, go over and help them.

In November, 1907, I came home to England, to comfort, help, and bless all those who felt their need of Truth, Life, and Love. I desire to thank our Father-Mother God that dear old Sheffield has a Christian Science Society, and I am happy to say that the committee have given me the charge of the reading-room. We are growing steadily, and already need a larger room. Truth is indeed working wonders!—F. H. HALL, Sheffield, Yorks, England.

I want to add my testimony to the healing power of Truth when applied with understanding. Among the many proofs of the one omnipotent Mind, and the nothingness of any belief to the contrary, I relate the following experience. I had been studying Science and Health only about five months, but was so fully convinced of the truth it contained that no doubt was left in my mind. Christian Science had come to me at the time of a very great need, and had "set my feet upon a rock." Instead of despair, it had "put a new song in my mouth;" so from that time until now there has not been the shadow of a doubt with me as to the truth of Christian Science.

About three years ago I had a very hard fall, injuring my knee severely. When I fell, even with my very limited understanding I knew that as God's spiritual child I could not be governed by any so-called material laws. As this fact became real to me, to a degree, I was enabled to rise and go up a flight of steps with very little help and almost with ease. We were to take a short trip that afternoon, which would necessitate the changing of cars, besides getting on and off a boat, etc. I hastily began to get ready, but before I knew what I was doing, a sense of fear had presented itself. By the time I was ready to go the pain had returned in a very severe form, and when I reached the cars I was suffering intensely. When we arrived at the city which was our destination, I was almost helpless, and after remaining there quietly for a while, we returned, but I had to be lifted on and off the cars. Before reaching home I asked one of the party to leave the car and go to a Christian Science practitioner, that I might have help immediately.

Digitized by Google

By the time I reached home I could go up a flight of stairs to my room with much less pain than I had had all the afternoon, and in a short time could walk about the rooms with comparative ease and spent a comfortable evening, which was a marvel to those about me, for they were not Christian Scientists. The practitioner gave me another absent treatment at bedtime, and although there were indications of serious injury, yet notwithstanding this I slept as peacefully as a child all night and had no pain. The practitioner came to see me the next day, and she also gave me two other absent treatments, that I might realize my right to entire freedom from any and all material laws, since God never made them and hence they were not real. Before the end of the week I was climbing up and down hills, some of which were quite steep, and I did this without any trace of lameness; nor have I felt any from that day to this. To mortal sense I had been badly hurt, but through Christian Science I was saved from a long siege of lameness and perhaps permanent injury.

If I could make plain to some suffering, doubting one what this truth has been to me during the last two years, and thereby encourage that one, I should be very happy. My days have been full of demonstrations of the power of Truth, for I have learned that this power is supreme, and that I can best show my deep thankfulness by a consecrated life. My gratitude to Mrs. Eddy is unbounded, for what would I have done but for the truth which she has made so clear. I know that the Word, the divine manifestation, can come to the flesh, and the spiritual understanding which is unfolding to me in my journey from sense to Soul is the most wonderful of all.

I am thankful to the beloved Wayshower who first opened to us the way, and also to our revered Leader for finding it after it had been hidden for so many centuries.

MRS. A. A. SHRIDE, Berkeley, Cal.

I feel that it is time I paid my tribute to Christian Science, and perhaps thus be the means of encouraging some one who is seeking help. In 1901 a very serious operation was performed upon me, and while greatly relieved, I found, after five years had passed, that my physical condition again pointed the way to the hospital. At this time a friend who had been greatly helped by Christian Science asked me to try it. I did so, and the pains which were driving me to another operation vanished. A very annoying catarrhal trouble was the next to disappear, and many other ailments vanished in like manner, enabling me, among other things, to dispense with eye-glasses. For over three years I have used no medicine at all, whereas prior to that time I took so much that I wonder how I kept track of the various doses.

When I sought the aid of Christian Science I admit it was purely to get ease from my sufferings, never dreaming about the religious side of it until I experienced the grand uplifting of thought. My friend presented me with a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the reading of this book turned me to the Bible, which I had not looked into for years; and for this, above all else, I ask God to bless our dear Leader. That God is an ever-present help in time of trouble has been made quite clear to me during these last three years, and I am very grateful for the truth which has done so much for me.

MRS. AMELIA E. THEIS, Bensonhurst, Long Island, N. Y.

On the 19th of August, nine years ago, I was taken ill with a fever. I was sick for three weeks, and as soon as that fever left me a rheumatic trouble set in. I had been ill for weeks when a friend came in and wanted me to try Christian Science. So I sent for a practitioner, who treated me, and I felt much better right away. I had not been able to move myself for two weeks, but the first night I turned over on both sides, and in two or three days I got out of bed. In two weeks after that I was able to walk a little, and continued to improve steadily. Since that time I have not had a sign of the disease.

MISS ADA FOLKMAN, Ogden, Utah.

It is with deepest thankfulness to God, and gratitude to Mrs. Eddy, that I attempt to tell a little of what Christian Science has done for us. Our baby, when she was four months old, became ruptured. I called our doctor, who brought a truss for her and said she might have to wear it till she was two years old, and if she was not cured by that time she would have to endure it until she was four, that being the earliest date at which they could perform an operation. The truss was used for a month, although it was a task to keep it in place and it produced great irritation, and I cannot express our distress to see our child in this condition. As my sister is a Christian Scientist, we wrote her about the baby, and she replied that God could heal her, and advised us to try Christian Science. With one treatment in Christian Science she was healed, and from that day (now seven months) she has never worn her truss, has had no medicine of any kind, and is enjoying good health. I am trying to express my gratitude by my daily life.—MRS. SIDNEY BRADFIELD, Chicago, Ill.

I wish to express my gratitude for all that Christian Science has done for me and my family. My life was saved when an attack of blood-poisoning overtook me after childbirth. We telephoned at once for help, and in less than six days I was able to sit up. Many other ills have been overcome, both for my husband and myself, and for our three children, who all love the truth.

My gratitude to God, and to our beloved Leader, Mrs. Eddy, is too great to be expressed in words. Through the study of our text-book, "Science and Health with Key to the Scriptures," which I love next to the Bible, I have been shown the way to the God who is Love. In return for this I am striving to serve God and humanity in humbleness of heart, striving to guard my thoughts, and to watch and pray for growth in grace and in the understanding of Christian Science. In return for the many blessings which I have, I am trying to impart this blessed truth to other earth-bound hearts, and to show them the way that they also may drink from the fountain of the water of life freely. I am truly grateful for the spiritual blessing, and I realize that Christian Science is the way, the truth, and the life.

MRS. MAGDELENE JOHNSON, Rawlins, Wyo.

CORRECTION.

We regret that in the testimony of Mary F. Cummins, published in the *Sentinel* of Feb. 26, the original statement regarding the affected eye, that she "could not use it at all," was, through an error, mistakenly made to read, "could not see with it at all"—EDITOR.

[Written for the *Sentinel*.]

IN LOVE I LIVE.

EDMUND K. GOLDSBOROUGH, JR.

IN Love man lives, forever pure and fair,
Forever free from things which seem to bind,
His real life is within the realm of Mind,
The power of Truth is here and everywhere;
In Love, man lives.

In Love I live, and angels gather near,
To guard and keep me through the passing night,
Ah, precious thoughts which bring eternal light!
The light of good which conquers every fear;
In Love, I live.

FROM OUR EXCHANGES.

[*Interior.*]

It has actually come to pass that the outcry of the world is against all who sin in high station; the condemnation of humanity lies on such as pervert their rulership to bring ill to the people; the outcry of universal protest shakes those whose money is coined out of the blood-sweat of the oppressed. The twentieth century is giving substance to more hopes and dreams than any century that went before it. Much it has done. More it promises. All and everything it licenses men to anticipate. The man alive today lives when it is possible to expect every good thing for humanity—possible to believe in every success for justice, truth, and right—possible to work for the ultimate good with the cheer of a close-range confidence.

[*Christian Work and Evangelist.*]

Christianity is many things. It is the acceptance of Jesus Christ as Lord and Master of one's life and the doing of his will in passionate devotion to him. It is to hold the religion Jesus held and taught, the fatherhood of God, the oneness of man with the Father, the brotherhood of man, God's free forgiveness of our sins. It is the altruistic life, as opposed to the self-centered life. It is the looking at life through Christ's eyes, having the mind of Christ, holding his philosophy of life. It is surely the imitation of all the qualities and characteristics of his nature, the adoption of his spirit as the rule of life.

[Rev. John Hunter, D.D., in *Universalist Leader.*]

To Jesus his church was to be no exclusive body. It was to have its limits, but these were to be the natural limits of spiritual affinity and sympathy. He recognized his brethren in all who had a kindred spirit. The only principle of religious union which he acknowledged, and which has been so long and strangely ignored, is contained in the words, "Whosoever shall do the will of my Father, which is in heaven, the same is my brother, and sister, and mother." His flock is truly and deeply one wherever it is scattered, but the folds are many.

[The Rt. Rev. Anson R. Graves, Bishop of Kentucky, in *Churchman.*]

I think we have made a mistake in the past by dwelling too much upon what we imagine each branch of the church, or denomination, may have to surrender in order to attain church unity, and have dwelt too little upon the important things in which we are in substantial agreement, and not at all upon those things in which each denomination might possibly gain something by unity.

[Rev. Clayton R. Bowen in *Christian Register.*]

There is a spiritual fatherland of which we are all citizens, a spiritual heritage which we all share, a continuity of hallowed living and sacred tradition which it is our supreme privilege to hand on to them that come after us. Shall we laud national patriotism and have no sense of religious patriotism? Shall we have no heroes, no flags, no solemn days of memorial, in our life as men of religion?

[Rev. William McKinley, D.D., in *Western Christian Advocate.*]

Minds differentiated by nature, education, and environment see truth from different points of view and report what they have seen, and, notwithstanding apparent conflict, are all telling the truth, though none of them are telling it all, because none of them has it all.

[*Standard.*]

No amount of energy or ability or devotion will make up for the lack of a disposition saturated with the spirit of Jesus.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $10.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $10.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.
Ten copies to one address, each, one year, $1.90; six months, $1.15.
Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.
Fifty copies to one address, each, one year, $1.50; six months, 90 cents.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Gifford Pinchot, in an address before an audience of twenty-five hundred people in Carnegie Hall, New York, last week, said: "There is a vigorous, well-organized, clear-cut opposition to the movement of conservation, as it was defined by Mr. Roosevelt. This is an active fight, more bitter day by day, to set public welfare ahead of private welfare and to prove that public welfare ought to come first. The principles of conservation are those which govern the cost of living, of water-power, of heat, of all things susceptible to the monopolistic influences. The individual is fighting with this truth in mind—that the exclusive ownership of commodities and natural resources makes for excessive wealth for the few. The question is whether to the average man has been given a fair chance to get his share of the nation's wealth. The reason that the conservation movement is going to win is that it is a moral issue. Conservation means the application of common sense to the control of natural resources, but behind all that, the thing that makes conservation worth while is that it means the preservation of common human rights for all the people."

The House committee on interstate and foreign commerce has struck out from the Administration railroad bill the provisos relative to the acquisition of competing lines by railroad companies. One of these provisos was that a railroad on acquiring half the stock of a competing line could purchase the remainder. The regulation of the purchase of competing lines, they say, should be left to the Sherman anti-trust law which is drastic enough to cover all cases. The other proviso excluded electric railroads from the operation of section twelve, which prohibits railroads from acquiring stock in competing lines. The two provisions struck from the bill were suggested by the railroad presidents at a meeting with President Taft at the White House.

The Northern Pacific Company, in the United States supreme court, has won its case against the requirement of the interstate commerce commission that it join with other railroads in establishing a through passenger route and joint rates from the East to Puget Sound territory via Portland, Ore. It based its refusal on the claim that it had already provided a satisfactory and reasonable route via Billings, Mont. The court held that the reasons assigned by the commission as to why the Northern Pacific route was not a satisfactory or reasonable one could only be maintained by giving the words of the statute an artificial meaning.

The public service commission of the second district of New York state, the up-state commission, as it is called, for the year 1909, has established precedents which will make overcapitalization and its attendant evils things of the past. It has held that a scrip dividend does not conform to the conditions laid down by the public service commissions act regarding the issuance of capital; that a stock dividend also is not allowable, and it has declined to allow the issue of bonds to reimburse the treasury of a company for payments made which could not themselves in the first instance constitute proper capital charges under the act.

There will be added to the irrigable areas in the four northwestern states, Montana, Washington, Idaho, and Oregon, $103,000,000 worth of lands. Lands now under Government irrigation projects are as follows: Idaho, 142,000 acres of a total of 480,000 to be reclaimed; Montana, 50,000 acres of 550,000; Oregon, 142,000 acres of 170,000, and Washington, 23,000 of a total of 262,000.

The New Orleans Board of Trade is being urged to the need of concerted action in the South to secure the aid of the Government in draining the fifty-eight million acres of swamp lands in that section. These lands under tillage would be worth hundreds of millions of dollars.

The bill introduced in the New York Legislature, providing for the establishment of an agricultural college on Long Island, has passed the Assembly, and there is a prospect of its enactment before the close of the session.

Governor Hughes' bill, placing telegraph and telephone companies under the jurisdiction of the public service commission, defeated last year, has been again introduced in the New York Assembly.

An appropriation of six hundred thousand dollars is provided for the establishment of submarine signals along the Atlantic coast in a bill passed by the Senate.

The second unit of the Belle Fourche, S. D., irrigation project, embracing ten thousand acres, divided into forty and eighty-acre farms, has been completed.

Edward Payson Weston, the pedestrian, had reached La Junta, Col., on the 9th on his walk from California to New York.

William Jennings Bryan is to launch a prohibition newspaper in Nebraska.

The postoffice bill totaling $239,812,195 has passed Congress.

International.

Agricultural and cooperative syndicates are receiving a great deal of attention in Egypt as possibilities for improving the condition of the fellaheen at the present juncture. General conditions are favorable to the successful operation of such syndicates and corporations. The property is divided into small holdings, and it is the small proprietor who will derive most advantage from these institutions, as he will be able to buy and sell at favorable terms without recourse to middlemen. After examining the systems in vogue in other countries, the commission decided upon a system of syndicates of a simple nature, in order that the spirit of reform may penetrate rapidly among the fellaheen.

These resolutions will probably be offered relative to reforming the House of Lords: (1) That a strong and efficient second chamber is not merely an integral part of the British Constitution, but is necessary to the well-being of the state and the balance of Parliament; (2) that a second chamber can best be obtained by reforming and reconstituting the House of Lords; (3) that a necessary preliminary to such reform and reconstitution is the acceptance of the principle that possession of a peerage shall no longer in itself give the right to sit and vote in the House of Lords.

During the coming summer the Canadian Pacific Railway Company expects to spend twelve million dollars in extending its irrigation system in the Bow valley district of Alberta. Two branches of the Canadian Pacific railway now tap this part of the province, and a strip about sixty miles wide has been under homestead occupancy for some years. The projected extension will affect eight hundred thousand acres.

Ambassador O'Brien at Tokyo has received the Foreign Office's acknowledgment of the American State Department's assurance of friendly and disinterested motives, and no ulterior design, in the Manchurian proposal for the neutralization of the railroads. Japan's reply is couched in most courteous terms.

A concession for a railroad six hundred and fifty miles long, forming the connecting link between Mexico City and Meridia, Yucatan, has been granted by the federal government. Work of construction will be begun at once. Yucatan is today cut off from the outside world.

The twelve-million-dollar tunnel under the Andes, which is to allow direct railway transportation between Valparaiso and Buenos Aires, has been pierced and it is promised that trains will be running before July 1.

France has 7,883 postal savings banks.

Industrial and Commercial.

Meat prices have advanced in all the principal producing and consuming sections of the world, according to compilations just made by the bureau of statistics of the department of commerce and labor. The figures which the bureau has compiled consist chiefly of the export prices of the principal meat-exporting countries of the world and the import and quoted wholesale prices in the chief meat-importing and consuming countries. The chief meat-exporting countries are Australia, New Zealand, Argentina, Canada, and the United States; and the chief meat-importing countries are the United Kingdom and Germany. All of the meat-exporting countries show higher prices per pound in their exports in recent years than those of a decade ago, and all of the meat-importing countries show higher rates in their import figures and in the current market quotations.

The fifty-word letter-telegram rate of the Western Union and the Postal Telegraph companies went into effect last week. Both telegraph companies now receive for transmission to any part of the United States, between 5 p.m. and midnight, messages of fifty words and less at the regular daytime ten-word rate for early morning delivery.

A remarkably long wireless transmission was recently recorded by the steamship Tennessee, five days out from Honolulu, which succeeded in catching a message from Table Bluff on the coast of California. The message was a weather report, which was afterward verified by the navy department. The distance of transmission was 4,580 miles.

It is estimated that one hundred thousand acres will be planted in rice in 1910 on the prairies of eastern Arkansas. This is an increase of more than two hundred per cent over the acreage of 1909. There are now six rice mills in the district, with a combined capacity of approximately four thousand barrels in twelve hours.

The Mauretania made her recent passage from New York to Fishguard in 4 days 19 hours and 12 minutes. Her average speed for the entire passage was 25.42 knots. Her maximum speed was 27.47 knots.

More than two thirds of the lands of Australia, or approximately fifteen hundred million acres, are arid or semiarid, having an average annual rainfall of less than twenty inches.

More than three million acres of land in Spain are devoted to olive cultivation, of which more than one half are in Andalusia.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

"LOVE IS OUR REFUGE." *

SAMUEL GREENWOOD.

THE gentle reminder by Mrs. Eddy, that "we are all capable of more than we do" (Science and Health, p. 80), should find ready response from all Christian Scientists, for were it put into practice in the earnest desire to be and to do the best of which we are capable, the result would be largely increased growth and prosperity, both individually and as a Cause. On the other hand, by not working to one's full capacity, the enemy may find us unprepared for defense, and temporarily overcome us through the evils which, though denied, are not wholly forsaken. Knowing this, as we so well do, what prevents us from doing our best at all times? Can it be that self-love, the cares of this world, or the deceitfulness of its many-hued "riches," is allowed to lull us into apathy over spiritual opportunities?

"Love is the fulfilling of the law," said Paul: therefore love is the only refuge from lawlessness, and the only means whereby mortals can meet the divine requirements. We are all capable of being more loving and lovable. No one is so self-blinded but that he can see a little more of the divine concept in his fellows, and in that increased degree let love have its natural and spontaneous activity. What, then, engages our attention when this larger sense of love is excluded? It is certainly not one's belief in Christian Science that prompts selfish or malicious thoughts; neither can these enter consciousness without the individual's consent. If Christian Science had its rightful place in the affections, and were valued above all worldly considerations, what could one possibly have to do with any phase of evil except to overcome it? What possible attractiveness can there be to Christian Scientists in hating instead of loving, in revenge rather than mercy, or in being ruled by human passions and impulses in place of that divine Love which they declare to be omnipresent, the infinite God? Who that knows how sore is mankind's need of light and love, and who is conscious of his ability to reflect these in some degree, can willingly permit any baneful thought to rob him of this priceless privilege and opportunity?

It rests with Christian Scientists in a special sense to prove to mankind that God is Love, as the Scripture declares, not only in the healing of disease but of every sinful thought and desire. Knowing the falsity of corporeal sense, with all that pertains thereto, it is their privilege intelligently to acknowledge and obey God's will in preference to their own, and to love one another. Are these high and sacred privileges fully recognized and appreciated? Are we giving worthy evidence to the world that we are Christian Scientists? Are we giving worthy evidence to our brethren, both in and out of the church, that we have caught the glory of this great light which reveals the infinitude of Love? One's life is that which alone declares his position. Unless we love above all things else to be loving and pure, unless good is supreme in thought and deed, we have yet hardly touched the hem of the garment of Christian Science.

In writing to The Mother Church, Mrs. Eddy says that "mortals hating, or unloving, are neither Christians nor Scientists" (Messages to The Mother Church, p. 82); and no one knows better than our Leader what constitutes a Christian Scientist. Every member of a Christian Science church subscribes to a solemn promise to seek that Mind "which was also in Christ Jesus," and to be obedient to the golden rule of love; but it would seem sometimes that this promise has been lightly given and as lightly kept. Truly to watch and to pray that the Christ-mind may be in us, is to have it in the measure of our capacity; and honestly to strive to practise the golden rule toward all men is to do it, is it not? If not, then why not?

As surely as the mill cannot grind with the water that is past, Christian Scientists cannot spiritually thrive on the strength of former demonstration. The oil needs constantly to be renewed, else the light goes out. The love we expressed last year or yesterday does not suffice to meet the need of today; neither does the love given in certain instances redeem the cases where this love is withheld. Though every individual on earth but one were loved by us, think you that divine Love would excuse us for not loving that one? To love is the necessity of living, for in the spiritual sense they are essentially one; hence we should preserve the activities of love with the same care that we would guard our sense of life. Before placing ourselves on record for the day, let us take account of Love's power to save from sinning as well as from sin, and then, for the sake of our own salvation and the peace of mankind, go forth to demonstrate that "perfect love" which casts out not only fear, but all else that is not like God.

How often, when things do not go right, do we diagnose the trouble as lack of loving, or the lack of returning good for evil, since we know that mortal mind, so called, and not matter, is always the culprit? If thought is given over to the contemplation of evil, or if the heart yields to unkind and unloving impulses, what wonder that storm-clouds gather on the horizon and tempests break over one's path. Well shall it be for us then if, discerning the real source of the suffering, we turn away from the troubled senses and apply ourselves wholly to casting out the demons of wrong thought that alone have wrought the mischief. Love is a refuge for the sinner, but only when he is ready to forsake his sin. Love means that mortals must learn to do right, even though it be through suffering.

Students of Christian Science should not need the lesson of suffering to teach them that the measure of evil they mete to others will be measured to them again; that sin always reacts upon the sinner. One disregards his own safety and happiness who ventures into the suppositional realm of enmity and strife, for there the shadow of death abides and there hell has its domain. In her article, "Love Your Enemies," in "Miscellaneous Writings," Mrs. Eddy sounds a note of warning that should keep every student

* "Miscellaneous Writings," p. 389.

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

who desires indeed to be a Christian Scientist, from crossing that fatal line.

The pathos of evil indulgence is, that it avails nothing. Revenge does not remedy wrong, nor hatred restore peace; covetousness does not satisfy desire, nor jealousy reassure the heart. Anger and resentment never soothed a hurt nor healed a wound, but have only added misery to misery and sin to sin. Love, and love only, is the remedy for human ills, for Love is omnipotent. However sorely one may be sinned against, it is possible to gain sufficient love to antidote the sense of injury, else God is inadequate to meet human need. If mortals are not willing to recognize the demands of divine Love, and work out its rule in Christian Science, this willingness will have to be gained through suffering, for learn this lesson sooner or later all mankind must.

What but an exaggerated sense of self-esteem could turn a student aside from the straight course of love to God and man, to brood over imaginary slights, or even intentional offenses, until the shadow of resentment or dislike comes between brother and brother. If love invariably ruled Christian Scientists, as it should, what chance would there be for personal animosities, cliques, or strife among brethren, what desire for personal preference or control? Christian Scientists who are honest in their profession of allegiance to the teachings of Christian Science will be governed by this love; but if they are not honest in this avowal, the world will surely have occasion to criticize them for their inconsistency.

These thoughts are not offered in the spirit of condemnation, but in the hope that all Christian Scientists may search their thought lest there be any hidden obstruction to the love that "thinketh no evil" and that "never faileth." With a sense of the greatness of our Cause and its mission too large to be disturbed over personalities, may we work unitedly to bring about that realization of the coming of God's kingdom for which we pray daily. In that kingdom there is no mine nor thine, but the full recognition of the omnipresence of good. Taken at its best, what is there in the human personality worth worshiping or fighting for? What does self-interest amount to beside the priceless boon of loving others as oneself? What good can come from having one's own way, worth comparing with the joyous privilege of working for the coming of God's kingdom in the hearts of all mankind?

DEMOCRACY AND CHRISTIAN SCIENCE.

REV. CHARLES D. REYNOLDS.

THAT democracy, or rule by majorities, is the most advantageous system for the administration of human affairs, providing the people are prepared for it, no one seriously questions. It is not claimed for this system that it is best because majorities are always right, or nearer the perfect ideal of which all serious-minded men must be more or less conscious, than are minorities, but because democracy demands of every member composing a body the free and unobstructed exercise of all his faculties. It demands the use of intelligent observation and power to draw correct and logical conclusions, and enables every member to be of assistance to his neighbor by giving him the benefit of his observation and deductions. Thus, through the mutual cooperation of all included in the fellowship, a happy average of conviction results, to the support of which all contribute. By voluntary consent they have pledged themselves to sustain and enforce the judgment of the majority and await developments.

Sometimes it happens, within a body governing itself democratically, that a clique is formed in opposition to the sense of the majority, having a standard different from that followed by the majority. Sometimes this is justified by the plausible argument that the ideals and line of action represented by the majority are not high enough, that the standard is so unideal that the minority, to maintain the dignity and purity of their own thought and the cause at large, feel themselves called upon to resist the standard represented by the majority and substitute therefor their own alleged higher standard. Whatever argument may be put forth in justification of this course, it is certain that it is unscientific, and has no rightful place as a part of legitimate democracy.

Sometimes the argument is made by those who claim that they see the truth or right way so much clearer than that which is represented by the majority, that they cannot work harmoniously in fellowship with them, since by so doing they would hazard the loss of their higher and purer light, and so be dragged down and injured. This argument also, when rightly examined, shows itself to be faulty and unworthy of those who have accepted democracy as presented and practically applied in the teaching of Christian Science. One who knows himself to be in advance of others, is in a position to advise and help, not to criticize or tear down. One who is certain, moreover, of the superiority of his position over the majority, is in the unique place of one who can perform invaluable services to others, if he will avail himself of his opportunities. If the vision of some is indistinct, if their ideals are obscure and low, and another's vision is strong and clear, his heart firm and fearless and loving, then he will make excellent company for his struggling brothers. To him is assigned the work to which Jesus referred when he said, "Whosoever of you will be the chiefest, shall be servant of all. For even the Son of man came not to be ministered unto, but to minister."

We may assume that all organizations formed for serious purposes involve ideals whose realization lies somewhere in the distant future and cannot be attained without long and patient effort. The government by majorities lends itself to a progressive order in human experience. As clearer views of Truth unfold themselves, thought is uplifted and step by step the conduct of affairs is adjusted to the new and higher order. If there are those whose ideals fall too far below the average to be accounted worthy of membership, their case will call for special consideration, but the sacred privileges of scientific self-government should not be dishonored by the unworthy and self-deceiving claim that there are those who are so far in advance of the majority that they cannot respect the honest position taken by them, nor work lovingly and cheerfully in cooperation with them for the common good. Those who are desirous of raising the standard (and this can always be honestly claimed as a present need) can work bravely at their task, though their cherished ideals are not at once accepted and they must patiently await their time. If the minority would have their views receive respectful consideration, they must remember that God must and will overturn evil, "until he come whose right it is," and they should not attempt prematurely to force others into a step which they are not ready and willing to take. A position prematurely taken is certain to bring needless confusion, and it invites resentment and warfare rather than healing and peace.

The method of progress in democracy is unfoldment, not revolution. He who affirms his light to be clearer and stronger than that of another, and who proceeds forthwith to demand that every one shall walk by his light instead of their own, is manifestly impelled by human zeal rather than divine wisdom, and is unwittingly adopting the method not of democracy, but of anarchy, wherein there is no fixed impersonal standard to lead the way, but the majority are swayed by personal caprice or by the will of one. Divine Love is pure and its manifestations are pure, and our present line of action will adjust itself to a higher standard more quickly by following faithfully in this way than by any other that can be devised.

Digitized by Google

Under democracy the reformer is he who patiently labors with the individual for the adoption of a higher general average, and he may entrust his efforts at well-doing to the providence of God for safe keeping, since he knows himself to be in no hostile attitude toward any individual, but seeks to be a willing servant of all.

THE ARK OF GOD AND DAGON.

FLORENCE E. B. DONALDSON.

IN our Leader's brief but wonderful description of the unfolding to her thought of the great verities of Spirit, she affirms that the Bible was her only text-book, and adds: "The Scriptures were illumined; reason and revelation were reconciled, and afterward the truth of Christian Science was demonstrated" (Science and Health, p. 110). Most of us can see that only in proportion to our clear realization of the omnipotence, omnipresence, and omniscience of Spirit, shall we be able to comprehend the unreality of evil. As we progress in the understanding of Christian Science, we see more and more clearly that great spiritual truths underlie the Scriptures throughout.

From the very beginning of our serious study of "Science and Health with Key to the Scriptures," the Bible becomes a new book to us. The deeper teachings of philosophical and metaphysical passages are elucidated; practical statements are brought home to us, and shown to be as direct guidance for today as when they were first uttered or penned. Stories and simple episodes, which seemed to mean little or nothing to us in the old days; touches which, if noticed at all, were apt to be considered as showing the forceful descriptive narrative of the Jewish historian, rather than of any spiritual significance,—all these are now seen in new aspects. For, whether we understand a passage at present or not, we soon learn in Christian Science that every story or episode, however slight, however veiled to material thought, is for our learning, and that when spiritually understood it assuredly expresses some healing truth which destroys error, and which it is ours to assimilate whenever we have the understanding to discern it.

Some time ago, as I was working in Science, the episode of the falling of the idol Dagon, when the ark of God was placed by it, came suddenly to my thought. The brief narrative, as given in the fifth chapter of 1 Samuel, was illumined in the light of Christian Science, and was at once seen to be full of helpful meaning. In the metaphysical interpretation of "ark," we learn that it signifies in part: "The understanding of Spirit, destroying belief in matter" (*Ibid.*, p. 581). The incident of the fall of Dagon seems to show that, however secure a position material belief may claim to fill, when the power of Spirit, Truth, is brought to bear upon it, error totters to its fall. "Dagon was fallen upon his face to the earth before the ark of the Lord." Error is abashed before Truth, and so we are told that the idol fell face downward. Then we read: "And they took Dagon, and set him in his place again." How often does mortal mind, in resisting the control of Spirit, seek to reestablish its idol! But the story relates how the inevitable second fall was greater than the first. "And the head of Dagon and both the palms of his hands were cut off upon the threshold." In this second fall we see that the claim of intelligence, symbolized by the head, and of power, by the palms of the hands, were both destroyed. "Therefore neither the priests of Dagon, nor any that come into Dagon's house, tread on the threshold of Dagon in Ashdod unto this day." So complete had been the manifestation of the supremacy of Spirit, that mortal mind instinctively drew back and yielded up its claim.

Another point of interest in the application of this incident to present needs, is the silent working of Truth in the long watches of the night. Has it not often happened in the experience of Christian Scientists, whether to themselves or others, that during a prolonged period of darkness and doubt, of grievous suffering and consequent despondency, the action of Spirit has been quietly at work, so that the very early dawn of understanding has revealed the headlong overthrow of error, and Truth the victor? Again, has it not often happened to each one of us, that when we have lain down at night with the understanding of Spirit uppermost in our thought, we have slept the sleep of conscious "safety," and in the morning have waked to find that Truth had been silently at work, that the strength of some error had gone from it, making it loose its hold and fall from its former high estate in the unconscious thought? And thus it is borne in upon us, with ever-increasing assurance, that, whatever the seeming, evil in and of itself has no power.

Marginal notes to the above narrative in the Bible refer us to prophecies of a later date, relating to the overthrow and breaking in pieces of all idols. It seems strange that, while warnings have frequently been given and accepted, as to the tendency to make an idol of some much-loved human being or admired personality, Christendom has invariably scouted the idea of the worship of material or man-made objects. It is not until we come to Christian Science that we see how the drug, the medical appliance, the operating-table, the special disease, the social observance, or the ritualistic creed, are all such idols of human fashioning; and as we see and recognize the error of our ways, as one idol after another is revealed in its special niche in our hearts, we can rejoice and be glad that they must all fall in the presence of the manifestations of Truth.

GIVING TESTIMONY.

H. J. BRADSHAW.

THE Wednesday evening meetings were established by our Leader that the public might have an opportunity to know of the benefits to be derived from the teachings of Christian Science. Much has been said in our periodicals by way of emphasizing the importance of our testifying to the good we have received from our study, and of bringing to the attention of all Christian Scientists their duty in this respect.

All who study our text-book, be they beginners or advanced students, must remember that they have a specific duty in the matter,—that of giving testimony to the beneficent influence of Christian Science in their daily experiences. The writer has heard many express their reluctance to testify at these meetings, and yet any one of these people, if met by an inquirer outside of the meetings, could and would give many convincing proofs of the efficacy of Christian Science for both physical and mental disturbances. Now let each ask himself why this unnatural reluctance to share with the multitude? Are we to sit in our seats and leave the table bare? or should we bring such a feast of good tidings that every inquirer, every suffering or discouraged visitor, may go away satisfied that here at last is a solution of his problem, that here is a practical religion which will help one to be a better individual,—a better father, mother, brother, or sister as the case may be?

More than this, we can look over our daily experiences and find many examples of our improved thinking—the overcoming of fear, envy, anger, hate, doubt, and despair. We must also bear in mind the words of our Leader (Science and Health, p. 384): "The prophylactic and therapeutic (that is, the preventive and curative) arts belong emphatically to Christian Science," and feel that we have much to be thankful for in the protection that this improved thinking has afforded us. Then, too, we must not measure our demonstrations, for no thing is small if done by more

closely following God. What person would say that the example "one and one are two" is an insignificant use of mathematics, just because this same digit if followed by six ciphers amounts to a million? Any one who has had books to balance will tell you that many times the search for this smallest of the digits has long delayed the closing of a set of books, and was as important in this detail as though a million dollars had been involved.

Then, too, we ought to bear in mind that we ourselves are benefited by giving testimony. Every one who has risen to his feet and borne testimony and given thanks to God for the good received, can feel that he is thereby strengthened, for he has given to the world a word of cheer. Our Leader encourages us when she says: "Millions of unprejudiced minds—simple seekers for Truth, weary wanderers, athirst in the desert—are waiting and watching for rest and drink. Give them a cup of cold water in Christ's name, and never fear the consequences" (*Ibid.*, p. 570), and Peter admonishes us to be always ready to give a reason for the hope that is in us. This is the intention of the mid-week meetings,—to give to the world a reason for the hope that is in us, that mankind may be lifted above their misconceptions of God (which have resulted in the many phases of sickness and sin), into the truth about Him that heals and saves.

It is a privilege as well as a duty, of which each should avail himself, to add our testimony to the great mass that is going out at each of these meetings, well knowing that we ourselves are enriched by all we do in the service of God and His Christ.

THE TRUE CONSCIOUSNESS.

VALERIA J. CAMPBELL.

MRS. EDDY says in "Miscellaneous Writings" (p. 208): "The true consciousness is the true health." How, then, shall we attain this true consciousness? Christian Science teaches that God is All-in-all, that God is Mind, and that since there is but one God, there can be but one Mind. As Mind is consciousness, there can be in reality but one consciousness. If we had no mind or consciousness, could we know anything of the past? No. Then all the past there is to us is our present consciousness of it, is it not? Accordingly, if we can get our present consciousness right, we shall realize our freedom.

We learn in the Scriptures that God is all, and that there is none beside Him. This true consciousness then, will have to be gained from God, to whom eternity is perfect and harmonious; wholly good, because all that is real is His reflection, and what God knows is eternally true. The present, then, is good, perfect, and harmonious, the future also. To get the past right, is to get the present and future right also. This spiritual fact may be applied as a healing balm to every wound.

Our Leader says: "Insist vehemently on the great fact which covers the whole ground, that God, Spirit, is all, and that there is none beside Him" (Science and Health, p. 421). In thinking of God as the only Mind, do we always include in our consciousness the correlated statement, that there is no mortal mind? Jesus said, "If therefore thine eye be single [if thou hast the one consciousness], thy whole body shall be full of light." The individual consciousness of Truth is the reflection of the one all-embracing consciousness. At this moment there is harmony throughout the universe, for God's law is harmony. At this moment each idea is in its rightful place and is satisfied and contented. As each idea is the expression of God's being, each idea reflects Life, Truth, Love; therefore each idea reflects and expresses health, harmony, and activity here and now.

Let us not forget for a moment the purpose for which we exist, namely, to manifest and thus glorify God, infinite Mind, and that to know the truth about God, man, and the universe, and to live it, makes us free. Johnson said,—

> Know the truth, for eternal unity behind her shines.
> She bids all sounds in earth and heaven be still.

APPLYING THE TRUTH.

MARY JEAN MILLER.

A TRUTH-SEEKER one day said to the writer, "I know that Christian Science is all true, but I can't seem to make it a part of myself. Instead, it stands apart from myself." As the speaker was a teacher in the public schools of one of our largest cities, it was simple for her to see a correspondence between herself and the boy in her grade who makes the remark regarding his arithmetic lesson, "I can't do it." The teacher asks, "Do you know your multiplication table?" He answers, "Yes, I do." "Then use it in your problem. Add and subtract, multiply and divide, and be sure that you do each in the right place." Even so the teacher found that she too must use this great truth of Christian Science in her daily problems. She must add (affirm) all that divine Love has created her to have, and subtract (deny) all that falsely claims a place in her consciousness. By such a method she can multiply, that is, "manifest His power" (Science and Health, p. 517), and thereby will understand how to divide the tares (material sense) from the wheat, for we learn in Christian Science that "understanding is the line of demarcation between the real and unreal" (*Ibid.*, p. 505).

When she found that she must love her neighbor as herself, she queried, "Don't you think it will be all right if I think a great deal of some people and let the rest go?" And again it was made plain that she was like the boy who says, "Do I have to use all of the multiplication table? Can't I use a part of it and let the rest go?" Said the apostle Paul: "Every scripture inspired of God is also profitable for teaching, for reproof, for correction, for instruction which is in righteousness: that the man of God may be complete, furnished completely unto every good work" (Rev. Ver.). One day discouragement almost to the state of depression tried to overcome her. As she looked over her condition of thought (problem) she found this statement: two plus seven equals ten. She asked herself, "Is this truth?" "No!" "What is it?" "A false statement (claim)." "Has it any origin, or place?" "No!" She then erased it by knowing "the truth, the whole truth, and nothing but the truth:" and became very thankful for Christian Science, which had taught her how to compare spiritual things with spiritual.

The Christian Scientist finds that the solution of each day's problems is his proof or demonstration that God, Truth, is All-in-all. No wonder, then, that his gratitude to God is never ending for having given to the world this message of Truth through our faithful Leader, Mrs. Eddy, who asks of us that we follow her "only so far as she follows Christ" (Messages to The Mother Church, p. 78).

[Written for the *Sentinel.*]

ASPIRATION.

AMY RUTH WENZEL.

MAKE me a savor of sweetness,
A sweet-smelling savor of Love,
To hearts that know not the repleteness,
Of life that is breathed from above.

To hearts that are stifled with sadness,
In pain swooning under the rod,
Oh, make me a savor of gladness,
A perfume to lead them to God.

SELECTED ARTICLES.

[Alfred Farlow in *Christian Register.*]

In your issue of the 13th ult. you published an article entitled "Excommunication," in which you say the Unitarian "church door stands ever open for all classes," and that "to any protesting voice it might be replied that the office of the church as that of the Christ is not to call the righteous, but sinners, to repentance." The spirit of liberality is indeed commendable, but in marked contrast therewith the *Register* of the 20th contains an article by the Rev. John Snyder which advocates a campaign against a class of people who, he admits, are "righteous," but who are not identified with his church. Evidently Mr. Snyder does not agree with the editor of the *Christian Register* that persons should be left unmolested in their individual religious beliefs. On the contrary he goes so far as to advocate the circulation of literature which upon examination we discover to be nothing more nor less than a misrepresentation of the teaching of Christian Science.

Mr. Snyder declares that Christian Science is not new, but only "a new label for an old thing." He offers as his authority for this statement an opinion of an Indian Pundita who is said to have visited America, and "when it [Christian Science] was explained to her, said, 'That is not new. We have had it in India for four thousand years. It has ruined thousands of lives!'" I am glad that our critic mentioned the point, "When it was explained to her, she replied," etc. As a matter of fact many persons have offered "explanations" of Christian Science which utterly fail to give a correct understanding of the subject. Some say, "It is just like spiritualism"; others say, "It is like theosophy"; others, "It is mental suggestion," etc. Just how it can be like all of these various things, which differ very greatly from each other, no one has attempted to explain, and we suspect that the only reason Christian Science has been likened unto these various isms is because the one who makes the "explanation" has the impression that they are not popular, and hence they are mentioned in connection with Christian Science as an indirect way of calling names. In any event, it is manifest that *some* of them must be wrong; for, as we have said, Christian Science could not possibly be like them all, since they are unlike each other. In regard to the Pundita's opinion, the difficulty was evidently with the explanation made to her, and not with Christian Science. The mere fact that she was impressed that Christian Science is like Hinduism is proof positive that it was not properly "explained to her," but, on the contrary, misrepresented.

Mr. Snyder recommends that both clergymen and laymen enter into the task of putting an end to Christian Science by examining "alleged cures." We assure the gentleman that Christian Scientists would be pleased to help him in this investigation, and would respectfully call his attention to the report of investigations which were recently made by certain physicians and which were embodied in an article published by B. O. Flower in the *Arena Magazine* of November, 1908, under the title "Christian Science and Organic Disease." This examination of the subject ought to convince Mr. Snyder, if testimony has any weight with him whatever, that Christian Science does heal organic diseases. Our critic advises that as a proof of the "superstition" of Christian Scientists one should attend the Christian Science church and hear stories of the healing of horses and hogs through Christian Science. Such testimonies may have been heard in Christian Science churches, but I very much question if the general public would support the contention that they give evidence of "superstition," or indorse Dr. Snyder's manifest belief that the divine protection of four-footed animals is distinctive from the divine care and protection of the two-footed varieties. If we may be permitted to believe that God created them in the first instance, it should be no strain upon our faith to believe that He could and would protect them in the second instance. I dare say that even Mr. Snyder, who is so free from the "sin" which he names "superstition" as to merit in no degree the Scriptural admonition, "He that is without sin among you, let him first cast a stone," would recommend some sort of a remedy for suffering animals, and it would not surprise me if he were to contend that the particular remedy which he commends is the remedy which God intended to be used. Thus even he might be "superstitious" enough to admit that God has condescended to provide for the four-footed beasts as well as for mankind.

Mr. Snyder refers to certain teachings and practices in New York city which have recently been mentioned in the public press as being similar to "witchcraft," but he has neglected to mention the fact that these peculiar teachings and practices are condemned—not indorsed—by the Christian Science church. He speaks of them as "the unauthorized use of malicious animal magnetism," as a lack of proper discrimination "between the offensive and defensive use of this dangerous agency." To be accurate he should have stated that an erroneous and evil teaching is not subject to any other use than misuse. Malicious animal magnetism, which is designated in the scientific schools as "pernicious mental evil," is wholly apart from the practice of Christian Science. It is an evil subterfuge. Mrs. Eddy teaches that animal magnetism has no power whatever apart from false mortal belief. She has known that certain persons do believe in its power, and that they attempt to exercise it, but she has taught her students how to defend themselves against such deception by understanding that God, good, is the only real power. Thus our critic may note that Mrs. Eddy has preceded him, and already entered the field in the interest of safeguarding the public by advising them to have no faith in the asserted power of "animal magnetism" or any other superstition.

The dropping of the names of certain persons from the membership of the Christian Science church is unquestionable proof of its requirement that those who teach and practise in the name of Christian Science shall be Christian and consistent in both word and deed, neither using "animal magnetism" to further their ends nor consenting to its use by those for whose views and habits as professed Christian Scientists they are responsible. The case cited should convince Dr. Snyder and all others that Christian Science is inherently and absolutely opposed to all "superstition," to every ill-begetting belief or action. To hold Christian Science responsible for the wrongs attaching to the conduct of those whom Mrs. Eddy has rebuked and whom the Directors of The Mother Church have disciplined, is to evidence a willingness both to deceive and to be deceived. This is but another of the fruits of prejudice.

[Editorial in *Beacon,* Cannon Falls, Minn.]

There has been much disposition shown of late by our fun-makers and their imitators to make Christian Science the butt of their humor. The writer admits, and not without regret, that he has not achieved Christian Science. We say achieved because we consider the comprehension and application of Christian Science to the daily life something of an achievement; and this apart from the healing feature of the faith. The point we wish to make is that the humorist who finds it necessary, in working out his daily stunt, to play upon the belief of any religious organization, is not only offering insult to a body of earnest and sincere people, but is exposing to public comment the sterility of the soil upon which he depends for his particular product, things to amuse his readers. Though any one Christian organization is not particularly resentful of disparag-

Digitized by Google

ing things that may be said of other Christian organizations, its members are extremely sensitive to anything reflecting on their own particular organization; and their right to be so is unquestioned.

If there is a feature of American citizenship that should be held inviolate, it is this right to freedom of belief and worship. Happily we have passed the period of physical religious intolerance, and presumably we shall one day achieve that Christian spirit which recognizes all good men as brethren. It would seem that, from the view-point of business common sense, if not from that of maintaining a high plane of regard for the rights of all, the press would lead in a strict observance of such rights, and exclude any trifling or disparaging reference to any religious sect that teaches the Christian religion and the high moral ideals established by its great Founder. No man's religion is a thing to joke about. Most men have a religion of some kind; in some degree they recognize and emulate goodness; and regardless of what that religion is, it is the best he has; it is the sheet-anchor of his life, and gives whatever of moral stability he may possess, whatever of the Christian virtues he may practise, whatever hold upon the immortal side of human life he may have. It is the thing that he lives by, and the life he lives is all he has to die by.

As people grow older, they realize that from the cradle to the grave man needs all the strengthening, all the steadying influences possible to him, to enable him to be all the man, all the woman possible, under the unavoidable conditions of life. It would seem to be logic that a cheerful optimistic religious belief—such, for instance, as Christian Science—would be about the proper antidote for the vexations and harassments of life, but there are many good folk who would be utterly miserable with a cheerful religion, and they too must be protected and respected, and they are also to be congratulated, in that they have a religion which is adapted to their peculiar needs; and it is the multifarious peculiar needs of humanity that make sacred all forms of religious belief and should protect them from jest and scorn, and Christian Science no more, no less than others.

[Frederick Dixon in *Weston-Super-Mare Gazette.*]

First, our critic says there is no place in Christian Science for the atonement. It would perhaps have been wiser, though I admit it would have been more difficult, for the critic to explain what the doctrine of the atonement exactly is. He is perhaps not aware that the vice-principal of the Theological College at Lichfield, after declaring that the Miltonic view, besides "offending one's moral sense," "logically and rapidly leads us to undiluted Arianism," recently proceeded to discuss what he termed "four typical modern theories of the atonement," as a prelude to developing a fifth one of his own. If your contributor would like to explain which of the orthodox views is his own, I shall be very happy to explain the Christian Science view.

Secondly, he objects to the teaching of the allness of Spirit and the nothingness of matter. Now unless he is prepared to deny the infinity of Spirit, he will be forced to admit the nothingness of matter, unless he would like to maintain that the spiritual and the material are one, and so submerge himself in undiluted pantheism. His argument that if a man hit his head against a brick wall he would be convinced of the reality of matter, is one which would have drawn from the ineffable Mr. Littimer the remark that, speaking scientifically, he was "young, very young." Perhaps he would like to hear Professor Huxley's reply to a gentleman who thought he could demolish the fabric of idealism by this particular argument. "Coxcombs," said Huxley, "vanquished Berkeley with a grin, and common-sense people proved the reality of matter by stamping on the ground or some such irrelevant proceeding."

Third, he maintains that Christian Science is carried on for gain, and that Mrs. Eddy made a large fortune by healing. The latter statement is entirely untrue, but not more so than the former. Many Christian Science workers have made considerable financial sacrifices, and probably they would be making larger incomes did they devote their time to the ordinary business of the world.

Fourthly, that the proportion of cures is small. As the critic has not the remotest conception what the proportion is, the statement resolves itself into a piece of gratuitous nonsense. While as for the names of those healed not being given, that is a question not for the healer, but for the patient. As a matter of fact, any one can attend any Wednesday meeting in a Christian Science church, and talk personally to the givers of the testimonies at its close.

Fifthly, he is good enough to explain that the teaching that disease is a mental product is rubbish. This is a little hard on all the great idealistic thinkers of the last few thousand years, and that great contemporary natural scientist, Professor Ostwald, will doubtless think again before he hazards the remark that "matter is only a thing imagined, which we have constructed for ourselves, very imperfectly to represent the constant element in the changing series of phenomena."

Finally, by way of demonstrating his philosophic calm, your contributor condescends to the fatally weak argument of strong language. He concludes with a quotation from Shakespeare, may I therefore be allowed the same privilege. It is a hackneyed one, but admirably adapted to the occasion:—

> There are more things in heaven and earth, Horatio,
> Than are dreamt of in your philosophy.

[William J. Bowin in *Rochdale* (Eng.) *Observer.*]

In Christian Science, the reverend critic averred, the health of the body was made the chief feature, whereas in the New Testament it was the salvation of the soul that was emphasized.

This severance of these two questions as two separate and independent considerations is what Christian Science shows to have been the open door for schism and naught but a pernicious influence upon the Christian church. Christian Science does not make "the health of the body the chief feature," but it does insist that the healing power of the Christ is with us alway, and that, with the knowledge of the truth, discordant conditions, the suppositious exceptions to the perfect law of God, must disappear. If they do not, the truth is not in us, and we are like the woman bound by Satan, in bondage to a lie. It is not a little strange that earnest students of the Bible, familiar with all its definite declarations, from the promise in Exodus, "If thou wilt diligently hearken to the voice of the Lord thy God, . . . I will put none of these diseases upon thee," to Jesus' rebuke to the scribes, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" should be able for a moment to entertain the idea that sin and sickness and suffering can be anything other than indissolubly connected, related, and interdependent. And if this is so, true healing, as distinguished from mere doctoring of disease, becomes at once inseparable from religion.

One has only to reflect upon the continual demonstration the Founder of Christianity gave of the truth of his message, through its power to assuage the pain of the world and fulfil all that Isaiah had foretold, upon the undivided mandate to his disciples to preach the gospel and heal the sick, upon his promise that those who believe on him shall do the works that he did, upon the healing work that ever accompanied the preaching of the apostles and continued in the early church for the first few centuries; one has only to reflect upon these facts to be convinced that to preach a Christianity that has no practical side to it and would post-

Digitized by Google

pone salvation from misery as unattainable on this side of the grave, is to preach a Christianity fundamentally differing from that of its Founder and shorn of its most potent and compassionate truths.

And when we further regard the innumerable divisions in so-called orthodox Christianity and the apparent impossibility of reunion, and note that all have abandoned the practical salvation from sin and suffering as an essential doctrine and are consequently without any means to test the truth or otherwise of their interpretation of the Scripture, the argument for the reestablishment of this test becomes irresistible; and it is this restoration that Christian Science is accomplishing.

[Frank Bell in *Pittsburgh* (Pa.) *Post*.]

The speaker is quoted as referring to Christian Science as a "self-centered system," which "teaches how to help one's self, how to get away from one's own troubles; but duty, responsibility, and the helping of others are minor considerations." Nothing could be farther from the truth. The veriest novice in Christian Science has learned, as one of his first lessons, that there is no hope of progress except in proportion as the claims of self are overcome. The Christian Science text-book, from preface to conclusion, is replete with practical instruction for the elimination of selfish desires, practices, and habits of thought.

"Getting away from one's own troubles" is a very small —though notably successful—phase of Christian Science. The great work is for others, and this is being accomplished on a scale that is not dreamed of by those who are not Christian Scientists. While it is not proper to boast of such matters, it may be said, since the question has been raised, that the average Christian Scientist is devoting vastly more effort, time, and money in loving and effective endeavor to help his fellow-men than he did before becoming a Christian Scientist.

It is not correct to say that Christian Science regards sin as simply a "limitation." The Christian Science attitude toward sin is practical and effectual, as thousands testify from individual experience therewith.

[E. J. Simpson in *Chickasha* (Okla.) *Journal*.]

Christian Scientists seek to behold the good in their neighbor, rather than delve for imperfections. "Love thy neighbor as thyself" is Biblical, and when we realize that the God-made man is spiritual and perfect—made in His image and likeness—the admonition becomes easy to follow. When discordant things manifest themselves, we know that these imperfections are concepts of the human mind, and are no part of God—the only Mind in reality—and no part of God's image and likeness. Therefore, when unwarranted fulminations are hurled against our religion and at our beloved Leader, Mrs. Eddy, we try to manifest only Love,—to realize that God's child has not voiced the unkind and unloving thoughts, but that something unlike God has been permitted to creep in and take temporary possession where Truth and Love alone should rule.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*.

Falmouth, Norway, and St. Paul streets, Boston, Mass.

AMONG THE CHURCHES.

LANSING, MICH.

We expect to commence the construction of our new church edifice about May first of this year, and for this purpose we have purchased one of the best sites in the city, facing the beautiful grounds of our state capitol, the building to be of the type now favored in the designing of Christian Science churches.

For the past seven years we have held our services in the G. A. R. Hall, but with the growth in the understanding of Christian Science in this city, these quarters are inadequate, and we hope to occupy our new church building, which will seat about five hundred people, by fall. This seemed a large undertaking for us when we began our work for it over a year ago, but since we began active efforts in this direction, we have felt a silent tide of understanding, confidence, and unity of purpose carrying the work along, and us with it, and this community has experienced a marked broadening and deepening of interest in the understanding of Christian Science. In doing this work we are thankful to have felt, in common with so many other Christian Scientists throughout the country, the passing from dependence upon personality to a partial recognition and demonstration of Principle.—*Correspondence*.

PACIFIC GROVE, CAL.

At a business meeting of First Church of Christ, Scientist, on Monday evening [Feb. 7], the report of the committee on the selection of a site for a church edifice was presented. Upon their recommendation, it was unanimously decided by the members to purchase the property on the corner of Fifteenth street, Fountain avenue, and Central avenue. This property, which is 140 x 120 feet, has now been purchased. No definite plans have yet been made for the erection of a church building, but it is understood that arrangements will soon be made.—*Review*.

[Written for the *Sentinel*.]

UNFOLDING FAITH.

FLORENCE CLEVELAND MC DONALD.

O TEND'REST Love, that guides the stumbling feet,
And keepest them in paths where Thou dost bide;
I cannot stray beyond Thy watchful care,
But always 'neath Thy shelt'ring wing may hide.

For Thou hast stilled the waters of my soul,
When they were lashed to fury by self-will.
And when, like weary child, I turned to Thee,
Thou didst them quiet with Thy Peace, be still.

So in my heart of hearts there rings a song,
Because I long to do Thy holy will;
As David sings adown the passing years,
Thou leadest me beside the waters still.

And I can thank Thee, Father-Mother God,
For every thing that leads to heights above,
Knowing that when we turn from mortal sense,
We find that God, and God alone, is Love.

So let me stand as Daniel stood of old,
With eyes steadfastly fixed upon the light,
And faith so strong in ever-present good,
That e'en the beasts of sense cannot affright.

Thus ever in my consciousness there dwells
The thought of arms divine upholding me.
For Thou—eternal God—my refuge art,
And I have found myself in finding Thee.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

AN AMENDED BY-LAW.

ARTICLE VIII.

CHURCH ORGANIZATIONS AMPLE.—SECT. 15. Members of this church shall not unite with organizations which impede their progress in Christian Science. God requires our whole heart, and He supplies within the wide channels of The Mother Church dutiful and sufficient occupation for all its members.

"NO SCIENTIFIC FOUNDATION."

PROBABLY no phase of Christian Science teaching is so generally misunderstood by those outside its borders as that which exposes and denounces the operations of so-called animal magnetism, and yet the teaching on this subject is so plainly stated by Mrs. Eddy in Science and Health that "he who runs may read," and even the wayfaring man need not err therein. From what has been said by some critics of this Science, however, it might be inferred that animal magnetism is a force or supposed power, somewhat akin to witchcraft, which has been invented by Christian Scientists and is used by them for the control and discomfiture of their enemies; but this assumption is no more true than are the hundred and one other criticisms which utterly fail to recognize the basic teaching of Christian Science, namely, that God is omnipotent, omniscient, and omnipresent.

Simply for convenience' sake, Mrs. Eddy has classified all erroneous beliefs under this one term; for instance, on page 484 of Science and Health she says, "Animal magnetism is the voluntary or involuntary action of error in all its forms." As showing the powerlessness and unreality of this aggregation of erroneous beliefs, she writes on page 102 of the same book, "Animal magnetism has no scientific foundation, for God governs all that is real, harmonious, and eternal, and His power is neither animal nor human. Its basis being a belief and this belief animal, in Science animal magnetism, mesmerism, or hypnotism is a mere negation, possessing neither intelligence, power, nor reality." Again, on page 103 she says of this masquerader in borrowed plumes, "It is the false belief that mind is in matter, and is both evil and good; that evil is as real as good and more powerful. This belief has not one quality of Truth."

Those who believe or profess to believe that animal magnetism is allied with Christian Science, should examine the primary authority on this question, the writings of Mrs. Eddy. If this search is made in a spirit of fair-mindedness, they cannot fail to see that animal magnetism is no more a part of the teachings of Christian Science than is the crime of burglary a part of the law which defines this crime, exposes its illegality, and decrees its punishment. If there be any who fear the seeming power of this evil, they should likewise study our Leader's writings, for in so doing they will find that animal magnetism is not something to fear, but is rather a false belief that there is a power apart from God, good; they will also learn how this false belief may be met and mastered.

Christian Science strips the cloak from all evil, and exposes the falsity of so-called intelligent matter. Wise indeed are those who heed the warning voice and strive to follow its teachings.

ARCHIBALD MCLELLAN.

CAUSE AND ITS LOCATION.

IN no one thing, perhaps, has Christian Science more helpfully influenced human thought than in its redirection of the world's attention to the very simple truth that effects are to be adequately dealt with only as we address ourselves to the removal of their final cause. Failure to act on this very common-sense requirement has defeated much honest and sincere effort to administer justice and better human conditions. Sheer ignorance, or the bias of prejudice and superstition, has so entirely mislocated the actual responsibility, so overlooked the real explanation of things, that the cause of ills has not only remained entrenched, but in the long run even effects have been aggravated rather than remedied.

This is nowhere more clearly manifest than in the endeavor to relieve the sick. The theology of the Christian world has always declared disease and death to be the outcome of sin, and yet when sickness comes to the great majority of Christian people today they practically ignore their explanatory faith, and unless the patient is subject to gross sensuality, some overt sin, the alleviation of his suffering by a poulticing process is the one end and aim to which effort is directed. The Christian Science concept of healing as a reclamation, a regeneration of human consciousness, presents an entirely different point of view. It focuses thought and endeavor, first, last, and all the time, upon the removal of cause, a false belief, thus rendering it practically possible for the sick to wrest a distinct and abiding gain from an experience which otherwise is found to be profitless as well as painful.

It is apparent that if in every case of sickness the final cause were at once attacked, so that the experience became the occasion of spiritual exercise, of assertive truth-knowing, not only for the sick but for the circle of friends surrounding them, its significance would be wholly changed, and what is now reckoned as loss, and that alone, would become one of the "all things" that "work together for good;" and this can but eventuate when we have learned in Christian Science to find the seat and explanation of all disharmony in that false sense of God and man from which, as all Christians agree, Christ, Truth, is a present and perfect Saviour. Then the meaning of St. James' words, "My brethren, count it all joy when ye fall into divers temptations," will be fully entered into and the day of our overcoming will be at hand.

The inertia and predisposition of false sense is strong, and Christian Scientists, withal, need to be very much awake to this matter of the correct location of cause in the instance of every ill. Our theoretical grasp of the truth that all causation is mental, and that neither the pain nor its explanation is in material conditions, may be very clear, and yet under the dictum of long-established habit we may find ourselves organically locating the trouble, and soothingly rubbing the parts with our thought if not with our hands. Many a failure, perchance, to find relief through Christian Science is due to a half-conscious but defeating doubt respecting the truth of this teaching that both the cause and cure of disease are wholly mental. Says our Leader, "It breaks the dream of disease to understand that sickness is formed by the human mind, not by matter nor by the divine Mind" (Science and Health, p. 396).

In so far as we tolerate the subtle suggestions of mortal sense, that disease and suffering find their explanation in organic conditions, in so far we can but distrust the power of Mind to heal, and at the best think of Christian Science treatment much as we once thought of drugs. When, how-

Digitized by Google

ever, disease is known for what it is, an expression of false material sense, the realization of the power of Truth to dispel this falsity entire will become clear and effective.

JOHN B. WILLIS.

DIVINE REQUIREMENTS.

IT is possible that very few persons have the highest motives when they begin to obey God's laws,—they may fear the consequences of wrong-doing; yet even in such cases it might be said that "the fear of the Lord is the beginning of wisdom." One thing is certain, namely, that no one can continue to obey divine law without gaining thereby, and finding that it not only "makes for righteousness," but also for happiness. The great Teacher said, "If any man will do his [God's] will, he shall know of the doctrine, whether it be of God." Moses impressed upon the people that the divine laws were for their good always, not for the purpose of sustaining the divine power and authority. As we obey we find that we are the better for our obedience, in "mind, body, and estate," and later we find (and rejoice in knowing it) that by our obedience we are also helping the whole human family, for as Paul says, "By the obedience of one shall many be made righteous."

In the Manual of The Mother Church under the caption "Guardianship of Church Funds," there is this impressive statement (Sect. 5), "God requires wisdom, economy, and brotherly love to characterize all the proceedings of the members of The Mother Church, The First Church of Christ, Scientist." This admonition is surely much needed in an age when material wealth and display call out rivalry and even dishonesty on the part of many mortals who have not learned the priceless value of spiritual possessions, nor what it means to be at peace with God, with one's self and one's neighbor. Instead of seeking first the establishment of the kingdom of God and its righteousness, the silly demands of self for the gewgaws of the passing hour are heeded by mortals, and anon, when all their affairs go wrong, they wonder why God afflicts them so.

Among the wise statutes found in Leviticus is this: "I am the Lord your God, . . . the wages of him that is hired shall not abide with thee all night until the morning." Does not this point to the "wisdom, economy, and brotherly love" spoken of in our Manual as "a divine requirement"? There are unfortunately many who excuse themselves from meeting their obligations promptly (if at all) on the ground that they cannot easily do so. Perhaps they have never tried the exercise of that stern but ennobling virtue, self-denial! It never harms any one to deny himself many material things, if only he is careful to expand on the spiritual side, adding, as St. Peter counsels us, one virtue to another until he can give proof that he is neither "barren nor unfruitful" in the Christian life.

"But," says some one, "does not self-denial suggest limitation?" Perhaps the inquirer has never thought that self-indulgence may impose a sense of limitation upon a brother who is waiting for what is his due: has never thought that our demonstration of harmony must begin with "wisdom," also "economy," for otherwise we should be building upon a false foundation. As the downfall of nations has always been traced to reckless expenditure and dishonesty, we may well look to ourselves as individuals. When we are "rich toward God," as the Master said, we shall have no lack, but we shall never indulge a personal desire at the sacrifice of another's just rights, whatever the nature of the obligation. It devolves upon Christian Scientists, who know the transcendent value of the spiritual, to prove their loyalty to it by a righteousness which far exceeds that of the "scribes and Pharisees" of this or any other period, for thus alone can they demonstrate their fitness to be members of the church which rests upon divine Principle and right.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Chelsea, S. W., March 2, 1910.

Dearest Leader:—My wife and I have just reached England, and I want, by the very first mail, to write and thank you for finding time, in the midst of all your work, to see us and talk to us when we were in Boston. It was a joy beyond words to both of us to find you looking so well, nor shall we ever forget your words of love and of encouragement. You have proved, and are hourly proving, by your obedience to Truth, the utter powerlessness and unreality of evil, and we know that just as we are faithful to your teaching we shall be able to prove this for ourselves.

Daily, as I go about, I find in every direction the evidence of your work for humanity. In coming home we had as a steward a man who told us how, a year or so ago, his wife had left a doctor's consulting-room doomed to a terrible operation, and how a Christian Scientist healed her without recourse to that operation. On landing I found a letter from a well-known man, in a far-off corner of Africa, telling me how he had just had a visit from an Anglo-Dutch farmer, who came in search of information about Christian Science, owing to the healing of a girl in the neighborhood, who had been "transformed from a bad invalid into a healthy, happy woman."

The healing of sorrow and sickness and sin, by giving the world a true understanding of God, is the work to which you have devoted your life. Is it any wonder, therefore, that daily you are cheered in your great work as you see the movement growing in vitality, in power, and in obedience to divine Principle. You said to us that "time is the doorway to eternity." I am beginning to see a little more clearly, as the days go by, the meaning of those words.

With both our love, your loving follower,

FREDERICK DIXON.

Boston, Mass., March 8, 1910.

Beloved Leader:—Never can I express my gratitude for that beautiful poem, "The Mother's Evening Prayer" (Miscellaneous Writings, p. 389), and that it is now set to music we all can love and sing; nor can I tell you how much that poem means to me. May I tell you this one beautiful evidence of its Love-power?

Sitting at the bedside of a beloved one who had passed beyond the reach of mortal hand (so the doctors said and so my senses told me), I whispered in her cold and seemingly unresponsive ear the first verse of that God-inspired poem. The cold flesh grew warm, the breath came naturally, and she slept. A few weeks later I asked her if she remembered that night and that occurrence. "Remember it?" she said, "Can I ever forget it? When you commenced to repeat those heavenly words, I stopped to listen —and I forgot to die." That was six years ago, and she is still with us, healed of that so-called fatal disease.

Many, many times the repeating of that one verse has bound "the power of pain" (*Ibid.*, p. 396). Many a prayer of gratitude has been offered for its author. For the past six years I have tried to thank you in the way you best like. Devotedly yours,

FRANK B. HOMANS.

Santa Barbara, Cal., March 2, 1910.

Beloved Leader and Teacher:—I wish to send you a message of love and thanksgiving,—to tell you that in my heart there is a constant song of praise and gratitude to you for all that you have done and are doing for me and mine and all humanity. You tell us, in your beautiful hymn, of the Truth that was found by you "in the life

Digitized by Google

and the love of our Lord" (Miscellaneous Writings, p. 398). I have found this Truth in your life and in your love, my dear Teacher. I am thankful that you have so divinely lived and loved as to have taught me and healed me of my ignorance of God and man. You told me years ago, that fruition would feed my hungry heart with sure and steadfast possessions. Those prophetic words are fulfilled.

I am thankful that I can see, that through your divinely appointed leadership our churches are being purified and uplifted, to see the proof of the omnipotence of Truth and Love, that exterminates self and error. I am sure it will please you to know that Mr. Bingham is filling the office of First Reader in the church here, and the work is uplifting. Mr. Bingham unites with me in this message of love.

Faithfully and devotedly your student,
HELEN W. BINGHAM.

Ithaca, N. Y., Jan. 25, 1910.
Mrs. Mary Baker Eddy, Chestnut Hill, Boston, Mass.

Beloved Leader:—First Church of Christ, Scientist, of Ithaca, New York, in annual meeting assembled, desire to express to you their gratitude for the blessings that come from church membership; from ever-increasing activity and the growing desire for universal good; gratitude for nearer glimpses of the real church, which is spiritual, and with which we unite "only as we are new-born of Spirit" (Science and Health, p. 35). We are especially grateful at this time for growth in membership and attendance, which makes it necessary for us to find a new church home. May the love and loyalty of this church be expressed in deeds, and may it be "found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick" (*Ibid.*, p. 583).

Committee.
First Church of Christ, Scientist, Ithaca, N. Y.

Coronado, Cal., Feb. 10, 1910.

Dear Mrs. Eddy:—The Christian Science Society of Coronado, Cal., send loving greeting, and grateful acknowledgment for the understanding of Truth imparted to us through the study of your inspired writings. We would like you to know that, as the fruit of our labor, we are now in possession of a little home, free from debt. Our earnest desire is to be loyal to you as our Leader, obedient and faithful to our text-book and Manual, and for continued growth in our understanding of God, as revealed through your work.

In truth and love,
Christian Science Society of Coronado, California.
MARY E. O'HARRA, *Clerk.*

Kansas City, Mo., March 7, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—Permit me, in the midst of great joy for the life in Christian Science, to take one moment of your precious time to thank you for your words in "Miscellaneous Writings" (p. 389):—

> O make me glad for every scalding tear,
> For hope deferred, ingratitude, disdain!
> Wait, and love more for every hate, and fear
> No ill,—since God is good, and loss is gain.

I pray God to give me strength to stand loyally for manhood in Christian Science—to be wisdom's wisdom and Love's love. I owe my life, all that I am or expect to be, to the message you have brought, and I love you for bringing it to the world.

With tender reverence, gratefully, humbly, I address you,
WILLIAM C. OFF.

Des Moines, Ia., Feb. 13, 1910.
Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Beloved Leader:—We, the ushers of First Church of Christ, Scientist, Des Moines, Ia., in meeting assembled, send greetings to you, our beloved Leader, and wish to express our gratitude and loyalty to one who for so many years has daily been about the Father's business. We are glad to assist, however humbly, in this, Christ's work.

Lovingly yours,

WILLIAM CLARK,	WILLIAM MOORE,
H. E. AUKENEY,	E. A. ELWELL,
D. A. PARKER,	T. B. MOORE,
O. L. OLSEN,	CARL A. SANDAHL,
O. M. SANDAHL,	U. E. HILL,

AL KUNTZ.

Dayton, O., March 9, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I know that it will cheer your heart to learn that we had the largest audience ever assembled in our city to hear Frank H. Leonard lecture on Christian Science Sunday afternoon, March 6. Each of our daily papers published a portion of the lecture, the *Herald* giving it in full, as per copy enclosed. That which evidences a growing interest in Christian Science in our city is the fact that never before were there so many meetings arranged throughout the city at the same hour, owing to a great revival which is going on in our midst; but, notwithstanding all the other meetings, we had about twenty-five hundred people present, by far the largest attendance we ever had at a lecture. It will bring joy to your heart to know how harmoniously the two churches here worked together in giving this lecture. This is the second time the two churches here have given a joint lecture.

After my return home from the meeting of the committee on publication held in The Mother Church last July, the boards of the two churches, together with the readers and practitioners, met at Second Church for the purpose of bringing out greater unity of action in the work of the committee on publication, and suffice it to say that much good has followed, and greater unity and love prevails. On Sunday, Feb. 13, Willard S. Mattox addressed the members of the two churches here on the importance of the churches supporting this branch of the work, the work of the committee on publication. We take this opportunity of expressing our gratitude to you for establishing the committee on publication, and for the very great pleasure of having Mr. Mattox in Ohio at a time when our Cause greatly needed his services.

Much good work in healing has been accomplished in this city, and both churches are growing nicely. I am glad to say that, notwithstanding the fact that Christian Science practitioners are not allowed to charge for their services in Ohio, and though I gave up a good position to enter the work of Christian Science, yet in the past nine years God has provided a way whereby every need has been met, thus verifying what you teach, that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

Your writings have proven such a comfort to us. My wife is a student of your dear Mr. Kinter of Chicago, and he told us of your great love for all your children.

Affectionately yours,
LLOYD B. COATE.

NOTICE.

The change in the explanatory note, as recently sent to First Readers by the Publishing Society, was made after the April *Quarterly* had been printed, but it will appear in the July issue. First Readers are therefore requested to continue to read the explanatory note as amended in the letter from the Society, until the change appears in the *Quarterly*.

THE LECTURES.

CEDAR RAPIDS, IA.

Prof. Hermann S. Hering lectured on Christian Science at Greene's Opera House Jan. 24. He was introduced by Don Barnes, who said in part,—

The lessons of the past teach us to keep our minds open and attuned to the reception of new truths. Let us not make the mistakes of the past and rest secure in our old beliefs and in our own ideas, but let us cautiously and candidly investigate the new ideas that are advanced by the best minds of the age. Christian Science has made a quiet yet rapid growth for over thirty years, and its converts and advocates embrace men and women in every walk of life. It advocates and stands for a higher life, for personal purity and civic righteousness.

Those of us who are not identified with this church, founded in love and builded on faith, must bear witness to its practical results and ethical altitudes. A religion that makes bright the dark places, shelters in adversity, that heals the sick and relieves the suffering, that gives hope in place of despair, happiness in place of woe, peace in place of contention, virtue in place of vice, that helps the disheartened to unravel the tangled threads of a dull existence and weave them into the beautiful fabric of better and brighter days, ought to receive a fair hearing and be warmly welcomed by all who believe in the fundamentals of a Christian faith.—*Correspondence.*

ANN ARBOR, MICH.

A lecture on Christian Science was delivered by William D. McCrackan, M.A., Jan. 30. He was introduced by R. L. Warren, president of the Times News Company, who said in part,—

Ever since that eventful morning in the long ago, when the angels sang together and heralded the coming of the Christ-child, the world has been struggling with the great problem of life. As the years have gone along, other problems affecting the welfare and happiness of the people have come forward, and the achievements which have been wrought have revealed the fruit of the labors of the persevering workers. What has been accomplished in all the fields of human endeavor is an open book to the keen observer. But during the ages which have passed there has by no means been a lack of interest in the investigation of that part of the problem of life which has to do with that great eternity toward which we are all hastening. Accomplishment is ever on the ascendency, and the question naturally arises, If in other directions so much is being wrought out for the betterment, the comfort, and the happiness of humanity, why is there not greater progress in that more important field which involves the spiritual welfare of all peoples for all time?

The Christian world has struggled through the centuries to establish the gospel of truth in the hearts of mankind, but with varying success. The reformers in the church, as elsewhere, have encountered obstacles, and as a whole the world is therefore yet floundering in the dark as to the truth and as to God's real purposes. At such a time the work of Mrs. Eddy has come to the attention of investigators. As all other teachers have encountered opposition, so has she; but it is marvelous with what serene purpose and intrepid confidence she has baffled her enemies, and now in her advanced age sits calmly awaiting the triumph of her hope that the truth, as revealed by the Bible and as taught by Christian Science, may find its true place in the world. Surely she has garlanded a wreath of accomplishment whose value and luster the future cannot diminish.

Correspondence.

CHESTER, PA.

Before a large audience at the Grand Opera House yesterday afternoon [Feb. 20] Bliss Knapp delivered a lecture on Christian Science. The lecturer was introduced by Benjamin C. Fox, Esq., a prominent citizen, real estate broker, and member of the board of trade, who spoke in part as follows:—

Today a theme which is being discussed the world over is Christian Science. What is its message? What is its meaning? Is it the truth? These are momentous questions. Are we once again in possession of the religion of the early Christians, who healed the sick and even raised the dead? We are confronted with the same answer to this query that the disciples of John the Baptist were confronted with when Jesus said, "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached."

I am not a Christian Scientist, but have heard of its many wonderful works, its healing, and its benefit to humanity in uplifting the fallen and restoring to respectability those who were seemingly lost. When in the city of Paris, France, some time ago, at the solicitation of friends I attended one of the Wednesday evening testimonial meetings, and that audience of happy faces has ever since been impressed on my thought.—*Republican.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Houston, Tex.—Francis J. Fluno, M.D., Prince Theater, 3:30 p.m., March 20.
Monrovia, Cal.—Prof. Hermann S. Hering, Woman's Club House, March 22.
Bloomington, Ill. (First Church).—Francis J. Fluno, M.D., Church Edifice, 2:30 p.m., March 27.
Pueblo, Cal.—Judge Septimus J. Hanna, Pantages Theater, 4:30 p.m., March 27.
St. Louis, Mo. (Second Church).—William D. McCrackan, M.A., The Odeon, March 28.
Le Roy, Kan.—Frank H. Leonard, March 29.
Oak Park, Ill. (Second Church).—Prof. Hermann S. Hering, Unity Temple, Lake street and Kenilworth avenue, April 1.
Tucson, Ariz.—Frank H. Leonard, Tucson Opera House, April 1.
Exeter, Neb.—Hon. Clarence A. Buskirk, Auditorium, 3 p.m., April 3.
New York, N. Y. (Society of the Bronx).—Francis J. Fluno, M.D., Masonic Temple, 1931 Washington avenue, 3:30 p.m., April 3.
Watertown, S. D. (First Church).—Judge Septimus J. Hanna, Church Edifice, 3 p.m., April 3.

TESTIMONIES OF HEALING.

With a feeling of grateful love, I wish to add my testimony to the many given in the *Sentinel* and *Journal*, for they have been very helpful to me. In 1895 my family of four was afflicted with a siege of a much dreaded fever, and my daughter, aged eighteen years, was a victim of it. The church of which I had been a member for over forty years was not a home to me any more, for I had tried to be faithful and devoted, but my prayers and the prayers of the church seemed so unavailing that I felt the need of something better and higher. As I recovered from the illness so that I could read a little, my sister in Cleveland sent me some tracts on Christian Science. It was the first Science literature which I had ever had, and I read these tracts over and over, for they seemed to give my sorrowing heart much comfort. I had heard of Christian Science, but knew nothing of its Principle or teaching. I thought the church I belonged to was the best, being founded, as I believed, on the Bible and that alone. In about a year I bought a copy of Science and Health, and by studying it soon found it to be indeed the "Key to the Scriptures." The more I read it, the better I liked it, and many minor ailments left me, such as headaches, weakness, rheumatic and stomach trouble; but while I was being helped, and was much pleased with what I was learning in regard to the new way of living, I was not giving proper thought to the healing power of God,—the whole robe of righteousness.

In 1897 came my test for the healing, in the form of poison in my right hand. For ten days and nights I neither slept nor rested, not being acquainted with any practitioner or knowing what to do in the way of Science. To please my family, I used material means and went to a doctor once; and that was sufficient, for I was only worse, and opiates I could not take. Then it was that I learned that man's extremity is God's opportunity. I went to a friend and asked for treatment. He went twenty miles for a practitioner, who came in about six hours. Before he arrived I was easy and dropped off to sleep, and that was the last of the pain. The practitioner said I should remove all material applications,—that God did not require anything but purity. My sister had come, and she took care of my hand, and I had treatment two or three weeks. In about a week we could see the result of the healing, but new flesh had to grow and it was some weeks before the hand was perfectly whole. In six weeks or two months I was doing all kinds of work with my hand, although some had said I never would do many things with it. Thanks to Christian Science, however, I have a good hand, and I have done anything I wished with it for eleven years. I have also been able to overcome a tendency to weak lungs and the fear of lung trouble, which was present with me every winter. While I am thankful for the physical healing, it is but a small part compared to the spiritual understanding of God, the ever-present good, here and now. I had always loved the Bible, but could not put its teachings into practice as I desired until I studied Science and Health.

My husband commenced to read the book as soon as we received it, and he has been helped in many ways. Headaches which came every two weeks and lasted several days, and were growing worse every year, until it seemed he could not endure the suffering much longer, have been completely destroyed; also a difficulty with the hip-joint, which made him use a cane if he walked a mile. For the last ten years he has walked off spry and straight without any cane, God being his only support. Although he is seventy-six years of age, he enjoys good health, and reads little else than the Bible and Science and Health and our other Science literature. We soon found a few Scientists near us, and commenced to go to service with them, driving six miles each Sunday. I enjoy the Lessons, and make them my study every week. They are so well arranged that the Sermon is complete. We are thankful, too, for class instruction from one of Mrs. Eddy's loyal students, and the *Sentinel*, *Journal*, and Manual, etc., are of priceless value to us. The *Monitor* is another gem now added to the treasures in the household.

Words cannot express my gratitude to Mrs. Eddy for bringing to the world anew the works that our blessed Master did and said his followers should do. If this testimony is worthy a place in the *Sentinel*, I hope it may prove a blessing to some one who is hungering, not for material loaves and fishes, but for the spiritual food that heals all our diseases and is a benefit to all mankind.

MRS. ALMEDA WHITE, Alma, Mich.

[Translated from the German.]

I would like to express my gratitude, especially for the proofs of the protecting and healing power of the teachings of Christian Science which I have experienced in cases of sudden injuries. About two years ago I inadvertently reached into a kettle of steaming hot preserves, but without looking at my hand I held fast to the truth that there is neither life nor intelligence in matter, that God is All-in-all, and that evil has no real power. Although the pain tried to make good its claim, I continued to work. The error was soon overcome, and I rejoiced over the disappearance of the material evidence.

Later on I had trouble with the left eye. It was at the time when the English lecture on Christian Science was delivered. With the joy of a child did I look forward to attending that lecture, and although I was not familiar with the English language, I trusted in the healing power of divine Truth which would be expressed there. I went, and was healed, and have experienced no trouble with my eye since. Last spring I awoke one night with a severe pain in the knee. I immediately declared the truth, trying to realize the scientific statement of being. The following morning I could, to sense, get up only with great pain. I had to go out that day, and broke down several times; but I would always get up again, leaning on God's power and strength, and thus get over the difficulty. I struggled along with this trouble, however, nearly all summer, but I knew that God is my physician and my helper, and I seemingly had no fear. A few weeks ago I spoke about it to a friend in Christian Science. He translated for me a passage from the text-book, Science and Health (p. 370), where it says, "The body improves under the same regimen which spiritualizes the thought; and if health is not made manifest under this regimen, this proves that fear is governing the body." I also remembered St. John's words, "There is no fear in love; but perfect love casteth out fear: because fear hath torment;" and Paul's words to Timothy: "For God hath not given us the spirit of fear; but of power and of love, and of a sound mind," and since that time I have had no return of the ailment.

For this blessing, as well as for many others, and especially for the spiritual uplifting and strength which I have received through Christian Science, I am sincerely grateful to God, divine Love, that heals all our diseases, and to Mrs. Eddy, who has led us to where we can grasp the fact that the divine Mind is the sole reality, that God is good only, and that He is All-in-all.

FRAU FROEHLICH-SEILER, Zurich, Switzerland.

It is with deep gratitude to God that I relate the story of my healing through Christian Science. In February, 1907, I was taken with a severe attack of rheumatism, so that even my hands resembled boxing-gloves. For a time I managed to get from one room to another, with the aid of crutches, but finally my shoulder became so much affected and the pain was so intense, that I was unable to do even that much. I had but little faith in doctors, and

Digitized by Google

for a week or ten days I tried to decide whether to call on Christian Science for help, or a physician. Each day I grew worse, and finally this question was put to me, "If God were at the back door, and the best doctor in the world at the front door, which would you choose to help you?" I of course said I would choose God; so on Monday morning a Christian Science practitioner was telephoned for, and from the first treatment I got relief. The lady called each day that week, and by Sunday I was able to walk to church, practically healed, although I took treatment for some little time after, more to learn of God's work than for any other reason. Since that time I have never been sick a day.

It is not only for the physical healing that I am thankful, but also for the spiritual inspiration.

MRS. MADGE FERRELL, Fruitvale, Cal.

I was ill for six years, the greater part of that time able to do but little, and part of the time nothing at all. I had tried first one remedy, then another; but everything failed. Finally the physicians said I would have to go through an operation; which I did a little over two years ago, but it was not successful. I grew gradually worse for six months, at the end of which time I was examined by three prominent physicians in this city, and they all said that I must return to the hospital immediately for another operation, or I could not live long. I refused to go back to the hospital, knowing I could find no help there. Christian Science was the only thing left, the only possible chance for me to live, so I decided to try it. I took treatment for six weeks, at the end of which time I returned to the physicians to know if I was not all right, and they told me that I was. I knew I felt all right, but I wanted to know what they would say. I had several forms of organic trouble, a growth being the most serious, besides very bad stomach and bowel ailments.

It is now nearly two years since I was healed, and I have never had any return of any of the old difficulties, and have never tasted medicine since. Christian Science has proved itself by far the best medicine in our family. My little boy was cured of a fever in three days. We did not know what it was until the third day, when we sent for a practitioner at once, and the next morning he got up well. We have had many other beautiful demonstrations in Christian Science, for which I am very grateful indeed. Words could not express my gratitude to God, and to Mrs. Eddy for this wonderful truth that does make free.

MRS. NELLIE JORDAN, Denver, Col.

On being asked if Christian Science has done anything for me, my answer is, that I believe it has saved my life. It has also brought to me good health, besides what it has done for my two babies. I had catarrhal trouble of the head and throat so that I could scarcely eat at all, and I lost my voice almost entirely. I took absent treatment in Christian Science, and now I can talk and sing as loud as I wish. My throat is actually better than it ever was, for when a child I was always afflicted with bronchial trouble, but now I am free from it. Besides this, the truth has healed me of other ills.

Those who believe there is nothing impossible with God are bound to acknowledge the power of Christian Science, for it is undoubtedly "the works of God," spoken of by Jesus. We all believe in Christian Science, and I have nothing to do with medicine. I have a copy of Science and Health, and this book and the Bible I constantly read. I do not hesitate to tell any one what Christian Science has done for us.—ADAH CALLIE, Aubrey, Tex.

I wish to submit my testimony to the healing power of Truth. In January, 1909, I arrived home from my work feeling very ill. I went to bed, and in the night I called my wife, the pain in my lungs being very distressing. I could not sleep at all, and about six o'clock in the morning my wife telephoned to a Christian Science practitioner, who began to treat me at once. I soon went to sleep, all pain having left, and I slept for two hours. In three days I was up, and in a week I went to work. Words fail to express my gratitude for this healing. I trust that some other sufferer who reads this may be benefited by Christian Science.

GEO. E. BOWDITCH, Somerville, Mass.

I wish to express something of what Christian Science has done for me. When I turned to it I was in very poor health, suffering from a complication of diseases—severe stomach disorder, with frequent and violent headaches, kidney and heart trouble. I had been under the care of several good physicians, but none of them could give me relief. I turned to Christian Science as a last resort, for I had no faith in it, and much as I needed the healing I did not want the religion, as I belonged to a church having a high ritual, which was very dear to me, and I felt that the religion which my mother has taught me was the only one.

When I finally did consent to have Christian Science treatment, I was surprised at the change it wrought. Within a week I was better, and in three weeks I was like another person. My physical ills had nearly all disappeared, and I was able to do any amount of work without the feeling of fatigue from which I had suffered all the time before. Instead of wishing for the end, I found the joy of living, as it is our right to live, in health and harmony. For the physical healing I am deeply grateful, but much more for the spiritual uplift which has given me the peace of mind that "passeth all understanding." I now know that "divine Love always has met and always will meet every human need" (Science and Health, p. 494), and there is great profit and comfort to be derived from the study of the text-book, "Science and Health with Key to the Scriptures" by our beloved Leader, Mrs. Eddy.

ETTA MULVEY, Portland, Ore.

When our little son was born in March, 1908, it was noticed that he could not use his left hand or arm. The attending physician stated that the trouble was very serious. We had two other doctors make an examination, and one of them asked for an X-ray photograph, as he did not know what the trouble was and was frank enough to confess it. The doctors could not give us any encouragement, so we had Christian Science treatment and it was wonderfully successful. After the first treatment the child moved his arm and hand, and within six weeks the healing was complete.

I would also like to mention that for fifteen years I had worn glasses, but after three weeks' reading of Science and Health by Mrs. Eddy, I was enabled to put them aside and have never needed them since. This was about three years ago. For these beautiful proofs of the power of Truth, words are inadequate to express my gratitude to God, also to our dear Leader.

MRS. NANA E. COALE, Yonkers, N. Y.

A little over two years ago, I was stricken with a severe attack of fever. In my home there was great opposition to Christian Science, so much in fact that I immediately left and went to the home of a Christian Scientist in an adjoining town. I had been interested in this teaching for about two years, and had no faith whatever in *materia medica*. During the first week of the sickness I arose each morning between six and seven o'clock, dressed myself, and went downstairs and rested in a chair all the forenoon, unless aroused by some one. The usual symptoms of this

Digitized by Google

disease presented themselves, but by the second week I was able to realize the truth more fully. The fever began to leave me, so that I could take a little nourishment, and my strength never failed me during this sickness. The third week I began to eat heartily, and was coming to myself again. The fourth week I was able to return to my home and begin work, realizing that Truth had carried me safely through this experience, and that I had been raised from sickness to health by the power of God. I thus proved that divine Love is "adequate to unclasp the hold and to destroy disease" (Science and Health, p. 412).

I am grateful for this deliverance and for all the blessings that have come to me since. I know that the truth which was practised on the shores of Galilee by Christ Jesus and his disciples has now been brought to us in Christian Science, made applicable by the teachings of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and that it meets all the needs of suffering humanity.—GEO. A. MARDEN, Exeter, N. H.

With a sense of devout thankfulness I wish to express my gratitude for the help which Christian Science has been to me, and for many manifestations of the power of divine Love. Shortly after we came west, over a year ago, our little daughter was stricken down very suddenly. I immediately sent for a Christian Science practitioner, and in less than twenty-four hours she was relieved. In a week she was entirely well. A few months ago, I was taken seriously ill with chills and fever, my head giving me great pain. At times it seemed as if I could not stand the intense pain, and I was so dizzy that I could not go up or down stairs without experiencing great suffering. I placed myself under Christian Science treatment, and in less than a week I was better.

My husband has been healed most wonderfully. He was stricken one night with a severe pain in his back, and upon going to his place of business the next morning he was obliged to return home. He then asked me to get help in Christian Science for him, which I immediately did. He was relieved at once of the worst suffering, although the pains would come back occasionally. There was a gradual improvement with each treatment, and it required only four to effect a complete and permanent cure. He is most grateful for his physical healing, but even more so for the peace and contentment which have come with it. We both wish to express our deep gratitude to God, also to our dear Leader for the help which Christian Science has been to us.

My cup of rejoicing is full to overflowing for these healings, and for many other blessings. I am thankful for the spiritual uplift,—"the peace of God, which passeth all understanding."

MRS. ELIZABETH L. HOADLEY, Spokane, Wash.

Jesus said, "I am come that they might have life, and that they might have it more abundantly." Since coming into Christian Science, headaches and some minor ailments have been less frequent and have been quickly overcome. I have always enjoyed the Bible readings and Lessons, but now there is a deeper meaning to them than ever before. Passages which I had set aside as unexplainable, I now see not as teaching the supernatural but that which is divinely natural. For this deeper and richer understanding of the Bible as containing a rule for life, I am truly grateful to our dear Leader.—GERTRUDE E. DOWLE, Chicago, Ill.

It is with a deep sense of gratitude that I testify to the blessings which I have received through Christian Science. I first became interested in it over two years ago, at which time I was suffering from a bowel affection, asthma, and a cough which *materia medica* had failed to cure in the course of nine years. I had received only temporary relief, but these ailments have been entirely overcome by the earnest perusal of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Through Christian Science treatment I have been able to lay aside glasses which I had worn for more than sixteen years, in fact I had been obliged to use two pairs. My gratitude and happiness are unbounded, not only for the physical benefits received, but Christian Science has also enabled me to overcome worry and a sense of grief which bordered on melancholy. In Science and Health we read this glorious statement, which has been proven to me: "There is no power apart from God. Omnipotence has all-power, and to acknowledge any other power is to dishonor God" (p. 228).

I am striving daily to learn more of this blessed truth which makes men free, and in place of gloom there is now health and happiness. My gratitude goes out to God, and to our beloved Leader, Mrs. Eddy, through whose teachings we gain an understanding of Christian Science.

MRS. C. TANTZ, Baltimore, Md.

Four years ago I was physically and mentally a wreck, and completely discouraged, as I had just come home from boarding-school with the expectation of having to give up my education. It was at this time that I was led to Christian Science. I was helped at once, and from the first treatment I laid aside glasses which I had been wearing. The next fall I returned to school and did nearly two years' work in one. Then, by studying two months in the summer, I entered Harvard college without conditions. For these and many other blessings which Christian Science has brought me, I am deeply grateful to God, and to our beloved Leader, Mrs. Eddy.

ARTHUR W. FLETCHER, Cambridge, Mass.

When I think of my present happiness, and then of the days before I knew about this saving truth, I am indeed very thankful to God for Christian Science. I had been a church-member, and was seeking for the truth, and I sometimes wondered why my prayers were not answered, but I know now that I did not understand how to ask aright. I often went to prayer-meeting hungry for the spiritual food, and came away disappointed and discouraged until I began the study of Christian Science. When I learned the great truth that man is governed by the divine Mind, then the joy and the peace that came to me can only be known by one who has had a similar experience. I am very grateful for the physical healing that has come into my life through this great truth, and members of my family also have been healed and made better. Spiritually and in every way we have been made to rejoice in God, who saves from sin and sickness.

MRS. A. FOOSHEE, Winfield, Kan.

I wish to add my testimony to the efficacy of Christian Science, and to express my deep gratitude for what it has done for me. I had been suffering from a severe cold for several weeks previous to Jan. 1, 1909, on which date I was suddenly taken very ill in the street with what seemed to be acute lung trouble. Besides the pain I coughed incessantly, and I had to be taken into a store, although I was only five minutes' walk from my home. I was taken home in a carriage, and my husband immediately went for a Christian Science practitioner, who responded at once. I was in a complete state of collapse when she arrived, but after a few minutes' treatment the cough ceased, and in less than half an hour my trouble had all disappeared, and I have been a perfectly well woman ever since.

Previous to that time I knew absolutely nothing about Christian Science healing. I am in my sixty-sixth year,

Digitized by Google

and since the day I was freed from my diseases by divine Truth, as revealed in Christian Science, I have missed only one meeting in the church, and that was on account of stormy weather. My physical health is better than at any time in the last twenty-five years. I read and study the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, every day, and attend all the meetings. I have received great benefit in many ways from the study of this book, and am trying to prove my gratitude by shaping my life in accordance with its teachings.

MRS. CATHERINE BALLANTYNE, Hudson, Mass.

Often as I have desired to express my gratitude for Christian Science and what it has done for me, I really cannot find words to do so. I had been a sufferer for over thirty years, and had tried all known remedies and many physicians and specialists, but received no permanent relief. After being given up by the physicians, I was sent to a hospital to have an operation for appendicitis, an abnormal growth, and bladder trouble. After I returned from the hospital I was not much better, and in about six years I was so bad that the doctors wanted me to go to the hospital and have another operation, saying that there was no other help for me.

This time I called a Christian Science practitioner, and I was healed immediately, so that I was able to be up and walk where I pleased in my home, and in doing my work I find Christian Science a very great comfort and source of strength. I have had many difficulties to overcome, but Christian Science has dispelled them all. I trust that this testimony through the power of Truth may be a ray of hope to lead into Christian Science those who are seeking for health, happiness, and the true way of life, knowing as I do that it will help them as it has helped me, if they will only accept the truth in God's way.

My heart goes out in love and gratitude to Mrs. Eddy for the blessings I have received and for the good work she has done and is still doing for the world. I am most grateful to God for guiding me into His truth, that I may have life, and "have it more abundantly," as Jesus said we should.

MRS. CHARLOTT A. RATHBUN, Webster, S. D.

Words are so inadequate to tell what Christian Science has done for me and mine, that I have been slow to write a testimony for publication. The great improvement in my own health under Christian Science treatment was followed by clear cases of healing in my family, one a case of long standing and obstinate chronic trouble, where many remedies and systems had been employed. But above the physical healings is the knowledge, the abiding consciousness, of the omnipotence, omniscience, and omnipresence of God, good, and that "all things work together for good to them that love God." This has transformed my mind from doubt and uncertainty to hope and trust in Christ, Truth. I am convinced, after eight years or more of study and of proving the teachings of Christian Science, that it presents the sanest optimism, because it is built on a sure foundation; and also that Mrs. Eddy has discovered the means of healing, and with it the elevation of humanity to oneness with God; that she has lovingly and faithfully given to mankind the revelation she has received, and that as we grow into these eternal truths, and they become ours, we can and do heal the sick and sinful.

These few words of acknowledgment are given with the sense of a debt long overdue, and with the earnest wish that they may serve as a guide-post to some suffering one.—ALICE L. VANDEVER, Columbia, Mo.

It is with a grateful heart that I wish to tell what Christian Science has done for us. Since knowing of this wonderful truth, about two years ago, we have used no material remedies, depending entirely on Christian Science. In May, 1908, our little boy of three years was severely burned on his hands and body with an acid, and he also swallowed some of it; but with the help of a Christian Science practitioner, who was called immediately by telephone, he was entirely healed in four hours' time. He ate a hearty supper, slept all night, and there were never any bad results from the experience. How we rejoiced over this demonstration, realizing what the result would have been if material means had been used. When we understand that the power of God, good, is ever present, we know that when this truth is rightly applied, good results must ever follow. I formerly read the Bible as a duty; now it is a pleasure to do so, and the spiritual understanding of it is to me a great blessing. We find Christian Science of great help in rearing our children, and there is more peace, love, and harmony in our home. Many ills of the flesh have been overcome,—such as colds, headache, fever, earache, etc. My husband was healed of rheumatism, from which he had suffered for years, and for which he had used many material remedies with only temporary relief.

Christian Science has not only healed our bodies, but has made better Christians of us. I cannot in words express my gratitude for the healing power of divine Love, but I hope my life may prove it. God bless our dear Leader for bringing this truth to suffering humanity.

MRS. O. E. ELLISON, East Chattanooga, Tenn.

I am a schoolboy and have always been a Christian Scientist. I read the Bible and Science and Health regularly, and love Mrs. Eddy for the good she has done for everybody. About two years ago, when I was playing on a high fence, I fell, and hung with a rusty nail through the palm of my hand until my father and brother could lift me off. In a day or two I ran another nail into my foot; but both injuries were quickly healed by Christian Science, there being no pain or swelling.

FRANCIS W. UTLEY, Eddyville, Ky.

[Written for the *Sentinel.*]

OUR KNIGHT.

ADA J. MILLER.

SURELY he'd come, this knight, and like the king,
Arthur of old, redress the wrong and stand
For honor, justice, and for stainless truth!
In dream I saw him draw his sword,—the Word,
Before whose power wrong shrinks, abashed and pale,
Foreseeing doom in this one flash of light.

One came—but Modred he—not Arthur, king.
Like all the world, save only those who see
Beyond the glamour and the sheen of gold,
He paid his homage at the court of fame.

Awakened with a start, I saw my dream,
Like spirit of a rose plucked ruthlessly,
Pass shadowlike, but left was its perfume
To sweeten memory's growing treasure-store.
And then I saw that Arthur and his knights
No more wear human form, but here today they live
In Truth impersonal, that knows nor rich,
Nor poor, nor earthly rank, but only knows
That all must yield to changeless law of love,
Which rights all wrongs, knows justice only, and
The power supreme, omnipotent, of good.

FROM OUR EXCHANGES.

[President William H. P. Faunce, LL.D., in *Watchman.*]

Ever more clearly we are coming to see that the Bible is not a series of rules to be obeyed, or ceremonies to be performed, or propositions to be believed, but is the record of the supreme religious experience of humanity, the immortal testimony of the men who beyond all others in history have come face to face with God. It is not, we say, a series of rules to be obeyed; if it were, we should still compel women to keep silence in the churches, and should send back every runaway slave to his master. It is not a series of ceremonies to be exactly repeated; if it were, we should practise foot-washing still, and should insist that the Lord's Supper be celebrated, as it was in the early church, at the conclusion of a regular meal. It is not a series of propositions to be accepted; if it were, we should all believe in demoniacal possession, in the immediately approaching end of the world, and should be torn with doubt as to how to reconcile Paul and James, Matthew and Luke, the ethics of Joshua with the ethics of the Sermon on the Mount. But if we can see in the Bible, as our scholars are more and more clearly teaching us, the record of the greatest voyages the human spirit has yet made in its search for God, the witness of those who out of strong crying and tears—yea, blood and martyrdom—have found the Father of spirits, then its pages become to us unspeakably precious and filled with deathless inspiration to heroic ethical endeavor. And if we find that the Bible leads us everywhere into the presence of our Lord, through the prophets who saw him, and the singers who longed for him, and the fishermen who sailed with him, and the apostles who gave their lives for him, and that the consciousness of the Lord thus becomes the fountain-head of Christian ethics, Christian truth, Christian attitudes toward God and toward man, then indeed our Bible is enthroned again in the center of our affection and our zeal.

[*New-Church Messenger.*]

The Christian life only begins with the illumination of the intellect. But the joy of that illumination is so great that when it first comes one feels that he must tell others, and he thinks that he has only to tell what has come to him to have others see, believe, and accept. But the time for others to accept has not come. What is told is rejected because of the mind being so infilled with falsities that it rejects the truth as the stony ground does the seed. Then one becomes discouraged, and may commence to live within himself, contented with what he knows. Or he may mistake the first joy for the final good, and not with zeal apply the light to his personal life, and so fail to be blessed with the life of love that it is the use of light to bring. The first use of light is to remove the evils and weaknesses from one's own heart.

[*Christian Register.*]

Prayer as an effort to direct God is an impertinence; as a method for modifying the laws of the universe, it is an anarchistic invention; but prayer that brings us into spiritual communication with purposive Love, and learns to be happy by saying, Thy will be done on earth as it is in the movements of the stars, creating harmony and fellowship for all,—such prayer gives us the Father.

[*Examiner.*]

Straightness is righteousness. And righteousness is not so much a word for theology as a word for ethics. It may belong to one's creed, but it must belong to his conduct. It roots itself deep in the soul, and works itself out through every act of the life. It ought to appear in great things, but it must also appear in trifles.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE. POSTPAID: Single copy, one year, $2.00, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; twenty-five copies, each, one year, $1.80, six months, $1.10; fifty copies, each, one year, $1.60, six months, 95 cents. These rates apply in the United States, Canada, Mexico, and Cuba. To all other countries, add 40 cents yearly for postage on each subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Ten copies, to ONE ADDRESS, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Ten copies, ONE ADDRESS, $2.10; twenty-five copies $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year $2.60 for six months. In all other countries additional postage at the rate of $3.00 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 190 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.
Ten copies to one address, each, one year, $1.90; six months, $1.15.
Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.
Fifty copies to one address, each, one year, $1.50; six months, 90 cents.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

In his address before the Chamber of Commerce at Rochester, N. Y., President Taft made an earnest appeal to Congress to subordinate and sacrifice individual opinions in order that the measures he recommended in fulfilment of party pledges shall be enacted into law. He expressed the hope that the party would show that it has "the sense and discipline" to meet its responsibilities. At one point in his speech, which was devoted entirely to the legislation which he has advised in the past few months, the President made this declaration: "That if this Congress is to be treated as a Republican Congress, these things ought to pass in fulfilment of party pledges. After this is done, it does not matter what happens at the next election. We shall have done something the country will be grateful for, whether it thinks it ought to express this gratitude in the immediate future or not. I am confident that in the end these measures will approve themselves. The troubles we most fear are those that never come. The measures that we promised ought to be adopted not because they will give us political strength, but because they are right. And if they are right the people will find them to be right, and that's the best politics in the end. I am tired," shouted the President, amid a storm of cheers, "of consulting particular interests to see whether or not a thing ought to go through. I am in favor of consulting every interest to see what its argument may be, and I want to give justice to every interest. I want to know if a thing is right. If it is right we can convince the people that it is right, and they will be with us."

Education is the best medium through which to promote relations of friendship between America and Japan, according to Baron Dairoku Kikuchi, president of the Imperial University of Kyoto and Japan's foremost educator. Before the Civic Forum, New York, on the eve of his departure for home, he said: "In my opinion, the proper and most effective bond to connect Japan and America is one of education, and the best way to secure such a lasting bond would be by the frequent interchange of prominent men of letters and instruction. As to the recent newspaper talk about war between your country and Japan, I feel convinced that neither country desires it and that there is no occasion therefor. I do not think that one per cent of the people of this country have any idea of entering upon such a struggle, and in Japan no nation has one half of the good will, respect, and admiration as that in which we hold the United States."

The Administration railroad bill is being sharply debated in the Senate and is likely to be much amended. The House committee on interstate commerce has adopted an amendment prohibiting railroads from leasing, purchasing, or acquiring interest in the capital stock in "any direct and substantially competitive" rail or water corporation. It would also bar any water transportation line from so acquiring capital stock interest, purchasing or leasing any railroad directly or substantially competitive with such water line. Another amendment provides that the interstate commerce commission shall supervise the issuance of stocks and bonds and fix the price at which they shall be offered for sale, instead of a flat provision in the bill restricting the price to the par value.

The final argument of the suit to dissolve the Standard Oil Company of New Jersey as a conspiracy and a monopoly in violation of the Sherman anti-trust law, was made last week and the court took the matter under consideration. The third day in the contest of counsel before the court was a memorable one, not only because of the arguments, but also because of the interest manifested in the proceedings, both by the bench and by the people who were attracted to the court. Rules of the court prohibiting spectators standing in its presence were swept aside, and members of Congress stood around the wall of the room. Not in years have so many persons been packed into the little chamber.

In the St. Paul (Minn.) Auditorium Secretary of the Interior Richard A. Ballinger, ex-Chief Forester Gifford Pinchot, Governor Eberhart, James J. Hill, and twenty others,—state officials, scientists, and capitalists,—discussed on Wednesday, Thursday, Friday, and Saturday of last week the problems of conservation and agricultural development in Minnesota. It was the first state congress on conservation, and since it was first called by Governor Eberhart, its scope has broadened until every conceivable phase of conservation and development was included.

Approximately three hundred thousand corporations amenable to the law imposing a tax of one per cent of their net incomes above five thousand dollars, have made returns to the internal revenue bureau. Additional returns are expected to swell the number to three hundred and twenty-five thousand, which will be in keeping with the estimate made by the officials before the law became operative. It is now generally believed, from the reports of collectors thus far at hand, that the estimate of twenty-five million dollars revenue from the corporation tax this year may be exceeded slightly.

A new art gallery was presented to the public at Washington last week, in connection with the opening of the new thirty-five hundred thousand dollar home of the National Museum. The fine granite structure, with an area of four hundred thousand feet on its four floors, is the latest Government building being completed in Washington. Not all the building is yet finished, although it is all under roof. Pending the completion of the interior of the east, south, and west wings, only the northern section is ready for occupancy.

After an intense and interesting parliamentary struggle in the House of Representatives, the resolution of Mr. Norris of Nebraska, providing for a rules committee of six Republicans and four Democrats, chosen by caucus, was adopted. Heretofore, for many years, the committee has been appointed by the speaker, who was himself its chairman. The issue was won by "insurgent" Republicans voting with the Democrats against the "regular" Republicans.

The question of the constitutionality of the corporation tax provisions of the Payne-Aldrich tariff law was argued last week before the United States supreme court. The contest attracted almost as much attenion as the Standard Oil dissolution case, heard in the court earlier in the week. Fifteen cases involving the question of the validity of the tax have been brought to the court for final judgment.

The so-called beef trust has lost the decision in the New Jersey supreme court, Justice Swayze filing a statement that he would sign the order compelling the National Packing Company and other packing companies to produce their books before the Hudson county grand jury for use in the investigation that body is holding with respect to cold storage houses in Hudson county.

The North Dakota coal rate law of 1907 is held to be constitutional for the present by the supreme court of the United States, despite the claim of the railroad that the law requires the transportation of coal below the cost of service.

International.

The native vernacular press has been reckoned, and justly during recent years, a powerful factor in the rejuvenation of the middle kingdom of China, but a marked change of tone has come over these publications as a class. The outspoken criticism of two years ago has been replaced almost universally by a spirit of acquiescence in the established order of things. The native press has passed under the control of the native official. There is hardly a newspaper worthy of the name printed in Chinese which is not owned or subsidized by mandarins.

The civil service estimates for England for 1910-11, which have just been given out with a total amount of upward of three hundred and thirty million dollars, show like the navy and army estimates a marked increase in the national expenditure. Should the chancellor's budget provide for the usual consolidated fund charges, the grand aggregate expenditure which the chancellor will have to meet will be upward of eight hundred and eighty-five million dollars, or nearly fifty million dollars in excess of last year's total.

Far from causing a ministerial crisis, the debate in the French Chamber of Deputies on the scandal in connection with the liquidation of the religious orders resulted in the adoption of a resolution, 343 to 70, condemning in the severest terms the manner in which the liquidations were executed, but expressing confidence in the government's promise to fix the responsibility and punish the guilty whoever they may be.

The Dominion government, by a solid party majority of forty-one, has carried through the second reading its bill for the construction of a Canadian navy. The measure has been unsuccessfully fought by the Conservative opposition for a month. The vote finally and irrevocably committed the Canadian government to the creation of a navy independent of Great Britain.

Japan will not object to the permanent peace court proposed by Secretary Knox, though the foreign office has kept silent on the subject. While there are difficulties in the way, these are not insurmountable. Japan, though giving consent to the plan, will point out that a compulsory court of arbitration must be most carefully organized.

The House of Lords last week debated the resolutions presented by Lord Rosebery, looking to the reform of the second chamber, but it is not likely that a division will be reached until this week. The speeches generally showed a strong feeling against any tampering with the hereditary principle.

Industrial and Commercial.

The Grand Trunk railroad system of Canada is seeking an entrance into Boston and Providence. It now reaches tidewater in New England at New London, Conn.

The boot and shoe exports of the United States for 1790 were valued at $11,013; those of the calendar year 1909 were valued at $11,443,225.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

EVERY MAN SPEAKING THE TRUTH TO HIS NEIGHBOR.

SUE H. MIMS.

IN wise admonition to the early Christians, St. Paul writes to the Ephesians: "That ye put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; and be renewed in the spirit of your mind; and that ye put on the new man, which after God is created in righteousness and true holiness. Wherefore putting away lying, speak every man truth with his neighbor."

Lately a very strong illustration of the power and wisdom of this admonition came into my experience. While traveling, I missed a train, and feeling a sense of great weariness, I drove to the home of a dear friend, a consecrated Christian Scientist. On entering the home I said to her, "Now let us have an evening together, to talk truth one to another;" to which she and another dear friend with her agreed. I first began to declare the truth of being,—"perfect God and perfect man" (Science and Health, p. 259), and our conversation was indeed "in heaven," for we thought and talked of spiritual existence, of the atmosphere of pure intelligence, of the ever-presence of divine Love and its reflection, of spiritual law and its demonstration, together with readings and quotations from our Leader's writings. When the hour arrived for me to leave, the errors of sense had been destroyed by this Christian communion; the discomfort and weariness had vanished, and I went on my way rejoicing.

Christian Science, going to the root of things, reveals to us deeper meanings than were dreamed of before the spiritual vision was opened. It embraces and unites the moral and the spiritual law. We see now that to talk truth to one another means vastly more than simply telling the truth about material incidents or events, although that is a stern requirement also of the moral law; but the higher sense of talking truth enables us and requires us to plant our feet on the very basis of true being. Before putting on the new we are admonished to put off the old man,—the old concept, or Adam theory of man as material, fallen, separated from God. Conversation on this plane of thought simply makes the miasma of earth, the resultant of sin, disease, and death.

The putting off or repudiation of this false sense of existence opens the way to the true and spiritual vision. God is recognized as the only cause and creator, the Father-Mother God, the only substance of all that is,—invisible, incorruptible, indestructible, eternal,—the infinite Life of all that is, the ever-present Love, the divine Principle of all, radiating joy, health, strength, bounty, blessedness. The spiritual law is seen to be continuous,—never obsolete, never intermittent, but ever active, ever operative, destroying all false sense of law. To talk and live in this atmosphere of spiritual understanding of the one Mind that is good, unites in one divine brotherhood all men held in the bonds of unselfed love, and furnishes indeed a glimpse of heaven.

Our dear Leader tells us in Science and Health (p. 492), "For right reasoning there should be but one fact before thought, namely, spiritual existence." She also says (p. 14), "Become conscious for a single moment that Life and intelligence are purely spiritual,—neither in nor of matter,—and the body will then utter no complaints." Indeed, in our text-book we are so clearly shown the way out of sense into Soul, out of discord into harmony, that we need only be faithful in following its teachings to attain the desired goal. If every Christian Scientist on earth should unite for one week in the solemn and sublime purpose to live and act and speak only from the true basis of being, would it not make such a rift in the clouds of materialism that a very splendor of light and life and health and harmony would flow into consciousness? Aye, and the sick would be healed spontaneously and nations born anew in a day.

It is gratifying, however, to know that the "signs of the times" are most encouraging; that the Christian Science consciousness is steadily advancing to this high ideal; that the bow of promise spans the heavens, and faint whispers of angelic songs are heard above the din and harsh noises of the day.

CHRISTIAN SCIENCE IS BRINGING HEAVEN TO EARTH.

EDWARD B. LENT.

[About seven years ago Mr. Lent wrote a book entitled "Being Done Good," and included in it a chapter in which he ridiculed Christian Science. Since that time he, like many others, has found that he was mistaken in his estimate of the value of this teaching, and it is his intention, we are informed, to insert in the remainder of the present edition of his book the following explanation and correction. —EDITOR.]

SEVEN years ago I "tried" Christian Science for one whole month. I could then see it was a fraud (everybody said so), and I ridiculed it in a chapter in this book, as I deemed it my duty to do. Two years ago, after wandering five years more and eight years altogether in the desert of matter, searching for the truth that would make me free, I was turned back to Christian Science by a woman with a copy of Science and Health and a Bible. Up to that time I had engaged upward of thirty-five doctors and material healers, to say nothing of innumerable "cures," in my quest. When this woman reached out her helping hand I had dwelt in a far country about long enough, and of husks I had eaten to the point of yearning for my Father's house. For the past two years I have been keeping to the straight and narrow way which leads to the heights in Christian Science, and I have demonstrated much over the claims of ill health,—enough to know that Mary Baker Eddy has established a church that will raise up a race of prophets and poets of the true order, immune to the fears of these days, and bring to this earth a full realization of the prayer, "Thy kingdom come."

The world is on the edge of a spiritual reformation free from superstition, vain speculations, and trifling psychologi-

cal investigations. The so-called scientific methods of gathering and classifying material and psychological "facts" must be abandoned. "Let the dead bury their dead," is the master Scientist's enduring comment on pathology. He did not teach that the world was to be overcome by such methods as our physical scientists employ, but that it was to be dominated by man when man, through intercourse with God, Spirit, realizes his eternal, spiritual, and perfect relations with the Father.

I learned that a mortal's faith, or his doctor's faith, in a drug saved him apparently, until his worship, often unconscious or subconscious, of that drug idol failed. The age of idolatry is here, and must be wiped out by knowing the truth that makes mortals free. The truth is that God never made discord; that a house divided against itself cannot stand; that a fountain cannot give forth both sweet water and bitter; we cannot serve both God and mammon. This is true science, but it is not yet taught at the universities of the land and logically applied to the smallest things of life. But it will be lived there, as elsewhere, when preaching gives way to doing.

The great physicists cannot see this thing, nor the psychologists of the schools. Their minds are loaded and overloaded with hair-splitting fancies founded on subtle, unsuspected divinations, which they proceed to materialize and then "discover." But the wise of this world are sincere, and will yet become as babes and imbibe the truth which is so simple that we all pass it by every day to seize the phantasmal which to our poor sense seems so real and vital. It is well to be armed, however, with armor that is proof against these misleading wiles.

I have no criticism to make of any sincere worker. As a reformer I am amazed to find that I have much to do right here at home, and any effort that I might care to make in straightening out the affairs of my neighbor without his seeking might better be spent in my own bounds.

I have regretted what I have written in this book against Christian Science, and I have about paid the last farthing for it. I have regretted all my sins, most of them committed through ignorance, but I shall work my way out in so far as I move sincerely and actively toward the real and substantial things of the spiritual kingdom.

Few of my friends see the coming of the millennium as I do. They do not have to see it yet. They are big, strong, and healthy, and busily happy. That is the way I want them to be. In due course they will reach the road quicker than I have done. They are more gifted with the simplicity that is necessary to secure direct results. They will say when they call, "Something has done him good: I guess it's the fresh air in the country; he drives out every day now." Little do these kind hearts realize what has been done to effect this change; they know nothing of the devils that have been cast out or the angels that have been admitted. So must it be with every mortal. His friends can give to him much comforting sympathy and uplifting thought, but in so far as they coddle him in his misfortunes their efforts are misdirected. This great mistake the human race does not yet perceive, but it will.

I do not want to preach. The way to do lies clear before me. For this I am grateful to Almighty God, and to Christ Jesus, the Wayshower in Science.

But where would I have stood had the message of that New England woman not been delivered? Mary Baker Eddy is the greatest reformer that has come into this world since the year 1.

HALF MEASURE AND FULL MEASURE.

COL. W. E. FELL.

It would seem that the chief difficulty with which the young student of Christian Science has to contend is his inability to accept the fact that the whole of material existence is a falsity, something in the nature of a dream. Those things which most strongly appeal to mortals in their better moods, he prefers to consider as a part of the realm of the real; that is, he makes reservations in favor of the appearances which physical sense asserts to be good or beautiful. The baneful, the injurious, the criminal, he willingly relegates to the realm of the unreal, failing to see that, so long as he permits himself to discriminate between the pleasant and unpleasant phases of materialism, he is clinging to and tilling a soil into which the seeds of sin, sickness, disease, and death may fall and fructify.

Christian Science teaches that the supposititious mentality called mortal mind, which is ever at enmity with God (according to St. Paul), embodies its own thoughts and calls them material things. Ignorant of itself and of what it is doing, it fears these false creations or falls down in abject worship before them, indiscriminately attributing their origin to God or to the devil. Ignorant of itself, ignorant of the fictitious nature of these manifested beliefs, ignorant of its own action and reaction, trusting nothing but the false evidence of the physical senses, deceived and deceiving, verily this mortal or carnal mind is ripe for destruction; and this welcome destruction of its tired and tortured selfhood must come when consciousness is prepared to contemplate perfect manhood, the Christ-idea, and to refuse all government but that of divine Mind. Let consciousness of the one Mind humble mortal, material selfhood out of existence; then shall the meek inherit the earth,—have dominion over every material condition.

When Christ Jesus rent the veil of materialism from top to bottom, the dragon received a deadly wound; but through the unfaithfulness of men to divine Principle and to the spiritual ideal, the dragon's "deadly wound" was *healed*. Spirit, however, was not dead, nor could the spiritual ideal be absent, or at any time less than perfect. One willing, waiting ear, attuned to the voice of Spirit, heard again the soft whisperings of Truth and Love, and this patient, tireless watcher has given to a sick and sinful world the import of that message, for which we are grateful.

When the light of Truth first dawns on human consciousness, partially awakening it to something apart from and outside of itself, mortal mind is reluctant to come forth from the cold dark shadow of its own false selfhood into the full light of God's day, lest perchance it should behold too much of its own nakedness and, in the manner of the Scriptural account of the Adam mentality, be overwhelmed with shame. Not until the call becomes imperative for right consciousness to come out and separate itself from the fears and fancies of ignorance, is one willing to acknowledge and bow down to God, infinite Mind, the spiritual creator of a spiritual creation. Although the process of unfoldment may seem to be slow, there should be no discouragement, since there is no reason for it. Nothing can take from the student of Christian Science the truth that has been unfolded to him. Love has given him "the morning star," the earnest of approaching dawn, and now is the time for him to loose from off his feet the clogging sandals of a discredited materialism, whether seemingly good or obviously bad, and as our Leader happily expresses it in Science and Health (p. 485), "emerge gently from matter into Spirit."

We should bear in mind that the unfoldment of Truth's idea in individual consciousness is as irresistible as the day's dawning; that nothing can stay the grandeur of its stately progress. Though clouds may seem to obscure, they cannot hinder, they cannot deflect its course. Let the young student press steadily forward, heedless of the feints, the marches and counter-marches of error, ever looking upward through night's gloaming to the heights whence comes the light which tells of the perfect day of Spirit.

THE LAW OF OPPOSITES.

WILLIAM HALL ROBERTSON.

THERE is no mortal law to which the world holds more rigidly than the supposititious law of opposites. The world has said that there's never an up but there's a down; and going on, the world has enlarged upon this to say that it is impossible to perceive the one without perceiving the other, at some time or in some way. From this line of theory comes the next statement in the order of human reasoning, which is, that it is impossible that one should experience the "ups" without also experiencing the "downs;" and thus it is that the human scale of living has been drawn whereby all men accept as a common factor of existence the proposition that life is but an experience of joys and sorrows, sickness and health, wealth and want.

Now we can allow this law of opposites to carry us as far as we will, but it is a desperate delusion, because, even granting that you travel all "down" one side of life and expect to enter into the joys of the "up" side, you are disappointed to find that even the "up" side in human experience falls far short of your expectations, and that the "ups" after all are only another presentation of "downs," for we read in the Scriptures that "if a kingdom be divided against itself, that kingdom cannot stand." He who accepts the law of opposites as an inevitable rule of existence has adopted a mistaken theory, and finds himself involved in a sort of treadmill existence, wherein the little he seems to gain is more than balanced by the counteraction, which is really an incessant action of loss. It is evident there can be no law of opposites where the ever-presence of good is the perpetual fact, the very Science of being.

This so-called law of opposites also suggests the thought, that if good is going on somewhere for somebody, its opposite, bad, is also going on somewhere for somebody; that if joy is mine, sorrow is, must be, present somewhere for somebody, so that all freedom of health is even suppressed by the consciousness that these very statements, if true, prove that there is sickness, sorrow, and evil somewhere for somebody. No wonder that human attainments fall far short of desire.

In adhering to these false beliefs, mortal man unconsciously suggests to the outside world the opposite condition to that which seems to be his own, and thus may contribute, so far as he can, to the ill of another. This responsibility is augumented by the reasoning that he is not alone in his trouble or joy; that half the world is with him in whatsoever condition he seems to be. So we can see that the man who accepts error instead of truth, who declares for the existence of evil as well as of good, unconsciously affirms evil for at least one half of the universe all the time. No wonder the burdens of mortals are great. Christ Jesus said, "Take my yoke upon you," not to add a burden, but to exchange the yoke which is heavy through false belief for the freedom of standing for the truth that "God, Spirit, alone created all, and called it good. Therefore evil . . . cannot be the product of God" (Science and Health, p. 339).

In late years, enlightened thought, by holding to the reality of the law of God, good, has proved in every direction the powerlessness of mortal mind to work good or evil. Shall we, then, accept the false suggestion of human will, or shall we endeavor to be brave enough and honest enough and pure enough to listen to the voice of Love and Truth, which ever whispers, "This is my beloved Son, in whom I am well pleased"? If we are learning and loving to know the truth which makes free, we are constantly progressing out of a consciousness which accepts qualities other than good, and are growing to understand that there is in the nature of Truth only a tending upward; no retrogression or retardation or stop. Unfoldment into the reality of the allness of good is the true Christian's assured destiny.

LOOK WITHIN.

KATE BUELL MOREY.

IN the Bible, that wonderful history of olden times, we find again and again the declaration that God talked with men. The Old Testament is full of such statements as, "The word of the Lord came unto me, saying;" "For the word of the Lord hath spoken it;" "Thus saith the Lord." When such a claim is made today, the world at large calls it blasphemy, and why? Were men better in those days, did they live purer lives, that we accept their statements reverently and without question, while doubting man's ability to hear God's voice today? Is there no one for God to speak through, or has He ceased speaking? In Christian Science we are learning that God is declaring the truth all the time, and that man's ability to hear it is in proportion to his goodness.

Our Leader says, "I will listen for Thy voice" (Miscellaneous Writings, p. 398); she also declares that "the mortal mind through which Truth appears most vividly is that one which has lost much materiality—much error—in order to become a better transparency for Truth. Then, like a cloud melting into thin vapor, it no longer hides the sun" (Science and Health, p. 295). The main issue, then, is purification of thought, and this teaching is confirmed in the Scripture, "Blessed are the pure in heart: for they shall see God." We have nothing to do with effects. If the work within has been well done, God will take care of the outward manifestation. The tendency of material sense all of the time is to divert the attention from the within to the without, and we know full well that inward rot is more destructive than all outward attacks joined together.

An experience which came to the writer several years ago taught her a lesson that has been invaluable. In the springtime a tree in the home yard failed to put forth its leaves. A little work was done along the lines of right thinking, and after a time a sparse foliage made its appearance. The next year the same condition presented itself, and more work was done, with the result that a most luxuriant foliage made its appearance. This seemed to say that all was well and accordingly there was rejoicing. But one day some children playing in the yard caught hold of one of the limbs. There was a loud cracking noise and it was thought that the limb had broken under the combined weight of children and foliage. This proved not to be the case, however, for on examination it was found that the whole tree had broken off close to the ground, the inside eaten by grubworms and decay. This hidden error had not been detected and removed. Thought had been satisfied with the beautiful outward seeming, while the enemy within continued its destructive work.

Since this lesson, the attempt of the writer has always been to get at the hidden error in each problem, and eradicate it; with the result that better work is done. The desire for a prosperous outward showing should be swallowed up in the all-absorbing desire for a spiritual wholeness, a wholeness so complete that God's voice is heeded; a within so solid, perfect, and strong that our work stands when the test comes. Our Leader says in "Miscellaneous Writings" (p. 280): "The doors of animal magnetism open wide for the entrance of error, sometimes just at the moment when you are ready to enter on the fruition of your labors, and with laudable ambition are about to chant hymns of victory for triumphs." But history will repeat itself, in "the prince of this world" coming and finding nothing in us, if all the diseased thought-germs of personal sense, hate, infidelity, dishonesty, jealousy, etc., have been eliminated from within. Then shall we hear the voice of Truth as Jeremiah heard it, saying: "I will put my law in their inward parts, and write it in their hearts; and will be their God, and they shall be my people."

REST.

D. AURELIA HILTON.

JESUS said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." No one knows better than the Christian Scientist the meaning of these words. He realizes that God's child is never weary, never needs rest, for he is always at peace. He knows no fear nor sorrow, he cannot be discouraged, nor can his birthright to the throne of grace be taken from him. Jesus comprehended the battle which his followers would have between the spirit and the flesh, hence the promise, "I will give you rest."

Here we are reminded that we have never understood the full meaning of the Master's sayings until our textbook, "Science and Health with Key to the Scriptures," was given us, wherein we learn to cope with the mortal mind which seems to load us with its material cares. In taking this rest it is first necessary to know the nothingness of all error, or we soon find ourselves laden with its myriad beliefs as to material law. To the true Christian Scientist there is no compensation so great as the one received through obedience to our Leader's admonition, "Stand porter at the door of thought" (Science and Health, p. 392). Working out Christ's mission and turning away from the "prince of this world" (error) which has nothing in him, it is ours to be ever active in keeping ourselves free from all worldliness.

To be able to take this rest from the flesh we must search every corner of our consciousness, and see that no secret beliefs in material law are keeping us from realizing the fulfilment of God's loving promises. The thrifty housewife will not clean simply the center of the room, but will search every part of it until she has brought all that is contrary to her sense of cleanliness to the surface. So must we see that every belief which is opposed to God, to Life and Truth, is cast out, and then we shall find the promised rest.

"NOTHING CAN I LACK."

WINIFRED STANTON.

IN the Christian Science Hymnal we find many lines which are full of help and comfort, if we study them carefully. The following (p. 168) brought a wonderful lesson to the writer:—

Wherever He may guide me,
No want shall turn me back.

It became very clear that if we seek divine guidance at each step we take, if we are governed by Principle, God, and are not following our own selfish desires, then we need have no fear, whatever that step may be. We can know, prove or demonstrate, the truth of the lines which complete the stanza already quoted:—

My Shepherd is beside me,
And nothing can I lack.

It is very plain that if we look to God for guidance, we can lack nothing,—no necessary or good thing. We cannot lack strength to perform our work, neither can we lack our right work, whatever that work may be; and we cannot lack the intelligence which will enable us to perform it well, nor the necessary return which our work should bring. If our work is with patients, we cannot lack the understanding which will enable us to heal them. Above all, we cannot lack the knowledge of that perfect Love which "casteth out fear." Then can we truly say,—

My hope I cannot measure,
My path in life is free;

which surely means that one is free to work for God.

SELECTED ARTICLES.

[Frederick Dixon in *City of London Observer.*]

What is quite unnecessary, what is really, when you come to think of it, quite deplorable, is the unworthy little insinuation, which our critic drags in by the scruff of the neck, that Mrs. Eddy's views are tinctured by a desire to save her pocket. Mrs. Eddy, as every one who knows anything at all about her, including the great mass of the press of her own country, is peculiarly generous and particularly broad-minded in her gifts and charities. She gives to medical and sectarian institutions from whose views she differs, but whose motives she respects, and she gives very largely, though not necessarily at Christmas, to the charities about her. When comparatively recently she left Concord for her new home in Boston, the mover of the farewell address to her, passed unanimously by the city council, referred to this very matter, in these words: "It is quite unnecessary for me to prompt your memory of her countless deeds of charity and her endless gifts. Neither is it necessary for me to call your attention to her innumerable donations to the unfortunate ones in our midst." It is quite possible that Mrs. Eddy's view of what constitutes "on earth peace, good will toward men" may differ considerably from our critic's, but it is quite certain that it would never take the form of writing to the papers to suggest a lack of generosity on his part. Reading his article, one begins to understand more fully why a great American paper wrote the other day: "The public is tired of the hue and cry against Christian Science, and is not a little sympathetic with the dignified lady who presides over the councils of that church."

[William J. Bonnin in *Manchester* (Eng.) *Chronicle.*]

The critics of Christian Science are apt to speak in a somewhat proprietary tone about "true religion" and "orthodox Christianity," for all the world as though such terms had some definite and accepted meaning, and did not constitute a begging of the whole question at issue. Thus a clerical critic, in his article in the *World*, from which extracts were printed last week, writes blandly of the superstitions to which men become victims "when once they reject true religion." When one bears in mind that, according to accepted authority on historic Christianity, the earlier and purer Christianity was gradually abandoned in the third century, when, in the words of Professor Harnack, the living faith was transformed into a creed to be believed, and devotion to Christ into Christology, with the resultant inability to demonstrate those signs promised to follow the true believer, then this statement of the reverend gentleman is seen to concern any form of Christianity rather than that primitive Christianity which Christian Science has set out to restore.

Most assuredly Christian Science in its teaching differs in many respects from that of other churches, but is there no demand for some fundamental recasting of our interpretation of the teaching of Jesus and the apostles? Do not the armies and navies of the world, its hospitals and gaols, its slums and its workhouses, argue eloquently that the Christianity of today falls short of the ideals of its Founder? Moreover, it is just by virtue of that difference that Christian Science is enabled to achieve its work of healing the sick, the sinning, and the suffering. Our critic says that among the truths of fundamental importance Christian Science insists upon, is the spiritual view of man and the world. But he adds that its protest against the materialistic view "of course goes too far in the opposite extreme." How this can be possible does not appear. If the spiritual view be the true view, the material must be the false, and it is hard to see how one can go "too far" in the direction of attaining to the true view. To believe that

Digitized by Google

there is reality or truth in both views is to attempt to serve God and mammon—the fatal dualism that Christian Science comes to destroy.

The jumble of short statements given out by this critic as Mrs. Eddy's pronouncements on certain Christian doctrines is entirely misleading, and as unfair a method of criticism as could be adopted. That Mrs. Eddy has ever said that "Jesus was a mere healer of the sick" is pure invention. This critic speaks of another truth of fundamental importance in Christian Science, the immense power of the soul to influence the body, "though how far this power extends is not yet fully known." At the same time he refers to Christian Scientists as dupes and Christian Science as nonsense, in connection with this very subject. Now Christian Science has not only definitely and lucidly expounded this subject, but it has also been responsible for the ever-increasing amount of thought that is being given to it throughout the world.

There must be one right way, and only one, to heal disease. Either it is right to burrow into the earth for some mineral, or to explore the forest for some vegetable wherewith to heal an ailment, or it is right to heal in the manner in which Jesus and his followers healed. Christian Science shows that disease is the outcome of fear, ignorance, or sin, and is the expression of a belief in a power apart from God; and that to know God is to see the impossibility of there being any power other than omnipotence. "Acquaint now thyself with him, and be at peace," counseled one of old. The erring human mind may invest anything it pleases with power, but such power can never rise above the limitations of a false belief, and, being a breach of the First Commandment, it involves the humanity responsible for it in discord and suffering, until it is destroyed by a knowledge of the truth. This knowledge of the truth is the forever coming of Christ to the human consciousness.

[James Phelps in *Cassville* (Wis.) *Record.*]

Those unfamiliar with and disposed to be critical of Christian Science should remember that the doctrine of Christ and him crucified, as presented by St. Paul was to the Greeks foolishness and to the Jews a stumbling-block; yet the doctrine and teachings of Christ Jesus have been the most potent factor in the uplift of humanity. Christian Science comes emphasizing the necessity of heeding the whole gospel, pointing out the essentials and showing the scientific and practical method of working the work demanded of the followers of Christ.

Christ Jesus taught that God is Spirit, and Science reveals the impossibility of Spirit's creating a material world. Therefore, according to Christian Science, the sun, stars, earth, water, and trees all represent spiritual ideas, and it is because of the misinterpretation of false, material sense that they seem to be matter. According to the first chapter of Genesis, man was made in the image and likeness of God, Spirit; hence he was and is spiritual, and not of clay. The second account of creation, found in the second chapter of Genesis, is simply meant to portray the erroneous conception of the true creation; or, putting it in another way, it is mortal mind's misinterpretation of the real creation as recorded in the first chapter of Genesis.

It is not the teaching of Christian Science that matter has no existence outside of the mind of any individual; but that, despite the fact that God, Spirit, Mind, hath evolved the whole creation out of Himself, that He is infinite and all-exclusive; that He produces nothing but the good, the eternal, the undying, the beautiful, the pure, and the satisfying, the unillumined senses of the ordinary mortal misinterpret spiritual realities and call them material, and from this false apprehension discord, decay, and death ensue. All our critic or any one else needs to do is to acquaint himself with God and be at peace. The history of mankind furnishes evidence that peace is not found in its materialistic theories and philosophies.

[Elizabeth T. Bell in *Charleston* (S. C.) *News and Courier.*]

Christian Science is a faith that heals and protects. Recognizing that fear is the chief cause of the transmission of disease, its first work is to allay individual and family fear, and replace it with that assurance of God's omnipotence and omnipresence which is a perpetual protection. "The law of the Spirit of life," which made Paul free, is ceaselessly operative and removes every "menace and danger" from the individual and the community. Christian Scientists recognize their duty as citizens and are willing and desire to obey the laws of the community in which they live.

[William Pitfield in *Manchester* (Eng.) *Dispatch.*]

It would be difficult to find words to express more fittingly the exact opposite of the teaching of Christian Science than those employed by Dr. Paget in his attack at the Church Congress. That Christian Science heals the sick and reforms the sinner is beyond all question, and in order to account for these results Dr. Paget is driven to suggest that they are the works of the devil. In the course of his address, however, he catalogues a list of benefits which he admits Christian Science has conferred upon its followers, and which, it is fair to presume, any society having for its object the amelioration of human woe would rejoice to be able to trace to its influence.

The message of hope which Christian Science brings to mankind is not to be set aside nor impeded by impassioned utterances of this kind, and it would be well at this juncture to bear in mind the advice of Gamaliel: "If this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it."

[Frank Bell in *Scr itonian*, Scranton, Pa.]

If the writer in a late issue really believes that Christian Science teaches the divinity of a human personality, Christian Science must indeed appear to him "the greatest humbug." The fact is, however, that Christian Science neither teaches nor tolerates any such absurd notion. Christian Scientists love Mrs. Eddy because, through the study of her writings and the application of the Principle therein set forth, they have been relieved of sick and sinful conditions that had not been effaced by other means. Under the influence of their great gratitude the beneficiaries of Christian Science may at times employ language that to the outsider seems immoderate; but while this has been cited as "evidence" of personal worship, Christian Scientists themselves understand that it is not anything of the sort. There is nothing whatever in the relations between other individual Christian Scientists and Mrs. Eddy that is incompatible with the fundamental teaching of Christian Science that God alone is entitled to the worship and adoration of man. The persistence with which the contrary belief is propagated in certain quarters in no sense alters the fact.

Mrs. Eddy's book does not, in either large or small measure, take the place of the Bible. The very first tenet of the Christian Science church, to which every member subscribes, is this: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal life" (Science and Health, p. 497). This text-book is the Christian Scientist's "Key to the Scriptures," and it is used as other commentaries on the Bible are used in other denominations. Two facts in this connection are beyond dispute—that the average Christian Scientist reads his Bible more than he ever did before; and that the Sunday services in Christian Science churches include a greater amount of reading direct from the Bible than is to be found in any church of any other denomination.

As to whether Christian Science heals the sick, the best testimony is that of the army of the healed who throng

Digitized by Google

the Christian Science churches. They are as a rule persons of intelligence and probity, and when they declare that Christian Science has healed them of all manner of diseases, in many instances after they had tried other methods in vain, their friends and neighbors will be inclined to accept their practical experiences as more convincing than the theories of learned scoffers.

[Olcott Haskell in *San Francisco* (Cal.) *Town Talk*.]

It is asked in a late issue, "How can physicians who apply medicine and surgery to the healing of ills be reputable physicians in the eyes of Christian Scientists?" I would say that such a question presupposes an antagonism on the part of Christian Scientists which does not exist. There is hardly a Christian Scientist who does not number among his intimate friends either physicians or those who are in sympathy with their methods of treatment. Such friends are respected, and the fact that they believe in the use of material remedies does not prevent a recognition of their sterling qualities. The physician who believes in material laws is consistent when he employs material prescriptions, and if he gives his patients that treatment for which they have asked and in which he conscientiously believes, he is not a "quack" but has honestly earned his fees. Speaking of such physicians Mrs. Eddy writes: "It is just to say that generally the cultured class of medical practitioners are grand men and women" (Science and Health, p. 164).

[Howard C. Van Meter in *Portland* (Ore.) *Oregonian*.]

To characterize any teaching as a substitute for the religion of Jesus Christ is serious business. Were one able accurately to determine that any would be declared by Jesus Christ to be exactly what he would have it, in case he were on earth, one would then be able to say, after understanding thoroughly various teachings and methods of salvation differing therefrom, wherein they were wrong. I do not know of any individual on earth today who possesses the degree of knowledge calculated to enable him to do this or who with reason may so claim. All that any one can do in the way of profession is to endeavor, from a deep desire to know and manifest the truth, to gain through spiritual understanding such a knowledge of God as will afford him a basis for a satisfied existence, the purpose of which is to manifest God as the Nazarene did. Any one able to do this would be a follower of Jesus Christ and a believer in the method of salvation he taught and demonstrated.

As to what Mrs. Eddy has given to the world, and which is responsible in numberless instances for the healing of sin and disease and an increase in the hope of complete salvation, she says on page ix. of the preface of Science and Health: "Today, though rejoicing in some progress, she still finds herself a willing disciple at the heavenly gate, waiting for the Mind of Christ."

On the question of the reality or unreality of sin, the confusion of our critic is due to failure to recognize the standpoint taken by Christian Science. It may be suggested that any evidence of sin of any kind indicates a lack of obedience to God, who is good and whose design could never be anything other than good—since creation is for the purpose of manifesting Him. It may properly appear that because sin does not emanate from the Mind that is God, it is not deserving of recognition as real. From this standpoint, the attitude of the individual toward sin is to recognize its claims of bringing him any good or as being in accord with law, as false, untrue, and so unreal.

[Alfred Farlow in *Signs of the Times*, Mountain View, Cal.]

A late issue says that "Christian Science denies the vicarious atonement of Christ. It denies that his sufferings and death were, in a substitutional sense, sacrificial." May I call your attention to the fact that Christian Science accords exactly with the vicarious atonement of Christ Jesus which is described in the Scriptures. The Master's death was vicarious in the sense that he voluntarily allowed himself to pass through the trying ordeal called death, when he might have escaped therefrom if he had disregarded the welfare of mankind. He said, "Thinkest thou that I cannot now pray to my Father, and he shall presently give me more than twelve legions of angels?" This implied that he might have been delivered from these testing experiences if he had considered no one but himself. His experience was a pure sacrifice and demonstrated his unbounded love, while it also proved certain facts concerning the Science of being which were necessary for mortals to understand in order to work out their salvation according to Scriptural admonition. It is useless to quibble over the nature of death. It is sufficient to know that it is the greatest calamity that befalls mortals, and that it is a part of the consequence of sin, which the Saviour came to destroy. While Christian Science recognizes the phenomenon called death, it maintains that there can be no such reality as death, since God who is Life, is ever present. Jesus recognized this fact when he said of the damsel, "She is not dead." He positively denied death, and he proved the truth of his proposition when he presented the damsel alive, having destroyed the appearance of death through his understanding of divine Life.

Christian Science agrees with the Scriptural teaching that "without shedding of blood is no remission." It only differs with some other theological beliefs as to the significance of the Scriptural words. Every step of the Master's experience from birth to ascension was absolutely essential to the salvation of the world. The world is justified by the blood of Jesus Christ, because through his experience they were enabled to waken to spiritual understanding of Truth, which, when practised, redeems mankind from sin, sickness, and death.

[Clinton B. Burgess in *Erie* (Pa.) *Dispatch*.]

Christian Science is based and built entirely and uncompromisingly upon two facts, namely, God, and His Christ. We accept as facts about God that He is Love, infinite and unchanging in mercy and tenderness, and inseparable from His children; that He is good, the source and sole creator of all reality, the one and only Father of all; that as He is almighty, all power is of God, and when we have ascribed to Him all power we have none left to acknowledge as belonging to that false claimant and arch-deceiver, evil, or devil; that God is ever and everywhere present, occupying all possibility of presence; that He is all seeing and all knowing. He fulfils in His infinite intelligence all the possibilities of Mind—that He is the only real Mind, since He is All-in-all; that He is supreme; that God, omnipotent Love and good, the only real power and intelligence, is supreme in very point of space and at every moment of time; and that He is changeless—with Him "is no variableness, neither shadow of turning."

We accept the statement that Christ is divine, the Son of God; that he is the only way, truth, and life; that "there is none other name under heaven given among men, whereby we must be saved;" that Christ Jesus came to this mortal sense of life to destroy the works of the devil; and that he destroyed lack, sin, disease, and death.

We accept as facts about the devil, or evil (if there can be said to be facts about that which is the opposite of truth and the absence of fact), Jesus' scathing denial of its pretense to be real or to be the cause of reality: "There is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it."

These we believe to be facts—Christian facts, because fundamental to Christianity, and scientific facts, because all true science must be founded on truth, and all truth is in

Digitized by Google

God and His Christ. These great facts are all contained in the Bible and have all come to the world through inspiration and revelation. The senses of the "carnal mind," that mortal, seeming mind which Paul so tersely describes as "enmity against God," are the only channels by which impressions of evil reach human consciousness; and they do not reveal one of these facts of God. "But," says Paul, "we have the mind of Christ." The deepest thinkers among the physical scientists of this age have reached the conclusion that, whatever the reality may be of the things before our senses, it certainly is not as those senses picture it, and Jesus, whom Mrs. Eddy has justly called "the most scientific man that ever trod the globe" (Science and Health, p. 313), admonished that we "judge not according to the appearance, but judge righteous judgment," and said that hearing we should hear, and should not understand; and seeing we should see, and should not perceive. The facts (realities) all belong to God, and they are facts, whether you believe them or whether you accept the testimony of that which is "enmity against God."

The true Christian Scientist is, first, last, and all the time, loyal to God and His Christ, and this loyalty demands that he accept as facts only those which declare the allness and love of God, and the ever-presence and availability of Christ—the same healing Christ, yesterday, today and forever—whatever claim of presence, power, or activity may be made by this carnal mind through its senses; for it is plain that enmity against God is enmity against truth and reality, and there can be no truth in the belief that evil (God's absence) can be really present or have real power.

[Charles K. Skinner in *Evening Recorder*, Albion, Mich.]

The time has long since passed that one may assume the role of misapprehension when attacking the teaching of Christian Science, for the opportunities to learn the truth concerning this religion are everywhere at hand. Every Christian Science church has its free public reading-room, where everything pertaining to this doctrine is for the use of inquirers. Also nearly every public library in the land is supplied with Mrs. Eddy's writings on this subject.

For the benefit of those who may have been deceived by mistaken statements that have been made, let me say plainly that Christian Science does not teach, by any possible construction of its words, that sin does not exist as an expression of the carnal mind; on the contrary, that it does so exist, and has to be destroyed through the power of God. It does teach, however, that it is not real or permanent, in the sense that God did not create it. Since God is good and created "all that was made," these wrong conditions are not chargeable to Him and may be destroyed by His law.

On page 5 of the Christian Science text-book, Science and Health, Mrs. Eddy says: "Sorrow for wrong-doing is but one step toward reform and the very easiest step. The next and great step required by wisdom is the test of our sincerity—namely, reformation. . . . Sin is forgiven only as it is destroyed by Christ . . . He grows worse who continues in sin because he thinks himself forgiven." The Christian Science text-book and other writings by Mrs. Eddy abound in similar statements.

Christian Science teaches that "devil" (evil) is impersonal, that it is evil thought which strives through its various phases to enter the consciousness of every individual, and is expressed in hatred, malice, lust, murder, envy, falsehood, etc. The Master certainly had this view of it in casting out the seven devils (evils) from Mary Magdalene, for there could not possibly have been seven persons cast out of one person.

Likewise "hell" is a condition of mind, as also the heaven of which Jesus spoke when he said, "The kingdom of heaven is within you." In other words, as the reign of harmony is in our own consciousness, if we are living rightly, so will the reign of discord be expressed; not only now, but in the future, until evil thoughts and their effects have been effaced from our consciousness as a ruling power.

[George Shaw Cook in *Farm*, Jacksonville, Ill.]

Christian Scientists believe that the works of Jesus, his disciples, and the early Christians were miraculous in the ordinary sense, but were divinely natural when considered in their true light. They believe that these works were performed according to Principle and its law. Because the law of God, of Truth, does not vary, they believe that it is possible for these works to be repeated today by those who understand and correctly apply the divine law to the destruction of human ills. They believe that the power of God, or Spirit, is supreme, and that it is as available to mankind today as it was centuries ago, and always will be. They are grateful that even a slight knowledge of this fact is enabling them to overcome many of the diseases and sins that infest humanity, and they believe that eventually this knowledge will result in the destruction of all evil.

[George A. Law in *New Haven* (Conn.) *Leader*.]

The Principle of Christian Science is God. Hence the fundamental of Christian Science has always existed. The mission of Jesus was to show the practical application of this Principle to the needs of mankind, and he healed sickness and sin in demonstration of this Principle. He also taught others how to obtain results by applying this truth, and so gaining that God-given freedom from the ills of the flesh which is man's heritage. Though Jesus' followers for about three hundred years practised his teaching, it finally became obscured by a material world. Mrs. Eddy through her experiences rediscovered this Principle, and by a prayerful and consecrated study of the Bible has succeeded in giving the rules governing this Science to the world, and she has done this in such a way that all who will may understand and apply it.

[Written for the *Sentinel*.]

GROWING.

LAURA GERAHTY.

Not by the passing years or season's beauty
Mark we our growth, as sowers watch the seed;
Not e'en in reckoning the hourly duty
Which gains a goal or satisfies a greed.

We grow by crushing out some false temptation;
Standing aside to give the stranger room;
Waiting, with outstretched hand, the demonstration
Of Truth's triumphant cry o'er error's doom.

We grow in power when human weakness binds us
More firmly to that Truth all power above;
We grow in gladness, as each sorrow finds us
Less glad to grieve—knowing that God is Love.

We grow in purity when angels, waiting,
Find entertainment in our hearts long cold;
We grow in understanding when translating
To knowledge rare the faint beliefs of old.

We grow in Love when o'er a world of sadness
We ring the joyous news of Christ again!
And from our storehouse cast abroad the gladness
Of Christ on earth, peace and good will to men.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

A QUESTION ANSWERED.

[We have been asked to answer a question which is practically the same in intent as one which was asked and answered in the *Sentinel* of May 18, 1899. The question was so satisfactorily answered at that time that we feel we can offer our questioner no better solution than will be afforded by a republication of the article as it then appeared.—Editor.]

Is it in accordance with the teaching of "Science and Health with Key to the Scriptures," in treating disease, to have lists of causes of special sins for each disease? For instance, "Rheumatism: treat or deny supposed anger," etc. —L. R.

The above inquiry contains a long list of diseases. Over against each specific disease, or affected part, some mental quality is assigned which must be specifically handled, the list of mental qualities corresponding to the number of diseases manifested on the body, whether large or small.

We answer the above question by saying that such methods of treatment are not only not in accordance with the teaching of Science and Health, but directly opposed. No such mental argument is anywhere authorized by our text-book, and to the extent that such practice prevails it must be the outgrowth of misapprehension on the part of individual teachers or students. We do not hesitate to pronounce it a pernicious practice, bordering close upon mind-cure and mesmerism.

This question was gone into at considerable length by the board of education at its January session, and those attending that session have the authority of the board for declaring this practice to be unscientific and unwarranted. Science and Health and the other writings of our Leader and teacher sufficiently point out the only true method of healing disease. Students should be careful in their study of "Science and Health with Key to the Scriptures" in order to be clear upon so important a matter. They should not rely upon promiscuous or unauthorized rumor. The healing of disease is too serious a thing to be dealt with lightly. Only through a deep understanding of the great healing truth taught in our text-book, and earnest, constant, watchful care and prayer and consecration, can the practitioner of Christian Science truly perform his sacred mission.

"THE MILLS OF GOD."

The familiar statement which has come down from the olden time, "The mills of God grind slowly," expresses a deep-seated conviction that justice comes slowly as contrasted with the processes of injustice, a belief which did not cease with what is known as heathen mythology, but which has colored much of the ethical and religious thinking of modern times. While it is true that both the Jewish and Christian concepts of deity were ethically far in advance of all others, yet even these, as generally understood, leave much to be desired. Although it is conceded that God, to be God, must be perfect, the perfection of His government is denied because human conditions, as they appear to the material senses, express the very opposite. While most people would hesitate to say that God is less than all powerful, they practically deny that He is by attributing unbounded power and influence to evil, and by denying that spiritual understanding can cope with and overcome the aggressive manifestations of evil; though Paul evidently felt sure that it could, when he wrote to the Corinthians: "The weapons of our warfare are not carnal, but mighty through God to the pulling down of strong holds."

From the Christian Science view-point the action of divine Principle is never slow, nor is it ever hastened at the call of human necessity, but the change which comes over human consciousness when Truth dawns upon one can only be described as the passing from death to life. When one hears the voice of Spirit saying, "Let there be light," the inertia of the belief of mind in matter gives place to the quickened sense which tells of the energy of the divine Life, and makes, for the awakened one, "all things new." What mattered it to the woman who touched the hem of Christ's robe that she had been sick for twelve long years; or to the man at the pool of Bethesda that he had lain helpless for thirty-eight years? They both found that "the word of God is quick" as well as "powerful," and so did many others whose recorded healing links together the golden chain of Christian demonstration in the past with that of the present hour.

When humanity as a whole goes forward, it but proves that there is some measure of response to that "quickening life" which nerves the "faltering will" by taking away all fear of failure; and what is true of nations is true of individuals, since the law of progress is invariable in its action. God says, "I change not!" Then, if we receive our help slowly, if justice seems to linger, our greatest need is to get rid of the belief that God and the operation of His law are ever less than perfect, or that man is ever controlled by any laws of sin or disease. The question is not whether divine justice halts by the way, but if our sense of justice is keen enough and alert enough to pierce the belief that evil has power, and to prove its nothingness.

In the Apocalypse St. John tells of those who cried out, "How long, O Lord;" and again, of those who "had gotten the victory" and who sang, "Just and true are thy ways, thou King of saints." This victory can only be gained by knowing that all God's ways are just and true. Our revered Leader tells us (Science and Health, p. 14), that to "become conscious for a single moment that Life and intelligence are purely spiritual," enables the sufferer to be "suddenly well." Surely this consciousness is worth striving for, and it has been experienced by unnumbered thousands, who have learned in Christian Science that there is no delay in the administration of the divine bounty and justice.

Annie M. Knott.

THE HIDDEN LIFE.

Professed Christians cannot read too frequently St. Paul's picture of life as portrayed in the third chapter of his letter to the Colossians. The severity of the reproof which may be conveyed to them by his words is more than balanced by the inspiration awakened by his assurance of what they may become, and his appeal that they fail not to enter into the fulness of their inheritance.

The exaltation of the life he outlines, its gentleness and humility, its unselfishness and patience, its superiority to temptation, its authority over evil, and above all, its unfailing love,—all this might be reckoned but a flight of the apostle's imagination, were it not manifest that he thinks of such a life as altogether attainable for every true disciple, and this for the sufficient reason that he is putting off "the old man,"—is being freed from the limitations of

Digitized by Google

mortal sense,—and is therefore able to demonstrate the life that is "hid with Christ in God;" and it is the revelation or expression of this hidden life, in all Christlike deeds, which he so splendidly champions.

In all this St. Paul anticipates the theme and contention of Christian Science, which persistently pleads for the recognition of life as the immediate manifestation of the divine activity, and which insists that it is to be thought of not in connection with material conditions, but in terms of Spirit and spiritual thought. He who responds to this appeal speedily begins to acquire a new and redemptive sense of man's inseparability from God, a consciousness of having already entered upon the "eternal life," which gives great poise and peace. This new point of view modifies all his thought, his habits, and his plans, and it renders his separation from the world a mere matter of course.

Incongruous as it may seem, most Christian people think of death as a factor of life, a normal and inescapable part of experience. They think of life as subject at every stage to the assault of innumerable enemies, to some one of which it must at last succumb, and all this fosters that feeling of incapacity and unwilling subjection to fate which leads ofttimes to the tragedies of despair. For these to deny, once and for all, this asserted association of life with death, or the conditions that bring death, and to think of life ever as hidden in God, is to inaugurate for themselves an entire transformation. Their resurrection day has dawned, for, as our Leader has said, "Spirit is discerned to be the Life of all" (Science and Health, p. 509).

Just now the denizens of the northland see in bush and tree naught but the nakedness of death, and yet what wonders, what marvels, as we well know, lie just beneath the surface of this seeming. Soon innumerable buds will have come to their birthnight, and in the morning a perfect wonder-world of blossomings will be disclosed. This is the Easter prophecy; it is the song and secret of the 91st Psalm, for the true life is not hidden, save to material sense. The activities of infinite Truth and Love are ceaseless,—God's works are forever fashioned,—and it is ours to bring these hidden things of the divine Life out into the open of human experience. This is to be our demonstration, and we may rejoice that today's bud of honest aspiration to know and do "the truth" hides in its humility a tomorrow's bloom, whose beauty and fragrance shall gladden and heal the hearts of men. Says Lowell,—

> The thing we long for, that we are
> For one transcendent moment.

It is a little moment, ofttimes, and its possibilities unknown, save to God; but when these moments shall have been multiplied into months, or years, and the unseen realities of being shall have been brought forth in us, then the resplendent glories of the hidden life will appear. This is our calling, and it is to become our perennial Easter.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Portsmouth, N. H., March 12, 1910.

Dearly Beloved Leader:—On reading your words in today's *Sentinel*, I exclaimed from the depths of my heart, Thank God that it is by their fruits ye shall know them! We who have been delivered from the bondage of sickness and raised from the so-called laws of death, know that none but the purest and most unselfed life could have given the great truth of Christian Science to the world today, and made possible the doing of the works which are being done in the name and in the service of Christ.

With deepest and tenderest love and gratitude I thank you for your life and its pure history, the half of which has never yet been told, nor can it be. We who love you know "there shall no evil befall thee, neither shall any plague come nigh thy dwelling. For he shall give his angels charge over thee, to keep thee in all thy ways,"—those "pure thoughts from God, winged with Truth and Love" (Science and Health, p. 298).

Lovingly and loyally yours,
GRACE E. ALLEN.

Madison, Wis., March 12, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dearly Loved Leader:—At a recent meeting of our church it was decided by unanimous vote to express to you our gratitude for your wise guidance and direction of the Cause, so dear to the hearts of all who have tasted and seen that the Lord is good, to pledge our loving obedience and loyalty to the by-laws of the Manual of The Mother Church, and to consecrate our lives anew in the endeavor to follow you, as you are following Christ.

With loving greetings from First Church of Christ, Scientist, of Madison, Wis.,

Sincerely yours,
MRS. ADELE J. BARKER, *First Reader.*

Cincinnati, O., Feb. 14, 1910.

Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Your reply to a letter from a student in the field interests me deeply, as I know that there is a work for each of us to do. We do need more "men in our ranks,"—more of the strong, spiritual reflection and understanding of divine Love,—those who, having put their hand to the plough, will not look back. May we all be "men in our ranks," and our harvest will be great and bountiful.

Faithfully yours,
R. W. FISKE.

Towanda, Pa., Jan. 18, 1910.

Beloved Leader:—We, the members of First Church of Christ, Scientist, assembled in annual meeting, wish to express our loyal love to you, and our great gratitude that through your wisdom and love we have been awakened to stand firmly as a loyal branch of The Mother Church, and in humility we feel that, in the clearer light of understanding our sole allegiance to Principle, we shall progress in service for the Cause.

Yours in sincerity and tender love,
MARY E. SUTTON, ELLA SWEET,
CHARLOTTE D. HOLCOMBE, *Committee.*

Parkersburg, W. Va., Feb. 17, 1910.

Dear Mrs. Eddy:—We are grateful to you for the invaluable work you have done and are doing for mankind, and we love you for having given to us the truth, as revealed in "Science and Health with Key to the Scriptures." We are being healed of all that is opposed to God—omnipotent good. We are learning—and are encouraged thereby—that just as you stand firm and loyal to Principle, so may we.

Through our text-book and your other writings you have shown us how the Master healed,—not by suggestion, but by "the power of the Word."

We earnestly desire to thank you for the Manual, for the *Monitor*, and for all the good things you are constantly giving to the world.

Your obedient followers,
First Church of Christ, Scientist, Parkersburg, W. Va.,
ANNA M. SHREWSBURY, B. RUSH PETRIKIN,
ALICE L. HALL, *Committee.*

Chicago, Ill., Feb. 26, 1910.

Mrs. Mary Baker Eddy, Boston, Mass.

Dearly Beloved Leader:—My heart is filled to overflowing with gratitude to you this day. It is just ten years since the light of Christian Science came into my life. It was such a life of darkness and dreariness then, that I wonder sometimes how it could ever discern the light you

Digitized by Google

have brought to us. The blessings which have been mine from that day to this I cannot recount. My love toward you grows as my confidence in and my love for God expand.

Yours in Christ,

JACOB S. SHIELD.

Salt Lake City, Utah, Feb. 21, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Your latest message, entitled "Men in Our Ranks," led me to think that perhaps a recent experience in the work in this city might be of interest to you. It so happened that among the members sent out to form the present Second Church there were very few men,—not enough, it seemed, to make an efficient organization or to fill the positions where they were needed. Confronted with this problem, we began to know that "Soul has infinite resources with which to bless mankind" (Science and Health, p. 60), and it was demonstrated that a lack of any kind cannot claim a long existence when it is persistently denied. We were shown that every need had already been met among those who went out, and several new men joined our ranks before the church was finally organized.

In my work as a Sunday School teacher I found it an invaluable aid to know that the boys were as interested and responsive as the girls, and in recognizing this truth I have been thankful to do even a very little to help destroy the mortal belief which universally asserts that men are not as receptive to the call of religion as are women. Surely each one of God's children hears His voice equally well. It is my earnest desire to know the nothingness of this mortal-mind argument which would claim to cheat some men out of their birthright and make others less active for the Cause than they otherwise would be, and to realize that in Christian Science "there is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female," but that we are indeed "all one in Christ Jesus." It is my desire that increasing fruits shall attest my love for you and for the Cause.

Your loving follower,

HELEN A. ALLEN.

Battle Creek, Mich., March 15, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Dear Leader:—First Church of Christ, Scientist, through its board of directors, sends greetings, and wishes to express its loyalty to the Cause of Christian Science, and gratitude for the loving care and wise counsel ever given for its guidance to a clearer understanding of Truth. The present year has so far fulfilled its promise to us of bringing added measure of all good things, and is proving to be one for special rejoicing, which we feel sure you will share with us.

The beginning of the year marked a new epoch in the growth of Christian Science in this field, through the acceptance by members of Second Church of an invitation from First Church to unite with it in membership, and Communion Sunday witnessed the inspiring sight of all kneeling together in silent prayer. With gratitude for the wisdom that directed this step, with unity and democracy in our church government, we are daily striving to present a clearer reflection of the one Mind, having confidence that, with a faithful adherence to this ideal, nothing can hinder our advancement.

BY COMMITTEE.

Augusta, Me., March 16, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of the Christian Science Society of Augusta, Me., having lately organized and adopted by-laws for democratic church government, unanimously voted to write you a letter to express our love and loyalty to you. As we journey on in this way made so plain for us by your interpretation of the Scriptures, we are enabled to see more fully what your life-work as revelator to this age is doing for the world. Truly, "by the obedience of one shall many be made righteous."

We are gaining a deeper meaning of the church and its work of Christian healing, and those who have been healed are coming into our ranks. We have secured the exclusive use of a fine hall, centrally located, which is to be used for our services and reading-room. On Feb. 28, under the auspices of this society, Professor Hering gave a masterly lecture in the Unitarian church that was listened to with rapt attention by an audience which filled the auditorium. The fruits of his remarkable lecture are apparent in an awakened interest in Christian Science and an increase in attendance at our services.

Yours with loving loyalty,

Christian Science Society.

MRS. MARTHA E. BURNS, HENRY L. UPTON,
MRS. M. EMMA ELLIS, MELVILLE WIGHT,
MRS. EDNA L. UPTON, *Committee.*

Chicago, Ill., Feb. 12, 1910.

Beloved Leader:—May I briefly thank you for your helpful words under the caption "Men in Our Ranks" in today's *Sentinel*. As I think of my past four years in Christian Science practice and my previous fourteen years of commercial life, your forceful words and clear thought help me to see that one day with the Lord in the healing work of Christian Science far outweighs a thousand years of striving for material gain or worldly prominence. Your unceasing vigil is an inspiration to every student to work more faithfully for a realization of the quick and spontaneous healing for which Christian Science stands.

Gratefully and loyally,

WALTER H. VANZWOLL.

Richmond Hill, N. Y., March 4, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—Sincere gratitude for the infinite blessings received through earnest study of the Bible, illumined by your inspired writings, prompted a group of students in Richmond Hill—Greater New York—to organize a Christian Science society, and at this our first meeting we unite in sending to you an expression of our love and appreciation of your life of noble self-sacrifice. Our purpose is to let our light so shine before men, that they may see our good works, and glorify our Father which is in heaven; by prompt obedience to abide, as a sturdy branch, in the Vine, The Mother Church, and thereby deserve your gracious declaration that "sanity and Science govern the Christian Science churches in Greater New York" (*Sentinel*, Feb. 12, 1910).

Lovingly and gratefully your followers,

Christian Science Society, Richmond Hill, N. Y.

MARY W. HARING, CASPER M. HARING,
HELEN SONDHEIM, *Committee.*

Elmira, N. Y., March 11, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—At our annual meeting, held March 9, by a unanimous vote of the members of First Church of Christ, Scientist, Elmira, N. Y., we send our love and gratitude to you for your unceasing love and loyalty to us and all mankind. In Jeremiah we read: "But this thing commanded I them, saying, Obey my voice, and I will be your God, and ye shall be my people: and walk ye in all the ways that I have commanded you, that it may be well unto you." We in this church want to live in obedience to God, and to your inspired guidance. Isaiah says: "For thou hast been a strength to the poor, a strength to the needy in his distress." We realize more than ever before the need of careful watchfulness in our journey from sense to Soul.

Yours in loving obedience,

MRS. MARY A. BALLY, *First Reader.*

THE LECTURES.

HOOPESTON, ILL.

William D. McCrackan, M.A., lectured at the McFerren Opera House Jan. 21. He was introduced by Albert B. Cooper, who said in part,—

You have been invited this evening to listen to a lecture on a subject which I presume is occupying the thoughts of more people than any other question before the public at the present time: namely, Christian Science. Why? Because it is unfolding the truth of God to humanity in this age in a way the world has not known since the advent of Jesus Christ. Christian Science makes no claim to the creation of truth, for truth always has existed and always will exist; but it is the practical application and realization of the truth, of God and His idea, which enables us to demonstrate the truth.—*Hoopeston Herald.*

MARSHALLTOWN, IA.

Prof. Hermann S. Hering of Concord, N. H., delivered his lecture, "Christian Science: The Science of Salvation," at the New Odeon last night [Jan. 28]. He was introduced by Judge G. W. Burnham, who spoke in part as follows:—

There are always those who are alarmed at changes in the social order. They sometimes think that change means destruction; or if not that, at least something not so good as for things to remain as they are. This may indeed sometimes be the case, but in the larger and longer view of things, changes are generally seen to be in the direction of progress and generally in the line of what may be called the world's natural growth. There are many now who see only evil and discouragement in the changes through which the public faith is passing on the subject of religion. They have been taught that certain things are true in religion and that these things are essential. They have come to look upon religion from certain standpoints and to see it wearing certain garments; and when they see people departing from these, and see religion changing its forms, they view these things with alarm.

If we take a large view of this subject, we may see that instead of our age drifting into infidelity, it is rather a transition into a larger and better faith. We should discriminate between a change of faith and a loss of faith. A change of belief is certainly not always a loss. When we come to the subject of the evening—Christian Science—I may say that I am not a Christian Scientist, but I am tolerant enough to have a profound respect for the opinions of all sincere people. When we look about us and see the effect of the teachings, meditations, and practices of the followers of this faith—see the cheerful disposition, the peace and happiness where there had been turmoil and sorrow, health and contentment where there had been sickness and discontent, we must admit that such results entitle it to our careful consideration and its teachers to our respectful hearing.—*Marshalltown Herald.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Pana, Ill.—Francis J. Fluno, M.D., Grand Opera House, March 28.

El Paso, Tex. (First Church).—Frank H. Leonard, March 31.

New York, N. Y. (Fifth Church).—Bliss Knapp, Church Edifice, 228 West 45th street, April 1.

Rockford, Ill.—Judge William G. Ewing, Church Edifice, 515 North Main street, April 5.

Yonkers, N. Y.—Francis J. Fluno, M.D., Public Library Hall, 8:15 p. m., April 5.

Benton Harbor, Mich.—Bliss Knapp, Bell Opera House, April 5.

Lampasas, Tex.—Clarence C. Eaton, April 7.

Wilmette, Ill.—Judge Septimus J. Hanna, Church Edifice, Tenth street and Central avenue, April 7.

Beloit, Kan.—Bliss Knapp, Church Edifice, April 7.

San Bernardino, Cal.—Frank H. Leonard, Opera House, April 7.

Greenville, Mich.—Judge Septimus J. Hanna, Phelps Opera House, April 8.

Auburn, Me.—Prof. Hermann S. Hering, Auburn Hall, April 8.

Toledo, O. (Second Church).—William D. McCrackan, M.A., Valentine Theater, 8:15 p.m., April 8.

Winchester, Ky.—Mrs. Sue Harper Mims, Opera House, April 8.

Whittier, Cal.—Frank H. Leonard, Woman's Club House, Baily street and Friends avenue, April 9.

Dallas, Tex.—Clarence C. Eaton, Dallas Opera House, 3 p.m., April 10.

Hartford, Conn. (First Church).—Francis J. Fluno, M.D., Parsons Theater, 3:30 p.m., April 10.

Brooklyn, N. Y. (First Church).—Prof. Hermann S. Hering, Academy of Music, 3:30 p.m., April 10.

Oklahoma City, Okla.—Bliss Knapp, Overholser Opera House, 3 p.m., April 10.

Los Angeles, Cal. (First Church).—Frank H. Leonard, Temple Auditorium, 3 p.m., April 10.

Mansfield, O.—William D. McCrackan, M.A., Memorial Opera House, 2:30 p.m., April 10.

Bloomington, Ind.—Mrs. Sue Harper Mims, Men's Gymnasium, 2 p.m., April 10.

New York, N. Y. (Fourth Church).—Prof. Hermann S. Hering, Church Edifice, 82d street, near Broadway, April 11.

Wichita, Kan. (Second Church).—Clarence C. Eaton, Philharmony Hall, April 12.

Long Beach, Cal.—Frank H. Leonard, Auditorium, Pine avenue, April 12.

Buffalo, N. Y. (First and Second Churches).—William D. McCrackan, M.A., Convention Hall, 8:15 p.m., April 12.

Eastbourne, England.—Rev. William P. McKenzie, Pavilion, Devonshire Park, April 19.

Guernsey, Channel Islands.—Rev. William P. McKenzie, St. Julien's Hall, April 21.

Glasgow, Scotland.—Rev. William P. McKenzie, Green's Rooms, Clifton street, April 26.

Manchester, Eng.—Rev. William P. McKenzie, Public Hall, West Didsbury, April 28.

Newcastle, Eng.—Rev. William P. McKenzie, Geographical Institute, St. Mary's Place, April 29.

Richmond (Surrey) Eng.—Rev. William P. McKenzie, Castle Theater, 8:30 p.m., May 2.

Berlin, Germany.—Rev. William P. McKenzie, May 24.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

TESTIMONIES OF HEALING.

I cannot fully express my gratitude for the blessings which Christian Science has brought to me. For many years I was an invalid, and for fourteen months previous to my introduction to Christian Science I was a very great sufferer from chronic bowel trouble, with complications of heart, kidney, and bladder affections, also sleeplessness and great weakness. I had spent six months under the care of a specialist in one of our large cities, at the end of which he informed me that I could not recover. I then returned to my sister's home in this city, and two of the most prominent physicians here also informed my relatives that I had only a short time to live. In all these long months I was not permitted to eat anything but a little light food, and when my sister called a Christian Science practitioner, at my request, now two years ago, I could not sit up an hour at a time.

The practitioner came on a Sunday night, and asked me if I would give up material means, and look wholly to God for help. I answered that I would, for they had done me no good. I had my first treatment that night. My sister was very fearful of the results, although she did not voice her fear; but I made rapid improvement. I awoke Wednesday morning hungry, arose, and took a hearty breakfast with the family. Before the day was over I ate peaches, which I gathered from the tree myself; in fact, I ate anything I desired. My sister said that she actually trembled when she saw me so reckless as to my diet. My improvement was so rapid that very soon I was able to walk to the residence of the Christian Science practitioner and back home, a distance of twelve blocks.

My daily study of Science and Health with the Bible, began with the treatments, and I received a spiritual understanding of the Scriptures never before enjoyed, and experienced a pleasure in the study of the Bible which heretofore had been unknown. I became a totally different woman, so friends said, and no one could know this so well as myself. It is my desire to be counted worthy to help others as I have been helped. I had about six weeks' treatment, although I was healed in less than two weeks, but I felt that I needed the instruction and help, in order to be better able to help myself. During the past year I have not had to call for assistance, being fully able to overcome all difficulties which presented themselves. For all of these blessings I am very thankful to God, and also to Mrs. Eddy.

Miss Elizabeth Higgins, Henderson, Ky.

Christian Science found me an invalid, and the first one to convey this teaching to me was a sister of mine who lived on a farm in the state of Washington. She had been to Tacoma with her husband, who was under medical care and in a critical condition, and while there they heard of Christian Science through some one who had been healed. It was presented in such a sensible way that they decided they would attend the next Wednesday evening meeting, and my sister, who had been using medicine, claimed that she was healed during the meeting. On seeing the proof, her husband decided to give up medicine and visit a practitioner, and from the very beginning he found that the treatments were helping him.

My sister became enthusiastic about this teaching and came back home again to tell me of it. Listening to her, I became hopeful and decided I would do as she said these people did, in trusting God without using any material remedies, but the book she referred to I thought I had no use for, as I had read the Bible so much and believed it, and besides I thought there was no better teaching than that of the church to which I belonged. After a while I found that this way of thinking did not improve my condition, and I became dissatisfied, thinking it to be according to God's will that I was sick. A month later, when my brother-in-law came home and brought with him the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, he read to me, but I did not take any interest in it, as I thought I had already convinced myself that there was nothing in this teaching. Time went on, and I knew from the past that I was marching on to an early grave. I could see no other end to it, as I had been most thoughtful about myself in regaining my health. I had been under the best of medical treatment, and followed every rule laid down, yet I grew continually worse.

One day the thought came to me to take the text-book and read it, and as I did so I came to this short sentence, "Time is no part of eternity" (Science and Health, p. 468). I asked myself if this was true, and I thought how often I had heard ministers in the churches preach on this subject, and that they always made comparisons in order to show their hearers the need of being prepared for the hereafter. By reasoning on this point I saw that a space of time having both beginning and ending could not possibly be any part of eternity, which has neither beginning nor ending, and the book became interesting to me. The next point I gained was where Mrs. Eddy shows how the material senses mislead us, and I saw this to be true; also the need of obeying the Scriptural injunction, "Prove all things; hold fast that which is good." Thus I gained one point after another, and before I expected, I found I was improving.

The first evidence I had that Christian Science was helping me was that I could sleep. I had passed night after night and even weeks at a time and never slept. The next evidence was that I could properly digest my food, which I had not been able to do for years, and then I began to gain strength and put on flesh, and other ailments commenced to disappear. I naturally became very grateful for this truth which had come to me, and today I am more grateful than ever to God and His Christ, and to our beloved Leader, Mrs. Eddy, for this demonstrable teaching.

T. O. Leeland, Tacoma, Wash.

With a heart overflowing with gratitude, I join the glad throng who with rejoicing testify that they have been healed through Christian Science treatment. It has proven not only a "test" but a finality. My practitioner showed great patience and love in dispelling my doubts and quelling my spirit of impatience and rebellion against God's way. I was made to "acquaint" myself with God and be at peace, and I found a God hitherto unknown. The balance of the text, "thereby good shall come unto thee," has become a verified promise. I desire to love God and His image and likeness so truly that I may be able to cast the bad away, seeing clearly that Love casteth out indifference, criticism, hate, etc. Within a few months five in my family have come to love Christian Science, and the others recognize the effects of the Truth-cure, shown in the health and harmony in our midst. My own experience in physical healing was unusual, and perhaps its relation will help some reader who is suffering from a similar condition. For a long time I had struggled against terrible spells of sleepiness, which so increased that we all became alarmed and I consulted a physician. His diagnosis pointed to overdoses of a drug given in a previous illness. Through his giving to my case the unusual attention he thought it demanded, and faithful obedience on my part to his prescriptions, I seemed after a few weeks to be greatly benefited. I was then suddenly stricken with rheumatic trouble and confined to my bed, suffering acute pain, often having to take medicine every half hour. Then the thought came to me that if my diseased condition resulted from medicine—in the first instance, the medicine I had taken to

Digitized by Google

counteract the poison had caused another disease—therefore I would not use any more drugs.

At this time my attention was drawn to Christian Science. I determined to investigate it, and so informed my doctor, whose efforts to convince me that Christian Science could not effect permanent cures failed to overcome my desire to see for myself. Deep sleep had fallen on me spiritually as well as physically, and as I had failed to receive help from church teaching, I turned eagerly for something to meet my great need. Then I found that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). One form of suffering after another was destroyed, and finally my stubborn sense of pain in the nerves disappeared. My healing has proved permanent and perfect. Weeks passed without a relapse, in spite of many tests, both of trouble and the changeable weather experienced during the month of May. Some one remarked that he did not believe I ever had rheumatism, if I did not feel it in such constantly rainy weather as we experienced for three weeks. Some time after my restoration to health, the sleepy feeling returned; but on receiving treatment in Christian Science it disappeared entirely.

My experience positively refutes the statement often made, that Christian Science is only a partial healer, or that Christian Scientists are selfish or unsympathetic. I have found practitioners ready at any hour of the day or night to help; I was not discharged until I was "every whit whole," and was discouraged from giving my testimony until the healing was complete beyond any question.

MRS. JULIA BURR MOSHER, Milwaukee, Wis.

I wish to express my gratitude for Christian Science and what it has done for me. For about four years previous to coming into Christian Science I hardly knew what it was to be entirely free from pain. I suffered from different organic and functional ailments, and if not suffering with one trouble I would have another, consequently I was held in the bondage of fear continually. The least exertion seemed to induce suffering, and after trying every known remedy, including an operation, massage, etc., besides different medical doctors, and not receiving any more than temporary relief, I at last was persuaded to try Christian Science, although I had very little faith in it myself. I began to take treatment, but was almost afraid to trust it without taking drugs for one trouble. I however decided to do as the practitioner advised, and I soon began to improve without the use of any drugs. This was over five years ago, and I have not touched medicine of any kind since.

My healing was not as rapid as in some cases, and at times the way seemed very dark and discouraging, but by clinging steadfastly to Truth and the perfect idea, the dark clouds were dispelled and all was light again. I am glad to say that even with my slight understanding of Truth I am also able to help others, and for this and all other blessings I feel very grateful to God, and to our Leader, Mrs. Eddy.

CAROLINE MOHR, Dallas City, Ill.

It is with a grateful heart that I send this testimony to what Christian Science has done for me. For many years I was the slave of several diseases,—heart and bronchial trouble, eye strain, and repeated attacks of stomach trouble,—until it seemed that life was not worth the living and the church of which I was a member seemed to be of little help in the various problems I had to meet.

My attention was first directed to Christian Science by a woman whose beautiful life attracted me, and for two years I thought much upon the few things which I heard of this teaching. At last I was told by the attending physician that I would probably have to go to a lower altitude to relieve the heart trouble, which was supposed to be hereditary. I did not care to give up my work as a teacher, and while visiting a friend one day I asked her if she thought Christian Science would help me. She said she was sure it would, and loaned me a copy of Science and Health. I began to read the book, and continued to do so, for I felt that I had found the truth. I wrote to a friend for absent treatment, and in a few days the heart difficulty was gone and my general health began to improve. While attending a summer school last year, the eye trouble was overcome in two treatments, and I laid aside glasses which I had worn constantly for fifteen years. In six months Christian Science did more for me than all the doctors had in my whole life.

It is such a relief to be free! The days used to be so full of pain and weariness; now I do my work easily and the days are never too long, nor is there ever too much work. The Bible, which had been a closed book, is now a joy and comfort. I am very grateful to our dear Leader, Mrs. Eddy, who has shown us the way in Christian Science; also for the Christian Science periodicals and the weekly Lessons, which are such a constant source of help. I thank God, too, for the dear Christian Science friends who are such a constant help and encouragement to one who is just learning the way. It is my desire that I may help others as I have been helped, and that I may live so that every thought will be a blessing to those with whom I come in contact.—MAUDE COREY GODFREY, Trinidad, Col.

One day early in the spring of 1899, our daughter came home from school with symptoms of a fever. A relative who is a Christian Science practitioner took the case, and the child passed through the different stages of the disease with but little discomfort. About this time, however, there was a stir in the neighborhood, and the health officer came to examine the child. He found no cause, he said, for quarantine, but after this the child commenced to suffer greatly. She was taken with a peculiar trouble in her limbs, which made it difficult for her to move, and though always bright and active when well, she now presented a limp and lifeless appearance. The practitioner came and remained with us through the night, and words fail to express how much the truth was to me through that experience, as the distress of mind and body was so great that I required help for myself. Faithful work was done for both of us, and only those who have experienced the help which Christian Science gives can understand the relief that came with the realization of Paul's words, "There is therefore now no condemnation to them which are in Christ Jesus, who walk not after the flesh, but after the Spirit." My own distress was overcome, and in its place came rest and quietness. The child was soon relieved, and although her limbs were weak for some time, she finally experienced perfect healing.

A little later my sister's child, about four years of age, was taken with the fever, and the health officer came and this time put up a notice of quarantine, which was not removed for several weeks. The little boy had previously been troubled with gatherings in his ears, and this ailment was so much aggravated at this time that it looked very serious to the health officer. He knew we were Christian Scientists, and may have thought we were not doing all that should be done, but he was at all times courteous and showed great consideration and kindness, leaving us to work out the healing through Christian Science without interference. The practitioner kept at work until perfect healing was accomplished, not even a scar remaining to show where the trouble had been, thus proving that Christian Scientists take the best care of their children when they trust the welfare of their little ones with their heavenly Father, the one perfect physician.

Much bitterness was expressed through anonymous

Digitized by Google

letters to the health officer, who said he wished people would be open and honest, and sign their names to the statements they made. Nearly every member of the household was attacked during this time of trial, but help came with the thought expressed by Isaiah: "For thou hast been a strength to the poor, a strength to the needy in his distress, a refuge from the storm, a shadow from the heat, when the blast of the terrible ones is as a storm against the wall." Another time our help came from reading "Unity of Good" by Mrs. Eddy. The raging of evil finally ceased, and the blessings more than made up for all the persecution that had been heaped upon us. We heard no more of the fever in my daughter's grade at school, and the whole atmosphere seemed changed.

I wish to express my gratitude for the comfort and support given me by the one who helped us throughout this trial. She said, one day, when told of the attitude of the neighborhood, "Only blessings can go from this house." This enabled me to look on the experience with joy, and the words of one of our hymns was proved to be true:—

He comes to make His blessings flow—
Far as the curse is found.

The interest in Christian Science was increased through this healing, and our love for the work has continued to grow stronger each year. May God's richest blessings rest on our Leader, Mrs. Eddy.

JESSIE A. FIFIELD, Janesville, Wis.

To say that I am very, very thankful for Christian Science, for the good which has come to me from the study and understanding of it, does not seem to express my thought. For fifteen years I was a slave to the tobacco habit, although in that time I made many an earnest effort to stop it. Sometimes I would quit its use for days; and several times I stopped for months, but then went back to it again, and although I did not use tobacco I still had the desire, and did not dare go around where any one was using it. With one treatment in Christian Science the desire was completely destroyed, and from that day to this, over three years, I have not used the weed in any form, nor even had the slightest desire to do so. This may not mean much to those who have never used tobacco, but I know it will to those who have struggled with the habit. It seemed a great deal to me then, but now that I see the spiritual uplifting, which is so great, the other seems nothing. The understanding of the spiritual reveals a life worth living, with which comes a sense of peace, contentment, happiness, and good will toward men.

Another proof that Christian Science heals, was revealed to me about a year and a half ago. After working at a different kind of work one day, when everything seemed to go wrong, I felt tired and all out of sorts. I went to bed, but could not go to sleep for a long time, and when I did was restless. When I awoke I had a fever, headache, and other symptoms of illness. I tried to help myself, but it seemed as if I could not think of anything but the pain. After sending for a Christian Science practitioner, who treated me, I went to sleep, a very peaceful sleep, and awoke all right, feeling no ill effects at all. Many other demonstrations have been made, which proved to me that Christian Science does heal, as well as give us good for evil, joy for sorrow, and freedom from bondage. My one desire is to know more of the truth.

I am very thankful to God for this truth, also to Mrs. Eddy for her goodness in putting it within the reach of us all.—CHARLES H. SPANGLER, Santa Ana, Cal.

I had always suffered from an affection of the throat, and had exhausted the skill of the best specialists for anything like immediate relief. I then turned to Christian Science, and through treatment by a practitioner I was enabled to meet an important engagement (I am a singer) in my usual voice. On several occasions since, I have been relieved, once almost instantly recovering the use of my voice; but, best of all, I feel that I no longer need fear the disease—that it has been met and fully overcome. I have also been cured of numerous annoying minor difficulties, and I feel a consequent freedom for which I cannot be too grateful to our dear Leader, Mrs. Eddy, who has shown us the way not only to health, but to a religion that fully satisfies.

MINNA GRACE ROPER, Santa Ana, Cal.

There are no words that can express my gratitude for what Christian Science has done for me, and what it is to me. When first I took up the text-book, it was to me as a blank; but the Bible told me that God is no respecter of persons, so from this I knew that, if I was persistent, earnest, and honest in searching, the truth therein was for me as well as for another. Gradually the light of understanding came to me, and now I do know that God does heal physically and mentally. I have had many conflicts; errors of belief have at times seemed very real; but His grace has been sufficient for me. I can truthfully say I have never deviated in the least from Mrs. Eddy's teaching, that it is God and not man who does the healing. Since coming here I have been brought triumphantly through a severe attack of illness, but the healing came as it always does when we leave all for Truth.

MRS. W. A. GREEN, Everett, Wash.

In March, 1908, I had an attack of illness which led to serious bowel and stomach complications. I was then in my seventieth year and had been told that I could not survive a stubborn case of sickness. My son-in-law and my daughter, with whom I reside, employed the services, during the first three or four weeks of my illness, of three prominent physicians, one of whom was a specialist on stomach diseases. At length my condition was pronounced hopeless by the doctors. It was said that I could live but a few days.

My son-in-law, who was interested in and had given some thought to Christian Science, urged as a last resort that I have Christian Science treatment, to which I consented. A practitioner was called and my condition made known. This was about eight o'clock in the evening. The practitioner said absent treatment would be given at once and that a visit would be made to me the following morning. I think I grew better from the first treatment, though the improvement was not perceptible until after two or three days. My recovery was gradual, the practitioner visiting me a number of times and continuing treatment for a period of six weeks, when I was perfectly well and able to be up.

Since my recovery I have enjoyed unusually good health, and my heart goes out in earnest gratitude and praise to God for this wonderful healing. I can honestly and strongly commend Christian Science to suffering humanity everywhere.—MRS. CATHERINE E. EASON, Dallas, Tex.

[Translated from the German.]

I would like to relate an experience which, through the understanding of Christian Science, afforded me proof of the truth of God's omnipotence and omnipresence. Three years ago I became acquainted with this teaching, but circumstances were such that I had no opportunity to attend the services. A kind acquaintance had, however, given me several copies of *Der Herold*, so that I remained in touch with Christian Science.

Lately I went on a visit of several weeks to a sister, and her little son playfully showed me a wrong door, so that I fell down the cellar stairs and lay for some time sense-

Digitized by Google

less at the bottom, apparently severely injured. Two persons carried me up, but my first thought was of divine help. They wanted to call a doctor, but I denied all pain, knowing that mortal mind has no power. Toward evening fever and chills set in, and at ten o'clock they again wanted to send for the doctor; but I refused, in the consciousness that God is almighty, that matter has neither intelligence nor substance. Toward three o'clock I had a short sleep, and when I awoke the fever had disappeared. I got up in the forenoon, in God's strength, knowing that error could not harm me. On the fifth day I was able to take a short walk out of doors, using my umbrella as a support. From day to day the trouble disappeared, and I recognized the power of Truth thus abundantly proved to me.

I thank God with all my heart for His loving protection, and our Leader, Mrs. Eddy, for showing us the way to Truth and to the right understanding of God.

JULIE GROZ, Esslingen a/N., Germany.

On Aug. 21, 1908, I was helping to put a carload of lumber in a dry kiln, when the car unexpectedly started and my right arm was jammed against a brick wall. With my left hand I tried to release the other, but could not do so, and the pain became so great that I realized I must have help at once. I first thought of help from the mill, but knew that it would take several men to push the car back and that this meant considerable delay. My next thought was of divine aid, and then the arm was released quickly without any material effort. All this happened in about one and a half minutes. I tried to get away by myself, to realize the truth, but could not do so.

A man who was working with me reported the accident at the mill, and the men suggested all kinds of material remedies, but I refused them all. I put in the rest of the afternoon working with one hand, declaring the truth constantly. By night my hand and wrist were very much swollen, but I kept on declaring the truth and trying to complete the demonstration myself. I, however, did not seem able to do so, and as my hand was almost closed tight and I had no use of my fingers, I went to see a Christian Science practitioner in Camden, about ten miles from my home. I had treatment, and arrived home about six o'clock. Later in the evening my fingers were straightened out and I had considerable use of my hand. That same evening I met a medical doctor, a friend from another city, and stated the case to him. He examined my wrist and said it was all right, and that he considered it a wonderful demonstration. I had another treatment on Sunday, and returned to my work on Monday. By Tuesday evening all trace of the injury had disappeared, and I had no further trouble whatever.

I am very grateful to God, and to dear Mrs. Eddy for bringing to us this healing truth which Jesus taught, and my earnest desire is that I may gain more understanding of it.—EDWIN W. WATSON, Moorestown, N. J.

When Christian Science was first suggested to me, it was after many of the best and most eminent physicians, both in America and in London and Paris, had entirely failed to give me anything but temporary relief from sleeplessness and a severe stomach disorder of fifteen years' standing. When I had gone three weeks without any solid food, those about me feared that starvation must be the end; but Christian Science was then resorted to, and in less than two weeks' time the trip from Toledo, O., to the Communion service in Boston was made with no ill effects, and I realized a steady gain in physical health. During the following year, the drug habit of seven years' standing and the use of stimulants were entirely overcome, and not once has either been resorted to, in the years that have intervened. Physical pains have been almost unknown, though great physical endurance has been required, whereas before for fifteen years the days and nights had been filled with the most intense suffering, and its consequent discomfort to all those about me. I send my testimony with the hope that it may help some one groping as I was for physical relief, that they too may find as I have the ever-ready aid of divine Mind, that heals all our diseases. To say that I am grateful to the author of "Science and Health with Key to the Scriptures," but faintly expresses what I feel, and to God, who has blessed my life through this wonderful book.

HELEN H. MCLEAN, New York, N. Y.

I wish to express my deep gratitude to God, and to Mrs. Eddy, for the spiritual uplifting as well as for the physical benefits I have received through the study of Christian Science. The Bible is a new book to me and I love God as never before. Christian Science has shown me how to overcome selfishness, resentment, fear, anger, and worry. There is peace, joy, and contentment in my home, and the four years that I have been in Christian Science have been the happiest years of my life. For fourteen years I had to wear glasses constantly for serious eye trouble. I suffered from severe headaches, also from an affection of the eyelids, and could not read or sew without glasses. About two years ago, with help from a practitioner, I was reading the Lesson on "Substance," and when half way through the thought became so clear to me that my sight was in God and not in the glasses, that I took them off and finished the reading of the Lesson without them; nor have I ever had them on since that time. I see better and I am better in every way, and I cannot begin to express my gratitude to God for leading me to Christian Science.

MRS. MARGARET W. TAYLOR, Oak Park, Ill.

In June, 1908, I was attacked with acute lung trouble, and my wife said I was very delirious at times. A Christian Science practitioner was called about one in the afternoon, and within an hour I was resting well; between four and five o'clock I got up, feeling entirely freed from suffering, and ate a hearty meal at six o'clock. Next morning I went through a drizzling rain to the practitioner's home, about a half mile, and on the following day went about my work as usual. For this healing and other blessings I am very grateful to God, and also to our Leader, Mrs. Eddy.

JESSE A. STEVENS, Kalispell, Mont.

[Written for the *Sentinel.*]

LIFE, TRUTH, AND LOVE.

L. A. WHARTON.

O BLESSED Truth!
Thou art the guide that found me,
Depressed and weary, with a sense of pain;
Banished all fear, with loving arms around me,
Taught me of Soul, and made me joy again!

O blessed Love!
Whose power hath unbound me,
Hath blotted out my dream of misery;
Struck off the bonds encrusted round me,
And lifted up my heart to victory!

O Love and Truth!
That come to bless and save us,—
Save me from sickness, sin, and sense of strife;
Ancient of days,—and yet today thou givest
The blest assurance of an endless Life!

FROM OUR EXCHANGES.

[*Universalist Leader.*]

Regardless of school, or sect, or theology, the intelligent Christian today has come to believe that religion is more than a revelation, more than an act of God, more than a Godward movement manward, more than something or anything once and forever delivered to the saints. A new and profounder psychology has fixed an impassable gulf between fifty years ago and our own times, concerning the spiritual nature of man and his relations to divine Truth. That which marks the whole world of modern religious thought as its distinctive characteristic is the primary conviction that true religion is everywhere and always an achievement, a discovery, as distinct from and different from and opposed to the idea that religion is or was anywhere ever handed to or revealed to man in any complete or perfect form. The modern man everywhere believes that man has won his religious truth as he has won all other truth, by hard knocks, by slow and laborious processes.

[*Christian Work and Evangelist.*]

Christ looks into the heart of every soul who comes to him, believing that the seed of goodness is there, some hidden depth of divinity, if only one have the compassionate heart to see. In the sinful woman who breaks the box of ointment on his feet, his companions see only evil; he sees a generous nature with capacity for purer things. Again and again this beautiful trait of looking for the soul of good in evil men is manifested in his life, and, strangely enough to others, but not strangely to him, he always found good there. As we grow more and more to understand him, we too, learn to look upon all men with his passionate desire to find the one good thing. Only a great love for men, however, can awaken this desire.

[*Examiner.*]

Of the Christ we read: "For the joy that was set before him [he] endured the cross;" and all this was because his outlook of love was for the salvation of men. As to his own life we learn that he did always the things which pleased Him who sent him. Owner of all things, he had not where to lay his head. The richest life was in worldly goods the poorest life. The center of gravity for our lives needs to be lifted if our life is to be at all worthy of us, or worthful to us, or fit as an example to others.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth*, London.]

Human society is as yet in its spiritual infancy; we are only just beginning to dream of a world-wide brotherhood of man, or of love as "creation's final law." Moral progress is slow and costly, but little by little Christ is coming to his own. Despite all threatenings to the contrary, the day will come "when he shall have put down all rule and all authority and power. For he must reign, till he hath put all enemies under his feet. The last enemy that shall be destroyed is death."

[President William H. P. Faunce, LL.D., in *Watchman.*]

A Christian man can teach or preach only so long as he continues to grow—beyond that point he becomes a repeater of pious phrases. A Christian denomination can hold its strength and power of leadership only so long as it keeps its face toward the light, and believes that God's tomorrow is greater and fairer than all his yesterdays. The Christian minister is not only to call his sheep by name—the pastoral function; he also "leadeth them out," in thought and action and enterprise.

[*Christian Register.*]

When the dust of any controversial age clears away, there is always found unchanged the everlasting foundations of the moral sense in man, the inalienable laws that furnish no easy mode of evading the penalties of sin and trespass.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: Single copy, one year, $2.00, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; twenty-five copies, each, one year, $1.80, six months, $1.10; fifty copies, each, one year, $1.60, six months, 95 cents. These rates apply in the United States, Canada, Mexico, and Cuba. To all other countries, add 40 cents yearly for postage on each subscription.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Ten copies, to ONE ADDRESS, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Ten copies, ONE ADDRESS, $2.10; twenty-five copies $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months. In all other countries additional postage at the rate of $3.00 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION, PAYABLE IN ADVANCE, POSTPAID: One or more copies, 50 cents, each, yearly. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postpaid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postpaid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico and Cuba, 10 cents a copy, 60 cents for six months, $1.00 a year; all other countries, 12 cents a copy, 75 cents for six months, $1.25 a year.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of
Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.
Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75
Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75
The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.09; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,
Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.

Ten copies to one address, each, one year, $1.90; six months, $1.15.

Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.

Fifty copies to one address, each, one year, $1.50; six months, 90 cents.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents. In the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Sworn statements and other documentary evidence intended to support the charges made against the United States Steel Corporation by the American Federation of Labor, have been presented to Attorney-general Wickersham. The evidence follows the petition of the organization to President Taft, who referred the whole matter to the attorney-general. Aside from alleging that the Steel Corporation exists in restraint of commerce and trade, the federation's chief complaint is that it employs conditions unsatisfactory to organized labor and has used various means to prevent labor organizers from working among its employees. Part of the argument is an effort to show that the Steel Corporation exists in violation of the Sherman law and certain provisions of the Wilson tariff act. The corporation's ownership of coal and ore lands is said to be part of a monopoly; it is charged with having crushed transportation competition on the Great Lakes, and in some instances on the railways. Its acquisition of Tennessee Coal, Iron, and Railroad Company is condemned.

Simultaneously with the returns of indictments against the National Packing Company and its subsidiary companies, charging violation of the anti-trust law, United States District Attorney Sims also filed a bill in equity, for dissolution of the alleged trust. The bill names not only the National Packing Company, but the Armour, Swift and Morris and other companies, and the individuals who dominate and control these concerns. It is apparent from the bill and the indictments that the Government regards the National Packing Company as the instrumentality through which, it is alleged, the packers have been evading the anti-trust law, and by means of which they have been making their combination effective. It is believed that if the National Packing Company is broken up, the alleged evils of this combination will be remedied.

The bill terminating the present lease of the fur seal killing company on the Pribiloff islands in the Pacific, and authorizing the secretary of commerce and labor to declare a closed season on the islands, has passed the Senate. The herd of seal has diminished from forty-five hundred thousand in 1867, when the United States acquired the islands, to fewer than one hundred thousand at the present time, and it is the opinion of experts that unless the seals are protected they will be entirely exterminated within two or three years. According to the lease, the holding company was allowed to kill fifteen thousand fur seals every year. These sold in the English market for about $465,000. The North America Company has been paying something over ten dollars for every seal it killed.

The commissioner of immigration has notified all the steamship lines entering New York that they must decidedly change their methods as far as the acceptance of immigrants is concerned. He states that since Jan. 1 more than thirty-five hundred aliens brought here by the various steamship lines have been returned as undesirable. That it is the fault of the immigrants themselves, it is distinctly asserted, is not true. Entirely honest in their intention to seek a livelihood in the United States, they are approached by the steamship agents in their native land, are told glowing tales of the wonders of America and brought here. Persons whom the agents know will not be admitted by the United States authorities are taken just as willingly as the desirable, and not the slightest care is used.

Tariff discussion is likely to break loose again in the Senate soon, owing to the determination of the "insurgents" who voted against the tariff bill to try to make the tariff board a real factor in the study of tariff questions. There is a conviction among them that the sentiment of the country demands that the protective duties be analyzed by experts, and the country, through a tariff board, be informed what industries apparently need high protection and what do not; and they believe that an impartial statement of facts with reference to the need of protection, as opposed to the demand for it by its chief beneficiaries, would result in a public clamor for certain reductions which Congress would not dare ignore.

The twenty-seven firms and individuals accused by the Government in its suit to dissolve the National Packing Company have been served with summonses directing them to appear in the court at Chicago in response to the charges. At the same time the criminal case involving the National Packing Company and the ten constituent concerns which were indicted by the federal grand jury, was placed on the calendar of Judge Landis of the federal court. It is said Judge Landis is undecided whether to sit in the case.

More material was taken out of the Culebra Cut at the Panama Canal last month than in any other February since ground was first broken for the canal. The total was 1,251,413 cubic yards. This bulk would represent a solid row of houses ninety feet deep, sixty feet high and a mile and one fifth in length. It would cover a forty-acre farm to the depth of nearly twenty feet.

A creditable representation by the United States at the international exposition at Buenos Aires this spring is assured by the action of Congress in deciding to appropriate seventy-five thousand dollars for the art exhibit and the live stock and agricultural show, and one hundred thousand dollars for the Fourth Pan-American Conference.

The Administration railroad bill, embodying many changes in the existing law and largely amended since its introduction in the House, has been ordered favorably reported by the House committee on interstate commerce.

The grand jury at Pittsburg, Pa., has returned indictments against forty former and present members of councils as the result of the confessions of Klein that many city government officials have been guilty of graft.

The Walter Baker Company has just distributed a bonus of thirty-two thousand dollars among the approximately eight hundred employees in its chocolate mills at Dorchester Lower Mills (Mass.).

The hulk of the ill-fated battle-ship Maine, sunk in the harbor of Havana in 1898, will be raised, if the Senate concurs with a bill just passed by the House.

Edward Payson Weston, the pedestrian, arrived at Peabody, Kan., March 18, nine days ahead of his schedule.

Ex-President Roosevelt is progressing leisurely down the Nile with his family and is being feted along the way.

It is expected the new census will show the population of the United States to be about ninety-one million.

International.

Premier Asquith has given notice in the House of Commons of three resolutions bearing on the veto power of the House of Lords. The first declares that it is expedient that the House of Lords be disabled by law from rejecting or amending a money bill, but that any such limitation shall not be taken to diminish or qualify the existing rights of the House of Commons. The second resolution declares that it is expedient that the powers of the House of Lords over bills other than money bills be restricted by law, so that any such bill which has passed the House of Commons in three successive sessions, and has been rejected by the House of Lords in each of these sessions, shall become a law without consent of the House of Lords, on royal assent being declared, provided that at least two years have elapsed between the date of the first introduction of the bill in the Commons and the date it passes the Commons for the third time. The third resolution proposes to limit the duration of each Parliament to five years.

The United States, Dutch and Danish consuls at Melbourne, Australia, have offered to assist in promoting the success of the Victorian cabinet's scheme whereby it is hoped that forty thousand settlers will be secured within two years. Cheap excursions are being arranged by the commonwealth ministry in order that farmers from those countries may have the opportunity of visiting Australia and of seeing for themselves the opportunities that await settlers there.

A commission appointed to inquire into the work of the education department in Italy has reported, and in consequence of the report and recommendations made, a bill has been presented to Parliament by the minister of education, whereby it is proposed that a committee should be appointed whose duty it would be to remove all the incompetent officials of that office.

The appointments of Sir Chen Tung Liang Cheng as minister at Berlin and of Wu Ting Fang as minister to France have been announced. Both of these men have served as minister to the United States.

At the first of the year Sweden had one telephone for every 34 persons in that country, Germany one to every 71, Great Britain one for every 955, and Russia one for every 1,322.

Industrial and Commercial.

During 1909 south Jersey farmers distributed more than seventy-five hundred thousand dollars worth of produce over the New England states, the Middle West, and Canada. This is an unprecedented record of shipments for one year, and represents an increase of thirty-four per cent over 1908. It took 18891 freight cars to transport this produce to the various markets—about one hundred and seventy-eight miles of cars, if made up in one train. To enable the farmer to market his products quickly and secure the most advantageous prices, special schedules were established and trains known as "preference freights" were run, making time only equaled by passenger trains.

The Cunarder Mauretania has just made the westward trip from Daunt's Rock to Ambrose Channel Lightship in 4 days, 15 hours, 29 minutes.

The mileage of the railroads of the world totals more than seventeen times the circumference of the world at the equator.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

POVERTY AND RICHES.

HON. CLARENCE A. BUSKIRK.

INNUMERABLE, indescribable, at times even fantastic, monstrous, and well-nigh incredible, are the processes through which human beliefs are formed and nurtured; whether we speak of such beliefs as individual or collective, as exceptional or general, as ancient or modern, as national, racial, or climatic. Innumerable and indescribable, also, are the complex influences of these beliefs upon human consciousness, character, and conduct. They are constantly at work, both in the waking and in the sleeping hours of mortals, shaping their ideals, hopes, fears, desires, emotions, and incentives. They work as the sculptor works: he first fashions in plastic clay, and then he chisels his work in marble. Some of these beliefs are radiant, beautiful, and serene; they seem to bring a light from heaven with them; but there are others that are tyrants, deceivers, obstructionists, robbers. Under the basilisk glance and breath of some of them the very flowers wither and all beauty departs from the earth.

Especially when the term "poverty" and the term "riches" are used in relation to material conditions, we may observe that the human belief of poverty and the human belief of riches are contraries but not opposites, and particularly so in the bodily discords which they manifest. While they have many differences, they have also many things in common. For example, the origin of the belief of poverty is fear; and there are certain accompanying beliefs, —the belief of humiliation, the belief of despondency, the belief of inferiority, the belief of human dependence, and so on. The belief of riches is primarily an outgrowth of the belief of poverty, with accompanying beliefs such as that of pride, of power, of superiority, of ostentation, and so on.

The accompanying beliefs of poverty and the accompanying beliefs of riches are likewise contraries but not opposites. This is illustrated when a person who has suffered all his years under a belief of poverty, and has manifested its accompanying beliefs, suddenly suffers from the contrary belief of newly acquired wealth, and manifests its accompaniments of arrogance, ostentation, etc. What is termed the polarity of the earth furnishes a useful simile. Those imagined spots, called respectively the North Pole and the South Pole, are antipodal, and yet they are accompanied with the similar beliefs of insufficient heat and light, of protracted snow and ice, of intense cold, of the absence of vegetation, etc.; all of them are to be referred to the belief that those spots on the earth receive the rays of the sun less powerfully.

It may be observed that there is also a sort of repulsion in respect to each other, which seems to exist between the belief of poverty and the belief of riches, and that this repulsion may be likened somewhat to the repulsion manifested by the dissimilar poles of a piece of magnetite. The two dissimilar poles belong to the same fragment of ore; break the fragment into smaller fragments, and the action of the two poles is not altered. Expose the piece of magnetite to the action of electricity, and its properties display an increased activity. So, expose individual human beliefs, including the beliefs of poverty and of riches, to the action of what may be termed the collective beliefs of a considerable number of persons,—which beliefs may sometimes assume such vast proportions and intensity that they may be termed world-beliefs,—and it is observable that such individual beliefs are generally strengthened and intensified in their manifestations.

The belief of animal magnetism, often called mesmerism, and now usually called hypnotism, relates to effects supposed to be similar to those produced by a magnet over iron. It is observable that the classes of persons who are most susceptible to the beliefs of material poverty are also most susceptible to the beliefs of material riches, and *vice versa;* and this is the case in respect to the supposed effects of animal magnetism, of education, of environment, etc.

The beliefs of material poverty and riches are from time immemorial, and their tyranny is world-wide. What is termed civilization seems to strengthen rather than to weaken them. In every age and country they have been prolific causes of manifold sufferings, vices, and crimes. The view of them is so kaleidoscopic that economics and sociology have sought in vain thus far for their marking-gauge. Both beliefs crave material possessions, and both are insatiable. Both beliefs are materialistic in their origin, their ideals, their incentives, their aspirations. Both beliefs are in denial of infinite good and the allness of divine Love. Both beliefs tend to idol-worship, and transgress the First Commandment: "Thou shalt have no other gods before me." Both beliefs, as analysis reveals, are based upon falsehoods, and are therefore amenable to the divine Truth-cure.

It is a serious mistake to suppose that the belief of poverty needs to be overcome, but that the belief of riches does not. Both alike need the ministry of Christian Science. Those who suffer from the belief of material riches may be less in numbers than those who suffer from the belief of material poverty, but the sufferings, moral, intellectual, and physical, which are the symptoms and incidents of the belief of riches are fully as numerous and pronounced as are those which are the symptoms and incidents of the belief of poverty. They may differ more or less in aspect, but their primary origin is the same. It will not do to smile at the sufferings of the rich, any more than it will do to smile at the sufferings of the poor. Both classes frequently need the offices of the good Samaritan; and both need at all times the offices of Christian Science. Both classes are wandering astray into thirsty deserts, and both need the living waters of the fountain of Life.

Not only are the needs of the individual sufferers to be regarded from this view-point, but likewise the needs of society and political government. The social and governmental ills which come from both of these beliefs are widespread throughout the earth. Class hatreds, class jeal-

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

ousies, class antagonisms, proceeding from both beliefs, cannot be safely disregarded. Every Christian Scientist is more or less liable to be affected by them, directly and indirectly, and therefore he has the right to put on the defensive armor and to take up the weapons of divine metaphysics. This is both his duty and his privilege. In this respect, there is no difference between warfare among the nations and warfare among the classes.

There is reason to hope that the modern civilized world is becoming so disgusted with wars and battles that their awful and humiliating records will not much longer continue to darken the page of history; so also should the beliefs of discordant relations between the classes known as the rich and the poor, the manifestations of which have been growing more acute under modern economic conditions, be overcome. If not overcome, at least very largely, the face of economic prosperity will certainly be covered with frequent darkness, private and public morals will become more and more disordered and retrogressive, and even free institutions may be very gravely imperiled.

In the metaphysical treatment of the belief of material poverty and the belief of material riches, it must be remembered that they are largely formed and nurtured by mental comparisons. The standards according to which these comparisons are drawn are constantly changing. The belief of riches of fifty or less years ago is scarcely the belief of riches now. The man of fifty or less years ago, whose wants and whose income were such that he was believed to be in quite comfortable circumstances, would now be classed by himself and others as among the poor. Riches and poverty are relative terms, the meanings of which are changing because their beliefs are mental conditions and are to be dealt with as such.

The rich man is given to comparing his possessions with those of men richer than himself, when he considers what measure of possessions may satisfy his desires. When he compares his possessions with those of men poorer than himself, it may be from a sense of gratitude, but it may also be to indulge his sense of superiority, of power, etc. These points must be considered in treating the person who suffers from the belief of material riches and its supplemental beliefs. The person who suffers from the belief of poverty is likely to compare his condition with that of those of larger material possessions. He may have enough to provide for his reasonable daily needs, but some other person has more than he, and this may arouse envy, hatred, and kindred beliefs, with their various discordant manifestations upon the body, all of which need to be recognized and overcome.

The fact that Christian Science helps business men and others to obtain deliverance from the beliefs of poverty and of business worries and entanglements, has been witnessed to so frequently in the Christian Science periodicals that all who are informed as to the facts and who are free from prejudice, are ready to concede the practical value of this teaching to every man of affairs.

A LESSON IN HOUSEKEEPING.

ELIZABETH EARL JONES.

WE learn in Christian Science that man is the reflection of God, and all that he is and all that he has, in reality, he has by virtue of spiritual reflection of the one infinite source of being. It is therefore with sweetest comfort and confidence that we read the Master's declaration: "Your Father knoweth what things ye have need of, before ye ask him." It is not the need, then, but the supply, "what things ye have need of," that divine Love knows, is ever knowing about His idea, even before we ask Him; therefore our labors are lightened and our highest hopes assured, because God is already knowing, declaring, and expressing through man and the universe all the good which we long to know and think and be. The above verse from Matthew's Gospel has often come as a treatment, with healing in its wings, to the writer, and pushed back the seeming veil of sense, fear, doubt, and materiality which would obscure and substitute the divine knowing with false beliefs about life and its supplies.

At one time, some years ago, a student of Christian Science became greatly distressed over the discordant condition of her usually happy home. Everything seemed to be going wrong, the members of the family were all cross and dissatisfied, and, search as she would, it seemed impossible to locate and dispel the intruding error which was causing so much unhappiness. After praying for divine guidance, the above words of the apostle evangelist came to mind, at once an instruction and a rebuke. Because man is the reflection of God, he must seek to know not the need, but the supply; not the lie, but the truth about any situation or any thing with which he or his patients may have to do. When the thing we have need of is discerned according to Science, the sense of lack, by whatever name we may call it, is seen for what it is, and then for what it is not, and it quickly disappears.

With the declaration, "God knows the thing I have need of, the quality and fact that seem to be lacking, therefore I, as His child, also know it," at once the answer came as clearly as if a voice were speaking: "The thing needed in your home and in your consciousness to bring out harmony is system." System! why, that was a quality which the student had never seemed to possess, and to the need of which she had never before awakened. Reviewing the situation mentally, she could now see that all the discord was directly traceable to a lack of system. It was a revelation!

Now, human sense is often so lazy and obstinate that it would argue inability to comply with the progressive demands of Soul, and it therefore needs close analysis, and so it was that the student began to reason: "It will take me a very long time to acquire systematic habits of thought and conduct, because I have never had them." But the same merciful God who uncovers evil's hidden claims, and awakens desire for better ways, will not leave man in bondage to fear, nor forsake him until the desired goal is won. Therefore the leading came again: "God has always known and expressed system throughout all His creation. He has always known it about His idea, and through His idea—yes, even before you ask Him; therefore man, His reflection, has always known it and manifested it, in reality, just as the universe does. The opposite belief that he does not reflect it is simply the lie about man, and the lie is already obsolete." From that day it became one of the easiest and greatest joys in this student's life to systematize her work, mental and physical, and to study the divine system manifested throughout the universe.

It is inevitable that things will begin to happen when thoughts are put into action, and the happenings will be harmonious or otherwise, according as the producing thoughts are right or wrong. Each thought and thing has its time and place, and with each in its place and each moment rightly filled, even human existence would send forth a rhythm more melodious than the music of the spheres, than whose system none more perfect is known in the material world. When a new glimpse of divinity thus dawns upon the human, like the early morning sunlight after a long, dark night of watching and waiting, dimly defined objects and delicate hues begin to appear where all was meaningless void before, these objects and hues becoming clearer and more tangible as day progresses; and so it was in the experience just narrated.

Some of the forms and hues which appeared in the light of this awakening were the beautiful and helpful glimpses of divine system manifested in the universe about us. With what marvelous regularity does the sun rise and set! We regulate our clocks and calendars by these

Digitized by Google

times and ways of God's housekeeping. With what certain routine do the seasons come and go,—the sweeping and dusting of the winds, the cleansing and refreshing of the rains, the drying and invigorating warmth of the sunshine, and the restful quiet of the silent nights, the necessary periods of spiritual meditation preceding renewed activity. And how beautifully does the life of our beloved Leader exemplify the divine order and its blessedness in filling up the measure of life, setting discords in harmony and providing an unbroken and uninterrupted channel through which God is speaking with men. She tells us it is wise to "square accounts with each passing hour" (Messages to The Mother Church, p. 91), and as we begin, even in a measure, to put the duty of each hour in its place, and to see each idea of God in its rightful place, the music of life begins to rise and swell in triumphal chords about us and to flow in gentle rhythm through all our words and deeds, bringing health and peace.

The one universal consciousness is God, so full of goodness, so radiant with intelligent and loving activity and provision, so permeated with harmony, that, as these new and ever-increasing views come, we rejoice to press onward and upward, praying more devoutly for the "seeing eye" and the "hearing ear," ever alert and attuned to the divine activities within and without.

OUR WATCHWORD.

JULIAN KUNE.

"WHAT I say unto you I say unto all, Watch." These words in which Jesus of Nazareth admonished his disciples, have been wisely selected by our Leader and placed as a motto on the title-page of the *Sentinel*. According to Webster, to watch, is "to be awake, to be attentive, or vigilant, to give heed; to be on the lookout, to keep guard, to act as sentinel." In Christian Science, it is not sufficient that we should at times sacredly guard the precious treasures of Truth obtained through the study and understanding of divine Science, but we must keep continued watch, lest lurking error should intrude and make damaging inroads into our consciousness.

While taking part as a private soldier in the Hungarian Revolutionary War of 1848, under Louis Kossuth, I remember that when I was for the first time placed on the picket line, the officer in charge cautioned me to be wide awake and to watch. This being my first experience in that line, and not seeing an enemy before me, I wondered why I should be so vigilant. Thirteen years later, while commanding a battalion in the American Civil War, I had occasion to superintend the placing of pickets around our camp, and having profited by former experiences as a picket, I was able to impress upon my men the importance of their watchfulness and vigilance, lest, failing in this respect, the enemy, during the dark of night, should stealthily approach and by a dashing assault break through the line and throw the camp into chaotic confusion.

It is the same in Christian Science. Unless our spiritual pickets are constantly encompassing our consciousness and on the watch, lurking error, in the form of various evil thoughts, emanating from the material senses, may at any time attack us, notwithstanding that we may consider ourselves immune from such attacks. Although I have enjoyed the blessings of Christian Science for over six years, I have never realized as much the necessity of watching and praying as I have during a recent experience. Considering myself fairly fortified by diligent study of our text-book, and my earnest endeavor to lead a good Christian life, I had omitted to watch, when all of a sudden, during the midnight hour, I was awakened from a sound sleep by a sense of severe physical discord; but Truth, always ready to help those who earnestly desire to be helped, came to my rescue through my reading of a few pages in Science and Health, when the intruding enemy was driven back into its native nothingness. This led me to appreciate more than ever before the force of the Master's words: "Take ye heed, watch and pray: for ye know not when the time is."

GIVING A TESTIMONY.

ALICE MARIE TAYLOR.

As Christian Scientists, we deem it a privilege to do any helpful thing for another, and many of us are in the attitude of seeking out ways and means for such helpfulness. The Wednesday evening meeting, which is the time and place formally provided for the publishing of the good news to hungry hearts in need of the healing, is one effective means of carrying out the perfectly right and selfless desire of aiding those in need. Over against the opportunity thus provided, and against the right desire to be of real service, appears the untrue argument that the would-be speaker does not know how to tell his blessings in a helpful way or in a convincing manner; that he is unlearned or not able to speak publicly; that he has nothing but so-called small demonstrations to recite, and other deterring false reasoning.

If the Cause of Christian Science were entrusted to defective and ignorant human nature, it would never prosper. If it had to wait for the perfect man or woman to spread the good news, the good news would scarcely be spread. Truth always commands attention and respect, no matter how simply it is told, if earnestness, sincerity, and gratitude convey it to the listener. The thoughtful, truthful, loving testimony is not the work of man. It is a form of activity inspired by divine intelligence, and cannot go forth fruitless. Thus analyzed, the beliefs which would keep the possessor of good news seated during a Wednesday evening meeting are not true, and the actual cause of his silence is revealed to be fear,—fear of criticism, of failure, or perhaps a nameless fear. Sincerely searching, one finds selfishness snugly tucked away, subtly restraining the better impulse of helpfulness. It is self that fears some phase of suffering or defeat; but the Master said, "Ye shall know the truth, and the truth shall make you free." Half the labor has been accomplished in the discovering of the falsity of these silent arguments. The truth is that the Christian Scientist wants to help some one; this is his desire, and his only desire.

In my own experience, a full realization of the desire to help fairly lifted me from my seat. I was going to help some one else. What could prevent that? I had many things to tell, and divine Love would help me to tell them. My testimony had been mentally prepared before service, so I quickly fell to noting in thought the things that would be helpful to those unlearned in Christian Science. I endeavored to arrange those items with reference to those needing the help, not with reference to those who already knew as much or more than I did about God's bounties, and this caused the work to grow still more simple. Much of my fear had been of the many students more learned than I. From those engaged in right thinking, as taught us, I had only help to expect; so the last vestige of fear was destroyed, and the testimony came freely, gratefully, and joyously. Since the first effort thus thoughtfully pursued to its actual giving, each effort has been attended with less and less fear. Always it is the same fear of criticism, fear of failure, but it is easily met by the truthful argument which helped me at that time.

Some prayerful thought given the meeting during the day preceding the evening in which it is to occur, does wonders in clearing away the débris that would obstruct right desire and right effort. God is ever with the earnest desire, and we are taught in Christian Science to entrust our desires to Him, "that they may be molded and exalted

Digitized by Google

before they take form in words and in deeds" (Science and Health, p. 1). We have a distinct duty toward the meetings which provide opportunity for publishing the good news, and we cannot fulfil that duty with one effort alone, but must contribute freely in all channels of right doing. It therefore becomes our duty joyfully to testify to the healing truth, proportionately as the meetings seem to need such right effort, thus gladly and humbly fulfilling our duty in the manner provided by our Leader's wisdom and loving foresight.

"NO TRESPASS."

IDA C. VANCE.

ONE afternoon, while at the home of a friend, I thoughtlessly repeated a bit of gossip which had been told me. In the evening, as I sat thinking over the experiences of the day, I recognized how prone we are to excuse ourselves when we voice error to other Christian Scientists, on the ground that "they will understand." But why should we ever consent to give our brother what we are (or should be) daily striving to cast out of our own consciousness, viz., sense testimony? Is it because we do not know what better disposition to make of it?

In following up these thoughts I began to work along new lines, and "in the quiet sanctuary of earnest longings" (Science and Health, p. 15) a clearer realization of the nothingness of what is termed gossip came to me. I asked myself: Suppose I have some rubbish to dispose of, would I ever empty it out in another's yard? Why, I would not think of doing such a thing, knowing as I do that such an act would be an unwarranted trespass on my neighbor; that the rubbish would not only mar the beauty of the lawn, but would tend to destroy the grass (a type of meekness) if it were allowed to remain. Of how much greater importance is it, then, to purify our own thought, in the way our dear Leader has pointed out on page 565 of Science and Health, where she tells us that "the chaff of error" must be burned up "with the fervent heat of Truth and Love," thus purifying human character. It is another opportunity to exemplify the golden rule, and if we are watchful that no wrong thought shall trespass on our own consciousness, we shall then give out to others only that which will elevate, purify, cheer, and bless.

THOUGHT UNFETTERED.

BELLE A. MUNDY.

A LADY once covered her canary's cage with a dark cloth, fearing that he might annoy the neighbors by singing at daybreak. However, when he awoke, he sang in the shrouded cage, because his instinct prompted him to greet the dawn with a cheery song. It seemed almost pathetic, the little creature trilling his pretty notes amid that unnatural gloom.

Is there not a lesson here for the children of God? Should not we, too, sing for joy, even though our surroundings seem darkened by error? Is not God's dear presence enough to fill the darkest prison of sense with gladness, and to free the voice of thanksgiving? Thus the lady queried, as she removed the covering from her little pet, and thanked him for the lesson he had taught her. Something in his happy notes entered into her own thought, for she said, unwittingly in rhyme,—

> Sing, little brother! we're born to fly,
> I from the earth and you through the sky.

Love those who reprove thee, and hate those who flatter thee; for reproof may lead thee to eternal life, flattery to destruction.—EMERSON.

AMONG THE CHURCHES.

SALT LAKE CITY, UTAH.

No one living in Brigham street is likely to object to the erection on that highway of a sanctuary for Second Church of Christ, Scientist—commonly called the Christian Science Church. Usually the buildings of that denomination are of a sort to be invited. They add to the impressive beauty of the streets on which they are located, and grace the neighborhood in which they stand.

Whether or not the reader may subscribe to the doctrines of the Christian Science church, the fact remains that no organization can be bad which gathers into its fold so many people of the excellence known to compose the Christian Science church of this city. Their cult has grown here, and it is growing everywhere. First Church has become inadequate to accommodate the people who want to go there. Membership has increased to the point where the congregation has to be divided, and the younger half will have to erect a home of its own. No longer will rented rooms be satisfactory.—*Republican.*

WEST CHESTER, PA.

Christian Science services were held in the new church building, North High street, for the first time yesterday, March 6. A brief history of the beginning and growth of Christian Science in West Chester was read by the First Reader. The church will not be dedicated at present, because the building is not free of debt. It is as convenient and inviting a building as one may desire to see, seating two hundred and twenty persons on the main floor, and forty in the gallery, and cost about ten thousand dollars. The colonial effect is produced in high degree by the old-time pews finished in mahogany and white, the buff walls and white trimmings, and a molding about the ceiling.

Local News.

EL PASO, TEXAS.

Ground was broken yesterday [Mar. 9] for the beautiful church edifice to be erected by First Church of Christ, Scientist, at the corner of Montana and Stanton streets. The contractor will complete the building within three months. The cost will be about $10,000. The edifice will be of the Corinthian style of architecture, square in design and massive in detail, forty-eight feet wide by eighty feet in length, with a height to ceiling of twenty-five feet. In front will be a commodious porch, ten by thirty-four feet, supported by four massive Corinthian columns. A membership of less than fifty has undertaken the task of building the church, and it is understood that sufficient funds have been subscribed to meet all expenditures.—*El Paso Times.*

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

SELECTED ARTICLES.

[Charles K. Skinner in *Grand Rapids* (Mich.) *Herald.*]

That the sharp line existing between Christian Science teaching and practice and other systems of mental healing may be defined to your readers, I ask your indulgence to explain it. Christian Science starts with the premise of but one creator, one Life, one Mind or intelligence, and that one is God, or infinite Mind. It gives no power to any lesser mind. It accepts the statement of the creation as given in the first chapter of Genesis, in which God says: "Let us make man in our image, after our likeness: and let them have dominion," as conclusive evidence that the true man is spiritual—very much hidden to human sense it is true, but nevertheless available to all who awaken to their spiritual birthright. Christian Science teaches that God is Love, the omnipotent intelligence that constantly upholds and protects all His children. This understanding fosters a perfect confidence in His care, and we put our hand in His hand, as it were, just as we did, when children, in that of our human parents, knowing that no harm can come to us when we sincerely and constantly rely on His protection. It is the realization that as God is perfect, the true or spiritual man before mentioned must be and is perfect now and always, even as the reflection is always like the original.

It was the clear understanding of this truth which enabled Christ Jesus to destroy all sense of discord in mankind and the physical universe with the spoken word. On the contrary, suggestion, mental science, mesmerism, hypnotism, and kindred systems rely entirely on the control of one human mind over another, or on auto-suggestion, the art of deceiving one's self, which one of its advocates defines as "the fine and beneficent art of fooling the body into good behavior." Very different is the treatment of a Christian Scientist, which is the prayer of understanding, that which brings to the consciousness of his patient the ever-presence of God, and constant peace, harmony, and rest, driving out fear, anxiety, and care.

On the subject of physical cures by mental suggestion, Prof. Dickenson S. Miller in the *New York Times* of Nov. 14, 1908, says: "We almost never can truthfully say to a patient, 'You will get well.' We do not know whether he will or not. I confess to the 'unpractical' moral squeamishness of wishing to banish the lie from suggestion altogether." The difference between the above practice and that of Christian Science is that the latter impresses his patient with the understanding that he is by man's birthright in the very presence of God, infinite Love. He is made to know how God is ever present, and of man's protection through his relation to God.

[William J. Bomin in *Liverpool* (Eng.) *Mercury.*]

There has of late swept through the country a small tornado of exaggerated and delirious language in reference to Christian Science, and congresses, conferences, and congregations have sat and listened while the enormities of Christian Scientists have been expatiated upon and sometimes gloated over. May I be allowed to take advantage of what appears to be a lull, or a lucid interval, to make a few remarks from another point of view?

The broader spirit manifested in recent episcopal utterances has been gratifying, though to be sure it has been wrapped in abundant repudiation of the teachings of Christian Science as absurdities; still a recognition has been made of the truth that Christian Science is promulgating and of the cheering results that it achieves. The Bishop of Carlisle says that Christian Science proclaims a great truth by caricaturing it. The Archbishop of York has just said that he has "rarely met with such capacity to enter some of the deeper aspects of truth" as that of Christian Scientists he has had to do with, and that he had seen the lives of Christian Scientists tranquil, bright, cheerful. Dr. Horton has said Christian Science is a force which makes for purity, happiness, and love. All this is a great advance upon the attitude of uncompromising condemnation so long maintained, and which the works of Christian Science have rendered no longer tenable. Altogether there seems to be a consensus of opinion that Christian Science, whatever else it may achieve, is operating as a transforming and elevating force upon the lives of those who have accepted its teaching.

Now, if a caricature of truth can produce these results, the presentation of the truth itself must, *a fortiori*, be attended with something a great deal better. Are we entitled to ask Dr. Diggle how and by whom it should be presented that these greater benefits may be no longer withheld from society? Professor James and the pragmatists, however, would probably maintain that these results could not possibly proceed from a caricature, and those who believe that a corrupt tree cannot bring forth good fruit will find themselves forced to this admission. As a matter of fact, Christian Science is not a philosophy to be scrutinized and criticized from a distance. It is eminently a practical system, a scheme of living and thinking, and it has to be put into practice and tested before it can be fully comprehended, every bit as much as a new dish must be tasted before its savor can be known.

There is, perhaps, no greater tragedy than earnest prayer unanswered. If Christian Scientists are finding that their prayers are being answered in a manner that convinces them of the goodness and omnipresence of God, is it any wonder that they pursue their way in calmness and confidence and peace?

[George A. Law in *Winsted* (Conn.) *Citizen.*]

That Christian Science heals only that class of diseases which the medical profession considers due to hysteria, as claimed in an article in a recent issue of this paper, is a very old theory, and one which has been used over and over by those who have attempted to discredit Christian Science healing. Those who advance this claim show a great lack of familiarity with what Christian Science has done and is doing for mankind, and also fail to appreciate that a very large majority of the cases healed in Christian Science had been diagnosed by many different reputable physicians and often by specialists recognized as the highest authority. To attempt to show that such healing has not been accomplished, on the ground that Christian Scientists do not offer competent testimony as to such healing in a great many cases, results in questioning the competency of the medical profession to diagnose disease and also to ignore entirely the statements of many disinterested individuals who have been in positions to know thoroughly the history of these cases and to observe conditions for themselves.

To consider that pain is an ordinance of God requires us to believe that pain is good; and as pain cannot possibly be good it certainly must be evil, the opposite of good. Since the Scriptures teach that God is Love, it becomes a very difficult problem to reconcile with that fact the proposition that He causes suffering. To credit God with causing pain makes God the source of two opposites, evil and good, which is clearly an impossibility, for from the same fountain cannot flow both bitter and sweet water. Again, if God is Love, He cannot precipitate evil, for Love (good) and evil cannot abide together.

[Frederick Dixon in *London Medical Times.*]

The question has been asked by a critic, why Christian Scientists do not start a hospital for demonstrating Christian Science healing on a large scale. May I say, therefore, without any offense, that Christian Scientists do not think that the gathering together of sick people under a single

Digitized by Google

roof would be in any way advantageous to the patients. Our critic would admit, I am sure, that the mind of the patient plays a very important part in healing; consequently, to collect numbers of people together, and subject them to the constant depression resulting from the unbroken contemplation of sickness all about them, is a process which no Christian Scientist would regard as either wise or desirable. Christian Science healing is based entirely upon the Bible. There were emphatically hospitals in the world before the Christian era, but the Founder of Christianity certainly never recommended the multiplication of them, and he did on more than one occasion command those whom he healed to tell no man, just as he commanded those who were present in the room in the case of Jairus' daughter, to leave him alone with the girl. To any one who understands what Christian Science healing aims at, the critic's idea, though perfectly natural to him, would be an impossibility.

[James Phelps in *La Crosse* (Wis.) *Chronicle*.]

Christian Science teaches implicit obedience to the commandments of Christ Jesus, the necessity of becoming as a little child; innocence, humility, and obedience; yes, more, holiness. It teaches that the Bible is the sufficient guide to eternal life, that man is absolutely dependent upon and responsible to God.

While Mrs. Eddy is recognized as the Discoverer of Christian Science and the Leader in this movement, no people on earth are more free from idol worship than are Christian Scientists, for they not only consider it wicked, but they understand the folly of it. Christian Science is indeed a religion of "love and sunshine," but it also declares the necessity of grappling with sin in ourselves and others and destroying it. We believe that the humble Nazarene asked no impossible thing when he said: "Ye shall know the truth, and the truth shall make you free."

[H. Coulson Fairchild in *Passaic* (N. J.) *News*.]

In the *Daily News* of Feb. 1 it was reported that during the after-dinner remarks at a meeting of the Presbyterian Brotherhood in this city, two visiting members of the clergy took occasion, while extolling the merits of tobacco smoking, incidentally to condemn Christian Science. Why this should have seemed necessary to the reverend gentlemen we are at a loss to determine, unless it may be that they have heard of cases in which the cigarette and other forms of tobacco habit have been permanently cured by Christian Science treatment, and in discounting the future foresee the time when it will be necessary to refrain from the weed in order to maintain the dignity of their calling.

Christian Science is sometimes criticized because it does not accord to evil the place and power which have been ascribed to it in the past. Christian Science teaches that evil is uncreated and unsustained by God; that it is therefore not entitled to place or power; the belief in the power of evil is all that seems to sustain it; when the omnipotence of God is universally acknowledged, evil will be self-destroyed. It is plain that Christian Scientists cannot consistently indulge in evil after having declared that it is unreal and delusive, for they would then be following the delusive and unreal. To bring the thing down to an illustration, we might say that the reason a man smokes tobacco is because he believes there is real pleasure in it, while the average Christian Scientist has learned that there is no real pleasure in smoking, hence does not smoke. The results in Christian Science justify the promise. A good tree brings forth good fruit. Christian Scientists are willing to stand squarely upon the platform that the use of drugs, narcotics, etc., is not in accord with the high standard of the teachings of Christ Jesus. Indeed we cannot imagine a more incongruous thing than an exemplar of Christianity with a cigar between his lips, and it is a sad commentary upon the Christian church when it is deemed necessary to endorse the use of tobacco in order to "win men to Christ." If it is thus necessary to temporize with men in order to interest them in the church organization, why not admit that the church is a social organization? Our critic says that if "tobacco is tabooed in the Christian church, such methods will not win men to Christ." How does he account for the fact that Christian Science churches reach so many men upon just the opposite platform, to wit: that, unless one by one all the false thoughts and weaknesses of men are overcome, it will be impossible for us to gain dominion over sin and disease. Men are coming to Christian Science on this proposition, and while they are not asked to abandon any habit by force of human will, many things which formerly seemed to attract lose their seeming power, as naturally as darkness gives place to light and sin to holiness.

[Charles B. Jamieson in *Portsmouth* (N. H.) *Herald*.]

From Genesis to Revelation the Scriptures characterize God (divine Mind) as the healer of "all thy diseases." The healing of all manner of diseases by Christ Jesus through spiritual means only, is a demonstration of the truth of that teaching. Christian Science, therefore, has Scriptural authority and the practical proof by Jesus that God—Spirit, Truth, Life, Love, infinite good—is the one ever-present intelligence, power, and causation, possessing all truly healing qualities.

The doctor suggests that it matters not where the faith is placed, that all healing is a matter of mental action, the result of mere blind "faith" in some person, system, or thing. Unnumbered persons who have unbounded "faith" in drugs continue to linger in sickness and disease, and then die. Their "faith" does not heal them. Neither does "faith" in the minister or the doctor alone reform the sinner or heal the sick. Many persons, however, after having such experiences, have put themselves under Christian Science treatment and have been healed: thus proving that it is better to rely upon God than upon man, upon Spirit rather than upon matter. All thinking persons now recognize the mental influence on the body. A changed mental state produces a changed bodily condition, thus proving the teaching of Christian Science that the so-called physical body is but the subjective state of human consciousness. This also emphasizes the further teaching of Christian Science that drugs possess no inherent healing properties and that the healing effect is of mental causation.

Christian Science, however, is not a "faith-cure." Faith alone is not enough. To practise Christian Science there must be a demonstrable understanding of God, Spirit, and also of His spiritual laws. The healing accomplished by Christian Science, like that accomplished by Jesus, is not the result of blind "faith" in a personal God, but of an intelligent faith, based upon the understanding of God, Spirit, and the laws of Spirit and their intelligent application to human needs and conditions. One might have "faith" in mathematics and yet be unable to solve a single problem. The understanding of mathematics, however, gives one a practical faith in mathematics. So is it with the understanding of God, as taught in Christian Science.

[George Shaw Cook in *Oak Leaves*, Oak Park, Ill.]

The report of a recent discussion by physicians, ministers, and others of "Faith-healing from a Medical Standpoint," which was published in *Oak Leaves*, contains some statements about Christian Science which I desire the privilege of correcting. Christian Science is quite different from what is ordinarily known as faith-healing and is also distinctly unlike mental suggestion. Failure to make the proper distinction between Christian Science Mind-healing and the various forms of so-called "mind-cure" is doubt-

Digitized by Google

less responsible for some of the mistaken assertions attributed to some of those who spoke on the occasion referred to above.

One speaker is reported to have declared that the "alleged cures of organic trouble" by Christian Science "are not cures, but only give the sufferer courage to ignore his trouble." That is not true of Christian Science practice. Mental suggestion, or mesmerism, may do no more than make the patient temporarily ignore pain and disease, or make him believe for the time being that he is not sick, while the operator really believes that he is so, though arguing to the contrary. That is, the operator in mesmeric treatment may try through will-power or mental suggestion to make his subject believe something which he himself does not believe. It should be readily seen that such methods cannot effect permanent cures and that they cannot and do not heal what is termed organic disease.

That Christian Science has healed many cases of so-called organic disease in what is commonly regarded as its incurable form is a matter of record. The record of these cures is made up of testimony such as is admissible in courts of law and has stood the scrutiny of those who are disposed to be skeptical. Names of reliable persons living in Chicago and elsewhere who have been thoroughly and completely healed by Christian Science of diseases which had been previously diagnosed as organic by reputable physicians, will be furnished to those who are sincerely desirous of knowing the facts. The reason why Christian Science has succeeded in many cases when other means have failed, is that the treatment in Christian Science depends upon the power of God, divine Mind, to destroy human ills according to a demonstrable law which is available to mankind in every hour of need. This law of divine intelligence, when correctly understood and faithfully applied, will cure disease in all of its forms. That Christian Scientists occasionally fail in the application of Christian Science to the healing of disease, is due mainly to the fact that they have only begun to understand the Principle thereof and to apply it correctly.

Some of the speakers on the occasion above referred to were able to recognize and were willing to acknowledge much good in Christian Science. This is cause for gratitude.

[Editorial in *Ypsilanti* (Mich.) *Daily Press.*]

Through the kindness of some friend, the editor is now receiving regularly the recently organized daily paper called *The Christian Science Monitor*. At a recent meeting of the Woman's Press Club at the Waldorf-Astoria hotel in New York city, this rather complimentary statement was made by a woman present: "A very remarkable departure in journalism has been inaugurated in Boston within the past year. This is a newspaper which has the unique distinction of being an absolutely clean sheet, which fact strongly commends it to all persons who advocate reforms of this character. I refer to *The Christian Science Monitor*, which was given to the world by a woman—Mrs. Mary Baker Eddy."

This paper bears evidence of being backed by ample money. Its editorial page is a creditable one. There isn't a dirty advertisement in it. Typographically, it is clear and clean and pleasing. We shall watch its editorial utterances with a good deal of interest, to see whether the optimism and the speak-a-good-word idea, which seems so prominent in the creed of the Christian Science people, will prevent it from fearlessly attacking evil and fraud when cases arise which demand it.

[Howard C. Van Meter in *Portland* (Ore.) *Telegram.*]

It ought to be acknowledged that the purpose of Christian religions is to acquaint men with God as defined in the Scriptures and as exemplified in the life of the Nazarene, and with a method of salvation based upon such knowledge which will enable the individual to understand the significance of life in its true sense and express the will of God the creator. At least this is the purpose of Christian Science as understood by those whose investigation has not been prompted by a desire to discredit it because its method differs from that of other denominations.

As to whether Christian Science is "the most seductive and harmful of all substitutes for the religion of Jesus Christ," we may profitably consider briefly what Christian Science teaches concerning the Master and his idea of what his followers should do. The best evidence is the extent to which his teaching is reduced to practice and the effects made manifest in daily life. Jesus taught that his followers should in believing (understanding) him, do the works that he did; in other words, if one understood the God whom Jesus was obeying and understanding, this knowledge of Truth would accomplish for him the same results.

In maintaining a life of satisfaction, it may easily be recognized that sin, disease, and death, with their attendant misery and anguish, have no place, because their presence is not expressive of happiness and satisfaction; consequently their abolishment would bring more peace to the world and result in a manifested creation that would glorify God in its every phase. In approximating a life which is so harmonious that it gives evidence of the eternal life which Jesus spoke of as being the knowledge of God, there is required, as taught in Christian Science, the acceptance of the Bible teaching that God is the only creator; that all He made is good and is finished, that "a good tree cannot bring forth evil fruit," as Jesus emphasized; therefore that which is the manifestation of God is good and only that which is good is real, in the sense that the real expresses God, which is the purpose of creation. Mortals believe that both good and evil are real, and try vainly to reconcile themselves to a changing experience in good and evil as the evidence of God, or a belief in a power apart from God, either of which would dethrone His unchangeable nature or omnipotence.

If Christian Scientists believe that the truth may be legitimately exercised in abolishing all evil, they should have the privilege of gaining a true analysis of evil as unreal and good as real, and following this apply their knowledge of the truth of being and abide by the results.

[Written for the *Sentinel.*]

REFUGE.

MARY J. ELMENDORF.

Across the lonely moor of the sky,
Wild and bleak and pale,
When the fairy webs of frost are spun
And the autumn wind-harps ring,
The wildfowl sail,
The eager robins fly,
Going home to the south and the sun—
Going home to spring.

Over the world's Cadmean stress,
Cruel, long, and deep,
Born of the dragon-teeth of night
And the dreary, misted sod,
My longings sweep,
My thoughts, impetuous, press,
Going home to comfort and light—
Going home to God.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"AN INVASION OF PERSONAL LIBERTIES."

THE question of medical legislation in one or another of the various phases it annually assumes, is, as usual at this season, receiving the attention of the unprejudiced newspapers of the country, and we note among them an editorial in the *Toledo (O.) Times*, apropos of a bill now pending in the Ohio Legislature, which discusses the matter from the broad ground of personal rights and in a manner which must appeal to parents who have the welfare of their children at heart. The *Times* says:—

Among the many legislative measures introduced at this session of the General Assembly, it is noteworthy that several medical bills have appeared, all of them having for their avowed object the protection of the health of the people. Without in the least desiring to disparage the profession as a whole, it would seem that some of these bills deserve rather careful scrutiny and analysis with a view to discovering their real purpose.

House Bill 408, which has been referred to the committee on common schools, is a measure which should be examined carefully by all vigilant citizens. It is entitled "A bill relating to the health of school children." It provides for the compulsory examination of all school children by an officially appointed school physician. That there is much and varied opposition to this measure, from all classes, is already apparent. At a recent public hearing before the Hamilton county delegation, at Cincinnati, Dr. C. A. L. Reed, one of the best known surgeons in Ohio, opposed the bill as it now stands, on the ground that it was an invasion of personal liberties. In this opinion, most parents will concur, and the general belief is that House Bill 408 is entirely unnecessary and dangerous. No parent would relish the idea of having the health board, or the school board, or the teacher dictate the school of medicine under which their children must be treated, or the particular physician who should administer the prescribed remedies of that school. . . . Aside from providing new offices for physicians, there is little in this bill which cannot be carried out under the law as it now exists. . . .

To subject sensitive children to a more or less public examination by alien physicians, who do not know the child's history or environment and of whom the child may naturally be afraid; to make the disabilities and ailments of school children a matter of public knowledge and discussion, will be resisted and objected to by all parents and will not find favor with the humane and enlightened educators of the young.

The pertinent fact remains that there is no public clamor for more rigid examination of school children. The parents of the state are not asking for such a law; school teachers and school boards are not urging its passage. House Bill 408 did not originate with the people. It does not represent the will of the voters. It originated with the state board of health, and even those who are not inclined to be cynical will suspect that the bill will be of no real advantage to any one but the few physicians who would receive appointments under the act.

The *Times* has tersely stated the fact about this proposed law by saying that it "did not originate with the people." None of the proposed laws by which medical control of the people is sought originate with the people, and this fact is becoming more and more apparent each year. It is time for the best men of the medical profession to call a halt, if they wish to spare themselves the general discredit which is being brought upon the entire profession by these attempts to invade personal rights. The *San Francisco Argonaut* summarizes this danger in a very few words, namely, "Medical legislators will have no one but themselves to blame if they find a wave of public sentiment running strongly against them, and such a sentiment will react against the whole profession."

ARCHIBALD MCLELLAN.

THE LAW OF INCREASE.

IN any catalogue of the known obstacles to spiritual progress contentment-without-increase would certainly find place well toward the head of the list. Its significance as a deterrent lies in the subtlety of its deceptiveness, in the fact that it rejoices in those achievements of good which it is trying to induce one to think he is not worthy of or is not able to make his own.

The development of the buds, the appearance of the leaves, the opening of the flowers, the ripening of the fruit,—all these may delight the senses; but it is apparent that they are only incidentals, only the preparatory antecedents of enlargement and multiplication. This association of life with growth is universal, and it is upon the lawfulness and legitimacy of this expectation of gain that the parable of the talents is based. The servant who was content with the preservation of his one talent of capital, and neglected to add thereto, is named as not only "slothful" but "wicked," and despite his affected humility and high regard for his lord, he is cast "into outer darkness" as a penalty for his offense.

When one thinks of the problem of the world's redemption in the light of the naturalness and necessity of this law of increase, he can but realize how the course of human history would have been changed if the healing truth which Christ Jesus committed to men, and which he evidently expected them speedily to make effective among "all nations," had been permitted, through the succeeding centuries, to "run, and be glorified," in individual growth. If Christian believers, following the example of the early disciples, had gone on to attain, as St. Paul hoped and prayed they might, "unto the measure of the stature of the fulness of Christ," this world would have long since been redeemed. The vast majority of Christian people are not only untroubled by the mediocrity and inadequacy of their spiritual attainments, but they deny even the possibility of measuring up to the efficiency of the early disciples; and as for going beyond them in spiritual apprehension and power,—for one to suggest such a thing would be to find himself classified with the "abnormally pious." It is into this realm of conventional indifference to the demands of religious duty that the word of Truth, spoken again in Christian Science, has come as a great "disturber of the peace," and to many its offense is altogether unpardonable.

Coming nearer home, one can but wonder what would have been accomplished in Christian Science if the lives of all its exponents had been characterized by that "divine discontent" which quickened those who "through faith subdued kingdoms, wrought righteousness," "out of weakness were made strong," and "turned to flight the armies of the aliens, . . . that they might obtain a better resurrection." It is very comforting to human sense to be carried, very convenient to have some one else work out one's individual or home problems, very easy to fall into the habit of dependence upon tried friends rather than upon Truth, and it is thus that our helps become our hindrances; but to every Christian Scientist comes the awakening word today, "Growth is the eternal mandate of Mind" (Science and Health, p. 520). They that are "at ease in Zion," that are content to live on without sensible increase of power to overcome sin and sickness, are rebuked and put to shame even by the alertness and energy of commercial impulse and scientific quest; they are rebuked by the pitiful cry of the sick and suffering in all the world; they are rebuked by the remembrance of the unfailing faith and daring devotion of her who, alone with her God and her impelling conviction of human privilege in Christ, struggled on, and on, until her bleeding feet entered the paths of peace; and they are rebuked above all by those pungent but pleading words of the Master, "O faithless and perverse generation, how long shall I be with you, and suffer you?"

JOHN B. WILLIS.

MAN A SPIRITUAL BEING.

THERE are many who criticize what they mistakenly suppose to be the teachings of Christian Science, because they have never thought of man as a spiritual being. They are accustomed to think of themselves and others as material (so far as all practical considerations go) and governed by material law, but with some chance of becoming spiritual after death. If such were really the case, these critics would undoubtedly have some grounds for their opposition to Christian Science. If it could be shown that man is material rather than spiritual, it would be logical to insist upon the use of material remedies for the cure of sickness; but before settling this question, it becomes necessary to ask what God is and what is man's relation to Him—assuming, of course, that the existence of God is admitted. This is surely a vital consideration, since Jesus said that to know God is "life eternal,"—life now and forever.

Christian Science begins its beneficent healing and redemptive work from the understanding that if man is the image and likeness of God, who is Spirit, his needs must be met spiritually,—a fact which is wholly ignored in all the medical systems. Christ Jesus surely had this in view when he counseled people to "take no thought" for the body, and when he, consistently therewith, healed "all manner of sickness and all manner of disease" without recourse to material means. That he did this by his recognition of man's spiritual, deathless nature, is implied by his entire teaching, from which a few words may be quoted. He said, "Labor not for the meat which perisheth, but for that meat which endureth unto everlasting life. . . . As the living Father hath sent me, and I live by the Father: so he that eateth me, even he shall live by me."

Christian Science shows that the spiritual man is neither sick nor sinful, and the bringing of this eternal fact to human consciousness has resulted in the most remarkable healing of disease that humanity has experienced since the days of Christ Jesus. Mrs. Eddy's teachings have enabled unnumbered thousands to lay hold upon the Master's words, and to prove that "they are spirit, and they are life,"—even as he said. If they are, will they not give life to any one who so accepts them, even though he were doomed to die, according to medical opinion?

A Western paper has published some very silly verses setting forth the startling statement that many children are allowed to die for want of medical treatment, but the writer has not even a single case with which to support his argument. A physician once attempted to comfort a mother whose child had died under his treatment by telling her that three hundred children had died during the week in the city where they lived, and where Christian Science was then unknown, but where there were thousands of physicians. The mother said that if hers had been the only loss she could have borne it better. It was the tragedy of the three hundred cases which made the sorrow greater, for God certainly never intends any of His children to suffer, sin, and die, and the mortal blindness to His outstretched hand is the sorrowful thing. What would be thought if a demand were made that statistics giving the results of all the different healing methods should be published monthly throughout the entire country, that all might be able to judge of them, not by blind prejudice, but "by their fruits," in accordance with the rule laid down by Christ Jesus? The results of such investigation would certainly be surprising to our critics.

When man is known as a spiritual being, it is seen that neither sickness nor sin is any part of him, and the true basis of Christian Science is recognized. When this is seen, all sincere thinkers will be glad to know and apply the truth of being, which brings blessings unspeakable to all mankind.

ANNIE M. KNOTT

LETTERS TO OUR LEADER.

Springfield, Mo., March 21, 1910.

Dear Leader:—I want to thank you today for the amendment to the by-law, "Church Organizations Ample." Only last week, when studying the Manual, I paused at this by-law and wondered why it was worded as it was; but instantly I knew that if the times demanded a change it would be made. Imagine my uplifted thought when today, with the new *Sentinel*, the change came. It was another proof to me that there is but one Mind, and that one able to supply all our need. I do not think as some of our critics declare, that you help God. Divine Principle needs no help; but I do know, dear Leader, that you help us.

The greatest blessing that has ever come into my life is Christian Science; it has made me a Christian.

Humbly I thank you for it,

MANA WILLIS FISHER.

Cranford, N. J., March 21, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—All earnest Christian Science workers will thank you for the amended by-law on "Church Organizations Ample." Busying one's self with the petty foibles of material organizations is apt to lead to one's being "cumbered about much serving:" whereas, following in the path of the wiser Mary may still be heard the Master's comment: Thou hast chosen the "one thing" needful. Our church organization is certainly the "one thing" needful; and let no Christian Scientist think that he has not ample work to do therein, for he has employment already in cleaning his own window-pane that he may reflect more light.

Respectfully,

CARL H. PIERCE.

Chicago, Ill., March 16, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—Gratitude for your wise leadership prompts us to venture upon a moment of your time, that your joy may be increased by the knowledge of another achievement in our beloved Cause. Seventh Church of Christ, Scientist, of Chicago writes to announce the dedication of its edifice on Sunday, March 27, 1910,—the third anniversary of the inauguration of its services. The dedication of the edifice at this time has been made possible by the unity of purpose and combined effort of the nine churches in the city. The other eight churches have supplied a little more than half of the amount necessary to erect the building.

Seventh Church was organized in conformity with the history of church extension in this city, it being an outgrowth from Second Church, formed to further the Cause of Christian Science by relieving the crowded condition of this church, and by establishing another church in a more remote district. In the three years of its existence the membership of the church has doubled, the congregation has more than doubled, and the Sunday School has made equal progress. Our hearts are grateful for the opportunity of establishing one of the "systematized centers of Christian Science" which, as you state in "Miscellaneous Writings" (p. 114), "are life-giving fountains of truth . . . are prolific sources of spiritual power whose intellectual, moral, and spiritual animus is felt throughout the land."

It is with profoundest gratitude to you, dear teacher, wise Leader, that we proffer this fruitage from this part of the land, knowing that to your efforts, to your steadfast teaching and practice of the divine Principle of Christianity, is due the establishment of the church. Others have caught glimpses of the Principle, of Truth, but you only have mapped out the way for humanity, and our gratitude for your untiring patience and diligence, and for our

Digitized by Google

privilege in being followers in this true path, is beyond words to express.

Gratefully and lovingly,
Seventh Church of Christ, Scientist,
PHINEAS P. CAHANA, *Clerk.*

Cambridge, Mass., March 25, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—Enclosed are two letters which may interest you, as they express appreciation of the *Monitor* and come from the only two life-saving stations on the New Hampshire coast. I thought that the men, having so much leisure time, would read the paper and thereby be benefited, and I thank you from my heart, dear Mrs. Eddy, for making it possible for me to help these men, and many others, through the understanding of Christian Science.

I am, with gratitude and love,
Yours,
MRS. MARY L. WILLIAMS.

Rye Beach Life-Saving Station,
Rye, N. H., March 3, 1910.
Mrs. M. L. Williams, Cambridge, Mass.

Dear Madam:—Yours of the 1st instant received, and in reply am pleased to say that *The Christian Science Monitor* came promptly, and has been received regularly. It is a good paper; it touches on most all subjects, and contains all the news of the day. It is read by my crew and myself with much satisfaction. With many thanks for your kindness, I am very gratfully yours,
A. L. REMICK, *Keeper.*

Hampton Beach Station, March 7, 1910.
Mrs. M. L. Williams, Cambridge, Mass.

Dear Mrs. Williams:—Acknowledging yours of March 1, I have the pleasure to reply that the paper arrives regularly and is a daily reminder that you are one of those who have a thought of, and for, the Life-Saving Service in winter as well as in summer. The morning edition would have reached us at 9.30 A.M., but the late edition is all right, as we sometimes get it the day of issue. The crew join me in an expression of sincere thanks for your true kindness.

Respectfully,
B. F. SMART, *Keeper.*

San Bernardino, Cal., March 10, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—Today I thank you, most lovingly and earnestly, for all that Christian Science has done and is doing for me. Many times I have desired to tell you of my love and gratitude, but have hesitated to encroach upon your time, so filled with loving, unselfish work for humanity. For years, health and joy and peace did not abide with me. That they do abide with me today, I owe to you. I cannot adequately express the reverence I feel for you, for your wonderful fidelity and loving patience in marking the way so clearly to your followers, but all that I find difficulty in expressing may be summed up in this: I love you, because you have shown me how to find and love God. Your loyal follower,
MRS. MABEL P. HILL.

Rome, Ga., March 23, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—May I add just one "crumb of comfort" to your overflowing basket? I earnestly desire to thank you for the Lesson-Sermons contained in the Christian Science *Quarterly*. Their daily study proves to be stepping-stones to the recognition of man's "higher selfhood, derived from God" (Unity of Good, p. 6). In the past, ignorant of man's true relation to God, "thieves and robbers"—unrighteous thoughts—had thrown me by the wayside, where, helpless and in despair, pride, self-will, self-love had bound me; but the good Samaritan—Christian Science—found me, lifted me up, and tenderly carried me to the "inn" of safety, where angels—"God's thoughts passing to man" (Science and Health, p. 581)—are protecting, guiding, and cheering me, on my journey from wrong to right. The heretofore hidden treasures of the Bible are unfolding more and more each day, as I realize the healing consciousness, which is a law of exclusion to every thought that does not point Godward.

With tender love, I remain yours fondly,
MRS. CARRIE YOUNG.

Baltimore, Md., Feb. 14, 1910.
Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dearly Beloved Leader:—I am deeply grateful for your words entitled "Men in Our Ranks." They have set me free to be a "factor" in the multiplication of the good you have so courageously accomplished for humanity. With your example and precept to cheer me on, I can but "press toward the mark for the prize of the high calling of God in Christ Jesus," and let my works attest the sincerity of my words.

Your devoted follower,
CHARLES GAMBRILL BALDWIN.

Memphis, Tenn., Feb. 13, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader and Friend:—I feel I must tell you of the good that has come to me through Christian Science. Fourteen years ago I was healed in one treatment of an incurable disease (so called), of ten years' standing, and have been a constant student ever since. We had the Lincoln day service last night, and I thought it would give you pleasure to know that we could have a service of this kind in the Southland once your home. With a heart full of gratitude, loyalty, and obedience,
Your humble follower,
MRS. BETTIE A. STOTTS.

Payette, Idaho, Feb. 17, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—The members of First Church of Christ, Scientist, of Payette, Idaho, wish to express to you love and loyalty and heartfelt gratitude for the manifold blessings we have received through your teachings. The Cause of Christian Science is advancing here as through the understanding of the truth the sick are healed, the sinful are reformed, and the sorrowing are comforted.

In loving obedience,
First Church of Christ, Scientist, Payette, Idaho.

Herkimer, N. Y., Jan. 26, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We are rejoicing in your sublime courage in steadfastly holding aloft the banner of righteousness, justice, honesty, and pure Christianity. We are striving to bring out these ideals in our own lives; to let our light so shine before men that they may see our good works, and glorify our Father which is in heaven. In proportion as we study and obey the rules in the Manual of The Mother Church are we successful in our efforts to establish our church and to carry on its work in obedience to Christ's command. We are learning to bind up the broken-hearted, to undo the heavy burdens, to open the prisons to those who are bound; and in doing this we shall endeavor to manifest our love, our loyalty, and our gratitude to you.

Faithfully yours,
First Church of Christ, Scientist, Herkimer, N. Y.
FRANCES G. FULLER, *Clerk.*

THE LECTURES.

GRAND RAPIDS, MICH.

First Church of Christ, Scientist, gave its second lecture of the year in Powers' Theater Feb. 6, William D. McCrackan, M.A., being the speaker. He was introduced by Luman A. Field, First Reader, who said,—

In the Bible we find this statement, "Where there is no vision, the people perish." History proves that every great epoch in humanity's advancement toward a truer life has been ushered in by a "heavenly vision" given to some pure and unselfish soul. To Abraham, to Moses, and to the prophets there came visions of a life more perfect than that which the people were living. To Jesus came the "heavenly vision" that to know God and His idea is life eternal, and he proved his vision practical by healing sin, disease, and death; but in the quickly succeeding centuries, the vision was so dimmed by selfishness and fear that humanity lost sight of its promised healing, and the people perished. Now, in our own age, this "heavenly vision" has again appeared, its dawning light being first beheld by

> A flowerlike soul . . .
> A spirit foreordained to cope with wrong.

This vision of life unfettered, harmonious, and eternal, perceived and given to the world by a woman, is today finding happy realization in the beneficent activities of Christian Science, of which Mrs. Eddy is the Discoverer and Founder.

Correspondence.

DENVER, COL.

Judge Septimus J. Hanna delivered a lecture on Christian Science at First Church on the evenings of March 3 and 4. He was introduced the first evening by John M. League, and the second evening by Attorney Andrew W. Gillette, who said in part,—

This present age is often spoken of as one of gross materialism, of commercialism, as an age almost wholly given over to the worship of the god Mammon. While this characterization is still, unfortunately, altogether too true, there are to be observed hopeful indications of a reawakening and growth of interest in things spiritual. There is abroad in the land a spirit of unrest, a spirit of inquiry. Men and women are asking themselves, seriously, the questions, "What am I?" "What are my relations to the universe and to God?" There is in progress a general shaking-up of the dry bones of theological beliefs, with the result that many people are finding out that they do not really believe that which they thought they believed. There is an eager desire for a more practical, satisfying, every-day religion than the world has heretofore known. This beautiful building in which we are assembled tonight bears mute but eloquent testimony to the fact that the people who gather here from Sunday to Sunday, and on the midweek night, to worship God and to testify to the wonderful healing and transforming power of His word, have found that for which the world is seeking,—a satisfying, practical, every-day, dependable religion. This religion is known as Christian Science. It is Christian because its followers seek to obey the words and to do the works of Christ; it is scientific because it is exact,—based on Principle.

We believe that to the discovery, to the teaching, and to the daily living of Christian Science is largely to be credited the reawakened and growing interest in what St. Paul has called "the things which are not seen,"—the deep, spiritual, eternal verities of life to which I have alluded. We believe that Christian Science is the leaven which is destined eventually to leaven the whole lump.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Temple, Tex.—Clarence C. Eaton, Carnegie Library Building, April 8.
Lansing, Mich.—Judge Septimus J. Hanna, Bijou Theater, 3 p.m., April 10.
Santa Monica, Cal.—Frank H. Leonard, Church Edifice, Oregon avenue and 7th street, April 10.
Pomona, Cal.—Frank H. Leonard, Fraternal Aid Opera House, April 11.
Charlotte, Mich.—Judge Septimus J. Hanna, Church Edifice, Lovett and Washington streets, April 12.
Johnstown, N. Y.—Prof. Hermann S. Hering, Grand Opera House, April 12.
Hackensack, N. J.—Rev. William P. McKenzie, Oritani Hall, Main and Camden streets, 8:15 p.m., April 12.
Reno, Nev.—Bliss Knapp, Majestic Theater, April 14.
Jonesville, Mich.—Mrs. Sue Harper Mims, April 14.
Kalamazoo, Mich.—Judge Septimus J. Hanna, Academy of Music, April 15.
Saline, Mich.—Prof. Hermann S. Hering, Opera House, 7:30 p.m., April 15.
Goldfield, Nev.—Bliss Knapp, Exchange Theater, April 15.
Lodi, Cal.—Frank H. Leonard, Lodi Opera House, April 15.
San Rafael, Cal.—Frank H. Leonard, April 16.
Minneapolis, Minn. (Sixth Church).—Hon. Clarence A. Buskirk, Auditorium, 3:30 p.m., April 17.
Rochester, N. Y.—Francis J. Fluno, M.D., Lyceum Theater, 3 p.m., April 17.
Mt. Pleasant, Mich.—Prof. Hermann S. Hering, Opera House, 3 p.m., April 17.
San Francisco, Cal. (Third Church).—Bliss Knapp, Dreamland Pavilion, Steiner street, between Sutter and Post, 3 p.m., April 17.
Santa Cruz, Cal.—Frank H. Leonard, Knights Opera House, 3. p.m., April 17.
Watsonville, Cal.—Frank H. Leonard, I. O. O. F. Hall, April 17.
Detroit, Mich.—Judge Septimus J. Hanna, Detroit Opera House, 3 p.m., April 17; Church Edifice, Alexandrine avenue, West near Woodward, April 18.
San Jose, Cal.—Frank H. Leonard, Victory Theater, April 18.
Goshen, Ind.—Judge Septimus J. Hanna, April 19.
Placerville, Cal.—Bliss Knapp, Masonic Hall, April 19.
Salinas, Cal.—Bliss Knapp, Crystal Theater, Lincoln and Gabilan streets, April 21.
Aldershot, England.—Rev. William P. McKenzie, Theater Royal, 3 p.m., May 4.
Cambridge, England.—Rev. William P. McKenzie, Victoria Assembly Rooms, 5 p.m., May 5.
Hornsea, England.—Rev. William P. McKenzie, Public Rooms, May 6.
Harrogate, England.—Rev. William P. McKenzie, Winter Gardens, May 9.
Leeds, England.—Rev. William P. McKenzie, Albert Hall, Cookridge street, May 10.

Longing for Thee, the future unrevealed,
Have I in weakness discontent concealed?
Are there false hopes God's law hath oft repealed?

The darkening shades of sense have disappeared
In this dear moment. Doubtings that I feared
Have vanished, while a holy sense revered
Brings to my heart a quickening hope. I pray
That wisdom crown my waiting all the way.

ELIZABETH ALLEN MALLORY.

TESTIMONIES OF HEALING.

Nearly four years have passed since I was turned from being a scoffer at Christian Science to a grateful beneficiary of its healing power. While attending the Iowa state normal school I was induced by a friend to apply for a life insurance policy. A medical examination was made, in the course of which two physicians told me that I had organic heart trouble, and that I might live a year or I might live indefinitely. From a condition of average health I rapidly degenerated into a morbid, fear-filled person. Heart pains developed, and I turned away from the doctors who had frightened me and took up physical culture. I tried medicines, etc., but found no relief. Discouraged and helpless, I gave up school and returned home. I dared not tell my mother my condition, but bore my trouble alone in fear and trepidation, each death from heart disease chronicled by the newspapers bringing up terrible pictures to my troubled mind. Finally, believing a change of climate to be my only hope, I decided to leave home and go to Washington state.

But here the "miracle." While stopping in another town with a friend who was to accompany me, I was stricken acutely with the much-feared trouble. Wretched and miserable, I left the printing-office in which I was temporarily employed and went to our rooms. I made up my mind to abandon the western trip and to return home to die. On my friend's book-shelf was a worn copy of Mrs. Eddy's "Science and Health with Key to the Scriptures," a book which hitherto I had scorned to touch, but now something impelled me to take it up. Starting with the sublime words, "To those leaning on the sustaining infinite, today is big with blessings" (Pref., p. vii.), I read on and on unconsciously, until the entrance of my friend interrupted me. He asked why I was at home instead of working at the office, and I told him my supposed condition. Then the truth burst over me. My sickness was gone! Like the morning mists it had disappeared before the reading of a few chapters in that volume. My friend then told me of the healing of his sister; how she had sent him the book, but that he was unable to understand it. He advised me to continue reading.

The result was that I did not go to another climate in search of health. When I left that town I borrowed the precious book, and since that time I have grown slowly but surely in the understanding of the Life that is God and a God who is Love. The overcoming of fear was gradual but perfect, until the symptoms of the supposed disease became a rarity. My every incentive is to put off more of the old man each day, and to live nearer the spiritual ideal ever held before us by our beloved Leader, the Discoverer and Founder of Christian Science.

AVERY BROWN, Des Moines, Ia.

My experience, which to me was beautiful, dates back to Feb. 7, 1908. I was then healed of a trouble of five years' standing, a condition in which I was left when our little boy was born. At times I felt pretty well, that is, when I took the best of care of myself according to mortal sense; but six months previous to my healing, the trouble came upon me with all its force, and remedies which had helped me before were of no avail. I went to a local doctor, and he prescribed an operation as the only help. As I never had had much faith in such things, I began to ask God to show me a better way out of my distress, and He gently led me to Christian Science. I was healed in one absent treatment, which proved to me that there is no distance in Spirit, God. I had at once refreshing sleep, and the peace and love which have been mine since coming into Christian Science are indescribable. Through the study of Science and Health, with the help of a practitioner, I have been lifted above the belief in faith without works to a gospel of works by faith, and as the result of this great change, I have been strengthened physically, mentally, and spiritually. I feel that I have much cause to be thankful to God for Christian Science. I am always glad to tell others of Truth's healing power, which cures both sin and disease, and I have been able to help others with the knowledge which I have gained in Christian Science. The *Sentinel* and *Journal* are constant sources of information and spiritual supply, and mean much to us. I can truly say that this has been the happiest year of my life.

I have felt for some time that I should make a public acknowledgment of what Christian Science has done for me, though the part that I can tell is small indeed. I certainly have proved, in part at least, Jesus' statement, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." I know that Christ, Truth, heals now just as Jesus did two thousand years ago, and I am realizing that the Christ not only takes away our sins but also heals our diseases. For a while I thought that I could remain in the church to which I then belonged, but I very soon found that there was much of the service in which I could no longer join. As there is no Christian Science church here, we have services in our home. This truth absorbs more and more of my time, and I am so happy since I have given up all for it. We find that the Master's words are true: "My yoke is easy, and my burden is light;" and surely there are none who feel that their part in this glorious work is a burden. I have no words to express my gratitude for that which has been done for me, and I know I can best show my gratitude by living Christian Science.

We greatly enjoy our daily study of the Bible and Science and Health, which is certainly the "Key to the Scriptures." The Bible is a new book to me. I am striving to be obedient to its teachings as revealed in our text-book, and shall seek constantly to express that Mind which was in Christ Jesus. Every day I am proving this truth in a larger way. We gladly give up creeds and man-made doctrines, but we give up nothing of true Christianity in accepting Christian Science. My gratitude to God is very great, for the health and happiness which are now mine through Christian Science. The physical healing meant much to me, but the spiritual uplifting means much more.

MRS. G. L. MEHOLIN, Fairfax, S. D.

It is now over five years since I became interested in Christian Science, and I feel it is my duty to tell some of the benefits received from its teachings. I came to Science for physical help, as medical treatment and change of climate had failed to help me. I had suffered from severe colds and cough for a number of years. We were then living in Chicago, and as our family doctor told me that I must get out of there as soon as possible, we came west; but the change did no good. I became weaker and weaker, had a number of alarming attacks, and had given up hope when Christian Science found me. My healing was slow but sure, and today I am in the best of health. We have had many demonstrations of healing in our family. At one time my little daughter had both of her feet badly scalded. When I removed the child's stockings the appearance was alarming, but I sent immediately to a Christian Science practitioner, and help came at once. While the child's feet seemed to be in a dreadful condition, she suffered no pain, and in a short time the healing was accomplished, leaving no scar.

We are truly thankful for all that Christian Science has done for us, and we are trying to prove our thankfulness by living its teachings. I have been a member of First Church of Christ, Scientist, in Salt Lake for three years.—HARRIET C. STARR, Salt Lake City, Utah.

Digitized by Google

Christian Science was first presented to me about five years ago. At that time I was seeking health through a change of climate. Nearly all of my life I had been sick, and finally, after being thoroughly examined by a physician, the verdict was that it was only a question of time when I must succumb to disease, as my lungs were then very seriously affected.

When I began to read Science and Health, along with other Christian Science literature, and to attend the services regularly, it was with no thought of being healed, but simply to learn something of its teachings. I, however, found that I was gradually gaining strength and doing things which fear had previously prevented me from doing, such as going out in damp or cold weather and eating certain kinds of food. A year later, when I returned to my home, I was well and a very different woman from the one who had left it. Some of my friends now tell me that they never expected to see me return alive.

About two years ago I had to mortal sense a severe attack of acute lung trouble. It was the first serious illness that had appeared in our family since I had come into Christian Science, and some wanted a physician called. They thought that Science might do in "minor ailments," but feared to trust it in more serious ones; nevertheless, they consulted my wishes in the matter, and I can truthfully say that I never had a fear, though I was told afterward that most of those who saw me believed that I would pass on. Through the faithful ministry of a loving practitioner I was soon restored to health, and in humble gratitude to God, and to Mrs. Eddy, I gladly testify not only to the wonderful physical benefits which I have received in Christian Science, but to the more wonderful spiritual blessings, and my sincere desire is to live the truth.—Mrs. Fannie E. Campbell, Richmond, Va.

I was baptized in the Mississippi river when I was sixteen years of age. A few years later I went to Minneapolis and secured employment, and there I heard of Christian Science and saw some people who had been healed. I did not like the name Christian Science, as I thought it sounded cold and worldly; but I had always believed in the healing promises of the Bible, just as much as I did any other part of the good book. I thought all that prevented us from being healed as in Jesus' time was lack of faith, so I decided that Christian Scientists were people who had much faith. I went to a practitioner to be healed of deafness. I asked her many questions, but my interpretations of the Scriptures were so literal and I held so strongly for a personal devil, that she told me we must not talk much. Time went on, and one day I saw some new books lying on the table. I picked up one of them and looked at the title; it was "Science and Health with Key to the Scriptures" by Mary Baker Eddy. That was just what I had always wanted, a "key" to the Scriptures, and with a light heart I took one of the books to my home. I cannot tell where I opened it, but it was at some place where the unreality of evil—sin, sickness, and death—was made plain; that God never made evil, yet He made all that was made. Like a flash of light in a dark room the truth burst upon me. The mystery of the ages was explained. I had found the "key" to the Scriptures, I had found the true God! I cannot express the feeling of joy, peace, and happiness that came over me. I was on the mount of transfiguration; old things had passed away; all things became new. How beautiful the world and everything in it looked. I had gone to the Scientist to recover my physical hearing, and had received something an hundredfold better, viz., spiritual sight and hearing.

My heart goes out with gratitude to God for giving us Mrs. Eddy and the "key" to the Scriptures. As time passed I had to come down from the mount and make this new-old truth practical, and well do I remember my first experience. I awoke one morning with all the physical evidence of a bad cold. I arose and knelt at the bedside and tried to realize spiritual existence; then I dressed, breakfasted, and went to my work. In less than two hours the cold had all disappeared. Later on, I listened to what Mrs. Eddy calls "the incentive of a mistaken sense" (*Sentinel*, Jan. 16, 1909). People said, "If Christian Science is the truth, why don't you get your hearing?" and, "I will believe in Christian Science when you get your hearing." So I fell into the thought that I must not talk of the Science or do any work for others until I could prove it by manifesting perfect physical hearing. I sat down and waited, so to speak, and finally it was made plain to me that I was making a stumbling-block of that physical defect, for every time I overcame an ache, a pain, fatigue, or any kind of disease or discord, there was the proof of the truth of Christian Science. At school the pupils who cannot work examples in long division are kept busy at addition, subtraction, and multiplication until the way is made plain for long division; and so it is with beginners in Christian Science. We must keep active at what we do understand, then the way opens up to solve more difficult problems. May we never hesitate to give a cup of cold water in Christ's name because we have not yet overcome every physical defect. If we offer the truth with a right motive we need not fear that it will not be accepted.

Mrs. Clara M. Palmer, Red Wing, Minn.

It is several years since the enlightenment of Christian Science came to me. I did not have immediate need of physical healing but, although Christian Science has proved a great preventive of disease, I have had occasion to call upon it for cure at different times. Once, while traveling in the South, I was taken with a fever. I telegraphed to a practitioner a thousand miles away, and I was healed by absent treatment. It must have been a realization of divine sonship that did the work. Jesus came to his disciples' aid in the storm. For him to know that the Son of God was in the place where he was needed was sufficient to meet this need at that time, and Christian Science proves this today. At another time I was having trouble with my throat. I am an actor, and could with difficulty perform my task when thus afflicted. I tried to overcome the disorder myself, even staying up all one night to do so, but the demonstration seemed beyond me. I then asked a Christian Science practitioner for help, and I was quickly restored,—enabled to eat, sleep, and work.

It is a joy to testify for Christian Science, and to recognize and honor our beloved Leader, Mrs. Eddy, even in this small way.—F. C. House, New York, N. Y.

While playing with a theatrical company in New York city, I had a narrow escape from what seemed to be a perilous situation. There was hardly a moment for thought, but I felt God's nearness and do not remember having any sense of fear. A friend, who is a Christian Scientist, was in front, and she said it looked as though nothing could save me; but she closed her eyes and tried to realize the truth. In front of the footlights was a chain upheld at intervals by sharp-pointed spikes. I fell over these, and landed on my back on the footlights, breaking about nine of them. Although my dress was badly torn, I was not even scratched, with the exception of a slight mark on one ankle. It was said that women in the audience screamed, and the men in the orchestra jumped up to try and catch me, but I was held safe by infinite Love. This certainly proved that God is indeed an ever-present help.

The above is only one of many helpful experiences that I have had in Christian Science, which is teaching me the fatherhood and motherhood of God and the brotherhood of man. Our Leader has said, "If you have been

Digitized by Google

badly wronged, forgive and forget" (Miscellaneous Writings, p. 12); and this has been a great help to me and has enabled me to see more clearly that "Love is reflected in love" (Science and Health, p. 17). I feel that I can only express my gratitude to our Leader as I understand and live the teachings of Christian Science.

HELEN HOUSE, New York, N. Y.

It is with a heart full of gratitude that I write the following testimony. Our home is in Evanston, Wyo., some seventy-six miles from Ogden, Utah, where it was necessary to go in order to have some much dreaded dental work done. My mother accompanied me, and on arriving in Ogden the next morning we went to consult a dentist who had been recommended to me by a friend. He advised me to have all of the upper teeth extracted, as they were in such bad condition. He also said this would be quite an ordeal, and advised that I take an anesthetic, but to this I did not consent. From the dentist's office we went to see a Christian Science practitioner, and at one o'clock she accompanied us to the dentist's and treated me during the extracting of the teeth. Seventeen teeth were extracted in a very short time, with little or no pain, and after leaving the office we went direct to a place where I partook of some ice cream. We then boarded a street-car and took a ride to various places, going to different stores to do some shopping. I ate a hearty supper, and next morning went home. After the dentist had gotten through with the extracting of the teeth, he said he was surprised to see how well I had stood it—that it was a miracle. Within three months I went to Ogden and got the plate. The dentist said he had never seen gums healed so perfectly. I then had two other teeth extracted and two filled, the practitioner treating me at the time. Since then I have been in sound health.

My mother and I have known of Christian Science for several years, and I owe a great deal of gratitude for all that it has done for me and the members of our family at various times.—PEARL NELSON ESBENSON, Evanston, Wyo.

I wish to relate how Christian Science helped me. I had rheumatism for ten years, and while living in Salt Lake City was confined to my bed with a severe attack, suffering intense pain, and weak from loss of appetite and sleep. The lady with whom I was boarding at the time had been cured by Christian Science, and she advised me to try it. I said I had suffered for ten years and had tried everything, receiving only temporary help at times, and I did not think that Christian Science could help me; but the lady insisted that it could, so I consented. A practitioner came, and found me greatly discouraged, sick in mind and body. She tried to cheer me up, telling me that God would help me, and said I should read the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy. She then treated me and I was healed in one week. That same winter I had a bad attack of lung trouble. I called in this practitioner again, and was healed in a short time. How thankful I am that the disease has never returned.

Since this experience I have relied entirely on Christian Science, and I find that God does help us in every trouble. While out in a mining district in Nevada, I was the only woman in camp, devoid of every comfort and exposed to extreme heat, which caused me to get very depressed. Then I would take refuge in the Science literature, and I found it such a comfort; indeed, I do not know what I would have done without my books. I feel deeply grateful to Mrs. Eddy for this healing truth which she has brought to the world, and I am glad to give my testimony to help some one else.

MRS. ADELAIDE H. EDMUNDS, Winnemucca, Nev.

I am glad, with thousands of others, to add my testimony of what Christian Science has done for me. After having a skin disease two and three times a year for a number of years, and finally having a more serious illness with it, I called a Christian Science practitioner. In a few treatments I was fully cured, and have never had any return of it. This was two years ago. Not only was I cured of the skin disease, but of other ailments. I can daily demonstrate the truth. I am indeed thankful for what Christian Science has done for me.

MRS. DOLLIE SOUTHARD, Los Angeles, Cal.

Four years ago my little girl, then two years of age, awakened in the night with a severe cold. In the morning she seemed much worse, but I decided to go to my mother's as planned, so took an early train and reached there about ten in the forenoon. A Christian Science practitioner was called at once, and by the time she arrived the case seemed to be acute lung trouble with a great deal of suffering. After the first treatment, and before the practitioner left, the child was relieved of all suffering and wanted to get up and play. With two more treatments she was entirely healed. Since that time I have studied Christian Science, and many are the blessings I have received. I am indeed thankful to God, and also wish to express my gratitude to our Leader, Mrs. Eddy, for the benefit which Christian Science has been to me.

MRS. FRED RUGG, Oakland, Cal.

Some five years ago, while at work as a carpenter, in taking some measurements on a ceiling I lost my balance and fell from the trestle to the floor, injuring my right arm severely. A physician was called, who set the bones and put on a cast; but having had some experience in Christian Science, I was satisfied to trust to divine Truth for my healing. I placed myself under the care of a practitioner, and told her what I had done, which she said was all right. My arm was kept in the cast about four weeks, but when this was taken off, I could not straighten my elbow or raise my hand to my face. The doctor advised me to use weights to straighten the arm, and said if I succeeded in getting a two thirds movement it would be all I could expect. I did not value this opinion, and continued with Christian Science treatment.

During the time I was under this difficulty, in attempting to alight from a street-car I was thrown to the ground with considerable force, receiving some severe injuries. I could not raise my arm, and the pain was so severe that my case appeared very forlorn. At this time I had given up treatment with the Christian Science practitioner, as she lived in an adjoining town; but I called on one nearer home, and in a very short time was perfectly healed. At the same time the liquor and smoking habits were overcome and my general health much improved, for which I am very thankful to God, and also to Christian Science, for a better understanding of Truth.—R. B. NIXON, Oakland, Cal.

I wish to give thanks for the help I have received from Christian Science. I did not come to it for healing for myself, but since beginning to study the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, nearly two years ago, I have had many demonstrations over ordinary ailments, also over fear and worry, and on the whole have had better health. What I do feel most grateful for is the better understanding of God and His goodness, and I rejoice to know that so many people are daily proving Him to be the healer of our diseases and the giver of every good and perfect gift.

I have often thought how great a privilege it is to be able to attend the Wednesday meetings week after week, and to hear the testimonies of Christian people. As I was

Digitized by Google

coming home one Wednesday evening, feeling more than usually grateful, the thought came to me to acknowledge the blessing and give thanks openly, which I do here and now. I have never gone to the Christian Science rooms without having my faith in God strengthened and feeling more and more impressed by the beauty of right thinking and right living. It is my earnest desire to be a true-hearted Christian Scientist.

EDITH MAUDE HALEY, Bradford, England.

[Translated from the German.]

For the past eleven years I have enjoyed the rich blessings of Christian Science, and joyfully acknowledge that I could no longer live without it. Through the understanding of Christian Science, not only nervous conditions—affection of the heart and pain in the head and stomach—have been overcome, but this teaching has also given me strength and comfort in trying and mournful days, when medical skill was unable to save my husband from death.

The God whom I found in Christian Science was my strength and my intelligence when duties to which I was unaccustomed suddenly devolved upon me. At first I thought that I must accept or even seek the advice of experienced and distinguished men, but as this had seldom proved the right thing for me, indeed at times had led to complications, I turned straight to God. My heavenly adviser has enlightened me at the right hour, and ofttimes solved intricate problems harmoniously. Although I experienced in my business the so-called hard times, I remained calm; I had the richest and most faithful Father standing by me. His goodness has been new every morning. I delight in translating the text-book for myself, and in finding those treasures, those high thoughts which make all Scientists so happy.

For all these blessings I thank God, and our revered Leader, with all my heart.

FRAU EMMY RICHTER, Dresden, Germany.

I was led into Christian Science about two years ago for physical reasons, thinking I could make use of it as I would any other remedy, and then drop it. Little did I know at that time of the spiritual unfoldment contained in this study, but to me this has been a beautiful revelation. I commenced my study for the express purpose of overcoming a chronic ailment of long duration, not giving any thought to my eyes, which had troubled me for ten years past because of an organic difficulty, according to specialists in this line. I had worn glasses for about ten years, and could not go without them at all without severe headaches, and I had been told a few months previous to reading Science and Health that my eyes could never be any better, and that I would be obliged to get stronger lenses soon, and probably continue to do so. I had been deeply absorbed in reading Science and Health for about five weeks, —I read nothing else, in fact,—when it seemed that the voice of Truth told me to take off my glasses. I did so, and read for about fifteen minutes; but the old fear crept in, and I put them on again, thinking I could not possibly read without them. I, however, experienced no bad effects from going without them, so I again removed them, and have not had them on since.

At that time the study of Christian Science was so new to me, and the workings of Truth so little comprehended, that I could scarcely realize that my eyes had been actually healed simply by reading Science and Health. This beautiful demonstration showed me that Truth acts without the human will, and when we concentrate our attention on some ailment and set up an anxious thought, it merely gives us some work to do. To worry and think of any difficulty retards the action of Truth in our consciousness. Mrs. Eddy says on page 381 of Science and Health: "Think less of the enactments of mortal mind, and you will sooner grasp man's God-given dominion." I was, indeed, very grateful for the healing of my eyes, and I have given them much harder use since going without my glasses than I did for several years previous.

Like other young Scientists, I was confronted with many problems, after I had read and studied long enough to know that it takes time to overcome and have a general uprooting of mortal belief, where the tenacity of error seems very real at times; but by an almost constant realization of man's oneness with divine Principle, the Truth which never fails, that which seems true to the senses fades away as mere illusion. I have tested this in more than one instance, and have found that our spiritual supply is equal to all demands; that the demand on our part is not always sufficient for the need, but we ask for more as our understanding grows. The study of Christian Science has had many attractive features for me. I was a student of so-called mental science a few years previous to taking up Christian Science, but its teachings had long failed to satisfy a spiritual craving for something which I did not attain. Christian Science is a practical religion, and I now understand God better. The exposition of the Bible gained through the daily study of the Lessons proves that we have a religion for every hour and every day of the year, to use in business, home, and church, a Principle to be applied to error of every description.

I gratefully acknowledge the spiritual development and physical help gained through this study, and I earnestly desire to be governed more and more by Principle. The seeming slowness in reaching entire freedom is an incentive for pushing on—a departure from the discordant. To see the wonderful works which some students, advanced in understanding, are carrying on, giving their whole time and thought to helping others to gain this knowledge, and the numbers who are turning to Christian Science for physical and mental help, shows what a power this truth has become. I have been very thankful for help given by those who have fitted themselves for this work, and for the very practical articles contained in our periodicals; but we would not have these practitioners and literature had it not been for Mrs. Eddy, who brought to us this truth and to whom untold gratitude is due.

IDA BOGARDUS ZUFELT, Sheboygan, Wis.

[Written for the *Sentinel*.]

THE LOYAL FRIEND.

ADA J. MILLER.

To whom does thought first turn in pain or joy?
Who whispers words of cheer when winds blow cold
And all the house is cheerless, for the glow
Of Truth and Love is shadowed dark by fear?
To whom turn we when loneliness would claim
The hours and make the plaint of joyless work?
'Tis then we test our Friend and ever find
Him steadfast, firm, and loyal to heart's core.
'Tis then we learn that One, and One alone,
Meets human need. Christ's living words of power
Again bid tempests cease and, as of yore,
The storm dies down,—at his command there's peace.
Then all the world of consciousness is filled
With glow of light, with joy's tranquillity.
We need no other friend. The mortal sense
Of friendship proved but rope of sand when we
Placed there our trust, and sought its aid to reach
The rock when thought was tempest-tossed.
But friend indeed is Truth, the risen Christ,
And strong his hand to lead us to the heights
Whereon alone we find repose—and peace.

FROM OUR EXCHANGES.

[Rev. R. J. Campbell in *Christian Commonwealth.*]

In all of you this war between flesh and spirit, between the world and God, goes on unceasingly. You are all stretched upon your crosses, and all of you have cried out against the fate that condemned you thereto; all of you have prayed to be spared the bitter cup. All of you have at times been tempted to avoid it by deserting your indwelling Lord, which means betraying your own spirit. All of you have at some time or other gone bravely to your Calvary, a Calvary you could easily have escaped if you had been willing to stifle the divine voice and choose the baser part. Perhaps you cannot even now tell why you accepted suffering and loss rather than compromise with the particular evil that for the moment had power to hurt; but the only reason is that the Christ in you was strong enough to say no to the tempter and take the consequences.

[*Christian Work and Evangelist.*]

The orthodox believer to whom Jesus is far removed from unredeemed humanity, still believes Christ is imitable because he imparts to the believer that grace and power which makes it possible to live a redeemed life after the pattern of his own holiness. On the other hand, the liberal believer, who thinks that the divinity in Jesus is his own achievement as a man, in his close walk with God, believes his character capable of emulation because as a man he could be divine, thus opening the road of divinity to other men. So here again practically all good men agree—that some approximation of his character is possible to all men.

[*New-Church Messenger.*]

That the second coming of the Lord is not his coming in person to the earth, but the revelation of spiritual truth, and that he has made his second coming, is not generally conceded; nevertheless, the unconscious power of that truth is such as to remove the former doctrines and cause many not only to believe in an unending increase in truth and love, but also to work with the conviction that the veritable kingdom of heaven can be established in the souls of men while they are yet upon the earth.

[*Congregationalist and Christian World.*]

Fellowship among the churches is as important a part of its program as the individual responsibility of each separate church to its Lord. The needs of today and tomorrow compel us to face the problems of living and working together. The more simply and naturally they can be solved, the better; but solved they must be, or the churches of our faith and order will tend to have a proportionately smaller and smaller share in the Christian activities of America.

[*Outlook.*]

There are women so beautiful in nature and men so noble in character that they never seem other than visitors on the earth; passing this way, deeply interested in what they see, deeply attached to those they meet, deeply engaged with the things that come to their hands, and yet always, in their interests, their friendships, and their occupations, living according to the standards of another and a higher order of existence.

[Rev. J. A. Jowett, M.A., in *British Congregationalist.*]

There is nothing fits a man for the contemplation of the great things of God like practice among the simplicities.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The movement for the transfer of water-power sites from the Government to the several states and territories has taken concrete shape in a bill introduced by Senator Smoot, which provides for the leasing of power sites by the states and does not permit their sale under any conditions. It provides for transfer to a state whenever it is shown to the satisfaction of the secretary of the interior that any tract of land is chiefly valuable as a power site. Other conditions of the bill are: That the land shall be devoted by the lessee only to the development of water-power; that the state shall reserve the right to fix charges by power companies for each ten-year period; that no monopoly shall be permitted to lessees under the law.

President Woodrow Wilson of Princeton University says: "A new day has come. Men and measures are being scrutinized as never before. For myself, I veritably believe that we are upon the eve of a new era of political liberty, when more literally and truly than ever before we can realize the ideals of popular government and of individual privilege—the dawn of an age in which the pristine vigor of America may be renewed amidst fresh achievements for humanity."

The New York Senate committee of the whole, by a vote of forty to nine, sustained the charge that Senator Allds had demanded and taken a bribe. He resigned before the voting began. The charges were brought at a meeting of seven insurgents at the Hotel Ten Eyck, in Albany, on Jan. 4, the day on which the regulars had elected Allds majority leader of the Senate and temporary president of that House.

Internal revenue officials expect the total revenue for 1910 will show an advance of thirteen million dollars over the amount estimated by Commissioner Cabell, two hundred and fifty-three million dollars, in his annual report. Customs receipts are expected to reach the estimate of three hundred and thirty-five million dollars.

President Taft, in a special message to Congress, informs that body that, under the power reposed in him by the Payne-Aldrich tariff act, negotiations under the maximum and minimum clause of the act were now substantially completed with all the nations of the world with results that were satisfactory.

Chief of Police Steward of Chicago will push his plan for municipally-owned five-cent theater. He wants the theaters in the small parks easily accessible, adults to be charged an admission fee of five cents, children under sixteen and over ten to be charged two cents, and children under ten to be charged one cent or free.

April 1 was the day upon which Pittsburg gave vent to its indignation at the grafting practices which are being revealed. A civic committee decided to make this indignation spectacular by expressing it with band music and speeches at a monster mass meeting in Exposition hall.

Recommendation for the improvement of the Connecticut river from Hartford, Conn., to Holyoke, Mass., at an estimated cost of ten hundred and fifteen thousand dollars, with ten thousand dollars annually for maintenance, has been submitted to Congress by the acting chief of engineers.

A resolution proposing an amendment to the Constitution for the election of United States senators by direct vote of the people has been reported favorably to the House by the committee on election of President, Vice-President, and representatives in Congress.

A movement looking toward the elimination of war histories as part of the public school curricula is now nation-wide, having its origin in Cook county, Illinois, when the action of a committee of the Evanston public schools was adopted by county superintendents.

One thousand corporations in existence at the time of the enactment of the new tariff law last summer failed to make returns to the internal revenue bureau under the provision imposing a tax of one per cent on their net income above five thousand dollars.

The irrigable area of the arid lands of the United States is estimated by Government experts at forty-five million acres, or more than four times the amount now irrigated.

A caucus of the Republicans of the House is to be called to arrange the program of putting through that body the Administration measures now pending in Congress.

Governor Fort of New Jersey has signed the public utilities bill, extending the power of the state railroad commission over every public utility company.

The pension bill, carrying appropriations of about one hundred and fifty-six million dollars, has passed the House.

On April 1, Weston, the pedestrian, had reached Illinois on his trip across the continent.

International.

The resolutions of Premier Asquith relative to the power of the House of Lords are generally regarded as a more extreme measure than his attitude since the opening of Parliament had led casual observers to believe the government would bring forward. By a comprehensive extension of the meaning of the term "a money bill," the House of Lords is to be disabled, according to these resolutions, from rejecting, or even amending, any bill containing any provisions dealing with any matters incidental to taxation, provision of money by Parliament in supply, control, regulation, or disposition of public funds or concerning any public loan. The adoption of the resolution, which is conceded, may precipitate another political and parliamentary crisis. The rejection of the resolution by the Lords, which is just as certain as its acceptance by the Commons, will force the Cabinet to offer its resignation.

Canada has decided to approve the waterways treaty with the United States. The treaty limits the amount of water to be taken from Niagara on the American side to twenty thousand feet per second and on the Canadian side to thirty-six thousand feet. It provides that each country shall have the right to half the water of the Milk and St. Mary's rivers crossing the line between Montana and Saskatchewan. It provides for the free use of international waters, the canals, and Lake Michigan for the vessels of both countries, and that the water of a stream crossing the international boundary cannot be diverted until sanctioned by an international permanent commission of six, for which the treaty makes provision.

A great land reclamation project which involves the diverting of the flow of the San Juan river so that it will no longer empty into the Rio Grande, at least not within seventy-five miles of its present mouth, is in a fair way to be consummated. It will irrigate several hundred thousand acres of land in Mexico.

Emperor Nicholas has issued a manifesto extending the authority of the Douma over Finland. The Russo-Finnish bill, defining the legislative boundary between the Douma and the Diet and which is to be submitted to the Douma, is assured of adoption with minor amendments.

This season's apples from Tasmania are being shipped in eighteen steamers of various lines to the United Kingdom. Some five hundred thousand cases, or one hundred and eighty thousand cases more than last season, will be shipped.

Former President Roosevelt's address before the students of the University of Egypt at Cairo has attracted considerable comment and there is a difference of opinion as to the good or evil effects of his plain speaking.

The twenty-third congress of the Institute of International Law has just met in Paris in the Sorbonne. There was a large attendance of authorities on international law from all parts of the civilized world.

Industrial and Commercial.

The Consolidated Gas Company of New York and its subsidiaries for the calendar year of 1909 earned a net income of $2,455,693 greater than the company earned in 1908 and a return of better than 6.5 per cent on the company's capital stock. When the Legislature fixed the price at eighty cents the company maintained it could not earn six per cent on its capital at the price and took the matter into court, where it lost its case.

A bill, drafted by the United States bureau of standards, has been introduced in Congress at the request of the president of the Boston Fruit and Produce Exchange, to regulate the size of baskets or other open containers for the sale of fruit and berries. The bill makes it unlawful to manufacture or sell for these purposes baskets containing less than one dry quart of 67.2 cubic inches, even full, one pint 33.6 cubic inches, one half pint 16.8 cubic inches.

Eighty-seven Montana and North Dakota business men stood in line all night to get a piece of the twenty thousand acres of land which the Northern Pacific is opening for settlement in the Yellowstone valley in eastern Montana and western North Dakota. The sale means the passing of the last great grazing land of the West. The land comprises a portion of the territory which the Northern Pacific received from the Government in the days when it was built.

Four big corporations, the United States Steel, the Pennsylvania Railroad Company, the Philadelphia and Reading Railroad Company, and the Berwind-White Mining Company on April 1 raised the wages of four hundred and fourteen thousand employees. This involves an increase annually of eighteen million three hundred thousand dollars on the payroll.

Six hundred thousand acres of land in Owyhee county, Idaho, will be reclaimed by Chicago, Pittsburg and eastern capital, the cost of the irrigation project, upon which work is to begin this spring, being estimated at twenty million dollars.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE ROUNDED IDEAL.

ARTHUR REEVES VOSBURGH.

In the eighth verse of the fourth chapter of Philippians Paul writes: "Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things." The impressiveness of this statement of the apostle is its finality and completeness. Paul writes this epistle to the Philippians from a Roman prison, near the close of his earthly career; and out of the depth and fulness of the marvelous experience that had been given him he prefaces this outline of the things that are to engage our thinking by the word "finally." Its finality rests upon the fact that our thinking first of all shall center in the things that are true; then from this center of truth the thought shall radiate out into the channels of human experience, taking in in its scope the things that are honest, just, pure, lovely, and of good report.

After a little thought it appeals to one that the things which are true include all these other things; that the one who is holding to the thought of truth must be living likewise in the thought of the things which are honest, just, and so on. Without any doubt this is the apostle's outlook, that the truth does include all these things; and the wisdom and finality of Paul's statement seem to rest in this, that he sees that Truth in itself is absolute; but that the truth in its application in human experience and its adaptation to human affairs becomes relative. So, as he recognizes and remembers that the thing which we think determines what we are, that the ideals which we hold before us are the things into which we grow, he sees that our thought must place before itself the ultimate ideal of absolute Truth. He has learned further that, in the words of our text-book, we must "emerge gently from matter into Spirit;" that we must keep before us and hold as the central fact of being the "spiritual ultimate of all things," but that we must "come naturally into Spirit through better health and morals and as the result of spiritual growth" (Science and Health, p. 485). Apparently it is to mark the elements and the qualities of thinking, to indicate the ideals of human experience which mark the way from our present human view-point to the spiritual ultimate of things, that he enjoins us to hold before us likewise the human ideals of things that are honest, just, pure, lovely, and of good report. This in its practical application will mean that in our reading we shall set before us the best in the world's thought and literature, and in our daily association shall form our friendships with those who will help us to higher ideals, or whom we can help.

That our human ideals should build upon things that are honest and just, and should be carried out in things that are pure, goes without saying. If these be the ideals that engage human thought and are worked out in human living, the problems of ethics and morals will be, and are, solved. But the finality and completeness of the Christ-ideal is more highly indicated in the fact that Paul sees that it covers something far beyond the mere demands of ethics and morality. We are likewise to hold before our thinking that which is lovely and that which is of good report. How often and how lamentably human thought in its striving after the Christ-ideal has failed in seeing this completeness and its application, the history of the Christian centuries only too plainly emphasizes. To note one instance, no sturdier stand for right ideals, no more strenuous effort to hold to the truth of Christian teaching, was ever made than that embodied in the Puritan reformation. The strength of the Puritan thought and Puritan movement was that it stood resolutely and irrevocably, at any cost and in any event, for the things that are honest, just, and pure; but this thought did not see that the Christ-ideal shall and does equally include the things that are lovely and of good report. The result was that Puritanism brought forth characters who were strong, upright, and in large measure noble and pure, but who often failed in the graces that are lovable and of good report. Paul was a Puritan, but he saw that the Christ-ideal must include them all.

Paul's writings again and again give little deft touches that show how he constantly recognized the importance of the amenities of thinking and living, the gentle nuances of thought and speech which make human life flow more smoothly. For instance, in his address on Mars Hill, Paul did not, as the Authorized Version represents him, open his address to the Athenians by bluntly accusing them of being "too superstitious." What he did do was to come tactfully into touch with them by pointing to the fact that he saw evidences all about him that they were "very religious." Then from this fact, seen in their worship of many gods, and among whom he saw an altar dedicated to the "unknown God," he declares that what to them was the "unknown God," was to him the one true God.

Again, in the epistle to the Romans he writes: "For I long to see you, that I may impart unto you some spiritual gift, to the end ye may be established." Now Paul was in such a position as a teacher and apostolic leader that he was authorized by God and man to do just this. This was what he was going to Rome for; this was that for which the Romans desired him to come. Yet Paul's splendid tact comes to him at this point, and he does not leave his statement seeming to assume a position of superiority, but that of mutual helpfulness; for he immediately says, "That is, that I may be comforted together with you by the mutual faith both of you and me." So, in this adaptation of the love and wisdom that is Christly, Paul's motto always was to become all things to all men, that he might by any means win some. This kind of adaptation, this kind of spiritual tactfulness, sees the importance in human relations of the things that are lovely, and beyond this the things that are even only of good report,—that stand, we will say, on no higher basis than that they are considered to be of "good form." All of this is indicated in Paul's outline of statement that comes to its final touch of detail in the things that are "of good report," while it finds its starting-point and foundation in the things that are honest and just.

One who has marked the progress and the unfoldment of the Christian Science movement will have been struck by the fact that it does grasp and unfold the completeness of the Christ-ideal as it is indicated in the rounded fulness of Paul's statement: that it stands for things which are honest, just, pure, is obvious. That it equally awakens in the consciousness of its follower an appreciation of the things which are lovely and of good report, is one of its most manifest features. It inspires and impels a recognition of this rounded fulness and completeness of the Christ-ideal. The one who has been so engrossed in the stern problems of society and of men that he has felt keenly the necessity of holding to things that are honest and just and pure, may have missed seeing the importance of things that are lovely and of good report. The one whose experience has led him to make of supreme importance the things that are esthetic and fine and ideal, who has emphasized matters that are lovely and of good report, may have failed utterly in recognizing the sturdier qualities that must hold and perhaps fight for things that are honest and just and pure. In each case the heavenly vision revealed in Christian Science shows that the sturdier and the finer virtues alike must all be held, that they must not be divorced. Our Leader has by precept and example shown us all the way along how the unity and completeness of all these elements that make up the ideal of rounded human experience must be followed and maintained, if we are to work out the righteousness and the beauty of holiness.

Paul's statement sets before us the guiding star of Truth. Its central light, which radiates from its five points, is indicated when he says "whatsoever things are true;" and then its gleaming light, as it radiates and flashes out into the channels of human thought and human experience, is pointed out as glowing forth in "whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report."

HAVING DONE ALL—STAND!

ALICE EDMUNDS.

In the Christian warfare in which all mankind is called upon to take part, it would seem that today, just as when St. Paul wrote to the Ephesians, the great and often the final test of individual strength of character is seen in one's ability, after "having done all, to stand." When meeting a seeming difficulty, to counteract which all measures have been taken, in so far as one understands, and yet the battle is not won, the problem seeming to remain unsolved, one may be tempted to act as a hireling of material sense, who flees when thus tempted, instead of standing firm and unmoved as a true representative of God. He may be inclined to give way to discouragement, doubt, or fear, or at least to lag behind in the race.

The late Dr. George Matheson of Edinburgh refers more than once, in his writings, to the much greater difficulty, as he deemed it, of having to "walk, and not faint," as compared to "run, and not be weary." He thought the very appearance of inaction in the first case made it a severer test of a man's faith. This is illustrated in the instance of the psalmist, who, despite the spiritual insight which convinced him of man's absolute dominion, covering all untoward conditions of mind, body, or estate, as depicted in the 23d, 37th, and 91st Psalms, etc., still in Psalm 55 despairingly writes: "Fearfulness and trembling are come upon me, and horror hath overwhelmed me. . . . Oh that I had the wings of a dove! for then would I fly away, and be at rest." His lack of courage, of faith in God, seems so complete for the time being that his one dominating wish is simply to shirk all further responsibility, and "fly away."

Though this man rose again, and undoubtedly proved his real individuality as a son of God, the very fact that such as he could fail to stand in time of tribulation should serve to show us the vital necessity of safeguarding ourselves by having on that "whole armor of God" which Paul describes in his epistle to the Ephesians. With this spiritual armor individually appropriated, we need have no fear of failure, for man's God-given ability to remain unshaken under any circumstances is already assured, and proved beyond all question in the life of Christ Jesus, our Wayshower. From the beginning to the end of his short but triumphant demonstration of the spiritual method of meeting and mastering disease, sin, and death, though tested and tempted to the utmost in every conceivable way, he unflinchingly stood until he had proved the supremacy of spiritual law. On page 275 of our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, we read: "All substance, intelligence, wisdom, being, immortality, cause, and effect belong to God;" and as it was quite evidently the incentive of this knowledge which enabled Jesus to withstand every temptation to ascribe power to material conditions, just so must it inspire us, his followers, to do likewise.

Doubtless every disciple of Christ knows how hard it is at times not to be swayed by the seeming legitimacy of material claims to power,—times when, after patient effort to overcome some discord, physical or otherwise, the "signs following" are still apparently lacking; but it is just at this point,—after making sure that all the initial steps have been taken, or in Paul's words, that one has "done all,"—that the acme of the student's spiritual strength may be shown by remaining unshaken in his faith while waiting to see God's will made manifest. It should be with no sense of uncertainty, however, that the student of Christian Science thus awaits the results of prayer, since in any case he knows God's will is always made evident in greater harmony. Furthermore, since he also knows that the ways of the Almighty are not on a par with those of mortals, being infinite alike in quality, quantity, and scope, the alert student is quite prepared to recognize the "signs," in whichever direction they may first appear, albeit entirely different to what might be expected.

We may be sure that all prayer of the quality defined by our Leader in the beginning of Science and Health is instantaneously answered, and the delay in recognizing this can generally be traced to the fact that our expectations are so limited that the all-pervading nature of the answer takes time to unfold to our sense of things. In order to realize this, we need honestly to satisfy ourselves that we want nothing less than the best; in a word, God's will, since otherwise we are liable to be disappointed or blinded into thinking our prayers unanswered. Let us, for instance, be awake enough to appreciate intelligently such "signs" from the All-wise as the lessening of fear before the annulling of its cause; or again, a broader sense of love, with its corresponding increase of forbearance toward others, sent to herald the greater physical freedom also needed.

If only we are striving for the qualities which constitute the kingdom of heaven within, the very while we are thus engaged all else "shall be added," to complete our idea of perfect bliss. As this happiness is already promised us, to the extent of unrestricted dominion over "every high thing that exalteth itself against the knowledge of God," good, then we should protect ourselves against any temptation which tends to retard our realization of it. Now one of the special forms of temptation is this, the giving way "at the eleventh hour,"—in the darkness just before the dawn,—when there is literally nothing more needed, perhaps, to prove our spiritual dominion, than the strength to "stand still, and see the salvation of the Lord."

In our every effort to remain untouched with bitterness, fear, or discouragement, when the work of overcoming through Spirit seems slow or difficult to material sense, we are not only hastening our own deliverance from all

Digitized by Google

bondage, but we thereby supply our brother man with the highest evidence of our conviction in the ultimate and unswerving triumph of good. Indeed, we could not intelligently, calmly, and firmly "stand still," unless buoyed by this hope.

BREAKING THE BREAD OF LIFE.

MAURICE SAUNDERSON.

For many years the writer had the desire not only to be a better man himself, but to be able to help his fellow-creatures in some measure to escape from the sin and wretchedness which enveloped them. Today his heart is full of gratitude for the understanding of divine Love which has come to his consciousness through Mrs. Eddy's wonderful revelation to the world, with its healing and regenerating power for his own needs, and which has also disclosed to him the means to carry out in some degree the command: "Go ye therefore into the highways, and as many as ye shall find, bid to the marriage."

This joyous work of bidding the poor and hungry to the feast is undertaken by a small committee of the Christian Science church in Manchester, England, by visiting and by distributing literature to the working classes in that great, gloomy, and unlovely city. The writer counts his work as a member of this committee a privilege and a happiness that it would be difficult to overestimate, for almost daily it is to see the Christ opening prison doors and making straight the paths. The many public libraries and reading-rooms are provided with Christian Science literature, but the thresholds of these institutions are seldom or never crossed by the vast majority of the dwellers in the narrow, squalid streets, the toiling thousands who so sorely need something of the joy that is real and the love that can save.

Though not infrequently greeted with reserve and suspicion on his first visit, the visitor as he goes from door to door generally finds his gift of a pamphlet or the *Sentinel* gladly accepted, and when he can accompany it with an account of those experiences of his own which constrain him to carry the good tidings to others, he is almost sure to arouse a hope in his hearer that will ensure his literature being carefully read. Subsequent visits lead to inquiries and conversations, and the earnest ones are directed to the reading-rooms or to libraries where the text-book may be borrowed and in other ways they may be helped to start on their passage from sense to Soul. How often does the visitor hear the welcome words, "This is just what I have been looking for!" And what greater reward than this could there be? The people of this class work from early morning to night; they have no opportunity of coming in touch with Christian Science unless it is taken to them. The same almost may be said of those in business in this great commercial center: their homes are comfortable, but they have little leisure, and the drudgery and monotony of their lives make them indeed ready for the transforming light of Christian Science. These north-country people are serious-minded and studious, and ready in most instances to give thought to any subject which promises to add to their mental or moral enlightenment.

One of the most encouraging signs in the development of this field of work is the demonstration of the divine guidance which comes with the closer consecration to the work. The visitor finds that more and more is he being directed to those homes where there is a present need, rather than to those where it is more remote, and he learns to regard his district as his vineyard, which needs not only labor but wisdom and love as well. Almost invariably does he find that where an acquaintance with Christian Science is claimed, the conception of its teaching is sadly distorted, or that wrong impressions in regard to our Leader are entertained. Cases are encountered when a bedridden sufferer has heard of Christian Science and has gone so far as to procure the text-book. Failing, however, to understand its teachings at once, he has laid it aside under the impression, which he communicates to his neighbors, that he has "tried Christian Science." For these a few helping words of explanation will often clear away the obscuring cloud, and allow an honest study of the text-book to be entered upon. Numbers believe Christian Science to be spiritualism, or they have some other erroneous concept sufficient to deter them effectually from taking the first step toward making an investigation. These mistakes are ill weeds not difficult for the worker in the vineyard to destroy.

Instances occur frequently of literature left by the Christian Scientist being sent on to friends and relatives, who, as a result, become regular attendants at a Christian Science church. Literature left at public houses, restaurants, and barbers' saloons invariably finds readers, who often carry it off to their homes. The seed thus sown may not all fall upon good ground, but that some of it does is quite certain. The members of the committee undertaking this distribution and visiting work meet together regularly, and they are daily gaining a fuller understanding of the sacred duty of missionary work, a deeper wisdom in its performance, and a higher happiness in its growing fruitage.

THE LAST ENEMY OVERCOME.

COUNTESS FANNY VON MOLTKE.

The Bible tells us that "the last enemy that shall be destroyed is death." What, then, can we do to overcome this enemy? This seems to be a task too great to begin with, and yet it has to be undertaken, and there must be a way to complete it. This way is pointed out very clearly in John's Gospel, where Christ Jesus says, in speaking to the Jews: "Verily, verily, I say unto you, If a man keep my saying, he shall never see death;" and again, "I seek not mine own glory." These are the conditions which make it possible for us to overcome "the last enemy," or death. We have to "keep" the saying of our Master, and not seek our own glory.

In regard to these words of Jesus, our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, says: "That statement is not confined to spiritual life, but includes all the phenomena of existence. Jesus demonstrated this, healing the dying and raising the dead. Mortal mind must part with error, must put off itself with its deeds, and immortal manhood, the Christ ideal, will appear. Faith should enlarge its borders and strengthen its base by resting upon Spirit instead of matter. When man gives up his belief in death, he will advance more rapidly toward God, Life, and Love" (p. 429).

How can it be more clearly pointed out, than in these statements, what we have to do to conquer death? But do we follow these precepts? Do we not say that this great proof of Life eternal will be demonstrated in times to come, by generations yet unborn? Do we not cling to the thought that our generation has still to go through death, that for us it is impossible to overcome this enemy? Why is this? Is it not because we seek our own glory more than the glory of our Father in heaven? Do we look to Life, Truth, and Love alone? Are we happy in working only for the great Cause of Christian Science, or is there a seeking to bring out personality, a longing for place and power? Cannot each one of us to whom the words of our Master are illumined by the glorious teachings of Christian Science do more than we are doing in striving to overcome evil, hate, envy, jealousy, misunderstandings, etc., and in doing so shall we not then come nearer to the time when the last enemy shall be destroyed? This belief that the time for this demonstration has not yet

Digitized by Google

come is no help to us; nay, it is a hindrance. Let us know, every day, that in reality there is no death.

Our revered Leader, in the *Sentinel* of Sept. 4, 1909, encourages us to press on to the full recognition of deathless being. In her wonderfully graphic way, she says that "a suppositional gust of evil in this evil world is the dark hour before the dawn." If the dawn is coming, the day with its effulgence of light is not far off. Hence, as Paul says, "it is high time to awake out of sleep: for now is our salvation nearer than when we believed. The night is far spent, the day is at hand: let us therefore cast off the works of darkness, and let us put on the armor of light." We should begin now to deny the thought of death and declare that "Life is deathless" (Science and Health, p. 487), leaving it to Love to appoint the hour in which this demonstration of Truth and Life will be complete, and spiritualization of thought will exclude death.

The persistent declaration of the ever-presence of the divine Life will enable us to make the lesser demonstrations more quickly and thoroughly. We must get rid of error and cling closely to Truth. In doing so we do our duty, and thus we shall not only help ourselves, but the whole world will be benefited. We shall also help those who, standing at exposed posts, have to meet more than do we the attacks of error, ignorance, malice, etc. Last but not least, in working patiently along these lines, we are working together with our beloved Leader and relieving her of some of the work which she is daily doing for our benefit as well as for that of the whole world. Let us follow her as closely as she follows Christ, and we shall reap the harvest of eternal life sooner than we think. Then the words of the psalmist will come true, that we "shall not die, but live, and declare the works of the Lord."

FORGIVENESS.

HELEN E. FOWLER.

A BEAUTIFUL lesson was taught me lately, showing me something of the deep significance of the teaching of Jesus in the following words: "Forgive us our debts, as we forgive our debtors." The forgiveness we all long for is described by our Leader in the following words: "The destruction of sin is the divine method of pardon. . . . Being destroyed, sin needs no other form of forgiveness" (Science and Health, p. 339). Here is a forgiveness so thorough that the scarlet hue of mortal sin vanishes before it into nothingness, leaving the whole being clothed in the whiteness of innocence, and the consciousness, new-born of Spirit, that man is indeed that child of the Father whose angel thoughts forever behold the face of the Father.

Love's forgiveness cannot do less than make whole, since God is "of purer eyes than to behold evil, and canst not look on iniquity." If this be true of God, it follows that man, the expression of His thought, must also have an equally pure outlook. For us to forgive, then, it is also necessary for us to know that the real man has never needed our forgiveness, has never been less than the outspoken thought of Love. The proof of our own pardon lies in the clearness of our vision of man as the only begotten Son of God, the spiritual idea to be understood and loved. Nothing less than this will suffice to protect us from the danger of presuming to criticize or condemn. Love cannot recognize anything but love; therefore, whenever we believe in a want of entire love in our brother, it behooves us to seek speedily our own pardon in this respect.

Mrs. Eddy has set us a glorious example, and our gratitude goes out to her whose demonstration of Love's forgiveness is removing "the covering" which has so long hidden the real man's beauty and symmetry from our vision.

THOUGHT PICTURES.

CARL E. HERRING.

A LITTLE girl who had been watching her mother make pencil sketches, finally said, "Mama, I know what drawing is." Her mother asked, "What is it, dear?" The child replied, "It's just thinking, and then making marks around the think."

Ever since the dawn of civilization history has recorded over and over again the efforts of the human race to learn how to make "marks around the think." Beginning almost before recorded history, we find the effort took the form of human sacrifices, and from this we pass from one weary stage to another, down to the present time. The Nazarene Prophet was so little understood that a whole race of theologians arose who filled thousands of volumes with printed matter, not one line of which presented man as made perfect, but all seemed intent upon putting in his hand of flesh a pencil with which to make marks upon the sand. This was succeeded by a still more material development, in the way of scientific investigation into the laws of being; the true concept was pushed still farther back on the shelf, with the result that the theologians and scientists, ancient medieval, and modern, have brought such confusion, in trying to teach us how to make marks around our "think," that our vision has become obscured.

It remained for one to outline for us the Christ-idea, "undivorced from truth, uncontaminated and unfettered by human hypotheses" (Explanatory Note, *Quarterly*). Mrs. Eddy says that "thought is borrowed from a higher source than matter" (Science and Health, p. 267), and what are all our prayers and supplications, our vain efforts to define the Godhead, our study of nature to find the law of Spirit, but an effort to drag thought from its pinnacle into the dust. Thought neither came from dust nor can it be portrayed in dust.

God, Spirit, Mind, creates the true idea, which is revealed in Christian Science, and we owe it to our Leader that we can recognize this idea and cease forever the dwarfing process of attempting to make "marks around the think."

[Written for the *Sentinel*.]

JESUS—CHRIST.

LAURA GERAHTY.

O MASTER, thou with the patient eyes
And the brow that bore and strove;
With the voice that ne'er a word conveyed
But was born of infinite Love;
Men say, as they pass on their way today,
Bending low 'neath the weight of care,
Could they touch thy hem that their silent grief
Would melt in the saintly air.
'Neath the fearsome depths of an angry sea,
'Midst the clouds of a storm-swept sky,
On the arid plains of discontent,
Or the sands where vultures cry,
In the chamber of sin with its casement barred
As close as the prison's gate—
Could they hear thy voice, then each thought would melt
That was born of fear or hate.

. . . . . .

Ah, radiant Christ, the Christ of God,
Great Truth that cannot fail,
The Life that reigns with strength supreme
Though a human heart may quail!
We can see thee now, through the mists and rain,
With a glimpse of immortal sight;
And we clasp thee close, and bathe our eyes
In the floods of Truth's great light.

SELECTED ARTICLES.

[From an editorial in *Montgomery* (Ala.) *Times*.]

It is very much the fashion among the less broad and tolerant of the theologians and many of their followers,—those who take especial pride in vaunting their strict orthodoxy,—to criticize in most unfriendly terms the followers of Mrs. Eddy, the author of "Science and Health with Key to the Scriptures" and the Founder of this new form of faith. They have been charged with an attempt to upset belief, with fanaticism, even with immorality; but no one who has come in contact with these people will admit the truth of such a charge. Their lives, so far as we have observed, are simple, sincere, and inspiring. The requirements, however, for a full embracement of Christian Science appear exacting; for they cover the actual relinquishment of sin and vice and an absolute demonstration that this has been undertaken in all sincerity by the neophyte.

We can say, with perfect truth, that the limited number of persons coming under our individual observation who have embraced this faith, have been improved morally and physically, and since the only sane way to judge of a planting is by the fruits produced, it is quite impossible to join with those who denounce Christian Science, Christian Scientists, and more particularly Mrs. Eddy, who has undoubtedly been hounded in no small measure both by those in search of newspaper sensationalism and those who have wished to discredit her manner, her ways, and the effects of her teaching.

To one who has observed the trend of events and the development of the world's religious thought, there can be no question but that the twentieth century will be marked by a deep study of the spiritual side of nature. Materialism is being found more and more incompatible with the teachings of Jesus. In every Christian church this new awakening may be seen. The past quarter century has produced a new process of thought which cannot be controlled, for it is grasping after an understanding of the eternal verities, the things not seen with mortal eyes but whispered by the still, small voice that dwells within the conscience, the deeper and holier recesses of men. And is it not safe to say that much which is now regarded as extreme, to a point that touches the impossible in Christian Science, is destined in another quarter century to be better understood, better loved, and more fully adopted by the Christian bodies of the world?

[Algernon Hervey-Bathurst in *Hampshire Observer*, Winchester, Eng.]

It is now generally understood that Christian Science is based entirely on the teaching of the Scriptures. Indeed, Mrs. Eddy has said on page 110 of Science and Health, in referring to her discovery of Christian Science, "The Bible was my only text-book;" and there are many thousands who declare today that the Bible was to them a sealed book until they commenced to study it in the light of Christian Science. From cover to cover of the Christian Science text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy declares the impossibility of practising Christian Science except through implicit obedience to the teachings and commands of the great Master. There could be no sounder teaching than this.

With regard to the teachings being "unscientific." One of the definitions of "science" given by Webster is "knowledge classified and made available in work, life, or the search for truth." Christ Jesus taught no mere theory; he proved that his teachings were scientific, demonstrable, and that those who understood his teachings would do the works he did. He said further that a tree is known by its fruits, or in the words of St. James, "Faith without works is dead." Now, Christian Science declares that those teachings and that standard are as practical and essential today as they were nearly two thousand years ago, and it is because Christian Scientists are striving to obey these commands that they are enabled to free themselves and others from the bondage of sin and the misery of sickness. For some three hundred years after the ascension it is known that the healing of sickness continued to be just as essential a part of the Christian religion as preaching the gospel; but gradually the command became divided, with the result that to clergymen is left the duty of fulfilling the first part, while doctors and hospitals are expected to comply with the latter portion of the command, which was never meant to be and never should have been divided.

The great proof of the truth of the teachings of Christian Science is the fruits by which it is known. The thousands who today subscribe to these teachings have a practical and tangible reason for doing so, for they have found in Christian Science what other systems have failed to give them. Meanwhile the Christian Science movement goes on quietly and unostentatiously, relieving mankind from burdens they should never have borne, healing the sick, reforming the sinner, comforting the sorrowing, because it is based on absolute Truth. "By their fruits ye shall know them."

[George Shaw Cook in *Quincy* (Ill.) *Herald*.]

Christian Science does not help those who are in prison because of having violated the laws of the state, to "imagine" that they are free and thus make them happy, any more than it helps those who are in bondage to physical illness because of violation of health laws to "imagine" that they are well. Mrs. Eddy has said on page 5 of the Christian Science text-book, "Sorrow for wrong-doing is but one step toward reform and the very easiest step. The next and great step required by wisdom is the test of our sincerity,—namely, reformation." On page 22 she says: "Justice requires reformation of the sinner. Mercy cancels the debt only when justice approves;" and on page 11 she further says, "A magistrate sometimes remits the penalty, but this may be no moral benefit to the criminal, and at best, it only saves the criminal from one form of punishment. . . . Mere legal pardon (and there is no other, for divine Principle never pardons our sins or mistakes till they are corrected) leaves the offender free to repeat the offense, if indeed, he has not already suffered sufficiently from vice to make him turn from it with loathing."

The foregoing brief quotations will be sufficient, I believe, to show that in Christian Science teaching there is nothing to justify a criminal either inside or outside prison walls to imagine that he could be free from the consequences of his crime until, through repentance and reformation, compliance with the law, and exemplary conduct, he had demonstrated his right to freedom. Thus it will be seen that the statement concerning the men in the Canon City prison, that they had "joined it [Christian Science] for the reason that they wanted to get out of jail, and the only way to do so without serving time is to lay hold on the implement with which they claim they can loosen steel bars and beat down prison walls—faith," is absurd. Even if the prison doors were opened to them, they would not, if they had been truly converted to Christian Science, wish to be released until they were legally entitled to their freedom. Christian Science would have made them the more willing to "serve their time" and to atone in the manner prescribed by law for their violation of the law. Even when unjustly imprisoned, Paul and Silas refused their freedom until the authorities who had wrongfully imprisoned them came and released them.

Christian Science, when correctly understood and applied, makes better citizens of those who are its students. The tendency of Christian Scientists as a class is to be law-abiding and considerate of the rights of others. Christian Science has in many instances completely reformed and regenerated inveterate criminals and hardened sinners, making of them good and useful members of society.

[John L. Rendall in *Cedar Rapids* (Ia.) *Republican.*]

It is true that Christian Science promises health, harmony, peace, and a reasonable amount of prosperity. It is also true that the Bible makes the same promises to all who "trust in God." Christian Science simply emphasizes the plain teachings of Scripture. The psalmist stated: "The Lord is my shepherd; I shall not want;" and again, "They shall be abundantly satisfied with the fatness of thy house; and thou shalt make them drink of the river of thy pleasures." In Proverbs we read: "The fear of the Lord tendeth to life: and he that hath it shall abide satisfied; he shall not be visited with evil." And again: "By humility and the fear of the Lord are riches, and honor, and life." The prophet Isaiah stated: "And the Lord shall guide thee continually, and satisfy thy soul in drought, and make fat thy bones: and thou shalt be like a watered garden, and like a spring of water, whose waters fail not." Jesus taught: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." The Bible from beginning to end is full of promises of health, strength, peace, and prosperity to "them that believe." Jesus' practical example, and that also of his immediate followers, was one of healing the sick and the sinner through their understanding of the ever-availability and all-sufficiency of the infinite power of God. It is the effort of every intelligent individual to attain the most complete, satisfactory, and harmonious conditions possible, physically, mentally, morally, spiritually.

The Christian religion teaches that these are to be found in the "kingdom of God," and Jesus taught, "The kingdom of God is within you." It therefore stands to reason that a religion which minimizes fear, which displaces discord, doubt, discouragement, which implants hope, faith, and confidence in God, which brings to the individual the consciousness of God's ever-presence and power, that which insistently and consistently attributes all power to God, must be and is a desirable possession. Christian Science is this sort of religion. It is intensely practical in all the "good things" our critic has stated that it promises, and moreover it fulfils its promises. That which produces better conditions spiritually must of necessity result in better conditions in every respect. It is therefore not to be wondered at that intelligent people everywhere are finding within the range of Christian Science that for which a weary, storm-tossed humanity has earnestly longed, because it is meeting the practical need of mankind for a satisfactory and adequate religion.

[James D. Sherwood in *Marshall* (Tex.) *Messenger.*]

A Christian Scientist does not ignore the claims of pain and disease, but he knows they are not a part of God's creation, which was finished and pronounced very good. He does not ignore disease, but he heals it in like manner as did Christ Jesus, and thus he relegates it to its proper rank of unreality, as that which is opposed to the realities of Spirit. A Christian Scientist recognizes the divine Mind as the only creator. He understands that right thinking and pure living externalize as health; and, per contra, that wrong thinking and impure living ultimate in disease and disaster. Thus it is that Christian Science in healing the sick first casts out evil thinking, evil desires, evil motives, and evil practices, and purifies thought, makes good active, and brings to pass the normal consequence: health (wholeness). The process is Christian and the means are purely spiritual, the way our Master taught and practised and left as a heritage to all who follow him in truth and in deed.

Our critic makes lengthy mention of Job, and says, "Had he but had a Science teacher his darkness would have all been light." In the book of Job we read that Job declared, "Ye are all physicians of no value. O that ye would altogether hold your peace! and it should be your wisdom." In another place we observe that Job had a clear conviction of mental causation, for he declared, "The thing which I greatly feared is come upon me, and that which I was afraid of is come unto me."

The claim our critic makes, that the Christian Scientists do not reverence the Bible, is as unjust as it is misleading, for it is well known to all who attend services in churches of this denomination that the Holy Bible is read by one appointed for that special purpose; and that during the week Christian Scientists everywhere have been making a study of the Bible passages that have direct reference to the Lesson-Sermon for the coming Sabbath. Christian Scientists, more than any other class of individuals on earth, make a daily and constant study of the Scriptures. Mrs. Eddy, the Discoverer and Founder of Christian Science, tells us that the Bible was her only guide and help when seeking an understanding of the lost art of Christian healing. She confined herself to the study of the sacred writings, and when the discovery was finally made, she made complete proof through demonstration before publishing her work, "Science and Health with Key to the Scriptures," the text-book of Christian Science which is healing thousands by its clear revelation of the omnipresence and omnipotence of God, who made man in His own image and likeness.

[Nellie M. Johnson in *Omaha* (Neb.) *World-Herald.*]

The mission of Christian Science is the establishment of God's kingdom on earth, and it seeks to accomplish its purpose by eradicating sin from men and inculcating the love of good in their affections. Its practice—eschewing all methods of human control, including telepathy and suggestion—relies solely upon the operation of God's law, which deals primarily with causation. Be it manifested as sickness or sorrow, poverty or pests, the cause of all human discord is sin, and the remedy in every instance lies in the overcoming of sin.

The novice in Christian Science may at times give undue prominence to insignificant detail, may try to eliminate effect without uprooting the cause. The wise student, perceiving the scope of his work, as a rule rids his house of vermin by ordinary methods, and devotes his energy to extirpating from his thought hate, envy, malice, revenge, and kindred evils.

[W. E. Fell in *Bradford* (Eng.) *Telegraph.*]

I have studied Christian Science in America, and it was there that I became absolutely convinced of the magnitude of the truth that had been revealed to the world, and of the selfless fortitude of the lady to whom it was revealed, and through whose tireless energy and faithful devotion to Truth hundreds of thousands today, who have been healed of all manner of diseases, sins, and mental deformities, are calling blessed, and striving to show their gratitude in the only way acceptable to her, by closely following in the footsteps of the Master.

Many hard and wholly false things have been said about Mrs. Eddy, but there is one rock of defense they cannot storm and that is her justification—the countless numbers of sinners and sufferers who through her teaching have turned to Christ and found him to be a Saviour in the fullest sense, a Saviour from sickness as well as sin. Let us all strive for a wider outlook and a larger charity.

[Frederick Dixon in *Bedford* (Eng.) *Circular.*]

For forty years, in a storm of slander, of obloquy, and of malice, Mrs. Eddy has stood pointing humanity steadfastly and courageously to the practical application of that knowledge of Truth which Christ Jesus had bestowed on it. The night of that watch is far spent, and one of the signs of the dawn is the increasing disgust excited by the violence with which she has been assailed in the past. In the noble

Digitized by Google

concluding words of the preface to her book, "Science and Health with Key to the Scriptures," "In the spirit of Christ's charity,—as one who 'hopeth all things, endureth all things,' and is joyful to bear consolation to the sorrowing and healing to the sick,"—she has committed "these pages to honest seekers for Truth." And in the ranks of the ever-increasing army of Christian Scientists she sees the answer to her devotion to her work.

[Charles M. Shaw in *Rochdale* (Eng.) *Observer*.]

The statement made by the reviewer of Dr. Horton's book, that Christian Science is regarded by many people on this side of the Atlantic as "a money-making swindle at the expense of ignorant and superstitious piety," is of course incorrect. But the remark is based upon such palpable ignorance of the subject, and is so like the attitude held by the present writer—along with many others now connected with the movement—when he first heard of Christian Science, that he can regard it without resentment. Nevertheless, it is due to the public that those who occupy chairs of criticism should speak with the authority of correct information.

That Christian Science is not a money-making swindle is evidenced, for one thing, by the fact that many of those engaged in the work have given up more remunerative posts in order to do it. Again, Christian Science has something to give mankind which cannot be obtained in other ways. There are scores of people in this district who have been healed by means of it when medical skill was baffled, as can easily be verified by any honest investigator. Professor James, in his notable book on "The Varieties of Religious Experience," says, "The plain fact remains that the spread of the movement has been due to practical fruits."

In the last three years Christian Science churches and societies have increased in number by thirty per cent, and contain among their members judges, lawyers, professors, authors, doctors, clergymen, teachers, and merchants. Your reviewer must have a singular knowledge of human nature if he imagines that in these days and among such people Christian Science would flourish if it were characterized by anything in the nature of a swindle.

[Lloyd B. Coate in *Dayton* (O.) *Herald*.]

Truth is eternal, and has always existed as one with the Father, for God is Truth. Abraham healed the sick through purely spiritual means, the prophets healed the sick through spiritual means, and Jesus the Christ and his disciples healed the sick through spiritual means,—an understanding of the power of God, Spirit. Christian Science is based upon the lives of the prophets and apostles, Jesus Christ being the chief corner-stone.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*.

Falmouth, Norway, and St. Paul streets, Boston, Mass.

AMONG THE CHURCHES.

ST. LOUIS, MO.

Second Church of Christ, Scientist, of St. Louis, Mo., laid the corner-stone of their new edifice, located at Washington boulevard and Washington way, this morning (March 7). The first service in the new edifice is scheduled for the first of May in what will be the future Sunday School room, and the completion of the main auditorium will proceed as quickly as possible. The edifice will be one of the handsomest in the city.—*Correspondence*.

BAKERSFIELD, CAL.

The Christian Scientists will soon begin the erection of a church edifice on their property at the southwest corner of Seventeenth and G streets. The preliminary drawings have been accepted, and as soon as detailed plans and specifications can be prepared the contract will be let for the building, which will be of frame construction and of neat design, with a seating capacity of two hundred and fifty. The structure is designed to accommodate the needs of the church temporarily, and a more commodious structure will be erected at some future period.—*Echo*.

IOLA, KAN.

The members of First Church of Christ, Scientist, are now occupying their new church at the corner of East and Sycamore streets. The new church building was remodeled from a house known for many years as the Allison residence, and during the past few months it has undergone extensive repairs to render it suitable for a church. The auditorium is tastefully decorated in green and white, equipped with opera chairs to seat one hundred and seventy-five, and is to be lighted with electricity. A reading-room adjoins the main room. The church will observe the custom of deferring the dedication until the building debt is canceled. The church was granted a charter in 1901, but previous to this time has occupied rented quarters at various places in this city.—*Daily Register*.

[Written for the *Sentinel*.]

TIME AND ETERNITY.

STELLA E. SAXTON.

Out of the darkness flames the light—
  A lark takes wing.
The sunset—soon a nightingale
  Begins to sing
Its joy unto the evening star.
  Then dark awane,
The soft faint whisperings of morn —
  'Tis dawn again.

And mortal life is but a thread
  Of gossamer,
On which are strung these passing days.
  So frail they are,
That though the beads be jet or pearls,
  It counts not much,
They crumble each and fall away
  At time's quick touch.

"Without beginning, without end,"
  O God, Thy years!
No stricken days, no broken threads,
  No bitter tears!
The Sun of Righteousness shines forth.
  Look up and see!
Earth's blight is not, and dawns for man
  Eternity!

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"FEAR NOT."

In reading the testimonies of healing received at this office for publication, the editors have been greatly impressed with a feeling that, next to the spiritual uplift which the study and practice of Christian Science have given the writers of these testimonies, the most important thing is that a great weight of fear has been lifted from their shoulders and they realize that they are indeed free. The healing of these persons has been not simply the cure of some disease, but, much more than this, the banishment of a fear which had been not only a part of the ills of which they had been healed, but also a factor in all their business, social, and religious activities.

Probably no one who has experienced this healing in Christian Science can look back upon his former experience without wondering how he could have been held in such utter bondage to a nameless fear, or how he could have given such implicit allegiance to something of which he was not conscious. How many of these people would have admitted in the old days that they were lacking in either moral or physical courage, or that they were ignorant of that truth of which Jesus said, "Ye shall know the truth, and the truth shall make you free"? Almost every one will agree, as a general proposition, that ignorance and fear are copartners, and many will go farther and agree —still as a general proposition—that ignorance is the cause of fear; but never since the days of our Master, until the revelation of Christian Science through the inspired thought of Mrs. Eddy, has the knowing of the truth made men truly free.

The truth which Jesus said should give freedom in this way, was the truth about God and man,—that God is omnipotent, omniscient, and omnipresent; that He is not the author of evil, therefore evil does not possess either power or entity; also that man is made in the image and likeness of God, therefore man can be subject only to that which is good, for we read in the first chapter of Genesis that God declared His creation to be good, and in this account of the spiritual creation we find neither fear nor sin mentioned, but only that which is "good" and "very good."

This truth has been reiterated and reemphasized by Mrs. Eddy in Christian Science, and it is the knowing of this truth which has freed from bondage those who have found it, just as our great Master declared that it should. His reassuring promise, "Fear not, little flock; for it is your Father's good pleasure to give you the kingdom," is just as true here and now as it was when it fell from his lips by the shores of Galilee nineteen hundred years ago; and that mankind is learning how to "fear not," is quite evident from the testimonies to which we refer. Mrs. Eddy has emphasized this in the chapter "Christian Science Practice," in Science and Health, and especially on page 442 in the words, "Christian Scientists, be a law to yourselves that mental malpractice cannot harm you either when asleep or when awake."

ARCHIBALD MCLELLAN.

CLEANNESS.

At the present time as never before, the most strenuous efforts are being made not merely to lessen disease and vice, but to annihilate them, and for this evidence of human progress Christian Scientists rejoice, even though the methods employed may not be those which they consider the best. While they are at least heartily in sympathy with every honest and unselfish endeavor to cleanse our cities morally and physically, they know that more than outward cleanliness is needed in order to overcome disease in any true sense and to establish a health that is worth while. Jesus admitted that the Pharisees of his time obeyed rigidly the Mosaic law relative to outward cleanliness, but he said of them, "Your inward part is full of ravening and wickedness." (Luke says that they had criticized Jesus because he had not "washed before dinner," and this was part of his comment.)

All through the Old Testament we find many references to ceremonial purification, much of which was undoubtedly symbolic of the true purification that establishes health, wholeness, or holiness. The psalmist tells us that the one who shall stand in the "holy place" is "he that hath clean hands, and a pure heart;" and Christian Science is daily demonstrating the fact that such an one is safe from all evil,—"from the snare of the fowler, and from the noisome pestilence."

One of the most impressive pictures in Revelation is that of the "great multitude, which no man could number," of those who had "washed their robes, and made them white in the blood of the Lamb." These had not always been pure, but the greatest of all changes had come to them, whereby material sense with its impurity was given up for spiritual sense with its purity, its peace, and its joy, recalling to us Paul's words, "The life which I now live in the flesh I live by the faith of the Son of God." Mrs. Eddy tells us that "we need a clean body and a clean mind," and she adds that "the pure and exalting influence of the divine Mind on the body is requisite" (Science and Health, p. 383). All who respond to this influence will strive after absolute purity within and without, and their lives will be a ceaseless demand for clean homes, clean morals, clean politics, clean literature, and above all, clean men and women.

The Revelator tells us that the great multitude of the redeemed whom he saw in spiritual vision reached their spotless purity by "the blood of the Lamb." In another place he says that they overcame "the accuser" by the same means. It has long been held that to accept on faith the blood of Christ Jesus was sufficient to ensure one's salvation, but the demand of Christian Science is for the proof offered in Revelation, the Christ purity which characterized the victors. In the Scriptures blood clearly symbolizes life, and in Science and Health we are shown that the one necessity is to "partake of that divine Life" (p. 25). If we are awakened to the divine Life, then it must inspire our every thought, word, and deed, making all pure and healthful.

Jesus said to his disciples, "Now ye are clean through the word which I have spoken unto you." John, who records these words, also tells us of the "pure river of water of life, clear as crystal, proceeding out of the throne of God and of the Lamb;" and then he tells of its influence in "the healing of the nations." The healing and the cleansing are one process. It remains with us to choose whether we shall cling to materiality, or give up pride and human opinion at the demand of Truth, as did Naaman of old, and plunge into the cleansing waters. We are told that when he did this, his flesh became like that of "a little child, and he was clean." This same privilege awaits today all who will accept it.

"MUCH ADO ABOUT NOTHING."

NOT infrequently would-be clever critics take occasion to make Christian Scientists the butt of raillery, if not ridicule, by an apparently legitimate inquiry as to why they should put forth such earnest effort to overcome sin and sickness, if it be true that these things are mere "old wives' fables." "Why not snap one's fingers, so to speak," say they, "and realize the goneness of such foolish fallacies at once?" If Christian Scientists always have the grace and wisdom to make no retort to such sallies, they do well. Usually this is distinctly the best course to pursue, and yet at the right time, and to those who will hear, they have somewhat to say.

Every worthy citizen is interested in the general educational system of his country. It may represent a vast organization, and involve the expenditure of an enormous sum, but usually this money is far more willingly contributed than that for any other communal undertaking. And what is the purpose and end of this huge enterprise? Simply the removal of some form of ignorance, which, as all will allow, is in itself mere nothingness. The displacement of a wrong sense, or no sense, by a right sense, is the sum total accomplished, or to be accomplished, by "all this ado," and yet no one thinks of ridiculing the effort as foolish.

Of all the world's teachers Christ Jesus has been denominated the greatest, and the educational work he inaugurated differs from that of other teachers, only as spirituality differs from mere intellectuality. The redemption of humanity means advance in knowledge, the banishment of the nothingness of stupidity and false belief, through the establishment of the rule of the right idea, the somethingness of Truth. So long as falsity is believed to be true, so long will it be potential upon the plane of human sense, though absolute nothingness in itself, and the "ado" which Christian Scientists are making over it, is the "ado" of every professor and teacher in the world, and that over the same thing; for, while ignorance exists with respect to many different things, its nothingness presents no varieties whatever.

The school-teacher knows that if falsity is left undisturbed, not only thought, but conduct and action, together with all the results of earthly living, will be determined by it; so that the welfare not only of the individual but of a family, a community,—yes, a nation,—may depend upon the leading into light of a stupid schoolboy. The teacher knows, too, that the ignorance which does not wish to be informed is the most difficult to dispel, and in these respects the parallelism between his work and that of the Christian Scientist is manifest. The latter is the most important, because it has to do all the time with character. The unlettered may live happy and useful lives despite their ignorance, but the unspiritual are, and must remain, without God and without hope, even in this world. Moreover, the unspiritual cling to evil's falsity as the source of their satisfaction; hence the necessity of having to do with the nature of evil, and of proving its nothingness as an asserted somewhat which, though highly exalted in human belief, is absolutely without Principle, place, or power.

All this explains that "much ado about nothing" which eventuates, through the appearing of truth, in mankind's escape from the tragedies of false sense. It is the universal assent to evil's claim that it is something, which renders it seemingly necessary for Christian Scientists to have so much to do with it as a falsity. Says our Leader, "Where the spirit of God is, . . . evil becomes nothing" (Science and Health, p. 480); and Christian Scientists are seeking to demonstrate this vital truth here and now, as the one "work" which will effectively rebuke the world's criticism and dispel the world's fear.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

New Rochelle, N. Y., March 22, 1910.

Beloved Leader:—The enclosed letter from my father arrived this morning, and I hasten to carry out his wish for me to forward it to you, as he did not have your mail address. I trust his loving thought may add to the joy of your busy life. Many times my gratitude goes out to God for your glorious messages which heal and uplift mankind. I hope to prove my faithfulness to you by doing each day better healing work and living what you have taught me in your writings. I am daily more grateful for your wisdom in establishing class instruction. The world is hungry for the food of Truth. I am beginning to see more clearly the many opportunities you give us to gain a better knowledge of Christian Science, which establishes the kingdom of heaven within.

Your loving follower,

MRS. ELIZABETH H. MCQUEEN.

Ocean Grove, N. J., March 22, 1910.

Dear Mrs. Eddy:—I think you will be somewhat astonished when you receive this note from me. I am a Methodist Episcopal minister. I have been preaching the glorious gospel of the Lord Jesus Christ for sixty years. During the last holidays I was visiting my daughter, Mrs. M. G. McQueen, living at New Rochelle, N. Y. There I found a book written by Sibyl Wilbur, "The Life of Mary Baker Eddy." I read this history of your life-work carefully, from beginning to end, with much interest and profit. After I had read the history, I told my daughter that you were a remarkable woman. In all your life-experience I found that you did not return evil for evil; but endured all that was said against you with a loving and sweet spirit. No criticism seemed to disturb your restful spirit. I thought you must have the same mind that was in Christ Jesus the Lord. I now congratulate you on the manifestation of that lovely sweet spirit as shown in your life-experience. God bless you, and give you many years yet to live and do good.

Yours in Christian love,

B. C. LIPPINCOTT.

Toledo, O., Feb. 25, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Beloved Leader:—Section 15 of Article VIII. of the Manual of The Mother Church was long a puzzle to me. One day a great light came, and with the light such an awakening as I have seldom experienced, this awakening bringing a deeper and truer sense of love and gratitude for your far-seeing wisdom. The light has continued to shine, to grow brighter, each day bringing out from dark and hidden places unsuspected things and arousing me with its sparkling clearness as I have not been aroused before. I realize that, even with this light, I see but dimly, but I know my vision will be enlarged as I gain the strength and wisdom requisite for a larger view.

This experience has proved to me so positively your wise, able, and loving guidance, has shown so conclusively divine inspiration, and has brought so clearly a new and larger understanding of the scope of the weapons for our warfare which you have so patiently, lovingly, and perfectly forged for us, that my heart goes out in more and greater devotion and loyalty to you, dear Leader, in proportion as my sense of Love is enlarged and I am able to catch fleeting glimpses of what you have so clearly seen and then so bravely and fearlessly given us.

Very lovingly,

PAUL ARTHUR HARSCH.

Digitized by Google

London, England, March 16, 1910.

Dearest Leader:—At a recent meeting of the members of First Church of Christ, Scientist, in London, at which we made a spontaneous collection of funds to offer to the Publishing Society at Boston, it came to me very forcibly what *The Christian Science Monitor* will one day mean to the world, in both hemispheres. The wisdom which has provided this newspaper as a vehicle for the unbiased presentation of facts, will more and more appear. In time it will be the one periodical in which men can find "the truth, the whole truth, and nothing but the truth," totally uncolored by greed, self-interest, sex-antagonism, and the mesmerism of the fast loosening grasp of creeds. Wrongs will be righted; justice will be done; wilful mistakes set right, and things reported as they are without prejudice.

We have many good newspapers in this country, but they all, more or less, bear the impress of bias, of human opinion, and of the theology which is unconsciously injected into all opinion. At some not far distant date I look to see *The Christian Science Monitor*—in Europe as in America—inaugurating great reforms. It will force the press to follow suit in honest method, and in the rightful representation of things, whether of public or private concern. We look foward, in this country, with hope and confidence, and in the assurance of a great development of good. And we bless God daily, hourly, for our Leader, and for the wisdom with which He has endowed her for the doing of His work.

Your devoted follower,

ALICE ARCHER HOUBLON.

(The Lady Alice Archer Houblon.)

[Telegram.] Rockford, Ill.

Mrs. Mary Baker Eddy.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Rockford, Ill., voted unanimously, at a special meeting held recently, to send you a message of love and gratitude for your God-inspired wisdom in giving to the world "Science and Health with Key to the Scriptures," which heals and purifies, and which has enabled us to open our beautiful new church edifice to the public, Sunday, April 3, 1910. Lovingly,

First Church of Christ, Scientist,
MARTHA E. KENNEDY, Clerk.

Malden, Mass., March 23, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Malden, Mass., in special meeting assembled, send to you, our divinely directed Leader and teacher, a message of gratitude for your exemplification of the words of our text-book, "Truth is revealed. It needs only to be practised" (Science and Health, p. 174). Under your leadership, we are rejoicing in the unfoldment of God's kingdom on earth. May the same patience, devotion, and unselfed love which has characterized your demonstration of Principle, be so practised by us, both individually and collectively, that we may be accounted a fruitful branch of the "living vine;" even one of those of whom Jesus spake: "Herein is my Father glorified, that ye bear much fruit; so shall ye be my disciples."

Lovingly,

First Church of Christ, Scientist, Malden, Mass.
BESSIE D. CHASE, R. CLINTON LOVELAND,
C. LILLIAN BEMIS, *Committee.*

Toronto, Can., March 25, 1910.

Beloved Leader:—Nearly twenty years ago Christian Science was brought to my notice by my brother, who had been healed by it after other remedies had failed. When my brother advised me to take up Christian Science, he very kindly gave me a copy each of Science and Health, "Retrospection and Introspection," and "Unity of Good," and the reading and study of these books worked such a transformation, mental, moral, and physical, that the desire for worldly associations decreased until finally I withdrew from them, including the masonic order, also the church of which I was then a member. This step was attended with much opposition on the part of some of my friends, and regrets from others who believed I had taken a wrong course; but I had found the truth, and despite their protests and entreaties to return I steadily and persistently pressed on, increasing in strength and usefulness, finding better opportunities for doing them good,—enriching myself and others.

Since that time the Church of Christ, Scientist, and its activities have engaged my attention and met all needs, both social and spiritual; and now, when the amended by-law in regard to organizations comes, I find myself ready and bid it a hearty welcome, for it shuts the door on error and opens it to Truth and wipes all tears away. The by-law in its present form is timely, and will accomplish much good.

Faithfully and lovingly yours,

WILLIAM BRUNDRETT.

San Francisco, Cal., March 23, 1910.

Beloved Mrs. Eddy:—May I tell you something that seemed so good to me. Last Sunday evening, after service, I was introduced to a gentleman who had been coming only a short time to our church. On inquiring how he came to be interested in our church services, he said that he had been receiving some of the Christian Science literature from our distribution committee regularly, for some time, at his place of business, and that he wanted to come to our church, and see what these faithful people were doing. He owns a large barber shop in our city, and our literature is placed on his reading-tables for his customers to read. I have greatly rejoiced over this little expression of appreciation of our faithful workers in the distribution work. So many are being reached in this way, since the literature is placed only where it is lovingly and acceptably received. Later, the gentleman referred to telephoned to ask where he could obtain the text-book and other literature necessary to begin the study of Christian Science, as he needed it in his home for a sick wife and daughter.

I cannot express how grateful I am for all our literature. Thank you, dear Leader. Lovingly,

MRS. M. C. BREYMAN.

Creston, Ia., Feb. 14, 1910.

Dearly Beloved Leader:—Your article in the *Sentinel* of the 12th inst., "Men in Our Ranks," has helped me to decide to take an important step. You have proved to be such a wise and loving Leader that I am assured that following your counsel will be fraught with victory. I also am glad to thank you, from a deeper sense of gratitude than words can express, that through your teaching I have been able to demonstrate, in some measure, that our God is "Lord of lords, and King of kings."

Your loving follower,

G. J. FERGUSON.

THE MANUAL.

The 86th edition of The Mother Church Manual, containing all of the recent changes, has been issued and is now on sale.

Subsequent editions of the Manual will be issued when new by-laws are made or when important changes are made in by-laws already in effect; and due notice of each new edition will appear in the *Sentinel.*

Address all orders to Allison V. Stewart, Publisher, Falmouth and St. Paul streets, Boston.

THE LECTURES.

YOUNGSTOWN, O.

Introducing William D. McCrackan, M.A., of Boston, who spoke on Christian Science Thursday night [Feb. 10], First Reader Harry K. Filler said in part,—

You have all experienced the satisfaction gained from learning the truth about the alphabet and the multiplication table. You learned the letters and numbers first, then you learned that by properly placing them you were able to read, write, count, and work numerous examples in arithmetic. Proportionately as you have held to the fundamentals upon which the alphabet and numbers are based, you have been enabled to arrive at a knowledge of things as you know them today. Only the truth about things ever brings real satisfaction; and I state unhesitatingly that all mankind everywhere are looking for satisfaction, are seeking for the truth of things. All truth must necessarily be based on Principle, and to get a knowledge of this Principle is to gain a working understanding of the truth, for anything to be true must be provable. Christian Science does teach the truth about God and His creation, and does in countless ways prove God to be a very present help in time of trouble. You may all, if you will, prove this to be true, as you have been able to prove the alphabet or numbers to be true. The thing required in this, as in mathematics, is a willingness to be taught. Desire the truth of it, and you will get it.

Youngstown Vindicator.

SPRINGVILLE, N. Y.

A lecture, outlining faithfully the benefits and work of the Christian Science church, was delivered Sunday, Feb. 20, at Godard Hall to a large and appreciative audience by the Rev. Arthur R. Vosburgh of Rochester, N. Y. The speaker was introduced by Ira W. Smith, a prominent attorney of Erie county, N. Y., who said in part,—

We have been called together this afternoon to listen to a discourse on the subject of Christian Science. I, like many others here today, have never embraced this form of religion and healing. During the past six months I have been brought in close touch with its workings, and I would not be true to myself and to the advocates of Christian Science if I did not emphatically state that I have seen uncertainty, sorrow, depression, and sickness give way to certainty, joy, happiness, and health.

I am very much impressed with the rapid growth of this institution, also with the character of the people who embrace its calling. I can remember when, only a few years ago, it was the subject of severe criticism and ridicule; but these have gradually faded away and faith has taken their place. Today its followers are numbered by thousands and tens of thousands, and it is not the ignorant and unintelligent who flock to its standard, but the educated and refined. The thinking people of the day are embracing this beautiful truth, and I say God speed it. We cannot hear too much of these things, and I take great pleasure in introducing the speaker of the afternoon.

Springville News.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

San Pedro, Cal.—Frank H. Leonard, The Auditorium, April 12.

Fostoria, O.—Mrs. Sue Harper Mims, Andes Opera House, April 12.

San Antonio, Tex.—Clarence C. Eaton, Grand Opera House, April 14.

La Porte, Ind.—Francis J. Fluno, M.D., Hall's Theater, April 14.

Jackson, Mich.—Prof Hermann S. Hering, Athenaeum, April 14.

Jonesville, Mich.—Mrs. Sue Harper Mims, Theater, 8:15 p.m., April 14.

Champaign, Ill. (Society).—Clarence C. Eaton, Walker Opera House, 3 p.m., April 17.

Geneva, N. Y.—William D. McCrackan, M.A., Smith Opera House, 3 p.m., April 17.

Binghamton, N. Y.—Mrs. Sue Harper Mims, Stone Opera House, 3 p.m., April 17.

Hastings, Mich.—Prof. Hermann S. Hering, Reed's Opera House, 7:30 p.m., April 18.

Constantine, Mich.—Prof. Hermann S. Hering, George Opera House, April 19.

Napa, Cal.—Frank H. Leonard, Hayes Theater, April 19.

Marshall, Mo.—Clarence C. Eaton, Marshall Opera House, April 21.

Waterloo, Ia.—Francis J. Fluno, M. D., Waterloo Theater, April 21.

McGregor, Ia.—Prof. Hermann S. Hering, Sullivan Opera House, 8:30 p.m., April 21.

Alameda, Cal.—Frank H. Leonard, Unitarian Church, Grand street, near Santa Clara avenue, April 21.

Oakland, Cal. (First Church).—Frank H. Leonard, Macdonough Theater, April 21.

Guernsey, Channel Islands.—Rev. William P. McKenzie, St. George's Hall, Esplanade Guernsey, 7 p.m., April 21.

Englewood, N. J.—Mrs. Sue Harper Mims, April 21.

Omaha, Neb. (First Church).—Clarence C. Eaton, Brandeis Theater, April 22.

Charles City, Ia.—Prof. Hermann S. Hering, Hildreth Opera House, 8:30 p.m., April 22.

Fresno, Cal.—Frank H. Leonard, Barton Opera House, April 22.

Excelsior, Minn.—Hon. Clarence A. Buskirk, Town Hall, 3 p.m., April 24.

Anderson, Ind.—Clarence C. Eaton, Grand Opera House, 3 p.m., April 24.

Fort Wayne, Ind.—Prof. Hermann S. Hering, Majestic Theater, 2:30 p.m., April 24.

Eureka, Cal.—Bliss Knapp, Ingomar Theater, April 24.

Riverside, Cal. (Second Church).—Frank H. Leonard, Loring Opera House, 3 p.m., April 24.

Ontario, Cal.—Frank H. Leonard, Masonic Hall, 7:45 p.m., April 24.

Manchester, N. H.—Mrs. Sue Harper Mims, Universalist Church, 3:30 p.m., April 24.

Washington, D. C.—William D. McCrackan, M.A., New National Theater, 3:30 p.m., April 24.

Janesville, Wis.—Judge Septimus J. Hanna, Myers Opera House, 8:15 p.m., April 25.

Fortuna, Cal.—Bliss Knapp, Christian Church, April 25.

Santa Ana, Cal.—Frank H. Leonard, Opera House, April 25.

Evanston, Ill.—Judge Septimus J. Hanna, Church Edifice, Chicago avenue and Grove street, April 26.

Terre Haute, Ind.—Prof. Hermann S. Hering, Pythian Temple, 125 South 8th street, April 26.

London, England.—Bicknell Young, Chelsea Town Hall, April 28.

London, Eng.—Rev. William P. McKenzie, Queen's Hall, Langham Place, 8:30 p.m., May 12.

Edinburgh, Scotland.—Rev. William P. McKenzie, Synod Hall, Castle Terrace, 3 p.m., May 15.

Bedford, England.—Rev. William P. McKenzie, Town Hall, May 17.

Bristol, England.—Rev. William P. McKenzie, Lesser Colston Hall, May 19.

London, England.—Rev. William P. McKenzie, Queen's Hall, Langham Place, May 20.

TESTIMONIES OF HEALING.

In 1902 my health began to fail, and it was at first thought that I had overworked myself and would be easily restored by rest and a change; but the benefit was only temporary, and I soon broke down again. This time the trouble was diagnosed as nervous breakdown, and after dragging along through the summer of 1903 without improving, I again went away, and was apparently somewhat better when I returned. A friend then offered me a situation requiring outdoor work. In the spring of 1905 my health gave out completely. I developed a severe cough, and my family and friends urged me to go West immediately. As it seemed quite an undertaking to wind up my business, I wished to be sure that this was necessary and went to a physician and asked for a thorough examination.

When Christian Science was recommended to me, I had undergone a part of the physical examination, and the outcome had been most discouraging. The verdict was that my lungs were affected, and if I wished to prolong my life I must go to a different climate. The prospect of leaving my little children fatherless tormented me hourly, and my life, which had seemed so full with fine business prospects, hosts of friends, and a happy family, was now burdened with care and discouragement. I grasped at Christian Science at once. I was glad to try anything that promised any help whatever, and went to see a practitioner, my voice so weak that I could scarcely be heard across the room. His advice to me as the first step toward Christian Science, was to break off the medical examinations I was then undergoing. As I recall this interview, during which I asked questions and received answers thereto, I realize that my mind was not only made up to discontinue medical treatment and examinations, but that I had taken a long step on the road to recovery. I went home and destroyed all my medicine, telling my wife that I was going to try Christian Science.

I had obtained a copy of "Science and Health with Key to the Scriptures," and commenced to read it at once. I had never read the Bible, had never thought it practical, but I had been reading Science and Health only a few days when I found a Bible a positive necessity. When I read the Gospel of John, I found to my surprise that it alone contained more meaning to me than I had expected to find in the whole book. I knew I was healed, and that I had found a remedy for every discord,—the Science of Life. My duty was plainly shown me in Jesus' words as given in Matthew, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Afterward I asked for help in overcoming the tobacco habit, to which I had been a slave for twenty years, and was healed in five treatments. I have also lost the taste for alcoholic stimulants, which I occasionally used to excess. The desire for all these things has been utterly eliminated from my consciousness. Our children have never had a drop of medicine since my healing, where previously they took medicine continually and we paid doctors' bills as regularly as we paid the grocer.

Through the study and development of this beautiful teaching, my views of everything have undergone a transformation. I realize that material living, apart from the influence and operation of spiritual law, brings nothing but misery and disappointment, and I am glad to gain a newness of life by applying myself to the study of the Science of being, which alone brings peace and happiness. As my understanding grows of what it has meant to bring this wonderful truth to the knowledge of this needy world, I rejoice that one has been faithful and unselfish enough for the great work, and my heart is filled with gratitude to Mrs. Eddy, not only for her insight to reveal this truth, but for her endurance in its establishment.

JOHN J. TODD, Nashville, Tenn.

Christian Science was a revelation to me, and it came as a result of reading Mrs. Eddy's wonderful book, "Science and Health with Key to the Scriptures." As I was reading the chapter on Prayer, I became so repentant that I turned to God with my whole heart. I was weeping as I scarce ever had wept before, and the "still small voice" said, as plainly as though some one had spoken to me, that Christ had always been here.

At the time this happened I was in California, where I had gone two years before for my health, my family and friends thinking I might never return, as I was believed to have organic lung disease. There was also a complication of other diseases, which had made me a useless invalid for more than twenty years, never having been able to do my housework or walk any distance, and for seven years of that time I was confined to the bed. When I finally got around again I was never able to stand without support, and even this was attended with great suffering. I was healed of the lung trouble in four treatments by a dear practitioner in Santa Ana. Later, this lady having gone away, I sought the help of another one of God's children, and was healed in two weeks of all my diseases, and have never used any material aid or medicine from that time to this. For all the help given me in Christian Science I shall never cease to be grateful. At the second healing work I experienced a most wonderful exaltation and uplifting, which was a veritable foretaste of heaven. I seemed to be on the mountain-top, and the Scripture was renewedly fulfilled, "They shall run, and not be weary; and they shall walk, and not faint." I have had some difficult problems to work out, but God has never failed me yet. For all of this I am impelled to echo Mrs. Eddy's soul-stirring words: "Glory be to God, and peace to the struggling hearts! Christ hath rolled away the stone from the door of human hope and faith" (Science and Health, p. 45).

I can find no words to express the valuation which I place on Mrs. Eddy's writings. Suffice it to say that if I could not get another copy of Science and Health all the wealth of the world could never buy the copy I now have. The Christian Science periodicals never fail to supply my need, and they are a never-ending source of joy and comfort to me. I realize that I have found in Christian Science that for which I have always been seeking, the truth about God and man. My prayer is that some weary and thirsty ones may find this "water of life" as I have, by studying the Bible in connection with Science and Health, which is a veritable "Key to the Scriptures."

MRS. HARRIET J. GRANT, Lynch, Neb.

In January, 1900, I became a member of a Christian Science household. I was at that time (and had been for several years) a member of an orthodox church, and one evening, on returning from my church, I was suddenly attacked with severe pains, which grew almost unbearable; so I called my friend, the wife in the home. A physician was summoned, but owing to stormy weather he did not come until morning. On making an examination, he decided that I had appendicitis, and as my case did not improve as rapidly as he wished he called in his son (a physician) for advice and help. They in turn called in a third physician, and an operation was decided upon, but with no absolute assurance of a recovery.

I had been in bed seventeen days when they decided that the operation should be the next day at nine o'clock. This state of affairs was a very unpleasant one for my Christian Science friend, who had cared for me according to the doctor's orders; and in looking for help and comfort for herself and her household, during that memorable night, she took up "Science and Health with Key to the Scriptures" by Mrs. Eddy, and read on page 86 these words: "Mortal mind sees what it believes as certainly as it believes what it sees." The unreality of the whole experience

Digitized by Google

came to her, and I was instantly healed. The swelling or enlargement in the intestines immediately disappeared,—vanished into its native nothingness,—proving that matter has no substance. A peace such as I had never before known came to me, and I was a new creature.

In the morning at seven o'clock the physician came to see if conditions were ready for the operation. He was greatly surprised to find me well, and after calling his son, they both examined me. He said, "I could not wait, when I found she was well; so I went after my son, as I could not credit the evidence of my senses." He also told my friend, before they left, to give me no more medicine. I got up the next day, began the study of Science and Health, and have since that time had no other physician than Truth. Stomach and bowel trouble, headache, backache, rheumatism, accidents, worry, envy, discontent, and many other inharmonious conditions have been destroyed through the understanding of God, good, as given in Christian Science.

My heart goes out in loving gratitude to God, and to our Leader, Mrs. Eddy, for my many blessings, and to those who through their gentleness and love have made the way brighter and easier.

MARIE JOHNSON GIST, Eureka, Cal.

For some time it has been apparent to me that I must not withhold my testimony any longer, for I should show my gratitude to God and to Mrs. Eddy for having been brought by degrees to see that Truth has all power over disease and sin. Christian Science healed me in three treatments of acute rheumatic attacks, and I was also healed of catarrh and severe throat trouble, which I used to have three or four times every winter. I have been healed of coughs, colds, headache, fever, and distressing pain in the side, also of an offensive odor which was very disagreeable to others. Christian Science has been our only physician for over six years, and all this brings us very near to God. We could not do without this healing truth. Our children have all been healed, one of a stomach affection and deafness, one of a fever. Another child fell from an upper story porch, striking on his head, but this was overcome at once. Another was rendered unconscious through inhaling gas, but was healed in Christian Science.

Many other difficulties have been overcome by this wonderful truth, and for all this I am very grateful to God, to the great Wayshower, and to Mrs. Eddy, our dear Leader who has so patiently shown the way in this age.

MRS. L. B. REES, Chicago, Ill.

I give my testimony of healing in Christian Science, hoping that it may aid and encourage some one in need of the assurance that "with God all things are possible." I was healed over two years ago of the constant use of an opiate and whisky, by reading and studying "Science and Health with Key to the Scriptures" by Mrs. Eddy. Being a trained nurse, I had every opportunity to gratify the desire: and it seemed impossible to break the habit, which was of five years' standing, it had seemingly grown so strong. With the disappearance of the drug habit came a gradual relief from unendurable headaches, and all conditions, mental and physical, that go with the continued and often overuse of the above-mentioned drugs. My friends, once in constant dread of some fearful ending for me, are now rejoicing in the fact that I am a well, happy, and ever growing better woman.

How can I help being grateful to Mrs. Eddy, and how can I show my love and gratitude except by striving to follow as nearly as I can in the way she has proved beyond doubt to be the straight and narrow way which leadeth unto life. In place of drugs for constant companions, I have the Bible and the Christian Science "Key" to it. That divine Love meets all our needs I know, because I have proved it many times—for myself and others—and when one has proof he cannot doubt. I wish that all might know the peace and joy that the truth brings, but we must have patience, for the time will come when all shall know.

ELEANOR LOVETT, Kingston, N. Y.

I am glad to add my testimony of healing. I suffered from early youth with kidney trouble. At times conditions seemed intensely critical. I sought Christian Science treatment, and the truth of the Christ-healing as therein taught was made so plain that I was well in one treatment. I am indeed grateful for the freedom from sickness, but far more for the spiritual awakening that comes with the healing touch.—MRS. A. L. WESTON, Port Haywood, Va.

It is with great pleasure I give this testimony of my wonderful healing through Christian Science. For twelve years I suffered from severe headaches, also stomach and heart difficulties. I was under two doctors, but only found relief for short periods. I was much worse twelve months ago, because of varicose veins, an internal disorder, and other complications. The pain was intense, and I could not walk about very much. I was under a physician's care at a hospital for eight months, but gradually grew worse. I was thoroughly discouraged and disheartened, for I feared I would never be well again.

Just at that time I met a Christian Science practitioner, and after the first treatment my pain vanished and I felt quite well, but I continued to take treatment for a week. I am now perfectly healed, and have not taken any medicine since. I have laid aside elastic stockings and can work the sewing-machine without the least difficulty.

God bless our dear Leader, Mrs. Eddy, and all workers in Christian Science.

ANNIE HODSON, Walsall, Stafford County, England.

I am glad of every legitimate opportunity to tell something of what Christian Science has been to me during the past few years. It has indeed meant freedom in more ways than there is space here to mention. Some of the ailments that have vanished were headaches, frequent and often prolonged for weeks, stomach and throat trouble, etc. I now see much better without glasses than I used to with them, and have no trouble from the eyes as before. But the half is not told! All this, however, is but a drop in the bucket compared to the moral awakening, which has been a gradual growth, the salvation from all sense of fear, hate, and discouragement.

For several years before I knew of Christian Science I hated many people and myself worst of all, but I can never begin to tell how great has been the relief in having that awful burden of ill-temper and despair taken away. I have found much physical benefit and infinitely more of spiritual joy and strength in the study of Science and Health. The first time I asked for treatment in Christian Science it was to make myself presentable for my part in the Sunday services on the following day. My face was badly swollen and there was much pain. It was gently explained that what I needed was more dependence on God, and that I was disobedient if I took anxious thought for the morrow. I went home to spend a long evening in study and prayer, and awoke the next morning quite normal and free for the day's duties. I have in this Christian teaching that which has brought me health and keeps me well, and which is a protection from besetting sin. Many of my friends and a few relatives have also been blessed by this truth, and, if these are the fruits of such a slight knowledge of God, how great will the harvest of joy and happiness be when more is learned!

I wish to say that I used to feel that too much was said

Digitized by Google

about Mrs. Eddy, but now my debt of love is daily accumulating for all that her faithfulness has brought to me and my brothers and sisters all over the world. She has simply followed the Master, and I thank God for her and rejoice in all the gratitude given her.

MRS. MARY P. MARR, Easthampton, Mass.

It is with great pleasure that I give this testimony as a small evidence of the benefit I have received through the study of Christian Science. In the winter of 1907 I was taken down by a very severe illness. I had suffered terribly from colds for many winters previous, and on this occasion I could not find anything to relieve me. I was on the point of calling in a physician, when my landlady asked me to try Christian Science, and gave me the text-book, "Science and Health with Key to the Scriptures," to read. After studying the book for a couple of hours I found myself much better, and by the second day the trouble had all gone. I had also been a sufferer for many years from extreme nervousness and worry, besides a catarrhal trouble, which brought on severe headaches at times; but my worst complaint was a fear of lung trouble. I had tried many doctors to see if they could restore my health, but I kept getting worse continually. After my experience in being cured so completely and so quickly through the reading of the text-book, I made up my mind to call on a practitioner to see if Christian Science could heal me of the other ailments. I took treatment for three weeks, and was greatly benefited. I have been improving every day since, and now my health is fully restored. I am enjoying life and have a true sense of freedom.

I am truly grateful for Christian Science and what it has done for us, especially for the spiritual uplifting that I have received. It has also given a new meaning to the Bible, and words can never express my gratitude to God, and to Mrs. Eddy, for the understanding that I have gained, also for what this truth has done for suffering humanity.

WILLIAM EVANS, Ogden, Utah.

In July, 1908, my husband was very sick. He was under a doctor's care and treatment for weeks, for a disease of the kidneys. His friends all believed that he would not live long, because the doctor said he had this disease in its worst form. A kind Scientist came to the house to see him, and after her first visit he was so much improved that he could sit up. After she had visited him three times he was completely recovered. I am so grateful for the good which was done to my husband in his sickness, that I feel justified in stating that Christian Science treatment does wonders toward healing and relieving the sick.

MRS. JOHN HOLDEN, Ogden, Utah

I do not feel that I would be doing right if I did not tell something of what Christian Science has done for our family. About a year ago I came home from school and found my wife suffering from a severe attack of illness. I had made arrangements to go out that evening, but decided to stay at home and help her. We both declared the truth as taught in Christian Science, and in about three quarters of an hour she was perfectly healed. I was able to keep my engagement, and my wife spent the evening with a friend. This was to us a wonderful demonstration of God's power to heal. Aside from the physical healing, we both received a great spiritual uplift. Our year-old daughter had been suffering from a stubborn bowel disorder. My wife and I worked for her, knowing that all action is normal and perfect in divine Mind. In two days all symptoms of obstruction were gone, and have never reappeared.

It would be impossible to tell all that Christian Science has done for us. We are happy in the truth, knowing that God is our source of supply. I apply the teachings of Science every day in my school work, and things are very harmonious, while before I came into Science I used to be physically exhausted every night from worry and nervousness. We are indeed thankful to God, and also to our dear and revered Leader, Mrs. Eddy.

S. W. MITCHELL, Elwood, Ia.

A little over seven years ago, Christian Science was brought to my notice through the healing of a friend whose case had been pronounced hopeless by the doctors. Mine, too, was seemingly a hopeless case, as my physician said I had all the ills that flesh is heir to; and I certainly suffered more than would be possible to tell. I was told I had a morbid growth which would kill me, besides numerous other serious troubles. It seemed that I was about to pass away from lung disease; then there were heart trouble, headaches, varicose veins, and several other ills which caused much suffering. I was said to have inherited the lung trouble and was never well as a child. As I grew to womanhood there were a few years that were passed very comfortably, but after reaching the age of twenty, the next twenty-five years were full of suffering, and although I had "many things of many physicians" I continued to grow worse slowly, and there seemed absolutely no hope that I would ever be any better.

After the news of my friend's healing came to me, I thought of it for several days,—what a wonderful healing it was, just like the raising of the dead,—and hope sprang up in my heart that I, too, might be healed. I secured the name of my friend's practitioner and was taken to see her, and I cannot tell what a sense of peace and rest came over me when the dear woman said, "You will be required to use no remedies, but to look to God, who will heal you." I was told that the treatment was silent prayer, and I felt perfectly satisfied and was very glad that there was no more medicine for me. Still I wondered why my prayers and those of my parents and many friends were not answered, as I could not remember a time when I did not pray. The third day after my visit to the practitioner, I began to feel as if I was being lifted up; a great happiness seemed to pervade my whole being, and my very body seemed to to be changed from an old and stiffened feeling to one of suppleness in every portion. In my joy I began to sing praises to God, and the thought came to me that the practitioner was praying for me. Upon asking her the time at which she gave me treatment that day, I found it had been the same hour of my experience. I was wonderfully healed in two weeks' treatment, and began to do my washing the third week, along with the general work for a family of five, and am still rejoicing in that health and peace which comes alone "to those leaning on the sustaining infinite" (Science and Health, Pref., p. vii.).

Through my healing my husband and children have received the same help, and are now demonstrating the healing power of Truth. For the same reason three sisters and a brother sought and found in Christian Science the same wonderful healing and inspiration. I have had many demonstrations of the power of Truth over error. I am very thankful to God for what I have received and am receiving, and to Mrs. Eddy for giving us the wonderful truths in Christian Science.

MRS. J. F. TOWNSEND, Seattle, Wash.

In January, 1904, when the healing truth came into our home, our young daughter was nearly helpless from a nervous disease. We had just enough faith in Christian Science to think that it might help in such a case as this, and I was led to one of Mrs. Eddy's students, who gave me a new understanding of life, and the child was wonderfully healed in a few weeks' treatment. By that time, my faith

Digitized by Google

had increased, and I was taking treatment myself and studying, filled with a new hope. For seven years I had suffered from various diseases, had been forced to leave our home in Michigan, and later in Illinois, and had come to Colorado Springs, in hope of benefit from the climate. I had refused Christian Science in both of the above places, when offered by loving friends, and was led by a path I knew not, through my child's suffering. One after another my troubles vanished, among them bronchial trouble, a serious throat disease, deafness and loss of voice; and I was free!

The regaining of my voice has always seemed a wonderful demonstration to me, as I had very little faith in the efficacy of prayer. One Sunday evening, while preparing lunch, the impression came to me so strongly to obey the Master's admonition, "Enter into thy closet, and . . . pray to thy Father which is in secret: and thy Father which seeth in secret shall reward thee openly," that I left my work and very earnestly claimed perfect hearing and voice. In about an hour I startled the family by speaking a few words, and at the following Wednesday evening meeting I gained perfect freedom. Since then we have had numberless proofs of the power of Truth to meet our every need, among them being the healing of a running sore which had made life almost unbearable for a year, and a serious injury to the head of a little daughter, with its distressing accompaniments, was overcome by two absent treatments. I had been a life-long believer in spiritualism, and had a great struggle to accept the Bible. I found it true that "in the breaking up of material beliefs may seem to be famine and pestilence;" but I also found that "Love will finally mark the hour of harmony, and spiritualization will follow, for Love is Spirit" (Science and Health, p. 96).

My intense prejudice against the Founder of Christian Science (resulting from reading in mental science) soon gave way to unlimited respect and love, and I can never be thankful enough to her for bringing to this age the beautiful message of Love, "with healing in his wings."

MRS. LILLIAN HALE JACKSON, Montclair, Col.

[Translated from the German.]

For three years I suffered from a chronic disease of the stomach and bowels, and the physicians whom I consulted brought no help. The trouble grew so severe that I could take scarcely any nourishment. Besides this, I had suffered for years with rheumatism, and found no relief from medicine. A gentleman with whom I was acquainted then asked me to go to the Christian Science reading-room, and through the reading of the *Herold* which I found there, it became clear to me that Christian Science was the only way for me. I took treatment, and was completely healed in one week. Through the understanding gained through Christian Science I have become a happy and contented man. All that seemed incomprehensible has become clear, and dark shadows have been dispelled. I thank God, also Mrs. Eddy, for all the good that I have received.

HERMANN BOCK, Berlin, Germany.

It is with gratitude to God for the healing power of Truth, that I give this testimony. In the spring of 1905 my daughter was healed in Christian Science, after all material means had failed. We were in deep despair, feeling sure we would not have her with us long, and her recovery had a wonderful influence on all of us, convincing us beyond a doubt of the power of Christian Science to heal all manner of disease. I have myself been benefited by its teaching in ways too numerous to mention. I have indeed reason to be very thankful to God, and to Mrs. Eddy, for this truth.—MRS. MINA PEW, Rapid City, S. D.

In October, 1906, my husband was taken with severe pain in the side. He requested me to telephone to a practitioner for treatment, but after two days without relief, he (not being a Christian Scientist) desired a physician. The physician made two visits, diagnosed the case as gallstones, and said that partial peritonitis had already set in. Again the patient turned to Christian Science, the physician being kindly dismissed. A practitioner arrived that evening, having to travel seventy-five miles. She remained in the home, working faithfully day and night, with the result that in less than a week my husband was able to return to work, and has remained well since. Our little boy, now two years old, has never been sick, with the exception of a cold, which was quickly relieved by Christian Science treatment; and those who do not understand, marvel at his health, happiness, and sweetness. Christian Science has brought to me innumerable blessings, chief among which is the desire for better living. My gratitude to Mrs. Eddy, through whom God has revealed this wonderful truth, increases daily; also to those who contribute to our ever welcome publications.

MRS. MARY L. CHASE, Newport News, Va.

Since living in Prague, so far away from any Christian Science organization, I have had many wonderful proofs of the divine presence, and of the unfailing efficacy of Christian Science in every trial. The winter climate of Prague is said to be very trying to those not accustomed to it, and during the winter of 1908–9, many of my friends among the musical students gave way to this belief, which naturally interfered with their study, at times, to a very great extent. One morning I arose with a severe case of throat trouble, and at first I feared that I would be compelled to seek a doctor, remembering an admonition from my father that in case of illness I should not hesitate to procure the best physician possible. While mentally debating this, the thought suddenly came to me: Who is the best physician in Prague,—anywhere,—everywhere? Is it not the God who heals all our diseases? So I resolved to turn to Him for help. For a moment I endeavored to realize fully the truth of being, and after several moments I felt no inconvenience whatsoever. The following morning, however, the incident was repeated; but, not in the least discouraged, I successfully demonstrated over this, with the result that I was permanently healed of the trouble, and since then have been absolutely free from all suffering. This is only one of many demonstrations that have been mine since I have lived here, with no guide but the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy; but I have since discovered that there are several ladies living here who are interested in Christian Science, and as I write this we are about to arrange a weekly meeting for the purpose of studying the Lesson-Sermons. I hope this may be the beginning of great things for the future of Christian Science in Prague.

I need not add how grateful I am that I am gaining more and more, daily, that realization of divine Love whereby we are enabled to overcome every seeming discord which would block our path heavenward; and how grateful I am to that source from whence I have learned something of the God who is "a very present help in trouble," whose love follows us to the ends of the earth, and never ceases.

SOL. COHEN, Prague-Weinberge, Bohemia.

A friend,—it is another name for God,
Whose love inspires all love; is all in all.
Profane it not lest lowest shame befall,
Worship no idol, whether star or clod!
Nor think that any friend is truly thine
Save as life's choicest link with Love divine.

LUCY LARCOM.

FROM OUR EXCHANGES.

[*Outlook.*]

The supreme word which describes the Christian and the Christian church is not organization, however ancient, nor ritual, however beautiful and helpful, nor creed, however adequate in vision and love; but life. The church is the unbroken company of witnesses to the resurrection of Christ,—not those who have seen him in the flesh, nor those who believe the most exact statements about him, nor those who worship him most fittingly; but those whose lives bear witness to the mighty power of a living Christ, and who show in spirit, word, and deed his presence until he come again. A historic church may be and often has been a living church, but the test of its authority to speak for Christ lies not in its unbroken tradition but in its victorious and fruitful life. A historic church may cumber the ground with its splendid temples, its beautiful altars, its treasures of noble memories; while the living church may be an obscure and scattered remnant. A church ought to be a sublime revelation of a living God to living men; if its soul is supreme and glowing in its body, the body cannot be too gloriously appareled.

[*Christian Register.*]

Old prejudices die hard, and long-established ideas fade out but slowly even in the light of modern thinking. We are long in getting free from the idea that the church possesses a truth which is of a different order from the great body of truth which humanity possesses, that the minister of religion speaks with a superhuman knowledge or with the authority of a church having this special avenue into truth inaccessible to others. It is only gradually that men come clearly and definitely to the thought that the minister is a man among men, gaining his knowledge, even though he be a specialist, in the same manner that all human knowledge is gained; that the church is an organization of human beings, and does not become superhuman because its purpose is religious; that the authority of the minister in the utterance of truth is not derived from a special inspiration in the kind of truth that he utters, nor in himself.

[Rev. R. J. Campbell in *Christian Commonwealth.*]

The truth is that what was centralized in Jesus has been taking place in human life in general ever since time began, and is still going on, and must go on until this material universe of ours comes to an end and all separate human existence has been merged and glorified in the manifold unity of God. On the one hand the process is on the scale of the cosmos itself; on the other it is repeated and consummated in every individual soul.

[*Universalist Leader.*]

We are all talking brotherhood now; some day we shall be living it. We are all speculating as to just what it means, and trying to bring every one else to our definition, when there is no definition big enough to hold so great a thing. We can only hope to gather in our mind and heart some of the great underlying principles which are to be adapted to the conditions under which we live.

[*Examiner.*]

The testimony of Christian character is far more effective than the testimony of the tongue and all mere theological teaching. It is what we are, rather than what we know or say, that makes us effective witnesses for Christ.

[*Advance.*]

There is a success that cannot be expressed in commercial terms or measured by social position. It is the success that comes from right living and correct thinking, and its outward and visible sign is character.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY. DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $2.50 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The end of the usurious "loan trust," which has made millions by forcing poor people to pay extortionate interest on money their necessities compelled them to borrow, is in sight in New York state. The state banking department and the Sage foundation have joined hands to stamp out the loan evil. The state banking department has asked the Legislature to pass bills giving it power, in issuing licenses, to investigate the character of proposed beneficiary organizations and to license loan associations. These latter are to be permitted to do a "pawn brokerage" business, the rate of interest being limited to three per cent a month, and limits the loan business in this state entirely to loans on chattels or other property. Loans on salaries are absolutely prohibited in any form.

The "bar and bottle" bill, after a lively contest, has passed the House of Representatives of the Massachusetts Legislature. The effect of the bill is to separate saloons where liquor is sold over a bar to be drunk on the premises and places where liquors are sold in bottles or other receptacles to be carried away. This will put an extra burden on the liquor traffic, as two license fees, both local and United States, must be paid where only one is now required. It is estimated that it will close about one quarter of the saloons in the state. It is claimed that it is the greatest step in advance toward temperance taken in Massachusetts in many years.

A bill has been reported unanimously in the Massachusetts Senate to create a Metropolitan Boston, to consist of the cities and towns in the various metropolitan districts. This idea of establishing a Greater Boston has been advocated in the Legislature, as well as outside, for many years. It is provided in the bill now reported that the metropolitan park district, sewer district, and water district and other towns and municipalities may be united into a Metropolitan Boston. The mayors of the several cities and the chairmen of the boards of selectmen of the towns are to constitute a Metropolitan Boston council.

President Taft has issued an order putting assistant postmasters at first and second-class offices in the classified service. Something like twenty-one thousand offices are affected by the order. For several years there has been a demand that assistant postmasters in the larger postoffices be transferred to the classified service, the argument in favor of the step being that assistant postmasters have confidential relations with the postmasters and, as a rule, stay on from one Administration to another.

At a recent meeting of the regatta committee of the Atlantic Yacht Club and a representative of the Royal Bermuda Yacht Club, it was decided that the conditions of the Bermuda race for sail craft, which is to start on June 25 from off the anchorage of the Atlantic Yacht Club, should be the same as those that furnished such an interesting and excellent contest in 1909. The race will be open to cruising sail craft belonging to any organized club in the world.

Indiana is insurgent, if the platform of the Republican state convention and the speech of Senator Beveridge accurately reflect the opinion of the people of the commonwealth. The convention adopted a platform that indorses first the Roosevelt policies; then, among other things, a protective tariff, a tariff commission, conservation of natural resources, and lastly the administration of President Taft.

Dealing in futures on cotton exchanges, unless there is a *bona fide* intention of actually delivering the cotton, is prohibited in a bill agreed upon in Congress by the House committee on agriculture, and ordered favorably reported to the House.

The beef packers are charged directly with the high cost of meat in the report of the special grand jury which was called to Cleveland to investigate the high cost of living, and which has just announced its findings.

The Senate of Maryland has acted favorably upon a joint resolution, already approved by the House of Delegates, approving the proposed income tax amendment to the Federal Constitution.

The first awards for the new three hundred and fifty thousand dollar Sheldon traveling fellowship fund have been presented by the Harvard corporation to twelve graduate students.

A bill is now in the New York Legislature which, if passed, will put private banks and banking houses accepting deposits under the supervision of the state banking department.

International.

The last branch connecting the railway systems of Argentina and Chile has been opened. At the ceremonies Argentina was represented by the Minister of Public Works and Chile by the Minister of the Interior and the Minister of Public Works. Most cordial speeches emphasized the importance of this railway connection between the Atlantic and the Pacific oceans. The tunnel is twelve thousand feet above level and links the republics of Chile and Argentina commercially. Its construction constituted a great engineering feat in which American methods and machinery were used. It is five miles long and affords direct communication between Valparaiso and Buenos Aires.

The House of Commons rejected, by a vote of 357 to 251, the opposition amendment to Premier Asquith's resolutions on the veto power of the House of Lords, and agreed that the Premier's motion should go to committee without division. The House was crowded and many peers and diplomats were present. The announcement of the figures, showing that the government was sure of a majority of 106 for the veto resolutions, was greeted with prolonged ministerial cheers.

The magnetic survey of Africa, the first ever accomplished, was participated in by prominent South African educators, working under the direction of the authorities of the Carnegie Institution in Washington. These explorers sent out by the institution penetrated from Cape Town to the head waters of the Nile at Victoria-Nyanza, sometimes on foot and sometimes in ox carts, through Rhodesia, Portuguese East Africa, German East Africa, Uganda, and British East Africa.

A conference of international jurisconsults has been held in London to consider the reason of the action of Russia with regard to Finland. The results of the deliberations of these gentlemen are that "the rights of Finland in respect to her constitution are not figments of 'Finnish imagination,' but a historical reality; they do not form a 'dogma' in which the Finlander believes without being able to offer proofs, but a judicial truth scientifically demonstrated."

The number of passengers carried by tram, omnibus, and tramway in London has increased over fivefold since 1881.

Submarine bells as aids to navigation are to be placed on the British Columbia coast.

Industrial and Commercial.

Nearly one million new farms have been created in the United States during the past ten years, says the *New England Homestead* of Jan. 1, in an exhaustive census investigation of farm interests throughout the United States. In the last ten years the total number of farms has increased eighteen per cent. In the older states, from Ohio eastward, there has been going on for twenty years a tendency toward the amalgamation of farms distant from market into larger holdings. On the other hand, this section has witnessed the cutting up into smaller sizes of many farms nearer to market. There are now almost three times as many farms as in 1870 and an unprecedented increase in the value revealed by this inquiry. The land in farms with their buildings, improvements, and live stock, is today worth almost thirty billion dollars, a gain of forty-four per cent in ten years.

One of the largest steel contracts ever made in the United States is in sight by the Isthmian Canal commission, which soon will call for bids for the construction of gates to the locks with which the Isthmian Canal will be equipped. The price will approximate six and one half million dollars. The requisition calls for the manufacture, delivery, and erection of about fifty-eight thousand tons of steel parts, which will be used in the construction of the forty-six mitering lock gates of two leaves each at the Gatun, Pedro Miguel, and Miraflores locks. The specifications stipulate that all gates shall be completely erected by Jan. 1, 1914. The total number of leaves is ninety-two, two for each gate.

Records of the last few weeks show a large increase, mostly voluntary, in the payrolls of the railroad companies and other corporations which employ a goodly percentage of the labor in the United States. The number of men affected by the raise amounts to upward of three hundred and sixty-five thousand.

The Senate committee for the investigation of food prices recommended to the Senate that a law be passed placing a limitation on the length of time during which perishable food may be kept in cold storage.

The production of silver ore at Cobalt camp in 1909 totaled 21,998 tons, valued at twelve million dollars.

General.

It is frequently remarked by travelers that, with a knowledge of the English language, one can make himself understood in most countries. There are certainly but few hotels in Germany, France, or Switzerland where the waiters do not speak it more or less fluently. There are at the present time one hundred million people who talk English, whereas a century ago the number did not exceed twenty million. One hundred years ago there were thirty-four million people who spoke French, whereas now there are not more than forty-six million. In regard to German, seventy million speak the language today against thirty-six million one hundred years ago. It is said that the Russian language is spoken by sixty-nine million as against thirty million one hundred years ago, while only eighteen million spoke Italian against thirty-two million today.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

CHRISTIANITY AND CHRISTIAN SCIENCE.

THE following article by Frederick Dixon is sound and scientific; it cannot be permeated with an insinuation unscriptural or an argument illogical. It is as firm as the foundation of Truth, and it is immortal.

I thank Mr. Dixon for his clear-cut scientific sentences, simple sound logic, and above all for his honest declarations in the face of his disputants. His calm, sound, and demonstrable utterances are undeniable by honest men or women of common sense, and are practically accepted by the logician, by the religious, literary, and historic authors and editors of this period.

MARY BAKER EDDY.

April 7, 1910.

[Frederick Dixon in *Coventry* (Eng.) *Herald*.]

The sermon on "Christianity and Christian Science," preached by Canon Masterman, and reported in your issue of the 12th inst., manifests, I think, a desire to be fair, and so renders it easier, if only in the fragmentary way possible in a letter, to attempt to correct the misconceptions into which he has been betrayed.

The preacher, at the very outset, if he had only known it, fell into a fundamental error, for he explained that Christian Science was reminiscent of the speculations of the Gnostic teachers of the second century. Now Gnosticism was the outcome of that contact of the Jew and the Greek, in the Asian church, which led to an attempt to blend Hebrew and pagan ideals in a philosophy that would reconcile the rigid dogmatism of the one with the culture of the other. It so happens that the orthodox churches of today are in this very dilemma, for they have accepted literally the materialism of the Pentateuch, and have been compelled, in order to reconcile it with the teaching of the New Testament, to create a theology less logical than that of Gnosticism. The two cardinal difficulties which led to Gnosticism were: First, how to reconcile the creation of the material universe by an absolutely good God with the existence of evil; and, second, how the human spirit came to be incarcerated in matter, and how it was to be released. Now Christian Science denies the very premises of the issues at stake. It denies that the physical universe ever was God-created, or that Spirit ever was incarcerated in matter, and so finds no dilemma to escape from. The orthodox churches, however, accept both the premises, and it was the effort to escape from their inevitable conclusions rather than the teaching of Christian Science, that provided the *raison d'etre* of the Canon's sermon. How real the difficulties are, it is easy enough to show.

The book of Genesis distinctly declares that God saw all that He had created, "and, behold, it was very good." Therefore it is logically obvious, if evil is real, either that there was another creator besides God, or else God created evil and termed it good. Again, if Spirit is imprisoned in matter, how did this come about, for Jesus said quite unmistakably, "The flesh profiteth nothing;" while Paul wrote to the Romans, "They that are in the flesh cannot please God." Is it conceivable that the creation of an absolutely good and wise God contained something which was of no profit, but in which spiritual life was imprisoned?

Christian Science is in no such quandary. It explains —and here all the great scholars of the churches are at one with it—that the Old Testament is not a verbal revelation to be taken in an absolutely literal way (if it was, it would be faced at the very outset by verbal contradictions), but that it is a collection of allegory, apocalypse, poetry, and history. And it goes on to explain—and here it parts company with so-called orthodoxy altogether—that these *biblia* are merely the attempts of different men, at different epochs, gifted with a varying spiritual intuition, to record, as accurately as human language would permit, the evolution of the human consciousness from a belief in the reality of sin, disease, and death to an understanding of the truth which Jesus declared would make men free, and which Mrs. Eddy has stated, on page 468 of Science and Health, in the phrase, "therefore man is not material; he is spiritual."

When, therefore, the preacher described Christian Science as a mixture of "oriental philosophy, Stoic theories, and Christian teaching," he was not only indulging in the wildest of generalities, but was utterly at sea. You might apply the first term to the Bible on the grounds that it is frequently philosophical, and is indisputably eastern. If, however, the illustration is meant to imply that Christian Science has any connection with the philosophies of what has come to be known as "the far East," the suggestion is absurd. Those philosophies are, without exception, based on the admission of the power of the human mind, which is distinctly "a house divided against a house," and which is, in consequence, as completely disowned in Christian Science as in the teaching of the New Testament.

Now the preacher claimed matter as "the garment of God," though, as has been already pointed out, the Bible expressly declares "they that are in the flesh"—the garment of God—"cannot please God," and he goes on, as he is bound to do, from this to "thank God for the mortal mind." But the mortal mind is the mind of mortality, and "as by one man sin entered the world, and death by sin," he arrives quite unintentionally, but quite unerringly, at thanking God for sin. It is, of course, this mortal mind which, claiming to work by some process of mental suggestion, constitutes the force through which oriental magic in turn claims to work. It was the means by which the Jews attempted to taint the stream of Jesus' healing, and which they termed casting out devils through Beelzebub. Jesus' answer repudiated mortal mind forever as a factor in Christian healing. "If I," he said, "with the finger of God cast out devils, no doubt the kingdom of God is come upon you." The kingdom of God never came upon any man through the suggestion of mortal mind. It comes through the Mind of Christ, and that Mind is attained not through the study of philosophy, but by walking in the footsteps of Christ, and so learning the truth which makes men free; namely, the fact that the creation of an absolutely

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

good God is spiritual and not material, and that, however strange it may seem to the human senses, evil is not power and is not real, but is what Jesus declared it, when, personifying it after the manner of the East, he called it a liar. The only power a liar can ever even seem to exert is the temporary sense of power he may seem to possess while those who hear him are sufficiently ignorant of the truth which frees to be held in bondage by the lies he utters.

The preacher was, perhaps, even more unfortunate in his attempt to associate Christian Science with Stoicism. The great Stoic maxim is, "Live according to nature," and by nature the Stoic implied the physical universe and the prompting of mortal mind, the reality of both of which are denied in Christian Science. There were, naturally, in the Stoic philosophy points where it approached Christianity, and so we find Paul quoting a Stoic writer on a famous occasion. Stoicism, however, lost itself in the frankest pantheism, and when an orthodox churchman has declared that God is infinite, and that matter is real, he has reduced his teaching to the same pantheistic level as the Stoic.

Popularly, however, the Stoic is known as the parent of "the grin and bear it" gospel, and without any wish to be offensive to the preacher, this was precisely what his own theory of suffering developed into, a fact which he recognizes in the sentence, "For the unavoidable suffering of the world we throw the responsibility on God." Christian Science denies the accuracy of that statement from alpha to omega. No suffering, it declares, is unavoidable or anything approaching unavoidable. It is unavoidable just as we fail in learning the truth which makes men free; but the knowledge necessary to destroy it does not amount to what in the epistles is described as the *epignosis tou theou*, the full knowledge of God, but to the knowledge acquired through the faith which Jesus likened to a grain of mustard seed. Suffering, of course, has its value. It is sometimes the only thing which will rouse a man from the dream of sensuality, but the moment he wakes out of that dream and begins to learn something of Truth he begins to acquire the power to demonstrate Truth, and so to fulfil the command of Jesus, "He that believeth on me, the works that I do shall he do also." Still, in order to gain anything of that knowledge, he must gain something of the Mind of Christ, and that is why Mrs. Eddy has written, on page 267 of Science and Health, "Even in this world, therefore, 'let thy garments be always white.'"

THE LETTER AND THE SPIRIT.

WILLIS F. GROSS.

In Christian Science it is learned that both the letter and the spirit of Christianity are necessary if humanity is to experience, in its fullest sense, the blessings of the gospel. It has never been claimed that all the benefits of the gospel have been realized, or that even one person had reached the heights and accomplished all that was possible to accomplish. The blessings of salvation are more than have been realized, and it is possible for each individual to gain still more of that good which has lifted him somewhat above the discordant things of earth. No one should be content to remain where he is, since it is possible for him to gain a higher and consequently a more harmonious sense of existence.

Both the letter and the spirit of the gospel are needed. Neither can be dispensed with in the present stage of human development. It is true the spirit is more necessary than the letter, but Christian Science is demonstrating that the earnest seeker for Truth gains the spirit in a larger degree when the letter is correctly stated and rightly comprehended. The faith which saves to the uttermost and makes man every whit whole, is not a blind belief, but an enlightened spiritual understanding. Perhaps the great drawback to spiritual growth and development has been that humanity is called upon to accept too much on faith. Many things which have seemed altogether incomprehensible to human reason have been set forth as the teaching of the gospel, and the one who was inclined to question, has been told that it was not for him to know the why and wherefore, his duty was to obey. And perhaps he has earnestly endeavored to do so, even though he felt he was walking in the dark. The desire to be obedient, and the earnest longing for truth and righteousness, have brought to many of earth's faithful ones much of the spirit which the world could not receive, much less comprehend.

Mrs. Eddy writes in Science and Health (p. 283), "The divine Principle, or Life, cannot be practically demonstrated in length of days, as it was by the patriarchs, unless its Science be accurately stated," and in this "Key to the Scriptures" she has clearly stated the letter of the gospel. So far as she has found it possible to do so, the author has expressed in simple terms a definite idea of what God is. She has also set forth a demonstrable idea of man and the universe and the scientific relation of the creator to His creation. There are also given in this book definite rules whereby the truth of being, as it is discerned in Christian Science, can be applied in all the affairs of human experience, thereby correcting the errors of mortal belief and enabling the individual to escape the discord and suffering resulting from these errors. To a certain extent, but in a very limited degree, the teachings of Science and Health can be comprehended intellectually, but those who think that this book can be studied and mastered in the same way that a book on mathematics or some other subject which deals with material things can be understood, have yet to gain the first true conception of genuine Christian Science. The letter of this Science is indispensable; but if thought does not rise above the letter to imbibe the spirit, the healing power of Truth is little realized. Ever since Science and Health was published, Mrs. Eddy has warned her students against the error of thinking the letter of Christian Science was equal to the demonstration thereof, and she writes on page 113 of the text-book, "The vital part, the heart and soul of Christian Science, is Love. Without this, the letter is but the dead body of Science,—pulseless, cold, inanimate."

The Master said, "It is the spirit that quickeneth; the flesh profiteth nothing." Paul declared, "The letter killeth, but the spirit giveth life." We do not understand that Paul here meant to convey the idea that the letter was worse than useless, rather was it his intention to impress upon the thought of the early Christians the great necessity there was for striving to gain the spirit. Those who had gained the spirit had some realization of the sense of Life as God, while those who had the letter but not the spirit, were dead because they had not experienced the quickening power of Spirit and were still in bondage to various phases of evil.

The Master came not to set aside the law, but to fulfil the law. He taught that the sense of righteousness resulting from the intellectual observance of rites and ceremonies was not sufficient. In his Sermon on the Mount he said, "Except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no case enter into the kingdom of heaven." If the law had been sufficient, there would have been no need of the gospel; and so, if the letter could avail, the spirit would not be necessary. In the history of human experience the law preceded the gospel, and in the individual consciousness the letter is gained before the spirit is realized.

The mistake is made when the person stops with the letter, because he thinks he has gained all that is necessary. The letter serves its purpose, and a most excellent purpose it is, but the student should not place too much importance upon the letter. The letter of Christian Science cannot

Digitized by Google

heal either sickness or sin. The repetition of the letter of this Science, either mentally or audibly, does not demonstrate the saving power of Truth and Love. True prayer is of the heart and not the head. At best the eloquence of words is but the feeblest expression of the prayer that avails with God. Paul said, "If I speak with the tongues of men and of angels, but have not love [which is the spirit that quickeneth], I am become sounding brass, or a clanging cymbal" (Rev. Ver.). One may be able to talk the letter of Christian Science fluently, but if the spirit is lacking the healing power of divine Love is not demonstrated.

The letter of Christian Science is reasonable, logical, and consistent, and it opens the way for a more liberal outpouring of the spirit; but if the student fails to live what he learns, he cannot be "endued with power from on high," and the demonstration of this Science is impossible. True prayer is effectual in healing sickness and destroying sin, and it is the only remedy for the discords of earth that is suggested by the teachings and life of the Master. The prayers of the people were not effectual, because they were not sincere. He said to those who came to him for instruction, "When ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking." The heathen are those who know not the true God, or have not the true conception of God. It may be that there are those who, not having discerned the spirit of Christian Science, hope to atone for the lack of the spirit by the persistent repetition of the letter; but such practice is not the practice of Christian Science, and no sincere student of this Science who has read Science and Health aright can be blinded by such a misconception of what is necessary to demonstrate the divine Principle of all true healing. The letter and the mental argument do not heal. God is the only healer, and the only purpose of man's effort should be to bring himself, with those whom he would help, into harmony with God. In the degree that this is done, the mortal beliefs of sin and sickness are destroyed. "The Father that dwelleth in me, he doeth the works," said Jesus; and nothing less than the work of Spirit is Christian Science healing.

The rules which are given in a text-book on mathematics are for the guidance of the student. By following the rule which points out the necessary steps, it is expected the student will discern the basic law of numbers which is involved in the solution of the problem under consideration. The repetition of the rule will not solve the problem. Even though the student obeys the letter implicitly and takes each step as it is pointed out and thereby obtains, so far as numbers are concerned, the answer to the problem, if he has not discerned the basic law back of the rule, it cannot be truthfully said that so far as he is concerned he has solved the problem. The conclusion he has reached means nothing more to him than adherence to the letter which he does not understand.

So is it in Christian Science. It is not the letter, but the spirit which solves the problem of life. The letter points the way and serves its purpose, but at best it is only a means to an end and the mistake should never be made of thinking the goal is reached when nothing but the letter has been gained.

GOD NO RESPECTER OF PERSONS.

[The following letter is in response to one called out by the reading of Mr. Grey's testimony, which was published in the *Sentinel* of March 2, 1907. We give this letter to the Field with the hope that its practical statements will show some sufferers how this healing truth may be grasped and made available at all times.—EDITOR.]

Los Angeles, Cal., March 15, 1910.

My Dear Mr. ——:—Your letter of March 2 has been received. Several letters have come as a result of my testimony printed in the *Sentinel,* but I have had none like yours. You say that your case "would be awfully funny, if it were not so sad." It is indeed sad that one of your stamp should be in so sorry a plight. I know what it means. Your letter brings back vividly my own long-drawn-out experience. I used to love books even more than I do now, yet for years I could not read. I enjoyed people of the right kind, but for many weary months I could not see any one, and for many more had to accept the company of those who happened to pass my way—not always the best. I have roamed for months over the Sierra Madre mountains, a horse, an occasional wildcat, buzzards, and the great out-of-doors, my only companions. I have lived alone in a tent, thousands of miles from home, with a person in the last stages of illness for my neighbor; and always I was waiting—waiting for the improvement that did not come; or if it did, it came only soon to flee again.

For a while I worked on a ranch—that would have been awfully funny, too, if it had not been sad. And now you ask me if my cure has been permanent. My dear man, it has been so very permanent that I have you to thank for reminding me that I was once an invalid, for recalling to me again the fact that to Christian Science I owe a debt of gratitude which I can never, never repay; and that if, to one who is passing through a similar experience, I can say anything that will be of the least help, the time and attention thus directed, and taken either from a busy business career or from the happiest of family lives at home, could not possibly be better spent. You say, "If I could only find out how to work it, how to apply the Principle of Christian Science to my own case." Let me tell you what I did. If that helps, God be praised! As you say, He is no repecter of persons, so what He has done He can do once more. Our cases apparently are not in every respect similar. You can read and write. I could not. Yet later on I had a threatened return of my trouble (which was soon disposed of), that perhaps is more nearly like yours, and which I will get at presently.

Regarding my first and main experience with Christian Science, it began in this way: I had a friend who had gone through much the same course. She was a graduate of Smith College, and a girl of unusual intellectual attainments. After battling with sanitariums, rest-cures, and that sort of thing for two or three years, she was in a comparatively short time healed through Christian Science. I had great respect for her good sense, and so, when I heard of her case, and especially when I talked with her, it removed a prejudice I had previously held against Christian Science and prompted me to give it a trial. This I did by taking a copy of Science and Health with me on the train *en route* to California, as related in the *Sentinel.* What actually happened in the way of my mental operation when I tried to read that book I did not there state. I will endeavor to do so now, so nearly as I can recall it.

I was able to read the verse from the Bible on the first page, which is as follows: "For verily I say unto you, That whosoever shall say unto this mountain, Be thou removed, and be thou cast into the sea; and shall not doubt in his heart, but shall believe that those things which he saith shall come to pass; he shall have whatsoever he saith. Therefore I say unto you, What things soever ye desire when ye pray, believe that ye receive them, and ye shall have them. Your Father knoweth what things ye have need of, before ye ask him." When I read this, I said to myself, "If that is so, if I give God a fair trial, He should be able to remove the viselike grip that heretofore has seemed to take hold in my head whenever I would attempt to carry the reading operation beyond certain very restricted limits. I will try Him. I will put Christian Science to a fair test. It can do no worse than repeat the pain which so often I have experienced before. If I do not trust Him to the extent of endangering my

Digitized by Google

comfort,—yes, even my health, for every try at reading seemed to set me back,—it is not giving this Science a fair trial." I continued to read. I read on and on! A great joy came over me. I could read! The great barrier that for years had stood between me and my work, health, and happiness, was it?—yes, it was really removed!

Then followed two most curious experiences. During the next week or ten days I continued to read Science and Health. I was in the habit (by the advice of a physician) of taking a hot salt bath every evening before retiring, to quiet my nerves and thus aid my sleep. When I reached Berkeley, in conformity with this habit I engaged a room with a bath. To my surprise I soon found, when bedtime came, that the usual restlessness no longer occurred. I did not desire the bath, and I found I did not require it in order to get a good night's rest. On the other hand, another very remarkable thing occurred. I would sleep very soundly, and when I awakened I felt rested and refreshed; but as a matter of fact I slept only three or four hours a night. There was a great commotion in my mental "inards." I slept as one who was going through a period of great excitement; only, as I say, always when I awoke I was rested and refreshed. This stir kept up perhaps for several weeks, after which it gradually wore away. I spent many of the wakeful hours of the night in reading Science and Health, and kept constantly in mind the thought that, although I was getting so little sleep, He who had brought me thus far toward really living again, undoubtedly had me in His care, and I was getting all the sleep that I required. And such proved to be the case.

As regards the other experience to which I referred,—when I was threatened with a return of illness,—I had all the stock symptoms, and constant terror at the thought of again being laid on the shelf. I consulted a Christian Science practitioner, who showed me how I should work, but otherwise did not help me. I took a week's vacation, applied myself to the study of Science and Health, but all to no apparent purpose. Finally the test came. I was compelled to have an interview with a rather trying client. During the entire interview it was a struggle between the thought that I must give up, that I needed a long vacation for rest, etc. (the world's stock theories), and the thought that God was my strength, that He would sustain me, and that I must trust in Him and ignore the voices that would down me.

I recall some of the sentences in Science and Health to which I clung about this time (for I have them marked in my copy). They are these: "If we pray to God as a corporeal person, this will prevent us from relinquishing the human doubts and fears which attend such a belief; and so we cannot grasp the wonders wrought by infinite, incorporeal Love, to whom all things are possible" (p. 13); and continuing down to the bottom of the page. On the next page: "If we are sensibly with the body, and regard omnipotence as a corporeal, material person, whose ear we would gain, we are not 'absent from the body' and 'present with the Lord' in the demonstration of Spirit." On the same page (1905 edition), lines 9, 10, and 11, lines 12 to 15, lines 16 to 18, and especially lines 25 and 26. The great bugaboo in my experience was fear. I was in terror lest my old trouble with all its attendant train of ills should return; but I worked on, holding to the idea that life is in Soul, and not in body. Presently there came to my mind the thought, "Remember you do not have to struggle. You do not have to fight, you only have to know." And then suddenly I knew! knew that my trouble had been fear, that it had been conquered, and that all indeed that was necessary was to know that I was well and to proceed about my work accordingly. A great peace came over me, and I have remained well since.

Now, my dear man, you ask me, "Why is it that some people can be so easily healed, while others suffer and struggle and beat the air?" I do not pretend to know. To me it seems as if that is a question which concerns you less than this one, "How can I be healed?" If you will permit me to advise: Take a fresh start. Remember that life is not physical, but spiritual. Where does your immediate path of work or duty lie? Ask for strength to walk in it,—not of a corporeal God somewhere in the heavens, but of the God who is Love, who is omnipresent, who is spiritual Life—your life. May He bless you.

Sincerely,

ELMER GREY.

THE NAME OF GOD.

JANE E. HUDDART.

IN the Bible we read: "Thou shalt not take the name of the Lord thy God in vain: for the Lord will not hold him guiltless that taketh his name in vain." When the glorious promise contained in this passage of Scripture first dawned on the consciousness of the writer, through the study of Christian Science, thought was filled with gratitude and praise. The declaration of God's goodness is so definite, and the reason of our success or failure to manifest this goodness is so clearly pointed out, that we see, in the degree of our reliance on this promise, that no man can ask in vain, unless he "ask amiss."

In the light of Jesus' teaching, God is proclaimed to be a loving, merciful, unchanging, omnipotent Father. Jesus' life proved his understanding of God's law, and his words, "Go thy way; thy son liveth," were a proof that he knew the infallibility of the commandments. He never took God's name in vain, and his saying, "All things, whatsoever ye shall ask in prayer, believing, ye shall receive," were a reminder that the promise of the fulfilment of the law is unchanged, and is for all time. Our Leader's message to this age points thought again to an unchanging, omnipotent Principle, and every healing in Christian Science is a proof that the law and promise stand for the present generation as surely as for the past.

As in the light of our text-book the higher spiritual meaning of the commandments appears, we find that as they are indeed written upon our heart and mind, we realize safety and security. This comes with the knowledge that God's law is all the law there is, and is maintained by the divine energy throughout eternity.

[Written for the *Sentinel*.]

RECOMPENSE.

MARY J. ELMENDORF.

My hands that were reaching so eagerly out
Have closed on the hilt of a star;
My eyes that were scanning the waters of doubt
Have visioned the harbor afar.

My heart that sickened of shadow and greed,
That wearied of wantons of woe,
Has found the road to the distant mead
Where the roses with radiance glow.

Tired, I turn from the toiling throng
And the harvests of gloom they glean.
Oh, the wind of the heights in my face is strong
With the sweetness of things unseen!

In the silence of thought a lamp I clutch,
A glistening, wonderful globe,
And, laved in its glory, I kneel to touch
The hem of the seamless robe.

SELECTED ARTICLES.

["Fair Play" in *Bellefontaine* (O.) *Examiner.*]

I would suggest to this critic, before he again "lifts the veil and assumes the pressure," that he mingle with these people and obtain authentic knowledge concerning them, learning from them that Christ's teachings can be carried into every-day life,—in all their dealings with mankind as vigorously as upon the Sabbath. Go into the little gatherings where two or three are met together, bowed in silent prayer, amidst persecution and ridicule, crying as did the meek and lowly Nazarene on Calvary, "Father, forgive them; for they know not what they do." Then visit their crowded churches and view the vast assemblages drawn together by the influence of love, not fear, to hear of "Jesus Christ, and him crucified." Do not condemn them for the absence of "live wires" and "cyclones," for they doubt the beneficial results of explosive attractions. Bear with them in their silent prayers to the throne of grace, for they doubt the efficacy of any effort to attract the attention of the Almighty through either petitions or oratory. Censure them not for the belief that God created man perfectly free from sin, sickness, and death, in His own likeness, and their desire to reestablish these conditions. If they believe that Christ was once able to cast out devils and heal the sick, and is still able and willing to continue it, do not disturb them. If they claim there is no sensation in matter, examine the nearest brain to you and be convinced. If in your association with them you find, from their daily lives and conduct, that they are sons and daughters of God, without publication of the facts in the daily press, attribute it to their meekness and humility.

For the past twenty years I have been closely associated, both in business and worship, with Christian Scientists in various localities, and both experience and observation have demonstrated to me that no class of worshipers, with the Bible for their guide, are more conscientiously Christian not only on the Sabbath but in all that pertains to their fellow-man throughout the week. Their zeal for the elevation of humanity and to Christianize the world is too great to pull the ladders from beneath other denominations who are striving to reach the throne of grace by some other route. I have never heard uttered by them one unkind word against other sects or creeds. I am not a Christian Scientist, but after my long association with them, I would be dead to all appreciation of their many kindnesses to me, were I quietly to see them maliciously villified through the public press in this community where they and their works are so little known and understood.

In conclusion, I would ask the critic to cover the shortcomings of these people with the mantle of charity, and remember the command of the Master, "Judge not, that ye be not judged."

[William J. Bonnin in *Stretford Division* (Eng.) *Advertiser.*]

Christian Science is nothing more nor less than the restoration of primitive Christianity. It proves that the faith that is not dead is demonstrable in works, and that the healing of the sick and sinning is today, as in the first few centuries, the necessary outcome of an understanding of Truth. Preach the gospel and heal the sick is the indivisible and enduring injunction, and those who profess to be and call themselves Christians, cannot disregard it. The healing is always the test of the preaching.

Christian Science comes to show mankind that all suffering, sorrow, and sin is the result, or expression, of a want of knowledge—not of material knowledge, but of true and absolute knowledge—for as soon as they arrive at even a slight understanding of the truth about God and His creation, they realize in that degree the promised freedom awaiting all. "Ye shall know the truth, and the truth shall make you free." This is no idle or visionary theory. It is in no way an exaggeration to say that there are today hundreds of thousands of people who have tested and proved that the love of God, when we understand how to avail ourselves of it, will heal any and every disease and evil condition that may harass us. Salvation this side of the grave is the salvation of a practical Christianity, and this is the salvation that Christian Science has to offer.

[James Phelps in *Leader-Press*, La Crosse, Wis.]

If Christian Science was any such nonsense as our critic would have your readers believe, it would not command the attention of an ever-increasing number of intelligent and God-fearing men and women, recruited principally from the older churches, but containing a liberal sprinkling from the great unchurched throng. Many ministers of the gospel have adopted its tenets and teachings and, together with eminent judges, lawyers, educators, editors, authors, and artists, are bearing insistent testimony that they have found a clearer and more satisfying sense of God and His Christ than they ever knew before.

The words "imaginary" and "imagination" are seldom used in Christian Science. To the suffering sense of the patient, sickness, pain, and disease are intensely real, but when the truth about God, man, and being is realized, and by this process the pain, sickness, and suffering disappear, it surely proves that the thoughts entertained by the one who makes the demonstration are correct and of God, from whom cometh "every good gift and every perfect gift."

Christian Science does not ignore any fact of life: it demands that man shall meet and conquer everything unlike the Anointed in his own consciousness. He will then be prepared to render service to his fellow-men.

[C. A. Arnold in *Indianapolis* (Ind.) *Star.*]

A despatch states that a Japanese professor claims that the key-note of Mrs. Eddy's religion was transplanted from Japan and was practised there four hundred years ago. He might have gone back two thousand years and discovered that the things Mrs. Eddy teaches were the doctrines preached by Jesus Christ and taught by him. In his last words to his disciples, just before he ascended, he said of all those who believed in him, "These signs shall follow them that believe: In my name shall they cast out devils: they shall speak with new tongues: . . . they shall lay hands on the sick, and they shall recover." Mrs. Eddy's doctrine, therefore, is not a new doctrine. It was not only practised by the disciples of Christ, but was practised for four hundred years after his time.

[William C. Henderson in *Foster's Democrat*, Dover, N. H.]

Our clerical critic errs when he classes Christian Science with spiritualism, or any other ism, creed, or doctrine. The writer has only love and good will in his heart for one who is striving to uplift and benefit the people of Dover or elsewhere; but he feels constrained to say to those who would oppose Christian Science, that there is only one way in which they can successfully combat its steady growth. It is to give to the world something as satisfying as Christian Science, something that will not only heal the sick, comfort the sorrowing, and reform the sinner, but that will make all who come within its influence better and the world a happier place to live in. This is the kind of work that Christian Science is doing quietly day by day, and it explains why it is gaining in strength and numbers. Jesus said, "By their fruits ye shall know them," and the Christian Scientists of Dover are willing to be judged upon this basis.

Digitized by Google

[Frederick Dixon in *London Express.*]

Spiritual healing is effected by gaining a knowledge of the truth which Christ Jesus said would make men free, and this knowledge is acquired exactly in proportion as a man, walking in the footsteps of Christ Jesus, attains the Mind of Christ. Any person in the entire world who gains this knowledge of Truth will gain, precisely in the same proportion, the power to do the works which Christ Jesus did.

A Christian Scientist does not say he can perform all the works Christ Jesus performed, but he does say that not only he but every other person can perform those works exactly in proportion as they acquire the Mind which was in Christ Jesus. It would be well for our critic to remember that it was the Founder of Christianity, and no one else, who made the ability to perform these works the test of a man's belief, and consequently of his Christianity.

[John L. Rendall in *Council Bluffs* (Ia.) *Nonpareil.*]

The results of Jesus' ministry proved that he knew more about the best way to cure or overcome sin, disease, and death than any one who ever trod the globe, and he promised to his followers throughout all time, "Greater works than these shall he do; because I go unto my Father." It seems strangely inconsistent that ministers of Christian churches should in one breath commend to their congregations the healing work of Jesus Christ and in the next breath belittle and denounce those who today are the most active exponents of the healing religion which Jesus taught and practised.

It is no new thing for Christian Scientists to be objects of attack from ministers and others. Neither is this a new condition of things in the world's religious history, it is an experience which finds its prototype in the attitude taken by the chief priests and leaders of ecclesiastical monopoly in Jesus' time, and which expressed certain elements of human thought in the crucifixion of the one who brought to the world its clearest and most potent message of salvation from sin and sickness. It will therefore avail nothing for ministers of any denomination to refer to Christian Science as "a fad which is leading many well-meaning people astray." Neither will it avail anything for them to attempt to belittle the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy, for the reason that the teachings of this book have thrown a positive light upon the healing truths expressed in Scripture and opened up the way of salvation to hundreds of thousands of people who were in great need.

Christian Science offers to humanity that which satisfies their religious cravings, that which heals and saves in the most complete way. It presents to the world a satisfactory, reasonable, logical, and practical teaching, and the fact that intelligent people in and out of all religious denominations have accepted it and found peace within its borders, means much. It is perhaps needless to state that no effort, whether organized or unorganized, whether in the open or subtle, can ever overthrow this positive demonstrable teaching of truth. If other Christian churches have failed to meet the needs of their membership, they should take pattern by Christian Science, which is meeting these needs and presenting to the world the teachings of our Master in their completeness. In Christian Science it is recognized that not person but divine Principle is the healing potency. Mrs. Eddy has said: "Follow your Leader only so far as she follows Christ" (Messages, p. 78).

Christian Scientists are not afraid of opposition. They know its futility, itis powerlessness, and in the conscious integrity of their Christian motives and purposes they can claim the promise of the prophet of old, "No weapon that is formed against thee shall prosper; and every tongue that shall rise against thee in judgment thou shalt condemn. This is the heritage of the servants of the Lord, and their righteousness is of me, saith the Lord."

[Royal D. Stearns in *Lincoln* (Neb.) *News.*]

Christian Scientists do not claim that Mrs. Eddy has added anything to the Bible, but that she has discovered the precious truths of God's Word which heretofore have not been clear to them. They point to the fruitage of Christian Science practice as the only reasonable proof of its divinity. They accept in its entirety the command of Jesus to preach the gospel and heal the sick. They are doing this through a practical understanding of the application of the divine Principle, as taught by Mrs. Eddy in the Christian Science text-book, "Science and Health with Key to the Scriptures."

It matters not whether your critic agrees with the interpretation and application of the Scriptures as made by Christian Scientists, or not. Christian Science must stand or fall on its own merits. It should be known that vast numbers of people are constantly coming to Christian Science, recognizing its redemptive power,—coming from all walks of life, seeking refuge from various cares and troubles, etc., or they were sick, or they wanted a more satisfactory explanation of God and their being; and after a faithful and conscientious effort they have found health, happiness, and peace,—"the peace of God, which passeth all understanding."

The work of Christian Science is no more that of bodily healing than was the work of Jesus, when he went about healing all manner of diseases, and declaring that he was about his Father's business. Bringing relief to the body was not the end and aim of Jesus' teaching, nor is it of Christian Science. Jesus perceived that if the people were shown the practical power of God in the removal of the afflictions that burdened them, they would readily understand His love and His omnipotence. Having found Him "a very present help," they would be more inclined to deny self and acknowledge Him as the only God, and more willing to see that the love of evil is the cause of evil, and that the love of God would create good and destroy evil. The teaching of Jesus was fundamental, and Christian Science is the revival of His teaching.

Christian Scientists unequivocally accept the Elohistic creation of man as found in the first and a part of the second chapter of Genesis. They accept the Biblical statement that God created man in His own image and likeness and gave him dominion and told him to subdue the earth. They believe the real man to be spiritual. In denying the reality of matter, Christian Scientists do so in the sense that Jesus said, "It is the spirit that quickeneth; the flesh profiteth nothing." It will also be remembered that Paul said that "the things which are seen are temporal; but the things which are not seen are eternal." Christian Scientists recognize that to the physical senses matter seems both real and substantial, but they also understand that only that which is eternal and indestructible is real in the best sense of the word. Jesus had a body, but when he disappeared from human vision, he left no trace of a body behind. He walked on water, penetrated closed doors, raised himself from the grave, and finally ascended above mortal vision. All this shows that he must have had a very different conception of matter and substance from that generally entertained.

To say that Christian Science discredits the Bible, or claims that it is "full of falsehoods," is absolutely the reverse of the facts in the case, and must have been made under an utter misconception of what the Christian Science text-book, Science and Health, teaches on the subject. On page 497 of that book, which is the Christian Scientists' Bible commentary, it is specifically stated, as the first religious tenet of Christian Science, that "as adherents of

Digitized by Google

Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life." Proceeding from this standpoint, it will be easy to understand that Christian Scientists, having subscribed to the foregoing tenet, could not consistently say or do anything to discredit the Holy Scriptures. The fact is, that Christian Scientists, as a religious body, are devoted to Bible study. They consult it daily for inspiration, guidance, and protection from all the ills of the flesh, and place a sacred reliance upon it. Furthermore, there is positive and abundant proof that thousands of people have been healed through the apprehension of Scripture truth which they have gained in the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy.

The results of Christian Science have been so pronounced that the time has long since passed when it is possible by means of denunciation to hinder or discredit the positive and beneficial work which Christian Scientists are accomplishing in every civilized land. Christian Science presents an ideal religion. It holds to a God who is Life, Truth, Love, ever-present Spirit, without a taint of materiality; and its ideal man as spiritual, created in the image and likeness of God, Spirit, as the Bible teaches.

[R. Stanhope Easterday in *Elkhart* (Ind.) *Review.*]

Our critic rightly argues that Jesus did not come to earth to relieve physical sickness, but this does not militate one iota against the significant preponderance of the healing work in his brief earth-ministry. The fact seems to have been overlooked, also, that Jesus classified sin and sickness in the same category, often healing sore physical distress by forgiving sin, and in the end declaring all phases of evil, including sin, disease, death, and all manner of discord, the work of the devil, after designating the evil one "a liar, and the father of it." Disease, therefore, being the more tangible or obvious manifestation of evil, it was natural and necessary that healing of physical ills, resultant from the more or less hidden operation of spiritual truth in the elimination of sin from human consciousness, should have been more noticeable and seemingly paramount.

The origin, moreover, of all phases of evil being a lie, it should be obvious to all that the truth of being alone can effectually antidote the same, whether manifest as sin or disease. This, then, is the full and effectual significance of our Lord's work for humanity, and this in brief is a resumé of Christian Science teaching. Because Mrs. Eddy deduced Christian Science from the Scriptures, her text-book on the subject is but a recapitulation of the teachings of Jesus, or a commentary on the Bible, and the sole end and aim of Christian Science is to reestablish in this age primitive apostolic religion and healing, with what success, moreover, the healing and regeneration of countless hundreds attest, and those who do not understand or demonstrate Christian Science cannot appreciate or effectually refute these evidences of unadulterated Christianity.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

AMONG THE CHURCHES.

CHICAGO, ILL.

The edifice of Seventh Church of Christ, Scientist, 5318 Kenmore avenue, Edgewater, will be dedicated today [March 27]. Three services will be held, at 10:45 A.M., 3:30 P.M., and 7.45 P.M. The building has a seating capacity of more than sixteen hundred. The actual cost, including the ground on which it stands, was one hundred and nineteen thousand dollars. This is the sixth large Christian Science church edifice to be built in Chicago and dedicated free of debt since 1897. The aggregate cost of these buildings is between $650,000 and $700,000. The total membership of the nine Christian Science churches in Chicago is more than five thousand and the average total attendance at church services is considerably more than ten thousand.—*Chicago Examiner.*

The dedicatory address was in part as follows:—

Just three years ago today this Seventh Church of Christ, Scientist, of Chicago, held its first services, and it seems fitting that the dedication of our edifice, free from all indebtedness, should occur on this, its third anniversary. Seventh Church was organized in conformity with the history of church extension in this city, it being an outgrowth from Second Church, formed to further the Cause of Christian Science by relieving the crowded condition of that church, and by establishing another church in a more remote district of the city. That wisdom impelled and guided the supplying of the great needs of the Cause of Christian Science in this north division of the city, was evident from the first in the crowded condition of the Edgewater Country Club, where our services were held, and the fact that the hall continued to be well filled Sunday after Sunday was proof that many were ready and waiting for this opportunity to be provided. This condition compelled an early decision to build our own edifice, as there was no larger hall available. Accordingly, a little over four months after our organization as a church, we found ourselves in possession of a building lot, and with plans for an edifice fully approved by the church membership. Work was carried along rapidly, without hindrance from disturbing elements, and we were able to hold services in the building, though unfinished, from the first Sunday in January, 1908. Four months later, in April, the building was completed and formally opened.

The members of the Christian Science churches are living witnesses that scientific Christianity heals disease and redeems from sin; that it gives inspiration for their hope, courage in their daily endeavor, freedom from fear, and affords a peace and satisfaction passing human understanding, which is the coming of the Comforter promised aforetime. It has enlarged their mental capacity, awakened their moral natures, and stimulated their desire for spiritual gain and welfare. They can say, with the Founder of Christian Science, that its aim is to injure no man but to bless all mankind.

Remarks at the dedication of a Christian Science church are incomplete without an expression of the deep-seated and profound gratitude we feel to Mrs. Eddy, our wise and beloved Leader. To her constant and God-directed efforts, her steadfast teaching and consistent practice of the divine Principle of Christianity, is due the founding of the Christian Science church, which is showing humanity how to apply the teachings of Christ Jesus.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

FAITH SHOWN BY WORKS.

When we read in the Manual of The Mother Church (p. 17) of the "little band of earnest seekers after Truth" who thirty-one years ago "went into deliberations over forming a church without creeds, to be called the 'Church of Christ, Scientist;' " that the church began its work with twenty-six members; that, "although walking through deep waters, the little church went steadily on, increasing in numbers," and then contrast that small beginning with the unnumbered host who today constitute the "Church of Christ, Scientist," we can but acknowledge that the growth in membership of the Christian Science church has been and is indeed phenomenal in point of numbers. Yet, after all, this is not a true test of the real growth of the movement, nor of its usefulness to humanity. The true test is to be found in the lives of those who are now members of this church and of those who may hereafter become members of it. It is not a question of numbers, but of quality. The need is not so much for more Christian Scientists, as it is for better Christian Scientists; not so much for professions of loyalty, as for Christian living and works of Christian humility and helpfulness.

On page 192 of Science and Health, Mrs. Eddy very clearly defines what constitutes a Christian Scientist, in the following words: "We are Christian Scientists, only as we quit our reliance upon that which is false and grasp the true. We are not Christian Scientists until we leave all for Christ." To the mortal, human sense of things this seems to be a proposition which can easily be assented to in words, but not so easily proved by deeds. The difficulty, however, is not in the truth of the statement, but in the unwillingness of the individual to comply with the conditions; for to the extent that we are accepting and relying upon the testimony of the material senses, to that extent we are rejecting the dominion of Spirit and denying the possibility of there being a spiritual sense.

A willingness to leave all for Christ does not come through ecstatic yearning, but through a calm, clear sense of the allness of God, Spirit, and the consequent unreliability and unreality of all that is unlike Him. Under the definition quoted above we fail truly to become Christian Scientists, in proportion to our failure to lay down self-will, self-righteousness, and self-justification, as well as every other belief which would keep us away from Christ, "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583).

While, to human sense, in our present state of progress heavenward, it may seem difficult or impossible to comply with the demands of Spirit in all cases, the fact remains that this demand is made upon us, and it is well to remember that God asks nothing of us beyond what He gives us strength to perform. Read the divine promise to those who are His servants, to those whom He has chosen and not cast away: "Fear thou not; for I am with thee: be not dismayed; for I am thy God: I will strengthen thee; yea, I will help thee; yea, I will uphold thee with the right hand of my righteousness." It is ours, as Christian Scientists, to claim this promise,—to "go from strength to strength;" but it behooves us to make good our professions in fact as well as in name,—to become more loving, more Christian, more consecrated to the right; to prove to the world, as our Leader bids us, "through living as well as healing and teaching, that Christ's way is the only one by which mortals are radically saved from sin and sickness" (*Ibid.*, p. 458).

Archibald McLellan.

"FAITH IN CHRIST."

Driven by the necessities of the case, both physicians and preachers are having much to say these days regarding the mental factor in the healing of disease. Those who concede that the beneficent works of Christ Jesus and his disciples were wrought through the realization of the efficiency and sufficiency of divine law, are free to acknowledge the inadequacy of the prevailing religious belief, and some are honestly seeking to advance in that spiritual understanding which will equip them to meet the demands which Christ Jesus laid upon all his disciples.

On the other hand, those who maintain that the Christ-method of healing is not incumbent upon his disciples today, are putting forth many theories in explanation of the undeniable healings of Christian Science. They are laying great emphasis upon the "physiological effect of faith." They point to the fact that a large proportion of the functional processes of the body are under the control of unconscious mentality, and declare that "these unconscious processes are doing their best only when they feel the throb of a great faith, a great hope, love, and courage." "When fear is eliminated," say they, "and men go to God in prayer for the cure of disease with faith and love, the unconscious processes respond at once and do their full duty."

This may be said to be a distinctly improved belief, and it indicates the present drift of thought away from dependence upon drugs; but the logic of the statement takes one farther than its makers are sometimes willing to go, for it demands that any person who is not equipped in character and in spiritual apprehension to awaken and nourish this "faith and love," is altogether unprepared to meet the demands of the situation,—all of which would argue that the school of healing and the school of faith should again be united, as they were in the days of the Nazarene. The contention of many physicians, that the object and reasonableness of the patient's faith is immaterial, may be true with respect to the removal of somewhat of fear; but it would surely be a startling proposition to say that Christ Jesus encouraged and exacted faith with a view simply of supplying a needed "physiological factor in the cure of disease."

It is just here that the thought of Christian Science is greatly misapprehended by both doctors and clergymen. Its teaching is grounded on the proposition that man is a manifestation of Spirit, the infinite Mind, and that health and harmony are but the normal expression and effect of our realization of man's spiritual nature and at-one-ment with God. Faith to the Christian Scientist is not the mere belief of the truth of a statement, but the demonstrable (*i.e.*, scientific) understanding of the truth stated. This apprehension of the truth furnishes the condition under which the power of Truth is manifested in human experience.

When the viper fastened itself upon Paul's hand, he was possessed of and kept by a faith that signified very much more than the "stimulus to which the physiological processes respond." Christ Jesus made no distinction whatever between diseases which fall within the respective domains of conscious and unconscious mentality, and he gave his disciples no intimation that they were to cure them otherwise than by the apprehension of and reliance upon

Digitized by Google

Truth. Spiritual quickening and illumination must constitute the major part of all true healing, and the testimony of Christian Scientists regarding this all-significant fact is uniform and world-wide. Mrs. Eddy has stood from the beginning for a higher, more vital conception of the nature of saving "faith in Christ," and it is in the maintenance of the lawfulness, naturalness, and present possibility of its realization, that Christian Scientists have achieved all the good which has attended their efforts.

JOHN B. WILLIS.

IMMORTALITY.

THE 40th chapter of Isaiah begins with the familiar and beautiful words, "Comfort ye, comfort ye my people, saith your God." The statements which follow do not, as might be expected, deal directly with the subject of immortality; but they certainly do so inferentially, since they make a rousing appeal to all who have eyes to see and ears to hear the spiritual message of this great prophet of the olden time. He tells us that "the glory of the Lord shall be revealed, and all flesh shall see it together;" not, some within the veil and others without, but "together"! To God none are ever dead, according to the great Teacher, for "all live unto him;" and when we no longer see "through a glass, darkly," but face to face with the eternal facts, this will be true of us also. Isaiah also tells us that "all flesh is grass;" and he adds, "The grass withereth, the flower fadeth: but the word of our God shall stand for ever." Mrs. Eddy says, "Man in the likeness of God as revealed in Science cannot help being immortal. Though the grass seemeth to wither and the flower to fade, they reappear. . . . In Science, man's immortality depends upon that of God, good, and follows as a necessary consequence of the immortality of good" (Science and Health, p. 81).

All revelation shows clearly that so long as our vision is limited to a material sense of things, so long will the objects of our desire fade and disappear; but there is comfort for those who mourn,—they are bidden to get them up into "the high mountain," and there behold their God! "But," says the sorrowful one, "my way is hid from the Lord." Then comes the answer that, as the "everlasting God" never fainteth nor is weary, so they that wait upon Him begin to reflect the divine power, until they mount up with wings as eagles, soaring above the fogs and mists of materiality, with its shadows of sin, disease, and death, into the light of Spirit. Respecting this event we may say with Paul, "Then shall I know even as also I am known." It is the question of our knowing those we love in the time to come, which weighs so heavily upon the hearts of many professed Christians. "The Master has said so little about it," say they. If we grant this, the reason is not far to seek. It was always life to him. While he did speak of the "many mansions," he also said, "If a man keep my saying, he shall never see death." Who *keeps* his saying today, and holds fast to man's immortality in the face of all evidence to the contrary? Here we are reminded that "a great sacrifice of material things must precede this advanced spiritual understanding" (*Ibid.*, p. 16).

In the parable of the rich man and Lazarus (Luke xvi.) we have a simple and natural presentation of the changes which must come to human consciousness before it is wholly purified from materiality. Here we have a man who, as it seems, lived wholly for self, but in the change called death he neither lost his own identity nor his sense of the identity of others. He called upon Abraham, although their mental states were so widely divergent, and humbly asked that Lazarus be allowed to minister to his great need. This request was not granted, but he ventured another. He begged that Lazarus might be sent to warn his brethren of the consequences of living for self. His human sense of love had not died (love never goes into the grave), but had actually begun to unfold toward the spiritual in a desire for the redemption of others.

If this were the case with a bad man, what must the unfolding of affection be for those who learn in Science that Life is deathless and Love "the master of hate" (*Ibid.*, p. 44)? All mortal elements must vanish away,—all that is unlike God; but the real knows the real, and that which is like God and of Him must share the deathless life of Spirit and bear "the image of the heavenly."

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Camberley, England, March 20, 1910.

Mrs. Mary Baker Eddy, Boston, Mass., U. S. A.

Beloved Leader:—I used to wonder why you permitted the publication of some of the many letters sent you by earnest followers. They seemed to me, then, too sacred for the casual reader to see. Since that time, however, I have been so often helped by reading these evidences of love and loyalty, that I am now impelled to thank you very heartily for allowing them to appear in our *Sentinel*. These letters have shown me how other students, beset with the same difficulties which seem to bind me down at times, have risen above the cloud, and their expressions to you have sometimes brought the light to me, just in the way it was most needed. Human struggles are much alike, whatever part of the world we dwell in, and our progress from sense to Soul seems attended by the same apparent obstacles, whatever position in life we occupy.

To note the progress and loyalty of other students often encourages and helps us on our way; but above all, your noble example, dear Leader, is ever an inspiration to continue firm in our fight against error. Miss Wilbur's book has shown us something of what you have had to endure in the past, and it proved to me very clearly that the one thing we all have to guard against is any adulteration of the absolute teaching of Christian Science as set forth in our text-book, "Science and Health with Key to the Scriptures."

With loving loyalty,

Your grateful follower,

WALTER SHAW.

Johannesburg, South Africa, March 7, 1910.

Dearest Leader:—I am sure it will please you to know that yesterday was a great day of rejoicing with us, for we held our first service in our own church, a beautiful stone structure. We opened our service by singing "Shepherd, show me how to go," a small tribute to your labor of love for mankind, and which made it possible for us to have the truth in this land, and our church (the material manifestation of it). Last year we had the great privilege of having our first lecturer out here. Dr. and Mrs. Fluno's visit has been of the greatest help and inspiration to many of us. I know that our church is indeed going to uplift the whole of South Africa.

In our own home life Christian Science has been more to us than I am able to express. My husband was healed, over seven years ago, when there was no hope left for him in *materia medica;* and as for myself, I feel that I have been brought out of Egyptian darkness. Now, to press on and bring forth more "fruit unto God"!

With greatest love and gratitude,

Yours faithfully,

MRS. ANNIE WILKS, *First Reader,*
First Church of Christ, Scientist, Johannesburg, South Africa.

Atlanta, Ga., March 27, 1910.

Beloved Leader:—At this beautiful Easter time my heart overflows with love and gratitude to you for the truth which is risen in my consciousness, and I felt I must send a message of love to you. I thank you, dear Mrs. Eddy, for

Digitized by Google

Science and Health, for the Manual, for the *Sentinel*, *Journal*, and the *Monitor*, all of which are teaching me the truth that is making me free. I am trying to prove my gratitude by being so unselfed that in reflecting divine Love I may become a blessing to others. My husband and little daughter join me in loving greetings and gratitude to you.

Loyally yours,
VIRGINIA REED FARR.

Fresno, Cal., Feb. 23, 1910.

Beloved Leader:—At our annual meeting on Jan. 21, we unanimously expressed the desire to send you our thanks and our most cordial love for all the good that you have brought to mankind. God is indeed good, is good only, and the only good. How grateful we feel for this understanding revealed to us because of your spirituality, your courage, perseverance, and unfailing love, which we desire to emulate, so as to be worthy of the name of Christian Scientist. The valuable article, "The Church of Christ, Scientist" (*Sentinel*, Jan. 8), was read at this meeting, and we one and all shall strive to prove our loyalty to you and the Cause by following its injunctions and by striving always to be guided by wisdom and Love.

Your faithful followers,
First Church of Christ, Scientist, Fresno, Cal.
MRS. P. GUNDELFINGER,
H. M. COBBEY,
MAX CÄHN, *President*,
MRS. EMMA G. PARSONS, *First Reader*,
Committee.

Harrogate, England, Feb. 11, 1910.

Beloved Leader:—Gratitude and love to you seek for expression, but it is not easy to put into words all that I feel. Christian Science has been a priceless blessing to me, satisfying, vivifying. It has opened the door out of darkness into light, and I thank you, love and honor you, because you have taught me everything I know about God. You have shown me the Christ, and made clear the way out of the flesh into real selfhood. I was so blind with self-satisfaction that it has taken years to open my eyes even a little; but I am rejoicing all the way and am unutterably grateful to you. I am trying to keep the true incentive always in mind, "love for God and man" (Science and Health, p. 454). Your loving follower,

CAROLINE GETTY.

Lincoln, Ill., March 1, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—We extend to you an expression of our love and gratitude for your years of sacrifice and untiring service to mankind. Science and Health, the Manual, and your other writings, have brought health and happiness within the reach of all. Your life with its unselfishness and love is an inspiration to us to strive earnestly to live the life of true Christian Scientists, at all times ready to be guided by your loving counsel. In this way can we best show our loyalty to you and your teachings.

Obediently yours,
Board of Directors, Christian Science Society,
J. W. WHITE, *Chairman*,
OLLIE J. BLACK, *Clerk*.

Sioux City, Ia., Feb. 27, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Dear Leader:—On behalf of First Church of Christ, Scientist, Sioux City, Ia., we are sending today to Mr. Chase, Treasurer, the sum of three hundred dollars for the publishing house fund. The members of this church have ever gladly acknowledged your leadership and promptly responded to any call for financial support to The Mother Church, knowing that as we have given to help the Vine the branch has grown stronger. We all study daily the Bible and your writings, and may it give you joy to know that much healing of disease and of immorality is the result. All are gladdened by the knowledge of God which they gain from these books and the practice of their teachings.

With most loving gratitude from your students of the second and third generations,

L. W. STONE, *Secretary Board of Trustees*.

Winchester, Mass., Feb. 28, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved and Revered Leader:—I have come from Cape Town, South Africa, where a faithful little band of your followers are seeking and finding the truth. Six years ago Christian Science was hardly a name in that far-off part of the world, but today a steadily growing number of earnest workers, together with a small but thriving Sunday School, testify to what divine Love hath wrought. As the representative of the Cape Town Christian Scientists, I bring you greetings, and the assurance of loving loyalty in that branch of the work.

Out of a full heart, I thank you, dear Leader, for all you have done and are doing to bring light and love into hearts and homes today. In grateful love we are learning from your teachings to know something of that kingdom which Jesus said should be found within us.

Your loving follower,
JENNY W. FORSYTH, *First Reader*,
For the Cape Town Christian Science Society.

Jamestown, N. Y., Feb. 12, 1910.

Beloved Leader:—I wish to express my gratitude to you for "Science and Health with Key to the Scriptures." Simply reading this book healed me, fifteen years ago, of five chronic troubles in two weeks. I have been a faithful student and follower of Christian Science ever since, but in the last few weeks I have had a deeper appreciation of your absolute devotion to Principle, your loving and watchful care over the "flock," so that not "one of the least of these" should mistake personality for Principle. The need of the hour has always been met by your wise guidance. The call for democratic church government was like the "voice of one crying in the wilderness, Prepare ye the way."

With gratitude and love, one of your loyal followers,
MISS MARY M. MYERS.

Grinnell, Ia., Jan. 29, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I have just finished reading the story of your life and work as told by Sibyl Wilbur, and I wish to express my appreciation of your herculean and persistent effort to bring this greatest of all blessings, the revelation of Christian Science, to the comprehension of your fellowmen. No words can express our debt to you, and I often think of your remark, made several years ago, that millions might know you were the Discoverer and Founder of Christian Science, but only you could know what it meant. Truly, we see that this is so. The perfidy and ingratitude of students who were incapable of understanding you or your work, must have been the sharpest thorns, but you pressed on, rose above every obstacle, and today you stand before all the world as the greatest benefactor of humanity since the great master Metaphysician, the humble and mighty Jesus of Nazareth. I wish to express thanks for your example of persistence, as well as for the great blessing you have given us and for the sweet benediction of your quiet, gentle, but forceful and earnest life.

In sincerity and truth,
MRS. THERESA WRIGHT BURTON.

THE LECTURES.

COLUMBUS, O.

A very large audience gathered at Memorial Hall, on Monday evening March 7, to listen to a lecture on Christian Science by Frank H. Leonard, given under the auspices of First Church of Christ, Scientist. Mr. Leonard was introduced by the Hon. Judson Harmon, governor of Ohio, who said in part,—

In performing the duties of my office, I find that I am called upon to appear before my fellow-citizens when they are assembled for widely different purposes. Sometimes I feel at home and quite in touch with my surroundings, and sometimes I feel that I am not very well informed as to the objects and purposes of the meeting; yet I am always glad to lend my presence to such occasions. When the lawyers hold a meeting and ask me to attend, I feel myself quite at home; when the railroad men get together, I feel myself at home in the midst of them; and there are some other occasions when I feel myself to have an understanding of the matters under discussion; but tonight I must confess to feeling that I am not sufficiently acquainted with the matters to be discussed in this presence to be able to contribute to your enjoyment of them as I would like to do. I have come to know one thing about all questions which come up for consideration from time to time, however, and that is, that wherever there are a large number of persons banded together in the support of any one given principle, their work always results in the uplift of humanity and in making progress for the human race; and I have also learned another thing which applies to such questions as are to be discussed by the speaker of the evening, and that is, that the truth about any movement in the religious world, or in any other branch of human inquiry, can neither be ascertained by taking the views of the most enthusiastic supporters of that movement, nor by taking the views of the enemies and critics of the movement, but must be secured from the calm statements of those who know the actual principle upon which the movement stands.

We have with us tonight one who knows and can explain to us the Principle upon which Christian Science is based, and we shall no doubt derive great pleasure and benefit from his presentation of the subject. I thank you for having invited me to introduce your speaker and to preside at this meeting, and feeling it to be an honor to be permitted to do so, I shall present the gentleman to you and take my place as one of the audience he is to address.

Correspondence.

NEW YORK, N. Y.

On Thursday evening, March 24, the Rev. Arthur R. Vosburgh delivered a lecture in Second Church to an audience that completely filled the auditorium, many standing throughout the lecture. The speaker was introduced by Virgil O. Strickler, First Reader of First Church of Christ, Scientist, New York, who said in part,—

The Bible tells us that the religion of Jesus Christ offers a full salvation, and it has been well said that if this be true, then it must meet humanity's full need. In our old churches we were taught that salvation was limited to the next world, and that it could only be attained by patiently submitting to the afflictions sent upon us by an all-wise God. This definition has never been satisfying. What men need and crave is an understanding of God that will help them solve the problems of daily life, and that will save them from the disasters and wreckage of human experience.

Mrs. Eddy has given a better definition of salvation. She has declared that the teachings of Jesus, when rightly understood and rightly applied, are sufficient, without the aid of anything else whatsoever, both to regenerate the sinner and to heal the sick. If this be true, then the most important thing that can engage the attention of thinking men and women is to try to gain that understanding. This lecture has been arranged for the purpose of affording an opportunity to the public to learn about Christian Science.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Cranford, N. J.—Mrs. Sue Harper Mims, Church Edifice, April 19.

Milwaukee, Wis. (First Church).—Judge Septimus J. Hanna, Church Edifice, Prospect avenue and Keene street, April 21 and 22.

Fresno, Cal.—Frank H. Leonard, Barton Opera House, April 23 (changed date).

Peoria, Ill.—Francis J. Fluno, M.D., Majestic Theater, 3 p.m., April 24.

University of Michigan, Ann Arbor, Mich.—Judge Septimus J. Hanna, University Hall, April 24.

Dublin, Ireland.—Rev. William P. McKenzie, Antient Concert Rooms, 3:30 p.m., April 24.

Chicago, Ill. (Eighth Church).—Judge William G. Ewing, Bournique Hall, 315 East 23rd street, 3 p.m., April 24; 8 p.m., April 25.

Kokomo, Ind.—Clarence C. Eaton, Sipe Theater, April 26.

Taylorville, Ill.—Francis J. Fluno, M.D., Elks Theater, 8:15 p.m., April 26.

Redondo Beach, Cal.—Frank H. Leonard, Redondo Pavilion Auditorium, April 26.

Evansville, Ind. (First Church).—Clarence C. Eaton, Wells Bijou Theater, April 28

La Grange, Ill.—Prof. Hermann S. Hering, Church Edifice, Cossit Boulevard and Catherine avenue, 8:15 p.m., April 28.

Portland, Me.—Mrs. Sue Harper Mims, Kotzschmar Hall, Congress street, April 28.

Danville, Ill.—Prof. Hermann S. Hering, Grand Opera House, April 29.

Elko, Nev.—Frank H. Leonard, Opera House, April 29.

Duluth, Minn. (Second Church).—Miss Mary Brookins, Lyceum Theater, 3 p.m., May 1.

Boise, Idaho.—Hon. Clarence A. Buskirk, Pinney Theater, May 1.

Wheeling, W. Va.—Judge William G. Ewing, Victoria Theater, 3 p.m., May 1.

Louisville, Ky.—Francis J. Fluno, M.D., Macauley's Theater, May 1.

TESTIMONIES OF HEALING.

In September, 1902, I was operated upon for appendicitis and peritonitis. I was in the hospital for about eight weeks, was under the knife three different times, and thrice was pronounced beyond all help. After leaving the hospital, I remained in my home for nearly three months and then went back to my studies at school. Being of an athletic turn of mind, I tried to reenter the games and sports, but injured myself in four places, which steadily grew worse, so that I had to wear a truss, an abdominal supporter, and numerous other bandages. Two years ago I was in such agony that I was about to do away with myself, but finally decided to make one more effort to get well. I went to my operating physician and asked him to operate upon me at once, but he said he would rather have me go to a man more skilful with the knife, and immediately telephoned to a doctor in Albany, N. Y. This doctor examined me minutely, gave me some very severe tests, and after completing his examination declared it a very serious case and called in three other noted physicians. Finally he stated that it would be a very expensive operation and he could not give me any encouragement. He also stated that the muscles in the former incisions had never healed together, and that he would be obliged to cut them again and let them knit together afresh. I then went to another physician, who told me that six months in bed would not harm me, but he could not say it would benefit me. He said he would be unable to do the operating himself, and advised me to go to still another physician. I did so, but he too would neither operate nor give me any encouragement. I also went to see a number of other noted physicians and surgeons, but none of them were able to help me in any way.

I then became utterly discouraged, as I was unable to work, and returned to my home a complete wreck. Through the suggestion of an uncle, I turned to Christian Science for help. I asked my aunt to take the case, and had my first treatment on Sunday night. After one week's treatment I left off wearing my truss and everything else used to support me, and was running and jumping as every young man should be able to do. Today I can truthfully assert, with many thanksgivings to God and to Mrs. Eddy, that I am as well, happy, and healthy as any one need be.

T. Z. Ayers, Jr., Pittsfield, Mass.

At the close of my college course in 1905, I was left in a miserable mental and physical state, having suffered for a number of years from frequent attacks of acute stomach trouble accompanied by severe pains in the heart, etc. I also suffered greatly from rheumatism, and at times during my school course it was necessary for me to lie in bed while studying my lessons. About this time a growth began to manifest itself on my neck, and I was considerably alarmed at its presence. I had also very troublesome eyes and had been wearing glasses for five years, an eye specialist having informed me that I would have to wear them the rest of my life, as my eyes could not be healed. I suffered greatly if I removed them even for a short period.

I tried different kinds of medicine, with exercise and baths, but received only temporary relief from my troubles until finally I turned to Christian Science through the healing of a sister. I began to take treatment, and at the first visit my eyes were healed. My glasses were laid aside, and I have not worn them since. I also experienced a wonderful moral and spiritual uplift from this treatment, and all desire for smoking, drinking, and profanity left me. The stomach trouble was relieved in a few weeks, as was also the heart trouble, and the growth was destroyed after one year's treatment. Since that time many discordant conditions have been overcome, and in the past three years I have depended wholly on Christian Science as my guide, not only to health and happiness but in business matters, to which it has been applied with marked results. I am filled with gratitude to God for the many blessings I have received, and also feel deeply grateful to Mrs. Eddy.

Richard Morgan Smith, Detroit, Mich.

[Translated from the German.]

I would like to express my thankfulness for what Christian Science has done for me. For three years I suffered with kidney trouble, the attacks being attended by severe pain, and the last year they were more frequent. In February, 1907, I had such a severe attack that the physician thought it necessary for me to undergo treatment in a clinique. I stayed at the clinique for ten days, but that this treatment was practically of no effect was evidenced by another although less severe attack, which I had a few days later.

In the mean time I had heard of Christian Science and decided to take treatment. As soon as I was able to go out, I went to see a practitioner. After a few treatments I felt much better, and after three months I needed help no more. All the symptoms of the trouble had disappeared, and I felt well and strong, as I had not done for years. Some time later, while away from home on a trip, symptoms of the old trouble appeared; they vanished, however, after I had read in the text-book for several hours.

I thank God that I have found the way to Christian Science, and I also thank Mrs. Eddy with all my heart for all she has done for suffering humanity. I am grateful, too, for the loving guidance through which I became acquainted with the teachings of Christian Science.

Bertha Goldschmidt, Frankfort on the Main, Germany.

I want to add my testimony as an appreciation of what Christian Science has done for me and mine. When it found me I had had poor health for years, on account of a complication of peculiar and very painful troubles of long standing. I had been treated by several prominent doctors with only temporary relief, besides being operated on by a fine surgeon, and told that I could never be well again. I also had a chronic bladder affection which distressed me greatly. For seven years I had suffered with catarrh, which had seriously affected my throat, causing constant coughing and headache. I went to have the glottis removed, hoping for a little rest; but it was not done; and I was told that nothing more could be done for me.

Here was God's opportunity. I was advised to try Christian Science; which I did, and in a few days was a changed woman. I have since enjoyed good health, which had been beyond any shadow of hope. There have been many demonstrations of the power of Truth in my family. I have seen chills, fever, croup, earache, etc., quickly healed. For the noble, God-inspired woman who has made the truth plain in this age, my gratitude is unbounded. My greatest blessing is to understand my true relationship to God; and to know that I am in

> The way the holy prophets went,
> The road that leads from banishment.

Mrs. R. E. Garland, Palestine, Tex.

When I first became acquainted with Christian Science I was suffering greatly from stomach and bowel difficulties, sinking-spells, and rheumatism. Many times I have thought that if it were not for my children I would do something desperate, for it seemed that I could not get into a much worse condition. I had vapor baths and powerful drugs, but without any benefit. My healing in

Digitized by Google

Christian Science seemed very slow, and my husband frequently remarked that I had better give up the treatment; but I always answered, "No, I am gaining; I feel different." Away inside, somewhere, I knew I was getting better. Now that the peace and love "which passeth all understanding" is mine, and nothing can take it from me, I thank God for all that Christian Science has done for me and my family. I am very grateful to Mrs. Eddy for the wonderful truth she has made plain to mankind. I know it is the truth, for I have proven it.

EURETTA PFUMMER, Hibbing, Minn.

I receive so much help from reading the testimonies of others, that I give this with the hope that some one else will be helped as I have been. I was to have a dental operation which I was told would be very painful, and the dentist said I would have to take gas, but I asked him to extract the root without this means, which he said he would do. I called up a Christian Science practitioner and asked for treatment, and will say that it proved a pleasant experience for me and a surprise for the dentist, for there was absolutely no pain and it showed him what Christian Science does for those who rely upon the truth. I have no words to express my gratitude to God, and to dear Mrs. Eddy for this truth. I am grateful for the spiritual understanding I am gaining from the daily study of the Bible and Science and Health.

ANNIE L. WHITE, Kansas City, Mo.

I have been a student of Science and Health for four years, and would like to tell of some of the blessings which I have received. The power of Truth was proved when I burned my hand and arm so severely that to mortal sense the flesh seemed destroyed. I called in a Christian Science practitioner, and in three hours after the accident I was entirely healed. My mother, who lives with me, was very ill with liver and kidney trouble, and she was healed in Christian Science; also my son, who was suffering from a malignant growth on his lip, was healed through this Science. I am indeed very grateful to Mrs. Eddy for revealing this blessed truth to us.

MRS. MARY WOODRUFF, Kewanee, Ill.

In early childhood there came into my life a circumstance which at one stroke changed me from a care-free child into a thoughtful woman, with one purpose, around which everything was made to center. As the years passed, and failure and disappointments clustered around the shrine which my mind and heart had made, this purpose, though partly fulfilled, but amid an environment which wounded sorely my affectionate nature, became a deep sorrow, which often plunged me into uncontrollable grief, and I felt that if I did not soon win out, grief and finally death would sap my life away. After graduating from high school, and trying to teach (though in a state of nervousness too great to continue the work), I went to my parents' country home, feeling all the time that the struggle was about to end. After being at home only a short time, I was seized with a serious illness,—severe pain in my side, combined with heart, lung, and kidney trouble. I had never been so ill, and I thought death was near; but this did not disturb me, as I did not think life worth living.

My parents had taken up Christian Science before this, and as I had lost all faith in medical skill, they read to me from the Bible and the Christian Science text-book all night. As I got no better, and had a high fever, a practitioner was asked to take the case. Deeper, however, than the physical pain, was the mental anguish which I did not think any practitioner could touch. During all my illness my parents did not seem to worry or show any fear in the least. My father often repeated to my mother, "Perfect love casteth out fear;" and to me he would say, "Baby, God's love is all-sufficient for you." The practitioner kept on working, sometimes giving me two or three treatments a day. She would send me such texts as this, "In every thing give thanks;" but this only made me sadder, and when my mother asked me why I wept, I told her I had nothing at all for which to be thankful. Yet God's goodness continued, and now I know that I have everything to be thankful for. A lady who was visiting at our home during my illness said afterward that she told her husband this case would be the test of Christian Science for them; that if it helped me, there was something in it. After having taken treatment for a week, I was able to ride four miles and back, to Christian Science services; and I found, in addition to the bodily healing, that sorrow had lost its power over me and I could once more realize happiness.

This is only one of God's numerous blessings to me, and I am sure that Mrs. Eddy must be following the Christ-life, or her light would not so shine before men, or her good works glorify the Father which is in heaven.

MISS MARIAN S. NEFF, Talmage, Neb.

I am the person referred to in the above testimony, and wish to say that since Miss Neff's healing, in November, 1907, Christian Science has been my only help. Shortly after that time I was healed of acute rheumatism and heart trouble by Christian Science. I have been benefited in many ways, and my daily prayer is for spiritual growth.

MRS. ANNA STROUBE, West Plains, Mo.

I am very grateful for the many blessings that have come to myself and family through the study and application of Christian Science. My first experience in the healing power of Christian Science was a number of years ago, when I was perfectly healed in three or four treatments of a cough which had been very severe for a number of weeks, and which had troubled me, at times, nearly all my life. Material remedies had been tried, but without my receiving any help from them. During the time that the Christian Science treatment was being given me, a case of contagion which seemed to affect me was instantly met and overcome.

It is impossible for me to write or tell of the many blessings that have come to us through the help of Christian Science. I have three children in the Sunday School who have never taken any medicine. All their ailments, some of which were seemingly very severe, have been overcome by the understanding of this truth. Again I want to express my loving gratitude to God, and to Mrs. Eddy for this healing truth which has brought to us light and understanding.—MRS. MAUDE HOWARD, Grand Rapids, Mich.

It is over eight years since I first began to read the Christian Science literature. I had worn glasses for five years previous to this time, and after one treatment by a Christian Science practitioner I was able to lay them aside, and have never found it necessary to put them on again. I wish to express my gratitude to God, and to Mrs. Eddy, for all that Christian Science has done for me. I was lifted out of the depths of darkness and despair by this blessed truth. I became an earnest seeker for the good in Christian Science, and within the past year have enjoyed the privilege of class instruction, for which I am very thankful. I have found Christian Science an ever-present help, and words fail to express the great assistance in daily living which I have received from the study of this healing truth.

MISS SOPHIA C. PAMPERIN, Green Bay, Wis.

Digitized by Google

About four years ago I had occasion to test Christian Science in the case of an accident. While running a swiftly revolving machine I had the bone of one finger severed and a portion of the bone and flesh taken from another. I had a surgeon to dress the hand, but he used no drugs, knowing that it was against my wishes for him to do so. After dressing the hand he told me to call at his office in three days, and he would then put it in splints. In the mean time, however, I had Christian Science treatment and dismissed the surgeon, so that he did not see the hand again after dressing it the first time. I continued the Christian Science treatment, and the fingers healed beautifully. The only pain I experienced was in removing the first bandage. Many of my friends told me that when the bone began to knit it would be very painful, but that law was also overcome, for God's laws bring only peace, harmony, and happiness.

For this and many other blessings which have come to me and mine through the study of Christian Science, I feel truly grateful to God, and to Mrs. Eddy, who has been so pure and loving as to give this truth to mankind.

W. L. JARVIS, Norfolk, Va.

When Christian Science found me, in April, 1907, I was in the depths of discouragement, infidelity, and fear, also a victim of the drink and tobacco habits. I think it was only about one week after I started to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, that I found I had no more desire for liquor, and in about four or five weeks I lost the appetite for smoking. Some other errors were not so quickly overcome, but I am very thankful to say that every day the way grows brighter. Christian Science has made a new man of me, and for this regeneration I wish to express my gratitude to God, also to Mrs. Eddy.—GEORGE REBER, JR., Philadelphia, Pa.

After being in poor health for several years, I broke down completely in February, 1905, and my case was pronounced lead-poisoning. A physician advised me to give up my trade as painter if I wanted to be cured of this disease. He also said that I would never dare to paint again, for if I did I surely would have a relapse and would then be incurable. After three months of medical treatment my health improved very slowly, and my physician gave me permission to go to work at paper-hanging, this being the only other work I could do that I was strong enough to undertake, and so I dragged myself to work, as my family and I had to live. I felt very miserable and discouraged, and often spoke of ending my life; but I had a loving wife and two dear children, and I could not bear the thought of parting from them in such a sinful way.

I had been working at paper-hanging for about three months, when one day a lady spoke to me about Christian Science, and said among other things that I could be healed from my afflictions through Christian Science treatment, and that I could keep right on painting while taking treatments and be cured of the disease and never be troubled with it again. Still, knowing what the physician had told me (and two other physicians had said the same thing), I was too skeptical to believe that Christian Science could do me any good, and I neglected to investigate the subject. About three months later I painted a small room in forty minutes, and that night I experienced the severest cramps I had ever had during all my illness. This set me to thinking about Christian Science again, and three weeks after this last attack I consulted a practitioner. She told me the same thing that the other lady had told me about Christian Science, and so a week later I commenced to take treatment. The following week I varnished a large room, and when I retired I wondered what effect this would have on me. Upon awaking the next morning I was surprised to see how fine I felt. After that I painted occasionally without being affected by it. The week following my third treatment I painted ten hours every day without feeling the least tired or affected thereby, and my health improved so rapidly that all my friends and neighbors wondered how it was that I was getting well "all of a sudden," as they called it, after being hardly able to carry myself about for eight months. The happiness which I experienced after I received my fifth treatment is almost indescribable. I was completely healed.

This was four years ago, and though I have painted steadily ever since, never for a moment have I felt any bad effect from it. My wife and children have also been healed from colds and some other ailments by reading "Science and Health with Key to the Scriptures," by Mrs. Eddy, and have been without any medical aid whatever during the past four years. We all thank God for this truth, and hope that His blessings will be with the one who brought it to us.—H. A. PLUEDDEMAN, St. Clair, Mich.

About three years ago a sudden and overwhelming attack of throat trouble necessitated aid other than my own. The Christian Science practitioner called upon was an entire stranger, and the details of the case were not given; but during the healing process Love appeared to me as the presence and power of real being, without any sense of a personality. A strong, calm, sweet sense of the presence of divine Love filled my consciousness with light. A gradually waning sense of personality had fitted me for the reception of this most beautiful reflection of impersonal Love, and I was healed of the ailment which had characterized the greater part of my life, and my voice is now strong, clear, and distinct in articulation.

HELEN FRENCH REED, Roxbury, Mass.

For a long time I have felt it my duty to express publicly my gratitude for all the blessings which have come to me through Christian Science. It certainly is the "pearl of great price." Everything has become changed to me. —I, too, see "a new heaven and a new earth," for the former things have passed away. I do not enjoy the things that once gave me pleasure and now I have peace and harmony. I have found God, Truth, and know that Love supplies all our needs. Christian Science gives us a Principle to follow, and we know that as we sow we shall reap.

I have been healed of sleeplessness, nervousness, a diseased condition of the eyelids, and a very bad cough which I had for six years. I find that the more I read in Christian Science the more I want to read it, and then everything becomes more harmonious and I am much happier. My greatest desire is to become a better Scientist, each day to reflect more of the one Mind,—our Father-Mother God. I am indeed thankful to God for this wonderful truth, and to dear Mrs. Eddy, whose teachings have helped me so much.—CORA A. POILLON, New York, N. Y.

I am very grateful for the many physical benefits received in Christian Science, which are, however, as nothing in comparison to the spiritual uplifting I have experienced through its teachings. For years I suffered terribly. My legs ached and I was unable to walk any distance. I fainted very often, each attack being, as it seemed, worse than the other. I was under the doctor for quite a long time and spent several weeks in bed. It is now about two years since I took up Christian Science. I was treated by a practitioner and was quite well within a fortnight. I am indeed pleased to say that I have never fainted or spent a day in bed since. It is good to know disease is not real, and that God, good, is ever present. I hope I may progress in this knowledge and be able to help others.

ZILLAH WRIGHT, Eaglescliffe, Durham, England.

Digitized by Google

My boy was taken very ill one Friday evening. As my husband is not a Christian Scientist, he called a physician. The child was in convulsions, and from the first the physician said the case was very serious and that little could be done. The child himself called continually for a Christian Scientist, and at one o'clock the father went for a practitioner. She worked all night, and although the child at times seemed relieved, the conditions rather grew worse. Saturday morning a consultation of physicians decided there was no hope—no possible chance. As one of them expressed it, "There is nothing that we can do." It was the verdict that the boy might live through the night, but it was not probable.

Upon being told that I was a Christian Scientist, one of the doctors advised that we have that treatment. That afternoon, with every evidence of approaching death present, the conditions were met and destroyed, and on Sunday morning the child was able to sit up. By the following Wednesday he was about as usual, looking none the worse for the illness which he had suffered. This child, since he was five years old, has been taught Christian Science, so he has learned to help himself. He was unconscious much of the time, but he never gave up and during his conscious moments he declared the truth incessantly. He said over and over the prayers he had been taught, and when it was said he could not live he declared, "There is no death, for God is Life. God is my life, I cannot die. God cares for me." This proved that he truly trusted God. Had he himself not worked, it would have been difficult to have saved him, but his trust was rewarded. I feel that my boy was saved, not only because of the faithful work of the practitioner, but also because of his own use of the understanding gained in Christian Science, in daily right living. Much responsibility rests with parents and teachers, for right thinking and living is made involuntary by regular habits of good, practically used and applied in each daily need.

I am more grateful than I can say for all the help Christian Science has been to me, and I honor and love our Leader, Mrs. Eddy.

MRS. JENNIE HUSCH, Jersey City, N. J.

I am very glad to be able to pay a tribute to Christian Science, and heartfelt thanks to our dear Leader. This testimony will show how wonderfully our dear Father in heaven can and will heal wounds, no matter how alarming they may look to the mortal eye. On Dec. 3, 1907, I went to work as usual, but had a severe injury to my hand from a circular saw. A wagon was called to take me to a doctor, but I realized that God alone could be the healer, so I declared the truth as well as I could, knowing He would help me. I got to the doctor; and after waiting for an hour he came and looked at the fingers. Once in a while the pain was terrible, but by declaring the truth it soon left me. The doctor (a fine man) told the driver who was with me, that all he could do was to cut the fingers off, as there was not enough left to be sewed together. I then realized that I must say something, so I told him not to cut my fingers off, but again he said that there was nothing to be sewed. I then told him to put together what was left, and the good man said he would, and that in four days, when the bandage was taken off, he would have to amputate them. On the fourth day he did not cut the fingers off, but looked first at me and then at the hand; he could scarcely believe his own eyes.

When I got home from the doctor that first day, my daughter, a member of First Church of Christ, Scientist, came to see me, and she had a copy of our Hymnal to give me for a present. I told her what had happened and asked her to see a dear friend of ours, who is a practitioner, and tell her what the doctor had said and done. I slept well all night, and although the doctor had warned me that I would have a high fever, he could find none at all. I have the same fingers, and there is not a mark to show the injury. For this healing, and many spiritual upliftings, I am very thankful to God our Father, to Christ Jesus, and to our beloved Leader, Mrs. Eddy.

CHRISTIAN HOEFEL, St. Louis, Mo.

About two years ago I was healed of a malignant growth and also of a spinal trouble received from a fall when a girl. After the birth of my little daughter, two years and a half ago, there followed an illness of three months of which I knew nothing except what I was told. The physicians said there seemed no possible chance of recovery. It was six months before I gained sufficiently for my husband and nurse to take me to Seattle for an operation. Words cannot express the torture of that month, and on returning to my home in Everett, a new growth appeared within a week.

I knew that all earthly help had failed, and I did not care, thinking death would be welcome. God seemed to have deserted me; my prayers for help seemed all in vain, darkness settled all around me; there was no God and no hope. A friend then advised my husband to try Christian Science, but when he asked me if he should call a practitioner, I told him it was of no use, that everything had failed, that he had spent all for me, and should try no more. That afternoon, however, a Christian Science practitioner came and gave me treatment, assuring me that as God's child I would surely be well. Before night the pain had left entirely, and I rested for the first time in months without an opiate. Truth had pierced the darkness, I knew there was a God, and within a week the growth disappeared.

The peace and harmony that have come into our home seem as wonderful as the healing of sickness. The only way we can show our gratitude to God is by following in the Master's footsteps, in the way so beautifully outlined by Mrs. Eddy in that wonderful book, "Science and Health with Key to the Scriptures."

MRS. G. C. ELANDER, Alameda, Cal.

[Written for the *Sentinel.*]

THE UNSPOKEN PRAYER.

CASSIUS M. LOOMIS.

THERE is a prayer of thanks no child of earth
Can voice in words. I seek in vain to find
Some sentence deep enough to give it birth,
But language finds me lagging far behind.
That man is God's own child—how vast this truth!
That we His household evermore will share—
No age, no time, yea, one eternal youth.
Should not our lives be one unceasing prayer?

And yet my hour of praise still lacks some word
Of thanks for God's great gift. And so I wait;
And when my days with petty ills seem blurred,
And error would my blessings underrate,
I woo this wordless silence, trusting all
To Him who doth reward me openly.
Must not the eye that notes the sparrow's fall
Discern the depths of my unspoken plea?

There is a zone of silence, tense with thought,
Beyond the realm of speech. It must be true—
Our Master felt its nearness when he taught
Love's glorious gospel to his chosen few.
Then should I strive to lisp a tongue unknown?
Or should I not forego my wordless plea,
And dwell content within this sacred zone,
A child of God for all eternity?

FROM OUR EXCHANGES.

[*Christian Register.*]

Thinking men discredit not only the old claim that the minister, representing the church, speaks with a superhuman authority, but they discredit the view of religion which is usually associated with that claim. They no longer regard religion as coming into the world from an extramundane source. God is at home in this world, and religion is a natural function of normal human life. The knowledge, then, which the modern minister should possess is a thorough knowledge of the phase of life represented by the broadest meaning of the word "religion." In this he is to be a specialist. He is to be a master in the field of religious experience and religious thinking, in the field of the spiritual life, in the field of the application of religion to practical life. These fields are one field. The world of thinking men listens to the man who knows: in religion it listens to the man who knows.

[*Universalist Leader.*]

There seems to be in the minds of many a notion that there are a good many kinds of Christianity among which we are to choose, and measurably this is true. That is, there are a great many different interpretations of this one thing, and it is wise for us to choose that interpretation which most nearly approaches truth and efficiency. But when we have determined what sort of Christianity we believe in, then we can all take to ourselves the advice of Dr. Hunter, who says, "He will seek to hold and preach his Christianity not as a problem, but as an open secret; not as a theme for critical research, but as a divine message; not as a discovery, but as a revelation; not as a philosophy, but as a gospel; not as a creed, but as a faith." That is, he will vitalize his belief into a life.

[*Christian Work and Evangelist.*]

In these days of bitter poverty in immediate contrast with enormous wealth, a great party is growing up whose principle is the abolition of all private property rights. The gospel brings the true solution. It does not cry, "Down with wealth," but it whispers, "Come down with your wealth into the midst of the humble and the needy, yet keep your large horizon; consider not merely the pressing wants of the immediate neighbor, but of the whole community, which also is the neighbor. So use your wealth that the whole of it, to the very last dollar, shall serve the interests of the community, which are the interests of the kingdom of God!"

[Lyman Abbott in *Outlook.*]

Godliness is more than correct belief about God, more than obedience to God's law, more than trust in God's protecting care. It is the consecration of one's life and all its energies to the accomplishment of God's will in the world, in a spirit of joyous, loyal companionship with him.

[*Examiner.*]

The most serious enemy the religion of Christ has to encounter is the indifference of those who profess it. The gates of hell cannot prevail against a living and militant church; but if the church itself fall away, who shall save it?

[*Western Christian Advocate.*]

The hill called Calvary is not a single locality outside the walls of Jerusalem. It is universal. Infinite in number are the human Calvaries, crowned with crosses.

[*Outlook.*]

To be a follower of Christ is not to do great things; it is to do all things in a great spirit, the spirit of unselfish service.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

To Subscribers.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist.—The Mother Church.—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.80, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.
Ten copies to one address, each, one year, $1.90; six months, $1.15.
Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.
Fifty copies to one address, each, one year, $1.50; six months, 90 cents.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Moorfield Storey, president of the Boston Bar Association, sounded a note of warning at the recent annual banquet of that organization. He expressed the belief, with President Taft, that the administration of criminal law is a disgrace to civilization, and that on the civil side the law always works benefit to the man with the longest purse. "Men are blind," he said, "who cannot see that we will soon be entered on the greatest contest in history. A struggle is coming against executives, against judges, and against everybody who wishes to deny his fellow-citizens equal rights and equal opportunities.

"The expenses and delays of litigation, even in the best conducted lawsuits, are enormous, and in the hands of unscrupulous practitioners have become a means of oppression hardly distinguishable from blackmail. We must set ourselves to the work of reducing the expenses and delays of litigation. In the present crisis it is our duty to uphold the courts and the law, but our first duty is to make the law an instrument of justice."

Governor Hughes of New York, in a recent speech says: "Political corruption is not partisan. It is the common enemy. The essential operations of government inevitably furnish opportunities for scoundrelism, and against this curse all parties and the people as a whole must continually wage an unrelenting war. These are wholesome days for the people of this state, full of opportunity and promise. We may be humiliated by disclosures, but these mark our safety as well as our danger, our progress and not our decline. I want to see the springs of government pure and its waters sweet to the taste. I want to see the illicit efforts of privilege frustrated, bribery and corrupt arrangements destroyed, and the market-places, where governmental favor has been bought and sold, converted into true assemblies of honest representatives of the people."

A despatch from Washington says: Criminal prosecutions of a most sensational character for violation of the customs laws have been undertaken by the Administration, and there is reason to believe that within the next two weeks the federal grand jury will return indictments which will startle the country. Evidence has been discovered which leads to the belief that these frauds have not been confined to the importers of sugar, but that their ramifications are far more extensive in character than has hitherto been supposed. Indictments against practically all the officials of the sugar trust have been returned, and the indications are that many others will be forthcoming.

The Fairbanks expedition to Mt. McKinley, the highest peak in North America, reached the summit April 3, after a climb of one month from the base, according to an announcement. No traces of Dr. Cook's alleged ascent were found. Four camps were established during the ascent and a trail was blazed all the way up the crest. Up to twelve thousand feet the climbing did not present unusual difficulties. For the next four thousand feet the way led over the steep ice-field. The final dash to the top was made from the sixteen-thousand-foot camp.

The interstate commerce commission, in a recent decision, holds it to be "unjust and unreasonable" for the Pullman company to charge equally for the upper and lower berths in its sleeping-cars. Differential charges are ordered in several instances, and Pullman rates from Chicago to the Pacific are ordered reduced. This ruling is recognized as the opening wedge for a general readjustment of sleeping-car rates.

Governor Hughes of New York has recommended a general probing of legislative corruption, and the enactment of his direct primary bill. Machinery has been set in motion which will probably result in the passage by the Senate of a resolution for a wide and thorough inquiry into all suspicious transactions involving legislators and legislation.

On account of the fact that there are only seven members of the supreme court now sitting, Chief Justice Fuller announced last week that the appeal of the Standard Oil Company in the dissolution suit brought by the United States will be restored to the docket and be reheard. The tobacco trust cases were also ordered to be reheard.

A committee on municipal affairs of the Chamber of Commerce, which has spent over a year in thorough study of the local situation and of experiments made elsewhere, will report to the chamber in favor of a commission form of government for Pittsburg. The movement has no direct connection with the graft exposures.

Judge Landis in the United States District Court has given the National Packing Company and its subsidiary concerns until April 27 to plead to the indictments charging them with operating in violation of the Sherman anti-trust law.

The rivers and harbors appropriation bill, as reported from the Senate committee on commerce, carries $52,566,418 in actual appropriations of cash and amounts involved in continuing contracts.

New Jersey officials have announced that the state will build no more macadam roads, experiments proving that several forms of bituminous materials are better and cheaper.

The New York board of estimate and apportionment has voted sixty million dollars for the construction of new subways, to be used as fast as the money becomes available.

Edward Payson Weston passed through Cleveland on April 13.

International.

King Albert has approved the plans of the ministry of the colonies for reforms in the Belgian Congo and they will become effective on July 1, when a large area will be opened to free commerce. The reforms include: A reduction in the taxes, which will be collected in money and not paid by labor; the substitution of native for white officials; the restriction of obligatory labor on the part of adults to the works dedicated to the improvement of their own conditions; the suppression of polygamy.

A Berlin despatch announces that the imperial unearned increment tax bill, as published, differs in many particulars from the forecast of the measure that had been printed. The bill abolishes all taxes of this class now imposed by municipalities; substitutes a general tax, the revenue from which is divided in three parts, forty per cent returning to the municipalities, ten per cent going to the states, and fifty per cent being retained by the imperial government; a graduated scale of tax rates. The estimated income to the government would be about $21,250,000.

A manifesto, regarded as a compromise, was signed a few days ago by the Czar. The manifesto commanded the introduction into the imperial Duma and the imperial council of a bill on the subject of the procedure to be followed in the case of laws affecting Finland only, and those affecting the empire generally. According to the terms of the manifesto, the Finnish Diet will be allowed to give its opinion on the provisions of the measure, which views will be submitted to the Duma and the imperial council for their consideration.

It is expected that by the end of April the railhead of the Cape-to-Cairo railroad will have been carried for one hundred miles into Congo territory. Locomotives are now running to a point forty miles beyond the Congo frontier, or 2,187 miles from Cape Town, and the earthworks are completed for sixty miles farther northward.

Indications of the German workingmen's prosperity, as contained in the Prussian savings bank statistics, show that the deposits in the kingdom, which comprises only two thirds of the empire, totaled $2,393,250,000 at the end of 1908.

The recently adopted land ownership law, restricting the ownership of land in Japan to such foreigners as come from a country which extends similar privileges to Japanese residents, has been promulgated.

The concession for the financing of the construction of the Chinchow-Aigun railroad, sought by a syndicate of British and American capitalists, has been granted by China.

The second Japanese domestic bond conversion of fifty million dollars has been oversubscribed one and a half times.

Industrial and Commercial.

Lorenzo Trevino of Monterey is constructing one of the largest systems of irrigation in Mexico upon his ranch of two million acres in the state of Coahuila, bordering on the Rio Grande for more than one hundred miles. It is stated that he will spend more than two million dollars gold in the construction of dams and in building a system of canals and ditches.

Building operations throughout the country in March were upon a phenomenal scale in point of money invested, according to advance sheets of the *Construction News*. Permits were issued in fifty-two principal cities for the construction of 20,718 buildings involving a total estimated cost of $70,095,753.

The Grand Trunk charter bill, favorably passed by the Rhode Island House and Senate, became law last week. It gives the Southern New England Railway Company, an auxiliary branch of the Grand Trunk railway, a direct line through Rhode Island, with a seaport outlet at Providence.

Five hundred miles of new railway are to be constructed in northern Alberta this season, and it is estimated that fully a thousand men will be required for the work, in addition to the six hundred men now in the various construction camps.

The last legal obstacle in the way of the new United Station Company of Kansas City, Mo., has been removed, and work has begun on the station and terminal system, which will cost thirty million dollars.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE NEED OF UNDERSTANDING.

CLARENCE W. CHADWICK.

It requires very little effort for a mortal to say, "I believe." In fact it is about the only thing he can do. He can say that he believes in God, and yet know absolutely nothing of the Supreme Being. He can say that he believes in Christ Jesus as the Saviour of the world, and yet have no adequate or scientific comprehension of Christ, Truth. He can say that he believes that God is Love, and yet fall far short of loving his neighbor as himself. He can say that he believes that God is all powerful, and yet in the same breath acknowledge another power called evil. He can even go so far as to say that he believes in Christian Science, and yet know little or nothing of what it really is. Worst of all, he believes that he can believe his way into the kingdom of heaven, and yet have no disposition to correct or change his present mode of thinking and living. From beginning to end his existence is merely a belief existence. He admits that he is endowed with five physical senses which cannot give him any reliable information concerning God, and yet he clings to these so-called senses with a determination to believe what they tell him. This leaves him in the domain of fear, anxiety, worry, suspicion, doubt, superstition, mysticism, and ignorance.

Finally, through the pangs of discontent and unhappiness, a change takes place. Christ, Truth, knocks at the door of consciousness and calls in unmistakable tones, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light." For the first time he begins to grasp the true purport of self-denial and to put off the old man. The fallacy of blind belief appeals to him from a new and unexpected standpoint. He now sees the need of understanding, and he begins to cultivate that higher or spiritual sense which alone can lead him into the knowledge or understanding of God and His perfect spiritual creation. He learns to see and grasp things that other people do not see, in that he is looking more deeply into the realm of spiritual reality, where ideas are found to be substantial, tangible, and practical. Where others are conscious only of confusion and suffering, he is experiencing a measure of peace and comfort, because he is able to look beyond the outward or fleeting sense of things into the perfection of being.

Here it is that he finds the true idea of God and man and discards the carnal or material sense of things. He looks into Mind and finds health apart from matter, and ever afterward he discards material remedies, knowing that infinite Spirit never intended or provided them for human use. However tenaciously others may hold to *materia medica* and insistently urge him to yield to its decree, he now knows that the same serpent which talked to Adam and Eve is suggesting to him the efficacy and use of material remedies, and he accordingly places the suggestion where it belongs. Men and women of admitted ordinary common sense, friends and foes alike, rise up on all sides to call him foolish and even "crazy," if he elects to discard the god of medicine. He is, they think, deliberately refusing to do anything for himself, unless he rejects spiritual means and clings to inanimate matter for help! Such is the dictum of the unenlightened human mind that has failed to grasp the meaning of the Scripture which declares that God created "every plant of the field before it was in the earth, and every herb of the field before it grew."

Most Christian Scientists have spent years in serving the god of medicine before they knew anything of Christian Science. When they awaken to the truth that God is Spirit and that the only remedy prescribed by Spirit must be and is spiritual, they turn away from so-called material remedies with a degree of spiritual enlightenment and understanding which enables them to rely directly and intelligently upon divine power in every hour of need. The Christian Scientist has tried both ways, and chooses to "hold fast that which is good." Must he be dubbed an ignoramus because he refuses to return to the cast-off garment of *materia medica*, which is generally admitted to be devoid of an unchangeable law or Principle? The zeal with which mortal mind attempts to step in and to regulate other people's affairs when the sacred and practical ministrations of Christian Science are preferred in place of the drug-taking habit, would indicate more the ignorance and religious intolerance of the early centuries than an enlightened twentieth-century understanding and Christian toleration.

Christian Science practice has passed its experimental stage, and the sooner all Christian denominations approximate an understanding of this important fact the sooner they will relinquish human concepts for the divine idea, and become tolerant of the Principle and practice of Christian healing. Christian Science invites the most searching investigation of its teachings and practice, which will invariably do away with all untempered criticism and ignorant condemnation of its methods and ability to heal and regenerate mankind. Those who would keep pace with the advancing thought of the hour must awaken to the necessity of understanding the truth. The death-knell to blind belief has long since sounded. The great Master exposed the presumptuous claims of the material senses, and Christian Science has come to reinstate and to give to the world a demonstrable understanding of his sacred teachings.

When it is recognized that the suppositional reign of evil obtains only so long as the senses of man are regarded as material or physical, the great need of spiritual awakening and enlightenment must surely dawn upon individual consciousness. No one who actually knows what Christian Science is has any desire to criticize or condemn its teachings. He is at peace with himself and therefore with the world,—he knows the truth. The individual who is swayed by the ignorant opinions of others is capable of arriving at the most unreasonable and utterly ludicrous conclusions concerning Christian Science. It is simply amazing what some people are willing to accept as intelligent and authentic information upon the subject of Christian Science. Sooner or later the awakening must come to all who imagine that the sacredness of the Christ-teaching can be discerned or understood through the medium of material sense.

Christian Science reveals the metaphysical but practical meaning of the "serpent" referred to in Genesis, and

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

through this revelation the human race is being emancipated from its long night of enslavement to the so-called material senses. Spiritual understanding is taking the place of blind belief, superstition, ignorance, and religious intolerance. Let those who assume to teach others, —to bring the Christ-idea of purity, health, and happiness into individual consciousness,—let them stop to consider the poverty-stricken condition of their own mental storehouses unless they are endowed with a practical demonstrable understanding of the power of Mind to correct and destroy the arguments and suggestions of the serpent of materiality. Until they realize the need of enlightened understanding, they must submit to the Master's impeachment: "Let them alone: they be blind leaders of the blind. And if the blind lead the blind, both shall fall into the ditch." Who would not rather deserve the characterization of the Bereans, who were declared to be "more noble than those in Thessalonica, in that they received the word with all readiness of mind, and searched the Scriptures daily, whether those things were so."

THE FOURTH BEATITUDE.

ANNE EVANS.

JESUS said, in that wonderful hillside sermon: "Blessed are they which do hunger and thirst after righteousness, for they shall be filled." When urgent need drove me to take up the study of the Christian Science text-book, in the hope of proving for myself some of the truth it voices, such a wealth of light and comfort was opened to my sorely tried mind and heart that I could scarcely bear to lay the book down. When I did, and the mortal picture of the problem then confronting me presented itself, it caused me such grief and anxiety that perforce I sought the book again. From it, I learned to turn my mind from the limited mortal view of the situation, and to seek that brighter world which Christian Science teaches us to find and to demonstrate. So, in trains, street-cars, and subways, by day and by night, I read Mrs. Eddy's book, and I found in it not only peace for my weary mind and heart, but a sure and simple way, which any child could follow, through the trials I had not dared to contemplate.

I know that my experience has not been in the least unique. Since then, again and again, I have known people who, in periods of mental, physical, or spiritual extremity, have turned to the text-book of Christian Science, and in their hunger and thirst after the bread and wine of spiritual sustenance it offers, have shut out every other thought, and given to that book their constant attention; and never once have I known them to lay it down, unrefreshed and unanswered in thought. If the study has been sufficiently humble and unprejudiced, the problem will have been lifted out of the atmosphere of an earthly need into that of an heavenly opportunity. Perhaps the help of a practitioner has been required in order to bring out the physical healing, but the student can see for himself the Principle and its rule of operation, and can by his own mental work help to bring about an harmonious condition in his own affairs. He need never again be the victim of a sense of helplessness.

I think that every earnest seeker for the way in Christian Science finds, in the first year or more of his study, that he has little time to read any other books save the Bible and our text-book, which is indeed its "Key,"—that other books fail to hold his interest, and that to read them seems like wasting precious minutes that might be invested in drinking the draughts of pure truth. The treadmill of "work to eat, eat to live, live to work," becomes glorified with the consciousness that every waking hour may be filled with thoughts of truth. No moment, no task can be dull or monotonous, and no work done under the beneficent influence of Christian Science can suffer from thoughts filled with truth. An hour spent in waiting, once looked upon as wasted, becomes the most productive of the day; and every incident of the busiest life comes to the Christian Scientist with its power to bless or its need to be blessed. It is our privilege to help, or to be helped by, each thought which presents itself to our consciousness, if we will watch our own thought concerning it, declaring faithfully the truth about it and contradicting the error.

When we have delved a little more deeply into the new world to which we are admitted in our search for truth, we are filled with joy, and almost with awe, at the marvels which scientific thought is daily bringing to light. Miracles are wrought before our eyes, we see the sick healed, and every field of labor lifted out of the condemnation of discord and fear with which mortal mind seems to prevent itself from accomplishing the tasks it sets itself. We see these fictitious mortal laws set aside in favor of those who know how to avail themselves of the valid laws of God's making, and we say, Why didn't I have this truth years ago? Why have I been wandering for years in the mists of hopes that cheat, fears that threaten, and work that leads to nothing? If I had had the opportunity to know and to study, how happy I should be to be able to do the great healing works which these elder brothers are doing! How fair it must be up there, on the heights of understanding! In our eagerness to know all the truth, we almost envy those whose courage and devotion, through trials we are not yet strong enough or brave enough to bear, have carried them a few steps farther on the way "which, to discover, we must travel too." We look at the little children, with their great privilege of Sunday School instruction in Christian Science, and think what a priceless heritage their wise mothers are storing up for them, even while they enjoy its riches each day. If some one had only started us that way! And when we think of those older children who have been blessed with the instruction of our Leader,—ah, they have been given opportunity indeed!

Dear pilgrim student, no more opportunity to know the truth exists, or has ever existed, than is today at the door of every possessor of a Bible and a copy of Science and Health. No one who wishes them need be without a copy of these two books, thanks to the facilities offered to all for obtaining them by the wise and loving provisions of our Leader. And until we can truly say that we have accomplished, in our own thoughts, the work of "casting down imaginations, and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ," we have not lived up to our present opportunity of knowing the truth, and proving it.

So, then, we have assigned to each one of us plenty of work to keep us from worrying about other people's opportunities and privileges in the field of Christian Science. Progress can only be marked in the humbler heart, the purer life, the mind more obedient to reflect the Mind that is God, more in harmony with man in His image and likeness. On pages 495 and 496 our text-book lays down the simple rule for progress in Christian Science, and fully explains how to work it out. Having studied that rule carefully, daily, our progress becomes a matter of watching each thought; selecting, discriminating, scrutinizing, eliminating, proving; holding fast that which is good, turning from and rejecting that which is bad, and hence false; yielding not to the temptation to watch for sin and its consequences in others; looking not to mortal mind and its manifestations, nor thinking how pat a rebuke is to another's error, but earnestly striving to weed out every thought of self-justification, criticism, and condemnation, and getting back to the immortal facts of creation, which Jesus voiced for himself and for all mankind: "Before Abraham was, I am;" "I and my Father are one." With such a view of man's eternal reality, there would be no

Digitized by Google

room in thought for personalities, for either idealization or criticism of mortals.

Divine Love gives us not only the opportunity to struggle against "the sin which doth so easily beset us," but has placed at our right hand and our left, constant monitors, tender counselors, to point us the way to scientific achievement and immortality. And with every triumph of Truth over error, Love gives us proof positive that we too can succeed. The untiring patience with which our Leader has expounded "precept upon precept, precept upon precept," makes her whole book not only a sufficient guide for our instruction, but a monument to her loving care. To what infinite pains she has gone in order that not one of us should misapprehend the precious truth confided to her for communication to mankind in this age. Unwearied with her long-time labor on behalf of weary humanity, she has gone on "from strength to strength," providing, with wisdom and foresight from on high, for each need and each opportunity still further to bless mankind.

Today, salvation is published in so widespread a manner that it is doubtful if there be one English-speaking person who has not heard, whether he believes it or not, that Christian Science heals. The Lesson-Sermons reveal the relation of this healing to that foretold by the prophets, and performed by Christ Jesus and his immediate followers, and show the method to be the same. The Wednesday evening meetings publish, upon unimpeachable testimony, the good news that this method is healing all manner of disease and discord today. Weekly and monthly periodicals corroborate our faith, pouring out such a blessing that our consciousness is not big enough to receive them. Reading-rooms, havens of rest and retreat from the heat of the day, stand open to welcome us, and in them we find a table prepared before us, spread with the fruits of the best thought and work of the scientific world. There we may meet and enjoy the thoughts of some of the finest minds in the field of Science. At hand we have the lectures of a board of devoted men and women, specially selected for their ability to make clear to us this life-giving truth. Any or all of these helps may become ours, to take home and study, to make our own, for trifling sums. We may send a priceless gift of them to some one we love, for a few pennies. The lecturers themselves are busy carrying the message to all the world, and no one can possibly estimate how much healing is being accomplished by these lectures, spoken and written.

All this understanding and love is being turned into the great general fund of available good, and we can hardly estimate the richness of the store of opportunity which is daily being stored up against the moment when we shall be ready to take full advantage of it. We know, however, that in the measure we pour out blessing and love to all mankind, in that measure will our capacity to receive these blessings, to fulfil these opportunities, be enlarged. Our Master has charged us, "Freely ye have received, freely give;" and a correlative is found in the hymn,—

> Ceasing to give, we cease to have,
> Such is the law of Love.

If we could count our blessings, perhaps the greatest would be that we too may bless, and thus help to swell the tide of love and praise ascending heavenward, in the name of Christian Science.

SPIRITUAL SOARING.

CARL HORTON PIERCE.

THE recent surprising feats of the aviators of America, England, France, and Germany serve to draw the thought more attentively to the spiritual aspiration which has been called forth by Christian Science. In spiritual soaring Mrs. Eddy is leading the race to the heights where "conception unconfined is winged to reach the divine glory" (Science and Health, p. 323). We observe the inspiring sight of our noble spiritual pathfinder preceding an army of those who follow her as she follows Christ.

Unlike material aviation, however, our spiritual upward progress is not attended with constant fear of death and sudden annihilation. He who has awakened to Truth is dependent on no frail construction for his safety, but realizes more and more as he ascends that "underneath are the everlasting arms,"—the same arms that guide Arcturus with his sons,—eternal, supreme, divine Principle. Gathering confidence with each succeeding moment of spiritual ascension, we learn to rest upon these wings of Love, whose supporting influence is able to keep us from falling, and thus height after height is reached in our spiritual progress. The beginner in Christian Science, like the lad who first tried the sandals of Hermes and was unable to utilize their bounding wings, may perhaps subject himself to the criticism that he is not balanced, and needs to keep his feet firmly on the ground; in fact, those not in sympathy with Christian Science have been inclined to say that because of these spiritual flights its followers are not practical. Those, however, who know Mrs. Eddy best and who apprehend her teachings, know that she has given to the world an eminently practical religion, and that through the application of definite spiritual laws governing man human misconceptions are set at naught.

The business man, when first perceiving in some measure the beauty of the idealism of Christian Science, may indeed yearn for green pastures beside still waters, where the roar of the mill-wheels ceases and one is alone with God; but Christian Science calls for the practical operative work. The novitiate may try the winged sandals; but wisdom comes to his assistance and says to him: "Where Science found you, there you must demonstrate. Are you able instantaneously to turn the current of a lifetime of previous conceptions into this new thought? Could the pious Polycarp change at once from good to evil? No. Science demands of you practical proofs as well as mere professions. Here you are in business. Whose business is it?" To this the business man is led to answer: "My Father's business." Wisdom asks: "Is the selfishness, the unfair competition, the deception with which you are seemingly surrounded, of God?" The business man must answer: "No, nothing is of God that is not good and in keeping with His government." "If, then," says wisdom, "you are about your Father's business,—whether you are behind a counter, or managing a railroad, or conducting a corporation,—what is your duty?" And in many instances the business man is led to reply: "My business is to demonstrate the power of Truth and Love where I am, realizing that where God would have me be, there I can heal the sick and reform the sinner, even if that be confined entirely for the present to changing my own false concepts and uplifting my own sense of the Christ so that my light be not hid under a bushel of error."

A Christian Scientist recently said, in conversation with a brother Scientist, that a half hour a day spent in penitence and prayer, in order that we might get out of our own thought the evils which seemingly "so easily beset us," was the best practice to which we could set ourselves. Mrs. Eddy says (Miscellaneous Writings, p. 355): "To consummate this *desideratum*, mortal mind must pass through three stages of growth;" and she goes on to show that these stages are self-knowledge, humility, and love. When the business man can truly say that, working from the point where Science found him, he has obtained a thorough knowledge of himself; has attained humility, and has demonstrated justice and love in his business surroundings, he may then awaken to see that the kingdom of heaven is indeed within him and is a present possibility—on Wall street as well as in a practitioner's office. Gaining a little understanding each day, learning to balance himself more

Digitized by Google

and more securely, the faithful student finds that the spiritual unfoldment is sure, certain, peace-giving, abundance-providing. The business man then no longer strives to satisfy human ambition, unnatural modes of living, or a mistaken sense of abundance, and in simpler desires, humbler modes of living, and righteous economy, he finds that God indeed meets every human need, and the rule of the Christ-mind becomes a simple matter—not complex.

Thus the business man finds that in obeying his Leader,—in coming out from the world and being separate mentally, yet remaining and doing his work in a practical manner,—his reflection of the Christ has been exalted by the experience, and as this Christ-idea is exalted the very simple consequence follows that people flock to the light which shines. There is no simpler law. The eye follows the light. People follow the spiritual light today, just as in the time of Jesus. Having now learned the art of balancing his own spiritually ascending thought, the Christian Science aviator, seasoned by experience and strengthened by many a battle with the conflicting currents of mortal mind, goes forth each day with growing assurance that God will provide; that He is a very present help in time of trouble; that He will abundantly save; that His arm is not shortened; that His word does heal; that by it the sick are healed, the dying raised to life, the dead (in trespasses and sins) are resurrected; and that God's will may be done on earth and in the business world as it is done in heaven.

TIME AND ETERNITY.

HARRY FRANKLIN PORTER.

To him who lives in consciousness of ever-present Love, whose every moment is devoted to good works, who lives to labor and labors to enjoy, there is no past, no future; there is only just today, the eternal now. A moment is a moment, ever just the same. An hour is a moment still, on just a little larger plan. And so it is with days and weeks and months and years—they are still but moments on an ascending scale.

So time is but a phantom—the image of man's fears, the grim and gruesome shadows of the past upon the dark, foreboding imageries of the future. It is in truth a limitation,—the compass of man's sins,—and as salvation upon the near horizon dawns, this with all else that limits must vanish into naught. God's spiritual man—all that really is—reflects his Maker's infinitude. To him indeed time is nothing; eternity is all.

How then can man wax old? How can one moment, one month, one year, one span of life, be different from the one just by, the one to be? God is the same forever, and the never ceasing emanation of infinite Love is an unfailing crystal stream whose smooth and rhythmic flow goes on eternally, bathing all the vast creation in loveliness and beauty beyond compare, while over and around it there broods an everlasting peace.

MAN AND THE DAISY.

ELIZABETH A. POGSON.

THE writer has often read and pondered Mrs. Eddy's teaching that man is "the compound idea of God" (Science and Health, p. 475), trying to gain a clearer view of her own and her brother's real individuality and place; but she never seemed to gain a clear and definite understanding of this profound truth until the light was suddenly revealed to her through a child who was reciting a lesson in nature study. The explanation was as follows: "The daisy is called a compound flower, because each little petal is a perfect and complete flower in itself. Each gains its own nutriment—life, substance—from the same source; each does its own work, and cannot hinder or take upon itself the work of another petal, but every petal is necessary in its place to make a perfect daisy."

At once I saw myself and all my brothers and sisters as the daisy petals,—each perfect and complete, each entirely independent of the other, each reflecting Life, Truth, intelligence, and substance, the one source of being, divine Mind. Our work, then, is to cling steadfastly to that Mind in all things, and the infinite qualities of that Mind will be reflected in us and we shall be clothed, like the daisy *petal*, in white raiment, the symbol of purity. It is only when we turn away from that source and think that another is necessary for our welfare, or that another's work could be done better by us, or that one is in the wrong place, that we, like the fallen petal, become brown and faded.

With this realization came great joy. Reasoning from cause, as we are taught to do in Christian Science, we have perfect God, perfect Mind; therefore man, His compound idea, must be and is perfect. Then all fear that we can lose our identity vanishes, for we see man generically (symbolized by the daisy) and man individually (symbolized by the petals), each complete and in his right place, each as important and necessary as the other, each distinct, but one in unity, and all encircled by the everlasting arms of Love.

AN APPRECIATION.

[In a lecture before the University of Berlin, Germany, where he is at present serving as exchange professor, Benjamin Ide Wheeler, president of the University of California, made the following statements in regard to the Christian Science denomination. The church edifice to which he refers, however, is the original Mother Church, an extension to which, completed in 1903, and seating five thousand people, is now used for services. This edifice also was dedicated free of debt and cost two million dollars.—EDITOR.]

A noteworthy characteristic of the time is the sudden appearing of religious bodies which are in no wise—not even in name—connected with the old churches. The Christian Scientists are a striking example thereof, having had six hundred and sixty-eight churches and eighty-five thousand members in the year 1908, although this denomination was only founded in 1879, and its Founder, Mrs. Eddy, is still living. Boston is the center of this cult and the seat of The Mother Church. The services are held in a luxurious edifice finished in 1894, which cost one million marks [about $240,000], and was dedicated free of debt.

The belief of this faith—according to its own way of expressing it—"does away with all material medicines, and sees the remedy for all ills as well as for sin in immortal Soul; and that the mortal mind is the source of all suffering with which mortals are stricken. . . . The fundamental truths of Christian Science are the unreality of matter, the spiritualization of man and the universe, the omnipotence of God, and the powerlessness of evil."

In spite of the scorn and ridicule with which it has met, the rapid growth of this religious body has been a matter of surprise, and many intelligent and well-educated people belong to its membership. No one who has watched its results closely can deny that this religion has brought much sunshine and peace into the lives of innumerable individuals and into many homes.

Beneath the mighty ocean deep,
A pearl lay in its shell asleep,
Until a diver brought to sight
The luster of its wondrous light.

My heart within a dungeon lay,
It languished there by night and day,
Till 'neath Truth's wand the fetters broke,
And life and love in me awoke.

MARIE RUSSELL.

[Editorial in *Liverpool* (Eng.) *Post and Mercury.*]

To have lived through the age of materialism is a matter for satisfaction, and to have reached a day when a materialist does not exist, save a few youthful members of secularist societies who are fond of harrowing the souls of the frequenters of their favorite pothouses by the ignorant volubility of their atheism. Who that can recall the intellectual tone of the "sixties" and "seventies," with theology butting against a message of science that it misunderstood and recklessly misinterpreted, ever hoped to see the dawn of such a day? Huxley, whom Dr. Campbell Macfie, in his "Science, Matter, and Immortality" (Williams and Norgate), well calls "that great spiritual teacher," foresaw it when he said, "The honest and rigorous following up of the argument which leads us to materialism inevitably carries us beyond it." The same foreknowledge was present in the mind of Herbert Spencer when, speaking of matter, he said, "That which persists unchanging in quantity, but ever changing in form under these sensible appearances which the universe presents to us, transcends human conception, is an unknown and unknowable power which we are obliged to recognize as without limit in space and without beginning or end in time;" a sentence which Dr. Macfie finely paraphrases, "Evolution and dissolution are merely the systole and diastole of the heart of God." But those great men probably did not foresee that within a few years their disciples would admit God to be the inevitable corollary of the consciousness of man, and the ultimate reality of matter to be an idea in the divine Mind. "The substance of the schoolmen," says Dr. Macfie, "the noumenon, the *Ding an sich* of the German philosophers, the points of force of Boscovitch, the ether of the modern physicist, can also be conceived as power, and conceived emotionally as a conscious power, as the power that makes beauty and love." Even "as certain forces result in the concept matter, so the result of all the forces which constitute conscious life result in the concept of God." The dogmatic materialists of fifty years ago were wont to sneer at love and beauty as mere transient ideals, but the philosopher of today knows them to be eternal realities, limbs of the cosmic consciousness, existences compared with which a Dreadnought is as gossamer-like as the tail of a comet. If we ascend up into heaven, they are there; if we make our bed in hell, behold they are there. If we take the wings of the morning and dwell in the uttermost parts of the sea, even there shall their hand lead us, and their right hand shall hold us.

The children of men too long have been misled by the apparent reality of matter. The rough-and-ready materialist says: "A steam-engine I know; my spirit I do not know, for I have never seen it, heard it, touched it, or smelled it." And therein he makes a great mistake, for his spirit he does know, and it is the only thing he knows to exist, for as Stanley Redgrove, author of "The Calculation of Thermo-Chemical Constants," remarks in his "Matter, Spirit, and the Cosmos" (Rider and Son): "It is not matter, but spirit, that we know: and by this be it understood that I know myself as such, and the external world as an ideal construction in my mind. We do not know matter in itself; what we do know and experience are changes in states of consciousness." If it be objected that this is mere idealism, then listen to Huxley, who, commenting on Berkeley's argument that matter and motion are known to us only as forms of consciousness, remarked: "I conceive that this reasoning is irrefragable. And, therefore, if I were obliged to choose between absolute materialism and absolute idealism, I should feel compelled to accept the latter alternative." Matter, says Dr. Macfie, is force, and nothing but force—nothing but mental effects of a certain kind, produced by forces which are neither visible nor ponderable. All the whirling worlds, all the dancing atoms, are merely our subjective projections of various forms of force impinging upon us, and "we cannot empty the idea of force of its psychical significance. The term and the idea are derived from our own conscious action. The moment we identify matter with force, we identify it with conscious will and conscious being. There is no way out of it. What was formerly called the substance of matter is now known to be force, and force is recognized to be the soul or will of God." This is only an old truth newly expressed. The atoms of Lucretius had free will; the monads of Leibnitz had perception and apperception. To Schopenhauer matter was will made perceptible and visible. Haeckel endowed his atoms with sensation and will, and W. K. Clifford considered them bits of mind-stuff.

Thus God and the life of the world to come are facts, not merely hopes, and death, with all his terrors, vanishes before the new evangel. Says Dr. Macfie: "Death cannot be the end. The scientific logic that would say so is easily refuted by philosophy, and philosophy can easily go farther; it can show that when we talk of beginnings and ends of consciousness we talk nonsense. Birth and death are only finite terms useful enough for the finite judgments required for every-day life, but used with respect to consciousness they are meaningless. The question is not even fit to be discussed." We are facts in the Mind of God, and we cannot perish.

[Jno. M. Dean in *Memphis* (Tenn.) *Commercial Appeal.*]

After reading an extract from a sermon delivered by a local clergyman, in which he makes the statement that Christian Science is a broad road to hell, I am reminded of the old saying that "history repeats itself." The scribes and Pharisees of Jesus' day entertained the same opinion regarding his work and teachings, and the statement of the reverend critic regarding the Founder of Christian Science in this age and those who believe in her interpretation of the plain command of Jesus to heal as well as to teach, is directly in line with the charges made against the Master. In Matthew's Gospel we read: "But when the Pharisees heard it, they said, This fellow doth not cast out devils, but by Beelzebub the prince of the devils." Then follows the answer of Jesus: "If I by Beelzebub cast out devils, by whom do your children cast them out?"

Let me recommend to the gentleman a surer and quicker way to get rid of Christian Science than by resorting to vituperation and abuse: Let him offer to the world something that meets its needs better than Christian Science is meeting them, and he will find thousands of hearers where he now has but one. Until he can do this he had best abandon the old, worn-out method of abuse, which is as unconvincing as it is unbecoming a follower of the meek and lowly Jesus.

[William J. Bonnin in *Waterloo and Crosby* (Eng.) *Herald.*]

Christian Science declares unswervingly that there is and can be one, and only one, reality, and that reality is Truth. This Truth must be either spiritual or material; there cannot be absolute reality in both the spiritual and the material. Spiritual sense declares that God, Spirit, is omnipresent, infinite. Material sense, unable to cognize God or know Him in any manner, asserts that matter is the only reality, while Christian Science declares that there can be no reconciliation between Truth and error, any more than there can be between heat and cold, light and darkness. The only absolute existence anything has is the existence it has in the divine Mind which created it, and in that Mind, too pure to behold evil, all is perfect, harmonious, and eternal. The relative existence anything may have in the mortal, material mind, is nought but the imperfect human concept, an erring belief. It can be but belief, for

Digitized by Google

only of absolute Truth can knowledge be held. Christian Science designates the human material concept, and all the evil which that concept holds (and no evil exists anywhere else) as error. Did not Jesus stigmatize evil, personified for the thought of the day as Satan, as a liar? Did he not teach that the flesh "profiteth nothing"? Paul, too, referred to the whole material concept as the "carnal mind," which he explained was enmity against, or contradiction of, God, the divine Mind. It is this distinction that gives force to such injunctions as "Be ye transformed by the renewing of your mind," and "Let this mind be in you, which was also in Christ Jesus."

It will be seen that no Christian Scientist would aver that matter, evil, and pain are anything but very real to our human senses, though such a travesty is constantly being presented from the pulpit as Christian Science teaching.

[Charles K. Skinner in *Harbor Springs* (Mich.) *Graphic.*]

A clergyman has undertaken to instruct your readers on the teaching of Christian Science, and as he does not claim to be able to do any of the works which Christian Scientists are doing today all over the world, we are wondering if he really understands the words of his text—"By thy words thou shalt be justified, and be thy words thou shalt be condemned." It is related that Jesus said: "Ye shall know them by their fruits;" "Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven." The only mark that Jesus gave his followers by which they should be known as such, was that they should do the works that he did. Has our brother thought of this? On another occasion the Master gave the disciples the parable of the two sons, who were sent to their father's vineyard. One said, "I will not;" but he afterward repented of his action and went. The other said, "I go, sir: and went not." Jesus' closing words were, "If ye love me, keep my commandments."

This critic has quoted very freely from the text-book of Christian Science in an effort to discredit its statements. The fact remains, however, that this book, Science and Health, when studied from the view-point of its author, Mrs. Eddy, which is that of the spiritual creation of man and the universe, will be found to be true and demonstrable in every statement. The fact that a child cannot understand, or is too indolent or stubborn to apply the rules of mathematics, does not change those same rules that have done effective service with thousands of other children before him.

The gentleman has well said, "One way to prove a system of ideas erroneous is to put them into practice." Has he done so in this instance? Mrs. Eddy has proved her system correct by putting it into practice, and that her teaching is true has been proved by an innumerable company of people from every walk in life. Ridicule and opposition have tried in vain to change the fact that the word of God as taught in Christian Science heals the sick, reforms the drunkard, and regenerates the sinner, as no other system ever has since the time of Jesus the Christ. The fact that one has no personal knowledge of the works of Christian Science gives him no license to declare publicly that they have not been done. Did our brother believe ten years ago that wireless telegraphy could be a practical success? Does he understand its laws now, so that he can demonstrate them?

The charge against Mrs. Eddy of "crass ignorance of the Scriptures" is not in good taste from one who has not shown his willingness to do the works demanded by the Master. Some ten years ago a prominent minister of this state, who is still a pastor of a large church, preached a sermon against Christian Science, and some years later, when asked to do so again, he said, "No, I have learned a great deal about Christian Science since I did that, and I shall never speak in that way again." The critic's reference to Mrs. Eddy's bank account is likewise unworthy of one in his position. The Christian Science text-book is in nearly every public library in the land, and in every Christian Science reading-room for the free use of all seekers, and is loaned to those desiring it. The statement that it is insisted that every Christian Scientist have a copy of every new edition of Science and Health is untrue and silly, and inasmuch as no one buys the book unless he wants it, the reverend gentleman is saying a great deal about something which does not concern any one but the Christian Scientists themselves.

[John Ashcroft in *St. Louis* (Mo.) *Star.*]

Christian Science is scientific Christianity. It is the provable knowledge of God, as taught and demonstrated by Christ Jesus. In her effort to restore the undivided garment of the Master's teachings, Mrs. Eddy has specifically stated in the preface to the Christian Science text-book, "Science and Health with Key to the Scriptures," that "the Bible was her sole teacher."

Christian Science has nothing in common with a philosophy which would ascribe suffering "to discord of the four elements of nature," but heals suffering on the basis of the understanding that it is produced by the errors of mortal mind. To describe as "superstition" the belief that physical disease is curable by purely spiritual means, indicates a lack of appreciation of the teachings and works of the Founder of Christianity, and overlooks the fact that such cures were the signs which followed the understanding of the Master's teachings during the first three centuries of the Christian era, and are today the evidence of the restoration of a true sense of these teachings in Christian Science.

[J. M. Jackson in *Toronto* (Ont.) *World.*]

Matter is not and never was a healing agency, for matter (in whatever form employed) is inert, mindless, without intelligence—though, until one knows the truth upon this point, one may seem to be benefited temporarily by material means, according to the faith one reposes in such means. We have no record of Jesus' ever employing matter as a healing agency, whether in the form of human electricity or other material device. On the contrary, he invariably relied solely upon spiritual means to accomplish the healing work, never finding it necessary to supplement this with any human device. All through his ministry he pointed to his Father (Spirit) as the source of his power, and his method was not only immensely superior to all other known methods of healing, but was the method which those who profess to follow him were distinctly enjoined to practise.

[A. C. Fishback in *Indianapolis* (Ind.) *News.*]

The other day there was published a short synopsis of a paper that had been read before the ministerial association, in which a critic vigorously attacked Christian Science. I am not a Christian Scientist, but I am a member of the same denomination as that critic. Besides, I have met the gentleman and admire him. His statement that Christian Science has "caught us napping" is a little insipid, and is closely akin to an incident that will be readily recalled by Bible readers. I recall that Alexander Campbell during the first half of the last century caught the orthodoxy of that day napping, and when they were finally aroused they became almost a unit in persecuting Campbell and his followers, and for fifty years the Christian church had to fight for its life—in fact, some of our older brethren still fire a broadside now and then at their enemies, just to let them know that they, like the flag, are "still there." All of this is recent history, so recent in fact that I am astonished that any minister of the Christian church could be induced to lead an attack that savors of persecution against any people who call Christ the Lord.

[C. S. Adams in *Warren* (O.) *Tribune.*]

Christian Science does not claim to teach anything not found in the Bible or that may not easily be deduced from Bible statements. What it does claim is that it has reduced these statements to a system that may readily be comprehended by modern thought and that may be practically applied to the healing of sickness and sin. That it does this, any one who will give the requisite time and thought to the subject may prove for himself.

[Willis D. McKinstry in *Marquette* (Kan.) *Tribune.*]

The teachings of Christian Science enable mankind to distinguish between the so-called human mind and the infinite divine Mind, between that which is false and that which is true. One might think that two times two equals five, though this would not make it so; but it is possible to understand—to know—that two times two equals four, because of the unchanging law of numbers.

We have Scriptural authority for declaring that man is the image of God, divine Mind, the All-knowing, and as man's existence is the reflection of the one Mind, man must express the intelligence which knows. Therefore he does not imagine he is something which he is not. In Paul's epistle to the Romans he said: "The Spirit itself beareth witness with our spirit, that we are the children of God; and if children, then heirs; heirs of God, and joint-heirs with Christ." Thus, as a man understandeth the things which are true, so is he heir of all things, by reason of the spiritual law of divine Principle.

[Charles W. J. Tennant in *Evening Citizen*, Glasgow.]

In a late issue a critic is reported to have condemned Christian Science while speaking at a meeting in London. Permit me to say that I am sure his condemnation has arisen from a misunderstanding of the subject, for the fruits of Christian Science are exactly what he advocates in another part of his address—viz., the fruits of early Christianity, healing the sick and reforming the sinner. The command of Jesus that those who believed on him were to heal the sick as well as preach the gospel, is as binding on Christians of the twentieth century as on those of the first. The power that enabled them to perform these works of old has never altered, being omnipotent, omniscient, and omnipresent throughout eternity. It only needs to be understood and applied today to produce the same results.

The gentleman is also reported to have said he thought Christians had lost all knowledge of God in these days. Now, God, "the same yesterday, and to day, and for ever," is the Principle of Christian Science, and to the extent that a man understands this Science, to that extent does he know God. This knowledge is absolutely essential before the kingdom of God is attained within, for the Master has said, "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

AMONG THE CHURCHES.

READING, PA.

An important real estate transaction has been effected in the sale of the oldest building in the city, the farm dwelling-house on North Fifth street between Buttonwood and Woodward streets. This old landmark has been purchased by the congregation of First Church of Christ, Scientist, of this city, and a chapel will be erected, plans for which are now in preparation. It is the intention of the Christian Scientists to erect a church edifice within the next few years. The property extends sixty feet along Fifth street and is one hundred and thirty feet in depth.

Reading Telegram.

ATLANTIC CITY, N. J.

First Church of Christ, Scientist, the first edifice to be erected in Atlantic City for a congregation of that growing denomination, will be opened on Easter Sunday morning [March 27]. The new church, a very neat structure, designed to seat four hundred persons, occupies a site one hundred by one hundred and twenty-five feet in dimensions on Brighton avenue, between Atlantic and Pacific. It has been built and paid for through individual subscriptions of members and friends. The building is designed to accommodate not only the rapidly increasing number of persons interested in Christian Science in Atlantic City, but to provide a place of worship for the large numbers of Scientists from Philadelphia and other cities who come here for recreation and pleasure and who have worshiped heretofore in the limited quarters of the congregation in a hall on the Boardwalk near Virginia avenue. The location of the new church building is particularly advantageous for the many Chelsea cottagers who are members of Scientist congregations in their home cities.

Atlantic City Union.

WATERTOWN, S. D.

One of the late additions in the way of public buildings in the city is First Church of Christ, Scientist, located on the corner of First avenue S. and Maple street. This is one of the finest churches in the city for its unostentatious appearance and architectural beauty. It is built of the popular Watertown sand lime brick and Bedford stone trimmings, with wood porticoes and columns, which are finished in white. This building is fully equipped with every modern convenience from the basement to the auditorium. The ground floor comprises the Sunday School room, which seats about two hundred, a reading-room, and a nice, roomy foyer. The second floor is the auditorium, with a seating capacity of four hundred and fifty. This twenty-thousand-dollar edifice, the largest and finest in the state, recently completed after nearly two years of hard work on the part of the Christian Scientists in Watertown, was dedicated yesterday [April 3]. The dedication proper was held in the morning. Introduced by G. W. Case, Judge Septimus J. Hanna in the afternoon gave an address upon the teachings of Christian Science.

Public Opinion.

The victory of Christianity over the antique paganism was in large measure a fruit of the devotion with which the women of Rome, more than the men, accepted the new teaching. And if this teaching shall really accomplish what Jesus proclaimed as its purpose, to vanquish the world and establish the kingdom of God on earth, then must this also be a problem in the solution of which a most important part is reserved to woman.—VICTOR RUDBERG.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

A PEAN OF PRAISE.

MARY BAKER EDDY.

Behind a frowning providence
He hides a shining face.

THE Christian Scientists at Mrs. Eddy's home are the happiest group on earth. Their faces shine with the reflection of light and love; their footsteps are not weary; their thoughts are upward; their way is onward, and their light shines. The world is better for this happy group of Christian Scientists; Mrs. Eddy is happier because of them; God is glorified in His reflection of peace, love, joy.

When will mankind awake to know their present ownership of all good and praise, and love the spot where God dwells most conspicuously in His reflection of love and leadership? When will the world waken to the privilege of knowing God, the liberty and glory of His presence, —where

He plants His footsteps in the sea
And rides upon the storm.

April 20, 1910.

A SURE FOUNDATION.

THE one great difference between Christian Science and practically all other religions is that it insists upon the present-day possibility of those "signs" which Jesus declared should follow upon the works of all who believe in him. It insists that the mere preaching of the gospel is not enough to show that those who take upon themselves the name of the great Master are in truth his followers, but that the "signs" which were to follow the doing of the works by which Jesus himself proved his Messiahship, must be present. It is therefore incumbent on Christian Scientists especially to see that they are not barren of the good works which characterized Jesus' earthly ministry; to see that they are "doers of the word, and not hearers only," for he that is "a doer of the work," St. James tells us, "this man shall be blessed in his deed."

The church which all these centuries has based its claim for existence on its fulfilment of Christ's command, "Go ye into all the world, and preach the gospel to every creature," has been and is strangely unmindful that the truth of the preaching was to be demonstrated in a practical way; that when the Master commissioned his followers, he required them not only to preach the gospel, but to do the works of healing the sick and suffering ones of earth which he did and which he had taught them how to do.

After Mrs. Eddy's discovery, in 1866, of the "Science of divine metaphysical healing" (Retrospection and Introspection, p. 24), she proved the truth of her discovery by works of healing, confirming it again and again before she devoted herself to the organization of the church which was to revive the primitive Christianity which healed the sick,—the church which is proving today that "the best sermon ever preached is Truth practised and demonstrated by the destruction of sin, sickness, and death" (Science and Health, p. 201); and it is because the Church of Christ, Scientist, differs in this regard from the established sects of Christendom, that it has authority and excuse for being. If it were merely another sect added to the hundred or more which differ from each other only in their interpretation of technicalities of doctrine, there would be no cause for the interest which people rightfully take in it, nor would its works justify the hope of suffering humanity.

It is for these reasons that Christian Scientists in the smaller cities and towns where churches or societies of this faith have not yet been established, should not place their dependence for the arousing of interest in their field upon the members of the board of lectureship. The lecturers are doing splendidly, but the foundation must be deeply and solidly laid before the rearing of the superstructure is attempted, and to get the full benefit of the lecturers' work toward upbuilding the Cause of Christian Science, the healing of the sick and the redemption of the sinful must precede it; the interest of the community must be roused by the living of the truths of Christian Science teaching, rather than by an explanation of its teaching before people see any reason for giving heed.

Each step in the presentation of Christian Science in a convincing manner must be taken in its right place and at the right time, and the lectures, like the organization of a church or society, must follow the healing work. All those who call themselves Christian Scientists should be able to do this work, and if they are doing it faithfully and successfully they will establish Christian Science in their locality on a sure and lasting foundation.

ARCHIBALD MCLELLAN.

WHEN TO GIVE THANKS.

IN the 107th Psalm we have a wonderful presentation of the great drama of human redemption from sin and sickness, with several interludes which call upon men to give thanks to God for all His goodness and for His "wonderful works to the children of men!" In this psalm every phase of human wretchedness is outlined,—the sin and sickness, the "darkness and the shadow of death," the penury, the hunger, the tempest; but in each case the all-sufficiency of divine Love is shown and every storm is stilled. The psalm closes with the significant words, "Whoso is wise, and will observe these things, even they shall understand the lovingkindness of the Lord."

All through the Scriptures, moreover, we find exhortations to thanksgiving. In the first chapter of Paul's epistle to the Romans he speaks of those who were not thankful, and says of them that "their foolish heart was darkened." In another place his counsel is, "In every thing give thanks," an admonition for which he had the authority of Christ Jesus' teaching and example.

In Christian Science we have had a great revival of the giving of thanks, not with outward ceremonial and at stated times, but daily and hourly, for the reason that we have learned how to appropriate and appreciate the divine goodness, and the time once given to the rehearsing of trials and tribulations is now devoted to the recalling of the triumphs of Truth, which have brought deliverance to the erstwhile captives of sense, with the joys of spiritual freedom.

A business man writes of a chance meeting with some friends one morning, on the street in a large western city, where all of the little group were Christian Scientists and three of them told how they had been redeemed through Christian Science from the appetite for strong drink. One of them said, "I was in newspaper work, and could not write a line in the morning until I had taken several drinks of liquor." The other two told of similar experiences, and all three said that not a trace of the desire for stimulants was left. The letter went on: "During this little sidewalk testimonial meeting kindly reference was made to the boon companions of former days, but there was no word of criticism of any. Some were referred to as 'coming into the truth,' others as already 'in,' and of others it

Digitized by Google

was said that they would 'all come some day.'" The writer added, "I found myself wondering how many such meetings were held daily, wherever the power of Truth has been experienced;" and he went on, "Of course our dear Leader knows of the great work of redemption which is going on in human consciousness, but I could not help thinking that it would add a little to the measure of her joy could she know how groups of men come together in their offices, on the streets,—anywhere,—and spend some minutes in giving grateful testimony to what has come to them as a result of her life-work. The psalmist wrote of the time when men should say to each other, 'Let us go into the house of the Lord.' Is not this time already here?"

There is never a time when we should not be ready to give thanks, and this may sometimes require us "to put the finger on the lips and remember our blessings" (Science and Health, p. 3). Jesus gave thanks at the grave of Lazarus, and also at the last supper with his disciples, when betrayal and crucifixion were before him. John heard the angelic choir giving thanks to God for the overcoming of all sin, sorrow, and pain; and again the voices said, "We give thee thanks, O Lord God Almighty, . . . because thou hast taken to thee thy great power, and hast reigned." The psalmist said, "Oh that men would praise the Lord for his goodness," and Christian Scientists are doing this very thing, "without ceasing," as they tell each other of the greatness and goodness of divine Love.

ANNIE M. KNOTT.

THAT HATEFUL DARNEL.

THE parable of the tares rebukes a habit which is pitiful enough when grounded in ignorance, and which, when grounded in maliciousness, is simply despicable. It is the habit of casting into the good soil of unprotected thought that darnel of false suggestion which Christ Jesus named "the children of the wicked one," and the sower of which he named the devil. No one can read this story without being moved by a sense of the diabolical meanness of an act which thus desecrates another's possession, and which fouls every foot of a field with a weed whose removal may involve years of persistent labor. The reader cannot fail to realize, furthermore, how trivial such an offense would be, upon the plane of husbandry, as compared with that of filling the receptive soil of an innocent mentality with those portrayals and intimations of evil which, when they have come to their growth, choke and hinder in human experience every good seed, and draw to their own fattening and multiplication all the better resources of human nature.

One is also likely to be reminded, as he reads this parable, of the life-long fight which he has had to wage in his efforts to escape from the blight of implantings in his own thought by those whom he called "good fellows," perchance, at the time when his ears were open to the ill-flavored stories, hints, and insinuations which they scattered in a field that was fitted for flowers and waving grain. Yet again, one may be led to think with profound regret—and this no doubt was the hope of the preacher—of his own stupid stumblings or more venial sins in this line, the part that he has taken in the sowing of tares. Surely there is no keener remorse, no sincerer repentance, than that which comes to him who in his nobler years recognizes the ill harvesting in another's life of the noxious seeds which were scattered by his careless if not wilful hand, a hand which merits, as he now knows, to his shame, the Master's uncompromising judgment, "Cut it off, and cast it from thee."

Some excuse for this sowing of darnel might be found for those whose education has brought them no clearly-defined basis of discrimination between truth and error, good and evil, and no fine ethical sense of propriety; who have become habituated in their own homes, perchance, to the abandon of gossip, the byplay of unguarded and inconsiderate comment, and who have been educated to think of a large range of materiality as an expression of divine law, and hence legitimate. But for those who through Christian Science have had abundant opportunity to acquaint themselves with the earmarks of falsity, who know the seeming tenacity of its hold, and the degradation it brings in human experience: who have been taught not only not to distribute its blight, but to resist its every appeal for place in thought,—for carelessness upon the part of these, there is no shadow of excuse, no possible palliation of the offense. Says our Leader, "Man's rights are invaded when the divine order is interfered with, and the mental trespasser incurs the divine penalty due this crime" (Science and Health, p. 106). When we recognize and honor the law of non-trespass in Christ, we are equally guarded respecting both the seeds we drop into the soil of another's thought and those we consent to have dropped in our own. The tongue that is inconsiderate of its speech, and the ear that is hospitable to the suggestions of error,—these two are confederates, and pronounced enemies of our spiritual good.

Every worthy Christian Scientist will zealously guard against becoming a means for the multiplication of evil, and especially against the unnecessary communication to another's thought of any seed of falsity or earthiness. While alive to every opportunity to scatter the seeds of kindness, of Truth and Love, he will not forget the Master's words: "Let your communication be, Yea, yea; Nay, nay: for whatsoever is more than these cometh of evil."

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Riverside, Cal., April 2, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—Mrs. Hall and I have together picked and packed a box of oranges from the trees surrounding our home, and we have shipped them to you by express today. We send you our very best love and gratitude. We became interested in Christian Science over twenty years ago, went through the same class together before we were married, and have lived together as Christian Scientists in the home shown in the picture on this letter ever since we were married, which will soon be twenty years.

We love you more and more each year as we study Christian Science, and we are better people every year that passes. Very sincerely and gratefully,

PRIESTLEY HALL.

Kansas City, Mo., March 1, 1910.

Beloved Leader:—This morning, when I began my new duties as the representative of First Church in our united reading-rooms, my thoughts flew back to the days when I so utterly misunderstood you and your motives that I believed myself honestly justified in adding my share to your already heavy burden of the world's misapprehension. The hour came, however, when I gladly turned for help to that which I had ridiculed, and my awakening was quick. Today, as I was handling those priceless books, made dear through four years of earnest study,—a penitence so deep came over me that I cannot be happy to go to my work tomorrow without having asked you in words for the forgiveness which I have so many times asked in thought; for I love you now as only those can love to whom "much hath been forgiven," and I shall go to my place each day with a high sense of its responsibilities and a prayer in my heart to be found ever faithful to the sacred trust.

Yours, in obedience just touching the hem of Christ's garment,

LOUISE KNIGHT WHEATLEY.

Denver, Col., Feb. 15, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—This church, assembled in its annual meeting, by unanimous vote instructed its board of directors to express to you, as our God-inspired Leader and teacher, the unswerving loyalty of this branch church and our appreciation of the work of the Christian Science Board of Directors in their steadfastness to divine Principle, and to pledge them our hearty support. Your messages to the Field, the demonstration of the Christian Science Board of Directors, the articles on church government in our periodicals, come to us at an opportune time, as we are about to amend our by-laws and truly desire to bring about a scientifically democratic church government.

At the same church meeting the apparent need of enlarging the publishing house was brought to our attention, and it was immediately resolved to send forward a contribution for that purpose. Accordingly we have mailed to Mr. Chase a draft for $515.35. Of this amount the Sunday School contributed $54.92.

The Lincoln day service was participated in by the four Churches of Christ, Scientist, of this city, and was conducted by the First Readers of three of the churches and the chairman of the board of directors of the other. By exalting Principle instead of personality, demonstrating scientific democracy instead of autocracy in church government, manifesting unity of purpose in all our work, the hour of harmony is striking, and we confidently look for a renewal and vigorous growth for our great Cause in the "Queen City of the Plains."

Again expressing our fealty to you as our Leader and guide, and acknowledging the justice, mercy, wisdom, and goodness in which Christian Science is founded and established, we are Gratefully yours,

First Church of Christ, Scientist,

CHARLES M. CAMERON, *Secretary Board of Directors.*

[Telegram.]

Rochester, N. Y., April 11, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—It is our great joy tonight, as we are consummating the first steps in securing the site for our new church home, to send to you a message of love and gratitude. The steadfastness of your purpose, the constancy of your love, the purity of your life in revealing the pure Christ-teaching and healing, and thus establishing the kingdom of heaven on earth, are the inspiration and example that have made this step possible for us.

THE BOARD OF TRUSTEES, MEMBERS, AND CONGREGATION OF FIRST CHURCH OF CHRIST, SCIENTIST.

Minneapolis, Minn., April 8, 1910.

Beloved Leader:—In the same mail with this we are sending to Mr. Chase, the Treasurer, a check for one thousand dollars, to be used for the enlargement of the publishing house, from Second Church of Christ, Scientist, of this city. We are glad to have the privilege of adding this further contribution to the fund as an evidence of our loving desire to participate in a matter that has merited your approval.

We are also glad to inform you that, on the invitation of our church, a joint meeting was held on the 15th of February, of committees representing the six churches of this city, the church in St. Paul, and also the one at Excelsior, Lake Minnetonka, for the purpose of conferring on the question of obtaining orderly and harmonious action in the giving of the lectures. This meeting afforded the opportunity to suggest to the several churches the advisability of making the committee permanent and also of extending its scope to permit conference on other subjects within the provisions of the Manual of The Mother Church. May this forward step be an expression of our gratitude to you for your unfaltering and courageous guidance of our Cause.

Lovingly and gratefully yours,

BOARD OF DIRECTORS,

Second Church of Christ, Scientist, Minneapolis, Minn.,

LOUISE W. CHAPMAN, *Clerk.*

Oneida, N. Y., Jan. 25, 1910.

Mrs. Mary Baker Eddy.

Dear Leader:—First Church of Christ, Scientist, of Oneida, N. Y., in special meeting assembled, desires to send you heartfelt gratitude for many blessings received through your life of righteous living, and for the influence this has had upon our lives. We are striving to follow you, and in this way express our gratitude to God and to you. Lovingly yours,

MRS. LULU MORSE, *Clerk.*

Milford, Utah, April 5, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, assembled in annual meeting, wish to express our loyal love and obedience to you, and our deep gratitude for the blessings which we have received and which we are receiving through the study of our inspired text-book and your other writings. We take this opportunity to thank you for the *Monitor*, and for all the good you are sending to the world.

Your faithful followers,

First Church of Christ, Scientist, Milford, Utah.

M. CATHERINE SMITHSON,

MRS. M. HUNTINGTON SMITHSON,

Committee.

Oakland, Cal, April 3, 1910.

Dearly Beloved Leader:—The members of Second Church, in business meeting assembled, have decided by unanimous vote to send a message expressing their love to you, the one whom God has chosen to voice the truth to this age. We feel deeply indebted to you, dear Leader, for your loving care and guidance, and pray that we as a church may express loving obedience to God through demonstrating His word—the word which has been unsealed or unlocked by your wonderful book, "Science and Health with Key to the Scriptures." Recently this church held an informal session after the regular testimonial meeting on Wednesday evening had been closed, to discuss the merits of the *Monitor*. This resulted in much good, and the sale of the *Monitor* at the reading-room has increased sixfold since that time.

In loving loyalty to the spirit and law of The Mother Church, we earnestly desire to follow the example it has set by obeying our Leader, who has given us this practical truth that is uplifting humanity from sin, sickness, and death.

Second Church of Christ, Scientist, Oakland, Cal.

MRS. FLORENCE C. ASHENFELTER, CHARLES R. HATCH,

MRS. MARY M. LAY, *Committee.*

THE MANUAL.

The 87th edition of The Mother Church Manual, containing all of the recent changes, has been issued and is now on sale.

Subsequent editions of the Manual will be issued when new by-laws are made or when important changes are made in by-laws already in effect; and due notice of each new edition will appear in the *Sentinel*.

Address all orders to Allison V. Stewart, Publisher, Falmouth and St. Paul streets, Boston.

THE LECTURES.

MACON, GA.

The Hon. Clarence A. Buskirk of St. Louis, Mo., lectured on Christian Science at the Grand yesterday afternoon [Feb. 27]. He was kindly and brilliantly introduced by Prof. E. L. Martin, who said in part,—

To my mind the annals of religious history reveal no more beautiful or inspiring spectacle than that presented by the Leader and followers of the Christian Science movement, who have uniformly met with equanimity, with patient forbearance, and with the sweet spirit of forgiveness, many taunts and jeers as they have marched steadily forward in the cause of practical and demonstrable Christianity. Sustained by the consciousness of the divinity of their faith and the purity of their purposes—protected by the impenetrable armor of truth and virtue—their own lives have been luminous with love and jeweled with joy, as they have daily taught and exemplified the gospel of hopefulness, helpfulness, healthfulness, and happiness.

Macon Telegraph.

HARVARD UNIVERSITY, CAMBRIDGE, MASS.

Frank H. Leonard delivered a lecture on "Christian Science: Demonstrable Religion" in Emerson Hall, Harvard University, last Thursday evening [March 10]. Mr. Leonard spoke under the auspices of the Christian Science Society of Harvard, and was introduced by its president, George R. Bonner, who said,—

The motto on the Harvard shield, "*Veritas*," leads at once to that great question, "What is truth?" Our universities have always been pioneers in the search for an answer to this question, and it is a matter for pride that Harvard has always been a leader among our American universities. Harvard men have always been ready to take up new discoveries and theories, and investigate them. They have never been afraid of something new merely because it differed radically from the old theories. It is the Harvard spirit to give an impartial and unprejudiced hearing, confident that if the theory is sound it will bear the light of investigation, and that if false it will melt away before a searching examination. So it is very natural that we should be here tonight to listen to a lecture on Christian Science. To many of you, Mr. Leonard needs no introduction; to the others I will say that he takes up Christian Science from the point of view of the practical business man.—*Cambridge Chronicle.*

HELENA, ARK.

William D. McCrackan, M.A., delivered a lecture on Christian Science Feb. 18. He was introduced by Attorney Edward Bevens, who said in part,—

Man, in all ages, has been a seeker after truth in things material and in things spiritual. Whether it is the chemist, gazing intently into his crucible, watching for some delicate reaction; or the astronomer, watching throughout the night, striving to discover some celestial wanderer whose presence his calculations have led him to suspect, or the geologist, striving to decipher the record of the rocks and hills; all are moved by a common purpose—the search for truth. It is believed that those who are in sympathy with that never ending, never tiring search for truth, which has gone on from the beginning and will go on until the end of time, will in the lecture for the evening find much food for thought.

Christian Science, my friends, has passed the stage when its falsity may be demonstrated by sneers or ridicule, and right bravely and right cheerfully has it passed through all of that. Some of the sharpest arrows in literature have been aimed at its bosom, only to fall harmless at its feet. Not only in our own land, but practically all over the world great numbers of intelligent, deep-thinking people have embraced its doctrines, and some of the brightest minds in our community believe it to be God-given truth. It is entitled, then, to be weighed in the balances of your reason, and there let its weight and fineness be determined. I congratulate you tonight upon the excellent opportunity that is afforded you of hearing, from an authoritative source, something of the doctrines of Christian Science.

Helena World.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Arcata, Cal.—Bliss Knapp, Pythian Castle, 2:30 p.m., April 24.
Hyde Park, Mass.—Rev. Arthur R. Vosburgh, Waverly Hall, 4 p.m., April 24.
Massillon, O.—Prof. Hermann S. Hering, City Hall, April 25.
Elyria, O.—Rev. Arthur R. Vosburgh, Church Edifice, 308 East avenue, April 28.
Ashland, Ore.—Bliss Knapp, Opera House, April 29.
Mattoon, Ill.—Clarence C. Eaton, Majestic Theater, 3 p.m., May 1.
Walla Walla, Wash.—Hon. Clarence A. Buskirk, Kelor Grand Theater, May 3.
Houghton, Mich.—Clarence C. Eaton, Kerredge Theater, May 3.
Bremerton, Wash.—Bliss Knapp, Eagle Hall, May 3.
Anita, Ia.—Clarence C. Eaton, Christian Church, May 5.
Potsdam, N. Y.—Judge William G. Ewing, Town Hall, May 5.
Roxbury, Mass.—Prof. Hermann S. Hering, Fauntleroy Hall, Wenonah street, opposite Elm Hill avenue, May 5.
Winona, Minn.—Miss Mary Brookins, Winona Opera House, May 6.
Richmond, Va.—Judge Septimus J. Hanna, May 6.
Plymouth, Mass.—Prof. Hermann S. Hering, First Universalist Church, May 6.
Port Angeles, Wash.—Bliss Knapp, May 6.
Butte, Mont. (First and Third Churches).—Frank H. Leonard, Auditorium, May 6.
Calgary, Alta.—Rev. Arthur R. Vosburgh, May 6.
Minneapolis, Minn. (Fourth Church).—Miss Mary Brookins, Auditorium, 3:30 p.m., May 8.
Portland, Ore. (First Church).—Hon. Clarence A. Buskirk, Bungalow Theater, 3 p.m. and 8 p.m., May 8.
East Aurora, N. Y.—Clarence C. Eaton, 3:15 p.m., May 8.
South Haven, Mich.—Judge William G. Ewing, Selkirks Opera House, 3 p.m., May 8.
Lexington, Ky.—Francis J. Fluno, M.D., Opera House, 3 p.m., May 8.
Greensburg, Pa.—Judge Septimus J. Hanna, St. Clair Theater, 3 p.m., May 8.
Tacoma, Wash.—Bliss Knapp, Tacoma Theater, 3 p.m., May 8.
Nampa, Idaho.—Frank H. Leonard, Orpheum Theater, 3 p.m., May 8.
Providence, R. I. (First Church).—Mrs. Sue Harper Mims, Providence Opera House, 4 p.m., May 8.
Laconia, N. H.—Prof. Hermann S. Hering, Unitarian Church, May 9.
Twin Falls, Idaho.—Frank H. Leonard, Grand Theater, May 9.
Spokane, Wash.—Bliss Knapp, Christian Science Church, 4th and Post streets, May 9 and 10.
Rockland, Mass.—Prof. Hermann S. Hering, Grand Army Hall, School street, 7:30 p.m., May 10.
Pocatello, Idaho.—Frank H. Leonard, Auditorium Theater, 8:30 p.m., May 10.
The Hague, Holland.—Rev. William P. McKenzie, Diligentia Hall, 3 p.m., May 22.
Paris, France.—Rev. William P. McKenzie, Washington Palace, 14 rue Magellan, May 26.

TESTIMONIES OF HEALING.

Christian Science was impressed upon my mind about twelve years ago, by reading an article in a religious paper warning people against it as a dangerous doctrine. My husband being a minister, I supposed every other religion than his was wrong and that our church only was right; so I hugged my tatters all the closer to me, for error was not willing to be unrobed so that the winds of God could blow on us. But, as Mrs. Eddy says, "either here or hereafter, suffering or Science must destroy all illusion" (Science and Health, p. 297), and I came through suffering. Five years I dieted for stomach trouble, and got worse all the time; then was almost an invalid for two years with female trouble. After exhausting the skill of doctors and their remedies, I tried different kinds of mineral waters, but all to no avail.

As I was not expected to live long, it was thought best for me to visit my mother in Kentucky, and while there I heard that a cousin had "gone off with the Christian Scientists." I ventured to ask what the Christian Scientists believed, and was told that they claimed to heal people. Health was what I had been diligently searching for, so I decided to visit this cousin. I wrote her that I would pay her a visit before I returned to Texas, and thought that by so doing I could discern for myself her mental condition; if she proved to be unbalanced, I need not tell any one why I went to see her. I went, saw, and was convinced. I was so thoroughly convinced that I even condescended (?) to ask for treatment; but that day ended my dieting for stomach trouble, and all the other troubles disappeared as well. She gave me a copy of Science and Health, and I read it to learn how people were healed physically, and to my surprise I read myself into a religion "where fetters fall and the rights of man are fully known and acknowledged" (*Ibid.*, p. 227). I saw that this is indeed the Comforter that guides into all truth, and reveals the God "who healeth all thy diseases." I have of course severed my connection in the church with which I had been identified so long.

Coming to a restless, suffering, but thinking humanity, this religion, though its progress may be seemingly slow, must be victorious in its overcoming of error and be recognized as the true "balm of Gilead."

MRS. LETTIE TRAVIS, Amarillo, Tex.

I feel that I would not be doing my duty if I did not express my gratitude for the wonderful blessings that have come to me through the teachings of "Science and Health with Key to the Scriptures" by Mrs. Eddy. A neighbor asked me to read this book through before giving an opinion, which I promised to do, more from curiosity than from any thought of what I might gain. It was not therefore from any expectation of healing, but merely to know its contents and to learn if there really was any revealed truth; for I was hungry for truth, and had tried for years to get some evidence that the promises of the Bible were verified. Pulpit oratory did not furnish it, sermons did not give any proof of divine power, blind faith did not comfort; and so I drifted on, year after year, until I read Science and Health. What a change then came to me! Here were statements from God's Word given by one who had demonstrated that they were true, not only to her, but to all mankind. As I read its pages I was filled with joy and peace such as I had never known, and which words cannot express. As I continue to read and ponder on the great truths revealed to my hungry soul, I realize more fully the fact that it is "the Christ, and not the creed" (Miscellaneous Writings, p. 399) that makes us whole.

Christian Science appeals to me because it is fundamentally practical, and not a vague theological theory. The spiritual uplifting, the peace and joy and satisfaction of knowledge to prove all things, weighed by God's word, and to know the truth that makes free, is what I have long been looking for, and I thank God every day for the wonderful work of our dear Leader, whom God has chosen to give this great revelation to humanity. What a different book the Bible is with this new illumination! It is my desire to live so near to divine Love that I may be used to help others to see and know the truth. May His richest blessings attend our dear Leader in her great work of good.—MRS. HATTIE E. WALKER, Ottumwa, Ia.

In the fourth chapter of John is a testimonial which has impressed me very forcibly. The woman of Samaria had reported the wonderful words which Jesus had spoken to her, and we learn that after investigating her report many of the Samaritans gave this convincing testimony: "Now we believe, not because of thy saying: for we have heard him ourselves, and know that this is indeed the Christ, the Saviour of the world."

Except Mrs. Eddy, I presume that almost every one now interested in Christian Science was first induced to begin the study because of its influence on some one other than themselves. With Christian Science reading-rooms in the center of our city, where visitors are always welcome; with the Wednesday evening meetings, which I now prize so highly; with numbers of good, true Christian Scientists, patient and ever ready to do all they can to aid seekers for truth,—with all these agencies for good here in our own city, it remained for a stranger from Indianapolis, Ind., whom I met in a business transaction, to be the first to lead me to the study of Christian Science. Furthermore, an occasional copy of the *Christian Science Sentinel*, mailed to me from Indianapolis, after his return, was the immediate channel through which this precious truth first came to my consciousness. I say this in order to encourage all Scientists who read this to send out their literature, resting assured that much of the seed thus sown will not fall in stony places.

Within a short time after meeting the gentleman already mentioned, I decided that he was a true Christian, an earnest worker for Christ's kingdom on earth, and it was upon his invitation that I first attended a Christian Science service. After his return I continued to attend the Sunday services, and was so favorably impressed with the earnestness with which Christian Scientists worship, that I decided to attend a Wednesday evening meeting. I had been a church-member for about seventeen years, and occasionally I attended the evening prayer-meetings, but always found only a few of the oldest and best members in attendance; it is therefore difficult to express my surprise when I found the Christian Science church as well filled on Wednesday evening as it was on Sundays. Indeed this fact alone is enough to convince any unbiased person that there is a reality in this religion. Week after week, month after month, I have attended these Wednesday evening meetings, and always (whether the weather has been pleasant or unpleasant) I have found the church filled, testimonials of healing and spiritual uplifting freely and earnestly given, and the audience ever attentive.

Two years have passed since I became convinced beyond a doubt that others had been benefited physically as well as spiritually through the study of Christian Science. I had always been taught that God is no respecter of persons and that He is omnipotent and omniscient, and seeing no reason why I, too, should not receive good from it, I determined to discard all prejudice and to begin at once to find this healing truth which, according to their testimony, others had found. During the two years I have had many proofs of God's power to heal, and it has been clearly demonstrated

Digitized by Google

to me that as I overcome the material and learn to trust God more implicitly, to that extent my troubles, physical or otherwise, disappear as naturally as darkness disappears in the presence of light. I am gaining a slight understanding of the first statement in our text-book (Science and Health with Key to the Scriptures): "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God."

Pleasant as it is to hear the testimonies of others, I thank God that I have gained an understanding which has brought experiences of my own, and like those Samaritans, I know that I found Christ, the divine Truth that is saving the world today, physically as well as spiritually, and elevating humanity to a higher plane of thinking and consequently a higher plane of living.

M. E. TILLY, Atlanta, Ga.

Within sight of the feast prepared for me in my Father's house, I had for a long time tried to subsist on the husks of materialism, but an acute attack of rheumatism opened my eyes to my condition, and I was brought to a state of spiritual and bodily health under Christian Science treatment. I want to add my testimony to those of thousands of others, so that any one in trouble may read and know that there is an ever-present and an ever-ready help for all their woes. I can attest not only to the wonderful healing power of Christian Science, from my own experience with this disease, but can tell of my experience under *materia medica*. Before I cared to know anything about Christian Science I was stricken with the disease. Material remedies were applied, but to mortal sense I suffered torture, and the relief I got was only temporary. I was carried about like a babe, utterly helpless, my body racked with pain. I was spiritually blind, and the blind were trying to lead me.

How different my recent experience! I say it with the conviction of truth that this experience was from its inception a blessing. My bodily healing is complete, but how much more beneficial has been the spiritual healing! My eyes have been opened to the everlasting truth. I can see clearly the path that leads to my Father's house. Even now I am enjoying the feast which had been prepared for the return of the prodigal, and what a welcome home it was! No words can express what I felt during those weeks of suffering, but I have been made to lie down in green pastures; I have been led beside the still waters; I have quenched my thirst at the living fountain of Truth; I have felt the unending power of divine Love. What more could one ask?

Science and Health with the Bible has been my medicine-chest, and a loving disciple of Mrs. Eddy has administered the spiritual food as it was needed. I realize the force of Isaiah's words: "Ho, every one that thirsteth, come ye to the waters, and he that hath no money; come ye, buy; and eat; yea, come, buy wine and milk without money and without price."—ALVIN T. STEINEL, Fort Collins, Col.

I wish I could tell of the many wonderful proofs of the power of Truth over error that I have experienced, but one will suffice. I was healed of a dreadful case of rectal trouble of many years' standing, in fact since early childhood. Those who have been similarly affected can appreciate what I have suffered. For the relief which came to me through this healing truth, words cannot express my gratitude to God, also to our dear Leader, Mrs. Eddy, who has brought us this truth which not only heals from sickness but uplifts spiritually.

MRS. NANNIE SIMPSON, Petersburg, Va.

I did not come into Christian Science for the healing. I had for many years been a member of an orthodox church and had little patience with what I considered Christian Science to be. I overcame my scruples to some extent, however, and married into a Christian Science family, but I maintained my connection with my own church, even taking a more active part than formerly. After a time, however, I began to realize that my wife received more comfort and help from her religion than I did from mine. I could not understand why, so I decided to investigate a little. When I got my own consent to do this, it was only a short time until I was fully convinced that instead of a transcendental, abstract theory, my wife had a very practical, helpful, every-day religion, while I had only a theory. Soon after I withdrew from my own church and became a member of the Christian Science church. I have now been identified with this movement about ten years, and in that time I have had many proofs to strengthen and sustain me. I have received many blessings, and been helped in many ways through my own understanding and that of others. I discarded glasses which I had used for five years, and I was entirely relieved of throat trouble from which I had suffered more or less for years. I used to have an attack of chills and fever once or twice a year; but these attacks were made unreal to me in Christian Science, and I have had no return of them for several years.

In the spring of 1907 I met with a very severe and painful accident while overseeing some work at a planing-mill in Memphis, Tenn., with which I was connected. A piece of belting pulled apart, and one end, which had several copper brads in it, struck me, inflicting a most painful and dangerous wound. When the foreman asked whom he should call, I asked him to telephone to a Christian Science practitioner, instructing him to tell her exactly what had occurred. He reported that she was out, and on telephoning my wife, found that she also was out. I then told him to call a surgeon, an old roommate of mine. I was carried home in an ambulance, and they were all there when I arrived. The surgeon sewed up and dressed the wound, while the practitioner in the next room was giving me treatment. Many stitches were required, the work covering about two hours. I took no anesthetic, but during the entire operation talked freely with the surgeon. It was indeed very painful at times, but nothing like as severe as I thought it would be, thanks to the Christian Science treatment given me at the time. The Scientist remained in the house with me for three days and nights, with the result that instead of fever, as the surgeon feared, I had no fever whatever, and in about two weeks I was out. The surgeon told me afterward that he was very fearful at first, as the percentage of mortality in similar wounds is considerable. He was most careful and painstaking in his work, but I know, and I think he realized, that it was Christian Science which sustained me and kept out the fever, and restored me well and strong in so short a time.

I cannot be too grateful for this helpful, healing truth, and for the understanding through which I was enabled to overcome much pain and was so quickly healed.

L. B. EDWARDS, Los Angeles, Cal.

It is now six years since Christian Science entered our home. The healing of my brother from a relapse in an acute illness, through the power of Truth, proved to me that there is hope for all who wish to be free. I had suffered for years with catarrhal trouble, but after two weeks' treatment in Christian Science, I was entirely healed. Before I became interested in this teaching, I was a very dissatisfied woman. I wanted to lead a Christian life, but did not know how. I used to wish many times, after reading how Jesus healed the sick, that I could do as he did, but I did not for a moment think this could be. Thanks be to God for Christian Science, which is showing

Digitized by Google

us the way if we only hear and see. We have had many beautiful demonstrations of the power of Truth in our family of five, including my father and mother. My husband passed away at the time I first took up Science, leaving me with two little children to provide for; but divine Love has met our every need. Both of my parents are earnest seekers for truth. My mother was healed of nervous trouble, also of fainting spells and other ailments. My father, seventy years of age, was healed of a badly injured leg, so that in three weeks he could get about again. He was healed of running sores, also of catarrh. He is very grateful for this truth. Many ailments have been overcome for the children, such as croup, fevers, etc.

We are certainly thankful to God for the many blessings which this healing power has brought to our home, but I am even more so for the spiritual uplifting, which is received when we are ready for it. I am very grateful to Mrs. Eddy for her wonderful book, "Science and Health with Key to the Scriptures."

MRS. MINNIE TUPPER, Plymouth, Wis.

Many, many times it has occurred to me to give my testimony, though words are inadequate to express what this truth has done for me in the past year. For five years I had been looking into it, but now, I thank God, I am safely anchored. It has cured me of many ailments,—the greatest of all from fear of nervous trouble, which to mortal sense is hereditary in my family; but to know that there is no law of heredity in God's kingdom, has dispelled this awful condition. I have had three severe attacks of this trouble, and as I am now only in the prime of life, to know that it can never return again is heaven to me. I devoutly thank dear Mrs. Eddy, who has labored so patiently and lovingly to bring this great truth to the world. To her I owe an endless debt of gratitude for the way in which she has made it so clear that in its light I have learned to know God aright.

MRS. J. A. GOLDBERG, Chicago, Ill.

About two years ago I came to Christian Science for physical help. I tried several doctors, the last one saying that I must take the rest-cure. Just at this time, through a friend, I heard of Christian Science, and after thinking it over for a week I decided to give it a trial; and am thankful today that I did so. After taking a few treatments, I found that it is the truth that sets men free, but I also found I had a work to do in order to be free. At first it seemed rather uphill, and again I saw that each step was one toward freedom. With the loving watchfulness of my teacher, and the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I soon saw my old troubles, in the words of Longfellow,—

> . . . fold their tents like the Arabs,
> And as silently steal away.

I am especially grateful to Mrs. Eddy for pointing out the way so clearly. My greatest desire is to understand more of Christian Science.

MISS EMMA CROOKS, St. Joseph, Mo.

It is over nine years since I became interested in Christian Science, and many times have received help from it for which I cannot express my thanks in words. My first great demonstration was gained from reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had suffered untold agonies with a skin disease, some of the time in its worst form, and the doctors told me there was no cure for me, as I had inherited it. The disease, however, disappeared so suddenly that it was a joyful surprise to me, for it had been of seventeen years' duration. While I am not free from all bondage, there is an abiding faith, and I am trying to live so near to God as to influence others to seek the truth that blesses.

I live so far from any place where Christian Science services are held that I am not privileged to attend them very frequently, but I appreciate them very much. I am seventy-four years old and somewhat of a surprise to those who know me on account of the work I do. How thankful I am for all that our dear Leader has done for humanity, and I hope to be more worthy to be called one of her followers.—MRS. SARAH J. WARREN, Bear Lake, Mich.

[Translated from the German.]

I am very grateful for the peace and rest which Christian Science has brought to me. Over a year ago I was taken with an eruption round the waist, accompanied with seemingly unbearable pain, and as I was unable to sleep, I was completely upset. I had often attended the Christian Science meetings and heard many good things there; so I decided to take treatment. After two days the disease was overcome, sleep returned, and the nerves quieted down completely. This quick healing was a proof to me that there is but one truth which has the power to heal physical diseases as well as mental troubles, and that this glorious truth is being demonstrated through Christian Science. For all the blessings which we have received I am very thankful to God, also to Mrs. Eddy.

FRAU A. ALTHOFF, Frankfort-on-the-Main, Germany.

I desire to express in some degree my thankfulness for the truth as revealed in Christian Science by our dear Leader, Mrs. Eddy. As applied in my behalf it has brought to me untold blessings, of one of which I will speak. When an operation for a disease in the breast seemed inevitable, and there was no assurance of its success, I turned to Christian Science as a last resort, and asked for treatment, with the result that I was perfectly healed. There was not even a scar left. The healing was not instantaneous, but all pain and the great fear were gone after one treatment, and I had the blessed assurance that every manifestation of the error would disappear.

With the desire that some one may read this and be inspired with hope in God, who forgives all our iniquities and heals all our diseases, I gladly submit these lines for publication in the *Sentinel*.

MRS. MARY H. KELLER, Brainerd, Minn.

I wish to add my testimony to the vitalizing power of Truth in the healing of both sin and disease, as taught and practised by Jesus, and reduced to a system and made practical for this age by our beloved Leader, Mrs. Eddy. My present vigorous physical condition, and whatever moral soundness I may possess, is due entirely to Christian Science. When it found me, eight years ago, I was a physical wreck and most unsound morally. I shall never forget the appearance of a slight girl tripping through a snow-storm to give me my first Christian Science treatment. I had been pronounced an incurable invalid by three eminent medical doctors, but in a very short time I was convinced that this girl knew more than all of them put together,—about my case at least,—and I knew it by immediate relief from suffering and a continued gain in health.

Some of my friends, and I myself at first, tried to find some other cause than Christian Science for the change, but the farther I went in the study and practice of this blessed Christ-teaching, the more clearly did my well-defined regeneration stand out as dating from that first Christian Science treatment. From the day the light of Christian Science first dawned on my vision I have had no desire to try any other method of healing, nor have my family; and I cannot recall that we have taken a dose of medicine of any kind, though we have not been wholly free from

Digitized by Google

attacks of disease. I myself have looked death in the face, but was saved by Christian Science treatment.

For all this, and for the purpose to lead a purer, more exalted life, inspired by the teachings of Christian Science, and above all by the example and precepts of our Leader, can any think that I am not grateful? I have no words to express my sense of gratitude! It is deep and true and abiding. Neither can I tell adequately of the peace and joy and hope that have gradually but surely found lodgment in my consciousness, or of the desire that inspires me to gain greater heights in the understanding of one infinite God and His Christ.—C. L. PETRIKIN, Muncy, Pa.

I want to tell what Christian Science has done and is still doing for me. At the first conversation I ever had about Christian Science, the practitioner asked me if I had never heard or read about this teaching. She then gave me a copy of the *Journal* and a lecture to read, and the reading of these was my first step in Christian Science. I thank God that I took it. I decided to try Christian Science treatment, and very soon I began to feel better. I had been a great sufferer for years; had tried all kinds of material remedies and doctors, but never got even temporary relief. I also suffered from rheumatic trouble, toothache, and headache. My ailments have all disappeared through the application of Christian Science and the understanding of God. I am very thankful to God for this wonderful healing that came to me, and I also thank dear Mrs. Eddy for "Science and Health with Key to the Scriptures," which I purchased at once and began to study. As I go on in the study of this blessed truth I find that I am learning the way to righteousness.

MISS ANNA GROBOSKY, Canton, O.

[Translated from the German.]

Having received so much good and quick help through Christian Science, I want to tell of my healing, for my heart is full of gratitude. I suffered for two years with a severe nasal affection, as growths which had formed in the nose caused much pain and difficulty in breathing. I had many sleepless nights, and the headaches were so severe that I often thought I would collapse. As the trouble kept growing worse, I was obliged to take medical treatment, although I did so reluctantly. The physician prescribed a remedy, and said that if this brought no relief, he would have to perform an operation, which greatly frightened me. The remedy relieved me at first, but when I stopped using it the trouble returned.

I had heard much of Christian Science and also had read many testimonies of healing; so I chose God for my helper, and asked for treatment. I cannot thank God enough, also Mrs. Eddy, for the wonderful help I received, for with three treatments I was freed from the troubles mentioned. Now I feel perfectly well, I am happy and buoyant, and have also been able to help others. I can say with the psalmist, "The Lord is my shepherd; I shall not want."

ANNA MUELLER, Breslau, Germany.

It is impossible to express adequately my thankfulness for recovery from a spinal trouble which baffled the skill of several physicians, who finally pronounced it incurable and gave me no hope of anything better than a life of invalidism. For over thirty years I was obliged to use a crutch to assist me in getting about, and for several years prior to my healing required two crutches and a wheel-chair. I was also unable to use my arms without having severe pain in the back.

Such were the conditions when in October, 1903, I sought relief in Christian Science. At the first treatment I was startled and amazed when the practitioner put the crutches under the couch upon which I was lying, remarking that I would have no further use for them, and then told me to get up and walk. I protested, saying that I could not do so unaided. She replied that I need have no fear, that I would soon realize that God is our strength, our support; that "underneath are the everlasting arms," and that God is everywhere present and all powerful. Hesitating no longer, I arose, declaring with every step that God was my strength and that I trusted in Him. I crossed and recrossed the room several times. To my joy I discovered that I was healed, and greatly to the surprise and wonder of the family, walked about like the rest of them. I felt bewildered, like one awaking from a terrible dream, but I was glad and happy to be awake. The second day I walked out in the garden, going down several steps, also called on a neighbor. The crutches have never been resumed. I gained rapidly in strength, and soon moved to another place, leaving wheel-chair and crutches behind.

Six years have elapsed, and I still "stand fast" in the liberty wherewith Christ has made me free: for which I am most sincerely thankful to God, and also to Mrs. Eddy, who has revealed the healing truth to this age.

MRS. MARY SERVISS, Gray, N. Y.

I feel it a duty to express my gratitude for the blessings which Christian Science has brought to me and mine. Our youngest child was born under Christian Science treatment, and I can truthfully say there was no such suffering as in former times, and in a week I was up and doing my own work. Fevers, headache, toothache, and injuries have all been healed by this blessed truth. My little girl woke up one night with severe pain in her ear. I at once declared the truth for her, and taking her in my arms I began to read Science and Health. In an hour she went to sleep, but the pain reappeared and she commenced to cry. Then the thought came that I must try more earnestly, which I did. As I read again, and declared the ever-presence of divine Love, she went to sleep and slept till morning, and there was never any return of the trouble.

To me this experience seemed a great deal, and I am very thankful that I am learning how to meet all seeming evil with the truth. I have also been helped in a great many other ways, and I am very grateful to God, as well as to Mrs. Eddy for bringing to us this healing word.

MRS. BYANTHA A. CHASE, Janesville, Wis.

[Written for the *Sentinel*.]

THE VICTOR.

MARY J. ELMENDORF.

HE lifts his lyre on high
In the heavy stillness around;
He lifts his lyre on high
And smites it in fervent emotion,
Singing with sweetness new-found.
And the dreaming earth, the sky,
And the somnolent ocean
Into choral communion are woven,
To the deeps of their dumbness cloven
By the silver sabres of sound.

He opens the eyes of his soul
Full on the gloom and the blight;
He opens the eyes of his soul.
Unsabled by thought of surrender,
Full on the threatening night.
And the fires of his faith outroll
In a whirlwind of splendor,
Over the foemen flashing,
Over the darkness dashing,
A legion of conquering light.

FROM OUR EXCHANGES.

[*Universalist Leader.*]

There is a spiritual biography of Jesus which is his real biography,—the story of the thoughts, ideas, ideals, convictions which slowly ripened in his consciousness, and finally blossomed forth into his beautiful character. Can we trace this spiritual biography? Can we follow the rays of this inner light back into the soul of our Master? Can we uncover the organic spiritual unity of his spirit? This is the primary psychological and spiritual problem of the Gospels and of the gospel. We are confident that it can be done. Until it is done no real life of Jesus can ever be written. And until it is done we are not ready to construct the real and permanent and universal Christian faith. For the faith which is to rest on the solid and unchanging rock of spiritual truth must uncover the eternal and unchanging realities of the spiritual nature of man. It must go inside of and beyond the multitude of external things over which the world differs. The ultimate, absolute, indestructible things of the Spirit we believe to be there in the soul of our Master, beyond the reach of criticism or fluctuations of human opinion.

[Canon Alexander in *Churchman.*]

Those who refuse to permit their lives to be ordered by fashion, convention, or respectability; who do not regard popularity as the final test of merit; who do not judge failure and success as the world judges them; who know that in many respects the standards of the world and the standards of Christ must differ; who will not deliberately be guilty of compromise—all such must look for collisions with the average morality and spirit. And it is such today that we greatly need among us—men and women who can be strong and independent; who can show moral vitality and enthusiasm and imagination; who can bring to the service of church and state principle and high-mindedness; who will not let their life, their one chance of living, be lost in "eddies of purposeless dust," or drift, aimless and meaningless, along the stream of time.

[Lyman Abbott in *Outlook.*]

Happiness cannot be conferred upon mankind, it must be developed in mankind. We are blessed if we are poor in spirit, meek, aspiring, full of mercy, pure in heart, peace-possessing and peace-giving. No mere obedience to law will give us these qualities. No mere doing of things for reward will give them to us. We receive them when we are the children of our Father in heaven, and devote our lives to acquiring these qualities ourselves by our fellowship with Him and to imparting them to others by our fellowship with them.

[*Christian World*, London.]

Bible and church, we say, derive their authority in the first place from the human spirit. Their statements, their judgments, are outflows of that spirit. The divine in them came through the human, as a development of the human. But if we are to recognize a divine in the past, we must recognize it not less in the present. The education still goes on. The voice of God has not ceased in the soul. All ascertained truths, all moral progress are forms of the one inspiration.

[*Church Times.*]

The alliance of the world is constantly being proffered to us all, and we are tempted to clutch at it. The lesser interest, we consider, must be sacrificed to the bigger one. It was on such grounds that it was held expedient by the head of the Jewish religion that one Man, though guiltless, should die for the people.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the issue named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $10.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $10.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 110 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $10.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 40 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 304 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, pr paid, single copy, 20 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.
Ten copies to one address, each, one year, $1.90; six months, $1.15.
Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.
Fifty copies to one address, each, one year, $1.50; six months, 90 cents.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI. 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Efforts to abate the bill-board nuisance are still being made, and some progress is noted. Massachusetts men are making another effort this year. The supreme court of Illinois has affirmed the right of the police to censure immoral posters. In Montclair, N. J., and Cambridge, Mass., women are refraining from purchasing goods advertised on the bill-boards, and Worcester, Mass., is exercising rigid oversight. Various federations of women have entered the field and have been particularly active in Cincinnati. The San Francisco Real Estate Board has been conducting a determined crusade. Washington, D. C., has begun an earnest effort to rid the national capital of offensive boards. The corporation counsel of Seattle has recommended that the Legislature be urged to amend the law in such way as to bring the right to use property for bill-board advertising within the eminent domain power of municipalities, thus granting municipalities the power to condemn such rights.

Peter Cooper Hewitt of New York, an electrical inventor of note, has been granted the patent right by the United States court in a contest with the General Electric Company for priority of invention for a device which does away with the present transformer of electric currents. The new apparatus, which is exceedingly simple in construction, is capable of converting an alternating into a direct current by passing the alternating current through an exhausted glass or metal chamber having simple electrodes at one end and a small quantity of mercury at the other. This case has been in the courts for six years.

The interesting announcement has been made by Secretary Knox that an international court of arbitral justice—the much-discussed "peace court"—is practically assured. Contrary to the opinion which gained currency several months ago, that the note sent by the United States to the Powers had been received indifferently, it is now stated on good authority that several nations are favorable to the plan. Reports so far received justify the expectation that a court of arbitral justice will be established before the meeting of the next conference at The Hague in 1915.

The statement is made in the *Canal Record* that all of the excavation which was contemplated in the original Panama Canal project, the removal of 103,705,000 cubic yards of material, has been completed. Subsequently, to accommodate naval vessels of the Dreadnought type and the giant liners now under construction, the President ordered the widening and deepening of the canal channel, which involved the removal of 70,871,504 additional yards of material, and that is all of the task of excavation that now confronts the engineers.

Actual construction work on New York's new hundred-million-dollar triborough subway will not begin before Jan. 1 next, as it is estimated the contracts cannot be advertised for bidders until June 1. They are to be advertised for at least three months, to allow contractors sufficient time to examine specifications and drawings, which will delay the opening of bids until Sept. 1, and a month or six weeks will elapse before the contracts can be awarded.

The court of customs appeals, organized last week, will, it is claimed, expedite final decisions in customs cases, some of the more intricate of which under present conditions have been delayed for years. Every appeal from the board of general appraisers now pending in federal courts will be transferred to the new court. Many of them involve large amounts of money.

Colonel Roosevelt reached Paris last week after his visit to Budapest, where he was heartily received. He will deliver lectures within the next two or three weeks at Paris, Christiania, Berlin, and Oxford.

A million official government "cook books," recently issued by the Department of Agriculture, have been ordered printed by the House. The copies will be sent out by members of Congress.

The river and harbor bill, carrying an appropriation of about fifty-two million dollars, has passed the Senate without material amendments.

International.

The proposal to extend the trolley lines of Paris has raised a storm of indignant protest, not only from the daily newspapers, but from men and women of all classes and professions in the districts through which it is proposed that the trolleys should run. The trolley system has, up to the present, only been adopted in one or two unimportant districts of the city, while steam or the underground cable is used on other lines. The main argument in defense of the trolleys is their cheapness, but the opponents of the system argue that they constitute an eyesore and disfigure the beauty of the city.

David Lloyd-George, chancellor of the exchequer, has reintroduced last year's budget in the House of Commons. He declared that he realized that the present deficit of $131,240,000 would be more than wiped out when all arrears had been collected, and that there would be an actual surplus of $14,800,000. If the budget had been passed as usual last year, he said, there would have been a surplus of $21,000,000.

The proposals of the Egyptian government with regard to the renewal of the Suez Canal concession have been rejected by the General Assembly by sixty-six votes to one. The concession of the Suez Canal Company does not expire until November, 1968, but the proposal, just rejected, arranged for the prolongation of the concession for another forty years, that is, to the end of 2008.

Amid scenes of intense excitement, hardly paralleled since the Gladstonian home rule debates, the House of Commons last week, by a majority of 103, recorded its approval of Premier Asquith's resolutions dealing with the veto power of the House of Lords, and heard the premier's declaration of policy for carrying them into statutory effect.

The Sultan has signed the accord with France, obligating Morocco to pay twelve million dollars as indemnity and damages arising out of the Casablanca affair.

At a special session the French Chamber of Deputies voted the budget of 1910, amounting to $836,058,813.

Industrial and Commercial.

The Ministry of Commerce has undertaken an investigation of the Russian metallurgical trust, operating under the guise of a selling agency and controlling almost ninety per cent of the production of structural iron, wrought and cast iron, tubular steel, etc., in Russia. An alliance with the rail syndicate gives it control also of the steel rail industry. The trust, which is financed by French and Belgian capital, evaded the provision of the Russian law requiring government sanction, by incorporating abroad and conducting its business ostensibly from Paris, the various plants retaining their Russian individuality. The government believes, however, that the "gentlemen's agreement," under which the trust operates, can be successfully assailed.

The construction of the St. Lawrence and Ungava railway will open up a country rich in minerals and water-power. Gold, silver, copper, iron, asbestos, and manganese have been found and it is estimated that there is ten million horse-power available along the projected route, which will admit of electricity being the chief motive power. The enterprise is capitalized at twenty-five million dollars and construction will begin in the spring.

The battleship Indiana has just made a successful five-days test at sea of a brake which it is claimed will help in the quick stoppage of war-ships. With its use the Indiana could be stopped in half its own length when going at good speed. The brake is attached to each side of a ship and is operated from the engine-room.

The Cunard Steamship Company announces that the line is planning for another great steamer to take its place beside the Mauretania and Lusitania in the Liverpool-New York service, and that tenders already have been invited for the construction of another vessel of the Franconia type.

More than a million dollars will be divided between Oregon and Washington this year and will be used in building roads and schools throughout the two states, as the result of sales of timber on Government reserves,—one of the results of the Pinchot policy of forest reserves.

In 1909 over fifteen hundred thousand dollars was spent in Maine in the construction of new factories, mills, and shops, or in the enlargement of such establishments. Over thirty-five hundred men are given employment in these new plants.

The reported consolidation of all the cereal manufacturing concerns of Minneapolis, one in Battle Creek, Mich., two in Chicago, and some in Iowa, in a new million-dollar corporation to handle the output, has been confirmed.

The North Lubec Manufacturing and Canning Company is building in Rockland, Me., a sardine plant which is to be one of the finest in the world. The plant will give employment to two hundred and fifty people.

The total production of copper throughout the world for the year 1908 amounted to 730,000 tons, of which the United States produced 431,900 tons.

A telescope sixty-eight feet long with a lens seventy inches wide has been set up in the new observatory at Treptow, near Berlin, in Germany.

Directors of the Chamber of Commerce have voted unanimously in favor of a tunnel through Boston connecting the two railroad terminals.

The Long Island Railroad expects to expend on its property during the current year $7,250,000.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

SPIRITUAL RICHES.

W. D. MC CRACKAN, M.A.

JESUS once found it necessary to administer a gentle rebuke to his disciples on the subject of money matters. His words on this occasion will be found of special value to modern Christians who may be in danger of being overwhelmed by financial cares, or even by the minutiæ of routine in church work.

It was six days before the passover. Jesus, who had come up to Bethany on his way to Jerusalem, was sitting at supper in the house of Lazarus whom he had raised from the dead, and we read that Lazarus himself "was one of them that sat at the table with him." Martha served and Mary anointed Jesus' feet with ointment of spikenard and wiped his feet with her hair. This lavish use of costly ointment drew a question or an expostulation from the disciple who was the bearer of the bag, the treasurer of the little company, and who later fell before the temptation of greed in so sad a manner. "Why was not this ointment sold for three hundred pence, and given to the poor?" asked this disciple.

The question sounds so reasonable, when it is viewed from the ordinary material standpoint of the world, that one listens with special expectancy for Jesus' reply. He who was "the most scientific man that ever trod the globe" (Science and Health, p. 313), had a way of baffling the evil intent of would-be critics and yet satisfying the hearts and minds of honest questioners. His answer was in part: "The poor always ye have with you; but me ye have not always." To some of his listeners this reply doubtless sounded like a reproach tinged with sadness, conveying the impression that he, the personal Jesus, would not always be with them; but that the poor would remain, even after he had left them, and in the mean time they might well lavish upon him their tokens of affection. This would seem to be the obvious meaning, especially when taken in connection with the context.

This statement, however, like most of Jesus' declarations, also conveyed a meaning beyond the obvious or superficial one. His words were of such a nature as to appeal to all classes of hearers. So, to those whom he was instructing in the Science of being, there was also a profound metaphysical interpretation to his saying. It would seem to the writer of this article that Jesus meant to convey a warning to those of his listeners who were ready to understand, against the habit of thinking poverty, of harping upon the thought of limitation in every-day life, and thus unconsciously cultivating a sense of lack and losing the sense of substance. It was as though Jesus had said, Always you have the thought of poverty with you; but me, the representative of spiritual riches, of unlimited abundance and affluence, the Christ, the Son of God,—me, you do not always have with you.

To have the right understanding of the real man is to be in possession of the divine qualities which he reflects. To have Christ in our thought is to be rich beyond compare. This thought is very simply expressed in one of the hymns in the Christian Science Hymnal (p. 264): —

He that has made my heaven secure,
Will here all good provide;
While Christ is rich, can I be poor?
What can I want beside?

THE SIGNS OF THE SEASONS.

CAMPBELL IREDELL JONES.

WITH the signs of spring on every side, and the sweet unfoldment of nature under the touch of the warm sunshine and refreshing showers, each day bringing with it brighter promises of the glorious beauty and bounty of the summer that is nearing, the thought comes, How similar is this unfoldment of nature to the process that is going on in the world today in human consciousness, as a result of the sunshine of Christian Science! We are now in the springtime of the Christ-coming, and as the trees and plants on every side are being transformed from unsightly barrenness to beauty and bounty, and in the place of blight and seeming death tender leaves and tiny blossoms are springing forth to greet the sunshine, so today man, under the touch of Christian Science and the warmth of divine Love, is unfolding slowly but surely and blossoming forth in the image and likeness of his Maker, liberated from the seeming bonds of sickness, sin, and death to express the full freedom and usefulness of God's children.

If in the early spring we should accept the testimony of our physical sense, we might feel discouraged about the ultimate development of all the trees and plants, for some look as though they were never going to yield to the transforming touch of warm sunshine and shower; they seem so covered with dead leaves and other débris that we might almost wonder if they will ever be able to look up at the blue sky above. We do not accept the testimony of our eyes, however, for we know that in due season they will all blossom forth. And should we not have the same faith in the unfoldment of God's kingdom? or are we going to accept sense testimony in this instance, and be discouraged at the slow progress of some of our fellow-men? Some seem so asleep in the dream of life in matter with its pleasures and pains, and some are so covered with the débris of creeds and dogmas, that we are inclined at times to feel small hope of their ever awakening to spiritual life. Why should we doubt, though, with such a beautiful lesson about us today in nature's unfoldment?

As the sun keeps on shining day after day, and the winds blow gently and the rain descends, urging the reluctant plants to yield to the strong, kind forces nature is using, so through divine activity Truth is daily pouring into human consciousness its warmth and healing power, descending like refreshing showers upon the drooping heart, sweeping away the débris of creeds and urging mankind to come out of material bondage and accept the "glorious liberty of the children of God."

Some of the trees and plants seem to wait until the summer is nearly here before manifesting any signs at all of

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

life, yet almost with the first breath of warm spring air activity began and has been going on within the plants; then, in a day, as it were, it all appears, and leaf and blossom spring forth to greet the eye. When the summer is here, however, we cannot tell which plant or tree unfolded first; nor do we care, so satisfying is the complete manifestation of beauty they each express. So today some of mankind are as yet manifesting no signs of spiritual unfoldment under the touch of Science, yet the process is going on, unseen to human eye, as with the trees and plants; and suddenly man, too, will spring forth into being, and express God's government in individual goodness and beauty, for, as Mrs. Eddy says, "Science is working changes in personal character as well as in the material universe" (Science and Health, p. 238).

Material bondage is even now being forced to give up its victims, and to the remotest part of the earth tyranny and pride are giving way before the "still small voice" of Truth, for "the world feels the alterative effect of truth through every pore" (*Ibid.*, p. 224). How soon it will be before all material bonds are broken we do not know, but on every side today are the signs of an advanced springtime in human consciousness, and bright promises of the full-orbed appearing of the Christ, Truth.

THE FATHER'S HOUSE.

M. C. JOUBERT.

JESUS said, "It is written, My house shall be called the house of prayer; but ye have made it a den of thieves." As I listened to this Scriptural rebuke, as it was read one Sunday morning during our service, I was awakened out of the mesmerism of greed and money-making. Later, as I was pondering on the above text, it became clear to me that I, too, had allowed thieves and robbers in my Father's house (my consciousness). I saw that I held it as a place of bartering and money-making, and that this was the reason why I could not make headway in Science and in my daily business. I was seemingly at a standstill, and failed in all that I undertook. I had read and studied Science for the past six years, and had been healed of many ailments; but there was one which still beset me, and which seems to afflict the majority of mankind, viz., the lack of money; and this was the desire of my whole being. If I could only have enough money, I would feel safe—I would have no fear of the morrow, no fear of my children's not receiving their proper education, and would be rid of the thousand and one fears which beset the future.

Though my intentions were no doubt good, yet I had to learn the better way; I had to learn that God, good, was my source of supply, that I had to take no thought for the morrow, that my children would receive proper training and no good thing would be withheld from them, if I would follow Love's guidance only. I had sought to make money and to make it fast, and here again I made another mistake, for when making money rapidly one is apt to be doing others out of their portion. I speculated freely and rushed after every alluring proposition within my reach, but of nothing did I make a success: one enterprise after another failed, until I was so reduced that I had to give up venturing. I often wondered why this was so. Now I know why. I was looking for my supply in matter instead of Mind. I always argued that I could not make money in Science, as money was material and had to be made materially; but that once I had made a fortune, I would devote more time to Science. This also was an error of thought, and error never can lead one to Truth. Had I succeeded I would no doubt have drifted in the wrong direction altogether.

Restless and sickened through material failures, I once more sought the calm haven of spirituality, and thus it was that the above text lifted the veil and showed me my error, and that my only real estate was in Mind, which is exhaustless in both supply and resource; that if I would be guided by Truth alone, the supply of my present needs would be added unto me. Now I see how through the dark hours of disappointment and failure Love was preparing the way for my upward growth. This also became clear to me, that it certainly is error to be in debt: it appeared to me that when I owe nothing to anybody, it is the same as having a whole body; that to contract debt is the same as to contract disease, and that it is as foolish to make debt as to bruise one's body.

Thus, as I pondered, were "the tables" in my consciousness overturned—the errors of greed and desire for wealth driven out by the lashes of Truth, and I felt a sweet calm, a knowing that the future holds all that is good for me, every need being already met by divine Love.

FORGIVENESS.

MARY VANSANT FINNEY.

SEVERAL years ago I heard a story which exemplifies the true spirit of brotherly love and forgiveness. Two brothers owned a field of wheat in common. At harvest-time a disagreement arose concerning the division of the wheat, and the brothers parted in anger. Late that night the anger of each subsided, and each was ready to say, like Abraham of old, "Let there be no strife, I pray thee, between me and thee, . . . for we be brethren." By one impulse each brother determined to go into the field, take a sheaf of his own wheat, and lay it among his brother's sheaves. Obeying the impulse, they met at the dividing line, each with the peace-offering in his arms.

In the light of Christian Science we know that this is the only way to blot out malice and envy and selfishness when they try to hide our brother from us and to lead us to think of man as a monster instead of the perfect image which Scripture declares him to be. We have no time to brood over wrongs. There is but one course to pursue when disagreements arise, and that is to send out our message of love,—the spiritual sheaf. We may not always take it in person, but we know that "thought is deeper than all speech," and that when we think love, and love only,—when our minds are filled with Truth and Love, as our Leader tells us,—then "all upon whom [our] thoughts rest are thereby benefited" (*Sentinel*, Oct. 6, 1906).

Nothing matters but our thought about it: we are not asked to call black white, nor white black. We have but to know that good alone is real, and that we war not with persons. The whole field of warfare is in our own mentality: the rest we leave with God, and "one on God's side is a majority." Who knows but that our brother is even now coming toward us with his offering of love; and even if he is not, we are but following Christ's admonition when we continue to love, and refuse to know evil or to hold our brother in thoughts of condemnation. Moreover, when disagreements do arise, neither party is apt to be altogether right, for every one has still much of mortal personal sense to overcome; and he who removes the beam from his own eye has risen to a position where he can perceive no mote in that of his brother.

Love is all-power, for God is Love; and when we understand this, we shall realize that we win our brother not by condemning or judging him, but by loving him and seeing him as man always is—the perfect child of God. This is the plane of thought upon which we can do the work our Master has commanded us to do, the work of preaching the gospel and healing the sick.

SUCCESS.

REUBEN POGSON.

Success in man is the measure of his capacity to reflect or express God in all the infinite ways indicated by the synonyms for God found in Science and Health, namely, Love, Truth, Life, Mind, Principle. From this standpoint we can easily see that Jesus was the most successful man that ever dwelt on this earth, a statement only made possible through the light of Christian Science shining on the inspired Word, the Bible. Too long has theology impressed us with the gloomy side of the earthly existence of the glorious one who was Master of all his consciousness surveyed,—the man "in all points tempted like as we are, yet without sin,"—the acceptance and acquiescence in that which denies the unity of God, man, and the spiritual universe.

Did God create man for success or for failure, or for a mixture of both? All the good in humanity rises in protest against the idea that God created His likeness to be a failure. The mere fact that one is still associating the words "image of God" and "failure" in one sentence is evidence of the mesmerism that humanity seems to be under, in that it does not strike men and women as being too incongruous to be discussed. It does not follow, however, that a successful man in this true sense is necessarily famous as the world understands fame; nor does it follow, on the other hand, that a successful man shall not be famous—nay, as progress hastens, fame will wait more upon real success than on the transitory glitter of human achievement. The world has to acknowledge even now that the most famous woman of today is the one who is the most successful according to the strict definition stated here. The writer is grateful to Mrs. Eddy for having demonstrated that poverty is not a necessary mark of holiness, but is a sign of incapacity to express that possession which comes from hearing the Father say to each of us, "Son, thou art ever with me, and all that I have is thine." These words of the Father must cause a well-spring of joy to bubble in the hearts of all who are born under the ban of poverty and the yoke of social and economic oppression.

The aim of the Christian Science student is not the amassing of material riches, nor the scaling of dizzy heights of fame, but the breaking down in his consciousness of the belief of incapacity, the belief of penury, the belief in a starving lack of originality, the inability to reflect the divine edict, "Behold, I make all things new." This is the aim of the student of Christian Science working from the selfless desire to achieve for the vindication of the glory of God in earth as in heaven. Man is, always has been, always will be a success. There is no evidence on record of man ever having lost the dominion given him by God. The first chapter of Genesis and the first five verses in the second chapter constitute the whole record of spiritual creation that we have, and nothing has been altered. The facts stated there are as true now as ever they were, and as humanity wipes out of its consciousness the belief in the Adamic record of creation, so it will gradually reduce the seeming gulf of years that separate this generation from the spiritual era and man will awaken to know that what the Adam-dreamer has sleepily declared to have occurred thousands of years ago in the dim past is really with us here and now.

Day by day we who are Christian Science students must take the first record of creation and assimilate it so that we shall be able to break down the mesmeric belief that any other creation took place. The spiritual creation is the fact now, and will continue to be the fact, regardless of the claims of Adamic belief. God gave man dominion, and Jesus claimed this dominion when he declared, "All power is given unto me in heaven and in earth." He also assured his disciples this dominion when he said, "I give unto you power to tread on serpents and scorpions." He refused to give credence to the Adamic creation, "Ye are of your father the devil. . . . He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it."

True, honest, legitimate success is ours at every step of our way spiritward; it is ours for the knowing. Our prayer for success must be of the order of Whittier's verse:—

Breathe through the pulses of desire
Thy coolness and thy balm;
Let sense be dumb, its heat expire,
Speak through the ear thquake, wind, and fire,
O still small voice of calm!

FOUNDATION.

DR. EDMUND F. BURTON.

The rains that descended, the floods that came, and the winds that blew and beat upon the house of the wise man and upon the house of the foolish man, in the parable, were not responsible for the fall of the one any more than for the standing of the other, and there seems to be nothing in the teaching of the parable or in the life of Jesus to indicate that men should avoid rain, flood, and wind, or that they should seek to build their houses or live their lives in places sheltered from rough weather. Jesus prayed not that his followers should be taken out of the world, but that they should be kept from the evil. Moreover, the safety of the house lies not in its size, its beauty, its intrinsic strength of construction, nor in its stage of progress. The facts that determine whether or not it will endure, are its foundation or lack thereof, and the genuineness of the structure built thereon. The everlasting "rock of ages" alone can meet and repel all attacks, and all honest building founded thereon is safe. That which is built may be little or much, crude or ornate, in its first stages or approaching completion, yet will its foundation of rock insure its permanence. Sand has neither adhesion nor cohesion and is typical of that which possesses neither Mind nor Life. That which is built on it has no foundation, for we read that "other foundation can no man lay than that is laid, which is Jesus Christ."

It is not the panic that brings ruin to the business man, but the lack of preparedness for financial stress and emergency, the failure to have built upon sound economic principles. No temptation ever overthrew a man, for with the temptation is also made a way of escape. No machination of evil or of the mind that is enmity against God ever caused his downfall. Nothing but the failure to make use of the way of escape, failure to dwell in "the secret place of the most High," to "abide under the shadow of the Almighty," caused the yielding to the temptation of his own devices. Christian Scientists are never harmed by malpractice or by any manifestation of error or hatred, but by their own failure to heed our Leader's warning to keep their minds "so filled with Truth and Love that sin, disease, and death cannot enter them" (*Sentinel*, Oct. 6, 1906), failure to know that Science, the Mind that was in Christ Jesus, never fails, and that what may seem to be such a failure is always a lack of Science in the consciousness—a building upon the sand of mortal sense instead of upon the rock of spiritual sense.

And this emphasizes one of "these sayings" of Jesus which the wise man hears and does, and the foolish man hears and does not. When the adversary with whom we are told to agree quickly, meets the man who has been less than scientific in his methods of thought, who has been slack in his examination of his accounts with his brother as well as with Him whom we beseech to "forgive us our debts, as we forgive our debtors," who has trusted to sense testimony or has allowed himself to be lulled into a false sense of security by a loose declaration and belief that

Digitized by Google

"everything will come out all right somehow,"—such a man is surprised and terrified by the appearance of the adversary, and so half acknowledges the validity of whatever claim is brought against him. Not having at hand the understanding of truth with which to refute the adversary's statement, he feels that the sand of false belief is shifting and slipping under him, and is led to make one concession after another, until, after being forced to pay to the uttermost farthing, he finds that he must begin life all over again.

On the other hand, the man whose mind is filled with the consciousness of the truth about God and himself, and who admits only the testimony of spiritual sense as truth, is able to avoid the consequence of failure to agree quickly. He has at hand, subject to instant draft, the means whereby to offset the claim. On account of the sound basic laws upon which they rest, the methods of his mental business are such that he has a clear understanding of his affairs, knows that he is spiritually solvent, that there is nothing outstanding against him that has not already been met by divine Principle, and therefore he can, without fear or hesitation, take up and look into any claim against him, while he is in the way with it, detect its falsity and the effort to take advantage of him, demonstrate his invulnerability, and so bring about a speedy settlement and one not to his disadvantage.

Hearing and doing the commands of Christ constitute the wisdom that is the building upon the rock. To hear and interpret correctly the "still small voice" of Truth requires an ear attuned and a mind purified by spiritual understanding, a spiritual sense rendered keen by constant vigilance and much listening to God. Today we are blessed by such a message from off the altar, a message so voiced as to reach even ears dulled by matter's clamor, and so interpreted as to be comprehended by minds unused to Spirit's tones. With gratitude and humility may we follow the words of wisdom in the Book of books, as interpreted to us in that wonderful "Key to the Scriptures," the Christian Science text-book, revealing to us how we may build with safety, and even with grace and beauty, upon our one foundation, eternal Mind.

"LET THIS MIND BE IN YOU."

WILLIAM W. PORTER.

To excuse sin in one's self, to fail to recognize sin as sin in one's self or in others,—in fact, wherever and whenever sin is voiced,—is to nurture and perpetuate sin. Sin is a false sense, and a false sense has no foundation in fact or in Science. A false sense harbored or entertained, under whatever pretext, name, or disguise, immediately finds expression in some of the myriad forms of error or discord. It is impossible that that which contributes to the gratification of a personal or false sense should result otherwise than in discord or distress. The gratification of selfish desires necessarily holds one restricted within the circumscribed area of human limitations. Science demands that we recognize a thing for what it is, therefore Science demands that we recognize error, sin, discord, or suffering as a false mortal belief, the aggravated and cumulative result of a false sense imparted through a mode of mental contagion and consciously or unconsciously accepted and acted upon by passive mortals.

Since error, being causeless, is inexplicable, it is not surprising that suffering or discord seems complex to mortal sense. Yet not so the remedy, which is simple and clear; for a false belief, having neither origin nor foundation in fact or in Science, has and can have no intelligence or mind with which to move, argue, or perpetuate itself, or to create channels for the infliction of penalties under its so-called laws. This false belief being thus degraded and reduced to its proper and only rightful state of nothingness and powerlessness in the light of Truth, all that remains in which to "live, and move, and have our being," is the divine consciousness or divine Mind which, being all-pervasive, omnipotent, and omniactive, heals the sick, dispels discord and the evil suggestions of a false sense. Thus may be discerned in Christian Science the infinitude and glory of God as All-in-all, and the dominion of man in His image and likeness.

None of us would fear or hesitate to repudiate sin or evil, if presented to us under its own horrible aspect and in its true colors, and it is worthy to note here that sin never presents itself for our consideration in this manner. When sin presents itself to us it is garbed in attractive and alluring colors, and to human sense it is a thing to be desired, yes, even fought for. As Christian Scientists, when we feel called upon to give battle, to take up the weapons of the carnal mind, it is well calmly to ask ourselves how much of God's kingdom we are gaining—or losing—by the conflict. Jesus said, "Put up thy sword," and thus resentment and recourse to the activities of the carnal mind were finally and forever set aside.

It is recalled in the Scriptures that Jesus inquired of his followers regarding his identity, and that Peter, perceiving the Christ, Truth, which Jesus represented, finally declared that he was the Christ. Thereupon Jesus strongly commended this disciple's discernment of spiritual being, and proceeded to tell his followers how he should be rejected by his own people, be slain, and rise on the third day. At this point in the Scripture narrative it is stated that Peter demurred at the attitude of our Lord, and said that surely these things should not be concerning the Master; whereupon Jesus rebuked Peter's material thought. In this incident is a lesson which may be pondered well by every Christian Scientist, indicating as it does the necessity of guarding against the suggestions of error, particularly under the guise of benefiting the Cause of Christian Science, or benefiting ourselves as workers therein.

Peter, with a perception of truth clearer than that of the others, had just declared his discernment of the Christ, and the Master, filled with gratitude that one of his students had pierced the veil of materiality sufficiently to identify him aright, had earnestly commended this discernment and proceeded then to tell of the ordeal yet before him. Whereupon this very disciple who had won his strong commendation began to present arguments why the Master, why the Messiah whom they had so long looked and watched and waited for, should not proceed to the dangerous, difficult, and seemingly ill-selected task which lay before him.

Peter had just proved his clearness in one direction, and in view of this the arguments now presented by him would seem to be entitled to consideration; but without hesitation the Master rebuked him for thus voicing that which savored so strongly of material desires. Doubtless Peter's suggestion was founded upon the belief that the Messiah should enter upon and establish his material kingdom; and Jesus, whose being was so at-one with his divine purpose, instantly detected the false note in Peter's suggestion; and that, too, notwithstanding Peter himself was unaware of the awful and fatal precedent which he had suggested. Impulsive Peter would have Jesus follow the more enticing path of sense-ease and material gratification, instead of rising higher in the demonstration of divine Love and proving all that he thereafter proved for the sake of sick and blind humanity; but Jesus detected the sin and error which was thus presented to him under the guise of honest personal friendship, through the channel of one of his closest friends and followers. To his undying glory, he saw its danger and nothingness, and rebuked Peter for harboring such a condition of thought.

In this latter age an instance of rare fidelity to Principle is found in the example of Mrs. Eddy, whose leadership

Digitized by Google

of the Cause of Christian Science has been attained through honest and ceaseless striving to repudiate and put aside the innumerable appeals, demands, and suggestions of material sense. As we contemplate her consistent life and work, we learn to realize that she has become what she is to Christian Science not because she has felt called to assume the leadership, but because she has measured up to the simple daily requirements of God in holding the standard of this Science above the petty limitations of human personality. In gaining an appreciation of what this means, it may be helpful to ask ourselves what Christian Science would be, and where Christian Scientists would stand today, had this standard been placed in a hand less firm or in one of human election. Surely God is "mindful of His own."

Spiritual truth is the same "yesterday, and to day, and for ever," and what was true of spiritual truth in Jesus' day is true eternally; namely, that it cannot be demonstrated or attained through any path approved or presented by the material senses or desires. The sooner we definitely understand and practically apply this simple rule in gauging our thoughts and acts, our ambitions and hopes, the more readily and confidently, the more strongly and gladly we shall discern and take each progressive step in the line of Christian Science. We shall doubtless encounter trials and possibly defeats, but we shall arise from them with renewed righteousness of purpose and a zeal conformable to wisdom, and find in each instance a needed opportunity for growth and make use of them as such. The admonition of Jesus repeated upon the banner of Christian Science is simple and direct: "Heal the sick, cleanse the lepers, raise the dead, cast out demons."

[Written for the *Sentinel*.]

THE CALL OF THE MOUNTAINS.

ADA J. MILLER.

THE mountains call! Their heights in azure bathed
Speak of a broader view, of peace, of rest;
But as we climb, sometimes, confronting us
Is rock,—sheer, dark,—across the narrow way;
And, looking back, the valley seems a heaven.
But as we look, again we hear the call:
"The heights alone are heaven; ye see but wraith
Of joy. Ye know full well it is not there
Where ceaseless quest for peace must ever fail."
Again we face the height. The road, sunlit,
Has lost its gloom, and 'round the base we see
Again the narrow way and onward press,
Sustained by inner voice and mountain call.

Another height is reached, and here we pause;
But now the backward glance gives clearer view.
We see how small a thing has oft obscured
The light; we see the pettiness of aim
Where highest good is but to have and hold,
By right of human law, what men call wealth.
The clear air of the heights reveals to us
The paltriness of what the world calls power;
The childishness of strife for bauble—fame.
It shows to us the narrowness of pride,
The nothingness of self with all its vaunt
Of power, of place, and eager strife for gain.
In clear air of the heights we plainly see
That all earth's clamor yields but seeming good.

Again we face the narrow, rock-strewn trail
And onward press, with step unfaltering
And heart aglow with gratitude and joy
That we have heard the mountain call and found
The way which leads to peace, to heaven,—to God!

SELECTED ARTICLES.

[Frederick Dixon in *Bournemouth* (Eng.) *Visiter's Directory*.]

The fact is that the calling of names, at all times an unwise proceeding, is a peculiarly unwise one on such a subject as heresy. The Christianity of Christendom changed, Froude once declared, with every century down to the Reformation, when it was entirely remade; and he might have added, that it has changed with every century since. The Christianity of the Bible, however, has never changed. It is summed up in one or two particular verses more expressively than in any others, because in those verses it is reduced from verbal definition to practical demonstration. "He that believeth on me, the works that I do shall he do also," is the test not of the Christian Scientist of today, but of the Founder of Christianity. It is a curious commentary on orthodoxy that the one church which insists on the application of this verse in its full significance, is the church which orthodoxy selects to brand as heretical.

Even more unfortunate is the description of the science of Christian Science as prehistoric. If it is prehistoric it is something of which our clerical critic has no knowledge, and this is obviously the case. It is not necessary to trouble your readers with a definition of science from the dictionaries. It will be admitted, however, by every one, that science is the expression of absolute Truth, and Truth, it is to be suspected, is prehistoric. Supposing, on the other hand, that a definition of science is sought from our own time, it would be impossible to appeal to a higher authority than Huxley, and here is Huxley's definition of the term. Science, he wrote, was the answer a man made to the question, What do I know? The critic will at this point begin to appreciate the significance of healing in Christian Science. It is the answer the Christian Scientist makes to the question what he knows of Truth. Some eighteen centuries ago Jesus came preaching in Galilee and Judea the gospel of Christ, which he summed up as the truth which would make men free. When the deadened spiritual sense of the populace revolted from the deep metaphysical truths embedded in this gospel, he turned to them with the words that if they could not accept his teaching for the words' sake, they must do so for the very works' sake; and so he performed the miracles of healing in demonstration of the fact that knowledge of the truth could make men free, and those works of healing became his answer to the question as to what he knew.

There is absolutely no connection between teaching of this nature and spiritualism, though that is the critic's third count against Christian Science. Anybody who understands the teaching of either Christian Science or spiritualism can see this at a glance. So far from being supernatural, the miracles of Christian Science, like the miracles of Christ Jesus, are divinely natural. The Greek words translated miracle in the New Testament mean simply an act of power or a sign. The Latin word which came to be substituted for them in the Vulgate means simply something remarkable. The miracles of Jesus were acts of power or signs, inasmuch as they were demonstrations of the power of absolute Truth, and they were wonderful inasmuch as they were demonstrations of this power to people who had never dreamed that such demonstrations were possible or practical. What Mrs. Eddy has done, has been to teach humanity that Jesus' promise that those who believed in him would be able to do his works was no mere theoretical statement, but an absolute scientific fact, demonstrable exactly in proportion as men grasped his teaching and lived his life; that is to say, in the degree they accepted him as the way. His miracles were not limited to the healing of physical troubles, nor was the healing of sickness his ultimate object. That ultimate object was the destruction of sin, itself the source of evil

Digitized by Google

and inharmony of every description. And so Mrs. Eddy has written, on page 150 of Science and Health, "Now, as then, signs and wonders are wrought in the metaphysical healing of physical disease; but these signs are only to demonstrate its divine origin—to attest the reality of the higher mission of the Christ-power to take away the sins of the world."

[Alfred Farlow in *Fall River* (Mass.) *Daily Globe*.]

In your issue of the 16th the Rev. Carlyle Summerbell makes rejoinder to my reply in the following words: "What I ventured to suggest was that Christian Science, while denying philosophically the existence of the body, gave paramount attention to the health of the body." He adds, "I judged this, not only from Christian Science literature, but from oral Christian Science testimonies, which I myself heard given in The Mother Church in Boston." The difficulty is that the clerical gentleman has overlooked the fact that the gratitude of one who has been bodily healed through Christian Science is not so much a rejoicing because of a relief from pain, as it is because he has proven the power of God to overcome evil and discord. Jesus said, "Rejoice not, that the spirits are subject unto you; but rather rejoice, because your names are written in heaven." Christian Science points to the spiritual benefit as a means of bodily improvement. It opens the door of understanding to the recognition of man's eternal inseparability from his Maker.

It is of course not at all surprising if some who have been healed in Christian Science are more conscious of the bodily improvement than of their spiritual benefits, as in the time of Jesus. Such may be amenable to rebuke. Be this as it may, the fact still remains that the prime object of Christian Science is to "improve the spiritual condition of its beneficiaries," and we would add here that we agree with our critic that "this is the mission of all religious denominations." Furthermore, experience will convince those who seek the benefit of Christian Science that the best results, the most substantial results, accrue to those who are willing to part with their sins, which are in reality the foundation of their trouble. It is not the goodness in the individual that gets sick, but his materiality. Christian Science acts as a preventive as well as a cure to those who are willing so to purge themselves as to become immune from discord, the just penalty for wrong-doing. Paul said, "The sting of death is sin." The sting that ultimates in death is sin. The term sin in the text is used in its broad sense and applies to ignorant blunders as well as wilful wrong-doing. Christian Science does not teach that man has no body. It teaches that man is the image and likeness of God. It repudiates only the false material concept of man. Healing the body does not mean a restoration or an increase of materiality. The body is better and looks better after Christian Science treatment because, under the influence of a higher, more spiritual consciousness it has become somewhat transformed, is less material and more spiritual.

The gentleman declares, "Personally I believe that Christian Science has often proved itself of practical value, in nervous diseases, where the patient simply thinks himself sick," etc. "But," he adds, "has Christian Science ever cured a single case of organic disease?" Upon what ground does the gentleman assume that it has not cured organic disease? He gives no reason, although he offers Dr. Cabot of Boston as his witness. How does Dr. Cabot, or any one else, know that Christian Science has not cured organic diseases? B. O. Flower of Boston, Mass. (5 Park Square), recently published a book, entitled "Christian Science as a Religious Belief and a Therapeutic Agent," which contains affidavits and statements that prove beyond all question that organic diseases have been cured by Christian Science treatment, if the testimony of experienced physicians may be accepted as evidence; and it is proper to say here that, if the testimony of Dr. Cabot is worth anything on this subject, the testimony of other physicians of experience should be considered. Mr. Flower has proved by the testimony of eminent physicians that organic diseases have been cured by Christian Science.

Dr. Cabot declares concerning Christian Science testimonies: "Their claims were the result of mistake or intellectual mistiness, and not of intentional deception." A few examples of medical diagnosis may not be amiss at this point. A lady had been treated for several years by a physician, who diagnosed her case as tuberculosis of the lungs. As a last resort she turned to Christian Science and was cured. The physician who had treated the case, when called upon to give her a certificate to the effect that she had formerly had consumption, declined to do so, affirming that he had "mistakenly diagnosed the case; that the woman had not had consumption, for if she had she could not have been cured by Christian Science. The fact that she had been cured by Christian Science was evidence that she did not have consumption to begin with."

A gentleman had been examined by one of the most noted, if not the most noted, specialist in this country, who pronounced his case Bright's disease in an incurable form. He was afterward healed by Christian Science and then returned to the specialist. After two very careful and painstaking examinations the famous doctor threw up his hands and very gravely said, "For the first time in my life I have been mistaken in my diagnosis. You never had Bright's disease." Is it any wonder that the Christian Scientist declines to have this question settled by the diagnosis of physicians? As a matter of fact a physician cannot believe that it is possible for a patient to be cured of a real disease by Christian Science and at the same time maintain his own belief in the incurability of the given disease, and it is useless to attempt to settle the question by physicians' testimonies as to the "before and after taking."

In conclusion we venture the assertion that the Rev. Mr. Summerbell might dispute the healings of Jesus and his apostles on the same ground that he brushes aside the healings of Christian Science. There is just as much ground upon which to assume that the Master did not heal organic diseases as there is to assume that Christian Science does not heal such cases. To insist that it is not possible to heal organic cases is to insist that Jesus and his disciples did not heal organic cases, or that when he urged his disciples and all Christians to "heal the sick," he meant only to heal those who simply "thought they were sick" and yet were not sick. To insist upon the impossibility of curing real disease by the divine power is to limit the divine power and amounts to an implication that Jesus and his disciples did not heal real diseases. We insist that God has never changed, that His laws have never changed, but that His power is as capable of demonstration now as it was in the early days of Christianity.

[E. M. Ramsay in *Dundee* (Scot.) *Advertiser*.]

Christian Science lays no claim to mysticism; on the contrary, its mission is to get rid of mystery, to get rid of the supernatural, and to show men the simplicity of the truth, the beauty of holiness, the naturalness of purity, of health, of good; to break down the sense of separation between God and man. He who knew more about God than did any other that ever walked this earth, called Him by the endearing name of Father. "I ascend unto my Father, and your Father," he said; and he called himself the Son. St. Paul tells us in Galatians that it pleased God to reveal His Son in him. This Son Christian Science explains to be the real nature of man, that which was and is and ever will be the image and likeness of God; and it proceeds to show how this Son may be revealed in each one of us, how the truth can separate the false thoughts in

Digitized by Google

our consciousness from the true, that which is of the earth from the child of God. "Ye shall know the truth, and the truth shall make you free." This method, we submit, is scientific and Christian.

[Henry Deutsch in *St. Paul* (Minn.) *Pioneer Press.*]

Christian Science is a spiritual, demonstrable religion, founded upon the Bible and the works of the great teachers and prophets whose history and narratives of works appear therein. There is nothing in the fundamentals of Christian Science that furnishes any foundation for the statements which are so often made, that Christian Science declares the nothingness of physical phenomena so far as mortal experience is concerned. We do say that physical objects, substance, aches and pains, as well as sin and suffering, seem and are decidedly real to the person who experiences them, but we also say that they arise from an erroneous conception of facts, and that when man arrives at the understanding in which he gains the proper concept of the relation between God and man, these false impressions of what is real fade away and he attains to the actual truth of reality.

There is no reason for any one's displaying ignorance on the question of Christian Science. The opportunities are open for every one to gain a correct idea of its basic truth. "Science and Health with Key to the Scriptures" can be read and understood by any one who desires to arrive at the truths therein enunciated. In every city of any size there are free reading-rooms where Christian Science literature can be obtained and read. In almost every city and town in the country there are services, both on Sundays and Wednesday nights, and through any or all of these sources one can obtain the proper concept of what Christian Science is.

[George Shaw Cook in *Utica* (Ill.) *Gazette.*]

Christian Scientists have no disposition to test their faith in the power of God by intentionally swallowing poison to see whether it would have a fatal effect. They find plenty of opportunities in ordinary experiences to test the efficacy of their system of healing without seeking extraordinary means of doing so. Nor does this argue against their Christianity any more than against their sanity, for it is recorded of Christ Jesus that under certain circumstances he refused to cast himself down from the pinnacle, and quoting from the Scriptures said, "Thou shalt not tempt the Lord thy God."

As to our critic's statement that the Sermon on the Mount is with Mrs. Eddy quite a subordinate matter, I beg to say that he is mistaken. Thoughtful students of Mrs. Eddy's writings know that frequent reference is made by her to the Sermon on the Mount and the Ten Commandments, and that she urges upon her followers the necessity of living in harmony with the precepts laid down therein. On one occasion she said that "the Sermon on the Mount, read each Sunday without comment and obeyed throughout the week, would be enough for Christian practice" (Messages to The Mother Church, p. 47).

Our critic's statement that the Bible is secondary to Science and Health in the Christian Science church is also erroneous. The fact is that in all Christian Science church services the Bible takes precedence, and the reading from Science and Health is explanatory, confirmatory, and correlative.

[William J. Bonnin in *Catholic Herald*, Manchester, Eng.]

Christian Science draws a sharp distinction between creation, the things that are, as they appear to our human senses, and these things as they exist in Truth, in the divine Mind that created them. By the human material senses they are apprehended only relatively as phenomena, and not cognized in their absolute reality. Hence our sense acquaintance with phenomena is mere belief as compared with absolute knowledge of the reality behind, as it were, those phenomena; hence in Christian Science matter stands for the erring human concept of true spiritual substance. The human concept is, therefore, not truth. It is given in Christian Science the generic name of error, and it is the birthplace and domain, and the only birthplace and the only domain, of evil. All that is, is perfect, for "the law of the Lord is perfect;" the imperfections exist only as the human concept is imperfect.

Christian Science teaches that Christianity's message of salvation is that it is possible for us, through purity, honesty, and humility, to work out our own salvation by letting the false concept be corrected by the knowledge of the truth; or, in Paul's words, by letting that Mind be in us which was also in Christ Jesus. Thus it may be seen that no Christian Scientist would urge anything so egregiously foolish as the contention industriously combated by Father Day, that to the human senses matter, pain, disease, and evil are non-existent.

Christian Science teaches that God is Spirit, the only Mind: that He is Life, Truth, and Love. If this is "to deny the true nature of God," because it does not present Deity as a finite corporeal person, then we acknowledge materialism paramount and triumphant. As for "making a caricature of Jesus Christ," Christian Scientists gratefully aver that the understanding which has come to them through their study of Christian Science has enabled them to love, honor, and revere him more than ever they had power to in the past.

The healing accomplished in Christian Science is the outcome of a knowledge and understanding of man's true spiritual nature as the image and likeness of God, whereby the evil dwelling in the human mortal mind and reflected in our material conditions is destroyed, and vanishes as does darkness in the presence of light. Browning knew what evil was when he wrote: "The evil is null, is naught, is silence implying sound." From this it will be seen how diametrically opposed to truth it is to allege that this healing is procured by "mental suggestion" or any other process of the human mind. It would be quite impossible to find two things more completely contradictory than Christian Science and hypnotism.

A LETTER FROM BOSTON.

We have been privileged to see the following extract from a letter written by a Christian Scientist who has recently visited The Mother Church and the publishing house in Boston. The impression which the work that is being done here made on this visitor may be of interest to our readers; therefore we are giving it place here.—Editor.

"I arrived here just in time to attend The Mother Church last Sunday morning. The service seemed an unusually beautiful one. Everything was very simple and quiet, even to the music. I was reminded of the by-law which says the music shall not be operatic.

"I have visited both of the reading-rooms, and found in them the same restfulness and marked simplicity which pervaded the church. I have been pleased with the happy medium they attain in everything. There are none of the extremes which attend an effort to outdo others. They seem to have studied to have the outward appearance of things such that no attention will be drawn to it.

"I called at the manager's office in the publishing house. He was out, but with extreme kindness a guide was provided who showed me over the entire place. I have never seen so much harmony displayed in a business enterprise before. I was almost surprised to find how active every one is, yet no one is too busy to be courteous. I am well pleased with what I have seen here. If I were a critic I should feel without occupation."

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

[Republished by request from *Sentinel*, Oct. 23, 1909.]

"FEAR NOT."

THROUGH all the centuries mankind has been cheated and defrauded by its belief that evil is something real and powerful, but in the last half century, fortunately, through the discovery of Christian Science and its teachings by Mrs. Eddy, multitudes have been awakened to the falseness and iniquity of this belief, and thereby they are being freed from it and from its consequences. Through this belief in the supposed power of evil, and through it only, fear has entered into human consciousness, and only by its destruction can mankind avail itself of the blessed gospel proclaimed by the Master, who came "to heal the brokenhearted, to preach deliverance to the captives, . . . to set at liberty them that are bruised."

To fear evil is to subscribe to the belief that evil is power, and that it can harm us and harm others. That this fear should prevail is possible only through ignorance of God and of His unalterable law. That fear is a mistaken belief is apparent from its own contradictory character. The admission that evil is real, whether this admission be tacit or expressed, must of necessity carry with it the belief that evil is of divine origin, a belief which, when stated in plain words, is seen to be opposed to Christianity, because it either denies the omnipotence of God or holds Him to be the creator of evil and thus responsible for all sin, sickness, and death.

Evil not being of divine origin, and therefore being unreal in the sense that only God's creation is real, has no power; therefore, in fearing it mankind is simply fearing a self-imposed belief. This is a strong point in Christian Science, and Christian Scientists must rouse themselves not only to claim their freedom from evil, but also to assert their freedom from the fear which would give it power. Mrs. Eddy writes, on page 380 of Science and Health: "The physical effects of fear illustrate its illusion. Gazing at a chained lion, crouched for a spring, should not terrify a man;" and she adds, "Nothing but the power of Truth can prevent the fear of error, and prove man's dominion over error." Also, on page 392, she writes: "Casting out evil and fear enables truth to outweigh error. The only course is to take antagonistic grounds against all that is opposed to the health, holiness, and harmony of man, God's image."

That evil is held in Christian Science to be an unreality does not give Christian Scientists liberty to practise it, and Mrs. Eddy makes this very clear when she writes: "The evil-doer receives no encouragement from my declaration that evil is unreal, when I declare that he must awake from his belief in this awful unreality, repent and forsake it, in order to understand and demonstrate its unreality" (Messages to The Mother Church, p. 50).

Jesus' saying, "Be not afraid," is a note of divine encouragement to mankind, and we are taught in Science and Health (p. 425) that we are to "correct material belief by spiritual understanding," and that when we do this we "will never fear again except to offend God."

ARCHIBALD MCLELLAN.

MORE ABUNDANT LIFE.

THE spring is a great preacher. It speaks for beauty and law and wondrous art. There is a freshness, a spontaneity, and a joy about its coming and its song which win for it a welcome at every hearthstone, and make its reign a time of buoyancy and of cheer. Unspiritual as is the world, it cannot brook the suggestion that all this fine modeling of bud and branch, this weaving and tinting of leaves and petals, is but a manifestation of materiality. Nothing indeed satisfies our sense here but the thought that underlying all this material seeming there is an infinite and ever-active Mind which is good and beautiful and true.

Above all else, however, the spring speaks for more abundant life, life that like a mighty tide fills to their full every bay and estuary and channel, until all the land is laved and loved by the sea. These suggestions of the larger life are the more ministering because they meet the heart's great need. Mortal experience finds life but a toy of circumstance and utterly unsatisfying. At its so-called beginning the tender feet of the little babe are ofttimes found in paths that are strewn with thorns. While yet a child he becomes a prey to impulses that drive him, like a tiny craft, before the ocean's storm. Arrived at youth he is assaulted by appetites and passions which he does not understand, and to which if he yield but for an hour he may reap for himself and all who love him a lifetime of suffering. Manhood ushers in that impelling desire for place, possession, and power which leads to bitterness, while all along the way the possibilities of accident abound, and at the last death claims the right to make an insistent close of the tragedy men have called life.

Surely those wondrous words of the Master, "I am come that they might have life, and that they might have it more abundantly," were most opportune, for nothing but a larger, more vital, more spiritual sense of life can solve the human problem and end human woe. The wonder-working of spring, the fragrant prodigalities with which it carpets the hillsides and makes bush and tree to burn with blossomings, as if aflame with the divine glory,—all this will have served us most and best only when it has lifted our thought to that unfailing and inexhaustible source of life which was made manifest by the lowly Nazarene.

The life of the Master was a wayside flower in its gentleness, a giant oak in its strength, a sun-bathed mountain in its repose. It had the winsomeness of Love; the sovereignty of Truth. Before it materiality fell away as the bark yields to the swelling bud. His sense of life was freedom-bringing, joy-inspiring, good-achieving, all-glorious, divine, and with it he would endow every willing and obedient heart. This is the end and achievement of that efficient faith in him which links every true Christian to the throne of God. The asserted powers apart from God which have entailed for mortals the ills of sin, sickness, and death, were proved to be nothingness in his presence. He suffered them not even to speak, and every nook and corner of nature is reminding us today of the ever available riches of this Life divine.

In the teaching of Christian Science Mrs. Eddy is again calling men to an understanding of the gladness, the beauty, the sweetness, and the supreme power of the Christ-life. We are being led to see that the infinite wisdom and glory is to find fitting expression in the at-one-ment of cause and effect,—God and man, here and now. More of the Christ-life means more of freedom from sickness, poverty, limitation, and all the fears and foolishness of mortal sense. This is the gospel of Christian Science, and it is rejoicing the heart of mankind. It is the herald of a nobler, diviner, happier experience, and its blessings are as sweet and satisfying as are the flowers of spring.

JOHN B. WILLIS.

REASON AND CONSCIENCE.

IN "Science and Health with Key to the Scriptures," Mrs. Eddy says, "God has endowed man with inalienable rights, among which are self-government, reason, and conscience" (p. 106). It is very significant that reason and conscience are thus linked together and their vital relation to each other shown, the more so since many have held very hazy views as to the function of conscience, some thinkers regarding it as a propelling, not a directing force in human consciousness. Webster informs us that as science means knowledge, it follows, etymologically, that conscience means self-knowledge. He defines conscience as "the faculty, power, or inward principle which decides as to the character of one's own actions, purposes, and affections, warning against and condemning that which is wrong, and approving and prompting that which is right." There are numerous references to conscience in the New Testament, especially in Paul's writings, the most familiar passage being that in which he speaks of the one whose "weak" conscience is defiled by his partaking of that which is offered to an idol, and also of those who have "their conscience seared with a hot iron." Again, in Hebrews, we find the fervent desire expressed that our conscience may be purified "from dead works to serve the living God."

In Christian Science conscience might be defined as the faculty which responds to the demands of divine Principle, or to be more accurate, that which is conscious of such demands. A nature which had no sense of the demands of justice, of truth, or of right, would tend toward annihilation, for evil is not self-preservative but self-destructive. An enlightened conscience, on the other hand, would prove an awakened spiritual nature, responsive to the requirements of divine law; whereas, the one whose reason and conscience were divorced would be swayed by fear, superstition, and the tyranny of man-made creeds and dogmas. Such an one would need to have his conscience purged from "dead works," that he might truly serve God and the cause of righteousness.

If the whole desire is to know the will of God and to do it, obedience must and will follow, and this will of necessity bring greater and greater enlightenment. One of the greatest miseries of mortal experience is the uncertainty as to what is right on many occasions, but there can be no uncertainty in the divine Mind, to which we have continual access, and to the extent that we reflect this Mind our sense of uncertainty vanishes, and we shall do all things to the glory of God. Our first duty, then, is to do what our revered Leader has said in her beautiful hymn (Miscellaneous Writings, p. 398),—

I will listen for Thy voice,
Lest my footsteps stray;

the next is to obey, whatever the demand of Truth may be, for it is ready obedience which quickens the inner ear to hear the voice of God.

No one would question that the harmonious action of reason and conscience constitutes a healthful mental and moral condition, but Christian Science has revealed the fact that this includes a healthful physical condition as well. The "self-government" of which Mrs. Eddy speaks as a divine endowment, is found to extend to all within the area of human experience, and the conscience which is "void of offense toward God, and toward men" (to quote Paul again), aids in propelling even the bodily activities toward health and harmony, while the spiritually enlightened reason directs thought toward perfection in all things. Fear is not a factor in this scientific process, but instead of it there comes an ever greater assurance that

The hand which bears creation up,
Shall guard His children well.

ANNIE M. KNOTT.

SEMIANNUAL LECTURE IN THE MOTHER CHURCH.

The First Church of Christ, Scientist, in Boston, Mass., announces a lecture on Christian Science by Bicknell Young of London, England, a member of the board of lectureship of The First Church of Christ, Scientist, Boston, Mass., in the Church Edifice, Falmouth, Norway, and St. Paul streets, Monday evening, May 9, 1910, at eight o'clock. The public is cordially invited.

LETTERS TO OUR LEADER.

Dear Reader:—The following letter is a gem of the first water, that should receive the best setting and most prominent place on the walls of society.

MARY BAKER EDDY.

April 22, 1910.

St. Louis, Mo., April 19, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—The *Monitor* is meeting one of the greatest possible needs, and to have in our family a clean, newsy newspaper has filled a long felt want, as this has been a matter I have thought of for the last thirty years. My prayer and wish was for a clean newspaper, and when the *Monitor* came out it met so perfectly my ideal of a newspaper that I have sent out many hundreds of them, and particularly the Thanksgiving number. I also have made many subscriptions for friends, who have appreciated it very much. I now feel that I should do more than this, and I am taking great pleasure in sending you a check for five hundred dollars, to be used in connection with the *Monitor* in increasing its circulation, or sending papers to institutions, or for further extension of buildings, or for any purpose which in your wise judgment seems best fitting. My heart overflows with deep gratitude that some one has come forth and given to the world a newspaper such as the *Monitor*, and I want to allow the expression of this gratitude to be made manifest in a little personal sacrifice on my part in sending this check, which I am sure may be put to good use.

I also want to express heartfelt gratitude for all of the Christian Science publications, and especially for the textbook, which has been such a healer and help in every line of work. I truly confess that until I received this book, which is indeed a "Key to the Scriptures," I was not able to read the Bible with any interest or understanding; but, since having had placed in my hands "Science and Health with Key to the Scriptures," a ray of spiritual light has been thrown on every page of the Bible, and has made it the most read and most loved book in the family, for it has brought out the great Master's teachings practically for our daily needs. We have had so many proofs of the healing and saving qualities of Christian Science, that we may well express our loving gratitude that we have found this great subject, which is purifying the people, putting business on a higher and more exalted standard, bringing health, peace, and happiness to those who were in such seeming bondage to material sense, and has shown us how we may, as Paul so aptly said, "put off the old man with his deeds; and . . . put on the new man, which is renewed in knowledge after the image of him that created him."

Yours in the truth,

CLARENCE H. HOWARD.

Ottawa, Ont., April 12, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—The members of First Church of Christ, Scientist, in this city, rejoice in your loving leadership, and in the wise provision you are making in the

Digitized by Google

Manual, through your helpful admonitions, and most of all by the noble example of your life, to establish the brotherhood of man and the kingdom of heaven on earth. We also wish to express our unswerving loyalty and loving gratitude to you by demonstrating Truth and Love in healing the sick and reforming sinners.

Sincerely,
First Church of Christ, Scientist, Ottawa, Ont.
MISS CYNTHIA WRIGHT, *Clerk.*

MRS. EDDY'S COMMENT.

God will abundantly bless this willing and obedient church with the rich reward of those that seek and serve Him. No greater hope have we than in right thinking and right acting and faith in the blessing of fidelity, courage, patience, and grace.

MARY BAKER EDDY.

Memphis, Tenn., April 18, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Our church, in quarterly meeting assembled, voted to send you a message of love and gratitude for your example of humility, courage, and obedience to God, divine Principle. We thank you and love you more each day for your wonderful revelation of Truth in "Science and Health with Key to the Scriptures," and your other writings, and especially do we as a church organization appreciate the precepts and rules for our guidance found in the Manual of The Mother Church. We shall strive to obey its wise counsel, and prove our faith by our works, and through a higher sense of law as divine Principle, Love, be enabled to do better healing, to comfort such as mourn, and to awaken the sinner. We wish you all good, and know that divine Love supports you in every good word and work.

Yours with increasing love and loyalty,
Board of Directors, First Church of Christ, Scientist,
EDWARD F. STAPLETON, *Chairman.*

La Grange, Ill., April 13, 1910.
Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Beloved Leader:—We, the members and congregation of First Church of Christ, Scientist, La Grange, assembled in special meeting, send you love and greetings. You will rejoice with us to know that, through growth in the understanding of Christian Science, we are now free to dedicate our church building, in which we have been holding services since January, 1908. We are deeply grateful for "Science and Health with Key to the Scriptures," and for the Lesson-Sermons which have made this demonstration possible. Through them has come the understanding that the church is not the building, but, as shown in Science and Health (p. 583), it is "that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick."

We desire to express our loving gratitude for the rousing of our "dormant understanding" to this better apprehension, and at our dedicatory service, which has been set for May 1, we shall earnestly strive to consecrate our lives more completely to the service of Truth, and to be more loyal and obedient to the demands of Christian Science.

Lovingly and gratefully yours,
First Church of Christ, Scientist, La Grange, Ill.,
MRS. MAUDE L. WHITMAN, *Clerk.*

Harrisburg, Pa., April 18, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—At the April quarterly meeting of the members of First Church of Christ, Scientist, of Harrisburg, it was unanimously resolved that we send to you a message bearing loyal love from the workers in this field. We are grateful beyond adequate expression for the privileges of church-membership in Christian Science, and for the opportunities therein afforded for humble and fruitful service in the great Cause of which you are the Founder and Leader. We rejoice to know that the "structure of Truth and Love" (Science and Health, p. 583) is being lifted up here in the capital of a commonwealth whose founder, in dedicating it to religious liberty, prayed that "this holy experiment" might ultimately prove "an example to the nations."

MISS EMMA B. HARCLERODE, *Clerk.*

Englewood, N. J., April 5, 1910.

Beloved Leader:—For all the wonderful blessings that have come into my life and for the precious understanding of Life, Truth, and Love that is day by day unfolding in my consciousness through the study and application of the Principle as found in your book, "Science and Health with Key to the Scriptures," I thank God. God bless and keep you, dearly beloved.

Lovingly and gratefully,
GERTRUDE H. FRENCH.

New York, N. Y., April 18, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Holy resolves are the sacrifice which my gratitude offers to God, and to you His messenger in this hour, for your untiring care of your followers and your ceaseless, conscientious work which covers every detail as it appears. This fact is again made manifest in your letter in the *Sentinel* of Jan. 1, 1910, entitled, "Practitioners' Charges." Timidity, reluctance, and fear cannot abide in the consciousness cognizant only of God. In your inspired book, "Science and Health with Key to the Scriptures," page 233, we read, "Progress is the law of God, whose law demands of us only what we can certainly fulfil." We your followers know that God's everlasting love watcheth over you.

Yours loyally,
NETTYE NACHMAN.

Lawrence, Kan., Jan. 9, 1910.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Lawrence, Kan., in meeting assembled, resolved by unanimous vote to acknowledge to you our deep gratitude for your inspired leadership, which we recognize is especially manifest in the wise provisions for church organization and government set forth in The Mother Church Manual. We rejoice in the courage and loyalty of the Board of Directors of The Mother Church, whose action within the past few months in separating between Truth and error has been a veritable bugle-call to Christian Scientists everywhere to awake to righteousness. We assure you of our unceasing love and loyalty to you, and of our earnest desire faithfully to "follow the directions of God as simplified in Christian Science" (*Sentinel*, Dec. 18, 1909).

In formulating a new set of by-laws, which we have just adopted, we have availed ourselves of the privilege of using "the Magna Charta of Christian Science" (*Journal*, June, 1904) for our preamble, and have endeavored to follow the fundamentals enunciated therein, for we recognize that it is only through humble obedience to the rules of Christian Science, as set forth by you, that our labors will be blessed of God to the advancement of His kingdom on earth.

HENRY B. OBER, *First Reader,*
MRS. GRACE H. OBER, *Second Reader,*
MRS. ELIZABETH EDIE, *President,*
MARSHAL A. EDIE, *Clerk.*

THE LECTURES.

ST. THOMAS, ONT.

A large and interested audience assembled at the City Hall Monday night, Feb. 14, to listen to the address of Frank H. Leonard on Christian Science. Albert Roberts, chairman of the board of education, introduced the speaker in part as follows:—

The citizens of our city are to be favored this evening with a lecture on a subject which is attracting the attention of thoughtful men and women everywhere, namely, Christian Science. Strange to say, after nearly twenty centuries since the great personage Jesus of Nazareth appeared among his own people, teaching in parables the great truths of nature, that we in this twentieth century should be devoting more thought and energy than any people heretofore have devoted to a study and attempt at elucidation of the great Principle of life enunciated and wrought out in actual practice by him.—*St. Thomas Times.*

CARTHAGE, MO.

Judge Septimus J. Hanna lectured on Christian Science March 13. He was introduced by Judge J. D. Perkins, who said in part.—

I do not claim to understand Christian Science, but it has been studied, investigated, and accepted by a large and ever increasing number of earnest and intelligent men and women of our country, and the subject is worthy of the most thoughtful and careful investigation. We live in an age of tolerance, progress, development, and advancement, and whatever may be said to the contrary, there is more virtue in the world today than ever before. Our standards of life are more elevated and on a higher plane now than at any previous time in the history of the world. It is claimed for Christian Science that it is the sober second thought of advancing humanity. The human race today is longing and hungering for the truth, and whoever comes with a message purporting to point the way to a correct understanding of the truth is accorded a patient and respectful hearing.—*Correspondence.*

SAN DIEGO, CAL.

A lecture on Christian Science was delivered by Prof. Hermann S. Hering at the Garrick Theater Sunday afternoon [March 27]. In introducing the speaker the Rev. E. R. Watson said in part.—

In the course of events, when the time came that a people in our midst should be helped to freedom and a new life, men left their peaceful occupations, their professions, their trades, their fields or flocks, and took up arms in order to proclaim liberty to the captive. So men, in behalf of another form of emancipation, have left the pursuits of sharp business competition, the hard, bitter struggle for gain, to go forth as evangelists for the life that is free and whole and good, the life the world today most needs.

The operation of divine Principle in our world is beyond the control of the institutions, the preferences, the foresights of men. Light and power operate strangely through deeper, finer channels than what we may see and understand. The baptism of Christ, his consecration to his work, was most unconventional and simple. In God's great out-of-doors the baptism came upon him by the ministry of one in the great open way of life. It seems to me that it is the most beautiful, most interesting phase of this work that men who have served in God's temple of worldly affairs may come with clean hands and pure hearts, offering the highest spiritual service, and that is the interpretation of great truths which should be in the possession of all humanity—*Union.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Boston, Mass., Bicknell Young, The First Church of Christ, Scientist, The Mother Church, Falmouth, Norway, and St. Paul streets, May 9.
Hornell, N. Y. (First Church).—Judge William G. Ewing, Universalist Church, April 29.
Duluth, Minn. (First Church).—Rev. Arthur R. Vosburgh, Lyceum Theater, Sunday afternoon, May 1.
McMinnville, Ore.—Hon. Clarence A. Buskirk, Imperial Theater, May 6.
East Aurora, N. Y.—Clarence C. Eaton, Universalist Church, 3:15 p.m., May 8.
Madison, N. J.—Prof. Hermann S. Hering, Assembly Building, 3:30 p.m., May 8.
Winnipeg, Man.—Rev. Arthur R. Vosburgh, Walker Theater, 7:30 p.m., May 8.
Richmond, Ky.—Francis J. Fluno, M.D., Court House, May 12.
Bradford, Pa.—Prof. Hermann S. Hering, Universalist Church, May 12.
Grand Junction, Col.—Frank H. Leonard, Park Opera House, May 12.
Oregon City, Ore.—Hon. Clarence A. Buskirk, Shively's Opera House, May 13.
Marlboro, Mass.—Judge Septimus J. Hanna, Universalist Church, May 13.
Salamanca, N. Y.—Prof. Hermann S. Hering, Baptist Church, May 13.
Omaha, Neb. (Second Church).—Bliss Knapp, Boyd's Theater, May 13.
Colorado Springs, Col.—Frank H. Leonard, Perkins Hall, May 13.
Baker City, Ore.—Hon. Clarence A. Buskirk, Opera House, 3:30 p.m., May 15.
Dover, N. H.—Clarence C. Eaton, City Opera House, 3:15 p.m., May 15.
Owensboro, Ky.—Francis J. Fluno, M.D., Grand Opera House, 3:30 p.m., May 15.
Summit, N. J.—Judge Septimus J. Hanna, Beechwood Hall, 3 p.m., May 15.
Joliet, Ill.—Prof. Hermann S. Hering, Auditorium, Clinton street., 3 p.m., May 15.
Decatur, Ill.—Bliss Knapp, Powers Opera House, 3:15 p.m., May 15.
Rocky Ford, Col.—Frank H. Leonard, Grand Opera House, 3:30 p.m., May 15.
Lincoln, Neb.—Rev. Arthur R. Vosburgh, Oliver Theater, May 15.
Bath, Me.—Clarence C. Eaton, Universalist Church, May 16.
Ottawa, Ill.—Prof. Hermann S. Hering, Christian Science Chapel, May 16.
Grand Rapids, Mich.—Bliss Knapp, Powers Theater, May 16.
Longmont, Col.—Frank H. Leonard, Dickens Opera House, 8:15 p.m., May 16.
Chanute, Kan.—Judge William G. Ewing, Hetrick Theater, May 17.
Nashville, Tenn.—Francis J. Fluno, M.D., Watkins Hall, May 17.
Kankakee, Ill.—Prof. Hermann S. Hering, Huling Hall, Public Library Building, May 17.
Muscatine, Ia.—Bliss Knapp, Grand Opera House, May 17.
Boulder, Col.—Frank H. Leonard, Curran Opera House, May 17.

TESTIMONIES OF HEALING.

When thirteen years of age, I sustained a serious injury to my left foot, and for nearly three years I was an invalid, undergoing during that period about a dozen operations for the removal of pieces of bone from the foot. When I finally recovered it was only to be assured that the old trouble might break out at any time, as my foot was left in a bad condition. For twenty years I lived in constant dread of a return of the trouble, for there was never a week that I did not suffer more or less pain, and a great deal of the time a tight bandage was worn on the foot to reduce and prevent swelling and inflammation.

Strange as it may seem, I took up pipe-organ playing as my life-work. I studied at Oberlin, O., and in Paris, and so adapted my afflicted foot to the pedal work that even my teachers did not discover the difficulty under which I labored until I told them of it. Early in June, 1907, just as I was making preparations for a series of organ recitals, the thing I had greatly feared came upon me, and I was hurried off to a hospital to have my foot operated upon. The doctors pronounced the trouble tubercular, in its most aggravated form, and after five operations it was finally decided to amputate the diseased member, which was done on June 22. The conditions were apparently against my recovery, for when the doctors and hospital authorities had pronounced the wound healed, and I had gone so far as to have ordered an artificial foot made, the disease again appeared. Again, without warning, I was rushed off to the hospital and a second amputation was performed.

Week after week passed, and that wound refused to heal. The doctor insisted that I would get well in time, but that he could not promise how long I would stay well. He said I must always spend a great deal of time in the open air, sleep with all my windows open, and do various other things to combat the disease. Nearly two months had passed since the second amputation, and the daily dressings were so painful that my nervous system was giving way under the strain. To add to my mental anguish, a black spot appeared near the end of the stump, and the doctor said it might mean another operation and possibly a third amputation. This was our Christmas cheer from *materia medica*.

On Sunday, Jan. 5, 1908, the doctor announced that he had made all arrangements for me to return to the hospital that day, in order that he might use the X-ray on me; but he was too late! The evening before I had yielded to my husband's entreaty and had consented to have him engage a Christian Science practitioner to take charge of my case, and when the doctor spoke of a return to the hospital, my husband said, "She is not going, doctor; and while you have been very faithful and very kind to us during all these months, we want to discontinue your services from today, for we are going to try Christian Science." Thus we, who had ridiculed what we thought was Christian Science, were brought in our dire extremity to lean upon God's blessed arm. That same day I had my first treatment. When the dear practitioner left me all my pain was gone, and from that day to this it has never returned, for my fear was cast out by "perfect love." In five weeks the wound was healed, although the doctor's prediction came true and early in the practitioner's work a much feared abscess did form; but it sneaked away as quietly as it came, for it was simply error coming to the surface to be destroyed by Truth.

In two months from the time I was healed I was walking on the artificial foot which had been ordered months before. June 4, one year from the day I first went to the hospital, we again went to housekeeping, since which time I have done practically all my own housework. I walk without even the suggestion of a limp and my health is perfect. My friends said I could never play the pipe-organ in this condition, but I knew that the same power which had restored my health could and would enable me to do my work,—the work for which I had spent time and money in fitting myself. In August, six months after my healing, I played for the Sunday services in three of the largest churches in Chicago, making my demonstration of healing so clear and unmistakable that many doubters were convinced.

I realize that all these things are mine through the power of the Christ who has been so clearly revealed to us through Mrs. Eddy, whose leadership I gratefully acknowledge.—MINNETTA RIGGS, Chicago, Ill.

I wish to add my own testimony to that of my wife as given above. While she was suffering so terribly under the surgeon's knife and from the effects of the many surgical operations, friends here in Chicago and elsewhere would say to me, "Why do you not investigate Christian Science?" Now I had been an orthodox minister at one time, and was full of a narrow and bigoted prejudice against what I thought was Christian Science. But when on a business trip to Akron, O., our old home, just a short time before we turned to Christian Science, I called at the home of a former neighbor, who is a Christian Scientist. I knew the sterling quality of her character and I knew she was honest when she said, "Oh, why will you let your wife lie there and suffer? I know that Christian Science will cure her if you will only try it."

From that time I began to inquire into this great truth, with the results as given in the foregoing testimony. Personally I have received great blessings from this new-old truth. From infancy I was a great sufferer from throat trouble of the most stubborn type. In the summer of 1908 a most violent attack came upon me while I was on a lecture tour. Ordinarily it would have meant a week or ten days in a hospital, but I went right on with my work, did not miss an engagement, and was entirely healed in three days, a Christian Science practitioner giving me absent treatment. A stomach disorder of five years' standing yielded instantaneously; the tobacco smoking habit of over twenty years' duration has gone, and I have not the least desire for the weed. Both my wife and I are slowly learning to do our own work in Science. The Bible, Science and Health, and the authorized literature on Christian Science are our constant companions. We have been most fortunate in our practitioner, as both she and her husband are truly consecrated Christian students and workers. We have been much with them, and they have led us on the way into a clearer understanding of Life, Truth, and Love.

Although I preached for years, the Bible has for me a new charm and a vital meaning since I have read it from a Christian Science standpoint. We are in this work and study for all it can bring to us in the way of spiritual development and holier living. We are trying to realize the Master's promise; "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." We are grateful for membership in Second Church of Christ, Scientist, in Chicago; we are grateful to an inexpressible degree to God, who "so loved the world, that he gave his only begotten Son," and who still so loves us that He has in these latter years given to the world our Leader, Mrs. Eddy, who so wondrously interprets the healing truth to us.—SPILLMAN RIGGS, Chicago, Ill.

[Translated from the German.]

The wonderful truth which Christian Science teaches came into our home in January, 1909, through an incident which follows, though words are hardly sufficient to express our thanks. About the time mentioned I went to see a lady with whom I was acquainted and who owned a store, as she was bedridden and I liked to be of some help to her.

Digitized by Google

One afternoon a salesman came in, and hearing of the lady's illness asked if she would not try to get help in Christian Science. Up to that time I had not heard of Christian Science, but I asked this gentleman a few questions, which were answered in such a kind way that I felt a desire to attend one of these services. On the following Sunday I went to church for the first time in years, and I cannot describe the wonderful change that has come into my life since that Sunday. My dear husband, I am thankful to say, immediately agreed to take up the study of this healing truth. We secured the wonderful book, "Science and Health with Key to the Scriptures," and derived from it daily more spiritual light. About Christmas, 1909, came the test which is the chief motive for sending in this testimony.

About that time I bruised the thumb of my right hand, causing considerable pain for the first few moments. As the pain disappeared, however, and no injury was visible on the finger, I attended to my duties just as I had done before, without in any way applying the wonderful teaching of Christian Science. On New Year night, however, I felt such pain in the thumb that I could not sleep. I began to declare the truth as best I knew how, but the finger grew worse. The condition grew more alarming, the arm being swollen: indeed the whole side of the body was affected, and I could neither eat nor sleep, nor do any mental work. In my great distress once more I opened the text-book and noted the advice which our beloved Mrs. Eddy gives us (Science and Health, p. 420), that if we cannot heal ourselves readily, we should not continue to suffer, but ask a Scientist to help us.

I immediately sent for a practitioner, who came as soon as she could. She worked with great love, and her work was successful, for in spite of all the pain I fell asleep; but when I awoke, the pain awoke also. I then asked for absent treatment, as I had already enough comprehension of Christian Science to understand that the spiritual has nothing to do with personal presence. Every day I struggled to overcome the lie with the truth, and by Saturday night my condition had so much improved that I was able to hold the Bible in my hands. I opened it, and my eyes at once fell on the passage where it tells how Jesus healed on the Sabbath day. My spiritual strength returned, and I began to study the Lesson-Sermon on Sacrament, which did me good. About five o'clock in the morning I fell asleep, feeling that God was with me and that evil could have no power over me. At nine o'clock my husband woke me up. He was very much surprised that I should be able to sleep so well in spite of the condition of my hand and arm, but I exclaimed, "I am free!" and from that hour I had no more pain. The healing of the wound which had formed was slow but wonderful. I was at once able to resume my household duties, and even worked more than usual, as my work was very much behindhand. Several of my friends who do not yet study this wonderful truth marvel how such a trouble could be cured without an operation or the help of a physician, but my dear husband and I were firm in our trust in eternal, divine Love, who is our best physician and is always near us; all we have to do is to receive.

We are grateful more than words can express for this wonderful healing, and for the help received in many other ways, but especially for the spiritual illumination which we have experienced through Christian Science. We thank God with all our hearts for having given us that dear, good woman, Mrs. Eddy, through whom the way to Truth is being illuminated for us, so that we only need to follow. MRS. ZUGENBUEHLER, EMIL ZUGENBUEHLER, Chicago, Ill.

I wish to express my gratitude for help received from Christian Science. A short time ago, while at work, my foot was caught between the dray wagon and the depot platform. The pain was very great, and when I reached home the accident was reported by telephone to a Christian Science practitioner, who at once gave treatment. The pain soon began to lessen, and in an hour it was all gone. I slept soundly all night and in the morning came downstairs without any trouble. The next day I was well and at work as usual. For this and other healings I feel very thankful.—GEORGE W. CHASE, Janesville, Wis.

I feel it a duty as well as a very great privilege to tell of a few of the many blessings which have come to me since learning of Christian Science and accepting its teachings. My desires and thoughts today are so very unlike those which I entertained when, over five years ago, I received my first help through Christian Science treatment, that I seem hardly able to tell of the conditions from which I have been made free.

One of the first healings was that of chronic bowel disorder. About eleven years ago I underwent a surgical operation for an abdominal trouble, and it was thought by the surgeon that the bowel difficulty would be much lessened, if not entirely overcome, as a result of operating for the other internal trouble. This did not prove to be so, however, and I did not receive any lasting benefit until I was healed through Christian Science: nevertheless, I feel most kindly toward the good man who tried to help me. Severe headaches, with which I suffered from early childhood and for which I had tried all sorts of material means to get some relief, have almost entirely disappeared from my consciousness. Only as I am willing to have one God, who is always good, to love instead of hate, trust instead of fear, rejoice instead of sorrow, forgive instead of condemn, am I able to know and to do God's will in a far greater sense than I had ever dreamed of doing, or in fact had ever thought I would care to do, until awakened somewhat to the truth of being through the study of Christian Science.

A little son, about five years of age, has been healed in Christian Science of many ailments supposed to be common among children. My husband has overcome a desire for sociable drinking. We always kept liquor in the house and felt free to take it when we desired, but the sense of worldliness has been largely overcome, in my healing, and we are very glad to know something of the true desires and pleasures of life and living.

MRS. ANNE LEE HUDGENS, San Francisco, Cal.

A little over six years ago, life to me was not worth living. I had suffered from childhood, and knew not what it meant to be happy. I was seeking God, but did not know where or how to find Him. I went to New York city, and while attending a musicale I saw one whose light was not hid under a bushel. I inquired who she was, and was told she was a Christian Scientist. I made her acquaintance, and through her was led to investigate Christian Science and to take treatments. I was healed in a very short time of severe nervous trouble, stomach and bowel disorders, and gall-stones, also of internal difficulties, for which I had had an operation but received no benefit. I had worn glasses for over ten years, had an operation on one eye, and had constant pain in my eyes and head for a year and a half. Nevertheless I laid off my glasses after the first treatment in Christian Science, and had no more pain, nor have I needed glasses since.

At first the physical healing seemed so wonderful that I felt it was the main thing, but I soon learned it was as nothing compared to the spiritual and moral healing. I have also been wonderfully helped financially. The change in my life has been so great that it would be impossible for me to tell all that has taken place. I was indeed brought up out of the land of Egypt, out of darkness into light. Can any one wonder that my heart is full of love

Digitized by Google

and gratitude for our dear Leader, who has shown me how to find God. This I have learned through the daily study of the text-book, "Science and Health with Key to the Scriptures," God's priceless gift to mankind in this age.

My daily prayer is that I may live so as to prove the allness of God and the nothingness of evil, and be able to show others how to find God. I am very grateful for class instruction and for all that has helped me in my journey from sense to Soul. I am also grateful for the *Sentinel*, *Journal*, and *Monitor*, as the help I gain from this literature enables me to overcome sin and sickness.

IDA B. SMITH, Williamsport, Pa.

I would like to give my testimony to the healing power of Truth. Over two years ago, four doctors at Flagler, Col., one at Lebanon, Neb., and one at Excelsior Springs, Mo., gave me up,—said I could not be cured, as I had kidney disease. I thought I would try Christian Science, as it was my last hope, and I got better from the start; but it was eight months before I could say I was healed. I had used tobacco for twelve years, and also drank some; but I am cured of it all. I cannot tell half of what Christian Science has done for me and mine.

HARRY POOL, Marion, Neb.

I gladly subscribe to the truth of my son's testimony, and offer a mother's gratitude for the rescue of her only child from the fate that *materia medica* had decreed for him.—MRS. EMMA POOL, Hendley, Neb.

The following testimony may be of help to some sufferer,—some brother who may be called upon to go through an experience similar to my own. One morning in September, 1908, I was working on a hoist which was lifting limerock. My thumb was accidentally caught in the cable, and terribly injured. When I found myself free again I looked at my hand, and the first thought was to cover the wound from sight; then I began to repeat the "scientific statement of being" (Science and Health, p. 468). I had about four hundred feet to go to the office to report the accident and get assistance. By the time I reached the office I was perfectly calm, and knew that I wanted a Christian Science practitioner first and then a surgeon. I gave the clerk the name of a practitioner and asked him to call her at once, but he could not find the number and insisted that such a name was not there. I said to him that if he would let me take the book I would find it; which I did, and I was soon in the care of the practitioner. After this was accomplished I was ready for the surgeon. A buggy was soon ready, and in a few minutes I was on my way without a particle of fear, which meant very much to me. On the way I stopped to speak to the practitioner, as I had to go past her place. The surgeon's work was done without the usual anesthetic, but there was little or no pain. After this was over I went home and put in the greater part of the day reading Science and Health. As the next day was Sunday I remained at home, but Monday I arose at the usual hour and went to work. I had to use my right hand many times that day to write, but this was done with little difficulty. Tuesday my hand was out of the sling most of the day. When I awoke Wednesday morning I knew the demonstration was complete. Thursday the surgeon took the bandages off, and was much surprised to find the wound perfectly healed.

I am very glad to know that one can go through such trials without the loss of a moment's sleep or any pain. I am very grateful to God for this wonderful demonstration, and also to our beloved Leader, Mrs. Eddy, through whom the light of Truth has reached humanity.

S. D. MORRISON, Fort Collins, Col.

Thankfulness to divine Love impels me to send my testimony to the *Sentinel*, and I do so with the hope of thereby helping some one who is striving to overcome evil with good. Through the close study and application of the truth as found in Science and Health, with the Bible, and the purifying fire of affliction, the insignificance of personality as either good or evil was unfolded to me. My progress, though seemingly slow, has none the less been steady, and the inspiring lessons of Truth have sunk deep within my heart. After finding that God is good and that He is absolutely all, it was plain to see that evil could never be real.

I came to Christian Science about fourteen years ago, very sick and wretched, and was healed of many ailments of ten years' standing. I had been treated by the best physicians in five different states, and was operated on by one of the best surgeons in the United States. Now, after our experience in Christian Science, depending (for a family of five) on God alone for help, not only for physical conditions but for all the problems of human existence, we have not found the truth wanting. Two of my children were born under Christian Science treatment. The birth of my son, seven years ago, was very harmonious. My youngest daughter was healed in three absent treatments in a severe attack of fever, and it did not spread to the other children. Many other ailments have been healed instantly or in a few treatments. None can be more grateful than a mother who is striving to destroy the errors of sense and teach her children the "Science of being."

To the God-inspired woman who has given to a hungering world "Science and Health with Key to the Scriptures," I bow in meek and humble gratitude.

ALICE M. MCKEE, Congress Park, Ill.

I desire to express my gratitude for Christian Science and what it has done and is doing for me. It has been a great benefit to me, both mentally and physically. In a period of fourteen years I have not had the aid of doctors or drugs, and among the ills from which Christian Science has freed me, are severe headaches, throat trouble, carsickness, and nervousness. I was but six years old when my mother first became interested in Christian Science, and cannot remember of ever depending on anything but the power of Truth to overcome any difficulty which might arise. Christian Science has also been of help to me in my studies, and above all it has shown me that God, divine Mind, is the only teacher. It has taught me to see and love spiritual realities. I had always been dissatisfied with mortal mind's belief of friendship, and had found it to be as a "reed shaken with the wind," but Christian Science revealed to me the fact that personality does not constitute friendship, but that all which reflects, manifests, and expresses infinite good is immutable.

I am daily trying to follow the "Rule for Motives and Acts" in our church Manual, and be worthy to be called a Christian Scientist. Words would fail to express all my gratitude to our dear Leader, Mrs. Eddy, but I can follow where she leads: for Christ Jesus said, "If ye love me, keep my commandments."

LEONOIR EVELYN MCKEE, Congress Park, Ill.

Gratitude for the many blessings I have received since coming into an understanding of Christian Science, impels me to offer my testimony. About four years ago, after an operation, Christian Science was offered to me for the second time. A year before this a dear sister had given me a copy of Science and Health, and asked me to read it. I took the book, but said defiantly that while Christian Science might help others it could not help me. I read the book, but did not understand it at all. After the operation, I met a family of four Scientists, and when they spoke to me about Christian Science, I said, "Can it cure the

Digitized by Google

blues?" as I had no idea it could help me physically. The dear friends said that it would help me in whatever I sought it for. I was then very weak and miserable, and looked on the dark side of everything, but they gave me some Christian Science literature to read and explained a few things to me, and I shall never forget how happy I was when I came home from their house. I was actually singing! From that time on, not a drop of medicine passed my lips, and I put the truth into practice as I understood it. I improved slowly, but did not have the depression that I formerly had. The attacks did not last long, and I am now in perfect health. My husband does not understand Science, but he has said he would not have me back in the old way for anything.

Our little girl, eight years old, is a great help to me. As I took up the reading, I would read and teach her, and now she uses it for everything. She says that God helps her to know her lessons every day at school. One morning she woke up with a high fever, and at first thought she would not go to school, but I read to her from Science and Health, and also "The Mother's Evening Prayer" (Miscellaneous Writings, p. 389). In less than a half hour, she wanted her breakfast and went to school. Another morning she was quite hoarse, but we sang a few hymns together and all error vanished into its native nothingness. As there are no other Scientists here, my little daughter and I go to Corpus Christi sometimes, to hear the reading of the Lesson-Sermon, as some fifteen or twenty meet there in private houses. This is always a pleasure, and helps us very much. When I look back, I can see that I am progressing, but my desire is to be near a church or other Scientists. I am, however, happy to say that I have helped quite a few to see the truth.

At first I was not grateful to Mrs. Eddy, but the more I understand Christian Science the more grateful I am, for if she had not rediscovered this glorious truth, we might still be groping in the dark. I am grateful to God every day that one was found brave enough to stand alone and lead us out of darkness into light.

MRS. EDWIN C. FISHER, Portland, Tex.

It is with sincere gratitude for the many blessings which Christian Science has brought me that I give this testimony. About ten years ago I suffered for a year with what the doctors pronounced an abnormal growth, and for which they said an operation would be the only hope of permanent relief. I then heard of Christian Science through a dear friend, and sought the help of a practitioner. I was healed in two months and have never experienced that condition since. I am indeed grateful to God for this truth which has been revealed to me.

MRS. MARY ROOT, Flushing, Mich.

Words cannot express my gratitude for what God has done for me and my children through Christian Science. My boy, twelve years old, was seemingly at death's door with blood-poisoning. We had two of the best doctors in Crawford to treat him, but they did him no good. They told us there was no help for him, but today, thank God, he is healed and well. He had been taken to town for medical treatment, and five incisions were made around the knee, but he kept growing worse, until the surgeon said he could not do any more unless he amputated the limb.

At this point a Christian Science friend suggested that we try Christian Science. The physical manifestations were dreadful,—both limbs enlarged, the bowels affected, and a weight had been hung on the leg to try to straighten it. When the Scientist took the case the surgeon was allowed to dress the limb for a few days, but the improvement not being fast enough, an aunt of the boy, who was also his nurse, wanted Christian Science altogether; so the weight was taken off and the end of the bed lowered. When the surgeon saw this, he would not have anything more to do with the case. In less than a week, however, the boy was sent home, twelve miles on a train, and then three miles in a wagon. He was soon able to walk with crutches and put his foot to the floor. Then his desire to play with the other children led him to hold up his foot, thereby hindering the straightening of the knee for a time, but he became well and stout. I am happy to say that he is now walking without the aid of crutch or cane, and while the knee is somewhat stiff it is improving.

I also want to tell of my little boy two years old, who was healed of bowel trouble. We had become discouraged, and sent for a doctor, but he could not do the child any good. I woke my husband, and when he came out of the bedroom the doctor told him that the baby would not live till morning. My husband said that he would, that God would heal him; and he sat down by the child's bed and prayed to God. The doctor stood there, and he was astonished when the baby got right up and tried to climb off the bed. I felt that I would always hold to the truth after this proof of God's power. The doctor could hardly believe his own eyes.

We are daily thankful to God, and to our beloved Leader, Mrs. Eddy, for her wondrous teachings.

MRS. NETTIE EVERSULL, Belmont, Neb.

I was afflicted with a stomach disorder from the time I was a child. Thirty-one years ago I came to live in the mountains, and soon after I commenced to have fainting-spells. I also suffered a great deal from neuralgia. I was treated by different doctors and took medicine almost continually, sometimes getting a little relief, but nothing helped me permanently. I was finally in such a condition that I had a fainting-spell nearly every day, and was afraid to go away from home. I could eat nothing but bread and water. I could not sleep, and I had also suffered from bowel trouble a great many years.

A friend had several times advised me to try Christian Science, but I refused to accept it. Later, I suffered so much that I was glad to grasp at anything that offered even relief. I commenced to attend the Christian Science meetings, and became acquainted with a lady who gave me treatment. I took treatment for two weeks, but did not feel any better. The lady said it was strange I should not be helped when others were, and I myself thought there was no reason why I should not. Then, almost before I knew it, I felt like a new person. I bought a copy of Science and Health, studied it and tried to help myself, and I improved steadily.

This was over six years ago, and I am glad that I found Christian Science. I think it is only right that others should know what I have gained. I have good health now, I sleep well, and do not suffer or have to starve myself any more. I am very thankful to God for all the benefits which I have received.—JOSAPHENA CHAMPION, Leadville, Col.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM OUR EXCHANGES.

[*Standard.*]

Men are saying that the church is declining while religion is growing. They talk of a church outside of the church. It is asserted that there is a growing disinclination on the part of religious people to identify themselves with the church. If half of that which we hear is true, then the church should set herself to discover the cause. Many will answer that the church has been too neglectful of social needs; has failed to serve humanity in practical ways; that we must relate ourselves to the humanitarian and philanthropic undertakings of our time if we hope to restore confidence in the church. Doubtless the church must express her life through ministry, and ministry that keeps in view every need of man. But first she must have life, and that can come only from God. The fundamental need of the church today, that which will do more to quicken her life and give her power than anything and everything else, is a keen sense of God.

[*New York Observer.*]

The cross of Christ is not only a concept to our thought, a moment in our theology, but is also a power and process in our life. Its influence is continuous, its grace is inexhaustible. In a lesser sense, too, if we are really Christian, there will be a cross in our lives, and our careers, as we enter into the fellowship of Christ's sufferings, will go out in holy ministry to the needs of others. If we are not willing in this sense to have the cross in our lives, it is useless for us to stand contemplating Calvary. Every truly consecrated life has in it a Gethsemane, a resurrection. There is only one Christ who redeems a race, but the Christ-spirit of consecration and vicarious suffering is found in some degree at least in any life that is genuinely Christian, and that will be owned as such in the great "last day."

[*Congregationalist and Christian World.*]

The common difficulty of our faith is that we stand afar off and interpret Christ's words as if they belonged to a multitude. The right attitude is that of the individual life with God, appropriating for daily needs all that our increasing knowledge of Christ's character and our experience of his love can show. We are proving our trust in God when we venture upon His promises in daily life. God has not changed since the days that are recorded in the Scriptures. If He was pleased with men who ventured then, in His name and for His work, we may be sure that He will welcome like venturing courage here and now.

[*Christian Commonwealth.*]

The world is full of a rising, conquering life. Out of the tomb of worldliness and selfishness, and the grave-clothes of materialism, ignorance, and error, the eternal Christ is coming forth. Resurrection is not an isolated, catastrophic act; it is a perpetual process and an ever-active principle. The divine Spirit is always rising within humanity. The stone is always being rolled away from the tomb in order that the divine Life may come forth in power and glory. And at the last, Christ shall be "all, and in all."

[*Advance.*]

There is no gospel of good cheer worth talking about which does not begin with a profound remedy for sin. Anything else is superficial, a gloss, and will end in disappointment and more despair. A religion which cannot strike as deep as sin has no mission in the world except to mislead. Making light of sin can never put new light in the face of the human race. The gospel of Jesus Christ is good news because it gives to the world a message of salvation from sin.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before *sending in* subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY. DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS; each, one year, $1.80, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883 1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $10.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the History and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 70 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, also Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 35 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 40 pages. Pebbled cloth covers. Price, prepaid, single copy, 25 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 314 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.

Ten copies to one address, each, one year, $1.90; six months, $1.15.

Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.

Fifty copies to one address, each, one year, $1.50; six months, 90 cents.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The beautiful new home in Washington, D. C., of the International Bureau of American Republics was formally dedicated last week in the presence of a most distinguished company. The building represents the expenditure of one million dollars, of which sum Mr. Carnegie contributed seven hundred and fifty thousand and the twenty-one American republics the remainder. Its large staff of diplomatic, statistical, and commercial experts conducts an extensive correspondence in English, Spanish, Portuguese, and French; publishes a monthly bulletin descriptive of the progress and conditions of the American republics, distributes hundreds of thousands of pamphlets, and declares that it was directly responsible last year for fifty-two million dollars of new business in the exchange of trade among the American republics.

"If I had the power I would force Germany and England to make some explanation of their action in disturbing the world peace by going on with their armaments. I would assert our right to be consulted. I would tell them that they must submit their quarrels to a tribunal." So spoke Mr. Carnegie at the dedication exercises.

The forest products laboratory at Madison, Wis., has been completed, and June 4 has been set as the date for the formal opening. The laboratory has been established to aid, through experiments and demonstrations, the lessening of waste in the manufacture and use of wood. It is a cooperative undertaking between the United States department of agriculture and the University of Wisconsin. The state has erected for the purpose a new building and the department of agriculture has supplied the equipment and apparatus and will maintain the force of thirty-five or forty persons required to carry on the work. Through this arrangement the United States has secured perhaps the largest and best equipped wood-testing laboratory in the world.

If the supply of paper produced in the United States continues to decrease during the remainder of the present year as it has during the past six months, this country will be obliged in the near future to import from Canada and other countries a constantly increasing amount of wood pulp and paper and to pay the greater price which is imposed by the tariff. This is shown by statistics prepared by Herbert Knox Smith, commissioner of corporations, at the request of the American Newspaper Publishers' Association. The opinion has been expressed that, as a result of this showing, the association will renew its efforts for free paper and demand a revision of the paper schedule of the tariff bill.

The department of the interior has withdrawn from entry approximately thirteen million five hundred thousand acres of coal lands in southeastern Montana, believed to contain valuable deposits, pending examination and classification as to their values, and four hundred thousand acres of land have been ordered into the enlarged homesteads, as not being susceptible of irrigation from any known source of water supply. A like order applies to twenty-eight thousand acres in New Mexico. This brings the area designated for homesteads in Montana close to thirty million acres, and in New Mexico to more than fifteen million acres.

A bill is before the Massachusetts Legislature asking for legislation to prohibit false pretenses in the sale of stocks and bonds. The bill makes it a felony for any officer of a corporation to sign or assent to the publication of any untrue or wilfully and fraudulently exaggerated report, prospectus, account, statement of operations, values, business, profits, expenditures, and prospects, or any other paper intended to represent securities as having a greater or less market value that they really have. The penalty imposed is a fine of not exceeding five thousand dollars or imprisonment for not more than two years or both.

Following repeated charges that the sugar trust is acquiring valuable sugar lands in the Philippines contrary to the limitations of the organic act of the islands, the House adopted a resolution calling upon the secretary of war to inform the House as to what sales of Philippine lands are now in progress. Simultaneously with this action, the President has requested the House committee on insular affairs to report an amendment to the organic act of the islands by which the friar lands will be made subject to the same limitations as the remainder of the public lands of the Philippines.

That a large part of the legislation in Louisiana directed toward the separation of the races does not apply to octoroons or quadroons is the gist of a decision handed down by the state supreme court. The court holds that where the text of the law merely says "Negroes," it cannot be applied to octoroons or other persons of mixed blood.

Senate committees are studying the cold storage methods and their relation to prices, and the facts upon the practice of administering the "third degree" by the police for the purpose of extorting confessions from persons suspected of crime.

That the Panama canal will be open as early as 1914 is an unofficial declaration from the highest official source. There is a possibility even that the big ditch will be completed and ready for the passage of ships before that time.

A census of the summer cottage property in Maine shows that there are 9753 such cottages in the state, of a total value of $13,272,936. Of these, 5196 cottages, valued at $10,102,083, are owned by non-residents.

Prince Tsai-Tao, uncle of the infant Emperor of China, with a suite of twenty-two Chinese of high degree, is in the United States studying its military system.

The hearing of the Government case for the dissolution of the merger of the Southern Pacific and Union Pacific railroads will take place probably about Oct. 1.

According to present indications, immigration to the United States for the fiscal year 1910 promises to reach one million people.

International.

Remarkable alteration has been made in Ireland by the operation of the successive parliamentary acts for the creation of small landholdings. Nearly two hundred and seventy-five million dollars has been advanced by the state to enable tenants to purchase their holdings, with an additional quarter billion to come. Already over three hundred thousand small ownerships have been created under the act, covering nearly a third of all the agricultural land. In the end probably three fourths of the small farmers will occupy their own land. It is asserted that this altered condition is producing effects not only in the improved state of the people, but in the political sentiment of the country. The former tenants, being more prosperous under greater incentives to industry and thrift, are less disposed toward radicalism; while the landlords, having obtained good prices for great tracts of their land, are freed from disturbance in the estates they have retained and are more tolerant.

Chancellor Lloyd-George's finance bill, the rejection of which by the House of Lords cost the nation, as Premier Asquith announced in his final speech, six million five hundred thousand dollars in actual money, passed the third reading in the House of Commons by a majority of 93 amid enthusiastic cheers from the Ministerialists. It was immediately carried to the House of Lords, which was waiting in session to receive it, and in quite uneventful fashion the Lords passed the three readings of the bill.

The relations between Russia and Finland are at this moment somewhat critical. Pacification may result from the present position. The Duma has an important problem to solve, as the Emperor has delegated to it his powers, and it is its duty to use them in accordance with its conscience. If the debates result in a settlement acceptable to all, it will have rendered a valuable service.

Industrial and Commercial.

Explosions are often caused in flour-mills and breweries by nails or other iron particles that find their way into the grain, which strike the steel rolls of the mills, producing sparks and igniting the finely pulverized material about them. Recently a large malting concern that had been troubled by many such explosions installed a set of electro-magnets over which the grain is passed before being prepared for shipment to the breweries. All iron particles in the grain are thus picked up by the magnets and eight hundred to one thousand bushels of grain are cleaned per hour. When the magnets have collected a large amount of metal, they are swung to one side, deenergized, and swept clean of any particles adhering to them by residual magnetism. Since the installation of these magnets there have been no explosions in the mills.

The attorney-general of New York reports to the Legislature that from testimony given the following facts were disclosed: In New York city a combination fixes price at which the producer is obliged to sell milk; prices paid to producers were unprofitable; although there was no legal evidence showing a combination to advance the price Nov. 1, 1909, some "gentlemen's agreement," or otherwise, was made to a moral certainty; the raise in bottled milk from eight cents to nine cents Nov. 1, 1909, was not justified.

The "quotation committee" of the board of trade of Elgin, Ill., consisting of but five men, fix the price every week at which butter shall be sold throughout the United States during the ensuing six days. The United States Government has undertaken an investigation to ascertain whether the operations of these men constitute a violation of the Sherman anti-trust act.

An electric lighting plant in Nebraska is manufacturing ice as a by-product. The exhaust steam of the plant is utilized in the ammonia absorption process of ice manufacture, and also for distilling water from which the ice is made. This venture has proved a profitable one.

The largest locomotive on record was recently delivered by its Philadelphia builders to the Atchison, Topeka, and Santa Fé railroad for fast passenger service. It weighs three hundred tons and is one hundred and five feet long.

Frost last week caused damage in the fruit belt of the middle West and the cotton belt of the South estimated at many millions of dollars.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

SOME CATEGORIES AND DEDUCTIONS.

HON. CLARENCE A. BUSKIRK.

Two parallel lines can never meet. Twice two is four. These are statements of unvarying truth. Again, one may say: Two parallel lines can meet. Twice two is three; twice two is five. These are representative statements of what seems to be; not is. Innumerable falsehoods seem to be, but are not.

An eternal truth exists or is; but a falsehood never exists, never is, for it represents not what is but what is not. That twice two is four, is now, always has been, and always will be, an existing and eternal fact, or truth. Though the planets may be blotted out from their places, it will remain true that twice two is four, that parallel lines can never meet. On the other hand, that which does not exist can only seem to exist. Such seeming existence is a negation, and a negation does not stand for something, but stands for nothing. To make use of the term eternal falsehood would be to describe a falsehood or negation as something when it is really nothing. That which is non-existent cannot be said to be eternal. Every negation of an eternal truth, such as sin, suffering, discord, death, etc., seems to be something, but it really is nothing. All such negations or falsehoods have their seeming existence in that erring human thought which in Christian Science is aptly termed mortal mind; and such seeming existence ceases when the erring human thought ceases.

This erring human thought, or mortal mind, is a negation of true thought. Like all other negations or falsehoods, it seems to exist, but in truth does not exist, for all falsehoods or negations are nothing but false thinking. A negation or falsehood could not have even a seeming existence except in false thinking, which is in itself a falsehood, and when the false thinking disappears from human consciousness, falsehood thereby disappears. The untruth and the untrue thought are one and the same negation or denial of something which is true. The thought and what is thought are one and inseparable. Nothing exists or is except what is thought by infinite and eternal Mind. An eternal truth is an eternal fact, and it is true everywhere as well as always. All so-called finite facts exist only in seeming, whereas everything which exists or is, is known to infinite and eternal Mind. The thought of existence precedes existence; and the thought of existence likewise accompanies existence.

One truth is consistent with every other truth. Infinite and eternal Mind thinks only what is true. Discord, which includes the "hell" of some religious dogmas, is not an infinite and eternal truth, nor is human suffering of any kind. When erring human belief ceases to deceive, the "hell" and human suffering likewise cease to deceive. Harmony is an eternal truth, and discord is its negation. Eternal harmony may appropriately be named an eternal heaven. So far, and so far only, as any one proves himself able to think what is true, that is, to perceive and cognize what is eternally true, does he prove to himself that man is an eternal thought of infinite Mind,—an immortal being. The one who thinks negations or falsehoods, who does not think what is true, is not a reflection or likeness of infinite Mind; therefore, his thought is not a fact or truth, but a seeming or counterfeit of true thinking. When one thinks what is true, that is, eternally true, he is not a seeming but is real, a part of Mind's universe as a thinking being, and as he studies the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, he will see more clearly each day the vital importance of having correct views of truth, and of applying the truth to every problem of daily experience.

As an eternal truth exists in thought, the thought is eternal and the thinker of the thought is eternal. To the apprehension of these verities of being Christian Science is rapidly leading all who will yield their thought to its blessed and healing illumination.

CHRISTIAN SCIENCE AND THE "ARTISTIC TEMPERAMENT."

MARY C. FRANCIS.

DISSATISFACTION with human life and conditions often means intense longing for the ideal. The dissatisfaction and the longing are common in a greater or less degree to the entire human race, but when manifested to a marked extent it is commonly known as "temperament;" and if the unhappy possessor happens to be one of the world's producers, a musician, a writer, a sculptor, or a painter, it is still further alluded to as the "artistic temperament." Under this treacherous disguise depths of anguish have been hidden, known only to those who have suffered, for pride always goes hand in hand with mental pain.

In the misdirected effort of the human mind to change the environment or the conditions on the material plane, it forever breaks its long, moaning waves on the sands of time, striving to pass the bounds of the infinite. Yet all the unhappy ones are only looking for peace. The most excitable persons secretly yearn for poise. The victim of a highstrung nature is always longing to be "understood." The lonely eat their hearts out for lack of sympathy and companionship. The loveless and unloved seem to perish for lack of love, and starved wanderers needlessly sob themselves to sleep in the cold dawn.

Moods, temper, hysteria, nervousness, headaches, sleeplessness,—these are merely a few of the torturing brood of evils that swarm in the trail of the artistic temperament, until it has come to be accepted as a matter of course that any one with productive ability in the realm of art, music, or literature must necessarily be subject to them—and to still worse things. But for over forty years Christian Science has steadily drawn recruits from the ranks of the temperamental, and within the past few years the large number of artists, musicians, actors, authors, newspaper people, and others who deal with the plastic thought of the

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

world, who have turned to this teaching, has attracted much attention; and the question is often asked, Why is it?

Almost the first thing we learn in Christian Science is the true relation of man to God—that man is His child, created in His image and likeness, reflecting the divine perfection in the real or spiritual man. This is the coming of Christ to human consciousness, and with it comes also the dawn of peace. Every Christian Scientist has experiences in which he is fully conscious of the all-presence of God, so that, as we sometimes hear it expressed in our testimony meetings, "there is nothing anywhere but God." This experience is an actual knowledge, and has no relation to emotional or imaginary states which are chiefly due to imagination. On the contrary, this pure and blissful spiritual consciousness is the direct result of Christian Science work according to divine Principle, and is as much a certainty as the solving of a problem in mathematics. What could more surely provide for peace of mind than this? It is not strange that the tempests of discordant sense are stilled. Christ has spoken to the tempest, and the waves of human passion smooth into calm under the Master's benediction: "It is I; be not afraid."

This is the larger healing of Christian Science. It annuls the material law that "action is equal to reaction, and in a contrary direction," and teaches us instead the law of Principle as shown by Mrs. Eddy, "There is no death, no inaction, diseased action, overaction, nor reaction" (Science and Health, p. 428). The uplifted sense then ushers in a new activity. The heart that sees all its ideals possible goes about its work singing. The old sense of loneliness is replaced by the constant knowledge of God's ever-presence, and the assurance that we are never for one instant deprived of the presence of Love. The craving for companionship is answered by the privilege of our fellowship in the Christian Science churches, and our new friends and associations confer a larger idea of the social relation. The desire for a higher class of reading-matter is granted by the daily study of the Bible, and our realization that an appreciation of the literary value of the Bible never saved one, but that one ray of spiritual light means salvation. The whole field of pure literature is opened to us in our text-book, "Science and Health with Key to the Scriptures," and in the Lesson-Sermons and all the different publications of our Publishing Society. The old human sense that clung persistently first to this personality and then to that, turning from one false god to another, only to be deceived by each in turn, is replaced by the glorious freedom of each as the sons and daughters of God. Soaring upward on strong wings, our Leader has written of this: "The divine Ego, or individuality, is reflected in all spiritual individuality from the infinitesimal to the infinite" (*Ibid.*, p. 336).

Thus freed from its prison-house of the old belief that life, mind, and intelligence are in matter, the liberated thought rises to the realization that divine Mind governs and protects all its ideas, as they go "from strength to strength," finding ever more true companionship along the way. These are a few of the reasons why Christian Science appeals to the "artistic temperament," and is merely a glimpse of the many ways in which the desire for order, beauty, peace, harmony, is gratified with full, overflowing measure. When we read, "I am the root and the offspring of David, and the bright and morning star," and then read again that wonderful promise to those who are faithful to the end, "And I will give him the morning star," we realize that there is nothing anywhere that can ever swerve us from the truth. And then some bright morning, —it matters not whether here or on some other plane of consciousness,—when we have met and conquered every lie of life in matter, we shall arise as did one of old, of whom it is written: "And Enoch walked with God: and he was not; for God took him."

SELF-KNOWLEDGE.

REV. JAMES J. ROME.

THERE is a wonderful store of wisdom behind the admonition of the Grecian philosopher, "*Gnothe seauton*" (Know thyself). A glance at the words is enough to start us on a line of investigation. Spontaneously the question suggests itself, Who or what am I? We may not have thought it worth while before to look ourselves up. An interesting task it is indeed, and much depends on the way in which we begin our quest. In contemplating himself, a man may feel very well satisfied until, met by some discovery of his own weakness or halted by such a challenge as the above, he is startled into a train of introspection. It is a good thing to learn a little of what we are, just as we find ourselves.

In this work of self-inspection it may be well first to consider what is our motive. Are we prompted simply by a sense of curiosity, a desire merely to discover our peculiarities or idiosyncrasies? Or is it our purpose to expose our faults that we may destroy them, our errors that we may correct them, and our weaknesses that we may overcome them? Admitting that we are sincere in our desire to get better acquainted with ourselves for the sake of self-improvement, how shall we proceed? We are quite safe in adopting the same method in self-examination that we would employ in scrutinizing the character of those with whom we wish to associate. We might, for instance, desire to know the general opinions held about them and why such opinions had been formed: so it is frequently wise to learn what opinions are held respecting ourselves, and why. Too apt we are to consider every adverse criticism, or even a kind correction, as some form of injustice or persecution, and thus allow self-justification or self-pity to rob us of the lessons we need to learn. Others may be able to see our faults more readily than we can. Even a false accusation made by a so-called enemy may aid us. It will do us no harm to examine and see if there is any ground whatever on which such an accusation might be based.

Again, as we might judge others by their acquaintances and associations, so by this same method we may make discoveries concerning ourselves. What company do I find pleasure in, and especially with what thoughts do I prefer to associate? When I am not striving to think right, what mental guests do I find myself entertaining? As we find it so forcibly expressed in Science and Health (p. 8), "We confess to having a very wicked heart and ask that it may be laid bare before us, but do we not already know more of this heart than we are willing to have our neighbor see?" After an honest, searching look into this heart of ours, we may well feel humble and put our hand on our lips when tempted to criticize or condemn our neighbor. Such humility seems to have been felt by the psalmist when he wrote, "Who can understand his errors? cleanse thou me from secret faults."

But while it may be wise thus to submit our human consciousness to close scrutiny, we must hasten on to the next and more important step of self-correction. Christian Science does not encourage or even permit the habit of brooding over mortal weaknesses or sinfulness, but leads us to a higher and truer concept of being. Jesus said, "Except a man be born again, he cannot see the kingdom of God;" and Paul, in writing to the Colossians, says, "Ye have put off the old man with his deeds; and have put on the new man, which is renewed in knowledge after the image of him that created him." Through the contemplation of this higher selfhood, or spiritual concept of man, we are enabled to destroy the erroneous thoughts which seem to present themselves to our consciousness. Their true nature is seen and their falsity recognized when we know that only thoughts of truth and goodness belong to man and that they alone are real and eternal.

Digitized by Google

Do thoughts of selfishness assert themselves? Then let us remember that God's man cannot be selfish, since he expresses only generosity and kindness. Are feelings of envy and jealousy, anger and malice in evidence? These also, being unlike God, are no part of man and are displaced by the real thoughts of gentleness, love, and good will. Are we tempted by thoughts of disease and suffering? Christian Science teaches us that we have the right and power to overcome these thoughts as well, and prevent their ill effects, by recognizing only thoughts of health to be real and true. By dispelling all concepts of evil and discord, and establishing in their place ideas of truth and harmony, we shall "grow in grace, and in the knowledge of our Lord and Saviour Jesus Christ,"—the knowledge of perfect and harmonious selfhood.

It is only as we thus learn to know our true selfhood that we are enabled to overcome or put off the false. In the words of our revered Leader, "You must change the human concept of life, and must at length know yourself spiritually and scientifically" (Science and Health, p. 359). As we grasp more fully this reality of being, this true relationship to and oneness with God, infinite, omnipotent Mind, there is awakened in us a sense of the grandeur and nobleness of living. This also gives us a consciousness of dominion, which frees us from our bondage to material conditions and their so-called laws and raises us to that exalted sense of our individuality expressed by Paul, "The Spirit itself beareth witness with our spirit, that we are the children of God: and if children, then heirs; heirs of God, and joint-heirs with Christ;" also by John in his epistle, "Beloved, now are we the sons of God, and it doth not yet appear what we shall be: but we know that, when he shall appear, we shall be like him; for we shall see him as he is."

IN HIS NAME.

EUGENIE PAUL JEFFERSON.

IT was in all probability for material assistance only that the beggar appealed to the two disciples as they entered the gate Beautiful of the temple, upon that wonderful day so many centuries ago, and when Peter corrected the false sense of need and awakened in this poor man's thought a concept of spiritual supply, he leaped and shouted for joy. Receiving strength and energy in limbs and feet that had never borne his weight, he arose as he was bid, "in the name of Jesus Christ of Nazareth;" or, "in the strength of Spirit to resist all that is unlike good," the way that has been shown us by the Discoverer of Christian Science (Science and Health, p. 393).

It is likely that this case of healing caused great excitement upon that day. The man was known by all, as he had been lame from his birth and was carried daily and laid at the temple gate which was called Beautiful, to ask alms of them that went in to pray. When importuned, Peter fastened his eyes upon the unfortunate man and said, "Look on us." And the beggar gave heed to them. The receptive condition of thought through which the wonderful—though divinely natural—work was accomplished is apparent, for not only did the man give heed, become attentive, to Truth, as he had been bid, but the story says he expected to receive something of them. In his supposed ignorance of what he really wanted, he was not aware that he was looking for a manifestation of the healing power of Truth. The disciples, however, knew what he needed, and Peter answered his plea for help. "Silver and gold have I none," he said; "but such as I have give I thee. In the name of Jesus Christ of Nazareth rise up and walk."

When the people saw Peter and John enter into the temple accompanied by the erstwhile cripple, who was now "walking, and leaping, and praising God," they were filled with wonder and amazement, and Peter thus addressed the great crowd which at once surrounded the little group: "Ye men of Israel," he said, "why marvel ye at this? or why look ye so earnestly on us, as though by our own power or holiness we had made this man to walk?" He then proceeded to explain to them that the name of Christ Jesus, with faith in the power of that name, had enabled them to make the demonstration in the presence of them all,—to restore perfect soundness where to mortal sense no soundness had been. We read that because of this manifestation of the power of God "in earth as it is in heaven," about five thousand people were convinced of the truth of the teachings of Jesus the Christ, him whom they had disbelieved and crucified.

Christian Science is demonstrable knowledge of the power of Truth, which Christ Jesus embodied. "In his name" means in his power,—in the power of Truth. The great lesson in the story of the lame man at the temple gate is contained in the words which Peter used immediately after he told the multitude that the healing had been done through the name of Jesus Christ,—"his name," he said, "through faith in his name," showing that power lies neither in a name nor in blind faith, but in the understanding of the unity of Truth and reliance upon that power. Our Master taught his disciples to pray, "Thine is the power;" and when we believe in the allness of God,—when we learn that omnipotence means all power,—to the exclusion of belief in evil as power, place, or person,—then we shall speak with the authority of Peter—and with "signs following."

PERFECT ACTION.

FLORENCE E. B. DONALDSON.

IN 1 Samuel we read: "The Lord is a God of knowledge, and by him actions are weighed." This verse, taken from Hannah's prayer of thanksgiving, on the occasion when she fulfilled the promise she had made and formally dedicated her first-born son, Samuel, to the service of the Lord, shows how clearly she realized that there is no true action except that which conforms to the standard of God, good. St. Paul went farther, in declaring that in God "we live, and move, and have our being;" and now Christian Science reveals to us that there is no other real action but the action of good, the perfect action of Principle, and that this alone should be reflected and expressed by all. We read in our text-book (p. 187) that "the divine Mind includes all action and volition, and man in Science is governed by this Mind."

Through spiritual sense alone can we understand the all-harmonious action of divine Principle, Love. We must turn from the evidence of the material senses and seek to learn the eternal truths of spiritual law. With the veil of the temple rent in twain by the triumph of Love over hate, we can penetrate beyond, and know something of the perfect work of all-creative Mind. It is thus we begin to see clearly that the belief in the action of evil, as well as in that of good, obtaining in human consciousness, is a false concept, a war of opposites, a logical impossibility. "God saw every thing that he had made, and, behold, it was very good."

In the first chapter of Genesis we have a wonderful picture of the sublime and harmonious action of Principle, for in this brief but comprehensive account of spiritual creation we find no element of destruction, no death-dealing force of storm or tempest, no violence of upheaval or catastrophe, no warfare between God's ideas, no discord nor antagonism. It portrays, on the contrary, a scene of grand, harmonious action, resulting from the revealed fact that "the Spirit of God moved." Creation is therefore not only spiritual but good. Nothing, perhaps, is brought out more clearly in this unique chapter of Scriptural history than the permanence, the continuity, the progressiveness, the perfect harmony of Mind-action, and as we strive more earnestly to walk in the light of divine Truth, we begin to apprehend the demands of absolute Science on this point. We must strenuously cast out of consciousness the false claims of material sense to make us channels for inhar-

Digitized by Google

monious action of any kind, whether mental, moral, or physical.

The great Teacher testified, "The Son can do nothing of himself, but what he seeth the Father do." It was the spiritual understanding of God as infinite Love which enabled Jesus of Nazareth to see the nothingness of the pretensions of sin, sickness, and death to have any true existence, since in the kingdom of God all is harmony. It is by reflecting that Mind "which was also in Christ Jesus" that his followers are known by their fruits. We must turn from the false claims of mortal mind to the spiritual ideal, and appeal from error to Truth. As we cast out of consciousness all belief in discordant mental pictures, our thoughts, lives, and actions will manifest only good. With the insight of genius Shakespeare made Pericles to say,—

My actions are as noble as my thoughts.

It is our actions that are weighed in the balances of Truth, and Christian Science teaches us how, necessarily, these can only be right and true, as we see, however dimly, the action of divine Mind, and strive to demonstrate its harmony in every problem presented to us, by knowing that God is All, and beside Him there is none else. The knowledge that every honest effort is "something attempted, something done," brings joy and gladness with its sense of progress. As our Leader says: "Advancing to a higher plane of action, thought rises from the material sense to the spiritual, from the scholastic to the inspirational, and from the mortal to the immortal" (Science and Health, p. 256).

In the so-called miracles performed by Christ Jesus and his disciples, and which are now being repeated, in part, in our midst, we recognize the material manifestation to human consciousness of the eternal activity of good. "With God all things are possible." Nothing is too hard for God, and when we turn to Him with the trustful petition of the poor leper, "Lord, if thou wilt, thou canst make me clean," we shall hear the compassionate response from the great heart of Love: "I will; be thou clean," and emerging from the baptism of Spirit, we shall know at last that Truth has spoken in our consciousness, and that the false, suffering sense of inharmonious action has vanished before the joyous verdict, "Thou art whole."

THE CALL TO OBEDIENCE.

EVA MAY S. WILLIS.

In the parable of the unjust steward Jesus made use of this expression: "The children of this world are in their generation wiser than the children of light." Recently, while pondering these words, I recalled the time when I was in bondage to material sense,—when *materia medica* made one law, hygiene another, and selfishness still another. These so-called laws were closely observed, because fear of suffering impelled obedience to their seeming dictates.

Students of Christian Science have been given by their Leader certain rules and by-laws which, if obeyed, make their journey out of the bondage of evil into the freedom of Truth more safe and sure. One of these by-laws in the Manual of The Mother Church (Article VIII., Sect. 6) directs our attention lovingly and plainly to an important duty. As I considered the saying of Jesus quoted above, the query came, Are you awake to the importance of perfect obedience to a method which your watchful Leader sees is most important, or are you less alert and wise than you were when seeking good in the realm of material sense?

Our text-book, "Science and Health with Key to the Scriptures," teaches that man's birthright is conscious unity with good, God. How can we better lay claim to that birthright, which utilized will bring us and all mankind into happiness and harmony, than by watchful endeavor to be alive to the importance of implicit obedience to the Master's loving admonition: "Be ye therefore wise as serpents, and harmless as doves."

SELECTED ARTICLES.

[Frederick Dixon in *Outlook*, London, Eng.]

The reviewer of the "Life of Mrs. Eddy," referred to in my letter printed in your issue of March 19, does not, it appears, approve of the form in which my answer was couched. He seems to think that the right way to approach the subject would have been to reply to the book, statement by statement, in a volume which in the nature of things would have been several times larger than the biography itself. I am afraid that would have been to invest the subject with an importance which no Christian Scientist would attach to it. The book in question is only one of a perfect library of volumes which are yearly being poured out on the subject. There is no reason for selecting it for special notice beyond the fact that it has been better advertised. The prospect held up to the Christian Science movement is therefore somewhat alarming. It is possible, as Lord Macaulay might have said, that Hilpa and Shalum would have considered the task a light one, but the ordinary Christian Scientist, engaged in the daily struggle to demonstrate the truth of the teaching he has accepted in the conquest of sickness and sin, might consider it a waste of time.

Then the reviewer objects to what he calls the suggestion that he only knows Christian Science through the book in question. I certainly understood that he had got the "facts" in his review from that book, but if I had been asked from whence he obtained his general knowledge of the subject I am afraid I should have been compelled to fall back on a somewhat hackneyed quotation from "Hamlet," as adapted in the phrase from his mind's eye, Horatio.

Again, the reviewer asks what is the difference between the evidence of nonagenarians and Mrs. Eddy's own statements about her youth. It is a mathematical one to begin with, which I will try to explain to him. Mrs. Eddy is not a nonagenarian, therefore there is a difference in the first instance. Secondly, Mrs. Eddy's reminiscences of her own youth were published years ago. I do not know in exactly which year her little autobiography was written, but I do know that it was copyrighted in 1891, which is twenty years ago, and that seems, when you come to think of it, to make a difference in the nonagenarian question. As a matter of fact Mrs. Eddy was never more mentally alert than today. She is the clearest thinker and hardest worker imaginable. Only a few weeks ago I had the happiness of talking to her in her house in Boston, and I should be extremely glad to feel that I possessed the same keenness of grasp which she displays of the complex questions which come to her in the course of her work. About a couple of years ago an attempt was made by certain people to prove her mentally deficient, but its futility was hopelessly exposed after the judges of the Concord court and some of the greatest of American doctors had spent an hour or so in her company. It was after these interviews that Dr. Allan McLane Hamilton, one of the most brilliant medical men in America, wrote to her, "It is the lot of every one who is in earnest in this life to have rivals and sometimes calumniators, and you have certainly had your share. May 1908 be full of peace for you."

How I was to guess that when the reviewer referred to literature he confined literature to books, I am sure I do not know. There is a good deal of literature not contained in books, just as there are a great number of books which are not literature. As, however, he explains that when he says literature he means books, may I point out that no Christian Scientist sees any necessity for writing a new book upon a subject none of them understand nearly as well as Mrs. Eddy. It would be of great benefit to the world if their example was more generally followed.

Finally, may I refer to the reviewer's remark that I cannot understand anybody having convictions strong enough

Digitized by Google

to express them rudely and violently. With the whole history of religion before me, it would be curious if I doubted the facts he dwells on. For centuries the holders of the dominant religious belief of the moment have been persecuting in the most hideous way those who have had the hardihood to differ from them. The religious history of the world is the history of the persecuted turned persecutors. That, however, has never proved that the argument of the rack was a sound one, or that controversial rudeness was a sign of controversial strength. I am not surprised at the reviewer considering the violence of his language a sign of virtue; what I am surprised at is his imagining that such a virtue has any connection, however remote, with Christianity.

The letter in your last issue of "An Outsider," a very unwisely chosen *nom de guerre,* by the way, puts it beyond any question that the reviewer has already gained one disciple. The qualification of much strong language and less than no argument is, however, such an easy one, that it is surprising there have not been more. Perhaps there were more. Some time ago the editor of a well-known London paper confided to me that he could not print a large part of the letters sent to him during a certain controversy on the subject of Christian Science, because they were so abusive. I had not then learned from your reviewer that this was a tribute to the depth of the religious feeling of the writers. In my innocence, I thought it a sign that they were getting the worst of the argument.

Nobody who has read "An Outsider's" letter by the light of your reviewer's commentary could possibly have any doubt of the depth of the writer's religious fervor. Genial expressions such as pitiable, hag-ridden, gross, immoral, unprogressive, evaders, shirkers, emotional, occupy the interstices between the most opprobrious charges put forward without any attempt at substantiation. It is, in short, a perfect mosaic of intemperance, which makes one feel, as one reads it, how immensely it must add to the self-esteem of a critic to feel himself so much better than thousands upon thousands of his fellow-creatures as to be able to write of them like this—anonymously.

Now does any human being, not in a passion, imagine that this sort of stuff is going to convince any one of anything except that the writer has lost his self-control? For upward of forty years the teaching of Christian Science has been traveling round the globe, gathering momentum every day, because men and women are beginning to find that in the understanding of it they can bid good-by to theoretical dogmas in the secure possession of a demonstrable religion. Jesus never demanded from his followers anything less than a demonstration of the power of Truth, the knowledge of which he declared would set them free. The key-note of his teaching was that those who understood his words would be able to prove their knowledge in their works. In this way he made the power to heal the sick the test of every man's Christianity. Alone of the churches of the day, Christian Science has made the healing of sorrow and sickness and sin the test of its own spirituality. It casts no stones at its neighbors, though when attacked it claims the right to defend itself. It devotes its entire energies not to proving some one else wrong, but to proving itself right. The consequence is that all over the world the numbers are daily increasing of those who owe their own lives and happiness, or the lives and happiness of those who are dear to them, to its ministrations. It is the strongest argument in the long run, for it is the argument by which Christ Jesus drew to him the sick and the sinner, the weary and the heavy laden, and gave to them "the peace of God, which passeth all understanding."

[Alfred Farlow in *Fall River* (Mass.) *Globe.*]

In the critic's opinion much that Christian Science claims at the present time is beyond the bounds of reason. We insist that the teaching of Christian Science is entirely consistent. If the gentleman can accept any one fundamental proposition of this Science, he is in line to accept all that it teaches. The premises of this Science are Scriptural, in strict accord with the teachings of Jesus Christ, and all its deductions are entirely consistent. Whether they are in the bounds of reason depends upon the premises employed in the reason. If the gentleman will accept the premise of Christian Science that God is Spirit and Spirit made all that was made and behold it was very good, we assure him that he will find Christian Science within the bounds of reason. On the contrary, if he undertakes to harmonize the reasoning of Christian Science with the material seeming, and to disregard spiritual understanding, he will find it impossible to become reconciled; but in so doing he will be compelled to violate the Scriptural admonition in respect to comparing "spiritual things with spiritual." We grant that spiritual understanding and the evidence of the material senses are contradictory and irreconcilable. Paul said, "The flesh lusteth against the Spirit, and the Spirit against the flesh: and these are contrary the one to the other." We may add here that Christians at this particular age are called upon to choose which they will serve.

The gentleman declares that "for the world to adopt Christian Science as a whole, would be to ignore many of the laws of God relating to the physical world." On the contrary, upon the closer study of this Science, he will discover that Christian Science restores the knowledge of "the laws of God relating to the physical world" which have heretofore been ignored.

We venture the assertion that our clerical critic might dispute the healings of Jesus and his apostles on the same ground that he brushes aside the healings of Christian Science. There is just as much ground upon which to assume that the Master did not heal organic diseases as there is to assume that Christian Science does not heal such cases. To insist that it is not possible to heal organic cases is to insist that Jesus did not heal organic cases, or that when he urged his disciples and all Christians to "heal the sick," he meant only to heal those who simply "thought they were sick" and yet were not sick. To insist upon the impossibility of curing real disease by the divine power is to limit the divine power and amounts to an implication that Jesus and his disciples did not heal real diseases. We insist that God has never changed, and His laws have never changed, but His power is as capable of demonstration now as it was in the early days of primitive Christianity.

[Henry Deutsch in *St. Paul* (Minn.) *Pioneer Press.*]

Christian Scientists do not say that there is no pain; in fact, we admit that to the man who is suffering pain it is extremely real; but, unlike our critic, we are unwilling to attribute that pain to God or to hold Him responsible for the sins of the world which are daily committed, and we do say that when man reaches the correct understanding of God and when he reaches out to Him and trusts in Him for the alleviation of pain, that he does obtain the relief from pain and rises to the consciousness of its absence, and therefore its nothingness. I presume the bishop would say that darkness is a reality and that God created it. Nevertheless, he knows, as well as every scientific man, that darkness is not a reality of itself, but merely the absence of light, and that when the light comes then the unreality or darkness disappears and its nothingness is apparent. A man may honestly believe that two times two is five, but that does not make it so; and the falsity disappears, becomes unreal, when he comes to understand that two times two is four.

If God suffers pain, then He must also suffer sin—both are discordant conditions. Will the critic explain how infinity and omnipotence can suffer pain? If pain is a

Digitized by Google

reality, where is the pain when a person is under the influence of an anesthetic or an opiate? If God is infinite and all powerful, for what reason should He suffer pain? Has any one ever doubted God's power to alleviate pain and suffering? Does the critic desire us to believe that God has to inflict pain upon Himself in order that He may not lose sight of His necessary perfection—that He needs to suffer so that He shall not sin? On the other hand, if pain is created by God and inflicted by Him, what right have we to take opiates and anesthetics or use any remedies to alleviate pain? Have we either the right or power to nullify God's decrees? I might continue this discussion indefinitely, but refrain, because of the inutility of such a course.

The man who is suffering from pain, sickness, or sorrow; who is a slave to the drug or drink habit; who has lost his God, and is in the slough of agnosticism and atheism, such a man is not much concerned with academic discussion; what he wants is relief and surcease. Which can give it to him—the critic's view and practice, or that of the Christian Scientist? The answer to this question is the ultimate of the argument. The critic's views are theoretical—those of Christian Scientists are practical. In other words, he says he thinks that certain things are so, and therefore believes. Christian Scientists say, "We prove that certain things are so, and therefore we know." The critic says to the sick and the suffering, the heart-sick and the sorrowing, "God sent this to you. He is responsible for it. He is inflicting His wrath upon you. Therefore you must turn to the doctors or medicine to seek to annul God's will; and if they fail, you must accept it with resignation." Christian Science says, "God is Love; therefore He cannot be a God of wrath."

God never created sin, evil, or suffering, nor did He ever create man capable of experiencing them. God created man in His own image and likeness, and when mortal man rises to the full consciousness and understanding of this fact he will cease to suffer or sin. God is not finite, nor does He manifest anything but infinite, perfect love. It is a fair question to ask, Which is the more reasonable and rational, and which would a man prefer to accept, the critic's statement that God created pain; that He suffers it Himself, therefore man must continue to suffer pain; or the Christian Scientist's belief that God never created pain, and that when a man turns to God and trusts in Him, his pain can be relieved and removed?

[Algernon Hervey Bathurst in *Whitley* (Eng.) *Seaside Chronicle*.]

With regard to the lecturer's explanation that the rapid spread of the movement was due to the promise it held out of "relief from bodily pain and sickness," let me say that an important feature, indeed the basis of the teachings of Christian Science, is the understanding that the patient treated in Christian Science must be morally regenerated as well as healed physically. Christ Jesus made it perfectly clear to the indignant scribes that true healing included also spiritual regeneration, when he said, "Whether is easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" For centuries the command to preach the gospel and heal the sick has been divided by the church, and, while clergymen are expected to obey the first, it is left to doctors and hospitals to obey the latter half of the command. This was never meant to be, and never should have been. The success of the Christian Science movement is due entirely to the fact that its teachings point out the necessity and importance of strict obedience to the teachings of Jesus the Christ; and should objection be made to Christian Science because it includes what in the teaching of other denominations is lacking?

Now as to the word "real" to which Dr. Warschauer refers, the lecturer is clearly under a misapprehension as to the true meaning of the word as used by Mrs. Eddy. It is generally admitted that there is but one great cause or creator, Spirit, God, who is infinite good. Since good cannot produce evil, the only logical deduction is that God's creation is perfect, and that therefore His spiritual perfect creation alone is real. Consequently, since evil, including sickness and sin, is not good, it is no part of God's creation, and is unreal. That evil exists relatively, or in so far as the human consciousness is concerned, is perfectly true; but Jesus came not to destroy, but to fulfil God's law, to prove that the testimony of the physical senses is wholly unreliable and false. This he did by healing the sick, reforming the sinner, feeding the hungry, and raising the dead. Now it is quite clear that if sickness or sin, or, for the matter of that, any of the testimony of the physical senses, is real or true, Christ Jesus would have done none of his "mighty works," for he could manifestly not have destroyed anything that God had made. And Christian Scientists are learning that their success in overcoming sin, sickness, and all discord is in exact proportion to their unswerving allegiance to his teachings.

During the course of his remarks the lecturer implied that the teachings of Christian Science are pantheistic, whereas the fact is that between Christian Science and pantheism there is a great gulf fixed. Webster defines pantheism as the doctrine that the universe, taken or conceived of as a whole, is God; the doctrine that there is no God but the combined forces and laws which are manifested in the existing universe. This is the very antithesis of the teachings of Christian Science, which declares that the belief in the coexistence of matter and spirit is the forbidden fruit of the tree of the knowledge of good and evil—a house divided against itself.

Acknowledging God, good, the all-knowing Mind, to be omnipotent and omnipresent, it is clear that there is no true knowledge other than that included in the one Mind. Since, therefore, there is no evil in good, it is a correct and logical statement to say that sin is unreal. This does not, however, authorize us to ignore sin or to indulge evil in in any form, for by so doing the sinner would be making a reality of that which is unreal, and would prove his ignorance of the teachings of Christian Science.

Touching "suggestion" or "self-suggestion" to which Dr. Warschauer refers, this is the diametrical opposite of Christian Science. Suggestion is the action of one human mind upon another. Now no one has ever maintained that the human mind is wholly good. Jesus said that "a good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit;" and since the human mind claims to be able to do both good and evil, the effects of suggestion cannot be wholly good. At this point Christian Science declares that there is no power but God, good, and that belief in any other power is false. Jesus proved this, and said of evil that it was a lie; and it is only by understanding this, and by striving to let that Mind be in us "which was also in Christ Jesus," that his teachings can be made practical today, and evil be proved powerless.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 10, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*.

Falmouth, Norway, and St. Paul streets, Boston, Mass.

AMONG THE CHURCHES.

SALT LAKE CITY, UTAH.

It is gratifying to be able to report that the work at the county infirmary in this city has been one of unfoldment the past year. During the year 1908 we had held a regular service three Thursday afternoons each month and a testimonial meeting on the fourth Thursday. These meetings were held in the sitting-room of the women's ward, and we could count on about four inmates to attend this service, never more than seven. There was much opposition from the management, and much indifference on the part of the inmates. In fact the question came up among the workers whether it would not be well to discontinue some of the services, and we were advised by the board of directors of our church to put the matter before the inmates, and see what they really wished. As the truth had already been demonstrated in many cases of healing, we found, when the question was put to them, that they were not willing to give up a single service; whereupon they were reminded that there was something for them to do. If they wished the work to go on, they must take a more active part in it. Meanwhile the committee had been studying the definition of church as given in Science and Health (p. 583), for they knew that only as their own understanding was awakened could they hope to arouse the dormant understanding of others. They also knew that the truth was established and that "progress is the law of God" (*Ibid.*, p. 233). From this time on more interest began to be shown. Previously we had to prepare the room ourselves and go around to the different rooms and invite the inmates to attend the service; but after this the room was prepared for us and they were all ready for the service, with an average attendance of twelve.

All that could be done for the men during 1908 was to distribute the literature and to secure permission from the superintendent to sing some of our hymns to them. They gradually became more interested, and by the end of the year they were joining in the singing. The growth for the year 1909 has been marked. We began the year in the men's ward by reading from the Bible and Science and Health, alternately, singing three or four hymns, and closing with the Lord's Prayer, in which all were asked to join. There was the greatest reverence shown during the reading and the repetition of the Lord's Prayer. One man said, "It is a good thing you have us repeat the Lord's Prayer—I have not said it since I was a very little boy. I made a bungle of it the first time I tried it, but I will keep on until I can say it." In a short time we were able to substitute a portion of the Lesson-Sermon, in place of the readings we had been giving them, and this they enjoyed so much that we were soon able to have the greater part of the Lesson-Sermon, opening and closing the service in the regular way. In this way we were conducting two services every Thursday afternoon, as well as a service one Sunday in the month.

At this point it became quite clear that our next step was to work for a service which both men and women could attend, and the way opened beautifully for us. At the close of one of our services the superintendent came and thanked us for the work we were doing for the inmates, saying they were all better for it, and offered us the largest dining-room for our services, with the use of the organ. This room is made ready for us and the bell rung for service, so that the inmates know when to come in, instead of waiting to be invited; and instead of sitting throughout the entire service, most of them now stand for the singing and at the close of service. Our Thanksgiving service was the regular one provided for that day. Our testimonies were good, all expressing their gratitude for the truth. As the time allowed for the service was short, many who desired to speak did not have the opportunity to do so. The following verse was handed me by one who attended our service for the first time on Thanksgiving day:—

Ladies of Christian Science,
We the inmates pray,
God bless you for the tidings
You've brought us here today;
God bless you for the tidings
You bring us when you call;
The God of love be with you,
And abide on one and all.

The Christian Science literature is in great demand, although last year they did not care for it. The number of *Sentinels* and *Monitors* has been increased several times, one man saying that he often had to wait two days for a *Sentinel*. Two copies of the *Salt Lake Telegram*, containing Judge Ewing's lecture, were kept in constant circulation many days, some calling for it twice. Some of these people study the Lesson-Sermon every day and use no material remedies whatever. One woman who took up the study of Christian Science was healed, and has left the institution to earn her own living. Another woman who had been an inmate four years asked for help, and was healed. She acknowledged her healing at the testimonial meeting, and in a short time obtained a good position. One man, who had become an earnest student, was suffering from apoplexy, and had been told by the physician that the next attack would be fatal; but, through the understanding of the truth he had gained, he passed through the attack unharmed, and in a few hours was about as usual, feeling better than he had before, and he has continued to gain. There are many demonstrations given at our testimonial meetings, and the good work goes on. The committee are most grateful for the experience gained while working among these needy people.

Correspondence.

[Written for the *Sentinel*.]

FRET NOT THYSELF!

E. W. SMITH.

FRET not thyself! Be patient, strive to prove
The depth and vastness of our Father's love;
When waves break high and winds blow fierce and chill,
Our God who rules the storm cries, "Peace, be still."

Fret not thyself! God's white-robed angel throng
Encampeth near,—so near their glorious song
Swells far above earth's roar and battle din
And drives afar the myriad hosts of sin.

Fret not thyself! Our God is All-in-all,
His angels guard thy steps lest thou shouldst fall;
Our Father-Mother God,—for Love divine
Fills and o'erflows with love this heart of mine.

Fret not thyself, dear child, for God is good,
He heeds the raven's cry and sendeth food;
His loving hand midst enemies doth spread
A bounteous feast of wine and oil and bread.

Fret not thyself! When earthly streams are dry,
Cool draughts from Bethl'em's well God doth supply;
And shouldst thou faint, or quail at sin's alarms,
Behold, outstretched, God's everlasting arms.

Fret not thyself! Press on! Lo, grand and fair
Looms forth the royal city! God is there!
No sickness, sin, nor death, nor tears, nor pain,
But Life and Truth and Love eternal reign.

Fret not thyself, dear heart! Hast borne the cross?
Hast drained the Master's cup? Hast suffered loss?
Hast battled long with sin and crushed it down?
Henceforth for thee heart's-ease and victor's crown.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

AN INALIENABLE RIGHT.

In a testimony which appears on page 714 of this issue of the *Sentinel*, Judge Rufus D. Smith of Santa Barbara, Cal., who for nearly thirty-five years before he came into Christian Science was a great sufferer from diseases contracted during his service in the Civil War, states that the best physicians obtainable by him considered his case hopeless; that they "were all agreed that there was no permanent help" for him.

To one who could see no hope of relief save in *materia medica*, and who, notwithstanding the kindly efforts of skilled physicians during the many years that he was under their care, felt himself going from bad to worse, so far as his physical condition was concerned, the outlook of continued invalidism must have indeed seemed dreary. He also refers to his attitude toward religion, and says that he called himself an infidel and was proud of it. One can hardly conceive of a more pitiable condition than is his who, wearied in body and mind, finds himself at last among those "having no hope, and without God in the world."

Fortunately for Mr. Smith, when the time came that his attention was directed to Christian Science as a means of relief from his sufferings, he was led to accept it, and as a consequence he was healed of his sickness and converted from his infidelity. And yet, notwithstanding his eloquent testimony of gratitude for restoration to health, and of happiness in the study of the Bible and the Christian Science literature, we have no doubt that some of the captious critics of Christian Science who may read this testimony will ignore these patent facts and fail to find any value in it because the writer is not able to state that a leg which was amputated by the surgeons has been replaced through Christian Science treatment. Jesus illustrated this condition of unbelief by the parable of the "certain rich man" to whom Abraham said, "If they hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead."

We have no doubt, however, that Mr. Smith has no fault to find with the benefits that he has received through Christian Science, and that at the present time he—a man who has endured years upon years of pain and anguish as a result of his conviction that that immortal sentiment of the Declaration of Independence, the right of mankind to "life, liberty, and the pursuit of happiness," should not be violated—would consider any law which in any manner interfered with his choice of this healing agency as the one to which he might resort in time of need, a violation of his inherent rights,—those "inalienable rights, among which are self-government, reason, and conscience," with which, as Mrs. Eddy tells us, "God has endowed man" (Science and Health, p. 106). Certainly he would have good grounds for protest should the law-making power of the state in which he resides seriously contemplate the enactment of a law that would infringe upon his right of choice, as a man and as a citizen, by compelling him to go back to the system which could only leave him hopeless and despairing at the end of thirty-five years of suffering.

ARCHIBALD MCLELLAN.

THE CHRISTIAN SCIENCE READING-ROOM.

Prominent among the activities of our Cause is the Christian Science reading-room, which is to be found wherever a church of our faith is established. As our Leader says respecting the by-laws of The Mother Church, the reading-rooms "sprang from necessity, the logic of events,—from the immediate demand for them as a help that must be supplied to maintain the dignity and defense of our Cause" (Miscellaneous Writings, p. 148). It was necessary that the growing demand for genuine Christian Science literature should be met in an adequate way, and that inquirers at bookstores or libraries should not be misled by the offer, made through prejudice or ignorance, of something "just as good" as that which alone sets forth the correct teachings of Christian Science; in other words, the authorized publications. It is desirable that inquirers should have opportunity to investigate these teachings at first hand; and many who are not ready to purchase the literature are glad to read it, in order to discover whether it has a promise of practical help in their hours of need.

To many such the reading-room is proving itself an oasis in the desert of human experience, being as a well of living water, and a shelter from the storm and tempest of sickness and sin, as we learn from some of the oral and published testimonies of its beneficiaries. We are reminded that some of the world's great philanthropists regard the public library as one of the most efficient means of helping mankind, and to this end they devote time and money which is generally admitted to be well spent. It is also noteworthy that in recent years the profession of librarian calls for at least as thorough preparation as in the case of any other profession. The librarian is expected and required to have accurate general knowledge of the books which deal with the many subjects represented in a public library, and to be ready to furnish the needed information to all inquirers. It will thus be readily seen that a librarian must be alert and progressive, noting the advance made in all directions, and yet not losing sight of that which has proven itself of value in the past.

In the case of Christian Science librarians,—those in charge of our reading-rooms,—it goes without saying that they should be well acquainted with our literature, so as to be able to give needed information to strangers, or even to Christian Scientists. A portion of each day could be used to great advantage in systematizing one's knowledge of our rapidly-expanding literature, so as to bring that which is most helpful to the notice of the needy seeker. Tact and courtesy are invaluable in this service, and at the same time a firm insistence that the rules shall be observed, quiet maintained, and the utmost propriety observed. While strangers may receive information as to the study of the Lesson-Sermons, these should never be read aloud or explained in the reading-room, for this would defeat their intent. Furthermore, no one is authorized to explain these Lessons, although a few kindly words may be of great service in encouraging beginners to seek earnestly the guidance of divine Mind in their study.

It goes without saying too, that gossip and criticism, with all of that ilk, are inadmissible in the reading-room. The ever-presence of Truth and Love should be kept constantly in thought, and as this is done those who come to inquire will feel the healing touch of Christ, Truth, and drop some burden of sorrow or suffering; and this, after all, is the real reason for the reading-room; namely, to bring the healing truth in the surest and best way to each seeker. God's kingdom is here, and the world is fast awakening to the fact. In describing this kingdom St. John says, "His servants shall serve him: and they shall see his face; and his name shall be in their foreheads." It was a "fellow-servant" who showed John the wonders of the kingdom, but to John he seemed an angel. So does the true ministry glorify every one who truly serves.

ANNIE M. KNOTT.

THE TRUE KINSHIP.

THERE are many Christian people who unhesitatingly accept the teaching of Christ Jesus as the highest spiritual authority, and yet who find it difficult if not impossible to explain or approve his statements and attitude as recorded in the 46th to the 50th verses of the 12th chapter of Matthew, where he seems to have turned away from the human sense of sonship and declared for the supremacy of the spiritual. This inability to understand his words is not at all inexplicable in view of the fact that those who accept the material order as divine can but conclude that the relations incident thereto are a part of that order, and therefore secondary to none other: hence for Christ Jesus to intimate that his least disciple is just as near, just as much to him, as his own mother, seems to them to put him in the position of one who is doing violence to a divine provision.

To the Christian Scientist these words of the Master are but one of the many incidental evidences that he recognized God, Spirit, as the only creator, the Father of man, and taught that every human relation can come to its true blossoming only when it is grown in an atmosphere of continuous and intelligent effort to realize the full significance of this eternal truth. In so far as one accepts the teaching that all true being is Spirit and Spirit's manifestation, in so far he must realize that all true relations are also spiritual, and that the idealization of human living, of marriage, parenthood, brotherhood, friendship, etc., is to be effected by holding the spiritual fact ever in thought, and honestly endeavoring to bring it into demonstration.

It is often true that, as the result of some rare affection or some mutual consecration, human lives seem to be wondrously blended. Witness the lasting attachment of old compatriots and soldiers, the tenderness of the life-long thought of each other by those who have suffered and faced death together. Like the early disciples, these men are true socialists; they have come to be brothers indeed. The bloom of such a fellow-feeling always exhales the fragrance of a fine sentiment, and this has often been the one redemptive and inspiring fact of otherwise dreadful tragedies. Such realizations, however, are always supersensual,—their most distinctive feature is their indifference to both caste and consanguinity. In every true patriot, parent, brother, or friend the divine is transforming the human, and in a thousand historic instances has such an achievement reemphasized the fact that true brotherhood, the only satisfying kinship, is grounded in mutual devotion to and realization of the Christ-ideal, apart from which human relations do not and cannot fulfil our hope or satisfy our longing. This was the basis and support of that fraternity of which Christ Jesus was the founder and head, and its significance to our daily experience is emphasized by Mrs. Eddy when she says, "Happiness is spiritual, born of Truth and Love" (Science and Health, p. 57).

Much is being said nowadays of the marked increase of divorce as an evidence of the despoliation of the home and family, and the people of any nation may well be alarmed when such a degree of indifference to the sacredness of the marital relation is being manifested. Christian Science immediately relates itself to this great problem in its insistence that the recognition and realization of spiritual man and his kinships offers the only means by which the human can be saved from sensuality, selfishness, and sorrow. When husband and wife are thinking of the spiritual at-one-ment of the truly wedded life, and when parents and children are thinking of each other in the light of that interpretation of kinship which Christ Jesus commended and acted upon, the joy of heaven is beginning to be known in the dawning of a true, uplifting, and practically significant sense of the fatherhood of God and the brotherhood of man.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Concord, N. H., April 12, 1910.

Dear Mrs. Eddy:—I am a little girl eleven years old, and my two brothers and myself attend the Christian Science Sunday School here. We have been able to make demonstrations for ourselves. Mamma was healed of a severe sickness, a year ago last August, and since then we have been a happy family, and love you very much for giving us Science and Health. I picked these Mayflowers for you.

With love,

JULIA R. MCFALL.

MRS. EDDY'S REPLY.

Well done, my good, faithful little Christian Scientist. Press on; you will be happy and blessed in being good.

MARY BAKER EDDY.

Rochdale, England, April 19, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Beloved Leader:—First Church of Christ, Scientist, Rochdale, England, in annual meeting assembled, desire to give expression of their gratitude and love to you for blessings received through Christian Science, and for the understanding of the truth which has come to this age through your inspired writings. We lovingly acknowledge our loyalty to you as our Leader, and are especially grateful for the Church Manual, which we recognize as the true guide for church government, and also to individual spiritual progress. We rejoice to know that God is so abundantly blessing you, and the Cause you have so nobly and so lovingly labored to establish for the benefit of all mankind.

On behalf of First Church of Christ, Scientist, Rochdale.

THE BOARD OF DIRECTORS.

Marlboro, Mass., April 28, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—Please accept my thanks for your "Pean of Praise," published in the *Sentinel* of April 23. Unnumbered thousands will read it, aspiring to touch the same key-note, while knowing also that the home founded on divine Principle can be made manifest in the lives of all His children. God's peace, His joy, His power are ever thine, and "with strong wing" you are lifting your readers "above the smoke of conflict into light and liberty," as you express your desire to do, in "Miscellaneous Writings" (Pref., p. xii.).

With gratitude sincere, for all that has helped me to know of that life though your efforts, I take renewed courage, knowing that what the apostle Paul wrote to the Ephesians in chapter ii: 19-21, can be reflected in the lives of God's children in our day.

Lovingly,

MRS. STELLA T. WEBSTER.

East Orange, N. J., April 26, 1910.

Beloved Leader:—I thank you for your song of triumph published in the *Monitor* of April 21. It has entered my home to confirm the "present ownership of all good and praise," and it reechoes Jesus' words, "Be of good cheer; I have overcome the world."

It has been my privilege within the last few weeks to place the *Monitor* for the first time, in yearly subscriptions, in the Young Men's Christian Association of Orange, the public library, and the state penitentiary at Caldwell, N. J.; and may those who read your words also understand the glory of your life, and your happy household. You are always giving some word of encouragement to strengthen the

Digitized by Google

loyal struggler for the right, and in grateful recognition of what your teachings are to me, I am sending, in the same mail with this letter, a check for one hundred dollars to Mr. Chase, to be used for the enlargement of the publishing house, for I love this home from which your writings are sent out to the world, giving to all "the privilege of knowing God," and the liberty of the sons of God.

Humbly and gratefully yours,

GRACE MERWIN COLBY.

[Telegram.]

St. Louis, Mo., April 29, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—On behalf of the members of the Christian Science churches in the St. Louis field, assembled tonight to confer harmoniously and with mutual helpfulness for the upbuilding of our Cause in this community, we send this word of greeting to you, our God-ordained Leader, to tell you of our tender love toward you and of our deep gratitude for what you have done and are doing for us and all mankind. Your unselfish work for humanity, by reason of its fruitage of health and happiness, is day by day becoming better understood, and as time goes on the redeemed from sickness and sorrow and sin will more and more rise up and call you blessed. The wonderful teachings of Christian Science have opened the Scriptures to us, and like the disciples of the Master, on the way to Emmaus, "our hearts burn within us," with gratitude and love. Lovingly yours,

JOHN RANDALL DUNN, W. E. MCMAHAN,
FRANK B. NUDERSCHER, FRANK S. WILBUR,
FRANK E. STEVENS, RICHARD H. CALKINS,
First Readers.

Detroit, Mich., April 23, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader and Teacher:—"A Pean of Praise," coming to us from you in this morning's *Sentinel* and *Monitor*, found a deep echo in my heart. Ever since my visit at your home March 24, I have felt the benediction of the faces of the members of that household, shining with the "reflection of light and love." It was a great blessing to be invited to come, and I assure you the reflected light has shone out ever since to others.

It will be twenty-one years next month since you gave me the Normal course, and in that time you have never failed to give the right word at the right moment for our Cause. I came home from Boston more impressed than ever with the consciousness of what tireless effort, unfeigned faith, and consecrated love mean. He that watcheth with you will never cease to bless, and we who obediently and willingly follow have the blessing with you.

Yours gratefully, lovingly,

MARTHA HARRIS BOGUE.

Santa Barbara, Cal., April 20, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—The experiences of the past two years have so greatly enriched my life that I am writing you this expression of gratitude for having shown me the way to work out my problems. This understanding of God has come to me through the study and practice of your invaluable teaching. In your article "The Way" (Miscellaneous Writings, p. 355) you teach us that self-knowledge, humility, and love are the steps necessary to the unfolding of the fruits of the Spirit, and to the "overcoming," as John wrote in Revelation. I have been working by these rules for the past three years, and they have given me all that your wisdom and love foretold for us. It is a great privilege for me to study and practise this wonderful teaching of Christian Science. I realize more fully the benefits that have come to me from it, even though many hard lessons have seemed to come to me during the last year's work. I now know that it is not hard nor impossible for me to work to fulfil the law of God. Five years ago I was a helpless, hopeless woman; today I am full of health and hope, and have great joy and contentment in this, God's work for me. I thank God, and you, dear Mrs. Eddy, for all these benefits, and I desire to follow this glorious teaching of Life and Love.

Lovingly and faithfully,

CARRIE L. BLISS.

Redfield, S. D., April 18, 1910.

Beloved Leader:—The unanimous desire was expressed at the last business meeting of First Church of Christ, Scientist, of Redfield, S. D., that we send you this, our first outward expression of love and gratitude. About one half of our members are class students, and the good which we have received through this light thrown on your teaching has enabled us to love God more and to serve Him better. We earnestly desire to be loyal and obedient; a fruitful branch of the Vine.

BY COMMITTEE.

Cambridge, Mass., April 26, 1910.

Mrs. Mary B. Eddy.

Beloved Leader:—Allow me to thank you for your last word to us through *The Christian Science Monitor* and the *Sentinel*. There is an exquisite sweetness in your picture of the "spot where God dwells most conspicuously in His reflection of love and leadership." The idea that is most hidden to human thought is apt to be the sweetest and best, and what a wonderful grasp on heaven is in the words "love and leadership!" It means, not perfunctory obedience merely, but the seeing of Principle so clearly that one's own personal inclinations are eliminated and the only thing to be seen is the one divine way. You are proved to be the exponent of Principle to this age. Whoever is seeing anything of Principle is in the line of action with you. One infinite Principle has one line of expression. So, though not obeying you through human will, what you voice as Principle is what any seeker for the way of Principle must see and do lower down the line of expression. I thank God for Mrs. Eddy.

Sincerely yours,

JOAN HUDGENS ROME.

St. Louis, Mo., April 25, 1910.

Beloved Leader:—Just to thank you for "A Pean of Praise." What a happy, useful household upon this earth,—a light set upon a hill, which cannot be hid. I pray daily to know how to serve you better in God's great "vineyard of Mind-sowing and reaping," which He has called you to plant, and charged you to water,—to "proclaim His gospel to this age" (Science and Health, Pref., p. xi.),—and where you tell us to "gather the harvest by mental, not material processes" (Unity of Good, p. 12).

Reverently,

KATE JOY GRAY.

Orange, N. J., April 21, 1910.

Beloved Teacher and Leader:—The *Monitor* has just come with your gracious reminder of God's omnipotence. I thank you from my heart for it. It refreshed my soul, encouraged me still to continue to climb the heights of holy aspiration, to leave behind the valley of materiality with its damps and mists, pitfalls and snares, to rise into the glad sunshine of scientific demonstration, and call my race "to the springtide of Christ's dear love" (Miscellaneous Writings, p. 330). This is my pean of praise to the Father, and to you, His child.

My love to your happy and privileged household.

Gratefully and lovingly your student,

NEMI ROBERTSON.

THE LECTURES.

MINNEAPOLIS, MINN.

Prof. Hermann S. Hering lectured for Fifth Church of Christ, Scientist, at the Metropolitan yesterday afternoon [March 6], on "Christian Science: The Science of Salvation." He was introduced by Judge A. C. Hickman of the law department of the University of Minnesota, who said,—

In this active business life of ours, notwithstanding the fact that mankind seems to be engrossed in the material, still there is a general, almost universal desire to peer over into the realm of the unseen and learn something of that great First Cause; that which is the source of all that is. When Jesus was on earth in physical form, he performed many wonders, commonly called miracles. One purpose of these seems to have been to convince the world of the fact that he was the long-promised Messiah. Another purpose was to reveal to the world the nature and character of Him who had sent him. We find him saying at one time to his disciples: "He that seeth me seeth him that sent me." Again, when one of his disciples asked him, "Lord, show us the Father," he replied, "He that hath seen me hath seen the Father." Then followed this significant language: "The words that I speak unto you I speak not of myself: but the Father that dwelleth in me, he doeth the works."

On one of his journeys he met a funeral procession, bearing to the grave the body of a young man, the only son of his widowed mother; and when he saw that grief-stricken woman, he was moved with compassion, and restored the young man to life and to his mother. On another occasion, with the mourning sisters of Lazarus, as he was approaching the grave of their departed brother, we find him weeping with those who wept. Recalling his language, "He that seeth me seeth him that sent me," we know the Father's attitude toward the bereaved and sorrowing. At one time, when Jesus was reclining at meat in the house of a Pharisee, a woman of the city, one who was a sinner, came in and stood at his feet behind him, and bending over bathed his feet with her tears and wiped them with the hairs of her head, anointing them with precious ointment. When Jesus saw this expression of her repentance and sincerity, her adoration for his pure and spotless character, he had compassion on her, and said, "Thy sins are forgiven." We read again that at the pool of Bethesda Jesus met a man who had been ailing for thirty-eight years, and from the account given we draw the inference that the man was practically helpless; but we are told that Jesus had compassion on him and healed him.

So we find, all through Jesus' life, wherever he met those who were sick, those who were suffering, those in distress, he always had compassion on them and healed them. Most of us have been reading these incidents from our childhood. We believe them. The Christian world still clings to the thought that there is in God the Father sympathy for the bereaved and sorrowing, that there is in Him the willingness to forgive the erring and repentant; but it remained for Mrs. Eddy, the Founder of the Christian Science church, to proclaim and demonstrate to the world that the infinite Father feels and acts now toward humanity just as He felt and acted toward humanity nineteen hundred years ago.—*Minneapolis Journal.*

LE ROY, KAN.

The lecture on Christian Science by Frank H. Leonard, at Union Hall, March 29, was listened to by an appreciative audience. Mr. Leonard was introduced by Andrew Lankton, who said in part,—

What is truth? In every age some seeker has asked in his own way the same question. Tonight many are seeking the reply. Those who have felt the rich blessings received from a knowledge of Christian Science, have found the answer, for Christian Science is the truth demonstrated. Christ Jesus demonstrated the truth by healing sin, sickness, and death. Between that time and this there have been many who have sought to prove the truth of his statement, "He that believeth on me, the works that I do shall he do also." For several centuries the truth was lost from the minds of the people, but forty years ago this truth was rediscovered by a woman, Mary Baker Eddy, who demonstrated Jesus' own prophecy, "Ye shall know the truth, and the truth shall make you free."

Le Roy Reporter.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

New York, N. Y. (United Churches and Societies of Greater New York).—Bicknell Young, Carnegie Hall, 3:30 and 8 p.m., May 8.
Evansville, Ind. (First Church).—Clarence C. Eaton, New Grand Theater, May 12. (Postponed from April 28.)
De Kalb, Ill.—Judge William G. Ewing, Church Edifice, May 12.
Chicago, Ill. (Second Church).—Bicknell Young, Church Edifice, Wrightwood and Pine Grove avenues, May 12, 13, and 14.
Duluth, Minn. (Second Church).—Miss Mary Brookins, Lyceum Theater, 3 p.m., May 15. (Postponed from May 1.)
Kansas City, Mo. (First Church).—Judge William G. Ewing, Auditorium Theater, 3 p.m., May 15.
St. Louis, Mo. (Fourth Church).—Bicknell Young, Rose Hill Hall, Hamilton and Maple avenues, 3 p.m., May 15.
New Haven, Conn. (Second Church).—Judge Septimus J. Hanna, Warner Hall, May 17.
Montrose, Col.—Hon. Clarence A. Buskirk, Church Edifice, May 19.
Bangor, Me.—Clarence C. Eaton, City Hall, May 19.
Green Bay, Wis.—Prof. Hermann S. Hering, Church Edifice, Cherry street and Monroe avenue, 8:15 p.m., May 19.
Davenport, Ia.—Bliss Knapp, Grand Opera House, May 19.
Denver, Col. (Fourth Church).—Frank H. Leonard, Elitch-Long Garden Auditorium, May 19.
Racine, Wis.—Prof. Hermann S. Hering, Guild Hall, Seventh street, May 20.
Maquoketa, Ia.—Bliss Knapp, Rice's Opera House, May 20.
Denver, Col. (Second Church).—Frank H. Leonard, First Church Edifice, 14th and Logan streets, May 20.
Muncie, Ind. (First Church).—Miss Mary Brookins, Wysor Grand Opera House, 3 p.m., May 22.
Braintree, Mass.—Clarence C. Eaton, Post Office Block, 3:30 p.m., May 22.

TESTIMONIES OF HEALING.

My first knowledge of Christian Science came to me on Thanksgiving day, 1895, when I attended a Christian Science service on the invitation of a friend. For nearly thirty-five years prior to that day I had been a great sufferer from diseases incurred in the army and in a prison during the Civil War. During these years there were many weeks and months of pain and sickness, resulting in the amputation of my leg at the thigh; then I hoped there were better days in store for me, but physicians told me that I would never be well again, that I had a bad case of liver disease which would lead into many serious complaints. Believing that they knew what they were talking about, I settled down to await results, and I soon came to think they were real prophets, for in a few years I was afflicted with bowel and stomach disorders, and for about seven years before I turned to Christian Science I was a great sufferer from nervous illness and headaches.

I had never thought there could be any possible help for me except through the physicians. I was treated by many of the very best obtainable, and they were very kind to me, but they were all agreed that there was no permanent help for me. My mind was as wearied and worn as was my body, and I sometimes speculated as to whether the grave or the madhouse would get me first. I had been raised by Christian parents, but if I had ever believed in a God it was such a long way back that I did not remember. I called myself an infidel and was proud of it, and gradually I had come to feel very hateful toward professed Christians, believing them to be either weak or hypocritical. My friend who invited me to attend the service told me that I could get help through Christian Science, so I attended the service with him and was very much surprised to see the Scientists assembled, for I knew nearly all of them and they were of the very best people in the city. I engaged the service of a practitioner and had treatment next day, continuing present treatment for one week and absent treatment for another week, during which time I strictly followed the rules laid down for me by the practitioner, being determined to give Christian Science as fair a trial as I had always given the physicians.

At the end of this time, somewhat to my surprise, I had not died from lack of medicine, this being the first time in fifteen years that I had gone two weeks without it. I soon began to read carefully the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, and I became so much interested in them that I read little else. After a few weeks I found my condition somewhat improved, I could eat sufficient food to satisfy hunger and with very little inconvenience, and there came to me a great sense of mental relief and satisfaction. I attended the Christian Science services regularly, and in time came to like its explanation of the Bible. I had such an abiding prejudice against Christians in general that my progress in the understanding of Christian Science was very slow, but the light dawned upon me little by little and my health and mental balance were gradually restored, so that at the end of five years I realized that I was entirely free of all my physical diseases, with as good a mental condition as I had ever had; and I was very happy that I could truly say that I believed in the Bible and in the God of the Bible, and in His Son, Christ Jesus.

None of my old ailments has ever haunted me in the last seven years, and I am very happy in the study of the Bible and the Christian Science publications. I am a member of the local Church of Christ, Scientist, also of The Mother Church; and I am a living testimony that Christian Science can and does cure organic diseases. My wife was as great an invalid as myself, but she has been greatly benefited and is a dear good Scientist, and she, too, is a member of the local church and of The Mother Church. When I think of my deplorable mental and physical condition at the time I turned to Christian Science, and of my utter disbelief in God and the Christian religion, I feel a great sense of love and veneration for our dear Leader, Mrs. Eddy, whose teaching and beautiful life-example have made it possible for me to escape from the enslavement of mortal mind; and to reward her for this I hope to be always worthy of her love and esteem.

(JUDGE) RUFUS D. SMITH, Santa Barbara, Cal.

I feel that in justice to Christian Science, I should acknowledge what Truth has done for me. For eighteen years I had been under the care of physicians, and many days I could not leave my bed. I suffered with dreadful headaches, nervousness, and kidney trouble, and after being examined by different physicians they said I had five abnormal growths. They thought that an operation would be the only cure; but as one physician said I could not recover, I would not consent to the operation. I then took Christian Science treatment for about three months, and have been healed. Not only did I receive the physical healing, but the spiritual uplifting I value more than all else, and words cannot express my gratitude.

MRS. IDA B. LEE, Dayton, O.

It is with sincere gratitude for the blessing which Christian Science has brought me, that I give this testimony. About fifteen months ago I was taken ill and had to leave my daily work. For another week I was not able to stand without help on account of weakness. My wife was alarmed and sent for a doctor, who examined me and told us that both of my lungs were affected with tubercular disease, and that he could do nothing for me.

Christian Science was then brought to me by a dear friend, who gave me treatment and also lent me a copy of Science and Health and asked me to read it. I told her I would, for like a drowning man I was ready to grasp at anything. After the first treatment I had the first night's sleep in three weeks. After the second week I was eating heartily of everything that was set before me, and in another week I was able to walk several miles without weariness. Since then our family has not taken any medicine, and we rely wholly on Christian Science. My lungs are sound and my health excellent.

FRANK COTHEY, Cleveland, O.

I wish to testify to what Christian Science has done for me. I had never been considered strong, and soon after my marriage my health became very poor. After the birth of my only child, I was operated upon four times, undergoing a most serious operation. I want to say right here that I am grateful to every physician who ever tried to do anything toward restoring my health, and some of them are our very best friends. For five years I suffered from stomach and female trouble, besides mental illness, while tubercular disease also developed. I never knew what a whole night's sleep was, so great was my suffering. My husband was a teacher, and our financial affairs were in such a condition, and my suffering so great, that hardly a day passed in which I did not think of ending it all. But I always clung to the hope that God would lead me to what I was looking for. I was a church-member, and lived up to its teachings as well as I possibly could. I was taught the Bible by some of the most noted theologians and Bible students of the South, but I was never satisfied until I found Christian Science.

I was healed in Christian Science in twelve weeks' treatment, and I am every day trying to realize that in God is my supply, and to know that at no distant day I shall owe no man anything, save to love him. The physical healing

Digitized by Google

was wonderful, but nothing compared to the spiritual uplifting. I have not taken any medicine or used any material means since the afternoon the dear friends came and told me what Christian Science is. My husband and little girl have had nothing but Christian Science treatment since that memorable afternoon, and I have seen croup, fevers, stomach trouble, partial deafness in one ear, etc., overcome for them. At Christmas, 1908, I was healed of acute throat and lung trouble in a short time. With the understanding of Truth which I have, I have made several demonstrations, some instantaneous, others taking a longer time. I began the reading of Science and Health the afternoon I was told what Christian Science is, and the fifth day I made a demonstration for which I shall always be especially grateful. Since then I feel that I have really lived.

I could write many pages and yet find it difficult to express my gratitude for Christian Science, and for the dear godly woman who brought this healing truth to all mankind. I love the Lesson-Sermons, and they are my daily bread. In this little Western town we are trying to be real Christian Scientists, and to let our "light so shine" that others will see our good works, and so honor God and His Cause. The persecutions which follow seem very bitter at times, but we know that "evil is nothing, no thing, mind, nor power;" and that "God is infinite, all-power, all Life, Truth, Love, over all, and All" (Science and Health, pp. 330, 17).

MRS. BERTHA JONES-DUKE, Eastland, Tex.

I had been sick more or less for twenty-five years, and from January until May, 1905, I was bedfast most of the time. One Sunday evening, when I was feeling very despondent and discouraged, neighbors who were Christian Scientists called, and during the evening my husband brought up the subject of Christian Science. I became quite interested in the conversation, and remarked that I thought I would have to take it up, as I had lost all faith in medicine. They said they would bring me some Christian Science *Sentinels* to read, which they did the next day. After reading them I was more interested than ever, and remarked to my husband that I could think of nothing but Christian Science, and believed I would like to take treatment, to which he consented. The same friends offered to loan us a copy of Science and Health, but my husband said we would buy one. We did so immediately, and I began to read it. After a few days we decided to call a practitioner, and I was instantaneously healed of bowel and female trouble, also of rheumatism.

Since then I have had many beautiful demonstrations of this truth that makes free, one of which was in a case of poisoning. This happened about four months after I came into Science, while in Estes Park, Col., on an outing with my husband and some relatives. The first manifestation appeared on my face after a day's picnic. It spread from day to day, until my face presented a distressing appearance, and one eye was almost closed. There was so much fear expressed by my relatives that I, being new in Science, was unable to overcome it. I knew of no practitioner nearer than Denver, and I reached there five days after the first appearance of the poison. My husband telephoned immediately from the hotel for a practitioner, and I received help at once. In less than two weeks, notwithstanding the great fear manifested, I was entirely healed, without a scar. Words but feebly express how grateful I am for this healing, also for the spiritual uplifting gained through the study of the Bible and Science and Health. It has made the Bible a new book to me, and the daily reading of the Lesson-Sermon is both a pleasure and a great help. The Christian Science literature is eagerly looked for and always welcome in our home.

I have found, as Mrs. Eddy says, that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). For all these blessings I am indeed grateful to God, and to Mrs. Eddy, to whom God gave this revelation of Truth.

MRS. MAUD VICKARS, Oklahoma City, Okla.

I wish to acknowledge publicly what Christian Science has done for me. About twelve years ago I was healed of a fever, and ever since I have relied on the Science for physical and mental healing. One of the most beautiful features of Christian Science to me is that it is a preventive as well as a curative agent. Space would not allow me to tell of all the benefits received. A few years ago, when I attended college, the work seemed very difficult, but by applying my knowledge of Christian Science I was able to complete the year's work. My consciousness is flooded with joy when I think how divine Love helped me in those trying hours. This truth has also been a great help to me in teaching school; it has enabled me to solve difficult problems in mathematics by knowing that man reflects the one intelligence. The school was more easily governed by knowing that man reflects God's government. One day there seemed to be quite a disturbance, but when I realized the truth it speedily ceased.

One day, while at school, my sister during play fell and struck her head so that she became unconscious. After books were taken up she began to cry and showed mental disturbance. I sent her home, and when I went home she was again unconscious. I began immediately to declare the truth that "Life and intelligence are purely spiritual,—neither in nor of matter," and that "the recognition of life harmonious—as Life eternally is—can destroy any painful sense of, or belief in, that which Life is not" (Science and Health, p. 14, 495). I realized that it was impossible for the intelligence which governs man to be disturbed or destroyed, that man's intelligence is eternal and immortal as is divine Principle. These thoughts took up their abode with me, and in thirty minutes my sister was all right and has been ever since. She did not remember the fall. I have seen diseases of all kinds vanish before the sunlight of Truth. The peace of mind and the spiritual uplifting which Christian Science has brought to my life are more to rejoice over than physical redemption.

Words are inadequate to express my gratitude to God; and to dear Mrs. Eddy, who was able to bring to mankind this truth.—LELA HUNT, Rose Hill, Ill.

Over a year ago I went to a Christian Science practitioner with my troubles, and to say that I am glad that I did so is expressing it mildly. I was healed of excessive nervousness, rheumatism, of drinking to excess of intoxicants, and of profanity. I cannot say too much in favor of Christian Science. God bless the day that I came to know of it! I had not read the Bible for over thirty years, but I now love the Book of books.

GEORGE PENNELL, Billings, Mont.

About a year ago my little daughter seemed to be suffering greatly from a stomach disorder and had not eaten for several days. A Christian Science practitioner was called in, and after the first treatment the pain was greatly relieved, and entirely removed by the second. The same help brought her safely and quickly through what threatened to be a severe attack of measles. At another time, while visiting away from our home town, the same little one became ill with a high fever and severe throat trouble. I wired for treatment, and within two hours all suffering was removed and the child was happily eating a hearty meal.

MRS. HARRIET M. KINNEY, San Mateo, Cal.

When I look back over the years that have passed since I became a Christian Scientist, I seem to be like a traveler, standing on the top of a mountain, from which he views the long road over which he has just passed. I feel the deepest reverence and gratitude for those through whose struggles this road has been opened up and rendered passable to all mankind, and my gratitude to our revered Leader, Mrs. Eddy, is unspeakable.

I should like to relate one of the many experiences in which Christian Science has blessed my life. In November, 1908, one of our children, a lad of eleven, who is a strenuous football player, came into the room where I was, saying that he had just finished a game of football in the course of which he had been struck on the head by the heavy boot of another player. I gave him treatment, and as he fell asleep I left the house for about an hour. He told me, on my return, that he had been very sick, and the vomiting continued through the night and the next day, accompanied with severe pains in the head. After trying to help him for one day without perceptible benefit, I asked a Christian Science practitioner to take his case. She did so, and the vomiting was then overcome, but the pain in the head was still intense, although from the first there had not been any external indication of an injury.

The fourth day after the injury, I went out of his room for a short time, and as I reentered the door he got up on his knees in the bed, saying that the pain was terrible. He then closed his eyes and fell over on his side senseless. I thought that it was the "last enemy," and instantly I cried out, declaring the allness of Life over and over again. I next rushed to the telephone, to call up the practitioner. I told her what I thought, and immediately she and another practitioner with whom she was staying temporarily, commenced to work in Christian Science. I went back to the room, emphatically declaring for Life, and calling the boy by name I told him to declare the truth for himself. After a while, in a faint far-off voice he repeated those words of truth, then his eyes opened and the color returned to his face. The Scientist came to our aid, and by her ministrations he improved greatly. Afterward we noticed that the spine was affected, also the eyes, one being larger than the other, and the eyesight so impaired that he saw double at times and very imperfectly. In three weeks' time, however, he was completely healed; so thoroughly was the work done that now, to him, the whole experience has hardly the consistency of the dream which it was.

When I look at this boy, now a picture of perfect health and strength, I often ask myself if any mother can have deeper cause to be grateful to Christian Science than I. Can I not call myself blessed, that I am able to give this great truth to my children?

MRS. ANNA B. SPRINKMANN, Milwaukee, Wis.

In May, 1908, I was taken ill with acute lung trouble. I could hardly walk after I got up from the attack, and when some one advised me to write to a Christian Scientist I did so; and I shall never regret it. When I wrote to her I was very weak and had lost flesh, but in three weeks I could walk anywhere and had gained twenty-five pounds. I also had a very bad cough when I began the treatment, and people said my lungs were affected; but, thanks to Christian Science, I am now as well and strong as I ever was in my life.

EVERETT L. HEWEY, Phillips, Me.

Christian Science came into our home at a time when I had almost yielded to a sense of despair, and it fed me on bread that I knew not of. Since then I have had many proofs of the efficacy of this treatment, and I will mention three instances which I hope will be a help to some mother who is struggling to know the truth that makes us free from sin, sickness, and death. My six-months-old baby, who was very delicate, was completely healed of a lingering spell of bowel trouble, and became a healthy child. He is now in school and has never taken any medicine. Another child, when a baby, was healed of acute lung trouble in a very short time, with only one visit from a Christian Science practitioner. There was an epidemic of fever in the city, and our neighbor's children were all housed in with it, when suddenly my oldest boy was attacked. I sent for a practitioner, and in three days the boy was healed and the little sister, who was with him all the time, was protected by divine Love. Nearly all diseases common to children have come into our home, and been healed by Christian Science.

Thanks and all glory to God, who has given us, through Mrs. Eddy, "Science and Health with Key to the Scriptures," that we may unlock them for our practical use.

PATTIE C. JETT, Winchester, Ky.

During the summer of 1908, while spending a few months with my mother in Tennessee, I became very much interested in Christian Science. I had known of its great works for years, having seen a dear sister healed of a so-called incurable disease a number of years before, yet it did not appeal to me that I needed Christian Science until the time mentioned. I had been a church-member for several years (in name only), and I read the Bible because I thought it a duty; but now it is very different, although it certainly does require careful study to get the right meaning. Our beloved Leader has told us that we must heed what it says, and "work out" our own salvation, and the more I study the Bible and Science and Health, the more I want to study them, and I have had some good demonstrations of the power of Truth. A dear baby girl was born to me under Christian Science treatment, and with very little suffering. She has never taken any medicine. I was up in four days, and had no pain, no medicine—nothing but God and His medicine in my home ever since. In our experience with our other baby we had doctors, pain, medicine, and every form of trouble, it seemed, and we finally lost our baby through dependence upon material means.

The Bible, Science and Health, and the *Quarterly* are my daily companions. The Lesson-Sermons are so good and helpful, and each time they are studied there is always something new to be found in them. Through their study I have learned to have more patience, and more thought for others. I have learned to love every one and see as much good as I can in place of evil. I know better each day how to appreciate Mrs. Eddy's teachings and realize that "every day makes its demands upon us for higher proofs rather than professions of Christian power" (Science and Health, p. 233).—MRS. GROVER C. MILLER, Idalia, Mo.

Four years ago I took up Christian Science for the healing of stomach trouble, from which I had been a sufferer for about fifteen years. Previous to this I had tried every material remedy offered for relief, but as I kept getting gradually worse, and had given up all hope of getting permanent help from *materia medica*, it was decided to try Christian Science. After the first treatment I discarded my system of dieting, and after taking five treatments I was completely cured. I also suffered from catarrh and headache, which have been entirely overcome by treatment and the study of the Christian Science text-book. Other members of my family also have been healed of various ailments through the application of this truth.

Above all the healing of physical diseases is the spiritual uplifting, which I value more than all else, for it has given me a clearer understanding of the Bible and the relation of man to God. For all these blessings I am indeed grate-

Digitized by Google

ful to our beloved Leader for this wonderful truth, which can and does free mankind from every discordant condition.—FLOYD MCGREW, Mishawaka, Ind.

Christian Science has done so much for me that I write this testimony with the hope that some one may be benefited by my experience. When quite a small child I was ruptured severely by lifting a very heavy weight. A doctor was called, and he ordered me to wear a support, to keep very quiet, and not on any account to run and jump about. After many years of pain and inconvenience I was persuaded to undergo an operation. This, however, proved an utter failure, my condition being worse after it than before. This went on for three years, until the happy day that I heard of Christian Science. I must confess that I felt skeptical about all the wonderful healings, but made up my mind to prove it for myself. In a short time I found that there was hope for me, that I need not suffer, that God is Love, and that joy and health are man's rightful inheritance. I wrote to a practitioner for absent treatment, and in a very short time I got my healing. In one of the practitioner's letters she asked if I could not make up my mind to lean on God for support. This let in the light: I felt I could give up the material support without any fear.

I cannot sufficiently express my joy and gratitude for this efficient healing, and for all the good things which have come in its train, foremost of all being the spiritual quickening. It is my great desire to live so as to reflect this truth which has been made so clear to us by our loving Leader, Mrs. Eddy.

MISS V. M. SYDENHAM, Scarborough, England.

When I came to Christian Science it was not for myself, but for my husband, although I now realize that I, too, was very much in need of it. It seemed as though medical skill had been exhausted, when we turned to God, and we proved this statement, "Man's extremity is God's opportunity." We came to Christian Science through the advice of a very dear friend, who is a living witness to Truth's power. My healing has been slow, but God, Truth, has been molding me anew in His own image and likeness. Mrs. Eddy has given us "Science and Health with Key to the Scriptures," which unlocks the door of the heart, and lets God come in and take full possession of our being. Then we can demonstrate the fact that in God "we live, and move, and have our being."

Not having much knowledge of disease, I cannot say what my ailments were, but I know this, that I am newborn,—spiritually, morally, and physically. Bodily ailments which I had had since childhood have all disappeared, and I am simply a new creature in Christ. I never was prejudiced against Christian Science, as it always seemed to me that there was truth in it. I cannot find words to express my gratitude to God, to Mrs. Eddy, and to all who have in any way helped me to come to a knowledge of this wonderful teaching.

MRS. JENNIE E. WELCH, Manchester, N. H.

On Oct. 1, 1900, while in South Africa, my left ankle was seriously injured by a shell. The ankle became quite stiff and was said to be ossified. For four years I tried *materia medica* and was greatly helped by it, but the doctors told me that I could not march any more and that nothing further could be done. In 1904 I tried Christian Science, and began to improve immediately. I have been enabled to do my work, even to the marching of twenty miles or more, and although not yet completely healed I know that the fault is not in the Principle but from lack of a fuller knowledge of that Principle. I have had many demonstrations of the power of divine Love, such as no ill effects after concussion (keeping to my work the next day), recovery from influenza, protection when in apparent danger, etc. I tried hard to keep the habit of smoking, but the desire for both tobacco and intoxicating drinks left me.

All this is, however, nothing as compared with the spiritual uplifting of thought which Christian Science is giving me. I am beginning to see the depths to which selfish thoughts and lack of self-restraint can lower one, for it is only when we begin to look upward that we see how deep down we have fallen. The truth of Jesus' statement, "Blessed are the pure in heart: for they shall see God," is made clear, and I know that when my thoughts are made purer by the overcoming of selfishness, irritability, etc., I shall see more of God and less of evil, whether under the name of sin or sickness. The true man is a ray from divine Love, and it would be as easy for a ray of sunlight to reflect darkness as for a ray of divine Love to reflect evil. To be truly healed we must seek the spiritual kingdom more than the physical benefit of healing, for then we look beyond the false evidence of human belief to the glorious purity revealed by spiritual understanding, attained through the study of Science and Health.

I cannot find words to express my gratitude to Mrs. Eddy for giving us this "Key to the Scriptures," and I often wonder where and what I should be now if she had not been faithful to her call to duty and given to the world this glorious revelation of Truth.

N. LUXMOORE, Captain, The Devonshire Regt., Candia, Crete.

I wish to express my gratitude for the many blessings I have received from the study of "Science and Health with Key to the Scriptures" and through the aid of a Christain Science practitioner. The saying that "man's extremity is God's opportunity" certainly held good in my case, as I had tried every material means I could hear of for my trouble, which was said to be organic, and according to *materia medica* incurable without an operation. I have also been relieved of nervousness and general debility, and am now able to do office work, although never before could I stand confinement. At times the sense of fatigue has been very marked, but it was soon overcome by declaring the truth.

While I am very thankful for the physical help, I am still more grateful for the spiritual uplifting, which passes all understanding. Although I have only a grain of understanding, I have Christ's promise, "Ye shall know the truth," and this sets us free from every material belief, according as we seek and strive. I am truly thankful to God, also to Mrs. Eddy, and my greatest desire is to have that Mind which was in Christ Jesus.

LOUISE WOOD, Dallas, Tex.

[Written for the *Sentinel*.]

"WITH THY LIKENESS."

LAWRENCE BRAINERD.

WHEN I awake in that glad morning light,
  And find myself in harmony with God,—
Freed from earth sense, and one with good,—I shall
  Exultant rise to walk on holy sod.
But is it death that brings this state of royal kin?
  And must we pass to other worlds before
We can reflect, in deed and way and look,
  The image of the Maker we adore?

Nay, 'tis the life of Truth and Love,—
  When in all things the good alone we see,
We shall awake to find there is no death,
  And with Thy likeness satisfied shall be.

FROM OUR EXCHANGES.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

We are so timid, so faithless, and so selfish in our way of encountering life that we allow great opportunities to slip by unheeded. The great difference between man and man is not so much a difference of capacity as receptiveness to divine inspiration and responsiveness to divine command. The real gospel of Jesus is not first and foremost the gospel of a great bestowal, but that of a great demand. Jesus demanded all that his followers had to give, even to their substance, not because he wanted it for himself, but because he knew they were not ready for the highest aims until they were freed from the petty personal point of view; then, indeed, they did find the gospel of a great bestowal, for they learned that they had lost nothing and gained everything.

[*New York Observer.*]

Hearing is but half the orb of Christian experience—doing is the other half. If faith abideth without works it is dead, because it is alone. The Word of God has a good many severe things to say of all attempts to divorce religion from morals and theology from life. Life cannot be divided into sections, and any one of the segments thrown away, without deep injury to the subjects who are to live it. Only the complete man is the happy man, and no man is complete who, while theoretically approving the truth, practically disowns it in practice and nullifies it by his conduct. It is always easier to accept an intellectual statement than it is to live a life or do a deed, and hence appears the constant need of insisting, in public and in private, on the absolute duty of accompanying hearing with doing.

[Cleland B. McAfee, D.D., in *Christian Work and Evangelist.*]

The theology of the Old Testament is the outcome of the experiences which Abraham and Moses and David and Isaiah and the others had with God and His truth. All revelation is first an experience which some man has with God. The theology of the New Testament is the outcome of the experiences of men with Christ, finding in him certain facts which demand explanation. It would be almost correct to say that the Bible is not a book of theology, but rather a book of religion, a book of experiences rather than a book of explanation of those experiences. At any rate, the accent of the whole book is on the religious experiences, and we are left to make our explanation of them.

[*Congregationalist and Christian World.*]

The Bible is not an oracle to which we go for the special needs of an hour, though Christian men have found comfort in this haphazard appropriation. It is rather the family history of God's people, by which we may interpret our own lives and fortify our hopes by the merciful and kindly dealings of God with others. It is our relation to Christ which brings us within the circle of God's pledged intentions. "All the promises of God are yea, and amen, in Christ Jesus." Do we really believe in God as the active helper and sustainer of our lives? If so, the words which were spoken in his name by prophets and apostles and by Christ himself will be full of living power and assurance for our souls.

[*Standard.*]

The power of a body of Christians to command the regard of those who stand outside does not depend upon numbers or wealth. It does not even hinge upon the confession of faith to which Christians may subscribe. The men and women are themselves the "epistles" which all know and read. If those who look on see loving-kindness, mutual helpfulness, the spirit which was in Jesus, they will be convinced of the relationship which we bear to our Lord, and in no other way.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

A joint resolution, now before Congress, asks that a commission of five members be appointed by the President of the United States, the duties of such commission to be: First—To urge upon the attention of other governments the fact that relief from the heavy burden of military expenditures and from the disasters of war can best be obtained by the establishment of an international federation; second—to report to Congress, as soon as practicable, a draft of articles of a federation limited to the maintenance of peace, through the establishment of an international court to have power to determine by decree the controversies between nations, and to enforce execution of its decrees by the arms of the federation, such arms to be provided to the federation and controlled solely by it; third—to consider and report upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war.

The physical valuation of railroads has been recommended as an amendment to the Taft-Elkins railroad bill in the Senate. This means an appraisement of its actual real property, lands, tracks, buildings, shops, and rolling stock. It does not consider good will, franchise, or the value of stocks and bonds issued by the company. Such an inventory would be of great service to the interstate commerce commission in determining rates that would be both just to the people and yield a fair profit to the railroad company on its actual investment.

The census office unofficially estimated the increase of population in the United States since 1900 at 15,121,036, making a total of 91,424,433. The unofficial estimate for Greater New York is 4,563,603, an increase since 1900 of 1,126,401. The population of Chicago is estimated at 2,282,926, Philadelphia, 1,540,429; New Orleans, 332,132; St. Louis, 608,716, Baltimore, 583,374, Washington, 350,145; Cleveland, 520,938; Cincinnati, 354,012; Buffalo, 401,535; Denver, 150,226; Pittsburg, including Allegheny, 569,823.

Ex-President Roosevelt's final ambition, it is said, is to be the founder in Washington of a great national university, with a foundation backed by unlimited capital, with himself at its head and with the firm purpose of devoting his whole endeavors to the institution. Andrew Carnegie, according to the scheme, is to head the list of several thousand men of wealth to contribute many million dollars for the foundation.

Ten million dollars is the amount Postmaster-General Hitchcock expects to save during this fiscal year in the operating expenses of the post-office department. He has already turned back to the general fund of the treasury four million dollars of the deficiency fund appropriated by Congress. This saving was made during the first six months of the present fiscal year ended Dec. 31.

The department of justice will be given an appropriation of fifty thousand dollars to continue the investigation and prosecution of sugar customs frauds. The department has collected as a result of prosecutions to date about three million five hundred thousand dollars, of most of which the Government had been defrauded in importations by various sugar companies.

It was the contention of ex-President Roosevelt that the power generated by dams erected on streams under Government control should belong to the nation, which should retain in perpetuity the power to regulate its sale price. In the bill just passed by the House and which will probably be vetoed by President Taft, this principle is disregarded.

The United States court of appeals has affirmed the decree of the United States circuit court in which the Standard Oil Company was fined twenty thousand dollars by a jury before Judge Noyes in the western district of New York for violation of the interstate commerce act. The defendant was found guilty on forty counts.

The start for an intelligent, expert revision of the tariff will be made with an appropriation of two hundred and fifty thousand dollars with which to enable the tariff board to make a study of the comparative costs of production in the United States and foreign countries.

More than one seventh of the entire revenue of New York state is spent for maintaining the hospitals for the insane. The total receipts of the state for the ten years following Oct. 1, 1899, amounted to $342,025,805. For the hospitals for the insane $54,018,361 was used.

To check New Jersey's destructive forest fires the state has ordered the railroads traversing its pine forests to clear the ground for fifty feet on each side of the tracks and plough up and gravel ten-foot strips to prevent the growth of brush again.

The supreme court of the United States, in a sweeping decision, has unanimously affirmed the decision of the Tennessee supreme court ousting the Standard Oil Company of Kentucky from the state and adjudging it a trust in restraint of trade.

Fraternities and sororities at the Bridgeport (Conn.) high schools will be abolished by the board of education, beginning with the next school year. This is the substance of a resolution adopted by the board following an investigation.

The Senate committee on judiciary has voted to recommend the confirmation of Governor Hughes' nomination for associate justice of the supreme court of the United States.

After twelve years the ill-fated battle-ship Maine is to be removed from the Havana harbor. A bill providing for such removal has passed the House and the Senate.

A second attempt to pass the resolution favoring the federal income tax failed in the New York assembly.

International.

Ex-President Roosevelt, in his address before the Nobel peace prize committee at Christiania, Norway, said: "All really civilized communities should have effective arbitration treaties among themselves. The methods adopted in the American Constitution to prevent hostilities between the states and to secure the supremacy of the federal court in certain classes of cases, are well worth the study of those who seek at The Hague to obtain the same results on a world scale. Something should be done as soon as possible to check the growth of armaments, especially naval armaments, by international agreement. It would be a master stroke if those great powers honestly bent on peace would form a league of peace, not only to keep the peace among themselves, but to prevent, by force if necessary, its being broken by others."

The Chinese government is considering a proposed railway to be built from Haichou, on the seacoast, westward through the Yellow river valley, connecting Chinese Turkestan with the sea. An important feature of the plan is the development of a new trading port at Haichou, midway between Chefoo and Shanghai. The line would be an important trunk line. Other land connections would be the Peking-Hankow and the Tientsin-Pukou railways. Its water connections would embrace the important sea routes of the world.

The officially appointed delegates at the World's Sunday School Convention in Washington, U. S. A., May 19 to 24, will represent more than twenty-five million persons. Four auditoriums will be used and speakers to the number of two hundred and fifty, representing forty-five lands, have formal place on the program.

King Edward VII. of England, beloved of all his people, passed away May 6. He is succeeded on the throne by his son, who was proclaimed King as George V.

Industrial and Commercial.

The test of the practicability of all the Government reclamation work is at hand. On April 1 there was due and payable into the reclamation fund from the settlers on the various projects, approximately one million dollars for water rights. If the farmers are able to meet their payments, it evidences that the Government is able to secure a return on its investment. On the big North Platte project in Wyoming and Nebraska there were 335 farms with charges due on April 1. It is reported that 227 of them paid up as early as last December and of the remaining 108 the engineers in the field estimate that not more than ten will be likely to be canceled. On the Truckee-Carson project in Nevada, where conditions have been as unfavorable as any could be, the reports show few delinquencies. On the Okanogan and Sunnyside projects in Washington, the Shoshone in Wyoming and the Huntley and Sun river in Montana, it is predicted that every farmer will meet his obligations. The greatest number of failures was found among those who took up the projects never intending to use them themselves, but to speculate for profits on *bona-fide* homemakers who came later. The farmers who came to farm are making good. The crops produced on the irrigated lands operated by the water systems of the Government in 1909 had an estimated value of fourteen million dollars and the land values increased not less than one hundred and five million dollars as the result of the construction of the federal irrigation works.

The Roosevelt dam, the great engineering work in connection with the Salt river irrigation project in Arizona, is nearly finished. The Government, unable to get cement at a reasonable price in connection with this dam, undertook to manufacture its own cement from local material, and saved thereby more than six hundred and fifty thousand dollars. The reservoir created by the dam is perhaps the largest artificial body of water in the world. Its capacity is sixty-one billion cubic feet, and if its water were spread over Delaware it would cover the entire surface of the state a foot deep. The dam is two hundred and eighty feet high, ten hundred and eighty feet long on top, and contains three hundred and twenty-six thousand cubic yards of masonry. It is expected that the dam will be completed in June, but the project will not be formally opened until fall. The project when completed will have cost eight million six hundred and forty thousand dollars. It will irrigate two hundred and forty thousand acres of land and it is estimated by expert agriculturists that the crops of a single season will return enough to repay the entire investment of the Government.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE "BANQUET OF CHRISTIAN SCIENCE."

SAMUEL GREENWOOD.

THAT was a happy expression which Mrs. Eddy used when she spoke of the weekly testimony meeting as a "banquet of Christian Science" (Miscellaneous Writings, p. 149), for here indeed are dispensed to needy mortals precious fragments of the "bread of life," and the fruits of that tree whose leaves are for "the healing of the nations." Throughout the field, now of world-wide extent, multitudes of weary wayfarers, hopeless of heart and famished of spirit, are attracted thither, seeking comfort and spiritual refreshment, and it should be the care of Christian Scientists, to whom this task of love has been committed, that none of these go away unsatisfied. It is their privilege as well as their duty to bring to this feast, in the words of our Leader, "what they possess of love and light," and to distribute "what God has given [them] of experience, hope, faith, and understanding" (*Ibid.*); or, as Malachi expressed it, to bring their "tithes into the storehouse, that there may be meat in mine house."

The primary purpose of the Wednesday evening meeting is evidently not so much to strengthen and cheer Christian Scientists themselves—although this blessing naturally attends one's unselfish ministrations—as it is to awaken mankind to a knowledge of the redemption from sin and disease which is provided in Christian Science. Christian Scientists are daily proving in numberless ways what the true idea of God, as omnipresent good, can do for them in times of need. Again and again they have seen demonstrated God's power to "furnish a table in the wilderness" when human material belief saw only dearth and desolation; and these experiences, when made known, inspire with new hope and courage those who wander in from the "highways and hedges." Their realization of God's goodness and protection may well be likened to the "candle" in the Master's illustration, which Christian Scientists are expected to keep in their candlesticks, to give light when needed, but not to hide under the "bushel" of diffidence or timidity. We may indeed bask in another's light, but that light cannot take the place nor do the work of one's own. This work is individual, and one should not rely upon another to do his part therein, any more than he should ask to be given a blessing for which he has not prepared himself.

An indispensable feature of successful banquets is that the fare be carefully selected and prepared, so as to prove most acceptable to one's guests. To do this, the palate of the guests, more than one's own, must be considered. Christian Scientists likewise owe it to those invited to the Wednesday evening meetings, that they not only give the best they have, but present it clearly and intelligibly,—not in an "unknown tongue," but in language readily apprehended. The effect of many good testimonies is frequently lost through the use of obscure terms. Disease, sin, and evil habits are not regarded by the average person as "claims" or "beliefs," but as actual experiences; and their need is not to have these conditions renamed, nor described in unusual phrases, but to know that Christian Science heals them. This fact, that Christian Science removes the ills and the errors of mankind, and makes human thought more loving, unselfish, and pure, should be the key-note of every utterance and the burden of every testimony.

It is important in this connection that Christian Scientists carefully observe the by-law in the Manual relating to testimony, namely, that such testimony "shall not include a description of symptoms or of suffering" (Art. VIII., Sect. 24). The too common tendency has been to dwell unduly upon the painful or distressing features of one's experience, rather than upon the deliverance wrought by Christian Science, not realizing that mortal thought is already too sensitive to disease descriptions. Vividly to depict one's past sufferings may impress them more deeply upon the thought of both narrator and listener as having been realities, rather than illusions of erroneous belief which the truth revealed in Christian Science dispelled. It is the object of these meetings to help efface the images of disease, but not to delineate them. The statement of one's ailments in generic terms, as provided in the by-law referred to, is amply sufficient for most occasions, and serves by its omission to protect the thought from the mesmerism of harrowing recitals of suffering or misfortune. As has been said, the purpose of these testimonies is to bring to human recognition the healing power of Christian Science, and this is always the main point to be considered in relating experiences.

The failure to fulfil one's individual part in Christian service, the disposition to enjoy God's bounty without sharing it with others, tends toward spiritual depletion, since the measure with which we give or withhold is given or withheld in return. The Master, it will be remembered, condemned those who, professing discipleship, neglected to minister to the needy. The omission to obey God's behests even in that which is least must always hinder spiritual growth, for there can be no progress beyond the line of fulfilled duty. No one can go forward and leave undone behind him aught that he should and can do, for only as one is doing all that is required can the call come to go higher.

There is, to be sure, a right season for silent meditation, but it is hardly during the half hour given to audible testimony, if the time waits and we have not presented our offering, for silence is then apt to be leaden rather than golden. Gratitude for the priceless boon of Christian Science, and unselfish love for humanity, will drive out fear of personality if given the opportunity. To have received even but a small knowledge of Christian Science, with its attendant benefits, is a great trust, and Christian Scientists will not be absolved from its responsibilities. They must live up to the measure of their privileges if they would retain and increase them. Doubtless it is difficult for most persons to speak in a public meeting, but, on the other hand, if no hard things were required in the

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

line of Christian duty, wherein would be one's cross-bearing? What we have to give may seem but a tiny crumb, yet it may be just what is needed by another, and if given in love will not return void.

No half hour of the week is more important to the advancement of the Cause or to the welfare of humanity than that devoted to public testimony at the Wednesday evening meeting, for here are given the proofs of the demonstrability of Christian Science. Much remains to be done in bringing this teaching to the attention of mankind, and all Christian Scientists may share in this work by making known the practical benefits they have received and are receiving therefrom. Let them give as freely as they receive. The strangers within our gates are our invited guests, and should be ministered to as cheerfully as if they had been invited to dine at our homes. Let the spirit of glad service fill the heart, and its expression will be spontaneous and fruitful. Anything that would influence us to withhold from God this small return for our blessings must seem paltry indeed in the light of the nothingness of all mortal things. We may be sure that any suggestion to keep back our tithe of helpful experience is not of God, and therefore should not be accepted; for there is not a moment when the Christian can safely cease his mental resistance to the self-assertive claims of evil, or relax his diligence in giving activity to every right thought.

This is not offered by way of criticism, but in the hope that there may be awakened a more active sense of individual responsibility, and hence a more general participation in this work. The writer knows full well the struggle many experience at the thought of speaking to a public assembly, but this fear is lessened and overcome by grappling with, not by yielding to it. Only the excuse which we know God will accept should ever prevail with us. If we are not doing the best of which we are capable, let us discover and remove the obstructing error, lest in limiting our usefulness we limit our receptivity also. Man is greater than anything which the sense of fear, indifference, or self-love can urge against one, and a realization of this will work out individual freedom to do whatever is right.

"LINE UPON LINE."

FRANK H. SPRAGUE.

To persons whose impressions of Christian Science have been gained from outside observation instead of practical experience, it is sometimes a matter of wonderment that the adherents of this faith devote so much time to the study of the Bible, with Science and Health and other writings of Mrs. Eddy. From the point of view of their observations it seems to savor of pedantry, if not indeed of fanaticism, that one should attend service every Sunday to listen to the reading of a stated Lesson-Sermon, after having already devoted a portion of each week-day to its careful perusal. Surely such loyalty to an ideal must be taken either as an indication of narrow-mindedness and bigotry on the part of its devotees, or else as evidence that the works in question contain a hidden source and supply of inspiration, which the outsider fails to discover.

If, as is frequently supposed, Christian Science were merely a novel system or method of treating disease, the essential points in its practice might be embodied in a definite formula or scheme of doctrine which, once mastered, would call for no further study. But the case is far different. The manifestations of healing witnessed by the onlooker are but incidental considerations in the practice of this Science, visible effects resulting from an appreciation and understanding of certain fundamental truths regarding man's being. Christian Science shows that Life has nothing to do with organic matter or material structure; that a sense of life which is involved in materiality is false; and that a right understanding of God and the universe causes discordant bodily conditions to disappear by correcting and undoing the mistaken beliefs of which those conditions are but the objective expression.

Not until human consciousness is so completely transformed that all evidence of materiality is wiped out and the undisputed reign of spiritual harmony established, will the stronghold of sin, disease, and all ungodlikeness be undermined and overthrown. Surely, such a consummation can be reached only by proceeding "precept upon precept; line upon line," in the eradication of falsity. The task of engrounding thought in the true, the spiritual sense of Life, in the face of the overwhelmingly contradictory and seemingly valid claims of physical sense testimony, calls for the utmost consecration and devotion—untiring vigilance and unremitting application. In the declaration, "If any man be in Christ, he is a new creature: old things are passed away," the apostle Paul expresses his recognition of the renovating process by which human consciousness must be dispossessed of a material sense of existence and spiritual sense quickened into manifestation.

Mrs. Eddy says in her address at the dedication of the church in Concord: "To live so as to keep human consciousness in constant relation with the divine, the spiritual and eternal, is to individualize infinite power—and this is Christian Science" (*Sentinel*, July 23, 1904). In the parable of the leaven Jesus indicates the power of spiritual sense or understanding, "the kingdom of heaven," to transform human consciousness. Again, he likens the kingdom of heaven to "a merchantman, seeking goodly pearls: who, when he had found one pearl of great price, went and sold all that he had, and bought it." Consciously or ignorantly, all mankind is seeking to realize the harmony and happiness which spiritual sense imparts. In proportion as the heavenly harmony is experienced, the glamour and allurements of a material sense of happiness fade away. Mortals do not deem the pursuit of materially conceived riches and power irksome, even though such pursuit involves toil and sacrifice, since they believe those things have ability to confer enjoyment. According to the testimony of innumerable witnesses, the progressive realization of man's true nature and possibilities, as unfolded in Christian Science, is attended by a spiritual sense of peace, joy, and harmony far surpassing the fleeting and disappointing pleasures of material sense. Is it to be wondered at, then, that Christian Scientists eagerly avail themselves of the advantages for spiritual growth offered in the systematic and concerted study of the Bible, together with their Leader's works, the public services, and other accessories which the movement affords?

THE CHRISTIAN SCIENCE MONITOR.

EDWARD GILBERT.

THE daily newspaper of the Christian Science denomination is now a year and a half old, and it seems good to look back over the period of its existence, to see what the results have been and whether they are commensurate with the outlay. When notices of the proposed publication of the *Monitor* first appeared, the writer was inclined to doubt the wisdom of a subscription, as it seemed more like a luxury than a necessity; but when a little later there appeared the advice from our Leader to all Christian Scientists, to subscribe for and read the paper, all possible objections were put aside and the subscription sent in. The wisdom of our Leader's advice was very soon apparent. The benefits received have been so many and so great that it seems but right to let others know what they are.

At the outset, reading was mostly confined to the Home Forum page. The articles on music and architecture, together with the little poems and snatches of wisdom from the best authors, which appear on this page, tended to lift thought from the every-day cares and to elevate it to the

Digitized by Google

contemplation of what is highest and best. As time went on, the writer was surprised and pleased to notice a marked improvement in his habits, his appearance and general address. Next the editorial page helped to widen and deepen the interest in and sympathy with all the people and nations of the world, dealing as it does with matters which concern not alone one person or one community, but all mankind, their present condition and their progress. It brings us nearer to them in thought, lessening, it would seem, the sense of distance, and is a fulfilment of Paul's declaration: "There is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female: for ye are all one in Christ Jesus."

For some months after the first copy of the paper appeared, the article on Christian Science printed in each issue did not appeal to thought very definitely; but afterward it was the writer's privilege to be on the road for some months, and then these articles began to be appreciated. After a strenuous forenoon's work, when there would seem to be a tendency to mental and physical fatigue, the Christian Science article in the *Monitor* would be read; and this not only cleared the thought and imparted a sense of rest and peace, but never failed to bring about a change in the business situation itself, which rendered work much more pleasant, successful, and satisfactory. It was refreshing to notice, also, that the subject for each day was interestingly adapted to the day's need, and thus it became the more acceptable and was more highly appreciated.

After this experience thought was turned to the sporting page, and at first (the writer not being particularly interested in any line of sport) there was a tendency to question the value of the matter on this page, and for some months it was passed over with a mere glance at its head-lines. One day, however, attention was directed to one of the articles on "Rational Golf." The writer did not know the game, and was not particularly interested in it, but he was induced to read the article. It described a situation in which a player, after making a few shots, found himself almost cornered, so to speak, and apparently unable to go any farther. After studying the situation for some minutes, however, he selected a particular club, and by a well-calculated shot was able to free himself from the awkward position into which he had played himself, and to proceed to the end of a satisfactory game.

The situation described in this article reminded the writer strongly of his own and others' experience in the work of Christian Science. Many times we find ourselves confronted by what appears to be an impassable wall, when mortal mind seems to say, "Thus far, and no farther," but by vigorous application of the truth as taught in Christian Science, how many times have we seen the seeming obstruction removed, and the way opened up for further progress in the truth.

With regard to the pages of cable and telegraphic news, it is worthy of note that the writer has several times read some special item of news in these pages of the *Monitor*, and later has read the same item in the local paper. There was no comparison of dates, but the fact remains that the news was read in the *Monitor* first, and that in this respect it happily supplied his need. This statement is made, not with any intention of undervaluing other papers, but to show that the *Monitor* can be relied upon for all necessary information.

Thus it was seen that each page and each article in our newspaper has its own special quota of information, admonition, or encouragement, of which the reader may if he choose take full advantage, and say, as the writer has several times done in the past year: "Thank God for the *Monitor!* May His blessing rest on her who was given the wisdom and foresight to conceive and carry out the idea of a daily newspaper which is fast becoming the means of a world-wide good."

THE STAR OF TRUTH.

DAISY BEDFORD.

How grand in its utter simplicity is the Gospel narrative of the birth of Jesus! Can any description, in its entire absence of pomp of words, compare with it, and yet nothing is lacking necessary to convey the whole scene to the mind of the most unimaginative. In St. Matthew the key-note is struck thus: "Now the birth of Jesus Christ was on this wise;" followed by the simple description of the conception and birth. St. Luke gives a fuller account, and to him we are indebted for Mary's hymn of gratitude and praise. With the help of these two accounts we can picture that wonderful event, the outcome of which was to revolutionize the world.

Under the starry night, all in the little town nestling among the Judæan hills are asleep, save in the quiet shed, where the patient oxen gaze in mild-eyed wonder at these strange intruders—Mary, bending over the manger cradle, and Joseph, watchful and full of care for his loved ones. Away on the hills the shepherds hear the joyful tidings, and rejoicing they take up the song of the angel host, "Glory to God in the highest." Peace and good will upon the earth is indeed declared in the birth of him who shall best present the Christ-idea.

In far-off lands the Magi had perceived a wondrous star, for which, learned as they were in the study of the heavens, they were at first unable to account. We can see them turning over their well-worn manuscripts to discover, if it may be, what this strange star portends. Then they remember that about this time it has been prophesied that a Messiah, a reformer, a king, should come to the earth,—should be born "in Bethlehem of Judæa,"—does this star announce his advent? They set out for Jerusalem, and thence, in obedience to the king's command to "search diligently for the young child" whose birth was thus portended, they depart for Bethlehem. The record reads: "And, lo, the star, which they saw in the east, went before them, till it came and stood over where the young child was." With one accord they follow, until—and this is the jewel of which their wonderment was only the setting, for it is the reward of faithful endeavor and obedience to spiritual vision—they came to the humble stable which alone offered shelter to the little king. Silently, in simple faith and wondering awe, they do homage, and give gifts to him who was to lead "captivity captive."

In this century the star of Truth has appeared in the heavens, and as it becomes visible to our eyes, we ask what this radiant visitant to our earth portends; for we, too, have been watching through the long night of darkened understanding, while stars of varying magnitude have passed across the sky only to vanish out of sight and leave the night yet darker for their unfulfilled promise. But none have shone with such a radiance as this which now meets our gaze, and our weary hearts gain courage as we whisper whether it may intend portend the reign of Christ's kingdom upon earth. Those whose lamps are burning, who have tended the spiritual light to "keep aglow the flame of devotion" (Miscellaneous Writings, p. 341), prepare to follow where it leads. No matter how rough the way, the bruised feet follow, and as the star moves on in silent majesty we are greeted by the angel song, "Glory to God in the highest, and on earth peace, good will toward men:" until at last we reach our journey's end, for the star has brought us, through perils unspeakable, to the place where the young child lies. Forgotten are the fatigue, the tired eyes, the aching limbs, and like the Magi, we kneel in speechless awe "to commune with the divine Principle, Love" (Science and Health, p. 35).

One star, divine Science, will indeed, if we follow it faithfully, lead us to the place where the young child,

Digitized by Google

the divine manifestation of God, dwells. Some find it in the wilderness; some by the bedside of their loved ones, healing them of their diseases; some at break of day, when material thought is stilled. To each and every watching one it will appear, but it remains with us whether we will follow. It pauses not, but leads on—away from mortal unrest—to the "peace of God, which passeth all understanding;" to the realization of "Immanuel, God with us." May we be prepared to offer the gold of a life consecrate, the frankincense of prayer without ceasing, the myrrh of Christian Science demonstrated in healing the sick and the sinning. Then, like the Magi, we shall return to our country (consciousness of good) another way, for the good we would we shall do, and the evil we would not that shall we not do.

So shall the reign of Mind commence on earth;
And starting fresh, as from a second birth,
Man, in the sunshine of the world's new spring,
Shall walk transparent, like some holy thing.

OUR "KEY TO THE SCRIPTURES."

RENETTE K. BUTLER.

As I progress in the study of Christian Science, I find that many passages of Scripture have been illumined for me. When I say illumined, I mean not simply made attractive, but made clear and plain; that is, passages which once merely expressed beautiful sentiments or theories, have become practical, demonstrable statements of Principle, just as practical and demonstrable as a statement in mathematics. Take, for example, the Master's requirement that the one who would follow in his footsteps must "deny himself." In a vague sort of way I once thought this to mean that if I wished to be a Christian, I must do without something which I very much wished to have. Circumstances left me no choice in the matter, and though I rebelled, I was denied much of the joy of being helpful because of physical weakness and suffering, I was denied a college education because of financial limitations, I was denied happiness because of a great unsatisfied longing. All this, however, seemed to strain rather than strengthen my sense of Christianity.

Through the study of our wonderful "Key to the Scriptures," the Christian Science text-book, I have learned that if I would truly follow Christ, if I would be his disciple, I must deny myself,—my false sense of self,—self-love, self-will, self-depreciation, self-righteousness, self-pity (which I used to call sensitiveness). I have found the daily prayer given in our church Manual to be a constant help in overcoming this error. I find that I must exercise eternal vigilance; but victories already gained have brought me happiness beyond expression, and have made me more wisely sympathetic and loving, more truly generous and helpful, because the effort to deny my own false sense of self has made it easier to unsee the false image in others.

As I realize more and more how much of my usefulness as a Christian Scientist depends upon this obliteration of self, I become more capable of gratitude toward our dear Leader, who has grown so far toward the living of "an unselfed love" (Science and Health, p. 1) as to be able to reveal to the world this wonderful Christian Science.

'Tis the sublime of man,
Our noontide majesty, to know ourselves
Parts and proportions of one wondrous whole!
This fraternizes man; this constitutes
Our charities and bearings. But 'tis God
Diffused through all that makes all one whole.

COLERIDGE.

SELECTED ARTICLES.

[Alfred Farlow in *Fort Worth* (Tex.) *Record.*]

The principal accusation which our critic brings against Christian Science is that it teaches the unreality of matter. He interprets the teaching of Christian Science on this subject as meaning that the entire universe is an illusion, and in this connection quotes the Scriptural passage: "In the beginning God created the heavens and the earth," as an evidence that the Scriptures contradict the teaching of Christian Science. The gentleman is incorrect in his interpretation of the teaching of Christian Science, both in his premise and in his conclusion. If he had read the Christian Science text-book understandingly, he would have learned that it is the universe witnessed to by the material senses which is declared to be unreal, an illusion. Christian Science teaches that God created the heavens and the earth and that it was so from the beginning, but the heavens and the earth of God's creating were Godlike, spiritual, "after his kind," pure, perfect, unchanging, and eternal as God Himself. The gentleman makes the word "matter" synonymous with the term "heavens and earth," but this use of the term is not justified in view of the context describing man as made in God's "own image." The image of God is not matter, since God is Spirit. Christian Scientists agree that God created "the heavens and the earth," but they would disagree with our critic as to the nature of the heavens and earth which God created, and this disagreement of their view with his has immediately to do with their ability to heal the sick.

To say that the teaching "there is no matter" is equivalent to the declaration that "there is no universe, no mathematics, no science," as affirmed by our critic, is equivalent to saying there is nothing outside of matter, nothing to know outside of the material, and that matter is the basis of all science. That there is something to know about God and His "express image" is indicated by the Master's statement, "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." Our Lord plainly declares that the instability of mortal existence is to be done away and substantial being established by gaining a true knowledge in contradistinction to a false belief about God and His Christ. If we are to be better than we now are, and thus attain to spiritual manhood, there is something to know about such manhood. This something is none the less true because it consists of spiritual understanding in contradistinction to material belief, and it is justly entitled to the name "Science," the demonstrable knowledge of spiritual truth. There is no authority for restricting the use of the term science to material things. Christian Science is the Science of the Christ-teaching; hence the propriety of the name.

It is not God's creation—not the real universe—which Christian Science repudiates, but the false material concept thereof. Christian Science teaches that everything in creation, from the least to the greatest, is real, but that it is not what it seems to be to the uneducated human mind, to that quality of understanding which interprets all things materially and does not consider them from the spiritual or God view-point. Paul said, "For if that which is done away was glorious, much more that which remaineth is glorious."

Christian Science teaches that mortals in their present immature condition have a more or less imperfect view of God's creation and of His man, the true selfhood; that their concept will continue to improve as they advance spiritually, and that when they finally arrive at the full stature of manhood in Christ, when they shall have attained to perfection, they will see all things as they are and as God made them, in all their beauty, perfection, and spirituality. Christian Scientists, therefore, believe that the end of the world which is spoken of in the Scriptures

Digitized by Google

does not mean an end to God's creation, but an end to the imperfections which human sense has attached thereto, and which will, as described by Isaiah, eventually be "rolled together as a scroll" with the dawn of spiritual understanding.

"What," it may be asked, "do you mean to tell me that God did not make this wonderful man? That He did not make the sparrow and the lilies of the field, which appear in such wondrous beauty?" We answer, "Yes, God made them all; and if the veil of material sense and the imperfections of human perception were but lifted so that we might behold them as they really are, they would be as much more beautiful and wonderful to us than they now are, as infinite wisdom is greater than our present limited apprehension of Truth. St. Paul said: "God hath chosen . . . things which are not, to bring to nought things that are: that no flesh should glory in his presence," meaning that the things of God "which are not" to human sense, when made manifest reduce to nothing the things "which are," to human perception, in order that it may be seen that matter or material sense has no deific standing; in other words, it is error.

Our clerical critic makes a serious charge against Christian Science because of its insistence upon the "unreality of sin, sickness, and suffering," and he quotes Scripture at great length to prove that these things must be regarded as realities because they are so often mentioned therein; and yet in all his quotations he does not mention one wherein it is stated pointedly that sickness is real or that sin is real. In God's Word we are warned against sin and we are told to heal sickness, but there is not a single statement in all the Scriptures where a pointed declaration is made that these are realities. On the contrary, there is Scripture to warrant the definition of Christian Science. For example, we are taught that "God saw every thing that he had made, and, behold, it was very good." Sickness and sin being no part of the "very good" things which God created, certainly cannot be classed as "of God;" and inasmuch as God is the only cause and creator, it is impossible to conceive that evil and disease have any other than a mythical existence. Christian Science, therefore, consistently denies that they are real or substantial. Science does not deny that these exist, however, in erring human thought and experience, in what Solomon called the "error" of life. It does not ignore these things. On the contrary, it insists that they must be grappled with and overcome by divine power.

[E. M. Ramsay in *Kilmacolm* (Scot.) *Advertiser.*]

While Christian Science is very far from being a mere method of healing the sick, there is no doubt that it is this aspect of its work which especially interests the public at this time, and which brings so many inquirers to its services and testimony meetings.

In the New Testament we find it stated that "God is Love" (1 John ii.), "Truth" (1 John iii.), and "Life" (John v.). Most men will admit that Truth is permanent; that it is above the changes and chances of mortal existence; that it is not dependent on man nor resident in man's body, but is grasped by him in consciousness. Man perceives Truth, and reflects it to the extent that he perceives it. Christian Science shows us that as there is but one kind of Truth, so there is but one kind of Love, and but one kind of Life. It points out that as Truth is outside man, so Love and Life are outside him; that as he possesses Truth by understanding it and reflecting it, so he possesses Life by understanding it to be God, and by reflecting it. Thus it will be seen that if Life is God, health is the knowledge of this fact. Health is primarily a condition of mind and only secondarily of the body.

As man turns in thought to God and earnestly strives to put behind him all that is unlike Life, Truth, and Love; as he refuses to admit to himself that evil possesses attraction or power, a sense of purity, peace, and joy, unlike anything he has hitherto felt, enters his consciousness, and the new birth begins. Bodily healing is one of the effects of this process of purification. Some people are healed merely through reading Science and Health, the true statements therein contained correcting the false beliefs they have hitherto held. Others require the assistance of a fellow-student; they cannot make out the way from the map alone; they require a guide. In either case the healing is the work of the Holy Spirit, the Comforter. No person heals; there is no healing power in personality. Mrs. Eddy says, "Humility is the stepping-stone to a higher recognition of Deity" (Miscellaneous Writings, p. 1).

[Frederick Dixon in *Richmond* (Eng.) *Herald.*]

In the notice of Dr. Foat's lecture, contained in your issue of the 2nd inst., the speaker is reported as saying that he could not agree to my contention "that the Bible writers did not mean anything supernatural when they spoke of miracles;" and he went on to maintain that "to them the phenomena in question were inexplicable, except as direct interventions of the Deity." May I, with your permission, examine this statement a little more fully.

The original documents of the New Testament were written, in all probability, some in Aramaic, and some in Greek. As Christianity spread, those which had been composed in Aramaic were translated into Greek, and in this way the Greek text of the New Testament came into being. Now there are in this text two Greek words translated miracle. The first of these is *dunamis*, which means an act of power; the second is *semeion*, which means a sign. Neither of these words has, or ever has had, any supernatural significance. It is, therefore, surely straining the text to suppose that the writers of the New Testament did not understand the meaning of the words they were using. They wrote, as all scholars today admit, in the bastard Greek known as *Koine*, which was the colloquial language of the peoples inhabiting the Mediterranean basin. This language was not literary Greek, which, if it occurs anywhere in the Bible, occurs only in the epistle to the Hebrews; nor was it Biblical Greek, which it is now admitted is a non-existent quantity. It was simply the Greek dialect spoken commonly in the local idioms of what was then the civilized western world. That is to say, in Jerusalem it would be spoken with the Hebrew idiom, and in Rome with the idiom of the Latins. It was, in fact, merely the commercial language of the day in which the Mediterranean peoples found it most possible to understand each other, just as in later days Latin became the language of the church, and so of diplomacy, until it was superseded by French, which to the present day remains the language of the diplomatic world.

To suppose, therefore, that the writers of the New Testament were ignorant of the medium they were using, or that when they used the words *semeion* or *dunamis* there was any mistake in their minds as to what they intended, is frankly incredible. The word miracle is derived from the Latin word *miraculum*, which was a common scientific term among the pagan philosophic speculators. Like the Greek words, it had no supernatural significance, and it was only introduced into the Bible when Jerome made the translation known as the Vulgate. There is, therefore, no reason to suppose for one moment that a single writer of the New Testament was unaware of the significance of the terms he used.

So long as healing remained a normal part of Christianity, the Christian churches do not seem to have attached any supernatural meaning to these words. They seem to have regarded them exactly in the sense in which Mrs. Eddy makes use of them when, on page 591 of Science and

Digitized by Google

Health, she speaks of the miracle as "divinely natural." Gradually, however, as the spiritual power of primitive Christianity was lost in the materiality of succeeding centuries, humanity began to regard the sporadic cases of healing which followed the prayers of men at long intervals, not as a result of an understanding of spiritual law, but as the result of an interposition of the Deity. By the nineteenth century this had come to be regarded as so natural that a thinker of the eminence of Hume was betrayed into defining a miracle as a violation of natural law by an interposition of the Deity. The futility of such a definition was remorselessly exposed by Huxley. A law, he explained, which had been violated, ceased, *ipso facto*, to be a law. If, then, a lump of lead appeared to be suspended in the air without visible support, this was a proof, not of a violation of law, but of the operation of some hitherto unsuspected law. It would, therefore, be wiser rather to investigate the cause of the phenomenon than to be satisfied with describing it as something outside the range of practical demonstration. Now, that the population of the eastern villages and countrysides may have regarded the miracles of the Bible as something supernatural, is perfectly possible. That, however, is altogether another thing from Jesus' own disciples, who had been taught by him, being under any misapprehension as to the spiritual law under which they were working. It is also a very different thing from supposing that the writers of the original documents of the New Testament were as ignorant of spiritual causation as were the inhabitants of Judæa, of Lydia, or of Mysia.

Jesus, certainly, from one end of his ministry to the other, never made any such claim. He came preaching to the world absolute truth (*te alethcia*), as clearly separated, in the Greek text of the fourth Gospel, from any mere relative human sense of truth (*alethcia*). This knowledge of absolute truth is further defined in the epistles in a phrase, "*epignosis tou theou*," translated knowledge of God, but which should, of course, be translated full, exact knowledge of God, and so of Truth. Such exact knowledge is necessarily scientific, and being scientific is demonstrable. Thus Jesus invariably declared, without reference to persons, time, or place, that those who believed in him,—understood his teaching—would be able to do his works,—demonstrate the truth of that teaching. The intellectual classes, the scribes and Pharisees, equally with the uncultivated classes, "the common people," recoiling from the spirituality of the revelation they could not understand, described the miracle or demonstration the one as magical, the other as supernatural. Those, on the other hand, who understood the teaching, whether mere fishermen, like Peter and John, Pharisees like Paul, or physicians like Luke, accepted the miracle as precisely what Jesus represented it, the *semeion*, or proof, that the knowledge of the truth which he taught was practical, and so demonstrable.

The error of the Jewish hierarchy and masses is being repeated today. Science, says the critic of Christian Science, with unblushing reliance on the most unscientific *post hoc, propter hoc* argument ever invented, is confined to the elucidation of secondary causes or physical facts, while primary causes are in the realm of the unknowable. Of course, if we decide that nothing can be known of primary causes, we are never likely to know anything, any more than, if we decide that the apparently unsupported suspension of a lump of lead in the air is a violation of law, we are ever likely to understand the law that makes it possible. Curiously enough, the man who crushed Hume's definition of a miracle has told us in a dozen words what science is: "The answer a man makes to the question, 'What do I know?'" The miracles of Jesus were the answers he made to the demand of the world as to what he knew of truth. The healing of Christian Science is the answer it makes, in its humble way, to the same question. "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do."

THE LECTURES.

LECTURE IN THE MOTHER CHURCH.

Bicknell Young, C.S.B., of London, England, a member of the Christian Science board of lectureship, delivered the semiannual lecture on Christian Science, under the auspices of The Mother Church, The First Church of Christ, Scientist, Boston, Mass., before an audience of about five thousand people, in the church edifice at Falmouth, Norway, and St. Paul streets, Monday evening [May 9]. His subject was "Christian Science: The Power of Good over Evil." The speaker was introduced by Judge Clifford P. Smith, First Reader of The Mother Church, who said,—

These lectures are given chiefly for the benefit of those who are just becoming interested in the religion represented by this church. To them I would say only a word. Christian Science is a subject of which no man can afford to be ignorant. You may have heard of this Science, either from those who disputed it or from those who favored it, without obtaining much actual information. The lecturer who will be heard here tonight stands upon this vantage-ground: he has devoted an adequate time to the study and practice of this Science; his work as a practitioner and teacher has been followed by satisfactory results in the lives of others; he has put this Science to good use in his own life, and he speaks as one having a scientific and practical understanding of his subject. For these reasons I value the privilege of introducing Bicknell Young, formerly of Chicago, but now of London, who will address you.—*The Christian Science Monitor.*

BROOKLYN, N. Y.

Prof. Hermann S. Hering lectured on Christian Science before an appreciative audience which filled the Brooklyn Academy of Music on Sunday afternoon April 10. Harvey M. Ferris, First Reader of First Church of Christ, Scientist, of Brooklyn, under whose auspices the lecture was given, introduced the speaker, and among other things said,—

Many years ago there was a man whose works not only astonished those who lived in his own age and country, but records of what he accomplished have been preserved throughout the centuries, gathering momentum with each advancing year, until today thought is actively striving to understand the power which enabled Christ Jesus to do his wonderful works—works which were entirely beyond the comprehension of the physical senses, but which he imparted to his disciples, so that they also were enabled to heal the sick, reform the sinner, and raise the dead. Moreover, he declared that these works should be the proof throughout all ages that his teaching was understood.

Through higher education and enlightened reason, we of this age have learned that the evidence of the physical senses is not sufficient to satisfy the questionings of the mind. The declaration of Jesus that all who believed on him (that is, understood him) should do the works that he did, and that this knowledge would be the great Comforter that would lead them into all truth, remains a fixed star throughout all time. Over the dark ages of materiality which engulfed mankind a few hundred years later, the words of that promise rang out, and eagerly have spiritually-minded men and women scanned the heavens of spiritual teaching for a clearer glimpse of this Comforter. It finally remained for one, through years of consecrated research, coupled with a spiritual perception most keen, to discover this Comforter. As Christian Scientists we have invited you here that you may learn of this discovery and receive the benefits which it extends to all.

CAMBRIDGE, MASS.

The Rev. Arthur R. Vosburgh of Rochester N. Y., delivered his lecture on "The Idealism of Jesus," on Sunday afternoon [March 20], before a deeply interested audience which filled Scenic Temple. In introducing the lecturer, the Rev. William P. McKenzie said,—

It is now almost twelve years since the board of lectureship was established by the Leader of this movement, and in that time every part of the world has heard the message of the lecturers. In the length and breadth of this country, in Canada and Mexico, in Europe and Africa, in parts of Asia and in the island continent of Australia, the lecturers have been called by Christian Science societies and churches to proclaim the truth whose benefits those who called them to speak in public to their friends and neighbors had already proved so satisfactory that they wished all others to share in the advantage of knowing it also.

The lecturers have not engaged in controversy or criticism, since the opportunity to speak regarding Christian Science is too precious to be wasted in discussion of what others may have said in ignorance. No living man of common honesty will ever disapprove of Christian Science, if once he comes to know, practically, what it is. The business, then, of the lecturer is to show what this movement is working out, what the discovery of its Leader, Mrs. Eddy, may mean in blessing mankind. In fact, the motto given for *The Christian Science Monitor*, our daily paper, is significantly descriptive of the intention of all Christian Scientists, "To injure no man, but to bless all mankind." Given by our Leader, this motto expresses her own motive also; and the lecturer who will speak to you has gained an understanding of the high purpose and consecration which make her a benefactor to the whole world, and so is competent to tell you about the Christian Science movement.

Cambridge Tribune.

PARIS, TEX.

Before a large and appreciative audience at the Peterson Theater, Sunday afternoon, March 20, Miss Mary Brookins delivered a lecture on Christian Science. She was introduced by W. B. Conner, a prominent business man, who said in part,—

Those who believe in Christian Science and who are trying to live according to its teachings, believe it is in reality God's word and necessarily the truth. The Founder of Christian Science, Mrs. Eddy, knew and all her followers know that such a statement as this without proofs and signs following is as dead as faith without works. They also know that the rule, "By their fruits ye shall know them," would be and in fact should be invoked, and that by this just rule they must stand or they must fall. The question naturally presents itself, Has Christian Science stood this test, and if so what of its fruits? As time is counted, only a few years have passed since its discovery, and yet I venture the statement that there is not within the range of my voice a man or a woman, yes, hardly a child, who has not either come directly under the healing influence of Christian Science and thereby tasted of its good fruits, or at least heard of or seen some of its healings. There are many here who can testify to lives made brighter, happier, more useful; to relief from sickness and pain and to release from the terrible bondage of fear and appetite. From every city, town, village, and hamlet in this broad land of ours, and from distant lands across the seas, comes the testimony of those who have in like manner been blessed. Men hear these expressions of thankfulness, they see these lives renewed and regenerated, they see about them increasing evidence of practical Christianity, more of charity and more of brotherly love, because of Christian Science. Their attention is challenged by the practical results presented, and the question is inevitable —Whence comes it all?

I say to you, my friends, this is the fruit. This is the Christ-spirit made manifest in the lives of these men and women as they have found it taught in Christian Science, and it is about this wonderful Science, discovered by a woman, that a woman will speak to you this afternoon.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

St. Louis, Mo. (Fourth Church).—Bicknell Young, Church Edifice, Page Boulevard near Montclair Place, 3 p.m., May 15.
Pasadena, Cal.—Bicknell Young, Church Edifice, Sunday School Rooms, May 19 and 20.
McKenzie, Tenn.—Francis J. Fluno, M.D., Castle Hall, May 20.
Neodesha, Kan.—Hon. Clarence A. Buskirk, Blakeslee Opera House, 2:30 p.m., May 22.
Memphis, Tenn.—Francis J. Fluno, M.D., Lyceum Theater, 3 p.m., May 22.
Williamsport, Pa.—Judge Septimus J. Hanna, Y. M. C. A. Hall, 3 p.m., May 22.
Des Moines, Ia.—Francis J. Fluno, M.D., Church Edifice, 927 W. 8th street, May 24.
Exeter, N. H.—Miss Mary Brookins, Town Hall Building, May 26.
Anamosa, Ia.—Francis J. Fluno, M.D., Opera House, 8:15 p.m., May 26.
Oshkosh, Wis.—Prof. Hermann S. Hering, Grand Opera House, May 26.
Quincy, Ill.—Frank H. Leonard, Empire Theater, May 26.
Hampton, Ia.—Francis J. Fluno, M.D., Olympic Opera House, May 27.
Manitowoc, Wis.—Prof. Hermann S. Hering, The New Opera House, May 27.
London, Ont.—Bliss Knapp, Church Edifice, corner Richmond street, Princess and Park avenues, May 27.
Chicago, Ill. (Ninth Church).—Hon. Clarence A. Buskirk, Woodlawn Masonic Temple, 64th street and Lexington avenue, May 26, 27, and 28.
Newark, N. Y.—Clarence C. Eaton, Sherman Opera House, 3:30 p.m., May 29.
Syracuse, N. Y.—Judge William G. Ewing, Wieting Opera House, May 29.
Saginaw, Mich.—Francis J. Fluno, M.D., Masonic Temple, 3 p.m., May 29.
White Plains, N. Y.—Judge Septimus J. Hanna, Newell Theater, 3 p.m., May 29.
Ashtabula, O.—Prof. Hermann S. Hering, Lyceum Theater, 3 p.m., May 29.
Marion, O.—Bliss Knapp, Opera House, 3 p.m., May 29.
Cleveland, O. (First Church).—Frank H. Leonard, Opera House, 3 and 8 p.m., May 29.
North Adams, Mass.—Rev. Arthur R. Vosburgh, Richmond Theater, 3:30 p.m., May 29.
Alpena, Mich.—Francis J. Fluno, M.D., Temple Theater, May 31.
Pittsburg, Pa. (First Church).—Bliss Knapp, Carnegie Music Hall, May 31.
Lorain, O.—Frank H. Leonard, Majestic Theater, May 31.

In all the affairs of this life my fidelity [to the king] shall be unshaken; for, in these, loss or gain has nothing to do with salvation. But it is contrary to the will of God that man should be subject to man in that which pertains to eternal life. Subjection in spirituals is a real worship, and should be rendered only to the creator.

MARTIN LUTHER to the German Emperor.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

THE CALLING OF READERS.

SOME of our friends have asked us to sound a note of warning in regard to the tendency upon the part of branch churches to "call" Readers from other fields, in preference to electing from their own membership to these important offices. With this request we gladly comply by republishing an editorial which appeared in the *Sentinel* several years ago, experience having but confirmed the convictions therein expressed. It was as follows:—

"We are informed that some of the smaller churches, when electing new Readers, have been impressed with a lack of available material within their own ranks, and have felt compelled to draw upon other fields, a condition that should not exist after three years of active public work. The principal lesson to be drawn from this seeming lack of material is that there is need of more specific as well as more general preparation for every branch of Christian Science work. While the healing of the sick is the most important and convincing evidence of the truth of Christian Science, there is other work which must be performed by those who have the welfare of our Cause at heart.

"Christian Scientists, in these early days of denominational growth and expansion, should realize that the call, 'Follow me, and I will make you fishers of men,' may come to them at any moment, and they should be prepared for it. No matter how small in membership a church may be, nor how limited the experience of its members in public affairs, it should have within itself material for all its needs. For the same reason that Christian Scientists should be ever ready to heal the sick, they should be ever ready to preach the gospel. Neither can be properly done without earnest preparation and diligent study. Those without training for public work of this character, should know that it is never too late to acquire the necessary preparation.

"Another phase of the question, which must be carefully considered, is the danger of creating within our ranks a certain class who would, in time, come to be looked upon as professional Readers. It does not seem that the establishment of such a class could be conducive to the growth of those comprising it, nor to the growth of the individuals who would be relieved thereby of the necessity of qualifying themselves for this work within their own field."

In the Manual of The Mother Church, Article III., the duties of Readers are very simply and clearly defined, and no one who feels himself equal to the first duty in Christian Science, namely, "to obey God, to have one Mind, and to love another as yourself" (Science and Health, p. 496), need hesitate to undertake official responsibility. While we are on this subject it may not be out of place to say to those modest individuals who continually shrink from responsibility, and thus leave those who are less timid, but no more competent, to fill the offices in the branch churches, that extreme modesty in this line is no more of a virtue than is extreme assertiveness.

ARCHIBALD MCLELLAN.

SELFHOOD, THE CONTENT OF CONSCIOUSNESS.

NEXT to "What is truth?" the leading question in human thought is, "What am I? what is the nature of selfhood, and how shall I define it?" and Christian Science is pouring such a flood of light upon both these subjects that the world's thinking respecting them is rapidly being revolutionized.

The speaking subject "I" or "we" is and must ever be identified with consciousness. Its character is determined by the kind and quality of thought entertained and expressed; hence the nature of this speaking ego is reached by the analysis of consciousness. When we remember the Scripture assertion that man was made in the divine image and likeness, and understand in Christian Science that *this* creation pertains to the eternal now, that it signifies the continuous activity or going forth of the divine nature, we can but perceive that the true ego or Christ-consciousness, the "child of God," is wholly constituted of the reflections of divine Mind, in which there can be no falsity or contradiction whatever. Thus "man and his Maker are correlated in divine Science, and real consciousness is cognizant only of the things of God" (Science and Health, p. 276).

On the other hand, many must have a keen sense of how relatively little of their present consciousness would be left if every thought which is not wholly conformed to the truth of being were removed. This sense of the vagrancy and unideality of every-day thought sometimes begets discouragement and morbidity, and escape from the attendant depression is to be found only as we enter into that conscious freedom in Christ which speaks for spiritual quickening, which is patiently progressive, and which is correspondingly able to voice the healing word.

Into this Christ-consciousness St. John had surely entered when he said, "Now are we the sons of God." He was then speaking, as did Christ Jesus not infrequently, for the true spiritual selfhood and not for mortal sense. This is made apparent by his concluding words, "And it doth not yet appear what we shall be, but we know that, when he shall appear, we shall be like him; for we shall see him as he is." If the apostle had meant to affirm the present perfection of the "we" of mortal consciousness, he would not have spoken of our *becoming* like God, since this would involve a self-contradiction. He must have meant that the true individuality "is now and ever shall be" God's child, and that the realization of this truth constitutes the awakening to man's Godlikeness, which he affirmed to be an immanent and assured experience of the spiritually-aspiring.

Mrs. Eddy thus defines the personal pronoun "you:" "As applied to corporeality, a mortal; finity" (Science and Health, p. 599). She also declares that "man is the reflection of Soul. He is the direct opposite of material sensation, and there is but one Ego" (*Ibid.*, p. 249). While recognizing the mortal claim of personality for what it is, we can rejoice in that hungering and thirsting after righteousness, that responsiveness to the ideal, that dawning of the "conscious, constant capacity to understand God" (*Ibid.*, p. 209) which proves that the human is being transformed by the "renewing" of the mind; that we are making advance to the realization of "the measure of the stature of the fulness of Christ,"—in a word, that we are entering into the fulfilment of the promise, "Ye shall know the truth;" a spiritual knowing which will surely become more definite and authoritative with our every demonstration over sin and sickness.

When consciousness has parted with every false belief, and become the perfect reflection of that Mind "which was also in Christ Jesus," the human sense "I" will have become "transformed" into the consciousness which is God's man, and we shall have entered into the fulness of the inheritance of sonship.

JOHN B. WILLIS.

THE THRONE THAT ENDURES.

As we share the sorrow of our brothers across the sea, for the passing of their king, we can but think of what loyalty to the throne means to all British subjects wherever they may sojourn. To them the sovereign represents the permanence of right government, and however imperfectly this may be understood or realized under present human conditions, it yet points to that high ideal which is coming nearer to its fulfilment with each succeeding birth-throe of humanity. It of course goes without saying that this ideal is not dependent upon earthly monarchy for its expression, but is to be found wherever the sovereignty of right is honored among men. Of old the psalmist said, "Justice and judgment are the habitation [or foundation] of thy throne;" and again he said of the ideal king, that his throne should be "as the days of heaven,"—that it should endure "throughout all generations."

The throne which is never shaken is the government of divine Mind,—"the reign and rule of universal harmony" (Science and Health, p. 208),—and human governments at their best are but an echo, a reflection, of the real and eternal. It is, however, cause for rejoicing that God has never left Himself without witness among the nations of the earth, and the right of all men to the protection of just laws is now admitted to be the true reason for the existence of any government. Early in her reign Queen Victoria announced to the world her conviction that the secret of England's greatness was the Bible, and her long and prosperous rule proved the truth of its teaching that "wisdom and knowledge shall be the stability of thy times." It has been the recognition by the English rulers of the divine rights of the people which made their land a shelter for the oppressed of other nations, and made these rulers fearless in going unattended among their people—and beloved.

At this hour we may well recall Tennyson's words, in the dedication of his "Idylls of the King," concerning Prince Albert, Queen Victoria's husband,—

> Thou noble Father of her Kings to be,
> Laborious for her people and her poor—
> Voice in the rich dawn of an ampler day—
> Far-sighted summoner of War and Waste
> To fruitful strifes and rivalries of peace.

With this high aim before us, we can but pray that all this and more will come to ennoble the character of the present king and make glorious his reign. The love and reverence of a great and aspiring people is surely a rich guerdon for the ruler who lives to advance his subjects toward happiness and freedom. King George has certainly a rich heritage in the pure and noble characters of his grandmother, Queen Victoria, and his mother, Queen Alexandra, for the strength and stability of the nation are largely dependent upon its moral purity.

"By the grace of God," the English nation has gone far forward in King Edward's reign, and by every law this promises the more rapid advance of ideal conditions in that of his successor. Today all peoples have the privilege of reading the Bible, and through the divinely sent message of Christian Science its rich treasures are being opened up to meet all human need. The freedom which Christ Jesus offered delivers the oppressed from all bondage, including the bondage of sin and disease, and it brings in the universal reign of righteousness and peace. Well said Tennyson,—

> O Statesmen, guard us, guard the eye, the soul
> Of Europe, keep our noble England whole,
> And save the one true seed of freedom sown
> Betwixt a people and their ancient throne;
> That sober freedom out of which there springs
> Our loyal passion for our temperate kings;
> For, saving that, ye help to save mankind
> Till public wrong is crumbled into dust,
> And drill the raw world for the march of mind.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER

[From a little girl eight years old.]

Hutchinson, Kan.

Dear Mrs. Eddy:—I go to the Christian Science Sunday School, and I think it is lovely—the talking about Love, Truth, and Life. I have not been sick once since I have been in Christian Science. We are going to build a new church. I thought I would write you a few lines.

Your little Christian Science girl,

MARGARET WADDLES.

MRS. EDDY'S REPLY.

God bless my little Christian Science girl, as He does all good girls. Lovingly,

MARY BAKER EDDY.

Boston, Mass., May 3, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Teacher and Leader:—I wish to express my deep appreciation of the recent changes in the titles of two chapters in Science and Health, namely, the fourth chapter, which is now entitled "Christian Science *vs.* Spiritualism," and the fifth, "Animal Magnetism Unmasked." These changes are not only of importance to inquirers, in setting forth more clearly the topics discussed in the chapters named, but to older students they indicate the widening of the gulf between the real and the unreal, the false and the true.

With thanks and loving gratitude,

Your student,

ANNIE M. KNOTT.

Chelsea, S. W., England, April 27, 1910.

Dearest Leader:—It is impossible for me to say what joy your endorsement of my letter in the *Coventry Herald* has given me. This is only an attempt to thank you, and to say that I will try to prove my love for you, and my gratitude to you, for all you have taught me, by living so as to be able to do better work for the Cause, every day.

Your loving follower,

FREDERICK DIXON.

Chicago, Ill., April 29, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—We enclose a copy of a letter recently received by this church. We feel that you will be pleased to note the spirit of love and good will which animates the churches in Chicago and which is manifested in this letter. With a consciousness of unbounded obligation for your wise and loving leadership, and with deepest gratitude for the blessings of Christian Science which we, in common with all who accept your teachings, may share in proportion to our loyalty and obedience, we are, dearest Leader,

Yours most sincerely,

Board of Directors, Sixth Church of Christ, Scientist, Chicago,

DELIA HOWE, *Clerk.*

[Copy of letter received.]

Chicago, Ill., April 14, 1910.

Board of Directors, Sixth Church of Christ, Scientist, of Chicago.

Dear Friends:—At a special business meeting of the members of Seventh Church, held Wednesday, April 13, 1910, it was unanimously voted that the surplus in our building fund, amounting to seven hundred and nineteen dollars, be sent at once as a contribution to the building fund of Sixth Church, and we take great pleasure in enclosing a check for that amount. This is but a forerunner of what is still to come as progress is made in your

Digitized by Google

plans for building. Our love goes out to the members and congregation of Sixth Church for the Christian and loving spirit which they have manifested, not only to Seventh Church, but to the Cause at large.

Sincerely yours,
Board of Directors, Seventh Church of Christ, Scientist, Chicago,
P. P. CAHANA, *Clerk.*

Boston, Mass., April 21, 1910.

Dear Mrs. Eddy:—For almost three years I have made my offering daily, hourly, that you might have in your home one who loves you and whose joy it is to be one of your helpers. It has lightened my way through darkest hours to remember that you were being cared for, and that through this privilege one of God's dear ones was learning more of the divine order and consciousness. Now it comes like a benediction to me, as I feel it must to the happy group of Christian Scientists in your home, to know it from your own word in the "Pean of Praise," in to-night's *Monitor,* that "Mrs. Eddy is happier because of them" and is conscious that "God is glorified in His reflection of peace, love, joy"—right there. "Who shall dwell in thy holy hill? He that walketh uprightly, and worketh righteousness, and speaketh the truth in his heart."

I have reason to be grateful and to be comforted, and I thank you for this message. As far as I know my own heart, my desire is to awake from the dream of matter and come into "the privilege of knowing God, the liberty and glory of His presence." There are thousands upon thousands of names on the list of people whose subscriptions to our periodicals are my special care, and I often look at them as a whole and try to realize the greatness of the work that is going on. It means that every one of those people has been touched by Christian Science, and in some measure knows Truth and Life and Love. It may be slowly, but it certainly is true, that mankind is awakening to "their present ownership of all good and praise, and love the spot where God dwells most conspicuously in His reflection of love and leadership." We see this in the stream of messages that flows daily into the publishing house; we hear it in the earnest, convincing testimonies of every Wednesday night meeting; we are conscious of it in every demonstration of the divine power of Christian Science, which enables us to cast evil out of ourselves, to heal the sick and reform the sinner.

With much love,
EFFIE J. FLETCHER.

Kansas City, Mo., May 2, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Brookline, Mass.

Beloved Leader:—The teachers and officers in the Sunday School of Second Church of Christ, Scientist, Kansas City, Mo., send you loving greetings for your provision for the instruction of the Sabbath School children. We appreciate and are grateful for the privilege of being channels for the instruction of the lambs of the flock. Guided by divine Principle, the understanding of which we have been able to glean from our text-book, "Science and Health with Key to the Scriptures," and for which we are indebted to you as its author, we are sowing the seeds of truth in the thoughts of these little ones; as a result of which we are prone to exclaim with you (Pulpit and Press, p. 9): "Ah, children, you are the bulwarks of freedom, the cement of society, the hope of our race!"

Good progress has been made in this work, both in the increase in numbers and in spiritual development. We know it would gladden your heart, and you would rejoice with us, to hear the little ones sing your hymns, the privilege of which is granted to them at the opening of every session, and you would also be pleased to learn of the love, gratitude, reverence, and respect they have for you, for what you are doing for them and humanity. We appreciate the privilege of having even a small part in aiding you in the establishment of the kingdom of heaven on earth, "till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

Lovingly and faithfully your followers,
J. W. WILSON, *Superintendent.*

Frankfurt a/Main, Germany, April 15, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Revered Leader:—A new glimpse of the meaning of that wonderful statement in our text-book (p. 266), "Universal Love is the divine way in Christian Science," dawned upon us recently through our perception of the loving care and provision for the needs of its younger and less stable branches that led the Board of Directors of our Mother Church to send one of their strong helpers on a mission of helpfulness to these European fields. Through his wise, opportune, and practical suggestions, this dear Scientist has helped us greatly and strengthened the links that bind us to you and to our Science home in Boston.

In token of our gratitude for these blessings, we are sending to Mr. Chase for the enlargement of the publishing house, a check representing the sum that was to have been spent on a spring lecture, knowing that Love will refill our coffers in time for an autumn lecture. No wide distribution of *The Christian Science Monitor* seeming possible at present in this country, the Scientists here desire to show their recognition of the missionary value to the world of this messenger of purity and peace, by furthering its issue in Boston.

Yours in loving gratitude,
Christian Science Society, Frankfurt a/Main,
By the Committee.

[Cablegram.]

Dresden, Germany, May 2, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

The newly organized Christian Science Society of Dresden-Neustadt, at the inauguration of its church home, desires to send its beloved Leader assurance of heartfelt gratitude and unswerving loyalty, and devotion to her inspiring leadership.

New York, N. Y., May 3, 1910.

Beloved Leader:—Your "Pean of Praise" gave forth such a breath of heavenly inspiration that out of a full heart I must thank you for it. It seems like a song that we should repeat in chorus, till earth echoes the tones of truth and love. Appreciation of daily blessings received through your inspired writings cannot be expressed in words, but honest effort to follow in the footsteps of Christ, Truth, as revealed by you, may in time prove the heart's deep gratitude. Lovingly yours,
ETHELINDA DIETZ.

Monticello, Ark., April 24, 1910.

Mrs. Mary Baker Eddy.

Dear Leader:—Today we held the first service in our beautiful little church, which is the first Christian Science church built in our state. As we have a membership of less than fifty, and all are poor in the eyes of the world, we realize that this church is indeed a "structure of Truth and Love" (Science and Health, p. 583). In the midst of our rejoicing our hearts are turned in deepest gratitude to you, for the wonderful lessons you have taught us, for the blessed example you have set before us.

Christian Science Society of Monticello, Ark.
MRS. MILLIE S. DUKE.

AMONG THE CHURCHES.

SEVENOAKS, KENT, ENGLAND.

Christian Scientists first held services in the small town of Sevenoaks three years ago last September. Commencing in a private house, and then moving to more convenient quarters in the town, the Sunday services have been held without interruption. Last July it was decided to organize as a society; a few simple rules were made, officers and Readers elected, and application made for a notice in the *Journal*. A letter was sent to our Leader, informing her of the step we were taking, and a reply, a copy of which is herewith enclosed, received.

In November last we were able to invite the Rev. Arthur R. Vosburgh to give a lecture in the public hall here, when some five hundred persons were present. Since this event, our average attendance at the services has increased and we have fourteen children attending Sunday School. People are coming to the services from villages round about, and a large proportion of the members of the society are also members of The Mother Church. In view of our Leader's teaching in a late *Sentinel*, it might be interesting to your readers to know that, though still a small community, members have already received class instruction from four different teachers.

Correspondence.

Chestnut Hill, Mass., Aug. 11, 1909.

Dear Friends:—Your letter of recent date, addressed to Mrs. Eddy, is at hand and read with interest. On behalf of our Leader, permit me to express to you her loving appreciation of your words of loyalty and gratitude, and further to assure you of her pleasure in learning that you have established at Sevenoaks a new branch in the vineyard, whereon is to grow the fruit of healing and regeneration.

Sincerely yours,

WM. R. RATHVON, *Corresponding Secretary.*

JOHANNESBURG, SO. AFRICA.

On Sunday, March 6, there was opened the edifice of First Church of Christ, Scientist, of Johannesburg. The building is a welcome addition to the architecture of Johannesburg, and is the finest piece of kopje stonework we have seen. The church, which is convenient to the Twist street, Yeoville, Orange Grove, and Judith Paarl trams, is erected on four stands, with the main frontage to Smit street of one hundred feet, Banket street one hundred and fifty feet, and Wolmarans street fifty feet. The design is in the early Christian style (of about the fourth century), the style being that which is known as the basilican plan.

The main hall or nave is seventy feet in length, forty feet in width, and in height twenty feet to top of clear story walls, and thirty-six feet to apex of roof, with bold arches in well-selected kopje stone on either side, revealing aisles of four feet in width and twelve feet in height. There are two turret-like arched main entrances east and west, with porches floored with six-inch red tiles. The porch arrangements provide for double doors, very necessary when our squally weather is prevalent. The roof is boarded and covered with Marseilles tiles. Full advantage has been taken by the architects of the fall of the ground from Smit street to Wolmarans by the erection of a semibasement under the full width of the church, providing Sunday School, reading and retiring-rooms, the dimensions being forty-eight feet by twenty-seven feet with a height of nine and one half feet.

The church is estimated to hold five hundred people, the reading-room about one hundred. Both the church and reading-room are well lighted and ventilated—the former having windows in the aisles on either side, as also large windows in the main or clear story walls of the church over the aisles. The church is and must ever be a landmark in Johannesburg for all time, for the stonework is picturesque and very good. It is intended to enclose the grounds by means of a live hedge, and, further, lay out and plant a flower garden all around the building, for which purpose the latter has been set back on all sides from the streets some twenty-five to thirty feet, an innovation which we consider should be pleasing.

It is worthy of note that the land has been purchased and the building erected by the Christian Scientists, without the aid of concerts, balls, or bazaars, or any extraneous assistance of any kind whatever.

Transvaal Weekly Illustrated.

WINNIPEG, MAN.

Plans are now under preparation for the erection of a church for the congregation of First Church of Christ, Scientist, which will be one of the finest of the many beautiful and costly edifices of Winnipeg. The site was procured some time ago at the corner of River avenue and Nassau street, Fort Rouge, and the excavation work preparatory to the commencement of construction has been in progress there for several days.

The new church, which is to be built of pressed brick and stone, and of classical design, will have cost, when completed, about $75,000. It is thought that only the lower or Sunday School portion may be built this season, at an expenditure of $20,000, and used temporarily until the upper part of the auditorium is completed. This first part will afford a seating capacity for six hundred and fifty people. The future extension, for which provision is made in the plans, will have accommodations for an audience of eleven hundred.—*Free Press.*

EL PASO, TEX.

At sunrise this morning [April 1] the corner-stone was laid on the foundation of what will be the home of First Church of Christ, Scientist, of El Paso. Nearly the entire congregation, some forty-five in all, attended the ceremonies. Following the repetition of the Lord's Prayer, there were readings from the Bible and the Christian Science text-book. In the corner-stone was placed a Bible, a copy of the text-book written by Mrs. Eddy, and the signatures of all members of the church organization. The building will be located at Stanton and Montana streets.

El Paso Herald.

LOVING AND LIVING.

RUTH INGRAHAM.

As the window, clear and bright,
Letteth in the warmth and light,
Bringing gladness to the sight,

Make my thought, O Love divine,
Pure, that Thou through it may shine,
Making one of Thine and mine!

May no stain, or blot, or blight
One least ray deflect from right,
Dim the brightness of Thy light.

All the light which I receive
May I freely, gladly give;
Thus it is to love and live!

TESTIMONIES OF HEALING.

The first time that I appeared before an audience to introduce a lecturer on the subject of Christian Science, it was embarrassing to me to admit that I had lived so many years in ignorance of this great truth, and had made no effort to know about it until I was driven to it by disease and suffering. My experience rises plainly before me, and, since to my mind the greatest mortal error is ingratitude, I will not be unthankful, but will tell of my experience in Christian Science, as revealed to the world by that grand apostle of Truth, Mary Baker Eddy. One could hardly conceive of a man being in greater misery than I was about fifteen months ago. My suffering from rheumatism was so severe that many times I had to be helped to dress and undress, and often had to be helped to arise from my couch when I lay down to rest; in addition to this, the physicians told me that I had an acute nervous and stomach disorder; that my kidneys were affected, and I was on the verge of absolute despondency. Moreover, in accordance with the almost universal custom which once prevailed in this western country, that of drinking the social glass, I had when a mere boy acquired the belief that whisky was a panacea for all ills; so that in my hours of suffering it became to me a demon by day and a dragon by night, habit ever suggesting its use to alleviate pain, until it became a battle royal when I strove to resist it.

This was my condition when a Christian Scientist of my city found me. When she approached me with literature on the subject of Christian Science, I took this literature but did not read it. She called occasionally to inquire about me, and I would always deceive her about reading what she had left, to save her feelings, as I then thought. She finally told me that it was never intended by God that any one should be sick and suffer, and this opened a new thought to me, as I then believed that God had willed that I should be left alone and be sick, because of the many sins I had committed. I had faithfully and earnestly taken all the drugs which had been prescribed, and more in despair than hope I told this lady to point the way for my restoration and that I would follow on. I went with her to Canyon City, where I met a Christian Science practitioner at her home. I had read nothing about Christian Science, hence I did not know what was expected of me; but we all three sat there for what seemed to me an eternity, and I listened to talk which seemed altogther foolish to me, and began to blame myself for coming there. When I told the practitioner that my friend had said she could help me, the reply was, "I can only be an instrument in God's hands, but God can and will help you." She asked me a few seemingly unimportant questions, and dismissed me with the injunction to eat whatever I wished and all that I wanted, and to let her hear from me in three or four days. I then thought she would not hear from me, so full of despondency had I become, but I promised to do all that she asked me to, and I kept my word.

The next day, instead of creeping to my office, I felt like going in leaps and bounds, and my heart was full of praise to God for this wonderful truth. I had been in the very throes of suffering when I called on the practitioner, but that morning I do not think I ever felt better in my life; and ever since, with slight exceptions, which can easily be accounted for, I have been well and happy. I wish to say further, that while I was open to conviction, I had no confidence whatever that I would be healed, but I kept this to myself, out of respect for what I regarded as an unselfish interest in my behalf by some of my friends. Since having been healed in Science, the Bible has become the plainest book I have ever read, and I can catch the spirit of it and feel that the God who inspired its words loves me with an everlasting love; whereas before I was continually fretting myself with the thought that God was willing under certain conditions that I should eventually end in the meshes of his Satanic majesty, else why did He create the devil.

Now, since the light of divine Science has caused the scales to fall from my eyes, I can see plainly that God never was the author of any evil, but that all He makes is good; and this has put a new song in my mouth, even praises unto God, who has loved us from the foundation of the world, and has given us His Christ, to point out the way of life eternal and deliver us from sin, sickness, and death.—(JUDGE) J. L. PENRY, Amarillo, Tex.

In August, 1906, I had occasion to take a room in an apartment house in Petaluma, Cal., and on entering I noticed the sign: "Christian Science Services and Reading-Room." I thought that since I had leisure it was a good opportunity to investigate Christian Science, as I had wished to do for several years. It happened that my room was across the hall from the Christian Science room, and the day was Wednesday, so I went to a Christian Science meeting that evening for the first time. On being questioned, I replied that I was not a Scientist, but would like some literature, and after that I spent several afternoons in conversation with the librarian, who kindly explained things that were puzzling me. I did not do this for relief from sickness, although I had worn a brace for five years. When I had read for some time in the text-book, "Science and Health with Key to the Scriptures," one afternoon the brace suddenly seemed very uncomfortable, and although previously I could not be comfortable without it, I finally removed it. The next morning when dressing I took it as usual to put on, but felt a sudden unwillingness to do so, and laid it aside until I should feel the need of it. I have never worn it since, and am now strong and well, but it did not occur to me until several days afterward, when reading the testimonies in Science and Health, that I had been healed by reading this book.

Since then I have had many successful demonstrations, and besides the physical help I enjoy the larger, freer life upon which I have entered. All the aspects of life, past, present, and future, are so changed that I could no more take up the old way again than a liberated bird could reenter its cage.—MRS. E. H. PERCY, Ukiah, Cal.

In the fall of 1894, when I first came to know of Christian Science, I was in a very serious condition from an acute attack of lung trouble. I had been under the care of one of our best physicians for three months, but had received no benefit whatever, when a friend came to see me and loaned me a copy of "Science and Health with Key to the Scriptures." I read a few pages that day, and was so much better that I discharged the doctor the next day, and the following day I was able to get up and dress. I felt that I had been healed by reading this book, and at the same time the desire for intoxicating liquors left me entirely. I have not had any desire for stimulants from that day to this, for which I am very thankful; and it all came without a single treatment, just by reading Mrs. Eddy's book. Even before I had much understanding of what I was reading, I began to improve, gaining greatly in weight in the first three weeks.

Seven years ago I was taken with a very severe attack of an eruptive disease, which my friends prophesied I would have every year afterward, but by the understanding of the truth it was completely destroyed in nine days. I was only confined to the house because of appearances. About three years later I was attacked with a very severe pain and some alarming symptoms. My wife telephoned to a Christian Science practitioner, who came and gave me treatment, remaining about two hours. I went to bed and also to sleep, and I slept all night. The next morning I

Digitized by Google

passed gravel-stone twice, but without any pain, and that was the last of the trouble. I had only the one treatment for this disease, and I think the healing was truly a wonderful work. Later, the same faithful practitioner brought me out of a very severe attack of lung trouble. For all this betterment I am very thankful to God, and also to our dear Leader.

GEORGE T. EVANS, Salt Lake City, Utah.

At the time Christian Science found me I thought I had lost all that made life worth living. At one blow husband, love, home, and money were taken from me, and for three and a half years I wandered restlessly about the world, thinking I should never be happy again; longing for contentment and peace, but finding none until I heard of Christian Science, over a year ago. Since then I have been experiencing that "warfare with one's self" which Mrs. Eddy tells us is "grand" (Miscellaneous Writings, p. 118). Having had a garden full of weeds, there still is much work to be done; but I now know that perfect peace is to be had here and now, when the overcoming has been accomplished. I have also learned where to look for true happiness, and that it is only obtained by seeking our own in another's good.

Besides the spiritual and moral enlightenment I have received through the help of those dear friends who have led me to the light, there have also been some proofs of healing for which to be grateful. A very few weeks after I heard of Christian Science I was called upon to make my choice between the surgeon and God for the healing of my child of abnormal growths and enlarged glands. I felt that the opportunity was given me to test the healing power of Christian Science, and I am thankful to say I was impelled to try it, with the result that the child's health began to improve almost immediately, and a fortnight later she was healed of the growths, in proof of which I had a doctor's certificate. The throat was, however, still in a bad state, and I was on the eve of going to France for the summer holidays, though the doctor had said it would be very unwise to do so. I risked it, however, knowing the truth, and that condition also was shortly overcome. Since then I have been relieved of corns, and both myself and my little girl have been healed of measles. During our treatment for this, all the falsity of the evidence of disease was clearly seen, yet it vanished entirely, leaving no after effects whatever. The child was out for a long walk on the sixth day, looking perfectly well and healthy.

I was astonished to find, when in France, that Christian Science had penetrated even to the out-of-the-way little old town of Lisieux. A working man there was suffering supposedly from the effects of sunstroke and was out of his mind. His wife had been healed instantaneously some years before, of small-pox, and she begged to be put in touch again with the healing power, as she felt sure that her husband could also be helped. I wrote to England to a Christian Science practitioner, asking for help, which was promptly given, and in two weeks the man was healed and back at work again. This seemed to my small knowledge of Christian Science very wonderful, as neither I nor the practitioner had any communication with the people save through a Protestant clergyman whose parishioners they were, and in whose house I was staying, many miles away from Lisieux. Fear has also left me since I came into Christian Science. When I brought my child to England from the East, I was afraid of the English climate for her, and went from place to place, seeking air that would suit her. Now I know that God's child lives, and moves, and has her being in Him, and is surrounded by the atmosphere of Love and Truth; that she is not dependent upon, nor influenced by, material atmosphere, and this knowledge is a great source of comfort to me.

I am so grateful to Mrs. Eddy for having shown us how we may make our lives grand and noble instead of a failure; glad that she loved her brother man so truly that she had the courage to go through all she has for his sake.—MRS. EDITH F. HARRIS, Sevenoaks, England.

The passing away of an eminent New York surgeon from a disease which I am told began as mine did, impels me to express gratitude for my own healing in Christian Science. I suffered for years from a fistula in my neck that came from a cyst with which I am told I was born, and which had been removed. I told a friend who is a Christian Scientist that I was discouraged, as nothing had helped me to my knowledge in any way, and my suffering had continued so long that I had about given up hope of cure. I then learned how to be treated by Christian Science. In two or three days, after one treatment, the fistula was entirely healed up, and it has not since troubled me. This was in November, 1905.

Just previous to this experience my friend had cured me in one treatment, after a terrible siege of seven months with carbuncles. In a single night I was freed from the severe pain, and all scars on my face, from many deep cuts made by the doctor, were likewise removed. This was almost marvelous to me, as the doctor was about to perform a very serious operation behind my ear. A few years later I was troubled with boils and was again compelled to turn to Christian Science. Once more I was healed in one night. On each occasion, when treated, my illness seemed to be at its worst. I am thankful to Christian Science for the healing, and for my very excellent health ever since.

D. FULLER APPLETON, New York, N. Y.

Giving all glory to God, and with a consciousness filled with gratitude to our dear Leader, Mrs. Eddy, that through divine Love alone I was brought out of a mortal sense of suffering into a knowledge of Truth, I desire to make known my wonderful healing. After a severe attack of inflammation of the bladder, a serious chronic condition appeared in spite of the best medical attention. I suffered constantly for five years, all of which time I had the best that could be done for me by eminent surgeons, but my husband was told I could never be cured. My sight had become so impaired that I could not read or write, and I drifted into melancholy, which resulted in nervous depression. I had reached a point of utter hopelessness when divine Love brought me in all humility to the loving ministry of Christian Science. I had taken but six treatments when my load of mortal bondage was completely removed.

It is now over three years, and I have never suffered any sense of pain since. Every vestige of my distress was removed as completely as one erases from a slate the outlines made upon it. I have never had the return of a symptom! I have also had many beautiful demonstrations of the power of Truth, through my own understanding. At one time I had a fall which resulted in an injury to two ribs, but I was able to continue my housework within five minutes from the time of my fall. Three weeks after this time no one could have told that anything of the kind had ever happened. My husband's testimony of healing was published in the *Sentinel* of Feb. 1, 1908.

MRS. JAMES H. THAW, Grand Rapids, Mich.

It is with love and gratitude that I give my testimony, hoping some other seeker for Truth may be benefited by it. As I look over the past two years and realize all the good that Christian Science has brought to me and mine, I feel I cannot be grateful enough to God, and to Mrs. Eddy, and that each thought should be one of love and thanksgiving.

When Christian Science found me, I was about as far

Digitized by Google

from God as mortals ever get. Physical suffering and other discord—mostly a cross disposition—were the manifestations of wrong thinking and false education. Medicine had seemed to relieve some of my physical ailments; but the unrest, the uncertainty, and my fear of disease, were hell indeed. During my last illness, I fully decided to investigate Christian Science at the first opportunity. A friend of long acquaintance came here on a visit, who had, I knew, been greatly benefited through Christian Science, both physically and mentally; so I called on her, telling her my desire to know something about it. I had many erroneous questions for her, to which she replied, "You will find it all explained in this book" (meaning "Science and Health with Key to the Scriptures"). I began to read the book, and had read only a few pages when my whole being was uplifted in praise to God. I ceased the use of all material remedies, although both of my children had a severe cough at the time. I clung to this teaching, and in three weeks was able to help myself when I had a burn on one hand. The cough soon passed into its native nothingness, and since then fevers, colds, measles, etc., have been overcome through Christian Science.

Even with my slight understanding of Truth, I have been able to meet many of these ailments without the aid of a practitioner. A very severe case of eye trouble with my little girl was relieved in one absent treatment by a practitioner who has lovingly assisted me in my efforts to advance, and I begin to realize that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). Not only for physical benefits am I grateful, but for the spiritual uplifting that has come to my consciousness and the manifestations of it in my home life,—for the knowing that God is my source of supply, and for the spiritual blessings that have come to my husband.—Mrs. Carrie M. Henry, Monroe, La.

The reading of the testimonies in the *Sentinel* and *Journal*, has wonderfully helped me, so I feel that one is due from me, giving my experience in Christian Science. Here I would pause to pay my homage to our beloved Leader, Mrs. Eddy, who has so patiently and lovingly led us forth out of darkness and despair into the glorious light of Truth. Love alone can repay her.

About eighteen years ago a young man with some knowledge of Christian Science came into these mountains —a somewhat remote part of California—to seek work. One day he handed a tract on Christian Science to a schoolteacher, who in turn passed it along to my brother, with a request that he read it to see what he thought of it. It seemed at first to arouse only a sense of ridicule, but later on a discussion on the merits of this faith took place with a lady who had come here with her husband, a mining man, and my brother became interested enough to send for other literature. Soon this little favor had blossomed forth into a beautiful faith, to knowledge; and in due time the literature was passed along as good tidings to others. How thankful I am that it came my way. Having but recently joined a church, I was hardly ready to investigate further; but the seed had been sown, and I too became a student of "Science and Health with Key to the Scriptures."

For a number of years previous to this time I had been troubled much with a stomach and bowel disorder, presumably inherited. I had consulted and been treated by four different doctors, but experienced no benefit until I became interested in this truth, when relief came immediately, and since that time a sense of relapse has been overcome. I have both seen and experienced many proofs of the efficacy of this teaching,—headache, toothache, colds, and rheumatism have been routed, each in its turn. The spiritual uplifting and relief from mental depression are but other reasons for the hope that is in me. I realize that my work is far from done. I can see much more to accomplish, but the work grows sweeter and more interesting with every accomplishment.—Ellis B. Clark, Bangor, Cal.

I am deeply grateful for this opportunity to tell every one who reads this testimony, how through Christian Science I have been lifted almost from the grave. I am now thirty-five years of age, and for fifteen years I was entirely controlled by the desire for strong drink. I tried various medicines that were guaranteed to cure drunkenness. I tried everything I could think of or any one could tell me, but to no avail. My friends told me I should use will-power, and I did the best I knew how; until I began to think God was unjust, knowing how hard I was trying to get out from under the control of liquor, and that He would not help me. I was about to leave my home and wife, because I did not want to disgrace them any longer,—preferring death, as I thought there was no hope for me,—when a lady advised me to try Christian Science treatment.

I had no faith in anything, but as a last resort, when all hope was gone, and hardly caring what happened, I went to a practitioner. I was a little under the influence of liquor at the time, but after the third or fourth treatment I was absolutely healed of the appetite for strong drink. I have been in perfect health ever since and am one of the happiest men in the world. I had been a church-member since I was a little child, but through the habit of drink had dropped out of it. My wife used to do everything possible to interest me in good and beautiful things, especially flowers, but I could see no beauty in them. Since I have come into Science I love flowers,—have my home filled with them,—and it seems as if I could hardly get enough of them.

I am very grateful to Mrs. Eddy for giving us "Science and Health with Key to the Scriptures," and grateful to God for the understanding which has made my life new and which enables me to send out only thoughts that will help to uplift others.—Jesse Martin, Lexington, Ky.

I was treated in Christian Science when my fourth baby was born, and the power of divine Truth, and of God's law, was a revelation to me. Words are inadequate to express my gratitude for the Science, and the self-sacrifice which made this demonstration possible and led me out of the darkness and chaos of mortal mind into the true understanding of the Scriptures. In Christian Science I have found the God I had sought for so many years. Our baby is at this writing a perfect expression of health and harmony. She has never had any medicine, and has never been ill a day. When error has appeared we have always succeeded in demonstrating the truth for her.

I thank Mrs. Eddy for "Science and Health with Key to the Scriptures," in which she has so interpreted the Bible that we may understand the word of God, and I hope so to live that I may reflect at least some ray of the love she has revealed to us in her years of faithful labor. In our family of five we have had many proofs through Science of God's loving care for His children.

Mrs. Amanda Whilt, Eureka, Mont.

With a heart full of gratitude I desire to give a testimony of my healing in Christian Science, hoping that it may prove helpful to others. In September, 1900, I turned to Christian Science for help, as I had been suffering severely all summer with rheumatism. I had tried material remedies, but got worse instead of better, the pain being so intense as to be almost unbearable. The doctor told me there was nothing that would do me any good, as the disease had become chronic. He said that an opera-

Digitized by Google

tion might relieve the pain, but that it would leave me a cripple, a statement which to me was very discouraging.

At that time I had never met a Christian Scientist and knew nothing of the teaching, but as I had a neighbor who had been healed, and who advised me to try Christian Science, I decided to do so. I went to see a practitioner, and was so much benefited by the first treatment that I slept better that night, but it took me some time before I could let go of the wreck. I had a great fear of the disease, but I rejoice to say that I was not only healed of it, but also of a number of other ailments, one of which was chronic. Our family doctor told me that the sciatic trouble would return; but it has not, and it is now over eight years since I was healed of it.

In May, 1906, I was taken with chills and fever and kept getting worse, so that I could not go to a practitioner, but I wrote for absent treatment. About the time my letter reached her all fear left me, and I felt peaceful and harmonious. I at once began to get better, and in twenty-four hours I was perfectly well, going about my work and eating with a normal appetite. This seemed wonderful to me. I do not live near any Christian Scientists, and have never had the privilege of attending a Christian Science service, but I have been able to overcome many minor ailments in a few hours by the knowledge I have gained through the reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy. My desire is to show my gratitude by a life of meekness and devotion to God, good.—Mrs. Sarah Foote, Antwerp, O.

I had been afflicted with a disorder of the stomach and bowels, and all the ills that accompany this disease, for twenty years. My mental condition was deplorable and sleep was almost unthought of, while material remedies had been tried in vain. A neighbor of mine was marvelously healed by Christian Science, and this arrested my attention, so I at once turned to it for help as a last resort. I began to study and have treatment, and soon was able to sleep and to eat anything I desired. In two months I was entirely healed, and now, after two years, I am a strong, healthy, happy woman. I give thanks to God, and also to Mrs. Eddy for giving us this understanding of Him that lifts us out of suffering into joy and peace. I hope my life may attest my sincerity in following the teachings of Christian Science.—Mrs. Ruthie Hill, Dallas, Tex.

In May, 1908, I came here from Fort Wayne, where I had to give up my work as a printer on account of tubercular disease. I was in such a weakened condition that I could scarcely walk a block, and could not lie down at all on account of the cough, so that I had to get what little sleep I had sitting up. A Christian Science practitioner then took me in charge for treatment, and within a week I was gaining in flesh and eating everything I wished; my cough was less severe, and I could lie down and sleep soundly. In two weeks I went to work as operator on a linotype machine. My cough was entirely gone. I gained in flesh, until I now weigh more than I ever did before, and the fear of this disease has never bothered me since.

Another fine demonstration which was made for me was more recent. On Tuesday morning, after getting through my work at half-past two, I injured my ankle very severely. The pain was most excruciating, and I could scarcely get to my room. I could not sleep, so I got up; but could not put my foot to the floor. I then called for the practitioner to treat me: which she did, and I was able to go to sleep within an hour. I worked as usual the coming night, though with some difficulty, but continued to get better as the night wore on, and the next night I scarcely limped at all. The third day, when I arose at one o'clock, my foot and ankle were well. These two demonstrations I consider very remarkable.

Forest M. Hall, Marion, Ind.

I have been fully healed by Christian Science treatment of chronic troubles of twenty years' standing, among them being varicose veins and catarrh. I was given up by some of the best doctors in the state of Maine, but my leg was healed in two weeks through Christian Science, and the spiritual uplifting has been wonderful. Twelve years before I had been baptized and joined the church, and had tried to live up to its teachings, but I felt that something was lacking. I could not read the Bible or realize harmony until I began to read Science and Health; but now the Bible is illuminated, and the words of Jesus stand out like letters of fire. I am living in a new world, —old things have passed out of my life and all things are become new.

God bless Mrs. Eddy, our dear mother in Israel, and grant that her life may be always sunshine. Words cannot express my gratitude for all that the study of her book has done for me, and the one great wish of my life is that I may be able to help others as much as I have been helped; thus fulfilling the Master's teaching, "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me." I send this testimony with a grateful heart.—Cephus Cobb, North Chatham, N. H.

My first knowledge of the healing power of Truth came to me about twelve years ago, through a friend who had been healed of a complication of diseases. At that time I had been for two years taking medicine prescribed by a doctor for hay-fever and catarrh. I had become very much discouraged over my condition, and I asked my friend if she thought I could be cured through Christian Science. She was sure I could be, and began the treatments at once, and in a very short time I was completely healed. I have great cause to be thankful for Christian Science, and I am very grateful to its Discoverer, Mrs. Eddy.

Mrs. Lulu C. Warner, Colfax, Wash.

About three years ago I was a physical wreck, suffering from stomach and bladder trouble. After the physicians had said they could not do anything more for me, and that I could not live longer than a few weeks, I took up Christian Science and was healed. Since learning the truth about God, in Christian Science, I have been able to overcome many diseases. Christian Science has helped me mentally as well as physically, and I am certainly grateful to God, and to Mrs. Eddy, for all of these blessings.

Elmer E. West, Indianapolis, Ind.

I am indeed grateful for what Christian Science has done for me. I have been cured of varicose veins, also of a bowel disorder, and numerous other ailments. Today I am happy in studying and seeking to know more of the truth.—Mrs. Mary E. Jackson, East Oakland, Cal.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be June 3, 1910. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before May 17, 1910.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to Nov. 5, 1909, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

John V. Dittemore, *Clerk.*

Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM OUR EXCHANGES.

[The Rev. W. E. Glanville, Ph.D., in *Living Church*.]

A tone of passive fatalism has characterized too many books, sermons, and hymns which have treated of suffering. We are coming to realize that it is the business of Christianity to rout suffering from the world. Suffering is part of the bondage of evil from which it is the mission of Christianity to emancipate men. Hence the attitude of Christianity to the causes of suffering is positively and aggressively hostile. The question is sometimes asked, Is not suffering a blessing? No; suffering is not a blessing *per se*. Health is preferable to sickness, always. But has not suffering chastened the soul into saintliness? In some instances, yes; in many others, no: it has hardened and embittered the heart. To relieve suffering, to drive out disease and pour in new tides of life and health, to bind up the broken in heart and dissipate the gloom of death: this was a substantive part of the mission of our Lord and remains to this day a substantive part of the mission of Christianity. We pay homage not at the shrines of the pain-bringers of the race, but at the shrines of the pain-removers of the race. Suffering is in the world not to be tamely accepted as inevitable and irremediable, but rather to be faced and vanquished as one of life's problems. It is to be regarded as transient, not permanent.

[*Universalist Leader*.]

If those preachers who try to scare men by telling them God will let them alone some day, would only reverse this and drive it into the consciousness of wicked men that God will never let them alone, nor give them any peace, so long as they are wicked, the result would be beneficial. Today every evil-doer is tormented. Every evil-doer is sure of this. If he knew and understood that tomorrow, next week, next year, next world, forever, he will be tormented until he ceases to do evil and learns to do good, the lesson would drive home to him the meaning of his present plight. Ours is a severe faith. Our God is a consuming fire. It is those who have come to believe that God will never let them alone in their sins, who understand that their only hope of peace is in obeying His laws.

[*Christian Work and Evangelist*.]

We are quite free to say that we do not think we are losing the moral sense in America, but that we are gaining in it. Much of the disclosure and rebuking of crime which has brought it to unusual public notice, may be more properly interpreted as a growth of civic conscience than as the growth of criminal tendency. There is perhaps no more crime, but there is a growing repugnance to it, and a higher standard of civic and commercial purity. So, in spite of all this sudden upheaval of the rotten depths to the surface, there is perhaps a higher standard in both politics and business than ever. There is at least more demand for it on the part of both pulpit and press.

[*Congregationalist and Christian World*.]

Faith in different ages takes on different manifestations. It may not seem so deep and reverent as in days of old, but it is far more pervasive and diffused than in any age the world has seen. The basal fact of our good cheer is God's presence. When we are sure of this we have no right to open our hearts' doors to discouragement.

[*Interior*.]

The church fatally mistakes the secret of its power if it suffers any other task or obligation to obscure from its mind or eliminate from its endeavor, even for the shortest period, its primary form of usefulness to society—the conversion of sinning and stumbling men to purity and strength.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

National.

The House has passed the Administration railroad bill as amended in the committee of the whole, by a vote of 200 to 126. Section 12, authorizing mergers under certain limitations, was stricken out and a substitute adopted which restricts the interstate commerce commission so that it cannot grant mergers "unless it shall find that such lines are not substantially competitive, and unless it shall also find that the public welfare will be promoted by such sale or lease."

A bill has been reported favorably by the Senate committee on post-offices and post-roads, which provides that the delivery of mail by city letter-carriers will only be made at such residences and places of business as provide at the doors or entrances receptacles for its deposit. The postmaster-general figures that the measure if put into operation would reduce the cost of city delivery several million dollars annually.

The school children of Montclair, N. J., have just voted for a "safe and sane" Fourth. The vote, without the high school grades, stood 663 for a quiet Fourth and 287 against. The Woman's Club of Upper Montclair started the crusade. They advocate a historical pageant as a substitute, and ask the city council to pass an ordinance prohibiting the sale of fireworks between June 10 and July 10.

An army engineer may be placed in charge of the reclamation service within the next few months. The successful prosecution of the work on the Panama Canal under Lieutenant-Colonel Goethals of the engineer corps is believed to furnish ample justification for such action.

The House committee on foreign affairs is considering a resolution to request the President to interest all foreign powers in a peace promotion plan through the syndicating of the navies and the establishment of an international naval police.

A bill providing for the opening to agricultural settlement and development of the surface of lands which have been classified as coal lands, has been passed by the House. The measure would affect about seventy million acres of coal land.

The new court of customs appeals has set June 7 as the day for the beginning of hearing of cases on its docket, of which there are already between forty and fifty. The jurisdiction of the tribunal covers appeals from the board of general appraisers.

Professor Emery, chairman of the Government tariff board, is spending a month in Germany and England, making first-hand observations of some of the results accomplished and the methods followed in gathering industrial data.

Governor Hughes' reform measure for direct nominations in primaries has again been defeated in the New York Assembly, although it brought out a surprisingly strong vote of sixty-seven against seventy-seven.

Senator Borah of Idaho is supporting a bill authorizing the President to make withdrawals of public lands when in his judgment the course is advisable, subject, however, to the ratification of Congress.

Ex-President Roosevelt has accepted the invitation of President Taft to act as special ambassador to represent the United States at the funeral of King Edward VII., on May 20.

Receipts from the corporation tax will exceed by nearly a million dollars Secretary MacVeagh's estimate of twenty-five million dollars made early in December.

The resolution for the election of United States Senators from Massachusetts by direct vote has been defeated by the Senate. It had been favored by the House.

America's greatest battle-ship, the Florida, was launched at the Government navy yard in Brooklyn last week. It cost about six million dollars.

The President has restored to the public domain 177,246 acres from the national forests of Washington, Idaho, and Colorado.

A new record for high kite flights has been made at the bureau observatory at Mt. Weather, Va., 23,800 feet.

An investigation into alleged abuses of the franking privileges may be ordered by the Senate.

International.

New Zealand in 1870 nationalized her railroads and during the ensuing ten years appropriated more than sixty million dollars in land and money for their expansion and improvement. The government came into full ownership of the roads in 1895. As fast as the profits rise above the three per cent rate concessions are made, and in this way both passenger and freight rates have been brought down to very reasonable figures. School children in the primary grade are carried free, and special rates given to the older ones. An effort is made to induce city workmen to live in suburban homes, and those who live ten or twelve miles out, as many do, travel about three miles for a cent, or a four-cent fare each way.

The Chinese government has abolished slavery throughout the empire and has prohibited henceforth the purchase and sale of human beings under any pretext. The reform, however, is not altogether complete, as certain forms of slavery will still be tolerated. The retainers of Manchu princes are not emancipated, but it is forbidden to call them slaves. They have long enjoyed educational and other privileges, although still bound to their hereditary masters. The household slaves of the Manchus are also refused emancipation, but their status under the law is improved. The rescript is said to be a compromise measure, but it will eventually give freedom to millions of human beings.

The policy of the premier of New South Wales includes among other things the determination to proceed with the more urgent duplication of the main trunk lines, and the construction of the cross-country line opening up new agricultural areas, facilitating the transportation of stock for pasturage purposes, and securing a cross-country connection for defensive purposes.

The proposal made by the commission now sitting in St. Petersburg, that the institution of Finnish pilots should be placed under the Russian admiralty, is received with general opposition on behalf of the Finnish pilots, and an influential petition has been laid before the Diet, requesting that a protest be lodged against the proposals.

The holdings of from one to thirty acres in New South Wales increased from 1903 to 1907 by 4,571, or 10.2 per cent; farms from thirty-one to four hundred acres increased by 1,026, or 5.4 per cent of the total; while holdings of from four hundred to one thousand acres increased 14,299, or 14.9 per cent.

Louis Paulhan, the French aviator, won the prize of fifty thousand dollars offered by Lord Northcliffe, for the first flight from London to Manchester. His actual going time was four hours and eight minutes, which is less than the average running time of trains.

The imperial government has decided to heighten the Assouan dam at Cairo, Egypt, to the extent of six meters. In order to carry out this work it has been found necessary to broaden and to strengthen the existing dam.

A Chinese imperial edict just issued summons the National Assembly to meet Oct. 3, and announces the appointment of ninety-six members representing all classes. The edict urges the people to prepare for a constitution and parliament.

The main idea of the exhibition to be opened in Glasgow next year is that it should be of an essentially national character, and that it should present a picture of Scottish life and history from the earliest times.

Foreigners are to be allowed to take the courses of ancient Chinese classics at the University of Peking.

A geological survey of the Argentine Republic has been authorized by the ministry of agriculture.

Industrial and Commercial.

For many years the principle of cooperative associations has been in vogue in France. In 1894 laws were passed authorizing the formation of associations and the extending of credit to agricultural interests. Recent law authorizes agricultural banks to grant mortgage loans up to a value of sixteen hundred dollars for various requirements of agriculture. Care is taken to advance the money in instalments to meet the need of the moment, as the work for which the grant was made progresses. There are at present ninety-five district banks and three thousand local banks, with one hundred and forty thousand members, and a capital of nearly ten million dollars, of which seven million dollars is due to the advances of the state. The reserve funds amount to over five hundred thousand dollars, and loans exceeding ninety million dollars have been issued since 1900.

The American Cooperative Union, the purpose of which is to aid in the crusade against high prices, was organized by farmers who attended the national rally just closed at St. Louis, Mo. The union is to be incorporated for one million dollars and branches will be opened in every large city in the United States. The plan provides for the absolute elimination of the middleman in the sale of farm products. Gifford Pinchot may be asked to accept the presidency of the institution.

A compilation which has been made shows that more than thirty-six thousand freight carloads of manufactured goods are shipped out of Waterbury (Conn.) annually. The shipments average approximately one hundred cars a day. While the bulk of the products is consigned to points within continental United States, there is a large market in Europe, South America, and certain Oriental countries.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE OPTIMISM OF THE SCRIPTURES.

SUE HARPER MIMS.

THE Standard dictionary gives the following definition of optimism in theodicy: "The doctrine that the universe, being the work of an infinitely perfect Being, is the best possible universe." This century is distinctly marked, particularly since the advent of Christian Science, by what is called the optimistic spirit, a grander outlook, a pervading hope, love, and expectancy of good. This is permeating thought and is largely responsible for the marvelous achievements of our time. Old things are passing away, new possibilities are coming into view. We are looking from the finite into the infinite; we are expecting the unexpected,—nothing now seems too wonderful to be true.

In this age of splendid hope and achievement it may seem somewhat strange to find that of all the optimists who have ever lived and loved and hoped, the prophets and poets and apostles of the Bible have been the grandest and most persistent in glorifying God, good. From the opening of religious history, the story of the genesis of man, whom God spoke into being,—a creature bearing the divine image and likeness and pronounced good, yea, "very good,"—to the conclusion of that glorious revelation of things to be, in which "the holy city, new Jerusalem," descends from God out of heaven, there is never any cessation of the glad refrain of the Life-psalm, the ultimate supremacy of good.

This song of praise, this spiritual joy, is the result of spiritual vision piercing the clouds of material sense,—*alias* the mist that rises from the ground of mortal belief,—and until the Scriptures are thus "opened," lifted from the physical to the metaphysical,—they are obscured and robbed of their deeper, more potential meaning to humanity. This was recently illustrated in an absurd newspaper story which told of the discovery of a fruit on which there were the marks of a bite, and which was said to be the same kind of fruit as that of which Eve ate in the garden of Eden. A woman of intelligence, a devoted member of a Christian church, called my attention to this so-called discovery, thinking it most wonderful and interesting. She was greatly surprised when I said, "But, my friend, the Scriptures say nothing about an apple, or any other material fruit; that belongs to the vagaries of a material sense interpretation of the Scriptures. The Scriptural account is wholly and absolutely metaphysical. Eve partook of 'the tree of the knowledge of good and evil.'"

Mrs. Eddy tells us that to her Genesis and Revelation, so obscure to material sense, "are transparent, for they contain the deep divinity of the Bible" (Science and Health, p. 546). How wonderfully luminous and practical becomes this remarkable story as we thus see the great warning against the eating of the forbidden fruit which is given in the second chapter of Genesis, how personal and yet universal, how searching to the individual consciousness. Do I partake of that fateful fruit of false material belief, that evil is as real as good, that death is as real as Life, that matter is as real as Spirit? Is not all material existence simply this belief of the commingling of opposites? Is not this the explanation of all limitation and sorrow? Is not this the denial of our God, the one God, infinite and eternal good, the denial of universal and omnipotent Life, the denial of all-supreme and all-sustaining Truth? Could its fruits or results be less than or other than what the Scriptures teach, namely, expulsion from paradise, separation from God, thorns and thistles and condemnation to till the soil,—earthly sorrows, disease, and death? Do not all these hinge upon this sad perversion of God's creation, the emanations of infinite good and wisdom?

The Scriptures do not leave us with this sad warning without pointing out the remedy. Our God is Love, the infinitely patient, tender, and true, meeting every human need. Above the din and confusion of error, the divine voice is heard, saying, "I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel." Mrs. Eddy says of this divine declaration: "This prophecy has been fulfilled. The Son of the Virgin-mother has unfolded the remedy for Adam, or error" (*Ibid.*, p. 534); and now, today, in God's own time, the woman has again awakened human thought to the deep metaphysics of the Scriptures, and shown the way of Life, the understanding of the unity, omnipotence, and reality of good, the tree of life in the midst of the paradise of good,—the understanding of Spirit as the creator, Mind, and man and the universe as spiritual, harmonious, immortal, at-one with and forever reflecting the perfect creator and inseparable from Him. This marks the dawn of the new day of Christian Science.

As we partake of this divine understanding, the fruit of this tree of life, love, and joy, consciousness is flooded with health and harmony, and songs of deliverance flow from lips and pen. Isaiah might be called the prince of optimists among the older prophets, for he pierced the mist of error born of materiality when he said, "Cease ye from man, whose breath is in his nostrils," and then rose to the joyous visions of the millennial reign of love and peace and universal freedom and joy,—when the child shall play by the cockatrice's den, when every evil thought, every malicious, subtle, and animal impulse shall be rendered powerless, when the dragon and the young lion shall be tamed by the hand of Love and the understanding of good, the one Mind, the one power and presence. Rejoice, O ye people, for "the voice of weeping shall be no more heard in her, nor the voice of crying." So far as any satisfaction in the splendors of materialism are concerned, Solomon may be called the prince of pessimists, nevertheless he also glimpsed the splendor of Truth through spiritual vision.

Scriptural optimism culminates in St. John's glorious revelation: "And I John saw the holy city, new Jerusalem,

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

coming down from God out of heaven, prepared as a bride adorned for her husband. And I heard a great voice out of heaven saying, Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God. And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away."

Our revered Leader, in commenting on this glorious vision of St. John, expresses a sublime optimism when she says: "Accompanying this scientific consciousness was another revelation, even the declaration from heaven, supreme harmony, that God, the divine Principle of harmony, is ever with men, and they are His people. Thus man was no longer regarded as a miserable sinner, but as the blessed child of God. Why? Because St. John's corporeal sense of the heavens and earth had vanished, and in place of this false sense was the spiritual sense, . . . This is Scriptural authority for concluding that such a recognition of being is, and has been, possible in this present state of existence,—that we can become conscious, here and now, of a cessation of death, sorrow, and pain" (Science and Health, p. 573).

APPEARANCE VS. REALITY.

JOHN E. FELLERS.

A MAN who was unaccustomed to thinking beyond the limitations of sense testimony, stood looking at a celebrated statue. At length he said to a friend, "I see nothing remarkable in this piece of work. All the sculptor did was to take a large piece of marble and chip off what he did not want. This statue is what was left." If he could have seen beyond the marble, he too might have been a sculptor.

The wondrous work of our beloved Leader in restoring the true concept of man, "every whit whole," from a condition of false living and thinking, and in holding thought to the spiritual reality that lies behind every material manifestation, marks her as a real sculptor among the world's thinkers who throughout all history have sought to express to dull comprehension the ideal and the true. What the painting is to art; what the poem is to poetry; what the note is to music; what the statue is to sculpture, so are the "fruits" thus far produced by the study and practice of Christian Science to the great truth of being, toward which the author of Science and Health is directing the thought of the race. The things we see and hear in our daily contact with materialism are not things at all. They are thinkings.

On page 86 of Science and Health, Mrs. Eddy says, "Mortal mind sees what it believes as certainly as it believes what it sees." A recent experience brought me face to face with the depth of meaning which this statement contains, and thinking it might be of service to others, I here relate it. The hall in which we hold our services has a balcony extending around the auditorium about ten feet above the floor. Beneath this balcony extends also a commodious wall seat. Until the sun reaches high noon each day, a part of this seat is in the shadow. One Sunday some months ago, I was experiencing a sense of both physical and mental suffering when I came to the Reader's desk. It was an inclement, cloudy morning, and the shadow fell heavily under the balcony when the services began. I saw sitting in the shadow a man whom I recognized as a visitor from another congregation, and who is known to be somewhat critical and precise in matters of pronunciation, expression, and literary style; in short, he belongs to that class of people whose value to others is not always appreciated, for he makes the careless careful, the indifferent watchful, and the thoughtless thoughtful. He seemed to be in his place that morning ready to hear the Lesson-Sermon, which evidently I had not fully comprehended, for I wished that he had come at some other time.

As we proceeded with the services, my thought kept recurring to the personality of our visitor, and I felt that I was reading poorly what should always be read well, but as I aroused myself from this condition of thought the anxiety and fear disappeared, and with them the physical and mental inharmony which had seemed to follow me to the desk. As the services were closing, the clouds had lifted, and the sun, having risen to noon, shone brightly through the windows, its light falling full upon our visiting brother. Looking in his direction again, to my surprise I discovered he was not the man I had thought him to be at all, but instead a dear, good friend who much resembled in personal appearance the critic to whom I thought I had been reading. I had seen what I believed, as certainly as I had believed what I had seen.

This experience illumined my thought for many days, and it has been one that has helped me very much. It taught me this lesson, that as we rise to a higher understanding and appreciation of what Christian Science is and what its Lesson-Sermon services mean to this age, and express that meaning in daily living, the sunshine of Truth will cast its light where now the shadow seems to be; and there, listening for the message, we shall find a true brother, instead of one whom we fear we might not please.

SALVATION HATH GOD ORDAINED.

ELIZABETH EARL JONES.

FROM beginning to end the Bible and our own spiritual intuition bear unmistakable testimony to the fact that God has a definite plan for man and the universe; a plan which includes man's dominion over all the earth, and which also includes a fulfilment of the promises to each and every one who presses forward conscientiously and actively in the footsteps of the Wayshower. This glorious, good plan is written upon the hearts and in the minds of God's children, and in it we see all things working together "for good to them that love God." We also begin to understand these much-wrested words of St. Paul. "Whom he did foreknow [the spiritual idea], he also did predestinate to be conformed to the image of his Son." We therefore feel assured of our high destiny, and we know that nothing can hinder its complete unfoldment.

But what is this other plan which seems to be at work, distressing and destroying the legitimate peace and harmony and the righteous reward of those who seek good? In aping God, evil (the lie) claims also to have a plan for man and the universe—a plan of sin, sickness, failure, sorrow, death. To the unenlightened this seeming contradiction in the logic of creation is disheartening and discouraging beyond words, and it seems altogether at variance with the wisdom and love of the creator. Because of this, human life seems to be a continual warfare between good and evil, between salvation and damnation, and confused mortals never seem to know which one will prevail.

Christian Science comes in fulfilment of the long-promised Comforter, to lift this weary burden of doubt and fear, and to instruct mankind as to the true nature of good and evil. It reiterates the Scriptural teaching of one God, good, without an equal or rival: Behold, O Israel, the Lord thy God is one Lord, and there is none else. Christian Science defines evil (devil) as Jesus did when he said, "He is a liar, and the father of it;" thus declaring evil to be untrue, unreal, and without cause or origin apart from falsehood; therefore, as utterly void of effect. Moreover, it declares that whatsoever effect evil may seem to have, must be untrue and subject to reversal by truth. In Christian Science we learn that this strange counter-plan

Digitized by Google

of evil which writes itself upon the imagination and upon the surface of material things; which seems to act with the forethought of intelligence; which seems to foresee its doom and to take steps ahead to checkmate and prevent the inevitable supremacy of Spirit; which appears to be able to multiply and care for its own, up to a certain point, is only the counterfeit of Truth and Love,—a perverted view of the eternal facts of being.

Even as did Jesus, Christian Science is proving that this false view of Life, God, can in every case be overcome by the right understanding of the truth of being; and so today, as yesterday, the sick are healed, the sinning reformed, and the sorrowing are comforted. On page 450 of "Science and Health with Key to the Scriptures," Mrs. Eddy says: "The Christian Scientist has enlisted to lessen evil, disease, and death; and he will overcome them by understanding their nothingness and the allness of God, or good." So long as we see the seething sea of error, conflict, persecution, etc., as "nothingness," so long shall we triumph over all its boisterous claims, and rejoice in the proof of the almightiness of Truth and Love; we shall realize that man's consciousness is not a battle-ground for conflicting forces, but a peaceful plane of harmony, a quiet dwelling-place with the most High.

This is the great test which all must undergo,—this bearing up, and proving unreal and powerless the pressing claims of evil; and we must do this individually and alone with God. If we find smooth sailing all the way, then we may be sure that we are not accomplishing much in the destruction of sin, disease, and death. Jesus knew the severity of these human testings; and, foreseeing that the time might come when, because of special persecution for the Word's sake and of vain and lonely longing for human sympathy and support, some might doubt their ability to hold out and to triumph with Christ, he met their need in these glowing words of tenderness and compassion: "Ye have not chosen me, but I have chosen you, and ordained you, that ye should go and bring forth fruit, and that your fruit should remain."

Thus the Master lifted the burden of responsibility from frail mortals, and rested it forever upon the strong, enduring shoulders of the victorious Christ, Truth. He lovingly assured his followers that from henceforth the burden of proof would be upon the "powers that be," and that ours will be the privilege of witnessing to God's invincible, good plan of salvation, against which all the powers of darkness combined cannot prevail. "Therefore, my beloved brethren," as Paul counsels, "be ye steadfast, unmovable, always abounding in the work of the Lord, forasmuch as ye know that your labor is not in vain in the Lord."

CHRISTIAN SCIENCE HEALING.

WILLIAM LLOYD.

I HAVE found Christian Science a practical, every-day religion, and am profoundly grateful for the knowledge its study has given me of God, for through it I have learned that He is a very present help, not only in all times of trouble, but in all kinds of trouble. It distresses me, therefore, to think that any should ever doubt its practicability, or say, "It is not for me." Yet this doubt occurs to some, especially when they first come to Christian Science and are not immediately healed. Again, this question may be asked, "Why are some healed so quickly, perhaps instantly, through the assimilation of one verse of the Bible or of one sentence in Science and Health, while the same verse or sentence has no apparent effect on others?"

Before trying to answer this question, let me state that I do not seek to lay down any law, for every case has its own environment and circumstances and no invariable rule could or should be made. I speak generally, and as a result of my own experience, observation, and growth. When I first came into Christian Science, and for a number of years after, I thought that the patient had nothing to do. I was so full of the wonders of Christian Science that I supposed the practitioner did it all, and I have often said to inquirers, "You do not need to believe." The longer I remain in Christian Science, however, and the more experience I gain, the more convinced I am that there are, humanly speaking, three factors in Christian Science healing,—God, the practitioner, and the patient. Let us consider these factors.

First, God, who is Love, who is ever present and all powerful; unchanging good,—"the same yesterday, and to day, and for ever." He has created man perfect; therefore His work is finished. Second, the practitioner, whose place it is to declare the completion and wholeness of God's work. The field is filled with honest, conscientious workers, and I think I am safe in saying that with rare exceptions they have a clear understanding of Christian Science, and are able and willing to declare the allness, power, and presence of God. Third, the patient. I take it for granted that the absolute rule laid down by our Leader, Mrs. Eddy, is invariably observed, and that no one is "treated" (or prayed for) without having asked for help. This very asking is, in part, a believing in and a reaching out after a better understanding of God, but how often does it stop there? How many who seek Christian Science healing are willing to do their share? Their share consists in opening wide their thought to receive the truth,—to be willing not only to go to the practitioner and receive a treatment, but to set aside a part of each day to study the Bible, with the aid of Science and Health, its key; in fact, to make a business of assimilating the truth; to work and strive to learn what God is, what His law is, what man is; to gain the truth of creator and creation.

Christian Science healing necessitates a change in the patient's thought. As all sickness must first be in the patient's thought, either consciously or unconsciously, before it is manifested upon his body, it necessarily follows that in order to be healed the thought must be changed; therefore, true healing first cleanses and purifies the mind, and then the body, as a consequence, manifests health. This is what Mrs. Eddy refers to when she says in Science and Health, on page 210, "Jesus healed sickness and sin by one and the same metaphysical process;" and on page 425, "Correct material belief by spiritual understanding, and Spirit will form you anew." I therefore conclude that healing in Christian Science depends to a large extent upon the patient's receptivity as well as upon the practitioner's understanding. This conclusion is, I believe, fully borne out by Mark's statement, where he relates that in a certain place Jesus "could there do no mighty works," and "he marveled because of their unbelief."

We come to Christian Science to learn the greatest of all lessons—an exact knowledge of God. When we went to school we did not expect the teacher to do our work, we had our text-books and we studied them. It was the teacher's province to explain and help along the way, but we did our share. A favorite quotation on the walls of our churches is this: "Divine Love always has met and always will meet every human need" (Science and Health, p. 494). In great need, as great as could ordinarily fall to any one's lot, I have proved this to be true; yet I have heard that it has been questioned. The doubter overlooked the implied contract, or copartnership, in the word "meet"—the word itself implies reciprocal action. It certainly does not mean that we are to sit still and expect divine Love to thrust its beneficences upon us. It means that we are to get up and go part way to "meet" God—to do our part in honest effort and unselfish endeavor. If any one does this with patience and perseverance, he will find that sooner or later divine Love does meet all his needs.

"POSSESSIONS."

HENRIETTA MARCUS.

RECALLING these pertinent lines by Robert Browning, concerning him

> Who goes gleaning
> Hedgeside chance-blades, while full-sheaved
> Stand corn-fields by him,

who has not felt the charm and pathos of the tale of the rich young man as related in the Gospel of Mark? One can almost picture him in the radiance and joy of youth, endowed with all material good, yet yearning for something higher and recognizing in Jesus the teacher and guide who could show him the way to life eternal.

The sweetness and promise of this young man are undoubted; they are established by the words, "Then Jesus beholding him loved him." We know the type of young man he represents, the human expression of vigor, strength, and joy in life, the man whom fortune has apparently favored physically, mentally, and morally; the man from whom we expect much and who seems capable of great things, but who ultimately sinks into mediocrity or insignificance through a persistent clinging to material possessions to the exclusion of spiritual gain. Without the abnegation of the human self, without the true understanding of the use of riches, without the right placing of human knowledge as a means, not as an end, the most richly dowered individual stands on the same footing as the lowest and meanest of mankind. "For he had great possessions." Possessions of what? Money, intellect, social rank, wit, beauty, genius. But all these are earthly possessions, and there is not one of us who does not own or thinks to own in mortal mind, some special privilege with which he is unready to part, yet which he is bound at last to lay as an offering on the altar of spiritual understanding. The greater the possession, the harder the struggle, and we can understand why the young man was "sad at that saying, and went away grieved."

Theoretically, it is easy to see that we cannot enter into heaven without ridding ourselves of the desire for mortal belongings, but in practice it is hard to cast away all that hampers our progress or impedes our spiritual growth. We have other possessions, however, which we are quite ready to yield up, and which we esteem ourselves the richer for being without—sickness, sorrow, and sin. These have to be cast aside in order to reveal the perfect man. Goethe said, "With self-renunciation life begins," and he only repeated in these words the truth so lovingly enunciated by Jesus to the young man who asked for life eternal. In looking back over the years in which we have studied Christian Science, we are forcibly impressed by our losses as well as our gains, by the disappearance of "possessions" for which we had no manner of use; the renunciation of what we formerly cherished has often been more than compensated for by the loss of some disease, some suffering or fear.

First and foremost there was "self"—an idol that has been given up, but that in most cases took with it its shadow, sickness. The beliefs of hatred and envy, fear and poverty, have been willingly given up, but it was not so easy to part with pride of intellect, love of wealth, or pleasure in the senses. The carnal mind would not admit that these were sins, but urged their retention; and they were retained until the growth of the Christ-spirit within us showed them in their true light. We do see, as we advance in Science, that there really is no loss, but only gain; that the material, temporal good which we give up is replaced by some spiritual gift which is ours forever. Love is substituted for hate, confidence for fear, health for sickness, the understanding of God for material knowledge. Our yearning for truth was never satisfied by the endeavor to acquire worldly wisdom, and very gradually, perhaps reluctantly, we have given up that line of study and now devote our time to the consideration of that which immediately enriches our spiritual life.

All Scientists will coincide in admitting that this giving up has been a gain rather than loss, that their lives are fuller and richer by the study of God's law than by the study of material knowledge. Christ Jesus said, "Verily I say unto you, There is no man that hath left house, or parents, or brethren, or wife, or children, for the kingdom of God's sake, who shall not receive manifold more in this present time, and in the world to come life everlasting." Mrs. Eddy says, "Let Christian Science, instead of corporeal sense, support your understanding of being, and this understanding will supplant error with Truth, replace mortality with immortality, and silence discord with harmony" (Science and Health, p. 495). The giving up of the most cherished possessions for the sake of Truth, from the first example of obedience shown to us by Abraham, unto the complete expression of absolute self-sacrifice made by Jesus, give us ample food for consideration as to what constitutes the real possessions of God's children. The understanding of spiritual truth has been gained by the study of our text-book, and our gratitude to Mrs. Eddy for this new revelation, also our growth, will no doubt compensate her for the renunciation of earthly possessions.

"OUT OF THE DEPTHS."

CHARLES H. S. KING.

"I DON'T know anything!" This wail of the self-discovered ignorant becomes the cry of personal sense, stunned by the rod of Truth. Barren material self, startled at its barrenness, can put no trust in Spirit and is lonely. Instead of looking out of itself and seeking good company in accurate, scientific thought, it sometimes consigns itself to untold tortures of trial until the monsters of self-accusation, self-distrust, and self-condemnation enforce its surrender, and the "strong man" is bound. This darkness of utter despair is dispelled by the effectual working of Truth, and it is succeeded, if we are faithful, by the morning splendor of hope, the dawn of "the first day." "Out of the depths have I cried unto thee," said the psalmist, and "with the Lord there is mercy, and with him is plenteous redemption." This transition from sense to Soul is a mental renovation, and it is here that our sincerity and genuine compassion are tried. Here "brave humility" must lift its head and determine its destiny. Here zeal is tempered by love, and all half truths, all extreme views must give place to wholesome spirituality and practical love for man. If we are faithful to this experience, personality becomes purged, we make sure our adoption as God's children, and Principle becomes our sole guide and concern.

Our Leader has said, "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment" (Miscellaneous Writings, p. 118). It would be far more ignominious than grand if we were doomed to final disappointment and to fall short of the understanding of the might and majesty of Mind. But we are not. Our faith is the victory,—"the victory that overcometh the world." There is no failure if we are determined. If we have been thinking erringly, we can immediately change our thoughts; and right thinking once established becomes natural, spontaneous. The sense of the reign of Mind dawns on persistent right thinking just as surely as like follows like. It makes no difference what our past blunders have been—how small, how mean, how mortified, or lonely we have felt. Truth finds human sense as mortal mind conceived it and provides the perfect model. Truth teaches us to know ourselves, and we are endeavoring to hew out character. This means much. The world may or may not appreciate it; but, as our Leader writes, "we never

Digitized by Google

need to despair of an honest heart" (Science and Health, p. 8), and the prize for true labor in humility and the fear of the Lord is riches, and honor, and length of days.

If we have sacredly named the name of Christ, we must screw our determination to the sticking-point and remember how great is the world's need of genuine true men. He that hath loved much has little time for the treadmill of the world's conventionalities. Local favor, local types and modes may interest, but do not beguile the man with chastened affections and spiritual vision. He is striving to attain to that Christian understanding and usefulness which would be effective for true advancement were he to be placed or "found," like Philip, in any community or clime. He has set his face against Egypt, and is determined to purify himself and mold his life according to the pattern showed in the mount. His slogan has no hint of materialism or mysticism. His ideal is pure, ingenuous Christianity.

This ideal is not "afar off," and its reward is with it. The aspiring heart emerges from the depths with a great hope and calm trust; it has proved true the prophet's words: "If thou draw out thy soul to the hungry, and satisfy the afflicted soul; then shall thy light rise in obscurity, and thy darkness be as the noon day: and the Lord shall guide thee continually, and satisfy thy soul in drought, and make fat thy bones: and thou shalt be like a watered garden, and like a spring of water, whose waters fail not."

REFLECTION.

FLORENCE LOUISE FRANK.

Some time ago, while passing along one of the Swiss lakes at the sunset hour, I witnessed a scene radiantly lovely. On the opposite shore Mt. Rigi rose in majestic winter whiteness against the evening sky, whose golden glory was slowly changing into a mellow glow of crimson, while in the distance other mountains, most of them snow-capped, lay in a soft flush of color. It was clearly evident that the highest peaks were the most radiant because of their whiteness and the fact that they reflected the most light.

This seemed to illustrate the thought that as individual consciousness rises in the scale of understanding, in the clear atmosphere of divine Mind, like the mountain peak it will be clad in purity, and in proportion to its purity be imbued with and reflect Truth. There was also a thought to be gleaned from the calm, clear lake, which reflected the wonders of sky and mountains so accurately that it seemed to consist of nothing but reflection, in the presence of which the water was imperceptible. In viewing this I could but think of the water as typifying the belief of matter vanishing before the clear reflection of substance, and recalling these lines by Mrs. Eddy: "Thought will finally be understood and seen in all form, substance, and color, but without material accompaniments" (Science and Health, p. 310). 'Tis true this scene bore only the nature of the symbolical, but in pondering it I could but echo our Leader's words, "I love your promise" (Miscellaneous Writings, p. 87), and give thanks for some measure of understanding of Truth, as revealed in Christian Science, which had so enhanced this evening vista.

The world has not learned friendship's meaning yet;
Little indeed is all thou hast to give
If it is but thine own; but bid me live
Largeness of life beyond thee, and my debt
Eternally uncanceled will remain,
And we, though strangers, have not met in vain.

LUCY LARCOM.

SELECTED ARTICLES.

[Frederick Dixon in *The Christian Science Monitor.*]

Among the many incidental services which Christian Science is bestowing on humanity is that it is steadily raising up a great race of exact thinkers. In Christian Science there is no room for such a phrase as "near enough." No human being can be too near to God; and consequently no human being can ever reason too exactly or too closely to Truth. Speaking one day to the Jews, in the court of the women in the temple, Jesus said, referring to those "which believed on him," "Ye shall know the truth, and the truth shall make you free." Readers familiar with the text of the Fourth Gospel are aware that the writer, with that precision of phrase which is so characteristic of his work, separates the absolute from the relative by a use of the definite article, a distinction which is unfortunately lost in the translation. "The freedom of the individual," writes one of the most brilliant of English commentators, with that deep insight for which he was justly famous, "is perfect conformity to the absolute—to that which is. Intellectually this conformity is knowledge of the truth: morally, obedience to the divine law."

It was precisely because Jesus had this knowledge of Truth, because in thought and deed he lived in absolute conformity to the absolute, that the synoptists say of him that "he taught them as one having authority, and not as the scribes." The word here translated authority is *exousia*, and it is noticeable that it is almost indifferently translated authority or power. This is remarkable, for the king *de facto* and the king *de jure* are by no means necessarily identical, and it proves that, in the mind of the writer, knowledge of the absolute, expressed intellectually in conformity to the truth and morally in obedience to divine law, constituted at once authority and power. "Honesty," writes Mrs. Eddy on page 453 of Science and Health, "is spiritual power."

Exactly what this means is brought out in the most striking way in the Fourth Gospel. After one of the many occasions on which Pilate, issuing from the prætorium, had faced the populace outside, he returned into the judgment-hall, and with the cry, "He made himself the Son of God," ringing in his ears, inquired of Jesus, "Whence art thou?" It was then, astonished by the silence with which his question was received, he demanded, "Speakest thou not unto me? knowest thou not that I have power to crucify thee, and have power to release thee?" The claim of Pilate, made with all the brutal frankness of the Roman soldier, to dispose as he chose of the life of the prisoner before him, Jesus brushed aside in a single sentence which set authority in its true light: "Thou couldest have no power at all against me, except it were given thee from above." The man who had avoided the manifold pitfalls set for him by the scribes and Pharisees, could have escaped now the craftiness of the high priests and the blundering Roman governor. If he seemed caught within their toils, it was only because his clear perception of the working of divine law seemed to show him that the moment had come when he could prove to humanity that life was indestructible and Spirit not to be held within the grasp of matter.

The force of the reply came home with startling rapidity to the Roman governor. From first to last, during the whole trial, he had striven to find a way to release the prisoner. Now his mind was suddenly made up for him by the angry shout, "If thou let this man go, thou art not Cæsar's friend." A moment's reflection as to the effect of such an accusation, if it was repeated to Tiberius in Rome, was enough for him. The man who a few seconds before had taunted the prisoner with his power of life and death, recognized his freedom of choice, and with it his authority slipping through his fingers. One final

Digitized by Google

effort he made to reassert his authority in the feeble demand, "Shall I crucify your King?" The answer of the chief priests settled the question. As he listened to the declaration, "We have no king but Cæsar," he recognized the futility of his boast. So far from having authority to give or take the prisoner's life, his own life was at the mercy of the despised rabble before him. At the repetition of the suggestion his power evaporated with his authority. He followed the Jews in sacrificing the Christ to the emperor, though he took his revenge in the title he affixed to the cross, and reasserted his authority, when the personal danger to himself had passed away, in the famous sentence, "What I have written I have written."

That was Pilate's dream of authority—the relative, human sense of authority, collapsing in a moment at the touch of a stronger hand. It happens, however, that we have Jesus' own idea of authority, and it is to a Roman soldier that we owe the explanation of it. It was on the day when he came down from delivering the sermon on the mount that, as he entered into Capernaum, he met the centurion. And there, in the narrow street of the Galilean town, amid the press of the passers-by in their many-colored gabardines, the Roman soldier in his scarlet toga and gleaming helmet stood and talked with the great Teacher until the latter marveled.

Twice only, in the whole story of his ministry, is it recorded that Jesus marveled. The first time was at the lack of belief amid the people of his native Nazareth; the second, at the understanding of the centurion. It could not have been the mere act of belief in the centurion at which Jesus marveled, because he did find equal faith without expressing such astonishment. The reason must be sought elsewhere, and will be found in the spiritual insight of the Roman expressed in his understanding of authority. It must be admitted that the translators of the Authorized Version by dropping the word "also" from the Greek text, "*kai gar ego*," did their utmost to darken counsel by words without knowledge. The revisers, wiser in their generation, restored the word, and with it the key to the saying: "For I also am a man set under authority." The Roman had caught a glimpse of something which had been hidden, it is to be suspected, from all the multitudes to whom Jesus had preached, and for whose benefit he had performed miracles. No wonder the Master marveled.

To Pilate, authority was the power to do as he liked. In all Judæa there was no one to dispute his power. To Tiberius, authority was the power to do as he liked. Within the confines of the empire there was no one to dispute his word. The centurion saw something beyond this. A suspicion of disloyalty breathed to Cæsar, and where would Pilate be? A dagger's point in the capitol, and where would Cæsar be? To him authority meant the might and dominion of Rome, which would continue after Tiberius and Pilate, perhaps in despite of them. He was a man truly under authority, the authority of the Roman eagles and the *Lex Romana*. He was the servant of the Roman law. If he, backed by this mere temporal power, could say to this man, "Go, and he goeth; and to another, Come, and he cometh," what might not be possible to this servant of Jehovah, understanding and applying the divine law? The cohorts of fear, the legions of disease, the armies of death would vanish at his word: "Speak the word only, and my servant shall be healed."

Millions of men, viewing the figure of Jesus in the perspective of the centuries, have invested him with all sorts of miraculous powers which they have denied to the dwellers in Christendom. But here was a Gentile soldier who met the Hebrew teacher, a despised Jew, in the streets of the little Galilean town, and realized his power because he understood something of what authority meant. How many of those who bow themselves today before the "man of sorrows" are willing to recognize that his true followers among those whom they meet today in the press of the streets are those who are striving to put into practice the command to preach the gospel and to heal the sick?

In the Messianic prophecies in the book of Isaiah the "man of sorrows" is spoken of as the servant of Jhvh, a word from which, by the process of mingling its consonants with the vowels of Adonai has been produced the term Jehovah. The writer of those prophecies understood full well what would be the reception by the world of the man who should manifest such "perfect conformity to the absolute" as to become entitled to the Messiahship: "He is despised and rejected of men; a man of sorrows and acquainted with grief: and we hid as it were our faces from him; he was despised, and we esteemed him not." The Roman centurion met Jesus in the street of Capernaum and recognized the Christ, and Jesus marveled.

Authority, then, as explained in the New Testament, is the corollary of spiritual understanding, of conformity to the absolute. This being so, it must necessarily be a demonstrable quality; and so, all through the Gospels, the word is found used almost inseparably from healing. The word healing is, of course, used in Christian Science in a far broader sense than the mere overcoming of physical disease. It is used, as it is used in the Bible, to express the destruction of anything that is unlike God. Jesus spoke with the same authority to the tempest as to disease, and to death as to the tempest. "Suffering, sinning, dying beliefs are unreal," Mrs. Eddy writes on page 76 of Science and Health. "When divine Science is universally understood, they will have no power over man, for man is immortal and lives by divine authority."

Anybody who has been the instrument of healing, in this way, the apparently most insignificant case of disease, knows beyond argument how divine is the authority which said to the tempest, "Peace, be still," and cried at the mouth of the tomb, "Lazarus, come forth." It is something quite devoid of will-power, of suggestion, or any of those frail material means through which the human mind works. It is the result of a knowledge of the absolute, acquired by the patient effort to live in conformity to the absolute; in short, to realize and put into practice the command of Jesus, "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." Such a man lives under divine authority.

[Eugene R. Cox in *Yonkers* (N. Y.) *News.*]

I have before me an editorial entitled "Hypnotic Goodness," wherein it is suggested that good deeds may be inspired by hypnotic control, and it is also stated that Mrs. Eddy attributes power to evil thoughts. In an earlier issue an account is given of Dr. Fluno's lecture with head-lines stating that Christian Science is not mesmerism, and as mesmerism and hypnotism are the same, it would appear that the editorial is already answered.

As I understand hypnotic control, it is the state which prevails when one person assumes control of the mind of another person, and in this, mesmerism and hypnotism are synonymous. When in such a state the victim performs acts involuntarily. But to do good, one must have the desire and intention to do good; hence it is evident that a person under hypnotic control could not individually produce righteousness, which means right thinking.

Mrs. Eddy throughout all of her works denies the power of evil thought; in Science and Health (p. 571), she says, "Clad in the panoply of Love, human hatred cannot reach you."

[Nellie M. Johnson in *Omaha* (Neb.) *World-Herald.*]

Christian Science establishes its claim to be the Christ-method of salvation by doing the works enumerated in the last chapter of Mark. These "signs" were to follow all

Digitized by Google

believers—that is, all who understand the teaching sufficiently to prove their faith by overcoming the numerous phases of evil. This system of salvation saves the community by arousing the individual to the necessity of reforming himself, and endues him with the understanding of the omnipotence of God, good, whereby he may achieve his purpose. Such an achievement improves the man and enhances his worth as a member of society.

The Christian Scientist esteems himself not less selfish than others, but less selfish than he was; he accounts himself not better than his neighbor, but better than before he began working out the problem of salvation through the understanding of Christian Science. Regeneration is slowly attained, but the student is richly compensated by spiritual growth.

Christian Science practice is not a trade, but a ministry, and its practitioners, combining the functions of physician and minister, should, like other humanitarians, receive a reasonable price for their services without adverse comment.

[George Shaw Cook in *Argus*, Rock Island, Ill.]

Our critic is wrong in his assumption regarding the teaching of Christian Science concerning the nature of sin, disease, and death. It teaches that these evils are not the result or effect of divine intelligence, or the Mind which is God, infinite good, and therefore that they are not real in the best sense of that word. It admits, however, that in the experience of mortals these evils are believed to exist, and that to the mortal or human sense they seem to be very real and very distressing. What Christian Science does teach is that all evil is destructible, and in that sense unreal. Christian Science practice is demonstrating the truth of this teaching by removing evil to an increasing extent from the experience of thousands upon thousands here and now.

SPECIAL OFFER ON BOUND VOLUMES.

The Publishing Society still has a limited number of sets of bound volumes of the *Journal* and *Sentinel* which are offered at the following special prices:—

SENTINELS.

No. vols. in Set.	Years.	Binding.	Price.
9	Sept. 1900–1909	Cloth	$15.00
8	" 1901–1909	Cloth	$13.50
8	" 1901–1909	Half Morocco	$21.00
7	" 1902–1909	Half Calf	$19.00
8	" 1901–1909	Assorted Bindings	$14.00
6	" 1903–1909	Assorted half calf and half morocco	$16.50
5	" 1904–1909	Half morocco	$14.00

JOURNALS.

9	April 1900–1908	Half Calf	$19.00
8	" 1901–1908	Cloth	$12.00
7	" 1902–1908	Cloth	$10.85
9	" 1900–1908	Assorted bindings	$14.50
9	" 1900–1908	Assorted bindings	$14.50
8	" 1901–1908	Assorted bindings	$16.25
4	" 1905–1908	Half morocco	$ 9.20

These special prices apply only on sets of books arranged by years, as above listed, and in no case on single volumes.

This offer presents an exceptional opportunity to Christian Scientists to obtain rare volumes for reading-rooms, libraries, and individual use. As the stock is limited, it is desirable, when ordering, that a second choice of sets be named

AMONG THE CHURCHES.

ROCKFORD, ILL.

The opening of the new edifice of First Church of Christ, Scientist, yesterday [April 3] marks a joyous occasion for the members of the organization in Rockford. While the exterior of the building is not yet completed, the interior is finished and presents a beautiful appearance in its cream and white tints. Six hundred may be seated comfortably. The entire structure is estimated to cost $30,000. E. J. Hollister, one of the pioneers of Christian Science in Rockford, in speaking of the history of the church in Rockford, said:—

"Christian Science services in Rockford were first held in 1897, in the South Rockford home of one of our present members; later were held in the home of another of the early workers in the Cause, one to whose faithful efforts the pioneers feel that they owe much. In 1898 a small down-town meeting-place was secured; then a small hall, which in turn gave place to a larger one. At one time the Masons' Hall on Wyman street was occupied; afterward the Knights of Pythias Hall. We then removed to Mendelssohn Hall, from which we have come to our own home. Our first organization in Rockford was a society, formed in October, 1899. The church was incorporated and organized in 1902, under the name, First Church of Christ, Scientist, of Rockford, Ill. In May, 1903, we started our first church building fund, the first two accumulations of which were gladly sent to meet the need of The Mother Church extension, then building. A meeting was called Sept. 2, 1907, to plan for a church edifice. Within a few weeks this lot had been secured. The corner-stone was laid Feb. 12, 1910. Constant and faithful effort on the part of those entrusted with the carrying out of the plans, trusting God and working, have borne the fruit you see here today."—*Rockford Reporter.*

COEUR D'ALENE, IDAHO.

The Christian Science society of this city has commenced the erection of a neat chapel on the corner of Foster and Third streets. The chapel will be in the bungalow style of architecture, thirty feet wide and fifty-four feet long, and with the lot will cost about two thousand dollars. This society has had a good normal growth since its organization in July, 1908.—*Correspondence.*

ST. PETERSBURG, FLA.

The Christian Science society of St. Petersburg, Fla., has purchased a lot and is planning to erect a church thereon in the near future.—*Correspondence.*

[Written for the *Sentinel.*]

PRAISE.

R. E. KEY.

WHEN the soft falling wind has ceased to stir
The tendrils of a thousand restless trees,
When the slow humming-bee has ceased to lie
Caressingly within the clustering leaves,
When the gray twilight falls—a silver sign—
Upon the path the woodland torrent cleaves:
Then, 'twixt the parting of reluctant day
And gentle advent of approaching night,
I bow a humble head in thankful prayer
For blessings infinite.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

[From *The Christian Science Monitor.*]

MRS. EDDY HELPS LITERARY UNION.

ANNOUNCEMENT was made public Thursday [May 5] that Mrs. Mary Baker Eddy of Brookline, Mass., the Discoverer and Founder of Christian Science, has given the New Hampton Literary Institution a check for one thousand dollars. Mrs. Eddy became interested in this Institution many years ago, while visiting friends living in this town. A building fund is being raised for the Institution. The amount of twelve thousand dollars has already been subscribed by the alumni. Mrs. Walker of Worcester, Mass., widow of ex-Congressman J. H. Walker, and her son, Joseph Walker of Brookline, Mass., have also given one thousand dollars. The Walkers have a summer home in New Hampton.

New Hampton Institution had its beginning nearly one hundred years ago in an obscure way, the primary purpose being to help young men and women to a higher education who would otherwise be unable to go beyond the teaching offered in the public schools, and this plan has been adhered to ever since. In 1821 the Institution was formally organized and dormitories and a class building were erected. Thousands of young men and women have been prepared here for the colleges of Maine and New Hampshire, and thousands of others have left the Institution to become teachers or to take up higher commercial activities. The fees for board and tuition make it possible for nearly anybody to prepare at the Institution for college, however limited the family means. Thousands have paid all their expenses, and some have been known to send money home as well, to contribute to the family support.

New Hampton is a quiet little country village set down among the mountains, at about an equal distance from the surrounding towns of Bristol, Ashland, Laconia, and Tilton.

We are glad to give place in our columns to the above item from the *Monitor,* with its interesting details of this oldtime seat of learning, and also to the letters which follow, expressive as they are of the appreciation with which our Leader's continued interest in the welfare of the people and institutions of her native state is received.

EDITOR.

STATE OF NEW HAMPSHIRE,
HENRY B. QUINBY, GOVERNOR.

Concord, April 30, 1910.

Rev. Irving C. Tomlinson.

Dear Mr. Tomlinson:—Mrs. Eddy's most generous response to my letter, and your kindness and promptness in laying it before her, are most fully appreciated, not only by me, but by the earnest and unselfish workers in behalf of the New Hampton Institution, and will gladden their hearts.

Sincerely yours,
HENRY B. QUINBY.

Manchester, N. H., April 29, 1910.

Mrs. Mary Baker Eddy.

Dear Madam:—I am informed by the Rev. Mr. Tomlinson that you have listened to the appeal in behalf of poor young women in New Hampshire who are desirous of an education, and that you have given one thousand dollars for the much-needed building where they can board themselves. I wish to thank you for the kindly interest you have manifested in this good work, and for the generous offering you have made. I wish to thank you not only for myself, but for every young woman who will receive benefit from your most helpful donation. May great blessings come to you and to your native state in consequence.

Very gratefully and sincerely yours,
ELLEN A. WALLACE.

PERSISTENCY.

PERSISTENCY is that mental quality which distinguishes the successful worker in any direction, for it is seldom indeed that even the most intelligent and conscientious effort secures at once the desired result. In no other line of endeavor is persistency more necessary than in the effort to escape from the limitations and miseries of materiality, through the understanding of divine Principle as revealed in Christian Science. It is true that many are healed at once of some distressing form of disease, through the recognition of the fact that evil has no place in the kingdom of God; but the working out of life's problem still remains and impels them to go forward, for Christian Science shows that the establishment of this kingdom on earth is an obligation which rests upon all Christians. It is true that Christ Jesus healed the sick, reformed sinners, gave sight to the blind, and even raised the dead, but the complete program of Christianity will not be demonstrated until everything which is unlike God and harmful to man has forever disappeared, to make place for the things that are of God, hence good.

There are some to whom even the physical healing comes slowly, and it is usually found that these persons depend to a large extent upon the efforts of others and have a very uncertain grasp of the great spiritual realities represented in health and freedom. They may read the Bible and Science and Health by the advice of friends or practitioners, but all the while there is a tendency to dwell upon past suffering, to note every discordant symptom, and to be constantly inquiring whether any cases similar to their own have been healed. This is certainly not a promising attitude, and it should be changed as soon as possible. The true work of the Christian Science practitioner is to help people to help themselves by apprehending and utilizing the truth of being, and it is no less discouraging for the practitioner than for the patient to have long-drawn-out experiments. There are possibly no two cases quite alike, but each treatment should bring at least some measure of freedom, and the patient can then go on and apply his realization of the truth for himself, seeking further personal aid only when this is necessary.

Some very interesting experiences, illustrating the value of persistent individual effort, come to us from the field. One case is that of a woman who had suffered terribly for years. The Christian Science text-book was brought to her, and she read it through five times before perfect healing was realized. At the third reading of the book there was even a seeming aggravation of the conditions, but she was certain that divine Truth was at work and so she persisted until the goal was reached. Another case was that of a man who continued to suffer a good deal for a year, although some troubles had been overcome at the start and a wonderful glimpse of the truth gained. He, too, persisted in holding to the truth, through "good report" or "evil report," so far as sense testimony was concerned, and the result was the same as in the first case cited. The writer knows of a woman who was stricken with smallpox during an epidemic of that disease, and after a member of her family had died from it, under medical treatment. She had a slight understanding of Christian Science, but for more than an hour she lay on the floor where she

Digitized by Google

had fallen, in great agony, and alone so far as any human being was concerned. Despite her struggle she remembered and repeated over and over again our revered Leader's words on page 495 of Science and Health, where she counsels us to "cling steadfastly to God and His idea," whatever the temptation. The woman did this, and she was perfectly healed before morning, although there were the usual evidences on her arms as she went about her household duties which would have convinced the most skeptical of the nature of the disease. Those who heard her tell of the experience could never doubt that God heals the sick today as surely as in the time of Christ Jesus. Mrs. Eddy tells us (*Ibid.*, p. 462) that in Christian Science "self-denial, sincerity, Christianity, and persistence alone win the prize, as they usually do in every department of life."

ANNIE M. KNOTT.

THE LINE OF LEAST RESISTANCE.

THERE is nothing that the average man is more frequently prompted to do than to dodge the disagreeable and leave it for the other fellow. This temptation is a test of true gentlemanliness as well as of moral character. When the call has come to go to the front, and face the enemy, a good many of us may have wished mightily, for a minute at least, that we could find a good stump and hide behind it, though knowing that cowardice is despicable and degrading. To win here is to launch a reformation and open a new era in the history of one's progress and capacity. All great opportunities to do for oneself or others are attended by such temptations. The argument that a given good end may be just as surely reached by a more agreeable course is very specious, and that it should be so welcomed by mortals is in evidence of that inherent mental laziness which is one of our most subtle and smooth-tongued foes. How promptly Christ Jesus resisted the allurements of an assertedly thornless path.

To do a thing awkwardly and laboriously, when it can be done artistically and easily, has no flavor of virtue whatever. Right living is abundantly strenuous at its best, and those who superstitiously court martyrdom by ignoring a line of lesser resistance which involves the sacrifice of no principle,—well, such people are certainly not wise. The vital need today, as always, is for those who, like the great Wayshower, will not balk at any hardship which may pertain to duty; who will not shirk and who will not compromise, but who, like true soldiers, are faithful, if need be, "unto death." These find their reward, a crown, as John tells us; and more, they find that they did follow the line of least resistance all the while, though human sense would have argued that they were passing it by. And this brings us to the very gist of the whole matter, namely, that for each individual case, whatever the seeming, to right vision,—the judgment that has taken in the whole cycle of experience,—absolute loyalty to God is always the line of least resistance, since it enables us to forestall that self-entrenchment which error otherwise secures, and interdicts that inertia of habit which, as Science teaches us, must some time be entirely overcome.

Things do not accomplish themselves, they do not "happen," either in this world or the next; hence there is very much to be done, and this is one of the splendid things about Christian Science, that it is a concrete and continuous stimulus to noble doing. It so awakens and inspires men that very many of those who were once looking about for an easy job are now standing in their own place, doing their duty in a manly way, and with a song upon their lips, though human sense might call their work hard and commonplace. They have gained a glimpse of the highlands ahead, and they are entirely sure that they are on the safest and shortest way home.

Moreover, they are rejoicing in the realization that no one can possibly be a genuine hero "unto himself." On the contrary, when he takes his stand for the spiritual ideal, for Truth, and fairly faces any issue involved, like the brave Winkelried he breaks the assaulting ranks of the enemy of all, and every brother man will find his way to freedom the more open therefor. This was the larger overcoming of Lincoln, and of the brave woman who saw before her "the awful conflict, the Red Sea and the wilderness," but who "pressed on" (Science and Health, p. 226) undismayed. She had wisdom and strength to stand alone and do the thing that needed to be done, regardless. Her course did not always seem, perchance, to be the line of least resistance; but it was the direct way to success, and to her enthronement in the affection of unnumbered thousands.

JOHN B. WILLIS.

NOTICE TO FIRST READERS.

The Lesson-Sermon subject, "Ancient and Modern Necromancy; or, Mesmerism and Hypnotism," has been amended to read as follows: "Ancient and Modern Necromancy, *alias* Mesmerism and Hypnotism, Denounced." As the current *Quarterly* was printed prior to this change, First Readers are requested to use the amended title in announcing the subject of the Lesson-Sermon for May 29.

LETTERS TO OUR LEADER.

Hermosa Beach, Cal., April 18, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dearly Beloved Leader:—Without special preparation I was recently called upon to teach the small children in Sunday School. Toward the close of the lesson the following questions and answers were given:—

"Where did Christian Science come from?" "God." "Yes; and who discovered it?" "Mary Baker Eddy." "Yes; and how was it given to us that we might study it?" "In Science and Health." "Yes; Science and Health—and what?" "Don't know."

The thought of what a key is, and what the Scriptures means was then brought out. Then I asked, "What does 'Key to the Scriptures' mean?" To which a nine-year-old girl replied: "To unlock our unbelief and open our understanding." I thought the answer would please you.

In love and gratitude which words cannot express, I am,

Obediently yours,

ETTA PRINCE WILLIAMS.

MRS. EDDY'S COMMENT.

"Out of the mouth of babes and sucklings thou hast perfected praise."

MARY BAKER EDDY.

Toledo, O., April 30, 1910.

Dear Mrs. Eddy:—I want to pour out a little of the joy that fills me tonight—gratitude for your life and work! I started to spend the evening with the Lord's Prayer, on which we are working in our Sunday School class. Not a minute could be spared for anything else, yet there lay a recent copy of the *Monitor* (how well it is named!). I opened it just to glance at the head-lines, and found the Christian Science article on the Home Forum page to be "The Lord's Prayer." So truly do I find "daily strength for daily needs" (Hymnal, p. 150) provided by divine Love and wisdom. What weapons of warfare God has given us through you! I am particularly grateful for the *Monitor*, which is daily giving to our boys and girls, little and big, a sheet that educates without polluting their wholesome thoughts with the sensationalism

Digitized by Google

"that defileth or maketh a lie." Truly the world's crying need for a clean newspaper is met.

Lovingly and gratefully,
LEILA CLOSE HARSCH.

Winchester, Mass., May 2, 1910.

Beloved Leader:—For ten years this church has endeavored to prove itself to be a vigorous and fruitful branch of The Mother Vine. Tonight, in this annual meeting, our hearts turn in loving gratitude to you for the many benefits received as the result of our effort to follow your wise leadership. We desire to express to you, the Discoverer and Founder of Christian Science, our deepest love and unswerving loyalty, by living in obedience to the Bible and to "Science and Health with Key to the Scriptures," thereby accomplishing the healing work which our Master so lovingly taught and to which you so faithfully direct us. In so doing we shall "forget self in laboring for mankind," "woo the weary wanderer" to our door, "win the pilgrim and stranger" to our church, and "find access to the heart of humanity" (Miscellaneous Writings, p. 155).

Thanking you for your "Pean of Praise," we are
Lovingly yours,
First Church of Christ, Scientist, Winchester, Mass.
MABEL C. DYER, *Clerk.*

Rutherford, N. J., April 30, 1910.

Mrs. Mary Baker Eddy, Chestnut, Hill, Mass.

Beloved Leader:—My heart says, blessed mother, for all the blessings of my life have come from your revelation of the Scriptures. The moment I heard your definition of God, as given in Science and Health, I knew, as you have expressed it in your Communion hymn, that I had heard the "glad sound," and felt the "power of the Word," and I was instantly healed of severe ailments from which I had suffered for so many years that I had commenced to believe they were a part of me. But you opened my eyes and ears to the truths that Jesus came to teach, and I have never lost that "glad sound," although the roar of human sense has been loud and long. Seven years ago I realized that as a practitioner and an active member of First Church of Christ, Scientist, of New York city, I was forced to take a stand for Principle or for personality. From your teachings I saw the importance of being loyal to my teacher, although I was never blind to the personal character of those teachings. I never confused it with your teaching, for I knew, "'Tis the same hand unfolds His power, and writes the page" (Christ and Christmas).

I was punished for resisting this personal teaching, through my only daughter, who was stricken with typhoid fever. My husband and relatives not being Christian Scientists, they insisted upon calling a physician, and this physician was certainly sent by God, for he was perfectly willing to leave the case in God's hands, each condition being met in Christian Science as soon as voiced, except the high temperature, which remained at a dangerous point with very little intermission for nearly seven months. We had professional nurses during that time, who tried to make trouble by reporting the case to the board of health, so we were compelled to have two consultations, the doctors on both occasions expressing their amazement at my daughter's harmonious condition with such a temperature. The last physician—although he did not think that she could live—said to the nurse that this was "the first practical demonstration" he had ever seen in Christian Science. None of these physicians offered any medicine. At the end of seven months we had so far conquered the suggestions of evil that the temperature became normal. My daughter had to learn to walk again, and in a short time was most harmonious. During these months of trial, different students from First Church would come and beg me to return to my teacher and let her heal my child, as I was referred to as an example of what must happen to a disloyal student.

It never occurred to me to look for help in conditions I had outgrown. I knew that divine Love had led me out of these conditions, and would still lead me on. Never for one moment was there a doubt or fear of the result of standing for Truth. I never lost the true ring, the "glad sound" that came to me through your teachings, as found in all of your writings, and I was able to hold the beginning of my confidence steadfast unto the end. Dear Leader, can you doubt my love and gratitude to God, for permitting me in the slightest degree to understand the language of Spirit that you speak? I want to express my gratitude for our Board of Directors of The Mother Church, who are fearless in their work of proving to the world that in Christian Science Truth is Truth and purity is purity. Pardon this long letter—I could make it a book and then the half of my blessings would not be told.

A loving student of your revelations,
IDA KATE SCHULTZE.

[Telegram.]

New York, N. Y., May 9, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—First Church of Christ, Scientist, of Brooklyn, N. Y., assembled in annual corporate meeting, on May 9, 1910, sends its loving thanks for the untiring watchfulness, penetrating foresight, and profound sagacity of your leadership, guiding, guarding, and preserving from all contamination the Christ Science which, discovered and founded by you, is rapidly uplifting and ennobling the race, bringing to countless thousands healing, redemption, peace, joy, love,—the kingdom of heaven. It is our earnest prayer that your life of consecration and unselfed love may inspire us to strive for the same exalted vision, a like devotion to Truth, so that in meekness and humility we may attest by our lives that we are also following in the steps of the lowly Nazarene, seeking always to be divinely led to work as he would have us work in our Father's vineyard.

HARVEY M. FERRIS, *First Reader,*
CLARA S. HILL, *Second Reader,*
TUNIS H. CROPSEY, *Clerk.*

[Telegram.]

Denver, Col., May 2, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dear Leader:—The practitioners of Christian Science of Denver, Col., in meeting assembled, unanimously voted to send you an assurance of their unswerving loyalty.

ELLA PECK SWEET, CHARLES MCVEAN CAMERON,
FRANCES MACK MANN, *Committee.*

South Bend, Ind., May 7, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—With love and gratitude the Sunday School of First Church of Christ, Scientist, of South Bend, Ind., is sending Mr. Chase fifty dollars to be added to the publishing house building fund. We rejoice in God's abundance and overflow of goodness, and in being able to send not only the one tenth, but two thirds of all we possess. Our prayer with it is that it may be applied to the furtherance and continuance of the conveniences and harmonies which are a manifestation of divine Mind in the publishing of our dearly beloved Christian Science literature.

We note that the Sunday this amount was appropriated (May 1), the largest collection was taken which this Sunday School has ever had, although no previous announcement had been made regarding the donation or call for special collection.

MARTHA B. PRELL, *Secretary* and *Treasurer.*

THE LECTURES.

GLASGOW, SCOTLAND.

A well-known American lecturer and student of Christian Science, the Rev. William P. McKenzie, spoke at some length last night [April 26] on his favorite subject in the Queen's Rooms. There was a large congregation, over which Brown Fleming presided. The lecturer is a member of the Christian Science board of lectureship of The First Church of Christ, Scientist, Boston, U. S. A. He has a pleasing personality; slimly built, with refined, clear-cut features, and a good carrying voice.

As might be gathered from his name, the reverend gentleman comes of good Scottish stock. His father—he told his audience last night—was a student of the New College in Edinburgh, and was connected with the Free Church, while his grandfather was pastor of a kirk in a little town on the Border. It was natural, then, that he should follow in the footsteps of his forbears and "wag his pow" in the pulpit. This is his first visit to the land of his race, and he had the opportunity last night of addressing for the first time an audience of Scottish people. It was a pleasant experience for those in the hall to listen to the quiet and convincing manner in which this Scotsman from over the seas told the beautiful story of the Gospels. Like the stock he has come from, he takes matters "cannily." He does not hurry. He gives his congregation plenty of time to assimilate and weigh the arguments which he voices. Naturally, he is an enthusiast regarding the "scientific" treatment, so to speak, of Christianity. His scholarly exposition of the basis upon which Christian Science is founded must have proved convincing to many of those listening to him.

In succinct and interesting fashion he traced the development of this cult, showing how "healing" was the great factor in the lives of its followers, and also how they derived that wonderful power from studying and thoroughly understanding the works of Christ. "Healing," in Mr. McKenzie's eloquent phrase, was the golden thread which could be traced in the Bible from Genesis to Revelation, and which to those who understood served to knit the whole into one great and glorious pean of harmony. He told the life-story of Mrs. Eddy, the Founder of Christian Science, of her wonderful experience in being healed by faith when lying on her death-bed, as was thought; and also referred in most interesting detail to many other cases, all of which effectively demonstrated the thoroughness and efficacy of a scientific understanding of the works of Jesus and the prophets of old.

Glasgow Evening Times.

OTTAWA, KAN.

Bliss Knapp lectured on Christian Science at the Rohrbaugh Theater Feb. 27. He was introduced by Thomas W. Morgan, who said in part,—

Personally I have not a full comprehension of the doctrine of Christian Science, and therefore it would not be proper for me to try to discuss it; but this much may be said, even by one who depends wholly upon observation for his knowledge, that the doctrine of the Christian Scientist is a doctrine of faith, it is a doctrine of hope, and it is preeminently a doctrine of charity or love. Even the most orthodox and old-fashioned of us must admit that a religious system established upon the basis of faith, hope, and charity is sound as well as Biblical in its foundation. I am glad that we live in an age of investigation and of tolerance, an age of "the open mind," if you please; a time when in science, in politics, and in religion, men are anxious for light and are willing to accept new truths—or rather new interpretations, for truth itself is eternal and unchangeable. In this audience are doubtless many persons who, like myself, are not yet full converts of the vital doctrine formulated by Mrs. Eddy; but, thanks to the liberality of the times, we are glad to listen, to learn, and—if convinced—to accept.

It is true of Christian Science as of many other great moral and intellectual movements, that the influence of its teachings extends far beyond the lines which include those who have fully accepted the faith. The optimism and the cheerfulness of the Scientists have extended outward into what might be called the unbelieving world, until today thousands of persons who class themselves as non-Scientists are more hopeful, happier, and more efficient than they would have been save for the new teaching.

Correspondence.

SANTA MONICA, CAL.

Frank H. Leonard delivered a lecture on Christian Science before a large audience at First Church of Christ, Scientist, on Sunday evening, April 10. The lecturer was introduced by Roy Jones, son of U. S. Senator John P. Jones, who said in part,—

Every man must look with reverence upon the sincere belief of his fellows, nor may he dare to deny the possibility of that which is truly believed by any considerable number of people. Christian Science is preeminently a religion of cheerfulness and happiness. I have never met one of its adherents who was not contented and did not look upon life with optimism. I suppose there are many present who are not affiliated with the Christian Science church, but none can fail to be interested in a subject which counts among its followers such a vast number of his countrymen.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Ridgewood, N. J.—Judge Septimus J. Hanna, Public Library, 8:15 p.m., May 23.
Hampton, Ia.—Lecture for May 27 canceled.
Seattle, Wash. (Fourth Church).—Bicknell Young, More Theater, 3 p.m., May 29.
Charlestown, W. Va.—Prof. Hermann S. Hering, Burlew Opera House, May 31.
Potsdam, N. Y.—Judge William G. Ewing, Town Hall, June 2. [Postponed from May 5.]
Owosso, Mich.—Francis J. Fluno, M.D., June 2.
Chicago, Ill. (Fourth Church).—Prof. Hermann S. Hering, June 2 and 3.
West Chester, Pa.—Bliss Knapp, Church Edifice, North High street, June 3.
Erie, Pa.—Frank H. Leonard, Alpha Theater, June 3.
Eaton, O.—Hon. Clarence A. Buskirk, Opera House, 2:30 p.m., June 5.
Springfield, Mass.—Clarence C. Eaton, Court Square Theater, 7:30 p.m., June 5.
Mystic, Conn.—Francis J. Fluno, M.D., Central Hall, 3:30 p.m., June 5.
Ithaca, N. Y.—Judge Septimus J. Hanna, Lyceum Theater, 3 p.m., June 5.
Lexington, Mass.—Prof. Hermann S. Hering, Town Hall, 3:30 p.m., June 5.

TESTIMONIES OF HEALING.

It is with gladness and gratitude that I testify to the good which Christian Science has brought to me. I was never strong, having seemingly inherited a delicate constitution, and when I gained my first understanding of this truth, over two years ago, I was in an almost hopeless condition. For many years I had suffered from stomach, catarrhal, and nervous troubles, and had reached such a state that any unusual exertion would result in a severe attack of illness. Colds were also followed by these attacks, and an illness of this nature, in February, 1907, led to my being sent to a Boston hospital, where the physician confirmed the diagnosis already given by two other physicians. I was advised, when leaving, not to work beyond my strength. I resumed teaching, however, as it seemed necessary, and kept up, till the close of the session, by means of so-called nerve stimulants. My physician, and others, thought I would not be able to teach another session.

It did not occur to me to seek help from Christian Science, as I had heard of it many years before, through unfavorable press references. I had now, however, for several months been associated with a Christian Scientist, whose life was an eloquent testimony, and much of my prejudice was laid aside; yet it seemed to me a thing incredible that there should be spiritual healing in the present age. Upon my return from the hospital, I found several copies of the *Sentinel* which had been sent me in my absence, and in an article these words were quoted from Science and Health: "Every law of matter or the body, supposed to govern man, is rendered null and void by the law of Life, God" (p. 380). This gave me a new viewpoint and some conception of the teaching of Christian Science, but being much occupied with other things, I gave it little thought. A few months later, however, the truth expressed in these words dawned upon my consciousness.

While making a long journey by rail, and suffering from car-sickness, it came to me quite clearly that the material law which causes suffering is the "law of sin and death" of which Paul wrote, and that the "law of the Spirit of life in Christ Jesus" can make us free from it, now as of old. With this understanding came relief; and I realized that I had found the truth. When I reached home, I reread the *Sentinels*, which I had kept. I laid aside medicines, and commenced to apply the slight understanding I had gained to each discord that presented itself. I gained steadily, and a few weeks later made an equally arduous railway journey with no return of car-sickness. I also entered upon the duties of another school year without fear. I studied the Bible, with Science and Health and other Christian Science literature, and in a few months was in better health than I had been for several years.

An acute illness which came to me at this time was overcome so quickly as to be a noteworthy instance of spiritual healing. I was taken suddenly one morning, the symptoms resembling those which had characterized my illness the previous winter, except that they were much aggravated and there was the complication of severe throat trouble, high fever, much pain, etc. I sent a message to a practitioner in Rutland, several miles distant, which reached her in the afternoon. By the next morning there was a very marked improvement, and the following day I found myself quite free from pain, the alarming symptoms having disappeared, and with a sense of peace that cannot be put in words. The next day I took charge of my classes, and although I had no rest until ten in the evening, all traces of the throat trouble had disappeared. I continued to do my usual work with no ill effects, and in a short time felt as well as before. Considering the duration of previous illnesses of a similar nature, and the long periods of prostration which followed, the quickness of this recovery was marvelous to human sense. Several other demonstrations have been made for me, colds and other ailments being quickly and entirely overcome. I was instantaneously healed of a painful sensation in the chest, caused by inhaling smoke while escaping from a burning building. My loss in this fire was considerable, but the experience became a lesson from which I learned the omnipotence of Love. All my needs have been supplied, and "goodness and mercy" have indeed followed me each day. For the past eight months I have taught in both day and evening school, and am in better health than I was when I took the position.

I also wish to testify to the great benefit which my sister has received from Christian Science. An invalid for many years, and suffering from a complication of diseases, she had tried many physicians and various remedies without avail. For a long time she had been confined to the house, able to sit up but a few hours each day. When she commenced to read Christian Science literature, there was an immediate change for the better, and after taking absent treatment for a short time she was enabled to drive a distance of eight miles and have a large amount of dental work done with no ill results. She has continued to improve, having gained steadily in strength since taking up this study; and while all discordant conditions have not as yet entirely vanished, we are most grateful for the large measure of freedom that has been gained, after material means had failed. We rejoice in knowing that Truth will ultimately destroy all error.

I am deeply grateful for the physical healing wrought by Christian Science, yet it is but one of the manifestations of Truth in human consciousness. I am even more grateful for the spiritual understanding whereby we learn that evil is unreal, that good is infinite. Though my understanding is as yet so imperfect, it is freeing me from the sorrow and bitterness that are born of the belief in evil, and is giving in their place the joy and gladness of love. I am grateful to the "one supreme and infinite God" (Science and Health, p. 497); to Christ Jesus, who laid down his life for us daily and hourly that we might have life and "have it more abundantly." I am grateful to her who in this age has been pure enough to see God, good, brave enough to voice the truth though a world of error opposed, and loving and patient enough to continue to labor for mankind under whatever difficulties. I am also grateful to all those whose loving help has aided me in taking the first steps of the journey from sense to Soul.

ANNIE P. STONE, Plainfield, N. J.

I have been healed of lung and spinal trouble, also of the liquor and tobacco habits, through Christian Science. I had the lung affection from childhood up, and the doctors said it was incurable. We had a fine business in Davenport, Ia., but first my father died of this disease, then my mother, next my sister, and the result was that our business failed. I started to travel, though I did not expect to find health anywhere. I was in a hospital in Chicago three times. Sometimes I was able to work, but very seldom. I went up through Canada, then to New York, and from there to England and to Italy, and often was in the hospitals. Then I went to Africa, and from there to Italy, and back to the United States.

I worked for the U. S. Express Co. in Chicago for three years, and their doctor stated that it was useless for me to take medicine, that it would not do me any good, and that I must go to Colorado if I wanted to live any length of time, or in fact to live at all. I went to Denver and remained there a short time in a hospital, and was kept by the U. S. Expressmen's Relief Association of Chicago. Leaving there, I traveled through Colorado, spending some

Digitized by Google

time in the hospital at Colorado Springs, and then went on to California, where I remained in the county hospital for some time. I was getting so that I could not walk; for besides the lung trouble, I had contracted spinal disease, and could barely move. After being kept by the county there, I wanted to get back to Denver, where I had friends who would give me money to go into the hospital there again, but the doctor said, "You can't possibly get to Denver, and you would only have to be brought back by the county." I, however, left, and walked from San Bernardino to Victor (forty-four miles) and it took me one hour to walk each mile of the forty-four. While there some cowboys took up a subscription and got me a ticket back to Denver. On arriving at the hospital there I had to be put in a plaster cast, but though several kinds were tried none of them helped me to walk. I was in the hospital off and on for five years, and at last the doctor said I would have to go to the poor-farm, and from there to my final resting-place. I was on crutches more or less of the time for three years, and when I got back into the hospital they put me into a cast again, with a weight on each leg, and I was in that condition when I found Christian Science.

A copy of Science and Health was passed around from patient to patient, at the hospital, and after reading this book one afternoon, I realized that I had found the truth. I was healed, and was out of the hospital in one week's time; in another week I cut off the plaster cast, and was quite able to make a trip to Omaha, and to Carroll, Ia. After I was healed through the reading of Science and Health, I came to Portland, Ore., and have been here now nearly three years, during which time I have never had a physician, nor have I had any spinal or lung trouble, and I have been happy and well, and at work. I had never thought I could be well, for my expectation had always been an end at the poor-farm with a pauper's grave. I was not looking for any healing, and never knew that it could be had.

I do not know how to thank God for this wonderful healing, and all these blessings, nor how to express my gratitude to Mrs. Eddy for the grand truth revealed in Christian Science, which no man can buy or sell, but all must find. As our Master says, "Seek, and ye shall find; knock, and it shall be opened unto you;" and I am glad that through Christian Science this prophecy has been fulfilled.—HENRY W. RUGE, Portland, Ore.

Years ago, while taking a course in Bible study, I read Joel ii : 23–26 and marked it "My promise." At that time I had never even heard of Christian Science, but I believed that there were promises in the Bible for every need, and this promise suited my particular needs. For ten years I had been a victim to epilepsy, shut up at home and watched continually every way I turned. The winter I was seventeen years old I was told that if I did not soon get relief I would lose my mind, and night after night I kept myself awake, dreading lest the fatal stroke should come while I was asleep. At last I got relief, but while I never again had the disease in that form, the fear was there and was kept continually before me by every doctor to whom I went. I started out to care for myself, but I had been kept almost entirely to myself for so many years that there was a deep chasm in my life that I did not know how to get across, and my actions and conversation in many respects were simply those of a child. Every way I turned I was continually dipping my feet into the waters of that deep gulf of my former life which it seemed would never be bridged over, and which pressed me back if I wanted to be with others of my age. But for the "promise" I would have become discouraged and given up; and it was there, always ready, no matter how humiliating or how heartrending the blunders I made (and they came thick and fast at times), to help me to my feet to start again. It seemed at times as if I was actually taken by the shoulders and pushed into another kind of work, to show me that I was capable of filling a higher position than I thought; and I could but believe that the time would come when it would be fulfilled.

One dark evening in October, 1898, while returning from work, I stepped into a hole dug by the side of the walk, and suffered serious external and internal injuries. I was up and down all winter, and as soon as it was warm enough in the spring I was sent home. There, after lying in bed three months, the doctor told me that he could not promise me that I would ever sit up again. In 1901, I, however, tried every kind of work I knew how to do, from teaching a country school and having but one dollar and thirty-five cents left at the end of the term, to running a shop by sitting up as long as I could to cut and fit garments, and then lying on the bed and showing the girls how to work; but it was all unprofitable, and in 1902 I went back to the city to learn another kind of work. I broke down before the end of the term, and in January, 1903, was sent to the hospital for an operation. When I got up again my spine was so weak that I was liable to drop down anywhere. In less than a year I was ill again, and the doctors told me that I must have another operation. When I refused, they told me they had done all they could for me. I then came here, and the change was beneficial in that no one here knew what I had been through, so I kept around for a year and a half before breaking down again. Before leaving home I had trouble about remembering things, and it seemed as if the doom pronounced so many years before was forcing itself upon me, so that it was out of the question to undertake any responsible work. Even with what outside work I could pick up, I lived the greater part of the time on three meals a week; but the "promise" was still there, and surely relief would come in some way.

In March, 1906, I had a severe attack of illness, and after some time, by the advice of a friend I went to a Christian Science practitioner. Before long I had learned the truth, that, "because matter has no consciousness or Ego, it cannot act" (Science and Health, p. 368): that God is Mind, and therefore cannot be affected by matter. I was free from the fear I had lived under so long, but as I was still too weak to do much work, I kept up the treatments for about four weeks more, then discontinued them, but kept on with the reading. One day the following July, in an attempt to move to another room I was overcome, and while lying there trying to deny the error, and at the same time wondering how I was ever going to get my trunk ready, the thought came to me, "If you believe in the power of Truth, why don't you get up and go to work?" I got up, and I have never been in bed nor fallen down since on account of a weak spine. Sixteen days from that date I walked over the hills to a mining town nine and a half miles from Deadwood, a distance I had never before walked at any one time, and suffered no inconvenience because of it. At the same time I laid aside my glasses, and have had no use for them since. The gulf in my life is not simply bridged over. It is gone! I do not know when it went. I only know that one morning the following winter I awoke to the fact that it was there no more—a sure fulfilment of the promise that God is ready to give even more than we ask.

I am learning to demonstrate the divine source of supply so that I have what I need, and am thankful to God, and to our beloved Leader for showing me the way whereby the fulfilment of my "promise" was brought about.

MISS FLORENCE GOUCHER, Deadwood, S. D.

I wish to express my gratitude to God for what has come to me through Christian Science. It is two years since this great truth was shown me. I was a nervous wreck,

Digitized by Google

had bowel disorder of several years' standing, besides severe female troubles. After I had exhausted material remedies, an operation was suggested. I then learned through a dear friend of Christian Science, and with mingled hope and anxiety I turned my weary footsteps to the home of a practitioner. After the first treatment a sense of freedom came to me; I began to eat heartily, I could drink water freely, and I slept like a child. After the third treatment I was completely healed. The joy and happiness which came to me and mine, words cannot tell. Since then my three children and myself have relied wholly on divine Truth, and all ills have been quickly overcome. I know by these experiences that we gain the true understanding of God and man, as taught by our dear Leader, and I am more than thankful for the many blessings received.—Mrs. N. Brannan, Austin, Ill.

It is with the greatest pleasure that I express my deep gratitude for Christian Science, and tell what it has done and is still doing for me. Here, in this beautiful city of Berlin, a feast of love has been prepared for us, and many there are who are learning daily of this wonderful truth through the marvelous healing and the blessed influence which Christian Science brings. In the past two years I have had many and great proofs of God's loving care, which has led me to turn from sense to Soul.

One experience, which occurred in the summer of 1908, I wish to relate, for it was to me a most convincing proof that God is an ever-present help in time of trouble. One morning my little daughter awakened with her throat in such a condition that she could not swallow. She had high fever and an eruption over the entire body. I was much alarmed, and at once telegraphed to a Christian Science practitioner, as she was absent from the city. The child began to improve immediately and was soon out of bed. I learned the following day that a child in the same house had been stricken with the same complaint, and that a physician had pronounced it a contagious fever. They depended on *materia medica* for relief, and their child was confined to her bed four weeks, and my child not one day. Later, after my daughter was doing well, was up and around, with a splendid appetite, she complained of her neck and her feet. I again appealed for help, and this time our dear friend came at once to us, and took the child home with her, to a country place. This was on a Friday, and the following Sunday I went to see her. It was an hour's ride from the city, and I was met at the station by happy faces, the child bounding with health and joy.

I am very grateful to God for all these blessings,—to eternal Life, Truth, and Love, for the revelation of Truth to this waiting world. I am also most grateful to our dear Leader, Mrs. Eddy, and I hope I may each day grow more worthy.—Mrs. Nona Lee Lane, Berlin, Germany.

For a long time I have felt it my duty to express my gratitude for what Christian Science has done for me. While I was so set against it that I would seldom go to church with my wife, who was a strong believer in Christian Science, I was taken with a very severe attack of throat trouble. I said to my wife that I thought I should have to get the doctor to lance the swelling, as he had done on former occasions, but she thought I had best wait until the morning. My wife's sister and her husband, who were with us at this time, were both Christian Scientists and they, too, advised me to wait. I consented, and soon went to sleep. These relatives and my wife then declared the truth for me, and when I awoke the next morning I was free from the trouble and I have not had a return of it since. This was some four years ago, and it changed my thought so that I went to reading Science and Health to find out, if I could, what there was in it; and I have continued to read it ever since. I felt that nothing but the truth could have brought such spiritual uplifting and such lasting results as came to me through this experience. It was some time, perhaps a year, before I fully appreciated what it meant to me, but I have had no desire for anything except the Christian Science help since that time.

For two years my wife had wanted to unite with the church, but would not on my account, as I did not believe in Christian Science, but now we have both united with it, and Christian Science has done much for me and my family. I have had other ailments, such as rheumatism and kidney trouble, and all have been overcome through Christian Science. I wish to express my heartfelt gratitude to our beloved Leader, Mrs. Eddy.

Orlando P. Bruxson, Janesville, Wis.

For the manifold blessings I have received in Christian Science I wish to express publicly my sincere gratitude. Christian Science was presented to me at a time when this world, with all its material remedies, offered not one ray of hope. For several years I had been half sick, and during this time I had been treated by many physicians. Following the advice of two of the best of them, I had an operation performed, and had not fully recovered from this when two members of my family were taken very ill, one case proving fatal; and the combined effects left me a complete wreck. It was then that Christian Science was presented to me and I took my first treatment, four years ago in April. I knew that nothing less than divine power could meet my need. The result was that stomach and bowel trouble of many years' standing was quickly overcome, while other much more serious conditions yielded very slowly.

For the encouragement of those who are having a slow healing, I will say that many weeks would pass at a time with seemingly no progress. I could not see one step ahead of me; all I could do was to do my very best every moment, and trust to Truth to guide me out of the wilderness of mortal beliefs. Before I was healed I had to learn that fear, discouragement, self-pity, and hate must be wiped out of my consciousness. It was not hate of any person, but vexation because of my slow healing. After I had learned that these errors had first to be overcome, and how to work for their overcoming, my progress was much more rapid. Surely God is our refuge and our strength. Neither tongue nor pen can ever express my gratitude to God, to the great Wayshower, and to Mrs. Eddy for this truth which heals all disease; also for the love and patience with which I have been helped.

Mrs. Delia Richardson, Grand Rapids, Mich.

About two years ago I was greatly benefited by the power of divine Love, and therefore feel impelled to send this testimony, hoping that it will help some other sufferer to gain freedom. I thank God for being whipped into line, as it were. Though greatly prejudiced, to please a very dear brother who had been much benefited by Christian Science, and as a last resort, I went to a practitioner, who relieved me at once of a serious heart trouble. The other disorders were slower in giving way. I was a physical wreck from liver, bladder, and kidney trouble in the worst form. Kind physicians had done all they could for me, but without success.

I love Christian Science, for it saved me in my dark hour; and I love the noble woman who discovered and declared the power of divine Truth to a suffering world; but, more than all, I love God for the great spiritual uplifting which came, driving out all fear and enabling me to realize His ever-presence, sustaining and supporting me in every hour of trial. If through reading this testimony

Digitized by Google

even one sufferer can realize the power of God to heal us, I shall be amply repaid. I am daily striving to walk in the footsteps of the Master, and though I have yet many errors to overcome, I have had some most wonderful demonstrations. I have learned that God is an ever-present help in time of need, and we know that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). There has been implanted in me a growing consciousness that fails not, and by faithful application I shall be enabled to solve the problems as they present themselves.

MRS. MATTIE A. HOWELL, Wills Point, Tex.

Two years ago my attention was directed to Christian Science through the marvelous healing of a very dear friend. Shortly after this I read a book written against Christian Science, and this further aroused my interest. I borrowed the book written by Mrs. Eddy, "Science and Health with Key to the Scriptures," and read it through carefully. I was surprised not to find in it any of the extraordinary things of which I had heard and read. I did not then understand its teachings, but I rejoiced that a woman had done something of this kind.

I had always longed to be an earnest Christian, but although I had gone through all the forms and ceremonies and tried my best in the orthodox way, I did not like to read the Bible, nor did I love Jesus as I wished to do. I then began to read the Christian Science *Sentinel* and *Journal*, and the articles made me feel much happier; still Christian Science was so new to me, and so different from anything I had ever known, that I thought it would be best to ask some of my church friends about it, and their ignorance of the subject, their bitterness and prejudice toward it, made me more interested than ever. Then I met some Christian Scientists out West, and their kindness, broadness, cheerfulness, culture, and common sense appealed to me. I liked the atmosphere of their homes, and I began to realize that these people had something in their lives which neither wealth, family, nor position could bring. I wondered what they had that gave such peace to their homes, such kindness to their deeds and such joy to their faces.

So I began seriously to investigate the subject, to study Science and Health, and I was surprised to find that Christain Science satisfactorily answered questions which I had been asking all my life. I was surprised to find one thing in this world that was altogether beautiful, without prejudice, without fear, with only love and good will toward all; surprised to find at last one thing which came up to my highest ideals in every respect. I had suffered from insomnia for many years, but I was relieved of it by having one treatment in Christian Science, and by the reading of the 91st Psalm. My children have been healed of chills, of torpid liver, and various other ills.

I can truthfully say that I am more grateful to Mrs. Eddy than words can express for the joy that has come to me in my first faint concept of a good God, a just God, a loving Father; for the hope that it brings into my life through the understanding of how to work out my salvation here and now, and of how to help my brother. Christian Science has taken away from me the dread that I had of death. I feel grateful to Mrs. Eddy for the Christian Science Sunday School, where our children can learn only good; for the *Sentinel* and the *Journal* and the *Monitor*, and for many other blessings which have come to us through the understanding of this wonderful truth.

MRS. EMMA GALLOWAY CRAFT, Memphis, Tenn.

About eighteen years ago, Christian Science came to our family through the healing of a cousin, after years of invalidism. My mother, soon after learning of this cousin's healing, purchased a copy of "Science and Health with Key to the Scriptures," and though from the first reading I accepted Christian Science as the truth, my study and application of it was but desultory for several years. Physical suffering finally caused me to make a more determined effort to understand this healing truth, and almost immediately it was revealed to me that my lack of understanding was in a great measure due to my failure to take a decided stand for Christian Science. While listening to the remarks of an earnest student of Christian Science and a faithful pioneer of the work in this vicinity, I made the mental resolve to stand on Mrs. Eddy's platform, whether my physical ills were overcome or not, because I knew it to be the truth. The result was the almost instantaneous healing of neuralgia, from which I had suffered more or less from childhood, and which had at that time reached a serious and critical point, holding me in bondage to a powerful drug for relief. From that time to the present I have had but one attack of the disease, and that was of but a few hours' duration.

Since Christian Science has taught me to look to God for my health, strength, intelligence—for everything that presents itself as a need—I have had many beautiful proofs that the Scriptural promises are for us to realize today. I am rejoicing daily in a clearer understanding of God and of the true mission of Christian Science. In cheerful, willing service in the Cause of Christian Science, I feel I can most effectively prove my gratitude to God for the gift of divine Love, and to Mrs. Eddy for her life of purity and devotion.

LEILA BUCKLIN FRENCH, Camden, Me.

It is with deep gratitude to God, and to Mrs. Eddy for Christian Science, that I send this testimony. I came here in September, 1907, to mortal sense a hopeless invalid. I could not read more than a paragraph at a time; I could not write even a note, and had to use all the will-power I possessed to do the least bit of sewing. There was a settled gloom over me, it seemed impossible for me even to smile. I had lost all interest in everything that was going on around me, and I did not know what a night's sleep was. The struggle was long and tedious, and required great patience on the part of the practitioner, but at last her efforts were crowned with success. I can now read any length of time, I love to write letters, I sew and work steadily, and do not know what weariness is. This I think is wonderful, as I am sixty-eight years old. Best of all, there has come to me great happiness and peace.

There is still much to be overcome, and but for the ever-presence of divine Love, I should lose courage; but God's precious promise is ever sure: "I the Lord thy God will hold thy right hand, saying unto thee, Fear not; I will help thee."—LOUISE A. SLUSSER, Alpena, Mich.

[Written for the *Sentinel*.]

A PROMISE.

GERTRUDE RING HOMANS.

And their works do follow them.—Rev. xiv. 13.

"THEIR works do follow them." John, loved of him
Who taught as only thought inspired can teach,
Charged these few words with warning power to reach
Beyond the rippling sound of shallow speech
Or flow of years, a tidal wave to rim
Time's tossing sea and beat upon the beach.

"Their works do follow them." Mere change of scene
Transforms no savage to a gownsman staid.
'Tis thus our works shall follow, undelayed,—
Pursue us with their methods habit-made.
O sermon! be they lofty deeds or mean,
These works that follow when earth-concepts fade.

FROM OUR EXCHANGES.

[*British Congregationalist.*]

In times like the present it seems to us that we have to judge things by their fruits and tendencies. The issue of constant criticism is unbelief, and unbelief threatens the finest flowers of civilization. If we could perfectly reconstruct the past, and solve every problem of origins, nothing would really be accomplished, unless some fresh divine power were brought thereby into life. What men really need is the power to lift and keep themselves above the animal plane. They are in constant danger of losing the soul, of extinguishing the tiny spark of divine light that glows within them, of becoming recreants to their own ideals and to the highest expectancies of God and man. They feel in themselves the pull of the earth and of the beast. Their cry is for liberation and for conquest. When truly awakened, they pant for forgiveness, for cleansing, for holiness, for God. How can they live in perfect obedience to the moral law revealed in conscience and in Christ? How can they bear up under pain and loss, and old age and death? How can they subdue the self-regarding instincts and live generously, even nobly, for men who repay goodness with contempt and the cross? These are some of the problems which every person has to face and solve.

[Lyman Abbott in *Outlook.*]

Religious faith is taking on a new direction. We are becoming more interested in banishing hell from earth than in escaping from hell hereafter; more interested in bringing the kingdom of heaven on the earth than in preparing on the earth for a kingdom in a future heaven. We must frankly recognize the change. We cannot recover the lost vision, rebuild the celestial city, go back to the medieval theology or the medieval images. We must go forward, not back. Our faith in a future immortality must grow out of our experience of a present immortality. It must be more Christian, less apocalyptic; less like that of John the seer, more like that of Jesus the worker. We must get our faith in immortality by living the immortal life.

[*Congregationalist and Christian World.*]

The foolishness of divisions does not lie in the fact of separate organizations, for the work of the followers of Christ can be better done by independent communities in fraternal relations than by one huge hierarchic trust. It lies in the claim of each section either to be the only genuine church, or at least to be superior to all the others. "We are the church, you are sects," will not be received as the gospel by those called sects to whom it is proclaimed as good news. One of the evidences of the advance of Christianity most welcome to good men is the rarity in our times of the formation of new sects. Hardly a single one of importance has appeared thus far in the twentieth century.

[*Christian World,* London.]

The man whom Christ has captured, who has learned his secret, who through him finds himself in wholesome relation to God and his fellows, will gain an ever surer judgment of the importance of things. It is a glorious secret for us all—for the philosopher, for the merchant in his affairs, for the housewife in her duties. Possessing it, we shall not readily be put out with trifles; no, nor with things that are not trifles. We know what are the fundamentals by experiencing them. The heart that trusts, that prays, that loves, that serves, has got hold of life's best, and can never be robbed of its treasure.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel.*

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel.*

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

A special pamphlet, comprising the two well-known articles by Mrs. Eddy, "Personal Contagion" and "What Our Leader Says," in large type on special paper, silk-sewed with overhang cover.

The Christian Science Hymnal, revised and enlarged, containing some fifty new hymns.

A new and desirable photogravure of The Mother Church edifices and the Publishing House.

For prices see opposite page.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS; each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 35 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.
Ten copies to one address, each, one year, $1.90; six months, $1.15.
Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.
Fifty copies to one address, each, one year, $1.50; six months, 90 cents.
These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.
Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.
To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.
Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Of the industrial training at the Washington Allston School of Boston the master says: "The boys will be trained in the arts and crafts that pertain to home-making and will be made to see that thus they can construct a home for themselves, instead of being left hopeless with the thought that without money they cannot have a home. The possibilities are almost legion for the young man, who has grown up and has a little spare time, to be independent. This work teaches the dignity and the true value of labor, that the difference between good and poor living is not a difference of money but of intelligence. The girls are shown how and how not to decorate, to make a simple but effective and comfortable home. Everything is of solid construction; there is no shoddy."

President Woodrow Wilson of Princeton, in a recent address said: "We are in the midst of a great reconsideration, not of principles, for the foundations of justice and equity remain the same, but of the application of principles. More than that, we are on the eve of such a reorganization of society as will effect a much better and more even adjustment of public and private interests. It will be a great day of moralization when we come fully to realize that no enterprise conducted on a great scale can be a wholly private enterprise, when we come to realize that every duty is in a sense a public duty, that the final standard of conduct is the benefit of the country and the good of mankind."

At the sixteenth annual meeting of the International Arbitration Conference, which held a three-days session at Lake Mohonk, N. Y., last week, more than four hundred delegates were present. The gathering, which was remarkably representative, included some of the best known diplomats, men of letters, bankers, and merchants. The army and navy and other distinguished organizations in various walks of life, European nations, the Far East, Latin America, and even far-away Honolulu sent duly accredited representatives.

The business organizations of Connecticut, as represented in the State Business Men's Association, are planning to press an aggressive movement for the enactment of a public utilities law at the next session of the Legislature. Such a measure was advocated by the late Governor Lilley.

A clerk of a national bank and a treasurer of a savings bank, charged with misappropriation of funds amounting respectively to three hundred thousand dollars and seven hundred thousand dollars, were sentenced in Massachusetts last week to fifteen years' imprisonment each.

A meeting has been held to form an Indiana council in connection with the movement for uniformity of laws among the states. There was an agreement that uniformity could be and ought to be reached on the majority of laws on the statute-books.

The so-called butter trust, with headquarters in Elgin, Ill., is proving a hard proposition for the department of justice, and it is considered doubtful if the Government can take action against it successfully under present laws.

The United States supreme court has fixed Nov. 14 as the date for the rehearing of the American Tobacco and Standard Oil trust cases.

The sixth year of American construction of the Panama Canal ended May 3.

International.

In two years an organization of three hundred thousand English boys, drawn from all classes of society, has been banded together under the title of "boy scouts," not for military service, but for training that will make them not only good scouts and keen observers, but self-reliant, efficient, chivalrous citizens. The idea is now finding favor in America. In order to become a second-class scout a boy must be able to do the following things: Tie four of the following knots in less than thirty seconds each knot: bow-line, fisherman's bend, reef knot, clove hitch, sheet bend; track a deer's *spoor* or a horse's track for a quarter of a mile in not more than fifteen minutes, or, in a town, describe satisfactorily the contents of one shop window out of four observed for one minute each; go at scout's pace for one mile in not more than thirteen minutes; know the scout's law and signs. To become a first-class scout, a boy must pass the following tests in addition to those described above: Point out the direction of different points of the compass from where he stands; make a journey alone of not less than fifteen miles from point to point by walking, riding, boat, or bicycle; describe or show the proper means for saving life in case of accidents; be able to read and write; have at least something in the savings bank; show that he has brought a recruit to the "boy scouts," and has taught him to tie the principal knots; lay and light a fire, using not more than two matches, and cook a quarter of a pound of flour and two potatoes without cooking utensils.

It is considered certain that the chief measure to be discussed during the coming session in the Australian commonwealth will be the progressive land tax. The income to be derived from the town lands will, it is hoped, go far toward refunding the money expended on the defense scheme. The tax imposed on country lands, on the other hand, is intended to be of such a nature as to force the owners either to make use of their land, or divide up the vast tracts of country now used for grazing purposes or not used at all. In this way a considerable amount of extra land will be rendered available for a large number of immigrants.

The Parliament of New Zealand will shortly be asked to sanction the expenditure of a sum up to two million five hundred thousand dollars to enable the government to develop the scheme whereby the control of the water-power services throughout the country will be in its hands. The present system of leasing the water-power results in higher rates, it is believed, than will obtain under government control.

Through a tripartite offer of mediation on the part of the United States, Brazil, and the Argentine Republic, the war crisis between Peru and Ecuador respecting boundary lines is believed to have been averted. It is understood that both countries are ready to accept the offer.

The bomb is no longer the weapon of the orthodox anarchist. At the international anarchist congress at Halle, Ger., last week, at which fifty-seven delegates, representing sixteen countries, including America, were present, a resolution was enthusiastically adopted "abjuring violent terrorism."

The Russian government is preparing a favorable reply to the proposal of P. C. Knox, secretary of state of the United States, for a permanent court of arbitral justice, through an extension of the jurisdiction of the international prize court authorized in 1907 by The Hague peace conference.

The new Tientsin-Pukow railway loan of four million pounds has been signed at the German legation in London. It is divided between German and British syndicates. The railway linking these two points will be one of the most important trunk lines in the Chinese empire.

Secretary of State Knox of the United States has for months been quietly trying to effect an arrangement whereby the perennial boundary disputes of the smaller countries of South America may be settled by diplomacy.

The bill providing for universal manhood suffrage in Japan was rejected by a large majority. Assumed incapacity on the part of the masses to grasp public affairs is the argument advanced.

An international congress in celebration of Argentina's centennial anniversary of freedom was opened May 18.

Industrial and Commercial.

Commercial conditions in every city and town in the western grain-growing states will be changed before 1915 as the result of increases in farm production, if the plans of the dry farming congress, which has headquarters in Spokane, are carried out as planned by the national officers. Experiments in the states where dry farming is practised show that an increase is possible of five bushels per acre at least, and upon the basis of the present acreage this means a total of 166,175,000 bushels additional yearly in the western states alone.

Twenty varieties of Grecian Skyros marble, which has a commercial value of thirty dollars a cubic foot, have been discovered, according to report, in Stevens county, Wash., fifteen miles northeast of Colville. Three of the largest veins have been explored at depth, the colors ranging from deep purple to pure white, other hues being brownish gray and pale gold.

The shipment of seed-oysters from Connecticut waters to the Pacific coast has assumed large proportions. One concern has just consigned eight thousand bushels to a company at Puget Sound. It took twenty-nine freight-cars to transport the shellfish.

The Standard Oil Company, which has approximately seventy thousand employees, has increased the wages of its workmen from six to ten per cent, adding, it is estimated, from six to ten million dollars to its annual pay-roll expense.

A gathering at Chicago of national shippers demanded that the question of proposed advances in railroad freight rates be arbitrated before the interstate commerce commission.

The 9700-foot breakwater which is building at Hilo, Hawaii, will inclose three thousand acres of water and make one of the finest harbors in the world.

Orders for two thousand steel freight-cars have been placed with a Chicago concern by the Grand Trunk railroad.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

"JUSTIFIED BY FAITH."

WILLIS F. GROSS.

WHEN the keeper of the prison realized the power of Truth to deliver those who had been unjustly deprived of their liberty, he came with fear and trembling and fell down before Paul and Silas and earnestly asked, "Sirs, what must I do to be saved?" The reply was, "Believe on the Lord Jesus Christ, and thou shalt be saved." No doubt most people have at some time in their lives asked this same question, and perhaps they have pondered these words of the apostles, wondering what was the true interpretation thereof. The doctrine of justification by faith has been preached for centuries. It has appealed to some as offering an easy way of escape from sin and the effects of wrong thinking and doing. To others it has seemed impossible that the mere fact of believing on the one who is justly considered as the best man the world has ever known, should be sufficient to atone for sin and deliver those who have spent the greater part of their lives in bondage to evil.

No one will deny that there is good authority in the Scriptures for the doctrine of justification by faith. Paul said, "Therefore being justified by faith, we have peace with God through our Lord Jesus Christ." Through faith we are justified in the sight of God and begin to dwell in harmony with the divine Principle of all true being. On the other hand, there are many familiar texts which show that something more than faith, as that term is generally understood, is necessary to salvation. For example: "Faith without works is dead;" "Be ye doers of the word, and not hearers only;" "For not the hearers of the law are just before God, but the doers of the law shall be justified;" "Ye see then how that by works a man is justified, and not by faith only." Many other similar texts could be cited, showing what is necessary to meet the divine requirements.

In favor of the teaching that a man is saved by faith and not by works, may be quoted such texts as these: "A man is not justified by the works of the law, but by the faith of Jesus Christ;" "That no man is justified by the law in the sight of God, it is evident: for, The just shall live by faith;" "For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: not of works, lest any man should boast." If there seems to be an apparent contradiction in these passages of Scripture, it is only apparent, and it disappears in the light which Christian Science is throwing on the inspired Word.

It must be evident that spiritual being is real and eternal, since God is Spirit. It must also be true that the evils which are a constituent part of mortal existence can have no place in the true consciousness of being, wherein all is harmony and discord is unknown. Salvation in its fullest sense means more than to escape from sin, sickness, and death: it means to gain real being, that which rejoices the heart and satisfieth "the desire of every living thing." Salvation is defined in Science and Health (p. 593) as "Life, Truth, and Love understood and demonstrated as supreme over all." To gain this salvation is not only to be delivered from evil, but to come into the conscious possession of good. The true consciousness of being is not something that man has evolved. It is born of God and has no existence apart from Him. Neither can it be said that the good works man has been able to accomplish have earned for him the salvation he desires. He is saved through faith, but the faith is "the gift of God." That which saves from evil is received from God, and this might seem to indicate that all that is required of man is that he believe and accept that which is so graciously bestowed.

Without that activity for good which results in the destruction of evil and so delivers from bondage and lifts thought higher, men cannot have the faith that is required, neither is it possible for them to receive the blessing of good even though it has been lovingly bestowed without measure. Mrs. Eddy writes, "Trustworthiness is the foundation of enlightened faith. Without a fitness for holiness, we cannot receive holiness" (Science and Health, p. 15). The faith that really saves is a living faith, and the expression or manifestation of this faith in human experience is in part the works which are necessary.

Mortals believe that man has existence apart from God, and this error is at the bottom of all erroneous theories regarding salvation and what is required of humanity. The belief that man is separated from God makes possible the belief that he is able to work as he will and that to himself alone is due all the credit of whatsoever he may accomplish. It is also believed that whatever measure of faith he may have in God, it originates with himself. When such erroneous beliefs regarding faith and works are entertained, it is not strange that the teaching of the Scriptures should appear to be contradictory. Works of this character do not save, and such faith as this is not sufficient to meet the divine requirements.

The teachings of Christian Science and the demonstration thereof are based upon man's unity with God. If Christian Science were in harmony with the mortal belief that man has intelligence and being apart from God, it would be as helpless to save humanity as have been the various material theories about life and mind which have absorbed the attention of mortals throughout the centuries that have passed. As the understanding of man's relation to God dawns upon human thought, one gains a truer sense of that faith whereby man is justified and he also comprehends the nature of the works which testify to the efficacy of faith.

All Christian people must admit that Jesus had the true thought of God. His concept of man was also correct, and he knew that man's relation to God is harmonious and eternal. Man's absolute dependence on God at all times is one of the vital points of his doctrine. He said, "I can of mine own self do nothing." If the world's greatest demonstrator of God's power to save humanity from all forms of evil, was constrained to speak of himself in this manner, how feeble must be the claim of independent action that is made by those who have utterly failed when their life-work is compared with that of the Nazarene.

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

Of his works he said, "The Father that dwelleth in me, he doeth the works." Because he understood the nothingness of the belief that man has being apart from God, and because he realized man's absolute dependence upon God at all times, he was able to show forth the intelligence and power of God as it has not been revealed to humanity before nor since. We are justified by the faith that made Jesus of Nazareth the Saviour of the world. It is as impossible to separate this faith from the works that were wrought through him, or to perform these works without the spiritual understanding which he possessed, as it would be to separate the light from the sun or to have an effect without a cause. The faith that truly saves is not born of human consciousness. It is the illumination of spiritual understanding, and spiritual understanding is the gift of God. The things that mortal man appropriates to himself prevent him from seeing the eternal realities of being, but in proportion as the false sense of man is denied and put off, real being is recognized and it is seen that man is indeed "justified by faith" (spiritual understanding).

Spiritual understanding reveals the eternal realities of being, and the appearing of that which is real and good demonstrates the unreality, nothingness, of that which is the opposite of good but claims both reality and power. When evil is seen for what it is, man's deliverance therefrom is accomplished and he is at peace with God. It is as natural for faith to manifest itself in works as it is for the sun to shine. One is not saved by reason of the good works that are accomplished in him or through him. The works testify to his deliverance from evil and his obedience to the law of God. He is justified by faith, and his demonstration of Truth is the proof of his justification.

MOTHER-LOVE.

ANNIE DINSMORE MC CLURE.

In puzzling out the problems of human relationships and trying to disentangle "the interlaced ambiguities of being" (Science and Health, p. 114), it has taken the writer years of sincere study to arrive at a reasonably satisfactory sense of human mother-love and its relation to spiritual reality. Very early in my study of Christian Science circumstances compelled the particular consideration of this department of human life, and it was discerned that much—or, as it then seemed, all—of this boasted sentiment was, in fact, self-love. The creation of another mortal in one's own likeness being the self-division of mortal thought, the love or preference for this offshoot of self was merely self-love, and was shared by all the lower animals up to an age in the offspring where individuality is manifested to a degree offensive to this self-love. This was as far as the solution progressed for some time, and it was obviously inadequate.

Next came the step involved in the work of mentally undoing the seeming links of material creation and relationship, and of rendering to Spirit, God, what is His alone, namely, creative power. I saw that my child was safe only so long as she was held in right and true relation to the one Father-Mother. Lately, through conscientious effort to separate error from my thought of man, I am grateful to have taken another step. Again I was forced to the problem. (How sweetly Love gives us our lessons, until they are sufficient to advance us.) It was a case which demanded unselfish, impartial love, and it was at last given me to see wherein human mother-love reflects the divine, and wherein it fails in this reflection. This passage from Science and Health (p. 286) gave me the leading: "The divine Principle, Love, creates and governs all that is real." The human mother-sense clings to the good, and refuses to recognize evil as in reality belonging to the true selfhood of her offspring,—denies it mentally and audibly. We often hear of human mothers the criticism that they are unable to see any fault in their children. God cannot see faults in His children. Did not Paul say, "Love . . . taketh not account of evil" (Stand. Ver.)?

To deny error and hold as real only the good, is what brings to light the manifestation of the sons of God. It is in this that human motherhood most nearly resembles the divine; and for this reason many a vice-worn man carries in his heart's core the sweetest and most perfect ideal ever held in his darkened sense of life, and finds the sole impulse to better living in the thought of his mother's love. Add to this pure gleam of divinity the universality and impartiality which characterize the divine parenthood, and we shall shed upon each of His little ones who is wandering in a sense of motherlessness, the same vivifying regenerating ray, and bring each orphaned thought back to his mother's breast,—to the Father-Mother God. Then we shall be in the way of bringing to pass God's kingdom on earth, "as it is in heaven."

This breaking of limitations is possible only to those who have learned in Christian Science to separate error from truth, and to accept as real only the perfect image of a perfect Father or creator.

MENTAL PRACTICE.

DENNIS L. ROGERS.

On several occasions our Leader, Mrs. Eddy, has called attention to the new paragraph in Science and Health (p. 442), which reads as follows: "Christian Scientists, be a law to yourselves that mental malpractice cannot harm you either when asleep or when awake." Recently, one not instructed in Christian Science (but assuming to be) undertook to discuss it in public, before a large audience; this particular paragraph being specially singled out and held up to ridicule. This circumstance came to the writer's notice, and led to a careful study of the paragraph which may be of interest to others.

In studying the lines the first thing which the student will note is that it is addressed to Christian Scientists, and that it is admonitory; in other words, it is a message from our Leader, which to loyal Christian Scientists is equivalent to a command, in that it enjoins upon us that we should do something. Now what is it we are to do? We are to "be a law" to ourselves. What does this mean? The sense of the verb "to be" is, according to Webster, "To be fixed, to exist; to have a real state, or existence, for a longer or shorter time." The word "law," is here used in the sense defined by Webster as "the invariable tendency or determination of species toward a particular form with definite properties." To be a law to ourselves, therefore, means simply to remain fixed, to exist, to continue, with an unvarying tendency or determination toward a particular form with definite properties. It may here be asked, What particular form? what properties? To understand this we must get back to our Leader's reasons for sending us this message. The reason why she sends any message to Christian Scientists is because she sees their need of it. She knows that no harm can come to Christian Scientists, either sleeping or waking, if they maintain an alert and obedient attitude toward divine law.

What is mental practice? Mental practice, is thinking; in other words, taking note of the thoughts or ideas manifested to consciousness. "*Mal*" is a prefix of Latin origin, meaning "bad;" therefore malpractice is bad practice. So "mental malpractice" is the thinking of bad thoughts, expressing bad beliefs. Now, if thinking bad thoughts and expressing bad beliefs is harmful both waking and sleeping, who can doubt that a law which would keep such thoughts and beliefs out of consciousness would be of great benefit.

Is there, then, such a law? Mrs. Eddy bids us be this law to ourselves, and to a Christian Scientist the ques-

Digitized by Google

tion as to how we can be a law to ourselves is easy; but the one who undertook to discuss it from a material standpoint, found it a "hard nut to crack." A Christian Scientist would understand that to be a law is simply to be in obedience to or in harmony with the law; and to be a law unto ourselves, which would keep bad thoughts out of consciousness, would be simply to exist, to remain, to continue, with an unvarying tendency or determination toward good thoughts, good ideals; and by holding steadfastly to the "form of sound words" as Paul says, "in faith and love," we exist in such a state of consciousness that mental malpractice, or bad thoughts, can harm us not at all, because they cannot find place or expression in our consciousness. Mrs. Eddy's message, then, which is equivalent to a command, requires much of those to whom it is addressed, and only those who are really trying to be faithful know how much.

To be faithfully obedient to this message of our Leader, is to dwell "in the secret place of the most High," and only those who therein abide can know what this means. To all who do not dwell in that place, our Leader's message is given in an unknown tongue; and ridicule of it is equivalent to ridicule of a rule or law of mathematics by one who has never studied arithmetic. A Christian Scientist can feel nothing but compassion for those who know nothing of the divine protection which Christian Science reveals to all those who desire to be taught of God and to reflect the harmony of His laws.

DREAMING AND WAKING.

RUTH INGRAHAM.

A YOUNG girl, the circumstances of whose life had called her far from home and kindred, suffered much, a stranger in a strange land, from homesickness. She used often to dream of being once more among her loved ones, only to find the awakening to the hard facts of her daily existence increasingly bitter. At last the sense that she was dreaming entered into her dreams themselves, and she disbelieved the reality of these experiences. One night she thought she picked a rose from the bush which grew in her own garden. "Surely now I can prove whether this is real," she said to herself. "If the thorn pricks and gives me pain, I shall know this cannot be a dream rose, but that I must truly be at home again." In an anguish of hope and doubt she pressed the thorns into her hand, and the pain was so genuine that she awoke; but only to find that she held in her hand a pincushion which she had somehow laid hold of in her sleep. How often do we, "heavenly homesick looking away from earth" (Science and Health, p. 365), demand proof through the senses that our poor dreams are real! And as often are we harshly undeceived, for error has no continuity or proper sequence; it lures and deceives itself, and is powerless to fulfil its own glittering promises. We wake from one sense of error to find ourselves in another, often more bitter, seemingly more hopeless of home and heaven; but the pains of sense are more salutary than its pleasures, since they drive us to spiritual things, to the only realities.

As the day dawns through the drawn curtains of his chamber, the sleeper gradually awakes. First his slumbers become lighter, his dreams less fantastic, more nearly in accordance with what he knows as the reality of his waking hours. Presently the growing light completely rouses him, and the fancies that peopled the dark are gone; his consciousness has become that which he has been taught to consider normal. So does the light of Truth, shining steadily, illuminate and rarefy our mortal dreams. Clearer and clearer it dawns on material sense, dispelling illusions with its divine radiance, until that perfect day when we wake in His likeness. Then, in the radiance of "the new heavens and a new earth," "the former shall not be remembered, nor come into mind." False consciousness shall have faded into its native nothingness; and no longer homesick, weary children, seeking to be satisfied with vain dreamings, we shall find ourselves—here, now, and forever—in the home that none can ever really leave,—the very heart of Love itself!

REASON RIGHTLY DIRECTED.

JOHN CARVETH.

THE worldly belief that mind is both good and evil, or that consciousness can possess or partake of the nature of both good and evil, is seen to be erroneous and impossible when examined in the light of rightly and scientifically directed human reason. It is self-evident that whatever is composed of given elements must possess the nature and character of these elements; therefore, if the qualities or elements of both good and evil enter into the entity we call mind, it must partake of and possess the nature of both. It is also self-evident that whatever is unlike and therefore contradicts the nature of the elements of mind, must also contradict the nature of mind, and whatever contradicts the nature of mind contradicts the very existence of mind. Hence it inevitably follows that if good is an element or quality of mind, this mind must possess the nature and character of good. Every rational thinker will admit that evil, in its every essence, element, operation, and nature, is the very opposite and antipode of good, and as effectually denies and contradicts the nature of good as darkness does the nature of light. Then, since evil contradicts the nature of good, it contradicts the nature of mind and therefore contradicts mind and denies it.

From the supposition that both good and evil are real elements or qualities of mind, the conclusion is irresistible that, as good is the antipode of and contradicts the nature of evil, so it would also contradict the nature of the mind of which evil is an element; hence, on the supposition of the reality of both good and evil as elements of mind, we see that both these elements contradict mind or consciousness, and that from this standpoint there could be no mind, no consciousness, and universal and total oblivion would be the only state or fact. As, however, oblivion is not a universal state or fact, so both good and evil are not and cannot be real elements of mind. Even human experience and observation prove this, and clearly elucidate the eternal truth that good is the only real element or quality of mind or consciousness; that, as the sense of good is developed and enlarged in the human mind, this mind is improved.

Who will question the proposition that the mind of the man most imbued with and governed by wisdom, purity, peace, patience, harmony, holiness, honesty, morality, meekness, kindness, gentleness, charity, love of humanity, and kindred qualities,—all elements of good,—is the mind that not only does the most to advance and uplift mankind, but brings to him who has it the highest earthly blessings. Again, if evil is allowed to develop and grow in a human mind, that mind is impaired. The human mind imbued with and governed by hate, envy, jealousy, greed, passion, appetite, selfishness, dishonesty, and kindred traits, is devoid of that wisdom which distinguishes man from the lower animals. Since mind is intelligence, these qualities of evil are the veriest contradictions thereof, and when they are developed to their seeming limit they degrade mentality and dehumanize men.

Thus we discern that good is the only real element of mind or consciousness, and that the belief in the reality of both good and evil is neither mind nor man. As the belief in evil is cast out of human consciousness as a quality of being, the sense of good is correspondingly enlarged and improved, and this process of growth must and will, in the light of Christian Science, continue until

Digitized by Google

good is found as the all and only of intelligent existence. In this Christianly scientific reasoning we learn that as good can be the only element of divine Mind, good and Mind are one; having the same nature, they have the same being. This Mind, or good, is the one infinite consciousness. A limited sense of Mind is ignorance thereof, and ignorance denotes the absence of Mind in human thought. As the light is impaired or limited, darkness appears to the exact extent that the light is withdrawn; but this darkness does not possess a single ray or element of light. There is but one process by which darkness can be removed, and that is by the increase of the light.

As good and Mind are one, the impairment or limitation of the human sense of Mind is the impairment of good, to this human sense. As lack of Mind is ignorance and the lack of good is evil, it is clear that ignorance and evil are also one, and both are gradually eliminated by the same process—the improvement of the human sense of divine Mind, which must go on until the falsity of human sense is wholly extinguished through divine illumination. This improved sense or understanding of divine Mind, or God, can be gained in a demonstrable degree at this hour by an intelligent, honest, and patient study of the Bible in the light of its spiritual interpretation as given in "Science and Health with Key to the Scriptures" by Mrs. Eddy.

Christian Science unmistakably proves that evil has no real substance or existence, and that what it seems to have is given to it by the belief in the limitation of Mind or good. This scientific apprehension is gained only as the absolute correctness of Christ Jesus' statements is proved in the healing of sickness and sin and the moral and physical regeneration of men. This spiritual healing, as practised by our great Master, is seen in Christian Science to be not a supernatural exhibition of divine power, but an eternal manifestation of divine law.

THE ADVANTAGE OF KNOWING.

ALEX. ALDERSON.

WHILE traveling across the desert from Khartoum to Wady Halfa, a party of us were chatting together, and one man seemed to be particularly interested in the mirage which presented itself before us. Illusion though it was, it certainly was exceptionally beautiful, representing as it did, water, palm-trees, and hills, and especially so by contrast with our surroundings, as the only things visible on the desert from our carriage windows on either side were a few large mounds of a rocky nature. At last I asked this passenger what made him so interested in the mirage and why he wanted to know so much about it. He answered, "I made this trip up to Khartoum not ten days ago, and in passing this part I saw all this water, etc., and never knew that the appearance was false. Had I not met you this time and had the phenomena explained, I might have lost one of the most interesting features of the trip."

It came to me at once what an advantage this man had in being able to accept the truth when it was explained to him, for at first he had been quite incredulous about the water in the mirage not being real. Many of us were in a similar position when the truths of Christian Science were first presented to us, and what advantages those of us have reaped who have been able to accept them! The lesson conveyed by this incident of the desert gave me food for thought for some days; so I "pass it on," with the hope that it may be equally useful to some reader of the *Sentinel*.

It is the big acts in life that round it out in its fulness, but it is the wee acts that make it sweet.

PHILLIP O. PEIRCE.

SELECTED ARTICLES.

[Judge Clifford P. Smith in *The Christian Science Monitor.*]

Christian Science has now been known and taught long enough for its effect on a second generation to be observed. When this Science is grasped by an adult, displacing beliefs to which he has long been accustomed, it gives him a new world; the world of the material senses is exchanged for the world of spiritual sense. The quickness and completeness of this change vary with different students, but any one who has formed the impressions of childhood without the teachings of Christian Science must have accepted as truth much that Christian Science rejects as error; and this must be in large part uprooted and cast out before the spiritual view of things becomes more natural to him than the material. In his talk with Nicodemus Christ Jesus likened this process to being born again.

On the other hand, children who develop with the knowledge of Christian Science learn less which must be unlearned. Having the understanding of Christian Science by which to test everything offered as knowledge, they learn the lessons of human life for what they are worth in the eternal scale of values. To them heavenly things are normal and natural, and they can therefore say or think, when confronted by earthly things, "We speak that we do know." This enables such children to obtain an education of the most practical character.

Human life appears to be mainly the pursuit of happiness. Those who seek it in wrong-doing have no right to find it; and they find none that lasts. Those who seek happiness in right-doing are entitled to find it; and they do find it when they know how to do right. The amount of happiness that enters one's life depends much on one's estimate of joy. It depends also on his philosophy toward that which threatens his happiness. These depend chiefly on his understanding of reality; and this is given by Christian Science. As this understanding deepens and widens with the third and fourth generations, error will have fewer witnesses, and it will be progressively easier to be overcome "until," as Mrs. Eddy writes on page 67 of "Retrospection and Introspection," "the false claim called sin is finally lost for lack of witness."

This scientific prophecy hints at the meaning of a statement which occurs between the second and third commandments of the Decalogue, "For I the Lord thy God am a jealous God, visiting the iniquity of the fathers upon the children unto the third and fourth generation of them that hate me." Finding these words along with the Ten Commandments, adults as well as children wonder what they can mean; for no one who has not been taught to do so will believe that divine Love can make one person suffer for the sins of another. Christian Scientists accept the Ten Commandments and they do not ignore these words, but they interpret them consistently with the true idea of God as revealed throughout the Scriptures, especially in the New Testament.

In human experience it does seem that an individual may suffer without any fault on his part. What is responsible for this? The only enmity against God and the only adversary to the human race—the only devil or evil—is the false claim and false thoughts that Paul referred to as the carnal mind or the mind of the flesh. Mrs. Eddy has defined the same error as mortal mind or animal magnetism. She says in "Science and Health with Key to the Scriptures" (p. 103): "It is the false belief that mind is in matter, and is both evil and good; that evil is as real as good and more powerful." Now this unreal mind is composed of all the false or bad or material thoughts in the world; and when nobody can be deceived into such a thought there will be no mortal mind. When that time comes everybody will be in the mental state that is spoken

Digitized by Google

of in the Bible as heaven, or the kingdom of God. Of this condition of thought Jesus said, "It is your Father's good pleasure to give you the kingdom." God gives us His kingdom or consciousness by giving us good thoughts, and in so far as we receive or accept these true thoughts we are saved from sin, disease, and death. Any individual is in heaven or harmony whose thoughts are purely spiritual. When a person's every thought is a true thought, is from the divine Mind, he will be one with God as Jesus was; his individuality will be "born of the Spirit;" and we need to remember Jesus' prayer for all, "that they may be one, even as we are one."

Then why does any one have a single bad thought? Especially why do material or sinful thoughts enter the consciousness of one who wants to be spiritually-minded? Paul said, "We are members one of another." It would be easier to be spiritually-minded if other people were. The aggregate of unspiritual thoughts forms our temptation; it constitutes evil or mortal mind; and it is in this way that the iniquity of one person or generation is visited on another. Nevertheless, unspiritual thoughts are not true nor real thoughts, and the understanding and practice of Christian Science enables its students to detect and exclude or expel them, with their evil consequences. This is the way of salvation from all evil, not only for individuals but for the human race; and by her discovery of it Mrs. Eddy has rendered a greater service to mankind than any one except the Master whose faithful follower she is.

From this explanation of the words attributed to Moses, it follows that we need to watch our thoughts, not only for our own benefit but for the sake of the whole world. By admitting and harboring none but right thoughts, we shall not only do right ourselves but we shall help everybody else who is not beyond temptation. This is doubtless what Paul meant when he said it was our "reasonable service" to make ourselves "holy, acceptable unto God."

The eighteenth chapter of the book of the prophet Ezekiel shows that he perceived, long before Christ Jesus came to teach the true concept of God, that it was not God who visited the iniquity of fathers upon the sons. Ezekiel declared the divine law to be this: "The son shall not bear the iniquity of the father, neither shall the father bear the iniquity of the son: the righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him. But if the wicked will turn from all his sins that he hath committed, and keep all my statutes, and do that which is lawful and right, he shall surely live, he shall not die. . . . In his righteousness that he hath done he shall live." As the Bible must be read as a whole, this statement by Ezekiel and the statement attributed to Moses must be read together, and both must be interpreted in the light of the fact that God is Love, the divine Principle which, as Mrs. Eddy has written on page 140 of Science and Health, "causeth no evil, disease, nor death."

[Charles K. Skinner in *Lansing* (Mich.) *Journal.*]

It was certainly kind of the critic to go out of his way to "warn the unwary souls of Lansing lest they fall into the errors of Christian Science." Although many Christian Science lectures have been delivered in the Detroit Opera House to crowded houses, although many sinners and drunkards have been reclaimed and regenerated, although thousands of sick have been restored to health through the beneficent work of Christian Science in Detroit, he has neglected all these years to lift up his voice in protest at what he is pleased to call "wiles of the devil," in his home town. Does he think the Lansing people more helpless than those in Detroit, or that the latter are less worthy of his efforts?

The critic made the same mistake in discussing Christian Science teaching that others who are opposed to advanced ideas on any lines have made. It was easy for such persons during the past to decry the steam-engine, the Morse telegraph, and later the electric car, the wireless telegraph, simply because their limited vision said that what it did not take in could not be accomplished. Is there any one so narrow as to believe that infinite Mind, God, will express Himself through the human mind for material advancement, and limit it to a starvation point spiritually? If this is true, what did Jesus mean by these words, "Be ye therefore perfect, even as your Father which is in heaven is perfect"? That a child does not assimilate and put into application certain mathematical rules, does not prove these rules false; that one cannot understand the spiritual teaching of the Scriptures sufficiently to put it into practice, gives him no right to condemn those who prove their understanding by their work.

We are taken to task for saying that "God is All. God is good. God is Mind." What is more reverential than to speak of God as infinite Mind, intelligence, and wisdom? St. Paul speaks of that Mind "which was also in Christ Jesus." The Scriptures speak of God as Love, Spirit, Life, Truth, and the Westminster confession of faith defines God as Spirit, infinite, eternal—wisdom, power, holiness, goodness, Truth. All churches have similar expressions for Deity, why then should exceptions be taken to the terms used in Christian Science?

The statement which our brother quotes from Science and Health (p. 40), "Another's suffering cannot lessen our own liability," seems to excite his indignation. Is it possible that he or any other Christian believes that because of the marvelous self-sacrifice of Jesus upon the cross, a man may go on and wilfully sin up to the last, and through a death-bed repentance escape the penalty for his sins? Could there be any greater selfishness, any more cruel perversion of the great Exemplar's teaching, than such a belief? Christian Science teaches that Jesus came to show men how to live, and do their life-work, not to do it for them. (See Science and Health, page 18.) This is in perfect accord with St. Paul's words, "Work out your own salvation with fear and trembling." "Getting something for nothing" seems to be one of the tricks of the devil to deceive mankind, and is not only used in the daily experiences of human life, but is attempted along spiritual lines. It is no more possible to gain heaven or harmony through the goodness of others, with no effort on our own part to live aright, than to work out a mathematical problem, while giving no heed to the rules governing it.

In closing let me call our brother's attention to Jesus' words, "Judge not, that ye be not judged;" "If ye love me, keep my commandments,"—not a part, but all of them.

[Gray Montgomery in *La Junta* (Col.) *Democrat.*]

Cultured and deep-thinking men and women of all professions and ranks of life are accepting the teachings of Christian Science and enjoying its benefits. Any one who has practised Christian Science knows that it is the opposite of mental suggestion or hypnotism. Hypnotism is the erroneous influence of the carnal mind. Christian Science healing is the effect of pure exalted prayer, the result of a realization of God's presence, power, and love. The practice of hypnotism is a complete departure from the teachings of Christian Science, hence it would be an utter impossibility for any one to practise hypnotism and be a Christian Scientist.

The teachings of Christian Science are based wholly upon the Scriptures. The old Greek philosophers were pagans, and their teachings were at variance with the teachings of the Bible; hence Christian Science could not have been "borrowed from the old Greek philosophers," as our critic declares. Mrs. Eddy's discovery of Christian Science came to her as the result of many years of earnest

Digitized by Google

study of the Scriptures and of consecrated search for Truth. Through the practice of Christian Science, sickness is healed and the patient is morally reformed and cleansed of his sins. In fact, sin causes disease, and must first be cast out before the sick person is healed. It is emphatically the purpose of Christian Science to destroy sin; and every genuine Christian Science healer shows his patient the necessity of overcoming sin in order to be healed. Mrs. Eddy says (Science and Health, p. 404); "Healing the sick and reforming the sinner are one and the same thing in Christian Science. Both cures require the same method and are inseparable in Truth."

[John L. Rendall in *Dubuque* (Ia.) *Herald.*]

It is very clearly recognized by Christian Scientists that to the human sense of things pain exists and suffering is very real. There is, however, a God-given means whereby pain, suffering, disease, discord of every name and nature, may be scientifically overcome. It is the means provided by our beloved Master, Jesus Christ, which is amplified and emphasized in the teachings of Christian Science as contained in its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Our critic erroneously places Christian Science under the category of "religious freaks." He cites the methods of various classes of religionists, and by inference attacks the validity of Christian healing as practised by Christian Scientists by introducing hypothetical cases. It is manifestly unfair to attack any one's religion by implication and innuendo. It has been my experience during a number of years that when these supposititious cases attributed to Christian Science were ferreted out, they proved to be not Christian Science cases at all or to have no existence whatever save in an overfertile imagination. Those who know what Christian Science is, know it to be an exact, satisfying, and reasonable religious teaching, embodying and making practical the highest ideals of Christianity.

[W. S. Morris, Jr., in *Farmville* (Va.) *Herald.*]

All Christian Scientists are prepared to put to practical test the teachings of Christian Science in so far as they may apprehend and understand them, but this test of their knowledge of Christian Science does not consist in attempting foolhardy feats, but must be earnest, honest efforts to lift the burden of sin and suffering for themselves and others through obedience to the commandments of Jesus Christ, and in a spirit of humility and meekness endeavor by their lives to bring to this sin-sick world a fuller knowledge of the teachings of Jesus Christ, whereby men may obtain present salvation from sickness and suffering as well as from sin. It is recorded in the New Testament that the devil took Jesus up into the holy city and set him on a pinnacle of the temple and tempted him to cast himself down, and that Jesus said to the devil, "It is written again, Thou shalt not tempt the Lord thy God." Would it be wise for any body of Christians to forget or ignore this example of the Master, and in opposition to the same attempt to do that which he put from him as a temptation from the evil one?

[Alfred Farlow in *Everett* (Mass.) *Republican.*]

It has been said that the best way of opposing Christian Science "is by helping men to see how much more desirable is the faith of the church." As a matter of course, if one's religion is true and practical it is possible to show this fact by one's works, and thus win a following by perfectly legitimate means, for the Master said, "By their fruits ye shall know them." However, before declaring any particular form of religion to be an "imposture," it is well enough to make sure that one's standard of measurement is correct. Christian Science may with safety to itself be tested by God's Word. Its premises are the exact words of the Bible and all its deductions are consistent. It is not claimed that the Christian Science text-book is "actually superior" to the Bible. It is what its name indicates, a "Key to the Scriptures;" *i.e.*, it is the Christian Scientist's commentary. Our critic comments upon the Scriptures, but does that signify that he considers his writings "actually superior" to the Scriptures? Such a claim would be on a par with that which he brings against the Christian Science text-book.

Our critic declares that Christian Science "uses Christian terminology, professes reverence for Christ and the Bible," but with "fantastic errors." How does he account for the fact that Christian Scientists have a more lively interest in the Bible than they did while members of other churches. They love it more than ever before and they are now able to heal sin and sickness through the increased knowledge of Truth which Christian Science has afforded them.

[Frank Bell in *Meadville* (Pa.) *Messenger.*]

If it be true, as stated in the printed summary of a recent speech, that seventy thousand persons believe in Christian Science, the opinion of one man to the contrary is not necessarily conclusive. There are, as a matter of fact, many times that number of persons who not only believe in Christian Science, but who know that it is true, because they have not taken the word of somebody else either for or against it, but have tried and proved for themselves its efficiency in the overcoming of sin and disease.

I note that at one point in the speech Mrs. Eddy is referred to as the "sole inventor" of Christian Science, while later on it is averred that "the whole system was cribbed" from some one else. One of these assertions must be untrue, and the fact is that both are. Mrs. Eddy does not claim to have invented anything, but to have rediscovered to this age the Principle by which disease and sin were healed by the Founder of Christianity, who said: "He that believeth on me, the works that I do shall he do also." Whether or not she has done so is not to be proved or disproved on the platform, but in the hearts and lives of those who stand in need of the healing and saving "works" of Christians imbued with the Mind that was in Christ Jesus.

The best evidence of the effectiveness of Christian Science treatment is in the growing army of those who use it. Parents who have been healed in Christian Science of diseases pronounced incurable by physicians, naturally prefer to have like treatment for their children. If the fact that a few children have died under Christian Science treatment is an argument against this form of treatment, what must be said of the immmerable thousands who die under the treatment of *materia medica?* Certainly more children have died as a result of blundering administration of drugs than as a result of failure to apply effectively the methods of Christian Science; yet that fact is not held up as a ground of indictment of the medical profession. Our clerical friends would resent the suggestion that their system of theology is all wrong because now and then they fail in their efforts to "save a soul."

[Editorial in *Greensboro* (Ind.) *Graphic.*]

The best way to make the Cause of Christian Science grow in this community is to attack it after the style of the man brought here by the Protestant ministers to "expose" it. There are many steps in the process of reasoning followed by the adherents of Mrs. Eddy, and there are many things in the teachings of modern Protestantism that are yet unexplained and must be taken by faith or not at all; but it does not argue that a thing is false because we do not understand it or are not able to explain it. We do not know why the sun shines, and only theory tells why its

Digitized by Google

heat produces certain results, but are we justified in denying the existence of the results because we do not understand?

The belief in Christian Science produces certain results in those who believe in it and in those who practise it, and they have occurred right here in this city. It is only the wilfully blind who do not see. The intolerance of others who do not believe will not destroy Christian Science, and persecution of the band of women in this city who compose the local branch will raise up for them friends of whom the persecuting ministerial association dreams not.

[James D. Sherwood in *Eagle Pass* (Tex.) *News-Guide*.]

Our critic cannot measure Christian Science accurately by his yardstick, for if he only understood the teachings of Christian Science he could make proof of his understanding by following Christ Jesus in doing the works of healing the sick, and recall the words of St. James: "But wilt thou know, O vain man, that faith without works is dead?" Humanity today is demanding a return of the demonstrable faith which accords with the promise of the blessed Master, who said: "He that believeth on me, the works that I do shall he do also." Christian Science is accomplishing this today. By its healing ministrations sin is abandoned and disease is demolished, and men and women everywhere are getting to know God aright, and are giving thanks for His unspeakable gifts and loving-kindnesses.

A gross materialism cannot correctly fathom the meaning of the record of creation given in the first chapter of Genesis, wherein it is declared that God made man in His image and likeness, in the likeness of Spirit; that God made all things, and saw everything that He had made, and pronounced it "very good." God finished His work, and He left nothing to be made. Matter, sin, disease, and death are not mentioned in the Elohistic record of creation, and therefore they are not of God, nor for man made in God's image and likeness. St. John has said: "All things were made by him; and without him was not any thing made that was made." Christ Jesus was engaged in healing the sick, reforming the sinner, and raising the dead, and of him it was said that he had come to destroy the works of the devil.

If there exists between Christian Science and other organizations such a great difference as our critic declares, and if Christian Science is seen to be doing the works of healing that were required by the great Master, would it not seem advisable for our opponents to come to us, in a friendly spirit of brotherly kindness, to make inquiry into the teachings and practices of Christian Science, and thus learn how closely they conform to the teachings of the great Teacher, Christ Jesus? If Jesus had followed the teachings of the Pharisees, he would not have been stoned and maligned and crucified; but then the earth would have been deprived of Christianity and its healing Christ, and there would have been no progress made heavenward. Christ Jesus openly rebuked the Pharisees and suffered martyrdom, and his true followers may expect the world of materialism to differ with them even as it differed with him; but they will not become discouraged, nor faint beside the way, because others do not believe their report, which is attested by thousands of instances of the healing of bodily infirmities and mental distresses.

[Editorial in *Advertiser*, Blackpool, Eng.]

The Christian Science Monitor, which is published in America and localized for English reading, is a really wonderful publication. Both in quantity of matter and in quality of printing and get-up, it is highly creditable to the movement

AMONG THE CHURCHES.

LA GRANGE, ILL.

First Church of Christ, Scientist, dedicated its edifice, corner Cossitt boulevard and Catherine avenue, last Sunday [May 1]. The building is of red brick with colonial pillars, the interior being finished in ivory and gold. It has a seating capacity of four hundred and fifty. Services were held at 10:45 in the morning and 3:45 in the afternoon. There was a large attendance at both services, many from out of town being present. The dedicatory address, prepared by the board of directors and read by Avery Coonley, First Reader, was in part as follows:—

On Dec. 27, 1896, after holding services six months as a society, the students of Christian Science in this vicinity organized as First Church of Christ, Scientist, of La Grange, Ill. Services were held in Conservatory Hall for four years, when the new Town Hall was leased. Here we remained until our church edifice was completed. On April 2, 1898, the Sunday School presented to this church the sum of ten dollars "to form the nucleus of a building fund." To this amount was added forty dollars from the church treasury. This fund gradually increased, and in May, 1902, the lot was purchased on which this building stands. Building operations began in April, 1907, and the opening service was held Sunday, Jan. 5, 1908. Many contributions to our building fund were received from friends and coworkers in Chicago and elsewhere. To these friends we return our sincere thanks. The entire indebtedness upon the building at the time of the opening has been paid by the members and congregation of this church. The total cost of this property was $32,000.

As we dedicate this edifice today to our Father-Mother God, we are reminded that, while this building stands as a testimonial of gratitude for blessings received through Christian Science, the real temple must ever be the love for God and their fellow-men manifested in the lives of its members. Christian Science brings to light the fact that God is Love—the eternal divine Principle. Thus God is ever present, and we may become acquainted with Him now and be at peace, as the Bible declares. Through this understanding of God, as gained in Christian Science, the activity of infinite Mind is found to be healing all manner of diseases, and lifting the burden of sin from the life of humanity. Through the operation of this Science man is awaking to his liberty as a child of God, and is entering into the joy of living.

Christian Scientists everywhere are filled with deepest gratitude to their beloved Leader, Mrs. Eddy, who through the discovery of Christian Science has opened the gate of heaven, and who is proving that "the tabernacle of God is with men, and he will dwell with them, and they shall be his people." Her example of unswerving faith in and loyalty to God is an inspiration to the world. May the members of this church, though today rejoicing in some measure of progress, cling to the watchwords watch and pray; may they remember these words of their Leader (Miscellaneous Writings, p. 155): "All power and happiness are spiritual, and proceed from goodness. Sacrifice self to bless one another, even as God has blessed you. Forget self in laboring for mankind; then will you woo the weary wanderer to your door, win the pilgrim and stranger to your church, and find access to the heart of humanity. While pressing meekly on, be faithful, be valiant in the Christian's warfare, and peace will crown your joy."—*Suburban News*.

Give every man thy ear, but few thy voice;
Take each man's censure, but reserve thy judgment.
SHAKESPEARE.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"PROVE ALL THINGS."

THE statement, "Evil is not power" (Science and Health, p. 192), has become to Christian Scientists one of the most familiar phrases of their text-book, and like another statement, "Divine Love always has met and always will meet every human need" (*Ibid.*, p. 494), it has given them great comfort and reassurance in times of stress and trouble. They must not, however, think that mere familiarity with these words is all that is needed in order to enable them to set straight every crooked way, and heal the sick.

On this point, Mrs. Eddy writes in Science and Health, "Expect to heal simply by repeating the author's words, by right talking and wrong acting, and you will be disappointed. Such a practice does not demonstrate the Science by which divine Mind heals the sick" (p. 452). Again, she writes (*Ibid.*, p. 350), "To understand all our Master's sayings as recorded in the New Testament, sayings infinitely important, his followers must grow into that stature of manhood in Christ Jesus which enables them to interpret his spiritual meaning. Then they know how Truth casts out error and heals the sick. His words were the offspring of his deeds, both of which must be understood. Unless the works are comprehended which his words explained, the words are blind." From this teaching we can rest assured that Christian Science is and must be a religion of demonstration, rather than one of supine drifting.

The great deficiency in connection with most religious thought has been the failure of its followers to make practical use of the great teachings which they have received, and it certainly behooves Christian Scientists not to repeat this mistake. Christian Science is founded on the Scriptures, and there is not one of its postulates which cannot be proved, otherwise they would not be scientific; and it is in the proving of these statements of truth that Christian Scientists are of service to their fellows.

Mrs. Eddy in all her writings has insisted with Paul that it is necessary to "prove all things; hold fast that which is good;" and to "pray without ceasing." She is ever urging upon her followers the necessity to be doers of the word, as well as hearers of it; and the apostle James says of such, "He being not a forgetful hearer, but a doer of the work, this man shall be blessed in his deed." It is incumbent, therefore, upon all who truly desire to receive the benefits of Christian Science, as well as to be able to impart these benefits to others, that they not only know, but by demonstration of the Principle and rule of Christian Science prove, that "evil is not power."

ARCHIBALD MCLELLAN.

"MY PEACE."

No characteristic of the present time is more proverbial than that tensity of life which has rendered satisfaction and content well-nigh obsolete, not only in the realm of business, but in the haunts of recreation and the retirement of home. This is particularly true in the domain of thought, where faiths and opinions are undergoing such rapid and revolutionary change. The great deep of human belief is being broken up, and the disturbance of the waters is reported in the surf that thunders upon every shore. With very pertinent interest, therefore, do we recall the fact that the birth of the Bethlehem babe was announced by one of many who sang, "On earth peace;" and that near the close of his ministry Jesus said to his disciples, "Peace I leave with you, my peace I give unto you."

Other creatures seem to find a full measure of satisfaction in their living, but men are ever plunged into the turmoils of discontent, even by their so-called successes. Their empty palms are always extended. They are continually longing for an unnamed fruition, and this speaks for the unfathomed capacity of a higher order of being. True poets are ever voicing this yearning. Says Richard Jeffries, —

> There lives on in me an unquenchable belief that there is yet something to be found, something real, something to give each separate personality sunshine and flowers in his own existence now: . . . something to shape this million-handed labor to an end and outcome that will leave more sunshine and more flowers for those who must succeed. Something real now!

It is the cry of human sense, seeking if haply it may come to its better self; and it is quieted by Love's voice alone.

As understood in Christian Science, Christ, Truth, ministers to all our needs, whether physical or mental. This means life and peace, and these are gained through the faith of Christ Jesus, his apprehension of the divine nature, manifestation, and government. He could say, "My peace," for he knew in whom he believed; and as we follow him we come to know that spiritual serenity is the sequence of spiritual understanding.

Just here, however, we need to remember that the resultant gains of spiritual realization are not in themselves communicable. The Master could convey to his disciples his own apprehension of Truth, and in this way, and no other, could his power and peace become theirs. The belief that by some inexplicable means the fruit of spiritual demonstration can be acquired as a direct gift from God, is rebuked in Christian Science. Christ Jesus could say, "My peace I give unto you," because he was transmitting that knowledge of the truth of being, and that meekness and lowliness of spirit, which lead on to loftiness of life and rest of heart. Indeed, every least disclosure of the divine presence and power, wisdom and beauty, however homely and commonplace the avenue of its approach, may add to our realization of that peace which Christ Jesus assured to his faithful followers.

This is one of the secrets of fine living, that we may find the nourishment of our content and growth in the unnumbered little every-day expressions of the ideal, in every experience that lets in a glint of heavenly light and beauty, for all these serve to enlarge and establish that gladdening consciousness of good to which God's peace pertains. Said the Master, "We will come unto him, and make our abode with him." This is the one peace-bringing event, for it dispels doubt and stills the tumult of the heart, and the latch may be lifted for its coming by so simple a fact, perchance, as the remembrance of a mother's unfailing love, the glint of a star from out the summer's twilight, or the quiet hum of a busy bee as he gathers his honey and "harmless gold." However trifling the circumstance, if it give us a new sense of the nearness of the all-wise, all-loving, all-beautiful Father, we have gained another increment of peace and joy.

JOHN B. WILLIS.

TRUST.

IT is deeply interesting to study the many exhortations to trust which are to be found in the Scriptures, and the wonderful examples of trust in the divine power which appear along with them. The psalmist says of God, "Blessed are all they that put their trust in him," and there are doubtless many who would be glad to know how this trust and its attendant blessedness are to be attained. Say

Digitized by Google

what we may, no person can trust one whom he does not know; or one whom be believes to be bad. The one whom we trust must possess qualities which justify our confidence; all the qualities, indeed, in order to justify perfect trust on our part; and here we are told, "Acquaint now thyself with him [God], and be at peace: thereby good shall come unto thee."

Jeremiah says, "Cursed be the man that trusteth in [mortal] man, and maketh flesh his arm." How often do men bewail their misplaced confidence when they do this foolish thing against which the prophet warns us, and find that in their hour of trial they have leaned upon a broken reed which pierced the hand; not that a brother would wilfully harm one, but that reliance on aught less than infinite divine Principle must fail sooner or later. The prophet who gives this solemn warning does not leave us, however, with the gloomy thought that doubt must be the guardian of our consciousness. On the contrary he says, evidently quoting from the 1st and 2nd Psalms, "Blessed is the man who trusteth in the Lord," and he compares this blessedness to the perpetual verdure of a tree which draws its strength from hidden springs, and ceases not to bear fruit even in seasons of drought. The all-important consideration, then, is to know God, and to know Him better each day.

A splendid example of true trust is to be found in Paul's letter to Timothy, written when the former was awaiting sentence under Nero. He says, "I know whom I have believed, and am persuaded that he is able to keep that which I have committed unto him." Paul's course had not been an easy one, but he had proved that his trust was not misplaced,—when deliverance came to him in the Philippian dungeon, in shipwreck, in many perils; the crowning proof being the healing work which he himself did by the Christ-power. The process involved the disappearing of the Adam-man that never trusts God but believes the serpent, and the appearing of the Christ-man who trusts God because he knows Him.

Our revered Leader has much to say about trust in God. She tells us that Abraham "illustrated the purpose of Love to create trust in good, and showed the life-preserving power of spiritual understanding" (Science and Health, p. 579). This recalls the psalmist's words, "Trust in the Lord, and do good; so shalt thou dwell in the land, and verily thou shalt be fed." Again, she tells us that "to obey the divine order and trust God, saves retracing and traversing anew the path from sin to holiness" (*Ibid.*, p. 20). The greatest unfoldment of trust in good is usually reached through the severest tests and trials, as witness Daniel, when he was thrown to the lions, his companions, who were cast into the fiery furnace, and all those who at a later day refused to make matter their trust, but chose instead to place their entire reliance upon Spirit and spiritual realities.

This unfoldment of trust includes reliance upon spiritual law, in maintaining health as well as in overcoming disease and discords of every name and nature; it includes trust not only for ourselves, but also for those we love, for it is based upon the recognition of God, omnipotent Mind, as everywhere present, governing all by the law of universal harmony. Well may the Christian Scientist say, as did the psalmist, "He is my refuge and my fortress: my God; in him will I trust."

ANNIE M. KNOTT.

UNAUTHORIZED LITERATURE.

WE again call our readers' attention to the fact that authorized Christian Science literature, whether books, pamphlets, or periodicals, is published only by Mrs. Eddy's publisher and by The Christian Science Publishing Society. Christian Scientists should not be misled by books, etc., which claim to be expositions of "advanced" Christian Science, since they are harmful in their tendency as well as unauthorized.

LETTERS TO OUR LEADER.

New York, N. Y., April 17, 1910.

Beloved Leader:—"Love is the fulfilling of the law," and surely gratitude is the first-born of love. I write to express to you gratitude for your life, teachings, and writings, which have for the past six years been all to me. At that time I had reached the place where I did not wish to live, and yet feared to die. This condition was not the result of ill health, but of a life wasted and ill spent, that of a prodigal son in every sense of the words. I had separated myself from my family, and wandered far from home and friends in England. A friend used to speak to me of the truth, but I did not hear him, and he left me alone, feeling, as he told me afterward, that the seed had been sown. About a year later a blow came that sent me directly to him, and he advised me to see a practitioner. I went, although little understanding what for; but a short conversation convinced me that the practitioner had something worth while, and I began to hunger for it. Our text-book was put into my hand, and from that day to this it has been my constant companion.

At once the skies began to clear, and I found that life was indeed worth living, but that it was for me to learn how to live, and that Love was the only way. Within a few weeks a sense of hatred, so bitter that it was even then abhorrent to me, but which held me tightly in its grasp, was absolutely wiped out, and so effectually that not one unkind thought has ever passed since. To me this has been the most wonderful experience, and one for which I am most grateful. Right along it has been a constant and beautiful unfoldment of Love, and of Love's all-power to help, guide, and sustain in the hour of need. Although the way has not been strewn with flowers, by heeding your loving counsel and refraining from counting my bleeding footsteps, I have pressed on, "trusting Truth, the strong deliverer" (Science and Health, p. 226), striving by my life to express true gratitude to God and to His messenger, yourself, by faithfully and obediently adhering to the Principle revealed to us, and by at all times living love in my daily way and conversation. Accept my deep gratitude and love.

Sincerely yours,

WILLIAM R. BEST.

New York, N. Y.

Dear Mrs. Eddy:—May I tell you of a pleasant experience of Sunday last? Two audiences, comprising more than six thousand persons, gathered at Carnegie Hall in this city to hear Bicknell Young lecture. You know what he says and how well he says it; hence you know that every one went away with an increased understanding of reality —God. It was a notable occasion, for the lecture was given jointly by all the Christian Science churches and societies of Greater New York; that is, all in existence when the lecture was planned, as another society has been organized since. The occasion was rendered notable also by the fact that the *Herald*, one of our great metropolitan dailies, devoted three columns to a synopsis of the lecture.

The best of all was the adequate and satisfying statements by the lecturer of the reason which we have for gratitude to you, and of how that gratitude grows in us as we realize more and more how great has been your gift to us and to the world.

Lovingly,

EUGENE R. COX.

Bembridge, Isle of Wight, England, April 3, 1910.

Dear Mrs. Eddy:—I feel I must send you a few words of gratitude and love, for my heart is full of both. Through your wonderful teaching I have been able to overcome what otherwise would have been an unbearable

Digitized by Google

trouble and loss; but your inspired explanation that God is Life, and that "Life is not in matter. Therefore it cannot be said to pass out of matter" (Science and Health, p. 289), also these words of yours, "The Christian Scientist who believes that he dies, gains a rich blessing of disbelief in death, and a higher realization of heaven" (*Sentinel*, Sept. 4, 1909), have given me such a glimpse of the truth about Life and man that, instead of sorrow, I have found great peace. My dear husband was always very grateful to you, and all your writings were his great joy and interest. For all this I feel very grateful, and though words can never express my deep gratitude to you for all that Christian Science has done and is doing for me and my dear one (and indeed for all the world), I feel I must send you this little line.

Yours lovingly,
ETHEL DONNE.

Chicago, Ill., May 3, 1910.

Dear Mrs. Eddy:—I do not know how to express my gratitude to you for Christian Science. I know you will say that I can prove it by living and demonstrating the truth, and I am trying daily to overcome my belief in sin, sickness, and death, and to overcome evil with good. It is an ever-present help and has never failed in time of need. I was healed of a so-called incurable disease, and at the time was staying with the practitioner. The healing was accomplished through seeing her live the truth every moment; her pure loving thought lifted me out of the shadows, and taught me a lesson I have never forgotten. As one of our hymns expresses it,—

'Tis in deeds we serve the Master,—
Words are idle, empty prayer;
All our Christian life a pretense,
If the deeds are wanting there.

Sincerely and gratefully yours in truth and love,
EMILY H. GARDNER.

[Telegram.]

New York, N. Y., May 8, 1910.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—We, the ushers of the united Christian Science churches and societies of Greater New York, assembled at Carnegie Hall, New York, do praise God and thank you for this great opportunity to be of service at the lectures given today by Bicknell Young. We pledge ourselves to maintain that uprightness of character and faithful service which is the true spirit of every loyal Christian Scientist, and to express the joy we feel in taking part in this great movement of unity.

THE COMMITTEE.

Chicago, Ill., May 9, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Please accept our gratitude for the wisdom manifested in establishing, maintaining, and extending the truth. Among our manifold blessings, we are grateful for the Lincoln day service. George Shaw Cook, publication committee for Illinois, delivered the address at Third Church to an attentive and appreciative audience. Feeling sure that you will be interested to read this loving tribute to President Lincoln, we send you a copy with our dearest love and loyalty.

Faithfully and lovingly,
Board of Directors,
(MISS) M. BELLE BRADY, *Clerk.*

Birmingham, England, April 26, 1910.

Beloved Leader:—On behalf of our society we wish to tell you of the progress made in individual lives and in the work of this young branch of the Vine. Last week Bicknell Young lectured for us in the Town Hall to a most interested audience, that listened with appreciation to his able explanation of Christian Science. Through this demonstration we are encouraged and inspired to press on and to prove more fully "that Christian Science heals the sick quickly and wholly" (Manual, Art. 30, Sect. 7).

We thank you for the rules and by-laws, which steadily lead us away from personality to Principle, and for the periodicals which you have provided for us. We are learning to love the *Monitor*, which in its purity is blessing mankind. Our aim is to be a worthy branch of The Mother Church, by bearing much fruit and giving out intelligently the message of Truth and Love to humanity. We love you and thank you for all you have done, and are doing, for us and mankind.

Loyally and lovingly yours,
LOUISA HARRIS,
WILLIAM G. WESTLE,
Committee.

St. Joseph, Mo., April 25, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader and Teacher:—I have just read your beautiful words "A Pean of Praise" in the *Monitor* and the *Sentinel*, and I thank you most sincerely for such an expression. Like everything else you do, it is timely and in the right place. As I read these lines I thought how you have set an example for every household, and through Christian Science this can be duplicated everywhere. Then I thought of the wonder, to mortal sense, that one lone woman should discover, formulate, and establish such a mighty reformation. And how can any one doubt that you have been divinely governed? And how can we help loving you more and more for making it possible for us to live above self and sense?

Ever yours above material sense,
CHARLES M. HOWE.

Minneapolis, Minn., May 6, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—It is with great joy we inform you that we have tonight completed the organization of the Christian Science Society of the University of Minnesota. We feel very grateful to you for having given us this privilege of helping to establish the truth about Christian Science. Yours in loving obedience,

Christian Science Society of the University of Minnesota,
JENNESS B. FREAR, *Secretary.*

Valparaiso, Ind., May 2, 1910.

Mrs. Mary Baker Eddy.

Beloved Leader:—First Church of Christ, Scientist, Valparaiso, Ind., in annual meeting assembled, wish to send you heartfelt gratitude for blessings received through your unfaltering guidance of our Cause.

In loving appreciation,
The Board of Directors,
MRS. JESSIE S. LETHERMAN, *Clerk.*

[Telegram.]

Grand Rapids, Mich., May 16, 1910.

Mrs. Mary Baker Eddy, Brookline, Mass.

Have just left Powers Theater, where Bliss Knapp lectured to an audience of eighteen hundred or more. Among numberless good things, the lecturer said, "The everlasting arms are never tired." I want to thank you, dear Leader, for sending these lecturers to us with their healing messages of truth and love.

AGNES F. CHALMERS.

THE LECTURES.

LA JUNTA, COL.

A lecture upon Christian Science was delivered by Frank H. Leonard Thursday evening, March 24, at the Opera House to an audience of three hundred people. He was introduced by Attorney Paul M. North of Rocky Ford, a member of the city council of his city, who said in part,—

Modern Christianity came to this world about nineteen hundred years ago with the birth of Jesus Christ, who came to a world that was under a spell of materialism, to a people given over to egoism, self-desire, and sensuous allurements. He came with the simple message, "On earth peace, good will toward men." He taught sublime truths; he taught moral idealism; he also healed the sick and told others to do the same. But those people could not understand him, and because they could not understand him they crucified him. However, a few did understand him and did do as he taught, and during all the years since his crucifixion some of those truths have been taught by some people. But many of Christ's teachings became actually forgotten and obsolete with the passing of the centuries, and it was left for the present generation to witness the reestablishment of Christ's teachings in the Christian Science religion. This religion was rediscovered only forty-four years ago. Its growth has been marvelous. Its teachings are based absolutely upon the teachings of Christ Jesus. This religion has met with a great deal of opposition and criticism, but it has met this opposition and criticism with dignity, with charity, with no sensationalism, with no attitude of persecution, and standing entirely upon its own merits.

Many of you are here tonight because you have been helped and healed by reason of Christian Science, and you are grateful. I became interested in this religion on account of a healing in my own family, a condition that doctors doing all they could had not relieved in ten years' time; but it was absolutely healed in three weeks under Christian Science treatment. That was six years ago. Many of you are here because you want to know about this organization and its doctrine, an organization that only sixteen years ago did not own a church edifice, but which today owns hundreds of church buildings and includes over one thousand branch organizations throughout the world.

Correspondence.

PUEBLO, COL.

Judge Septimus J. Hanna of Colorado Springs lectured on Christian Science at Pantages Theater Sunday afternoon [March 27]. He was introduced by Ezra W. Palmer, who spoke in part as follows:—

The majority of mankind accept theoretically the proposition that the universe is governed by a beneficent creator who is the source, cause, and inspiration of all true being; that this creator is omnipotent, omniscient, and omnipresent; that in Him is centered all power, all true knowledge, all presence; and furthermore, that in knowing rightly this infinite, divine One is the true aim of man's life and the measure of his most sublime ideal. I say the majority of mankind accept theoretically this concept of God, for it is a lamentable fact that the practical application of this concept of the nature and attributes of the divine Mind to the affairs of daily life is so small, that so far as the great mass of mankind is concerned it amounts to a virtual repudiation of the government of the universe by a loving, all-wise, all-knowing creator.

That God is a saving God, and that through His agency men are saved from all the ills of mortal existence, from the effects of sin and from disease and death, is the message of the Bible, and this message has been the inspiration of prophet and apostle, and especially of that meekest and mightiest of men, Jesus of Nazareth. But, because the true teachings of the Bible in its saving and healing effects upon all mankind have in great measure been lost sight of since about three hundred years after the ascension, it became necessary in the providence of God that a restatement of the fundamentals of Christianity should be made, so that the healing power of God should be again manifested and men could again look to God as a pillar of cloud by day and of fire by night, guiding man upward to unity with the infinite Mind and defeating every claim of sin and every ill of the flesh.

This restatement of the message of the Bible to mankind, a great and ever increasing throng of Christians believe has been made by Christian Science, through whose gentle ministrations literally a great multitude have been healed and saved in every civilized land of the globe.

Pueblo Star-Journal.

ST. LOUIS, MO.

A lecture on the subject of Christian Science by William D. McCrackan, M.A., was delivered in this city March 28, at the Odeon, under the auspices of Second Church. He was introduced by William E. Morgan of First Church, whose introductory remarks were in part as follows:—

The coming of Christian Science has served to awaken a new and genuine interest in matters pertaining to religious belief and practice. One of the main reasons for this renewed interest is that it promises returns here and now. It offers to the world a present salvation. In this material and practical age Christian Science is presented to us as a spiritual and practical religion, meeting the needs of mankind, comforting the sorrowful, healing the afflicted, purifying the affections, and lifting the thought of mankind Godward. No serious fault can be found with a religious teaching which endears the Scriptures to its votaries. The declaration of the Christian Scientist is, "Thy word is a lamp unto my feet, and a light unto my path." And the prayer of the Christian Scientist is also well rendered in the words of the psalmist: "Create in me a clean heart, O God; and renew a right spirit within me."

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Chicago, Ill. (Sixth Church).—Hon. Clarence A. Buskirk, Market Hall, Pullman, 3 p.m., May 29.

Malden, Mass.—Rev. Arthur R. Vosburgh, Malden Auditorium, 7:30 p.m., June 5.

Concord, N. H.—Bicknell Young, Church Edifice, June 7.

Canajoharie, N. Y.—Lecture for June 7 canceled.

Warren, O.—Hon. Clarence A. Buskirk, Opera House, 3 p.m., June 12.

Belleville, Ill.—Clarence C. Eaton, Liederkranz Hall, 3:15 p.m., June 12.

Orange, Mass.—Prof. Hermann S. Hering, Town Hall, 3:30 p.m., June 12.

Newburyport, Mass.—Bliss Knapp, Orpheum Theater, 3 p.m., June 12.

Haverhill, Mass.—Bliss Knapp, Unitarian Church, Main street, June 12.

Hamilton, O.—Frank H. Leonard, Smith's Theater, 3 p.m., June 12.

Chicago, Ill. (Fifth Church).—Bicknell Young, Church Edifice, 4840 Madison Avenue, 3:30 p.m., June 12; 8 p.m., June 13 and 14.

Springfield, Ill.—Clarence C. Eaton, Majestic Theater, June 13.

Macomb, Ill.—Frank H. Leonard, Universalist Church, June 13.

Junction City, Kan.—Clarence C. Eaton, Universalist Church, 5th and Adams streets, June 14.

Kenosha, Wis.—Frank H. Leonard, Carpenter's Hall, Park street, June 14.

TESTIMONIES OF HEALING.

[Translated from the German.]

I have been an adherent of Christian Science for the past four years, during which time I have received many blessings. I came to Christian Science through the healing of my son, who was suffering from a severe nervous affection and heart trouble. Previous to this I was physically and mentally a broken woman, through the death of my dear husband in 1901, and I looked toward the future with great anxiety. Before coming to Christian Science I was almost constantly under medical treatment, but it brought me only temporary and partial relief.

I asked a Christian Science practitioner for treatment, was healed within two months' time, and was physically and mentally a changed woman, looking forward to the future with trust in God. In March, 1908, while visiting my children in Berlin, I was taken with a severe attack of illness, with fever and severe pain in the whole body. My son immediately sent word to a Christian Science practitioner. In the afternoon I felt no better; but suddenly I was able to sit up in bed, and asked for some Christian Science literature to read. This was on Friday, and on Saturday afternoon the Scientist came to see me, and found me sitting up in bed and much better. I kept on improving, and I was able to go out for a walk on Monday. My children and I have experienced the blessing of the truth in many other instances, and have recognized that God is the only helper in every need. As I live out of town, it is not always possible for me to attend the Sunday and Wednesday evening meetings, but I read the Bible and *Der Herold* diligently. It always gives me great joy when through attending the services I have an opportunity to acquire more understanding of divine Truth.

I am thankful with all my heart to God, and also to our dear Leader, Mrs. Eddy, for having been freed from the troubles mentioned, and that I and mine have received these blessings through Christian Science.

FRAU PAULINE STRUBE, Kremmen near Berlin, Germany.

I wish to express my deep gratitude for all that Christian Science has done for me. I first heard of it about two years ago, when a very dear friend wrote to me about the healing, as she knew I was then suffering from a return of an internal complaint for which I had undergone an operation in one of the London hospitals. My friend also sent me a copy of Science and Health, begging me to study it, which I did occasionally but failed to understand its meaning.

In August, 1908, I was taking a night journey to Scotland and had a bad fall, severely injuring my right arm. The doctor who saw it said I had narrowly escaped breaking the arm in three places. For weeks I was unable to use it and it was most painful. I had to have my hair done for me, as the arm was practically useless. One Sunday morning in November I felt impelled to attend a service held by Christian Scientists in Sevenoaks, and I left that service feeling a different woman. I spoke to a practitioner there, and she treated my arm. At the first treatment the pain was relieved, and at the second I could swing my arm any way I liked, and use it as I did before the accident. This led me to study Christian Science more deeply. I recovered in a short time from bronchial trouble without the help of any doctor or medicine, and what to me is more than all, I have lost all the symptoms of the internal trouble, and am perfectly well and strong. Formerly I was continually saying that I must have stronger glasses, as I could scarcely see. Now, I can sit from early morning till late at night at the finest needlework.

I would not give up Christian Science for anything. I know that "God is Love," that He is "a very present help in trouble," and that we have only to "rest in the Lord" and "be still." I am deeply grateful to our dear Leader, Mrs. Eddy, and to all who have shown me this beautiful Science, which has made me a happier and better woman. I long for all around me to know it.

ELLEN SEWARD, Sevenoaks, Kent, England.

Words seem to fail me as I try to think how I may tell of many years of wilderness wandering, ere I finally embraced Christian Science. After courses of medical treatment, a year spent in Colorado for change of climate, etc., one day a friend said to me, "There is some one in Hartford, Conn., who heals without medicine. Why not try that?" I did so, was benefited, and then wishing to know the unseen cause of such effects I went to New York and took a two-weeks course in metaphysical healing, and later one in physics and one in ethics. Still a sufferer, I tried so-called "mental science," reading books by different authors, seeking this way and that for a solution of my misery, or a way out of it. Finally, when "Science and Health with Key to the Scriptures" was offered to me, I refused it, saying, and thinking, that there could be no more in that book than in the others, for me.

In time the thought presented itself to me, that I was making a stumbling-block of this book; that I had better read it; if it was good I needed it, and if not I could forget it. So I read it, curiously and comparatively, but seemed to get little help from it; yet I was unwilling to give it up. Another friend advised me to take it up with the Lesson-Sermons. I did so, and circumstances led me to Jersey City, where I became a regular attendant at both the Sunday and Wednesday evening services, and also applied to a Christian Science practitioner for help. While the specific conditions which took me to a practitioner have not yet been met, I am sure they will be when I can more clearly apprehend the truth. Other ailments have been overcome, and the continual spiritual growth is more to me than all else. Again circumstances brought me to Minnesota, where the passing on of a sister and father caused me to search diligently for more light. Realizing there could be nothing for me but Christian Science, I united with The Mother Church in Boston, in November, 1908, and I rejoice in being numbered with God's children there. Upon arriving in this town I asked whether there was a Christian Science church or any Christian Science people. There was no church, but I sought out one who had been healed, and we began to read the Lesson-Sermons together at intervals. We now meet every Sunday, and our number has grown to twenty, including seven children. My husband attends the readings with me, while still an active member in another church.

One morning I found myself seemingly very ill. I worked hard to overcome the condition,—would read a few lines from Science and Health, then lie down a little while. I knew there was no one near upon whom I could call for help, and all the texts I could recall did not seem to meet my need. Finally, I cried out mentally, "I am alone with God, and He cannot—will not—leave His child alone." At that moment the "still small voice" said, "I will not leave you comfortless; I will come to you." I repeated these words twice or more, and within ten minutes I was resting quietly. A little later I was able to go about my neglected duties.

Each day I am more and more grateful for the understanding of the Bible which comes to me through the study of Science and Health. I have been a Bible student from childhood, but never understood it as I now do. Thanks be to God, and to Jesus the Christ, also to that friend of the whole world, dear Mrs. Eddy. I have written this, both because I wish to add my thanks with those of others, also in the hope that some part of my

Digitized by Google

experience may help another wayfarer who seems to be journeying slowly onward.

MRS. EMMA L. R. REVELL, Stewartville, Minn.

About fourteen years ago I was taken ill, and the physician upon whom I called said I had serious uterine trouble, and that it would be some time before I would be well again. After about three months I was able to go to my work again as teacher in a district school, which of course necessitated my being on my feet a great deal. About a year and a half later my old trouble returned with greater force, and I also suffered from a bowel disorder. I was unable to work, walk, or ride without suffering greatly. I employed another physician, who agreed with the first as to my trouble, and said that mine was one of the worst cases he had ever had. After treating with him about three months, with little relief, I went back to my first physician, hoping to regain my health; but with the same result as before. I then took medicines recommended for such cases as mine, with like results. Other ailments came upon me, and I gradually grew weaker and thinner and became utterly discouraged with *materia medica*.

Having heard of Christian Science, I decided to try it for myself, with the result that after the first treatment I rode twenty-six miles, and walked quite a distance without suffering. I continued treatment for six weeks. This was in April, 1898. The female trouble was gone, and I did my housework and walked and rode anywhere I pleased. One serious ailment did not yield as quickly as the weakness, and I had treatments occasionally during the summer. I was said to have inherited this trouble, but September, 1898, found me rid of it also. It is now eleven years since my healing in Christian Science, and I have never had a vestige of the old difficulties. I am indeed grateful for my physical healing, and yet more for the spiritual understanding of the Scriptures gained from the study of Science and Health. I have learned through my healing that the Scriptural promise, "They shall run, and not be weary; and they shall walk, and not faint," is demonstrable. God bless Mrs. Eddy for having shown us the way.

MRS. LIZZIE W. BALL, Chesaning, Mich.

It is over six years since I became interested in Christian Science, and for over five years Truth alone has been my help. There have been several ills to meet,—malaria in different forms. At first the attacks were severe and I was obliged to call upon a practitioner, but each time the illness was quickly met. I have had many beautiful demonstrations. Some time ago I was obliged to have five teeth extracted. I first asked a practitioner to help me, and then I asked the dentist not to apply any drugs or give me any anesthetic. The five teeth were extracted without pain. Christian Science helps me in every way, spiritually as well as physically. I am learning slowly how to reject old beliefs which bring inharmony; I am learning that consciousness should be filled with true thoughts, which bring peace and happiness. Christian Science is an inspiring religion, and I am thankful to God, and to Mrs. Eddy for this truth.—MRS. IDA D. FLANDERS, Dallas, Tex.

Like so many others, I had my own opinion of what Christian Science is, but two years ago I learned that all my views about it were wrong, for only that which is good and true is Christian Science. I came to Christian Science for physical healing. I had worn glasses for more than twelve years, and for several years I read very little besides my correspondence. I could do no fine sewing, for I suffered greatly when using my eyes, but after receiving the second treatment in Christian Science I took my glasses off. I have felt no need of them since that time, and I use my eyes with perfect freedom. After this healing I was especially happy, because I could embroider all my Christmas gifts, and each one of these gifts was a testimony of God's healing power.

I am most grateful for this healing of my eyes, though it was only the beginning of many blessings that have been added, one of which is peace of mind. I suffered greatly from nervousness, which made me unjust to those who were dearest to me; but as these errors have passed away, good has taken their place. I now know whence cometh my strength. Christian Science is wonderfully beautiful. Those who are healed by it are not only physically healed but are taught to be better in every way. I know the truest gratitude for these many blessings is to help others gain a knowledge of Christian Science.

REBECCA JANE STROBRIDGE, Los Angeles, Cal.

My first Christian Science treatment overcame neuralgia from which I had suffered for several days and nights without receiving any relief from material remedies. Soon after, our little son, two years old, was healed in four weeks' treatment of a rupture from which he had suffered intensely. About the same time my husband's old enemy, a throat affection, reappeared, and grew steadily worse under the application of the usual remedies and medical treatment. When my husband became unable to eat or sleep, we telegraphed for Christian Science treatment for him, and also for myself, as I was suffering from an attack of illness, with acute stomach trouble. Immediate relief came to us both. In an hour's time all pain had gone from my husband's tortured throat, and I was about my neglected household duties.

These cases of healing in our household occurred in the spring and early summer months of 1908. Through the summer a fever raged in the town, and in September my husband was taken ill with its symptoms. We at once telegraphed for Christian Science treatment, and that evening the fever disappeared in profuse perspiration. The other symptoms did not yield so readily, but each day he was dressed, and walked to and from his office a mile distant. In three or four weeks not one ill effect remained. Later our two little children were freed from malaria by Christian Science treatment, and we are very grateful for these and many other evidences that Truth is with us "alway."

Although I only came to Christian Science for physical healing, I found in it that peace with God for which I had longed, and all my darkness of doubt and unrest has been banished by its light. It has been such joy to find that while we are yet "a great way off," Love meets us on our way back to the Father's house, and to prove the truth of Mrs. Eddy's declaration that "Truth has a healing effect, even when not fully understood" (Science and Health, p. 152).—MRS. HOWARD I. SHAW, Rawhide, Nev.

[Translated from the German.]

Christian Science came to us at a time when we were seemingly engulfed in error and disease, and after my wife, who had constantly tried to find relief through medical skill, had failed to obtain it. We attended the services at the Christian Science church, and found that the world is entering into a new sense of life which makes it realize the truth, and this means health, not only physically but also spiritually. We bought *Der Herold der Christian Science*, also the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, which we studied, and thereby began to discern the power of divine Love, and man as created by God.

I would like to give a brief account of the healing which we have experienced through Christian Science. For

Digitized by Google

eleven years I had suffered with severe hernia and upon medical advice had worn a truss. I tried repeatedly to do without it, but was unable to do so, as the pain would set in the next day. I then tried Christian Science, in June, 1908, and applied the truth, with the result that I improved daily. After two weeks I was free from pain, and since that time have neither worn a support nor have I had a return of this trouble. I awoke one morning with what seemed a serious eye affection. I treated myself in Christian Science, and the healing was accomplished within ten days. Later, I had an attack of illness which lasted three days; a present treatment, however, was sufficient to overcome that error. I have also overcome irascibility, and my wife envy. With our dear children the healing through Christian Science has been especially quick. One of the children was stricken with deafness and was unable to understand a word, even when we talked very loud; but the child was fully healed within a week. Our little boy was taken with rickets in a severe form, and this disease was completely overcome through Christian Science. In three instances the children were healed of measles within two to five days, the greater part of the healing being accomplished through absent treatment.—HERMANN MÜLLER, Berlin, Germany.

It is with deepest gratitude that I wish to tell what God has done and is doing for me and mine through Christian Science. I was healed in one week's treatment, six years ago, of a severe and almost constant pain in my side, from which I had suffered for over ten years. Through this treatment I was also healed of stomach and bowel trouble. My little boy of three months at that time was also healed in one treatment of rupture, which has never returned. Before taking treatment in Christian Science I was not able to do my own housework, but after the first week I did the washing for our family of four and was not in the least tired. I commenced to read the Bible, together with Science and Health by our Leader, Mrs. Eddy, and I knew I had found the truth which makes us free from sin and disease. I also learned at once that a sinful, sick mortal is not the image and likeness of God, but that the Bible declares that God made man in His own image, and that all He made was good. I questioned myself, and found I was very far from that likeness; then I commenced at once to cast out my wrong thoughts of God and man, and these words came to me from "Miscellaneous Writings" (p. 341): "By that, you may know you are parting with a material sense of life and happiness to win the spiritual sense of good. O learn to lose with God! and you find Life eternal: you gain all."

I have yet many things to overcome; but I am striving, and I know that in time I shall overcome them. I am glad I have found how to overcome evil with good. I thank God with all my heart for Christian Science, and our dear Leader, Mrs. Eddy, for showing us the way. I am one of those who are striving for the Mind of Christ.

MRS. DORA E. TANNA, Montarilla, Ore.

During the summer of 1907 I was almost bedfast from a nervous breakdown and other complications. I had a great deal of business to attend to, and my strength had completely failed me. In despair I wrote to a Christian Science practitioner of Canyon City, Tex., for treatment. The next day (while she was treating me, as I afterward learned) I had a wonderful experience; such joy and peace came suddenly to me, and I realized that I was well! My appetite came to me (I had not been able to eat anything for some time), and I gained strength and flesh rapidly. I shall always feel thankful for this realization of God's allness, and it seems to me we cannot love and revere Mrs. Eddy too much for searching out this glorious truth for us.—J. E. RHEU, Roswell, N. Mex.

From the time Christian Science was first presented to me it has been a continual help and comfort. When used at childbirth it destroyed all my fear, which had seemed great, and saved my life and that of the child. In cases of headache, fever, cough, and severe bowel trouble, Christian Science treatment has been most successfully used for me and my children. We also have cause to rejoice in that it has been a preventive against many ills. Through the teachings of Christian Science a high moral standard has been set up in my home, which is gradually becoming more and more harmonious. Through the same Truth-teaching I am learning how to forgive, to overcome selfishness, impatience, indifference, and resentment, and I know I am a better woman and a better mother than I ever could have been without Christian Science.

The example of the unselfish and loving life of our Leader continually encourages me, and calls forth my deepest gratitude. The Christian Science literature not only helps those who have already accepted its teaching, but it is also a means of bringing the light of Truth to others not yet interested in it; and I rejoice and am grateful for this.

MRS. LORENA HELDER MORSE, Olathe, Kan.

The joy, the happiness which have been revealed to me by gaining some understanding of Christian Science causes my cup to overflow, and as it does may it reach some weary searcher after the truth. Not until I had tried in various ways to find happiness and health (with no success), did I turn to Christian Science, over five years ago. I was a nervous wreck, and not only did I myself experience great suffering, but I caused all those about me to be unhappy. In the very darkest hour, without even solicitation or human persuasion, I wended my way to a Christian Science practitioner's office. In the conversation which followed these words were quoted from the Bible: "And God saw every thing that he had made, and, behold, it was very good." Words are inadequate to express what this meant to me. I immediately felt the beneficial effects of the truth, and after purchasing the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I earnestly began to study it to find out what had helped me. It did not take very long to awaken me to the conditions which had produced all the discord. I soon discovered that all the weapons I had previously used were carnal—the world's weapons—and that they must be supplanted by "the sword of the Spirit, which is the word of God."

A lively battle ensued against the beliefs in disease, against the tenacious hold which hereditary conditions seem to have on mankind, against ignorant and malicious aims and purposes, such as envy, jealousy, pride, revenge, and all the discords of the flesh,—all these were bidden to loose their grasp where they had previously held full sway. As a result of the struggle, health has been restored; there has come to me happiness, such as I never knew before, with a growing desire to know more of the good and the beautiful and to help lead mankind out of darkness. Such being the present fruits, with earnest endeavor the full fruitage must also come. Of the many privileges that have been given me, I am most grateful for the wise provision of our dear Leader for a way to receive class instruction if we choose. I have found this provision a wise protection.

MRS. ELSIE B. CARVETH, Rockford, Ill.

About four years ago, while at work one evening, some one spoke to me of Christian Science. Some literature was given me to take home, but it stayed without fruit until very recently, when my son was taken quite sick with fever, and as I had a few months before laid my youngest son to rest, I was discouraged with doctors and medicine and thought I would give Christian Science a trial. When I called upon a practitioner she responded at once, and my son was almost instantly healed, being able

Digitized by Google

to go back to his work the next day at noon. At the same time my daughter, who had an attack of stomach and bowel trouble, was treated and also cured.

I feel that I cannot begin to express the benefit that Christian Science has been to me, both physically and spiritually, and I know my whole life has been made happier by it. I am very grateful to God, and also to Mrs. Eddy, the Founder of Christian Science.

MATILDA WERTH, Dallas, Tex.

A short time ago, I was taken sick with fever. My mother asked for Christian Science treatment for me, and I was almost instantly cured. I have been reading "Science and Health with Key to the Scriptures" by Mrs. Eddy, and have been benefited in business and in health ever since. I am very grateful for Christian Science, and thankful to God, whence all good comes.

FRED WERTH, Dallas, Tex.

Some time ago I was attacked by stomach and bowel trouble. A Christian Science practitioner was called, and my ailment soon left and I was again able to resume my duties. I am very thankful for the good done me and others, and praise God for speaking to us through Mrs. Eddy.—TILLIE WERTH, Dallas, Tex.

Before April, 1908, I had attended the Wednesday evening meetings of Second Church of Christ, Scientist, in this city for over a year, but never thought of going on Sunday, and never found time (seemingly) to read that wonderful book, "Science and Health with Key to the Scriptures," as I do now, although it lay on the library table all the time. The meetings seemed to give me something to think about, as I was sure that the good people who told of their healings were speaking the truth, and I was becoming interested and began to think that Christian Science was what I wanted. Before this time I could never become sufficiently interested in any church to want to attend once a week, but now I feel that I cannot afford to miss a Sunday service or a Wednesday meeting. I love to go, and I can feel the love that surrounds me there at every meeting.

During the month mentioned above, Christian Science was given a severe test (at least in our eyes), and not found wanting, when our four-year-old boy was healed of a serious attack of throat trouble. (He had previously been healed of a skin disease, but I thought that it was just a "coincidence.") When he complained of his throat and fever was coming on, we realized that something had to be done at once, and as this was our first time to call for help since being interested in Science, I remarked to my wife, "Here is our chance to try Christian Science. Shall we use medicine, or call for a practitioner?" The latter was decided on, and how thankful we have been ever since. The child was treated in the evening and the next afternoon he was playing, the fever all gone and the danger-line passed. With a few more treatments he was himself again, with no bad effects afterward with the exception of a cough, which was overcome later. A close friend, a Christian Science nurse, with many years' previous experience in hospitals, afterward told us that this case was one of the worst which she had ever seen in her experience.

This healing was an eye-opener to us, but shortly afterward the little fellow was healed of whooping-cough in a most satisfactory way, and then came another remarkable healing of stammering and stuttering, to which he had been subject for several months, so much so that others outside the family could hardly understand him; but after several treatments he could talk as plainly as any child. For the above healings, all of which took place inside of one year, we cannot find words to express our gratitude to Mrs. Eddy, the Discoverer of this great truth, and to those who have helped us to realize this better way to live. Christian Science gives me that peace and harmony which I never understood before. I am better mentally, morally, physically, and, by far, spiritually, as I never used to think of reading the Bible; now it gives me pleasure to do so, as we have the "key" to it in Mrs. Eddy's grand book.

I now realize that the truth will make me free, and I see almost daily where God, divine Love, is showing me the way. I have learned to love those whom in the old thought I would have called enemies, and how to treat my fellowmen better and not to ridicule or criticize as before. I am trying to live as nearly as I have the understanding to what Christian Science teaches. The *Sentinel*, *Journal*, and *Monitor* are a great help to me, and I anxiously await their coming. I wish that every one had at least the small understanding of Science which I have.

B. O. BOOTHBY, Los Angeles, Cal.

I wish to express my gratitude for what Christian Science has done for me. While I did not come to it for physical healing, I have been healed of defective eyesight, partial deafness, chronic throat trouble, and constant cough and colds; also of a physical deformity. While I am grateful for the healing of all these ills, I am still more grateful for the healing of a very disagreeable disposition. Before coming into Christian Science I was always unhappy, always disagreeable, always discontented, and I had no friends. In fact, I spent much time for some months before beginning to study our inspired text-book, in figuring out the most effective method of ending my life.

All this is now changed! I am always happy, always contented, always at peace with the world, and I have hosts of friends. I am grateful to know that I am learning to love my neighbor as myself; also, that "love is the fulfilling of the law." I am grateful every moment for "Science and Health with Key to the Scriptures," and all the rest of Mrs. Eddy's books; grateful for the understanding of the Bible which I am gaining; grateful for all of our periodicals, including the *Monitor;* grateful that I am situated so that I can attend a Christian Science church; grateful for the Lesson-Sermon, and for the solos in the church I attend, for they have been of untold value to me many, many times. I am grateful for the lectures on Christian Science. But above all, I am most grateful to God because He has enabled Mrs. Eddy to make known this healing truth to all mankind, and I thank her for all she has made possible for me and for all humanity. I am daily striving to have that Mind "which was also in Christ Jesus" and to know myself.

JANE CORNELL VAN HOESEN, Chicago, Ill.

[Written for the *Sentinel.*]

SHADOW.

JOSEPHINE W. HEERMANS.

My heart was full of rapture yesterday;
Ecstatic joy my being overflowed,
For Love with me sojourned. There was bestowed
On me surcease from discords all; yea, they
Dissolved to nothingness. Ah, but today
Love seems no more to brighten my abode!
Sweet yesterday my world effulgent glowed
In Love's glad light. Whence came this shadow gray?
This blight of yesterday's ecstatic mood
Is but some fear that, cloudlike, would the light
Obscure, and fain would sever me from good—
A cloud of sense, reluctant in its flight.
Infinite Love keeps e'er its constant course;
From Love no dark, no shadow has its source.

FROM OUR EXCHANGES.

[*Christian World.*]

The dream of a universal peace, which Lucan depicted in his "Pharsalia," which Erasmus cherished, and which scholars and kings labored for, alas! in vain, in the seventeenth century, is today a matter of practical politics, and an assured possession of the future. We are moving toward a better city, a better state, a better world. The experiments of the past, with all their story of disappointment and failure, are showing themselves as preparations for a real achievement. The New Jerusalem has yet to descend out of heaven from God.

[Rev. Charles W. Burrowes in *Christian Intelligencer.*]

It is not in reading and remembering the words of Jesus that the authority of his leadership is to be realized, but in fellowship with him in spirit. This makes him the leader of modern thought: his teaching when first given was brought up out of the depths, was brought down from the heights, and it was given in the most intimate and devoted fellowship—no greater depths have been sounded, no loftier heights have been scaled, on behalf of men, and no fellowship more intimate and devoted is offered to them.

[*British Congregationalist.*]

If men are judging themselves and others by God, and not God by man; if they are resisting the persuasions of self-interest and working for the supremacy of the supernatural in the affairs of time and sense, they are among the faith-keepers. Their doubts and divergences of belief we would tolerate, only asking them to remember that the dogmatism of unbelief is just as fallible, and practically far more deadly, than the dogmatism of the narrowest orthodoxy.

[*Watchman.*]

The truth and righteousness of our Lord drew out the fierceness of the spirit of hatred of righteousness. At any time when a good man or a good cause makes headway we can see the same malignant expression and, if opportunity offered, the same savage glee in cruel deeds. It is difficult for those of good hearts to conceive of the fierce hatred that lurks in the spirit of those who are thoroughly bad.

[*Zion's Herald.*]

It is easy to see that some other man should help to make the world better, and to send him about his business, but to do our part—to lift our burden, to bear our end of the yoke, to expend our quotum of energy, to sacrifice our share of pleasure—that is hard; and that is blessed, if done in a Christly spirit.

[*Christian Work and Evangelist.*]

The man who does not know the Bible simply does not know the greatest thoughts that have ever been thought: does not know the best words God has ever spoken through human lips; does not know the most inspiring, comforting, sustaining truth of the ages.

[Lyman Abbott in *Outlook.*]

Immortality is a present possession. We are now immortal and living with the immortals. And he who forms the habit of looking on the invisible realities veiled behind the visible symbols, will not lose the vision when the veil is taken away.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

The Publishing Society has a limited number of volumes of the *Journal* and *Sentinel* bound in cloth, half morocco, and half calf and arranged in sets from four to nine volumes. These sets are now on sale at special prices, ranging from $9.20 to $21.00, according to the style of binding and number of books in the set.

These special prices apply only on sets of books, and in no case on single volumes. The offer presents an exceptional opportunity to Christian Scientists to obtain rare volumes for reading-rooms, libraries, and individual use. Detailed information will be furnished on request.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.80, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

PAMPHLETS AND REPRINTS

CHRISTIANITY IS SCIENCE, AND SCIENCE IS DEMONSTRABLE. By MISS MARY BROOKINS.

CHRISTIAN SCIENCE: ITS RELIGIOUS PHILOSOPHY. By HON. CLARENCE A. BUSKIRK.

Full morocco, single copy, $2.50. Levant, single copy, $3.50. Pocket edition, size 4 5-8 x 6 5-8. Full morocco. Single copy, $3; one dozen, $30.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music as follows:—

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. Arrangement for high and low voice in same copy. Single copy, 75 cents; one dozen, $7.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. Single copy, 75 cents; one dozen, $7.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. Single copy, 50 cents; one dozen, $5.

"BLEST CHRISTMAS MORN." By Frederic W. Root. Published in two keys, for high and low voice. Single copy, 27 cents; one dozen, $2.75.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederic W. Root. Published in two keys for high and low voice. Single copy, 27 cents; one dozen, $2.75.

Please state, when ordering any of the last three numbers, whether high or low key is desired.

Our Catalogue for 1910, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.

Remittances should always accompany orders, and be made by check, money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless egistered. Please send no money or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 20 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.

Ten copies to one address, each, one year, $1.50; six months, $1.15.

Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.

Fifty copies to one address, each, one year, $1.50; six months, 90 cents.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Bound Volumes: Current year or two years previous, cloth, $2.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The measure providing for the acceptance by New York state of the splendid gift of one million dollars and ten thousand acres of land along the Hudson river for park purposes, offered by Mrs. E. H. Harriman, has passed both Houses. This is gratifying to the friends of conservation, as it guarantees advantages to the inhabitants of New York city and residents in the valley of the Hudson, and a pleasing prospect to the traveling public. With the purchase of twenty-five thousand acres more by the Palisades commission, and the probable gifts by owners of large local estates, the tract may become one of the most extensive and beautiful parks in the world.

New Orleans and San Francisco both desire to hold the World's Panama exposition in 1915. The matter is now being considered in Congress. New Orleans claims that sixty million people reside within a radius of one thousand miles of that city as against six million for San Francisco, and that the average railroad fare to New Orleans for over seventy-five per cent of the people of this country to visit an exposition there will be $12.50 against $37.50 to San Francisco.

The United States court of claims has handed down its decision in the Ute Indian case, entering judgment for the Indians for $3,508,611.40. It seems that from time to time lands have been practically confiscated by the Government by minor treaties, which, while ratifying the immediate transfer, have never given just compensation to the Indians.

Thumb-mark signatures by Indians who are not able to write are now required on all checks, receipts, and other official papers, which were formerly signed by a cross-mark by Indians and others. These are then witnessed, to make the identification certain and thus be an infallible method of identification in case of dispute or attempted fraud.

The American Single Tax party, a new political organization, has been formed in New York city by the advocates of the Henry George system of economics, and a call will be issued "to all opponents of special privilege to unite with them in restoring to the people the opportunities that belong to all the people."

The reform administration in New York city, under Mayor Gaynor, has effected a reduction of $21,814,887 in the amount of money required to finance the city government, and a consequent saving of $240,000 in interest charges alone, during the first three months of 1910.

Declaring that the state should be compensated properly and such conditions be imposed as will secure proper returns for the privileges granted, Governor Hughes of New York has vetoed the bill relative to the grants of land under water.

Figures given out by the Pennsylvania railroad show that in 1908 and 1909 its various lines carried a total of 581,762,058 passengers on its twenty-four thousand miles of track, and that only one passenger was killed as a result of a train wreck.

Governor Draper of Massachusetts has signed the "quieter Fourth of July" bill. This bill prohibits the sale of certain pistols and explosives and authorizes the making of regulations relative to fireworks and firecrackers.

Governor Hughes of New York has signed a bill providing for the licensing of private bankers who do not operate under the provisions of the banking law. The bill is designed to protect the savings of immigrants.

The New York Assembly has passed an automobile bill which provides for a speed of from fifteen to thirty miles an hour, and for an annual registration fee graded according to the horse-power of the machine.

Princeton University is the recent recipient of an estate estimated to amount to at least ten million dollars. This will assure that university probably the most handsomely endowed graduate school in the world.

Edward Payson Weston, the famous long-distance pedestrian, now seventy-two years old, who left Los Angeles, Cal., Feb. 1, reached New York, a distance of 3,483 miles, in seventy-seven walking days.

About thirty-six per cent of the area of the United States has been mapped in detail by the geological survey, whose topographers covered more than twenty-four thousand square miles last year.

Investment funds of Harvard College amount to $22,716,750, producing an annual income of $916,113.

International.

An edict has been promulgated establishing national decimal coinage throughout China and ordering the cessation of all coinage by provincial mints. The new currency is to consist of coins of the following denominations: Dollar, fifty cents, twenty-five cents, and ten cents minted in silver; five cents minted in nickel, and copper cents minted in copper. The establishment of national decimal coinage is in compliance with the treaty signed following the Boxer troubles and according to the terms of which the Chinese government pledged itself to adopt universal decimal currency. For centuries confusion has existed throughout China in regard to both internal and external commerce, owing to the many district standards of value in the various provinces.

The international boundary between the United States and Canada along the southeast coast of Maine has been fixed, according to a treaty signed by Ambassador Bryce and Secretary Knox, as running from a point in Passamaquoddy bay between Treat island and Friar head and extending through the bay to the middle of Grand Manan channel. The exact location of this boundary had been in dispute ever since 1783.

About fourteen hundred and forty million postcards were transmitted in Germany last year. The United Kingdom came next with eight hundred and thirty-three million, British India four hundred million, Russia two hundred and ten million, while France, where it is just as cheap to send a letter as a postcard, had only eighteen million.

The Russo-Japanese agreement on Far Eastern affairs continues to be a subject of exchanges between the two governments. The compact has gradually narrowed down until now it embraces only the question of the Manchurian railroad. The status of Korea and the future of that kingdom is not involved.

The Hankow-Sze-Chuen railway loan agreement has been signed. The signers are representatives of financial groups of the United States, France, Great Britain, and Germany. The agreement provides for a loan to the Chinese government of thirty million dollars for railroad construction.

France and Great Britain have submitted to the governments of Russia and Italy, the other two protecting powers, a proposition to invite Crete to restore the *status quo* prior to 1908. According to this plan Crete would retain its autonomy under the suzerainty of Turkey.

The public debt of France amounts to more than seven billion dollars and exceeds that of any other country.

The National Gallery had 758,795 visitors last year, including 67,452 on Sundays.

Industrial and Commercial.

The recent signing of the contract between the Mexican government and the Vera Cruz, Tobasco & Campeche Railway Company for the construction of that line between Santa Lucrecia, on the National Tehuantepec railroad, and Campeche, where it will connect with the United Railways of Yucatan, marks the last of the subsidized railroads authorized by an act of Congress of April, 1900. The road will pass through one of the richest portions of tropical Mexico, and will penetrate vast forests of virgin hardwoods.

The Standard Oil Company may be ousted from Minnesota as the result of a decision handed down by the state supreme court. The case was brought to revoke the license of the Standard to do business in Minnesota, on the ground that the company was guilty of unfair competition by charging lower prices at competitive points for the purpose of destroying business rivals.

An admitted inaccuracy in the court's opinion in a Government suit against the Standard Oil Company of New York, for violations of the Elkins act in accepting concessions from railroad companies on shipments of oil, was held by the United States circuit court of appeals to be insufficient ground for the granting of the company's petition for a rehearing.

Robert A. Millikan, associate professor of physics at the University of Chicago, announces that he has isolated and studied a single ion, the "atom of electricity," and has accurately measured the ultimate electrical charge and observed the actual structure of the charge. The announcement follows an investigation of four years' duration.

The department of justice is investigating the price of lumber in the United States with the view of determining whether or not the so-called lumber trust may be reached by the Sherman anti-trust law on the ground that it is a combination in restraint of trade.

The state regulation of railroads in Wisconsin has already effected an annual saving to the people of one million nine hundred and seventy thousand dollars in the reduction of rates and has brought an improved service in equipment, trains, schedules, mileage, and net earnings.

The Durham Textile Mills, the only hosiery mill in North Carolina run by negroes, has met with such success that it has doubled its capital, working quarters, and machines.

More than a quarter million dollars has been paid by motorists in fees and fines since the first of January toward the maintenance of state highways in Massachusetts.

Orchids to the estimated value of over five hundred thousand dollars were on exhibition last week at Horticultural Hall, Boston.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE SEEKERS OF THE LIGHT.

BLANCHE HERSEY HOGUE.

"THE seekers of the light are one;" so reads the loved hymn of Samuel Longfellow, and this thought finds honest response in the heart of the Christian Scientist, for he is engaged in discovering those things in which he is at-one with God and with his fellow-men. The primary element of Christian Science is unity; man's unity with God and man's unity with man. The brotherhood of man practically demonstrated on earth is the ideal of Christian Scientists; yet they are not looking for brotherhood in the instincts and habits of the fleshly mind. Because they have learned that the human mind has been from the beginning the destroyer of brotherhood, they are striving to rise from it into the spiritual manhood which God creates and knows, in order to find unruptured relationship between all men.

The Christian Scientist becomes a "seeker of the light," knowing that as he sees God he will see God reflected in his fellow-men; as he loves God, he will love God's goodness manifest in men; as he becomes at-one with God, he will find himself at-one with all which springs from God in the hearts of men. Christian Science reveals the basic truth that God is one with His manifestation and that spiritual man and the universe are at-one in their reflection of God. And so it is learned that oneness is not something to be brought about by human beings, but an eternal fact to be discovered and enjoyed in the right understanding of God's relation to His creation.

For this reason it is well for Christian Scientists to find and to keep with them the real and essential matters in which they are at-one, and to recognize that the things in which they differ are the things which pass away. It is also well to cherish those things in which they are at-one with all mankind, for here again the differences belong to that which perishes. To point out intellectually the difference between Christian Science and the theologies of the world at large does not give bread to the hungry nor the cup of cold water to the thirsty. Let the seeker find in Christian Science those essential elements of Christianity which the Master proved as he walked in Galilee and which heal men, mind and body; then he will discover for himself wherein Christian Science differs from the human theories which do not heal.

If Christian Scientists in their work together dwell upon those things in which they concur, their diverging viewpoints concerning non-essentials will soon slip into secondary importance and unity will prevail. Upon this matter John Ruskin in "The Mystery of Life and its Arts," uses words both plain and strong. He writes: "Whenever in any religious faith, dark or bright, we allow our minds to dwell upon the points in which we differ from other people, we are wrong, and in the devil's power. That is the essence of the Pharisee's thanksgiving—'Lord, I thank thee that I am not as other men are.' At every moment of our lives we should be trying to find out not in what we differ with other people, but in what we agree with them; and the moment we find we can agree as to anything, that should be done, kind or good (and who but fools could not?), then do it; push at it together; you cannot quarrel in a side-by-side push; but the moment that even the best men stop pushing and begin talking, they mistake their pugnacity for piety and it is all over."

"But," the student of Christian Science may ask, "are we not to uncover error? Are we not to detect evil? Should we not warn the innocent against danger?" By all means, yes. But, before undertaking such important matters, we should note well wherein divine action differs from human will in uncovering and destroying evil. "I have naught to say to thee about thy brother's error," said a wise old philosopher; "bring him to me;" and whoever heeds this sweet example is most in accord with divine law. Human nature runs to another person to rehearse the brother's error; divine Love prompts the heart to keep silent concerning it, or to speak only under sacred necessity. Human nature betrays; divine Love protects; and whoever marks and applies this difference is dealing with others constructively, not destructively. Whatever thing among us has not become a matter of church discipline can very generally be disposed of in quietness and kindness by this one simple rule that is divinely enjoined upon us, "Go and tell him his fault between thee and him alone." Heeding this, we "push together;" and so we prove "the seekers of the light" one, for loving-kindness binds into one even the human efforts toward righteousness and minimizes personal differences until the real spiritual unity of God and man shall appear.

Differences of opinion do not heal; differences do not increase our store; differences do not build our churches. Spiritual thought-processes which reflect God's thinking make whole; give the increase; rear our outward temples. Whatever Christian Scientists may appear in their matters of difference, they are surely one in their reflection of God, for spiritual thinking is scientific, true, exact; and all who dwell therein will of course find themselves together. By fair logic, then, to abandon human opinions and to abide in the spiritual understanding which Christ Jesus revealed and which Christian Science repeats in this age, makes Christian Scientists one. And in the measure that they think the truth and cease to think error, they are at-one.

Christian Scientists know well the things in which they are at-one. In the understanding of God and of man's relation to God; in their adherence to Christ Jesus as the Wayshower and Saviour; in their daily study of the Scriptures and their text-book; in their gratitude and loyalty to the Leader who discovered Christian Science for them; in their support of church organization; their obedience to the Manual of church government; their conduct of church services; their erection of church buildings,—in all these things the students of Christian Science are truly at-one, even in their present immature growth. It may reasonably be asked, "In what, then, can they possibly differ?" And by way of answer it must be admitted that only in their con-

Digitized by Google

clusions as to method, only in their judgment concerning how they are to "push together" in their common interests, can they differ; for in loyalty to the vital issue they are indissolubly at-one.

It is evident, as well, that the less these personal viewpoints of ambition, self-will, caution, fear, criticism, and opinionated beliefs in general color individual thinking, the less divergence there will be. One church-member cannot, perhaps, in church matters, yield his opinion to that of another; nor is he expected to, for the question is not a conflict of opinions. But every member can and should surrender his opinion to the law of God, and in doing this all members will draw together in God, and the way that is nearest right will logically come to light and will prevail. In this process every honest worker will be set right and comforted, for where unity abides peace and good will abound. What is true in the church life is equally true in the family group, the social circle, the business world. Divine Love holds all men at-one; and the growth of loving-kindness in human thought, springing from Love's activity, is fast proving them to be at-one.

Christian Scientists, then, know what they have to do. They are to "push together" in their enterprises, and they are to do it by serving Christ; by resisting the "Beelzebub" of self-interest that would weaken their hands and scatter their forces. They cannot all always have their own way in all that they undertake together—no group of people "pushing together" ever can. But they can all desire and find God's way, and forget their own in the joy of His. They may sometimes utter things better left unsaid,—who does not? But the determination to know in each other only what the Father sees and approves, and the persistent effort to cherish in memory only that which blesses, soon removes heartache and exalts thought above the personal. And always Christian Scientists can classify their thinking into two kinds, that which separates and scatters, or that which makes them at-one. As the good hymn reads,—

> One in the freedom of the truth,
> One in the joy of paths untrod,
> One in the heart's perennial youth,
> One in the larger thought of God.

TRUE PHILANTHROPY.

ELIZABETH EARL JONES.

THE psalmist said: "Cast thy burden upon the Lord, and he shall sustain thee." Never was there a wiser and kinder saying than this, and we do well to heed it, especially when we are tempted by false pity to shoulder the burdens of others for them. The only helpful sympathy is to encourage those in need to avail themselves of the ever-present help of God, and lovingly instruct them to work out their own salvation according to divine Principle. Some helpers are wise enough at the start to discern the real need of humanity, but some have to learn by experience.

If we shoulder a brother's burden in a kindly but mistaken effort to help him progress in the way of perfect liberty, we first of all betray our own lack of faith in the impartiality and all-sufficiency of divine wisdom and Love to meet the every need of His every child, and to be able to do this more quickly, thoroughly, and permanently than we could ever hope to do it. Secondly, we do the needy one a vast injustice, for we thereby foster in him human dependence, laziness, and selfishness, and thus deprive him of the very foundation stones of progress, *i.e.*, the mighty wrestlings with and victories over temptation which are absolutely necessary to insure safe and honest growth in Christian Science. Dwarfing one's growth in this manner spoils his mental perspective, and blights his realization of gratitude.

When mortals pay for themselves the full price of spiritual dominion, then, and not until then, do they properly estimate its priceless value and manifest true gratitude to God, the giver of all good, and to the human helper who has pointed the way to the one infinite source. Paul said, "When I am weak, then am I strong;" and so it is that our own experiences make us truly strong, and no other's can. The Christian Science practitioner finds that he has constantly to remind himself of the psalmist's admonition in order to guard his consciousness against the subtle mesmerism of false pity. How he may best bear his own and another's burdens, "and so fulfil the law of Christ," is the subject of his most earnest prayer, and its answer involves an understanding of how to help himself and others to find in God's Word the truth which Jesus said would make us free.

However much he loves and serves, no individual is large enough and strong enough to carry even his own burden without constant recourse to divine help; much less is he able to supersede God and carry another's load. If he attempts it, sooner or later he will find it absolutely necessary to unload, and then—well, unless his circle of beneficiaries are far more generous and just than are the average type of mortals, there is apt to be some murmuring, misunderstanding, bitterness, and estrangement going about under the name of disappointed friendship. Much as we long to do so, we cannot share our birthright with others, but we can always so live that others in need can find the desired proof of God's infinite bounty and blessings for all, and gain courage to press on and avail themselves of their own birthright as children of the same good God.

When firmly grounded, individually and collectively, upon the rock of demonstration, mortals will have gained enough experience to be too meek, too thankful, too keenly appreciative of good in its every manifestation, and too charitable to have any further inclination to lean or be leaned upon, and will therefore no longer bruise, weary, disappoint, and jostle another. There is and ever will be a superabundance of good to go around, when each one claims all that divine Love has provided for him.

"GLORY TO GOD IN THE HIGHEST."

FLORENCE E. B. DONALDSON.

A WELL-KNOWN preacher once said in a sermon that he did not believe that life after death would be "an eternal sitting in damp clouds, playing on harps, and singing praises to God," as so many people seemed to think. This may have been a blunt way of expressing what he had found to be latent in the thought of many of his parishioners, but the reproof was none the less needed. Even now one is constantly confronted with the shadowy outline of some such materialistic and uncomfortable belief among professing Christians. Such a mental picture may perhaps be regarded as a mere reflex of medieval religious art. But when crude thoughts, such as these, are in possession, even if partially unrecognized and unavowed, we can hardly wonder that the modern world has shown increasing disregard of the teachings of those who, if they have not fostered such beliefs, have neither been able to prove their absurdity nor to substitute higher and loftier conceptions of the objects to be kept in view when obeying the apostolic injunctions to work out our own salvation, and to seek "an inheritance incorruptible, and undefiled, and that fadeth not away."

Perhaps there is no line of thought in which Christian Science lifts us into greater awakening light than in the view it opens out to us of what glory to God really means, and how it must necessarily fill heaven, to its widest echo, with enraptured strains of ceaseless praise. Just in the degree in which the true child of God, the expression of His being, is realized and demonstrated, thereby manifesting that spiritual sense which our Leader defines as "a conscious, constant capacity to understand God" (Science and Health, p. 209), shall we apprehend that song of

Digitized by Google

praise to Him which rises in glad spontaneity in "the perfect rhythm of head and heart." To give glory to God is as necessarily a part of our being as to reflect the selfless Love which is the divine Principle thereof. The glory of sunlight is reflected in and by everything it rests upon, and it thus typifies the sunshine of Love. As one of our hymns voices it,—

God's glory is a wondrous thing,
Most strange in all its ways,
And, of all things on earth, least like
What men agree to praise.

Thus it is only as we rise to "newness of life," turn away from material beliefs to the spiritual facts of being, that we dimly feel the beauty of holiness, the wonders of divine Love, and stammer forth our gratitude. As we do so in sincerity and in truth, we catch something of the meaning of those songs of praise which rise continually to the throne of glory, and we aspire to demonstrate that state of consciousness in which, like the beloved disciple, we shall hear that new song which no man could learn but the hundred and forty and four thousand who were redeemed.

The understanding of the metaphysical teaching and practice of Christ Jesus which comes to us in the study of Christian Science, enables us to see how the great Teacher's whole life and ministry was one continuous expression of glory to God. Born when the angels' song of "Glory to God in the highest" resounded through the skies, this song was heard throughout his entire earthly career. From the "Wist ye not that I must be about my Father's business?" to the baptism in Jordan, we know how rightly his preparatory work must have been done. Did not divine Mind declare, "This is my beloved Son, in whom I am well pleased"? It enabled him to meet each concentrated attack of error with reiterated asseveration of the allness of God. Self surrender to Principle was the key-note of every word, of every act, in our Master's life-work of demonstrating the omnipotence, omniscience, and omnipresence of God, good. To the young man who could not see beyond the human personality, he said, "Why callest thou me good? there is none good but one, that is, God." To the impetuous but receptive disciple who saw and acclaimed the Messiah, he said, "Blessed art thou, Simon Bar-jona: for flesh and blood hath not revealed it unto thee, but my Father which is in heaven." At another time we find him declaring, "I can of mine own self do nothing;" and again, "I seek not mine own will, but the will of the Father which hath sent me."

One point which cannot fail to attract the attention of the Christian Scientist, in connection with the healing work done by Christ Jesus, is the manner in which his clear thought eliminated the sense of personality and lifted the recipients of the blessing to the realization that God had healed them. Again and again we read that they "glorified God." It would seem that the complete abandonment, in his hour of trial, of the one to whom so many thousands were indebted for physical as well as spiritual blessings, is explained in a measure by the fact that while his understanding had lifted their thought to the divine Principle he demonstrated, they had not understood that, if they could not hold thoughts of gratitude to the one who had been the channel for the truth-healing, neither would they continue to give glory to God.

This should teach us something of the meaning of that endless song of praise which rises like incense to the throne of glory. Let us be careful to nourish and preserve our gratitude to Christ Jesus, "the Saviour of the world;" then this gratitude will embrace our beloved Leader for her heroic, self-sacrificing ministry, and flow on, with ever-increasing purity, to swell the angels' song. To this end every thought and every act of our lives must echo the apostle's words: "For of him, and through him, and to him, are all things: to whom be glory for ever."

SERVICE.

ROSS H. MAYNARD.

CHRISTIAN SCIENTISTS are often confronted with the question, "How can I serve the Cause of Christian Science?" To answer this it is imperative to know that there is no unimportant service in Christian Science, no matter how humble or simple our station in life may seem; but, in order to render true service, we must have a clear understanding of just what the Cause is. Contemplating that, we find it to be the establishment of the kingdom of God upon earth; the demonstrable realization that God is All; the complete elimination of the material sense of selfhood.

Mrs. Eddy says (Science and Health, p. 201), "The best sermon ever preached is Truth practised and demonstrated by the destruction of sin, sickness, and death." Just so, the best service we can render the Cause is the demonstration of the positive knowing that God is All. The definition of positive as given by Webster reads: "Not admitting of any doubt; indisputable; positive truth; positive proof." The task before us as Christian Scientists is stupendous, and the opportunities to serve the Cause are consequently innumerable. Let us be very sure that our motives in service are right motives, lest the effort weigh for hindrance rather than help. Service inspired by belief without understanding, or from a cold sense of duty, does not always help the Cause. Service based upon the positive knowing that God is All, is of itself a demonstration of the truth of our Cause. We cannot choose other than work for that which we know to be the truth.

Three essentials necessary in our work are equipment, obedience, and activity. Equipment is necessary for service of any kind. Demands are made upon us constantly to prove our position as Christian Scientists, and we must be ready to stand fast, equipped for demonstration. To do this, we must obey the teachings of Christian Science. There is no true service apart from obedience, and both service and obedience demand activity. When we realize that there is no true activity except that which is caused by divine Mind, we can see that nothing can touch or injure the Cause of Christian Science; and when we are confronted by any phase of the seeming activities of mortal mind, we then prove, under fire as it were, whether or not we have been active in our preparation, whether or not we have equipped ourselves so that we can stand calm, and render service with the spirit of Love, which is always merciful and wise. Then we can so speak and act that our light will shine before men, and they will see our good works and glorify (turn unto) our Father in heaven.

Christian Science is no less applicable to business than to the healing of sickness and disease. As a matter of fact, there is no phase of mortal life more sinful, sickly, and diseased than the so-called business life, or methods of doing business. The large majority of business men who are members of churches do not apply the teachings of the church to their business, or their business methods to the management of the affairs of the church. Why? Because they say it is not practical. Statistics from a mercantile office of recognized standing show that ninety-five per cent of those who enter business with a capital of five thousand dollars or less, make a failure. This condition certainly was not created by God, good, for we know that man was not made to be a failure. Man has been given dominion, which certainly means success for us in every right endeavor. Mortal mind always has been and always will be a failure. Why? Because it is a house divided against itself. Jesus surely taught that mortal mind government is a divided house. We know, or should know, that if Christian Science is anything, it is practical and demonstrable when applied to business, and that no man can fail when governed by Christian Science.

Digitized by Google

The writer's twenty-five years of business experience enables him to state intelligently that there is not a business man or woman on earth who is opposed to what Christian Science would give to them; neither are they in reality opposed to its Leader, Mrs. Eddy, or to any of her teachings. They are opposed to what they think Christian Science is,—their concept of it and of her teachings having been formed from hearsay, or what they have been told by unwise students or by opponents of Christian Science. The writer can also state from experience that a business education guided and governed by Christian Science is the education every business man wants for himself and his children. Think what wonderful service each Christian Science business man or woman can render the Cause by proving this to the world!

Every Christian Scientist can render the Cause an important service by remembering that our Leader instructs away from personality to the behests of God. Impatience or argument with opponents never destroys antagonism, but always tends to intensify the belief that the opponent has cause for opposition. When presenting or explaining Christian Science to another, we should heed the Master's counsel, "Be ye therefore wise as serpents, and harmless as doves." Every Christian Scientist needs to know that it is necessary to be alive to our opportunities and put into practice what we have been taught. True gratitude is expressed in deeds not words; and Jesus said, "By their fruits ye shall know them." In "Miscellaneous Writings" (p. 110), Mrs. Eddy says, "What grander ambition is there than to maintain in yourselves what Jesus loved, and to know that your example, more than words, makes morals for mankind!"

SUNDAY SCHOOL WORK.

CLARA M. DARLINGTON.

SOME years' experience in Sunday School work has led to the desire to express my gratitude for the by-laws in our Manual governing Sunday Schools. This is particularly true with reference to the by-law which outlines the subject for lessons, and more particularly that part described as "first lessons:" that is, the Ten Commandments, the Lord's Prayer and its spiritual interpretation by Mrs. Eddy, and the sermon on the mount, as it has become so evident that this study supplies the foundation and necessary preparation for the work to follow.

After working with a class of small children for a short time on the "first lessons," I found myself looking forward to the time when I would be given a class old enough to study the Lesson-Sermon, or as stated in the Manual, "the next lessons," thinking that in this work would be found the great opportunity for the pupils' advancement as well as my own. As I, however, had been asked by the superintendent to remain with this class until the first of the year, which was some months hence, I found myself under the necessity of making a deeper research in the Bible and Science and Health for the spiritual interpretation of the commandments, beatitudes, etc., being told that there was much in these which would unfold when prayerfully studied. It was with this thought that I took up the Concordance, and starting with the question on page 465 of Science and Health, "What is God?" I found in addition to the answer to this question many clear, concise statements which brought out the thought of God as Mind, Love, Principle, etc.; and I saw that, first of all, the pupil entering the Christian Science Sunday School should be given a correct concept of God, even though this concept might be quite limited in the beginning. It was then that I began to comprehend something of the reason why Mrs. Eddy in her great wisdom had provided the commandments as the first lesson for every pupil entering our Sunday Schools, and also why this work is just as important for the young people in their teens who now enter our Sunday Schools as it is for the smallest child, since nothing else could be given to the pupil intelligently until this foundation is established and the pupil has gained some glimpse of the one creator, the infinite Mind that is good only.

Then, in taking up the word "idolatry," which was suggested through "graven image," I found (Science and Health, p. 140) that "the first idolatry was faith in matter;" and since idolatry is the attributing of power or being to some other source than the one true God, it is plain that the second commandment strengthens the first one by declaring that man shall not make unto himself another creator, that is, believe that matter is a creator. Here, then, is the thought that came: Thou shalt have (know) one God who is Love, Mind, good. Thou shalt not have (not know) matter, evil, sin, disease,—anything that is unlike God; and that to fail to have the active thought which declares the reality of good and denies the reality of evil is to "take the name of the Lord thy God in vain." Invariably the claim is presented that there is evil and matter, because mortals seem to see it with their eyes; an argument which may be met with the question, What are you honoring in your thought,—your Father-Mother God, who created all things spiritually, or are you believing in another creator? This line of thought continues to unfold throughout the Lord's Prayer and its spiritual interpretation by Mrs. Eddy, and then follows the comforting beatitudes, which add to these commands, or divine laws of life, the preparation of the heart so necessary for true obedience.

This last part of the "first lessons" showed me that thought needs to be emptied of all preconceived opinions of God, man, and the universe, to be "poor in spirit," in order to know the truth of being; that mortals need to be mindful of this all along the way, so that they may have one Mind, one God, and keep the First Commandment; also, that it is true meekness to know that man is nothing of himself; that we can only have true peace on one basis, namely, the knowledge of the allness of God and the nothingness of evil. Through obedience to the commandments we find that there is only one way by which we can be "pure in heart," and that is through honoring Spirit and not matter; and that "the determination to hold Spirit in the grasp of matter is the persecutor of Truth and Love" (Science and Health, p. 28). It was at this point that I saw why the order in the Manual places the commandments before the beatitudes, and why the First Commandment is first in importance.

It is now nearly three years since my thought turned longingly to the "next lessons," and since that time I have found so much to learn in the "first lessons" that I do not yet begin to see the end. The awakening which comes as this work continuously unfolds, fills me with gratitude to our Leader for by-laws that give us what we need, long before we have the understanding to appreciate it; that it is only through intelligent obedience we are led to where we can see, and are then filled with rejoicing through this vision.

From the love of liberty and, from what is rarer, the ability of organizing liberty in institutions, sprang the America of which we are so fondly proud. Our popular or democratic idea is associated with the religious instinct, so that our political has always rested upon our religious liberty. Democracy is the declaration of a brotherhood of rights, and therefore, with a sublime propriety, forecasting its destined liberty, the first articulate words of America were, "All men are born free and equal,"—the echo in the mouths of legislators and the hearts of a people of the song the Syrian shepherds heard from celestial singers, "On earth peace, good will toward men."—GEORGE WILLIAM CURTIS.

SELECTED ARTICLES.

[Frederick Dixon in *Nation*, London, England.]

The writer of the short notice in your issue of the 16th inst., of Miss Milmine's life of Mrs. Eddy makes an illuminating remark. He says that it is difficult to understand from the picture drawn the fascination exerted by the subject. It certainly is most difficult to understand. The writer depicts Mrs. Eddy—the terms are those selected by the reviewer—as "selfish,"—yet Mrs. Eddy is known in her own neighborhood as one of the most charitable of citizens. When, not long since, after a residence of nineteen years in Concord, she moved to Boston, the mover of the farewell address, carried unanimously by the city council, spoke in these terms: "It is quite unnecessary for me to prompt your memory of the countless deeds of charity and her endless gifts. Neither is it necessary for me to call your attention to her innumerable donations to the more unfortunate ones in our midst." "Fickle,"—yet she is surrounded by workers, inside and outside her household, who have lived on terms of intimacy and the deepest affection for her for a quarter of a century. "Unlearned." —yet the Christian Science movement contains thousands of men successful in business and well known at the bar, in the army and navy, and in artistic, literary, and scientific circles, who have found their greatest intellectual and spiritual stimulus in her teaching.

Is it any wonder that Dr. Allan McLane Hamilton, himself not a Christian Scientist, but one of the most distinguished of American medical men, who was brought in contact a little time ago with Mrs. Eddy in a law case into which she had been forced, wrote to her afterward: "It is the lot of every one who is in earnest in this life to have rivals and sometimes calumniators, and you have certainly had your share." "Suspicious,"—yet she has conceived a form of church government, the most democratic in the world, in which every congregation holds and disposes of its own church property, makes its own by-laws, and governs itself literally for the congregation, by the congregation. So suspicious is she that no member of the church is permitted even to make a complaint to her about another member. "Unscrupulous,"—yet the entire organization of the Christian Science movement is, under her instructions, scrupulous to the last extent of the rights and feelings of those who do not agree with it. "Quick to make and unmake favorites the moment she suspects want of obedience." —yet she never interferes in the government of churches, but on the contrary leaves the entire movement free to work out its own salvation. No wonder that a great New York paper, absolutely unconnected with Christian Science, lately wrote, "The public is tired of the hue and cry against Christian Science, and is not a little sympathetic with the dignified lady who presides over the councils of that church."

The fact is that the book in question is the outcome of the reminiscences of people not merely without sympathy for, but burdened with prejudice and actual antagonism against, Christian Science. The only witnesses who have not been called are those who know Mrs. Eddy intimately, and have worked beside her for years. Without exception the testimony of these is absent. The original publishers claim that the greatest care has been taken to ensure correctness, yet they ignored the offer of the committee on publication in Boston to correct errors in the letterpress, and though Mrs. Eddy is by far the best-known woman in America, published as a picture of her a picture of another person. Biography is one of the most difficult of literary undertakings. Biographies of contemporaries, while the battle is still being joined over their teaching, are the most difficult forms of portraiture not to get out of focus. Imagine a biography of Charles I. written by Hugh Peters, or of Cromwell written by Laud! The true biography of Mrs. Eddy is being written daily in the healing of sorrow and sickness and sin all over the world. The Archbishop of York, speaking not long ago, though disagreeing with the theology of Christian Science, bore generous testimony to the lives of Christian Scientists. Those lives they have learned to live by reading Mrs. Eddy's books, and in the words of Jesus, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit."

[Alfred Farlow in *Fort Worth* (Tex.) *Record*.]

For the past forty years Christian Science has been quietly healing sin and sickness, and its beneficiaries and adherents in all parts of the world witness unhesitatingly that they are better than they were before they came under the influence of its teaching. They declare that they are better neighbors, better business men, better husbands and better wives, and as a rule their neighbors speak also of their increased goodness and cheeriness: therefore we might ask, as did the Master, For which of these good deeds do ye stone us?

The gentleman declares that "the Christian Science textbook purports to be equal in authority with the Bible, and is studied with far more zeal than the infallible Word of God." A testimonial may not be out of place here. When I became a Christian Scientist I was a member of an orthodox church and a student of the Bible. In my childhood days I won several prizes from the Sunday School of which I was a member for committing to memory verses and chapters in the Bible. As I grew older I was unable to reconcile the purely material construction of the Scriptures with my growing sense of the infinite love of God. Later on I became alarmed at my condition of mind and grew despondent and melancholy. I commenced to feel that I was a hypocrite in retaining my membership with the church under the circumstances. I resolved to have a talk with my pastor, and if he could not dispel my doubts and fears, withdraw from the church and fight it out alone. Just at this time Christian Science came into my life, and while it saved me from sickness and despondency, it also saved for me the Bible.

Thousands have testified that they have been redeemed from skepticism and infidelity in regard to the Word of God, and are now studying and defending the Bible which they once cast aside. It is quite true that Christian Scientists study their text-book with zeal, and believe that the book teaches the truth, but I doubt if any Christian Scientist has ever made a comparison in his own mind regarding the Bible and the Christian Science text-book. He regards the latter as a key to the former. He loves the Bible more than ever, and his love for it increases daily, owing largely to the fact that Christian Science has rendered it both more intelligible and more practical. It is probable that in his weekly sermons our critic says much by way of explanation of his understanding of the Bible teaching. It is probable, too, that his sermons are sometimes published. If in reading these sermons people were spiritually quickened and helped, would he consider it a great offense in them if they were to make a frank statement of the fact? I think your readers will readily agree that the mere fact that Christian Scientists love and honor and study the Word of God more than they did before they had read Mrs. Eddy's writings, disproves the gentleman's charge. It is anomalous to suppose that a great body of intelligent persons have become intensely interested in God's Word by their zealous study of a book which is opposed to the Bible.

The gentleman further says that he regards Christian Science as "subversive of all truth and dangerous in the extreme." The Master said: "God is a Spirit," and his apostle declared, "Spirit is truth." Therefore God is Truth. As we have before stated, Christian Science plants itself unreservedly on this Scriptural definition of God as

Digitized by Google

Spirit, Love, Mind, Truth, good, and thus far no critic has ever attempted to prove any statement contained in the Christian Science text-book as not consistently deduced from these premises. The only danger that is incurred in the practice of Christian Science is the danger which Truth brings to error, which pure and holy living brings to sensualism, and I trust that the lives of consistent Christian Scientists will attest this fact.

[E. M. Deuel in *Harbor Springs* (Mich.) *Graphic.*]

In my working relations with different churches for many years, I have found none more earnestly persistent in going about doing good "in his name" than the Christian Scientists; none more fully awake to the fact that, if they expect to reign with Christ, they must also share his cup of earthly sorrow, rejoicing if they may be counted worthy to suffer shame and persecution for his name; none who take more literally his whole command to "preach the gospel" and "heal the sick," well knowing that only in proportion to their right understanding of Truth can they cast out the evil in themselves and others.

Gamaliel said, "If this counsel or this work be of men, it will come to naught: but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God." It seems strange that in this enlightened age, "the painful story of the persecution of every new truth goes on, and in proportion to its vitality has been the bitterness of attack."

We know that "Jesus amazed the multitude with his new ideas followed by his works, with the resulting persecution, false witness, and the martyr's crown; and his disciples were slain, save one, who was banished." We read that the founders of the Baptist and Methodist denominations received very unchristian treatment in this country from our good old Puritan forefathers. They were reviled, persecuted, and driven from place to place by mobs. In one small town Jesse Lee, the founder of Methodism in New England, was much encouraged because one or two dared kneel down during prayers, and he said, "The lion begins to roar very loud in this place, a sure sign that he is about to lose some of his subjects." Does history repeat itself in our enlightened day and country?

In Boston only one hundred and twenty years ago, Lee was refused the use of any building, public or private, where he could speak. The ground was too wet for him to preach out under the "Boston elm," where he had spoken on a former occasion, and, discouraged, he left the place amid poverty, neglect, and insults, saying, "The Methodists have no home, but their time may come," and today the historian tells us that, according to the census of 1890, the Methodist family constitute nearly one third of all the denominations in the United States. Rather a healthy organization as to numbers, considering all the opposition met by it. "But," the critic says, "numbers count for nothing," and quotes, "Thou shalt not follow a multitude to do evil."

The study of Christian Science has revealed to its followers more clearly than anything else the divinity of Jesus Christ, and the fact that through the acquisition of his faith, and in the following of his example, must come the regeneration and salvation of the world. On page 22 of "Science and Health with Key to the Scriptures" by Mrs. Eddy, we read, "Whosoever believeth that wrath is righteous or that divinity is appeased by human suffering, does not understand God." Our daily prayer now should be one of thankfulness that Christian Science or the Science of Christ is here to give us a higher and nobler concept of God, and of man created in His image and likeness; that it teaches us the necessity of holding "malice toward none, with charity for all;" that its followers hold in due respect and admiration all noble Christians in every denomination who are fighting the good fight for the upholding of universal righteousness, and that now, if they feel the necessity of diverging somewhat from the old theological path, on account of their greater love and reverence for God, their parting message is, "Let there be no strife, I pray thee, between me and thee, . . . for we be brethren."

[Henry Deutsch in *Winona* (Minn.) *Republican-Herald.*]

Mrs. Eddy most decisively reiterates again and again the great fact that the Bible contains the whole truth, and she proves it by so illuminating and bringing it to the comprehension of her followers that, as a result thereof, they are able to prove it by repeating the mighty works recorded therein. Is the man who is suffering from sin, disease, and sorrow, interested in a future salvation, or in a present surcease? Were the promises of Jesus all for the future? Did he mean nothing when he said: "Behold, the kingdom of God is within you;" "He that believeth on me, the works that I do shall he do also; and greater works than these;" and "Come unto me, all ye that labor and are heavy laden, and I will give you rest"?

When the light of Christian Science came to Mrs. Eddy, she knew that the promises of the Master were for present fulfilment, and so for forty years Christian Science has pursued its stately course, lifted from the gutters the downfallen and sinful, raised the invalid from the bed of pain and suffering, restored the atheist, the infidel, and the agnostic to a present knowledge of God as our Father, as the God of Life, Truth, and Love, and brought to a sinning, suffering world the hope and the realization of a present-day redemption and salvation. Christian Science says, even as the Master said, "Be not afraid, only believe;" and to those who obey comes the ever-present and convincing assurance that God is here; that He is not a God "afar off," but a God "at hand," and that here and now we may realize the fulness of God's love and mercy, which the Master came to portray.

There are many statements made as to what Christian Science teaches, and these statements are as generally incorrect as the attitude of those who make them is critical and prejudiced. The doctrines of Christian Science are not secret. Its fundamentals and rules are fully enumerated and expounded in the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and every one may for himself read and learn therein just what Christian Science teaches. Its doctrines may at first sight seem to some strange and perhaps startling; but this should not be surprising, for such is the history and experience of every new revelation of the truth, whether it be in the realm of philosophy, religion, or physics. It was also true of the Master's teachings, and because the world was not then ready to receive them, he paid the penalty on the cross; and it was several centuries before they were accepted and had attained to vitality and strength.

Human opinion at best is frail and not reliable. What we think is ofttimes very far removed from what is the actual fact, and so our impressions of religion and of truth are so often the result merely of tradition or the accident of birth, that they furnish no safe foundation for right conclusions. Christian Science fortunately is not dependent for its justification upon the mere written and spoken word or argument; nor is it dependent upon profession or the dicta of those who claim to speak with authority. The Principle and rule of Christian Science is at hand for every one, and its truth can be proven in the practical application by every one who is willing to make the earnest, fair-minded attempt, and thus prove for himself the truth of the Principle which it enunciates.

It is in this manner that Christian Science has gained its following. It seeks not to divert the followers of any

Digitized by Google

other creed or religion. It makes no effort to proselyte or to convert, but it says to all the world, "Ho, every one that thirsteth, come ye to the waters"! If Christian Science has drawn from the ranks of the other churches, it has been not by an effort on the part of its followers, but because it offers to those poor discouraged seekers for the truth that for which they have searched in vain in their former church home and found only in the Christian Science church.

[John Galsworthy in *London* (Eng.) *Chronicle.*]

Reformation does not come from beating on the prisoner's fiber with the dull mallet of suffering. To reform one must inspire. There is a spark of good in every man's breast; the only chance lies in fanning that spark. But if we are not reforming men in our prisons, how can we be said to be protecting society by sending them there? We are endangering society; we are nurturing the spirit of crime. The fact of the matter is: revenge is still at the back of our thought. Let a man argue on the subject with whomsoever he will, ten minutes will not have passed before he makes this discovery. We still feel that because a man has hurt us, we must hurt him. And this feeling destroys all the economy and science of our law. When a crime is committed, all we should be concerned with is the application of the best possible means to minimize the results of that crime, to ensure that society shall run the least possible risk of a repetition of the crime, and the offender the least possible risk of remaining a criminal.

In doing this we cannot, so far as I can see, avoid the detention of our criminals, but we can, and should, avoid inflicting suffering on those whom we detain, beyond the suffering which is inseparable from detention; for by extra suffering we do not deter others from committing offenses, and we do foster in those whom we are detaining the disposition to commit fresh offenses when they are released. The diminution of crime in the bulk depends hardly at all on deterrent punishment, but on wide and impalpable influences, growth of social feeling, spread of education, betterment of manners, decrease of intemperance, improvement in housing, a hundred other reasons.

Crime is disease. It is either the disease of weakness or the disease of inherited taint. We have fought against this conclusion because we still harbor the spirit of revenge; but as knowledge advances, we shall, we must accept it. And the sooner we do accept it the less money shall we waste, the less harmful and unnecessary suffering shall we inflict. For a man with any sympathy in his composition it is impossible not to feel for those who, administering justice, earnestly desire to do their best, and are often, I am sure, sick at heart from the feeling that what they are doing is not the best. It rests with public opinion in this country to reanimate our attitude toward crime; to shake itself free of our muddled conceptions of the object of punishment; to scotch once for all the evil spirit of revenge; to rise to a higher, more generous, more scientific and decent conception of our duty to our neighbor, even when his conception of his duty to ourselves has been deficient.

Let us get rid of the idea that we are protecting society and reforming offenders by inflicting suffering that we falsely call deterrent. Let us detain our offenders, as it were, in school instead of sending them to prison. Loss of liberty is, next to loss of life, the most dreaded of all fates; it has in and by itself all the deterrent force that is needful; the statement sometimes made that a certain type of criminal finds prison rather pleasant than otherwise, I do not for a second believe. If it were true it would be contrary to all that we know of human nature. Let us, then, take loss of liberty as our sole deterrent, and on those whom we deprive of liberty let us use all the resources of a humanity and common sense that shall refuse to apply to criminals methods which would be scouted in the reform of human beings outside prisons. I am talking to the wind, but the wind goes round the world. May the wind carry these words into a few hearts not too indifferent and not too scornful to open to them a corner of welcome!

[W. E. Fell in *Yorkshire* (Eng.) *Post.*]

In an otherwise kindly criticism of Christian Science, the Rev. W. F. Mayer is reported in your columns as having "described the teaching of Christian Science as a strange mixture of truth and error, and its treatment of Scripture as abounding in faulty exegesis and distorted interpretations."

Now it seems to me that the only rational way of bringing home to the Christian Scientist the errors under which he is supposed to labor would be to show him a better way of destroying sin, sickness, disease, sensuality, and the drink and drug habit than that which he is practising. Such a demonstration of the understanding of a better way would carry more weight than carping criticism mixed with faint praise. Jesus did not say that it was by their religious views or professions, but "by their fruits," that the true Christians should be known. It is not words of which the world is in sore need today, but a return to the healing Christianity of Christ and his immediate followers. Christian Science is a religion of works, and that is why its success is phenomenal.

Most emphatically Christian Science does not rob "the New Testament of its Saviour," but it does unfold to the unprejudiced seeker for truth a present Saviour "at hand," bringing to sinful and suffering humanity an absolutely full salvation from sickness as well as sin—salvation from all that is unlike God, whose image and likeness the real man bears. The progress of this practical Christianity is assured, because it is the direct teaching of Jesus, from which all merely human opinion and dogma are eliminated. Why should any Christian wish to hinder or criticize that which heals the sick, reforms the sinner, and frees man from loathsome habits? "Faith without works is dead."

[James Phelps in *Milwaukee* (Wis.) *Sentinel.*]

It seems quite natural that mortals should think that those who hold a different view from that held by their own school, are poor, deluded people; and our critic is apparently no exception to the rule. He seems very much perturbed that our legislators cannot see through the specs used by his class of doctors; but sensible people are beginning to realize that the doctors are not the repositories of all knowledge, especially since they differ so radically among themselves and also because they fail so often to heal the people who trust them most implicitly.

No doubt it takes considerable breadth of mind in a physician not to feel chagrined when he sees Christian Scientists setting the so-called incurable on his feet; but our medical critic ought to know that what is deemed good theory and practice by the doctors of one generation is often discarded by the next. Christian Scientists have no objection to the doctors teaching the children of parents who believe in them, but they do insist on their constitutional rights to have something to say about the education of their own children, and it would certainly be a narrow mind which would attempt to deny this right

---

NEW EDITION OF "CHRIST AND CHRISTMAS."

A new edition of "Christ and Christmas" is ready for delivery. This edition is printed from new type on a tinted paper which brings out both letterpress and engravings with a softness and distinctness very pleasing to the eye. The book is bound in such a way as to make it durable and easy to handle.

Address all orders to Allison V. Stewart, Falmouth and St. Paul streets, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

TAKE NOTICE.

MRS. EDDY has requested that as a rule no more letters to her shall be published in our periodicals.

ADAM H. DICKEY, *Secretary.*

BUILDING ARIGHT.

IT sometimes appears to those who are engaged in slowly and patiently building up a Christian Science church or society in a small city or town, that perhaps more aggressive methods than those ordinarily in use might be employed with advantage, in order to secure more quickly the desired growth in numbers of the church membership. This feeling has at times tempted some to become rather impatient, and to seek for such methods as they hope will bring about more rapid growth. To such as have felt this way in regard to their branch church problem, who, unmindful of the lesson taught by the Master,—"First the blade, then the ear, after that the full corn in the ear,"—would hasten the reaping of the harvest while the field yet awaits the seed, it may not be out of place to say a few words at this time.

In the past experience has repeatedly proven that genuine and healthy growth of the Christian Science Cause has been due to the fact that this movement is not one of words alone, but rather one of words backed up, substantiated, by works; that its preaching has not been the sum total of what it has to offer to needy humanity, but that it has been ready as well with its practical demonstrations of the healing and saving power of Truth,—the "works" which justified its "faith."

The unnumbered thousands who have identified themselves with the churches and societies of this denomination have not done so because of the pleasant things that have been spoken in regard to Christian Science and Christian Scientists, but because of the appeal made to their intelligence by the healing of the sick and the reformation of the sinful which have come within their personal experience. The one great and important thing, therefore, to be done by Christian Scientists, in order most effectually to help their branch churches to grow and prosper, is to demonstrate the fact that Christian Science is based upon divine Principle; that its teachings can be proved to be true, and that the sick and sinful are healed and saved through the practice of its "divine beatitudes" (Science and Health, p. 446).

The more healing work there is done by Christian Scientists, the greater will be the growth of the movement, and the greater will be the benefit conferred upon humanity. In "Miscellaneous Writings" (p. 206) our revered Leader writes: "Growth is governed by intelligence; by the active, all-wise, law-creating, law-disciplining, law-abiding Principle, God." Surely no larger boon can come to mankind than the knowledge of God which heals and saves, and no nobler work can be undertaken by any one than that which has so effectually proved its divine basis as has Christian Science.

The literature, the lectures, the church services in all their simplicity and earnestness, the quiet poise and gentleness of Christian Scientists themselves,—all these have their place; but the Christianity which fulfils the requirements of our Master's teachings and prophecy is the one great essential, and it rests with us individually to prove to the world that we are able to meet the test he imposed when he said: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

ARCHIBALD MCLELLAN.

INCREASE.

WE are often reminded in modern times of the proud boast of the Laodiceans, "I am rich, and increased with goods, and have need of nothing;" and of the stern rebuke of Spirit, "Thou . . . knowest not that thou art wretched, and miserable, and poor, and blind, and naked." There are many who have earthly possessions in abundance, yet feel themselves to be miserable indeed; and again there are millions who believe that supreme happiness would be theirs if they had all the material things which they crave. It is certainly true that no one can be satisfied with poverty or limitation, but it is no less true that no one can be satisfied with materiality, since desire for it enlarges with possession, and oftentimes he who starts out to be a ruler of men becomes in time a slave to his wealth. Yet all the while the law of increase is a fundamental law of being, and as such it cannot be set aside.

All through the Scriptures "increase" is promised as the result of obedience to God's law, and Christian Science explains how we may attain the "blessing of the Lord" which "maketh rich, and he addeth no sorrow with it." Christian Science teaches that we can find our true selves only as we reflect God. No one would ever think of God as being poor, but even with the faintest gleam of spiritual light we can see that the divine sense of possession must be wholly unlike that of mortals. God possesses all that is real, as Mind, Spirit; therefore He forever says, "Let there be." Creation is forever unfolding from the creative Mind, and even on the human plane we have a hint of this ceaseless activity, for without it the whole universe would be resolved into chaos. No one who reflects the divine activity can fail to express in some degree the divine sense of possession, and it was doubtless to this that Paul referred when he said, "All things are yours."

There are some who mistakenly think that the earthly life of Christ Jesus was characterized by poverty, but the Gospel narratives fail to sustain this belief. It is true that his early environment was lowly, but we read that as he advanced in years he "increased in wisdom," also "in favor with God and man." While he counseled his followers to lay up treasure in heaven, he also told them that all their needs were supplied by their heavenly Father, whose lavish bounty he illustrated by the lilies of the field. He taught that in order to avail ourselves of this bounty we must seek "first the kingdom of God, and his righteousness;" and that then all other things would be added. He also illustrated the law of increase in the parable of the talents, in which he severely condemned the one who charged his poverty to the lord who had supplied him with the one talent. Jesus called him "wicked and slothful," and we may well beware lest we be robbed, by the errors here indicated, of our divinely bestowed right to increase.

Mrs. Eddy's wonderful discovery of Christian Science reveals the fact that, as the heavy burden of false belief is thrown off by spiritual understanding, "human capacities are enlarged and perfected" (Science and Health, p. 258); and the recognition of this great truth blesses all mankind. The unfolding of these capacities means the rounding out of character and the consequent overcoming of all that would limit or retard progress. When one begins to

Digitized by Google

exercise man's God-given dominion over his own thoughts and his body, he has begun to take possession of a boundless heritage of good. Error can never rob us of the real, and with this truth ever before us we press on with noble ambition to be, to do, and to possess, remembering Tennyson's estimation of Fortune and her wheel in Enid's song.—

> Smile and we smile, the lords of many lands;
> Frown and we smile, the lords of our own hands;
> For man is man and master of his fate.
>
> Turn, turn thy wheel above the staring crowd;
> Thy wheel and thou are shadows in the cloud;
> Thy wheel and thee we neither love nor hate.

ANNIE M. KNOTT.

A SIGNIFICANT BY-PRODUCT.

WHEN Christ Jesus declared that "a good tree cannot bring forth evil fruit," he enunciated that unvarying law of identification and estimate which is divine, and which Christian Science insists upon and is ready to submit to as a final test of values. Phrased in the language of the day, its import would be conveyed in the statement that not only the products of a real good, a divine idea or order, will always be good, but its by-products, its every incidental effect, will always be good also. This is a fundamental teaching of Christian Science, that there can be no fraternity or commingling of good and evil, and no transmutation or transformation of good into evil or evil into good,—that they are as finally and forever separate as are light and darkness.

The world is beginning to see this mutual exclusiveness of opposites such as truth and error, and in so far it is prepared to accept the fact that the knowledge of God and His manifestation which Mrs. Eddy has named Christian Science can bring forth only good, and that any failure or imperfection which may attend the human expression of Christian Science is not traceable to its presence but to its absence. The consciousness which has acquired but a meager apprehension of divine law may try to solve a problem of which it is as yet incapable and fail, as did the disciples in the case of the epileptic boy, but to attribute such a result to the law of Truth would be as gross a mistake as to hold the rule of numbers responsible for the blunders of an accountant. The world is also beginning to see that a system of teaching and healing which is attended by incidental results that are evil, and always so, cannot be a true or trustworthy system, though its immediate effects may in many instances seem good.

All this is very pertinent to the fact that, according to statements made by Dr. Kebler, chief of one of the departments of the government bureau of chemistry, which appear in a recent government bulletin, the "drug-habit" in America is becoming an "alarming problem." The whole world has been moved by a knowledge of the "opium scourge" of the East, and yet, according to the figures given by this government officer, there are more "drug fiends" in the United States, in proportion to the population, than in China! "Not only is there an increased consumption of opium and its derivatives," says the bulletin, "but large quantities of other habit-forming agents [nine are enumerated] are *being introduced chiefly for medical purposes*" (our italics). We are told that many of these are found in patent medicines; that many of the mixtures are concocted, directly or indirectly, by unscrupulous physicians, and that illicit sales of cocaine, morphine, etc., are also made by druggists, both wholesale and retail.

So serious is the situation, that it is named "one of the gravest of existing social evils;" and yet it is by no means so serious, surely, as the related fact that, according to the faith of many Christian believers throughout the world, these drugs are divinely provided and therefore good, and those who prescribe them are fulfilling Christ Jesus' command to "heal the sick," despite the proof thus supplied that their use is invariably attended by the debauchery, disease, and death of men. No one can fail to see that the logic of this contention makes the source of all good responsible for an unquestioned evil, and involves a direct contradiction of our Lord's statement that "a good tree cannot bring forth evil fruit."

Against this palpably inconsistent concept of the divine order, this outcome of material belief, Christian Science protests, while commending for every outcome of ignorance and sin that remedy which Christ Jesus employed, and which effects good, and only good. Those who are so thoughtful and unprejudiced as to be capable of accepting a new point of view can but recognize the propriety of this protest and its possible significance to the well-being of all mankind. JOHN B. WILLIS.

AMONG THE CHURCHES.

A GOOD EXAMPLE.

Toronto, Oct. 21, 1909.

Editor *Sentinel*, Boston, Mass.

Dear Sir:—At the last quarterly meeting of First Church of Christ, Scientist, Toronto, it was suggested that a subscription be taken up for the purpose of supplying *The Christian Science Monitor* to public institutions. As a result, sufficient funds were immediately raised to furnish the paper to fourteen of these institutions for one year.

Yours in truth,

A. LEADLAY, *Clerk*.

SEATTLE, WASH.

At a regular business meeting of Second Church of Christ, Scientist, held Jan. 4, 1910, it was decided that, as its property used for church purposes had been paid for and was suitable for the present need, a building fund should be established to assist First Church in completing her church edifice, and this offer has been very lovingly accepted by First Church. Our membership is not large, yet we realize that the little we may do, if given in love and with the right thought, will be a help to our sister church in completing the edifice which is so much needed. Our Master said, "I am not come to destroy, but to fulfil;" and we are striving to reflect the Christ-spirit, the Christ-love, which assists, constructs, establishes, and supports every work that is needed in the giving out of this truth which is doing so much for humanity throughout the world.—*Correspondence.*

ROCHESTER, N. Y.

One year ago last January former First and Second churches of this city united, forming a new First Church, meeting in the edifice known as First Church of Christ, Scientist. From the day of this union we have been looking forward to a new church building, the one now occupied being small and the congregation filling it Sunday after Sunday.

This spring the thought of the need of a new building became a very positive and general one. The expression of this at a members' meeting was followed directly by an offering of a site, meeting in every respect the requirements. This was immediately secured, with the unanimous approval of the congregation. As soon as practical after completing the financial demonstration of this property, we shall begin the erection of our church, which, built in unity of thought and purpose, will in fact be a "structure of Truth and Love." In the mean time we are, each in his individual consciousness, preparing the stones for our spiritual structure, that they may rightly fit together, demonstrating a church that shall suitably represent our great Cause in this city.—*Correspondence.*

WILLIAMSPORT, PA.

First Church of Christ, Scientist, of Williamsport, has bought the property at the corner of Maynard and Third streets from the Third or Central Presbyterian church congregation, and will occupy the church building after the Presbyterians move into their handsome new home on Fourth street. Only necessary repairs will be made to the church structure, as the Scientists look forward to building at some future time a new church on the corner. The Christian Scientists will hold their first service in their newly acquired home on Wednesday evening [May 11]. Their regular Sunday services will begin on the 15th.

Gazette and Bulletin.

HOUSTON, TEX.

Members of First Church of Christ, Scientist, will shortly begin work on the construction of a handsome new edifice at Jefferson avenue and Hain street, which will cost between forty thousand and fifty thousand dollars, the lot being valued at eighteen thousand five hundred dollars. The work of raising money for a new building has been going on quietly for two years, and the plans were formally accepted last week. The church will be of Greek and Roman design, built of stone and pressed brick and surmounted by a copper dome. The structure will be 57 x 92 feet, the lot being 62½ x 125 feet.

Starting in 1898 with fifteen members, the church has made rapid progress. The present frame edifice at Travis street and McKinney avenue has long been inadequate for the needs of the congregation.—*Houston Post.*

WATERTOWN, S. D.

The new church building of Second Church of Christ, Scientist, at the corner of Third avenue and Oak street N., was occupied for the first time yesterday [May 15]. The church is of pure colonial design, with the massive pillars and porch effect. It is 52 x 46, and will seat over two hundred. The cost of the building was four thousand dollars, and the lot two thousand dollars. The church is situated on a very prominent corner, just out of the business section of the city, and is the only church building on the North side.—*Watertown Public Opinion.*

PUYALLUP, WASH.

The members of First Church of Christ, Scientist, of Puyallup, Wash., are now occupying their new church at the corner of Pioneer avenue and Ash street. The building is after the bungalow style, neat, artistic, and attractive, with a seating capacity of two hundred. A pleasant and convenient reading-room is provided in the front of the building, while the Sunday School class-rooms are in the rear. The members are delighted with the results and are encouraged to do better work, recognizing that "the harvest truly is plenteous."—*Correspondence.*

We long to leave something behind us which shall last, some influence of good which shall be transmitted through our children, some impress of character or action which shall endure and perpetuate itself. There is only one way in which we can do this, only one way in which our lives can receive any lasting beauty and dignity; and that is by being taken up into the great plan of God. Then the fragments of broken glass glow with an immortal meaning in the design of His grand mosaic. Then our work is established, because it becomes part of His work.

HENRY VAN DYKE.

THE LECTURES.

MARYVILLE, MO.

Prof. Hermann S. Hering lectured here on Christian Science Sunday afternoon, Feb. 20, in the Empire Theater. He was introduced by Ralph W. Eversole, First Reader of the local church, who spoke in part as follows:—

The healing work that Christian Science is accomplishing is in direct confirmation of Jesus' words, when he said, "He that believeth on me, the works that I do shall he do also." Christian Science gives us the correct understanding of God and of man's relation to God, and this is the truth that makes free. Jesus' words and works do not belong to a dispensation now ended. They are for all people and for all time.—*Correspondence.*

ALTOONA, PA.

Frank H. Leonard of Brooklyn, N. Y., delivered a lecture on Christian Science at the Mishler Theater, in Altoona, Pa., March 8. He was introduced by D. Lloyd Claycome, Esq., who said in part.—

I believe that all Christendom will bear witness to the truth of my statement that in the onward march of the Christian church, as it fought its battle against the most stubborn opposition to its final triumph, its greatest progress was most marked where it was allowed the freest and fullest discussion of its claims. And, as no truth can be injured by the fullest possible discussion of the fundamentals of that truth, neither can the Christian religion be injured by a like discussion of what it claims.

I understand that Christian Science does not claim to teach any new truths. Truth being eternal, there can be no new truth, and so Christian Science only claims to vitalize and emphasize the truth that has always existed. It has for a number of years been passing through the crucible of modern thought, and so far has survived the assaults and the closest scrutiny of the most keen and careful skeptics, and in spite of this opposition has taken its place as a recognized Science in the forum of modern Christian thought. As Christianity came when the world was under the spell of materialism, so I believe that Christian Science has come when even Christendom is passing through the throes of materialistic thought; and when I witness the Christian energy and fortitude and optimism manifested by the Christian Scientists, I am willing to accord to them the fullest discussion of their claims, so that—if I am in error in any way in my Christian thought—I may be brought to light; and I believe that this intelligent audience here tonight will bear evidence of the logic of this position.—*Correspondence.*

NEW YORK, N. Y.

On the evening of April 1 a lecture on Christian Science was given by Bliss Knapp in the church edifice of Fifth Church of Christ, Scientist. Mr. Knapp was introduced by Richard P. Verrall, of First Church of Christ, Scientist, of this city, who spoke as follows:—

In welcoming you here this evening, it is gratifying to note that the usual interest in Christian Science lectures is not lacking here tonight. Less than twenty-five years ago Christian Science was practically unknown in this great city. Today there are twelve Christian Science churches and societies in Greater New York and some two hundred regular Christian Science practitioners devoting their time to the healing ministry. Beyond and above the numerical growth and prosperity of our movement, the real cause of its success lies in the fact that

Digitized by Google

Christian Science is meeting a genuine human need. Through Mrs. Eddy's discovery of the present value of the teaching of Christ Jesus, the world is gradually becoming emancipated from the bondage of sickness and sin. It is with the view of laying before you some of the fundamental truths of this healing gospel, that we have with us tonight a member of the Christian Science board of lectureship of The Mother Church, in Boston, Mass.

Correspondence.

DALLAS, TEXAS.

Clarence C. Eaton lectured on Christian Science at the Dallas Opera House, Sunday afternoon, April 10. He was introduced by De Witt McMurray, who said in part,—

For countless centuries the thoughtful and intelligent among men have been searching for the truth; that is, the truth as to what some one has called "the riddle of the universe," or "the mystery of life," or "the whence, where, and whither of man." It would probably be more nearly correct to say that they have been trying to recognize the truth, as it has of course been always present, for it is unthinkable that the truth has ever been absent from among men; but in their search for it men have been like the inexperienced miner who went forth to delve for precious stones, and who passed over or cast them aside because he did not know them when he saw them—they did not have the appearance he expected them to have.

Whatever may be the beliefs of those who have not an altogether complete understanding of Christian Science, we can gladly give testimony as to the splendid character, good citizenship, exemplary conduct, and we must add, too, the good health of those whom we have the privilege of knowing as adherents of this faith. Jesus said that a tree is known by its fruits. Taking that as a standard of excellence,—and it is of course a correct one,—our knowledge of those about us tells us that this is a good tree.—*Correspondence.*

RENO, NEV.

A large audience at the Majestic Theater last night [April 14] listened to a lecture on Christian Science by Bliss Knapp. In introducing the speaker of the evening, Judge B. F. Curler spoke in part as follows:—

To me has been delegated the pleasure of introducing to you tonight a gentleman who will deliver a lecture on Christian Science. I have no apology to make for appearing before you tonight in the capacity which I occupy. No matter what my preconceived notions of Christian Science were, many of you know that I have a daily illustration in my own home of what Christian Science can do and has done. Many of you have heard me privately express my opinion upon this subject, but this is the first opportunity I have had to express it in public; and it is a pleasure to me to say tonight that under the test that Jesus Christ made—namely, the test of "By their fruits ye shall know them"—I can testify that there is something more in Christian Science than many of us are willing to concede.—*Nevada State Journal.*

EASTBOURNE, ENGLAND.

A public lecture on the subject of Christian Science was given in the Pavilion, Devonshire Park, on Tuesday evening [April 19] by the Rev. William P. McKenzie of America, whose first appearance this was before an English audience. There was a large attendance, the meeting being held under the presidency of P. Martineau of Reading. The chairman, after extending a cordial welcome to the lecturer, referred to the discovery of Christian Science by Mrs. Eddy over forty years ago, and its phenomenal progress during the last few years. Personal experiences were generally more convincing than anything else, so the chairman related one. From his boyhood, he said, he had suffered from tonsilitis. Ten years ago he heard of Christian Science and determined to see what it could do for him. After one slight treatment he was permanently cured. In his investigations of the subject—Christian Science invited it—he found it was simply Christianity.

Eastbourne Chronicle.

SAN ANTONIO, TEX.

Clarence C. Eaton lectured on Christian Science at the Grand Opera House, April 14. He was introduced by Judge J. E. Webb, who said in part,—

We live in a progressive age, remarkable for its mechanical inventions as well as for its forward march in the line of research and thought. At no time in the history of the world have a people had more cause for congratulation than the people in this age, when we may freely enjoy the liberty of speech and press, as well as the religious liberty guaranteed by the Constitution of the United States. We are proud of the fact that Christian Science and the religious people who believe in that doctrine have their home and headquarters in the city of Boston, where Cotton Mather, famous for his religious intolerance but a few years ago in point of time, denounced heretics and heresies and would recognize none except those whom he considered orthodox Christians.

I esteem it a matter of joy and happiness that a religion is taught by Christian Scientists that means happiness, buoyancy, hope, smiles, and sunshine. It is far better to be happy than miserable, to smile rather than frown, to look upward not downward, to be an optimist rather than a pessimist. I know but little of the doctrine taught by Christian Scientists, and I am not affiliated with that organization, but I believe it would be a matter of moral cowardice for me to say that I do not personally believe in many things taught by them, for as a matter of actual experience I know that many of the fundamentals taught by these people are founded upon the truth.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Scranton, Pa.—Bicknell Young, Lyceum Theater, 212 Penn avenue, 3 p.m., June 5.
Painesville, O.—Lecture for June 6 canceled.
Newburyport, Mass.—Bliss Knapp, Griffin Hall, 3 p.m., June 12. (Note change of hall.)
Chillicothe, Ill.—Hon. Clarence A. Buskirk, June 14.
Marshalltown, Ia.—Clarence C. Eaton, Odeon, 8:30 p.m., June 16.
Independence, Ia.—Frank H. Leonard, Gedney Opera House, June 16.
Burlington, Ia.—Bicknell Young, Grand Opera House, June 16.
Gary, Ind.—Frank H. Leonard, Assembly Hall, 6th avenue and Broadway, June 17.
Burns, Ill.—Hon. Clarence A. Buskirk, residence Mrs. Louisia Fischer, 3 p.m., June 19.
Pine Bluff, Ark.—Clarence C. Eaton, The Elks Theater, 2:30 p.m., June 19.
Johnstown, Pa.—Frank H. Leonard, Majestic Theater, 3 p.m., June 19.
Petoskey, Mich.—Rev. Arthur R. Vosburgh, Bremmeyr's Hall, June 21.

TESTIMONIES OF HEALING.

If these simple statements of my experience should reach some poor suffering and discouraged mortal, such as I was before I knew of Christian Science, and should afford him as great pleasure and profit as the reading of the experiences of others has afforded me, I shall feel that I have indeed found my own in another's good. I enlisted at the age of eighteen as a soldier in the Civil War, and when the war was over and I returned home, I felt the need of a better education. So I entered a district school, but though I studied hard I made very little progress. At the end of the first term I was very much discouraged, but I started in on the second term. At that time mathematics was a hard study for me, and my teacher failed to give me the necessary instructions. I related my situation to one of my classmates and told him I had decided to quit school unless I could get the help I so much needed. He said he knew of a book that would give me a start, a little book known as "A Key to the Arithmetic." This announcement gave me courage, and in a few days the key was in my possession, and it gave me the needed help. I had no further trouble in keeping up with my class, and quit school at the close of the third term with honors, which was the result of my getting help when I needed it and when I would have failed had I not received it.

There came a time, thirty years later, when I was more sorely in need of help than at any other period of my human experience. I was a weary wanderer, searching for health, strength, and peace of mind, and I had sought in vain at every known source. Physicians gave me no encouragement, medicine no permanent relief, and my church gave me no proof of its truth in health or in harmony of thought. Christian Science was then recommended to me by a friend, who told me that there was a book which contained all the fundamentals of Christian Science, and that the name of the book was "Science and Health with Key to the Scriptures," its author being Mary Baker Eddy, the Discoverer and Founder of Christian Science. He further stated that many had been healed by the reading of this book. The thought of a key which would unlock the mysteries of the Scriptures illumined my thought and gave me new hope. I felt my heart lighten at the mention of it. I ordered a copy at once, and commenced to read it, and every spare moment from that day to this has been devoted to the study of this wonderful book. Its teaching is fast revolutionizing the world, and what it has done and is doing for unnumbered millions it will do for any and all honest earnest seekers after Truth.

The constant dwelling under Truth's search-light has uncovered and destroyed all my ills, both mental and physical. I cannot tell when they disappeared, but they went—they are gone! The last to go was fear. Before I knew of this great light I was afraid of everything and everybody. I was afraid even to trust myself; I was afraid to eat for fear of my stomach, and I was afraid if I did not eat I would lose my strength and die. But I can today truthfully say that I am free from fear and anxiety respecting both these things. I have learned the spiritual origin of man and know there is no cause for fear. Christian Science is not guesswork, neither is it "faith-cure;" its practice is definite, precise, and systematic. It works according to law, and is both rational and philosophical.

The Christian Science text-book is indispensable to every earnest, honest seeker after Truth. I can advise those who are sick and heartsore to try Christian Science, and they will not find it wanting. To me it has been the "pearl of great price." Christian Science stands by the Master's test, "By their fruits ye shall know them." It has given me higher ideals in life, and taught me that their realization is possible here and now. Science and Health is certainly a "Key to the Scriptures," and the Bible is a new book to me. I find that when it is interpreted in the light of Christian Science it contains treasures not dreamed of before. I have found the true way to obtain peace, happiness, and contentment; the true way to smooth out the mental discords which constantly come up to annoy mortals. I wish to say in conclusion that I have no words sufficient to express my gratitude for this Science, or my reverence for our Leader, Mrs. Eddy, who has been good enough, self-sacrificing enough, and has known enough to rediscover and give to this age the same healing truth practised by Christ Jesus, the Founder of Christianity, so many centuries ago.

AARON S. VANVALEY, Heyworth, Ill.

Christian Science came to me several years ago, while I was looking for something to help my mother of what seemed to us then an incurable disease. My interest was first awakened by reading an article in one of the *Journals*. I had heard of Mrs. Eddy as being the Founder of Christian Science, but it was not until I had read several *Journals* through that I learned there was a book given up wholly to the subject of Christian Science. I then obtained a copy of Science and Health and began to read it, and before I had read it through once I was healed of an enlargement on my shoulder which I had had for some time; and it has never returned. As soon as I learned what the reading of this book would do, I could not help being grateful to its author for bringing this truth to the world and showing us how to apply it for ourselves.

I would like to tell of a demonstration which I made over an injured ankle when I had very little knowledge of Christian Science. I was riding my wheel one day when I fell and caught my foot in the pedal. My ankle felt as if it had been badly hurt, and I wondered if I could walk. I found that I could, and I reached my home without any one noticing anything unusual. I spent most of the afternoon in my room, reading and treating myself. At night I could with great difficulty remove my shoe, but in a week the pain was entirely gone, though the swelling and discoloration lasted a little longer. No one in the house knew that anything had happened and I did not call upon a practitioner. From that time my ankle has been perfectly well and strong. When I was a child this same ankle was injured, and for many months I could not bear my weight on the foot without a bandage, and long after that it was weak. This is only one of many, many proofs that Christian Science is the truth.

MRS. LENA URY BRAKE, Carmel, Cal.

[Translated from the German.]

About four years ago my ten-year-old son's voice became affected. We thought that he had caught a cold, though at times his voice would sound all right. This continued about a year; then he lost his voice to such a degree that we could hardly understand what he said. As my wife and I were interested in Christian Science and saw various diseases being healed, we asked a practitioner to treat the boy. A few days later his voice began to improve, and within a short time it was perfectly restored and has remained normal ever since. An acute attack of throat trouble with which my wife was taken, was completely healed in a week's time through the understanding of a practitioner.

Christian Science has led us out of darkness into light and sunshine, for which we are very grateful, and our constant endeavor is to follow the teachings of the Master as they are interpreted by our dear Leader, Mrs. Eddy.

LOUIS LOTZ, Rochester, N. Y.

After I had consulted a physician and he had pronounced my ailment a malignant growth, I decided to try Christian

Digitized by Google

Science. The doctor said I must have an operation at once, but we called in a Christian Science practitioner instead, and after the first treatment I was relieved of pain and slept well. After three weeks' treatment the growth had entirely disappeared. I feel very grateful for Christian Science, and especially thankful to God for His loving care. This healing took place in October, 1908.

MRS. GEO. GROVER, Great Falls, Mont.

In March, 1909, my mother asked me to treat her for severe pain in her head, accompanied with stomach and bowel trouble, cold and cough. I did so, and she seemed to be better in some respects, but did not gain as I thought she should. This was on Wednesday, and on Friday morning I wrote to a dear Christian Science friend who had helped me over many rough places in my journey from sense to Soul, and asked her for help; but before the letter was mailed my mother came into the room where I was at work, and as I looked around I saw that she was about to fall. I helped her to a chair, and as I did so she called on God and began to declare the truth for herself. She then sank back, with every appearance of impending dissolution.

I declared the truth with all the understanding of Christian Science which I had. I do not know how long I worked, as I was alone in the house, and I was glad of it, for I felt that God was all I needed at this time. I managed to reach the telephone, and called my husband, asking him to come home at once. I never ceased to declare for life, and by the time my husband got home my mother had begun to show signs of consciousness though still very ill. My husband then telegraphed to the practitioner mentioned, and she responded to our call for help at once. She worked faithfully, and I reported the results every day. By Sunday my mother was much better, and on Tuesday she was able to sit up and take a bath. On the following Sunday she went to the Christian Science services, and in less than three weeks she was able to travel on the train and went to visit my sister. This was an attack of an eruptive disease, from which she had suffered before, and I have known of her being confined to the bed for many weeks under medical treatment before she was able even to sit up in bed.

Is it any wonder that we love Mrs. Eddy for showing us this blessed way to Truth and Life. I am indeed very grateful for this help, for I feel that my mother was saved from death.—MRS. LULA WALTHALL, Crowell, Tex.

I am grateful for many healings in Christian Science—surely I have been delivered from dreadful bondage; but rising above all else in thought is the knowledge that in Christian Science one may find a solution for every problem humanity ever faced. My work as a supervisor of music brought me in touch with all classes of children, and the distressing conditions were many times so extreme that I suffered intensely, because there seemed no way of permanently relieving their woes. I was sure that deliverance would come through God, but how? In searching for light I did a great deal of wandering through the various "isms," and finally it was out of curiosity that I read "Science and Health with Key to the Scriptures" by Mrs. Eddy. The sense of peace which came to me as I read the "little book" the first time will always be remembered, for as I made that first journey through its pages, the weight of many an unanswered question was lifted. I saw plainly how to give, directly and indirectly, "a cup of cold water" to all classes and conditions of men.

Previous to becoming interested in Christian Science, I was a sufferer from a peculiar throat trouble. I cannot remember of ever having two physicians give the affection the same name—ofttimes it was a question as to even relieving my distress. Each year the periods of being without the natural use of the organs grew alarmingly close together; for weeks at a time I was deprived of the ability to sing. This, with various other physical conditions left by many illnesses, worried me, but not until a form of poisoning developed did I seek the truth earnestly. It was than a choice between life and death, and immediate help was necessary.

During the last illness of my mother, I was unable to do much for her, because of my own susceptibility to the disease from which she suffered, and the physician insisted that I remain out of the room, else there would be serious results. That which he feared came upon me, and my case seemed perfectly hopeless. So changed was I that friends passed me without recognizing me. I sought a Christian Science practitioner, and in a few weeks went to a farm where I would not have to come in contact with any one outside of the family. Inside of two months the trouble disappeared, largely through my reading of Science and Health. The following winter the throat trouble was healed and my sense of smell restored.

I feel that only by following our Leader's example of usefulness, unselfishness, humility, and love, can my gratitude for Christian Science be acceptable unto God. If the testimony of my healing proves of assistance to even one person, I shall indeed rejoice, for to be of help to others in the right way is my greatest desire.

OLIVE B. WILSON, Kansas City, Mo.

During the spring of 1905 my husband and I were led into Christian Science through the healing of my father, who after many years of suffering was healed of a double rupture, together with other serious ailments, through the reading of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the loving help of a practitioner. Since then the various members of our family have been wonderfully blessed in many ways through the practical application of the glorious truth as revealed through the teachings of Christian Science.

When Christian Science found me I had been wearing glasses from the time I was ten years of age; the physicians saying that I had a severe case of malformation, but that if I wore glasses constantly I could probably lay them aside when I grew older. Every few years, however, I was compelled to have the glasses changed, my eyes growing constantly worse. Only two weeks before I was led to investigate this wonderful truth I had got a new pair. After two treatments in Christian Science for another trouble I was enabled to lay the glasses aside, and have never had occasion to use them since. This meant very much to me, as I am bookkeeper for my husband and have to use my eyes constantly, and I am indeed most grateful for this healing. For years I had suffered with a severe backache, was constantly under the care of the physician, and finally underwent an operation, but received no benefit therefrom. Later my trouble was pronounced rheumatic. Truth was, however, equal to the emergency, and I was entirely healed through Christian Science.

In September, 1907, I had a severe attack of fever, diagnosed by a physician, who at the same time stated that our place of business would have to be closed on account of my illness; but Truth again proved its availability, and I was healed in three treatments, being confined to my bed only two days. We are also very grateful for a demonstration over blood-poisoning, which was fully overcome; and for the spiritual uplifting gained at this time, for it made clear to us the nothingness of fear, that "Life and intelligence are purely spiritual,—neither in nor of matter," and that "God is All-in-all" (Science and Health, pp. 14, 113).

We are very grateful for the revelations of Truth contained in Science and Health, which has given us such a

Digitized by Google

different concept of what God is and a more glorious one, and also of our relation to Him. How can we help loving dear Mrs. Eddy, whose thought and life have been proved pure enough to become a medium for this great light to us? Words can never express our love to God, for what the revelation and understanding of Christian Science has done for us and must do for all mankind.

MRS. ANNIE W. GRAUEL, Baltimore, Md.

I am ninety-five years of age, and about a year ago I had a very bad case of eruption on my face and head. When a doctor came he said my age was against me, and that he dared not prescribe the usual medicines as my face was very badly swollen and inflamed. We then turned to Christian Science for healing, and through the loving, Christlike work of a practitioner I was free in two or three days. Since that time many ills have been quickly overcome, and henceforth Christ is my "great Physician."

ELIZA PARTRIDGE, Jefferson, Ia.

I feel it a great privilege to tell of a few of the blessings which I and my family have received in Christian Science. I have been healed of nervous trouble in its very worst form, among my many ills being what *materia medica* called a serious stomach disorder. There were many things I could not eat, as I was afraid of a return of the pain. I worried all the time, but these ills have all been overcome by divine Love, whose power was with me always, though I knew it not. Our daughter also was a nervous wreck. We tried many doctors, but with very little relief. Finally, an acquaintance asked us to try Christian Science, of which I had never before heard, but I was willing to try anything which would help our child. After a few treatments she was able to walk without a limp, and to go up hills with perfect ease. The many troubles from which she suffered were overcome through the truth that makes us free. My husband has been healed of a supposedly incurable kidney disease. It took a longer time to overcome his illness, as he said he had to be made all over spiritually. A skin disease in its very worst form was also healed, and many blessings have been ours by knowing that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

We have been able to help ourselves and to help others by knowing the truth, for which we are very thankful, and we cannot be grateful enough to God for showing Mrs. Eddy this healing truth.

MRS. EMMA H. HOWALD, Conway, S. C.

My first healing in Christian Science occurred about three years ago. I was then hardly able to go up and down stairs or to walk any distance, female trouble being the cause of this condition. My healing was accomplished in one week's treatment, and since that time my husband and myself have depended entirely upon Christian Science for help. Our baby was born under Christian Science treatment; and the demonstration was even beyond our expectation. In a similar occurrence under *materia medica* we lost the baby and my own life was given up by the physicians. My experience under Christian Science was entirely different, as all the conditions were perfectly harmonious. I was up the third day, and everything moved along beautifully afterward. The baby was a picture of health, and free from any inharmonious condition. To me it is a privilege to have this little one surrounded by the healthful atmosphere of divine Love, and to have as our guide and support the truth, revealed in Christian Science, bringing peace, harmony, and love. We are able to enjoy this little one without holding fear for her, knowing that our Father-Mother God is always with her.

That God is Love means much to us, as we see every day that we have an opportunity to reflect love in some way, and it always comes back threefold. I am learning more and more that when we smooth all the rough places with love the truth is ever ready and never fails. I feel most thankful to know that God is the healer of all our diseases, and I am grateful to Mrs. Eddy, who has so lovingly shown us the way to harmony.

MRS. MYRTLE PEYTON, Oklahoma City, Okla.

The first I knew of Christian Science was a little more than a year ago, when a neighbor invited me to attend a service. I had always had a desire to get all the good I could, so when my friend invited me to go to the service with her, I accepted the invitation, hoping to find the help I was seeking and of which I was so greatly in need. I went with her the following Wednesday evening, but as I had not been able to hear ordinary conversation for years, I could not follow what was said. I was, however, impressed with the service, and would have gone again soon but, as I moved to the country directly after this, I was unable to do so for some time. Fortunately, one of my nearest neighbors was a Christian Scientist, and she loaned me a copy of "Science and Health with Key to the Scriptures," which I read with great interest.

My health began to improve, but I was so interested in the truths taught in this book that I lost sight of the physical condition, and did not realize the help I was receiving until my husband, noticing such a marked improvement in my condition, asked what I had been doing to bring about this change. It was not until then that I awakened to the fact that I had been healed. I had from a child been troubled with an eruptive disease, which had affected my hearing, so that for five years previous to my healing I had not had a good night's rest on account of it, and the pain and irritation were dreadful at times. I tried many physicians and procured every remedy I could hear of, but all to no avail. I am now free from the old complaints, and my hearing is so much improved that I can hear a clock ticking across the room.

I find great joy in the daily study of the Lesson-Sermons, and I hope some time to understand better the truth revealed in Christian Science, which has made me free. At present all I can say is, "Whereas I was blind, now I see." Nor can I express in words my gratitude to Mrs. Eddy, through whom this has been made possible.

MRS. JANE SMITH, Richmond, Ky.

Having derived more benefit from the *Sentinel* than I can tell, I desire to give my mite in return. About eight years ago I was healed instantaneously of bladder trouble. Nine years previous to this I suffered periodically, and was bedfast at times. I was treated by our home physician, also by one from Butler, Pa., but was never benefited.

It was then that I decided to try Christian Science. I sent for a practitioner, and went to my room with the intention of going to bed, but was so miserable that I could not. When the practitioner arrived, she found me suffering greatly. After a few moments of silent prayer, she requested me to rise, to sit in a rocker, and join her in reading the Lesson-Sermon. She said she would treat me, and with her assistance I arose. I can truthfully say that I was healed in that one treatment, for I have never had the slightest symptom of the disease since. A year ago I was healed of an attack of cold in one treatment. Being the only believer in Science in our home, I was denied treatment. I, however, refused medical aid, and after I had suffered intensely for fifteen hours, my sister came to see me, and I told her to telephone for help. She did so, and in about twenty minutes I was comfortable; in another half hour I was up and dressed, helped to get the dinner, and also partook of it. I could tell of numerous

Digitized by Google

proofs of the efficacy of Science for myself and children, and while there is yet much to overcome, I know this Scripture is true, "Commit thy way unto the Lord; trust also in him; and he shall bring it to pass." To those who are seemingly prejudiced, as I was, I would say, "Get the 'little book;' read and understand it, for 'where the Spirit of the Lord is, there is liberty.'"

I am very grateful to God for the healing received, but best of all is the understanding that "'good is my God, and my God is good. Love is my God, and my God is Love'" (Miscellaneous Writings, p. 206). I am also grateful for such a noble Leader. Truth indeed makes men free, and brings to our consciousness the "peace of God, which passeth all understanding."

MRS. CLARA MCKEE, Pittsburg, Pa.

When I read the testimonies of healing in our periodicals, I wonder if any have greater occasion for thanksgiving than I. When Christian Science came to me I had been for eight months under a special treatment for lung trouble, and had been advised to move into the country away from the seashore. Day by day the laws of *materia medica* were holding me in heavier bondage, and when at last the doctor, after telling me that he had found traces of tuberculosis, had left the house and I was all alone, I threw myself on the floor and cried out to God that I could not have it so, and that I must stay to care for my family,—a husband and our daughter of eight years.

My prayer was truly answered, and man's extremity proved to be God's opportunity, for I sought healing in Christian Science. It came slowly and sometimes it seemed difficult to get even a glimpse of the truth; but my practitioner was patient, and at last the healing was realized, although it was three years before I could be sure that I was rejoicing in perfect health. Each one of the family has proved the power and presence of God in healing, and many problems have been worked out according to the rules of divine Principle,—in the home, in the school, and in the business life. Today we are rejoicing in the knowledge that God is our Father and Mother, the source of all the good that has come into our experience, and as a family manifest so much of the harmony and health which belong to the children of God. We look to Him in every need, "and never look in vain," to quote from our Hymnal.

Words fail in trying to tell all that has come to me through the understanding of Christian Science, and I feel that I can best express my gratitude by living each day nearer to God, in love to man and in obedience to God's laws. I am thankful to God, and grateful to Mrs. Eddy for this truth which she was brave enough to give to the world when it was revealed to her. The world today calls her "blessed."

MRS. ELIZA F. HUMPHREY, East Saugus, Mass.

When my attention was first called to Christian Science I gave it little consideration, but I am very grateful that I have since learned a little of the Principle of being as made known by Mrs. Eddy, and I am glad to make the following statement of healing through Christian Science.

One evening during the summer of 1908 I suffered a loss of consciousness, falling to the ground in a small yard. None of my family were at home at the time, and my condition was called to the attention of neighbors, who came to my assistance. Loss of consciousness was followed by hemorrhage of stomach and bowels, and this condition continued for an hour, during which I was conscious for only short intervals. The neighbors became alarmed and called a physician. When the doctor arrived I was conscious, and he diagnosed the case as one of poisoning. He left without suggesting any treatment, but instructed the neighbors to call him promptly should another attack occur, and directed that I be kept on very light nourishment for a few days and as quiet as possible. Soon after he left, my family came home, and an hour later another attack came on and I again lost consciousness. I had become so weakened that during the time of consciousness it was necessary for me to be assisted to move myself in bed. While I was unconscious a Christian Science practitioner was called by telephone, and absent treatment given, under which I quickly regained consciousness and a feeling of perfect relief. One treatment entirely removed the trouble, strength returned rapidly, and my regular duties were interrupted for one day only.

To know that there is unfailing help in any trouble is a comfort that cannot be adequately described.

SAMUEL B. CHASE, Great Falls, Mont.

The foregoing is a correct statement of the healing of my husband, through Christian Science treatment.

CLARA A. CHASE, Great Falls, Mont.

On Sept. 25, 1903, while on my way to work, I was getting on the street-car when it suddenly started, and I was thrown to the ground, receiving very serious injuries. An ambulance was called and I was taken to a hospital. I was in bed nine weeks with a weight on my foot; then the weight was taken off and I sat up in a wheel-chair. The next day the leg was found to have shortened two and a half inches, so the doctor put a weight of five pounds in my shoe, and I walked with crutches. I carried this weight until March, 1904. The following June I went to the hospital again, and the doctors held a consultation, using the X-rays. They said that the bone had not united and that it was only held together by the ligaments. Some of the doctors wanted to cut the limb open and wire the bone together; but the others objected, so the operation was not performed.

When the doctors were through with my case, the limb seemed lifeless, from the hip down, and I was unable to put any weight upon it. The whole condition was one of great distress, although I tried to walk with a crutch and cane. It was on Jan. 18, 1905, that I took my first Christian Science treatment, and about six weeks later I went to work, being able by that time to give up my crutch and to use a cane only. After a few months I could walk without the use of the cane, and have worked at hard labor ever since without experiencing any trouble whatever. I am indeed thankful to God for Christian Science, and all it has brought to me; also to Mrs. Eddy for this wonderful truth, and to my friends for directing me to the Christ-healing.—GEORGE STONEHOUSE, Detroit, Mich.

[Written for the *Sentinel*.]

THE PURPOSE.

LEBARON P. COOKE.

TAKE all thy hidden talents. Do not miss
The purposes of Life, and never wait
For coming days to overthrow thy fate.
In thine own grasp sleeps destiny. Let this
Vast truth bar out all doubt, all prejudice.
Do not procrastinate. Know thou art great—
Great with nobility; and dominate
All thy surroundings; ent'ring into bliss.

Oh, love much, hating none, keeping no aim
That does not 'cord with the eternal good!
Hear what the echoes of the silence say:
All hope is thine if thou wilt voice thy claim;
Allow the Spirit to be understood—
All lesser things must vanish, pass away.

Digitized by Google

FROM OUR EXCHANGES.

[*Advance.*]

In spite of all the seeming overthrow of order and law in the world by such an exercise of power as that which fed the multitude, we see the action of another law which not only does not produce confusion but which brings order out of confusion. We recognize the fact that the one who performs these miracles is himself the perfect type of obedience and the very incarnation of moral and spiritual law. Jesus never does anything which by the shadow of a semblance violates moral law. Therefore, inasmuch as moral law is given higher rank in the human mind than material law, the reason is not shocked by the miracles of Jesus, and belief in these miracles cannot be overthrown by the argument that they contradict reason or that they overthrow law. They do not overthrow law, but put the highest law at the top and the lowest law at the bottom. They are in the most profound harmony with the deepest conception which the human mind entertains regarding law and order in the universe, namely, that the moral should be above the material, that the spirit is greater than matter, that the eternal is more than the temporal, that health is better than sickness, that life is more than death, freedom more than slavery, and the creator greater than the creature.

[*Congregationalist and Christian World.*]

In one sense pharisaism is a matter of true moral proportion. We are tempted to devote our whole attention to the little things, to the neglect of what is really important. Many of our denominational differences seem to sensible men an evidence of this false proportion. While vice and poverty are the outstanding facts of our social life, even in our little villages Christians are seeking to attract adherents from each other's churches, rather than to commend Christ to those who are without. Men who are active in the church are sometimes known in business as without apparent scruple in their dealings. There is a divorce between word and deed, a stress upon trivialities, a carelessness about justice and mercy which is an offense to the average man who is not a Christian. And that sensitiveness was taught and shared by Christ.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

You are expecting at once too much and too little from the life that now is—too much, if you think that any earthly good is an end in itself; too little if you do not see that everything to which you put your hand means something in the world of God's eternal light. What you are doing today will result in treasure in heaven or fetters in hell, both of your own making. God is asking you to magnify Him in the common things of common day, to magnify Him by putting your soul into them, not for their own sake, but for the sake of the life eternal.

[Rev. Frank Abram Powell in *Christian Register.*]

The church should supply the impulse toward all humane and remedial activities; but, in order to supply such impulse, the life of the church itself must be higher and more significant than any one of these activities. The remedy for the indifference and coldness of the churches is not sociology, even in its best sense, but a new awakening of spiritual life. We need new prophets of the soul and a new dispensation of genuine and fervid religious preaching. The crying need of the church today is a definite and positive spiritual leadership.

[*Zion's Herald.*]

The true leaders of men are those who can succeed and still keep the simplicity of their hearts unspoiled. They do not bluster and they do not boast. They are approachable, and their words are those of a brother and friend.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

The Publishing Society has a limited number of volumes of the *Journal* and *Sentinel* bound in cloth, half morocco, and half calf and arranged in sets from four to nine volumes. These sets are now on sale at special prices, ranging from $9.20 to $21.00, according to the style of binding and number of books in the set.

These special prices apply only on sets of books, and in no case on single volumes. The offer presents an exceptional opportunity to Christian Scientists to obtain rare volumes for reading-rooms, libraries, and individual use. Detailed information will be furnished on request.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $3 a year, $1 for six months. In all other countries additional postage at the rate of $1 yearly is required. When delivered by carrier through a local newsdealer, 12 cents a week payable to the newsdealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

CHRISTIAN SCIENCE: A RELIGION OF PROGRESS. By WILLIAM D. MCCRACKAN. Also printed in German.

CHRISTIAN SCIENCE: OR, DELIVERANCE FROM EVIL. By REV. WILLIAM P. MCKENZIE. Also printed in French.

CHRISTIAN SCIENCE: THE CHRISTIANITY OF JESUS. By MRS. SUE HARPER MIMS.

CHRISTIAN SCIENCE: BOTH CHRISTIAN AND SCIENTIFIC. By REV. IRVING C. TOMLINSON.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. By REV. ARTHUR R. VOSBURGH.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. By BICKNELL YOUNG. Also printed in German.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the JOURNAL. Also printed in German.

PROPHECY: FULFILMENT: REVELATION. By CHARLES ADOLPHUS MURRAY, Seventh Earl of Dunmore.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science.

PRAYER AND CONFIDENCE. Four articles reprinted from the JOURNAL. Also printed in German.

THE CHRISTIAN SCIENCE CHURCH. Its organization and polity. By CAROL NORTON.

PRICE, POSTPAID: Single copy, six cents; 12 copies, ONE ADDRESS, 60 cents; 50 copies, $2.25; 100 copies, $4. Orders for above pamphlets may be assorted as desired.

REPRINTS FROM THE JOURNAL AND SENTINEL

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883 1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00; six months, $1.20.

Ten copies to one address, each, one year, $1.90; six months, $1.15.

Twenty-five copies to one address, each, one year, $1.80; six months, $1.10.

Fifty copies to one address, each, one year, $1.50; six months, 90 cents.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Subscriptions to the SENTINEL will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. X indicates the year 1910; XI, 1911. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

TERMS OF SALE

Single copy, postpaid, five cents, in the United States, Canada, Mexico, and Cuba; twenty-five copies, one address, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, single copy, six cents; twenty-five copies to one address, $1.25; fifty copies, $2.25; one hundred copies, $4.00.

Bound Volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Owing largely to the presence of only seven of the nine members on the bench, thirty cases heard at the term of the United States supreme court just ended must be reargued next term. The fifteen involving the constitutionality of the corporation tax were heard as one case. Two involve the question whether the penalties for violating the twenty-eight-hour law for the transportation of live stock shall be determined by the individual shipments or by the train. Two suits bring up the dissolution of the tobacco corporation. Two more cases involve the validity of indictments for grazing sheep on forest reservations without permission of the Government; two others, the use of the waters of the Walker river in California and Nevada, and two more the enforcement of the Oklahoma prohibition laws in interstate shipments. Other cases to be reargued are the dissolution suit against the Standard Oil Corporation; the case involving the constitutionality of the hours of service law for railroad employees, and that arising out of the use of the water of the upper Gila river in Arizona for irrigation. Six cases argued remained without action when the court adjourned for the summer. Of these the only one of general interest was that involving the rights of forwarding agencies to demand carload rates from railroads.

Governor Hughes of New York has called a special session of the General Assembly to consider the question of direct primaries which failed of enactment before adjournment. Although he failed of securing action on this important matter he was fortunate in obtaining favorable legislation on all his other more important recommendations, which include the state's refusal to endorse the proposed income tax amendment to the federal Constitution; a resolution calling for a general investigation of corrupt practices; the placing of telephone and telegraph companies under supervision of the public service commission, second district; strengthening the laws against racetrack gambling; acceptance by the state of the Harriman park gift; the enactment of a liberal automobile law productive of state revenue; a proposed constitutional amendment looking to the development of water power within the forest reserves; a law recognizing the principle of an employer's liability for injury to the employee; more stringent measures for the suppression of the white slave traffic; important reforms in the insurance and banking laws.

To obtain greater precision and do away with errors of compass and compass reading, the hydrographic office of the United States navy has adopted a new compass, which is simply a circle divided into three hundred and sixty degrees. On it there is no east, no south, no west, only true north. To avoid confusion in the period of transition, the old-style compass will be used, combined with the new, the letters indicating direction being taken off and the degrees being represented. By this new marking, for example, to steer northeast the order would be given to the man at the helm to make the course forty-five degrees.

The Pilgrim monument on Town Hill, Provincetown, Mass., at the laying of the cornerstone of which President Roosevelt made a memorable attack upon corporations, will be dedicated on Aug. 5, the anniversary of the sailing of the Pilgrims from Delft Haven, Holland. It is expected that President Taft will make the trip across Massachusetts bay from Beverly and attend the dedication.

A prize of thirty thousand dollars has been offered by the *New York World* to the first aviator who flies in an aeroplane from New York city to St. Louis, or from St. Louis to New York. In addition to this offer the *New York Times* has arranged with the *Chicago Evening Post* for an offer of twenty-five thousand dollars for an aeroplane race between Chicago and New York.

Attorney-General Wickersham has secured an injunction, which he hopes to make permanent, from Judge Dyer of the federal court at Hannibal, Mo., restraining twenty-five western railroads from putting into effect rate increases which were to be operative June 1. The injunction was sued out on the ground that the proposed increases were "subversive of the interests of the public."

No new irrigation projects will be started by the Government within the next ten years, says Director Newell of the reclamation service. The bureau is now bending its energies to complete the work already begun. It hopes Congress will authorize the thirty-million-dollar bond issue.

On Sunday, May 29, Glenn H. Curtiss flew from Albany to New York, a distance of two hundred and thirty-five miles, in an aeroplane and won the ten-thousand-dollar prize offered by the *New York World*.

The Senate has added to the railroad bill an amendment placing interstate telegraph and telephone lines under the supervision of the interstate commerce commission.

International.

Opposition by the gentry and other popular leaders in Hunan and Honan provinces, China, to the acceptance by the Chinese government of the Hankow-Sze-Chuen railway loan still continues. During the negotiations between the financial groups of the United States, Great Britain, Germany, and France there were occasional manifestations against the government in the two provinces, and a few weeks before the loan agreement was signed in Paris by the members of the international banking syndicate, the trouble became acute. The opposition seems to be directed toward the acceptance by China of foreign capital and foreign direction in the construction of the railroad line, which influential personages in the province wish to have built, if at all, with Chinese capital.

It is reported that the Canadian Pacific Railway Company is about to apply the ready-made farm idea, which has proved so successful in Alberta, to some large tracts of fruit lands which it has recently acquired in the Kootenay district of British Columbia. The object, it is stated, is not so much to make money as it is to encourage new settlers. A force of men are already at work clearing the land and planting trees. The property will be divided into ten and twenty-acre holdings, which will be disposed of to *bona fide* settlers at a reasonable figure.

China opened her first great exposition on June 5 in Nanking. The project started with the former viceroy, Tuan Fang, a progressive mandarin, who has presided over the destinies of the many millions in these prosperous Yangtse provinces. The original intention of the viceroy was to make this a nucleus of a model Chinese city, and to that end he stipulated that the buildings should possess a certain degree of permanence. The Chinese of the different provinces are taking a keen interest in the project and fifteen provincial buildings are in course of construction.

The scheme for the construction of the proposed line from the Mediterranean to Mesopotamia is to be pushed forward by the Turkish government with all speed. The concession has been granted to a well-known Turk, who is engaged in making the necessary arrangements for developing the enterprise. The construction of this line, in giving direct means of access to the Mediterranean, will enable the Turkish authorities to carry out the vast plans of Sir William Willcocks for the irrigation of Mesopotamia.

The general policy of the land system of New Zealand includes: Breaking up and preventing land monopoly through progressive taxation of the larger holdings; conserving public lands for genuine settlers; limiting the area of holdings and the right of transfer; buying up and dividing large estates; establishing long leases, with periodic revaluations; giving preference to the landless in sales, and aiding the unemployed and the artisan to get on the soil.

The counter cases in the arbitration between the United States and Venezuela with regard to the claim of the Orinoco Steam-ship Company have been exchanged at The Hague. This is the last of the five claim cases between the United States and Venezuela which several years ago caused the rupture of diplomatic relations. The four other cases have been settled by direct arbitration.

The first decennial performance of the Passion Play at Ober-Ammergau, the grand rehearsal, took place May 11, partly in a snow-storm, for the auditorium is open at one end. The part of the Christus is taken, as ten years ago, by Anton Lang. The play begins in the early morning and with one intermission continues during the day.

Tree-raising for railroad ties and for fuel is becoming an established policy of the railroads of Brazil. This is made necessary because the timber sections, in many instances, are so distant from the railroad lines and so difficult of access that the wood can be obtained only at a great cost.

Industrial and Commercial.

Forty-nine nations are now forwarding reports of their production of the raw material of commerce to the central office of the International Agricultural Institute at Rome. All these figures are assembled, and put out to the nations, making it possible for trade to be conducted on a solid basis of known quantities.

A million-dollar corporation, formed by milk producers of New England to establish a selling agency in Boston to deal direct with the consumers and thus to lower the present retail prices of milk, is a possibility, according to the secretary of the New England Milk Producers Association.

Manufactures and manufacturers' materials now form practically four-fifths of the entire foreign commerce of the United States, their aggregate importation and exportation in the nine months ending with March, 1910, having been $1,967,000,000.

Ten thousand men with four million five hundred thousand dollars' worth of equipment are working at various points along the Columbia, Willamette, and Clackamas rivers in Washington and Oregon, where the salmon season opened on May 1.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE PUBLIC DEBT TO CHRISTIAN SCIENCE.

W. D. MC CRACKAN, M.A.

ALL loyal citizens are interested in the preservation of public health, and none more so than Christian Scientists. Perhaps these are even more solicitous about such preservation than most people, because they so thoroughly understand the *modus operandi* of disease in propagating itself in unseen ways unless it be scientifically checked and destroyed.

Mrs. Eddy explains that "disease arises, like other mental conditions, from association" (Science and Health, p. 154). The cause, process, and propagation of all disease is mental, therefore the method of mastering it must also be mental. The recognition of this fact will presently dawn upon the minds of medical practitioners, as it has already dawned upon the minds of Christian Science practitioners. In the mean time, as Christian Scientists are at work, healing sin and sickness in themselves and others, they are thereby helping the members of the communities in which they live. The protective and preventive powers of Christian Science are not generally known to the public, but they are in operation, nevertheless, and cannot fail to be appreciated before long.

Did the general public only know the salutary effect which the right thinking of a body of Christian Scientists exerts upon the health of a community, we should hear no more about attempts to interfere with Christian Science practice. Ignorance of the power of right ideas for good can alone account for such misjudged attempts. Indeed, who shall adequately repay Christian Scientists for their unseen watch and vigil over a community beset on all sides by dangers which it does not discern and subject to attacks which it does not understand? One hears a good deal about the contagion of disease, but little about the danger of diseased thinking, or about the healing influence of wholesome, healthy thinking. Yet the latter is more powerful than the former, as good overwhelms and overtops evil.

Who can measure the beneficent effect upon a body of people trained to believe in a God who sends evil, of one righteous man who knows that God is "of purer eyes than to behold evil"? Who can estimate the result of one courageous protest, based upon Science, against the awful belief that the laws of disease can defy God? Who can follow in its blessed flight through a community one act of forgiveness, one requital of good for evil, one temptation to revenge resisted, one opportunity of destroying an enemy turned into an occasion for helping him? By this constant resistance to false concepts, by this Christian warfare against spiritual wickedness in high places, carried on from day to day, from hour to hour, Christian Scientists are making themselves indispensable wherever they are established.

Christian Science stops the vagrant contagion of evil at the word of command. It challenges and examines every opinion and belief which tries to enter human consciousness. It demands that every thought shall justify itself before God ere it can be admitted to fellowship in the great company of right ideas. It sifts and weighs, assimilates or discards, and in so doing it is performing a public service which entitles it to the loyal consideration of those who are working along other lines with the same end in view of preserving the public health.

REBUKING ERROR.

CHARLOTTE PAULSEN.

IT is said that Goethe once remarked that it was easier to rebuke error than to speak truth, and so we often find the young student of Christian Science, in his first enthusiastic attempts to promote the welfare of his fellows, offering unsolicited counsel or even rebukes with a mistaken sense of doing good. After many tests, much stumbling, and further striving, he learns that although this new-found truth requires absolute perfection of every man, its present comprehension and application are still relative, and out of his own oft-repeated mistakes, his seeming defeats and humiliation, there comes to him a larger sympathy and a greater compassion for those whose faults are still apparent. He no longer places the emphasis on the rebuking of the error, but in meekness and humility consecrates himself to living the truth instead.

As we study the life of Christ Jesus and the method he pursued in his rebuking of sin, we cannot fail to be impressed with the love and compassion he reflected to the individual, though he made no compromise with the error. Either he voiced the truth so that in itself it uncovered to the sinner's consciousness a sense of wrong-doing, or he quietly asked the question which led the offender of his own accord to condemn the offense, and through the spirit of truth which accompanied the question, to awaken to an honest self-analysis and desire for reform. Only as each individual consciousness voluntarily reaches out and receives the illumination of truth, does it separate right from wrong. When the Christian Scientist can thus quickly perceive the thought of another and at the same time reflect enough of truth to meet the need of that one, he will simultaneously uncover and destroy error, and the healing will be instantaneous.

When some ethical or moral problem is under discussion it is the duty of a Christian Scientist to preach the gospel and fearlessly voice the truth in what may seem a most radical way, lest, as Shakespeare says, "if we shall stand still, in fear our motion will be mocked or carped at, we should take root here where we sit." In dealing with the individual, however, we can so lovingly voice the truth that no resentment, no sense of personal injury or distrust of our motives, can enter into that relation which we seek to sustain in the name of Christ. A successful practitioner of Christian Science can be best judged by the multitude fed, as also by the many led out of captivity. Such an one may indeed have a moral standard which seems almost impossible of realization in this day of varied human relationship, and his ideals may often meet with opposition

Copyright, 1910, by Mary Baker Eddy.

Digitized by Google

from those who are not yet ready to accept one so high, but those who seek the true worker in their need, always find a patient ear and a sympathetic understanding.

This spirit of forgiveness without condemnation or even criticism, in itself inspires one with a desire for those same ideals which make a character beautiful and destroy the false belief of pleasure in evil. Such a spirit manifested in demonstrating the truth of Christian Science not only wins loyal and obedient followers to Truth, but it does even more in lessening unnecessary hostile attacks on Christian Science and its students. The poet's advice may well be heeded:—

Search thine own heart!
What paineth thee in others in thyself may be.
All dust is frail, all flesh is weak,
Be thou the true man thou dost seek.

THE CONSTRUCTIVE MIND.

DR. EDMUND F. BURTON.

THERE will be no objection upon the part of any exponent of modern ethics to the proposition that optimism is better than pessimism, that it is a power for good and leads to improved conditions; and all shades of Christian thought today will endorse and sustain the desirability of up-looking instead of down-looking. Such thinking is, however, no more than a determination to look upon the bright side of things while acknowledging that there is a dark side; an attempt, to use an old and homely expression, to lift oneself by one's own bootstraps. It is a dependence upon the power of the human will over the human mind and body, and when the human will sinks down in helplessness before the acknowledged power of matter and physical laws, this dark side is sure to appear and force itself upon the experience of every one.

Christian Science is, above all things, optimistic in its teaching and tendency, but it puts a permanent and unshakable foundation under such teaching by revealing the truth that there is no reality but good; that there is no dark side, and that in the new heaven and new earth there is no night. In Science and Health (p. 475), we read that man "reflects spiritually all that belongs to his Maker." We look upon creative power as one of the highest attributes of God, and although we are able to comprehend but partially that which in spiritual man is the manifestation of this quality of his Maker, still today as never before is it patent to the eyes of men.

In man as we know him it appears as the constructive mentality. In the commercial world today he who is endowed to the highest degree with such constructive powers of mind is most highly esteemed, and is showered with the best that men can give. The day of the apotheosis of the destroying conqueror is past. The day of the builder is here, and although there have never been produced by the hands of man such powerful engines of destruction as now, yet their real object is that peace may be preserved and that destruction may cease. It is therefore interesting and profitable to understand the particular cast of mind which possesses this constructive ability. More than anything else it seems to be the power to see a goal, and between the present standpoint and such goal nothing but a path thereto; the ability to understand as opportunities those things which to minds of less clarity and courage appear as obstacles; the inability to see failure or evil. A man so endowed looks across a continent and sees a path for a railroad, and to him the forests, streams, valleys, and mountains are but aids to his enterprise, not barriers in his way.

There are builders who are capable of seeing and of keeping in view such a vision—such a goal—far beyond their fellows, but who must use the talents of others to plan for them the details of the pathfinding and pathbuilding, lest they lose sight of the end in the difficulties of the way; while once in many years there arises a man who can conceive great enterprises and at the same time plan and oversee in painstaking detail their execution. As the plans of such men grow into accomplishment, there come to the narrow-visioned multitude not only astonishment, but also great material advantages in the way of increased opportunities for activity and gain; and those who perceive and take advantage of these offerings not only profit by them but, by becoming in turn centers of smaller groups, spread throughout the whole community the fruits of the genius of the master mind.

Things material are counterfeits and types of things spiritual. Throughout the history of the world, the great mass of its inhabitants have known nothing but that which their daily material lives have brought within the range of their vision. Either ignorant of the existence of God, or blindly worshiping, in superstition and fear, some unknown god, they have seen nothing but obstacles to life and happiness, and have gone to their graves believing sin, sickness, sorrow, pain, and death to be the sum and substance of man's life. There have been in all ages some few who have been able to look farther and higher, and who have perceived more or less clearly the truth of a good God who is the creator of all that exists; but even these theologians have been unable to hold their gaze to the vision. They have been deceived by the appearance of the daily path, have beheld lions therein, and have granted the existence of another god, if not more powerful yet more near at hand than the good God, and have worshiped this false god with more fear than they have worshiped the good God with love. Once in many generations there has arisen one with sufficient steadiness of exalted thought to behold the revelation and with unflinching faith and spiritual power to hold to it while making of all earthly experiences a path from sense to Soul. Whenever such a one has appeared in history, he has, by his uplifted and uplifting thought, drawn all men unto him—unto his spiritual ideal.

Such is spiritual-mindedness, constructive in things substantial. It sees that "all is infinite Mind and its infinite manifestation" (Science and Health, p. 468), and to its understanding every valley shall be exalted, every mountain shall be made low, and in the desert there shall be a highway for our God. We of this generation have the privilege of being among those who are drawn unto the spiritual idea and shown the pathway to God in detail, through the pure, steady vision of the Leader of Christian Science, and he who fails today to see both the goal and the pathway is left without excuse. Likewise he who, having eyes, sees the truth, is permitted to become a coworker in the constructive work, to reflect the light that has been brought to his own consciousness, by his own uplifting to help draw others, and so to add his individual powers to the bringing in of the day that is approaching, when "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

LIGHT.

HERBERT A. HUTCHINSON.

ONE of the most beautiful symbols used in the Bible is that of light. From the beginning of the first chapter in Genesis to the last chapter of the book of Revelation, light is used as a symbol of Truth and Love, and Christian Science shows the true meaning of the word, as spiritual sense or understanding. In Ecclesiastes we read, "Who is as the wise man? and who knoweth the interpretation of a thing? a man's wisdom maketh his face to shine." That spiritual understanding and communion have this effect is seen in the case of Moses, on his return from the mount the second time with the tablets bearing the Ten Commandments: "And when Aaron and all the children of Israel saw Moses, behold, the skin of his face shone." On the occasion of Jesus' transfiguration on the

Digitized by Google

mount, Matthew says of him that "his face did shine as the sun, and his raiment was white as the light." When Paul was converted, on his journey to Damascus, it is related that "suddenly there shined round about him a light from heaven."

The Master constantly used the word "light" in the spiritual sense in his teachings, when endeavoring to raise the thoughts of his disciples, and all who heard him, heavenward. The 12th chapter of John's Gospel contains this saying of Jesus: "I am come a light into the world, that whosoever believeth on me should not abide in darkness." We of this age cannot be grateful enough that the light of Truth, of Spirit, has again dawned in consciousness, and for this our gratitude goes out to our best human friend, Mrs. Eddy, for "Science and Health with Key to the Scriptures," and for all her labors for mankind. Across the rage and fury of mortal thought, lashed and stirred to its depths by the winds of Truth, the clear, steady light of Christian Science shines out as a beacon, and through the roar and hurricane of the clash of human beliefs and wills, come the tender tones of the voice, saying as of old, "Peace, be still."

It is in the book of Revelation that we get the full sense of light. John, the beloved disciple, our "brother, and companion in tribulation, and in the kingdom and patience of Jesus Christ," has lifted the veil of human beliefs, and whoever has seen the light can get a vision, however slight, of that state in which mortal error will have flickered out, and eternal harmony reign. From the beginning to the end of this book the scenes bring to the reader a sense of transcendent light,—light far beyond the ken of mortal sense; and yet our present sense of spiritual light, as proved by our comparatively feeble demonstrations of the Christ-power, can only be as the glint of starlight compared to the sun shining "in his strength."

The wonderful chapter on the Apocalypse in Science and Health helps our thought and raises us clearer in comprehension. When the continual repetition of the mutterings and babble of the lies of the Adam-dream wearies one, it is a welcome relief to turn to the contemplation of the mental scenes portrayed in Revelation, when "the accuser of our brethren is cast down" and the earth-mists have disappeared. Then thought rises to a glimpse of the real, the eternal consciousness of divine Love, typified by that heavenly city which "had no need of the sun, neither of the moon, to shine in it; for the glory of God did lighten it, and the Lamb is the light thereof."

"THE WORDS OF MY MOUTH."

M. ETHEL WHITCOMB.

CHRISTIAN SCIENCE is proclaiming anew to the world the truth that if it would ever know freedom from disease and bondage, from weight and woe, it must obey the command of Scripture, "Be ye holy in all manner of conversation." Health and joy, peace and prosperity, are unobtainable without it. "But," says one, "what relation does my conversation bear to my happiness and health?" A most important one, for our conversation is an expression of our thought, and our thought governs our bodies and circumstances. Moses declared to the children of Israel: "Know therefore this day, and consider it in thine heart, that the Lord he is God in heaven above, and upon the earth beneath: there is none else." Because God is All, and has made all good like Himself, nothing really exists to talk about apart from His all-perfect creation, the joy, health, and holiness which He has ordained.

To talk of the supposititious opposite of God, good, expressed as disease and sin, discord and horror, is to dishonor Him and break the First Commandment, "Thou shalt have no other gods before me." Therefore it is a part of the Christian Scientist's religious duty to talk of that which is helpful and spiritual, immortal and true, and he knows that he is breaking a divine command when judging, criticizing, condemning, or talking of the imperfections expressed through the mortal sense of personality. Paul's injunction, "Be thou an example of the believers, in word, in conversation, in charity, in spirit, in faith, in purity," becomes his watchword.

Through all the writings of Mrs. Eddy we find the thought expressed that it is inadmissible to repeat error of any kind, unless it becomes absolutely necessary to uncover and destroy wrong. In "Miscellaneous Writings" (p. 346) she says, "It is a rule in Christian Science never to repeat error unless it becomes requisite to bring out Truth." How seldom is it really necessary to voice error in order to bring out the truth! It is helpful, before naming any discord, to remember this rule and ask one's self if one's only thought in speaking is to lessen the trouble that should be overcome. The real Christian Scientist has but one desire, to decrease all forms of evil; he is always obedient to the command, "Thou shalt not bear false witness."

Paul writes, "Let no corrupt communication proceed out of your mouth, but that which is good to the use of edifying, that it may minister grace unto the hearers." Conversation about disease and sin surely does not edify, nor "minister grace unto the hearers." When we realize that error has no origin in God,—the only creator,—we see that all its supposed operation is false and fleeting, and not worthy of conversation. Without strict obedience to the apostle's injunction, "Whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things," we can never hope to be "holy in all manner of conversation."

We find in Scripture this startling statement, "To him that ordereth his conversation aright will I shew the salvation of God." The dictionary defines salvation as preservation, deliverance. He, then, who orders his conversation aright shall be delivered from evil. We might turn this about and say, He that does not order his conversation aright, but talks of a supposed power apart from good, of disease and error, shall be led into captivity because of it. The wise man said, "There is that speaketh like the piercings of a sword: but the tongue of the wise is health." And not only is it health, but life, for we read again, "A wholesome tongue is a tree of life."

Many who seek healing through Christian Science are being deprived of the blessings they so much desire because they continue to talk of the imperfect. In Christian Science patient after patient has been delivered from deepest affliction when he has ordered his conversation aright by absolutely refusing to sigh over his sorrows, or talk of his symptoms or any discord, and by faithfully declaring God's allness,—talking only of that which is beautiful, brave, and fair. Jesus was our example in this as in all other things. He said, "The words that I speak unto you, they are spirit, and they are life." Again he said, "Now ye are clean through the word which I have spoken unto you." Jesus had nothing in common with the conversation of the world. At all times he spoke the word of Life which banished the diseased mind-pictures, and thus he lifted the multitude into health and holiness. As we think of how the word of God restored the withered arm and caused the blind to see in the days of Jesus, and remember that Truth is the same throughout all time, we may see the possibilities of holy conversation, and affirm with joy, "The Lord God hath given me the tongue of the learned, that I should know how to speak a word in season to him that is weary."

On no one point is humanity more tempted than on this

Digitized by Google

matter of voicing imperfection. To keep our "conversation in heaven," as Paul expresses it, requires thought to abide in heaven; it requires constant striving and constant prayer; the striving of yesterday is not sufficient for the temptations of today. When one thinks of the burdens that would be lifted, and the joy and peace that would be known on earth if men never spake but to voice the truth of God's goodness, the brotherhood of man, the power and reality of justice, the joy and health of holiness, he can but resolve anew to be obedient to the command, "Be ye holy in all manner of conversation," and with repentance for past failures, pray with David, "Let the words of my mouth, and the meditations of my heart, be acceptable in thy sight, O Lord, my strength, and my redeemer."

THE HUMAN PROBLEM.

MARGARET H. MAYNARD.

THE problem of supply is one which has to be met by each of us in some of its various forms and phases, and its correct solution proves the possibility of solving all other problems. If scientifically demonstrated, it proves that God is the only creator, the only Mind, the only real source of good. It therefore follows that want, sickness, and sin, which are not good, are no part of God's creation, and should not be so considered or recognized.

On page 8 of "Unity of Good" Mrs. Eddy says: "Everything is as real as you make it, and no more so. What you see, hear, feel, is a mode of consciousness, and can have no other reality than the sense you entertain of it." A friend to whom the question of supply was proving a very trying experience, was asked why she did not use the interest on a small sum which she had invested. She said, "Yes, I could use the interest; but it is such a little bit." The widow to whom Elijah was sent had indeed a "little bit,"—only "an handful of meal in a barrel, and a little oil in a cruse,"—but, in obedience to the divine command given through Elijah, she used what she had, and it lasted "many days,"—as the marginal reading has it, "a full year."

This question of supply presented itself to Jesus after a long day of teaching and healing in the desert, where the multitude had followed him. When his compassion expressed itself in the desire to feed the people, the disciples remonstrated that they had only a few loaves and fishes, and how could they feed such a multitude there in the wilderness; in other words, that the supply was entirely inadequate to meet the demand. But Jesus denied the material evidence, destroyed the false witness of the senses, for, looking away from matter into spiritual consciousness, realizing the perfect law of God and the abundance of the unlimited resources of Spirit, he knew there was plenty. We read that he "gave thanks,"—he did not wait to see the outward manifestation of the supply before he expressed his gratitude. He knew that in the spiritual realization was the possession; and if that same Mind be in us "which was also in Christ Jesus," there can be no fear of limitation.

One phase of this problem is lack of time. Over and over again we have heard this remark, "Yes, Christian Science may be all right, and perhaps it would help me; but it requires so much study to understand it, and I have not the time to give to the study of the Lesson-Sermon during the week." It has been truly said that we have all the time there is, but do we actually possess it? A dictionary definition of possess is "to make one's self master of; to have complete power or mastery over; to dominate, control." When a limited sense as to time is felt, is it not the "god of this world," the belief of false activities, the claim of the non-essential, that is dominating or possessing our thought?

The First Commandment is, "Thou shalt have no other gods before me;" and Jesus said, "Seek ye first the kingdom of God, and his righteousness." Not after all the social demands have been attended to, not after a fortune has been accumulated, may we give the time that is left to this seeking; but the command is, "Seek ye first," and if the seeking and striving be faithfully and thoroughly done, "these things" will have lost much of their former importance to us, and the "tyranny of things" will have been overthrown. In "Miscellaneous Writings" (p. 230) Mrs. Eddy says: "Success in life depends upon persistent *effort*, upon the improvement of moments more than upon any other one thing. . . . improving moments before they have passed into hours, and hours that other people may occupy in the pursuit of pleasure." As we eliminate materiality from our thought, and come to see only the essential, the good, we find that confusion is eliminated from our homes and our lives, and that time is merged into eternity.

"AS SCARLET."

JANE E. HUDDART.

WHILE trying to realize the truth about conditions which the world calls "hopeless," this text from Isaiah came into mind: "Though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool." Then came into remembrance the commonly held beliefs about these colors, and thus the passage took on a deeper meaning. Scarlet is commonly spoken of as a "fast color." In the East it is believed that when made with a certain dye this color will not fade, even when exposed to the full light and heat of a tropical sun. It is also spoken of as a flaunting, bold, showy color.

Standing for error, as in the text from Isaiah, whether that error be sin or sickness, thought is led to perceive that though the discord seems to be so fastened into consciousness as to be real and unalterable, it will disappear when subjected to the pure white light of Truth. Though so-called material conditions seem to be flaunting themselves boldly and persistently, they vanish as the tender, meek, pure, and peaceful Christ-spirit is perceived. If, through the dream of life in matter, mortals seem to be tainted by sin or marked by disease, yet, as the truth of being is grasped, the real man is seen in all his God-reflected purity and whiteness.

Though the error has been accepted as real by mortals, in their ignorance of its nature and origin, yet in the presence of the truth, as we "reason together" with God, its false claims are exposed, it loses its seeming reality, fades away, and in its place is seen the dazzling white of "the robe of righteousness."

[Written for the *Sentinel*.]

COMMUNION.

EVELYN SYLVESTER KNOWLES.

COMMUNION with thy God is not to stand
With eye uplifted and outreaching hand;
Communion with thy God is this—what more?
Never upon His child to close the door,
To feed the hungry and restore the blind;
The lame to strengthen and the lost to find;
To teach the foolish wisdom's word to hear;
To bind the broken, nullify all fear;
To lift the lowly to behold His face,
And cause the proud to seek a lowly place;
To lure the sinner by a loving word,
And banish wrath by hatred's impulse stirred:—

This is communion with all-loving good,
And all may be partakers of this food,—
This "bread of life" that cometh every day
To nourish and sustain us on the way.

SELECTED ARTICLES.

[Frederick Dixon in *Battersea* (Eng.) *Borough News.*]

The letter signed "A Student" in a recent issue, exhibits in a rather remarkable way the readiness of the human mind to indulge in criticism. Christian Science is the religion of a very large body of cultivated and thoughtful men and women, who may be trusted not to have reached their conclusions without having been confronted with obvious and superficial difficulties which must occur to everybody on first reading any subject with which they are unacquainted. Yet here is a gentleman who, having "some time since looked through" the text-book of Christian Science, and "having read the report of a lecture in your columns," which report was of course necessarily curtailed, hastens to give utterance to his feelings in a criticism signed as by "A Student." Surely if we are to accept such methods we shall require a new definition of the term student.

The critic begins with a little wholesale denunciation. Christian Science, it appears, is "unscientific, unphilosophic, inhuman, and unscriptural." To feel that you are so much better trained morally and intellectually than hundreds of thousands of your neighbors, and to be able to speak of them in terms of such mingled certainty and contempt, must really almost be to succeed in adding a cubit to your stature. Some day the critic will discover that one reason for the persistent success of the Christian Science movement is that its members devote their time and their energies entirely to demonstrating the truth of their own views, and never attack those of their neighbor.

Now, when the critic explains that Christian Science is unscriptural he is merely explaining that the Christian Science view of the Scriptures is not his view; in plain English, that it is unorthodox. Orthodoxy, however, unfortunately for him, is one of the most difficult terms to define. The only thing that can be said on the subject with any certainty is that the heterodoxy of one century is quite secure of being the orthodoxy of the next. Still, whatever views may be held as to what is Scriptural and what is not, there are certain passages in the Scriptures which no amount of ingenuity can explain away, and among these are the passages expressing that fundamental idea in the teaching of Christ Jesus explained by him in the words, "He that believeth on me, the works that I do shall he do also." That is a "test" instituted not by Parliament nor by a particular church, but by the Founder of Christianity himself. It is a little remarkable that the church which insists on the application of this in its full significance, is the church whose teaching your critic elects to condemn as unscriptural.

The accusations that Christian Science is at once unscientific and unphilosophical may be dealt with together, as it is obvious that the two counts rest on the same basis. Just as the churches have set up their views of orthodox Christianity, so certain natural scientists would like to exclude Christian Science from the term science, because it fails to square with their conception of science. The word science, like the word religion, is a sufficiently difficult one to define, but a natural scientist of acknowledged authority, Huxley himself, has defined it as the answer a man makes to the question, What do I know? Now Jesus, preaching in Palestine and Judea the gospel of Christianity, made use of the phrase, "Ye shall know the truth, and the truth shall make you free." A knowledge of the truth is obviously the most scientific thing in the world, and that is why the writers of the epistles made use of a phrase, *epignosis tou theou*, which, though commonly translated knowledge of God, should obviously be rendered as full, exact, that is to say, scientific knowledge of God, and so of Truth. When, however, Jesus found that the deadened spiritual sense of the people of Palestine rebelled against any explanation of Truth other than that given through the orthodox teachers of his day, he replied that if they could not accept his teaching for the words' sake, they must accept it for the very works' sake; and so he made the miracle the demonstration of the truth of his teaching, or, as Huxley would have put it, it was his answer to the question, What do I know?

There remains the urbane suggestion that the teaching of Christian Science is inhuman, and this is illustrated later on by the declaration that remedies which bring relief to patients are withheld. Remedies which are supposed to bring relief to patients are being used every day, constantly without avail in bringing even temporary relief. Christian Science, dealing directly with cause instead of effect, destroys the origin of disease, and so brings permanent help to those who adopt its ministrations. As a matter of fact, Christian Science is perpetually destroying pain in numbers of cases where the "simple remedies" have utterly failed to produce any effect at all; while as for its practitioners being inhuman, at the very moment your contributor was making that pleasant accusation, these practitioners were devoting their time and energies in innumerable cases, all over the globe, not only to the destruction of physical suffering, but to the overcoming of sorrow and sin.

[Alfred Farlow in *Fort Worth* (Tex.) *Record.*]

Christ Jesus commanded his disciples: "And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils." Our clerical critic says that he prays daily for the sick. As a matter of course, he expects his prayers to be answered; otherwise he would not pray. In any event, he declares his belief in "healing according to New Testament teaching." It would be interesting to have him furnish a list giving "names and addresses" of those he has healed of the diseases which he has named. To be altogether courteous he should furnish testimonies before asking for them. If he does not believe that healing the sick is a part of the Christian ministry, our testimonies will be of no value to him as a means of proving that Christian Science is Christian—the question under discussion. On the other hand, if he does believe in Christian healing, he should practise accordingly, and thus he will prove the power of God for himself and so have no need of our testimonies.

Persons who do not accept the premises of Christian Science, but on the contrary are religiously, medically, or otherwise opposed to them, are not well prepared to accept the testimonies of Christian Scientists. A man who does not believe that disease is mental at bottom cannot bear competent testimony on this subject. He would be compelled to insist either that the cured person was not sick to begin with, or that he had been cured in some other way. Each individual is inclined to insist that a given cure is effected by the particular means which he believes to be necessary to a cure. For example, one who believes in medicine would insist that the medicine which he formerly took is just having effect. A man who does not believe in medicine will say it is because he has quit taking medicine. "I have always thought," he declares, "that he took too much medicine." A man who believes in hypnotic suggestion will insist that the patient has not been healed by divine power, by a Christian process, but by the "suggestion" of the human will.

[William J. Bonnin in *St. Anne's* (Eng.) *Express.*]

It is no hyperbole, but the literal truth, to say that there are multitudes of people happy and well today who, but for Christian Science, would be either in their graves or hopelessly invalided. There are hundreds of thousands of

Digitized by Google

people who rely entirely upon Christian Science in all cases of sickness, and there are many thousands of Christian Science practitioners devoting their lives to the work. Is it not refreshing and pleasant to contemplate the enormous amount of healing work that is being thus daily accomplished, but of which the general public hears nothing? And is it a great thing that there should be here and there a failure? If it is, then what shall be said of medical science? What an overwhelming indictment the daily death-roll becomes! What a confession of failure the melancholy list of "incurable" diseases! No, in face of the successes of Christian Science, the apparent failures at once shrink into insignificance. How, otherwise, could this teaching continue to spread, as it is spreading, over the face of the earth? Forty years ago there was one Christian Scientist. Through those forty years the voice of misrepresentation, derision, and vilification has never been silent, yet today students of Christian Science may be found in almost all the countries of the world, from Scandinavia to Egypt, from Italy to the Australian commonwealth; and every week sees a new center organized. Is it conceivable that these things should be, if Christian Science were merely "superstitious"? The vitality of the movement lies in the fact that it demonstrates the truth of its teaching.

To aver that mesmerism is "the central point of the creed" is about the limit to which it is possible to go in misstating Christian Science. I cannot ask for space to show the full falsity of such an allegation, but it may suffice to say that the fundamental teaching of Christian Science is that there is but one intelligence, the divine Mind; and that, consequently, it is diametrically opposed to the belief in minds many, or in the supposed power of the human mind. Christian Science insists upon all power being ascribed to the omnipotent, all wisdom to the omniscient, and all being and presence to the omnipresent. To call the inexorable logic of such teaching fanaticism is to choose about the last word that could apply to it. Finally, to prophesy its early extermination is but to repeat what has been said year by year for the past quarter of a century. Christian Science has, however, preserved its steady progress, concerned only to demonstrate its faith by its works.

[M. S. Bruen in *Irish Times.*]

If Christian Scientists really held the extraordinary views which are attributed to them, these would, indeed, be a strange medley. In reply to some of these criticisms, may I say that Christian Science does not imply or admit that sin does not bring suffering. On the contrary, from one end of the text-book, "Science and Health with Key to the Scriptures," to the other it is reiterated that "they who sin must suffer" (p. 37). Nor does it assert, or imply, that the human mind can pardon, or has any power to overcome, sin and suffering; but "the pardon of divine mercy is the destruction of error" (*Ibid.*, p. 329). The God of Christian Science is the Almighty, the all-loving creator, who made all things good, even "very good."

Christian Science repudiates the suggestion that the Almighty, whom the beloved disciple saw to be Love, made man capable of murder, and then visited the crime with a cruelty worse than the murderer's. It does not admit the illogical conclusion that, if suffering were sent or permitted by the creator, it were either wise or possible to escape from it by the use of drugs and medicaments; but it shows that sin and materiality, being negations, the supposed opposites of good—a state of ignorance—are overcome in human experience by the perception and admission of good. Christian Science acknowledges to the full the salvation which Christ Jesus brought to mankind, knowing that sinners are saved from sin, disease, and death by the love of which he was the exponent. It does not wait for a future world salvation, endeavoring to put it off as long as possible with the aid of doctoring, nursing, and health regulations, but accepts the apostle's declaration that "now is the accepted time; behold, now is the day of salvation."

[George A. Law in *New London* (Conn.) *Telegraph.*]

The dictionary defines science as "knowledge, or a certain knowledge; the comprehension or understanding of facts by the mind. The science of God must be perfect."

From Scripture it is learned that God is the only cause and creator, that He made the completed universe which is governed by His invariable, eternal, spiritual law. Scripture also states that God is "all in all," and therefore infinite. It then becomes perfectly plain that knowledge must consist of an understanding of God, His creation, and His laws governing the universe. It is also clear that such knowledge constitutes certain knowledge, and is therefore science; wherein lies the reason for the definition "The science of God must be perfect." This might also be stated, The perfect knowledge of God must be science.

Jesus founded Christianity. He lived in accord with God's true spiritual laws, and the basis of his life, the true spiritual law, is taken as a basis for the religious faith of all Christian denominations. Since the life, works, and teachings of Jesus, upon which Christianity is founded, were based on true spiritual law, certain knowledge, the perfect Science of God, then Christianity to be Christian must be Science, and Science to be Science must be Christian. It is then obvious that the combining of the terms "Christian" and "Science" is consistent, logical, and natural.

[Howard C. Van Meter in *Portland* (Ore.) *Telegram.*]

Our critic says that the Bible "is the book of God" and also "the book of man's sin." Christian Scientists believe that the Bible teaches the allness of God, and likewise points out the evil effects that follow disobedience to Him. Jesus said, "If I had not come and spoken unto them, they had not had sin; but now they have no cloak for their sin;" that is, they had no excuse for longer failing to recognize the subtlety of sin and to turn from it, and so cease to be servants of it. He also said, "Whosoever committeth sin is the servant of sin;" and to avoid doing this there must be a recognition of its claims and a repudiation of them, based upon an understanding of God as the only creator.

In "Science and Health with Key to the Scriptures" (p. 461) Mrs. Eddy writes, "To prove scientifically the error or unreality of sin, you must first see the claim of sin, and then destroy it." The quickened sense of God's allness means, likewise, a quickened perception of the falsity of evil, and thus enables man to refuse obedience to it and avoid the suffering which would otherwise characterize his experience. Those who are believing in and proving the teachings of Christian Science give the best evidence of its verity, and it seems strange that critics overlook the general conduct of this body of people, and attribute an effect resulting from the teaching that is so well disproved in the actual experience of those adhering thereto. The Christian Scientist is endeavoring to lessen sorrow and pain in the world, and he is entitled to be so credited, even if his way is different from that of some others, and it would hardly appear that any one should object to their abolishment from human experience.

[Charles K. Skinner in *Bay City* (Mich.) *Tribune.*]

Christian Scientists know that their teaching is radically different on some lines from that of others, and that a superficial reading of the text-book, "Science and Health with Key to the Scriptures," fits no one to judge it or the practice of its followers. Some years ago an orthodox

Digitized by Google

minister of our city attacked Christian Science from the same standpoint as has our present critic. On being interviewed, he was asked if he had ever read the text-book carefully, to know just what Mrs. Eddy taught. His reply was that he had never read it, but he had read excerpts from it in various papers, and he had talked with other ministers and different people, and he felt that he was perfectly competent to judge of the doctrine.

On being asked if he would consider such a method adopted by opponents toward his own teaching a just one, he had the honesty to say that he would not. He then frankly said that he would read the text-book carefully, from an unbiased standpoint, and if he found he was mistaken he would write a retraction. To his credit, be it said, he not only corrected his former article, but said that while he did not fully understand some of the statements in Science and Health, he was sure that Christian Science was teaching the truth, and Mrs. Eddy was doing a great work for humanity.

The present critic tells us that "the cause of the rapid spread of Christian Science is its strong appeal to the physical needs of mankind." Granting this to be true, in most instances, is it not right and proper to show the sick man that he can be well and happy, and remain so, by living a right life; and that the power of God to help him do it is here now, by healing him through that same power? The Master, who was the greatest teacher of God's word that ever lived, carried out this plan all through his life, and he declared that the only mark of his followers was that they should do the works that he did. Almost his last words were, "If ye love me, keep my commandments." It is true that Jesus reproved the people because of their material desire for the "loaves and fishes," yet there is no instance recorded where he refused the physical healing, although he always made a demand on those whom he healed either for faith, obedience, or better living. The Gospels are full of the works of physical healing, showing that Jesus considered that harmony in the physical body was a necessary counterpart of the spiritual harmony. When John, who was in prison, sent to Jesus for proofs of his Messiahship, he said to these messengers, "Go and show John again those things which ye do hear and see: The blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them. And blessed is he, whosoever shall not be offended in me."

[C. R. Munro in *Brantford* (Can.) *Courier*.]

Mrs. Eddy's teachings about matter are identically those of Jesus, as is shown by the fact that matter and its so-called laws, as manifested in sickness of various forms, are being overthrown through the teachings of Christian Science today in exactly the same way they were in the time of Jesus the Christ. Knowing the truth about these things frees us from the bondage of the material law, but it is evident that in the article under consideration the writer has failed to distinguish between man made in God's image and likeness, and the mortal, material concept of man. Jesus repeatedly proved that the spiritual law is actually supreme, all powerful, and ever present, and Christian Science is likewise proving that this law, when understood, is as effectual today as it was in Jesus' time to destroy sin and sickness. Jesus said: "It is the spirit that quickeneth; the flesh [matter] profiteth nothing;" and he also said of those who believed on him, "The works that I do shall he do also; and greater works than these shall he do."

The writer in question refers to the "practitioners of this black art," implying, no doubt, that the healing in Christian Science is accomplished through the agency of the carnal mind. This error has been cleared up times without number, but it becomes necessary to state again that Christian Science distinguishes clearly between the one divine Mind, or God,—the omnipotent, omnipresent, and omniscient,—which is the only healer, and the carnal or mortal mind, which is never a healer, but is responsible for the myriad ills that afflict humanity today. Christian Scientists believe that this divine Mind is the Mind which is referred to by Paul in the passage, "Let this mind be in you, which was also in Christ Jesus;" and they believe that this Mind is as all powerful and ever present to heal and save today as it ever was.

Sneers are very poor arguments, and always indicate a weak case. Moreover, they will carry little weight, I venture to predict, with the large body of your thoughtful readers, who will naturally prefer to estimate Mrs. Eddy and her critics according to the fruits which have been produced by each respectively. If Christian Science has been the means of healing thousands of sufferers of every known ailment, including the worst types of organic disease, after many of them had been given up to die, if it has been the means of reclaiming thousands from lives of sin to lives of usefulness,—and these are the works Christian Science has done and is daily doing,—then Mrs. Eddy, as the Discoverer of Christian Science, is entitled to the respect, not the sneers, of every man and woman worth the name; and she will have it.

In conclusion, if a person wishes to learn the truth about, say, the science of numbers or the science of music, he consults a recognized text-book on the subject or a competent teacher. The Science of Christianity must be studied in the same way, and can never be understood through those who have either failed to grasp its teachings and to demonstrate their understanding of those teachings by healing the sick and sinning, or who wilfully misrepresent the facts.

[George Shaw Cook in *Peoria* (Ill.) *Star*.]

The whole trend of Christian Science teaching is to lift the student above the fear of evil. If certain press reports seem to indicate that Christian Scientists are manifesting fear and superstition, it should be remembered that these conditions of thought obtain in some instances only because of a lack of Christian Science or because of a perverted sense of it. Christian Scientists do not claim to have entirely risen above the miasma of human fear, but as a class they are more free from fear and superstition than they once were, and they have a much greater sense of freedom than they had before they acquired a knowledge of Christian Science.

Christian Scientists have at least begun to understand that fear is never about anything real; that God, who is acknowledged by them as the only creator, never made anything of which they need be afraid. Therefore they are gradually coming to know that in reality there is nothing to fear. They observe that human experience is full of evil conditions which have the appearance of reality, but they do not acknowledge reality or power in these conditions, because they have learned that they are without basis in God, who is omnipotence. Mrs. Eddy says on page 563 of Science and Health: "Human sense may well marvel at discord, while, to a diviner sense, harmony is the real and discord the unreal. We may well be astonished at sin, sickness, and death. We may well be perplexed at human fear; and still more astounded at hatred, which lifts its hydra head, showing its horns in the many inventions of evil." From cover to cover the Christian Science text-book is one mighty protest against the fear of evil.

Count that day lost whose low descending sun
Views from thy hand no worthy action done.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

THE ANNUAL MEETING.

THE annual meeting of The Mother Church, The First Church of Christ, Scientist, in Boston, was held in the church edifice Monday, June 6, and the reports submitted by the Treasurer and Clerk were most satisfactory and encouraging. The substantial growth of the movement was illustrated by the statement that one hundred and four more branch churches and societies were advertised in *The Christian Science Journal* on June 1, 1910, than were advertised one year previous, indicating that new churches and societies holding public services were being formed at the rate of one every three and a half days. The Clerk announced that William D. Baldwin of New York had been elected President of the church for the ensuing year, and that Stephen A. Chase and J. V. Dittemore had been reelected Treasurer and Clerk, respectively. The reports of the work that is being done by the branch churches and societies in Europe were particularly interesting and satisfactory.

Much gratitude was manifested for the wise and splendid leadership evinced by Mrs. Eddy, and as an expression of this gratitude the following letter was unanimously ordered to be sent to her.

LETTER TO MRS. EDDY.

Boston, June 6, 1910.

Rev. Mary Baker Eddy, Brookline, Mass.

Beloved Teacher and Leader:—The members of your church, in annual meeting assembled, turn to you in deepest gratitude for all that you have done for them and for the uplifting of all mankind through your inspired and inspiring teachings. They recognize day by day that the measurement of progress in Christian Science is not a matter of years or numbers, but rather of events which tend to lift human thought heavenward.

The steady stream of testimonies coming from all parts of the world grows vaster and vaster in its proportions. Unimpeachable evidence of the healing of organic and so-called incurable diseases, through Christian Science, is more abundant than ever before. Still more do we rejoice in the moral purification and spiritual illumination which accompany the physical healing in true Christian Science practice.

Your loving admonitions through many years are gradually being understood and assimilated, and as a consequence our churches are awakening to the meaning of true church government, the government of divine Principle, which means the truest and only real democracy.

We are learning that our gratitude to you can be fully expressed only by supporting all the activities which you have established for the regeneration and healing of mankind. This is especially true of the Christian Science publications, which are so ably managed and edited and which should enlist the support of every Christian Scientist. We here assure you of our deep appreciation for the faithful and effective work of the Board of Directors of The Mother Church at all times, and of our firm intention to give them our unwavering support in carrying forward its activities.

It is our earnest desire to prove by our works that Christian Scientists are loving and obedient followers of Christ Jesus. Your sublime discovery and teachings are enabling us to recognize that the kingdom of heaven is here and now. Through your words and works the centuries are bridged by the divine Christ, the truth concerning God, man, and the universe. For all this,—for all that you are today,—we thank God, and press toward the realization of the Christ-ideal, as revealed in Christian Science.

BICKNELL YOUNG, ANNIE M. KNOTT.
JULIA S. BARTLETT, *Committee.*

"LET THEM HAVE DOMINION."

THE extent of man's God-given authority is graphically outlined in the first chapter of Genesis, where man is spoken of as having "dominion over the fish of the sea, and over the fowl of the air, and over every living thing that moveth upon the earth." The dynamic efficiency of this rule, as the expression of a spiritual law, is indicated in the Master's words when he said to the seventy: "I give unto you power to tread on serpents and scorpions, and over all the power of the enemy: and nothing shall by any means hurt you:" while its ethical and redemptive nature—that it is to be corrective, healing, and all-encompassing—is made clear in his final injunction that they should "preach the gospel to every creature."

St. Paul's apprehension of the all-inclusive, all-emancipating range of the Christ-idea is made to appear in his letter to the Romans, where he says that "the earnest expectation of the creature waiteth for the manifestation of the sons of God. . . . because the creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God." All this teaching presents a concept of the extent and completeness of the rule of the spiritual consciousness unto which the Christian disciple is called, that reveals a very great contrast to the thought of privilege and responsibility respecting this matter which is entertained by the average Christian believer.

The great body of Christian people are disposed to be pretty well content if they can realize a more or less complete dominion over the temptations to selfishness and sensuality, and though not a few are awakening to the thought of overcoming sickness as well as sin, this idea of realizing not only the redemption of humanity, but of so-called nature, that not only the disease which pertains to mankind, but the distress which pertains to the phenomenal world, is to vanish at the appearing of "the sons of God,"—this to the many no doubt seems altogether visionary. And yet, centuries before the Prince of Peace demonstrated his power over the so-called law and order of nature, a prophet of God had foreseen the compass and completeness of the reign of Christ, Truth, and thus pictures his vision: "The wolf also shall dwell with the lamb, and the leopard shall lie down with the kid; and the calf and the young lion and the fatling together; and a little child shall lead them. . . . They shall not hurt nor destroy in all my holy mountain: for the earth shall be full of the knowledge of the Lord, as the waters cover the sea"! Moreover, while the sages of the East were singing of the coming of universal peace in the reign of the Messiah, the Greeks, that most wonderful people, were telling their children the story of Orpheus, the child of the sun-god Apollo, who lured the beasts from the control of their cruel instincts with his sweet-toned lyre, and thus actualized, as the tradition ran, that peace in wood and field of which the Hebrew prophet had spoken.

Christian Science places no limit upon the transforming and redemptive power of Truth; on the contrary, it declares that this overruling power is, and ever has been, demonstrable in the measure of the intelligent responsiveness and

Digitized by Google

obedience of the human to the divine. Mrs. Eddy writes, "Earthly experience discloses the finity of error and the infinite capacities of Truth, in which God gives man dominion over all the earth" (Science and Health, p. 202). To "preach the gospel to every creature" is so to realize and reflect divine Love as to rebuke materiality in its every form and expression. That kindly interest in creature life, the recognition of the tragedy of its experience under the rule of fear, which is substituting the camera for the gun and transforming sportsmen into sympathetic students, —this is indeed an improved belief in which we may all rejoice; but the ministry to which every Christian Scientist is called means vastly more, namely, such a knowing of God, Spirit, and His creation, as will make practical contributions to the fulfilment of the expectation of the reign of Love which Isaiah entertained, and for which Christ Jesus made provision when he said, "My peace I give unto you." Christian Science thus lifts up the standard of man's true sovereignty, and awakens a new and inspiring sense of what it is possible for every child of God to do for the world's emancipation and release.

JOHN B. WILLIS.

GOD'S LAW OUR DEFENSE

WITH wonderful wisdom and foresight our revered Leader has directed that the first lessons of the children in our Sunday Schools shall be the Ten Commandments, the Lord's Prayer with its spiritual interpretation (as found in Science and Health, p. 16), and the beatitudes from the sermon on the mount. It is seen at once that the Ten Commandments are the basis of all human law which aims to establish justice among men and to give security to human life. It is, however, very significant in this connection to remember the declaration in the Westminster Confession of faith, that "No mere man, since the fall, is able, in this life, perfectly to keep the commandments of God; but doth daily break them, in thought, word, and deed." This would seem to be supported by St. Paul's words in the eighth of Romans, that the carnal mind is "not subject to the law of God, neither indeed can be;" yet we have, on the other hand, the unqualified demand of Christ Jesus, in his sermon on the mount, "Be ye . . . perfect, even as your Father which is in heaven is perfect." To this demand we may add the words from 1 John 5 : 18: "We know that whosoever is born of God sinneth not; but he that is begotten of God keepeth himself, and that wicked one toucheth him not."

In the chapter already quoted St. Paul makes it clear that as we cease to "mind the things of the flesh," and instead come to mind "the things of the Spirit," we cease to be lawbreakers, for we become "conformed to the image of his Son," who fulfilled the law of God at every point. In "Miscellaneous Writings" (pp. 66, 67) Mrs. Eddy shows the vital relation between obedience to the law of God and the healing of sin and disease. She lifts thought above the merely material sense of the Decalogue, up to its spiritual sense and infinite demand, and shows that the one who disobeys the commandments actually forfeits his own sense of life and happiness. On the other hand, we learn in Christian Science that each commandment, spiritually understood and faithfully obeyed, becomes a weapon of defense against all the allurements or the assaults of evil. It requires, however, constant practice to use the spiritual weapons with which to vanquish every foe. The one who indulges in hate cannot say to error, "Thou shalt not kill;" nor can he who tramples upon another's rights and ignores the divine demand for entire honesty, say, when his own interests are assailed, "Thou shalt not steal."

In this age, no less than at the dawn of Christianity, there are mighty wrestlings "against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places;" and no one can "stand," to use Paul's forceful word, who does not wear "the breastplate of righteousness," which includes righteous thinking about God, man, the Cause of Truth and its God-appointed Leader, as well as holy living. Having this breastplate, and the shield of faith, we are assured that we can "quench all the fiery darts of the wicked."

We should never forget that God's law cannot in reality be broken. It remains forever the same, an eternal witness to the justice and mercy of God, while mortals vainly and blindly outrage their own sense of right in the attempt to harm others. Divine law is really summarized in love to God and to our neighbor, and this was constantly emphasized in the teaching of the Master. The spiritual man loves God and loves God's law, knowing it to be the source of his safety and his freedom, of his health, happiness, and strength. In Christian Science we learn that we must not deny man's ability to obey this law, but instead declare for the God-bestowed ability to honor it "in thought, word, and deed." The revelator says, "Blessed are they that do his commandments, that they may have right to the tree of life, and may enter in through the gates into the city."

ANNIE M. KNOTT.

AMONG THE CHURCHES.

LONDON, ENGLAND.

Many churches of Christ, Scientist, responded to the expressed wish of King George V., that a memorial service be held by the churches in honor of the late King Edward VII. The following excerpts are taken from reports, received to date, of the remarks made by First Readers in connection with a specially prepared Lesson-Sermon.

Third Church, London:—

Friends, we are not gathered together today to grieve as the world grieves at the passing of a great king, but rather to show, as Jesus also showed, our human sympathy with a nation's sorrow. The teaching of Christian Science respecting the unreality of death and the glorious reality of Life, has led us to understand that all good is eternal. Hence we know that the thoughts and hopes for "peace and good will to all men" which marked the life of him whom we call "Edward the Peacemaker,"—these thoughts and hopes cannot die; they have not passed away, but will live eternally. They will bring forth fruit in due season, yea, even to the utmost parts of the earth. The desire for peace is the aspiration of love, and we who are daily striving to forget "those things which are behind," and who are reaching "forth unto those things which are before," may well meet to honor those ideals which have lifted up a standard of peace to the people. We may well assemble in solemn sympathy, in loving recognition of a king whose reign has helped to herald the thought of "a new heaven and a new earth," where "there shall be no more death, neither sorrow, nor crying;" a king through whose earnest example and work has been brought nearer to men's minds that "great city" of which it is written, "And the nations of them which are saved shall walk in the light of it: and the kings of the earth do bring their glory and honor into it."

First Church, Leeds:—

"The King is dead, long live the King." Not so do we as Christian Scientists regard our dear and honored sovereign. He is not dead, but is entering upon a higher sense of life. Most truly we mourn our King, but not as those who mourn without hope, for we know that not for one single instant has the infinite Life and Love been separated from the object of His love and care. To human sense King Edward has passed through the shadow called death, but in this experience he has surely awakened more fully

Digitized by Google

to the fact that man never dies, and is finding his real imperishable selfhood which is God's reflection, the Christ-man, the "I AM" expressed. King Edward set an example of practical Christianity that all might follow with advantage,—as a man, in kindly deeds, in unfailing courtesy and cordiality, and in sympathy for all those, whether rich or poor, high or low, whose sorrows or sufferings came to his knowledge. To his lasting honor be it said, that it is not so much as a king, but as a man that he has fairly won and holds the affection of "this so great a people." His name will descend to posterity as the peace lover, the peace maintainer, as Edward the Peacemaker.

And what of the chief mourner, the Queen mother! With her we tenderly sympathize in this her dark hour. As she has gladly and dutifully shared her husband's joys and sorrows, so divine Love will assuage her grief, will comfort and sustain her. As Christian Scientists let us not forget for one moment, while this mighty wave of sorrow sweeps the empire for the passing of a great and good king, that the time draws on, yea and now is, when there shall be but one shepherd and one King, even as it is written: "they shall all know me [God], from the least of them unto the greatest." It rests with us to hasten this realization through a better and quicker healing of sickness and sin, through the example of loving and blameless lives, through a broad-minded sympathy with others, and a direct refusal to regard man, even though to our finite sense the subject of our contemplation may be a cause of disappointment, otherwise than as God regards man. The world stands poised in breathless expectation, waiting for its salvation, which it knows is at hand. Whence it comes, it knows not; but we know, and in that knowledge we rejoice. "If we live in the Spirit, let us also walk in the Spirit," for therein there is no death.

Second Church, London:—

Our service today is being held to bear grateful and loving witness to the life and reign of King Edward, who has governed our noble empire with that prudence, wisdom, and foresight in which we recognize the loving guidance of our Father-Mother God. As Christian Scientists we admit neither the might nor the majesty of death. We are met here not to pay any tribute to its reality, nor to mourn over its seeming power; but by helping to destroy its reality, we are destroying the sorrow that the belief in death seems to cause. In this way we think we are best fulfilling the wish of the Queen mother, when she said in her message to the nation, "Give me a thought in your prayers." *Correspondence.*

THE LECTURES.

SAN JOSE, CAL.

An audience that taxed the seating capacity of the Victory Theater listened for an hour and a half last evening [April 18] to an impressive address on the subject of Christian Science by Frank H. Leonard of Brooklyn, N. Y. The lecturer was introduced by Francis J. Hambly, one of San Jose's most prominent attorneys, who said,—

The large audience assembled is but another proof of the great interest there is in Christian Science, and of the desire of the people of the world to ascertain the actual facts and learn the truth about this great movement, from sources that can be relied upon. Since the days of Jesus the Christ, the Christian world has accepted as true the Biblical accounts of the healing of the sick by him and by his disciples, through spiritual means alone. It has accepted as true the fact that for three hundred years after his ascension his followers likewise healed the sick, and that down through the succeeding centuries there have been occasional healings as the result of an uplifted spiritual consciousness and prayer. In the year 1866, an American woman, the Rev. Mary Baker Eddy, was so healed,—raised from the bed of death when material means had failed,—and she came to the conclusion that her healing, and the healing work of the Master and his followers, were the result, not of the mere pleasure of an anthropomorphic God, but of a great spiritual rule or law, eternal, infinite, and universal in its application, and thereafter she devoted herself to the discovery of that rule or law, the method by which the healing work had been and could be done.

That rule or law was subsequently discovered by her, revealed to her, proven and demonstrated, and published and given to the world in her great work, "Science and Health with Key to the Scriptures," the Christian Science text-book. That rule or law, through and by its Principle, God, heals the sinning as well as the sick. This, in part, has been the precious contribution of Mrs. Eddy to the human race. Through and by it the lives of countless thousands have been saved and blessed, and the great healing work goes on daily, and must continue to go on, redeeming human consciousness through the power and activity of Truth, until man's freedom from sin, disease, and death has been wholly demonstrated.—*San Jose Mercury.*

SALINAS, CAL.

Bliss Knapp delivered a lecture on Christian Science April 21. He was introduced by ex-Mayor W. J. Hill, who said,—

While I am not a Christian Scientist and do not profess to understand the philosophy of its teachings, I nevertheless believe that the time has come when the public, and especially the Christian public, ought to give the subject a candid, careful, and impartial hearing. It is the faith of thousands and hundreds of thousands of our people, who in point of intelligence and standing in their respective communities are not below the average of the membership of any other religious denomination. Among its adherents are successful business men, shining lights in the learned professions, on the bench and in the halls of legislation. Whether we believe in the doctrine of Christian Science or not, there is no gainsaying the fact that it has many wonderful cases of both mental and physical healing to its credit, and that it exercises a most beneficent influence over the lives and destinies of its large and rapidly increasing number of disciples, who seem to be the most optimistic people on earth, ever ready with a word of cheer, a kindness for every situation, and who look upon the brightness of life, rather than its shadows.

I remember when the Christian Science movement first started, over forty years ago, that the great mass of humanity were doubters and even open scoffers, but prejudice, misrepresentation, and criticism were met with patience and dignity, until from the modest home of Mrs. Eddy in Lynn, Mass., Christian Science has spread to the uttermost ends of the earth. The truth has nothing to fear from the freest and fullest investigation. Let us give to others the thoughtful, careful, kindly consideration that we ask for ourselves, exemplifying the golden rule of doing unto others as we would have others do unto us.

It is little short of marvelous, the hold that Christian Science has taken on the minds of men and women throughout the whole civilized world. In a San Francisco newspaper I recently read an article from the pen of an eminent minister of the gospel in that city, who declared that by far the largest church congregations in New York, Boston, San Francisco, Los Angeles, and other great cities, are made up of the followers of Mrs. Eddy, who seem to find in Christian Science something that satisfies their longing for better things.—*Correspondence.*

Digitized by Google

BIRMINGHAM, ENGLAND.

Bicknell Young lectured on Christian Science in the Town Hall, Birmingham, England, on Friday evening, April 22. There were over a thousand people in the hall, who listened to the lecture with close attention. The lecturer was introduced by Colonel Hobart, of Liverpool, who said in part,—

In such a gathering as this there must be many who have attended from various motives: there are those, no doubt, who have already accepted the teachings as given to this age by the Discoverer of Christian Science, Mary Baker Eddy, who is also the author of the Christian Science textbook, "Science and Health with Key to the Scriptures." There are others who have come here earnestly seeking for Truth, and an understanding of its saving and healing power. Then, possibly, there are those who have very little acquaintance with the subject, who have formed their opinions from criticisms against Christian Science. This is what Mrs. Eddy named the Christ Science, which she said was the divine law of Life, Truth, and Love. Whatever may be the individual mental attitude of our friends here tonight, we would ask their cordial and respectful attention to the lecturer who, in the limited time at his disposal when dealing with an infinite subject, will tell you some little of what Christian Science is, what are its promises, and what it has done and is doing for mortals since its discovery by its Founder, Mary Baker Eddy, in 1866.

Now I could not, even if I were desirous, overlap the lecturer, because it would be quite impossible to trespass on any ground over which he may travel in this unlimited subject in which the infinite, omnipotent, omniscient, and omnipresent God is the All-in-all; but as one of over a million who have accepted this new-old religion, which Jesus lived and practised nearly two thousand years ago and which he commanded his followers in every age to pursue in these well known words, "Go ye into all the world, and preach the gospel to every creature;" "Heal the sick, cleanse the lepers, raise the dead, cast out devils," I would like again to bear public testimony to the blessings I have received since hearing of Christian Science, just a little over seven years ago. Prior to that my family seemed to have more than its share of sickness and the consequent heavy expense when trying to combat the ills to which flesh is supposed to be heir; and although all available material means and human wisdom were brought to bear, particularly in one case of sickness, there was no effectual result. Then, when all these had failed, and in our extremity we turned as a last resource to God,—sought the divine source of all good, and applied for metaphysical treatment,—there was such a complete cure effected as proved positively that God is "a very present help in trouble;" that in Him "we live, and move, and have our being;" that He is the author and giver of all good, and of good alone; that He is not the author of sin, sickness, and death, and also that He is all-power.—*Correspondence.*

GUERNSEY, CHANNEL ISLANDS.

There was a large attendance on Thursday evening [April 21] at the St. George's Hall to hear the lecture given by the Rev. William P. McKenzie of Boston, U. S. A., on Christian Science. The chairman, the Hon. Donough O'Brien of London, introduced Mr. McKenzie in a short pleasant speech. He explained that the lectures were intended to remove misunderstanding and misconception as to what Christian Science really teaches. Mr. O'Brien spoke of the growth of the movement in its beneficent work for mankind, and illustrated by his own case, for several years ago he had been healed of distressing conditions of long continued suffering. Since that time of healing he had enjoyed good health and had never been absent from his professional work through sickness.

Guernsey Advertiser.

FORT WAYNE, IND.

Prof. Hermann S. Hering lectured yesterday afternoon [April 24] in the Majestic Theater before a very large audience, his subject being "Christian Science: The Science of Salvation." He was introduced by Jacob S. Shield, formerly of Warsaw, Ind., now of Chicago, Ill., who said in part,—

We may differ on many questions, but I dare say that on at least one we are all united, and that is that there is but one God, the Father of all. If that is true, then we are one universal family, and we are not divided in any sense of the word, except as humanity has taken it upon itself to divide itself; and so the interests of one are the interests of all; and if any of us have anything that is good for another, it would be gross selfishness if we would not give it to the brethren.

You are asked to be here today because we have something very, very good to give you. Christian Scientists are always glad to make known their doctrines as best they possibly can to others, hoping that thereby they may release some poor sufferer who has been unfortunate enough to come under the difficulties experienced in the world, and who has not found the desired healing. Now, because we have found that Christian Science is the best healing method in all the universe, because we have tried it and found it all that is required for man's health, harmony, and peace in the world, because we have learned something more about God in that experience,—these are the reasons that we offer it to you today. We do not expect that the whole world will immediately accept Christian Science; in fact, we do not expect that a single individual will accept Christian Science until he is positively convinced that it is the absolute truth as taught by the Master on the shores of the Galilean sea. But we have tried Christian Science, and we hope that we may also lead you to try it, if you have anything in the world that makes you a sufferer.

The difficulty that we encounter is to make people believe that there is indeed such a wonderful thing as a healing power altogether different from anything known in the world. Just as each one of you, if you could go back one hundred years, with your present knowledge, and meet the great men of that time and explain to them about the transmission of the voice from one end of the continent to the other, and say to them that you could converse with your friends, they would at once brand it as a fairy tale, or say that you were not mentally responsible. So with Christian Science today. We tell you something so marvelous, so wonderful, that it seems almost incredible; and the world is full of doubting Thomases.

Fort Wayne Journal-Gazette.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given at 8 p.m.

Topeka, Kan. (Second Church).—Hon. Clarence A. Buskirk, Grand Opera House, June 16.

Minneapolis, Minn. (First Church).—Rev. Arthur R. Vosburgh, Auditorium, 3 p.m., June 19.

Highland Park, Ill.—Bicknell Young, Ravinia Park Theater, 3:30 p.m., June 19. (Joint lecture for Highland Park, Evanston, and Wilmette.)

Huntington, W. Va.—Frank H. Leonard, Carnegie Hall, June 20.

Paris, Tex.—Hon. Clarence A. Buskirk, Peterson's Theater, June 21.

Indianapolis, Ind. (Second Church).—Bicknell Young, Tomlinson Hall, Delaware and Market streets, June 23.

Milford, N. H.—Mrs. Sue Harper Mims, Town Hall, June 27.

Philadelphia, Pa.—Bicknell Young, Church Edifice, 40th and Walnut streets, June 26 and 27.

TESTIMONIES OF HEALING.

I came into Christian Science about two years ago. For over twenty years previous to that time I had never known what it was to be free from pain. Operations, sanitarium treatment, osteopathic treatment, electric baths, and change of climate were tried one after another without any benefit. During this time six physicians were consulted, but they gave no encouragement. At the time of my coming into Science I was partially paralyzed, had spinal trouble, and was said to have locomotor ataxia. For a year before my healing I had suffered intensely day and night. I never knew what it was to have restful sleep.

It would be impossible to describe my condition at this time; there was no position in which I could place myself that did not cause intense pain. During the winter of 1908 I grew worse very rapidly, and our family physician, who made a thorough examination and study of the case, said that there was no remedy known to medical science, and that as long as I lived I would be a great sufferer. I had been a devout Christian all my life, but could not believe that God was responsible for my suffering, that He would be less merciful than my earthly father; yet He seemed very far away, and my own prayers and the prayers of a devoted family remained unanswered. For a long time my only prayer had been, "God help me!"

At this time, when on the verge of the grave, a dear friend advised me to try Christian Science. I procured a copy of "Science and Health with Key to the Scriptures," but for some time even the thought of reading seemed a burden; but one day a great desire came over me to know what it was that brought health and peace to my friends, and with this desire I resolved to give up the medicine I had been taking daily for years and to get all the benefit I could from Science and Health. The desire grew until it absorbed every thought and I felt I could not wait for any one to help me. It seemed as though I had been starving for years and was just within reach of food, and such food! How my heart is filled with praise to God for this heavenly manna. I began to read, and for two weeks I was so absorbed that I was entirely indifferent to my surroundings. When my healing occurred I cannot say, but one day I awoke to the fact that every pain had left me; the burden I had carried so long had dissolved, and I was free.

How can I describe my joy in finding God, good, with that peace and sweet content which comes through trusting Him. What a blessed comfort it was to know that "desire is prayer" (Science and Health, p. 1); that I could pray without ceasing, and that God is not afar off, but nearer than hand or foot. For two years no medicine has passed my lips and my health has been excellent. I can walk any distance without fatigue, and I have strength for every duty that is mine to do, knowing that in God is all strength. Perhaps no one has suffered more than I did from sleeplessness. For years restful sleep was unknown to me, but from the first day of reading Science and Health I began to sleep. Instead of resorting to material means to induce sleep, I used the 91st Psalm and the Lord's Prayer, and it proved so helpful that I was soon peacefully sleeping, and for the whole night through.

Through Christian Science, life for me has begun anew, sickness has given place to health, fear to trust, and unrest to perfect contentment. I find my greatest joy in studying the Lesson-Sermons. My heart is continually praising God, and my gratitude to Mrs. Eddy can well be imagined when one realizes that without her gift to the world I would still be wandering in the darkness of despair. My greatest desire is to rise each day into a higher realization of Life, Truth, and Love.

MRS. MARY D. MOORE, Boulder, Col.

I can testify to the preceding facts, as stated by my wife, Mary D. Moore. I will also say that our physician, who is considered a peer in his profession, after a thorough examination and study of my wife's case, said she had organic trouble, which could not be cured; that cases similar to hers were very rare; that there was no remedy known for the disease; that complications would follow, and the result would be terrible. It was then, after all hope for help was gone, that she turned to Christian Science. She procured a copy of Science and Health and began to read; and as she read, she realized the peace that passeth understanding. In less than three weeks the truth had set her free. The blood began to circulate through the stiffened limbs, and the flesh, which had been fast to the bone, became normal.

During the two weeks previous to her healing, she seemed to be "absent from the body and present with the Lord." The child of Christian parents, she had devoted the greater part of her life to church work, and she could not believe that a just God would so afflict one who was ever trying to do His will. It was only after studying Science and Health that she got the true understanding of God. To say that I am thankful to God, and to Mrs. Eddy, for this wonderful healing after all other means had failed, does not begin to express my feelings. I hope the giving of these facts may be the means of bringing some one from darkness into light. It has taught me this lesson, that there is nothing impossible with God.

ISRAEL MOORE, Boulder, Col.

It was after I had taken medicine for weak lungs for over two years, that I came to Christian Science. I also had a stomach trouble, for which the doctor urgently advised an operation. To this, however, my relatives would not consent. After some weeks, when I had improved enough to walk around, I went to a Christian Science practitioner's house, where for the first time I was told of Christian Science—or "healing through prayer," as she called it. She offered to help me free of charge, and I was healed in one treatment. I was then fourteen years old, and as the laws of Norway are very strict about school attendance, my teacher, when she heard of my improved health, sent for me. A doctor's certificate now became necessary, so I went to the same physician who had for the last two years prescribed for me, and who had also advised the operation. After giving me a very thorough examination, he said, "Now you are well, lungs and all." And so it has proved.

This was more than three years ago, and since then I have spent over a year in a factory, but have never felt any reminders of the old troubles. I am at present a strong and healthy girl over seventeen. Before I was healed, I had to beg for bread; but I thank God that through Christian Science health has been restored, so that I at present can earn not only my own living but am able also to give a helping hand to my widowed mother, who has four little ones to support. My hopes are that my life in the future will bear such fruits as will prove my gratitude.

BERGLIOT KARLSON, Ostre Aker pr Kristiania, Norway.

In gratitude to God, and to our dear Leader, Mrs. Eddy, I wish to relate my experience. I had been a great sufferer for many years, in pain most of the time, and I never knew what it was to be free from a sense of weariness. I was operated upon in one of the hospitals in Boston, but the operation was not a success. I also had four operations performed at my home, without any lasting benefit, two physicians giving up my case and one stating that he thought I could not live forty-eight hours. I then set the medicine aside and gained rapidly, but was not healed.

Digitized by Google

The doctors told me that unless I submitted to a very critical operation, with only one chance in a hundred of recovery, I could never be well.

My husband had recovered from an illness and gone away to work, and I went also. While away, my husband's trouble came back worse than ever, and we called in a physician, who relieved him for a few hours, so that he was able to go out; but he was again taken very ill in the office of the firm for which he worked. He asked some one to take him home, and this man was a Christian Scientist. He asked my husband if he might send his wife over to talk with him. She came, and through her treatment my husband was relieved, and he expressed the thought that if I were a Christian Scientist I could help him. I was willing to be a Christian Scientist if I found it to be right, so I began to study the Lesson-Sermons with the lady who had helped my husband. I was very anxious to have a copy of Science and Health, so when my husband made me a birthday present of ten dollars, I invested part of it in a copy of this book. The second morning after receiving Science and Health, I sat by the window reading the chapter on Prayer, and looking up I earnestly prayed our heavenly Father to manifest the truth to me in some way, that I might know without a doubt Immediately a most beautiful light seemed to fill the cottage, and I was healed. I also suffered from partial blindness, but was able to remove the glasses which I was wearing constantly, although I still use glasses for reading and sewing. After my healing, convulsions, a trouble from which I had suffered for years, came up again, but I had Christian Science treatment and was healed. *Materia medica* had never been able to overcome this trouble.

I cannot find words to express the wonderful peace and happiness which came to me when I realized that Christ, Truth, had set me free. It is easy to tell of one's physical healing, but I cannot express the spiritual uplifting which I received in seeking another's good. My prayer is to be ever faithful, and to do some good each day.

MARY E. GOULDING, Rockland, Me.

In 1898 Christian Science found me helpless and hopeless, physically and mentally, with only a longing to pass on to some unknown future state, to see if I could there secure one day free from suffering. Two years prior to this, while under medical treatment for a slight catarrhal affection, both currents of an electric battery were accidentally turned on my head, and from that time physicians pronounced me a nervous wreck and said they could do nothing for me. They advised my parents to keep me free from worry and excitement, and said that under no circumstances should I be permitted to study.

I suffered from stomach, liver, and bowel trouble, and the powerlessness of material remedies, together with constant travel from mountains to seashore, led me step by step to Christian Science for help. On hearing the "scientific statement of being" (Science and Health, p. 468), I knew that this was the truth. After three weeks' treatment I walked miles, when formerly to walk one block caused much suffering. The healing in my case was not instantaneous, but required two years' work. For the help so faithfully given in guiding my feeble footsteps out of darkness into light during this period, my heart is full of love and gratitude. In order to make room in consciousness for the great truth of Christian Science, my thought had to be emptied of false teaching, such as belief in spiritualism and fear of hypnotism; hence my slow healing.

To tell of the battles fought and victories won up to the present time would be joyous, but I will give a somewhat recent case of healing. In August, 1908, I was taken with fever and called in a practitioner, refusing to have a nurse. The fever was very high at times, but I was able to serve myself both day and night, being left entirely alone at night. Those who witnessed my healing were amazed at the fact that I lost very little flesh and with the exception of a few days ate anything I desired. I was conscious and mentally clear during the entire time, being able to read and study the Bible and Science and Health. I required very little sleep, and felt no exhaustion from lack of it. I was even able to get out of bed one night to put out a fire in my room caused by the overflowing of an alcohol stove, and I felt no excitement or weakness from the exertion. On the night of the day that the fever left me, I was suddenly awakened from a quiet sleep, conscious that I must have immediate help. The practitioner came to me in a few minutes, and although I was seemingly in the presence of the last enemy, there was no fear. All through the night the battle for life was waged, but when the morning came the testimony of the material senses was silenced and Truth's omnipotence revealed, proving that our weapons "are not carnal," but are "mighty through God" to the destruction of every form of error.

What can I say of the beloved woman who made this work possible through her teachings? The study of Science and Health with the Bible has given to me the only real knowledge of God as a living Principle that I have ever possessed. It has given me health, strength, and a broader sense of love. My heart overflows with joy, with gratitude and boundless love, and may I prove in works, not words only, that I am a meek and humble follower of Christ.—MISS GERTRUDE CHICK, Oakland, Cal.

One day, nearly two years ago, I was lying down with what was no new occurrence, a distressing headache. Before I became interested in Christian Science I used to stand the pain as long as I could, and then send for powders and lie down. If the headache was a bad one the powders had no effect. On this occasion I was studying an article in the *Sentinel*, and as the truth it contained was borne in upon my consciousness, the pain left me instantaneously. I noticed this at once, and after a moment got up and walked aimlessly about for a bit, to see if the pain had really stopped. I fully expected to have to lie down again, for the twinges were always unbearable, but they did not come back. I spoke of this experience not long since to a non-Scientist, who said: "Oh, that was nothing. Sometimes a jumping toothache will stop suddenly, and so does neuralgia. It only happened to stop while you were reading." I said, "Yes; but that was two years ago, and I have never since had one of those headaches, to which I was very subject. How do you account for that?" "Well, that does seem singular," said my friend. "You had better keep on reading the *Sentinel*."

I have done so, and I am very thankful to testify that I have experienced many instantaneous healings during moments of sincere study. All the literature is indispensable to me, especially "Science and Health with Key to the Scriptures" by Mrs. Eddy, and I never merely read it—I study.—BELLE A. MUNDY, New York, N. Y.

It gives me great pleasure to testify to the benefits I have received from Christian Science. About two years ago I began to take a deep interest in its study, having known of some wonderful cases of healing among my friends and acquaintances. The study of the textbook, "Science and Health with Key to the Scriptures," has not only increased my interest in the Bible, but I find its teachings applicable and helpful in every phase of daily life. In December, 1907, I had been suffering for more than two weeks with severe pains and heartburn when I applied to a Christian Science practitioner for help. After taking the first treatment I was very much better, and after the second treatment I was entirely cured, so that

I have had no return of the trouble. I am in perfect health and am thoroughly satisfied that the application of the truth, as found in Christian Science, is the remedy for all ills—physical, moral, or mental.

L. S. LARSEN, Camden, N. J.

In the nine years that I have been reading the *Sentinel* and *Journal*, I have often thought that we seem to have very little appreciation of what has been done for us in Christian Science. Often in reading our periodicals the help which I would get from perhaps one article was worth more than a year's subscription. Certainly no class of people have so much to be thankful for as have Christian Scientists. They realize, though it may be in a small way, that they are beginning to know something about the only true God, and to understand what the Saviour meant when he said, "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

Through the understanding I have gained by reading "Science and Health with Key to the Scriptures" in connection with the Bible, I have seen the following cases healed in my own family of three. My husband was healed of a severe case of throat trouble in practically one treatment, with some talk and some reading from Science and Health. He had been subject to this disease for a good many years, but since being healed in Christian Science he has never had even a symptom of it. In a few treatments he was healed of chills and fever, also of night-sweats. In the case of a badly injured thumb, the physician made some rather alarming laws in regard to it; but all was overcome in a short time. For several years my son had worn glasses when at school, but the winter that I began to attend the Christian Science church and to read Science and Health, he only used his glasses part of two or three days, and in the past ten years he has not used or even needed them. In one treatment he was healed of an acute attack of bowel trouble, after suffering all day with it. A good many ailments have yielded with a few treatments, others more slowly. I would also like to tell of one demonstration which we had the first summer after we began to study Christian Science. This son was barefooted, and ran a piece of rusty wire through his heel. It was deeply imbedded in the flesh, and it seemed for a while that it could not be removed without cutting it out; but finally it came out, and in less than half an hour he went back to his play. The wound healed with very little inconvenience, considering the great amount of fear that I had always had about such things.

As for myself, the language at my command is inadequate fully to express what Christian Science has done and is doing for me. In the spring of 1864 I had an illness which seemed to settle in my lungs. My restoration to health was despaired of, but finally my health in a measure returned. The effects of the disease were still manifested, however, in headaches and lung and stomach trouble; and later other diseases developed, until it seemed as if I was sick both in mind and body. For twelve years before I knew anything about Christian Science these ills seemed to be aggravated; I took medicine and gave medicine to my boy until I was heartsick of the whole thing. Often of an evening, when I would look up into the blue sky, it seemed so calm and restful that I would say to myself, "Ah, if I could only go to sleep and never wake, it would be such a blessed relief." For three years, especially, the burden seemed more than I could bear—I do not think I had three good nights' rest in that time. A great deal more could be told, but I have said enough to show that I have much reason to be thankful for Christian Science. After I had read only a few pages in Science and Health, I thought, "Oh, why could I not have had this when I was a child; how much sorrow and suffering I might have been saved from!" When I see children starting on life's journey over the same road that I traveled, I think if their parents could only know that there is a better and safer way, the Christ-way that leads to peace and happiness, and that they could not give their children a better legacy than the practical knowledge of scientific Christianity, as taught and demonstrated by our Saviour, and revealed anew to us in our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. The understanding of this book certainly does unlock the treasures of the Bible, and so illumes its sacred pages that now we read it with loving interest and benefit.

In regard to physical healing, there is one thing for which I am most thankful, namely, the healing of a so-called malignant disease. In 1903 this disease appeared on my hand and arm. I had to ask for help, until my own thought was sufficiently uplifted and freed from fear so that I could work for myself, and it was two years before I was entirely healed. I certainly was very thankful for this added proof of God's power. I am very grateful to God, and to our dear Leader, Mrs. Eddy, for this blessed truth, and that I can demonstrate it not only in my own family, but for others also. The transforming process that has been going on, in my consciousness as well as in my body, is wonderful to me. Before I knew about Christian Science, it was mere mortal existence; now it is real living, so that in the last ten years there has been a sweet song of gladness in my heart. Not all the beliefs of the so-called mortal mind have yet been destroyed, but I rejoice because of what has been done, and I know what will be done, and that I have at last found the true way to work out my own salvation, and to work for God.

I thank God that in all this wide world there was one pure enough, one imbued with enough of the spirit of the Master to receive the glorious message of Christian Science and give it to poor humanity, struggling hopelessly with sin, sickness, suffering, and death. I want to live so as to prove my gratitude, and to give me the right to be called a loyal Christian Scientist.

MRS. JOAN M. BREWER, Parsons, Kan.

I will add my thanks to those that are given each week in the *Sentinel*. I did not come to Christian Science through my own physical healing, but through that of my child, who was cured of a very severe case of whooping-cough in one week's treatment in Christian Science. This led me to investigate its teaching, and I have seen many beautiful demonstrations since coming into this truth.

I will relate a case of mental surgery which happened to me over a year ago. I was carrying a large box of flowers, and as that morning the walk was very slippery, I fell backward, striking on this box. I felt that I was severely injured, but I declared the truth, repeating the "scientific statement of being" (Science and Health, p. 468) over and over; still the pain seemed so real that I at once took a street-car and visited a Christian Science practitioner. I had a treatment, but the pain did not cease. I, however, went to my place of business and stayed till noon, when I went home and tried to lie down and read in Science and Health; but the symptoms were very serious, and in the evening I telephoned to the practitioner that she should come and see me again, as I could not lie down or even sit up except in one position. I did not sleep any that night, and was not much better the next morning, but that day I read in Science and Health and realized that error is never real, for God is All-in-all. The next night I slept some, and in the morning I got up, dressed myself, and when the practitioner came I opened the door for her. I stayed up all day, and in the evening I went out to get shaved. The next morning I went to my place of business and worked all day.

This experience showed me that God can heal anything, no matter how serious it may seem. In the epistle to the

Digitized by Google

Hebrews we read that "the word of God is quick, and powerful, and sharper than any two-edged sword." I am very thankful to God, and to our beloved Leader, who has unfolded to us this heavenly truth that all mankind may avail themselves of its great blessings. Christian Science heals the sick and the broken-hearted. I am also grateful for the knowledge of this God-given truth, so that I can help others to find the way heavenward, for this is the command Jesus has given us.

CHRISTIAN TEXTOR, Toledo, O.

Feeling that I have been greatly benefited through the ministrations of Christian Science, I willingly add my testimony, hoping it may be an inspiration to others in need as I was, to find out for themselves that God is the "great Physician" and ever-present helper. In December, 1907, I was taken to a hospital, where I underwent a very severe operation, from which the doctors said it would take months fully to recover. Three weeks after the first operation, the doctors thought it necessary to operate again for internal trouble, as there was fear of blood-poisoning; but from this I was saved through the help of a sister who is a Christian Scientist.

Just one week later I was taken home in an ambulance, unable to sit up and with doctor's orders not to do anything for eight or ten weeks after I grew strong enough to be up. The next morning, however, I began to read Science and Health, and through doing so I was led to call for the help of a practitioner. I began to sit up the day after my first treatment, and gained steadily, even assisting in the housework. Two weeks from that time I felt equal to taking a trip to Chicago, where I visited the Christian Science churches and enjoyed myself, being quite free from my former fears; whereas, before I took up Christian Science, fear and worry kept sickness in the family almost constantly.

I am stronger and better in health than ever before, for all of which I am profoundly grateful to God, and also to our dear Leader, who has so faithfully shown us the way.

MRS. BERTHA HAWKINS, Kenosha, Wis.

Words cannot express my gratitude to God, and to Mrs. Eddy for what Christian Science has done for me since it found me, about three years ago, a physical wreck. I had what the doctors called an incurable kidney disease and gall-stones. When I took up Science treatment I was much reduced in weight, but in four months I was perfectly healed, and my present weight indicates robust health. Christian Science has brought many blessings to my home, every member of my family having been healed of some discordant condition. For all of these blessings I am very thankful.—R. H. PENTECOST, Memphis, Tenn.

When I think of the seventeen years passed in pain and intense suffering, which the doctors said was caused from female weakness and heart disease, I feel that I must tell others of my healing in Christian Science. I was told that there was no hope of my ever having a living child, as we had lost three from premature birth; and while the kindness and sympathy of the doctors were appreciated, yet not a ray of light or hope was held out to me. When finally a baby was born, it suffered as much as a child could possibly and live. My husband was then told by a friend of her having been permanently healed by Christian Science of rheumatism of long standing (while in her seventy-second year), and she begged him to have me try it, as he was constantly dwelling on my helplessness and suffering. I, however, said that I could not be helped,—that it was too late; but that, if Christian Science explained the Bible, I might get some comfort in my last hours. Thank God, I, too, have been permanently healed by Christian Science, and so has our child, who is now over ten years old.

Human language is inadequate to express my love and gratitude to our revered Leader, Mrs. Eddy, the author of "Science and Health with Key to the Scriptures."

MRS. HATTIE SHAFER, Tucumcari, N. Mex.

I have learned in Christian Science that there is but one power, the power of Truth and Love, to destroy sin, sickness, and death. This divine power, believed in and applied, enabled me years ago to lay aside glasses, after having used them for five years. My husband had worn glasses twenty-five years when the demonstration of normal vision was made. "Divine Love always has met and always will meet every human need" (Science and Health, p. 494). Mrs. Eddy tells us, and this reflection of perfect vision proved to be the supply for his human need.

Some time ago a severe accident came to me. My neck was badly twisted, and in extricating myself my spine was hurt, causing severe pain; but the truth of being was declared, and I was enabled to attend to the duty of caring for another. The pain, however, finally located in and about one eye. One Friday evening the appearance became alarming, and my suffering was intense until the following Sunday morning. I had always gone over the Lesson at the hour of service when unable to attend, but this time every effort to read was a failure. Finally I removed the bandage, tossed it aside, and vehemently declared a part of the Scriptural statement in Romans viii. 38, 39. From the study of the Bible, and by gaining light from Science and Health, the demonstration was made, and with joy I was able to "draw water out of the wells of salvation." My weakness was replaced by strength, and the damaged eye was out of thought. By Monday evening, happily, the pupil was normal, and perfect vision was mine! I can best express my gratitude for Christian Science by carefully studying the letter, imbibing the spirit (as counseled by our Leader), and in striving to demonstrate the healing power of Truth and Love.

ELEANOR BLAIR, Chicago, Ill.

It is with the greatest joy and gratitude that I add my testimony to the many others that I have read in the *Sentinel* and *Journal*. I came into Science over a year ago, for physical healing, and received so much spiritual enlightenment that it is my greatest aim in life to try to impart some to my fellow-men. The trouble was an exposed nerve after the extraction of a tooth. For weeks the pain was so intense that, after being poulticed, drugged, and examined by the president of the Sydney Dental Board, and a well-known Sydney specialist, with no result, I at last turned to Christian Science in my extremity, and gradually the difficulty was overcome.

Since then I have had many demonstrations of the ever-presence of divine Love, some of them being instantaneous. One evening, while at tea, I accidentally cut my thumb. I instantly declared the truth, that nothing could harm God's child, and went on with my tea, but when I had finished I examined the injury closely. It was still stinging, but not a drop of blood flowed. Another almost instantaneous demonstration was help given to our maid, who came to me in tears, saying that she was in great pain. I told her that I was a Christian Scientist and would help her if she liked. Upon her consenting, I set to work at once, and in a very few minutes she told me that the pain had gone.

For these blessings, for our helpful literature, especially our text-book, "Science and Health with Key to the Scriptures," and for the life of our dearly beloved Leader, I thank God, and my prayer is that I may follow humbly and faithfully in the footsteps of our Master, Christ Jesus.

GERTRUDE E. SALTER, Sydney, Australia.

FROM OUR EXCHANGES.

[*Interior.*]

Religion might have been revealed complete, fixed, final. The Bible might have been packed full of rigid legislation forestalling every human contingency. The Son sent to make known the Father might have put forth a symposium of systematic theology or an encyclopedia of canon law. But such is not the Bible we have. Its rigid commandments are but ten. Its supreme authority preaches not a science but a life—a life that grows. He does not exhaust truth; he tells learners that many things are left unspoken and promises them a Spirit to guide their further excursions into truth. That is to say, God has given to the world a religion whose great overrising landmarks are plain, sure, and immovable; whose Master will suffer no obedient soul to be lost from the mighty goal of the eternal fact; but, as the follower presses forward, pursuing that Master in faith and watching his great sentinel marks, many things are to be learned along the way. There is nothing to learn which contradicts or obscures the landmarks the traveler saw at the outset, but much appears to make the Master's purposes clearer, his insight into the affairs and nature of men more marvelous, and the opportunities of serving with him for the weal of the world more thrilling.

[*Christian World.*]

Prayer is a human experience whose test is its results upon the soul. Those results argue its relation to the truth of things. It supposes man's fellowship with a spiritual universe, his immediate contact with a supreme and holy personality, a supposition against which science, truly considered, brings no valid objection. It is a spiritual force which has wrought in the mightiest souls and in the mightiest movements. It demands as its conditions a true and sincere life. It is the source of man's purest joys. It is the function to which he must bring *his* best in order to receive *its* best. It is his heaven here, and prepares him for all the heavens that are beyond.

[*New York Observer.*]

Christianity is more than all measures, broader than all molds of thought, richer than all rituals. Many men today are preaching miniature Christianities which are but dwarfed caricatures of the splendid whole. Others are setting forth faiths that have received no baptism from on high. It is our duty and privilege to give ourselves more and more to a patient and profound investigation of the question, What is Christianity? and to a resolute effort to interpret that faith (while we theoretically master it) in terms of righteous conduct and loving ministry to our fellow-men.

[Rev. Charles W. Burrowes in *Christian Intelligencer.*]

This is what constitutes Jesus the leader of the times: not that he was ahead of his times in that day long ago, and that he then gave to men truths that were somehow preserved for the use of this more advanced and appreciative day; but that in his devotion to men of that day he led them to unfailing springs, to inexhaustible granaries, to loftiest heights; and that we men now can find no springs so sweet, no granaries so abounding, no mountains so high.

[*British Congregationalist.*]

Doubt and intellectual difficulties are the common lot. Every person who thinks at all, walks more or less in a mental twilight. But, if his heart be darkened, and he lose hold upon the revelation of God in Jesus Christ, his state is pitiable. If he try to lead other men, it is but the blind leading the blind, and both will fall ultimately into the ditch of despair.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains important changes and additions by the author, also a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS have recently been published as pocket and library editions in new bindings. Description and prices of these will be found on the outside cover page of the *Sentinel*.

EACH NEW EDITION OF THE CHURCH MANUAL containing the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., will have special notice in the *Sentinel*.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE SOCIETY.

TO SUBSCRIBERS.

Subscribers to our periodicals are requested to observe the expiration dates of their subscriptions, as given on the wrappers of the periodicals which come to them, and to renew subscriptions prior to the date there given.

The notation "Nov. X" indicates that the periodical will not continue after the last issue of November, 1910, unless subscription is renewed, and "July XI" in the same manner denotes termination with the last issue of July, 1911.

Subscribers are also requested to refer to the subscription rates given in our standing notices before sending in subscriptions.

OF INTEREST TO THE FIELD.

The Publishing Society has a limited number of volumes of the *Journal* and *Sentinel* bound in cloth, half morocco, and half calf and arranged in sets from four to nine volumes. These sets are now on sale at special prices, ranging from $9.20 to $21.00, according to the style of binding and number of books in the set.

These special prices apply only on sets of books, and in no case on single volumes. The offer presents an exceptional opportunity to Christian Scientists to obtain rare volumes for reading-rooms, libraries, and individual use. Detailed information will be furnished on request.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, should be addressed to the editor, and not to individuals.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES. Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of testimonies to spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2, six months, $1.20. Ten copies, ONE ADDRESS: each, one year, $1.90, six months, $1.15; 25 copies, each, one year, $1.80; six months, $1.10; 50 copies, each, one year, $1.60; six months, 95 cents. In all other countries additional postage, at the rate of 40 cents yearly for each subscription is required.

SALE PRICE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, 20 cents. Ten copies, ONE ADDRESS, $1.70; 25 copies, $4; 50 copies, $7. In all other countries, single copy, 25 cents. Ten copies, ONE ADDRESS, $2.10; 25 copies, $5; 50 copies, $9.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. 100 copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper. X indicates the year 1910 and XI, 1911. Subscriptions and orders should reach us two months or more before *Quarterlies* are needed for use, and should specify the size desired.

Der Herold der Christian Science

Published Monthly

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing from Germany and America, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches. Improved and enlarged for 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.
