THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. For Canada add 25 cents for postage. SALE PRICE: Single copy, 20 cents. In all other countries add 45 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every day, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.20 a year. Quantity rates will be furnished on application.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE: ITS RELIGIOUS PHILOSOPHY. By HON. CLARENCE A. BUSKIRK.

CAUSATION: VIEWED IN THE LIGHT OF CHRISTIAN SCIENCE. By FREDERICK DIXON. Also printed in Swedish.

CHRISTIAN SCIENCE VS. MENTAL SUGGESTION. By FREDERICK DIXON. Reprinted from the *Weekly Budget*, London, England.

CHRISTIAN SCIENCE: A RELIGION OF DOING. By JUDGE WILLIAM G. EWING.

CHRISTIAN SCIENCE VS. FINITE SENSE. By FRANCIS J. FLEMING, M.D.

CHRISTIAN SCIENCE: THE GOSPEL OF FREEDOM. By WILLIS F. GROSS.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. By JUDGE SEPTIMUS J. HANNA.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. By PROF. HERMANN S. HERING. Also printed in Dutch.

ANSWERS TO QUESTIONS CONCERNING CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. Also printed in Dutch, German, and Norwegian.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A London lecture. Also printed in French.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A Harvard University lecture.

CHRISTIAN SCIENCE: ITS DIVINE AUTHORITY. By BLISS KNAPP.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. By FRANK H. LEONARD.

CHRISTIAN SCIENCE: A RELIGION OF PROGRESS. By WILLIAM D. MCCRACKAN. Also printed in German and in Swedish.

CHRISTIAN SCIENCE: OR, DELIVERANCE FROM EVIL. By REV. WILLIAM P. MCKENZIE. Also printed in French and in Dutch.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. By BICKNELL YOUNG. Also printed in French, German, and Swedish.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science.

FULFILLING THE LAW.
THE DIVINE NATURE.
PRAYER AND CONFIDENCE. Printed in German only
PRAYER AND HEALING. Also printed in German.
SEEKING AND FINDING. Also printed in Dutch, German, and Swedish.
MARY BAKER EDDY: HER PURPOSE AND ACCOMPLISHMENT. By FREDERICK DIXON. Printed in German only.
THE DISCOVERER OF CHRISTIAN SCIENCE. By B. O. FLOWER. Printed in German only.
CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. By BLISS KNAPP. Printed in French only.
CHRISTIAN SCIENCE: THE COMFORTER OF PROMISE. By FRANK H. LEONARD. Printed in French only.

THE PROVIDENCE OF GOOD.
UPWARD FOOTSTEPS.

Price, POSTPAID: Single copy, 5 cents; twelve copies, ONE ADDRESS, 55 cents; fifty copies, $2; one hundred copies, $3.50. Orders for above pamphlets may be assorted as desired.

REPRINTS

(Not printed in English)

The following reprints are published in French, German, and Swedish:—

CHRISTIAN HEALING EXPLAINED.
CHRISTIANITY AND SCIENCE.
HELL AND HEAVEN.
MAN'S UNITY WITH GOD.
OUR WATCHMAN.
OVERCOMING OF EVIL.
REALITY.
SUPPLY.
THE GENIUS OF CHRISTIAN SCIENCE.
THE GOVERNMENT OF LAW.
THE MIRACLES.
THE NATURE OF EVIL.
"THERE IS A RIVER."
WHAT IS PRAYER?

The following are published in German only:—

CHURCH BUILDING IN CHRISTIAN SCIENCE.
LOVE IS LIFE.
PRACTICAL RELIGION.
THE IMPERSONAL NATURE OF EVIL.
"THE LAST ENEMY THAT SHALL BE DESTROYED."

PRICE, POSTPAID: Ten copies, 10 cents; one hundred copies, 75 cents; five hundred copies, $3; one thousand copies, $5.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483x), heavy faced, very distinct type, Turkey morocco, size, 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.

Morocco cases, to hold pocket edition of Science and Health, *Quarterly*, and above Bible, may be had at $1.25.

Text Bible. (01561x), pica square type, Alaska seal, size, 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

Our latest Catalogue containing a selected list of Bibles will be mailed free on application.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. 132 pages with index. Published in two styles of binding. Prices for paper covered editions: Single copy, prepaid, 15 cents; twelve copies to one address, $1.50; fifty copies, $5.75; one hundred copies, $10; Cloth binding: Single copy, 75 cents; by mail, 85 cents; six copies, prepaid, $4; twelve copies, prepaid, $7.50.

LIFE OF MARY BAKER EDDY (New Edition). By Sibyl Wilbur. Cloth edition: 425 pages. Cloth, single copy, prepaid, $1; six copies, $4.50; twelve copies, $8; edition *de luxe*, $5. Ten per cent discount to Reading Rooms on the *de luxe* edition.

CHRISTIAN SCIENCE AND LEGISLATION. 128 pages. Single copy, 10 cents; twelve copies, ONE ADDRESS, $1; twenty-five copies, $1.85; fifty copies, $3.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. New Edition. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated; 107 pages. Single copy, $1.50; six copies, $7; twelve copies, $12.

THE CHRISTIAN SCIENCE HYMNAL. Revised and enlarged. Cloth, single copy, $1.15; six copies, $5; twelve copies, $9. Half morocco, single copy, $1.40; six copies, $6.50; twelve copies, $12. Full morocco, single copy, $2.50. Levant, single copy, $3.50. Pocket edition, size 4 5-8 x 6 5-8. Full morocco. Single copy, $3; twelve copies, $30.

"PERSONAL CONTAGION" AND "WHAT OUR LEADER SAYS." By Mary Baker Eddy. Single copy, 10 cents; twelve copies, $1; one hundred copies, $7.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, is for sale at the following prices: 8-inch (mount 12x16), single copy, $1; six copies, $5.25, twelve copies, $9.50; 12-inch (mount 15x20), single copy, $2; six copies, $10.50; twelve copies, $19; 16-inch (mount 21x29), specially adapted for Reading Rooms, single copy, $3.50; three copies, $9.50; six copies, $18.50; twelve copies, $33.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, in Boston, Mass., and the Publishing House of The Christian Science Publishing Society. Artist's proof with remarque on Japanese vellum. Size, 18 x 24. Each, $5; on India paper without remarque, each, $2. Ten per cent discount to Reading Rooms. Smaller reproduction of the above picture. Size, 11 x 14. On Japanese vellum. Single copy, $1; six copies, $5; twelve copies, $9.50. Photogravure Post Cards, reproduction of the large picture of the Church and the Publishing House, each 5 cents; twenty-five, $1.15; one hundred, $4.25.

QUARTERLY COVERS. In black morocco. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11 a dozen. With change pocket, $1.40 each or $14 a dozen.

4.00— 0: 16 : 5 ;	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

In his message vetoing the farmers' free list bill, President Taft declares that the same reasons which impelled him to decline to sign the wool bill, controlled him in this case, and in his summary objects to it because he thinks it should not be considered until the tariff board shall make report upon the schedules it affects; because the bill is so loosely drawn as to involve the government in endless litigation and to leave the commercial community in disastrous doubt; because it places the finished product on the free list, but retains on the dutiable list the raw material and the machinery with which such finished product is made, and thus puts at a needless disadvantage our American manufacturers; that, while purporting, by putting agricultural implements, meat, and flour on the free list, to reduce their price to the consumers, it does not do so, but only gives to Canada valuable concessions which might be used by the executive to expand reciprocity with that country in accordance with the direction of Congress.

In vetoing a bill reducing tariff duties on wool, President Taft says, among other reasons, that he did so because he is pledged by his party platform to maintain protective tariff by the imposition of such duties as will equal the difference between the cost at home and abroad, together with a reasonable profit to American industries; because the tariff board is now engaged in investigating cost of production of wool and wool manufactures at home and abroad; because schedule K (wools and woolens) is the most complicated in the tariff, and while sharing the belief that the Payne schedule is too high, the President lacks data needed to fix rates at proper level; there is no public exigency requiring revision now rather than in December, and the public weal is better preserved by a delay of ninety days, in order to do justice, than now to enact a law which may seriously injure the woolen trade and business in general.

The campaign publicity bill signed by President Taft provides for complete publicity of campaign expenditures for candidates for the House and Senate before election, and limits the amount that a candidate for senator may spend to ten thousand dollars and for representative to five thousand dollars. Every promise or pledge made by one of these candidates or by any one for him must be included in his filed statement. No candidate may promise any office or place of any kind to any person to obtain his support. Candidates shall in no way contribute to or influence the election of any candidate to the Legislature. All contributions and the names of contributors shall be made public before election. The law applies to primaries as well as regular elections.

By a decision by Federal Judge Lewis the Denver & Rio Grande railroad will have to pay a large sum to the federal government for timber trespasses committed years ago, when the road was built. The government estimates the value of the timber at ten million dollars. The government filed suit in 1902, asserting that the road, with its subsidiary railroad and lumber companies, took advantage of the grant of 1872, which permitted it to cut trees from adjacent public lands for the building of its roadbed in southwestern Colorado. It accused the road of going far into the interior and even building railroads of a temporary nature in order to get to the richest timber lands.

The extraordinary session of the Sixty-second Congress adjourned Aug. 22. Among the important laws enacted were: Reciprocity with Canada, given effect by act of Congress; representatives in Congress increased to four hundred and thirty-three members and provision made for redistricting of states; publicity of campaign contributions; Arizona and New Mexico admitted to statehood, with recall of judges stricken from Arizona constitution.

It will cost one million seven hundred thousand dollars to conduct the United States military academy at West Point for the next fiscal year, according to estimates received by the war department. General Barry asks Congress' authority for new buildings at an expenditure of three million dollars to be spread over a period of five years. This is to carry out the plan of enlargement to accommodate seven hundred and fifty cadets.

President Taft advocates strongly that the original cause of the blowing up of the Maine be made known if possible and published to the world. His position was made clear when he sent to both houses of Congress a special message transmitting a letter from Secretary of War Stimson on the necessity of more funds for continuing the work on the Maine wreckage.

Lincoln Beachey, flying his Curtiss racing biplane with a sixty-horse-power motor, broke the world's official altitude record at the Chicago aviation meet, reaching a height of 11,642 feet.

A great gathering of trust magnates, labor leaders, economists, and legislators is to meet in Washington, it is reported, between now and the reconvening of Congress, to confer on the alleged economic crisis.

The estimates for the army for the next fiscal year will be in the aggregate about the same as the amount appropriated by Congress for the military establishment during the current year, $94,210,400.

Congress adjourned without ratifying the arbitration treaties negotiated with France and Great Britain. Favorable action, however, is expected when Congress assembles in December.

International.

In order to make the dock accommodation of the Thames sufficient not only for present needs, but also for the requirements of the future, the port of London authority has decided to undertake vast schemes of improvement which will practically transform the port. Improvements to be undertaken at once will include the building of a great new dock, and will involve an expenditure of nearly twenty million dollars. But these constitute only the first and most urgent branch of a much larger program.

M. Tkatchenko, chief of the forestry department of the Russian government at St. Petersburg, is in the United States visiting experimental stations at the expense of the Russian government, which believes that, although its forestry department is one hundred and eight years old, Russian foresters can learn a great deal from America. He will remain in the United States eight months and then go to Canada.

W. Morgan Shuster of Washington, D. C., authorizes the statement that he is prepared to resign his position as treasurer-general of the Persian government, as the Anglo-Russian action regarding his appointment of Maj. C. B. Stokes as head of the treasury gendarmerie has made the effective occupation of his own post impossible.

The transfer of Prince Su of China, chief of the naval department, to the board of dependencies, is taken to mean that China will attempt to develop Mongolia and Thibet, as well as Manchuria, and convert them into provinces, with the object of saving them from ultimate foreign domination.

The London county council is now considering the advisability of opposing the great five-hundred-million-dollar scheme for new roads out of London suggested in the report of the royal commission on London traffic. The scheme provides for a number of new arteries for traffic in and out of London.

"La Joconde," also called "Mona Lisa," the masterpiece of Leonardo da Vinci, has disappeared from the Salon Carre of the Louvre, where it occupied the place of honor. It is said that the British government offered five million dollars for "La Joconde" and that the offer was refused.

China has demanded officially $16,650,000 from Mexico for the damage done to the property and persons of her subjects in the late revolution.

A special commission has been appointed to inquire into questions at issue between British railway companies and employees.

It has been decided that the work of reorganizing of the Chinese navy shall be spread over a period of seven years.

Industrial and Commercial.

Large financial interests are just beginning to realize the wonderful opportunity for profitable investment in the swamp lands of Louisiana bordering the gulf coast and situated in the orange territory. One of the largest projects has in view the reclamation of fifty thousand acres of land in Clinton parish, bordering the Texas line. A syndicate with a capital of two million five hundred thousand dollars will construct a drainage system which will be one of the most extensive in the South. The main canal will empty into Black bayou, which is an arm of Calcasieu lake. The work of dredging the canal will be so far finished within the next two or three months that about five thousand acres of the land will be available for cultivation, and steps are being taken to divide it into farms and locate colonists thereon.

Immediate development of the vast mineral resources of Alaska through government ownership of all railroads, ships, and public utilities, wharves, docks, etc., and the actual mining of Alaskan coal by the government, all to be administered through a board of public works for the benefit of the people, was the broad plan outlined in a speech in the Senate, at the session of Congress just closed, by Senator La Follette.

It is announced at the offices of the Southern Pacific Railroad Company in San Francisco that six thousand men will be dropped from the pay-rolls of Harriman railroads before the end of September. The employees will be taken on again in October in the order of their seniority, if conditions warrant.

The Senate, before adjournment of Congress, concurred in the House amendment and passed the bill continuing in force until March 1, 1912, the provisions of the Burton act, regulating the use of water for power purposes at Niagara Falls.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

GIVING AND RECEIVING.

W. D. MC CRACKAN, M.A.

On a recent ocean voyage the question presented itself of how best to give to the seamen's fund. It is customary on all ocean liners to give an entertainment of some sort toward the end of the voyage, generally a concert, and to take up a collection for the support of seamen's homes and the families of disabled seamen. There has at times arisen a certain rivalry between the bigger ships to see which could contribute the most toward this fund, and occasionally more attention has been paid to ingenious ways of making people give than to the spirit in which the giving was done.

It occurred to the writer of this article to make the giving toward this fund repose upon his understanding of Christian Science, and on reflection many helpful thoughts came from this right desire. The donation toward the fund, what did it really represent? Evidently gratitude for service received. In this gratitude was included the captain, whose loyal vigilance made for safety, as well as all the other officers of the ship who watched day and night over the ship's course and marked her position on the trackless sea. In this gratitude were also embraced the willing stewards who contributed to the comfort of all the passengers, in fair weather or foul, in times of good or evil report. Whoever worked for the good of the ship in any way was worthy of receiving gratitude, whether it was the sailor on deck, the cook in the galley, or the stoker in the engine-room.

The writer then recalled that gratitude was a spiritual or mental concept; that safety and comfort are dependent upon our recognition of certain qualities of the divine Mind, which insure our safeguarding at all times, so that the whole matter of giving and receiving in connection with the seamen's fund resolved itself into an exchange of mental concepts, into the expression of divine characteristics on the part of giver and recipient, supply coming forward to meet the demands of either side, all in reality working together in a fraternity which was none the less true because all on board the vessel were not yet fully aware of the fact of God's ever-presence and all-power, or of the deep significance of human brotherhood.

Mrs. Eddy tells us in answer to the question, "What is substance?" (Science and Health, p. 468): "Substance is that which is eternal and incapable of discord and decay. Truth, Life, and Love are substance, as the Scriptures use this word in Hebrews: 'The substance of things hoped for, the evidence of things not seen.'" In so far, then, as the Christian Scientist goes about his daily affairs expressing in his life divine Truth, Life, and Love, he is helping mankind to establish the eternal facts of being, to transform human consciousness, and to substitute a spiritual for a false material basis in all things. He is hastening that process of spiritualizing the world's thought which is evident on all hands, thus laying bare the fact that "man is not material; he is spiritual" (*Ibid.*, p. 468).

An inspiring picture of helpful activity rises before the Christian Scientist who grasps the true idea of substance. With this true idea, as with a lever, he can lift every legitimate transaction from matter into mind, divest every business enterprise of its sordidness, purify every art expression of possible pride or ignoble trickery, and present every faculty, every activity, ability, or talent "holy, acceptable unto God." Equally beneficial in human affairs is the right idea of receiving. To receive worthily is often more difficult than to give. The art of receiving must be learned, no less than the art of giving, by those who desire to make life a well-rounded expression of divine activities. To receive humbly and without greed, without self-consciousness or self-importance, means to apply correctly the Science of substance.

Such scientific receiving, like true giving, must repose upon the spiritual understanding of God as the infinite source of supply. Personal sense will not spoil our mental attitude in receiving when we recognize God as the origin of all that really is. There will be no pride to be hurt, no fear of personal obligation, no apprehension of not being able to pay back, when we realize God's bounty as inexhaustible and unlimited and equally accessible to all.

THE CLOSED HAND.

LOUISE KNIGHT WHEATLEY.

In an article recently published in the *Sentinel*, there appeared this sentence: "The closed hand cannot receive." The simple statement, almost epigrammatic in its terseness, lingered in the memory of at least one reader, and said itself over and over in her heart as she went about her daily work. "The closed hand cannot receive." And why not? She had only to hold out her own hand, tightly closed, to understand. Some one might have been offering her the price of a king's ransom, and yet so long as those fingers maintained their rigid clasp she could not have received it. Let her open her hand, however, and hold it out, palm upward, as in the act of giving, and that very change of attitude, simple though it was, placed her at once in a position to receive.

As she pondered these things a picture which hangs in a certain dearly-loved reading-room flashed into her memory. It represents a group of persons standing on a lawn listening to a woman who has evidently stepped out upon a low balcony to address them. The woman is Mrs. Eddy. She stands looking out upon that sea of upturned faces, a slender figure silhouetted against the sky, the face in shadow, but what a world of eloquence there is in those outstretched hands! And the palms are upturned. Giving, giving, always giving,—and since the days of Jesus of Nazareth no one has ever received in such abundance. Yet is it not only in accord with an immutable law that she who gave so much should receive in like manner? Jesus himself said, "With what measure ye mete, it shall be measured to you again."

Does the storehouse sometimes seem strangely empty, O troubled heart? Do we sometimes find ourselves think-

Digitized by Google

ing that Christian Science is not doing as much for us as it should; that we are not getting as much out of it as we ought, and wonder why we do not receive more? Before becoming unduly disturbed over this, suppose we try the experiment of taking an entirely different point of view. Instead of asking, "What is Christian Science doing for me?" suppose we ask ourselves, "What am I doing for Christian Science?" Instead of saying, "I am not getting as much as I ought," suppose we say, "Am I giving as much as I can?" Instead of saying, "I wonder why I do not receive more?" suppose we say, "Am I making the most of what I have?"

Why should we concern ourselves as to how much we are receiving? That is God's part, and His work is already done. Divine Love is always saying, as did the father in the parable, "Son, thou art ever with me, and all that I have is thine." Since Principle and its idea are inseparable in Science, man already has all, for man is God's reflection. The ring and the best robe have always belonged to the son, but he can use and enjoy them only as he turns to the Father, the divine Principle of his being, from whom all good proceeds. And, by the same process of reasoning, if we, today, would receive all that "the Father hath bestowed upon us," we should ask ourselves whether or not we are making the absolute best of that good of which we are already in conscious possession. If we are honestly doing this, and giving to others as it hath been given unto us, fully, freely, out of the abundance of a grateful heart, and with no thought of recompense or reward, the clear, strong currents of a still higher understanding will flow into our lives in accordance with a law of divine reciprocity.

When Saul of Tarsus first saw the light of Truth, he did not stop to inquire what all this was to bring him, nor what return he might expect for work in the Master's service. He simply fell on his knees and cried out, "Lord, what wilt thou have me to do?" And a Christian Scientist who carries this prayer in his heart each day will find, when the evening shadows fall, that opportunities to give and to bless have come to him far beyond his fondest hopes. For it is the prayer of divine activity, which must ever find its answer. It is the prayer which longs to give, not one which murmurs because it does not receive. It is the prayer which asks to be shown the Father's will, not one which desires to carry out its own. It is the prayer of the righteous which "availeth much."

Self-examination is not always an agreeable occupation, nor is it the one best fitted to send us up in our own esteem, for when we dig deeply into the depths of human consciousness we sometimes bring to the surface thoughts which do not look very pretty when viewed in the honest light of day. It is, nevertheless, a purifying process which none of us can afford to neglect, for nine times out of ten when things go wrong, we have only to look within to locate the trouble. Do we feel, for instance, that we receive but scant measure of love from those around us? Let us look within and find how much love we are giving. "But," we complain, "certain people do not even seem to like us." Do we like them? "If ye love them which love you," said the Master, "what reward have ye? do not even the publicans the same?"

Perhaps we feel that we have been unjustly treated. What about our treatment of others? Has it invariably been characterized by a gentle charity, "broad enough to cover the whole world's evil, and sweet enough to neutralize what is bitter in it" (Miscellaneous Writings, p. 224)? Possibly our best efforts are often unappreciated. What of other people's best efforts? Have we always given to them the cordial "Well done!" which we ourselves have failed to hear? Many of us feel that we are frequently misunderstood. Do we always understand others? Those who happen to differ from us may yet be quite as sincere and honest in their convictions as even we ourselves; but it takes a nature rarely great to remember this. Do we hear our mistakes criticized? Before resenting this, we might profitably look back into the past and see if we can remember ever having become a self-appointed judge in Israel. Are our faults magnified and commented upon? What of other people's faults? Have we always maintained toward them the same loving silence which we would be glad to receive in return?

Truly it is "with what measure ye mete," dear fellow-worker in the bonds of Christ. Then let each begin this day, this hour, to do something for somebody; and if the suggestion comes that one is so situated that he cannot do anything for anybody, let him talk straight back to the lying argument and send it where it belongs. No one is so poor that he cannot do something, if it is only to turn over with his foot the beetle which is struggling on its back in a garden path. It is not always money which this sad world needs. In fact, could statistics of this kind be taken, they would probably show that more people starve annually for want of love than for want of food. There may be those within sound of our voice today to whom a word of encouragement would be worth more than all the money in the world. Indeed, circumstances sometimes arise when it requires more of the real Christ-spirit to hold out a hand to a friend who stands alone and misunderstood, perhaps even for the moment disgraced in the eyes of the world, than to build a church whose spires shall reach the very heavens.

When the hungry multitude lacked bread, Jesus fed them in the wilderness, "about five thousand men, beside women and children," but when Mary sat at his feet to learn more of Christ, Truth, he said she had chosen the one thing needful. Thus was he ever ready to give according as the human sense of need presented itself. He did not tell the starving multitude that "man shall not live by bread alone," nor did he give to Mary of the loaves and the fishes. Can we pray too earnestly for a similar discernment, for that intelligent, wisely expressed love which is ever reaching out toward humanity in tenderest compassion, ever ready to bless, to comfort, to heal?

There was once a poor widow whom Elijah found, in time of famine, gathering sticks. When he asked her to fetch him a little water and a bit of bread, she explained that she had only a handful of meal and a little oil in a cruse. "And, behold, I am gathering two sticks, that I may go in and dress it for me and my son, that we may eat it, and die." The same old lying argument—"too poor to give!" But what said the man of God? Did he come down under the same mesmerism, accept her point of view, and hastily take himself off in search of some one whose opportunities were obviously less limited? Not at all. On the contrary, he saw the mental attitude of the speaker, saw the closed hand holding fast to fear, doubt, self-interest, and lack of faith in God's infinite bounty. He saw that, so far as she was concerned, the sense of famine was nowhere so great as in her own thought, and he helped her heal it in the only way which at that moment would have done the work. "Fear not," he said, "go and do as thou hast said: but make me thereof a little cake first." Open the closed hand. Those stiff, cramped fingers have been shut too long. Let go of all that makes for limitation. Stop doubting God and begin to supply a brother's need out of that good of which you are already in conscious possession. The woman did as she was told, and the upturned open hand received the blessing, for we are told that "she, and he, and her house, did eat many days. And the barrel of meal wasted not, neither did the cruse of oil fail."

Elijah is not here today, but God is. The same Principle which was operative then is with us now, for God is "the same yesterday, and to day, and for ever." Then

Digitized by Google

let us act as if we believed this. Let us give what we have, and give it gladly. If some beautiful new thought has unfolded to our consciousness, to shine like a star upon our ascending path, let us remember it is only as we pass on to others the blessing it has brought, that we may really make it our own. That which we gained yesterday, and give today, fits us to receive in yet greater measure tomorrow. The only man who receives nothing is the man who stands still, tightly clutching that which he has for fear of losing it.

Then let us open the closed hand. Open it wide. It should be joy enough for any one of us "to sow by the wayside for the way-weary, and trust Love's recompense of love" (No and Yes, p. 3). That recompense is sure, but it often comes more quickly when we stop looking for it. Let us be willing to leave that part of it—the what and the when and the where—to God; and just go quietly on, forgetting self in blessing others, and leaving the future to make manifest that which is already growing clearer to us each day, each hour, that we cannot lose by giving.

DOUBT DISPLACED.

JOHN GRAY.

At the time when the rulers were accusing Christ Jesus of unlawful practices, and scheming to put him out of the way, John the Baptist, who had been cast into prison by Herod, heard of the wonderful works wrought by Jesus and which had so roused the wrath and jealousy of the rulers, and he sent messengers to inquire of Jesus if he were really the Messiah, or whether they should look for another. John must have known Jesus to be just what he had proclaimed him. He needed no new evidence of the true mission of the Saviour, nor that this man whom they were accusing was the Wayshower, for he himself had heralded his coming and proclaimed him as the Messiah who should come; but fear, and the dread of what might happen, caused him for the moment to forget that Jesus had said, "Suffer it to be so now," when John baptized him. Jesus did not question John's sincerity, but simply told the messengers to go and tell John again of the works already done,—how that the lame walked, the blind could see, and the dead were restored to life.

History repeats itself. Today some Christian Scientists seem to doubt the very resurrection of themselves from the same conditions which prevailed at the time of John, and although they know they have been healed,—raised, when they were dead in trespasses and sins,—they fear to testify of the Saviour, and they constantly need the reminder of Christ Jesus to "go and tell." It is well that those who have just experienced the new birth should not be too hasty in proclaiming their blessings to the world; they are wise to obey the other injunction, "Go, and tell no man," till they better understand the cause of this awakening. But not so with those who have tested Christian Science. The Christian Scientist who has proven, who has the witness within himself, and who, time and again, has tasted that "the Lord is good," has a duty to perform. If he is a constant attendant at the local church, he should remember his blessings, and be ready to tell the visiting brother of the healing power of Christian Science in his own extremity, and make glad the heart of this brother as well as other seekers for the light, for the "seekers of the light are one."

The visiting brother has also a duty to perform; he has a message to deliver, a story to tell,—one which may be just what some suffering heart is hungering to hear, and his brothers in the local church are always anxious to confirm their own experiences by the message he has to give. It is only fear that holds the Scientist in bondage. The promise is, "Open thy mouth wide, and I will fill it." It is not only a duty to tell in the Wednesday evening meeting the many blessings obtained through Christian Science, it is a privilege, a privilege that those who have not known of this healing power do not possess; and it is not ours to know who needs the message we are holding back because of doubt. It is our duty to give the message and to know that our bread cast upon the waters will return, not void, but bearing fruit.

The Mother Church Manual, Article VIII, Section 24, says: "Testimony in regard to the healing of the sick is highly important. More than a mere rehearsal of blessings, it scales the pinnacle of praise and illustrates the demonstration of Christ, 'who healeth all thy diseases.'"

A GOLDEN KEY.

ELLEN C. H. PARSONS.

We often hear it said by Christian Scientists that they never really appreciated the Bible until they began to understand Christian Science. In my family our parents brought us up to know the Bible well, but I never truly understood it until I became interested in Christian Science. Reading has always been a great pleasure to me, but now the reading of all other books fades into mere shadowland of interest beside the study of the Bible with the light which Mrs. Eddy's wonderful book, "Science and Health with Key to the Scriptures," brings to this study. The teaching of Science and Health is like the sunrise on a fine autumn morning, when the blue sky is faintly flecked with clouds on the horizon, and the rising of the sun fills the watcher with deep and ever growing wonder and admiration. As the increasing light and warmth bring an increasing sense of happiness, so the light of Truth which comes with the growing understanding of this book brings ever increasing happiness into our lives. It is indeed a golden key, and with this key we may have many golden hours with our Bibles.

I love to take a chapter of the Bible and find for myself the correlative passages from Science and Health which throw new light upon each verse and give to it a fuller meaning. What a wealth of spiritual food we get, and we can never have too much. With what courage we go forth to meet "the trivial round, the common task." Perhaps we are seated quietly in charge of the Christian Science reading-room, and an inquirer comes in, longing for the help that we are there to give; or perhaps some learned theologian comes with arguments to oppose. Of ourselves we know we can do nothing, of ourselves we know nothing, but with the Concordance to Science and Health beside us, we are ready to answer any question with most wonderful and enlightening replies. We grow in understanding as we give our answers with the help of this wonderful book. We simply become a channel through which the truth flows. The key has unlocked the door, and we are just handing out the gifts from the treasure-house within.

A Bible chapter which is very dear to me is the fourth of Ephesians, but it is only one of the many beautiful and helpful chapters of the Bible. In the light of Christian Science how it glows, and what spiritual strength it gives! I found for the first verse some interesting passages from Science and Health, and as the chapter advanced the interest deepened and grew. When I reached the seventh verse I did not at first see very much in it, and left it, also the following three verses, which I found difficult to understand, intending to work them out later; but when reading on page 98 of our text-book I came across a passage which seemed a wonderful interpretation to the first of these verses. For what is "the gift of Christ"? And who shall receive it? The Master promised that all his faithful followers should receive the Holy Ghost, the Comforter. He also promised that all should do the works that he did, and the gift of Christ is surely the power to do these works. And to whom

Digitized by Google

shall the power be given? Is it not to those only who follow the Master's example and obey his commands?

Jesus told us that the reward given by the men of this world to those who followed his teachings and obeyed his commands was persecution, but he comforts his followers in all ages by this assurance, "Blessed are ye, when men shall revile you, and persecute you, . . . for my sake." And Mrs. Eddy gives fuller meaning to this verse when she says that "the spiritual recompense of the persecuted is assured in the elevation of existence above mortal discord and in the gift of divine Love" (*Ibid.*, p. 98). Who could fear the persecution when the gift is so great and glorious? Then Paul's words come flashing into thought: "Persecuted, but not forsaken; cast down, but not destroyed; . . . For our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory."

Again our Leader carries forward the same thought on page 574, when she says, "The very circumstance, which your suffering sense deems wrathful and afflictive, Love can make an angel entertained unawares." Then she goes on to tell us of what Paul calls the "exceeding and eternal weight of glory," and which is described by St. John in Revelation, when he writes of the city that lieth foursquare. St. John's vision becomes far more glorious and clear to us with the light which Christian Science throws upon it. After reading it we are filled with a wondrous sense of peace and power, for we are assured that "in divine Science, man possesses this recognition of harmony consciously in proportion to his understanding of God" (p. 576).

What a glorious thought, that this golden key is available to all men! What strong, pure thoughts are ours when we take the Bible and open it with this key. Shall we not follow Paul's advice and "pray without ceasing," also "rejoice evermore," and "in every thing give thanks"? We need to have thankful hearts toward the one who in our time braved so much persecution that we might have this "Key to the Scriptures." We can only return thanks by being loyal, steadfast Christian Scientists, by demonstrating what we understand. Our text-book gives us the understanding wherewith to heal the sick and sinning, which is surely the same as the key given to the apostle Peter, a veritable key to the kingdom of heaven. It was this key that gave him the power to heal and to bind the material beliefs of sin, sickness, and death. These false beliefs cannot appear in heaven, for they have no place there, but dwell in outer darkness. These material beliefs are not God-made and are therefore unreal. We have power to bind them here on earth, and thus to destroy their asserted power. The golden key opens the gates of heaven, and the light shining forth reveals the beautiful things of God, and as these are let loose on earth they minister to the happiness of men,—these glories of God which form the substance of heavenly things. This gift of Christ, this golden key, was given to him who understood that the real man is the "Son of the living God."

THE TRUE VINE.

BERT A. MILLER.

In conversation with others recently, on the advisability and necessity of all loyal and active members of branch churches becoming members of The Mother Church, in order to receive the full privileges of membership with the "vine" over which our revered Leader has held such loving and careful supervision, the following from the fifteenth chapter of John impressed me very forcibly: "Abide in me, and I in you. As the branch cannot bear fruit of itself, except it abide in the vine; no more can ye, except ye abide in me. I am the vine, ye are the branches: He that abideth in me, and I in him, the same bringeth forth much fruit: for without me ye can do nothing."

We can all plainly see, if we stop to analyze the situation, that no branch church, or its members, can prosper and progress as they should without realizing the full import of the meaning and object for which The Mother Church was established or founded. In the "Historical Sketch," found in our Church Manual (p. 17), we read that it was "to organize a church designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing." Mrs. Eddy further defines church, for the benefit of her followers, in Science and Health (p. 583), as "that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick."

Careful study of the above from the Manual and the Christian Science text-book by members of branch churches ought to arouse within them the realization that it is not only a duty but a privilege to associate themselves in full membership with the greatest religious movement which is before the world today, and in which all should delight to participate actively. To be a member of a Christian Science church at this period means much, and we should not allow ourselves to be mesmerized into a state of idleness, apathy, or self-ease as to our obligations. Merely to attend the services in order to absorb all the good we can, without giving anything in return, or remaining away from the business meetings and allowing others to do our work for us, it being easier thus to do, is not true membership. We should, on the contrary, be about our "Father's business," and imbibe the spirit expressed in one of our beautiful hymns,—

Not forever in green pastures
Do we ask our way to be;
But the steep and rugged pathway
May we tread rejoicingly.

When we realize that there are unnumbered thousands of our fellow-men today who have eyes yet see not, and who have ears yet hear not,—so far as things spiritual are concerned,—we who have been awakened out of this false dream and have turned our faces toward the light should not allow an opportunity to pass in which we can aid some one of Christ's little ones to get a glimpse of that light which never loses its effulgence, but lighteth every man that cometh into the world. One of the greatest avenues available today to reach the vast multitude who are hungering and thirsting after good, is to be found in passing along the Christian Science literature, especially the *Monitor*, and making friends of all classes who desire clean journalism and pure and wholesome thinking.

FINE PHOTOGRAVURE OF MRS. EDDY.

The Publishing Society now has on sale a fine photogravure of Mrs. Eddy which will be valued as an excellent likeness of the Discoverer and Founder of Christian Science. The picture from which this photogravure was made had the approval of Mrs. Eddy as being to her the most satisfactory of recent years.

The photogravure is printed in three sizes on India paper and mounted on heavy plate paper ready for framing, and is for sale at the following prices: 8-inch picture (mount 12x16), single copy $1; six copies $5.25; twelve copies, $9.50. 12-inch picture (mount 15x20), single copy $2; six copies $10.50; twelve copies $19. 16-inch picture (mount 21x29), specially adapted for reading-rooms, single copy $3.50; three copies $9.50; six copies $18.50; twelve copies $33.50.

Address all orders for these pictures to The Christian Science Publishing Society, Falmouth and St. Paul Sts., Boston, Mass.

SELECTED ARTICLES.

[Frederick Dixon in *Islington* (Eng.) *Gazette.*]

The religious body to which our clerical critic belongs has had every opportunity of giving the people a religion capable of appealing more strongly to their spiritual needs, and open to a higher degree of proof than Christian Science. When he and his supporters are able to offer this, they will have little to fear from Christian Science; until they can do this, their denunciation will, it is to be suspected, be but so many words. It is easy to call Christian Science superstition, and London the throne of Satan. As a matter of fact the expression, the throne of Satan, was originally used of a city dedicated largely to the worship of Æsculapius, so it is possible that the doctor merely meant that London is doctor-ridden.

If it is a sign of superstition to ask for proofs of the theological premises offered to you, Christian Science might be described as superstitious. At the same time the Christian religion is in a similar way superstitious. Jesus declared that those who believed in him would be able to do his works, and so made those works the test of the reality of Christian conduct. When our critic supports his faith in the way demanded by Jesus, he will be in no need of using opprobrious terms in which to describe those who differ from him.

[John M. Dean in *Memphis* (Tenn.) *Commercial.*]

A large percentage of the membership of the Christian Science church were formerly consistent working members in the various orthodox churches, and it is a fair assumption to say that if these churches had ministered to the needs of these people they would not have become afflicted with a "waning faith" which would lead them into the acceptance of what the good doctor is pleased to term a "half-truth." So-called orthodoxy offers only one half of the healing gospel of Jesus—the healing of sin—while Christian Science comes with the "undivided garment" and offers full salvation from both sickness and sin. Whenever Jesus said "preach" he also said "heal," and if our friend will inform us when and by whom the latter command was abrogated, we will acknowledge our error and cease our efforts to obey it. Until he can do this he had best study these commands carefully and prayerfully, and perhaps he will thereby find the reason for the empty churches of which he complains.

Neither "telepathic amusement" nor "occult experiment" enter into the teaching or practice of Christian Science, as the gentleman would know if he had even half carefully read Mrs. Eddy's book, Science and Health; and if he has not done this he is obviously disqualified as a critic. In either event, the testimony of good citizens who have an intimate acquaintance with Christian Science should outweigh the unsupported word of an unfriendly critic, however honest.

The charge that Christian Science "eliminates self-abnegation" is something new under the sun, for its followers put a literal interpretation upon the injunction of the Master when he said that he who would "come after" him must "deny himself." They put particular emphasis on the word "self," which certainly means far more than a perfunctory abstinence from worldly comforts or pleasures. They recognize self as their greatest enemy and are, in varying degree, striving to overcome this enemy.

We would hardly go as far as our friend when he says "a religion which could not stop the toothache in the body would not answer to relieve a psychic ache of the human conscience," for in saying this he brings a wholesale indictment against the entire orthodox church. The Christian Scientist who trusts God to heal his aches and pains may sometimes temporarily fail to demonstrate his faith, just as might a Methodist who trusts God for the healing of his sins. It should also be borne in mind that all churches have members who fail to live up to their religious teachings. In any event, we submit that it is far better to make a conscientious effort to follow the Master all the way than to refuse to take the step yourself and ridicule those who try. Even the apostles were not always successful, as is shown in the case of the demoniac boy of whose case Jesus said, "This kind goeth not out but by prayer and fasting." However, this one failure neither lessened their faith nor deterred them from healing others, and the failure of some Christian Scientists to effect an immediate cure of the toothache is an infinitesimal item when compared with the thousands of cures of organic disease wrought by Christian Science. A little more searching of failings in one's own religious home and a little more squaring of preaching and practice, would deter many a critic from taking an unkind fling at his neighbor.

[E. M. Ramsay in *Dundee* (Scot.) *Telegraph.*]

With all other Christian churches, Christian Science teaches that God is the only creator, absolute good, infinite, omnipotent, and eternal. It teaches that infinite, omnipotent, eternal, absolute good includes no evil power and leaves place for none; that evil, therefore, is not real in the absolute sense of the word, but a "deceiver," "a liar, and the father of it." It will at once be seen that this strikes at the very root of witchcraft, or belief in an evil power. Further, Christian Science declares that, since God is infinite and intelligent, He must be infinite intelligence, the only intelligence, the one Mind, and that all true intelligence manifested in the universe can but be the reflection or expression of the one and only Mind. This again destroys all belief in witchcraft or the domination of one personal sense over another.

Further, Christian Science shows that there is no supernatural, since the creator cannot be supernatural to His own children, to His own creation, and since there is nothing which He did not create. While no student of Christian Science has yet attained to the full understanding of the truth, he believes much less in evil than he did before; he is daily striving to cast out of his thought that which is abnormal and unlike the divine; he is beginning to perceive that the activity of divine Love is forever at hand, is forever available; that it is natural for man to be healthy, happy, and good, unnatural for him to be sick or sinful.

[James D. Sherwood in *Beaumont* (Tex.) *Enterprise.*]

There is no gainsaying the fact that sin claims to exert an influence over mortals. There is no denial of the fact that disease and death, as they appear to mortals, are common experiences among the children of men; but they are not the work of God. God is infinite good. God is the only cause and creator, whose omnipresence fills immensity. The infinity of good leaves no room for evil of any kind. Christian Science proves the unreality of disease by healing it. It proves the nothingness of sin by destroying it. Every clergyman believes sin can be overcome through repentance and reformation; and that is just what Christian Science teaches. When sin is destroyed it ceases to have manifestation in corporeal sensation; and when one is healed in Christian Science he is better morally as well as physically, because the process is good, annulling the claims of evil, and giving an improved sense of God and His universe. When all sin is destroyed the wages of sin will cease and death will be obsolete. The insubstantiality of death is evidenced by the statement, "The last enemy that shall be destroyed is death."

If one magnifies to his consciousness a sense of sin, and practises what he believes, sin will seem real, and he will lose the sense of good as ever present, and darkness will becloud his thought, thus proving of man that "as he thinketh in his heart, so is he." How much better it is to make good real, to hold in thought the consciousness of

Digitized by Google

God's allness, and that man in God's image is like God. As Paul said, "Know ye not, that to whom ye yield yourselves servants to obey, his servants ye are to whom ye obey, whether of sin unto death, or of obedience unto righteousness?" Christ Jesus said, "Be ye therefore perfect, even as your Father which is in heaven is perfect."

[George A. Law in *Bridgeport* (Conn.) *Post.*]

Christian Science does not teach that sin, sickness, and death are not a part of the experience of this mortal existence, and no one knows better than a Christian Scientist how real pain and suffering seem to the one afflicted. As most Christian Scientists have been healed of such conditions and restored to health and wholeness, they know whereof they speak. The teaching of Christian Science is that sin, disease, and death do not emanate from God, are not in the divine order of things, and are therefore to be contended with and gotten rid of. Thus they are not permanent, immortal, as are the things of God. God's creation, but are fleeting, temporal, abnormal; and it is in this sense that in Christian Science they are regarded as unreal. Paul says, "Therefore seeing we have this ministry, as we have received mercy, we faint not;" "While we look not at the things which are seen, but at the things which are not seen; for the things which are seen are temporal, but the things which are not seen are eternal."

If sin, sickness, and death were of God's creating, they would exist under the intense spiritual law. Then it would be impossible to destroy or eliminate them and men would face a condition impossible to cope with. Indeed Jesus' own works of healing would not have been possible of accomplishment. But Jesus taught how to obtain freedom from these disturbers of the God-given peace and happiness of man. He declared death an enemy to be overcome, the last enemy to be overcome, as Paul puts it. And Jesus overcame death, thus proving it unreal to be immortal, the image and likeness of God which is supreme over all things.

Mrs. Eddy has never claimed that the sage would witness the demonstration over death according to Jesus' words, but Mrs. Eddy says, "Be sure that you and I do not enter this dark shadow of mortal sense ourselves, but to assist what we have not reached." Her work in Science never [illegible] sense of life's [illegible]

[William S. Campbell in *Washington* (D.C.) *Post.*]

The special report on religious bodies compiled by the bureau of the census, gives the number of church-members in the United States as thirty-three millions in round numbers. Each one of these persons professedly believes in God. If each were to be asked to give a definition of God, a large majority would undoubtedly agree that God is a person and an inflexible and righteous judge. They would also admit that Jesus has thrown more light on the character and nature of God than has any other teacher.

Nothing can be more important than to know, if it be possible, what God is, and what are His nature and attributes. It is admitted that the Galilean Prophet had a singularly clear insight into spiritual realities, and that he spoke "as one having authority." A study of his statements about God shows them to be at variance with the belief that God is a person. On one occasion he said, "Believe me that I am in the Father, and the Father in me." Still more at variance with the popular concept is his statement, "At that day ye shall know that I am in my Father, and ye in me, and I in you."

These seemingly extravagant statements become reasonable if we take the Master's own definition for God. It is given accurately in the Revised Version, "God is Spirit." He further stated that God is life, and his favorite student, the "beloved disciple," summarized what he had learned from the great Teacher in the definition, "God is love; and he that dwelleth in love dwelleth in God, and God in him." That the concept of God as a person was not the concept of the early church may be assumed from a statement made by Paul, the foremost church organizer of that day. In unequivocal terms he stated, "In him we live, and move, and have our being." The unreasonable assumption that the omnipresent and omnipotent creator is a person is a heritage of the Christian church from the dark ages. So close's has the pall of that period overhung the succeeding centuries that when, in our time, Mrs. Eddy proclaimed the true definition, that God is Spirit; God is Life; God is Love, it was like the voice of one crying in the wilderness—the wilderness of doctrinal beliefs.

With such explicit definitions as have confronted Bible students, it is passing strange that such an erroneous conception of deity should have so long held sway, and stranger still that the world should have been so slow to accept the Christian Science interpretation. Were there anything recondite in the interpretation there might be reason for misunderstanding of the Master's definitions, and some reason for a different concept. But what can be more satisfying than the assurance that God, as Spirit, fills all space; that as Life He is the animating Power of all being; that as Love He can be seen even in the humblest of His creatures; that God is the Supreme, and that all goodness comes from

Digitized by Google

much more shall your Father which is in heaven give good *things* to them that ask him?" He referred to the sparrows, the ravens, and the lilies, in proof of a God who is good, and then questioned, "Are ye not much better than they?"

On page 140 of the Christian Science text-book appears this statement: "The Jewish tribal Jehovah was a man-projected God, liable to wrath, repentance, and human changeableness. The Christian Science God is universal, eternal, divine Love, which changeth not and causeth no evil, disease, nor death. It is indeed mournfully true that the older Scripture is reversed. In the beginning God created man in His, God's, image; but mortals would procreate man, and make God in their own human image. What is the god of a mortal, but a mortal magnified?"

This reasonable and satisfying idea of God propounded by Mrs. Eddy is the basis of the Christian Science doctrine. It appeals to the sober sense of mankind, and is meeting the needs of all classes—Jew, Christian, and infidel.

[Olcott Haskell in *Freedom*, San Francisco, Cal.]

To say that Christian Science enables one to succeed and be comfortable while yet pursuing a wrong course, is the very opposite of the truth. If one is dishonest in business or in any way, to that extent he shuts himself out from the healing influence of Christian Science. On page 453 of "Science and Health with Key to the Scriptures," Mrs. Eddy says: "Honesty is spiritual power. Dishonesty is human weakness, which forfeits divine help." And on page 446 we read: "A wrong motive involves defeat. In the Science of Mind-healing, it is imperative to be honest, for victory rests on the side of immutable right."

It is coming to be recognized in business circles that those who study Christian Science are thereby quickened into a higher sense of business honesty and fair dealing. No one can hope to be healed who is not willing to reform his life and to endeavor to correct all wrong thinking and doing. One of the great blessings which Christian Science is bringing to humanity is the raising of the standard of business morals.

"Healthy" and "holy" are derived from the same word, and these qualities in man cannot be separated. Mrs. Eddy says (Science and Health, p. 404): "Healing the sick and reforming the sinner are one and the same thing in Christian Science." Many a man has been lifted out of failure and poverty by learning in Christian Science that power belongs, not to trickery or dishonesty, but to good, to honesty and justice. "The burdens of the working men" were known to Jesus of Nazareth, and he said: "Come unto me, all ye that labor and are heavy laden, and I will give you rest." Christian Science appeals to all classes and conditions of men, and will ultimately save mankind from the injustice which our critic deplores.

[John L. Rendall in *Ottumwa* (Ia.) *Courier*.]

The abstract statement that "Christian Science opposes the Bible by denying the reality of matter" is one impossible of proof. The denial of matter as reality does not constitute opposition to the teachings of Scripture, neither does the denial of matter include the denial of the perfect spiritual creation, which Christian Scientists understand to be the real and eternal.

Many natural scientists define matter as simply "the externalized manifestation of human thought." As Mr. Huxley writes, "After all, what do we know of this terrible matter, except as the name for the unknown hypothetical cause of states of our own consciousness." Christian Science does not teach, "We can think our disease away by thinking our body away," but with St. Paul it teaches that the necessity is to put off the old man with his deeds and put on the new man, "which after God is created in righteousness and true holiness." And again it is stated, "Flesh and blood cannot inherit the kingdom of God." It is certainly very plain that the Bible teaches the possibility of overcoming the discords and diseases of the flesh through holy, uplifting thought. Therefore, "Be ye transformed by the renewing of your mind."

Jesus and his disciples preached and practised this healing and saving ministry, which is therefore fundamental Christianity. For any one to attempt from a Scriptural standpoint to condemn those who are endeavoring earnestly, intelligently, and consistently to follow the precepts and example of our Master, is inconsistent and inexcusable. It is plainly taught in Christian Science that to the human sense of things, and to that sense only, sin, sickness, and death are real, while to a diviner sense of things, or the sense entertained by Christ Jesus, they become unreal in the scientific apprehension of what reality includes. The best way to overcome sickness, sin, and death is clearly pointed out in Scripture, and this overcoming includes their complete destruction. No one can overcome sin and sickness simply by "believing there is none," but it can be accomplished by knowing what is real and true in the way established by Christ Jesus.

The statement that "Christian Science is pantheism, because it denies the personality of God," is incorrect in premise and conclusion. In the first place, Christian Science does not deny the personality of God, but it teaches that God is the one infinite Person, the one Spirit, who cannot be outlined or humanly circumscribed. The concept of God as a material form is in itself pantheism. God in matter or materially outlined is an impossibility, if God be infinite Spirit, and this is the teaching of the Bible. God is not in His creation, for the reason that the greater cannot be in the lesser. Spiritual creation is the expression of God, and in the recognition of this fact Christian Science does not "deny the personality of God," it does not "deny the reality of Jesus Christ," but consistently affirms that God is the Father, and that Christ Jesus is the Son of God and the Saviour of the world.

With reference to the denial of Satan, I will say: Because God is All-in-all, the one infinite personality, the one intelligent creator, and all creation, all reality reflects Him, if Satan were a reality or a personality, then he would be part of God's creation, which in itself would be and is absolutely inconceivable and inconsistent with the nature and character of God. Hence, Christian Science does deny most emphatically any personal so-called devil, or Satan.

All the evil there is, all the devil there is, is but the mortal false sense of things, expressed through the belief of evil as a reality, and is no part of God or His perfect creation. For one arbitrarily to select passages from the Scripture and then state that these apply to or condemn Christian Science, is to take a position that is untenable and absolutely unwarranted by fair logic. It is possible to take Scriptural quotations away from their context and pervert them seemingly to any purpose.

There are certain fundamental teachings of Scripture which Christian Science emphasizes, and the practice of these has resulted in inestimable blessings to humanity. Jesus said, "By their fruits ye shall know them." It is on the basis of accomplished results in the healing of sickness and sin among the people that Christian Scientists have their right to a fair and impartial judgment. On this basis of practical results there can be but one conviction, namely, that Christian Science as a religious teaching and as a therapeutic agency is of greater value to humanity than any teaching since the time of Jesus of Nazareth.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

THE TIME OF THE HARVEST.

THESE are the days when the husbandman, as he looks out over his broad fields of grain, fast ripening under the September sun, rejoices to see the approaching fruition of months of labor and waiting,—the breaking up of the bare brown earth, the sowing of the seed, the growth of the tiny green spearlike blades that first pierce the soil, until they burst into flower and fruit, giving promise of an abundant harvest; and happy is he who has secured his laborers against the time of reaping, that the golden grain waste not upon its stalk.

The ninth chapter of Matthew is notable in its record of a series of wonderful works wrought by Christ Jesus in his own city and apparently within a few hours' time. With his disciples he had just come by ship from the country of the Gergesenes, where he had healed two men possessed of devils, to Capernaum, and scarcely had he entered the city when there was brought to him one sick of the palsy, whose faith that he could be healed so appealed to the Master that he was speedily bidden to rise and walk. Next had come the ruler Jairus, to entreat that the Master would go and lay his hand upon the little daughter of the house, that she might awaken from the sleep which had fallen upon her. As Jesus passed on his way to the ruler's house, one who for twelve years had been a sufferer came up behind and touched the hem of his garment, in the hope that thereby she might receive healing. How tenderly the words must have fallen from the Master's lips: "Daughter, be of good comfort; thy faith hath made thee whole." Then he went on, and in swift succession raised the ruler's daughter, opened the eyes of two blind men, and healed a dumb man, so that he spake.

Seeing these wondrous works, day after day, the multitudes marveled, and as the Master went from city to city, preaching the gospel of the coming of the kingdom of God, they brought their sick to be healed of him,—"of every sickness and every disease." Is it any wonder, as he saw the many who needed healing from sickness and sin, that the Master was "moved with compassion" that there were so few to minister to them,—that the harvest truly was plenteous but the laborers few,—and that he sent forth the disciples, endued with power to heal all manner of disease and sickness.

Today there are multitudes of sufferers who need to know that through the discovery of Christian Science the Christ-healing is once more available; that the Master's promise, "He that believeth on me, the works that I do shall he do also," is being fulfilled daily,—that the sick are healed, the weak limbs strengthened, the blind eyes opened and the deaf ears unstopped, the victims of degrading habits loosed from their slavery, through the prayer of faith, the prayer which declares, nothing doubting, that all things are possible with God; that through the power of Truth, "the law of the Spirit of life in Christ Jesus," we are freed from bondage to sin and suffering. It is because Christian Science offers a full gospel, the undivided garment of Truth, the healing of sickness as well as sin, that it has appealed to unnumbered thousands, who have found in its teachings the promised Comforter, the knowledge of God as divine Life, Truth, and Love which has led them into all truth, into the freedom which is their natural and inalienable right.

Thus we who have profited by her labors are beginning to understand something of what the world owes to Mrs. Eddy as the Discoverer and Founder of Christian Science. She it was who thrust the keen plowshare of Truth into the soil hardened by centuries of neglect, who sowed with unsparing hand the precious seed,—some on shallow and stony ground, and some, thank God, on fertile soil,—who guarded and cherished the upspringing blade until the Church of Christ, Scientist, like the mustard seed of the Master's parable, is become a mighty tree whose outspreading branches touch every quarter of the globe. The world will never know with what prayers and tears, what stress and toil, this work has been wrought, but it has a right to know whether as Christian Scientists we are being faithful to our trust,—if we are making rightful use of our heritage, or letting our talent gather the rust of neglect and sloth.

We have but to lift up our eyes to see that the fields are "white already to harvest," that all about us the multitudes are looking to us to break unto them the "bread of life," to give them to drink of the "living water." Who will respond to our beloved Leader's call, and do his part to hasten the time of the harvest, "that happy day when man shall recognize the Science of Christ and love his neighbor as himself, —when he shall realize God's omnipotence, and the healing power of the divine Love in what it has done and is doing for mankind" (Science and Health, p. 55).

ARCHIBALD MCLELLAN.

AN UNHOLY ALLIANCE.

SHE was a very bright old lady, and for more than four score years she had lived a life of devotion to the fulfilment of her highest concept of Christian faith and duty. Her gentleness, unselfishness, and goodness were proverbial, and they had greatly endeared her to one who coveted for her exaltation of sense and uplift of heart, that triumph and joy which was outlined by St. Paul when he declared that "though our outward man perish, yet the inward man is renewed day by day;" which speaks for true Christian freedom and which alone comports with Christian maturity. In his calls upon her, however, this friend usually found her submerged in that self-identification with the material body which has fettered so many saints, but which is so unequivocally rebuked in the teaching of Christian Science.

From the human point of view she was perfectly normal, but at the time when her sky should have been all aglow with the splendors of light, she seemed to think of little save darkness and decay. Instead of that rejoicing in conscious spiritual strength and growth which the apostle refers to as the natural as well as the fitting fruitage of faith in Christ, she was simply wedded to weakness, persistently dwelling upon the failure of sight and hearing and memory, her inability to walk or work, and her general sense of good-for-nothingness. These things were enumerated and enlarged upon until one's heart was moved with a deep sense of the pitifulness of it all, and of the unspeakable wrong which materialistic teaching had wrought in thus linking life, in her thought, to the frailties of the flesh. As a minister's wife she had been a close student of the Scriptures and could quote them *ad libitum*, nevertheless she had acquired very little spiritual vision, gained very little of the freedom which Christ Jesus declared should attend the knowing of truth, and realized very little of that inheritance guaranteed to every faithful disciple in his wondrous words, "I am come that they might have life, and that they might have it more abundantly."

The Christ-life surely means liberty, that liberty which the apostle was definitely seeking when in the agony of his struggle he cried out, "Who shall deliver me from the body of this death?" Paul realized that absorption in and subjection to the material sense of life should be done away, and this is the very kernel of the redemptive truth which Christ Jesus taught and demonstrated, as it is the definite goal of every true Christian Scientist.

Entry into this concept of Christian privilege and duty

Digitized by Google

involves a revolutionary change in our thought of selfhood. The long-time belief in man as constituted of soul and body, of spirit and matter, a belief which is still enforced in Christian schools and from Christian pulpits in all the world, must give place to a nobler sense of man before this mental enslavement of Christian maturity can possibly be done away, since they have the relation of cause and effect, and it is this fact which gives significance to the teaching of Christian Science as the emancipator of men.

The subjection of saintliness to serfdom awakens the protest of every moral sense. Every worthy instinct and impulse of the human heart cries out against the suffering and injustice which inevitably attend the degradation of the thought of man, the alliance in belief of opposites, spirit and matter, and she who first voiced effectively in our times this protest by demonstrating the present possible dominion of the Christ-consciousness, has done a deed for which all mankind will one day bring her blessings.

JOHN B. WILLIS.

THE PRIVILEGE OF WORK.

As Labor day comes round it has a lesson for each one of us, inasmuch as this is the age of workers, not of idlers. It is rightly considered disgraceful to be an idler, and the question is no longer so much as to the kind of work we do as to its quality, for any work well done dignifies, indeed glorifies, the lowliest worker. It is useless to deny that most people, if not all, work at first from a sense of sheer necessity; then, as this is sure to become oppressive and disappointing, a truer and nobler outlook is sought. When one comes to think of what he may do to help others, his thought expands and he becomes conscious of latent powers and possibilities which had been unrecognized while he was a mere toiler, his thought narrowed down by the ever-recurring question, "What shall we eat? or, What shall we drink? or, Wherewithal shall we be clothed?"

Christ Jesus lived among the toilers, doubtless toiled with them at one time, and so knew the very heart of their problem, saw why the sky was darkened for them with the heavy clouds of doubt and fear, fear not so much for the evil of today, as for the dreaded evil of tomorrow. He told them that their mistake was the attempt to serve two masters, that this was the explanation of the long and weary struggle for material things. He who had neither lands nor houses, who had not even a place whereon to lay his head, but who was never unprovided for,—he told them to look up and see the birds, free denizens of the air, to look around them at the lilies clothed in splendor, to look down upon the grass and remember that "the meek shall inherit the earth," if they would find evidence of a loving Father, who cares and who provides!

The great Teacher did not forget to say, "My Father worketh hitherto, and I work," and in Christian Science nothing is of greater importance to each of us than to realize the ceaseless activity of infinite Mind. As we come to understand that in the truest sense Mind is the only worker, that its energy is tireless and forever intelligent, we begin to appreciate the possibility and privilege of being "workers together with him." Their work ceases to be toil, much less drudgery or enforced servitude. We work because life must be expressed in action, and because the joy of pressing on to perfection in all things gives zest to the performance of every task, and in this mood our unfolding capabilities make us smile at our former sense of burdensome efforts and poor results. Paul said, "When I was a child . . . I thought as a child: but when I became a man, I put away childish things." So with the spiritual outlook we no longer think or work as we once did, but with faith, hope, and understanding we press on to perfection, knowing that neither matter nor money is our master, but Mind.

Our revered Leader asks, "Through toil, struggle, and sorrow, what do mortals attain?" (Science and Health, p. 536). It is true that we must be willing to toil until material sense is brought into subjection to the real man's spiritual faculties; and every brave effort to reach his God-given dominion is a blessing to the entire race. Every true worker is advancing with his work, and as the material sense is given up, and we know that "God rests in action" (*Ibid.*, p. 519), we, too, shall find rest in ever-renewed strength and ever-enlarging opportunities for the service of God and humanity. If we are truly working together for good, each will find his rightful place, and receive from God and man the "well done" which is the guerdon of the good and faithful servant.

ANNIE M. KNOTT.

AMONG THE CHURCHES.

LONDON, ENGLAND.

Through the courtesy of our English friends we have been favored with a copy of the loyal and dutiful address of the Christian Science churches and societies in the empire presented to their most gracious Majesties King George V and Queen Mary, and also of the letter sent in response.

"*May it please your Majesties:* We, the members of the following Christian Science churches and societies in these islands and in your Majesties' dominions across the seas, rejoice in offering our humble and loyal congratulations on the auspicious occasion of your Majesties' coronation, and in conveying to your Majesties our loving assurance that our hearts unite with those of all loyal subjects in the prayer that every blessing of divine Love may rest upon your Majesties and upon each member of the royal house.

"Your people have already had evidences, whereof to be grateful, concerning your Majesties' attitude toward the great questions of the day, both social and religious, and we feel that your Majesties' recognition of the vital importance of raising the standards of health and of moral and religious integrity is deeply appreciated by all, and is an inspiration and encouragement to those who are striving to make the ideal practical in daily life. We recognize that the empire is passing through an important transitional state of development, and that great opportunities for good are arising in promotion of the sanctity of home life, education, wider political justice, amelioration of social conditions, the abolition of war, and a greater spiritual awakening. And we pray God that your Majesties may have the joy of seeing the happy fruition of these movements, and that the brotherhood of man, involving universal peace, may be so established during your reign that the psalmist's prophecy may be abundantly realized: 'Mercy and truth are met together; righteousness and peace have kissed each other.'"

The churches and societies which united in presenting the address were as follows:

Africa: Capetown, Christian Science Society; Durban, Christian Science Society; Johannesburg, First Church; Johannesburg, Christian Science Society; Potchefstroom, Christian Science Society.

Australia: Ballarat, First Church; Brisbane, First Church; Melbourne, First Church; Sydney, First Church.

Bahama Islands: Nassau, Christian Science Society.

Bermuda Islands: Hamilton, Christian Science Society.

Canada: Belleville, Christian Science Society; Berlin, First Church; Brandon, First Church; Brantford, First Church; Edmonton, First Church; Halifax, First Church; Hamilton, First Church; Kenora, Christian Science Society; Kingston, First Church; Leamington, Christian Science Society; Lethbridge, First Church; Liverpool, Christian Science Society; London, First Church; Montreal, First

Following is the courteous reply of the secretary, by command of the King:

"Home Office, Whitehall, 17th July, 1911.

"*Sir*:—I am commanded by the King to convey to you hereby his Majesty's thanks for the loyal and dutiful address of the Christian Science churches and societies in the British empire on the occasion of their Majesties' coronation.

"I am, sir, your obedient servant,

"WINSTON S. CHURCHILL.

"The secretary to the coronation address committee of the Christian Science churches in London—First Church of Christ, Scientist, Sloane Terrace, S. W."

MINNEAPOLIS, MINN.

The five Christian Science churches of Minneapolis have united in a movement to establish and maintain a central reading-room, which will be opened at 1006-1010 Plymouth building, Hennepin avenue and Sixth street.

THE LECTURES.

KANKAKEE, ILL.

Bliss Knapp gave a lecture on the subject of Christian Science May 16. He was introduced by ex-Judge J. N. Orr, who said:—

It is a pleasure to welcome you here tonight, for I am sure the present occasion will be a profitable one. No subject can be more important or more practical than Christian Science. It is needed in working out our daily problems and our ultimate problems; it pertains to our usefulness, our happiness, and our salvation. Christian Science bears the distinction of being the only religion ever founded by a woman, and its Founder, Mary Baker Eddy, occupies an enviable position among the world's most famous women. Christian Science bears the further distinction of having had the most phenomenal growth of any religious movement in our history. The speaker whom you have come to hear is well qualified to speak on this subject, and it is hoped the lecture will at least show what Christian Science is capable of doing for humanity and lead to a more intimate knowledge of it.—*Correspondence.*

DOVER, N. J.

A lecture on Christian Science was delivered on June 5 by Prof. Hermann S. Hering. He was introduced by the second reader, Henry F. Dow, who said:—

All of us, no matter what our faith or purpose in life may be, are seeking after truth,—that truth of which Christ spoke when he said, "Ye shall know the truth, and the truth shall make you free." Pilate in his inquiry of Jesus, "What is truth?" voiced an inquiry that has for the past nineteen hundred years found expression upon the part of millions of earnest hungry, longing souls, and the answer to the inquiry is today just as eagerly sought for as in the beginning of the Christian era. We are all seekers after truth. We all long for the "glorious liberty of the children of God." We all long to be free from all our fears and false beliefs; and we are struggling to free ourselves and so by our example our fellow-man, from the slavery of sin and the cords of error. The results are sure and the victory glorious.

In order to understand, however, how these things are possible, it is necessary to understand the foundation, the divine Principle upon which Christian Science rests. Christian Science declares that all causation is Mind, and that Mind is God, and that "God is Love" as the Scriptures declare; and if God is Love, then Love must be God; and if God is true then Truth must be God; therefore to know the truth is to know God, whom to know aright, Jesus declared, "is life eternal." If we know the truth, just so far as we know we can prove, can demonstrate the truth.

Correspondence.

COLVILLE, WASH.

The First Baptist church of Colville was comfortably filled on Thursday evening, June 1, to listen to an able address on the subject of Christian Science by Judge C. A. Buskirk of St. Louis. The speaker was introduced by J. B. Slater, who said in part,—

While it is only my purpose primarily to introduce to you the speaker of the evening, at the same time I feel it a duty to say just a few words in commendation of the work of the organization known as Christian Science. You understand that we always, whether consciously or unconsciously, judge a man by the company he keeps. We also, in like manner, judge a society by its works—its accomplishments.

Now, I have never gone into a minute examination of the theories or practices of Christian Science, but some

Digitized by Google

time ago there fell into my hands a copy of a daily newspaper called, I think, *The Christian Science Monitor*, published in Boston, Massachusetts, said to be the hub and wheel of all things *élite* in America. I read the paper through. It contained all of the readable news that any one would care to be interested in. This fact I was impressed with. There was another feature of the paper possessed of real inspiration, the point I want to make being that while organized society has inveighed against the flagrant evil we call "yellow journalism," and waged all manner of war upon a dangerous element in the molding of public opinion, I made the discovery that Christian Science, instead of holding up to the eyes of the public *the hideous product* of a fevered brain, has gone to work and given to the world what it wanted, an example of clean journalism, a newspaper that can be taken by a parent into a home without fear of the result of its teachings. For example, for weeks we had been reading in the great dailies of the country, pages upon pages of the harrowing details of a trial concluding with the horrors of an execution; but it remained for *The Christian Science Monitor* to tell in about six lines all the facts that the people needed to know. If this is one of the products of Christian Science, let us pass righteous judgment by applauding the effort.

Statesman-Index.

HORNSEA, ENGLAND.

Bicknell Young lectured at the Public Rooms on the subject of Christian Science, July 7. He was introduced by Colonel the Honorable George Napier of London, who said:—

We are gathered here this evening to listen to a lecture on the greatest religious movement of modern times. Wherever the English language is spoken there are Christian Science churches and congregations steadily growing in numbers and importance. In Germany, Scandinavia, and Switzerland, wherever in fact the Christian religion prevails and religious thought is free and unfettered, this Science is making way, in spite of the many difficulties presented by diversity of tongues. It must be that Christian Science offers something to mankind that cannot be had elsewhere. What then is this message for which modern thought seems waiting and for which it seems so well prepared? It is the message of the Christ-healing, the same message that caused the multitude to follow our Saviour on the shores of the lake of Galilee, the demonstration of the healing power of divine Love through Christ, the spiritual idea of God.—*Correspondence.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Berlin, Ger.—Bicknell Young, Beethoven Saal, Sept. 26.

Corona, Cal.—William R. Rathvon, Masonic Temple, Sept. 15.

Hammond, Ind.—Frank H. Leonard, Masonic Temple, Munich court, Sept. 11.

Long Beach, Cal.—William R. Rathvon, Long Beach Auditorium, Sept. 11.

Los Angeles, Cal. (Five Churches).—William R. Rathvon, Second Church Edifice, West Adams street near Hoover, Sept. 7; Third Church Edifice (Simpson Auditorium), 734 South Hope street, 3 p.m., Sept. 10; Wilcox Hall, Hollywood boulevard, Sept. 12.

Park Ridge and Edison Park, Ill.—Frank H. Leonard, Clark's Hall, 3:15 p.m., Sept. 10.

Petaluma, Cal.—Francis J. Fluno, M.D., The Hill Opera House, 3:15 p.m., Sept. 10.

Portsmouth, N. H.—Judge Clifford P. Smith, Freeman's Hall, 3 p.m., Sept. 10.

Potchefstroom, Transvaal, S. A.—William D. McCrackan, M.A., Town Hall, 8:15 p.m., Oct. 17.

TESTIMONIES OF HEALING.

It is with inexpressible joy and gratitude to God, and also to our beloved Leader, that I send my testimony, for there is no part of my life untouched by the hallowed influence of Christian Science, and as freely I have received, I would freely give, longing for all to know the possibility of perfect healing. I was all my life a church-member, and for many years was an active worker; yet I was spiritually unsatisfied, secretly yearning for a God who did not wound, but healed. I was for twenty years the victim of spinal disease, also serious abdominal and stomach trouble, which a critical internal operation failed to relieve. Mentally confused, I tried to kiss in faith the hand that held the chastening rod, believing it to be God's will that I should suffer for all time. Thus the gloomy years of agony and tears dragged on, while I longed for death to free me from this condition. But deliverance was near; Christian Science with healing in its wings came to me, and as a practical uplifting religion it appealed to me, then delivered me from fear and depression. When, however, I was told by a dear Christian Scientist that it was possible for me to be well, I simply gasped with astonishment. She loaned me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and I began to study it, and the half of what it has done I am unable to tell. It is over three years since the healing balm of Truth completed its work, and I have remained well, active, and happy. What freedom, after years of doctoring followed by strict hygienic treatment! But the physical benefit, although great, is insignificant compared with the spiritual illumination, the understanding of God as ever-present good, that only the good is true, and the true good.

I am daily learning more of the truth which frees from all inharmony, entering more fully into the peace of God which passeth knowledge, and I now enjoy the glorious liberty which is the right of every child of God, who is doing exceeding abundantly, above all that I had asked or even thought of. I have been tenderly guided to give all my time to leading the sick and sorrowful into the sunlight, and last year it was my great privilege to receive class instruction from one of Mrs. Eddy's students. I know that Christian Science heals, for whereas I was sick, now I am well, and I know that "God with us" is the only physician who never fails. I am daily proving the fulfilment of the promises in the Bible of the holy Comforter, which promises are fulfilled in Christian Science. By the help of our text-book the Bible has become a new book to me, filled with Life and light and health. I now know something of what the Master meant when he said, "The kingdom of God is within you," and I am indeed thankful, thankful to God who is Love, and that our revered Leader so dwelt "in the secret place of the most High" that He could use her in the work of freeing mankind from sin, disease, and death. I am very grateful for the Lesson-Sermons, for all our literature, and for the realization in Christian Science that all things are possible to God, who is the same "yesterday, and to day, and for ever."

LILLIAN LEA STIRK, Birmingham, England.

I thankfully endorse all that my daughter has said in the above testimony, and although she is the only Christian Scientist in my family we are by no means indifferent to the gentle healing influence of Truth, for we have all been delivered from fear for our dear one, and the inability which we felt to relieve her in times of great mental and physical suffering, known only to those in the home. I send this with tender thanks to God, in which my wife and daughters join, for this perfect manifestation of healing.

EDWARD STIRK, Birmingham, England.

I wish to express my sincere gratitude for all that Christian Science has done for me. During my childhood and schooldays I was considered delicate, my education being

Digitized by Google

much interrupted by periods of ill health. On leaving school, instead of improving my health became worse, and for the next ten years I was unable to take up any business. Several of these years I had to winter abroad; if I did not do so, I was largely confined to the house, and frequently to bed during the worst weather.

I was continually taking tonics, without apparent benefit. I also suffered severely from a catarrhal affection which impaired my hearing. I consulted and was treated by specialists in Glasgow, Edinburgh, and London, having several operations without obtaining relief. It was by the advice of these specialists that I wintered abroad, which was the only hope they gave me of preventing my hearing from becoming worse; but they held out no hope of there ever being any improvement. All were agreed that to winter in this damp climate would be very bad for me, and this was the case until I came to Christian Science. In all these years of bondage to sickness and drugs, I never knew what it was, even at my best, to be entirely free from a feeling of weakness. I also frequently suffered from depression, as there seemed nothing to look forward to but a life of enforced illness and uselessness.

It was at this time, when all seemed so dark, that Christian Science was brought to my notice. Although somewhat skeptical, I decided to give it a fair trial, and asked for treatment from a practitioner. I need only say that this was over five years ago, and since then I have never had a day in bed, or even been confined to the house. I have been living entirely in this country during the last four years, and have been out and about in all sorts of weather, and all this time have been entirely free from any symptoms of illness. Although I cannot yet say that all difficulty in hearing has been overcome, I certainly hear decidedly better than I did five years ago. About four years ago I had a threatened return of abscess in the facial bones, which had been feared by my doctors, but on this occasion it was overcome in a few days by Christian Science treatment, and I was able all the time to be about my work. Within a short time of my first treatment I lost all desire for tobacco and stimulants.

Grateful as I am for my physical healing, I am still more so for having found in Christian Science a practical religion. It has turned me to the study of the Bible, which I had neglected for many years, and with the light which Christian Science has thrown upon it the Scriptures have now become a sure guide in every problem. I am deeply grateful to our Leader, Mrs. Eddy, for all her writings, and also for the Christian Science Journal, Sentinel, and Monitor, which are a constant help.

WM. P. MUNSON, Glasgow, Scotland.

I have known W. P. Munson intimately for twenty-five years and have no hesitancy in testifying as to the accuracy of the above statements.

(REV.) S. RAMSAY, M.A., Glasgow, Scotland.

I feel that I was led by God to investigate Christian Science. I had been a member of various churches and was a constant reader of the Scriptures to prove [illegible] but my [illegible] were not sufficient for me. [illegible] I was led to [illegible] Science and Health with Key to the Scriptures" by Mrs. Eddy, and judge for myself. I did so, and attended the Sunday and Wednesday services also. That was nine years ago, and what I heard of this teaching in the beginning has been verified all along the way. I have experienced its healing power over a mind "ill at ease" as well as a sick body, and over accidents. I have also proved its power to liberate one from the bondage of so-called worldly pleasures, of the habits of excessive drinking and smoking, the use of profanity, and the witnessing of debasing exhibitions of cruelty. These evils were destroyed during the study of the text-book, and especially of the "scientific statement of being" which it contains (p. 468).

The truth also helped me to overcome in a short time two carbuncles, one directly in the armpit, the other close to it. There was not the slightest pain, the arm could be used in any position, the cores fell out on the fourth day, the cavities closed up at once, and inside of a week there was no sign where they had been. To me this was wonderful compared to my previous experiences with them; as when having recourse to drugs and sometimes the surgeon, they were always extremely painful and it was six or seven weeks usually before they disappeared. I must also tell of the [illegible] from [illegible] a badly scalded [illegible] and also after a serious accident to my thumb, when the nail was forced off and the bone crushed. In both these cases the pain was relieved in a few minutes. My [illegible] also [illegible] More than two [illegible] as well as all that I [illegible] but as it is only [illegible] that anything of value can be lost, I am now able to [illegible]

MRS. FLORA M. DOLLINA, Long Creek, Ore.

When I first heard of Christian Science and listened to an explanation of what it taught and what it accomplished, I decided to read its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and judge for myself. I did so, and attended the Sunday and Wednesday services also. That was nine years ago, and what I heard of this teaching in the beginning has been verified all along the way. I have experienced its healing power over a mind "ill at ease" as well as a sick body, and over accidents. I have also proved its power to liberate one from the bondage of so-called worldly pleasures, of the habits of excessive drinking and smoking, the use of profanity, and the witnessing of debasing exhibitions of cruelty. These evils were destroyed during the study of the text-book, and especially of the "scientific statement of being" which it contains (p. 468).

The truth also helped me to overcome in a short time two carbuncles, one directly in the armpit, the other close to it. There was not the slightest pain, the arm could be used in any position, the cores fell out on the fourth day, the cavities closed up at once, and inside of a week there was no sign where they had been. To me this was wonderful compared to my previous experiences with them; as when having recourse to drugs and sometimes the surgeon, they were always extremely painful and it was six or seven weeks usually before they disappeared. These are only part of the many benefits I have received, but far above all the physical healing is the light that Christian Science has thrown upon the Scriptures; it has indeed made the Bible a new book to me, a book to be loved and made a daily reference and guide. Christian Science has made known to me my creator as a loving Father and ever-present Saviour; it has cast away from me many forms of fear and given me confidence, tranquillity, and peace when I needed them. I look back on the day that Christian Science was offered to me with joy and gratitude to the one who mentioned it to me. Nothing in my life has compared with this gift, and I am endeavoring to put into practice, however feebly, a little of that love which was shown to me by so many friends in London, members of the churches there, who from the first and until I left England, gave me so much patient, loving help and guidance.

In the Bible I find these words: "It is a good thing to give thanks unto the Lord, and to sing praises unto thy name, O most High." I am also grateful beyond words to our revered Leader, who through her purity of thought and life was able to express in this redemptive teaching the healing power of Truth and Love.

WILLIAM ARTHUR BULLOCK, Boisdale, Gippsland, Victoria, Australia.

I have indeed proved that God meets every human need. I was suddenly placed in a position where, being seemingly a cripple, unable to stand or rise from my chair, I had to do work that seemed quite impossible; but through Christian Science I now make beds, cook a dinner every day, and do a good deal of household work, sitting in a wheel-chair. I am able to lift weights that I have not been able to lift for years, the use of my arms having been restored through the truth. Divine Love has met my every need. I had not done any of these things for thirteen years. I am deeply grateful to God, also to Mrs. Eddy for her love to mankind in showing us that we live in Him.

MRS. BULLOCK, Boisdale, Gippsland, Australia.

In the course of most people's lives there comes a time when the perplexing problems of material existence reach a climax. It was at just such a time, when a college student, that I was led to ask myself, What does it all mean? That little word "it" was the most bewildering proposition I ever expect to deal with, but at this opportune moment some unseen power directed me to the reading of Mrs. Eddy's wonderful gift to wandering mortals, "Science and Health with Key to the Scriptures."

I had always been an enthusiast in regard to college games and plays, and during my freshman year was fortunate enough to make the class track team as a half-mile runner, sometimes running the mile race. In the course of the training, however, a severe pain in the region of the heart became quite evident. I however continued to run for another year, until I became so frightened that I consulted different physicians, who informed me that they could do nothing for me and that I would have to cease all exercise. It can easily be imagined how a student inclined to athletics would receive such directions; he might as well have been told all of his days of life and pleasure were over.

At this time I was in a suite of rooms with two students who were Christian Scientists, and I was aware of the fact that there was a copy of Science and Health at my disposal if I cared to glean anything from its teachings, but I did not know anything about Christian Science beyond the fact that four or five friends were Christian Scientists, and I did not know them intimately; yet there was something about them which I could not explain, but which seemed to tell of beautiful things and the wish that all humanity could appreciate what they knew. So I decided to be fair-minded, and at least see what the book could do for me. I decided to read the book, but to do it secretly; and having read the Preface and the chapter on Prayer. I slowly finished the book, weighing each thought most carefully. Even with the completion of the chapter on Prayer, life took on for me a fulness which the mere grouping of words could not express; and I state the truth when I say I felt, on retiring that night, as if separate from the body; and some unseen influence outside of me seemed to direct all my actions. It was then that I realized the truth, which has never since been quite so evident; namely, that the body is simply a mortal concept. The *finale* was that the heart trouble disappeared, never to return. Since that time I have studied Christian Science continuously, including the Lesson-Sermon each night; have attended Sunday service; and now I go regularly to the Wednesday evening meeting also.

It would require many pages to tell what this wonderful truth has done for me in two years and a half; so I will only mention the most noticeable changes. I have learned not to judge my fellow men; to annihilate that green-eyed monster, criticism; and to know that fear is powerless. Although I am the only one in our family who knows of Christian Science, there is a degree of harmony there which was never experienced before. I feel most cordial and friendly to all humanity; and appreciate a radiation of Truth which reaches all those with whom I deal,—a reflection of divine Truth, Life, and Love. In many problems that have confronted me, I have felt as did Jacob when wrestling with the angel; I have had the angel in the form of Christian Science, and have wrestled until the problem has been solved.

Being a student of mechanical engineering, I have always been exact and required a proof for all things before accepting them. My studies along the lines of physics and chemistry had never been quite satisfactory to me, because so much was based on theory; while on the other hand mathematics was always more or less a pleasure to me, for I had something definite to work with. But above all, my study of Christian Science has given proof of a Science that can meet every conceivable difficulty which may arise, and as these are met one gradually realizes the putting off of the old man, and the real man's unity with God. Now, as the ship of Christian Science has gradually risen above the distant horizon, it may be seen sailing on peacefully and steadily, at times buffeted by the waves of "earth's troubled, angry sea" (Miscellaneous Writings, p. 397). Looking beyond, I perceive a magnificent harbor; the sea has been stilled; a perfect calm is realized; and this mighty craft can be seen reflected in the waters, bearing the message of heaven on earth as a present reality.

JOHN GRAY SPONSEL, Chicago, Ill.

For many years I was a sufferer from organic diseases, the kidneys, bladder, stomach, heart, and bowels being involved; in fact, there seemed to be no soundness from head to foot. Extreme nervousness, sleeplessness, and inability to eat the simplest food without its causing great suffering, brought me to the verge of despair, for neither medicine, mineral waters, mountain air, nor aught else brought any relief. When I had given up all hope of ever being well again, the daughter of our family physician suggested that I try Christian Science, and brought me a copy of "Science and Health with Key to the Scriptures" that I might investigate its teachings. This copy had been sent to our library by a lady in Dallas, Texas, and was the only one in our town.

After reading the text-book for two weeks, I wrote to a Christian Science practitioner for treatment, and was healed. The acute stomach trouble disappeared with the first treatment, and from that day to the present I have eaten anything which I have desired. One by one the other ills disappeared, but the healing was rather slow, for there had to be a great emptying of old beliefs before I could grasp the truth as taught by Mrs. Eddy, and her book has

Digitized by Google

surely been a veritable key to me. A copy of Science and Health was purchased, and as my husband often read to me at night, he, too, soon found relief from many ailments and business worries, and the continued study led to his giving up his business as a merchant and devoting himself to the work of preaching the gospel and healing the sick.

We are witnesses to the truth that Christian Science does heal the sick and give sight to the blind. One case of blindness that has been healed was that of a little boy who had been blind two years, the other a girl of twelve years. We have had many proofs of God's power to heal, both for ourselves and for others, and our hearts are filled with love to God and gratitude to dear Mrs. Eddy for expressing this truth of being to mankind.

MRS. H. H. FAULKNER, McMinnville, Tenn.

About three years ago, on alighting from a street-car, I was thrown so heavily to the pavement as to tear my clothing and to break the enamel on a watch-charm I was wearing. As I arose I found that my arm was painfully hurt. I had about a half block to walk to my home, and found it difficult to get there. I walked upstairs, called my wife, who was talking to a Christian Science friend, got my coat off, and then fainted. On regaining consciousness I found both my wife and friend by my side, declaring the truth for me. The question then came to me as to whether I should be treated in Christian Science, or have medical attention, as I was carrying accident insurance in two companies and wanted to secure the money due me on account of the accident.

It was a hard struggle for me, but finally about seven o'clock I came to a decision and asked my wife to telephone to a Christian Science practitioner for treatment. I did not get to sleep till about midnight, when my wife read to me from Science and Health, but I slept till morning. In the morning I could not lift my hand to my head or use my fingers. I went to the practitioner and took treatment for two weeks, and was able to attend to my business all the time. I then started on a two-months trip, and at one of my stops I met a physician whose wife was interested in Christian Science. He asked me why I favored my left arm, and I told him of my fall and that I had been healed by Christian Science. He asked me to let him look at my arm, so we went to his room and he examined my elbow. He said that the injury had been of a very serious nature, but that the ligaments which had been torn from their place were all right. He intimated that I might have had a stiff arm under medical treatment.

My arm was and is now as perfect as ever, and I am indeed grateful to God for this proof of Truth's power, and to Mrs. Eddy for giving this wonderful blessing to the world.—W. H. BERTEAUX, Tropico, Cal.

Compared to the peace and joy and spiritual upliftment which the study of Christian Science brings into one's life, the physical healing seems almost unimportant; but, as Mrs. Eddy says, "divine Truth must be known by its effects on the body as well as upon the mind, before the Science of being can be demonstrated" (Science and Health, p. 350).

I should like to relate one out of many personal experiences of Christian Science healing. About two years ago, when stepping down from a high chair, I fell heavily to the ground with my left hand doubled underneath me. I knew at once that to mortal sense I had hurt my hand seriously, as I had been a hospital nurse for ten years and had considerable surgical experience. I soon found that my wrist was very seriously injured. I tried to declare the truth of being, but the pain and shock seemed so real for the moment that I felt I must have help. I telephoned to a practitioner, who began treatment at once, and came to me without delay. When she saw what the injury was, she very kindly said that if I wished to have a surgeon to set the wrist, she would stay and help me; "but," she added, "divine Love is the best surgeon," and her words were so convincing that I felt no material aid was necessary. The pain gradually subsided, although it was very hard and the arm as far as the elbow was badly swollen and discolored. After a couple of hours I was able to move my fingers, and shortly after that to raise my hand. On the third day afterward I did my own hair, and after one week's treatment I continued to use my hand constantly, although it was some little time before it resumed its normal appearance.

Needless to say, I was extremely thankful to be spared the pain and prolonged discomfort of surgical treatment, but it was for the (to me) absolutely convincing and beautiful proof of God's ever-loving presence and power that I was most grateful. This knowledge which we gain through the study and understanding of Christian Science does indeed fill our hearts and minds with the "peace of God which passeth all understanding."

MRS. MARY WILSON, Harrowgate, England.

When I went to a Christian Science practitioner for treatment, I had reached the end of a darkened path in which I had walked for long weeks with great hardness and bitterness of thought. From days of wretchedness and sleepless nights, mind and body had reached the point where only drugs could quiet overwrought nerves or bring even an hour's respite from pain. I told the Scientist that I did not want to live, and when she asked me whether I would rather work out my problem here or somewhere else, I told her I would rather risk the somewhere else. She listened to all my miserable story, and when I had finished showed me with much loving patience and wisdom why I had reached the state in which I found myself, laid bare to me all the error which was robbing me of my birthright,—health, happiness, and peace. In that first treatment my body was healed, and I went home to sleep for the first time in weeks without the use of drugs. In the few days that followed, the gates of another world were opened to me,—and such a world of light and love! I forgave by knowing there was nothing to be forgiven, and all my hardness and bitterness slipped away as a shadow.

I go my way now with winged, not leaden feet; my days are filled with gratitude for all that divine Love has given me, I sleep at night to the music of that song of David, "I will both lay me down in peace, and sleep: for thou, Lord, only makest me to dwell in safety."

KATHERINE G. DAVIS, Kansas City, Mo.

When I first heard of Christian Science, over nine years ago, I was ill and very unhappy. Several years before I had graduated from a normal university, whither I had gone to prepare myself for teaching in the public schools. The course I took was known as a scientific course, terminating with a B.S. degree. Among other things which were presented to us for study and discussion was that intellectual mirage known as the evolutionary theory of the origin of man. We were required to read and study certain books and to prepare papers on them. As soon as I began the contemplation of this material philosophy my health and strength and happiness began to wane; I had to be excused from certain duties, and after graduation went home almost a total wreck. It took months for me to recuperate sufficiently to enter the work of my chosen profession, and I can truly say now that from the time this godless theory first claimed my attention until it met its destruction, during my reading of the inspired pages of our text-book, "Science and Health with Key to the Scriptures," the conflict between Spirit and matter was waged ceaselessly—mortal mind declaring that in no other way could

Digitized by Google

the universe including man be accounted for, and spiritual sense forever pleading for the recognition of Spirit—forever pleading for God.

In August, 1900, exceedingly weary, ill, and despondent, I first heard of Christian Science and began to read the literature, also to take treatment. At once I began to improve, and one after another my ailments disappeared. At the first dawn of truth came a real inclination to live and a hope that perhaps I might sometime be happy. Then a chronic throat trouble disappeared. I had had diphtheria some time before this and was told that I would be apt to have it frequently, as my throat had been left in a bad condition. This was, however, healed in a short time. I had had for years a stomach disorder, but I soon learned to eat anything I craved without fear. Later other troubles of even a more serious nature left me, and I became quite comfortable.

But that for which I am most grateful was a closer communion with God than I had ever known before. During what I may term the evolutionary *régime* God seemed so far away, so obscured, that I was desolate; but now He has become an ever-present help in trouble. After nine years of earnest seeking for the truth as revealed by our beloved Leader in our text-book, with all the manifold blessings of health and happiness which have come into my life standing out clearly before me, I lovingly, gratefully rehearse the words of the shepherd king, "I will say of the Lord, He is my refuge and my fortress; my God, in him will I trust."

FLORA E. MILLER, Madisonville, Ohio.

Words are inadequate to express my thankfulness and appreciation for the benefits I have received for myself and family during the last year in Christian Science. I am a widow with four children, but with the power of Truth I have been able to realize that God is our Life, strength, and a very present help in time of trouble. One test of the healing power of Truth was in a case of a seemingly severe burn, in which the suffering was relieved almost instantly. The children have had numerous ailments to meet, but all have been readily overcome, Christian Science being the only remedy. For these blessings I am very grateful.—MRS. CLARE P. SCHOOLEY, Ashland, Ore.

Before I became acquainted with Christian Science I was troubled with catarrh. I had been to the leading physicians of the community, but received only temporary relief. After two years of continuous doctoring, I was advised about two years ago, by my mother, to try Christian Science. From the first treatment I began to improve, and in one month's time I was perfectly healed. I feel very thankful to God, and also to Mrs. Eddy, whom God has so wonderfully used in bringing to the world again the Christ-healing.

EDMUND W. PETERSON, Asbury Park, N. J.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM OUR EXCHANGES.

[Congregationalist and Christian World.]

The secret of rest is a healed spirit, and spiritual rest is rooted in trust and surrender. Real rest works from the inside out. If God does not find us, we shall not find rest. The vacation which does not issue in deeper spiritual adjustments is no vacation at all. The processes by which this is obtained may be indirect; they must be none the less real. The real secret of the ministrations of the sea and the mountains, of quiet green spaces, yellow harvest-fields, and clear nights of stars, is just here. They insensibly lead our perturbed spirits into ampler and healing presences. The horizons of the sea call us from benumbing littlenesses to regions whose spaciousness is no unfit symbol of the tendernesses of the mercy of God. The patient strength of the mountains teaches us without words that there is a might against which the tumult of the tempest is in vain. Their remote and stainless summits carry weary eyes and hearts into altitudes to which the summits themselves offer only thresholds of approach. Green fields and quiet waters breathe the shepherding care of God, and the stars themselves, seen from horizon to horizon, declare not only the glory of God, but a serenity which puts to shame our earth-born fretfulness. Surely all these are spiritual processes. We have yielded ourselves to the unchanging serenities and securities, and as we have let them bear us we have been healed. After the storm we can hear the birds once more carol their notes of praise; at the end of sorrow and tragedy hear faith reawaken and have the poet's song echoing in our hearts.

[Rev. Jonathan Edwards, Ph.D., in *Christian Work and Evangelist.*]

The Scriptures testify to the supremacy of the spiritual. The Bible is primarily a spiritual book. It was written by inspiration of God. Among its first declarations we find that the Spirit moved on the face of the waters. It reveals a spiritual Father, who must be worshiped in spirit and in truth. We have in it record of unseen beings ascending and descending; of the spiritual eyes of Elisha's servant opened, giving him a vision of horses and chariots of fire on the mountain, teaching that great unseen forces may work in our favor when in God's service. The New Testament reveals the spiritual and eternal life. Christ came to give life, that is, the spiritual—and give it abundantly. His way and his truth are spiritual. His disciples and apostles were endowed with spiritual power to fit them for effective service. A vision of the spiritual was the source of the progress of the early church, that gave the apostles and others patience, hope, fortitude, and all sweet graces of character, making a handful of humble men and women, some of them slaves, all despised by haughty monarchs, more real in influence than Rome, the world's metropolis, and destined to overcome her political and military power.

[Living Church.]

What Jesus seemed to value in Nathanael was his candor, guilelessness, and openness of mind. He was an Israelite indeed, steeped in the lore of his fathers and in the traditions of his race, but eager to receive new light and glad to find his ideals embodied in a living truth. It is an attitude of mind, a temper of the heart, that is ever valuable in the deepening of religious life and faith, too often lacking among the religious people of our own day. We are grown hypercritical, and the debilitating skepticism of the time finds its satisfaction in an increasing worldliness and irreligion. We need the readiness and expectancy that finds the Christ in the enthusiasms, the spontaneous faiths in good things that are so natural to our hearts when they are not distracted by the cares and pleasures of the world. We need the simplicity of soul that comes of quiet medita-

Digitized by Google

tion and hopeful thought, willingness to enter more and more sincerely into the imitation of the Master, the open mind that knows, however sincere its present faith, there is yet for it to receive the light of the opening heaven.

[Rev. William P. Du Bose in *Churchman.*]

We want the spiritual art and science of a self-renewing and self-sustaining faith and hope and love. The Jesus who was transfigured upon the mount is he who is "the same yesterday, and to day, and for ever." The subject of conference in the transfiguration was the old story of the cross. They spoke of his decease which he should accomplish at Jerusalem. "I determined," says St. Paul, "to know nothing among you save Jesus Christ, and him crucified." If we cannot get high enough, often enough, to get and keep these truths illuminated and glorified in our minds and hearts and lives, we must be content to remain in the dark.

[*Christian Register.*]

Everywhere there is abroad a new and finer sense of spiritual realities. The letter is passing, and the spirit, of which the letter was merely a collection of fallen leaves, is beginning to manifest itself. The passage from the letter to the spirit of religion is the great achievement of the last half century. It is more momentous than the outburst of Protestantism nearly four hundred years ago, because it has a wider sweep and a deeper meaning. No lines are drawn, but a new republic has extended its borders to the ends of earth, and within it are included the wise, the good, and the far-seeing, the illuminated souls of every communion.

[*British Congregationalist.*]

If a man gets into the habit of contemplating his ideals without a corresponding effort to reach them, even his vision ceases to be true—even that which he has is taken away. Our activities feed our senses. In any high sense of seeing, hearing, feeling, apprehending, when we cease to do we are on the way to cease to know. When we no longer care to speak the truth, we are on the road to cease to see the truth. When we no more care to make anything beautiful, we have cut the nerve of our sense of the beautiful. We must be "doers of the word, and not hearers only," or we are going to cease to be even hearers.

[Charles W. Stevenson in *New York Observer.*]

Our religion is, or was until the last twenty-five years, one of fear. It is still too much one of rewards and punishments. We do right too often because it is the gateway to heaven. To do right for the benefit of our fellows, to live and leave an impress on the mass by right action and love for men, this is too thin for our diet. We want something for what we do. God must pay us wages, and we are striving to get an increase all the time. We do nothing save it is measured in dollars and cents.

[*Advocate of Peace.*]

With increasing frequency and power the great gatherings of the Christian church in all parts of the world are uttering their demand for the abolition of war and the establishment of a permanent system of judicial settlement of such international controversies as cannot be adjusted by direct negotiations or avoided altogether through the influence of a spirit of justice, friendliness, and mutual service.

[*Tongues of Fire.*]

To be good is to be often misunderstood.

Sometimes we are actuated by passion, and think it zeal.

When you get filled with perfect love, you will have a poor memory for other people's faults.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herald,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

The Publishing Society has secured, and now has ready for distribution, a fine photogravure of Mary Baker Eddy made by Littig & Co. of New York from a colored portrait painted by Miss Alice C. Barbour, which was based on a photograph taken by Mr. Bowers of Concord, N. H., in November, 1891, and with a rearrangement of her hair that was very pleasing to our Leader.

This admirable portraiture of Mrs. Eddy, printed in three sizes on India paper and mounted on heavy plate paper ready for framing is for sale at the prices shown on opposite page.

The field will undoubtedly be gratified to learn that a book (132 pages with index) containing the "Excerpts from Editorial Comments" which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, also the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is now on sale, published in two styles of binding. For prices see opposite page.

Two of our Leader's poems, "Shepherd, show me how to go," and "Love," set to music by Frederic W. Root, are on sale by the Society. For description and price see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. Of earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; 50 copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; 50 copies or more, 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1919.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; 12 copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; 12 copies, ONE ADDRESS, $1.25.

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 192 pages, cloth binding, marbled edges. Price, single copy, $1.30; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

2.50— 0: 10 : 3 ;	10.60;	12.85
4.00— 0: 16 : 6. ;	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

Hearings by the government commission on second class postage rates, which have been held in New York for the last month, have ended and Justice Charles E. Hughes, chairman of the commission, said that he would receive briefs from those interested at his summer home in Bridgehampton, L. I. After the close of the hearings was announced the postmaster-general officially indorsed the idea of a parcels post.

"I am very much in favor of a parcels post," said he, "but it must be established in a way that will enable the postoffice department to care for it without interfering with the great volume of other classes of mail matter. I would like to see an enactment by Congress for a parcels post that would enable the department first to install it locally on the rural free delivery systems. Then it can be extended as time and conditions permit to the deliveries of the smaller and larger cities."

In 1908 the biological survey estimated that the total number of antelope in the United States had been reduced to seventeen thousand. Of these about ten thousand were in Montana, Wyoming, and the Yellowstone National Park and the remaining seven thousand were distributed in twelve other states. On the Wichita, Okla., game refuge, where eight antelope have been placed, it is hoped that they will find themselves in surroundings suited to their increase. The Wichita is really a national forest. There are over one hundred and fifty national forests, but only two national game refuges. The Wichita is also notable for the fact that it has a small herd of buffalo upon it. They were donated by the American Bison Society and shipped from the New York Zoological Garden in 1908. They then numbered fifteen and have since been increased by the addition of ten calves.

Rock roads throughout the state of Missouri are expected as a result of the new road law, and the steam roller and construction gang already are tearing up the surfaces in Lafayette county. The Lexington road district already has spent forty thousand dollars for grades and culverts since its organization. It expects to spend several times that amount in putting rock on the roadbeds. The farmers who fought the rock road bonds last spring are among the strongest workers for the movement now, as they realize the benefits of good roads.

Contracts for the construction of eight torpedo boat destroyers have been awarded by the acting secretary of the navy. They will range in price from $756,000 to $770,450. Each of the destroyers will be ten hundred and ten tons displacement and must be able to make twenty-nine and one half knots an hour. They will be finished and delivered within two years. The new vessels will be propelled by combination turbines and reciprocating engines.

The department of justice has practically finished negotiations with attorneys for the electrical trust, which will result in an agreed decree embodying all the government asks in its suit for dissolution of the alleged combination. Although the trust was said to consist of sixteen pools and the government sued only one, the government has received evidence that the other fifteen have been dissolved.

The Massachusetts Legislature this year appropriated ten thousand dollars for the purpose of fighting forest fires. With this money and with the cooperation of the government a system of towers with telephonic connection will be established and lookouts posted to watch for fires. In this way fires can be handled before making much headway.

President Taft addressed the American Bar Association last week in Huntington Hall, Boston, where the association has been holding sessions. Among other matters they considered a uniform law governing corporations, and placed themselves on record against the principle of recall for judges. President Taft spoke especially of the delays in law.

As a result of a canvass by letter of army officials stationed throughout the United States, Representative Hay, chairman of the committee on military affairs, who has been holding hearings recently, will urge Congress to adopt the five-year enlistment plan for the army.

International.

When André Jager-Schmidt, the Parisian journalist, drove up in an automobile in front of the office of the *Daily Excelsior* in the Avenue Champs Elysée at two minutes, 10 2-5 seconds past nine o'clock, Aug. 26, he had officially completed his circuit of the world in 30 days, 19 hours, 43 minutes and 37 4-5 seconds. He started from Paris July 17 in an attempt to beat the record of M. Stiegler of the Paris *Matin*, who made the journey around the world in sixty-three days. The route followed took him to Vladivostock by way of Moscow, to Yokohama, Vancouver, Montreal, New York, reaching that city Aug. 18.

Jules Pams, the minister of agriculture, was instructed during a recent cabinet conference to investigate the underlying cause of the high price of food which has resulted in considerable rioting in the northern departments of France. The war against high prices is being continued with unabated violence, and the government sent two squadrons of cavalry to the Valenciennes region with stringent orders to repress all disturbances. The storekeepers are beginning to quail and many of them have already intimated their intention of reducing prices as demanded.

The governor-general of French West Africa has recently announced to the government council a proposal for raising a loan of one hundred and fifty million francs for the purpose of providing railway lines in the thickly populated regions of the Sudan and for the construction of port works in French Western Africa. A scheme is also included for the extension of the ivory coast railway which will connect it with this system. The total cost of completing this scheme would probably be about four hundred and eighty million francs.

During the course of a lecture delivered by Pember Reeves at the Festival of Empire at the Crystal palace, London, he said that the trade of New Zealand was equal to forty pounds per head of the population. Although, he pointed out, the country was a rich one, it did not contain a single millionaire, but, on the other hand, there were very few paupers and the general standard of living in the country was as high as in any other country in the world.

Whether the King-Emperor will go to India at the end of the year for the great coronation durbar that was to be the most gorgeous of all the events connected with the accession of George V., is becoming more doubtful. The *Daily Express* says that the most disquieting and distressing accounts are being received at the India office, and that the prospect of famine, with its toll of misery, is looming closer every day.

According to the latest census returns published, the total population of the Union of South Africa, including all natives, is 5,238,478, an increase of about seven hundred and fifty thousand since 1904. Of these 1,278,025 are Europeans.

Industrial and Commercial.

The Woolworth building, which is to be erected in New York city at a total cost of thirteen million dollars, will contain fifty-five stories and from the sidewalk to the top of the Gothic tower the height will be seven hundred and fifty feet. The building will occupy altogether an area of about thirty-nine thousand five hundred square feet. The building proper will be twenty-nine stories in height. From the center, facing Broadway, will rise the tower, twenty-six stories high and nearly square in dimensions, being eighty-six by eighty-four feet. The plans call for the completion of the building by the fall of 1912.

The growth of eucalyptus hardwood timber trees is becoming a profitable feature in the development of Louisiana lands. The blue gum variety is one of the largest and most rapid-growing trees in the world. Seedling stands will average a height growth of fifty feet in six years, and one hundred feet in ten years. Under very favorable conditions individual trees have reached a height of one hundred and twenty-five feet and a diameter of thirty-six inches in nine years. The red and gray varieties grow nearly as fast and are even more hardy.

Work on another twenty-five-million-dollar railroad passenger station is to be started in Chicago in the spring for the roads now using the Union station in Canal street just west of the river. The new station will be built and operated by a union depot company as a holding corporation for the Burlington, the Fort Wayne (the Pittsburgh, Fort Wayne & Chicago), the Panhandle (Pittsburgh, Cincinnati, Chicago & St. Louis), the Chicago, Milwaukee & St. Paul, and the Chicago & Alton.

One of the purposes of the National Lumber Manufacturers Association, for which it was organized, "is to promote uniformity in the methods of manufacture and sale of lumber," and under this the association is now taking up the question of the standardization of the varying sizes of lumber which are being cut by manufacturers in standard patterns, such as flooring, siding, shiplap and other descriptions. There are thirteen affiliated associations.

In order to carry into effect the ideas of James J. Hill, head of the Hill lines, in regard to conservation of the soil and development of the Northwest, Prof. A. E. Chamberlain, superintendent of farmers' institutes for the state of South Dakota for five years, has been named development commissioner of the Great Northern road. The work which he will do is new in railroad effort.

More than four million dollars' worth of steel cars are under construction or contracted for in the Pittsburgh district. The Pressed Steel Car Company will build cars to the value of two million two hundred thousand dollars and the Standard Steel Car Company two million dollars.

A check for $42,395.69 has been received by the department of justice from the Standard Oil Company in payment of costs in the dissolution suit brought by the government under the Sherman antitrust law.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

PERFECT THOUGHT-MODELS.

CLARENCE W. CHADWICK.

THE opposition of the carnal mind to the idea of spiritual perfection only goes to prove that this so-called mind is made up of elements that are not related to spirituality. Hence the admonition of the apostle, "Be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God."

The very first step in this mental transformation is the giving up of imperfect for perfect "thought-models." (See Science and Health, p. 259.) The mission of Christian Science is to present such models to the world, and he who rejects this Science is but expressing his own disbelief in spiritual perfection. The command of Christ Jesus to be perfect as the Father in heaven is perfect has for him no practical meaning, and he is very positive in his assertions that perfection does not apply to him in this present world. What the future may have in store for him he deems contingent only upon his leaving this world, rather than upon the life that he now leads. He has, in other words, no intelligent grasp of man's unity with God, and because of this mental deficiency he does not realize the need of accurate thought-models, but is content to dwell upon the imperfections and counterfeits of material sense.

Passing strange that a so-called intelligent human being should take particular pride in identifying himself with the myriad forms of evil which he admits do not exist in the divine Mind; that he should delight in magnifying his belief in evil and in relegating good and its perfections to the realm of the intangible and unreal! Is this not proof that "God [the perfect One] is not in all his thoughts"? Many there be who claim to believe in God, and yet who vigorously denounce their concept of the teaching of Christian Science, which is rooted and grounded in spiritual perfection, goodness, and power. Standing thus in their own light, they reject the divine Principle of perfection, the acceptance of which would lead them into the kingdom of heaven on earth. Only through spiritual transformation can this chaos of human unbelief in all that is good, pure, and perfect dissolve and man's true individuality become manifest in an intelligent, sympathetic recognition and acceptance of all that makes for perfection.

It must be conceded by any rational thinker that the contemplation of things impure and imperfect leads inevitably to demoralizing mental and bodily conditions. The human parent who admonishes his child not to look at impure pictures or to read obscene literature, knows only too well the effect of wrong thought. He knows the danger of mental contamination, and so warns his child not to make companions of those who are known to think foul thoughts. He warns him against every form of evil association from his own view-point of what evil is; but, unfortunately for the human race, he has not compassed the full meaning of the term evil, and for this reason has not been able to hold up to his child uncontaminated or spiritually perfect thought-models. His efforts at molding and building human character have been almost wholly confined to the material plane; spiritual patterns have seldom been referred to as applicable to present-day thinking and living. The idea of a God of perfection may have been theoretically advanced, but the so-called perfect or model man that has been believed in and upheld in his indulgence of a hundred-and-one wrongs, has been far removed from the spiritual image and likeness of a perfect creator.

Thus it is that the Christ-model of a perfect God and a perfect image-and-likeness man has been lost sight of, and an imperfect mortal concept substituted in its place. Through this open gate has entered every known form of evil, sin, disease, and death. Christian Science is here to close this door, and in doing so to reveal to humanity the true meaning of prayer. It makes it very clear to the professing Christian that he cannot allow his thoughts to coincide with sense testimony and at the same time imagine that he is communing with the God of perfection. He cannot telephone for a material remedy and at the same time expect an all-powerful God to answer his petitions. To "pray with the understanding" of man's perfect relationship to God, he must realize the absolute necessity of thinking and living above the corporeal senses. To do otherwise is to believe in the tree of knowledge of both good and evil, which, according to Scripture, means death and not life to the believer. Spiritually perfect thought-models must be his constant companions if he would ever hope to reach heaven, the perfection of his being, for imperfect models all point in the opposite direction.

No perfect thought-image was ever known to instill fear into the human heart, while imperfect images are directly responsible for all the unhappiness and misery known to mortals. The image of disease has struck terror to millions of people and led them into the depths of suffering and despair. The alluring thought-images of sin and sensuality have enticed countless multitudes into committing the darkest crimes that have ever stained the pages of human history. Must Christian Science and Christian Scientists be stoned for pointing out the one and only way of escape from such suffering and crime?

On page 248 of Science and Health Mrs. Eddy says: "To remedy this, we must first turn our gaze in the right direction, and then walk that way. We must form perfect models in thought and look at them continually, or we shall never carve them out in grand and noble lives." The unceasing prayer by which sense testimony is renounced involves the contemplation of perfect thought-models, and Christian Science will continue to hold these ideals before the world until "every knee shall bow . . . and every tongue shall confess" that God and His ideas constitute the only reality and perfection of being. The demonstration of Christian healing is founded upon a spiritual or right understanding of perfection, and all opposition to this manifestation of "God with us" will be a thing of the past when spiritual ideals are universally adopted and the discordant imperfections of corporeal sense eliminated from thought and conversation.

THE COUNTERFEIT VS. THE REAL.

CHARLOTTE PAULSEN.

THE word counterfeit is derived from two Latin terms, *facere*, "to make," and *counter*, meaning "against." Nothing can be made and so successfully accomplish all that is implied in the word "against" as that which is made to resemble something in all its externals while diametrically opposed to it in character. No object can be so worthless, no aim so destructive, as that which seems to bear the marks of identification which belong to the good, the true, and the beautiful, but which are in essence everything that may be classified as against those very ideas.

Take for instance our banking system, based on a numerical table of values which is fixed for all times and all places. Can one conceive of more stupendous error than that which would result if in but one instance the figure two represented any value other than the number two? The error if undetected would multiply, as it continued to touch added business relations, until the confusion and loss could scarcely be estimated. It is absolutely essential, then, that value and representation be identical. It is even more essential that we as individuals, sustaining relations beyond those of commerce or of social intercourse, relations touching the great issues of life in which time and place have no part, should endeavor to make one the real self and the apparent self. As we work on our problems, incorporating one experience, eliminating another, we learn that extreme care and unceasing vigilance must be exercised to detect the counterfeit, so that it may be rejected and consciousness left open to what is true.

It is surprising, often, to discover that mortal mind, which always seeks to deceive and to counterfeit, does not itself believe what it claims to be or to do, and so we must look back of its pretensions to find the nature of error before we can apply the understanding of Truth which destroys it. Mortal mind may argue that pity directed a certain act, but understanding soon reveals that selfishness was the motive power. Mortal mind may claim that fear for another prompted an impulse, but again understanding discloses that jealousy—fear for self—was at work. It is interesting to note, as one studies the meanings of words, that ideas originally intended to be conveyed by those words have been through common usage and false belief so perverted that even in belief the human consciousness has counterfeited the idea and purpose of the word. "Gossip," an old Anglo-Saxon word originally, came from *godsib*—"sib" expressing the thought of relation or alliance. A gossip then was "a relation by religious obligation;" or, as conversation, gossip was related to God, good. What has the counterfeit grown to mean? The dictionary reveals that "nervous" originally meant "strength," "vigor," "force." Does a so-called nervous person resemble in any degree these attributes?

As we work with the truth, to make it the only basis for all thought, all action, and every relationship, we often find that during the time in which Love is preparing us for a true experience, running parallel with the unfoldment of the true is one or possibly several experiences with the same undercurrent of thought, which are not of Truth and which present themselves now and again as tests. They test our fidelity to the intuitions which come in an exalted moment of prayer. They test our patience, our trust in the promise of the one Mind, and they test our discrimination of what really constitutes truth as well as our sincerity as followers of Truth. Often we do not see the test until we have had the experience and found it valueless. While we are believing the counterfeit real, or trying to make it so, of course the truly real seems even farther away. If, however, we discern that what has just gone was but a counterfeit, that however much it resembled the real it was not consistent with our highest thought and purpose and therefore no part of true experience, we have risen nearer the goal than we may at the moment realize.

But better than learning through suffering is the learning which comes through obedience. When we are awake to the fact that error seeks to simulate Truth in every experience, then we approach the counterfeit cautiously until we are satisfied that it could not possibly be that experience which God intended for us, and that we need not enter into it very far, if at all. For every step we take, for every mile we run in this journey heavenward, if we pray in confidence and humility, the voice which rightly directs speaks to us through our intuitions. If we find, before long, that many voices are speaking, some urging, others enticing, like the Erlking's daughter, with great promises of enchantment and delight, then we must stand still and listen for God, and we shall surely hear that first voice again, even more plainly. The mistakes, the footsteps that stain the ground as we try to find the way back to regain the highway, will all be spared us, but it requires the meekness and humility of our great Teacher to be willing to listen, and having heard to obey.

We come into our own as we patiently wait upon God and strive to acquaint ourselves with Him. His plan for us is so much better than our own—and if we wait for Love to unfold it, the fulfilment of our desires is as naturally perfect and as beautiful as the rose that blossoms in its own time, made perfect by soft sunshine and gentle rains. It is our impatience that would force the flowering time and mar its beauty. Let us be patient, then, purifying our desires and reserving our treasure for the time when God shall take it up and bless it. Let us be awake to perceive that the experiences which are not of consecrated thought are but the counterfeits. The nearer we grow to our divine inheritance wherein all true desire is fulfilled and ambition crowned, the greater will seem the contrast between the true and the false, but understanding will make all plain to us.

Our beloved Leader has said, "The more closely error simulates truth . . . the more impotent error becomes as a belief" (Science and Health, p. 97); and she has also said, "When we wait patiently on God and seek Truth righteously, He directs our path" (*Ibid.*, p. 254). This is enough for us to know!

THE CORRELATIVE SCRIPTURE.

WILTON H. MC KERRAL.

IN the passages of Scripture from the third chapter of the first epistle of John selected by our Leader to be read at the Sunday services as correlative to the "scientific statement of being" from the Christian Science textbook (p. 468), the personal pronoun in the first person plural occurs eight times. It is evident, therefore, that the antecedent of this pronoun must be a quite important factor in these passages. For what then does the word stand? Is this "we" or "us" personal, meaning only the writer and certain others to whom the lines are addressed? Or is it sectarian, and intended to include only the adherents of a certain religious belief? Or is it universal, representing humanity?

These passages in their correlation to the "scientific statement of being" should therefore furnish us the key to their interpretation. The conclusion of the "scientific statement of being" reads, "Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual" (Science and Health, p. 468). The whole purpose of this statement is the declaration of man's spiritual nature; of his sonship with God. The theme of the correlative Scripture is, in this case, identical; and the antecedent of its personal pronoun we may fairly assume to be none other than the "man" of the scientific statement of being. These selections are neither of them in any way sectarian. Both are in the broadest sense universal.

Digitized by Google

The constant recurrence of this pronoun in the Scripture reading has a tendency to lead one to place upon it an emphasis which may cause the listener unfamiliar with Christian Science to suppose that it is intended to use the word in a sectarian sense. The justification of this inference lies in the law that emphasis tends to narrow the meaning of the word emphasized and cause it to pass from its general to its more specific signification; indeed it is questionable if the pronoun at any time requires special emphasis to bring out the full meaning of these passages. If in the first clause thought is especially directed to "us" as the recipients of God's love, the tendency is for the emphasis on this word to repeat itself throughout the reading, so that the appreciation of the sequence of thought is somewhat disturbed by the recurring intrusion of the idea of personality.

In a not unusual rendering of these passages thought is directed rather to God's gift of love, and to the things that pertain to it. The climactic idea of the first clause is then that of the bestowal of this gift. The second clause defines the very nature of the gift, the "manner" of love; that "we [man] should be called the sons of God." The third salient idea is that of the world's ignorance of this gift. The world "knoweth not." That the world knoweth not "us," if the line means no more, is indeed too small a matter to merit the position the statement occupies. But that the world knoweth not man as the son of God is the essence of the one great problem of being. The evidence that the world knoweth not "man" appears in its rejection of the manifestation of the true man and of the proof of his relationship to God revealed in the life of Christ Jesus.

The fourth affirmation regarding this gift is its immediateness. It is "now" that we (man) are the sons of God. The gift has the form, not of promise, but of present actuality. Known or not known, it is. In spite of the world's ignorance and indifference, it remains the one great fact. The fifth assertion is of supreme confidence that, although human consciousness as yet but dimly discerns the fact and the meaning of man's sonship with God, the constant contemplation and emulation of the Christ-ideal will cause the Christ-life and the Christ-mind to be understood and realized and manifested in human experience, until both God and man are fully known and their relationship established in human consciousness.

For "we know"! The world knoweth not, but "we" know! Is not this "we" somewhat personal or sectarian? Does not the assertion imply a schism in the brotherhood of man, a division between believers and non-believers? Here as elsewhere the pronoun refers to man. The sense of its use is therefore universal. The division implied is that which eternally exists between man in God's likeness and "the sinning race of Adam" (*Ibid.*, p. 345); between man receiving the Christ-ideal and with it "power to become the sons of God," and men of whom Jesus said, "Ye are of your father the devil, and the lusts of your father ye will do." This separation between the chosen of God and the rejected finds its line of cleavage, not between races as was anciently believed, not between sects as later theories affirm, not even between individuals as many still hold; but within the individual.

The demands of Truth are upon every man. They are imperative and eternal. "Neither death, nor life, . . . nor things present, nor things to come" can make man to be other than the likeness of God; and the realization of this fact is the universal heritage of man. Universal, likewise, so far as mundane experience goes, is the temptation to reject this truth and regard man as material, as suffering and mortal, as an animal preying upon others and becoming in turn a prey; as being the creature the senses declare him to be. Until "the time of harvest" these two contradictory concepts of man are found presenting their claims in each individual human consciousness. Though to human sense their proximity appears such that they may seem to occupy the same space at the same time, yet the division between them is really sharp and clear cut; not merely a line that may be crossed at will, but a gulf as wide and impassable as that between Lazarus and Dives.

One or the other of these concepts constitutes the reality of man's being. Both do not. Neither is one the ultimate reality for one individual and the other for another. If sense testimony is correct when it says that man is born of the flesh, it is also correct when it says that man dies. If the witness of the spirit is true when it affirms that man is the son of God, then man does not die in any instance. Spiritual man is not in need of salvation for he knows no other condition. Fleshly man cannot be saved, for he is of the world that passeth away. The need of human consciousness is to know, as Mrs. Eddy declares, that "man is not material; he is spiritual;" and to experience the regeneration which this understanding brings. Sonship with God is the expression of God's love from which not even the collapse of the objective universe shall be able to separate man. It thus appears that the division between the man of the apostle's fellowship who knows and appreciates God's gift and the man of the world who knows it not is not sectarian but has the same ultimate meaning for each individual in the universe.

The final sentence of the correlative Scripture sets forth the conditions essential to growth in the realization of man's sonship with God: "And every man that hath this hope in him purifieth himself, even as he is pure." The preceding declarations of both readings have been as broad and universal as the sunlight; this concluding statement is as narrow and incisive as a single ray. It carries home the immediate significance of these ultimate truths. It implies that the realization of man's sonship with God, of man as God's likeness, begins and ends with Godlikeness and leaves room for nothing else. The demand is purity, and it is urged on the ground that although the fact of man's sonship with God is universal, the hope of its realization cannot exist apart from the effort to be pure; to be like God as revealed in Christ. Error is always error, but to that consciousness which gives it room it stands for the time as truth, so that, however universal and gracious God's love, in error there can be no hope, except as the inception of hope impels to departure from error through the effort to be pure.

Thus it is seen that though the ultimate meaning of truth is the same for each individual, its immediate meaning is not, but varies for each human consciousness according as that consciousness recognizes man as the son of God or sees in him the offspring of the flesh. The glory of man's sonship with God is manifest only to him who accepts it and according to the measure of his acceptance. If one's aims and affections are fixed on things that are material, he must feel them slip from his grasp; if on things that are spiritual, he will know their permanence and the permanence of his faculties for their appreciation.

This discussion of the immediate significance of ultimate truth leads us back to the evident fact that the apostle addressed his epistle to a more or less definite body of individuals who had taken the first steps in the realization of God's gift, and who were obeying the injunction to come out from the world and be separate; also to the probability that in writing these lines this body of compatriots was in his thought the immediate antecedent of the much used pronoun, and that the original significance of these words was thus in a large degree personal. We may go farther, and say that the latter-day successors of that early church also have a right to claim a share in the personal significance of these passages; have a right to feel that they are addressed distinctively to those who are following the leadings of Truth in demonstration of sonship with God.

Is it not then mere verbal jugglery to attribute to these

Digitized by Google

words this duality of meaning, and especially to give pre-eminence to that meaning which appears to have been less obviously in the writer's thought? No! Dual meanings are found throughout the Scriptures because truth upon the lower plane is but the shadow and type of truth upon the higher plane. There exists a truthful literal interpretation and a truthful spiritual interpretation, which have the appearance of duality but which are unified by comparison in a perspective that shows their aspect on both levels. The differences are then found to be, not in the thought itself, but in the planes upon which its image is cast. The "scientific statement of being" is an utterance upon the plane of absolute Science, and the correlative Scripture should be considered upon the same plane.

The separation of the Christian from the world is a type of the separation between the man of God and the man of this world which is taking place in his own consciousness; and this in turn is a type of, as well as a part of, the separation between reality and illusion which is going on in human consciousness universally. This separation is in no case sectarian. It is evangelical. Its bars are raised not against humanity, but against sin.

THE COMMANDMENTS AS PROMISES.

ELOISE CAMERON MAC GREGOR.

IN studying the closing section of a Lesson-Sermon, the writer found this comforting promise from Zephaniah: "Thou shalt not see evil any more." While dwelling on the beauty of this promise of safety from even the appearance of evil, in that we need not see it any more, and also on the inspiration of the assurance that because the real man is fully equipped with spiritual sense he cannot behold evil, the realization came that this particular reference was not merely a glorious promise, but a divine statute, a law of good, and since this law is changeless and intelligible, humanity can understand and obey it here and now, and enjoy the immediate fruition of obedience.

Further thought revealed the fact that this is exactly the form in which Moses presents the Ten Commandments. All were laws of good, and to those who honored them the promise was given. To the rebellious senses the "shalt nots" may at first sound like stern restrictive laws, a code of negations which would deprive mankind of something. When, however, one turns to the "scientific translation of mortal mind" (Science and Health, p. 115), it is found that the commandments annihilate only the mistaken beliefs and depraved practices designated as the "first degree," the so-called physical statements of error, and further classified under the marginal heading as "unreality." Nothing is surely more obvious than that the supplanting of an error with the truth is not a deprivation but a great gain.

When the commandments, seen from this view-point, are accepted as a standard, and struggled for in daily life, their words are illuminated to the moral sense which arises phœnixlike from the combat, and which is described by Mrs. Eddy as the "second degree." Thus, on the firm foundation of law we descry the sheltering superstructure of promise. This higher sense being apprehended and followed, we approach the "third degree," where word and deed begin to honor and exemplify the commandments in the light of "understanding," which reveals them as spiritual declarations of the primal and ultimate verity respecting man and his oneness with divine Mind.

In and with this true consciousness of the power and presence of good, we need not and will not have any other life, substance, or intelligence but that which is spiritual; we will not make any graven image, nor will we take God's name "in vain;" our demonstrations of the truth will not be made void or reversed; we will not break the Sabbath consciousness of Spirit's supremacy, and will remember naught but Truth and Love triumphant; we will honor but the one "Father-Mother God, all-harmonious" (*Ibid.*, p. 16), indeed we cannot honor any other; we will not fear that we may kill, adulterate, steal, lie, or covet, because we shall have overcome the possibility of believing in or practising aught which is apart from infinite Love and its manifold expressions.

The more clearly we see this great truth and patiently practise these ten rules, the better we shall understand the Master's teachings and our text-book's explanation of them, until we cast fear, sin, and all evil out of consciousness, are enabled to bind up the broken-hearted, heal the sick, and reform the sinner, even as did Christ Jesus.

A SURE HAVEN.

WILLIAM P. MURDOCH.

DURING a yachting cruise on the west coast of Scotland, I remember on one occasion being compelled to take shelter from a storm in an almost landlocked loch. Having chosen a spot where I knew that the holding ground was excellent, I anchored until the storm was over, feeling assured of safety. For some time that night I lay listening to the howling of the squalls as they came tearing down upon us from the mountains, lashing the usually quiet waters of the loch into spray, and beating it against the sides of the yacht. I knew, however, that there was nothing to fear. The storm was powerless to harm, for the anchor was firmly fixed in the sure holding ground.

Often since, when in seeming trouble, my thoughts have gone back to that night, and I have been greatly helped by seeing how very similar are the experiences of all of us in our "passage from sense to Soul" (Science and Health, p. 566). In this passage at times all is peaceful and progress seems easy, all around is sunshine and calm. Then one day mayhap there arises a storm of error, all seems dark and sunless, while material sense howls and beats upon us. At such a time we may not be able to advance; but we can always retire for shelter into a quiet haven within, a haven of spiritual consciousness, knowing that we have our anchor fixed in sure holding ground, the realization of the omnipresence and omnipotence of divine Love. Knowing that, as Paul says, our life is "hid with Christ in God," we need never fear the seeming, the raging of error.

When the storm is over and once more the sun is shining, we advance joyously on our way, seeing that in reality the sun had not ceased to shine, but was only obscured by clouds, to mortal belief by a false material sense. We may therefore go on our way with rejoicing and fresh courage, knowing that we have always a sure haven within, where we can retire and hold fast our position, safe in our Leader's assurance that "divine Science rolls back the clouds of error with the light of Truth" (*Ibid.*, p. 557).

[Written for the *Sentinel*.]

LOVE'S BOUNTY.

JOSEPH MOSDELL.

THERE is no power save Love,
Resistless, tender, true,
In all the worlds above,
The universe all through,—
In heaven, on earth, and e'en in hell,
Throughout all time, in every place,
There omnipresent Love must dwell,
As universal as is space.
And Love's provision doth include
The men of ev'ry race and clime,
The cultivated and the rude,
Through all the centuries of time,
In ages past and yet to be,
Till all by Love have been made free.

SELECTED ARTICLES.

[Frederick Dixon in *World's Work*, London, Eng.]

In discussing the question of payment for mental healing, I have no intention of dealing with the whole ground covered by Clifford Howard in his article in your issue for May. I have neither the knowledge of the practice of the various bodies to which he refers, nor would it be in any way possible or desirable that I should discuss the facts were I in possession of them. The present inquiry must be confined solely to the method pursued in Christian Science practice.

In 1866 Mrs. Eddy discovered the Principle of the Christ-healing and withdrew herself from the world and spent three years, with the Bible as her only text-book, in the endeavor to fathom the inner meaning of the gospel message. Gradually, as she succeeded in her task, the vastness of Christian healing opened before her in all its overwhelming grandeur, and she saw that she was learning not merely a new method of healing the sick, but a new law, or, to be more exact, that old law through the operation of which spiritual harmony was maintained. An understanding of this law she recognized was a necessary prelude to demonstration, just as through demonstration its reliability could be tested. For this reason, while she was making the necessary demonstration, she withheld the publication of her book, with the result that when the book appeared later on, it was not as a mere contribution to religious ethics, but as the text-book of Christian Science, the truth of which had been already proved through actual demonstration.

Almost two thousand years before, the Galilean Prophet had come preaching to the world that wonderful message summed up in the ever recurring phrase, "Repent, for the kingdom of heaven is at hand." Now, the word translated "repent" means literally something causing a conviction afterward, and so a change of mind. When, therefore, a man changes his mind from a belief in physical law, with its warp of horrors and inharmonies, into an understanding of spiritual law, with its perpetual harmonious effects, he finds that the kingdom of heaven is indeed at hand, for "the kingdom of God is within you." In order, however, that the world might gain the benefits of the operation of spiritual law, it was necessary that the law should be explained. For this purpose, consequently, Mrs. Eddy founded the Massachusetts Metaphysical College, under a charter granted to her by the state, for the teaching of Christian Science.

That Mrs. Eddy charged for her teaching is evidently regarded by this critic as a proof of trafficking for money in spiritual affairs. What Mrs. Eddy really did was to charge for teaching those who were able to afford her fees, but she never hesitated to teach gratuitously those who were unable to do this, and a large proportion of her students were taught in the latter way. When, however, the writer of the article declares that Peter, and Stephen, and Paul gave their lives for what Christian Scientists were being paid to do, it is manifest that he has got his history a little out of focus. Similar reasoning would compare the early Christian martyrs with the Pope, the Archbishop of Canterbury, and the heads of the Nonconformist sects. It is, therefore, necessary to endeavor to gain a historical perspective.

For purposes of illustration the Established Church will suffice. The church exists to carry out the commands of the Founder of the Christian religion. Though it has surrendered its obedience to the command to heal the sick, it maintains its obedience to the command to preach the gospel. This preaching is done through its ministry, who in turn are educated in its theological colleges. Now, its ministers are provided for by life salaries, its teachers are provided for by salaries and fees, while its aim is, admittedly, the healing of sin, a more difficult undertaking, if it knew it, than the healing of sickness. Is anybody, in these circumstances, able to point to the difference between the preparation of church ministers and the teaching of Christian Science in the Metaphysical College in Boston? Yet one is paid for in a most ample way, and the payment is represented as legitimate, while the other, paid for in a far less ample way, and maintained without any endowments whatever, is referred to as "trading in the Holy Spirit." The distinction is not only absurd, it is positively indecent.

Again, a reader in the Christian Science church, who corresponds to a minister, holds his position for three years, and then merges again into the general congregation. During these three years he is paid a nominal sum, on which in only a very few instances it would be possible for him to live. Anybody who will turn to the public emoluments of the state church will find that they begin with a sum of fifteen thousand pounds a year (seventy-five thousand dollars), with the attached palaces, to the Archbishop of Canterbury; ten thousand pounds (fifty thousand dollars) a year, with the palace at Bishopthorpe, to the Archbishop of York; ten thousand pounds (fifty thousand dollars) a year, with a palace at Fulham and a house in St. James' square, to the Bishop of London; and so on downward. These ministers are regarded as carrying on the work which Jesus and the apostles carried on. Yet these episcopal descendants of Peter and Stephen and Paul, with all the minor clergy, are being paid for fulfilling part of the divine command, that of preaching the gospel, while a Christian Scientist is criticized for accepting payment for obeying the entire command, "to preach the gospel, and to heal the sick."

Jesus himself explained this. The laborer, he said, was worthy of his hire; and so he bade the disciples to take no purses with them, no money, no change of raiment, but accept all that they needed from those to whom they ministered. The writer of the article cites Paul in support of his argument. It happens, however, that Paul has spoken quite distinctly on this very point, and Paul had no qualms whatever about receiving payment for preaching and healing, no more qualms whatever in carrying out, in this respect, the commands of Jesus than the present ministers of the religious sects of the world:—"If we have sown unto you spiritual things," he says, in writing to the Corinthians, "is it a great thing if we reap your carnal things?" Is this "trading in the Holy Spirit"?

Finally, what do these various fees amount to? There are a limited number of teachers, who are not allowed to teach more than thirty pupils in a year. From these pupils they receive, in such cases as the payment can be made, the sum of twenty pounds (one hundred dollars). The writer of the article is wrong in his figures here. For this sum the teacher not only gives the pupil that teaching which is given in the theological colleges, and for which it is legitimate to receive payment there, but for the future becomes the person to whom these pupils can come for advice and for help at any moment. Hours every day are spent in seeing, helping, talking with or writing to the pupils who gradually gather round the various teachers. How these requirements are to be met if the teachers are not to charge for teaching, the critic does not explain, and be it remarked that some of the most violent criticisms, in this respect, come from the members of the orthodox churches who are provided for by endowments, which it is ludicrously pretended are legitimate, while it is contended that the fees paid to Christian Science teachers are illegitimate.

Again, your critic estimates the fees for treatment at four shillings (one dollar) each, and probably this is about as accurate an estimate as could be made. For this sum Christian Science practitioners all over the world are spending hours with their patients: sitting up with them at night, helping them financially when they are in want, striving not merely to make them well, but to give them that under-

Digitized by Google

standing of divine Principle which in the future will enable them not only to keep well themselves, but to assist their neighbors. "The student," Mrs. Eddy writes on page 358 of "Miscellaneous Writings," "who heals by teaching and teaches by healing will graduate under divine honors."

There is probably nothing easier in the world than criticism. There is certainly nothing less desirable than the denunciation from some molehill of self-righteousness of the labors of men and women who are doing more for humanity than their critics have ever dreamed of. The final comment is inevitable. So long as a man attempts to part the seamless robe, so long as he is satisfied with preaching the gospel or with healing the sick, he is entitled to accept fees compared to which any remuneration paid to a Christian Scientist is insignificant. The moment, however, that he adheres to the strict command of the Founder of Christianity, to unite these two offices, "to preach the gospel, and to heal the sick," he becomes guilty of "trading in the Holy Spirit."

The world has yet to learn that there are more things in Christian Science than have entered into its own narrow little philosophy. It is precisely because Christian Scientists are preaching the gospel and healing the sick, absolutely unselfishly, instead of preaching sermons and writing articles to denounce their neighbors for doing something which they do not do themselves, that Christian Science is rolling over the world with an irresistible impetus which no amount of criticism will ever be able successfully to oppose. The one hope of the opponents of Christian Science is to give the world a greater hope and a more perfect form of spiritual healing, and when they embark on this attempt they will find that they have embarked on Christian Science.

[B. O. Flower in *Twentieth Century Magazine*.]

Even after the monopoly or trust-seeking doctors had commenced their campaign against those who employed external methods in the treatment of disease, they disavowed all desire to interfere with the freedom of the people in the treatment of disease, if the healing was a part of their religious convictions, or to interfere with those who practised such treatment as a part of their religious belief, unless they administered deadly drugs. Here again, under freedom, a mighty revolution in therapeutic theories has resulted, and hundreds of thousands of cures of the sick who in a large number of instances had been pronounced victims of supposedly incurable diseases by the flower of the medical profession, have resulted in seriously diminishing the revenues of the drug-dispensing doctors.

What is even quite as significant, and for the well-being of civilization of far greater moment, is the fact that the cures effected by the chief representatives of this newer treatment have been accomplished through a direct appeal to the spiritual nature that has resulted in moral reformation as well as physical cure. The older treatments have left the invalid where they found him; the newer treatment, in most cases by awakening his moral nature, has led him from sensuous or sensual domination to spiritual supremacy. And so great have been the physical healings that the trust-seeking doctors are now as thoroughly alarmed as were the image-makers of Ephesus when through the preaching of the apostles the supremacy of Diana was menaced. Hence they have formed a mighty nation-wide political machine or organization, and are advancing along three definite lines in order to gain absolute monopoly of the healing art. From the Atlantic to the Pacific in various states they are seeking to obtain greater legislative protection for themselves—protection that will place the pocket-books and bodies of the people more completely at their mercy. At the same time they are striving to secure national legislation on the one hand, while endeavoring to fasten on the tax-payers a vast army of fear-creating, state-salaried medical inspectors who will virtually be drummers for the protected doctors.

Do you question this? Let me give you one illustrative fact. The report of the department of health for New York city, published in 1909, declares that 323,344 school children were examined during the preceding official year, of whom 242,048 needed medical or surgical treatment. Only 181,296 children out of 323,344, according to these disease-hunting medical inspectors, should not be turned over to the fee-seeking empirical doctors. Think of the result of having an army of 242,048 children turned over to the experimentation of doctors, a large number of whose theories are constantly changing, and having their minds filled with fear while the pocket-books of their parents are being depleted.

[Reynold E. Blight in *Los Angeles* (Cal.) *Express*.]

Speaking on recent criticisms of Christian Science Mr. Blight said: "The time has gone by when broad-minded men can look with approval upon such attacks. I am not a Christian Scientist, but my religion teaches me that I should give Godspeed to every movement that is earnestly and successfully endeavoring to uplift mankind.

"The Christian Scientists are rendering an invaluable service to the present generation. They are teaching us cheerfulness, optimism, and faith in the eternal goodness and love of God. The Christian Science movement is radiating health, peace, and love, and is the greatest moral and spiritual dynamic in the world today. So thoroughly have the Christian Scientists justified their spirit and purpose, so successful have they been in their practice, that they need make no defense with words, but can point to their work and let it speak for itself."

[From a correspondent in *Christian Commonwealth*, London, England.]

If anything were necessary to prove the vitality of the Christian Science movement, it could have been found in the fact that on a beautiful Saturday evening at the close of the coronation festivities Queen's Hall was packed from floor to ceiling with an audience bent on listening to a lecture on the subject. It was a deeply attentive and distinctly cultivated and thoughtful throng which followed the lecturer's remarks with manifest appreciation.

It was exactly half-past eight when a burst of applause greeted Oscar Browning and Bicknell Young as they walked on to the platform. Mr. Browning's introduction was brief. He expressed his sense of the great privilege of being permitted to take part in a meeting held in support of "the most powerful spiritual movement of modern times;" and went on to assure his listeners that, as he under-stood it, Christian Science was something far greater than a means of enabling "the world to dispense with doctors and medicines;" it was, of course, a road to the attainment of physical health, but it was even more "a fundamental basis of morality, a guidance in the conduct of life, a morality founded on Love, a course of life based on the omnipotence of Spirit and the nothingness of materiality."

[From *Chicago* (Ill.) *Examiner*.]

Dr. H. C. Morrison at an afternoon service at Desplaines (Ill.) camp meeting, referred to the growth of the Christian Science faith, and claimed that the preachers are to blame themselves for this great defection from the orthodox churches. "The Christian Scientists," said the speaker, "have drifted away to satisfy their spiritual nature, because we have failed to preach a full salvation. People change their boarding-houses in religion as in other things, if the food is not to their taste. When we stop saying 'I think so and so,' and stop preaching our doubts and call things by their right names, we shall break up this business and bring them back again."

[From *Ellingwood's Therapeutist*, Chicago, Ill.]

The careless attitude so often shown toward the "chronics" is responsible for many turning to the various cults—especially to Christian Science. How often does the doctor with little or no knowledge of the case, except from the recital of the subjective symptoms, turn to his well-stocked bag and give a panacea combination lauded for all such ills? It gives no results, a few more visits, a change to another M. D., and finally a part of the Christian Science rank and file. Why not retain all these chronics? Search diligently for the underlying trouble, when found treat it thoughtfully and specifically, but always diagnose the mental condition.

[*Manchester* (Eng.) *Daily Sketch.*]

King George is always a delightful host at the small dinner parties to which he invites minor members of his household and other friends. One subject is absolutely forbidden at his table on all occasions. It is that of politics. Before he came to the throne he saw no reason for not discussing them, but since then no one could guess that his Majesty had the remotest interest in the subject. Politics are not held as overinteresting at a great many tables nowadays, and one is much more likely to hear Christian Science, the theater, charities, or travel discussed.

[Edward W. Dickey in *Los Angeles* (Cal.) *Herald.*]

To one who has made a study of Christian Science, and who has been able to discern somewhat of its premise and conclusion, nothing could be clearer than the fact that it eschews, yea, abolishes all human will-power or human mind action. Nowhere is there to be found a teaching that so unreservedly turns its students to God, the one divine Mind. The Christian Scientist is ever conscious of the fact, "I can of mine own self do nothing." He realizes that it is the Father that "doeth the works."

Mrs. Eddy has made it clear in "Science and Health with Key to the Scriptures," which is the Christian Science textbook, that divine Truth and Love should dominate human activities. She has pointed out with distinctness and clearness that human will misguides judgment and animates mortal propensities. On page 206 of Science and Health she says: "Will-power is capable of all evil. It can never heal the sick, for it is the prayer of the unrighteous; while the exercise of the sentiments—hope, faith, love—is the prayer of the righteous. This prayer, governed by Science instead of the senses, heals the sick." The struggle to relieve suffering humanity is to be commended at all times, but it should be remembered that there can be but one right way of eliminating from human experience the ills which beset it. For this reason Mrs. Eddy has uncompromisingly given the truth to the world, and the "fruits" thereof are daily proving its verity and worth.

[W. E. Fell in *Yorkshire* (Eng.) *Post.*]

In the report of the subcommittee of the British Medical Association on "faith-healing," a bishop declared that he could not draw any marked distinction between the claims of such healing alleged by Christian Scientists, by Church of England healers, by Mohammedans, or by members of other religions. The doctors find, as your report says, "that the essential factor in all forms of psychic healing is mental suggestion." That this is the case in all other methods of mental healing there is not the shadow of a doubt, but it is at this point that Christian Science takes a radical departure from all other mental healing. The difference, as I have said, is at the outstart in the view-point. All other methods of mental healing have a materialistic basis; indeed, it is believed that mind itself is a form of matter.

Christian Science, on the other hand, does not take matter into consideration at all; its basis is spiritual. To the Christian Scientist health and sickness are alike modes of consciousness. All sickness, sin, and disease are recognized as the harvest of wrong thinking, and this wrong thinking, the cause of discord physical or mental, is rectified by substituting the right thinking. The Christian Science practitioner, therefore, strives to have that Mind which was also in Christ Jesus, in order that he may unsee the error. To see the truth about any matter is to unsee the falsity. To destroy the cause, the wrong thinking, is to destroy the effect, the sinful habit, the sickness or disease. To the extent that the practitioner possesses the divine Mind, that Mind "which was also in Christ Jesus," is he guided by the wisdom of God in his treatment of a discordant condition. Christian Science has nothing in common with hypnosis or suggestion. Christian Science teaches that to preserve health our thinking must be spiritual; it must manifest Truth, for as a man "thinketh in his heart, so is he." Health is spiritual wholeness. It is, therefore, exact knowledge or scientific knowledge of God that is required if we would free mankind from the results of their wrong thinking. Sin and its consequent sickness and disease are mental darkness, a darkness that can only be dispelled by the bright shining of Truth.

So far as Christian Science is concerned, there is no "special gift of healing." This healing is scientific; it is governed by Principle and its law; it is an exact science, inasmuch as it is demonstrable. It is, therefore, no special gift, but, like every other science, belongs to those who choose to become proficient in the understanding of the Principle and law that govern its operation, and who are willing to live the Christ-life.

[Arthur E. Jennings in *Northern Mail*, West Hartlepool, Eng.]

Christian Science healing is the result of spiritual understanding, and those who are healed by it can say with the apostle, "I know whom I have believed." Christian Scientists hope that the medical men of this country will never have anything to do with mental suggestion, nor encourage its practice in any way, because mental suggestion is the worst enemy that mankind must overcome and learn to destroy. It is a cause of sickness, but never its cure. According to the theory of hypnotism, the hypnotist may suggest something pleasant to one person and something wicked to another.

The word "faith" as used in Christian Science means understanding, and to understand the truth is to have faith in the truth. Christian Science healing is attained through a scientific understanding of God, man, and the universe, and there is one thing that prevents its abuse—it must be lived in order to be practised. The demands of the Bible must be obeyed, and pride, self-righteousness, selfishness, conceit, envy, and malice must be uprooted and cast out. There is no permanent healing except that gained by the understanding which comes through God—divine Mind. Paul said: "Faith is the substance of things hoped for, the evidence of things not seen." This is as true today as it was then, and in time all Christians will tell whether their understanding is correct by the results which follow.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

"VAIN REPETITIONS."

ONE of the numerous fallacies imposed on many who are taking their first steps in Christian Science, is the belief that the practice of this healing religion is confined to the use or reiteration of some formula or combination of words; whereas in their experience of its saving power it should have been made clear to them that it is the knowledge of God and man's relation to Him that heals the sick. As a matter of fact, it is difficult to understand how any one could be misled on this point when Mrs. Eddy has so clearly and concisely epitomized her teaching on this subject in the opening sentence of our text-book: "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God,—a spiritual understanding of Him, an unselfed love" (Science and Health, p. 1); and that this "spiritual understanding" is the knowledge of "the one true God" which Christ Jesus declared is "life eternal."

There is no doubt that in our present state of understanding it is necessary for us, mentally and sometimes audibly, to go over the arguments by which we may clear away the doubts and fears which so easily beset us, and which would tend to make us accept the material as the real and to reject the spiritual as the illusion; but should these arguments ever become to us the substance of our healing practice, rather than a means to an end, our usefulness would be lost, and we should be subject to the rebuke which was given by our Master to those who use "vain repetitions."

Mrs. Eddy, not only in Science and Health, but in all her writings, strongly emphasizes the necessity of acquiring this understanding of God and His relation to the universe, including man, which casts out all false beliefs and heals the sick, and while it is necessary to deny and reject every material belief which would becloud this understanding, we must not mistake the argument for the understanding which actually accomplishes the healing work.

It should be remembered, also, that a by-law of The Mother Church (Article VIII, Sect. 6) especially forbids the use of formulas by members of this church, as auxiliaries to either teaching or healing, and yet there are in circulation among professedly loyal Christian Scientists not a few of these so-called "helps" to an understanding of Christian Science, some even that it is alleged were prepared and given out by our Leader, notwithstanding her open repudiation of these documents and her expressed desire in the *Sentinel* of July 4, 1908, that they should not be accepted as "a precedent for a present student of this Science."

Any person who has intelligently studied the chapters on Prayer and Christian Science Practice, in our text-book, Science and Health, should be able to perceive that the use of these formulas, or the mere repetition of any combination of words, whether mentally or audibly, is not a Christian Science treatment. Under the sub-heading, "Mental Treatment Illustrated," on page 410 of Science and Health, Mrs. Eddy clearly defines the *modus* of Christian Science healing, but it will be noted that she makes no attempt to prescribe formulas for this purpose. On the contrary, she writes on page 412: "The great fact that God lovingly governs all, never punishing aught but sin, is your standpoint, from which to advance and destroy the human fear of sickness. Mentally and silently plead the case scientifically for Truth. You may vary the arguments to meet the peculiar or general symptoms of the case you treat, but be thoroughly persuaded in your own mind concerning the truth which you think or speak, and you will be the victor."

In addition to the formulas that we have mentioned, there are in circulation other papers which purport to be private talks of teachers to students, but which are entirely unauthenticated and would tend to build up a belief in the efficacy of words rather than works. These too should be eschewed by every Christian Scientist. There is likewise a tendency to make a fetish of certain articles and poems that have appeared in our publications. These articles and poems are valuable and helpful as expressions of growth in the understanding of Christian Science, but one and all they date back to the primal authority on Christian Science, our beloved and revered Leader's writings, and we must guard against mistaking the stream for the source.

ARCHIBALD MCLELLAN.

"THE KINGDOM OF GOD."

AMONG the many sage and sacred utterances of the great Teacher, none is of more importance than this, "The kingdom of God is within you." A study of this subject as presented in the four gospels, also in the epistles, richly repays one for the time devoted to it. Christ Jesus and several of his immediate followers tell us practically everything that is to be known respecting the nature of God's kingdom. Paul says that it is not "meat and drink;" that none who are unrighteous can enter into it, neither the extortioners nor the impure,—and he adds that "flesh and blood cannot inherit" it. Luke impressively tells us that Jesus discoursed on this subject to the people who followed him to a "desert place," and there he "healed them that had need of healing."

In our own day, no less than at that time, the greatest need of each one is not merely to be healed of distressing mental and physical conditions, a far greater need being to discern the kingdom within, to know that its government is vested in divine Principle and that its laws are spiritual and absolutely just. So long as we believe that the kingdom is far from us, either in a localized heaven or in some more favored place than that in which we dwell, we are self-limited and so fail to grasp our God-given opportunities for good until the mistake is seen and corrected. We shall never be in any place where God is nearer to us than He is where we are every moment, since, as the Bible declares, He fills heaven and earth; and until we recognize the absolute reign of divine Principle within our own consciousness we shall in vain look for it without.

He who questions divine justice does not see that he himself must enthrone justice within, as that before which every petty consideration of self-interest must bow down. As he begins to do this, he will get a firmer grasp of the power of right doing and right thinking, and he will know that as "God is not mocked," so the God-idea which he loves and lives cannot be mocked by any arrogancy of boastful mortal belief. He may have to wait for a complete demonstration, but this is really because the kingdom is not fully established within. Of old the psalmist said, "The Lord reigneth: let the earth rejoice." For this good reason we may rejoice exceedingly every day, for if God reigns within us, no foe can harm us, nor can we be subject to sin, disease, or death. No, for we are then subject to the Mind that governs the universe, the One who calls the stars by their name, and who says to the proud wave of oppression, "Thus far and no farther" (Science and Health, p. 124).

Pilate said to Jesus, "Art thou a king then?" His question would have been answered had he seen the sick made whole, the hungry fed, the blind given sight, the dead raised to life, and the tempest stilled by this Godlike man of whom he asked the question,—the one who had told all

Digitized by Google

who chose to listen of that kingdom within where they too might reign over self and prove man's God-given dominion, which cannot be denied nor destroyed. As we realize its presence we begin to hear, as did St. John, the angelic voices saying, "The kingdoms of this world are become the kingdoms of our Lord, and of his Christ; and he shall reign for ever and ever." Our revered Leader says (Science and Health, p. 99), "Truth has furnished the key to the kingdom, and with this key Christian Science has opened the door of the human understanding." It is for us to enter, and to reign with Christ!

ANNIE M. KNOTT.

A QUESTION OF AUTHORITY.

No thoughtful observer of common conversation can fail to note the well-nigh universal and often quite unconscious habit of dodging responsibility for statements, by prefacing them with "They say," or "It is reported." People who would shrink from the thought of misrepresenting anybody, not infrequently lend themselves to the purveyance of doubtful comments, as though it were not at all blameworthy so long as they do not definitely vouch for the verity of their questionable assertion. They become partners in an intentional wrong-doing, perchance, which they would despise did they but see it in its exact proportions and inherent meanness, and they thus contribute to that iniquitous "trade in tattle" which is so peculiarly discreditable to Christian profession.

This habit is vigorously taken in hand by the inspired writers, and one of the specific occasions for their condemnation of it is cited by Jeremiah when he voices the word of the Lord, saying: "Behold, I am against the prophets, saith the Lord, that use their tongues, and say, He saith. Behold, I am against them that prophesy false dreams, saith the Lord, and do tell them, and cause my people to err by their lies, and by their lightness; yet I sent them not, nor commanded them: therefore they shall not profit this people at all, saith the Lord."

No doubt a false concept of the divine nature, that as "King of kings" God would pursue under given conditions that course with which men had been made familiar by wicked earthly rulers, rather than any spirit of deception, would account for the falsifying to which Jeremiah refers; but whether it be the result of ignorance or of well-meaning but presumptuous zeal, it is manifestly of vital importance that the Bible student recognize the fact. Failure to perceive the human element in the sacred writings has been a stone of stumbling in all the ages. It has led the many to think of the Scriptures as verbally inspired, and thus precipitated the endeavor upon the part of scholastic theology to show that, though infinitely just and good, God is responsible for laws and conditions which are condemned as cruel and unjust by every intelligent moral sense, and this explains no doubt the sad fact that many have rejected the Bible as an inspired book. Here as elsewhere the corrective significance of Christian Science to Christian belief is beyond all estimate or valuation.

It has been Mrs. Eddy's vigorous and fundamental contention that God cannot be a party to, or either directly or indirectly responsible for, any course or condition of things which is out of keeping with the ideality of His nature, and this thought is rapidly revolutionizing the world's concept of God's relation to evil and to mortal experience. Christ Jesus frequently spoke with great definiteness about his Father's doings and determinations. Without the least show of reserve he declared the word of God, and with his consent and approval the disciples continued to speak, not only, as they averred, with divine authority, but with that divine effectiveness which proved that they were not trespassing upon prerogative but had simply entered into the assertive liberty of the children of God.

To the Christian Scientist the wondrous words of the Master, spoken not only to Peter but to all his disciples, "Whatsoever ye shall bind on earth shall be bound in heaven: and whatsoever ye shall loose on earth shall be loosed in heaven," have a vital present significance. He has come to know that the Mind "which was also in Christ Jesus," and which was mighty in healing the sick and sinful, is no less potent today when expressed understandingly by him who is of "a humble and contrite heart." Through that spiritual intuition which accepts its high calling and demonstrates its verity, the "thus saith the Lord" of Christian Science is again declared with power, and the wonder is again repeated that on earth man may speak "as one having authority."

JOHN B. WILLIS.

AMONG THE CHURCHES.

BOSTON, MASS.

The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m. In the new church edifice, Norway, Falmouth, and St. Paul streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading Rooms: Berkeley building (suite 306-307), 420 Boylston street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company building (second floor), southwest corner Devonshire and Milk streets, opposite Post Office; open daily, except Sunday, from 9 a.m. to 5:30 p.m.

SALT LAKE CITY, UTAH.

Overcrowding of the edifice of First Church of Christ, Scientist, on East Third South street, caused the formation of another congregation in Salt Lake. The members of this congregation have steadily augmented in numbers, until now a second church building has become imperative. While it has not yet been decided to begin building operations at once, plans have been drawn for a building to cost fifty thousand dollars. The new congregation owns a fine lot on East South Temple street, near the corner of Sixth East street. This was purchased some time ago at a cost of between nine thousand and ten thousand dollars and is worth very much more than that sum now. It is planned to erect on this lot a building of classic design surmounted by a dome, which will be a beautiful addition to the street. The proposed plans for the new church call for a stone and brick building with terra cotta trimmings. It will stand back thirty feet from the sidewalk and will have an auditorium with a capacity of one thousand and a Sunday school in the basement with seating capacity of five hundred. Off this will be large class rooms. The building will be fireproof up to and including the first floor.

Salt Lake Tribune.

ASHEVILLE, N. C.

The Christian Scientists of Asheville have moved into their new church building, 64 North French Broad avenue. Until the main auditorium is completed they will use the Sunday school room on the first floor, which is part basement, the entrance being on the south side at grade level. This room will seat about one hundred and fifty persons and has been finished in white and French gray and furnished with mahoganized opera chairs, giving a very pleasing effect. The exterior of the building is a reproduction of the Highland Park (Ill.) church.

Asheville Citizen.

THE LECTURES.

AURORA, ILL.

That Aurora has a very considerable following of the Christian Science faith was evidenced by the large audience assembled in the People's Church last evening [May 19] to hear an address by Bliss Knapp. The speaker was introduced by Albert M. Snook, who said:—

The pleasant task of introducing the distinguished gentleman who is to address you this evening has been assigned to me, not because I am a Christian Scientist, but for the reason that as an outsider I recognize that Christian Scientists are doing a good work. Also, as editor of an American newspaper, I consider that I should be remiss in my duty did I not help to further the interests of Christian Science or any similar movement that is helping to uplift humanity. I speak not so much from an intimate knowledge of the tenets of the church, for I am frank to state that I have read comparatively little of the writings of the gifted Mrs. Eddy, but I draw my observation more from my daily association with people of the Christian Science faith and from the remarkable results of Christian Science teachings that so often come to my notice.

I hold that in these days of marvelous invention and revelations no thoughtful person can reasonably oppose anything that tends to benefit humanity. Our world keeps moving, and what may be a cult today is an accepted fact tomorrow. From my observations I know the Christian Science people are, as a whole, among the much loved and very loving and consistently lovable people. They must be and they are inspired by a great faith and uplifted by a great spiritual truth.—*Aurora Beacon.*

OMAHA, NEB.

On May 11 William R. Rathvon delivered a lecture under the auspices of First Church of Christ, Scientist, at the Brandeis Theater, to a very large and attentive audience. The seating capacity of the theater was taxed to its full extent and several hundred left because they could not secure seats. Atty. Arthur C. Wakeley, a former reader of Second Church of Christ, Scientist, introduced Mr. Rathvon, saying in part,—

The presence of this magnificent audience emphasizes the increasing interest which has been evoked in the religious movement designated by its Founder as Christian Science; a new-old religion, if you please, but one in which thousands who have turned to it and embraced its teachings have found for themselves health and happiness and peace. He who from Mars' hill spake to the men of Athens, also said, "There are, it may be, so many kinds of voices in the world, and none of them is without signification." The greatest woman of our day and generation says in her immortal book: "In the sacred sanctuary of Truth are voices of solemn import, but we heed them not" (Science and Health, p. 232). With an ear attentive to these celestial visitants, with an ear attuned to the diviner messages of Life, Truth, and Love, as they came to her upon invisible cables of the air,—these she has intercepted; these she has translated so that they speak to us; messages written not in cipher, but speaking to us in the intelligent accents of Love for all,—for all the weary, the heavy laden, the trouble stricken of this earth. I will venture the assertion that there is not a person here tonight, though he be not a Christian Scientist, but who can call up in the circle of his friends or his acquaintances some one whose restoration to health or whose regeneration of daily life attests the truth of what I say.

It is results, friends, that we are looking for, and if a tree be known by its fruits, then the seeds of this new religion have fallen on fruitful soil. The average American, with his love of fair play, with a spirit of liberality which is our common heritage, is ever alert to appropriate the good, although it has not come down through the long train of ages encased in conventional parchment. Thousands who have turned to Christian Science for the cure of the body, have found in it also the cure of the mind. In every civilized country of the earth the Church of Christ, Scientist, has found lodgment. The first edition of Science and Health, the Christian Science text-book, was published in 1875, and the development and expansion of the religion founded by Mrs. Eddy stands unique in history. Founded upon divine Principle, and not upon personality, the present continued increase in the organization of new churches, the accessions to membership in The Mother Church, refute the statements which you have doubtless read in the press and heard from some pulpits, that the passing on of its Founder would be the death-blow to Christian Science.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Aberdeen, Wash.—Frank H. Leonard, Grand Theater, Sept. 19.

Fond du Lac, Wis.—Judge Clifford P. Smith, Henry Boyle Theater, Sept. 22.

Gloversville, N. Y.—Bliss Knapp, Darling Theater, 3:30 p.m., Sept. 17.

Grand Rapids, Wis.—Judge Clifford P. Smith, Opera House, Sept. 21.

Lexington, Mass.—Bliss Knapp, Asbury Temple, Waltham, Sept. 18.

NEW GERMAN PAMPHLETS.

Two new pamphlets, "Mary Baker Eddy: Her Purpose and Accomplishment," by Frederick Dixon, and "The Discoverer of Christian Science," by B. O. Flower, printed in German only, are announced by The Christian Science Publishing Society. Price, postpaid; single copy, 5 cents; 12 copies, one address, 55 cents; 50 copies, $2; 100 copies, $3.50. Address all orders for these pamphlets to The Christian Science Publishing Society, Falmouth and St. Paul Sts., Boston, Mass.

TESTIMONIES OF HEALING.

It is with a heart full of gratitude to God for Christian Science that I relate what has been done for me, and I sincerely hope that others may be benefited by reading my experience. In October, 1908, I began to be ailing, and during the winter had an attack of acute lung trouble, which left me with a racking cough that continued almost incessantly, so that by spring I had become much reduced and was unable to do my housework. The doctors said I had lung trouble, and one said the condition was very serious. He told my husband I could not live longer than Christmas of that year. This thought, that I was doomed, produced a state of mind which can only be understood by those who have experienced it.

One noon my husband, who was working in a lumber yard a little out of town, asked me to walk out with him to his work and get the air. I told him I would later, if I felt able to do so. When left alone I lay down and thought and thought. My whole soul and being was one prayer going out to the Almighty that I might be spared for my children's sake. Suddenly the thought came to me to go and see a lady of whom I knew as one standing very high in the community; but our intimacy was not such as would account for this sudden and overwhelming desire to go to her, as I had never before done so in my troubles.

I had heard that she was a Christian Scientist, but that meant nothing to me, as I did not know what Christian Science was, though I had a vague notion that it was not reliable. There was absolutely no thought of treatment for my trouble when I started for her house. When I entered it I began to cry, and she kindly inquired about my health. I answered, "I am going to die, and I want to go to Denver to consult specialists on lung trouble." She asked me to remain until after lunch. I had not the least idea of what she was going to do, but my heart began to lighten; the clouds seemed to be lifting, and a ray of hope returned to me.

I coughed so incessantly while waiting that I was ashamed to disturb them so. When she was ready she sat down and told me a little about Christian Science and what it had done for her sister. I asked her to treat me, and she said she was not a practitioner, but she knew that Truth would help me anyway, and she would do for me what she could. She gave me a treatment and I stopped coughing, and have never since had a coughing spell. I knew I was cured, and I went home so happy that words cannot tell it. I kept repeating over and over as I walked home, "God bless Mrs. —— and Christian Science." It was four o'clock when I got home, and I was so hungry that I ate two large sandwiches and later a hearty supper, the first meal I had enjoyed for months, as I had been on a rigid diet.

After this healing I had a peculiar experience. I was lying awake one night, feeling very thankful and happy, and closing my eyes I seemed to see plainly the cavity in my lung in process of disappearing, until it vanished, and I knew that the disease was locked out forever. I went to sleep and slept well all night, and I have had no sickness since, not even the headaches from which I suffered for years. My healing was in the latter part of June, 1909, and the second of August the same year I went to cooking in a sawmill camp near Kremmling, Col., where I had from twelve to thirty-one men to cook for, and I did my own washing besides. I was very busy, but never tired, and gained in flesh. The mill closed down the twentieth of December, and I came to Kremmling and sewed steadily until the seventh of May, 1910, when I commenced cooking again for a sawmill camp near Fraser, Col. I am abundantly strong enough to do this hard work. I have never been in a Christian Science church and am too busy to read much. My son broke his ankle and the doctors told him he would be laid up for six weeks, but through my small knowledge of Christian Science he was able in two weeks to take a team and skid logs. I also relieved my brother-in-law of rheumatism.

I owe my life to God, and to Mrs. Eddy who brought this wonderful truth within reach of the most humble. I remain a true believer in Christian Science.

MRS. JENNIE CONE, Kremmling, Col.

Over four years ago I was healed through this blessed truth which is free to all. Before Christian Science came to my notice I was a mere wreck for a period of about ten years, with what physicians pronounced complete exhaustion of the nervous system. My nerve suffering was no mere pretense, as I seemed to have a terrible fear even of my own dear mother, and a dislike for her. Many times I threatened to take my life, thinking that this would end all my troubles, that then I would be at peace with God, my friends, and relatives. I did not realize that God is a God of the living and not of the dead.

I tried *materia medica* and other material methods faithfully, with only temporary relief. I continued in this way of doctoring until Christian Science found me in bed, where for sixteen weeks I had been suffering. The truth was brought to me by a dear cousin, also by a kind practitioner who came with her and gave me treatment. I remember being told that God means good, and that good is only another term for God; also that devil is the same as evil. I afterward learned the true meaning of both these words. The definition of God as given in the Glossary of Science and Health (p. 587) I found most helpful. When we know how to cast out the evil, or devil (false thinking), and thereby become conscious of the allness of good, we are really healed,—morally, physically, and spiritually.

I felt rather discouraged the evening before the practitioner's second visit, and thought of giving it all up, though I had said before trying Christian Science I would give it a fair trial, as I knew all other remedies had utterly failed in my case; but I felt vastly different the next morning. I had not realized that I could be healed with absent treatment. In ten days after my first treatment I was able to eat dinner with the family, and the world looked pleasant and beautiful to me. I am truly grateful to God, and to Mrs. Eddy, Truth's messenger, who has brought to humanity this Christ-healing which sets the captive free.

In connection with my own healing I would like to express my thankfulness for my mother's healing through Christian Science. She became interested, through my healing, nearly five years ago. For more than a year she suffered many things, and when help was necessary we sought the aid of a kind practitioner, also a nurse who worked faithfully. About the beginning and later on during Christian Science treatment it seemed best to call in a physician to diagnose the case, as it helped to quiet outside thought. The case was accordingly diagnosed as follows: Weak condition of heart, kidney trouble, dropsy with much enlarged feet, limbs, and abdomen, complicated with very distressing conditions. My mother is eighty-two years of age, but all these ailments have been overcome through Christian Science treatment. The healing was slow, and many discouraging times attended the patient and myself, though mother always manifested a desire for Christian Science treatment. When asked which she preferred, she would invariably reply, "Christian Science is the thing to have. Doctors cannot do anything for me." In this way we were enabled to cling steadfastly to the truth, knowing that man is the expressed image and likeness of God and cannot suffer, for God "healeth all thy diseases." By persistently holding on to Truth, the demonstration was made, and mother is truly grateful and free from physical suffering when realizing that God is all power. She maintains an increased interest in Christian Science and makes it a point to go over the Lesson every day, and is helped spir-

Digitized by Google

itually. I am also glad to say she is now able to take part of the care in housekeeping, and enjoys visiting her friends occasionally.

We are both very grateful for the understanding we have of Christian Science, and hope to make this truth, this demonstrable religion, practical in our daily lives.

LYDIA G. WEBSTER, Conshohocken, Pa.

I have been a student of Christian Science only a short time, but in that time my outlook on life has completely changed. In the old days things were beginning to look so hopeless; I was getting older, had several infirmities, and was beginning to think that death was my only way out. I belonged to the church, but got very little comfort; I did not find the Bible interesting, though I honestly tried to read it. I tried to believe in a God of love, but could never understand or reconcile this with the fact (as I had been taught) that He sent all our sickness and trouble, and that however hard we tried to be good, it made very little difference in respect to our sufferings; so I tried to hear things, and worship the God I found so strangely unlike even the loving human parent. May He forgive me! how could I have known so little of the All-loving!

One day, when I was telling my troubles to one of my loved boys, he said, "Mother, why don't you go on with Christian Science?" He knew that two years before I had bought Mrs. Eddy's book, but it seemed that I could not then understand it. His words, thank God, revived my waning interest. I began to make inquiries, and found a friend who had been healed of a painful condition by Christian Science. I went to a practitioner myself, and in three weeks I was completely cured of a distressing form of rheumatism, and two other most trying and painful ailments. I was so delighted, and so thankful to God, that I took up in real earnest the study of the Bible, in conjunction with Mrs. Eddy's "Science and Health with Key to the Scriptures," and the knowledge of God thus gained has quite changed my outlook on life. I know that God is Love, and is close to each of us,—Love's all-power a mighty shield before us. He created all that was created, therefore evil does not exist, for God pronounced creation good.

I know that if I try to mold my life on that of our beloved Wayshower, Christ Jesus, though I may falter and fail often, yet made in God's likeness, spiritual, not material, I have only to stretch out my hand in faith to Him, and His strength is sufficient for me, and all fear leaves me.

MRS. EMILY EASTWOOD, Hoylake, Cheshire, England.

With the help of God I will tell something of what Christian Science has done for me. I became interested in it for the benefit of my husband, not thinking of myself, but I received a great blessing from it. I was healed of eye trouble and severe headaches, besides a great many other ailments, but the greatest help of all was the spiritual uplifting. I had a decayed tooth restored, and since that time another tooth has been restored by the truth.

I have been in Science for over six years and have been my own practitioner when physical healing was needed. I feel very thankful for this understanding of the bread that comes down from heaven, which we gain from our dear Leader's writings. I am truly thankful to God for this blessed truth, and shall try to be a better woman each day.—MRS. MINERVIA J. CARTY, Denver, Col.,

---

I became interested in Christian Science over two years ago through the healing of my wife. We were then married fifteen years. For two years before coming into Christian Science she was not able to do her housework, neither did her condition allow of the work being done at the house the greater part of that time. Having tried numerous prominent doctors and all sorts of medicines without relief, she was at last advised by her doctor to undergo a severe operation. This being her only hope for relief, she consented; but after it she suffered untold pains, and not being relieved from her former troubles, her misery was still greater.

One day she met a lady who advised her to try Christian Science. She did so, and after the fourth treatment she found relief and was able to do light housework. By reading our text-book, Science and Health by Mrs. Eddy, while also taking treatment, she has gained a good understanding of the truth. Today she is enjoying the truth she found in Christian Science, and doing all work which is expected of a woman with pleasure and ease. Our home has the past year been filled with happiness and sunshine. Surely I have reason to be thankful for Christian Science, which has brought the truth into our home.

E. J. PUTT, Baltic, Ohio.

I came into Christian Science over two years ago, after having suffered for many years. I had tried a number of doctors, medicines, hygiene, and so forth, but found no relief therein. At last I was advised to undergo a severe operation, which I did a year previous to my coming into Christian Science; but after it I was worse, so I concluded to try Christian Science. After the fourth treatment I was healed so that I gave up glasses which I had worn for about twelve years, during which time I had suffered greatly with my eyes and head.

For about two years before coming into this truth, much of the time I could not have the children at the house, and at times could not bear even their whispering, so that they were often compelled to leave the house and I would sit alone all day with only a little light, as my eyes could not bear it. All this seemed very hard to me and my family. I was also healed in Christian Science of stomach trouble which I had had for many years, and now I eat things that I could not eat before. I have also been healed of bladder trouble, from which I suffered severely at times for about fifteen years. I was subject to frequent colds, but have not had a cold this winter, though I wear only half the weight of clothing I used to wear before coming into Christian Science, and am comfortable. I am now able to do harder work and with greater ease than ever before. Whenever a sense of fatigue arises, I cling to the thought that God is my life and my strength, and His power has no limit; and I very soon overcome it in this way.

My daughter was healed in Christian Science of St. Vitus' dance, in four weeks' treatment. About five months after coming into this truth, I healed both of my children of wearing glasses. My son was near-sighted, so that he could not see the figures on the blackboard unless he stood very close to it, and at times his eyes pained him. Now he sits in the rear of the schoolroom and says he can see the figures very plainly. Since their healing the children have been reading more than ever before and without glasses. Later, my son had measles, but was not sick to amount to anything, and I could scarcely keep him in the house. All these healings were brought about through the understanding that God is the only Life; that He does not make any of His children to suffer, and that there is no life in matter.

Some time ago I visited with my brother, who was one of my doctors, and he said, "Who would have thought a year ago that you would be the woman you are today!" To him my healing seemed wonderful, as he had not seen me so well for many years. That these lines may help some poor sufferer and wanderer who is seeking for the truth is my earnest wish. I praise and thank God more each day for this truth as revealed to us by our dear Leader, Mrs. Eddy.—MRS. E. J. PUTT, Baltic, Ohio.

Both my husband and myself feel very grateful for what has been done for us, and we wish to add our testimony to the healing power of Truth and Love as demonstrated in

Digitized by Google

our own experience. As the result of a strain from over-lifting my husband became critically ill. Under the old thought I should have been greatly alarmed; but trusting all to the power of infinite Mind, the alarming symptoms soon disappeared, and in a short time my husband was able to resume work. In my own case a serious stomach trouble, accompanied by great distress and inability to retain my food, was soon relieved and in a few days healed. This occurred nearly two years ago, and there has been no recurrence of the trouble.

MRS. GEORGE W. STEVENS, Ashland, Ore.

Nearly fifteen years ago I purchased my first copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and since that time I have seen all manner of disease destroyed by the truth contained in this book, and many forms of sin overcome. I have always loved our Leader, and I have four children who will rise up and call her blessed. Three of these have never taken a drug in any form, and the fourth one's life was saved when we turned from *materia medica* to God for help.

I have been healed of many ills and have been made a happy woman in place of being a discordant mortal. I am now spending the most of my time in preaching this gospel by healing the sick and binding up the broken-hearted, as we are told to do. My heart overflows with gratitude to Mrs. Eddy and love to God for leading me into this truth.

MRS. NELLIE H. MATTHEWS, Knoxville, Tenn.

It is with a heart filled with gratitude that I tell what Christian Science has done for myself and family. I became interested in this teaching about two years ago, when I tried Science in my family; and many are the blessings that have come to us. My boy of seventeen was taken with a severe attack of mumps, but was able to be out in a few days after taking treatment. The ailments that have come up in our family have always been destroyed almost immediately, in most instances through absent treatment. My daughter was also cured of very bad headaches. She was not able to attend school and had to wear glasses, but after the third treatment in Christian Science she gave up her glasses and has not worn them since. Her eyes were healed and she goes to school regularly, for which we are all thankful to God, and to the one through whom the truth came. My boys were both healed of blood-poison. In a serious case of accident, in which one child was hurt on the head and was delirious, it was all overcome, showing that divine Love will take care of us if we trust.

I am grateful to Mrs. Eddy for having brought us this wonderful truth, and above all to God, who led me to it. I find that Truth never fails. I used to read Science and Health, but now I study it with the Bible, and have received more understanding in this way.

MRS. L. SCHNEIDER, Sea Cliff, L. I., N. Y.

Words fail to express my gratitude for the benefits I have received through Christian Science. Before hearing of this truth I had a very serious illness which was said to be tuberculosis of the kidneys, my doctor advising the removal of one kidney, as medicine could not do me any good. I underwent an operation, but the kidney was not removed, owing to my being in such a low state. I was in the infirmary and convalescent home three months. When I returned home a nurse attended me every day to dress the wound in my back, which had not healed, and the doctor came once a week. Twelve months elapsed from the time of the operation, during which time I suffered severe pain.

I had not made any progress toward recovery, but was gradually getting worse and worse, when my doctor advised a second operation. This greatly disturbed me, and the thought struck me one night, "Who is it that cures us when all is said and done? It is not the doctors. Why not, then, trust to God to cure me?" I saw that I had not been trusting God while thinking that medicine and surgery could do the work. A passage from the Bible came to me, "Lo, I am with you alway, even unto the end of the world," and this filled me with a great hope. I knew that I should get better again. I told a friend who had my welfare very much at heart about my thoughts, but he seemed to regard this as anything but a good sign and was very despondent because of what I had told him. When he went home he prayed for me, and on raising his head the first thing he saw was a newspaper with an article which related to Christian Science. He brought the cutting to me the following evening and asked me to read it, which I did. I cannot express the uplifting feeling that came over me, and I exclaimed, "Oh, this is an answer to all our prayers!" My friend said the same thought had occurred to him.

I went to see a Christian Science practitioner a day or two afterward. From the first treatment all pain left me. In a short time I was able to give up the doctor and nurse, and the wound in my back, which had not progressed at all under medical treatment, healed beautifully when left completely to God's care. I was healed at the same time of catarrh, from which I had suffered about ten years. My joy and thankfulness for this splendid demonstration of God's love and care can be imagined, for now I am perfectly healthy and free. From the time of first hearing of Christian Science, over two years ago, I have had no return of the above troubles. The promise of Christ Jesus, "Ye shall know the truth, and the truth shall make you free," has been fulfilled for me. I know that God recognizes no sickness or imperfection in what He has created; therefore I, as God's child, should not do so either.

I am indeed thankful to God for my healing and for the love and help so generously given me; also to our revered Leader, Mrs. Eddy. It is my earnest desire to show my gratitude in deeds rather than in words.

MRS. E. EATON, Manchester, England.

Three years ago our boy inadvertently upset some boiling water, scalding his legs very badly. We immediately took off his clothes and found large blisters, possibly from the steam being confined. He suffered a great deal, and the usual remedies were applied at once to alleviate the pain if possible; but day after day went by without bringing relief. We became very anxious, as we now had used all the material means that we knew about without any particular benefit being experienced. It was three weeks since the accident had occurred, and the burned places had grown worse.

One morning, having wrapped him up well and placed him in a chair, I had him taken out in the garden, as it was a pleasant sunny day. A neighbor who was passing inquired how he was getting along. I replied that he was very bad, and then told her of my trouble, how much he suffered and how we must have the doctor to burn the proud flesh that had formed. She said to me, "God can heal him if you want Him to. The boy does not need to suffer any more." She talked to me about God.—His goodness to us, His love and care for us; of the Bible, and the wonderful teaching in Science and Health, where we could learn of this great truth that heals all our diseases; that we could have this help now, if we were willing to give up all material means and rely upon God, trust our child in His care, and take Christian Science treatment. I was willing to do this, and thought my husband would be also. When my husband came in he offered no objections; but had not much hope of the child's being helped by Christian Science. I did, however, and our boy received great peace and comfort from the first; and he felt that God would heal him. The right leg was never dressed but once after this, though

Digitized by Google

the other had to be dressed many times, as the burns seemed so large, extending from the thigh down nearly to the ankle; yet, thanks to Christian Science, relief came; the pain and swelling were overcome so that he was able to be about in a few days, playing at times about the house, and attending Christian Science Sunday school in less than two weeks. Shortly afterward he commenced to go to the public day school, as the burns healed rapidly, new flesh and skin grew naturally, and the legs resumed a normal appearance and size. We had feared he might be crippled by drawing up of the muscles where the burns were so deep, but thanks to God our dear boy is well and was perfectly healed through Christian Science in a very few treatments. He is learning to know God and something of this wonderful truth as taught in Science and Health, in the Sunday school where he loves to go.

Not only for the foregoing benefits am I grateful, but above all this, the child constantly thinks about God and often takes the books and asks us to explain the Scriptures and the Science to him. By this I know that he is reaching out to gain a knowledge of God, and his love for God will increase as time passes on. For this blessing that has come to him of the spiritual Life, we are more than thankful, and grateful for the help that came to us through Christian Science in our hour of need.

ALWINE KANGIESER, Berkeley, Cal.

[Translated from the German.]

It is with a grateful heart that I wish to tell of the infinite blessings which we have received through Christian Science. In July, 1910, our dear mother was suddenly taken ill with hemorrhages from the lungs in such a severe form that there seemed to be no hope of recovery. We had not heard much about Christian Science at the time, but applied to a Christian Science practitioner for treatment, which was taken up immediately. Mother improved at once, and in October was able to take a four-hour trip in order to attend the services here. She had been afflicted with a sore on her leg for the past twenty years, but this too was completely healed during the treatment.

I also have experienced blessings through Christian Science. I had been suffering from a uterine disease for quite a while, and had been told that I could be relieved only through an operation, but I confidently applied to the Christian Science practitioner, knowing that disease has no power over us. I am completely freed of my suffering now, and thank God with all my heart, also our revered Leader, Mrs. Eddy, for showing us the right way which leads to the recognition of Truth.

FRAU KÖNIG, Linden-Hannover, Germany.

My daily prayer is that I may dwell more and more "in the secret place of the most High," and every hour I shall strive to realize more of the omnipotence and omnipresence of divine Love. One evening as I was reading the *Sentinel*, the thought came to me that I had received countless blessings from a realization of this truth, and, since this has made so many changes in our home in every way, that I should tell it to the world.

About seven years ago Christian Science was introduced into our home in order that I might have a chance to live, and I wanted to live, for I was then only sixteen years of age and had everything to live for; but until we turned wholly to God it did seem as if harmonious conditions were few and far between. To be brief, I had had an accident and operations which left me much deformed, and the attending physicians, with others consulted, said that it was impossible for me to live long. My parents knew the doctors' verdict, but could not bear to tell me. I suffered greatly for more than a year, when I commenced to realize that I could not keep it up much longer, and this was, as many of us know, a sad thought; but, thank God, Christian Science has changed it all. I am now enjoying the best of health, the diseased conditions have entirely disappeared, and I have full use of a limb which before I took Christian Science treatment caused me the greatest agony if it accidentally touched the floor; in other words, it was useless to me. Now, aside from a slight lameness, which is diminishing, all is perfect harmony.

The physical healing is indeed grand, but I thank God for the different view of everything which has come to me. Just to know that God is infinite is restful; to realize that here and now we may experience God's goodness in every way is uplifting in itself, and I cannot express in words what I feel toward Christian Science. I can, however, live and show my gratitude by striving to realize more every hour that "Love is reflected in love" (Science and Health, p. 17). In our home harmony governs where many times before evil seemed to rule. Father has been healed of many minor complaints; mother has had many minor demonstrations, in fact every one in our family has been helped not only physically, but morally. The habit of swearing occasionally when annoyed left me, as did bad temper, etc., for a more harmonious thought was and is uppermost. Every day is as it were a Sabbath, a peaceful, restful day, and I am thankful I can say that I am gradually working upward in thought toward the one Mind.

JAMES E. MAGEE, St. John, N. B.

My first knowledge of Christian Science came to me over six years ago, through reading a book on the subject. I knew immediately it was what I wanted, and after borrowing a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I ordered one for myself, and I consider it by far my most valuable possession. It would be impossible to tell all the ways in which I have been benefited, but among them is the overcoming of an eye difficulty. This enabled me to lay aside glasses which I had worn every day for eighteen years. I was also cured entirely of malaria and severe headaches from which I had suffered from childhood. But what means more to me than all else is the correction of an irritable disposition and hasty temper.

My life is as happy now as it once was miserable, and I am indeed thankful to God for this blessed truth, and very grateful to Mrs. Eddy for giving us in "Science and Health with Key to the Scriptures" the rule of right living which we can follow for ourselves.

SERAPHINE HEYMAN, Clinton, La.

For some time I have felt it was my duty to express publicly my gratitude for all the blessings which have come to me through Christian Science. In March, 1909, I was stricken with a nervous collapse which lasted about seven months. I then got some relief, but in September I was taken with a very severe bowel trouble, which lasted until December. My physician did all he could for me, then told me that he wanted me to see a specialist; so I went to Portland to do so. I came home exhausted, took to my bed, and grew worse for two weeks. The last night of my suffering two doctors were with me from midnight until morning, and they decided to take me to a hospital as soon as my strength would permit.

My daughter, however, was very much opposed to my going, as she has a dread of hospitals, and had faith in Christian Science. She telephoned to a practitioner in Auburn, who came in the afternoon. I was very sick all night, but in the morning I was much better, sat up a short while, and took Science and Health and began to read it. From that time I grew better so fast that in three days the bowel trouble was overcome and I was sitting up nearly all day, something I had not done for two weeks.

Digitized by Google

In seven days I went downstairs and ate dinner with the family. This was the middle of December, and I had not eaten any solid food for four months. I began to eat anything that the rest did which I wanted, and nothing hurt me at all. In just seven weeks from the time the Christian Science practitioner came to me I went to the shop to work on my old job, a well woman.

My husband also was healed of a chronic stomach trouble that he had suffered with for years. The doctors had failed to help him, but when he saw what Christian Science had done for me, he tried it, and is now well. We feel that we cannot say enough in praise of Christian Science, *which has done so much* for us.

MRS. J. L. BENNETT, Norway, Me.

[Translated from the German.]

It is with a joyful heart that I herewith acknowledge the great blessings which Christian Science has brought me and mine. Some two years ago a dear daughter passed on with lung disease, and our younger children, whom we believed to be infected with the disease, did not seem to get along well physically; so we were in a state of constant fear and worry, which in my case brought on a severe heart and nervous trouble. My left arm was almost paralyzed, and I could sleep but little, while medical help proved of no avail.

In this hour of greatest need we heard of Christian Science, and some literature was given us. I thus gained my first idea of the teachings of Christian Science, and called upon a practitioner in Stuttgart. She received me kindly, and during the conversation directed my thought to the omnipotence, perfection, and love of our creator. The following night I had my first good sleep in a long while, and the next day I was well. Before that time I had frequent attacks of catarrh, in fact I was never entirely free from it; but I have had no return of this trouble. Through the reading of the *Herold* we have learned that there is no reality in hereditary diseases, and that we need not be afraid regarding our children, who are now doing splendidly. I cannot bear to think of what would have become of us had we not found Christian Science. We have learned really to trust God and to love Him, and we have a much clearer understanding of the one infinite Mind. My constant prayer is that all men may know Him in His glory through the teachings of Christian Science. More peace has come into our home, and is manifested in our relation to our fellow beings. In regard to the discovery of this truth, I would say of the Founder of the Christian Science movement: God reward her for it! To God be praise, glory, and thanks for ever and ever.

FRAU LINA FEESER, Aalen (Württ.) Germany.

[Written for the *Sentinel.*]

LIFT UP THINE EYES.

CHARLES C. SANDELIN.

ART thou aweary, friend? Thy burden's weight
As slowly on thou ploddest seems more great.
Come, friend, thy burden drop and rest thee; stay,
And hear in patience that which Love doth say.

Seest thou the hand that now this burden takes?
Hearest thou the voice that in thy heart awakes?
Thou know'st the touch of One forever near:
Canst thou then sorrow, friend? Canst thou then fear?

In all thy journey thou wert not alone:
Love ever nigh thee has His guidance shown;
When, bruised and stumbling, bitter tears did start,
Sweet peace did triumph: Love's beam in thy heart.

Lift thou thine eyes from off the weary earth—
See thou in gladness thy exalted birth;
Behold—nay, not afar—thy journey's end
When thou each word of Love dost comprehend!

FROM OUR EXCHANGES.

[*Christian Intelligencer.*]

Our blessed Lord illustrated in all that he was and did the value of personal consecration. Jesus measured up to the perfect standard of his sermon on the mount and forever established the power of a holy life. With a purpose no less comprehensive than the redemption of a world, we might well have expected the Master to set about his tasks with the energy of desperation. What we find, however, is the patience of faith, the sweet consciousness that truth embodied in life would be infinitely more potent than truth conveyed through profound reasoning or established by military conquest. Christ employed character to set forth the eternal, redeeming, and sacrificial love. Jesus' teachings were marvelous, his deeds glorious, but both precept and deed were the expression of his spirit and the fruitage of his personality. It is Jesus himself, as distinguished from any single activity of his life, or rather, as operating through every detail of life, that constitutes the supreme appeal to men.

[Charles W. Stevenson in *New York Observer.*]

There is a fierce desire which is in the flesh and of the world, and thousands there are who live in this material plane; but they who really reach out into the unknown and draw to themselves the events and the love which are there, these are the men and women who aspire and who live in their spiritual natures. Fitting into the nature of the particular individual, these dreams become a part of the life of a man; they are incorporated into the soul structure; they are the fiber of his feeling and thought. And it is here that they become a reality, even though they fail, and it is this beautiful influence of the aspiration and the dream, the wish and the accomplishment, which leads on to higher and yet higher life. What man has figured out of the maze of the conflicting events, that which he has come to believe as to right and joy and justice,—these things become the framework of a secret desire that is ever his lodestar and which he cannot and does not tell to any.

[*Universalist Leader.*]

Down at the bottom, the gospel rests upon the witness of the whole life of Jesus to the truth of the things which he said to men. We believe in the gospel because we believe in him. Beyond every word and line and precept of the story looms the personality of one who speaks the truth because he is true. We believe it because we cannot doubt him. And it always happens that the closer we approach to his truth, the more we conform our lives to his precepts, the more he becomes our Lord and Master, our king and deliverer. Whatever may be true of other guides, it is one of the beautiful and blessed facts about the gospel that those who follow Jesus are not disappointed in the end. The curse of disenchantment is on many paths men travel through the world. Those who have accepted Jesus as their witness to the truth about life, have found with increasing years increasing peace and joy.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

Had such a man as Socrates no faith in Christ? To be sure he had. His faith in the divine presence and in the moral imperative, the faith that lifted him above all fear of opposition, suffering, and death, the faith that energized him to make the sacrifice of himself in the service of his ideal, was faith in Christ. All faith in goodness is faith in Christ; and no man has ever yet vanquished the evil in himself or risen to a true spiritual consciousness otherwise than by the saving power of Christ, who is the way, the truth, and the life, however little they may have known of Him as the son of Mary who spoke on the hillsides of Galilee the words of eternal life and suffered and died on

Digitized by Google

Calvary's tree. Yet it is an infallible truth of experience that, without faith in Christ, however crude, however dim, no man can and no man does conquer the beast within him and manifest the God.

[*Continent.*]

The backbone of antipathy to unlimited arbitration among enlightened nations is in fact simply another manifestation of the most pervasive of all human failings—selfishness. It is a nationalistic phase of the universal phenomenon of looking every man on his own things and not also on the things of others. Because Jesus Christ is eternally and omnipotently against selfishness, he must appear on the side of the arbitration ideal as the treaties of 1911 embody it. His second great commandment, "Thou shalt love thy neighbor as thyself," stands for nations as for citizens. The nation which loves its neighbor will wish the neighbor's interests in any question of temporary misunderstanding justly judged by those able to view its claims without bias or predilection. It will not insist on its own opinion regardless. There is where arbitration fits closest to Christianity.

[Rev. Frank N. Riale, Ph.D., D.D., in *Christian Work and Evangelist.*]

The new day is upon us when, as nations, we are to be born again in a moment into the kingdom of heaven—the kingdom of His dear Son. It is the kingdom in which what is Christ's is ours. It is the new heaven and the new earth, wherein dwelleth righteousness, in which the Almighty has baptized us with His holy presence, so that each will create according to his ability, and each receive according to his need. It is the heavenly community and the divine democracy, in which the dream world of the seers will be but a dim picture of the real world all will see. Faith that our relation to God is that of Jesus will bring all this about. "If thou shalt believe, thus thou shalt see the glory of it."

[Rev. R. I. Horton, M.A., D.D., in *British Congregationalist.*]

Specially let us lay stress on this—the Lord of love is coming. The coming of Jesus in the flesh long ago left upon history this great mark—that love is the key of life, and that love to God and love to men is the only true religion. It is the Lord of love that is coming; and how shall we meet him if our hearts are full of hate, if our nature is warped with passion and all the cruelties of unholy feeling? We must love if we would meet him, and by love we must prepare for his coming.

[*Watchman.*]

In the time of Christ and his apostles it is noticed that the Jerusalem Jews were apt to be the bigoted ones and the most hostile to the new faith, but the devout men from every nation under heaven who had been broadened in their ideas were prepared to accept the freeness and breadth of the gospel. Isolated religion tends to narrowness. The true religion must stand in the stream of the world and be in the world, though not of it.

[*Congregationalist and Christian World.*]

He from whom weariness slipped as a garment, as he taught the woman at the well, will share with all the weary that meat which the world knows not of. He will disclose, in duty nobly done and burdens bravely borne, those springs of spiritual renewal which are the secret of all rest, and reveal among the shadows healing compensations.

[Rev. A. E. Owen Jones in *Christian Commonwealth.*]

The preachers who have nothing to say in these times of social upheaval, no guidance to give, and who ignore the well-nigh universal demand for a better order, will deservedly lose the moral leadership to which their place in the ministry entitles them.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

The Publishing Society has secured, and now has ready for distribution, a fine photogravure of Mary Baker Eddy made by Littig & Co. of New York from a colored portrait painted by Miss Alice C. Barbour, which was based on a photograph taken by Mr. Bowers of Concord, N. H., in November, 1891, and with a rearrangement of her hair that was very pleasing to our Leader.

This admirable portraiture of Mrs. Eddy, printed in three sizes on India paper and mounted on heavy plate paper ready for framing is for sale at the prices shown on opposite page.

The field will undoubtedly be gratified to learn that a book (132 pages with index) containing the "Excerpts from Editorial Comments" which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, also the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is now on sale, published in two styles of binding. For prices see opposite page.

Two of our Leader's poems, "Shepherd, show me how to go," and "Love," set to music by Frederic W. Root, are on sale by the Society. For description and price see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $3.00; six or more copies to one address, $2.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 40 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.30; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 15 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Leatherette covers, deckled edges. 15 pages. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE. June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 70 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $1.00; 50 copies, $1.80; 100 copies, $3.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25— 0: 5 s.: 2d.;	Mk. 5.30;	F. 6.45
2.25— 0: 9 : 3 ;	9.50;	11.60
2.50— 0: 10 : 3 ;	10.60;	12.85
4.00— 0: 16 : 5 ;	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

The Southern Pacific Railroad Company has filed its answer in the suit of the United States, to declare forfeited to the government for alleged violations of the conditions of the grant, 2,373,000 acres of timber and agricultural land, valued at sixty million dollars. The contentions set forth in the answer are that the United States for forty years has failed to protest against the sale of this land in tracts larger than one hundred and sixty acres and at a price exceeding $2.50 an acre; that the government has freely used the railway for transporting troops and munitions of war; that it accepted $1,857,234 for taxes upon this land, in addition to large sums for surveying and patenting.

The Southern Pacific Railway Company, through its vice-president and director of maintenance and operation of the Harriman lines, absolutely rejected a demand for recognition of the Federation of Shop Employees, comprising five shop craft unions and twenty-five thousand men. That such recognition, with its implications, would hamper the company in performing its duty to the public was the position taken by its officials. Union leaders asked for it on grounds of economy and expedition, and admittedly because of a feeling that greater centralization of capital and power made corresponding centralization among various unions desirable.

The state department is having difficulty in finding suitable sites for embassy and legation sites abroad. When Congress passed the bill for purchase by this government of such buildings it named one hundred and fifty thousand dollars as the maximum price which could be paid for any one building. From estimates submitted to the department it now appears that this restriction may prevent the United States from owning homes for its diplomatic officers in any of the big foreign cities. It is only at the smaller posts, it is said, that the government will be able to purchase sites within this figure.

The state of California has passed an act providing for an expenditure of eighteen million dollars for state highway construction. The act stipulates that two roads shall be built from the Oregon border to Los Angeles county, where they shall become one and extend to the Mexican border. One of the roads is to extend along the coast and the other through the central part of the state between the Coast range and the Sierra Nevada mountains in the valleys of the Sacramento and San Joaquin rivers. The length of roadway planned is about seventeen hundred miles.

At the aviation meet in Boston last week a cross country circuit of one hundred and sixty miles was negotiated by two machines in 3 hours, 6 minutes, 22 1-5 seconds and 5 hours, 22 minutes, 37 seconds respectively. Prearranged stops were made at Nashua, N. H., Worcester, Mass., and Providence, R. I. A flight from the field to Boston light, covering a distance of thirty-three miles, was made in a record time of 27 minutes 35 1-5 seconds, equal to a speed of seventy-one miles an hour.

Forty-nine claimants of the Watson coal land group in the Matanuska district of Alaska have been cited by the Juneau land office to show cause within thirty days why their claims should not be raised to the commissioner of the general land office for cancellation. The government charges that they have not complied with all conditions required under the grant. They think they have and are preparing an answer.

Stockholders of the West End Street Railway Company at a special meeting voted in the ratio of three to one to sell their property, privileges, and franchises to the Boston Elevated Railway Company. A merger of the two companies is thus virtually effected on terms which the public in large measure dictated. This vote obligates the Boston Elevated to undertake at once the construction of two new subways and an extension.

Before the annual convention in Cincinnati of the National Association of Supervisory Postoffice Employees adjourned, resolutions were adopted favoring placing postmasters of all classes under civil service, the purpose being to eliminate the dismissal of the postmasters when national politics are changed.

Seventy-two Chinese students recently arrived in San Francisco on the Pacific Mail steamer to be assigned to various American universities. Among the students are three Chinese girls. China now has in training in American educational institutions more than eight hundred students.

International.

A cabinet council, presided over by President Fallieres of France, has been held to consider the disorders arising from the cheaper food agitation and to adopt measures intended to ease the cost of living. The minister of commerce and the minister of agriculture explained in detail the results of their investigations of the problem. The cost of everything eatable is higher throughout France today than ever before. The cabinet approved a scheme to ameliorate the situation by facilitating the importation of cattle and frozen meats, by installing refrigerating and storage plants, by demanding that the railways lower their rates for the transportation of food, and by suspending the tariffs on fodders.

"The Chinese people," says the commercial attache of the British government at Pekin, China, "have at last come to realize that railways are an indispensable factor in the development of their country's resources, and that the vast stores of mineral wealth that lie dormant all over the empire are of no use to them unless exploited by expert methods.

"They have, moreover, awakened to the fact that with practically unlimited supplies of raw materials and cheap labor there is no reason why they should not themselves manufacture many of the articles they have hitherto imported from abroad. So railways are being constructed and projected in every province, coal and other mines are being opened, and factories are springing up in every direction."

By half a million votes to ninety-three thousand the Trades Union Congress, in session at Newcastle-on-Tyne, England, rejected the proposal for the organization of a citizen army. The subject was introduced by the London Glass Blowers Society in the form of a resolution as follows:

"This congress, realizing that militarism and the existence of a regular standing army constitute a menace to popular liberty, is of the opinion that the time has arrived for the institution of a real citizen army, free entirely from military law during times of peace, officered entirely by the election of the rank and file; such citizen army to be used for defensive purposes only.

In various parts of Finland movements have been started in protest against the bill, approved by the Emperor, for submission to the Duma, cutting off Kivinebe and Nakirka parishes from Viborg province and adding them to the province of St. Petersburg. This measure is regarded by the Finns as the first step in the partition of Finland.

France last week submitted to Germany her ultimatum concerning the Moroccan dispute, and there is reason to believe that it will be accepted, if certain privileges demanded by Germany are granted.

Industrial and Commercial.

During the last three years the Tata Iron & Steel Works, for the production and sale of steel, has been under construction at Sakchi, near Kalimati, in the state of Nagpur, India. This is considered to be the greatest industrial undertaking ever attempted in India. About seventy European and American engineers have been employed in putting up the plant. In a few weeks the first blast furnace will be "blown in." All the raw materials of the iron industry are within easy distance. The company will obtain its iron deposits in Mayurbhanj. It has its own lime quarries in the Jubbulpore district and it can obtain cheap coal from the Jherria coal field close by. Water is supplied by the Subarnarekha river, one and one half miles away, and to provide against any emergency a reservoir with a capacity of two hundred and fifty million gallons has been constructed. One great object which has been kept in view in designing the machinery has been the reduction of the human element to the smallest proportions possible, as labor in India, though cheap, is troublesome to get and to keep. The Tata Iron & Steel Works will require only twenty-five hundred laborers. The government of India has undertaken to purchase annually twenty thousand tons of rails.

Plans are said to be under way for the merger into a single corporation of the many companies which now make up the New York Central system. The purpose is mainly for the better financing of the railroad business. In connection with the consolidation a new bond issue is proposed, sufficient to cover the existing outstanding obligations of the system besides providing for future capital expenditures. The scheme involves hundreds of millions of dollars and a railroad mileage of over thirteen thousand, which the New York Central proper has about four thousand.

Farmers in Iowa have entered upon a project to drain their swamp lands, and the total cost of the improvements when finished is estimated at three hundred and seven million dollars. It is expected that hundreds of thousands of acres will be added to the tillable area of the state. The reclamation was begun in 1904 and thus far nearly eight million dollars has been spent on public drainage ditches in fourteen out of the thirty counties in which the work is projected.

The removal from New York to Chicago this month of the entire auditing department of the Wells, Fargo Express Company will require five special trains to carry the thousand employees of the company, their families, baggage, and household effects.

No American cotton crop ever grown has sold for as much as the one just marketed, the total value, including the seed, having been one billion thirty million dollars, according to the report of the secretary of the New Orleans Cotton Exchange.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE HABIT OF HATING.

HON. CLARENCE A. BUSKIRK.

THE world contains many people who cherish, as did the writer at one time, the foolish and pestiferous notion that to be "a good hater" is evidence of strength of character. Sometimes, even, the absurd notion is held that the ability to hate well shows a corresponding temperamental disposition and power to love well. Literature abounds with mischievous encouragement of such notions. Incorrect opinions about God being "a hater," opinions which are derived through a superficial consideration of the meaning of some passages in the Bible, are appealed to for supporting the falsity of such notions. Great writers like Thomas Carlyle have adulterated their mighty influences for good with the false teaching that hate has shown itself at times in the affairs of the world, as in the French Revolution, for example, to be a sublime dynamic energy to assist humankind toward bettered conditions.

One of the blessings incident to the careful study of the writings of Mrs. Eddy, who was a very safe and profound reasoner (as is shown whenever we apply the ultimate tests of logic, although the hasty glance at some of her statements might lead to the opposite opinion), is to be found in the fact that such study has been educating us how to think more broadly, more surely, more exactly. We learn—many of us, at least—how to analyze and synthesize more successfully. Besides, when we come to any of those highways or byways in our meditations where heretofore we always found ourselves to be painfully stumbling along in the dark, our progress is assisted and illumined if we will turn on the search-lights of the great primary truths of Christian Science.

Let us now try to turn on one of these search-lights, to dispel the misleading falsehood that to hate is sometimes good. Let us begin with the obvious truth that the meaning of the verb to hate is the exact antipode of the meaning of the verb to love. Of course the term love is here used according to its higher meaning only. Love is the creative impulse and motive to be discerned throughout God's universe. Harmony is the incident of love. Nothing could endure without harmony. On the other hand, discord, the antipode of harmony, is always destructive. Love and harmony therefore are based on God's law, they are affirmative elements of the divine Principle of being. Hatred and discord are not such affirmative elements. They are negations of love and harmony; hatred the absence of love, and discord the absence of harmony; therefore, hatred has no law to energize and maintain it.

All the maintenance and energy hatred may seem to have or to exhibit come from some supposed source wholly apart and distinct from God's law and government. In other words, hatred is a falsehood, and is to be classified as belonging to the extensive category of falsehoods which have their place in "mortal mind." Any force or energy exhibited by hatred is destructive, and is followed by consequences more or less mischievous according to the degree of force or energy manifested. This is so because any force or energy exhibited by hatred proceeds from the circumstance that it arouses to action what is bad and not what is good in human beings. Hate contributed to the French Revolution its crimes and horrors, not its triumphs which inured to the benefit of our race. The latter resulted from higher causes. Not a single good thing in the life of any people or of any individual can be traced to the causation of hate, because hate's action is necessarily discordant and destructive.

The term "a good hater" is a self-contradictory term. There cannot be a good hater unless there can be such a thing as good hatred. To say that there ever can be such a thing as good hatred necessarily implies that a force or energy which, like every phenomenon of evil, is a negation of law in its origin and manifestation, as much so as a mistake in adding numbers is a negation of the rule of addition, would be the same as saying that what is lawless may at times be lawful; or, to pursue the mathematical illustration, that a violation of the law of addition may at times produce a right result. If love be a force or energy the results of which are sure to be good, then the antipode of love, hatred, can be nothing else than a false exhibition of force and energy, the results of which are sure to be bad.

By way of illustration, let us suppose that one is a student of Christian Science, and that he has come to the decision that it is wrong for him to hate any person. That is a big step toward the attainment of harmony in his consciousness and life, and likewise in becoming a source of harmonious influences for the good of others. To nurse a feeling of hatred for any person or persons is to nurse a venomous source of discord, the effects of which are manifested mentally, morally, and physically. Now let us suppose that while he has thus decided to try to overcome his hatred for any person or persons, he is still of the opinion that it is a good thing to hate certain kinds of evil "impersonally," or in the abstract.

There are good people who still pride themselves, perchance, upon the belief that they are "good haters" of evil, especially of certain kinds, in the abstract, although they have learned how much better it is to have no hate for any person or persons, or for any particular thing or things in concrete form. Would it not be wise for such a one to ponder the question whether or not he can hate "impersonally;" that is to say, are we sure that we can hate the vice of lying, for example, without associating in our consciousness this vice with some person or persons? Further, if we are indulging in the habit of "impersonal" hatred, for example, for the vice of lying, are we not thereby in danger of making a reality or truth of that toward which we are directing the thought of hate? Again, are we thus pursuing the right method for overcoming what when we analyze it proves to be a negation or absence of truth, and therefore no part of the reality of God's universe? On the contrary, are we not pursuing a course which is the very opposite of the scientific course? Do we not need to remember that Love and Truth can overcome evil, and that hatred has no power to do so? In Science and Health (p. 243) we read, "Love has no sense of hatred. . . .

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

Truth, Life, and Love are a law of annihilation to everything unlike themselves, because they declare nothing except God."

Finally, is not the habit of hating, no matter what the object of our hatred may be, whether personal or impersonal, a very bad habit for us to cultivate? Does not any kind of "hating" on our part tend to make us more or less discordant? Is it not better to understand that everything in God's universe is good, and worthy to be loved, and simply to know the nothingness of all that does not belong to God? We may also ponder with profit the apostle's declaration, namely, "Love is the fulfilling of the law."

LEARNING HOW TO CLIMB.

GRACE SQUIRES.

In the early stages of his experience in Christian Science one is likely to think that when he has sufficiently grown in grace, purged his own consciousness of very evident errors, that his life will be one long uninterrupted harmony. Friends and neighbors, tradesmen and traveling crowds will all fall into line, and through him demonstrate the universal brotherhood of men. From such a view-point there is a later discrepancy which is often bitter, and one has patiently to readjust his approach to what we call the wear and tear of daily life.

In the confusion of this state of mind, an article purporting to point out how the unlovable could become lovable and the insufferable sufferable, was hungrily read by one of the "weary wanderers, athirst in the desert," of whom Mrs. Eddy writes (Science and Health, p. 570); but to that consciousness it failed to make its point, and the unlovable and the insufferable remained. To begin with, he found, after leaving the heights and descending with surprising swiftness into the valley, that the purging of his own consciousness was not the work of a moment, and he decided that if the redemption or even amelioration of his surroundings was only to be gained through his own spotlessness, it would be some time before his affairs would be adjusted. Mrs. Eddy says, "The new birth is not the work of a moment. It begins with moments, and goes on with years" (Miscellaneous Writings, p. 15). In his disheartened mood these words were more bitter than encouraging.

But Truth is its own leaven. Through the persistent study of the Bible and Science and Health, coupled with a growing conviction that there must be some definite base upon which life could be harmoniously lived, the demonstration of this point was made, and after growingly frequent days of uninterrupted peace came the realization that he could say with deep sincerity that the unlovable and the unendurable had lost much of their power to invade his life. Yet, looking about, he still found the falling away of some friends, the irritability of others, the dishonesty of business associates, and the selfishness and discourtesy of the world at large, and realized that his demonstration had not been based on the destruction of these things, which he had at first attempted, but rather on the destruction of his own response to them.

His first advance in the right direction was taken when he learned this, that the reformation of the world is not collective but individual. Wrestling with his own errors, instead of wondering about the depravity of others, he more clearly saw the universality and therefore impersonality of evil, an ignorance rather than a viciousness which would use him in common with others, and as two times two became indisputably four to him, he learned the process of its acquirement and ceased to scorn those who still thought this multiple something else. He found, too, that Christian Science has intermediate steps in its application, that no one need remain in the valley even if the heights are distantly indistinct, and that if he could not at a bound love that which was unlovable, he could do the next best, and shut out his sense of anger by sweeping the provocation, the misunderstanding, the insult, even intentional maliciousness from his consciousness.

He learned in time to do this as effectually as though the circumstance had never been, and so laid the axe at the root of criticism, resentment, shutting out weary hours of mortal mind's turning and overturning, and learning in the process the deep spiritual meaning of the Master's declaration, "The prince of this world cometh, and hath nothing in me." He determined that it should have nothing in him. From discouraged self-pity as to why this or that should be constantly defeating his climb, he learned that there is no climb without resistance, and its steepness became the test of his strength, the opportunity to measure his understanding of spiritual truth against all material inroads, to find his heaven within and not without.

He read how Jesus, surrounded by a vicious mob and pushed to the brow of the precipice with malicious intent, had stilled neither their violence nor hatred, but "passing through the midst of them went his way." Inexpressibly deep and beautiful the lesson in this miracle became to him, —the divine ability to pass through all forms of evil, and untouched to go one's way in mental separateness. Now, instead of wondering, after some years as a Christian Scientist, why the world is much the same, he finds, in the struggle to overcome its evil beliefs, his own exaltation. As some one has so beautifully expressed it, "Poised, sure, protected, safe, looking only to God, he stands ineffably aloof from aught else."

WHAT CONSTITUTES LOYALTY?

WILLIAM HART SPENCER.

ALLEGIANCE to any cause has only half value if it lacks loyalty, for loyalty can be defined as the active manifestation of allegiance. Furthermore, adherence to Principle or to a given purpose, if not characterized by loyalty, is often more detrimental than open opposition. An attempt to further a cause through a mistaken direction of activity, due often to a lack of knowledge of the real import of ways and means, generally proves hurtful to the cause itself, and harmful to the one taking an unwise initiative. The appointed ones could steady the ark; the well-intentioned Uzza, in ignorantly attempting it, failed.

One view of the motive which actuated Judas holds that he was not a pronounced enemy of the Master, but that he was ambitious, self-willed, and self-conceited. He had been in the company of Jesus for several years, had listened to his teaching and witnessed his healing of the multitudes, the quieting of the waves, and other mighty works, and we may assume that he had strong faith in Jesus of a certain kind. He did not doubt the power of the Master, but, lacking in spiritual perception as well as a true sense of loyalty, he construed the teaching of Jesus to mean an earthly kingdom, in which he as one of the disciples would take a prominent part. As time went by and this material kingdom was not inaugurated, opportunity seemed to be ignored. With perfect confidence that that which he conceived to be the promise would surely come to pass, Judas' patience could not brook further delay, and not doubting but that his Lord would exert his wonderful power when forced to do so for his own protection, which act would necessarily precipitate the looked-for revolution, he ventured to hasten events by taking matters into his own hands, and forcing the issue. The outcome was the tragedy on Calvary.

Christian Scientists should be careful in all their thoughts and statements concerning the governing powers in our church. The private in the ranks cannot fully know the plans for the movements of a great army, even though he may be as patriotic and self-sacrificing as those in command, and if each soldier, no matter how earnest, should undertake

Digitized by Google

to carry out a plan of campaign on his own initiative, we know that the result would be disastrous. The Scriptures promise a satisfied spiritual understanding to every one who truly seeks it, and hoping for this realization men all down the years have pondered, struggled, and prayed for higher living and more holy thought. Our beloved Leader's words and works, in conformity with the teaching of Christ Jesus, are the nearest portrayal of spiritual things through a human medium that the world has known since the time of the Master. Never since that time has there been such a base for intelligent insight of things spiritual as we now have, and this teaching is systematized and epitomized in the *Christian Science church.*

The appointed ones in this great movement are today *giving themselves wholly*, heartily, intelligently, and prayerfully to the guidance and good conduct of our cause, and we should be careful not only to put a guard upon our lips, but like David pray that we may be searched to find if there is anything in our mentality which can be construed as disloyal. To the extent that we clear our mental house, drive out all thought which conflicts with the sense of right, our activity will prove serviceable to our cause. All should have their part in the upbuilding of God's kingdom here on earth, but for each one to know his part, that he may not underdo or overdo this part, requires prayerful thought and much watchfulness, for these best express true loyalty.

THE LISTENING EAR.

M. ETHEL WHITCOMB.

If men but lived continuously in the attitude of humble, obedient alertness to the voice of God, what suffering would be avoided and what peace would be won, and how often, indeed, do we as Christian Scientists promise to do this, as we sing in the hymn written by our Leader, "I will listen for Thy voice" (Poems, p. 14). We find this ideal perfectly exemplified in the life of our Master, who said, "I can of mine own self do nothing: as I hear, I judge." He knew that man has no intelligence apart from God, therefore he did not claim to originate anything, but rather to express what he heard from his Father.

Endeavoring to lift men's thoughts to perceive the great need of listening for their Father's voice, Jesus gave them the parable of the shepherd and the sheep. He said, "When he putteth forth his own sheep, he goeth before them, and the sheep follow him: for they know his voice. And a stranger will they not follow, but will flee from him: for they know not the voice of strangers." How tenderly the Master tried to teach men through this parable one of the most important of life's lessons! Deep is the meaning of this metaphor! As we study it our thoughts turn for a moment to the shepherd gently leading the flock up the hill to the broad green pasture, and we can see how disastrous it would be for one of them to listen to a stranger who might attempt to call him away from the fold, for "the thief cometh not, but for to steal, and to kill, and to destroy" the health and the joy and the peace of the sheep. If one of the flock should listen and follow the stranger, he would soon see that the stranger's promise to show him greener pastures was false, and the sheep would find himself caught in a bog in the valley. How he would yearn for the shepherd and for the peace of the fold! After darkness and struggle he would extricate himself, and with the determination to be more faithful in listening and following, he would hasten back to the shepherd.

Many times a day the "stranger" (the belief of an intelligence, a will, a way apart from God) tries to call us from the fold and deafen our ears to the voice of the "good shepherd." The voice of the stranger would tempt through evil suggestions, such as self-pity, discouragement, mental apathy, disappointment, criticism, or through a sense of separation from the other sheep. It would make us assent to the suggestion that our work is toilsome, and thus cause us to forget and neglect our duty to God. (See Manual, Art. VIII, Sect. 6). Sometimes the stranger tries to lead us away from the shepherd through causing us to listen to praise; through self-condemnation or through self-righteousness it would dull and stupefy the senses and lead to the bog of discord the one who listens. Of old the prophet said, "Behold, to obey is better than sacrifice, and to hearken than the fat of rams."

There is indeed no duty more imperative than that of discriminating between the shepherd's voice and the call of the stranger. Jesus said of the obedient sheep, "A stranger will they not follow, but will flee from him." Do we flee from every suggestion of self-ease, from the whisperings of worry, anxiety, depression, from human plans and wishes? Do we turn instantly and flee from every thought that would separate us from our faith and our brothers? Do we recognize as the stranger's voice, and therefore flee from, all that would hinder our spiritual progress and highest usefulness? Jesus' reply to the voice which whispered of place and power was, "Get thee hence, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve." When he took this mental stand, and absolutely refused to listen to the voice of error, it is written, "The devil leaveth him, and, behold, angels came and ministered unto him." What a reward was this for his obedience!

On page 581 of our text-book, "Science and Health with Key to the Scriptures," our Leader defines angels as "God's thoughts passing to man; spiritual intuitions, pure and perfect." Had Jesus not taken this firm position with the "stranger," impersonal error, he would not have been in the spiritual attitude to receive these angel messages or to hear the voice of the shepherd. Later in his ministry, to quicken his disciples, he said, "The prince of this world cometh, and hath nothing in me." It is well for the disciple of today to hold the position that the "prince of this world," the supposititious opposite of good, can find nothing in his thought to correspond with or to respond to its suggestions. Mrs. Eddy has called us to active watching and listening in these words from "Miscellaneous Writings" (p. 113), "He who refuses to be influenced by any but the divine Mind, commits his way to God, and rises superior to suggestions from an evil source."

To abide in the consciousness which hears the Father's voice is the joy of spiritual life. Some one has said, "God's voice is soft and low, and is only heard by those who hear nothing else." One can no more hear the sweet symphony of Spirit while listening to suggestions of self, than one can enjoy beautiful music while thinking or talking of the discords of human existence. The voice of Spirit, God, is heard only in the silence of self-renunciation, and here, in the quiet of spiritual consciousness, we can always retreat and hear the Father's voice. Truth is always voicing itself, and if we heed its call we are spared much wandering and suffering, and soon reach a higher plane of thought. When the way seems obscure and we do not see the path that we should take, let us not feel dependent upon seeking human advice, rather let us strengthen ourselves with the promise given in Isaiah, "He wakeneth mine ear to hear as the learned." It is written that in this attitude of humble listening, "thine ears shall hear a word behind thee, saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left."

Numberless times when clouds of sin or sickness have gathered about the faithful Christian Scientist, he has reassured himself with the fact that ideas are continuously passing from Mind to man, and that man is the activity or expression of these ideas. Knowing that man in Mind's image sees as Mind sees and hears as Mind hears, he has stood in steadfast faith, saying in the words of Samuel,

Digitized by Google

"Speak, Lord; for thy servant heareth." And in sweet fulfilment of promise, the Christ-idea has come to his expectant listening thought, voicing itself, perchance, through some passage from the Bible or from Science and Health, and has instantly dispelled the clouds of frightened, suffering sense.

As the clamor of material thinking is silenced, we hear the voice of Love calling, "Incline your ear, and come unto me: hear, and your soul shall live;" and again, "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me." Each time that we shut the door of our thought to the "stranger," and open it wide for the Christ, we enter the green pastures of spiritual consciousness, and beside the still waters of inspiration we joyfully commune with him who leadeth us "in the paths of righteousness for his name's sake."

UNDERCURRENTS.

ELOISE I. COOPER.

THOSE who accept Christian Science can truly say that for them "old things" have indeed passed away, because the spiritual sense of being has replaced material belief, but there are some of us who continue to carry in our consciousness an undercurrent of belief in sin, sickness, or sorrow. Some months ago a dear friend said to the writer that for two weeks she had been striving faithfully to shut out an undercurrent of grief from her thought.

The next day I went carefully to work to analyze my own consciousness, and was truly surprised to find that for a year and a half I had thought that I was doing well to carry a brave exterior and be ready with a kind word or a cheery smile, although there had not been one waking hour when I was not conscious of a heavy sense of sorrow underneath. It had in fact seemed loyalty to one who was gone to leave that sense undisturbed, sacred to the memory of the departed, and thus thought was being held down to a "baseless fabric" instead of building upon the true foundation, that of Truth and Love.

Then came a steadfast resolve that this hidden evil, this belief in sorrow and death, should be uncovered, and the secret thought held resolutely before the light of Spirit that had penetrated to the depths of human consciousness. The first question that naturally presented itself was, What is grief? There could be but one answer, namely, an illusion entertained respecting God and man. It was then clearly seen that grief has no power to undermine and bring chaos where the solid foundations of living faith and trust in good are laid. It was also seen that no earnest seeker for Truth would willingly harbor such a falsity, therefore it must be rooted out; and though the process may be slow, the error must be destroyed. Then a new song of happiness and harmony will rise from the depths of consciousness, where joy should reign forever! Joy because God is All.

The Discoverer and Founder of Christian Science, with tenderest love and patience, has brought us the understanding of Truth to destroy every ill that mortal mind would place upon us. With loving heart she gave us these lines (Poems, p. 22),—

> Dear God! how great, how good Thou art—
> To heal humanity's sore heart;
> To probe the wound, then pour the balm—
> A life perfected, strong and calm.

As true meekness enters our hearts, we begin to gain an understanding of Jesus' words, "And ye now therefore have sorrow: but I will see you again, and your heart shall rejoice, and your joy no man taketh from you;" and again, "Ask, and ye shall receive, that your joy may be full."

As we obey the demand of infinite Love as voiced by the prophet Micah, that is, do justly, love mercy, and walk humbly with God, Truth will indeed probe every wound; and we shall begin to see as Mrs. Eddy saw when she wrote, in the same poem,—

> 'Tis writ on earth, on leaf and flower:
> Love hath one race, one realm, one power.

BURDENS: AN INTERROGATORY.

CLARKE MC CUE.

"HE is carrying such a heavy burden!" Is such a comment just to the one hearing it? Is it just to the one uttering it? The statement is direct. It would have the hearer believe that it is based on knowledge. An unwarranted assumption, is it not?

Paul said, "Bear ye one another's burdens, and so fulfil the law of Christ." Does this injunction mean that we are literally to take on the burdens of others? If so, would we not be rather unwelcome porters and our proffer of help laid open to rebuke? For would mortal mind consent to trust its treasured baggage to the hands of strangers? Then, too, are not burdens conjured frequently at the behest of self-pity or through a desire for martyrdom? Therefore, is it not at once apparent that such baggage can have no weight in reality? Why, then, retard the traveler by confirming his own false and nurtured belief? Why be moved and mistake pity for compassion? Why seek to share in the self-pity of another when that self-pity is distinctively that other's own property? Can one learn a lesson for another?

Fulfilment of Truth's law is thus interpreted by Mrs. Eddy in "An Allegory": "Then he who has no baggage goes back and kindly binds up their wounds, wipes away the blood stains, and would help them on; but suddenly the Stranger [the ever-present Christ] shouts, 'Let them alone; they must learn from the things they suffer. Make thine own way'" (Miscellaneous Writings, p. 327). Why place possible obstructions in the way of a fellow traveler by giving utterance to a falsity? Is not the belief in a burden born out of things past or fear of the future? Is either existent in reality?

Our Leader says further: "Therefore, give up thy earth-weights and observe the apostle's admonition, 'Forgetting those things which are behind, and reaching forth unto those things which are before'" (*Ibid.*, p. 328). This last clause is pregnant with eternal hope. It dispels all thought of burden by "reaching forth unto those things which are before."

[Written for the *Sentinel*.]

HO! COME YE TO THE WATERS!

CHAS. C. SANDELIN.

Ho! Come ye to the waters! Drink! No fee
For all thou drinkest shall be required of thee;
For free to all this precious draft is given,
To high, to low, to whole or riven,
Who thirst in darkness, knowing not that here—
Aye, at their side—is water pure and clear.

Ho! Come ye to the waters! Cool and sweet,
Refreshment from the earth's depressing heat;
Pure waters of Truth, that sparkled 'neath the sun
Of Love's kind presence ere had time begun,
And ne'er denied thee. Drink this day thy fill:
All earth-born yearnings doth the water still.

Ho! Come ye to the waters! Cleanse thy heart,
That Love more fully may its joys impart!
Then error's fancies shall depart with speed,
And Love's voice only shalt thou ever heed;
Thine heart, a-winged, shall evermore rejoice,
And songs of gladness only know thy voice.

[Frederick Dixon in *New Age*, London.]

Christian Science accepts without qualification the declaration of Jesus that men must be born again, and it insists that this new birth only takes place as the carnal mind gives place to the Mind that was in Christ Jesus. If, however, the carnal mind is to be destroyed, the material body which is the material idea or image and likeness of the carnal mind must disappear, and the spiritual man appear. But if the carnal mind and the material body can disappear, it is because they are not the real mind or body, for that which is real is indestructible. It is here the theory of the unreality of matter emerges in Christian Science, and probably more nonsense has been talked on this subject, by people with a generous ignorance of what they are talking about, than about any other subject of interest to the world.

Christian Science is obviously spiritual idealism, and, as is the case in all idealistic teaching, it denies the reality of the phenomenon called matter. The theory has been put with complete frankness by one of the greatest chemists in Europe, a man whom the university of Oxford has delighted to honor: "Matter is only a thing imagined, which we have constructed for ourselves, very imperfectly, to represent the constant element in the changing series of phenomena. Now we begin to understand the actual—that is, that which acts upon us, is only energy, we have to ascertain by tests in what relation the two conceptions stand, and the result is without a doubt that of energy alone can reality be predicated." Now if the idealist of natural science acted logically on his premises, he would desist from the clumsy method of inducing mind to act on matter through material means. The human mind is, however, incorrigibly illogical, and the holders of these advanced theories, while declaring disease to be a mental effect, proceed to doctor it materially.

The Christian Scientist indulges in no such half truths. He declares matter to be unreal, just as the orthodox idealist, but here he parts company entirely with the idealism of the schools, and *boldly* accepting the idealism of the New Testament, insists that mortal mind or energy is itself unreal, and constitutes nothing but the negation of divine Mind, without whom "was not any thing made that was made." This, he insists, is the truth, the absolute scientific truth to which Jesus alluded when he said, "Ye shall know the truth, and the truth shall make you free." Free from the false evidence of the material senses, which in insisting on the unreality of matter declare sin, disease, and death to be ideas of that divine Mind which created nothing that was not good, and in speaking of which Jesus himself said, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life."

To imagine that divine intelligence created something which profited nothing, and which Paul dismissed as the garment of those who could not please God, is surely to be guilty of a word the opponents of Christian Science are extremely fond of, and that is, blasphemy. All the same, numbers of natural scientists, who claim to be Christians, are forever committing this blasphemy, apparently unconsciously. One of these natural scientists tells us that science is confined to the study of secondary causes or physical facts, and that primary causes are of necessity in the realm of the unknowable. In other words this writer calmly assures us that science is confined to the study of that which "profiteth nothing" and "cannot please God." Such reasoning is frankly not only anti-Christian, it begs the question in the most unblushing way. Of course, if you assume you can never know something, you at any rate are never likely to know it; but it is perhaps as well the great thinkers of the past did not argue so childishly. So far from arguing that that which is born of the Spirit is *ipso facto* unknowable, Thomas Aquinas, the man whom Huxley described as perhaps the subtlest of the medieval thinkers, boldly declared that the only absolute science was theology, the word of God, while all natural sciences were strictly relative. Huxley put the matter a little differently. "If," he said, "I should see a lump of lead suspended, without support, in the air, I should not immediately describe it as a miracle, meaning thereby a violation of law. I should, on the contrary, realize that it was the operation of hitherto unsuspected law, and set to work to investigate the phenomenon." Now, it happens, of course, that the words translated miracle in the New Testament have not and never have had any supernatural significance. They mean the one an act of power, the other a sign. The miracles of Jesus were to the materialistic Jews acts of power, lumps of lead in the air, which they were ready to dismiss as supernatural: but to the spiritually-minded disciples they were signs of the power of divine law, that absolute Truth the knowledge of which was to make the world free. History repeats itself: when today the power of Truth heals a patient in Christian Science, the modern Sanhedrin shakes its head, and asks: "What shall we do to these men? for that indeed a notable miracle hath been done by them is manifest to all them that dwell in Jerusalem; and we cannot deny it. But that it spread no further among the people, let us straightly threaten them, that they speak henceforth to no man in this name."

Christian Science accepts the miracles of Jesus in their true sense, as object-lessons in proof of his theory or theology. "Ye shall know the truth," he said, "and the truth shall make you free." He came preaching to the world this truth, and the world knows the result. The materialists of the age promptly accused him of blasphemy, and said he was arrogating to himself the power of God. The world knows what he said, "He that believeth on me, the works that I do shall he do also."—he that understands my teaching, or my theology, will be able to prove the truth of it by demonstrating it in the way I have demonstrated it. No amount of ingenuity can ever get away from the simple meaning of those words, and when one reads the various answers of the sects to the teaching of Christian Science, one is reminded of the reply of Erasmus to the Franciscans, when they demanded that he should declare that they had controverted Luther's doctrines: "I can truthfully say," he replied grimly, "that you have burned his books, but I cannot say that you have answered them." The opponents of Christian Science endeavor to answer the teaching of Christian Science by expelling its books from the public libraries. They do not burn them, for that method has gone out of fashion. They fail to see that the modern argument is quite as humorous as the medieval one.

[Charles K. Skinner in *Fennville* (Mich.) *Herald*.]

It is not every public speaker who is favored by a would-be interpreter, but it seems that the recent lecturer on Christian Science in your city had this experience. The fact that the interpreter did not understand the subject of the lecture, however, has led him to make some unfortunate statements as a critic. The seemingly great bone of contention with which he struggled was the unreality of sin, sickness, and death. Now the remedy for this is very simple. Jesus gave it to Peter when that earnest disciple was much disturbed over John's problem. He said: "What is that to thee? follow thou me." The truth or falsity of a religion is dependent on the foundation upon which it is built. The proof will be shown in the fruits of its works. If it regenerates the sinner, reforms the drunkard, heals the sick, and restores harmony in homes where discord has held sway, all the criticism, misrepresentation, and ridicule will weigh nothing against it. If it does not fulfil its promises, it will fall by its own weakness and needs no calumny from its opponents.

Christian Science is doing all these things in every land in the known world, and because of this its supporters are

Digitized by Google

forging to the front and publishing its truths in their lives. Your readers are told that the result of Christian Science teaching upon a man who at one time was an earnest preacher was to make him "curse and swear." Let me say if this unfortunate condition ever did occur, it was the lack and not the knowledge of Christian Science which caused it. The simplest analysis of the words Christian Science is "knowledge of the Christ," and if one really had this knowledge he could not misuse it. The injustice of attacking a religion because an asserted adherent has slipped and fallen could be illustrated in the life of another man not a thousand miles from Detroit. He had been a successful pastor in an orthodox church, an ardent temperance worker, and doubtless had helped many to better lives, yet through yielding to temptations the past two years have seen him go lower and lower until this month he passed away at an institute for such cases. Contrary to the first instance cited, no one has been heard to charge the church of which he was a member, or the temperance organization with which he labored, with leading him astray; yet the cases are similar.

Now, as to the unreality of sin, sickness, and death—the Scriptures assert that God made all that was made, and that "God saw every thing that he had made, and, behold, it was very good." If this is true, there is but one of two positions to take: Either God made sin, sickness, and death, and hence it must be real, good, and eternal, or else God did not create them and they are unreal to Him and to the perfect man created in His image and likeness. Christian Science takes the last position and proves it by the Scriptures. The teaching of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, is based on the spiritual creation of man and the universe, as given in the first chapter of Genesis. Here it is shown that God created man perfect, and endowed him with the birthright of "dominion over all."

The Scriptures give further proof of a spiritual creation in these words: "The worlds were framed by the word of God, so that things which are seen were not made of things which do appear." Christian Science maintains that the man of God's creation can never be anything but perfect, because he is the reflection or likeness of God—he could not sin nor be sick unless God could express like conditions.

When approached from the spiritual side, the teachings of Science and Health will be found to conform to the Bible in every particular. Mankind has come no nearer to the understanding of God and the true man through material reasoning than in the time of Jesus. He said, "It is the spirit that quickeneth; the flesh profiteth nothing." Mrs. Eddy made no references to matter except to show its unreality to God and the true man. At the same time she said, "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being" (Science and Health, p. 460).

When we understand, as we sometime must, that everything is conscious or unconscious thought, or a mental picture externalized, we shall see that all conditions of good and evil are planes of thought in which we permit ourselves to dwell at times. To hold that good and evil are both real to the spiritual creator is to charge God with fallibility. As well might we say that the ghost which has been mentally pictured by a small child is a product of God's creation. To those of maturer thought the ghost is as unreal as a passing dream, but to the child it is as much of a fact as is sin, sickness, and death to those who look no farther than the testimony of the material senses. To the uninformed stranger in our country who has never seen our money, the counterfeit pieces would be as real as the true coin, but as his thought becomes educated he sees the delusion and avoids the snare. Thus it is that Christian Science is showing all who are tired of the husks and seeming reality of materialism, that there is no truth in its premises, and that whatever is based on anything other than spiritual laws must fade away.

On page 29 of Science and Health we read: "Christians must take up arms against error at home and abroad. They must grapple with sin in themselves and in others." Our critic must have overlooked John's words in his first epistle—speaking of the mortal or carnal man, he said, "He that committeth sin is of the devil;" but, speaking of the spiritual man, he adds, "Whosoever is born of God doth not commit sin; for his seed remaineth in him." It is to bring the realization of this birthright to mankind that Christian Scientists are striving.

Christian Science teaches that good, which comes alone from God, is omnipotent, and sin, its opposite, is powerless when the truth is understood. Some one has said that sin is belief in the absence of good. Then the way to be free from sin is to be possessed of good. What is meant by saying that sin is not real because it is not made by God, is clear to those who begin to prove its unreality by forsaking it for good. Only those who still choose evil see it is something to be desired—something real or good. Jesus' words were, "Judge not, that ye be not judged;" "If ye love me, keep my commandments"—not part, but all of them.

[From an editorial in *New York Telegraph.*]

If doctors could cure suffering mortals there might be some stock taken in their kicks against Christian Scientists. But there is no doctor on the face of the earth who can cure cancer—not one ever did. Last Thursday a body of physicians who had been working in Europe making an effort to find a cure for cancer, reported that they had failed. What they cannot do, they object to any one else's trying. If doctors only knew it, their protest against Christian Scientist healers merely attracts attention to their own inability.

[From *Peoria* (Ill.) *Star.*]

Tally one more for Christian Science. It has developed that the truth not only sets one free, cures imaginary diseases and possibly some which are organic, but that in its far-reaching benefactions it actually makes people honest, as the Robinson Fuel Company of this city cheerfully attests. The company in question recently received the following letter with the enclosure to which it alludes:

Robinson Fuel Company.

Dear Sirs: Enclosed please find six dollars. I take this means to reimburse for dishonesty that defrauded you out of five dollars about three years ago. The one dollar bill I enclose as interest. I will add that Christian Science has not only healed me of disease, but has uncovered this and many other dishonest acts.

Sincerely yours,

AN OLD CUSTOMER.

[W. L. Smith in *Rockland* (Me.) *Courier-Gazette.*]

I read in a late issue a clergyman's attack on the Christian Scientists, and I shall await with interest the dignified and courteous reply that observation has taught me is one of the characteristics of these peculiar Christians, who, when they are reviled, revile not again. Such vitriolic utterances emanating from a Christian clergyman and directed against a sect whose representatives in this vicinity are acknowledged to be among our best known and respected people, can hardly fail to be of interest not only to the parties immediately concerned, but also to the interested observer of no denomination, like myself, who seeks his Lord, crying, "Where have ye laid him?"

I am not a Christian Scientist, though in my search after religion that satisfied my mind I have read Mrs. Eddy's book with constantly increasing interest. I am just a plain, every-day business man, and reviewing this sermon

Digitized by Google

from the standpoint of an outsider, I would like to ask the reverend gentleman if he does not think that the sect which possesses enough of the Mind of Christ to say, in the face of such an attack (as these Christian Scientists surely will), "Let there be no strife, I pray thee, between me and thee, and between my herdmen and thy herdmen; for we be brethren," is the sect that in such an argument will win the respect and admiration of all fair-minded people.

[Algernon Hervey Bathurst in *Flint County Herald*, Holywell, Eng.]

As to the question whether God never made man capable of sin, the point is, Are we to accept the teachings of the Master or not? Nothing is more clear than the fact that he came, as he himself said, not to destroy but to fulfil the law of God. If man, that is, spiritual man, had been created subject to sin or sickness by the law of God, it is quite obvious that Christ Jesus would never have interfered with this law by healing the sick and destroying sin. Christian Science takes the Master as the great Exemplar, and Mrs. Eddy has pointed out on every page of Science and Health that our faith must be proved by our works; in other words, the healing of sickness and the destruction of sin are the natural outcome of an absolute spiritual understanding of what Jesus taught.

Again, it is generally accepted that there is but one creator, one cause. It is, therefore, impossible to imagine one infinite cause or creator producing evil, for this would clearly be a house divided against itself. It is true that the so-called testimony of the physical senses would bear witness to the contrary, but the fact remains that, in reality, the creation of God, good, the only creation, was, is, and always will be perfect, and it was the absolute knowledge of this that enabled Jesus and his disciples to do the works they did, and those works are being repeated all over the world today by earnest students of Christian Science to the extent that the teachings are understood by them. So long, however, as mankind is willing to cling to evil, whether it be sin or sickness, and affirm its reality, so long will it be impossible for it to accept the astounding promise given to the world by Jesus, "Ye shall know the truth, and the truth shall make you free;" and still more difficult for it to practise his teachings.

If, then, we admit the omnipotence of the one cause or creator, God, we cannot but admit the omnipresence of God as well. In view of this, is it therefore a very astounding statement to make that good cannot lapse into evil? Again, always bearing in mind that there are not two creators, is it illogical to state that man, the image and likeness of God, is incapable of sin? And would it not be difficult to prove that, as our critic says, such a statement is "not Christianity"? Christian Scientists know that they are daily becoming less subject to sin and evil, whether in thought, word, or deed, and that to the extent that they put into practice the teachings of Science and Health, they are able to prove, not only that man is not subject to these erroneous beliefs, but that he has dominion over them; and the Master was referring to this victory over the belief in evil when he said, "The prince of this world cometh, and hath nothing in me."

[George Shaw Cook in *Galesburg* (Ill.) *Republican Register*.]

The atonement is, as Mrs. Eddy says in Science and Health (p. 23), "a hard problem in theology," but many have found that her explanation thereof in the chapter Atonement and Eucharist, is reasonable and satisfying. In the discussion of this and correlated subjects much confusion arises in the thought of some students, because of the misuse of the word Christ by translators of the Bible and others. The terms Jesus and Christ are not synonymous, although the word Christ is frequently used where the word Jesus should be employed. Properly speaking, Christ is the eternal, spiritual idea of God and is as universal and omnipotent as God; whereas Jesus refers to the man who was endowed with the divine Spirit of Christ, "without measure." This marvelous spiritual endowment was what enabled Jesus Christ to be the perfect Wayshower for mankind. It was the Mind "which was also in Christ Jesus," and which Paul admonished Christians to have in them, which enabled Jesus to heal the sick, cast out sin, and raise the dead. Hence it should be plain that something higher than the human personality of Jesus was responsible for those mighty works. This is evident from his own words, for he said, "The Father that dwelleth in me, he doeth the works."

Thus it will be seen that Mrs. Eddy has reasonable grounds for her statement to which some critics object: "The material blood of Jesus was no more efficacious to cleanse from sin when it was shed upon 'the accursed tree' than when it was flowing in his veins as he went daily about his Father's business. His true flesh and blood were his Life; and they truly eat his flesh and drink his blood, who partake of that divine Life" (p. 25). However, that Mrs. Eddy does not minimize that which she refers to in her book as Jesus' "intense human sacrifice" (Science and Health, p. 54), is indicated by the following quotation from the text-book: "If all who ever partook of the sacrament had really commemorated the sufferings of Jesus and drunk of his cup, they would have revolutionized the world. If all who seek his commemoration through material symbols will take up the cross, heal the sick, cast out evils, and preach Christ, or Truth, to the poor,—the receptive thought,—they will bring in the millennium" (p. 34).

That Mrs. Eddy steadfastly pointed to Christ Jesus as the Wayshower and Exemplar of mankind, there can be no doubt on the part of any one who will read her writings with an "open mind." That hundreds of thousands have, through the study of Christian Science, gained a vastly improved concept of God, there can be no question. That they have likewise gained from this study a greater understanding of the nature of Christ Jesus, there can be no doubt, and there is abundant proof for all who seek it that this study has enabled them to a considerable degree to cast sin and disease out of themselves and others.

[H. D. Conger in *Northwestern*, Oshkosh, Wis.]

From the divine Mind, God, the source of all power and all goodness, comes all real healing. The Bible says of Jesus that he "was in all points tempted like as we are, yet without sin." His knowledge of Truth, being without sin, was so unclouded that he could demonstrate it by healing "all manner of disease." Christian Science, as taught and practised, has made its followers better men and women, better citizens, better fathers and mothers, better Christians, and this betterment has meant the overcoming of selfishness, sordidness, commonness, temper, jealousy, envy, hatred and other vices.

As Christian Scientists, we have accepted the invitation of Jesus to the heavy laden and found rest. If a change of mental environment enables one to come by one's own and brings with it the "choicest viands, softest clothing, and best living," it does not follow that the beneficiary has no feeling for others less fortunate. He knows the same honest sincere prayer will likewise bring his neighbor into the land of "milk and honey," but it is for the neighbor to decide if the overcoming is worth the reward.

Awake, dear heart! God calls you, and you must.
The eastern splendor melts the morning star.
Put on your garments of devoutest trust,
You walk with Him today where'er you are.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

AN ACTIVE FAITH.

An essential feature of the Church of Christ, Scientist, is that in this church, as in primitive Christianity, works are more highly valued than are mere professions or outward show of form and ceremony. Organization on this practical basis naturally leads to and demands simplicity and dignity in the form of service, which, as instituted by our Leader, has proven both satisfying and helpful to those who attend.

One important point, however, must not be overlooked. While the service in itself is all that could be desired, and for its proper maintenance it is necessary that the readers should be well equipped in voice and education, and in the conduct of the affairs of the church as an organization it is important that the trustees and other officers should be familiar with good business methods, it is also necessary, and really of more consequence, that these servants of their fellow members should, for the standing of the church with the community at large, be able to put into practice the tenets of their faith with sufficient understanding and certainty to be able to heal the sick and the sinning who may appeal to them for help, and in every way, both in their home and business life, in their daily walk and conversation, constantly to demonstrate that God, divine Mind, is All and governs all.

That this practical demonstration of their faith is within normal bounds is easily apparent to those who have learned that "he who dated the Christian era is the Example in Christian Science" (Manual, Art. VIII, Sect. 3). Christ Jesus demonstrated what he taught, proved the truth of his teachings by their practical application, and those who scoffed at his words could but acknowledge the validity of the works wrought by the power of Truth before their eyes. It was because he had been a witness to this convincing mode of argumentation that the apostle James wrote: "What doth it profit, my brethren, though a man say he hath faith, and have not works? can faith save him?" and again that unanswerable declaration, "Faith without works is dead;" for, as he goes on to explain, "by works a man is justified, and not by faith only."

This member of the little company of disciples had a strong precedent for his line of reasoning. Perhaps he was standing by when Jesus, questioned by John the Baptist's messengers as to the validity of his claims to the Messiahship, answered by referring them to the works which they had seen done, and bade them tell John "how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached," because of the power of God manifested through His beloved Son.

In Science and Health (p. 323) we read, "We must recollect that Truth is demonstrable when understood, and that good is not understood until demonstrated." This practical application of the truth taught therein is the key-note of Christian Science, and it leads clearly to the fulfilment of the command to "come out from among them, and be ye separate," the command which all Christian Scientists must heed sooner or later. Suavity, culture, refinement, business ability, these are qualities which should appear in and be a part of the every-day lives of Christian Scientists, but these qualities are not in and of themselves sufficient to prove that the persons who possess them are Christian Scientists, and for this reason they alone should not be deemed sufficient to qualify any one for the office of reader or even any minor office of a branch church. There must be the primal foundation of "an inward and spiritual grace" that shall manifest itself in "deeds not words."

All this is in accord with what Mrs. Eddy calls "the theology of Jesus" (*Ibid.*, p. 138), the theology on which he based that infallible test for all Christians, when he said, "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." Christian Scientists are accepting this test of the Master in the measure of their understanding of the truths taught in Science and Health, the book which has indeed opened to them the Scriptures, and are trying to show that their faith in the infinite, omnipotent God is an active one, by doing the works which Jesus promised those who believed on him should do. They are learning that a mere belief in Christian Science does not make them Christian Scientists; that there must be understanding and demonstration as well.

ARCHIBALD MCLELLAN.

THE ONE POSSESSION.

No one can read the history of the children of Israel without noting the extent to which their thought of possession was determined by material appetite. The command of earthly satisfactions and of militant power largely flavored their interpretations of the prophetic promises, and shaped their history, and it explains the continual plaint of their spiritual leaders, that "they forgat God their saviour, which had done great things." Jeremiah voices this in the very beginning of his long and tearful appeal. Speaking for God, he says: "My people have committed two evils; they have forsaken me the fountain of living waters, and hewed them out cisterns, broken cisterns, that can hold no water."

In all this the likeness between the ancients and the moderns is distinctly traceable. Not only is the endeavor of the world centered in the possession of that which is immediately related to earthly appetites and ambitions, but the acquisitiveness of Christian people is largely material. Money madness, the desire for wealth not as a means for doing good, but as a means for satisfying sense, the love of luxury and the pride of life,—this is the dominant factor in every economic and communal problem today; and yet all who are thoughtful know full well that with every increase of this desire there is not only a corresponding forgetfulness of God, but a corresponding increase in the unrest and dissatisfaction of all, for whether they succeed or fail they find out for themselves and make manifest to others the sage's saying, "All is vanity and vexation of spirit."

All this gives present pertinence to the old-time call of Truth, "Ho, every one that thirsteth, . . . come ye, buy, and eat; yea, come, buy wine and milk without money and without price." The intimations of this appeal were expressed by the Master in definite form when he said, "A man's life consisteth not in the abundance of the things which he possesseth;" and Christian Science is forever emphasizing this simple but eternal truth, a knowledge of which is the basis of all happiness and right living. This truth was glimpsed by the prophets of Israel, through whom it was revealed that the Levites, the priests, were to look to God direct for their sufficiency. Thus the word of the Lord was spoken, "I am their inheritance: . . . I am their possession," and in his teaching that every believer is to become a priest unto God Christ Jesus enlarged the compass of this thought until it includes every aspiring heart. This is a distinctive feature of his gospel, that each is to find in the realization of the divine nearness and availability his fulness of satisfaction and power: that each shall not only believe that God is "omnipotent, supreme" (Science

Digitized by Google

and Health, p. 17), but be able to say and prove it true that God is his All-in-all, his eternal possession.

To the possibility of this achievement in Christ, Christian Science is ever directing our thought. The allness and availability of God, of divine Truth and Love, is to become our individual realization, and who does not see the significance of this experience to one's poise and peace. He who is able to substitute his immovable confidence in the power, the stability, the wisdom, and the love of God for his whilom dependence upon the uncertainty and unreliability of drug panaceas as a basis of health and strength, has manifestly moved out into a larger freedom, attained to a new authority and usefulness, and forever escaped from a thousand fears and anxieties which find their warrant in the deeply instinctive feeling that apart from God there is no satisfying possession. The only true riches are spiritual, and he is blessed indeed who with the psalmist can say, "God is the strength of my heart, and my portion forever."

JOHN B. WILLIS.

SELF-DENIAL.

THE dictionaries give a rather limited definition of self-denial, such as, "denying one's self; self-sacrifice." It would, however, be conceded by all thoughtful people that self-denial is a Christian virtue which is given great prominence in the teaching and practice of Christ Jesus, who said, "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." He also bade his would-be followers to count the cost before they undertook to build on the foundation of Truth. Our revered Leader speaks of the mental condition which is "undisciplined by self-denial and divine Science;" and she tells us that "self-denial, sincerity, Christianity, and persistence alone win the prize" (Science and Health, pp. 221, 462). It is thus seen that self-denial is one of the essential elements of success. It really means that at every step of the way we must make a choice between the fleeting and the enduring, the ignoble and the noble, the unreal and the real, and this choice always involves the denial of self.

Many sincere Christians have unfortunately held very mistaken views respecting the denial of self. They have believed that there was something meritorious in giving up that which is desirable and good without having any ethical reason for so doing. In other words, they believed that self-inflicted deprivation of some sort might be good for them and bring a future reward in a rather uncertain heaven. Now Science teaches that we should not give up what is good, unless it be to gain what is better. Here it should be remembered that the personal and material sense of good is limited and faulty at its best, hence the need of constant self-denial that a larger, truer, and more spiritual concept of good may be attained. That which is selfish is ever false and fleeting, and like the old covenant of material sacrifices, it is "ready to vanish away."

It goes without saying that the student of Christian Science must deny "daily" the false sense of selfhood which was never born of God, and which results in sin, disease, and death; and this ofttimes means the taking up of the cross. But the student must make his self-denial a practical thing. If he begins the day with a declaration of spiritual being and the government of divine law, he cannot ignore the demands of Love and justice or trample upon the rights of others in the working out of his own human problem. He must not allow selfishness to hinder him from taking a full share of the work to be done, either in the home or the place of business, or to ignore his obligations in any wise. For instance, one may desire to purchase something for which he cannot pay, and if he allows self to dictate he may even take the name of Truth in vain,—say that he is overcoming limitation,—when in fact he is putting the burden of an unpaid debt upon a brother. If he but knew it, he would find in the temptation to incur the debt an opportunity to deny self and obey the demands of Principle, and by so doing he would advance greatly his own best interests, for he would find that by self-denial on the material plane he would gain in spiritual riches, in honesty, sincerity, truthfulness, love for others, and consequent self-respect.

It is good to stand mentally before the mirror of divine Science, and see whether we reflect the perfect model, the Christ-ideal. If we behold flaws where perfection should appear, we can begin to remedy the defect by obedience to the demand of our Master, to deny self and bring out in thought, word, and deed the reflection of Truth and Love.

ANNIE M. KNOTT.

AMONG THE CHURCHES.

BOSTON, MASS.

The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m. In the new church edifice, Norway, Falmouth, and St. Paul streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading Rooms: Berkeley building (suite 306-307), 420 Boylston street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company building (second floor), southwest corner Devonshire and Milk streets, opposite Post Office; open daily, except Sunday, from 9 a.m. to 5:30 p.m.

LYNN, MASS.

The trustees of First Church of Christ, Scientist, of this city have signed preliminary papers to purchase the Davis estate on Baltimore street, opposite Portland street, as a site for a religious edifice. This announcement will be read with interest by a large number of people throughout the world. It is the opinion of the members of the Christian Science faith that a more desirable location certainly could not be found in our city, centering as it does one of the most attractive residential sections. The estate is located at 34 Baltimore street, and was formerly owned by the late Joseph Davis. There is a dwelling on the estate assessed for twelve thousand dollars, and there are fifteen thousand five hundred and sixty-three square feet of land with an assessed valuation of eight thousand two hundred dollars.

As the long-time home of the Founder of the Christian Science movement and the place where Science and Health, her most important work, was written, it is entirely in keeping that a church should be erected in Lynn which shall be a credit to the city and stand as a worthy memorial of Mrs. Eddy, and judging from what the Christian Scientists have done elsewhere, the Christian Scientists of Lynn are assured that this will in due time be accomplished here. Although no plans for a church have been finally agreed upon, it is known to be the intention of the trustees of the church to erect a handsome structure.—*Daily Item.*

SYDNEY, N. S. W.

First Church of Christ, Scientist, has just purchased a block of land at a cost of eighteen hundred pounds ($9,000). The location is very central, near to Oxford square, which forms part of one of the principal avenues, Oxford street, and it is convenient to all the tramways. The area will allow for the erection of a church edifice to hold five to six hundred persons, and it is proposed to begin this work as early as possible. This important step is indicative of the progress our beloved cause is making in this great and growing city.—*Correspondence.*

THE LECTURES.

KENOSHA, WIS.

Bliss Knapp spoke to a large crowd at Carpenter's Hall on Monday evening [June 19]. The lecturer was introduced by J. D. Utley, Jr., who said in part,—

Some nineteen centuries ago there came into this world one whose life was to be dedicated to the uplift of mankind. Coming as he did at a time when the world seemed almost sunken in sensualism and sin, the advent of Jesus of Nazareth illumined a new page of the world's history. Brief as was his ministry, never before nor since has so much been accomplished in the practical operation of Immanuel or "God with us," as in those short three years when Jesus went about doing good, in binding up the broken-hearted, overcoming sin, and healing the sick, all three by the Christ-method which he was sent to exemplify in those works.

Authentic history records the fact that for about three centuries following this ministry, the dual command of Jesus to preach the gospel and heal the sick was obeyed after the manner of his teaching. Then followed a period when the spiritual qualifications for this healing became drowned in the materiality engulfing that age. And so this method of spiritual healing, though recorded in the Old Testament of the Bible and in the New, lay hidden from view until one should come with spiritual vision sufficiently keen to bring to light the hidden meanings of the Scripture and to reestablish spiritual healing among men. This reestablishment has been accomplished in a thorough and practical manner during the past fifty years, and has been presented to the world under the name of Christian Science. That some misconceptions as to what this Science teaches may be corrected and that the world at large may gain some knowledge of the elementary truths of its doctrine, lectures are given such as we are assembled to hear this evening.

Kenosha News.

HARROGATE, ENGLAND.

The Grand Hall and Circle of the Kursaal, Harrogate, were crowded on Sunday afternoon [July 9], despite the great temptation to be in the open air, with an appreciative audience who listened with rapt attention to an eloquent exposition of the Christian Scientists' beliefs by Bicknell Young. The meeting was held under the auspices of the Harrogate branch and the Rev. W. Howarth, pastor of Starbeck Primitive Methodist church, was the chairman. In introducing the lecturer, the Rev. W. Howarth said,—

I have no intention of making an explanation for my presence here this afternoon to preside over this gathering. I am glad to be able to extend a welcoming hand to a lecturer of another denomination different from my own. I do not suppose that on all details of theology or philosophy we are agreed. Probably no two thinking men present will agree on everything. I have never yet found a man with whom I did agree on all points. There are one or two things, at any rate, in their movement—their church—which have attracted my sympathies. The first is the emphasis which is laid upon faith. All Christian churches say that they believe in faith, but how few put such emphasis upon faith as to make it a reality or make it a fact. I welcome any movement which will lay such emphasis upon faith. Secondly, there is the insistence upon a standard of moral conduct. Without good living you will not get the blessings which you ask. I believe that you should tell people that that health which they ask for can come only as long as they live in the right spirit. Where these two things are blended together—this emphasis upon faith and insistence upon a good life—there my sympathies go, and I believe that any such church will do good, will help on the common cause of all churches, however much we may differ in some other detail. I am glad to welcome one of your accredited lecturers among us in order to explain some of your teachings and how these may be applied to the details of our lives.—*Harrogate Times.*

LOS GATOS, CAL.

Ford's Opera House was well filled Tuesday evening [May 23] by a representative audience. The lecturer, the Hon. Clarence A. Buskirk, was introduced by W. C. Wurz, president of the local Christian Science church, who spoke as follows:—

We have assembled here this evening for the purpose of listening to a lecture on Christian Science, a science based on facts. Whatever is a fact is unchangeable, eternal. If it is a fact at any time, it must be a fact at all times. It is impossible to think of a time or place when or where the mathematical fact that two and two are four would not be true or applicable. If the miracles and wonders recorded in the Bible as wrought by Christ Jesus nineteen hundred years ago were true then, they are true today. If the healing of sin and disease, want and woe was possible in the way Jesus healed them then, it must be possible now. That the same healing and saving power is present with us here and now is daily being proven by thousands of grateful followers of the Master and his teachings as contained in the Bible and illumed by the Christian Science text-book. That text-book, "Science and Health with Key to the Scriptures," has truly been the means of unlocking the infinite truths of the Bible to all earnest students.

In 1866 a fall rendered Mrs. Eddy an invalid; and with no hope of recovery through medical means, she lifted her heart to God. Taking her Bible, she read the account of the healing of the palsied man by Jesus. It was to her a revelation of Truth, and she was instantly healed. She realized at once that what had healed her would heal others, and after many years of diligent research and prayerful study of the Bible she was able gratefully and lovingly to give to the world what God had given to her.

Los Gatos Mail.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Baker, Ore.—Frank H. Leonard, Elks Hall, Sept. 29.
Bremerton, Wash.—Frank H. Leonard, The Eagles Hall, Sept. 25.
Brookings, So. Dak.—William R. Rathvon, Church Edifice, Sixth street and Fifth avenue, Sept. 26.
Centralia, Wash.—Frank H. Leonard, Rose Theater, 3 p.m., Sept. 24.
Chicago, Ill. (First Church).—Virgil O. Strickler, Church Edifice, 4017 Drexel boulevard, Sept. 26, 28, and 29.
Hurley, So. Dak.—William R. Rathvon, Christian Science Church, Sept. 28.
Lethbridge, Alta.—Prof. Hermann S. Hering, Sept. 22.
Minneapolis, Minn. (First Church).—William R. Rathvon, Auditorium, 3:30 p.m., Sept. 24.
Missoula, Mont.—Willis F. Gross, Harnois Theater, Sept. 22.
Pullman, Wash.—Prof. Hermann S. Hering, Sept. 26.
Spokane, Wash. (First Church).—Willis F. Gross, Auditorium Building, Auditorium Theater, 3 p.m., Sept. 24.

TESTIMONIES OF HEALING.

I have had many striking proofs of God's power, as well as numerous smaller ones, which only prepare the way for the greater. The experience which has called forth this testimony was shorn of its sting through the understanding of the truth about God and His idea (man), as gained by a study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I would not be here to tell the tale, if it were not for this truth. Is it any wonder, therefore, that we love her who has lived such a sanctified life, and who by her constant vigilance has kept that truth uncontaminated?

On the thirtieth of March, 1910, about half-past seven in the evening, an automobile going at a very rapid rate ran down my son, a boy of fifteen years. The machine struck him in the back, and that part of his head which came in contact with the cement street was terribly injured. He was taken into the nearest drug-store and pronounced dead, but a physician who was there advised taking him to the hospital, saying that there they had better facilities for discovering the extent of the injuries. Although we lived only five blocks from the scene of the accident, we did not hear of it for some time, but the truth that never fails had its representatives there. A Christian Scientist and his family were on their way to church as our boy was being carried in. This gentleman stopped to inquire and was told that the boy was probably dead, but he and his family at once declared the truth for him. We read that "the word of God is quick and powerful," and that treatment took effect immediately.

My sister preceded me home from church and went into the drug-store on an errand. While waiting her turn, she heard people talking about a boy that had been killed. No one seemed to know his name, but some one gave such a clear description that his aunt gave his name. The shock seemed terrible, but she would not believe it until they said they had received word from the hospital. With a great hope that I had not heard it, she hurried home to telephone for direct news. She found a messenger who had been sent to tell us that he was living. When I came home with two Scientist friends, my sister met us and told us in a very quiet way that my son had been hurt, and where they had taken him. We all affirmed the truth, and took the first car going in the direction of the hospital. A practitioner and myself stayed there all that night. The first thought that came to me when I heard the news was, "Only another opportunity to prove the allness of God, good, and the nothingness of evil." I had been gradually forming this habit of thinking since I had taken class instruction the year before, whenever error presented itself, and it helped me much at this time.

When we reached the hospital we found the boy lying in a comatose state. I kneeled beside his bed and whispered over and over the "scientific statement of being" (Science and Health, p. 468), and other declarations of the truth. Apparently there was nothing for us to do, but we knew there was much to be done, and Paul's words were recalled, "Having done all, to stand." About two in the morning the veil was lifted, and a sweet sense of peace and assurance came to me. All we had to do after that was to "stand still, and see the salvation of the Lord." The attending physician received hourly messages as to his condition, and each was better than the previous one. We stayed at the hospital until the first car after dawn and left him sleeping like a child, breathing naturally, though still seemingly unconscious. The next day, while sitting at his bedside, I noticed the discoloration of his hands, and called attention to it. The thought of congestion was voiced and the evidence disappeared almost at once; and so on with each claim of error as it came to the surface. The physician's fear of a broken back, a fractured skull, compression, concussion, etc., the beliefs incident to accidents of that character,—all these disappeared before the truth.

My son lay in an unconscious condition for seventy-two hours. Even in this state we could easily arouse him, and he always knew us, but would go right to sleep again. He was absolutely unconscious of any suffering, and there was no discoloration after the first day. On the morning of the ninth day he called me up on the telephone from the hospital and said, "Mother, I'll be home in half an hour." I responded, "All right, I'll get your room ready for you." He answered, "Don't get any bed ready; I've been in bed long enough." He only took two afternoon naps after he came home, and is now well and hearty.

This experience has certainly been wonderful to us, for it has opened the very flood-gates of Love to me and I have been abiding in the consciousness of the omnipresence of Love ever since. I asked the physician, one day since the occurrence, if he did not understand that it was a power beyond the human which healed my son. He said that it certainly was a miracle.

I thank God that He led me to a knowledge of this truth, and I am grateful to our dear Leader for her fidelity and fixedness of purpose through storm and sunshine in bringing this truth to the apprehension of all who are ready for it.—Mrs. K. H. Bunting, Pittsburg, Pa.

I hereby vouch for the truth of the testimony of Mrs. Bunting concerning the healing of her son, Dallas Bunting of Pittsburg, through Christian Science. My wife, daughter, and myself were passing on the night when the boy was run over by an automobile. He was not with any Science friends and was rushed into a near-by drug-store. We were on our way to the Wednesday evening meeting when we saw a boy brought out of the drug-store, limp and seemingly lifeless. A gentleman told us that he thought he was dead. A great crowd was standing around. We stopped for the moment to inquire what had happened, and were told. I then said to my wife and daughter that we should do some work in this matter; that we should declare the truth for him, now. We went on to church declaring ever the truth of being, although we did not then know anything as to who the boy was, or even whether he was interested in Science.

It seems that the mother did not know of the accident till after the church services, and she did not know that any Science work had been done in her boy's case till a day or two afterward, but she was very grateful that we were thoughtful enough to do our work at the time. I kept watch of the case after I learned that this boy was the child of a friend. For a while the doctor said the boy could not live. Then improvement began which kept up till complete recovery was realized. This was a very beautiful case of healing through the power of God.

Silas Cobb, Pittsburg, Pa.

My heart is so filled with gratitude for all those who have given so freely to the *Journal* and *Sentinel*, and for the great help I have received from testimonies, that I feel my own demonstration may reach some who are looking for the light and bring joy into their lives. I cannot remember the time, before I came to Christian Science, when I did not worry, and this constant anxiety brought on a nervous condition of the body, so that I was afflicted with neuralgia and often suffered intensely. After attending the Christian Science church services, Sunday mornings and Wednesday evenings, I became very much interested and began to study the Lesson-Sermons, reading from the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy. This study brought such an overwhelming sense of peace to my consciousness that I began to put into practice what I learned, and very soon found that all my

Digitized by Google

bodily aches and pains, as well as mental worries, had disappeared, and I was free, mentally and physically.

For the past fifteen years I have enjoyed perfect health and happiness, and for this healing and freedom my love goes out to our revered Leader, through whom was revealed to us the spiritual meaning of the Bible. This understanding becomes a practical help to every one who earnestly seeks the kingdom of heaven,—"the reign of harmony in divine Science; the realm of unerring, eternal, and omnipotent Mind; the atmosphere of Spirit, where Soul is supreme" (Science and Health, p. 590).

MRS. MARY E. HEYD, Chicago, Ill.

In "Science and Health with Key to the Scriptures" (p. 410) we read, "Every trial of our faith in God makes us stronger." I can say that every proof or demonstration of the truth which we have in Christian Science seems more wonderful than the previous one and strengthens our understanding of God and our trust in Him. Not long ago I found myself seemingly very ill, but I had no doubt that the truth as taught in our text-book would be sufficient to meet every claim of error; so I declared this truth as our dear Leader has given it to us, and listened to the reading of the Word; and this was sufficient. In a short time I was entirely relieved, and thanked God for sending us this demonstrable Science through Mrs. Eddy. I am so thankful that I live in an age when the Christ-healing is again demonstrated through our Leader's teachings. I am often encouraged to go to some sufferer and declare this truth in the name of almighty God.

MRS. MARY SLEE, Des Moines, Ia.

We came to Christian Science for the healing of our son. He was always a very active child and perfectly well up to his eighth year; but just here something seemed to come on him which frightened us very much. We called our family doctor, and he pronounced his case epilepsy. For five long years we struggled on, trying many different physicians in that time, but he seemed to grow worse. There was one physician who asked that she might take the case for six months free of charge, and I am sure she did the best she knew for him, but at the end of three months we stopped, as he seemed to get worse.

After this we lost all faith in drugs, and it seemed that my heart was broken, to think that our only child must grow up with this dread disease. But how thankful I am that divine Love led us to try Christian Science! We did not know anything about it, but I went to see a practitioner and she told me that God could heal our boy; but as everything else had failed, we did not have much hope that this treatment would cure him. He had, I think, in all about five months' treatment in Christian Science, and at the end of that time he was perfectly healed. It has been four years now since there was any manifestation of the old trouble, and I can only say, 'Thank God for this deliverance!" I shall not forget the loving help I have received from the different Scientists, and I hope to be able to help others as I have been helped.

LESLIE A. SCOTT (MR. and MRS. W. A. SCOTT), Riverside, Cal.

It is with a heart full of gratitude and love to God, also to our dear Leader, Mrs. Eddy, that I write my testimony of healing through the knowledge of Christian Science. I had an operation for tumor in October, 1908, after which I appeared to be all right until March, 1910, when the doctor told me I must have another operation, because the disease was spreading and he thought he could prevent it from going further. This made me most miserable for I dreaded the thought of another ordeal. It was just a month previous that I had first heard of Christian Science, but a friend of mine, having suffered for six years with a complicated disease, had taken it up and was being healed. I naturally thought that I too could be healed, so I went to this friend to ask her advice, and she said that I should try Christian Science; so I decided to do so. I asked her to tell her practitioner to call and see me, and I am confident that I was healed instantaneously, for which I am very grateful to God. It is impossible to express the feeling of relief and happiness which came over me then.

SARAH ANN BROADHEAD, Halifax, England.

The above is my sister's testimony of healing, and it is with a feeling of deep love to God, and also to our dear Leader, Mrs. Eddy, for this truth, that I testify to the healing power of Christian Science in my sister's case and also in my own. Her undergoing of the first operation had left me full of fear, and when the doctor advised a second one for my sister, I think I was the most miserable person on earth, for I just felt I could not live without her.

As soon as we decided for Christian Science, all fear left both of us, and with the practitioner's help and the understanding of God as given to us in Christian Science, the healing was realized. I know, as St. Paul says, that "God hath not given us the spirit of fear; but of power, and of love, and of a sound mind," for which we are both very grateful.—JANIE BROADHEAD, Halifax, England.

In 1907 I had measles, and three treatments in Christian Science healed me completely. Again, in the spring of 1908, while living in southeastern Missouri, attending school, I contracted what proved to be small-pox. As several cases were known to exist in the city, my parents wrote to a practitioner where we had formerly lived and who had helped us in past troubles. She acknowledged receipt of the letter, stating that she would do the best she could for me, but that we were at liberty at any time to get any one else if we so desired. I was never sick, and there was but one day that I was not up and dressed and able to eat my meals. The illness had a much shorter duration than such cases usually run, and I had no bad effects, such as scars from the disease. My parents, grandmother, and aunt were with me daily, and all of them were protected from contagion through the treatments. One who was well acquainted with the disease said that in my case it was thoroughly manifested.

Christian Science is our only remedy for all afflictions, and God is our ever-ready and "great Physician." I am trying to gain a better understanding of this truth daily, and have lately made several demonstrations for myself. Through the help of Christian Science I enjoy the best of health, for which I am very grateful. I am also grateful to Mrs. Eddy, through whom this truth has been given us.

GENEVA FULLER, Chillicothe, Mo.

At the age of eighteen, after a severe attack of illness I was left with heart failure, although my condition was not considered serious until about ten years ago, when I was taken with severe pain in my left side. After an examination my physician cautioned me to be very careful. I asked if I could be cured, and he said that there was an organic condition which was incurable. My fear was so great that I was ill for about a year.

I had been interested in Christian Science about six months when, after retiring one night, I was again taken with this severe pain. I was frightened, and tried to repeat "the scientific statement of being" (Science and Health, p. 468). I was unable to call for help, so I decided to try to get up and read the text-book. After a great effort I succeeded in doing so, and almost at once the pain left. I arose as usual the next day, and did a heavy day's work with no inconvenience or bad results. This was over three years ago.

Digitized by Google

I had also been troubled since childhood with a throat affection, and had tried all kinds of remedies, but with no cure. One morning since I became interested in Christian Science I awoke to find my throat in what seemed a bad condition. I tried to realize the ever-presence of God, good, and fell asleep, waking in about an hour to find my throat absolutely normal. This experience brought to my memory the fact that I had not suffered once (except the above experience) with my throat since I began to read the Christian Science text-book. I took no treatment for either of the above attacks, but help came when I forgot self in helping some one else, and I know it was the spiritual uplift that brought the healing.

I am deeply grateful to God, also to Mrs. Eddy for Christian Science, including the privilege of class instruction. Five other members of our family have received many blessings, for which we all are very grateful.

ANNA M. SNOWELL, Chicago, Ill.

About five years ago I was troubled with severe pain in the hips. It was so bad that when I lay down I could not get up without assistance. I asked for help in Christian Science, and was healed of this trouble in one treatment. Since then I have relied on nothing but the truth. I have three children, and have had this treatment for all of them with good results. The oldest girl was taken three years ago with measles; at the same time she was teething and took cold, and the symptoms were alarming. We called a Christian Science practitioner to treat her, and in a very few days she was completely healed.

These are only a few of the many ways that we have been helped in Christian Science, and we are indeed glad to be able to express our gratitude in this way.

MRS. JAY H. FRAZIER, Portland, Ore.

Our experience in Christian Science is such a proof that "a little leaven leaveneth the whole lump," I feel it may help some one whose family has not yet been able to grasp this wonderful truth about God. I began to study Christian Science for the benefit of a younger sister, who needed some help more powerful than anything we had ever found in the way of material belief. It made a wonderful change in her life; she was healed of a violent temper, great unhappiness, and many physical ills. I very soon found out that I needed this truth quite as much as my sister did, and was helped in every way,—physically, mentally, and spiritually.

For over two years we were the only ones in our family who would accept the truth, and there were many times when it seemed very hard to see those we loved suffering from ills, mental and physical, which we knew could be healed in Christian Science; but we had been told to live and think the truth rather than talk it, and this we tried always to do, leaving each individual in our family in the care of divine Love. We knew all the time that God gives the same understanding to each of His children, and that some time they would know it. The result has been more than satisfactory. One statement of the Master has helped us very much, "And I, if I be lifted up, will draw all men unto me."

At last a great need made my father turn to Christian Science for help, and he has been growing in understanding ever since. His life has been changed from one of intense fear and melancholy to a peaceful, happy, and useful one. He has been healed of a very severe form of sciatica, from which he had suffered for over thirty years. Next, my elder sister, who had been unable to accept this truth during the four years we had been living by it, became convinced that Christian Science is the truth about God and man. She had suffered from a very severe case of nervous prostration for over a year, had had the help of one of the very best physicians in our city, had tried change of scene and climate, but came back no better than when she left. Then she asked for Christian Science treatment, and in a very short time was entirely restored. She is of course very happy, also grateful for this truth and the freedom it brings.

About the same time a friend of ours, who is almost like one of our family, suddenly decided that she would take treatment. All the time that we had been studying she had been very much opposed to what she thought Christian Science to be. How true it is that none but the Father knoweth when this truth will be revealed to the individual. Our friend is being healed of fear, melancholy, and many physical disorders. Quite recently our housekeeper returned after an absence on account of illness, and announced that she wanted to learn Christian Science. Thus all of our household are studying each day in order to learn more and more of the truth which makes free. Our wish is to grow in understanding, so that we may be able to help those who may need our assistance, and we know that just as the seed which was first planted in our family has brought forth this much fruit, so will the true thought of every individual grow and multiply, until all shall know of this wonderful truth. We are certainly deeply grateful to Mrs. Eddy for living such a pure life that she could be a channel for Truth and Love, and very, very thankful to God that we are learning to understand Him and His universe.—MARGARET BURNSIDE, Indianapolis, Ind.

I wish I could let every one in the world know what Christian Science has done for me, for I never knew what it was to be well and strong until I found this truth. When I was about sixteen years old I had a severe illness, and it was a long time before I could walk; but when I would think I was free, the rheumatism would come back. About two years ago I was taken with the same trouble, and sent for a Christian Science practitioner. She came to see me every day for about four weeks, then gave me absent treatment for two weeks, and I was completely healed and ready to take up my work again (I am book-keeper for my husband in our grocery store). I have been able to be at work every day since my healing, and have had no return of the rheumatism or any other ailment.

I can never fully express in words my gratitude to Mrs. Eddy for giving us the true understanding of the Bible. I am truly thankful to know that God heals all our diseases.—MRS. DORA GRAHAM, Kansas City, Mo.

I feel it to be my duty to send my testimony to the healing power of Truth. I had been pronounced beyond medical skill, and when my brother (who had been healed through Christian Science) heard of my failing health, he wrote me to call for a Christian Science practitioner to help me. The second week after I heard I decided to try it, in the hope of being a better person and being ready to die; but I have been able to work every day since the first treatment. I was greatly reduced when I first took treatment, but am now a good weight and have not taken any medicine since September, 1909. We have not had a doctor or any medicine in our house since that time. I am thankful to God, and also to Mrs. Eddy for the understanding I have gained through the study of Science and Health.

MARY A. BALDWIN, Wilmore, Kan.

About two years ago I changed my residence, and went to live with some people who were interested in Christian Science. They talked to me about it, but at first I thought it only a religious fad. Ultimately they lent me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, which I read occasionally, and soon became convinced of the truth. I had suffered all my life from a complication of complaints. My father passed away suddenly over three years ago, and two of his brothers had likewise been taken without warning, said to be due to

Digitized by Google

heart failure. Over two years ago my mother, after three days' illness, died from acute lung trouble and heart failure, and three months later I lost a brother with even more terrible suddenness, also from heart disease.

Three years ago, while under medical treatment for several complaints, and apparently receiving no benefit, I was advised by a friend to consult a specialist, and did so. The specialist operated on my throat and told me I had *goitre*, and that it was an inherited complaint. He also told me not to hurry, and to get all the fresh air I could, as both my heart and lungs were affected. He said the business in which I was engaged was very bad for me, owing to the dust and close air of the factory. Later on I told my doctor I was worried about my neck, and his answer was: "Never mind about your neck, it is your chest that worries me." He also said my heart was about as bad as it could be.

Over a year ago I was feeling very depressed and altogether ill, and I decided to ask help from a Christian Science practitioner. As a result of the treatment gout, from which I was suffering, went almost at once, the *goitre* gradually left me, and my breathing became normal. Later I had a bad attack of cold. I went to business in the morning, but had to return home during the afternoon. My practitioner called in the evening, and after one treatment the cold practically left me, so that I was able to go to business next morning, though my throat was very painful; but during the day I felt the abscess go instantaneously. After that when asked by the practitioner how my heart was getting on, I could only reply that I did not know I had one. I was examined by a medical man, and he assured me that I was every whit sound and in splendid condition.

I am very thankful to God for bringing me into Christian Science, and for all the happiness and peace I have gained. Mrs. Eddy's wonderful book, "Science and Health with Key to the Scriptures," is a great boon to me, and daily I take more delight in studying it.

Miss L. E. Cooper, Canonbury, London N., England.

[Translated from the German.]

For three years I was ill with kidney disease in a very severe form. I suffered great pain, spent sleepless nights, and was almost desperate. I then heard of Christian Science through acquaintances, and soon felt a sense of great trust. I read the literature, also the Bible, and before long discerned the truth of Christian Science. I began to eat without fear and without any ill effects all the things which I had avoided formerly, and soon I was completely healed.

My daughter too has been restored to life through Christian Science. In May, 1910, she expected to go to Africa. A short time before this she was taken with severe nervous attacks, almost amounting to insanity. The condition became so serious that she had to be taken to a sanitarium. For years she had been suffering with severe headaches, which seemed to result in the trouble just mentioned. I immediately called upon a practitioner for help for my child, and the effect was wonderful. She had been under a sense of disordered thought, but on the day of her healing through Christian Science the consciousness of her identity returned, and she wrote to us: "I again know who I am." It affords me great joy to state that this great blessing has come to us only through the recognition of the truth in Christian Science. My daughter is entirely well now, and has gone to Africa with her husband and children.

For all the blessings which we have experienced through Christian Science I wish to express my sincerest gratitude to God, and to our beloved Leader, Mrs. Eddy.

Auguste Meier, née Neuling, Wolfenbuttel, Germany.

As I feel more and more grateful for Christian Science, after five years of its study, I will at least try to express something of what I feel for its many blessings. After having been for nearly all my life what the world calls an atheist, and having been for a long time in great physical distress, I began to investigate Christian Science by reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. I was immediately awakened to the truth of its teachings, and was, with the aid of a practitioner, healed of an intestinal disorder after more than ten years of suffering. I was also healed of rheumatism, and of a stiffened knee-joint.

Before coming into Christian Science I had suffered for almost a year from an attack of illness, but since coming into Christian Science I was healed in two hours of a similar attack which seemed even worse than the former one, and this without the aid of a practitioner. A discontented disposition had made me a wanderer on the face of the earth for a number of years, and though I was usually successful wherever I went, I was never satisfied. This too has been entirely overcome, and I am now contented and happy. I have also been healed of a sense of hatred, and of many other forms of sin. I am deeply grateful for the purified thought and life that I am beginning to reflect.

For these blessings and for many others, and especially for being able to love the Bible as I now do, I feel that I can never repay Mrs. Eddy.—Ira Botts, Kansas City, Mo.

I have often wished to tell of the many blessings I have received through Christian Science, and as I was reading the Lesson-Sermon one day the thought came to me to write my testimony at once. About five years ago I first heard of Christian Science when I seemed to be the most unhappy mortal that ever lived. Through the loss of an infant daughter, whom I then believed God had taken from me, I became utterly disheartened, and in consequence had several physical ills, such as nervous exhaustion, heart and stomach trouble, etc., so many, in fact, that I never thought I could get rid of them all. I was treated by at least five different doctors, who gave me temporary relief and said I might be well of some ailments within a year or so; while others said I might never be well. The only thing was to try to get it off my mind, which, thanks to Christian Science, I have been able to do.

I came into Christian Science through the healing of a dear sister in Port Angeles, Wash., who wrote asking us to try it; but when we first heard of it we, like many others, laughed at what we supposed Christian Science to be. We then decided to take a trip to my sister's; and when we arrived there I began to take treatment, and discarding all material remedies leaned wholly on God. Aided by the earnestness and faithfulness of a practitioner, I found myself gaining day by day, the results in three weeks' time being such perfect health and harmony as I had not known for a long time.

I owe all I am to Christian Science, and am grateful to all those who tried to help me in this blessed truth. I have had the privilege of class instruction, and for this and all the blessings I have received through Christian Science, which our beloved Leader has given to all mankind if they will only accept it, I am truly thankful. If but one sufferer finds encouragement from my testimony and receives help thereby, I know that others will receive the blessing, for "divine Love always has met and always will meet every human need" (Science and Health, p. 494).

Christian Science has been the only physician in our home for about five years, and I find that in my daily study of our Lesson and the Christian Science literature we have been able to overcome every seeming difficulty that has tried to present itself. As I daily apply the rules laid down in our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I find that all our problems can be solved thereby.—Mrs. Margaret M. Rush, Aledo, Ill.

Digitized by Google

I wish to express my gratitude for what Christian Science has done for me, both spiritually and physically. Coming from a family of eleven children, all of whom had succumbed one by one to a dreaded disease, until only my mother, one brother and myself were left, I was held constantly in the thought that I, too, would finally go the same way; consequently I was very delicate, and was always dosing myself with some kind of medicine or under the care of a physician.

When my mother passed away I went to live with an aunt, and shortly was led to take up the study of Christian Science. At first I only sought for the physical healing, but after learning something of the spiritual benefit that is derived from this teaching I lost sight of the physical and sought earnestly after the peace that "passeth all understanding." In about a year I began to notice a marked improvement in my health, and in two years my physical condition was almost perfect. From being a delicate creature weighing only ninety-seven pounds, I became a healthy woman and at the present time weigh about one hundred and sixty.

About two years ago I was, however, brought very low with a severe attack of liver and stomach trouble. I had had attacks for about a year previous to this, but had always been able to meet them with what knowledge I possessed of the truth. The time finally came, however, when I was unable to meet the trouble and had to remain home from the office and take to my bed. My people, none of whom are Scientists, were very much alarmed at my condition, as my color turned from white to dark yellow all over my body and I suffered intense pain. In fact, I was told by one member of the family that she considered my condition very serious and she thought I ought to call a physician. I told her I preferred a Christian Science practitioner, so one was called. I had not been able, previous to my first treatment, to lie down with any comfort, but that night I went to bed and slept with comparative ease. That was on Saturday, and a week from the following Monday I was able to return to work and, except for a slight yellowish tinge to my skin and a considerable loss of flesh, was none the worse for my attack. For a time fear held me in its thraldom and I continued to take treatment, but after a short time I had regained my lost weight and could eat heartily what was put before me. I have not had an attack of the illness since and know, if I but do my part, I shall never have another.

Only those who have suffered from the pangs of stomach and liver trouble can realize what it means to be delivered, and I am very thankful for all the help that has come to me through the power of Truth. I am also thankful for our Leader, who had the courage to labor patiently against great opposition that she might bring this new-old truth to a people hungering and thirsting after righteousness.

Miss Minnie Haley, Peoria, Ill.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

John V. Dittemore, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM OUR EXCHANGES.

[British Congregationalist.]

Many of our readers must have been oppressed by a sense of helplessness in the labor troubles that have threatened and still threaten national peace. The whole church of Christ in this land seems negligible. Men do not seek her counsel; they would resent any attempt on her part to intervene. At times like this we discover how far the church is from being "the moral guide of society." In such helplessness it may seem mockery to call men to pray; and the call may be misinterpreted.

We can have no sympathy, for example, with those who consider prayer the only duty of the believer, as though it were an alternative to other activities. . . . Still less can we praise the idle plea that prayer is easier and costs less than other duties. The church cannot dismiss the social problems of the day with the offer to pray. Few would urge this in so many words; yet at the back of many minds there is this delusion, that our contribution is that of prayer, while others must do everything else.

It is a curious delusion that the man who has communed with God is likely to be a useless citizen of this world, blind and even indifferent to its movements. It is thought, indeed, that such a man will look upon human affairs as though he were looking at an ant-hill on a summer day. Experience, whether it is found in the story of the past or in the present, teaches that this is not so; and it is to experience that the appeal must be made. The men who do things, who are the first to discern the inner meaning of the movements among their fellows, who can see life "steadily, and see it whole," are the men who have been much in fellowship with God. Against that background all things become clear.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

The truth is that there is but one religion and one Christ, and there never has been more than one. The one religion has been apprehended under manifold forms, none of them big enough to contain all the truth about the relations of God and man, but some of them containing more than others. The fullest and highest revelation yet made in this respect is no doubt what we call the Christian religion, but it is not a complete break with all the rest, nor does it stand unrelated to all that has gone before in the spiritual evolution of mankind. And the Christ of Christianity is not a being who has had nothing to do with any other age or faith than that which now bears his name; he has been the root and inspiration of everything worth doing, every thought worth thinking, every Godward effort that has ever been made in this world since human life began. Besides, who knows what Christianity is? Who has fully apprehended it yet? What church has a monopoly of it? What society has succeeded in giving it full and final expression? We are far too prone to be ruled by names. Everything good in the world is Christian, no matter how old or how young it is; everything worthy of Christ is Christian, whether it made its appearance five thousand years ago or only today. And when a redeemed humanity, perfect and complete, is gathered into the city of God at last, we shall find that at every stage of every road the Christ is the source as well as the goal of all our strivings, has been shepherding his own and guiding them toward one and the same eternal home.

[Chairman-elect of the Congregational Union of England and Wales, as quoted in an editorial in *Christian Commonwealth.*]

The inability of the churches to render any direct service in the social crisis of the hour must be disappointing and disconcerting to those people who set down the promotion of the well-being of the community as a primary Christian duty. They do not seem able to do anything either as

Digitized by Google

champions of justice or as friends of the poor or as impartial peacemakers. No doubt the principal reason why they do not attempt to interfere is that they know they are not wanted. Whole sections of the community would have no faith in them as mediators. Besides, their members cannot be regarded as outsiders. In many cases they are parties to the dispute on one side or the other. There are churches dominated by employers, and there are churches composed entirely of the working classes, while among the more normal churches in which rich and poor meet together church fellowship has not destroyed their distinctive class interests. If it had done so (as was the case at Jerusalem in the enthusiasm of its early days, but not at Corinth twenty years later), for the people in that happy state there would be no social problem, and we should have a leaven for wider circles.

[Charles W. Gilkey in *Standard*.]

The world is more eager to know about the disciples than about the doctrines, about the exponents than about the theory, about Christians than about Christianity. It will not believe in Christianity as a teaching until it is sure that it can believe in Christians as people. As somebody has put it, Christians are the world's Bible; the only Bible that most people read or are acquainted with; the source of acquaintance by which most people judge religion, the Bible, and Christians. What we modern Christians need most to fear is not skepticism as to Christian teaching; that may be serious, but it can and will be answered by the apologetic of Christian discipleship that is earnest and devoted and faithful. What we need to fear is the spiritual impotence, the weakness of Christian character, and experience that fails to produce real Christian disciples. Skepticism about Christian teaching can be answered by the evidence of Christian character; but skepticism about the reality of Christian character and the faithfulness of Christian disciples—how can we answer that?

[Rev. E. L. M. Gould in *New-Church Messenger*.]

The modern world, at least, is beginning to realize that a spiritual drought is upon the land. Here and there the deeper thinkers are beginning to deplore the loss of ideals, and to hope for something to take the place of the religious teachings that have been rejected. And all the while, nay, with trebly renewed vigor in these days of the second coming, the Elijah of the eternal world is proclaiming his challenge, if we would but hear him, and offering to show us certainly which God we should serve. Face to face with us as individuals, the simple truth of religion, once more revealed and made intelligible, is urging us to the test, "The God that answereth by fire, let him be God."

[*Universalist Leader*.]

Too much of our religious teaching is for church consumption only! We do not realize that its real value is to find its expression outside, under different conditions; that it is for use in the every-day life of the world. An education which does not leave the schoolroom is but poor stuff, and religion which does not get outside of the church will get no one into a heaven worth having.

[*Churchman*.]

There is coming into being from the inside of organized Christianity an untrammeled outlook toward religious questions symptomatic of a general revolt against the effort to force men and women to accept purely crystallized statements of religious truth. There is a demand that the religious consciousness shall have a living language, capable of expressing modern needs.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

The Publishing Society has secured, and now has ready for distribution, a fine photogravure of Mary Baker Eddy made by Littig & Co. of New York from a colored portrait painted by Miss Alice C. Barbour, which was based on a photograph taken by Mr. Bowers of Concord, N. H., in November, 1891, and with a rearrangement of her hair that was very pleasing to our Leader.

This admirable portraiture of Mrs. Eddy, printed in three sizes on India paper and mounted on heavy plate paper ready for framing is for sale at the prices shown on opposite page.

The field will undoubtedly be gratified to learn that a book (132 pages with index) containing the "Excerpts from Editorial Comments" which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, also the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is now on sale, published in two styles of binding. For prices see opposite page.

Two of our Leader's poems, "Shepherd, show me how to go," and "Love," set to music by Frederic W. Root, are on sale by the Society. For description and price see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.00. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half Morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind Healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy, $8.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10x7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 40 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 30 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE. June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 70 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $4.00; 50 copies, $7.80; 100 copies, $15.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $5.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25— £0: 5 s.: 2d.;	Mk. 5.30;	F. 6.45
2.25— 0: 9 : 3 ;	9.50;	11.60
2.50— 0: 10 : 3 ;	10.60;	12.85
4.00— 0: 16 : 5 ;	16.80;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

The New Orleans-Netherlands Company, owner of a five-thousand-acre tract of land ten miles southwest of New Orleans, will be ready to bring about two hundred families of Hollanders to colonize some time next year. J. Arthur Dixon, secretary of the company, says: "This section of Louisiana is truly the Holland of America, and we will bring to our tract only Hollanders, believing that they will do better there than would any other settlers. They understand well the system of farming that will be necessary here, and with proper environments they will succeed."

An expenditure of sixty million dollars is called for by the Boston Elevated railway's plans for construction and extensions in its transit development before the year 1915. To provide the necessary power a high tension alternating current system, consisting of a power station of thirty-thousand kilowatt capacity, one hundred and forty-two miles of underground conduit, and six sub-stations in which alternating current will be transformed into direct current, is being installed.

Charging conspiracy to restrain interstate trade and commerce in lumber and its products, a United States district attorney has filed a bill in the United States circuit court at Detroit, Mich., to enjoin the Michigan Retail Lumber Dealers' Association, the Scout Publishing Company of Detroit, Mich., and the Lumber Secretaries Bureau of Information of Chicago from further alleged unlawful business methods. This suit is one of several in the campaign which the department of justice is conducting against the lumber trust.

In the ten years which followed the census of 1900, the population of the United States increased twenty-one per cent, but the number of farms did not keep pace, increasing from 5,737,372 in 1900 to 6,340,357, or 10.5 per cent. The average number of acres in farms decreased from one hundred and forty-six in 1900 to one hundred and thirty-eight in 1910. The actual area in farms was 838,592,000 acres in 1900 and 873,729,000 acres in 1910.

Thirty-nine hundred dollars of a total of twenty thousand dollars in premiums and trophies, is offered as prizes in carload contests on pack, variety, and decorative features at the fourth national apple show in Spokane, Wash., Nov. 23 to 30.

Secretary of the Interior Walter L. Fisher and the party that accompanied him on the revenue cutter Takoma on the visit to Alaska, completed a journey of forty-five hundred miles. He believes the value of the resources in Alaska has been exaggerated.

Greece will be asked to enter into negotiations for the consummation of an arbitration treaty with the United States on lines similar to the agreements with Great Britain and France, which are now awaiting ratification by the Senate.

J. J. Ward, starting from Governor's Island, N. Y., and Robert F. Fowler, starting from San Francisco, Cal., are endeavoring to cross the continent in aeroplanes. They are competing for a prize of fifty thousand dollars.

The Gifford Pinchot exploring party, composed of the former chief forester, Senator Miles Poindexter of Washington, Mr. Pinchot's secretary, and two newspaper men, has reached Alaska on a tour of investigation.

President Taft, after reviewing the evidence, has sustained Dr. Harvey W. Wiley, the government pure food expert, on all points.

A tract of one hundred and sixty-seven acres has been chosen for the Panama-California exposition in 1915 at San Diego.

International.

Purely strategical reasons have induced the Japanese government to decide upon the abandonment of a naval station at Port Arthur, in Manchuria, representing an investment of many millions of dollars. This station was built by the Russians when they were in control of the Liao Tung peninsula, under a nominal lease from China. As much of the material as can be used elsewhere will be transferred to the new site selected at Chinhai Bay, on the coast of Korea, a position that will command the entrance to the Yellow sea and the great gulf of Pechili, as well as afford a measure of protection to the western coast of Japan and the straits of Korea.

The French naval program provides that the effective strength of the French fleet in 1920 shall be twenty-eight battleships, ten scout cruisers, fifty-two ocean-going torpedo boats and ninety-four submarines. There will be in addition a fleet of ten vessels for overseas purposes. The cost of construction involved in the new program will amount to a minimum of two hundred and eighty million dollars.

The value of the railroad between Port Arthur and Kuan-Cheng-Tzu, Manchuria, including rolling stock, which Russia surrendered to Japan by virtue of the treaty of Portsmouth, has been fixed at approximately forty million five hundred thousand dollars.

The *Tribuna* of Rome reports that Armenian priests who are at Brindisi say they have heard from an archeological mission in Egypt that there has been discovered a fifth and heretofore unknown gospel. The gospel is said to be written on papyrus.

President Fallières gave his formal sanction to the French reply to Germany's counter-proposals in the Moroccan negotiations and the foreign minister, M. de Selves, despatched the transcription of the document to Berlin on the 14th.

The royal commission on Melbourne traffic has issued a report in favor of the electrification of the suburban railways and tramways. This will involve an expenditure exceeding twenty-five million dollars.

The trip of M. Jagerschmidt, a Paris journalist, who went around the world in less than forty days, cost him about twelve hundred dollars.

The population of China, as estimated by the imperial maritime customs for the entire country is 438,425,000 and for the open ports 7,708,500.

The report of the finding of a valuable deposit of radium ore at Mt. Painter in northern Australia has been confirmed.

The Chinese section of the Kowloon-Canton railway will open Oct. 2 and will finally connect Hongkong and Canton.

Industrial and Commercial.

The president of the Spokane (Wash.) District Growers Association declares in an interview that some of the commission men have offered to pay growers one dollar a box for their apples in the orchards, agreeing also to pack them, as against about sixty-five cents a box paid before the orchardists in the Northwest perfected their organization. "The Northwest," he says, "can and does produce the best commercial apples in the world. They sell at from two to three dollars a box in the East, while the growers are paid about sixty-five cents. Out of this comes our cost of raising the fruit, packing, help, and time, and we don't clear expenses. That is the reason we have organized. The apple is a finished product and as such is conveyed to the consumer. The middlemen add nothing to it but simply move it and—collect a big commission. There is no good accomplished by the fruit going through their hands, but just an additional expense to the consumer, and neither the customer nor the producer is benefited."

Work on the construction of the first section of the Amur railroad, designed to give Russia a line to Vladivostok entirely through Russian territory, was begun in July, 1907. Forty thousand workmen, all Russians, are now engaged in the construction of the line and in addition six thousand convicts. About one hundred and twenty-five miles of rails have been laid and six hundred and fifty miles of a road suitable for automobiles constructed. This line will be about thirteen hundred miles long and is to cost, as estimated, one hundred and fifty-three million dollars. The doubling and improvement of the existing tracks of the Siberian railway are already proceeding in three sections, involving a cost of eighty-five million dollars. In addition three hundred and seven million dollars is to be spent in improving the Trans-Baikal railway, where there are steep grades requiring double-engine service on all trains, a large number of short curves, and wooden bridges over the narrow rivers, which are constantly destroyed by fire.

The discovery of a new metallic filament lamp has just been announced by H. N. Sporborg, a member of the British Thompson-Houston Company of Rugby, England. This firm, after three years of active experiment, has produced a tungsten filament which can be stretched to any length and bent in any direction. Hitherto the filaments, made of powdered tungsten fused together, were brittle and easily broken. By the new method a ductile filament of continuous length has been secured, the use of which it is claimed will revolutionize electric lighting.

Farmers of the United States needlessly lost 88,000,000 bushels of winter wheat this year, not to mention an enormous loss in other farm products, simply because they failed to prepare against drought by taking steps to keep moisture in the soil. This is the declaration of Secretary John T. Burns of the International Dry Farming Congress, who is now preparing to conduct the sixth congress, which meets in Colorado Springs, Col., next month.

President Barrett of the National Farmers Union announced at the southern cotton growers convention at Montgomery, Ala., that a Franco-English syndicate has guaranteed any amount of money up to seventy-five million dollars toward financing the South's cotton crop.

Reports of special inspectors on the coming wheat crop in the Canadian west show a total of 178,650,000 bushels. The crop of oats is estimated to run 223,550,000 bushels, the barley crop 33,300,000, and the flax 720,000 bushels.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

FIRST LESSONS.

REV. JAMES J. ROME.

IN Article XX of our Church Manual, we read that the first lessons which should be taught pupils in Sunday school are the Ten Commandments, the Lord's Prayer and its spiritual interpretation by Mrs. Eddy, and the sermon on the mount. There seems to be a misunderstanding or uncertainty on the part of some as to what is meant by "first lessons," and how these lessons are to be taught. One interpretation of the term seems to be that these lessons are to be taught only to the younger or primary classes; but this construction cannot be what was intended, for many pupils of the older classes in our Sunday schools have never had the privilege of such primary teaching. The term used must refer to something more than mere age or class grading.

These lessons are "first" inasmuch as they are the foundation or basis of all other lessons and are as necessary to one's progress toward perfect spiritual understanding as are the primary lessons and rules in arithmetic in the progress toward higher mathematics. We would never think that a student could understand the more complicated branches of mathematics without a thorough comprehension of the fundamentals. Without a knowledge of addition, subtraction, multiplication, and division, one could not be prepared to demonstrate problems in cube root or higher algebra; neither could he be excused from an acquaintance with these elementary rules and methods because he was well advanced in the study of geography, rhetoric, and history. It does not matter, likewise, how far a pupil in Sunday school may be advanced along other lines, his progress spiritually will depend largely upon his understanding of these first lessons.

It is important, then, that an acquaintance with and understanding of these lessons be considered the primary object in every Sunday school class. In teaching them it is necessary first to see that the letter is thoroughly learned, and by thoroughly is meant exactly, perfectly, for if the pupils are permitted to repeat the lessons in an indifferent, careless manner, it will be more difficult to impress them with the importance of the meaning and application. When this step has been attained, we may advance to the more careful consideration of the moral and spiritual signification, as it is expressed in Science and Health (p. 495): "Study thoroughly the letter and imbibe the spirit."

In learning these first lessons the pupils may regard them as apart from and independent of their own experience, and hence they may not be interested in the signification attached to them. It is well, therefore, to impress upon the pupils the fact that the essential truth of these teachings is of practical value to each of them and can be applied to their every-day life, thus increasing their interest in them. Familiar examples can be used that will appeal to the thoughts of the class and so stimulate the endeavor to conform their lives to this higher and better understanding of law. Even in teaching the regular Lesson as found in the *Quarterly*, which is the next step mentioned in the by-law, we have constant opportunity to apply and illustrate the first lessons.

This leads us to observe in the next place that these first lessons are the basis, the very foundation of all true teaching and living. Let us notice what they are: First, we have the Ten Commandments, the recognized basis of all moral law, that on which all true law is based, be it political, social, or religious. A gentleman being in the library of his friend who was a lawyer, was looking over the shelves of law books; one he picked out had the chapters arranged under the headings "Genesis," "Exodus," "Leviticus," etc. "Why," he exclaimed, "this is a Bible." "Certainly," his friend replied. "Do you not know that all civilized law is founded on the Bible? A law library would not be complete without it." So we find that in the life and experience of every man and woman an acquaintance with the requirements of the moral law as taught in the Bible is of the utmost importance. The child who has been trained to learn and obey the Ten Commandments will acquire an uprightness of character and steadfastness of purpose attainable in no other way. The man who takes the Bible as his chart in life will be a law-abiding citizen.

Next we have the Lord's Prayer with its spiritual interpretation; that prayer which is so universally known among Christian peoples and is so comprehensive that it touches human experience at every point; a prayer which, as Mrs. Eddy says in Science and Health (p. 16), "covers all human needs."

Next in order come the beatitudes, the introductory or preparatory steps to the sermon on the mount. What an introduction that is! Here we are taught humility, soberness, meekness, holy desire, mercifulness, purity, peacefulness, even in the face of persecution. Such a preparation of the heart seems necessary before mortals are able to grasp this fuller meaning of the law in order to fulfil its requirements. In the rest of the Master's great sermon which follows, we have the higher meaning of the moral law expounded and illustrated, and by its use we are enabled to understand and teach more fully the meaning of the commandments. The letter and especially the spirit of these first lessons should imbue the mentality of every one who is striving to live a true life. The Sunday school teachers themselves should have them in contemplation daily and hourly, in their endeavor to demonstrate them in their lives, and in proportion as this is done will they be able to impress their importance upon the thoughts of the pupils.

In Mrs. Eddy's writings we find special emphasis placed on the passages referred to in this by-law. In "Miscellaneous Writings" (p. 67), after speaking of the claims of the law and giving an interpretation to the sixth, seventh, eighth, and ninth commandments, she says: "Obedience to these commandments is indispensable to health, happiness, and length of days." On page 114 she adds: "They [the teachers] must themselves practise, and teach others to practise, the Hebrew Decalogue, the sermon on

the mount, and the understanding and enunciation of these according to Christ;" and on page 303, our Leader goes on, "If ever I wear out from serving students, it shall be in the effort to help them to obey the Ten Commandments and imbibe the spirit of Christ's beatitudes."

WHEN DOCTORS DISAGREE.

FLORENCE S. WEAVER.

SOME months ago invitations were sent out from a public school in the city of Baltimore to parents of the attending children, to be present on an occasion when the educational system of the school would be discussed. There were about two hundred present, and after a few preliminary remarks by the principal of the school, the meeting was thrown into an open conference. The length of the lesson and the physical condition of the average child were discussed until it seemed that the school tasks were difficult, and the child a frail creature indeed; that it was doubtful if he could stand the strain.

Then a doctor in the audience arose and said that while they were considering what was good for the child, he should like to suggest that the water in the school be boiled. He added that he was a doctor in good standing in the city, and he had used boiled water in his home for four years, and that not one member of his family had had typhoid fever, and that he had had a like result with many patients. Instantly another man was on his feet, claiming that as a physician in equally good standing he would like to state that he had also used boiled water at his table for several years, and that every member of his family had had this disease, and that many of his patients who had taken the same precaution had suffered similarly. He was interrupted by a man who said that from his standpoint he could not see that boiling the water both at home and at the school would suffice to insure against disease, as any child might be tempted to take a drink on his way to or from school.

Before the speaker could offer a solution to this dilemma he was vigorously interrupted by a doctor who said that he knew what he was talking about; that he had devoted years of study to the subject, and that he would like to denounce the practice of boiling the water; that in boiling what was objectionable in the water the life-giving properties were destroyed, and that one could not flourish, could not have the proper use of his faculties, while he was kept on boiled water. Thus, with much fervor, the discussion continued on the advisability of boiling or not boiling the water. One could hardly imagine how a settlement could be reached when the doctors disagreed.

At this point the writer slipped out, and in leaving met one of the teachers in the hall. The teacher did not know that the writer was a Christian Scientist, but her remarks were to the point when she said: "I do not blame you for leaving. We have these sessions twice a year to discuss education, but invariably physiology is discussed." I walked down the street from the school, thankful that the spiritual sense of being had come to me through Christian Science. Some one has said, "When one knows, even in a degree, that 'there is no life, truth, intelligence, nor substance in matter' (Science and Health, p. 468), then he is in God's arms." That is where I felt myself to be. Never before did I so clearly see that from which we had been delivered; never before did I so clearly understand St. Paul's statement, "The whole creation groaneth and travaileth in pain together," waiting to be delivered. Never before did I so deeply appreciate Mrs. Eddy's work—her worth and her victory—and this wonderful truth that is awakening men to know that their one need is God—"whom to know aright is Life eternal" (Science and Health, Pref., p. vii).

THE DECEPTION OF MATERIAL SENSE.

FRANK H. SPRAGUE.

"MORTAL existence is a state of self-deception and not the truth of being," Mrs. Eddy declares (Science and Health, p. 403), and the deceptiveness of certain phases of human experience is clear to every one. The dream of sleep presents a world of fantastic forms and conditions which, although seemingly real from the dream standpoint, is found to be unreal as soon as the more normal conditions of the waking state appear. Likewise, one who yields to the belief of hypnotic power exercised by another, seems to see and feel objects which in reality exist only as *illusions* of an abnormal consciousness. The insane may labor under the delusion that they are beset by demons or are journeying in foreign lands, when the situations experienced are purely imaginary. Hallucinations and superstitious beliefs of various descriptions also illustrate in milder ways the erratic tendencies of the human so-called mind. No form of delusion appears as such to the consciousness which entertains it. The fact that mankind has set for itself a certain standard by which it adjudges itself rational, normal, and undeceived, is in itself no proof that it is so in the truest sense.

Such a conclusion fulfils the requirements of human belief and nothing more. Although the world does not appear in exactly the same fashion to any two of the billion and a half inhabitants of the globe, each one is, as a rule, pretty fully persuaded that his own conception of things is essentially right. The fact, however, that a particular view is universally held is no guarantee that it is correct, for many of the most egregious errors have obtained world-wide credence. Because material existence, then, is believed by nearly every one to be real and genuine, it by no means follows that it is so. When thought escapes sufficiently from the circumscribed point of view and narrow limitations of material concepts to discern the nature of real being, the unreality and dreamlikeness of the condition known as mortal existence becomes apparent. This does not imply that all which seems to exist or transpire in human experience is misconceived and must be undone. We pronounce a dream unreal not because its every impression is fictitious, but because the standpoint from which the phenomenon as a whole is conceived is erroneous. So with regard to the matter-world which constitutes the daydream of mortals. While nature, even as materially construed, seems to possess elements of beauty, orderliness, and genuineness, the whole scheme of life on a material basis is found to be self-contradictory and inconsistent, when regarded from the standpoint of the existence of a creator who is infinite in wisdom, power, and goodness.

Nearly two thousand years ago a Galilean reformer excited the ridicule and hostility of learned and ignorant alike, by insisting that the commonly accepted notions about the universe were false; that in reality creation was spiritual, and that the materially conceived and evolved order of things was but an illusive appearance growing out of an unspiritual point of view. Furthermore, he proceeded to substantiate his view by works which, to the material thought of his contemporaries, seemed subversive of the method and order of nature. The normal, actual order of things as God had constituted it, and as it appeared to the spiritually awakened vision, he termed the "kingdom of heaven." He declared also that this order of things was always at hand, awaiting human recognition. He showed that substance, law, and order were spiritual and harmonious, and that the universe appeared to be subject to discord, suffering, sin, disease, and death, only because mortals saw it out of focus by reason of their abnormal point of view. He saw evil, or error, to be sure, in all its manifold phases; but he also saw through it as an imposture, an unreal exhibition of assumed power without foundation

Digitized by Google

or support in truth or fact. He repudiated the material concept of existence as unnatural, illegitimate, at variance with the fact—in short, as the work of "the devil," whom he characterized as the personification of falsity, deception, fraud,—"a liar, and the father of it."

This wrongly conceived order of things he referred to as "this world" in contradistinction to the real and abiding, the spiritual world ordained and sustained by God. He instructed his followers to set about overcoming, as he was doing, the belief or sense of materiality, through a spiritually enlightened understanding of God and His idea, or creation. "He that believeth on me, the works that I do shall he do also." In t]:s making the ability to do the works which he did the test of his students' understanding of his teaching, he was exercising no arbitrary authority; He was simply voicing the truth, previously unrecognized to any definite extent, that the consciousness of God as All-in-all logically and inevitably results in disestablishing the claims of material sense which uphold the presence and power of matter or evil.

As a steam-gauge registers the pressure within the boiler, so the great demonstrator of Christianity recognized in the ability to heal by divine power an indication of the spiritual status of the individual's thought. Error's stronghold has always been the plea that the world was made conformable to material law, and that it would be foolish to try to change conditions which an all-wise creator had seen fit to establish. But Christian Science shows that the world is not and never was made as it appears to material sense; and that it is our business to correct the errors of belief until human concepts shall tally completely with the divine idea, the world as God has created it.

Students of physical phenomena in all ages have recognized the deceptiveness of sense testimony; but they had not realized the self-deceived state or condition of the type of mentality which conceives of life as conditioned by physical modes, until Mrs. Eddy discovered the Principle and Science upon which the earlier demonstrations of Christianity were based. Through experience she reached the realization that the universe is spiritual, and that materiality disappears to the degree that the Mind which was in Christ Jesus is realized. She tells us that "the fading forms of matter, the mortal body and material earth, are the fleeting concepts of the human mind. They have their day before the permanent facts and their perfection in Spirit appear" (*Ibid.*, p. 263). By proving that material sense is, relatively speaking, a dreamlike condition foreign to man's normal consciousness, Christian Science shows why speculative thought has been forced repeatedly to abandon the attempt to solve the problem of being in any true and ultimate sense. Every endeavor to explain or account for the phenomena of a dream from the dream standpoint must result in "confusion worse confounded."

Mortals must wake sufficiently from the dream of material existence to recognize it as such before they are in a position to comprehend the meaning of life on a spiritual basis. The healing work of Christian Science tends to bring mortals to a realizing sense of their false view of things and to cause them to feel the necessity of working out their salvation from the standpoint of real being.

AN ASSURED GOAL.

FLORA R. TSCHOPIK.

THE persistency and zeal which are impelling factors with the Christian Scientist are inspired by the assurance of his quest. When Sir Galahad sought the holy grail he was animated by a holy purpose and by the possibility of success; yet he lacked the positiveness of the ultimate that gives courage, perseverance, and joy to the Christian Scientist. Demonstration upon demonstration assures the latter of the proof of the great verity that God is omnipotent; and although evil may seem to be ubiquitous and active, that is only the lie of a would-be usurper of God, infinite good, who is omnipresent and omniactive.

"Precept upon precept; . . . here a little, and there a little," convinces the newcomer that in Christian Science he has entered the right gate and has found the right path. If there were no conflicts with the so-called carnal mind to be undergone, no error to overcome, there would be no necessity for the truth to be demonstrated,—it would be an established fact in the consciousness of each individual; therefore in the universal consciousness. Material beliefs and temptations beset the way, but rock-foundationed in hope, faith, and love, true Scientists neither fear nor doubt, for "stately Science pauses not, but moves before them, a pillar of cloud by day and of fire by night, leading to divine heights" (Science and Health, p. 566). Having that priceless possession, "Science and Health with Key to the Scriptures" by Mrs. Eddy, by the aid of which we can here and now begin to enter heaven, eternal harmony; directed and supported by the immutable power of Spirit, what seeming counter-attraction can be offered to one who is awake to the truth of Life, or that can hinder this one from pursuing the way of victory, the incorporation into his own consciousness of the changeless truth, the attainment of man's real selfhood, unseparated and inseparable from God, perfect Mind.

Close adherence to divine Principle gives one power to perceive and to resist all of the allurements of mortal mind, whether it be the seductions of sensuous pleasure or the gratification of the subtleties of self-love, anger, criticism, envy, hatred, etc., all of which promise gratification in their indulgence and would turn one from the path of spiritual peace; but resistance to error and steadfast reliance upon Christ, Truth, will completely expose these obnoxious elements in their true colors, and a conquest is achieved which brings real pleasure and the rejoicing consciousness of having followed the charted way. We are rightly guided only in so far as we are obedient to Principle; any deviation therefrom causes one to become stranded on the shoals of sense slavery. In reflecting Truth, Love, and goodness, we follow the straight and narrow path, the path which leads ultimately to the bringing out of the perfect man, the express likeness of God, Mind, and the Scriptures give us the joyful assurance that in reality this is the only man that has ever existed.

By following the rules laid down in the Christian Science text-book,—by allowing spiritual law to annul material law, by letting true thoughts supersede wrong thoughts, by letting love be universal, by relying upon and following Principle instead of personality, by letting God's will be done instead of obeying the dictates of the false sense of self,—one begins here and now to come into his perfect selfhood, the selfhood demonstrated by Christ Jesus, who, denying the beliefs of material existence, lived the life of man in God's image, and in his ascension rose above the material senses into the actuality of conscious spiritual life. This is the proven quest for each individual. One man cannot do another's work. The work of renouncing and attaining is slow or rapid proportionately to one's fidelity to the leadings of Christ, Truth. The goal is sure! The guiding light is forever present! The swelling multitude cheers the way! This is the age of fulfilment, and one can tread the narrow way rejoicingly, undeflected therefrom by any cries of sense.

Abraham was one of the first to perceive that life is spiritual here and now, without waiting developments after death. Moses and the prophets saw the way of Truth leading to at-one-ment with God; Christ Jesus pointed out the way; our beloved Leader, Mrs. Eddy, has given us a complete chart for our guidance to unity with God. We have as beacon-lights the *Journal*, the *Sentinel*, and the *Monitor;* but just as the warning light is useless to the

Digitized by Google

mariner unless it is heeded, so the signals and warnings given to us are of no service unless they are studied and the correct standard of conduct and of activity is measured up to,—not merely noted, then carelessly passed by.

It is to be remembered that the goal is a forever fact; the voyage is not a hazard, neither is it companionless, for it is now being eagerly entered upon by many travelers. Hear the promise made to Joshua, "I will not fail thee, nor forsake thee. Be strong and of a good courage: for unto this people shalt thou divide for an inheritance the land which I sware unto their fathers to give them." Christ Jesus, whose life defined freedom and power, said, "In the world ye shall have tribulation: but be of good cheer; I have overcome the world." The true seekers of the way, then, may well be encouraged by these words of our beloved Leader, who says, "The discoverer of Christian Science finds the path less difficult when she has the high goal always before her thoughts, than when she counts her footsteps in endeavoring to reach it" (*Ibid.*, p. 426).

MIRACLES.

JOHN F. FORTH.

WEBSTER defines a miracle as "a wonder or wonderful thing; a marvel; an event or effect in the physical world beyond or out of the ordinary course of things." The work of Jesus Christ has been called miraculous; but his mighty works were wrought for the overcoming of sin, suffering, distress, and in doing thus he annulled material laws. These works must, therefore, have been wrought through the understanding of a higher law, and the great question for us is, Can we recognize, understand, and utilize this law? In the sermon on the mount Jesus said that he came to fulfil the law, to do the will of the Father, who is Spirit; therefore this law must be the law of Spirit, the expression of infinite Mind; a law eternal, unvarying, and available under all circumstances and conditions.

History shows that men of various races and times, who were least in bondage to material sense and its cravings, caught glimpses of this infinite and spiritual law, and obedience to it made them the "salt of the earth" which kept humanity from utter rottenness. The Hebrew Scriptures point to the coming of one who should understand the law of Spirit and have power to demonstrate it. Such a one could not possibly be in bondage to the belief in material laws, with their resultant misery—sin, disease, and death. In the arena of human consciousness he would either be mastered by them, or prove himself master; the conflict was inevitable, and on his victory the hopes of the ages rested.

This master thinker came to men with a message that contradicted their experience and beliefs. Could words alone convince them? No; it was necessary to demonstrate the fact that a power mightier than that manifested in sickness and death existed, was present, available for and provable through all who would accept the truth; therefore it was impossible for "mighty works" to remain undone; it was certain that in the orderly development of such a message, delivered by such a messenger, the demand that it be tested and put to the proof should be made by those who heard, and on this demonstration of a power beyond their experience, they were asked to acknowledge the presence and power of infinite Mind, Spirit, God!

Now as then, many ask for proof of an infinite Being, or God, and the power of God can be proved by all who accept the fact of man's spiritual relation to God. As there is no effect without a cause, there cannot be a law without a mind to frame and sustain the law, and as God's law is eternal, it must be eternal in its scope and operation. As the author and sustainer of the law is infinite, so every law of Spirit is unfailing and eternal, and it is on this basis that the mighty works of Christ Jesus and his disciples can be accepted as veritable facts. It has also been proved in Christian Science that the undestanding of and obedience to these laws not only may but will produce like results as in Jesus' time. The so-called miracles of yesterday are the facts of today!

THE BIBLE ILLUMINED.

ALICE B. WARNER.

A SHORT time ago I met a young woman whom I had not seen for a number of years, and almost the first thing she said was, "Well, I suppose you are still rejoicing in the study of Christian Science." Then she told me that she greatly desired to acquire a working knowledge of the subject herself, but there seemed so much family opposition that she was making very little progress. The mother of the young woman is the daughter of one orthodox minister and the wife of another, and her religious convictions are very much set. The daughter told me that she had said to her mother recently, "Well, mother, you will have to admit that Christian Scientists are the happiest people on earth. They are optimistic, cheerful, contented, willing to live and let live, and altogether they seem to have found the secret of joyous existence." The mother replied, "That is no argument in favor of Christian Science; any people who would read the Bible as much as they do would receive the same benefit." The strange thing is that she was so blinded by prejudice that she failed to see the contradiction of her own argument.

An incident, however, brought to me a realizing sense of what Christian Science has done for me in the direction indicated by this particular young woman. Before I learned from the study of "Science and Health with Key to the Scriptures," by Mrs. Eddy, that the "spiritual import" of the Bible has an "application to all ages, past, present, and future" (Explanatory note, Christian Science *Quarterly*), I tried in vain to read the Bible with any degree of understanding, interest, or profit. I had tried to study it with considerable effort, simply because I had been embarrassed by my ignorance of the book, but I found its reading dry, tiresome, and uninteresting, until I learned in Christian Science that God—the same God who in the beginning created the heavens and the earth; the God who caused the waters to part for the Israelites; the God whom the psalmist said "shall give his angels charge over thee:" the God who said to Isaiah, "Fear thou not; for I am with thee," and to Ezekiel, "Turn yourselves, and live ye:" the God who sent His angels and closed the lions' mouths when Daniel was thrown into their den; the God who sent His Son into the world with a message of peace and good will toward men; and the same God who through that Son healed all manner of sickness and all manner of disease and who abolished death and brought life and immortality to light,—that God is revealed in Christian Science as "universal, eternal, divine Love, which changeth not and causeth no evil, disease, nor death" (Science and Health, p. 140).

Since I learned what God really is, and consequently what His image and likeness must be, I have found the Bible to be my most precious possession, and next to it I value the book which taught me how to understand the Bible. Needless to say I am deeply grateful to Mrs. Eddy, the inspired author of Science and Health.

He that would enjoy life and act with freedom must have the work of the day continually before his eyes. Not yesterday's work, lest he fall into despair: not tomorrow's, lest he become a visionary; . . . Happy the man who can recognize in the work of today a connected portion of the work of life, and an embodiment of the work of eternity.

J. C. MAXWELL.

SELECTED ARTICLES.

[Alfred Farlow in *New Orleans* (La.) *Picayune.*]

In his continued discussion of Christian Science our critic declares that "Christian Science practitioners claim to be able to heal all kinds of diseases." As a matter of fact, Christian Scientists make no special pretensions as to what they are able to do, although they note with gratitude what has been already accomplished. They claim that with God all things are possible, and that perfect application of Christian Science will bring forth perfect results, but they hold that Christian Science is indeed a science, and must be so treated. One cannot be regarded as a mathematician simply because he believes in mathematics and its basic laws. He is a mathematician who understands and can apply mathematics in a manner to obtain the results which mathematics promises. So he is a Christian Scientist who understands and can apply Christian Science sufficiently to bring results. One could not reasonably affirm that a mathematical rule is not true simply because some one who believes in the rule is not able to demonstrate a proposition according to its instructions.

The gentleman declares that Christian Science is not the Christ-method, adding: "There was no limit to Christ's power, but Christian Science has very distinct limitations to its curative power." He declares that our Lord "spoke and it was done in a moment." It is certainly unreasonable to expect mortals in this material age to accomplish what the Master did in the perfection of his spiritual growth. Nevertheless, the demand is upon us, and it is our duty to comply as far as possible and as rapidly as possible. The important question is this: Does our critic believe that healing the sick as well as the sinner is an essential of Christianity? Does he believe the Master's promise: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father"? Does he believe the declaration which he has quoted, namely: "They shall lay hands on the sick, and they shall recover"? If so, is he able to demonstrate or recommend a better way than that which is presented in Christian Science? If he cannot present a more effectual method of producing results by a reliance upon divine power than that which is practised by Christian Scientists, he is surely not in a position to discourage the practice of Christian Science.

The command to heal the sick appears in the same connection as the command to preach the gospel, and is just as imperative. Moreover, if the gentleman will read the Scriptures once more on the subject of Christian healing, he will find therein recorded an incident when the disciples failed to heal, and brought the case to the Master to know why they had not been able to "cast him out," and the Master replied: "This kind goeth not out but by prayer and fasting," thus teaching that a great sacrifice of materiality and a high degree of spirituality must accompany an earnest effort as requisite to the healing of such a case. But in this connection he did not excuse the disciples. He rebuked them for their want of faith. We trust that our critic will not overlook the fact that it is quite as incumbent upon him as a professing Christian minister, as a professing advocate of the Christ-teaching, to heal the sick instantaneously and raise the dead, as it is upon Christian Scientists. It is barely possible that some of our Christian clergymen are not able to convert sinners as effectually and rapidly as the Master did. It is barely possible that Jesus may have converted sinners in one sermon in excess of what some of our preachers are able to do in many sermons. Shall we apply our critic's logic to such a case and affirm that, because a clergyman does not convert sinners as effectually and rapidly as the Master did, he is not preaching the same gospel? The Christian Scientist is aware of his shortcomings, but he is thankful that, through the added understanding of truth which Christian Science has afforded him, he is able to do better than he did formerly, and he believes that all other Christians could reap the same degree of improvement with Christian Science. The Christian Scientist does not claim that he is better than other folks who have tried harder and longer to do right. He only claims that he is better than he used to be, and that he is getting better results than he formerly did without Christian Science, and he believes that the best persons in the world could be even better with Christian Science than without it.

The gentleman dwells at length upon a point which he affirmed in his former address, that Christian Science healings do not prove the truthfulness of Christian Science, because results are forthcoming in the exercise of various other non-drugging methods of treating the sick. He might as well have said that the healings performed by Jesus and the apostles did not prove the truthfulness of the Christian doctrine, did not prove that the result was effected by divine power, simply because people were apparently healed in other ways. Christian Science accounts for the apparent healings effected through the exercise of human will on the basis of a change of belief, but such changes are not reliable and permanent, since they are not based upon eternal truth. The Scriptures teach this: "Except the Lord build the house, they labor in vain that build it;" which may be taken to mean that even though there should be an apparent result, if that result is not upheld and sustained by divine power, it will not stand the test.

The Scriptures refer to a species of peace which is not peace, declaring, "They have healed also the hurt of the daughter of my people slightly, saying, Peace, peace; when there is no peace." To illustrate: One who believes that two times two are six might be persuaded to believe that two times two are eight, and thus he would be cured of his error that two times two are six, but would have a more stupendous error in its place, while, if the fact that two times two are four is clearly explained to him, the error that two times two are six is really and permanently cured. It can never return again, from the simple fact that one cannot again believe a lie after arriving at a knowledge of the truth. Christian Science healings are made on the basis of eternal Truth, and all the arguments employed in healing the sick are based upon the understanding that God is the only real power.

[E. M. Ramsay in *Dundee* (Scot.) *Advertiser.*]

Of the many evil conditions around us, none, perhaps, presses harder on humanity than poverty, and it is my purpose to show something of the means by which Christian Science, which is applied Christianity, combats it. Every Christian Science treatment starts with God as the only cause and creator, and recognizes man as the effect of that only cause, made in the image and likeness of that only creator. It is plain that, since there is no element of poverty in the infinite good we name God, it cannot form part of God's image and likeness; it must be as foreign to the real nature of man as it is to the real nature of God. Speaking on this subject Christ Jesus said: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." This kingdom of God is a condition of thought, a perception that God is the supreme ruler of the universe and man.

Theoretically, it is easy for any one who calls himself a Christian to see this, since all Christians agree in declaring God to be infinite, eternal, all powerful, ever present, and good. To be able to make practical use of these statements, however, far more is required than a theoretical admission of their truth. We must be convinced of their truth; our consciousness must grasp them as living realities. Here, then, is the difficulty: How can the ordinary man attain to such a faith? To many a man, capitalists, to some, the conditions of trade, to others, the whole fabric of society,

Digitized by Google

seem to stand between them and abundance. It is these material forces and not God which appear to control their destiny.

Here Christian Science comes forward and explains the gospel teaching in such a way that all who are willing can grasp its meaning as never before. It shows us that we believe so much in other persons because we believe so much in our own personality, in our own character, habits, likes, and dislikes. If we are to be free from the domination of men we must first be free from the domination of self, we must become as little children; yea, more, we must be born again if we would enter the kingdom.

Thus the Christian Science student is urged to pray for purity, for humility, for docility, and to study the beatitudes and practise them hourly. If he follows these directions he finds himself getting rid of fear and anxiety; he becomes gradually conscious of his true nature as the child of God; he manifests more self-control, more intelligence and capacity, and meets with increasing success, happiness, freedom, and peace. By this process many have been lifted out of the depths of poverty into a condition of comfort and well-being, the improvement in the outward circumstances being the direct result of moral and spiritual advance. Thus the Master's words are verified.

It has been cast as a reproof at Christian Science that it is "an aristocratic religion." If by this is meant that it is only a fashionable fad, then nothing can be less true. In one Scottish town the students of Christian Science are principally drawn from among the shopkeepers; in another they are mostly employed in the factories of the place; while all up and down Scotland are to be found students of this Science in outlying farms and cottages.

[Algernon Hervey Bathurst in *Newcastle-on-Tyne Chronicle.*]

The great message that Christian Science has brought to humanity is that they can be freed from the bondage of sin, sickness, and discord today, just as Jesus proved was the case two thousand years ago. Christian Science is no mere theory; it is a tree known by its fruits; and those fruits consist of the positive healing of disease and the destruction of sin in the manner taught and demonstrated by Jesus and his disciples during the first three centuries of the Christian era.

That the healing accomplished through the practice of Christian Science is "healing according to the gospel" is evident when it is remembered that Mrs. Eddy discovered Christian Science in that same "simple gospel of the Lord," for it was at the time when all other assistance had failed that she turned to this gospel and, through her spiritual understanding of what Jesus declared, realized that the great power of good which he came to reveal to mankind was still as operative as it had ever been; and it was this realization that enabled her to devote her life to giving and explaining this message, to which so many thousands scattered over the face of the earth today owe their very existence.

On page 31 of "Science and Health with Key to the Scriptures," the Christian Science text-book, Mrs. Eddy points out, referring to the teachings of Jesus, that "first in the list of Christian duties, he taught his followers the healing power of Truth and Love;" and Mrs. Eddy has emphasized the necessity of proving our understanding of his teachings, not merely by saying that what he said is true, but by demonstrating the scientific certainty that a correct understanding of what he taught his disciples is as efficacious in obliterating sin and disease today as at the time those teachings were first uttered. Again, in her search for a deeper understanding of this great subject, Mrs. Eddy used the Bible alone as her text-book; and it is the experience of every student of Christian Science, that in proportion to his study and understanding of Science and Health, the Bible becomes more clear, more practical, until he declares that it has become the most valued book in his possession.

It is recorded in the eleventh chapter of St. Matthew's gospel that, at the conclusion of Jesus' instructions to the twelve disciples to go and heal "all manner of sickness and all manner of disease," John sent two of his disciples to the Master, asking, "Art thou he that should come?" and Jesus' reply was that they should take note of the works which were accomplished by the demonstration of his teachings, in which preaching and healing were not separated, but went hand in hand. It is in exactly the same manner that Christian Science declares today, in the words of James, "Faith without works is dead." It is clear, therefore, that Mrs. Eddy has reiterated the teachings of Christ Jesus, and it is because the signs do follow "them that believe" that those who turn to Christian Science, finding the help they need, express their gratitude to that good woman who devoted her life to giving this message of salvation to mankind.

[Frederick Dixon in *Hearth and Home*, London, Eng.]

Christian Science sets to work to heal by teaching men that they must walk in the footsteps of Christ. To the exact extent in which they succeed in doing this, they will gain that Mind which was in Christ Jesus, and exactly in the proportion in which they gain that Mind, they will gain not only purity of thought and harmony of existence, but physical health. "The body," Mrs. Eddy writes, on page 370 of Science and Health, "improves under the same regimen which spiritualizes the thought." This is about as different from the teaching referred to in your review as anything possibly could be.

[Miss Ellen Bentinck-Beach in *Guide to Dresden*, Germany.]

When a Science of healing which claims to be religion, and a religion which claims to be a healing Science, is first presented to the modern world, the learned receive it with sneers and the vulgar with abuse. It is only when the phenomena, inseparable from this gospel of healing by the power of intelligence, have forced themselves into notice, that the public sits up and asks, What is this?—Yes—what is this Christian Science about whose name there is still so much controversy, although there is scarcely a nation of the earth today that is not stretching out eager hands to gather its benefactions? Christian Science is the universal law of Love in active operation. Applied understandingly it breaks the shackles of disease, banishes sorrow, and resolves discord of every kind into harmony. It has proved itself able to cope with and overthrow the greatest enemy of the human race—fear.

Considered from the standpoint of ethics, "it is Christian Science to do right, and nothing short of right-doing has any claim to the name" (Science and Health, p. 448). Regarded as a therapeutic system, Christian Science replaces the unintelligent drug with thought; declares that Mind, not matter, is medicine, and therein follows the rule laid down by the master Metaphysician—Jesus of Nazareth. Considered theologically, Christian Science stands forth as a religion unincumbered by creeds and devoid of ceremonial observances. It recognizes one omnipotence, and that good, as controlling the universe, inclusive of all human affairs. It says by the mouth of its Founder: "Human philosophy has made God manlike. Christian Science makes man Godlike" (*Ibid.*, p. 269). To the intelligent reader it must be apparent that the acceptance of the above premises, whether singly or as a whole, involves the rejection of all alleged copartnership between Christian Science and hypnotism, spiritualism, esoteric magic, or human will-power. Its walks and its ways are in the light and of the day.

Whatever the judgment of future generations may be concerning Mrs. Eddy and Christian Science, her contem-

Digitized by Google

poraries owe her unstinted praise for the solace her Science has brought to thousands of worried mortals. Says the *Washington Herald:* "The nineteenth century business man is not only overworked but overworried. His need is the serenity and relaxation of mental rest. He wants a mental anchorage that also sustains and buoys: but this anchor must be stamped with absolute certainty (*Gewissheit*). Christian Science affords its believers just this. Mrs. Eddy's influence in thousands of homes has been for the amelioration of life and manners in family and social intercourse. Her creed of hope has raised thousands of pessimists out of the slough of despair and has converted an army of hypochondriacs into cheerful and useful citizens."

The many myths which of late years have come to be wrapped about the personality of Mrs. Eddy have been woven by malice, not by any mystery in her daily pursuits or manner of living. Three years ago an officially authenticated biography of Mrs. Eddy was published in the United States; a narrative in which every important event of her career from infancy to advanced age was fairly dealt with and verified by names and dates. And as all the ninety years of the venerable reformer's life,—save one brief marriage year in South Carolina,—were spent within the limits of New England, any error occurring in the biographer's statements would have been espied by some contemporary and dragged into the glare of publicity. As it is Miss Wilbur's "Life of Mary Baker Eddy" remains intact and is being circulated all over the world. It is noteworthy that the Discoverer of Christian Science is the only founder of a great church who lived to see the work complete and the one who most strictly severed her achievements from her own personality and name. Buddhism, Lutheranism, Wesleyanism, the world at different epochs has been invited to accept. But no Eddyism is offered it. The religious system which revives in the twentieth century the works that inaugurated the Christian era, bears no human cognomen.

[Editorial in *Los Angeles* (Cal.) *Express.*]

The testimony offered in the Senate by Senator John D. Works with relation to the benefits received by himself and members of his family from Christian Science treatment, does not differ in degree from the testimony of scores of thousands who have been restored to well-being by Christian Science after all other forms of treatment had failed. The high station and integrity of the speaker, the place in which he spoke, the immediate audience he addressed, all combined to make the event conspicuous and to lend additional importance to the testimony offered; but in themselves, wonderful as they are, the cures to which Senator Works bore personal witness are but typical of hundreds of thousands that have been wrought by healers believing with full faith "on him."

The occasion that drew forth from Senator Works that recital of benefits achieved made his utterances appropriate. A prodigious campaign is in progress to place the power of the federal government at the disposal of a single school of medicine. Under the guise of establishing a national bureau of health, the proponents of a medical trust are plotting to subject the bodies of the men and women of the United States to the medical jurisdiction of the American Medical Association. Senator Works opposes that just as he would oppose, in his capacity as a legislator, the erection by the government of a Christian Science bureau to which all citizens should be subject, regardless of personal convictions.

Back of his opposition and supporting it is the popular demand for continued freedom. No sect, in this enlightened day, would think of endeavoring to convert the government into an agency for the maintenance of a religious monopoly—would dream of establishing a state church by law and making all men and women yield to its authority and bow to its decrees. Yet the American Medical Association is attempting to assert over the bodies of the people a control equal to that which the Inquisition sought to establish over the souls of men and women. The association is not battling for the creation of a bureau of health, but for the acquisition of government authority to compel the people into acceptance of the theories of a particular school of medicine. It would acquire a tyrannical power, not for the preservation of national well-being, but for its own exaltation and supremacy. A liberty-loving people will not submit to be victims of that.

[Editorial in *Boston Times.*]

It has been said that the nation takes more interest in the conservation of agricultural industries than in the conservation of the public health. This argument is not well placed, since whatever of interest the nation takes in agriculture, pure foods, etc., is a marked contribution toward the public health. Because the government does its duty in this direction is no reason why it should overstep its bound and enter into unnecessary and improper paternalism. Whether or not the Owen bill would contribute toward the health of the public is a question. Whether or not what it proposes that is of real benefit to the public is not already provided for in other ways, is also a question.

One of the leading provisions of the proposed bill is that research as to the cause of disease, etc., shall be instituted, and literature shall be furnished the public, educating them accordingly. Of course, such research would be along the particular lines prescribed by whoever happened to be in power from time to time in the new federal department, and it certainly would not be according to the views of the general public. So long as there is such a wide difference of opinion as to what constitutes proper research, it seems best that each particular school should carry on its own research according to its chosen methods, experiment for itself and pay its own bills. Until the various schools get closer together and arrive at something more definite and final than is in vogue at the present time, it seems better that each private institution should continue experimentation for itself. It does not seem fair that the whole people should be called upon to furnish money by taxation to finance a propaganda that is only believed in by part of the people.

[Rev. E. R. Wright, B.D., in *Cleveland* (O.) *Leader.*]

The call of Christian Science is, as one writer expresses it, to the spiritual ego, to the inner man, that he should rise up and shake off the domination of material things and enter the promised land of light, Life, and Love; he believes this is a truth the soul has long sought after in vain, and, when once found, it brings the peace that passes understanding and which the world cannot take away. It means freedom; it means perfect communion with God; it means clear vision; and it means complete victory.

Then why fight Christian Science? Its marvelous growth during the past eighteen years compels respect and admiration. It is supplying a great need in modern life and is, therefore, accomplishing a great deal of good. It is filling the hearts of thousands with a comfort and a peace they would obtain in no other way; it is spreading sunshine and happiness over an age of nerve-racking strain and toil; its beneficent influence is helping thousands to continue to do their work in the world, and this old world will lose much of its hate and greed and suffering and shame.

Meditate upon the infinite as the holiest and the best, set forth for our worship not in the stars so clearly as in the heart of Christ. Education is no more certain to bring knowledge than the humble obedience to these conditions is sure to bring the diviner life.—THOMAS STARR KING.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

"ONENESS WITH THE FATHER."*

ONE of the most striking statements of Christian Science, and one in which is shown the fundamental difference of this teaching from all other so-called metaphysical systems, is found on page 468 of Science and Health. It reads, "All is infinite Mind and its infinite manifestation, for God is All-in-all;" and this statement is somewhat further explained on page 306 in the words, "If God, who is Life, were parted for a moment from His reflection, man, during that moment there would be no divinity reflected. The Ego would be unexpressed, and the Father would be childless,—no Father. . . . But man cannot be separated for an instant from God, if man reflects God."

Speaking of this oneness of God and His creation, of man with the Father, which Christ Jesus taught and demonstrated, Mrs. Eddy writes in "Unity of Good" (p. 40): "I understand that man is as definite and eternal as God, and that man is coexistent with God, as being the eternally divine idea. This is demonstrable by the simple appeal to human consciousness." This statement is supported by many others of similar purport in Science and Health, and these teachings, followed to their logical conclusion, fully establish the immortality of both God and man as a fundamental postulate of Christian Science.

From this premise Mrs. Eddy draws the conclusion that "because man is the reflection of his Maker, he is not subject to birth, growth, maturity, decay" (Science and Health, p. 305), and it is through the understanding of this, the inward beholding of the perfect spiritual man instead of the marred physical semblance,—in other words, following the Christ-method (*Ibid.*, p. 477),—that the sick are healed and the sinful reformed. The teachings of Science and Health are in no wise uncertain as to the immortality of man and the divinity of Christ. Every genuine demonstration of Christian Science healing is based upon the understanding of these great facts, and to ignore them or to depart from this understanding is to descend from the sublimity of Christian Science to the depths of mental processes which exploit finite mind and will-power. Any teaching which would, if carried to its logical conclusion, separate man from God, or leave God unexpressed, would also deny the immortality of man and the perpetuity of all that God has created. Such was not the teaching of the great Master, therefore is not Christianity and not the doctrine of Christian Science.

There is nothing in the teachings of Christian Science that is in any wise contrary to the "scientific statement of being" on page 468 of the text-book and the "platform" commencing on page 330 of the same book, of which Mrs. Eddy writes, "When the following platform is understood and the letter and the spirit bear witness, the infallibility of divine metaphysics will be demonstrated."

ARCHIBALD MCLELLAN.

* Science and Health, p. 18.

"WHAT IS MAN?"

THE psalmist's query, "What is man, that thou [the infinite] art mindful of him?" presents the problem of the ages and finds a most satisfying answer in Christian Science. If the psalmist had in view the mortal concept of man he might well ask what there could be in common between God and such a one, for the order and intelligence which he saw reflected in the starry universe were, clearly, not manifested in mortals, yet there was the Scriptural statement that the infinite creator had given man dominion over all things, had "put all things under his feet," and had "crowned him with glory and honor." Long after these words were written the author of the epistle to the Hebrews, referring to this passage in the Psalms, said, "But now we see not yet all things put under him." He then went on to tell of the reconciliation between God and the aspiring human sense through the divine ideal presented by Christ Jesus, up to the extinction of death itself with all that it involves,—a mighty deliverance for those "who through fear of death were all their lifetime subject to bondage."

Contrary to much popular opinion, Christian Science never attempts to heal the ills of mortals by suggesting that they are better than they think themselves to be. It resolutely and insistently points away from the mortal concept of man, and lifts thought to the contemplation of the man who is worthy to be called the likeness of God, in other words, the spiritual man. If this man did not exist, here and now, it might be as well perhaps to let mankind go on with their drugging systems, to let the doctors cut away the abnormal growths which often spring up again, like mushrooms after a night of rain, so long as the mental conditions exist which produce these growths. If man were merely "so much liver, lung, integument" (to quote Mrs. Browning), we might as well say, "Let us eat and drink; for to morrow we die;" but this is not the case, and it is high time for the whole world to begin to know man as God knows him.

There are many who have rejected Mrs. Eddy's teachings for the same reason that men rejected the teachings of Christ Jesus, namely, because both insist upon the nothingness of the mortal concept, and the absolute necessity for recognition of the man born of Spirit and spiritual. All would accept the physical healing if they could have it without yielding up their false views of God and man, but Truth makes no concessions to error in any age. The "kingdom of God, and his righteousness," is no less the demand of Christian Science than of the Master, and it is held before thought as the "first" consideration, the primal fact to which every material belief must give place. Besides this, no amount of false reasoning, based on ignorant prejudice, can deny that men need to know God and themselves and that they hunger for this true knowledge even while they are feeding upon husks. To know God is the one necessity of man, and this need is never supplied by materiality, for man as a spiritual being must find the supply for all his need in the truth of his own being, his likeness to God.

Happily for humanity, the divine message of health, happiness, and holiness has again been received and joyfully accepted, first by our revered Leader and then by countless thousands the world over who were waiting and watching for the fulfilment of Christ's promises, the healing and the spiritualization of human consciousness. The disciples once said to Jesus, "All men seek for thee," and today, no less than then, multitudes seek for that which Jesus had to offer, and they are finding it in Christian Science. None can bar the way, though some may attempt it, for man's prerogative is dominion, not subjection, and this implies the government of mind and body by almighty God, divine Principle. Man, thus governed, "is above sin or frailty" (Science and Health, p. 266) and by divine decree he is crowned "with glory and honor."

ANNIE M. KNOTT.

"AND SHUT THY DOOR."

THE apocalyptic call, as recorded by St. John, "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in," speaks not only for the compassion of divine Love, but for the necessity of an attitude of hospitality toward Truth upon the part of all who would be saved. On the other hand, the counsel of

Digitized by Google

the Master, "When thou prayest, enter into thy closet, and . . . shut thy door," voices that demand for exclusiveness toward error which must be coincident and coordinate with our responsiveness to Truth.

This thought of the necessary exclusiveness of a truly Christian life seems harsh to those who are enamored of a type of so-called liberalism, who are disposed to concede some good to everything, and who on the basis of an asserted love for good, feel authorized to open their thought to and to become possessed of much that is erroneous and blighting. To shut the door against the unconventional and repugnant is easy enough, but to shut the door against venerated opinions, against the tastes and impulses and appetites which have been long indulged, and maybap much enjoyed,—this calls for a strenuous, independent assertion, a persistent loyalty to the Christ-ideal which, as mortal sense would have men believe, is unnecessarily exacting. Nevertheless, when one thinks over this mandate of the Master which Mrs. Eddy has so happily rephrased in her counsel to "stand porter at the door of thought" (Science and Health, p. 392), it is seen to be no less reasonable than necessary. Indeed it is the only thing for every sensible and aspiring man to do.

We instinctively turn away from the uncanny and malodorous accretions of a common dump, and have a feeling of commiseration for those whose need impels them to rake over its reeking rubbish, and in so far as we are spiritually minded we must experience a corresponding aversion to the yet more unsavory refuse of mortal thought. Nevertheless, how often do the dainty fingered and highly respectable of the earth open their "closet," the inner chamber of thought, to the very sewage of material sense! "Shut thy door"! Why, yes, how unseemly and self-polluting any other course; and yet custom and the dominion of habit bear witness that many "nice people" seem really fond of wading about in this noxious tide, and supply themselves with the gruesome opportunity to do it every day! "Shut thy door"? Yes, in the name of all that is sane and wholesome, that we may "keep our mental home a sacred place," sweet and clean. This is but one of the beginnings of that better daily doing which belongs to and certainly waits upon a genuine acceptance of Christian Science, for to Christian Scientists the hideousness of every falsity has been revealed, the unspeakable hazard pertaining to every hospitality we extend it.

Some may recall the testimony in a recent *Sentinel* of one who when a child experienced a terror of fear on hearing the details of a case of disease which terminated in a saddening death, and who in middle life suffered from a malignant attack of the same dreaded disease from which, when all else had failed, she was saved through Christian Science. We cannot judge those who by inheritance and education have become accessible to every appeal of mortal sense, but for us who know the fateful sequences of falsity's entry and domination, there is no excuse if we do not immediately shut the door against every would-be intrusiveness of the unideal. Exclusiveness to error is but the obverse side of responsiveness to Truth, and we cannot consistently claim that we are loyal to the one, in any sense or degree, so long as we are knowingly leaving our doors open to the other.

JOHN B. WILLIS.

AMONG THE CHURCHES.

HONGKONG, CHINA.

Progress is being made with the erection of the Christian Science church on Macdonnell road. The site, purchased from government last August, contains three thousand nine hundred square feet. The edifice will consist of a central hall, a reading-room, and two readers' rooms. The central hall will have a polished white marble floor, with a ten-inch skirting board to match, from the quarries and mill at Ipoh, F. M. S. The aisles and rostrum will be finely carpeted. The seats will be of teak and the seating capacity is estimated to be about one hundred and fifty. Behind the rostrum there will be five stained glass windows. The edifice will occupy two thousand three hundred square feet, and the remaining ground will be laid out as a garden. It is expected that the structure will be completed by the first of the year. Its cost will be about sixteen thousand dollars.

Yesterday morning [July 25] at nine o'clock the corner-stone of the edifice was laid by William D. McCrackan, M.A., who read selections from the Bible and then correlative passages from "Science and Health with Key to the Scriptures" by Mrs. Eddy. This was followed by silent prayer, and then by the audible repetition of the Lord's Prayer. The service was closed by the reading of the "scientific statement of being" from the Christian Science text-book, Science and Health (p. 468). The hermetically sealed jar in the corner-stone contains a Bible, a copy of Science and Health, "Miscellaneous Writings," and the Manual of The Mother Church, by Mary Baker Eddy, a copy of the Christian Science *Sentinel*, of the *Journal*, and of the *Monitor*, a history of the Hongkong Christian Science Society, a list of the present members, a *Hongkong Daily Press* of July 15, a *South China Morning Post*, *China Mail*, and *Hongkong Telegraph* of July 21, and a copy of the society's by-laws.—*Hongkong Press*.

QUINCY, ILL.

The new Christian Science church which for the past year has been rising at the southwest corner of Eighteenth and Vermont streets, will be formally opened to the public on Sunday next [Sept. 3] with two services, one in the morning at eleven, and the other in the evening at eight o'clock. The services will be practically identical. From a handful of worshipers, meeting here and there in small halls and rooms, the growth for fifteen years has been steady until the church-membership is now nearly one hundred, and the Sunday congregations very much larger. Through untiring efforts and personal sacrifice and persistent purpose, they are all most happy at last in the possession of a church home of their own.

The new church is beautiful in its simplicity. Within and without no effort at overornamentation has been made, all is in perfect accord with the simplicity and beauty of the faith of the people who will worship within its walls. It is a sincere expression in a material form of the teachings of Christian Science. In architecture it follows the Roman Doric order, and its facade is made dignified and attractive by the colonnaded portico rising to the rounded vault above the central columns. The building is located upon an ample lot in the heart of the finest residence district of Quincy. The lot is about three feet above the level of the street and will be a handsome lawn in time. The total cost of the church is upward of twenty-five thousand dollars.

Quincy Herald.

SPOKANE, WASH.

Many members of Second Church of Christ, Scientist, assembled in their new two-thousand-dollar chapel, Post street and Spofford avenue, yesterday morning [Aug. 27], when the first services were conducted. The congregation was organized less than two years ago and for many months conducted services in the Plymouth Congregational church in the afternoon. A lot was then purchased and the present chapel built. The chapel has a seating capacity of about four hundred, and will be complete with a furnace and electric lights. The seats are finished in dark brown stain; the wainscoting is of dark brown burlap with dark tan paper on the side walls and a light tan paper on the ceiling.

THE LECTURES.

HONGKONG, CHINA.

George E. Anderson, American consul, presided last evening [July 20] at the lecture on Christian Science given by William D. McCrackan, M.A., at the Theater Royal. There was a capital attendance, and close attention was paid to the interesting lecture. Mr. Anderson in introducing the lecturer said:—

It may be superfluous to make any announcement of it, but I think I should say that I am not a Christian Scientist; I really know little of the real tenets or teachings of the Christian Science church. However, I recognize in it, as I think all reasonable men do, a distinctly uplifting factor in modern religious discussion. There are several hard facts about the Christian Science movement which challenge attention. It is a movement which commenced something like two score years ago in the work and writings of a single woman. It is a movement which, unique among religious movements, has appealed to the intellectual classes rather than the mass of the people. It has profoundly affected all other militant religious organizations and has compelled some of them to undertake work hitherto foreign to religious effort.

Now, whether we accept the teachings or not, I think that all reasonable men must recognize its accomplishment in having built up a world-wide organization upon the basis of teaching an increased capacity of the human soul and faith in God. The center of this great organization which has been built up in the past thirty years is The First Church of Christ, Scientist, in Boston, Massachusetts,—The Mother Church, as it is more generally known. Attached to this home church there is a board of lecturers composed of men of the Christian Science faith who have accomplished something beyond the ordinary in life, who have done something beyond the usual in law, literature, or some other branch of intellectual endeavor. Among the members of this board is one who has distinguished himself as a writer, traveler, and lecturer, and whom I now take pleasure in introducing to you.—*South China Mail.*

COTUIT, MASS.

Judge Clifford P. Smith lectured on Christian Science in Freedom Hall, Aug. 14. Charles L. Gifford, a prominent citizen, in introducing him said:—

I was pleased to accept the invitation extended to me by the committee in charge of this meeting, to introduce the lecturer of the evening. I have at all times had a great interest and respect for the movement, and now as so many of our friends and acquaintances have embraced this faith—friends and acquaintances of whom we can have but the highest regard for their intelligence and ability—we can but become vitally interested in a matter that is of such deep concern to them and through them to us all. We note a rapid disappearance on all sides of skepticism and criticism and the predominance of a spirit of recognition and commendation. I am told that thirty-two years ago but one church with a membership of twenty-six existed, while today there are twelve hundred churches with an unnumbered membership. Such an astounding growth, and among the best people in the land! They are a people who calmly, quietly, and with a most simple order of service, assert their belief without belittling or in argumentation against other forms of religious faith. They are a people who practise to a remarkable degree what they preach.

We cannot perhaps subscribe to all that our friends the Scientists believe, neither can we subscribe to or live the various creeds of our own denominations. However, a people who live such joyous, happy lives, who make annoyances and disappointments things unrecognizable,—these are a people we cannot help but admire and give consideration to a faith that makes them such. This is a day of the practical not the theoretical. Our churches all over the land realize that sermons and mission work are not sufficient, but that their doors must be open to assist in problems of industrial work, educational, and even to provide suitable amusements. The Scientists have indeed made their religion a practical one. They have made it a magnificent social institution and have even made of it a science, proving its use and application as exact and certain. We may not accept all the lecturer may say, but if we are not religiously blinded in our own denomination we can get some satisfactory explanation, and we can welcome the words of a man who can speak to us out of a deep experience. In consideration of the high regard and esteem we hold for our neighbor Scientist, I bespeak for him your earnest attention, and trust that all of us may get something that will be helpful.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Beloit, Wis.—Judge Clifford P. Smith, Church Edifice, Oct. 2.
Chicago, Ill. (Second Church).—Judge Clifford P. Smith, Church Edifice, Wrightwood and Pine Grove avenues, Oct. 5 and 6.
Cleveland, Ohio (Third Church).—Virgil O. Strickler, Grays' Armory, 3 p.m., Oct. 1.
Clinton, Iowa.—Prof. Hermann S. Hering, The Clinton, Oct. 5.
Delavan, Wis.—Bliss Knapp, Opera House, Oct. 6.
Denison, Iowa.—William R. Rathvon, Church Edifice, Oct. 3.
Dixon, Ill.—Bliss Knapp, Peoples Church, Oct. 2.
Fairmont, Minn.—Clarence C. Eaton, Church Edifice, Oct. 6.
Fond du Lac, Wis.—Lecture Sept. 22, postponed.
Horton, Kan.—Willis F. Gross, Opera House, Oct. 3.
Iowa City, Iowa.—Prof. Hermann S. Hering, Coldren Opera House, Oct. 3.
Kalispell, Mont.—Clarence C. Eaton, McIntosh Opera House, Oct. 2.
Kansas City, Mo. (First, Second, and Third Churches).—Prof. Hermann S. Hering, Convention Hall, 3:30 p.m., Oct. 1.
Kenora, Ont.—Judge Clifford P. Smith, Victoria Rink, Sept. 26.
La Grange, Ill.—Virgil O. Strickler, Church Edifice, Cossitt boulevard and Catherine avenue, Sept. 25.
Manhattan, Kan.—Willis F. Gross, Marshal Theater, Oct. 2.
Marshalltown, Iowa.—Judge Clifford P. Smith, New Odeon Theater, Sept. 29.
Mattoon, Ill.—Judge Clifford P. Smith, Grand Theater, Oct. 1.
Milford, Utah.—Frank H. Leonard, Pat Theater, Oct. 5.
Milwaukee, Wis. (Third Church).—Virgil O. Strickler, Milwaukee Auditorium, Main Hall, Oct. 3.
Morrison, Ill.—Bliss Knapp, Auditorium, Oct. 3.
Nebraska City, Neb.—William R. Rathvon, Church Edifice, 12th street and 1st avenue, 3:30 p.m., Oct. 1.
Olean, N. Y.—Virgil O. Strickler, Church Edifice, 3 p.m., Sept. 24.
Omaha, Neb.—Virgil O. Strickler, Church Edifice, St. Mary's avenue and 24th street, Oct. 5 and 7.
Park City, Utah.—Frank H. Leonard, Dewey Theater, Oct. 3.
Pasadena, Cal.—Francis J. Fluno, M.D., Church Edifice, Oakland avenue, Oct. 3.
Polo, Ill.—Bliss Knapp, Lecture Room Public Library, Oct. 5.
Prosser, Wash.—Clarence C. Eaton, High School Auditorium, Sept. 29.
Rossland, B. C.—Prof. Hermann S. Hering, Sept. 25.
Wichita, Kan.—Willis F. Gross, Auditorium, 3 p.m., Oct. 1.

TESTIMONIES OF HEALING.

I have received a great many benefits from the testimonies in the Christian Science publications, also those heard at the Wednesday evening meetings; so I will endeavor to give a few statements of what Truth has done for me through an understanding of the Bible as explained by our text-book, "Science and Health with Key to the Scriptures."

In the spring of 1903 I accepted a position with the department of agriculture as assistant soil expert under government supervision. The following spring I was sent to Louisiana to map some soils, and during that summer I contracted a severe form of fever, chronic bowel trouble, and other ailments which generally accompany malaria as given in a medical diagnosis. After several months spent in trying to overcome the illness by medical treatment, material remedies, and the drinking of whisky as advised by people of that community, I was compelled because of my weakened condition to give up and return to my home in Ohio. I reached home in a very weakened condition, was confined to my bed, and under the care of the family physician, who made a careful examination and diagnosed my case as malarial fever, chronic bowel and kidney trouble, enlargement of the liver, and an organic heart difficulty, etc. I was under his care from September, 1904, till March of the following year, including two weeks at a sanitarium. Then, through the advice of a friend, treatment was taken from one of the leading osteopathic physicians in Columbus, who after four months advised me to try a change of climate; so I started to Denver, Col., in July.

For a few weeks the change seemed to benefit me, then like each of the preceding methods I had tried, it seemed to lose its effect and all the old ailments returned with full force. I was then like a drowning man grasping at a straw, and yielded to the advice of my roommate and commenced to read Science and Health. I had been brought up in a home of very religious parents, but had been taught that Christian Science was the religion of a few ignorant fanatics; therefore I would at first only read when alone in the room, for I did not want my roommate to think that I would read any such doctrines. After a few days, however, I began to catch some glimpses of the truth, laid aside my preconceived opinions, and asked many questions. I was then advised to take a few treatments of a practitioner, so as to have some of the questions explained in a practical manner.

The lady to whom I was sent was a very intelligent and kindly disposed person. She even offered to treat me free of charge in case I did not feel able to pay, as she knew something of what I had paid out for illness in the past year and a half. A few treatments helped me to grasp the power of Truth and to realize that God is ever present and all powerful. I at once went to my trunk, in which I had many medicines stored, and threw them out of the window. I also discarded a support which had been worn two years. This was in the fall of 1905, and none of these material remedies have been needed since, though prior to that time I had been compelled to resort to drugs for stomach trouble, because the doctors said I could not assimilate my food without them; in fact the bowel conditions became alarming with a few days' abstinence from these drugs. I was greatly reduced in flesh when I became interested in Christian Science, but in four months had gained wonderfully.

For over a year previous to this time I had been dieting, and could only sleep till about midnight, then was in great distress till morning; but after I began to understand something of God as an ever-present help, and that He does not lay down material laws as to what we shall eat, a great burden of fear was lifted from me. I began to eat whatever I desired and to sleep good long hours. Shortly after taking up Christian Science I secured a position as janitor in a large office building, and also carried a paper route for the morning hours. Before coming back east I worked in a reservoir grading camp, which was considered very hard manual labor, yet I felt no ill effects. After coming home in May, 1906, I spent two years running as motorman and conductor on street-cars, during which time I successfully passed civil service examinations. I am now holding a position, and give Christian Science credit for the ability to pass the examination and for strength to do the work. When twelve years old I was injured in a runaway and from that time was said to have spinal trouble. When examined in college for gymnasium work, the director in charge found that I had a marked curvature of the spine, but after having been healed of so many ailments through Christian Science I was examined by a physician for a position in the railway mail service, and he could find no sign of curvature.

I am grateful for the physical benefits received through Christian Science, but better than all is the spiritual understanding gained through the study of Science and Health. I hope to appreciate the good that Mrs. Eddy has done for humanity in explaining the Bible in a practical way. My physical healing was very rapid, but my spiritual growth has been slow, perhaps because of my training in material knowledge, and also because of being deep in sin. I had been an active worker in a church, but when sickness came and my prayers for health availed not, I became an infidel, saying that no God of love would permit such suffering. Now prayer means something in the light of Christian Science, for I realize that I was a prisoner under carnal mind laws and would have gone to a suicide's grave had not the truth that makes free come into my life when it did.

LA MOTT RUHLEN, Columbus, Ohio.

[Translated from the German.]

It is with a heart filled with gratitude to God, and to our beloved Leader, Mrs. Eddy, that I write this testimony, in the hope that it may prove a help to some fellow being. I had been suffering for many years with a disease which manifested itself as pain in the head, back, and abdominal region. A physician for women's diseases made an examination in January, 1907, and stated that I had a growth which would have to be removed by an operation; but I could not make up my mind to submit to this. The following August hemorrhages were added, and I consulted two other specialists, whose diagnosis was identical with that of the first doctor, the only difference being that they insisted upon the operation being performed at once. I then decided to submit to the operation, and another examination was made in order to ascertain if the heart action was good. I was then asked if I knew that I had an organic disease of the heart, the doctor telling me that I could not, on this account, take an anesthetic; which filled me with such fear that I thought I must die.

In this state of despair I wrote to my brother, who had been in Christian Science for several years after having been healed of the morphine habit in four weeks' time. He wired: "Come at once," and on the following Wednesday I went to Berlin, broken in mind and body. We called upon a practitioner, who explained to me a few things, though I did not understand much of what she said; but I began to study by taking up the ninety-first Psalm, my chief endeavor being to get the sense of God's care and protection. After the third treatment the hemorrhages which I had had for eight weeks stopped. It was the first Sunday on which I attended the service, and I cannot describe my joy; I was filled with gratitude, for I felt that God is omnipotent and ever present. Beautiful days followed; it became more and more clear to me that the truth alone makes free. Thus I spent four happy weeks in Berlin,

Digitized by Google

surrounded by dear Science people for whose kindness, patience, love, and hospitality I would also express my thanks. I returned home filled with joy and happiness, feeling that I had found the most precious pearl, Christian Science.

A few days later my little boy, then seven years old, came from school crying, the teacher having sent him home on account of earache. With my small understanding I explained to him that God is omnipresent, and that he need have no pain. I read the ninety-first and twenty-third Psalms to him, and he fell asleep. At noon he awoke in a cheerful mood, and said he had no more pain. How grateful I was to God for this proof of divine Love. Later on the little fellow had an attack of a throat disease and lay in bed with high fever. My husband wanted to call a physician, but I asked him to wait until the Christian Science practitioner had received my despatch. This was about five o'clock; at six the fever had abated, and the next morning the boy asked to go to school. What a wonderful proof this was to me! I was filled with gratitude. Later on our boy injured his ankle while practising gymnastics at school, but the trouble was overcome with a few treatments in Christian Science. He seldom says anything now when he has some ailment to overcome, but does his own work. Children are near to God; they are not of a doubtful mind.

I am truly grateful for the physical healing, but much more so for the spiritual understanding which lifts us above materiality. My greatest desire is to be able to read the wonderful book, "Science and Health with Key to the Scriptures," and I hope to attain this some day with God's help. I am very thankful for the *Herold*, which is a great help to me in overcoming my faults. For the past year services and meetings have been held here in Magdeburg, and I am grateful for this, because it shows me that "desire is prayer" (Science and Health, p. 1), and that all things are possible to God.

ANNA FUCHS, Magdeburg, Germany.

I have been a member of a Christian Science church for over two years, and during this interval was relieved of several minor ailments, also of a severe attack of stomach trouble, which I overcame myself. All this time, however, I was not satisfied that I had the understanding of life apart from matter, and study as I would, enlightenment did not come; yet I strove for it daily, and now see that I was slowly but surely drawing nearer the goal, as I prayed for guidance, humility, and patience until the light should come.

One morning in May, 1910, I had symptoms of a very severe headache, but I went to my office, thinking the error would be destroyed by night. I however continued to grow worse, and by the third day my face was so swollen that many friends and business acquaintances began to ask questions, and I went home at noon. On my arrival a neighbor who is a doctor saw me, and said it looked like erysipelas to him. The next day conditions were so aggravated that I sent for a practitioner, who came that same afternoon and gave me a treatment. My wife, who is not a Scientist, became alarmed and begged me to let her send for a doctor, but I replied that the case was in the hands of the "great Physician," and if she would promise to let me obey the instructions of the practitioner, she could send for all the doctors she wanted to, if she found that the truth failed to cure me. She promised, and most nobly did she keep her word.

In the mean time the illness continued, and by the following day the swelling had rendered me practically blind, with my sense of hearing (I have since a child been afflicted with some deafness in both ears) almost totally destroyed. That afternoon the practitioner came out and told my wife what to do, and began to work systematically with such good results that when the next day I consented at my wife's earnest request to allow the doctor to diagnose the case, although he pronounced it a severe case of erysipelas, he added that I was better than when he had seen me three days previous.

All this time I had suffered no pain in my face, only an intense soreness, but I began to experience an almost unbearable pain in both my ears, which came on at night. On telephoning to the practitioner, this was stopped almost instantaneously at the first treatment, and was wholly overcome with the second. Another symptom which alarmed my wife was that the disease attacked my throat, but the healing was radically effectual here in two treatments. The wise and loving care of the practitioner, her gentle yet successful manner of winning my wife to Truth's way, was a remarkable demonstration in itself. My fever at times was very high, yet during the whole time I never lost consciousness (had I done so, my wife had resolved to send for several doctors), nor did I even go to bed, but remained up and dressed during the whole time. The disease was almost an epidemic here at the time, several deaths from it being reported, and a few weeks later I met a friend who had just recovered under medical treatment, and he told me he had been confined to his room with it for five weeks; others I had heard of, for three and four weeks. His face bore severe marks of the disease, while mine shows no marks of it at all.

I was healed in one week, but stayed at home another week from a sense of weakness and to remove the indications of the disease, but I was out of doors daily from the seventh day on, walking about the place and neighborhood. I had a good appetite, and showed but slight effects of the struggle. The following Sunday I attended church, and the next day resumed my business duties. My sense of hearing is now better than I can ever remember it, and I have strong hopes and belief that divine Love will yet restore it perfectly. Words are inadequate to express my love and gratitude to the Father for His wonderful goodness to me, and I now realize more than ever how much we owe that noble and good woman, Mrs. Eddy, for the divinely authorized way shown us. It is indeed true that "all things are possible to God."

CLAUDE M. REDFORD, Memphis, Tenn.

In April, 1908, I was taken with severe bladder trouble, and called on the medical fraternity for relief. After a month's treatment by our family physician I was somewhat better, but far from being cured. The doctor said that after thirty-two years of continuous service as a railway postal clerk, I was completely worn out and could not expect to be well.

About this time I began to read Science and Health, and although I did not understand it very well I kept on reading. After a few months the same illness came on again, with other complications. I suffered from a very severe pain in the head which affected my hearing, also a pain in my back and in my right leg, which became almost useless. During this last attack my eyesight also became greatly affected, so much so that I could not distinguish any object below a horizontal line.

In the mean time I had resigned my position in the post office department. I consulted another doctor, but his treatment did me no good whatever, and I called yet another, who was highly recommended. He made three examinations, and after the last of these he said that he did not feel justified in treating me without any certainty of success. He told my wife that probably I would not live more than three or four months at the longest, as I was suffering from an incurable disease. This was in January, 1909, but I am happy to say that I am still alive and enjoying very good health.

I was not a believer in Christian Science, but was per-

Digitized by Google

suaded by friends to try it. I took my first treatment on Friday, the next on Saturday (I took four treatments in all), and on Sunday at the dinner table my eyesight came to me all of a sudden. I could see as well as ever; in fact, my sight is better now than for many years and I can read ordinary print without glasses. My leg is entirely well, my hearing has been greatly helped, and my health has been gradually improving ever since I took up Christian Science.

It is over two years since I have taken any drugs, and I have depended entirely upon Christian Science for relief. Words cannot express my gratitude for all the help I have received in Christian Science, especially to the one who labored so untiringly for many years to bring the teachings of Christ Jesus again before the world for the benefit of humanity.—D. M. TORPY, Salt Lake City, Utah.

Christian Science has been of great help to me. I had a distressing ailment for several years which caused me much suffering. I had five slight operations every two or three years. Our doctor had consulted other physicians, and they said there was no cure for me.

I was advised to try Christian Science, and while visiting at my father's home in Danville, in the summer of 1909, I took one week's treatment, and was entirely healed, not only of the disease mentioned, but of other troubles also. I had weak eyes and had been wearing glasses for ten years, but after the first treatment in Christian Science I had no further need of them. I am thankful to say that with my slight understanding of this truth, gained from the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been able to meet all physical troubles that have since come up, as well as to receive mental comfort. My heart overflows with gratitude and love to God, and to our dear Leader for the spiritual light I am receiving each day.—IRENE HODGES, Virginia, Va.

[Translated from the German.]

In January, 1910, I contracted a severe cold. After the attack was over, however, I noticed that the swelling of the throat which had accompanied the trouble was becoming more pronounced, so that I could not wear a collar. At the same time I felt severe pain in the eyes, the sight of my left eye gradually grew weaker, and other distressing symptoms appeared. I was urged from all sides to consult an eye specialist, and there being no Christian Science practitioner in Wilhelmshaven, I was anxiously looking forward for the vacation time, which we expected to spend in Hannover.

The condition of my eye grew so bad, however, that I was hardly able to do the necessary reading and sewing, and the children would laugh at me in the street. When we came to Hannover, the practitioner had gone on a journey, and I therefore asked for absent treatment, with the result that after a little while I was able to sew and read without inconvenience. My relatives here were alarmed, however, and when the practitioner returned I went to see her twice or three times a week, and she helped me with great patience and love to walk in the right path. Treatment was discontinued early in October, the eye having become quite normal.

I am indeed thankful to God, and next to Him to our Leader, through whose untiring efforts it has been made possible for us to understand the truth.

FRAU S. KUNNEMANN, Wilhelmshaven, Germany.

Christian Science is the greatest blessing that has come into my life, for in this wonderful truth we can really know what safety and security mean, and can understand the love that "casteth out fear." The physical healing of Christian Science did not attract me at first, but I have since come to know and receive benefits from this very important branch of its work, and I have seen most wonderful results in the improved health and happiness of friends who have come to it for help. For a long time I was deeply distressed and troubled by the seemingly hard and ofttimes undeserved conditions I saw in the lives of the people all about me, and this caused me to look into the religions of the world for a remedy or solution of these conditions, but the best they offered was that all would be righted in some uncertain hereafter.

Then came Christian Science, with its high and hopeful note declaring so plainly and so reasonably that "earth has no sorrow that heaven cannot heal," right here and now, for "now is the accepted time; behold, now is the day of salvation." Christian Scientists can never be grateful enough to Mrs. Eddy for her tireless efforts to point out the path that leads us to our loving heavenly Father, who is more willing to bestow good upon us than we are to receive it.—IDA M. DORSETT, Brooklyn, N. Y.

One morning I realized the nothingness of error more forcibly than ever before in many years of experience in Christian Science. For about five days I had been feeling that I was critically ill. I was taken with severe pain in the back, reaching through to the abdomen. I called on a Christian Science friend for help, but fear manifested itself and the attack was not met. I then sent for another Christian Scientist, who had helped me many times before, and in a short time we saw a change for the better. I improved steadily for two days, then one morning a sense of blindness came over me. I tried to rise, but was unable to do so, and after a while I dropped asleep. I awoke feeling better, and I thought of my husband trying to get his own breakfast. Then the nothingness of error came to me with great clearness, and I realized that I could get up; that as God's child I could not be sick, for His idea is spiritual. I arose and went down to where my husband was, and as I entered the room he looked up in amazement, supposing I would have to remain quiet for possibly a long time; but instead, I sat down with him and ate breakfast.

How beautiful it is to know that we do reflect infinite Mind, and can see that evil is powerless and see God's all-power demonstrated in so short a time. For three weeks I felt as if my youthful days had returned once more; it was a foretaste of heaven, harmony, and love which will never be forgotten. When I felt this load of care leave me there was rejoicing, and I had to tell my husband how I came to feel as I did. While still under the sense of a heart weakness the error was erased by silently declaring these words from our text-book: "There is no metastasis, no stoppage of harmonious action, no paralysis. Truth not error, Love not hate, Spirit not matter, governs man" (Science and Health, p. 420). I then called for my copy of Science and Health and read aloud some of its life-giving statements. This experience came to me after years of study, and after each victory it seemed that more light would come, until I now know what is meant by God's reflection.

Many times I have been cheered by our dear Leader's words in Science and Health. I am very grateful for all her teachings, which bring us inspiration and understanding.—MRS. ANNIE E. CHAMBERS, Roberts, Ill.

I feel very thankful to God for Christian Science, and for complete healing. I was seemingly poisoned from eating some meat, and suffered greatly. I tried a number of well recommended remedies, but continued to grow worse and the pain was more and more severe, until my husband sent for a Christian Scientist, who came to my rescue. When she asked me if I wanted her to treat me,

Digitized by Google

I remember that I said to her, "To whom do you look for help? Do you go straight to God?" She replied that she did; and I then told her she could take my case. I can truthfully declare that after she had given me one treatment the pain almost immediately left me, and in a few moments I felt I was entirely healed—thanks be to God through Christian Science. I have eaten anything and everything I wanted since that time without the slightest inconvenience.—MRS. J. A. HINDMAN, Spokane, Wash.

I wish to say that the foregoing testimony of my wife is true, and her case is stated correctly, as the circumstances were what she has said. I also wish to add my deepfelt thanks for my personal healing, and for the uplifting power of Christian Science, for to the blessed truth as taught in Christian Science I owe my present good health, happiness, and prosperity. Six years ago, when I took up Christian Science, I was in what seemed bad circumstances, but today I am rejoicing in the freedom of the truth.

J. A. HINDMAN, Spokane, Wash.

It is with a grateful heart that I take this opportunity of expressing thanks for all that Christian Science has done for me. I have had many proofs of the healing power of Truth, as taught by Mrs. Eddy in our text-book, "Science and Health with Key to the Scriptures." Four years ago I was healed of very bad varicose veins and poisoning in my foot, with which I had been laid up for about eighteen months. I had treatment in Christian Science for this, and was healed in six weeks. Since then I have had attacks of neuralgia, throat trouble, colds, etc., but with the help of Truth I have been relieved almost immediately, and always within a few hours.

I had worn glasses for twenty-four years, and after studying Christian Science for six months I was able to leave them off. My sight is so much improved that I can now see to do almost anything. It is with great wonder and thankfulness that I have lately seen that Truth has brought peace and contentment to my home, where there was once continual worry and discord. I am very grateful to God, also to Mrs. Eddy, for this revelation of the omnipresence and omnipotence of Truth and Love.

MAUDE E. MUMFORD, London, England.

I am very glad to be able to testify in regard to Christian Science as a means of being healed. My daughter was in a very bad condition, not being able to walk, and the doctor said that she was past being cured by him. She was then a girl of sixteen, and had to be carried across the room, because she was too lame to walk; but after six weeks' treatment in Christian Science she could walk all about, and at the present time is in full health. All this was accomplished without the aid of medicine or a medical doctor.

I cannot say enough for the teachings of Christian Science, and for its work, but I sincerely hope that some other poor invalid will be healed as my daughter was. I thank God from the depths of my heart for the wonderful cure of my daughter, and hope the good work of Christian Science will continue.

MRS. NELLIE R. JARVIS, Cambridge, Mass.

Before coming into Christian Science I was constantly in bondage to some form or other of disease, some of these ills becoming chronic. After trying every available method known to the physicians and failing to obtain a cure, discouraged and disheartened I turned as a last resort to Christian Science, and there found the relief I was seeking. From the day I began treatment, now eight years ago, I have never tasted medicine. In the summer of 1909 I was attacked with what is supposed to be an incurable disease of the kidneys, my friends believing that I had but a short time to live; but through the aid of faithful practitioners I was healed. I am deeply grateful to God for Christian Science, and to our revered Leader, whose patient continuance in well-doing has made possible this freedom from the ills of the flesh.—MISS HATTIE CLARK, Elko, Nev.

Some years ago I was seriously ill, and suffering from what appeared to be a general breaking down of the system. I coughed constantly, and from the strain of the coughing was ruptured seriously. I was told by the physician whom I consulted that I must wear a truss constantly, or submit to a surgical operation. I was then over seventy years of age, so did not look with favor upon a surgical operation, but used the truss instead. As my condition grew gradually worse, I consulted a Christian Science practitioner, and after a time placed myself under her treatment. This was in 1902. The effect of the treatment seemed to be marvelous; in a few days I dispensed with the truss and experienced no inconvenience from its non-use. I also recovered from the cough, and have been substantially a well man ever since.

I am now more than eighty years of age, and I attribute my good health and the strength I have to pursue and perform the labors of my profession, that of the law, during the last six or seven years, to the benefits received in Christian Science. I am more than grateful for the spiritual understanding that has come to me through the study of this Science.—R. P. CLEMENT, Piedmont, Cal.

It affords me great pleasure to give my testimony to one particular healing which I received through Christian Science. This healing was instantaneous, and impressed me as a very great demonstration. I had for years been an occasional great sufferer from the effects of poison oak, as the attacks were very persistent and did not yield to *materia medica*. I had been suffering intensely the most of the former season, and could hardly tell when one attack ended and the other began. I tried everything known in medicine, and became nearly desperate from the intolerable irritation and loss of sleep. As a last resort I went to a Christian Science practitioner, hardly hoping for relief, but knowing not what else to do. After studying the Lesson-Sermon and while the Scientist was treating me, I was, much to my surprise, suddenly relieved from the torment. This was succeeded by peace and comfort, and I went to bed and to sleep, for the first time in many days. This I consider a very remarkable cure. I could tell of relief given many times, but this was instantaneous.

MARION R. CLEMENT, Piedmont, Cal.

About fifteen months ago a neighbor who is a practitioner introduced Christian Science to me, for which I am more than grateful, as it has been a great benefit to me. I began directly to feel stronger and better in every way, until I accidentally ran a rusty hairpin into the back of my head, with the result that inflammation set in and a very large carbuncle manifested itself. The suffering was very intense, and I became fearful of poisoning. Two days later my husband called upon our neighbor and asked for help. I am thankful to say that after two days' treatment the carbuncle broke and my recovery was so rapid as to cause great astonishment to my husband and myself, more especially as my husband had been confined to the house for several weeks with smaller ones, and in spite of the fact that he received medical attendance and constant nursing, it was fully six weeks before his wounds healed. In my case, before the week was out, I was able to go about my household duties, and even to do some gardening during

Digitized by Google

the second week, at the end of which I was completely healed.

Prior to taking up the study of Christian Science, I was continually subject to attacks of asthma and bronchitis, both of which have practically left me since. Every day I feel I am receiving more benefit and help from the reading of that wonderful book, "Science and Health with Key to the Scriptures." I am deeply grateful to Mrs. Eddy for having discovered the long hidden truth which enables me to understand the Bible so much more clearly.

MRS. AGNES A. JONES, London N., England.

[Translated from the German.]

I wish to express my gratitude for the great benefit derived from the reading of the text-book, "Science and Health with Key to the Scriptures." One cannot be too grateful to Mrs. Eddy for the clear presentation of the subject contained in that wonderful book. Although I have been completely healed of physical troubles of all kinds since I came to Christian Science, particularly of headaches, yet I cannot say that I have found therein things surprisingly new. Is not Christian Science after all the beautiful old truth as stated in the Bible? But it has greatly strengthened my faith, and given me a sense of security and trust which has enabled me to overcome all doubts. I write this testimony with a feeling of gratitude and reverence to Mrs. Eddy for having given us the Christian Science text-book and her other inspired writings.

MRS. EMILIE MANN, London, England.

I am truly grateful to God for Christian Science. Although only a student of its teachings for a short time, I have many blessings to count. I was healed of a severe attack of throat trouble, and also wonderfully healed of a large hernia, which was overcome very quickly.

I know that the understanding of divine Principle means more to me, in my home, in my business, and in our lives, than does all else in this great world, and I pray that I may have more understanding and more trust in God, whom I have proven to be an ever-present help in trouble when we trust Him.—LURA E. PICKERING, Medford, Mass.

[Translated from the German.]

My sister had been suffering for some time with stomach and kidney trouble, and in spite of much medical treatment she did not entirely recover her health. We then heard of Christian Science, and in a short time all her ailments disappeared. My sister is completely healed now, and we are deeply thankful to God, also to Mrs. Eddy for this truth.

M. HABENICHT, Hannover, Germany.

I wish to testify to the healing of my son through Christian Science. He had a severe cold and throat trouble, but he was healed after a few treatments.

MRS. J. L. MURRAY, Cambridge, Mass

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

FROM OUR EXCHANGES.

[Pres. W. H. P. Faunce, D.D., LL.D., in *Watchman.*]

A larger kind of righteousness is now looming on our horizon. Too often we have in the past been content with mere individual correctness. The traditional code has been right enough, but too petty to hold strong men. It has dealt with where a Christian man might go and how he should behave, and given to the young Christian a selected list of pleasing but petty virtues. Now we are coming to see that we need not only individual correctness of deportment, but a social order aflame with desire for justice and throbbing with human pity. As God's prophet led Nineveh to repentance in the great days of old, so the modern city must repent or be overthrown. It must realize that no success in the making of steel or flour can atone for utter failure in the making of men. We need again to see Moses crying with sublime audacity: "If thou wilt forgive their sin—; and if not, blot me, I pray thee, out of thy book;" and Paul crying: "I could wish that myself were accursed from Christ for my brethren." All sections of our modern life are to be permeated and redeemed by the immanent spirit of God. We are not merely to save souls, but to save men—body, soul, and spirit.

[Dean Hodges in *Churchman.*]

What our Lord blesses in the beatitudes is the quality of life. It may result in great achievement, it may result in failure. That depends, in great part, on the circumstances. Sometimes it is easy to be good and to do good; sometimes it is tremendously hard. To keep the quality of our life true; to hold our ideals high and to follow them, no matter how difficult or wearisome the way; to persist through bitter discouragement; to think and do the thing that is right because it is right, not because either law or common opinion enforces it; to keep the commandments not in the letter only, not in speech and action only, but in spirit; to endeavor day by day, each day anew, to live more nearly as he lived who is both the Master of our life and the Saviour of our soul; this is to attain by God's grace to that kind of character whose presentation astonished the people when he preached the sermon on the mount.

[Rev. Charles R. Brown, D.D., in *British Congregationalist.*]

"When he shall appear!" He does appear. He reappears in every renewed life. Let any wicked man forsake his ways, let any unrighteous man turn aside from his wicked thoughts, and turn to the Lord and be abundantly pardoned, and in that renewed life the Lord Jesus Christ begins to reappear in the finer lines and features of that face, in the new tone and accent in that voice, in the finer quality of spirit and method that comes to characterize the entire conduct of that renewed man. In every regenerate soul the spiritual energy of the Lord Jesus appears and reappears. The manger in the stable at Bethlehem was one door through which the divine came into human life on earth, and wherever men and women open their hearts they become doors for the divine presence again to manifest itself. He is perpetually appearing in this common life on earth by these lives which he renews.

[Lyman Abbott in *Outlook.*]

There are times when words seem to misinterpret spirit, and spirit to obscure personality; when the invisible seems more certain than the visible; moments in life when "the choir invisible" seems nearer and more assured than anything we can see; when, with Paul, we can say, "Yea, though we have known Christ after the flesh, yet now henceforth know we him no more." Then we realize that we are compassed about with a great cloud of witnesses, and we run our race with renewed patience because they

Digitized by Google

are watching us; then we realize that we have already come to the church of the first born which was written in heaven, and to God, the judge of all, and to the spirits of just men made perfect. Then problems are solved, burdens are lightened, duty is clarified, the diviner motives strengthened, all life is illuminated, and the voices of temptation for the moment are stilled.

[W. Tudor Pole in *Christian Commonwealth.*]

The world-wide phenomenon of seething unrest is one that is at the present time common to all people in East or West, and it manifests itself on the surface of things in different ways according to climate, circumstance, and temperament. A new spiritual impulse is stirring deeply within the root-consciousness of the race. It is gradually waking us to a sense of our added responsibilities and privileges as heralds and pioneers of a new era. The unrest is caused by the age-long conflict between the old order and the new. New wine is being poured into old bottles, and as a result the old bottles are breaking everywhere and are allowing the new wine of the Spirit to permeate the whole ocean of the mind of man. In other words, the present outpouring of the Spirit of God is universal in its manifestation, and must surely become limitless in its leavening power!

[Rev. Frank N. Riale, Ph.D., D.D., in *Presbyterian Banner.*]

The great God of all, who is above all and through all, is within us all, striving to give forth the express image of His grace and glory as it is shown forth so flawlessly and faultlessly in Christ Jesus. The whole creation is growing to bring forth such sons of the Highest. He was but the first full ripened fruit of the "tree of life." He was this solely because he was ever led by the spirit that God was within him, working to will and to do of His purpose for all. He was the medium through which we beheld the fulness of the divine purpose. Whatever God is in Jesus is His desire uppermost to be in us; and this will He work out if we only believe that He can and will do it.

[Rev. E. L. M. Gould in *New-Church Messenger.*]

The events of the Bible story have not occurred and been written down once and for all. They are happening now, and every day sees us and our friends write some of them into our book of life, the inner record of our hearts and characters. And the test which Elijah offered is offered and is fulfilled continually in the world about us, if we have but the eyes to see it. Not an hour of the day but sees some altar of Baal left cold before its despairing ministrants, while the fire of heaven descends upon the sacrifice set in order for the Lord of hosts.

[*New York Observer.*]

"Charity suffereth long, and is kind." Kindness reduces the frictions of life, most of which, perhaps all, are unnecessary, and love oils the wheels of progress. Charity or love is properly not an intermittent, uncertain activity, but a habitual offering of sympathy and help. Charity that exercises its benefits for a brief hour or for a single day may be good, but it is not by itself alone satisfactory, for we need the charity that "suffereth long"—that bears and forbears under the severest strains and to the utmost limits of human endurance.

[*Advance.*]

The church that wins conviction wins leadership. The church that draws the sword will perish by it. The church in America will be not more widely separated from American politics in the future, but more closely identified with the same: never as lord over men's consciences, but as the guide, philosopher, and friend of those who hold their citizenship the most sacred of their responsibilities.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herald,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

The Publishing Society has secured, and now has ready for distribution, a fine photogravure of Mary Baker Eddy made by Littig & Co. of New York from a colored portrait painted by Miss Alice C. Barbour, which was based on a photograph taken by Mr. Bowers of Concord, N. H., in November, 1891, and with a rearrangement of her hair that was very pleasing to our Leader.

This admirable portraiture of Mrs. Eddy, printed in three sizes on India paper and mounted on heavy plate paper ready for framing is for sale at the prices shown on opposite page.

The field will undoubtedly be gratified to learn that a book (132 pages with index) containing the "Excerpts from Editorial Comments" which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, also the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is now on sale, published in two styles of binding. For prices see opposite page.

Two of our Leader's poems, "Shepherd, show me how to go," and "Love," set to music by Frederic W. Root, are on sale by the Society. For description and price see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 50, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE: ITS RELIGIOUS PHILOSOPHY. By HON. CLARENCE A. BURRITT.

CAUSATION: VIEWED IN THE LIGHT OF CHRISTIAN SCIENCE. By FREDERICK DIXON.

CHRISTIAN SCIENCE: A RELIGION OF DOING. By JUDGE WILLIAM G. EWING.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science.

THE CHRISTIAN SCIENCE CHURCH. Its organization and polity. By CAROL NORTON.

FULFILLING THE LAW.
PRAYER AND HEALING.
THE DIVINE NATURE.
THE PROVIDENCE OF GOOD.
UPWARD FOOTSTEPS.

MARY BAKER EDDY: HER PURPOSE AND ACCOMPLISHMENT. By FREDERICK DIXON. Printed in German only.

THE DISCOVERER OF CHRISTIAN SCIENCE. By B. O. FLOWER. Printed in German only.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. By BLISS KNAPP. Printed in French only.

SEEKING AND FINDING. Also printed in Swedish.

PRICE, POSTPAID: Single copy, 5 cents; twelve copies, ONE ADDRESS, 55 cents; fifty copies, $2; one hundred copies, $3.50. Orders for above pamphlets may be assorted as desired.

REPRINTS

(Not printed in English)

The following reprints are published in French, German, and Swedish:—

CHRISTIAN HEALING EXPLAINED.
CHRISTIANITY AND SCIENCE.
HELL AND HEAVEN.
MAN'S UNITY WITH GOD.
OUR WATCHMAN.
OVERCOMING OF EVIL.
REALITY.
SUPPLY.
THE GENIUS OF CHRISTIAN SCIENCE.
THE GOVERNMENT OF LAW.
THE MIRACLES.
THE NATURE OF EVIL.
"THERE IS A RIVER."
WHAT IS PRAYER?

The following are published in German only:—

CHURCH BUILDING IN CHRISTIAN SCIENCE.
LOVE IS LIFE.
PRACTICAL RELIGION.
THE IMPERSONAL NATURE OF EVIL.
"THE LAST ENEMY THAT SHALL BE DESTROYED."

PRICE, POSTPAID: Ten copies, 10 cents; one hundred copies, 75 cents; five hundred copies, $3; one thousand copies, $5.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01463 x), heavy faced, very distinct type, Turkey morocco, size, 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.

Morocco cases, to hold pocket edition of Science and Health, *Quarterly*, and above Bible, may be had at $1.25.

Text Bible. (01561 x), pica square type, Alaska seal, size, 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

Our latest Catalogue containing a selected list of Bibles will be mailed free on application.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. 132 pages with index. Published in two styles of binding. Prices for paper covered editions: Single copy, prepaid, 15 cents; twelve copies to one address, $1.50; fifty copies, $5.75; one hundred copies, $10; Cloth binding: Single copy, 75 cents; by mail, 85 cents; six copies, prepaid, $4; twelve copies, prepaid, $7.50.

LIFE OF MARY BAKER EDDY (New Edition). By Sibyl Wilbur. Cloth edition; 425 pages. Cloth, single copy, prepaid, $3; six copies, $16.50; twelve copies, $32; edition *de luxe*, $5. Ten per cent discount to Reading Rooms on the *de luxe* edition.

CHRISTIAN SCIENCE AND LEGISLATION. 128 pages. Single copy, 10 cents; twelve copies, ONE ADDRESS, $1; twenty-five copies, $1.85; fifty copies, $3.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. New Edition. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated; 107 pages. Single copy, $1.50; six copies, $7; twelve copies, $12.

THE CHRISTIAN SCIENCE HYMNAL. Revised and enlarged. Cloth, single copy, $1.15; six copies, $5; twelve copies, $9. Half morocco, single copy, $1.40; six copies, $6.50; twelve copies, $12. Full morocco, single copy, $2.50. Levant, single copy, $3.50. Pocket edition, size 4 5-8 x 6 5-8. Full morocco. Single copy, $3; twelve copies, $30.

"PERSONAL CONTAGION" AND "WHAT OUR LEADER SAYS." By Mary Baker Eddy. Single copy, 10 cents; twelve copies, $1; one hundred copies, $7.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, is for sale at the following prices: 8-inch (mount 12x16), single copy, $1; six copies, $5.25; twelve copies, $9.50; 12-inch (mount 15x20), single copy, $2; six copies, $10.50; twelve copies, $19; 16-inch (mount 21x29), specially adapted for Reading Rooms, single copy, $3.50; three copies, $9.50; six copies, $18.50; twelve copies, $35.50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, in Boston, Mass., and the Publishing House of The Christian Science Publishing Society. Artist's proof with remarque on Japanese vellum. Size, 18 x 24. Each, $5; on India paper without remarque, each, $3. Ten per cent discount to Reading Rooms. Smaller reproduction of the above picture. Size, 11 x 14. On Japanese vellum. Single copy, $1; six copies, $5; twelve copies, $9.50. Photogravure Post Cards, reproduction of the large picture of the Church and the Publishing House, each 5 cents; twenty-five, $1.15; one hundred, $4.25.

QUARTERLY COVERS, in black morocco. Pocket size, 4 1-2 x 6 1-2. $1.15 each or $11 a dozen. With change pocket, $1.40 each or $14 a dozen.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind-healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy, $9.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *VERSUS* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE. June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $1.00; 50 copies, $1.80; 100 copies, $3.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $4.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25—6s 5d.;	2.50—12 10 ;	Mk. 5.30;	F. 6.45
2.25— 9 ;	4.00—16 5 ;	9.50;	11.60
2.50— 10 ;		10.60;	12.85
4.00— 16 5 ;		16.90;	20.00

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

The government is ready to permit the International Harvester Company voluntarily to readjust its organization to conform to recent interpretations of the Sherman law. Pending the result of conference between Attorney-General Wickersham and attorneys for the company, the threatened dissolution suit is being delayed. The government, however, will not drop its proposed suit upon a mere agreement of the company to reorganize, but will insist that the reorganization come as the result of a decree of a circuit court, thus placing the company in the position of acting in contempt of court should it violate any of the provisions of the reorganization scheme. The corporation in all now owns and operates eleven works and four twine mills, exclusive of the works operated by its affiliated and subsidiary companies.

The trustees of the Connecticut Woman's College at New London, Conn., have received the one million dollars which Morton F. Plant, chairman of the board of trustees, gave the institution. The gift is in securities which have an interest-bearing value of at least four per cent, assuring the college of an annual income of forty thousand dollars. A gift of ten thousand dollars from Edwin Milner of Mocsup was announced. This is the first donation toward a second million dollars which it is planned to raise. Of the one hundred and thirty-five thousand dollars raised by subscription in New London, eighty thousand dollars has been paid in.

Six prominent business men connected with the United Shoe Machinery Company have been indicted at Boston by the federal grand jury of the circuit court. All are charged with violations of the Sherman antitrust act in maintaining an alleged unlawful combination in restraint of trade. There are two indictments against each of the defendants, both charging that the six defendants have been working through the instrumentality of the United Shoe Machinery Company, which they have dominated and controlled in a way to make them as individuals criminally liable under the Sherman act.

Within the next year the United States civil service commission will appoint to the forest service at least four hundred assistant forest rangers at an entrance salary of eleven hundred dollars per year. To secure eligibles for these positions the local United States civil service bureau has received instructions from Washington to secure as many applicants as possible to compete at examinations to be held in nineteen southern and western states on Oct. 23 and 24.

A deep channel from New Orleans to the sea, to which the city has long looked forward and on which the United States government has been working since 1903, will be done by the end of the next fiscal year, it is thought. A large steamer drawing thirty and one half feet of water passed out to sea through the channel on April 18 and the occasion was duly celebrated.

Dean Jones of Yale College has just issued an order that after the next academic year wealthy students of the university will not be permitted to lodge in the luxurious private dormitories, but will be housed on the campus with the rest of the student body. This is a move to eliminate undergraduate snobbery.

The Boston and Cambridge commission has agreed on the work to be done by these two cities preparatory to the erecting of the Harvard College stadium memorial bridge to be built across the Charles river at Boylston street, Cambridge, for which Larz Anderson has offered a gift of three hundred thousand dollars.

The house of Governors in session at Spring Lake, N. J., has appointed a committee to urge before the supreme court of the United States the right of the states to fix traffic rates entirely within the borders of the single states.

A yearly saving of two million dollars on the transmission of periodical mails by fast freight is estimated by Postmaster-General Hitchcock after a two-weeks trial of this method of shipment.

International.

Tattershall castle in Lincolnshire, a medieval structure dating from the middle fifteenth century, has been purchased by an American millionaire. The old castle will be pulled down and rerected on Long Island, N. Y. Tattershall castle was erected by Lord Cromwell, lord treasurer to King Henry VI., about the years 1433-1443, and has been described as probably the finest specimen of medieval brickwork in the United Kingdom. The four fireplaces in the castle are remarkable for their beauty and heraldic interests and give practically a history of the owners and builders of castles from the earliest time.

An entirely satisfactory arrangement has now been made with regard to the payment of the fixed charges on the northern customs of Persia, as to which at one time there appeared a likelihood of dispute between the Russian government and the treasurer-general's department.

Mt. Etna is in violent eruption. The entire crest has been changed in outline and lava is flowing in four streams toward the north. It is estimated that the present eruption has caused so far a property loss of twenty million dollars.

Canada has rejected reciprocity with the United States by a large majority. The Conservatives outnumber the Liberals by about fifty seats in the Parliament and the government under Premier Laurier has met a decided defeat.

Australia plans to possess within twenty-two years a fleet of fifty-two ships and to have fifteen thousand officers and men.

Industrial and Commercial.

An automobile purchasing power amounting to many millions of dollars annually has been pooled and the International Motor Service Association in New York City formed. The primary purpose of the company will be to concentrate the purchases of supplies by all of the taxicab, touring car, parcel delivery, motor truck, and motor public service companies in America. These purchases exceed twelve million dollars annually. Statistics show that the motor service companies of America alone purchase annually eighteen million gallons of gasoline, two hundred thousand gallons of lubricating oil, two hundred and fifty thousand tires, five hundred thousand inner tubes, twenty-five thousand Weed chains, one thousand motor cars, taxicabs, etc., and pay one million dollars in insurance premiums, together with a great quantity of accessories and incidentals.

The search for substitutes for wood pulp in the manufacture of paper is likely to result in an extensive use of bamboo pulp, if the processes attending its preparation can be perfected, as now seems probable, since it is claimed the difficulty heretofore met with in the bleaching has been obviated. The advantages of bamboo as a pulp maker are said to consist in the facts that it has a strong vegetable fiber, that it is in general easily accessible for water transport, that it is not subject to fluctuations in supply, that it admits of easy conversion into bleached pulp, and that land established in bamboo can, after three years, be reaped annually for an indefinite period.

Arrangements for the largest timber sale ever undertaken by the government, involving approximately six hundred million board feet of merchantable timber, nine tenths of it yellow pine, are being made by the departments of agriculture and interior. The tract, which is said to be the largest body of good timber left in the Southwest, comprises parts of the Apache and Sitgreaves national forests and Ft. Apache Indian reservation in eastern Arizona. This sale will bring to the government from one million five hundred thousand to two million dollars.

Notice has been given of application to be made to the next session of the Canadian Parliament for the incorporation of the Pacific Trans-Canada & Hudson Bay Railroad Company. The company will ask for authority to build a road from Edmonton, Alta., north through Saskatchewan to Ft. Churchill or Port Nelson on Hudson bay; also west through Laurier pass to Prince Rupert or Portland canal on the Pacific coast. The road will run through practically new country.

It is estimated that Washington county, Me., will receive about one million dollars for its blueberry crop this year, the yield having been unusually large and fine. The industry of gathering and carrying these berries was begun in Washington county only a few years ago and has now attained such proportions that the state horticulturist proposes to make a thorough study of the berry region with the view of its further development in a commercial way.

Application at once of the deferred cable message system and cheaper rates on day and night "letters" is announced by President Vail of the Western Union. Negotiations between the Western Union Telegraph Company on the one hand and the Anglo-American and Direct United States Cable Company on the other, for the lease of the English properties to the Western Union, which were begun last winter, have been practically concluded.

Ten thousand tons of steel rails for the Chilean state railways will be rolled by one of the United States Steel Corporation mills. The Canadian Pacific has ordered twenty-five hundred tons more from the Illinois Steel Company. Export contracts pending include ten thousand tons for Peru and twenty thousand tons more for Chile, as well as smaller lots for the West Indies.

The *Manufacturers' Record* reports that English and Canadian capitalists are planning the investment in the central South of many millions of dollars already subscribed for the development on very broad lines of hydro-electric power operations and the building of interurban railway systems.

The gross profits to the sugar trust for the coming year, following the advance in the price of sugar from $3.75 per one hundred to $4.25 since Jan. 1, will reach forty million dollars according to sugar brokers in New York.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

FINITE AND INFINITE.

M. G. KAINS, M.S.

As used in general conversation, "finite" and "infinite" are relative terms. What seems to be infinite to one person may appear to be finite to another, and *vice versa*. This may be illustrated by the following instances. When a wireless telegraphic message is sent, the operator sees a flash of light and hears a short, sharp report each time he touches the key, yet electrical scientists tell us that when this phenomenon occurs electricity surges to and fro in the transmitter at the rate of four hundred thousand oscillations a second. They also tell us that the message dashes into space at the rate of more than one hundred and eighty-six thousand miles a second. To the lay mind these movements are beyond comprehension. Indeed the uninstructed can have little apprehension of their meaning. They are for us immeasurable, and therefore in a relative sense infinite. The rates of speed mean nothing to us, solely because we cannot bring them within our mental grasp. The electrical specialist has a clearer and more or less definite conception of them, because of his less limited attitude of mind toward them.

In a yet more remarkable way we are able to think of the giant suns of the firmament without effort; yet these suns are not only incomprehensible distances away from the earth, but also incomprehensible distances away from each other. Sirius and Vega are known to be two hundred and six trillion miles apart, and Polaris and Canopus have been estimated to be not less than eight quadrillion miles away from each other! Yet while these distances are inconceivably great, quite beyond our range of comprehension, it has been found that only the one hundredth part of a second is needed to think of any one of the stars and to jump in thought to any other star. Thus relatively infinite space is spanned in relatively infinitesimal finite time. But, startling as this fact may be to us, we are confronted with a still more startling one; namely, that while we can think of these immeasurable distances in such brief periods of time, yet we require the same amount of time to think of two objects near enough to us and to each other to touch! This is therefore a reverse case, and we may conclude from a comparison of the distances and the rates that in the latter case a relatively infinite time has been required to cover a relatively infinitesimal finite space.

The questions then naturally arise: What is thought that it can traverse and even encompass illimitable space in infinitesimal time, and that requires infinite time to cover infinitesimal space? Does the universe exist unexplored, and its parts unknown to each of us until learned and measured in our own way, until we can express, however feebly, our concepts about it? How is it possible for us to leap through infinite space from sun to sun while crawling in thought so slowly from near-by point to near-by point? Is the universe a complete whole which we must explore for ourselves and learn only in part as with our enlightened thought we are enabled to go from place to place? Does it exist as thought or as thing, as Principle or as manifestation, or does it exist as both?

In attempting to answer these questions we find ourselves in the same situation as Elihu, who in replying to Job undertakes to define God in what is doubtless the most striking effort recorded in the sacred writings. He has been striving to show Job the scope of God's wisdom and power, but after leading up through a long list of instances of this wisdom and power toward his climax, he seems to feel that he cannot reach a comprehensive climax after all, and yet he does in these wonderful words: "Touching the Almighty, we cannot find him out." The finite cannot measure the infinite.

We are usually ready to accept the statements of mathematicians, astronomers, and other specialists without question, because we have been led to think that these men have made a careful study of their subjects and therefore may be taken as authorities. We cannot know or even feel sure that these statements are true or erroneous, until we have made at least some advance toward their proof. At first the statements themselves may appear incorrect, then after we have made some slight progress in their direction they may seem to us to be infinite. But each of these attitudes is relative, because each can be measured in finite terms and we can conceive of a limit somewhere, some time, because we are dealing with thing not thought, manifestation not Principle.

Principle, therefore, alone is infinite. There can be no such thing as a limited Principle. Such a statement embraces contradictory terms. Principle, as understood in Christian Science, can create and continue to create without depletion of itself. This it does because of its intrinsic nature. The apprehension of this fact enables whoever grasps it to apply the Principle of being again and again, and thus to eliminate little by little his finite conception of the infinite. When a true conception is reached we begin to think infinitely, and when our hold upon it strengthens through proof of its truth we begin to understand what Isaiah meant when he prophesied that "the earth shall be full of the knowledge of the Lord, as the waters cover the sea," understand our Leader's statements that "the finite must yield to the infinite;" that "allness is the measure of the infinite, and nothing less can express God" (Science and Health, pp. 256, 336).

Christian Science is a liberating philosophy which enables whoever practises it in his own daily life to "think infinitely." Not that the novice or even the advanced Scientist can immediately claim perfection in this direction. Far from it! But in so far as he drops his former finite thinking, which was without conformity to Principle, and adopts the method of thinking which is based upon divine Principle, he can claim some degree of progress toward perfection, the goal our Master commanded us to attain. Principle, as defined by Christian Science, is God. Therefore as the student acquires the habit of thinking as God thinks he learns to follow the admonition which Paul gave to the Colossians; namely, "Put off the old man with his

Copyright, 1911, by The Christian Science Publishing Society

Digitized by Google

deeds" and "put on the new man, which is renewed in knowledge" (or is being constantly renewed).

What if Christian Scientists have not yet become perfect, does this militate against the system which Jesus and his disciples, and before their time prophets and seers, presented to the world, and which from remote ages until our own day has been set aside as visionary? The fact that people who in our own time have learned to think along the lines laid down in the Scriptures, and especially in the New Testament, as elucidated in and rendered practical by Mrs. Eddy's teaching in Science and Health, have performed wonderful works as Jesus commanded and as his disciples and the prophets of old are reported to have done, is irresistible proof that the Principle is the same, for like results proceed from like causes. Whosoever, therefore, can present the "signs" which Jesus declared to be characteristic of the efforts of those who understand his teachings, may be assured that he has at least begun to think upon the infinite basis of divine Principle, and "nothing but wrong intention can hinder [his] advancement" (*Ibid.*, p. 326).

BREAKING THE LAW

EUGENE R. COX.

HUMAN beliefs and superstitions, the dogmas of scholastic theology and the dicta of *materia medica*, have surrounded mortals with spurious laws to which habit and custom have given almost the force of genuine laws. When a patient appeals for help, it is the duty of the Christian Science practitioner to loose him from the bondage of these so-called laws. The practitioner knows that there is but one Lawgiver, and that divine law is the only law of the universe. Knowing this, he knows that the patient is not subject to the law of heredity, of limitation, or of penalty, because he knows that all spurious laws are without validity, force, or effect. That this consciousness of the practitioner is efficacious in breaking the apparent effect of such laws, is shown in a very simple way by the analogous case of a lawyer and client.

We will suppose that the Legislature, the lawmaking body of a state, has before it for consideration an act in relation to taxation. This is passed by both the House and Senate, is signed by the Governor, and takes its place on the statute-books of the state. It is recognized by all as the law of the land. The officials levy the tax and the citizens pay it. One citizen, however, goes to his attorney and says that the tax levied against him is unjust, and wants to know if he cannot be given relief from the imposition of the tax. The lawyer takes up the case. He knows that the fundamental and supreme law of the state is its constitution. He compares the law with the constitution and becomes convinced that it is contrary thereto. He files a suit to relieve his client from the burden of the taxation and the case goes to trial. In due course of procedure—and this course is often very tedious and tiresome to the client—the case is called and heard by the supreme court, which sustains the contention of the lawyer and pronounces the law unconstitutional and inoperative, thus absolving the client from the burden of the tax and from any penalty for his non-payment thereof.

It is, of course, apparent that such a law never existed and never had any effect. The enforcement by officials and the consent thereto of the citizens did not give it power, nor did the supreme court unmake any law. It merely declared that it was not a law. It will appear, upon reflection, that whatever force this supposed law had by reason of the belief of the community that it was a law, was broken so far as the client was concerned the moment the lawyer realized for himself that it was unconstitutional. The client could not have found relief, however, had his attorney continued in the belief that the law was valid, for so believing he could not have properly and effectually presented the case.

In exactly this way does the Christian Science practitioner free the patient. He knows that any law of mortal mind is contrary to divine law, therefore it is not a law, has no power, and that the patient cannot be made to suffer because of any supposed penalty attached to it. The practitioner does this, not by intellectual processes, not by the power of cold reasoning, but with loving compassion, knowing that the Mind "which was also in Christ Jesus" expresses no condemnation, but blesses all mankind.

DELIVERANCE AND GRATITUDE.

KATHARINE OVERTON.

FOR some time I thought that a testimony could have little value for others if given by one who had not been helped out of some serious malady or physical injury, but now it seems to me otherwise, and that at any rate the benefit to the testifier may be sufficient ground for the offering, particularly one who has always had a dislike of seeing her name in print, and perhaps a stronger dislike, though unacknowledged, of having it printed in connection with Christian Science. The reaction was so great after the uprooting of that noxious prejudice that I had a conviction that nothing would satisfy me but to go straightway, never stopping, till I should feel upon my head in blessing and forgiveness the hand which in the stupidity of ignorance I had done my utmost to discredit in its work of uplifting humanity.

But study of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, soon got me away from that, and I saw how once and for all time and for all such offenders, when penitent, the voice of divinity had spoken peace in the prayer, "Father, forgive them." To testify is a helpful step without doubt, and the more diffident we are the greater is the help; but out of my own experience I would dare to counsel another who timidly dreads to express his gratitude, "Do not force yourself to do it as a task. Look to your growth, and then wait with patience. Expression will come naturally, like petals pressing from an outgrown calyx." Of a certainty no cause led as Christian Science has been led has need of grudging or fearsome support. The time must come to each one when the stones will seem to cry out for us in thankfulness for such leadership, and when that time comes the voice will come, and it will be lifted up in joy, not fear. We have not realized what was keeping us back; we have perhaps called it by pleasanter names.

One day near dusk, off a lonely shore, a company of friends out in a skiff were caught in a storm that quickly rolled up high breakers, and seeing they would not be able to beach the boat in the cove where camp was established, they rowed into an untried cove where they barely got through the surf in safety, though everybody was drenched. Both rowers, one from each side, plunged into the last breaker before it swept in upon the beach, in order to steady the boat and to keep it from being sucked back in the undertow. We then seemed shut in by an almost perpendicular cliff encircling the small cove, menaced by the tide which would soon be flooding in. At first no trail could be found, but at last a narrow cleft was discovered, filled with the loose earth of the mesa above, and one of our number started laboriously upward, calling upon the rest to follow.

It was a hard climb, and when within a few feet of the top the trail disappeared, we all waited anxiously while the head man groped in the dusk for a foothold. Toward the top the cliff curved outward, overhanging the beach, which was sixty or seventy feet below. Return was out of the question, and it looked as if only prehensile feet could surmount the forbidding cliff. Then the leader called down to us that he had found some shallow notches cut in the face of the rock; these he followed cautiously and once on top was soon outstretched upon the ground, reaching

Digitized by Google

down with a staff to steady and guide the one next below. All got up in safety, but only one, the brave "last man," called out in the dangerous transit, "Blessings on the man that cut these notches."

Only one had voiced the thankfulness, yet all were possibly equally glad to be out of the peril. Again had my old disapproval of the nine ungracious (selfish) lepers to be turned inward in self-condemnation. Comparatively a trivial incident, it serves to picture a sterner scene which may well be etched in the unstable human memory; a crueler cliff in which steps have been cut for our feet by frail hands unused to rough undertakings; the hands of a delicate woman whose every step for years had been safeguarded by loving protection. She left the pleasant valley where love had enfolded her, and single-handed made her way—and our way—up the rugged mountain. There were no friendly voices, alas no! only mocking laughter; yet when the storms of derision and persecution were rudest there was no resentment in the gentle voice, there was not even moaning; there came, rather, from the bleak height, the sound of praise: "He maketh me to lie down in green pastures: he leadeth me beside the still waters." And from that desolation of human loneliness came the song:—

I will follow and rejoice
All the rugged way.

O critic! If you needs must find fault, let it be with something besides this "Shepherd Hymn." Call it nursery song if you like, but it is your business to know that every child in the land, and every childlike heart, is coming to love it and will carry it in memory forever; and that, you know, means its immortality. Christian Scientists give thanks, with you, for the great hymns of the masters, but for the inspiration of the church and home, marvel not if they shall cherish for all time a peculiar reverence for this fervent prayer of our Leader (Poems, p. 14):

Shepherd, show me how to go,
O'er the hillside steep.
How to gather, how to sow,—
How to feed Thy sheep.

TRUTH MAKES FREE.

ALFRED THORPE.

THE saying of our Lord, "Ye shall know the truth, and the truth shall make you free," can be best understood as one studies Christian Science. The Jews, to whom Jesus was speaking, had believed his sayings, but were still misty in their thought as to their relationship to him and to the truth. There is among all Christian believers a certain appreciation of God's love to man, but it is not of such a character, in most cases, as to relieve from the bondage of sickness and sin. The writer was for many years a lay-preacher of the gospel of Jesus Christ, as it is understood by the orthodox church to which he belonged, but he failed to grasp the full significance of the saying that Christ is "the same yesterday, and to day, and for ever," and that consequently, whatever had been God's treatment of the sons of men in the past, so it would be now, if we would but have it so.

Away back in my mind was the thought that somehow things ought to be different, and that the sick in body should be able to look to God for relief as the morally and spiritually sick did. I remember once, as I was getting up into the pulpit of a mission church, thinking, as I looked upon the congregation, what a grand thing it would be if the preachers of today could heal as they did in the days of Christ, not knowing (for I was then in ignorance on this matter) that the love of God has ever been at hand for the relief of mankind and that it has always been as easy for the true Christian to say, "Arise, and walk," as to say "Thy sins be forgiven thee." The experience of my family and myself is, that whereas before we began the study of Christian Science we were constantly, one or another of us, in the hands of the physician or surgeon, now we are absolutely free from any desire to call in such aid. By the grander understanding that we now have of our Father-Mother God, we realize more completely our relationship to divine Love, and so are able, by God's grace, to keep under the body and bring it into subjection, not only as to sin, but as to sickness. Sometimes error tries to assert itself in the form of sickness, but we now invariably turn to the "great Physician," and we find that according to our faith it is done unto us, and the enemy is quickly overcome.

The greatest good that comes to us is, however, in the fact that we are able to grasp more fully the significance of the apostle's declaration that "God is love." The more completely we realize or know the truth, the more completely are we rendered free from discordant conditions of every kind; thus verifying Jesus' saying, "Ye shall know the truth, and the truth shall make you free."

SATISFIED.

ETHEL CLAIRE ROMERY.

THE writer had just finished a Christian Science treatment, and a peace and satisfaction such as she had never before realized impelled her to pause and retain if possible the glory of a sense of meekness akin to power, of man at-one with God. An unspeakable sense of the divine presence and availability flooded consciousness, bringing one of those rare moments of vision in which, as one has said, we "touch and handle things unseen." The perfectness and completeness of His work appeared as never before, and aspiring thought, loosed from earthly environment, was linked to that infinite Life and Love from which all things proceed. Rejoicing in this new sense of freedom, she retraversed the scientific order of God's creation to find that God, after finishing His work and beholding it complete, expressed His entire satisfaction by pronouncing it "very good." As Mrs. Eddy expresses it, "Deity was satisfied with His work" (Science and Health, p. 519).

Christian Science teaches that God is the triune creative Principle, Life, Truth, Love, and that man is God's reflection, His image and likeness. In this conformity man was made, and it is therefore plain that the whole work of man is to image forth that parallelism of thought activity which establishes his at-one-ment or unity with God; to manifest the divine coincidence, "perfect God and perfect man" (*Ibid.*, p. 259) since God created man to express or bear witness unto Himself. In the divine plan each and every idea is perfect and complete, and as the perfect understanding of God and man is attained whereby perfect God and perfect man, coexistent and coeternal, are revealed, it is plain that perfectness and completeness irresistibly beget repose, that poise of thought which is the basis of true satisfaction.

A Christian Science treatment is a declaration of spiritual facts concerning God and man, the harmonious and eternal manifestation of all that exists and the unreality of whatever is unlike God, good. The Christian Science practitioner, effacing the claim of material personality and sense testimony, and fixing his thought steadfastly upon God and the Christ-idea, rises to the realization of God's omnipotence, omniscience, omnipresence, and omniaction, and through this aspiring sense, this clarified vision, exalted desire, and genuine meekness, he finds his ascension "unto the Father;" he enters the "holy of holies," where "sense is lost in sight," and beholds God's work finished and complete.

This conscious realization reveals the immaculate concept, unsullied, uncontaminated, and unconditioned by matter, as it was "in the beginning." The displacement and effacement of false sense by the assimilation of the truth heals, and there dawns the innate and supreme satisfaction which

Digitized by Google

is born of the understanding that God is All-in-all and that man is forever identified with Him. Jesus demonstrated this Godlikeness of consciousness. This satisfied sense was his abiding state, and it is thus seen that it is indigenous to all true individuality or spirituality. He demonstrated the spontaneous effect of Truth, the healing being accomplished many times before the patient was conscious of the change in his condition; so imbued was the Master with the understanding of Truth that there was no lapse between the declaration and the response,—cause and effect.

This exalted state of satisfaction, of rest in Truth, is not misleading. It is not to be confounded with the mesmeric and stultifying self-satisfaction of ignorance which ever characterizes the mortal, but rather is it the outcome and reward of that immortal yearning which seeks and finds its all-sufficiency in the completeness of God. What greater joy or satisfaction than to know that we are working for God and with God? To let His thoughts reign in us is to prove conclusively the correlation of man to God, it is to establish an impregnable defense against the counter-argument of error in all its varied presentations. In this righteous and harmonious thought-world of God man lives, moves, and has his being, and in this Godlikeness alone can we be satisfied.

"LEAD US."

ABBIE W. GRIFFIN.

THE significance of two words, repeated by every congregation at every Christian Science service in the world, is of vast import, and if used intelligently and with right motive, they must prove a mighty help to all humanity. These two words are in the Lord's Prayer, "Lead us." Now the real man, God's likeness, is always led by Spirit, for "real consciousness is cognizant only of the things of God" (Science and Health, p. 276). This is the model for which we should strive in human experience.

"God leadeth us not into temptation," is the spiritual interpretation of this petition as given in our text-book (p. 17). Should we not then cease to think of this prayer in the old way, "Lead us not into temptation," when the emphasis really belongs to the words "lead us"? This brings out the higher significance of the Christian Science teaching. "Lead us;" that is, "deliver us." This is surely the central thought. To be led by Spirit means sure deliverance from all evil. Thus we overcome the temptation to believe that evil is real and true. To be led by Spirit is to be conscious of man's unity with God, to know that "the tabernacle of God is with men," and that they are His people; it lifts thought into the realm of infinite Mind, and enables one to reflect Truth in daily living; it heals the sick and casts out devils or evils; it eliminates the selfishness which believes in a life, intelligence, and power apart from God, which is the sin of the world. To be led by Spirit means the evangelization of human selfhood; the enthronement in human consciousness of the one perfect Mind, which redeems the world. This extends the limited view of mortals from material sense to the unlimited capacities of the real man, who has dominion over the whole earth.

Said our Master, "And I, if I be lifted up from the earth, will draw all men unto me;" and in Science and Health we read, "There is but one real attraction, that of Spirit" (p. 102). In the measure that we lift up in thought and deed the spirit of Christ's life-work, will we attract humanity to that infinite Principle, divine Love, which meets every human need. Christian Science is indeed as a city set on a hill, which cannot be hid. Christian Scientists have a mighty work to do,—so to live, individually and collectively, the spirit of Love, as to help bring about the fulfilment of the Scripture prophecy, "The earth shall be filled with the knowledge of the glory of the Lord, as the waters cover the sea."

DELIGHT IN TRUTH.

GRACE HERNDON MCKAY.

CHRISTIAN SCIENTISTS are today experiencing the blessedness mentioned in the First Psalm, where we read of him whose "delight is in the law of the Lord; and in his law doth he meditate day and night." One can understand why the psalmist sang thus, since the same delight has come to us through the revelation of what God's law is. Often, when watching the cordial handshaking at a Christian Science church door, the thought comes that it is no mere greeting, but a mutual congratulation, a felicitation upon having found the truth.

When I first began the study of the Bible, with Science and Health as its key, I wondered why the door had not been opened wider for us and more explicit explanations made; but, as the deeper meanings began to unfold to me, I saw the great wisdom of Mrs. Eddy in protecting its pearls from the unprepared thought and leaving the joy of individual spiritual perception to reward faithful study. To search, to find, to analyze, to apply in any line of investigation, is conceded to be the greatest human pleasure by those who have had opportunity to judge. Let this research be for the Science of being, since it contains the answer to the riddle of the ages, and in pursuing it we of a surety find peace and blessedness. Moreover, every endeavor put forth to make our own the truth which is freely offered to all insures that steady growth in grace which is the reward of those only who exercise themselves unto godliness.

The Christian Scientist approaches his daily lesson with a prayerful anticipation that finds abundant reward. It has been said that "Christian Science is not to be intellectually perceived, but intelligently discerned." This discernment comes often with a flood of light when familiar passages stand out clearly with a meaning never before imagined. Such a realization often brings healing, and always a spiritual exaltation that sends the reader on his way enabled to "rejoice always" and with food for meditation "day and night." May those who have found this delight so exemplify it that the day may be hastened when all shall know God, from the least to the greatest.

"He who prays to God ought to address Him as if He were present; for He is everywhere, . . . Seek Him not therefore on the earth or in heaven, or elsewhere—seek for Him in your hearts; do as did the prophet who says, 'I will hear what God the Lord will speak.' In prayer, a man may be attending to the words, and this is a thing of a wholly material nature; he may be attending to the sense of the words, and this is rather study than prayer; and, lastly, his whole thought may be directed to God, and this alone is true prayer. It is unnecessary to be considering either sentences or language—the mind must be elevated above self, and must be wholly absorbed in the thought of God. Arrived at this state, the true believer forgets the world and its wants; he has attained almost a foreshadow of celestial happiness. To this state of elevation the ignorant may arrive as easily as the learned. It even frequently happens that he who repeats a psalm without understanding its words utters a much more holy prayer than the learned man who can explain its meaning. Words in fact are not indispensable to an act of prayer; when a man is truly rapt in the spirit, an uttered prayer becomes rather an impediment and ought to yield to that which is wholly mental. Thus it will be seen how great a mistake those commit who prescribe a fixed number of prayers. God does not delight in a multitude of words, but in a fervent spirit."

SAVONAROLA, as quoted by Mrs. Oliphant in "The Makers of Florence" (p. 263).

SELECTED ARTICLES.

[Alfred Farlow in *New Orleans* (La.) *Picayune.*]

Our critic affirms that Christian Science heals "by hypnosis and suggestion." We affirm that Christian Science heals by nothing short of the divine power.

I shall not undertake to discuss the elaborate mental treatment which the gentleman quotes, and which he immediately discredits as not being Christian, for it is not a Christian Science treatment, and was not made by a Christian Scientist. It is not a part of my business to defend those methods which are out of harmony with Christian Science, and which on that account are out of harmony with purely spiritual Truth. I agree with our critic that such methods were employed long before Christian Science was discovered. If they had been true and adequate there would have been no need of Christian Science, and it never would have been discovered. While they illustrate the physical phenomena which may be occasioned by varied and changing mental conditions, they do not demonstrate the power of God, nor are they worthy and final methods. The world cannot be blamed for doing its best with the means at hand, "but when that which is perfect is come, then that which is in part shall be done away." Now that Mrs. Eddy has given to mankind an understanding of the purely spiritual Christ-method of treating the sick, we should avail ourselves of the blessing that is for us by putting this method into practice and proving for ourselves what may be done by an unreserved reliance upon God.

While Christian Scientists make no pretensions toward any more knowledge than the ordinary layman possesses regarding diagnosis, that he really does have a deeper knowledge of the nature of disease is evidenced by the good results which he obtains in his practice. The mere fact that two states in the Union have trespassed upon individual privilege sufficiently to make an unconstitutional law that Christians shall not make a charge for their service is not a matter to boast of. The shame is upon those who have made the law, not upon Christian Science, and it is needless to say that an unconstitutional law will be short-lived. It only exists so long as the people are deceived as to the real import of Christian Science. The good fruits of Christian Science which are forthcoming daily will eventually be convincing to all. Christian Science is running the gantlet of opposition which is experienced by every new thing, and for this reason Christian Scientists do not allow themselves to be provoked because of the effort on the part of a few uninformed persons to stifle the free usage of Christian Science; on the contrary, they are patient and hopeful, relying upon the fact expressed in the oft-repeated lines,—

> Truth crushed to earth shall rise again;
> The eternal years of God are hers.

The gentleman declares that "the friends of Christian Science point to the moral elevation which characterizes their converts." Then he proposes to match this improved moral condition by results which he claims have been effected by "hypnosis and suggestion." Inasmuch as he proposes to employ hypnosis as a means of producing both physical and moral regeneration, I am wondering if he proposes to discard divine power altogether. I am wondering if he believes that we should give "all glory and honor to our heavenly Father," and that we should cultivate a reliance upon Him, or if we should acquire the habit of depending upon human will as a means of overcoming sin and sickness. Such methods are surely contrary to the Master's teaching, for he prayed: "Not as I will, but as thou wilt," and he said: "I can of mine own self do nothing;" "The Father that dwelleth in me, he doeth the works." And again I say that, if our critic is not willing to accept the teaching that Christian Science is the God-given method of producing spiritual results, it is incumbent upon him to point the way, rather than to discourage the one which has already earned a large measure of commendation.

The gentleman declares that Christian Science healers have "the temerity to compare themselves with Jesus Christ." Allow me to say that, if Christian Scientists have ever had any such temerity, they were not Christian Scientists in that particular act, however much they may have believed and practised Christian Science otherwise, for Christian Science would not admit of any comparison between the imperfect and the perfect. The Christian Science text-book, as well as the Manual of the Christian Science church, insists that there is but one Christ, and no loyal Christian Scientist has ever undertaken to "compare" himself with Jesus Christ, nor to be "on a level" with him, although we believe that all Christians should be Christlike in the full sense of the word; that it would not be robbery to be on an equality with our Lord in character and ability to utilize divine power; that it is the duty of each individual to attain the "full stature of manhood in Christ." The Scriptural command is: "Be ye therefore perfect, even as your Father which is in heaven is perfect." According to this text, no mortals are Christians in a full and sufficient sense at this period.

Our critic ridicules the proposition that Christian Science heals by denying the reality of disease. I wonder if he noticed the significance of the text which he quoted, namely, "The damsel is not dead"? This was the argument of truth which the Master employed to resuscitate the damsel, but it is evidence that his dependence was not upon this argument, but upon the eternal Truth which constituted the foundation of the argument, namely, "In him we live, and move, and have our being," since God is the life of man and the universe. Here the Master pointedly denied the existence of death. No stronger statement occurs in the Christian Science text-book. On another occasion he spoke of the woman "whom Satan hath bound, lo, these eighteen years." He did not say that she had rheumatism, or that she had any physical trouble: he spoke of it as a bond of Satan. He defined Satan as a "liar," and referred to Satan's offspring as a "lie." Thus it may be shown by axiomatic reasoning that the woman was bound by a falsity, something that was not true, and hence not real. Satan was a liar, and hence Satan's bond was a lie, and the only method by which a lie can be overcome is by the truth. Jesus was conscious of the unseen, eternal Truth, and by this consciousness he destroyed the error and liberated the damsel, in keeping with his teaching, "Ye shall know the truth, and the truth shall make you free."

[Howard C. Van Meter in *Portland* (Ore.) *Oregonian.*]

The word "worry" covers a multitude of sins, according to the general belief of mortals, and any attempt directly or indirectly to endorse it would not help humanity to any degree of the dominion we are encouraged to look and strive for, because it would tend to justify any and all leanings in the direction of fear. To the average person worry and fear go together. A rational consideration of certain possibilities and what our action should be, if results contrary to expectation were to prevail, affords opportunity for such intelligent thought and preciseness of action as will reduce to a minimum the likelihood of such possibilities coming to pass. If every individual were able to resist the fear that accompanies the temptation of an anticipated reversal of hope and desire, he would thereby strengthen his ability to act with mental equanimity now and take such precaution as will forestall the unfortunate possibilities.

The baneful nature of worrying about the future is that it unfits the individual to enjoy now whatever is at hand and also prevents through the presence of fear a proper analysis of whatever the situation may be and what is required to prevent an undesirable outcome which might mean disappointment and loss. To say that "perfect tran-

Digitized by Google

quillity implies perfect satisfaction with things as they are" is to fall short of a complete mental grasp of what satisfaction means and would be ignoring the evidence of wrongdoing and the results therefrom. This is not to be justified at all, as the proper conduct requires that such attention be paid as will insure the abolishment of the unsatisfactory conditions. A mental state of blissful inactivity in the presence of existing evil is to be deplored, and the blissful unconsciousness of its presence does not do away with it, which is the thing desired; but there may be a difference in the method of accomplishing its destruction through dealing with mental causation rather than with effects simply.

Christian Science may be classified with the various philosophies that urge the individual not to worry. Christian Science does not leave him, however, with the bare statement of admonition, but gives him a reason for such a state of mind as will enable him to proceed with an absence of fear, which either insures a favorable outcome to his undertaking, or at least renders him less susceptible to disappointment if it confronts him.

Volumes could be written upon this subject with a view of showing the undesirability of entertaining a dismal foreboding as to future conditions and the mental means whereby a state of peace is obtained and retained, which does not mean lethargy, but rather a calm and steadfast recognition of reality and the relationship between cause and effect based upon a reasonable view of causation.

[Frank C. Barrett in *Rockland* (Me.) *Courier-Gazette*.]

The major premise of Christian Science is that God, who is Spirit, Life, Truth, and Love, is the cause and creator of all that has real existence. The minor premise is that all God created He created in kind,—it is like Himself in quality, manifesting His wisdom, perfection, and grace in all continuity. The conclusion which must be derived from this is that God is not responsible for evil. Sin, sickness, and death cannot be classified among the "very good" things that God made. Thus, starting from the main premise you may state as many propositions as you like, and if the syllogism is correctly drawn the conclusions will be similar in every instance. The Christian Science text-book contains hundreds of propositions based on the one fact of the allness of God, or divine Mind, and in no case does one proposition contradict any other proposition in the book.

Jesus said, "Ye shall know the truth, and the truth shall make you free." Free from what? Why, from error of every kind. Now right here is where Christian Science "bulks large in denial." It denies error and refuses to give it place or power. Nothing less would be scientific if Truth is real. However, we are not so much concerned as to what Christian Science denies as we are concerning what it gives in place of what it denies. While it denies error, it leaves Truth in its place. While it denies the false sense of the universe, it gives in the place thereof a more perfect sense which liberates from discord and inharmony and establishes the enduring and true harmony in all things, and brings the "peace of God, which passeth all understanding." Now, let us continue and apply this teaching to sin. If sin is a reality, it can never be overcome and it would be useless to try to "resist it." Whereas, by knowing its unreality, seeing that there is "nothing in it," you are in a position to grapple with it and overcome it. If, then, we serve God, good, supremely, we will serve sin not at all, and it will pass out of our sight just as surely as darkness gives place to the light.

Mrs. Eddy says, "A sinner is not reformed merely by assuring him that he cannot be a sinner because there is no sin" (that is, merely to say there is no sin does no good); but, as she also makes clear, "to put down the claim of sin, you must detect it, remove the mask, point out the illusion, and thus get the victory over sin and so prove its unreality" (Science and Health, p. 447). This gives an altogether different meaning from that conveyed by the reverend gentleman in his reference to the passage from the Christian Science text-book first quoted, and it annuls all that he has said on the subject. Therefore, by denying sin, Christian Science stands for all that is good and pure and Christlike, for it will have none of it.

[Algernon Hervey Bathurst in *New Age*, London, Eng.]

Christian Science is no mere theory, it is known by its works, and those only can be called Christian Scientists who have not only studied, but practised, the teachings set forth by Mrs. Eddy in the Christian Science text-book, "Science and Health with Key to the Scriptures." It is for this very reason that the word "Science" was so aptly chosen by Mrs. Eddy to describe this great subject. Mere enthusiasm will not avail much, but the actual experience of sickness healed, of sin, misery, want, and discord overcome, is what enables Christian Scientists to stand and say, in the words of Job, "I know that my redeemer liveth."

Again, surely the term "eccentric religion" falls somewhat wide of the mark when used in connection with Christian Science. It is true that the same religion, preached and practised two thousand years ago by Christ Jesus and his disciples, was similarly criticized. Nevertheless, the sick were healed and the sinner reformed, as a proof of the mission which the Master declared he had come to accomplish, namely, to fulfil, and not to destroy, God's law. Jesus the Christ taught and demonstrated that sin, sickness, and fear were no part of God's creation, and were not brought about by the law of God. Would it not, therefore, be more logical to term eccentric those religions which teach that these very things that the Master came to prove to be unreal, not created by God, are to be patiently borne and accepted as God-given? Truth cannot be changed, and the truth taught by Jesus, and reiterated in Christian Science, is as true and practical today as the day it was first uttered.

Those who have turned to Christian Science for the help they have failed to find elsewhere, need no urging to understand what has freed them, and, as was the case with the blind man, they say with gratitude, in reply to criticism, "One thing I know, that, whereas I was blind, now I see:" and as they continue to search deeper into the teachings of this great subject they learn that freedom from sickness and sin, far from being eccentric, is the logical and natural result of the endeavor to live and practise the teachings of the Master given to the world two thousand years ago, and reiterated by Mrs. Eddy.

[Frank Putnam in *Houston* (Tex.) *Chronicle*.]

How was it possible, in a country already overrun with competing religious organizations, for a woman, stricken for years with ill health, dwelling in comparative obscurity and knowing but few people, to face the contemptuous laughter of powerful leaders of organized society, and within three decades establish a new religious society world-wide in extent?

That question, in various forms, I have heard asked by men of many minds during the past decade, but I have never heard any satisfactory answer. During a recent visit to New England, the birthplace of Christian Science, it occurred to me that the answer was in plain sight, so obvious, so easily seen, that it had, as usual in this world, been overlooked by the inquirers seeking for some deeply mysterious explanation of the phenomenon. With a membership now of unnumbered thousands, the Christian Science church cannot any longer be regarded as an experiment. It has taken its place beside the world's oldest and mightiest religious organizations, and apparently it will survive as long as any of its competitors.

Digitized by Google

Christian Science has won its success by delivering the goods. Just that. Nothing more. What has it delivered, and how? It has delivered to mankind a new faith in "the divinity that shapes our ends." It found a people nine tenths of whom were worried day and night by overwork and the fear of want in old age, and one tenth of whom were made grossly, cynically materialistic by possession of too much wealth, too much leisure, too much freedom for indulgence in the animal appetites of the race. It found most of these people unwilling or unable any longer really to believe in the healing power of divine Love. It found the churches as a rule with a dwindling male attendance, upheld chiefly by women. It found everywhere visible evidences of a formal acceptance of Christian creeds, but nowhere the old trust in divine goodness and divine power to lighten and uplift the lives of men.

Jefferson or some other philosopher once said: "The cure for the evils of democracy is more democracy." The little woman who founded Christian Science believed that the cure for lost faith was renewed and enlarged faith. Her first converts were, inevitably, among the poor and the lowly. It is so with all great uplifting forward movements of mankind. Her own early conceptions of the great idea were crudely expressed; the polite and the powerful scoffed at her, they had come to hold the spirit of religion so cheaply that they could test it only by grammatical rules. Mrs. Eddy gained classical grace with the passing years, because she gained larger mastery of her idea. She was in process of growth, intellectually and spiritually, to the last day of her life. As her vision grew in completeness, so grew her power to express it.

But to return: The people of New England, a hive of modern commercial and industrial activity in which living conditions for the majority are little more than endurable by human flesh and blood, had lost faith in divine Love, and losing faith, had lost hope. They trod their ways in heaviness of spirit, as many of them still do. Those among them in whom the will to live was still strong enough to respond to a new promise, heard the little woman's message at first with troubled doubt, then with rising hope, finally with eager gladness. It lit once more the lamp of love, of faith in divine goodness, within them, and they were the better able to believe in the power of divine goodness to heal physical ills because they were not too heavily burdened with the knowledge of the schools. Then came some of the rich and the powerful, grown heavy-hearted with excess of materialism. They too found the new light, the new hope, the new faith,—the new faith that was only the old faith of the disciples, once more asserted with entire belief by a penniless and unfriended woman, and which vindicated itself as we have seen.

The writer of these lines is an adherent of no church. His religion is the service of humanity. He believes mankind is to attain love, truth, beauty, health, harmony—all fruits of economic justice—here upon this earth. He challenges no mortal's belief concerning what may await men in the other spheres, but he believes utterly in the final perfection of the race upon this sphere. So he is glad to be a servant in the house of humanity, to aid in the building of sewers and drains and pavements in our cities, and of drains and roads in the country places. These homely tasks are a necessary part of the foundation laying for the structure of civilization. In these homely tasks he finds suitable expression of the religious instinct which is deepest-rooted of all human instincts, excepting only the instinct of self-preservation, with which indeed it is linked. He wishes, sometimes, that when our rich congregations raise two hundred or three hundred thousand dollars, or more, with which to erect great church houses, they would on second thought build modestly for the worship of the Son of man who had nowhere to lay his head, and would divert two thirds or three fourths of the money so raised to be given to the municipalities for the construction of sewers, drains, pavements, public schools, and water service extensions. Faith being free as air, so that any man can have it for the taking, and these foundation decencies of city life being procurable only at large cost of material wealth, he sometimes questions whether his friends within the churches might not express their religious instinct as truly, and perhaps even more wisely, by such use of their great wealth as he has here suggested.

By our works we shall be known hereafter; by them our inheritors shall judge of our wisdom, our faith, our foresight, our Christian charity under the sun. Mrs. Eddy has given us a new illustration of the mighty saving power of faith in the creator's love for His creatures throughout the universe. I hope to see this renaissance of faith expressed in such works as best fit the needs of our modern democratic organization of society. Let us so apply our common wealth that all may dwell cleanly and in pleasant places.

[Frederick Dixon in *Blackpool* (Eng.) *Gazette-News.*]

One of the causes of the success of Christian Science is that Christian Scientists are going about the world, never staying to abuse their neighbors or to waste their time in looking for faults in those neighbors, but in demonstrating practically the truth of the teaching in which they believe. The Christian Science movement contains innumerable thousands of cultivated and intelligent men and women, who would never stoop to the virulence of our critic, but whose effort is given to the struggle to overcome sickness and sin in themselves and for the world. In this way they are exerting an influence which no amount of violent misrepresentation is ever likely to affect.

[Charles Hapgood in *Indianapolis* (Ind.) *Star.*]

In your excellent editorial, entitled "Socialism in the United States," the mention of Christian Science in such a peculiar connection indicates a lack of consideration of the plain English definition or interpretation of the two words, "Christian Science." If any system of thought, philosophy, or religion can be formulated into a science, even the religion of Jesus into a Christian science, is not this a move in the right direction? Can any thinker protest against an effort to make religion scientific, regardless of said thinker's own particular religious convictions?

The writer is not a Christian Scientist, but having had occasion to read up on the subject depi .es the popular misconception of its real basis and purpose.

IMPORTANT NOTICE.

Beginning with September, the post office department, as a measure of economy, is shipping all magazines to central distributing points by fast freight, instead of by the regular fast mail trains. Although this change necessitates sending the *Journal*, *Herold*, and *Quarterly* to press two weeks earlier than heretofore, the Publishing Society, in line with other publishing houses, is cheerfully cooperating to make the plan a success.

We are confident our subscribers will be patient with any temporary delay that may be occasioned by the inauguration of this change, and would ask that special care be taken by the reading-rooms and distribution committees to send in orders sufficiently in advance to allow for the longer time required for transit. Orders for the *Quarterly* should reach us from two to four weeks earlier than heretofore. *Journal* and *Herold* orders should reach us not later than the fifth of the preceding month.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

THE TRUE LEAVEN.

THERE appeared in a recent issue of the *Outlook* an article by President Maclaurin of Massachusetts Institute of Technology, from which we clip the following:—

The spirit of science is essentially critical, and science will therefore always be suspicious of religion or of anything else that is founded merely on tradition or on authority. That, however, is a foundation upon which few modern men who take things seriously profess to place their faith. They may admit that tradition and authority have their value, but they see clearly that the real foundation must be elsewhere. And so it has come about, almost within a generation, that war has given place to a truce, and men are more ready to discuss the similarities between science and religion than to dispute over their differences. This change has been coincident with an unexpected broadening in the popular view of the nature of religion, and a corresponding clarification of men's ideas as to the sphere of science.

It will be noted that the distinguished writer has set this "unexpected broadening in the popular view of the nature of religion" as having taken place "almost within a generation," which is practically the time that has elapsed since Mrs. Eddy's discovery and promulgation of Christian Science. To the caviler this will appear but a mere coincidence in dates, but to thoughtful men, those who are accustomed to deal with great problems from the broad view-point of cause and effect, the relative significance of this change of thought can but be apparent—the true leaven has still its ancient power.

In the Preface to Science and Health (p. vii) Mrs. Eddy writes: "The time for thinkers has come. Truth, independent of doctrines and time-honored systems, knocks at the portal of humanity. Contentment with the past and the cold conventionality of materialism are crumbling away. Ignorance of God is no longer the stepping-stone to faith." She was a brave thinker, with the courage of her convictions, who dared to throw down the gantlet to the "time-honored systems" of both religion and science in the publication of "Science and Health with Key to the Scriptures," and that the seed thus sown has within a generation borne a mighty fruitage, cannot be gainsaid.

The fact that a very large percentage of the membership of the Church of Christ, Scientist, has come from the ranks of the orthodox churches is often commented on, but to those who have found in Christian Science the undivided garment of Christ, Truth, salvation from sickness as well as sin through "the healing of the seamless dress," who have proved for themselves, through the study and application of the teachings of Christian Science, the omnipotence and ever-presence of God, divine Truth, Life, and Love, the explanation of why they have "come out from among them" is simple and convincing; it is because they have found in Christian Science that "vitality of spiritual power by which material sense is made the servant of Science and religion becomes Christlike" (Science and Health, p. 146).

It is this "vitality of spiritual power," operating with ever-increasing energy and in constantly widening circles, that has been revolutionizing, turning and overturning, popular thought, so long held down to the belief that Christianity and science were as widely separated as the poles; and that this is being more and more conceded is evidenced in the attitude of the secular press. Speaking editorially, in December last, of Mrs. Eddy's work, the St. Louis *Post-Dispatch* said: "It has profoundly influenced religious thought and has modified medical science and practice." At the same time *The Springfield* (Mass.) *Union* said: "It [Christian Science] has unquestionably been a force to influence thought and religious institution, and its effect has been felt far beyond the membership of the Christian Science organization;" also, "In the element referred to as 'healing,' Mrs. Eddy seems to have touched a spring that is giving religion a new impulse in modern life."

These opinions are fully concurred in by many others who have noticed the effect which "has been felt far beyond the membership of the Christian Science organization," and while there are yet those who are not ready to acknowledge, or are unable to discern, that in giving to the world this new-old teaching Mrs. Eddy has reestablished primitive Christianity, has again made available the long-desired Christ-healing, we know that in Christian Science there has been introduced into the mass of time-honored doctrines the leaven which shall not cease its workings until the whole is leavened.

ARCHIBALD MCLELLAN.

PEACEMAKERS.

THE sermon on the mount begins with the beatitudes, every one of which is a sermon in itself. The seventh of these beatitudes, "Blessed are the peacemakers: for they shall be called the children of God," touches both directly and indirectly upon all the high spiritual teachings of the Bible and explains the failure or success of human experience in every age. Peace is unquestionably a spiritual condition, a characteristic of the divine government, yet it is the privilege of humanity to bring it into manifestation, else were there no need of peacemakers. In the nineteenth chapter of Luke we are told that on the occasion of Jesus' triumphal entry into Jerusalem, when he drew near to the city he looked down upon it from the mount of Olives, and wept over it, saying, "If thou hadst known, . . . the things which belong to thy peace! but now they are hid from thine eyes." The lesson of that hour is for us at every step of the way, and if we understand the things which make for peace, we shall have peace both within and without.

Coming back to the beatitudes, we discover that this one has a promise attached which gives it preeminence over the others. The "pure in heart" are to see God, but the peacemakers are to be called "the children of God,"—a high honor surely, and the important consideration is how it may be attained. In Isaiah we read that the Christ-idea first appears to human sense as a child,—"Unto us a child is born;" and this idea is no less mighty than meek, for it expresses the nature of "The mighty God, The everlasting Father;" the government rests upon his shoulder, and he is to be known as "The Prince of Peace." The prophet adds that there shall be no end to the peace thus established, and when we come to the days of Christ Jesus we find its perpetuity insured in his emphatic declaration, "My peace I give unto you"!

When we analyze the qualities of the peace to which Christ Jesus refers as "my peace," we find that it is inseparable from judgment and justice. It does not bring peace to evil, but destroys it; yet here is to be found a vital lesson for every Christian Scientist. If we are to be peacemakers, we must take every problem to the wonderful "Counselor" of whom Isaiah speaks, then we shall know how to deal with it so that we shall be indeed worthy of this name. When the great Teacher sent out his students to preach the gospel and heal the sick, he instructed them to declare peace for each house (or consciousness) which they entered, and if that house were not worthy, the command was, "Let your peace return to you." Peace must not be lost,—one must not be so disturbed by the rejection of the truth as to lose his own sense of its presence. He must be ready to receive the dove which comes back with the olive branch and wait for the assuaging of the waters.

Our revered Leader tells us that "righteousness, peace, and purity" are "the landmarks of Science" (Science and Health, p. 323). We cannot remove from our experience any one of these ancient landmarks and then claim to be peacemakers, and no one can ever rob us of our peace if we maintain these inviolate; nor can we be made to forget our Christian obligations so far as to rob others of their divinely bestowed right to the same spiritual possession. The promise to the faithful is this: "The God of peace shall bruise Satan under your feet shortly," and with its fulfilment we shall know ourselves and be known as the children of God.

ANNIE M. KNOTT.

AMONG THE CHURCHES.

AMESBURY, MASS.

Ground was broken here today [Aug. 9] for the chapel of First Church of Christ, Scientist, at Carpenter and Main streets. The building will be of cottage colonial style, divided into a main auditorium and two class rooms, with a seating capacity of about one hundred and forty. It will be ready for use about Jan. 1. The local society has been using the church of the Free Baptist society, having outgrown their prior temporary quarters.—*Boston Journal.*

STAMFORD, CONN.

The first service in the new Christian Science church was held yesterday [July 2] at 10:45 a.m., about three hundred attending. Aside from the invitations which were sent out, no official recognition of the fact that this was the first service was taken.

The front of the building is almost completed, and lacks but the coat of stucco which will soon be applied. Inlaid in the cement, about the tops of the great columns and around the arch of the entrance, are decorative tile, designed in a semi-Moorish pattern. The church architecture is one that might have been produced when Greek and Turk first clashed at Constantinople, and is a pleasing contrast to the usual run of churches of the present day. The main auditorium on the first floor is practically completed, workmen having labored Saturday night to render it presentable for the Sunday morning service. The woodwork is of browned oak, pews, trimmings and wainscoting matching the woodwork of the platform and of the organ, which occupies the space behind the platform.

Stamford Advocate.

EDINBURGH, SCOTLAND.

On Sunday, July 2, the members of First Church of Christ, Scientist, Edinburgh, held the first services in their new church in Inverleith terrace. The occasion was one of special interest, this being the first church built by Christian Scientists in Scotland, and this fact was evidenced by the large numbers who attended the opening service. Though no invitations had been sent out, and there was no addition to the usual form of service, every available chair appeared to be occupied, and gratitude and joy were expressed by all.

The church is a simple, but solid and dignified, stone structure, the interior taking the form of a spacious and airy hall, with wagon-shaped roof, well lighted and possessing excellent acoustic properties. The building stands in about two acres of ground, which will be laid down in grass and adorned with trees and shrubs and flower beds. Those who have been in charge of the work humbly and thankfully acknowledge that the good results obtained are the outcome of the united, earnest prayers and efforts of the whole church, a large number of members having willingly offered themselves to serve on various committees formed to further the work, while others who were not able to take part so actively have helped in other ways. There are still some finishing touches to be put to the building, but it is hoped that before many months are passed all will be completed, and the church formally dedicated to the service of God.—*Correspondence.*

WORDS OF APPRECIATION.

The following letters, which have come to the Publishing Society from a correspondent, were written by men who are at the present time confined in prison, and show the welcome which awaits our literature in such institutions:—

"I received your kind letter, and was glad to learn that there are at least a few hearts which beat in sympathy for us who have been so unfortunate as to stumble along life's pathway and err to such an extent that to safeguard society and meet the demands of justice we are compelled to weave a part of our thread of life in servitude. I don't know whether or not you folks realize the good you accomplish by extending a helping hand to those who by force of circumstances are led to believe that their last hope is torn to shreds, namely, their belief in humanity; but if you can, it must be a balm to your own hearts. It must be your bigness of heart and broadness of mind, coupled with the teachings of Christian Science, that enable you to see the possibilities for good in us who are supposed to be lost. And as my limited knowledge of Christian Science has taught me that it is the only agent for those pure thoughts and acts, I am very enthusiastic to understand thoroughly its teachings, and by daily study I am making most excellent progress to that end.

"You will no doubt be surprised, as I was, to learn of the reception of your literature among the boys here. As far as I was personally concerned, I preferred the clean journalism, but was inclined to believe with the world that this class of people have a tendency to read only the sensational; but I find it very different, for by the time the *Monitor* has gone the rounds it is simply read to pieces. But then there are about twenty of us who could give up the *Monitor* a great deal easier than the *Sentinel* or the *Journal*, as we get so much more real good and comfort from them; and the last couple of months of study has shown me that comfort and peace of mind can only come by looking at things through a Christian Science lens.

"I feel deeply grateful for the kindness shown me; my gratitude is easier felt than expressed in words, and you may be sure that the many others who are enjoying the literature appreciate your efforts."

"There is a steady and growing demand for Science reading matter here, but you will probably better appreciate the situation when I say that there are eleven men who are constantly studying Science and Health and demonstrating the great truths therein set forth, besides a number of others who are becoming interested in Science. There are a number of men here, well educated and highly intelligent, to whom religion does not at present appeal, but who are keenly interested in the effort of the *Monitor* to purify the journalistic atmosphere; and you may rest assured that each copy of the *Monitor* is well used up before it finds the waste basket. The *Sentinel* and *Journal* are eagerly 'devoured' by those who are seeking to know more of the spiritual facts of being.

"The *Sentinel* and *Journal* are to me each week as a cup of cold water to the thirsty. I have been studying Science ever since I arrived here two years and three months ago, and the change in me has been more than remarkable, it has been tremendous. I started in with the first line of the Preface of Science and Health, 'To those leaning on the sustaining infinite,' and I have been leaning on the same source of happiness, harmony, and health ever since, and each day has been filled with blessings. My gratitude to Mrs. Eddy; the glory is God's."

THE LECTURES.

CLEAR LAKE, IOWA.

A lecture on Christian Science was given at the White Pier, Clear Lake, Iowa, on Sunday, Aug. 20, by the Hon. Clarence A. Buskirk of St. Louis. The lecturer was introduced by the Rev. W. A. Marzolf, pastor of the Congregational church, who said:—

Christ Jesus taught men what to believe, how to think, how to live. This is a scientific age. Truth is science—science is truth. When we know the truth about God, about the Christ, about God's will for man, and adjust our lives to the truth, we shall be saved. It is history that in all ages the church has sought, as it were blindly, after God, after truth, and never in any age have men found all of truth—but with the advancing ages God has revealed Himself more clearly to men, as they became better fitted to receive larger revelations of God's truth.

God and truth are unchanging, "the same yesterday, and to day, and for ever," but slowly does the truth dawn upon our horizon. We are always glad to welcome one true to his convictions, and we have with us today one who is convinced that he has a more complete revelation of God's truth than mankind has had since the Christ of God taught the perfect will of his Father, which message in its true spiritual significance had been lost awhile. The foundation of his conviction is that God is omnipotent, omnipresent, and omniscient. He claims to find in the teachings of Christ Jesus the sum total of all spiritual truth, and it is this truth that he wishes to expound. We must always welcome one who comes in the name of Christ Jesus, that we be not numbered with those who stone the prophets and kill them that are sent unto men. When with indignation Jesus' disciples came to him, saying, "Master, we saw one casting out devils in thy name and we forbade him because he followeth not with us," Jesus said, "Forbid him not, for he that is not against us is for us." With these words of the Master ringing in my ears, I gladly introduce to you the Hon. C. A. Buskirk, who will now address you.

Clear Lake Reporter.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Beatrice, Neb.—Frank H. Leonard, Christian Church, corner Seventh and Ella streets, Oct. 10.
Burlington, Iowa.—William R. Rathvon, Opera House, Oct. 6.
Cedar Rapids, Iowa.—Judge Clifford P. Smith, Oct. 9.
Chicago, Ill. (Ninth Church).—Bliss Knapp, Woodlawn Masonic Temple, Lexington avenue and 64th street, 8 p.m. Oct. 7 and 3 p.m. Oct. 8.
Council Bluffs, Iowa.—Judge Clifford P. Smith, Dohany Theater, Oct. 12.
Creston, Iowa.—William R. Rathvon, Court House, Oct. 5.
Dayton, Ohio (First and Second Churches).—Virgil O. Strickler, Memorial Hall, Oct. 13.
Decatur, Ill.—William R. Rathvon, Power's Theater, Oct. 10.
Downers Grove, Ill.—William R. Rathvon, Auditorium, Main street, Oct. 9.
Fort Collins, Col.—Frank H. Leonard, Majestic Theater, 3:30 p.m., Oct. 8.
Fort Dodge, Iowa.—Judge Clifford P. Smith, Oct. 13.
Freeport, Ill.—William R. Rathvon, Masonic Temple, 3 p.m., Oct. 8.
Gainesville, Tex.—Francis J. Fluno, M.D., Opera House, Oct. 10.
Gary, Ind.—Prof. Hermann S. Hering, Commercial Club Hall, Broadway, between 6th and 7th avenues, Oct. 12.
Geneva, Ill.—Clarence C. Eaton, Congregational Church, Oct. 12.
Highland Park, Ill.—Judge Clifford P. Smith, Church Edifice, 3:30 p.m., Oct. 8.
Kewanee, Ill.—Prof. Hermann S. Hering, Church Edifice, Main and Lyle streets, Oct. 6.
Kirksville, Mo.—Bliss Knapp, Opera House, Oct. 9.
Le Roy, Kan.—Hon. Clarence A. Buskirk, Oct. 13.
Lincoln, Neb.—Virgil O. Strickler, Oliver Theater, Oct. 8.
London, Ont.—William R. Rathvon, Church Edifice, Oct. 12.
Los Angeles, Cal. (Churches and Societies).—Francis J. Fluno, M.D., Third Church (Simpson Auditorium), 734 S. Hope street, 3 p.m. Oct. 1, 8 p.m. Oct. 2.
Lyndonville, Vt.—Rev. William P. McKenzie, Music Hall, Oct. 9.
Marion, Ind.—Prof. Hermann S. Hering, Indiana Opera House, 3 p.m., Oct. 8.
Marshall, Mich.—William R. Rathvon, Empire Theater, Oct. 13.
Memphis, Tenn.—Willis F. Gross, Lyceum Theater, 3 p.m., Oct. 8.
Mexico, Mo.—Bliss Knapp, Church Edifice, Oct. 10.
Needham, Mass.—Rev. William P. McKenzie, Town Hall, 3:30 p.m., Oct. 8.
Neligh, Neb.—Frank H. Leonard, Auditorium, Oct. 12.
Newark, Ohio.—Bliss Knapp, High School Auditorium, Oct. 13.
Norwalk, Conn.—Rev. William P. McKenzie, Town Assembly Hall, Oct. 6.
Ogden, Utah.—Frank H. Leonard, Weber Academy, Oct. 2
Oskaloosa, Iowa.—Judge Clifford P. Smith, Oct. 10.
Plattsmouth, Neb.—William R. Rathvon, German Presbyterian Church, Oct. 2.
Princeton, Ind.—Hon. Clarence A. Buskirk, Court House, Oct. 5.
Provo, Utah.—Frank H. Leonard, Ellen Theater, Oct. 1.
Rock Island, Ill.—Clarence C. Eaton, The Illinois Theater, Oct. 10.
San Antonio, Tex.—Francis J. Fluno, M.D., Beethoven Hall, 4 p.m., Oct. 8.
Sioux Falls, S. D.—Frank H. Leonard, Oct. 13.
Springfield, Mo.—Willis F. Gross, Landers Theater, Oct. 13.
St. Joseph, Mo. (First Church).—Virgil O. Strickler, Tootle Theater, Oct. 10.
Wabash, Ind.—Prof. Hermann S. Hering, Eagles Theater, Oct. 10.
Watertown, Wis.—Clarence C. Eaton, Masonic Temple, Oct. 9.
Webster City, Iowa.—Clarence C. Eaton, Armory Opera House, Oct. 13.
Willmar, Minn.—Clarence C. Eaton, Church Edifice, Oct. 5.
York, Neb.—Frank H. Leonard, Opera House, Oct. 9.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

TESTIMONIES OF HEALING.

I wish to tell how I came to realize the truth of Christian Science, and how much it has helped me in every way since. I had never been a religious man and seldom attended church. I always held that all a man could do was to try and play the game of mortal existence straight, and I had not found that church-going helped me to do this.

Over two years ago, however, when on leave in England, I met a most extraordinary case, as I then thought, of healing through Christian Science. I will not go into any details concerning this case, but will only say that a very dear friend was suddenly cured by it against the expressed opinion of the doctors. I had known all the details of the case beforehand, and when my friend learned a little of the benefits of Christian Science, she naturally wished me to learn them too. I had always jeered at this Science, having an entirely wrong opinion as to what it really was; but I promised to read the text-book and see what I thought of it. As I believe often happens, I discovered many statements which seemed to me illogical, but being prevailed upon to take these questions to a practitioner, they were explained to me so logically that I could not refute her explanations. This made me realize that Christian Science was not a religion to be laughed at and cast aside: so I started to work at it, and in the end I realized its truth and beauty.

Since then I have taken no drugs, although some few months ago, when there was cholera in the cantonments, I had an attack of illness which appeared to be of that nature. By reading Science and Health, however, and treating myself, I was able to do duty again on the third morning, although I felt very weak and had lost a great deal in weight in the two days.

I will also give a short account of another healing which I experienced in Christian Science, in the hope that it may prove of value to some seeker after the truth. One afternoon I was playing in a hockey match at Kohat, when, stepping on the edge of the ball, I wrenched my ankle very painfully. I had to stop playing, as I could not walk; but I began immediately to declare the truth, and in a short time the pain was overcome sufficiently for me to be able to get into a trap and drive home. By the following morning, however, the ankle had become very badly swollen, and the regimental doctor, having heard I had sprained my ankle, came round to see me. He told me that I would be at least a week in bed; but I would not agree with this, and I told the doctor so. He laughed at me and said that it was absolutely impossible for me to get out as I expected. I treated myself all that day and the next, with the result that two days after my ankle had been hurt I was quite well enough to go to a ball and dance.

My colonel, who knows that I am a Scientist, holds, like so many others who do not yet know the truth, the idea that Christian Science is will-power, and he seemed to think I was pretending to be all right when I really was not. He accordingly ordered me to go out on a route march the following morning, and this I did, walking eight of the twelve miles without the slightest trouble or pain; and I also went to another dance the next night without feeling any trouble. My ankle has never worried me since. I may add that the doctor, talking in mess, said there must be something in Christian Science, as he could never have got me well anything like so quickly. This is not the only time that Christian Science has helped me, and I feel deeply grateful to Mrs. Eddy for her wonderful discovery.

I can only finish by adding my heartfelt thanks for this healing religion to God, and for His goodness in bringing the truth to me so early in my life.

LIEUT. H. N. LEE, 59th Rifles (F. F.), Changla Gali, Punjab, India.

One day, about six years ago, I was seated in the stillness of the park, with tears in my eyes, wondering what I had done that God was punishing me so severely. All of the arrangements for an operation for hernia had been made, yet I said in my heart that I would rather die than submit to etherization. And why live at all? What had I on this earth to live for? Yet I felt that God must have put me here for some good work, and as I was thus pondering a still small voice said to me, "Christian Science." I said to myself that it might help others, but never me, for the doctors had told me that I must be operated on. I decided, however, that I would look into Christian Science before going to the hospital; so I bought a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the first evening, while looking over its pages, I said to myself that whoever this dear woman might be, I loved her, for she surely walked close with God.

I spent night after night alone with God and this book, until the extreme hour came that I must decide what to do. On my knees I begged God to show me the way, to give me wisdom and understanding, for in that book I had found the truth: and still the operation was awaiting me. I said, "Whom have I in heaven but thee? and there is none upon earth that I desire beside thee." "Oh," I said, "if it were only true what I have read in that book,—that the Christ is here to heal and to save;" then my favorite hymn came to me, "Dear Jesus, I long to be perfectly whole," and as I wept and prayed a wonderful peace came over me. Truly I had touched the hem of Christ's garment and was made whole, for the hernia was overcome then and there. "Who is so great a God as our God!"

The following day I asked the maid to remove all medicine and medical appliances, and when she took away the last basketful I realized the allness of Mind, God, and decided that henceforth I would live and work for the glory of God and for the cause of Christian Science. May God bless the loving heart whose message of Truth has made one lone woman to know God aright.

MRS. ELSIE FISCHER, New York, N. Y.

It is with a deep feeling of gratitude that I tell what Christian Science has done for me. Though not a sufferer myself, my one wish was to know why the Christ-healing had gone from the world, and how I could find it to help others, particularly one member of my family. Three years ago I heard of some one's being healed by Christian Science, and the text-book was lent to me. On reading the first sentence in the book, I knew I had found what I was looking for. In reading this wonderful book my vision was so illuminated that I found eye-glasses were no longer of any use to me; perplexing problems were all solved; my fears for the dear one vanished forever, and I had found a new heaven and new earth. I thank God that in my reading of "Science and Health with Key to the Scriptures" I was awakened, and that I found the peace and the Love that passeth understanding. Some experiences which I had before hearing of Christian Science showed me plainly that ideas of Truth do without a doubt reach the receptive thought, and that they are powerful for good.

With one treatment in Christian Science I was instantaneously cured of severe headaches; and at another time, through absent treatment, of congested chest. One minute I could not speak, and the next I was perfectly well; in fact, I went at once into the city to pay the practitioner and thank her. I have also been able through the power of Truth, as declared by my sister, to get up and walk three miles, after falling off a wall and down some stone steps, and striking on the back of my head. For a few seconds a sense of pain suggested itself, but with a look up and away to divine Love, it vanished, and that night there was no mark visible of any accident. Shortly after

Digitized by Google

coming into Science, I proved the power of right thought to change discord into harmony, and since then I have proved it in innumerable ways. Through the teaching of Christian Science I have been able to bring health to others, and in one instance a knowledge of plenty instead of a sense of lack.

For all these benefits I am very thankful, and am trying to grow, so as to be a Scientist indeed,—a worthy follower of our Leader and a true disciple of Christ Jesus.

ELEANOR H. MILLIGAN, Birkenhead, England.

In Christian Science I have learned the power of God's law to bring harmony into every detail of life, and I am glad to express the joy that has come into my life during the past two years. All Christian Science literature is eagerly sought by me. My husband and I, after more than thirty years of church work, have found in Christian Science a church of Christ that satisfies us. Class instruction has enlarged our understanding of this healing truth, and I find it difficult to cease speaking of "the reason for the hope" that is in me. I trust that the years to come will in some measure prove my gratitude for the riches that God has poured into my understanding through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy.—ISADORE S. THURSTON, Cambridge, Mass.

While I was pondering the words, "Having done all, to stand," the thought came to me that I had left one thing undone in never having taken the pains to make some record of the great blessings which Christian Science has brought to me, for the possible help of others. When I first heard of this teaching, in 1889, I had been an invalid for ten years or more, confined to my room much of the time, suffering from what had been diagnosed as two incurable diseases by the many physicians I had tried. There were then no Scientists where I was living, and I did not know that absent treatment was possible, but I sent for a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, with the thought that if Christian Science had healed others, it would heal me also. The first time I read through that wonderful book I understood very little of its meaning, but as I went on studying I began to see that my body was but the reflection of my thought, and as my thought changed my body would change. This perception gave me peace, and then, as the mental and spiritual unrest and hunger disappeared before a better understanding of Christian Science, their bodily effects began to leave me.

At once I spoke to different friends about Science, and interested a few. From time to time friends would ask me to help them, telling me of their ailments. Then the suggestions would pour in that I could not help any one with Science; that it was absurd for me to pretend to work for others. But of the two voices which so often argue to us, the better impulse to do at least all that I could would prevail, and I was enabled to do what was asked of me, until gradually it came about that I was perfectly healed, was well and stronger than I had ever been in my life before, and I always felt that the effort to help others had greatly blessed me and hastened my own healing.

Some years after this I was thrown with great force from my bicycle, falling on one elbow against the concrete pavement. The pain seemed severe, but Truth was there to help me and I was enabled at once to declare the supremacy of God and His law,—that under divine government no accidents and no injury can occur; and I was able to remount my wheel and reach home without suffering. Later the pain returned, there was a dislocation, and the appearance was so alarming that a young Scientist who was with me offered to go for a surgeon. She did so, and not finding him went for another, who was also out. Then it seemed to me only right that Truth should finish what it had begun. With some help from a friend in Science I battled with and overcame the numerous suggestions about a deformed arm, etc., for I could use my arm but little for two or three weeks, and could not control the movements of the hand, as often it would turn in one direction when I tried to turn it in another. I am, however, most grateful to say that the healing was perfect, so complete that now I find it difficult to tell which arm was injured.

For the past twenty years I have leaned on God only, never using or needing medicine, and Christian Science has preserved my health and lifted me above every false belief; it has taught me how to work out my own salvation; how to build for eternity, so that I see what it means to work together with God, and can stand in the consciousness of our dear Leader's teaching that God reigns, and that He never errs.—MRS. LULU B. ESPY, New Orleans, La.

Christian Science has done so much for me that I wish to tell of it, hoping thereby to encourage others to read Science and Health, that they may be freed as I was. Ever since I could remember I had been sick, and as I grew older kidney and heart trouble held me, and also sleeplessness. Three years ago I began to read "Science and Health with Key to the Scriptures," and I am entirely healed. By sending this testimony I wish to express my gratitude to God for Christian Science and its Founder.

MARY A. MOORE, Mountain View Park, Cape Elizabeth, Maine.

When Christian Science was first brought to my notice, over two years ago, I had so far recovered from a very long and severe illness that I was able to go abroad and resume my work of teaching, but I was far from strong and in constant fear of a breakdown. The first effect of reading "Science and Health with Key to the Scriptures" by Mrs. Eddy was that I at once gave up the idea of resigning from my post and returning home, as I had had serious thoughts of doing. I recognized the fact that "whatever it is your duty to do, you can do without harm to yourself" (Science and Health, p. 385). Depression and the dismal sense of failure left me. I felt that I was surrounded by divine Love, and that all would be well with me. My health began steadily to improve, and later, when the feeling that my work was a strain attacked me again, I went to a practitioner, and with her help the condition was quickly overcome.

One day, on my way to the Christian Science reading-room, I stumbled and twisted my ankle severely. The thought that there is no sensation in matter came quickly to my mind, and I continued my walk without any pain. Once at my destination, however, a feeling of faintness came on. A Christian Science practitioner advised me to lie down and to keep "the scientific statement of being" (Science and Health, p. 468) in my thought. I did so, and in an incredibly short time I jumped up, saying that I could not lie there any longer, that I felt much too well to do this. Colds and coughs have also yielded with remarkable quickness. Through the study of the text-book, with the patience and the understanding, the advice and help of a practitioner, irritability, temper, and fear are slowly but surely loosening their hold on me. I am learning that Christian Science is available in all the every-day problems of life, and the help I am receiving in my work is inestimable.

The Bible means so much more to me now, that the ever-presence and all-power of God, good, is becoming clearer and clearer. I am indeed more grateful to God than I can express, and my heart goes out in thankfulness and love to our Leader, Mrs. Eddy.

ETHEL D. ROGERS, Frankfurt a/Main, Germany.

Digitized by Google

My gratitude to God is boundless for all the blessings I have received and am receiving daily in Christian Science. Until I was healed through this truth in January, 1908, I had never known what it was to be free from pain, and from the age of fourteen years had seldom been without medicine or a doctor, and every physician said that nothing but an operation would help me. I was operated on when very young, but at the time was told that it would relieve but not cure me. Finally, after repeated sick spells, I was taken out of bed at my home in western Texas, and brought to Ft. Worth, to one of the leading sanitariums. At that time I was operated on for appendicitis, an abnormal growth, and other troubles. I spent five weeks there, was brought home, but later went back again for further treatment.

In August my husband and I moved to Ft. Worth, and I was then a complete wreck. In December I went again to the sanitarium for another operation. One night, just before Christmas, my husband came to see me, and asked me to come home and try Christian Science. A friend, who was not a Scientist but had seen many healings, had asked him to do so. For myself, I was willing to try anything rather than to face the operating-table again; I felt that it might postpone the operation for a few weeks at least, and as we heard that no medicine was given, we felt it could do no harm. I got the consent of the doctor to go home, providing I would come back after the holidays. The following Monday a Christian Science practitioner came to see me, and in less than three weeks I was a well woman, although the doctors had told me that any woman who had suffered and gone through what I had could never be well and strong.

I have also been healed of weak lungs, contracted from nursing those who were very dear to me. I had hemorrhages, and the doctor said I might live a year or I might not live six months, as I certainly had serious lung trouble. I also had dreadful headaches, when I could not retain even a drop of water. An ankle that had caused me a great deal of pain for over nine years was healed, and I have been able to lay aside glasses after wearing them over thirteen years, as now my sight is normal.

There are other blessings, too numerous to mention, but for all I am grateful. Above all else is the knowledge I have gained of God, a God to whom I can go in every need, and He never fails me. I am deeply grateful to Mrs. Eddy for again bringing to light the truth which Jesus taught, and my prayer is that I may daily live this truth.

Mrs. William P. Derling, Ft. Worth, Tex.

Two years ago I was healed of jaundice and a disease of the bladder—so the different physicians called it. For over two years I had been under the care of doctors: seven in my own city and three in other cities tried to cure me, but they gave me no hope. One said an operation would be necessary, others that I could never be cured. When, finally, I was confined to my bed, suffering intensely, my family and doctor gave me up to die.

A friend came at this time to ask us to try Christian Science. My husband went to see a practitioner and asked her if she could heal me. She answered, "'All things are possible with God;' I will go and see her." She came, and with her such words of comfort and cheer that hope sprang up within me. After another day and night of great suffering, I fell asleep about one o'clock the next night and slept for five hours in sweet peace; all pain had left! I then had treatment for three weeks, but at the end of the first week I was about the house, and in two weeks I was doing my work.

I am truly happy, and most grateful for this blessed truth. It has not only healed me of sickness, but I am striving to put out all sin,—to love my neighbor as myself. I sing praises to God when about my work. I am glad to testify to His goodness, and may it help many others to receive comfort through Christian Science, for which our dear Leader has so patiently labored, that mankind may be freed from human bondage.

Mrs. Fred Fisher, Menomonie, Wis.

Three years ago I was healed in Christian Science. I had been a sufferer for a number of years from very severe headaches and extreme nervousness. I took the medicines prescribed for me by different doctors, and I also wore glasses for one year, but neither gave me much relief; the headaches grew worse, until I was on the point of going insane.

While living in Albuquerque, N. M., a woman who was then taking Christian Science treatment asked me if I would try it. I consented gladly, and as a result Christian Science did for me what medicine could not do. I was healed in two treatments. I am truly thankful to God, and grateful to Mrs. Eddy for my physical healing, but I am still more grateful for the spiritual quickening. Before coming to Christian Science I had no religion and I did not know God; now I know where to go in all my troubles, and I have been able, with my little understanding of this truth, to overcome several physical ailments within our family in the last three years. My hope and desire is to live the life which Christian Science teaches, knowing that it is the truth.

Mrs. Ellen Nelson, Los Angeles, Cal.

It gives me great pleasure to add my testimony to that of my wife. We came to Los Angeles shortly after my wife's healing, and became members of First Church here. Christian Science has been a great blessing to us, and we are very grateful to God, and to Mrs. Eddy, for this great truth.—George Nelson, Los Angeles, Cal.

My gratitude can never be expressed for what Christian Science has done for me and my family. I was brought up out of darkest Egypt into the promised land,—out of bondage into freedom. Science has taught me to love God, good, instead of fearing Him. Being brought up in a religious home, I was always striving to get a better understanding of God, that I might help others. Since I have come into the understanding of God and know that He is omnipotent, always with us, I can say: "Now is the accepted time; behold, now is the day of salvation;" "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee."

About nine years ago I was healed in Christian Science of a dislocated kneecap after being three months on crutches. Two physicians told me I would no doubt be a cripple for life, but with less than five treatments in Christian Science I was healed. Not being able to get the right understanding of Science at that time, I remained in the church, one of the most miserable persons on earth, always thinking that Christian Scientists had a different and more practical religion than mine was. Indeed, I was very jealous of them. What little understanding I had of their religion made me feel that it was good, and I was sure it was the teaching of Jesus; but I was afraid of it, as it seemed so different from what I had been taught.

Again Truth came knocking at my door. About three years ago my husband was healed instantaneously in Christian Science of a very severe form of stomach trouble, so bad that even water would distress him and he could not retain it. My daughter was also healed of measles in two treatments. Since that time I have had the privilege of class instruction and have seen a number of cases healed instantaneously. Since I have entered into this great field to work, after I have gotten my patients to work and know

Digitized by Google

they are sincere, I always ask them if they would not like to own a copy of Science and Health. As a rule they will always say, "Yes, but I am not quite ready for it, as I want the pocket edition when I get one." I have known of four different people to say this, and I have always replied, "Your sacrifice will open up God's supply." Each time they would come and tell me that they had bought the text-book, and had found my words to be true. I found this to be equally applicable in my own home, when I gave my daughter a copy of Science and Health for a present. She had none of her own, and we like our own things best; so I secured the book, and the next day one whom I had helped sent me the needed amount.

We are taught that all needs are supplied. I have found it to be so, both physically and spiritually. For this I am more grateful than words can express to God, and to our Leader, Mrs. Eddy.—Mrs. Indiana Wyatt, Denver, Col.

[Translated from the German.]

In January, 1909, I was taken with severe pain in the back. We tried several remedies which proved of no avail, and then consulted a physician. He prescribed treatment, but this did me no good either; so another physician was consulted. I tried everything prescribed, also baths, with the hope of improving; but in vain, and the pain was unbearable. I then heard of Christian Science, asked a practitioner to explain the subject to me, and at once began to take treatment. I looked forward to my healing with firm trust in God, and experienced a wonderful change after the first treatment. It would be difficult for me to describe it, but I felt as I never had before. The pain practically disappeared, except for a little twinge occasionally; but this also soon vanished. I remained under treatment for some time, but soon could consider myself healed, and am now perfectly well.

I give this testimony with a thankful heart, and am especially grateful, next to God, to our beloved Leader, for the healing truth of Christian Science, whereby we are blessed.

Frau Marie Schuchmacher, Linden-Hannover, Germany.

Enough time has passed since my healing in Christian Science to convince myself and others that I have been freed from rheumatism, lung trouble, and nervousness. From childhood I was a sufferer and was a continual source of anxiety to my mother on that account. Later in life I was obliged to earn my own living, but although I had been under medical treatment from infancy I seemed to grow gradually weaker and naturally became discouraged. The last doctor who attended me said one lung was almost gone and the other affected. Believing this, the future seemed dark and the present nothing but slavery under these conditions.

Just at this time a former class leader (I was a Wesleyan) told me of Christian Science. With only a faint gleam of hope I resolved to make an opportunity as soon as possible to attend a service. It was not the size of the church nor of the congregation that attracted me, but a sweet sense of protection, love, and peace which came over me and made me long to know more about this truth. At the end of the service I obtained a list of practitioners from one of the ushers, chose one of them, and asked for treatment right away. After the first treatment I left off my glasses, which I had worn constantly for eight years because of an injury I had received, and the optician had told me I could never do without them. I was delighted at being able to see so well without them and even to read.

The following week I was healed of pain in my ankle which always attacked me when walking any distance, owing to the ankle having been somewhat twisted by a fall from a tram-car about fourteen years previous. Not only has there been no return of the pain, but the ankle bone is now in its normal condition. After six weeks' treatment I felt myself a new woman. I knew I was thoroughly healed, and I began to feel that I, too, had a work to do in life; that I could do it, for my every need would be met. How gladly I paid my practitioner, for I felt I had received more in six weeks from the teachings of Mrs. Eddy than I had received in thirty years from material remedies. These "signs" convinced me that Christian Science is Christianity practised, but I feel my gratitude can best be shown by following our Leader, Mrs. Eddy, in obeying God's law.

Elizabeth Cooke, Darlington, England.

With gratitude I testify to the many blessings which Christian Science has brought to me and my family. I especially wish to mention the healing of my little grandson. When only a few months old, a severe bowel trouble set in, and at six months he was so weak he could scarcely hold up his head, while those who saw him thought he could live but a short time. As I had been greatly benefited in Christian Science, my son and his wife turned to it for their little one. There are no Christian Science practitioners here, so his mother took him to the nearest city, a distance of forty-five miles. Some people, not knowing why she went, thought her very foolish to undertake the journey with the child, but she went with the hope that he would be helped.

After a week or ten days' treatment, she brought him home, greatly benefited, and he soon began to grow and to look like another child. Now he is over four years old and a picture of health and strength, often taken to be older than he is because so well grown. He is fond of saying that he is a Christian Science boy.

We are all very thankful for this saving truth,—thankful to God for Mrs. Eddy, also for the benefit rendered us in time of need.—Mrs. C. R. Bray, Elizabeth City, N. C.

I have long wished to give my testimony of healing to the field. I was educated very strictly and religiously, but all my life I doubted the doctrines of the church, which seemed narrow and cramped. My father was an old-fashioned preacher, who held to everlasting punishment and lived what he preached. He often insisted on my going to protracted meetings and kneeling at the "mourners' bench," but it meant nothing to me. He passed away when I was but a child, thinking that his little girl was unsaved. I afterward united with the church, because I thought it was right to follow in his footsteps, but was never satisfied, was always seeking something higher. I looked into many theories, but without finding anything to satisfy.

I was an only child, my mother having passed away from lung disease and all her family going the same way. With her last breath she said, "My little daughter is all that holds me to this earth," and reaching out her hand she committed me to the care of the great Father. I grew up delicate, with the thought always held over me of inherited disease. At last I came down with it, and was sent among the mountains to fight it out. There a dear woman told me about Christian Science, and said I did not need to die because the physicians had told me so; that I might look into Christian Science, as it would do me no harm in any case. This seemed reasonable, and I immediately began to investigate. As soon as I was able to be up, I visited a practitioner, with whom I talked about an hour, and this resulted in my taking treatment. I never thought I could be healed, but as I told her, if she had a higher understanding of God, I wanted to know it. I was healed in my first treatment of lung, throat, and heart trouble, also of dreadful headaches, from which I would at times cry out with intense pain.

The first time that "Science and Health with Key to the Scriptures" was put into my hands, I read it eighteen consecutive hours with an intense longing to retain the truth

Digitized by Google

contained in it. A few months later I had the privilege of class teaching, and was happy to know that I could put off the "old man" and enter into my rightful inheritance. I felt as if intoxicated with joy, and when I sat down to reason out this great happiness, the "still small voice" whispered, "This is the new wine which cannot be put into old bottles; this is the new cloth which cannot be mended into the old garment; this is the wine of the kingdom." For weeks I was so happy that I seemed to walk in a great light. This was over eleven years ago. I not only have found Christian Science a great healing power, but a great sustaining power, as I grew stronger and stronger each day, and would like to exclaim with the psalmist, "Let *everything that hath breath* praise the Lord."

Through the teaching of our revered Leader has come to me the only real happiness and joy that I have ever known, and I study all her writings day by day, that I may emulate the life contained therein, and each day I try to imbibe more and more of this healing truth, that I may be able to help others. I am trying daily to show my gratitude by my works. My heart goes out to God, who has led me into this glorious liberty with a great love which I have no words to express.

MRS. AMELIA BOWEN BATTELLE, Norfolk, Va.

I wish to express my gratitude for what God has done for me through Christian Science. In December, 1909, I was confined to my bed with a skin disease in its worst form. My body was covered with it, and the discharge was very bad indeed. I had almost lost the use of my left hand, and my head and neck were drawn to one side, which was very painful, as they remained in that position for some time. It took two persons to move me about, and it had to be done very carefully.

On Dec. 25 it seemed that I would pass on, as the disease apparently had resulted in blood-poisoning; but the power of Truth was proven in this crisis, and on Jan. 9 I attended church, as they were to take in new members on that day, among them my husband. At that time the ground was covered with a heavy snow and sleet, and had been for several days. I mention this to show how quickly God does His work when we trust Him. In the old thought I am sure I would not have gone to church under the same conditions; but my healing was complete, and today there is not a trace of the disease left.

I am truly grateful to God, and to our dear Leader for this healing truth.—MRS. ORIE HORNE, Memphis, Tenn.

This certifies that on the 24th of December, 1909, I was called upon to diagnose the case of Mrs. Orie Horne, of this city, whom I found confined to her bed with several ulcers upon her body. I diagnosed the case as chronic eczema. She had a Christian Science practitioner to treat the case, and I saw her at the Science church soon after and found that she was well. This disease from a medical standpoint is difficult to cure.

C. H. JONES, M.D., Memphis, Tenn.

[Written for the *Sentinel.*]

TRANSFIGURATION.

MARY L. CUMMINS.

To scale the height with thee, thou Christ divine,
To find my consciousness fresh filled with thine,
To learn of thee in lone communion sweet
And feel my thought go out Truth's thought to meet!
Oh, then, as from the mount my steps descend—
This mount of Love—I lift my eyes and see
The poor, the sick, the sinning, needing thee,
And stretch out hands to all humanity,
That to the Father's house their feet may wend.

FROM OUR EXCHANGES.

[Congregationalist and Christian World.]

Christians are giving more serious thought than ever to the task of making their essential unity more manifest to the world; but the denomination which expects to give up nothing will have little influential part in shaping the final outcome. To deplore divisions and at the same time take the ground that all the principles of faith and methods of administration which divide Christians are forever sacred and never to be changed in a single iota, is to play with the great and pressing question of Christian unity. In view of the fact that tenets particularly associated with certain bodies are looked upon as matters of indifference by the great majority of Christians throughout the world, it cannot be right for those bodies at the outset of the discussion to assume them to be inflexible. Beware of ultimatums not based on ultimate and unchanging truths.

All this is not said in the interests of flabbiness of faith. The world respects men, and bodies of men, churches, and nations with positive convictions; but it pays a man now and then to take fresh stock of his essential beliefs; to ask himself not only what they are, but in what spirit he holds them; to remember that men who differ from him may have consciences, too. Those who really want to bring about righteous reforms in church and state must sometimes, for the sake of great ends to be gained, yield the one point more. This is the method employed by those who govern their households wisely. This is what Jesus meant when he bade his disciples go the second mile. This is what Christianity, when thoroughly seated in the heart, asks men to do and helps men to do.

[Standard.]

It has been affirmed that people care less for religion than formerly because of an apparent lack of interest in attendance upon public worship. This conclusion cannot be legitimately drawn as universally characteristic of present-day life, for local conditions in many places disprove it, and the new emphasis the church is securing from religious and social movements among men argues against long continued or serious indifference. There are many indications at present which go to prove that vital religion has been finding deeper rootage and getting hold upon the conviction of thoughtful people to a greater degree than had been supposed. The religious need of mankind cannot be eradicated by varying opinions or currents of worldliness. If for a time there has been an apparent indifference toward the church or toward a pronounced spirituality, we may be sure that convictions of the need of deep and vital religious experiences have been gaining in strength and will find expression in new forms of devotion. Any lapse of religious life from the customary forms of expression in worship is bound to have a reversion and to seek more satisfactory and wholesome life.

[New York Observer.]

As one studies the social system today, the more bewildering seem to be its phenomena, and at the same time the more attractive appear to be its opportunities for exemplifying the "mind of the Master" in the doing of good one to another. In times of great disaster the nerves of public pity are at once touched—but what is needed is the cultivation of a habitual sympathy, a consistent and persistent benevolence, which will keep at work all the time in ministering in Christ's name to human need. Really, the "good Samaritan" can take no vacations, for as an agent of mercy his services are all the time required. But let us also hope and pray that the time may come when men shall not bruise and buffet one another any more, so rendering the offering of "first aid" or of any other aid, unnecessary.

[Pres. W. H. P. Faunce, D.D., LL.D., in *Watchman.*]

Christianity is not mere aspiration after self-improvement. It is not synonymous with ethical culture, and good reading, and gentle manners, and the cautious hope that if we all do our best things will some day be better than they are. Christianity is a mighty passion founded on a mighty —even an almighty possession. Christianity is not the mere declaration that the good man, if he is patient, will be ushered into golden streets after this life is over. It is not the declaration that "God's in His heaven" and so "all's right with the world." It is the faith, rather the experience, that God is in His world, setting hoary wrongs right, transforming guilty men into unselfish servants of the common good, and lighting up darkened and desolate lives with a divine companionship.

[Charles F. Dole, D.D., in *Christian Register.*]

We are told that the church exists for "the worship of God." What do we mean by worship? Not surely the posture, the ceremony, the saying of words. We mean a spirit of reverence, of brotherly sympathy, of renewed devotion, of aspiration, trust, and hope. If the highest name of God is Love, then we shall have worshiped when we are in tune with the motion of love. To meet with good will, to renew our good will, to part in good will, and then to carry back a constant good will to homes and shops and stores and into all human relations, is to worship God. Whatever forms or words help us to maintain the attitude of good will are worshipful forms and words. Whatever forms fail to renew good will in our hearts and to inspire our conduct are futile.

[*Christian Intelligencer.*]

The world at large is not waiting for the vision of a world-wide and visibly united Christian church. It is waiting to behold the various divisions of the Lord's army forgetting their differences even while maintaining their distinctions and uniting not their outward semblances but their real power in the conquest of the world for Christ. The essential basis of such a union is not conformity nor unity, but cooperation. And in such cooperation will be found the surest method, the shortest road to that real unity of heart and hand which Jesus prayed might be characteristic of his people and which, whenever experienced, will join them indissolubly to each other and to their common Head, the Lord Christ.

[Rev. Charles Stelzle in *Christian Work and Evangelist.*]

It should be recognized that the Bible is not a book of mere statements. It is a historical account of certain developments in the life of particular persons and nations, although it does contain doctrinal teaching. It also presents commands and promises which were given by inspired men of old. It should be remembered, however, that the moral and ethical standards of Abraham's time, for instance, would not, in some respects, satisfy God's demands in the twentieth century, with its greater advantages and opportunities.

[Joseph King in *British Congregationalist.*]

Moral and humanitarian influences are stronger today than they ever were in our land. This means that there is a less marked difference between life within the churches and life outside. It is easier to live a clean and even an inspired and devoted life without an ecclesiastical support of any kind.

[Rev. W. Arter Wright, D.D., in *Western Christian Advocate.*]

Tradition assumes that truth is static, or rather that the comprehension of truth is like a steel tank, unexpansible, and that any overflow is loss. Faith assumes that truth is germinal in every individual, and must come to its flower and fruit in his own consciousness, if it is not already dead.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan,* and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine.* These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphlets will be found listed on the opposite page, with prices for single copies and quantities.

The field will undoubtedly be gratified to learn that a book (132 pages with index) containing the "Excerpts from Editorial Comments" which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, also the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is now on sale, published in two styles of binding. For prices see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 687 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Leatherette covers, deckled edges. 15 pages. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 70 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

4.00— 0: 16 : 5 ;	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

The National Municipal League has established an annual prize of one hundred dollars, called the "William H. Baldwin prize," to be given to the author of the best essay on a subject connected with municipal government. For the year 1911-1912 the competition will be limited to undergraduate students registered in a regular course in any college or university of the United States offering distinct instruction in municipal government. The topic for next year's competition is "The Appointment of Higher Municipal Officers by the Merit System." This subject involves a discussion of (a) the reason for the employment of experts in city work, (b) the proper position and tenure of the expert in the service of a city, his relation to the executive on the one hand and the subordinate administrative force on the other, (c) the extent to which the merit system is applicable in the selection and retention of experts, (d) and a practical application of the conclusions reached by the competitor to some American city, showing the changes in organization and powers which would be required. The essays must not exceed ten thousand words.

"Statistical Record of the Progress of the United States, 1800-1911" is the title of a small document just issued by the bureau of statistics, department of commerce and labor. It pictures in statistical form conditions in the commercial, financial, industrial, and transportation systems of the United States at brief intervals since the year 1800, down to and in many instances including the year 1911. Among the interesting facts shown are that the area of continental United States was 843,255 square miles in 1800, advancing to 1,734,030 square miles in 1810, to 2,995,536 square miles in 1850, and 3,026,789 square miles in 1853, since which date no change in area is shown. The population, which was 5,333,000 in 1800, was 93,750,000 in 1911. Public debt, which was $83,000,000 in 1800, reached $2,675,000,000 less cash in the treasury in 1865, the figures of 1911 being $1,015,000,000. Exports of domestic merchandise which amounted to $32,000,000 in value in 1800, were over $2,000,000,000 in 1911, and imports, which amounted to $91,000,000 in 1800, were $1,500,000,000 in 1911.

Mr. Fisher, secretary of the interior, in addressing the closing session of the third national conservation convention of Kansas City, Mo., said that he urged the leasing of government owned coal lands, with particular reference to those in Alaska. "I have been in Alaska and British Columbia," he said. "I studied the leasing law in British Columbia. Why can't we have the same kind of law? It retains the land in the hands of the government; it affords a permanent return and prevents the exhaustion of the land in a few years, but most important of all, it prevents the hoarding of the land and the subsequent redevelopment by capitalists." As to the situation in government coal lands in the West, he said: "I have learned that there are lots of men who want to gain control of the coal lands and hold them. They don't want to give the public a chance, but want to hoard these lands so they will make money for their progeny a hundred years hence."

Charges that the alleged lumber trust completely dominates the lumber trade of at least twenty states by maintaining a spy system, black lists, divisions of territory, and other alleged illegal methods, conducted through a central agency in Chicago, called the lumber secretaries bureau of information, are made in an antitrust suit just filed in the United States court at Denver by the department of justice. This is the government's fourth action in a nation-wide prosecution of the lumber "trust," in addition to the criminal indictments already standing against the secretaries of fourteen lumbermen's associations. Antitrust suits under the Sherman law are now pending against the Michigan Retail Lumber Dealers' Association and the Eastern States Retail Lumber Dealers' Association.

By a vote of eight to one, the state supreme court of Oregon sustained the constitutionality of the workingmen's compensation act passed by the last Legislature which requires all employers whose workmen are engaged in hazardous occupations to contribute to a fund from which the state will disburse fixed payments. The court says the same principles are involved as were decided the other way by the New York court of appeals. The ninth judge dissents from the opinion solely on the fact that the suit was brought on a test case. He holds that so important a matter should not be so decided.

That the battleship Maine, which was sunk in the harbor of Havana, Feb. 15, 1898, was destroyed by an external explosion, there no longer seems any reason to doubt. The cofferdam about the wreck has been pumped out and the mud cleared away to a greater extent than ever before. The clearing away of the wreckage reveals the double bottom of the ship with part of the keel standing in a perpendicular position some twenty-eight feet higher than the natural position.

It is now admitted that there is to be a determined effort next winter by men in both political parties in Congress to have the party caucuses opened to the public and to the press, so that the country may know not only what political parties have decided to do, but the reasons back of the decisions.

G. R. Rodgers, one of the aviators who are competing for the fifty-thousand-dollar cross-continent prize, reached Ohio last week. James J. Ward, after covering, with varying mishaps, a total distance of three hundred and eleven miles, has withdrawn. Fowler, flying eastward from California, has finally been baffled by the Sierras and given up. Earl Ovington is planning soon to make a start westward.

The Tacoma Dredging Company will complete the largest tideflat fill ever undertaken on the Pacific coast by March 1, 1912. When finished, nearly one half of the residence portion of Aberdeen now on "stilts" will be filled, streets paved, and other improvements made. The work will cost nearly $1,000,000.

The group of five buildings planned for the Pasadena, Cal., Polytechnic High school will cost half a million dollars and will give the city one of the finest and most complete schools of its kind in America.

The United States owes China $72,474 as a result of the latter's overpayments to the Boxer indemnity fund. The excess amount will be sent back by Secretary of State Knox.

International.

A vigorous controversy has been proceeding in the Japanese press as to the policy which it is desirable that Japan should pursue in the future with regard to her armaments. There are three schools of controversialists. One takes the line that a strong navy alone is required. The second school contends that unless Japan is willing to reconcile herself to abandoning her enterprises in Manchuria, to giving up Korea, and adopting a policy of general shrinkage, her only truly wise course is to expand all her armaments. The line adopted by a third body of controversialists is to urge the wisdom of silence. To engage in public discussion on such points, say these, is to expose Japan's weakness.

The Italian government delivered an ultimatum to Turkey, demanding that the latter agree to an occupation of Tripoli. The ultimatum stated that unless Turkey replied before Thursday of last week the province would be occupied without further discussion. On that day, having received no satisfactory answer from Turkey, Italy carried her threat into execution and declared war. Italy charges Turkey with dilatory tactics and insincerity in righting grievances that extend back three or four years. Italy has large interests in Tripoli and would be glad to annex it as a colonizing field. Already the Italian population there exceeds that of the Turks. Tripoli is four times the size of Italy.

A new Canadian river, at least three hundred miles long, has just been discovered and reported to the government. It is the Black Crow river, a tributary of the Porcupine, and was thought to be only thirty miles long. Surveyors delineating the international boundary have succeeded in going three hundred miles up the stream in a gasoline launch. The "find" is considered important, in that it will shorten the work of the surveyors by a year, and will also materially shorten the Canadian water route to the Arctic ocean. The Porcupine is a tributary of the Yukon river.

The treasury estimates as brought before the Russian Duma recently show a reduction in the national debt of $37,500,000. It is stated that on Jan. 1, 1912, the national debt will amount to $4,730,000,000. Out of the estimated expenditure during 1912 $103,015,000 will be set aside for the payment of interest on the national debt, and $14,575,000 toward its extinction. Fifty million dollars is also to be set aside for the redemption of the imperial treasury bills.

The republic of Portugal has been officially recognized by the powers. The British *charge d'affaires* was the first formally to recognize the government, the other powers doing so in the following order: Germany, Spain, Italy, and Austria.

Industrial and Commercial.

Automobiles and parts thereof exported from the United States during 1911 will aggregate approximately twenty million dollars in value. The total value of automobiles and parts thereof exported in 1901, only a decade ago, was less than one million dollars. Canada is by far the largest market. Of the practically nine thousand machines exported in the seven months ending with July, 3,724 went to Canada, 1,875 to the United Kingdom, 938 to British Oceania (chiefly Australia and New Zealand), 477 to Asia and Oceania other than British, 444 to South America, 273 to France, 175 to West Indies and Bermuda, 147 to Mexico, 137 to Italy, and 73 to Germany. These figures do not include the shipments to non-contiguous territory of the United States, the number sent to Hawaii in the seven months in question being 202, to Porto Rico 154, and to Alaska two.

The American Artificial Silk Manufacturing Company, which was recently incorporated with a capital of two million dollars for the manufacture of artificial silk on a large scale, selected a site in Camden, N. J., for the location of its extensive plant. The field for this product is said to be rapidly growing. It is planned to employ about three hundred and fifty to four hundred hands at first, while the production of the plant will be at the beginning about ten thousand pounds per week.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE RELIGIOUS MAN.

CLARENCE W. CHADWICK.

RELIGION is independent of time, space, or locality. True religion is communion with God. It is the natural and normal outcropping of universal good in the lives of men. It is the sanity of every-day living. It is the inspiration of the supersensible dominating human thought and actions,—the word of God made practical in daily experience. It is the overcoming of all that does not bear the hall-mark of spirituality. It is the unceasing exemplification of man's sonship with God.

Christian Science is rapidly dissipating the common notion that religion unfits men for the practical furtherance of worth-while human affairs. It is strongly emphasizing the fact that it is the lack of religion which renders a man incapable of assuming his rightful place in society. A lack of religion is a lack of the true knowledge or understanding of God. The too common admission that one is not religiously inclined is only another way of confessing ignorance of God and of His Christ, and ignorance does not and cannot commune with God or manifest His nature. To experience religion is to do away with ignorance and to become attuned to the dominating power and affluence of God, infinite Mind, and this conscious legacy of spiritual wealth can alone vitalize and dignify religion. Without it one's religion will fall short of being religion.

There is but one real religion, the one that takes hold of God's right hand and brings into action His goodness, mercy, and power in the manner prescribed by Christ Jesus, healing the sick and uncovering and destroying the hidden things of darkness which have so long allured and deceived the children of men. One's religion is tested alone by what he does, not by what he professes. Blind faith is faith without doing, and is not religion. Religion makes one a doer of the word, and not a self-satisfied hearer. Man's religious nature is his true nature, and the going out of ignorance is the coming in or manifestation of this true nature. Whenever it is manifest, some God-given quality is brought into action, and some un-Christian, and therefore undesirable, mortal trait is extirpated. It therefore follows that the truly religious man is the only man who can be trusted to carry out the will of God,—to obey the golden rule and to love his neighbor unselfishly. Instead of stifling one's higher nature, religion can always be relied upon to appeal to the very best that is in humanity and to develop latent capacities of being that are ever ready to spring into action the moment self is silenced and God understood and adored.

The appeal of religion to human consciousness is a Soul appeal and not an appeal of sense. It is the appeal of Love and good will, not of hate or inhumanity. It is a loving invitation to "come up higher," to partake of the thoughts of God and to hand them forth to suffering humanity through "signs following," not through ritual, creed, or dogma. It is the herald of the ever-present Christ-idea which says to human consciousness, "Be still, and know that I am God," and the man who hears this call and begins to silence the clamorous and wilful demands of the personal senses, begins to assume the natural and normal stature of manhood in Christ Jesus. The "old man" of sinful sense is gradually put off, and the image and likeness of God begins to shine forth in a higher order of thinking and living. Religion is no longer considered narrow, mystical, or impractical. It is no longer a burden to be shouldered, but a loving privilege of appeal to an available God. It now means salvation, regeneration, redemption. It is no longer fragmentary, but complete. It is nothing short of the working-out process that every human being must undergo before reaching the heavenly or spiritually mental kingdom.

To the student of Christian Science, religion is first, last, and always. Why? Because it is found to be the sum and substance of human life and hope. What nobler ambition could he have than to glorify God in thought and deed? This he is earnestly striving to do; and from all classes of people, religious and irreligious, there comes the spontaneous acknowledgment that Christian Science has done for multitudes what the world could not do. Christian Science being strictly a religious movement, no one can partake of its activities without gaining a higher and more spiritual concept of religion. This influx of scientific thought at once removes all vain hopes of ever reaching the goal of perfection through blind faith or belief, or through the gateway of death, so called. Then comes the inspiration and determination to work out one's own salvation, to eschew evil and to love good with the whole heart. When this transformation takes place in Christian Science, the sick are healed and sinning mortals joyfully forsake the errors of their ways, mourners cease to mourn, and the poor listen gladly to the gospel of good. Here, then, is proof positive that religion heals, purifies, and in every way blesses and instructs mankind. No human being can live without it. If he believes that he can, he must sooner or later, here or somewhere, understand the significance of Jesus' words, "Without me ye can do nothing," and "No man cometh unto the Father, but by me."

The twentieth-century man will be known by his religion, and the more religious he is the better will he be qualified to cope with the world's great problems, and so be able to "render to Cæsar the things that are Cæsar's, and to God the things that are God's." He will be an all-around man, at all times "rightly dividing the word of truth," and "bringing into captivity" every erroneous thought, to the glory of God. He will be a man of Principle at all times. He will be the only right thinker. He will be religious because it is perfectly natural and lawful for him to be so. He will be an active, living manifestation of what God does for man here and now. He will be, as was the master Christian, in the world but not of it. Whatever his vocation, he will be found doing only those things that are acceptable to God. He will be found eliminating from the domain of business activity everything that worketh or maketh a lie. He will prove to the world the real meaning

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

of success by keeping his thought clean and pure, uncontaminated by dishonesty, selfishness, greed, or lust, but ever mindful of man's Godlikeness. He will value the sacredness and happiness of home above the price of rubies. No business or social function will cause him to forget his true manhood whether at home or abroad. His religion will be his only protection at all times and under all circumstances. It will never lead him into temptation nor make him a slave to any foolish habit; on the contrary, it will clothe him with that God-given dominion vouchsafed to him who ever seeks first to know and to do the will of God, which is the highway to heaven. The lives of consecrated Christian Scientists will prove to the world the practical nature of true religion and the paramount need of making it one's first concern in thought, word, and deed.

THE ISOLATED CHRISTIAN SCIENTIST.

W. H. JENKINS.

THE writer and family are the only students of Christian Science in a small village, and we seldom meet other Scientists, except when business calls us away from home and we can sometimes go to a Christian Science service or a lecture. When I first began to read the literature, in order to overcome sickness, I wanted to be with Christian Scientists, and took much pains, whenever there were opportunities, to observe and converse with them. I think my purpose was to investigate the teaching, and I wanted to see what those who professed it were getting out of it, how it was transforming their lives and bringing out health and Christian character.

Although I found some good friends who were willing to help me in the way of treatment, instruction, and advice, I learned that I made less progress when I depended on personalities to help me than when I went directly to the text-book and was willing to work alone for the understanding of its truths. In looking to the human lives of some Christian Scientists I found they had much yet to overcome. I think I had idealized Scientists to the extent that I thought that after studying Science and Health they could not have the imperfections which others have. I expected too much, and was sometimes disappointed. I am now working for another spirit, that of love and charity, the charity which sees less of a brother's faults and looks beyond personality to God's perfect child, the spirit that sees all men as brothers who are willing to help each other to walk in the footsteps of Christ Jesus and work out their own salvation with the help of the Bible and their text-book.

I have found that the isolated Christian Scientist especially must bear to some extent the same cross which was perhaps the most grievous to Christ Jesus, that of being misunderstood. He must live and work with those who are prejudiced against what they think is Christian Science, and he may make mistakes which tend to make his problem still harder. With his small understanding of Christian Science, he may try to explain it, or to argue some points with a prejudiced and perhaps a very material neighbor, with the result that he has done no good either to himself or neighbor, but rather has weakened his own position and has not convinced his neighbor. Some time he will know that he can better heal himself and others by quietly living and demonstrating in every-day life the understanding of the truth he is gaining, that this will be his most convincing argument of the truth of Christian Science.

The isolated Christian Scientist, especially in a country town or neighborhood, often feels that he is being closely watched by those who wish to know just how much Christian Science is helping him to work out his problems. He may feel, if temporary sickness or failure seems to come to him, that some one is judging Christian Science by his present experience, and for the very conscientious and sensitive this position is often a hard one and may hinder his demonstration, for it adds to self-consciousness, which may be what he most needs to overcome. It is far better for such a one to think less about his own life and spend more time in keeping his thought focused so that it reflects God, Truth and Love,—reflecting as a mirror the glory (or better, the character) of God; also in studying our Leader's words in Science and Health (pp. 300, 301) about reflection. He will see that his thought and work should be directed toward obedience to Principle, or Spirit, and that he should be less anxious about results, for results are God's work, not ours.

The isolated Christian Scientist should feel that it is a privilege and an honor to stand alone, if it need be, for the truth that is making him free, and that he may be preparing the way for a great work in due time. In every town or community there are the sick, the sinful, the heavy-laden, to whom the burden of human life seems too heavy for them to bear longer. These are in need of the healing and transforming truth, and some time they will be ready for the message of Christian Science. Then to them will come the realization of the prophet Isaiah's declaration, "How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace." The Christian Scientist who has faithfully done his quiet work, and is ready for the opportunity, when it comes to him, of healing and teaching, will have his reward for his patient waiting, in meekness and perhaps silence, during the time he was bearing his cross of being misunderstood.

When the sick are healed, and friends come to the same truth that he loves, the student of Christian Science will have the fellowship he longs for. The little band of Christian Scientists will be a still stronger power for good, and he may see how all is leading to the organization of a working society or church which will have the respect of the community, and in the realization of his hopes of enlarged opportunities for doing God's work, there will be great joy and satisfaction.

"THE SYSTEMS FALL."

EZRA W. PALMER.

SOME months ago it was my great privilege to visit our headquarters in Boston and, upon the invitation of one of the workers, to look over the publishing plant. As we went from one room to another, the writer noted the order, quiet, and freedom of each department; there was no hurry, no appearance of friction. The business relations of the various departments were carefully adjusted, and there was no waste of time or energy; unity of endeavor was everywhere apparent. The workers themselves, while busily at work, showed no indication of strain or pressure, such as too often is the case in the editing and printing of a great daily newspaper. There was plenty of air and light in each department, and the general tone of the whole plant was that of freshness, purity, and exalted purpose.

After the visit of inspection, a member of the party remarked, "The business system of the Publishing Society has been well worked out." To this the worker replied in substance as follows: "The system has been carefully planned, but we do not depend upon the system. We know that some of the greatest movements in history for the elevation of the race have failed because system was relied on, rather than divine Principle. We find it necessary to reflect more and more the divine Mind, and to demonstrate this more and more perfectly each day in our work in the Publishing Society. We read in Hebrews: 'For the law made nothing perfect, but the bringing in of a better hope did.' We strive to do our work more perfectly each day, according to the 'better hope,' and not fall into bondage to a finite system of daily routine."

The words of this earnest worker remained with me

Digitized by Google

after I had returned to my home, and with them came with renewed force and beauty these words of Whittier which appear in our hymnal:—

The letter fails, the systems fall,
And every symbol wanes:
The Spirit overbrooding all,
Eternal Love, remains.

Why cannot men work out a system of procedure which can be absolutely relied on to reach the ideal, to bring humanity into true relations with God? The right answer to this question necessitates an understanding of God, man, and the universe, and this Christian Science gives the sincere student. Since God is infinite Spirit, and all-knowing, all-powerful, and ever-present, and man is His reflection, it is evident that only as a spiritual being can man rightly understand God or the universe. Mortal man, therefore, cannot formulate aught that pertains to the infinite. As one grows in the knowledge of God and puts off material ways and means, he can more and more clearly approximate the divine ways. Systems, laws, and symbols, formulated by mortals, can embody only mortal concepts and beliefs, and therefore are limited in scope and must of necessity be more or less faulty in construction. As the student of Christian Science strives daily to grow in understanding of spiritual things, he finds that old modes of thought and action, which seemed sufficient for his needs when working from a material basis, are totally inadequate to sustain him in his progress to higher and holier states of being. He finds that he must readjust his former thought-processes, correct erroneous and limited conceptions, and "replace them with the life which is spiritual, not material" (Science and Health, p. 428).

The necessity of replacing imperfect modes of thinking with better and more spiritual modes, and of rising daily into clearer and fresher consciousness of being, is apparent to all who have striven to reflect the Mind of Christ. It was this insight into the real nature of the universe which moved Paul to exclaim: "Therefore if any man be in Christ, he is a new creature: old things are passed away; behold, all things are become new." When the time arrives for the student to take a wider and freer range of thought, old habits of thinking and doing must be cast out to make room for the new, for far more spiritual and scientific methods, for unless this is done the old system will confuse the student, and even be a positive hindrance to his advancement. The apostle Peter bids us "grow in grace, and in the knowledge of our Lord and Saviour Jesus Christ," and to do this the student must be prepared to abandon any system of thought, plan of action, or mortal belief, reliance on which would retard his progress or confuse his vision.

Sometimes the workers in a Christian Science church, after overcoming outward opposition to their progress, after having through toil and self-sacrifice established a church on the basis of government by the divine Mind, having completed a church home and paid for it, with a large membership and a still larger congregation, have after all this allowed the subtle suggestion to creep into their midst that now the need for watchfulness, self-sacrifice, and earnest striving can in large measure be abated. What is the result? Stagnation, apathy, discord, limitation, dwindling attendance at services both of members and congregation! Then the workers are led to arouse themselves to see that no outward form of worship, no human system, can take the place of individual demonstration of the power of Spirit to heal and save mankind. They begin anew to "rise in the strength of Spirit" (*Ibid.*, p. 393), thus proving again their birthright of unity with God, and with the result that not only are the needs of the local church met and prosperity and harmony renewed, but the victories attained inspire and cheer all the workers throughout the world who are watching and striving for the coming of God's kingdom on earth.

"Work—work—work—watch and pray" (Messages to The Mother Church, p. 20), is the admonition of our beloved Leader, and this work consists in large measure of freeing ourselves from reliance on material systems and mortal modes of action.

"AM I MY BROTHER'S KEEPER?"

DAISY BEDFORD.

ONE of the most striking and helpful narratives of the Old Testament is that of Cain and Abel. In Science and Health (p. 540), Mrs. Eddy describes Cain as "the type of mortal and material man, conceived in sin . . . Material in origin and sense, he brings a material offering to God." In the Glossary (*Ibid.*, p. 579) we read that Abel typifies "watchfulness; self-offering." We can thus clearly see why Abel's offering was accepted, Cain's refused. Cain was wroth that his brother's gift was accepted, not recognizing that what God demands of each one of us with our gift, is the surrender of self-will, the willingness to lay our all upon the altar of Love; as the prophet Isaiah says, "Not doing thine own ways, nor finding thine own pleasure, nor speaking thine own words: then shalt thou delight thyself in the Lord."

Truth lovingly uncovered to Cain the reason his gift was not accepted—"If thou doest well"—and we are left to draw our own conclusions from the fact that his gift was refused; for "the sacrifice of the wicked is abomination: how much more, when he bringeth it with a wicked mind?" Cain's state of mind was shown in the murder of his brother. Jealousy and pride is not the spirit in which to offer unto the Lord. It had been pointed out to Cain that, had he done well, the same reward would have been his portion as his brother had received; but, as is so often the case, instead of heeding the rebuke and endeavoring to cast out envious and resentful thoughts, he indulged them, until it was only one step from bitter wrath to the murder of his brother, thus sweeping out of his path that which would have led him into the ways of peace and holiness.

Each of us, like Cain and Abel, desires to offer of his "firstfruits" unto the Lord. The worth of that offering, the blessing which will reward the giver, will be according to the selflessness of the gift. How often, when presenting it, are we tempted to be envious of our brother,—his larger understanding, his better work, the spiritual gifts of love, goodness, meekness, gentleness, which he expresses, the clear thought which enables him to preach the gospel with "signs following." If we would only pause right here, and see how we might correct our work and learn how to pattern it after his higher ideal, then all would be well and the time would probably come when in the stress of difficulties or trouble he would turn to us for inspiration, for the loving help which points away from self upward to God and bids the struggling heart be of good cheer. If, instead of doing this, we succumb to the temptation to judge and condemn our brother, Jesus' denunciation of the scribes and Pharisees will fall to our lot: "Woe unto you . . . for ye lade men with burdens grievous to be borne, . . . ye entered not in yourselves, and them that were entering in ye hindered."

Never in the history of mankind has there been such a strong desire for the realization of universal brotherhood, and it can only be realized in the measure that we each do our part in reflecting "the sweet amenities of Love, . . . in true brotherliness" (Church Manual, p. 40); as we strive to build each other up in the understanding of man's true being. Let us resolve to check the harsh criticism, fault-finding, and condemnation which rise to our lips, and let the "firstfruits" of a pure love for our fellow man be the holy and acceptable offering unto God. Let us pray, and desire earnestly, the tender compassion of our Master, who broke not the bruised reed nor quenched the dimly

Digitized by Google

burning flax. It may be we criticize those who are younger than we are in the study of Christian Science because they have perceived and voiced a clear statement of the truth, and we may even deem it presumptuous, forgetting that "out of the mouth of babes," the receptive thought, Truth perfects praise.

The only time is expressed in the unfoldment of good. There may be much to be got rid of in our consciousness which is not the unfoldment of good, and our growth in the understanding and demonstration of Christian Science may have been slow in consequence, but this should only cause us to rejoice the more in our brother's steady progress, because we know his light is shining in places where our feebler light cannot reach. If we would receive the blessing of our Father, we must as earnestly long for and desire our brother's good as our own, for by this right desire we can help him to tread more firmly in the path which leads upward all the way. This thought is beautifully expressed in one of our hymns:—

Then, brother man, fold to thy heart thy brother!
For where love dwells, the peace of God is there:
To worship rightly is to love each other,
Each smile a hymn, each kindly deed a prayer.

"AND A LITTLE CHILD SHALL LEAD THEM."

MARY E. BARBOUR.

PERHAPS in the experience of every Christian Scientist the truth of the above Scripture has been seen. Jesus loved little children, and set them as an example for us, even saying we could not enter the kingdom of heaven except we became like them, thus making it clear that the quality of thought requisite for the attainment of harmony is that of the little child.

What is so fearless, so trustful, so loving, so hopeful as a little child! It is the experience of the present writer to have been at times almost awed, and certainly humbled, by the utterances of these lambs of the flock. A little girl of eight years once asked her mother who made the multiplication table. On being told that it always was, because it was true: in fact, that God made it, she was perfectly satisfied. This same little girl was reproached for her faith in Christian Science by a worldly-wise relative, who said to her, "You are taught that God is All. Now that is not true, for God is not that tree." Instantly the child replied, "No, God is not that tree, but God is the life of that tree."

The following incident may interest the big children as well as the little ones. A little girl of three years sat in her grandmother's room, busy with her play. Presently, putting her hand to her neck, she exclaimed, "O grandma, my neck hurts!" Her grandmother bade her tell the hurt to go away: that it did not belong to her. The little one did so, and after a moment's waiting said, "But it doesn't go, grandma." "Then," said the grandmother, "we will say the Shepherd Hymn." So the first verse of Mrs. Eddy's beautiful hymn was repeated, then a second and third time at the child's request. Then she said, "Now it is all gone, grandma," and immediately asked for more of the same hymn. So the first half of the second verse was repeated, and for a few minutes nothing was said. The child had not changed her position on the floor, busy with her cutting, and the grandmother had not stopped her work; but presently the child said, "I'm not him."

"Not him," said the grandmother, "what do you mean?" Again the child repeated, "I'm not him." "Do you mean the 'stubborn will,' the 'callous breast,' 'stupid rest'?" "Yes," said the child. "I am a nice girl, I am God's child." This little child had been taught that God is Love: that God is everywhere; and that she was God's child when she was a good girl. One day she was asked, "And where is God's child?" The answer came quickly, "Everywhere." "And who is God's child," was asked her, and again she replied, "Everybody." Well may we echo the Master's prayer: "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes."

A PROBLEM AND ITS SOLUTION.

WILLIAM LLOYD.

I WAS very tired of church work. For weeks thoughts such as these had been forcing themselves upon me: "For so many years you have done so and so: you have earned a rest: it is some one else's duty to take his turn, etc." So I made up my mind to refuse office in the church the coming year. Still I was not satisfied, nor did I feel comfortable, or certain that I was doing right. Hence I kept on thinking over the matter, and gradually this line of thought evolved itself: "Since you accepted and have tried to walk in Christian Science, have you been practically free of anxiety for the future?" "Yes." "Why?" "Because I have learned that God is the source of all supply, and that if I go on from day to day, doing the best I know how, in whatever line of duty I find presented to me, then all my needs are met, for my storehouse, divine Love, is inexhaustible." "Well, then, does not that carry with it, as a necessary corollary, man's daily service?"

This question came almost as a shock, and as I thought it over, others came crowding in: "Can you accumulate service?" "What about last year's work, or that of the year before, or yesterday's?" "Was it more than sufficient for the moment?" "Did it not just serve for the day, and scant at that?" "Today's supply you expect from God: today's work you must give to God."

So I saw that we stand or fall from day to day. Then the full meaning of the thought, "I have done enough, I have earned a rest," dawned on me. It means, plainly put, just this: "I, a mortal man, have succeeded in putting the infinite in debt to me: now I can sit down and wait until God catches up." So, very gratefully I found the solution of my problem, and resumed my allotted task, thankful and willing to be of some service to our cause.

[Written for the *Sentinel*.]

ANGELS OF THOUGHT.

LILLIAN BARKER REEDE.

ANGELS of thought in their heavenward flight
Bore on their pinions this prayer one night,
Woven with love in the silent loom,
Fragrant with faith through the seeming gloom:
I thank Thee, Lord, for knowing,
For courage to declare,
Though all to sense is darkness,
The light of Truth is there.

Angels of thought, as the weeks go by,
Strengthen their wings as they sweep the sky,
Over the mountain of mortal fears,
Till through the shadow the light appears;
I thank Thee, Lord, for patience,
That trusted all to Thee,
For now by demonstration
The Christ, Truth, comes to me.

Angels of thought on their glad wings bear
Tenderly upward a silent prayer,
Waking a dreamer from pain and sin,
Letting the glory of God shine in:
I thank Thee, Lord, 'tis given
To me the truth to know:
O let me be the channel
Through which Thy blessings flow!

[Charles W. J. Tennant in *Eskdale and Liddesdale* (Scot.) *Advertiser.*]

Christian Scientists are in no way offended with our critic when he says "doctors of all kinds—surgical and medical—are coworkers with God." What concerns them infinitely more are the questions, "Was Jesus a coworker with God? and if so, did his method of healing differ from *materia medica?*" "Did he heal by material or spiritual means?" The answers to these questions can be found in the Bible. In John v, 19, we read, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise." From this we gather that Jesus healed the sick by a method which conformed to the will of God. Again, in John xiv, 12, we read, "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do." Is it unreasonable to think that the Master expected these works to be done by the same method he employed? According to Gibbon in his "History of the Decline and Fall of the Roman Empire," the early Christians healed the sick and raised the dead by spiritual means alone, for some two hundred and twenty-five years after Jesus left this earth.

In the Old Testament we have records of Elijah and Elisha multiplying meal and oil and raising the dead. Does our reverend critic not see the same divine Principle underlying these works as underlay the works of Jesus, his disciples, and the early Christians? The Bible teaches that God is 'the same yesterday, and to day, and for ever." His power, therefore, can heal the sick in any age, and is available to man just in proportion to his possession of that Mind in him "which was also in Christ Jesus." Our critic says, "Christian Scientists err in two ways in setting up their theory and practice. They represent matter as an illusion, evil as an illusion, and pain as an illusion. That is a caricature of idealism. It is comedy to the schools, but tragedy in the sick-room." Now let us go back to the scene of a sick-room in Palestine, which terminated in the death of a certain ruler's daughter, as related in Matthew ix, 23-25: "And when Jesus came into the ruler's house, and saw the minstrels and the people making a noise, he said unto them, Give place: for the maid is not dead, but sleepeth. And they laughed him to scorn. But when the people were put forth, he went in, and took her by the hand, and the maid arose." Now I ask which was the tragedy in the sick-room, the material thought of the people which laughed Jesus to scorn, or the spiritual understanding of Jesus which raised the dead?

Let our critic study and practise the idealism of Jesus as revealed in "Science and Health with Key to the Scriptures" by Mrs. Eddy, and it will give him a clearer understanding of how to "love God supremely," and his neighbor as himself.

[From *Los Angeles* (Cal.) *Express.*]

The Christian Science Publishing Society has issued a neatly bound volume, containing editorial comments on the life and work of Mary Baker Eddy. These reviews come from every portion of the United States, Canada, Mexico, England, Porto Rico, and even far-off China. They are principally from the secular press. Almost without exception the writers concede that the Founder of Christian Science was a remarkable woman and that she wrought a wonderful work, and that the world is better and happier because of her.

It is significant that practically all of these tributes are penned by men who profess to have little or no personal knowledge of the teachings of this religion, but this does not prevent them from classing Mrs. Eddy as one of the world's greatest women.

[William J. Bonnin in *Rochdale* (Eng.) *Observer.*]

It is just as well to remember that the spread of Christian Science from the day, some forty years ago, when there was one Christian Scientist in the world, a delicate and lonely woman without material resources of any kind in an obscure American village, to this day, when it is able to count its hundreds of churches and its hundreds of thousands of adherents in all parts of the world, is a thing unparalleled in history. Is it possible for such a movement to be based on "unmitigated bosh"? Is it not just possible that these thousands who rise up and bless Christian Science for what it has done for them may have after all seen something in it that has escaped the critics?

Of course, that is just what they have done. They have seen and experienced its saving power. They have watched it prove Christianity to be a living power, available now and here. They have demonstrated it. From all parts of the world come reports of the healing of organic diseases of the severest types. Christian Science is Christian idealism, and wherein it differs from philosophic idealism may be said to lie in the true meaning of "Christian." One evidence of that difference is seen in the practical nature of its idealism, which is not a thing of theory and conjecture, but a system to be practised and proved. After all, one is driven to base all being or knowledge on either a materialistic or an idealistic foundation, or else on a sort of mixture of both, the ordinary dualism of the day. This dualism, with its unending problems and perplexities and contradictions, its mysteries of sin and evil and pain, and its consequent conflict of creeds and religions and civilizations, is, in the light of Christian Science, but the attempt to serve two masters, God and mammon. The invitation of Christian Science is to serve God alone.

[Edward W. Dickey in *Fullerton* (Cal.) *Tribune.*]

The Bible teaches that the same fountain sendeth not forth "sweet water and bitter," and this is good logic. That Christian Science has done good for countless thousands is an incontestable fact. These benefits are the most comprehensive known since the days of primitive Christianity, and are physical, moral, and spiritual. It must follow, therefore, that if Christian Science brings forth these good fruits, it cannot be used to bring forth any other kind of fruit. Any attempt to do so, or to encourage the so-called power of human will, is a perversion of Christian Science, and the polar opposite of its cause and effect. No matter what you call it,—evil thoughts, animal magnetism, or what not,—any endeavor to work ill to one's brother is nothing more or less than a phase of hypnotism. Any endeavor to influence any person without his knowledge and consent is in the same category.

Christian Science and hypnotism are opposites, and Christian Science stands as a law of annihilation to hidden evil works. It goes below the mere surface of things and destroys everything that "worketh abomination, or maketh a lie." The world in general is coming to recognize the good fruits of Christian Science, and to appreciate the fact that not since the days of the Master has there come to this world, either by way of philosophy or religion, that which so fully and concisely works for the destruction of all evil as does Christian Science.

[E. M. Ramsay in *Aberdeen* (Scot.) *Gazette.*]

Christian Science is, as its name implies, that scientific understanding of God and His relationship to man and the universe, called by St. Paul the "knowledge of God." That Christianity has not usually been regarded as a science capable of practical demonstration has arisen from the neglect of the commands of Christ Jesus. He gave his followers a simple test by which they might prove to their

Digitized by Google

own satisfaction, and to the satisfaction of others, that they possessed a clear scientific understanding of his teachings: "These signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." When in the course of centuries those who called themselves Christians no longer found themselves able to heal the sick by their faith, *i.e.*, their perception of the true laws of being, they should have seen that they were no longer adhering strictly to the Science of Christianity. Instead of reviewing carefully their own position, they excused their lack of power by asserting that the times had changed, that God's ways of dealing with men were no longer the same, that our Saviour had possessed supernatural powers, and that it would be presumption in ordinary mortals to think they could do the works which he and his disciples had done; and yet what could be simpler than his own words on this subject, namely, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

Thus it comes about that our Lord's sayings are regarded rather as poetical utterances or moral aphorisms, than, as what they are in fact, plain statements of scientific truth; thus it is that those with whom logical sense is more developed than spiritual intuition, have been led to reject the gospel narrative as a mere compilation of myth and legend. Christian Scientists are making a humble and sincere effort to carry out all the commands of Christ Jesus; they have been greatly encouraged by the success which has attended their efforts, and they look forward to far grander results in the future, when they have grown farther into "the measure of the stature of the fulness of Christ."

[Frank W. Elliott in *Los Angeles* (Cal.) *Tribune.*]

You are to be complimented for your liberal, free-minded stand taken in your editorial on Senator Works' speech. I am not a Christian Scientist, but I must say Christian Science has done more in the past decade to make people think for themselves therapeutically than any other system. Every man has a right to his doctor. The "joker" in the Owens bill is not laid bare to the public. Let the doctor stand on his merits! Let him cure his patients and Christian Science, osteopathy, chiropractics, and all the other "irregularities" will have been put out of business without trust legislation.

[C. R. Munro in *Port Hope* (Ont.) *Times.*]

Christian Science does not teach that mortal man has no body, as our critic seems to think it does, but rather that the material body which decays and dies is not the real man which the Bible says is made in God's likeness. God being Spirit, His image and His likeness must be spiritual. Neither does Christian Science teach that the material body is immortal, but rather does it agree with St. Paul when he says: "The things which are seen are temporal; but the things which are not seen are eternal;" also the statement, "They that are in the flesh cannot please God," is clear evidence that the fleshly or mortal man is not the real man made in God's likeness.

Christian Science does not teach that sin and disease are imaginary, nor that there is no sin and disease to be overcome in our mortal experience. Mrs. Eddy says in "Science and Health with Key to the Scriptures," the text-book of Christian Science: "If at present satisfied with wrong-doing, we must learn to loathe it," and again, "Remember that mankind must sooner or later, either by suffering or by Science, be convinced of the error that is to be overcome" (p. 240). One of the tenets of Christian Science, as given in its text-book, is as follows: "We acknowledge God's forgiveness of sin in the destruction of sin and the spiritual understanding that casts out evil as unreal. But the belief in sin is punished so long as the belief lasts" (*Ibid.*, p. 497). Christian Science teaches that both sin and disease are no part of the perfect creation of God which He pronounced good; hence, not being God-created, they are not eternal, not real, as the term is understood in Christian Science.

Christian Scientists will fully endorse our critic's statement that Christ's religion is "a religion for the salvation of the body as well as the soul." In fact, Christian Scientists have been criticized many times for insisting on this very thing, viz., that Jesus' teachings are applicable to all conditions of life, and that God's power is able to save from sickness as well as sin. But Christian Scientists go farther than merely believing in God's power; they actually trust God for all things, for salvation from bodily pain and disease as well as from sin. Until we do this we are not truly, in the fullest sense, Christian. Many are willing to trust in God to save them from sin, but when troubled with physical sickness they trust more to an inanimate drug than to omnipotent Spirit. But this was not Jesus' way, and Christian Scientists are trying to the best of their ability to follow absolutely as he taught.

Jesus said, "He that believeth on me, the works that I do shall he do also." He sternly rebuked those who claimed to follow him and yet did not obey his commands, when he said, "Why call ye me, Lord, Lord, and do not the things which I say?" Jesus made the healing of sickness and sin, of all that is unlike God, the test of a man's Christianity, and the measure in which we obey his words and follow his example in our daily life is the truest indication of whether we are truly following him and whether we are correctly interpreting his teaching. The good works being done by Christian Science all over the world are the best proof which can be given that its adherents are striving earnestly to fulfil the command of our Master, "If ye love me, keep my commandments."

[M. I. Whitcroft in *Cheltenham* (Gloucestershire, Eng.) *Chronicle.*]

Christian Science is certainly "founded upon a truth," for its only foundation is the Bible and the teachings of Jesus and his apostles, which were absolutely scientific in that they were demonstrable. Jesus never relied on drugs or human aid to heal the sick, nor did he teach his followers to do so; but his acts of healing were the outcome of his perfect and scientific (exact) knowledge of God as omnipotent, omnipresent Life and Love, the creator of all good, and of man as made in His image and likeness.

Christian Science does not deny that sin, sickness, and death seem real to the physical senses, but it does deny that God is their author, that they exist in the divine consciousness, or are part of the divine law; and that, therefore, they are not real to God. Knowing the unreality of all that is opposed to God, Jesus spoke of the devil (the personification of evil) as "a liar, and the father of it." He said, "I am not come to destroy, but to fulfil," and proved this by healing sickness and sin and raising the dead, thus acting in accordance with the law of God—not in direct opposition to it, as would have been the case had this "triad of errors" (Science and Health, p. 122) been the law of God. Jesus also said, "He that believeth on me, the works that I do shall he do also;" and Christian Scientists are daily proving this by healing sickness and sin, and so obeying Jesus' commands to "heal the sick" as well as to "preach the gospel." If our reverend critic does not feel he can carry out these commands, his failure to realize the full responsibilities of his calling should not lead him to malign those who are humbly and obediently endeavoring to do so.

Mrs. Eddy says: "A sinner can receive no encouragement from the fact that Science demonstrates the unreality of evil, for the sinner would make a reality of sin. . . . Only those, who repent of sin and forsake the unreal, can fully understand the unreality of evil" (*Ibid.*, p. 339). If our critic will read that passage carefully he will see that Chris-

Digitized by Google

tian Science offers no safety-valve for wrong-doing. It is certainly surprising to read that Christian Scientists call God "a principle" and not "a person." This information is not to be found in Science and Health, but God is spoken of in that book as "Principle" (not "a principle), and if our critic will then turn to the dictionary meaning of the word "principle" he will find it to mean "fundamental truth, cause, or origin;" and I suppose he does not deny that God is the truth, cause, and origin of all good.

That God is not a person in the ordinary accepted sense of the word "person" as applied to a human being, but that He is infinite personality, is taught in Christian Science. To this infinite personality, God, ever-present Love, the Christian Scientist directs his prayer, knowing that "what *things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them.*" When Christian Scientists cease to heal the sick through prayer, then will be the time to find fault with their idea of prayer.

When our critic says that Christian Science means "the forsaking of your senses," he has at last quite accidentally stated something that is true. The Christian Scientist, knowing that "to be carnally minded is death; but to be spiritually minded is life and peace," earnestly strives to rise above the carnal or physical senses and to abide in the consciousness of Spirit. The healing of all manner of sin and disease through a right understanding of Christian Science is testified to throughout the world by thousands of grateful people; and if, as our critic evidently fears, it should, as he says, become universal, and so be the means of enabling children's hospitals and medical methods to be set aside, it will indeed be a cause for universal rejoicing. It will mean that Jesus' teachings are at last understood and realized in their full spiritual meaning, and that the kingdom of heaven, perfect harmony, is come on earth.

Mrs. Eddy was a woman of high intellectual attainments and is universally acknowledged, even by those who are not at present in agreement with her teachings, to be one of the most spiritually-minded women the world has ever seen. Her works survive her as proof, and they will endure. The Christian Science church is the outcome of her life-work, and being founded upon truth will endure for all time.

[*Girls' Own Paper and Woman's Magazine*, London.]

It is no longer well-bred to talk about ill health. It is true that we are still hindered with relics of the days when one's health and ills were the most interesting topic of conversation. We still perfunctorily ask, "How do you do?" But we have only pity for the person who answers that question in detail if she is not well. The woman who habitually pours out upon the unwilling ears of her friends the disagreeable tale of her headaches, her backaches, her worries, or other ills: the woman whose greatest satisfaction seems to be to tell, in gruesome detail, every step of an operation either upon herself or some one else—these women are slowly but surely being isolated by the bar of social exclusion, and either ignored or avoided. We know for a certainty now that the psychic contagion which one person can spread by suggestions with reference to disease is as real as the contagion from measles, or mumps, or scarlet fever. Modern society has recognized this psychic contagion, and is demanding that our conversation shall be clean and wholesome on subjects of health. To talk otherwise has become a sign of ill breeding. This is an epoch-making change in the character of human conversation, and it has occurred within the memory of many of us.

[R. Stanhope Easterday in *Indianapolis* (Ind.) *Star.*]

The first of the religious tenets of Christian Science is in these words: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497). Readings from the Scriptures comprise the principal part of the Christian Science religious services. Christian Scientists are daily readers and students of the Bible, using the King James version, and the critic's assertion that Christian Scientists confine themselves to "detached portions" of the Scriptures, and that these are given irregular settings and interpretations, is in a sense amusing, and indicates, at least, that the speaker was not altogether familiar with his subject. Christian Scientists are characterized the world over as earnest Bible students.

The matter of "direct revelation," as the term is used by the gentleman in connection with Christian Science, can safely be left to the good judgment of those of our readers who care to investigate. Jesus' argument in this connection was in the significant words, "By their fruits ye shall know them." He urged, "The works that I do in my Father's name, they bear witness of me." Christian Science is today healing the sick and reforming the sinner in direct compliance with our Lord's mandate, "Heal the sick," and his further promise, "These signs shall follow them that believe." When Christian Science thus heals the sick, it justifies its claim to be true "religion," and, being the religion taught by our Master, it must needs heal. It should be recalled in this connection that "every good gift and every perfect gift is from above, and cometh down from the Father of lights."

Our Lord healed by his theology, and his was not material theology, for he declared, "The words that I speak unto you, they are spirit, and they are life." In addition to this he said, "The flesh profiteth nothing." That which thus conduces to life precludes the possibility of disease, and must necessarily, therefore, conduce to healing in the truest sense of the term. One recalls, too, that the apostle Paul urged in connection with his teaching, "Now is the accepted time; behold, now is the day of salvation." Christian Scientists are but honestly trying to approximate such ideals of perfection by a daily, hourly struggle to know God, "whom to know aright is Life eternal" (Science and Health, Pref., p. vii), and by a reasonable attempt at that consecration of thought and endeavor which should characterize true followers of the Nazarene in all ages.

Mrs. Mary Baker Eddy, the Discoverer and Founder of Christian Science, far from essaying anything new in the realm of theology or medicine, has but humbly interpreted in her book, "Science and Health with Key to the Scriptures," the words and works of Jesus in a manner that has already resulted in the healing of practically every known disease and the regeneration of many from lower to high and holy ideals of living. Our critic, on the other hand, evidently doubts even the possibility of attaining such ideals, and is therefore hardly justified in essaying judgment upon those who seem to have made some progress along such lines of gratifying endeavor.

IMPORTANT NOTICE.

Beginning with September, the post office department, as a measure of economy, is shipping all magazines to central distributing points by fast freight, instead of by the regular fast mail trains. Although this change necessitates sending the *Journal*, *Herold*, and *Quarterly* to press two weeks earlier than heretofore, the Publishing Society, in line with other publishing houses, is cheerfully cooperating to make the plan a success.

We are confident our subscribers will be patient with any temporary delay that may be occasioned by the inauguration of this change, and would ask that special care be taken by the reading-rooms and distribution committees to send in orders sufficiently in advance to allow for the longer time required for transit. Orders for the *Quarterly* should reach us from two to four weeks earlier than heretofore. *Journal* and *Herold* orders should reach us not later than the fifth of the preceding month.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

TEACHING IN THE SUNDAY SCHOOL.

It is a fair inference, to judge from the many letters received at headquarters which request information as to the right way to carry on the work of the Sunday school, that the subject is one of great interest, and that there is not only an intention upon the part of those who are most intimately connected with and responsible for the conduct of this work for the good of the children who are attending these schools in the branch churches, to put into it their best efforts, but a general desire that these efforts shall be rightly directed.

Our Leader has made careful provision for the welfare of these lambs of the flock, and as fundamental authority on this subject of teaching the children we have the organic law of the church as contained in Article XX of the Church Manual (p. 62 of the present edition). It seems very clear, from a careful study of this by-law, that it was intended to define therein fully and specifically the scope of the subjects to be taught the children. In fact, it is couched in such definite language that there can be no question or difference of opinion as to just what our Leader considered fundamentally essential in teaching them Christian Science.

It is important to note, however, that the by-law does not say the teaching shall be confined to the mere letter of the commandments and the other subjects named. In a letter by Mrs. Eddy's secretary and which had her approval (*Sentinel*, March 3, 1906), it is stated that "it was not her [Mrs. Eddy's] intention to limit Sunday school instruction to the routine of memorizing the letter of the designated portions of the Scriptures," but that "the children should be taught the *meaning* of the Ten Commandments," etc. From what view-point this teaching shall be given is plainly stated in the closing sentence of Section 3 of the by-law above referred to; viz., "The instruction given by the children's teachers must not deviate from the absolute Christian Science contained in their text-book." This seems to make it quite clear that it was our Leader's intention that the instruction given the children should be along the line of the spiritual meaning and import of the Scriptures, rather than upon the basis of the material history of a race of people or a nation.

It will also be noted that in the by-law from which we have just quoted there is no provision made for the use of other books in the Sunday school than the Bible and Science and Health. In the Sunday school of The Mother Church effort is constantly directed to the observance of both the spirit and the letter of this by-law; that is, teaching is confined strictly to the subjects outlined, and from the spiritual view-point. No time is given to the study of the Bible from the historical standpoint, or to so-called Bible stories as "helps" to the elucidation of the Scriptures and Science and Health. The one object in view is to teach the children both the letter and the meaning of the "first lessons," namely, "the Ten Commandments, the Lord's Prayer, and its Spiritual Interpretation by Mary Baker Eddy, Sermon on the Mount;" and after these "the next lessons," which are to "consist of such questions and answers as are adapted to a juvenile class," and based upon the Lesson-Sermons which are read in the church service.

There is no provision made for the "entertainment" of the children, and it is safe to assume that our Leader had nothing of the kind in view when the by-law was made. That which she did consider necessary, however, and was careful to say, was that "they shall be instructed according to their understanding or ability to grasp the simpler meanings of the divine Principle that they are taught;" but it is worthy of note that she has said much the same thing about adults (Science and Health, p. 396, line 22; and p. 414, line 15). Nowhere does she say that Christian Science is to be diluted in order to bring it down to the comprehension of the beginner. On the contrary, she insists that it shall be given out only in its purity, and this necessarily applies to teaching in the Sunday school as well as to the work of practitioners with patients.

To sum it all up, then, the solution of the problems of the Sunday school officers and teachers will be found in a careful and prayerful study of Article XX of the Manual; and strict adherence to its provisions, both in the letter and in the spirit, will go far toward safeguarding the children of this and succeeding generations, which is its intent.

ARCHIBALD MCLELLAN.

THE ONE PRESSING NEED

Few would question that the safety and welfare of the communal life is determined by the ethical status of the people, the reverence shown for a moral order. Remove respect for truth and right, and in so far men are subject to the passions and impulses which make for anarchy and peril. The recognition of this fact is likely to beget a sense of solicitude in the minds of the thoughtful, in view of the further fact that so large a proportion of the people (three fourths, according to one eminent authority) do not attend any church and are not ethically impressed or dominated by the existing Christian order. A part of this majority are moved more or less by fear, a superstitious sense of the divine government, but they are ignorant of the Bible and without spiritual aspiration, and while the desire to preach the gospel "to the poor" is still impelling to much heroic effort, the results are so relatively meager that the skeptical have felt free to speak of Christianity as a failure, and to discuss other ways of solving the human problem.

This condition is deeply impressing not only Christian believers, but humanitarians of every shade of thought. It relates itself so immediately to future human welfare and to the stability of representative government, that men are startled when they think of its possible sequences. Especially are Christian ministers in all Christian lands inquiring why the common people, who once heard the gospel so gladly as to crowd upon the footsteps of the Master and his disciples, can hardly be induced today to listen to its proclamation. The coming of Christian Science at a time in religious history when Christian workers were thus losing their confidence of success, if not their courage of endeavor, has proved to be a no less momentous than interesting event, and in the presence of the unquestioned facts to which reference has been made, it well becomes all Christian Scientists to inquire on what grounds they can expect to gain and hold the attention of this vast body of indifferents.

Christian Scientists cannot appeal to either fear or superstition, since, as Mrs. Eddy has said, "superstition and understanding can never combine." "We should master fear instead of cultivating it" (Science and Health, pp. 288, 197); neither can they encourage or consent to any form of sacerdotalism. Furthermore, they must impose upon men the highest standard of personal rectitude and purity, be intrusively individualistic, in a sense, in demanding that every one shall awaken to the call of Truth and zealously address himself to the working out of his salvation. They must stand for a metaphysical point of view, a spiritual interpretation of nature and of life against which the educated beliefs of so-called common sense, the conclusions of reigning material thought, and the dictum of many honored

Digitized by Google

traditions promptly rebel,—and for these reasons Christian Scientists seem even less likely than others, from the human point of view, to reach the ear and rouse the dormant moral sense of the materially minded. What assurance of success, therefore, can the Christian Scientist have? This, and this alone, that he is declaring the truth which was spoken effectively by Christ Jesus and his disciples; that this truth may be, yes, is being demonstrated in the healing of the sick, and that "the gates of hell shall not prevail against it."

Let Christian Scientists so apprehend the vital truths the Master taught as to be able to do his works; let them go into the homes of the poor and needy, the sick and suffering, to stay the cruelties of pain, the disasters of disease, and *they will have* won the hearts of men, their consent that Truth shall shape their thinking, their conduct, and their destiny. This is the summons, the call of God which comes to each one of us, and this is our exceeding great reward, that we may preach and prove "the unsearchable riches of Christ," and meet again, as did Christ Jesus, the world's one pressing need.

JOHN B. WILLIS.

"HASTE TOWARD HARMONY."

IN the Glossary of Science and Health (p. 586) we find in the definition of "Gad" (Jacob's son), the statement, "haste toward harmony," which is not easily comprehended apart from the words which precede it, namely, "spiritual being understood." As every one who comes into Christian Science certainly desires to realize harmony speedily, it is surely well worth while to study the subject in the light of this teaching. In Genesis we read that when Jacob blessed his sons, he said concerning Gad, "A troop shall overcome him: but he shall overcome at the last." Here it would seem as if the realization of harmony was not hastened, but delayed. This prophecy is however made clearer when we add to it the statement given in Deuteronomy, where Moses blesses the tribes and says of Gad, "He executed the justice of the Lord, and his judgments with Israel." This relates itself very readily to Mrs. Eddy's definition, and points to the fact that haste toward harmony can be attained, by either state or individual, only as each strives to execute divine justice.

In Isaiah (chapter 16) is found a most interesting passage which reads, "The spoiler ceaseth, the oppressors are consumed out of the land. And in mercy shall the throne be established: and he [the Christ-idea] shall sit upon it in truth . . . judging, and seeking judgment, and hasting righteousness." In the Psalms we find many times the prayer, "Make haste, O God, to deliver me," or, "to help me," but Christian Science teaches that Divinity is always ready to heal and to save (see Science and Health, p. 458). It therefore rests with ourselves to do that which will hasten the realization of harmony, mental and physical. It may be that the sufferer is questioning divine justice, that he is blaming God or man, or both, for his prolonged sense of discord, and thus denying the omnipotence of good, which would be a most serious mistake. If God were not all powerful as well as absolutely just, our condition would be indeed hopeless; but He is both, and there is no delay on the divine side. If one desires to realize harmony speedily, he must hasten to affirm the immanence of divine justice and judgment, and thus shall he be delivered from the accuser, the false belief which would hold him under sentence, perhaps sentence of death, for some supposed violation of material law.

The law of God was stated for all time by Paul when he said, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death." Does the suffering mortal believe this? He surely ought to do so, for it is a decree of the Supreme Ruler whose decisions can never be set aside. It should be remembered in this connection that "the word of God is quick" as well as "powerful." The action of Truth is never slow, although the human apprehension of it may be. A fact is never less than a fact, although it may take a thousand years for mortals to recognize and utilize it; but "with God" the thousand years of seeming delay vanish in the "one day" of spiritual realization.

The demand, then, rests upon us to understand spiritual being and to hold fast to divine justice. This of course means that we shall strive to be just, in thought, word, and deed, which in turn means that we are making "haste toward harmony,"—toward health, holiness, happiness, the kingdom of God realized here and now.

ANNIE M. KNOTT.

AMONG THE CHURCHES.

BOSTON, MASS.

The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m. In the new church edifice, Norway, Falmouth, and St. Paul streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading Rooms: Berkeley building (suite 306-307), 420 Boylston street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company building (second floor), southwest corner Devonshire and Milk streets, opposite Post Office; open daily, except Sunday, from 9 a.m. to 5:30 p.m.

FLINT, MICH.

First Church of Christ, Scientist, will hold services Sunday morning [Aug. 6] in the new Christian Science auditorium, which is located in the Ward Building, Saginaw and Second streets. The auditorium was recently remodeled and is modern in every respect. It contains about two hundred mahogany theater seats and in front is a platform and desk where the readers will conduct the services. Opening on the auditorium is a large reading-room.

When the Christian Science church in this city was founded, the meetings were held at the homes of members, but the continued growth of the organization made it necessary to secure larger halls on several occasions. During the last few months the services have been held at St. Cecelia Hall, but the growth of the church made it again necessary to lease a larger auditorium. The first services will be held in the new auditorium at 10:45 o'clock Sunday morning.—*Daily Journal.*

ANAHEIM, CAL.

The Christian Science Society of Anaheim, organized a little over two years ago, is building a church on its lots at the corner of Chartres and Hedwig streets. The building is bungalow style, and will have a seating capacity of about two hundred. The cost, including the lots, will be a little over three thousand dollars.—*Plain Dealer.*

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk,*
Falmouth, Norway, and St. Paul streets, Boston, Mass.

THE LECTURES.

WHITE PLAINS, N. Y.

Bicknell Young lectured in the Court Square Theater on Sunday afternoon, June 11, to an audience of over seven hundred. He was introduced by Paul A. Harsch, who said:—

Standing in the beautiful temple of Herod, built for the glorification of the one God, but at that time, sadly enough, used for almost every other purpose; surrounded by the rugged and barren Judean hills and the hostile thoughts of those for whom he was about to make the greatest possible human sacrifice, Jesus expressed in never to be forgotten words the tenderest love and compassion for his people, when he used this beautiful simile: "O Jerusalem, Jerusalem, . . . how often would I have gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not!" Christian Science has come to this age with the same loving, comforting, and healing message that characterized all the teachings of the Master so many centuries ago; and it opens its arms to you today, extending the sweet solace of a God who is Love—Love infinite and eternal.—*Correspondence.*

VENTURA, CAL.

A lecture on Christian Science was delivered by Francis J. Fluno, M.D., at the Lagomarsino Opera House, July 23. He was introduced by Attorney Clay G. Knox, who said in part,—

Jesus of Nazareth, that great expounder of the divine law or truth, said, "Ye shall know the truth, and the truth shall make you free." His knowledge of the truth enabled him to heal the sick and reform the sinner, and for three hundred years after his ascension his followers, through their understanding of the truth, healed the sick and reformed the sinner. But for many centuries thereafter, the truth, especially as applied to the healing of the sick, became buried to a greater or less depth under a mass of materially made laws and doctrines.

Some forty odd years ago, Mrs. Eddy through her tireless study of the Bible uncovered this truth and discovered that its power to heal the sick and reform the sinner had never been lost. She named her discovery Christian Science,—Christian because it is the teaching of Christ, Truth; Science, because it is a demonstrable knowledge. Jesus told his followers to heal the sick, reform the sinner, and preach the gospel to the poor, and we contend that these commands are just as imperative today as they were when spoken by Jesus. Jesus also told his followers to beware of false prophets, and that they would know them by their fruits, and we contend that if we are judged by our fruits we shall not be found wanting. Students of Christian Science are daily healing the sick and reforming the sinning. Indeed the sick and sinning are in many instances healing and reforming themselves through their increasing understanding of the truth. We have with us today as our guest one who will preach the gospel, the truth, to the poor; not the poor in worldly goods, but those who are poor in the understanding of this divine law.

Correspondence.

DENVER, COL.

Before great audiences that crowded the spacious auditorium to the doors, William R. Rathvon delivered two lectures on Christian Science at First Church of Christ, Scientist, last evening [Sept. 2] and the evening before. Probably a total of three thousand people heard the two lectures, which attracted the close attention of all present. The lecturer was introduced on Friday evening by Judge W. C. Kingsley, a well-known attorney of this city. Judge Kingsley spoke as follows:—

In the early part of the first century of the Christian era, our Saviour on one occasion was surrounded by an anxious group, to whom he put this question: "But what went ye out for to see? A prophet? yea, I say unto you, and more than a prophet." In the dawn of the twentieth century, in the presence of two thousand representatives of the best intelligence of an enlightened community in which we live, may I not appropriately paraphrase this question and ask: For what came ye out to see or hear?

A momentary glance at the religious history of Europe during the fifteenth and two succeeding centuries will reveal a ceaseless conflict between the chief religious forces for supremacy; sometimes the one, and sometimes the other, gaining the mastery. The tide of conquest ebbed and flowed alternately—the one sweeping from the south and achieving victory in one generation, to be driven back before a triumphant adversary in the generation to follow. And so it came to pass, very naturally, that this warfare very much hindered, if it did not at times entirely prevent, obedience to the divine command to preach the gospel and heal the sick. The absence in the world of a religion which enabled its votaries "to heal the broken-hearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised," presented not only the great need, but the auspicious occasion for the discovery and promulgation of a religion which should bring peace on earth and good will to men, and meet the wants of a suffering world.

Christian Science came forth a little more than a quarter of a century ago, fully equipped for this service. And thus I reach what is to me a satisfactory answer to the question with which I started: For what came ye out to see or hear? My answer is that we are here to learn something of this wonderful gospel, Christian Science, discovered in 1866 by Mary Baker Eddy, the most remarkable woman of ancient or modern times, and divinely commissioned to unlock the Bible to a waiting and needy world. While this discovery was made in 1866, the text-book, "Science and Health with Key to the Scriptures," was not published until 1875, nine years later. So rapid has been the spread of this gospel during the last twenty-five years that it would be difficult to find a place in the inhabited parts of this earth where this gospel is not preached, the sad and sorrowing comforted, and the sick and dying restored to health and made whole.

On the second evening Edward J. Yetter, a well-known manufacturer, made the introduction. Mr. Yetter's remarks were as follows:—

It has always been recognized that there exists a supreme intelligence, power, and guide, higher than the human, which governs the affairs of men; and men in the extremity of their mortal experiences have often called upon this higher power for help. The first record we find of this reliance on divine power is in the fourth chapter of Genesis, which tells us that with Enos "then began men to call upon the name of the Lord," and thereafter down through the ages we have records of man's reliance on God and the wonderful answers to the prayers of men. The psalmist wrote, "He shall call upon me, and . . . I will be with him in trouble; I will deliver him, and honor him." This was the assurance David had when he called upon God.

Only a small number of inhabitants of the world have known how rightly to call upon God. Men live and work for, and search in many ways to gain the good gifts of joy, prosperity, health, peace, and long life. The search must finally lead to the right source, namely, "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning."

This is an age of scientific research and discovery, the greatest of which is the definite Science of God, man, and their relations. The world demands practical results, there-

Digitized by Google

fore one must know how to call and draw upon the unchanging, endless source of health and good gifts. To know this is understanding. We are assembled here tonight to learn something more of Christian Science, which leads men to call upon the one all-knowing, all-seeing, all-wise Principle, Mind—God.—*Denver Times.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Brooklyn, N. Y. (First Church).—William R. Rathvon, Kismet Temple, 92 Herkimer street, Oct. 17.

Brunswick, Me.—Bliss Knapp, K. P. Hall, Oct. 20.

Cadillac, Mich.—Clarence C. Eaton, K. of P. Hall, Oct. 17.

Concord, Mass.—Virgil O. Strickler, Town Hall, Oct. 16.

Concord, N. H.—Bliss Knapp, Church Edifice, State and School streets, Oct. 19.

Danbury, Conn.—Bliss Knapp, United Bank Building, Oct. 16.

Elgin, Ill.—Judge Clifford P. Smith, Universalist Church, Oct. 17.

Emporia, Kan.—Hon. Clarence A. Buskirk, Opera House, Oct. 17.

Eureka Springs, Ark.—Willis F. Gross, Opera House, Oct. 12.

Glens Falls, N. Y.—Virgil O. Strickler, Empire Theater, Oct. 17.

Iola, Kan.—Francis J. Fluno, M.D., Grand Theater, Oct. 19.

Joplin, Mo. (First Church).—Hon. Clarence A. Buskirk, New Club Theater, Fourth and Joplin streets, Oct. 16.

Kalamazoo, Mich.—Judge Clifford P. Smith, Academy of Music, Oct. 20.

Le Roy, Kan.—Hon. Clarence A. Buskirk, Union Hall, Oct. 13.

Lima, Ohio.—Frank H. Leonard, Faurot Opera House, Oct. 17.

Marshall, Tex.—Francis J. Fluno, M.D., Grand Opera House, 3 p.m., Oct. 15.

Michigan City, Ind.—Willis F. Gross, Orpheum Opera House, Oct. 16.

Niles, Mich.—Prof. Hermann S. Hering, Library Auditorium, Oct. 13.

Oshkosh, Wis.—Frank H. Leonard, Grand Opera House, Oct. 19.

Parsons, Kan.—Francis J. Fluno, M.D., Elks Theater, Oct. 17.

Piqua, Ohio.—Clarence C. Eaton, Mays Opera House, 2:30 p.m., Oct. 15.

Pittsfield, Mass.—Prof. Hermann S. Hering, Colonial Theater, 3 p.m., Oct. 15.

Plymouth, Mich.—Clarence C. Eaton, Church Edifice, Oct. 19.

Quincy, Mass.—Virgil O. Strickler, Alpha Hall, Hancock street and Cottage avenue, 3:30 p.m., Oct. 15.

Richmond, Ind.—William R. Rathvon, Murray Opera House, Oct. 15.

St. Johnsbury, Vt.—Prof. Hermann S. Hering, Colonial Theater, Oct. 20.

St. Louis, Mo. (all churches).—Willis F. Gross, The Odeon, Grand and Finney avenues, 3 p.m., Oct. 15.

Toledo, Iowa.—Frank H. Leonard, Phillips Music Hall, Oct. 16.

Watertown, S. D. (First Church).—Frank H. Leonard, Church Edifice, Oct. 20.

Wilmette, Ill.—Judge Clifford P. Smith, Church Edifice, Tenth street and Central avenue, Oct. 16.

Winchester, Mass.—Bliss Knapp, Church Building, Mount Vernon street, opposite Town Hall, Oct. 17.

Yonkers, N. Y.—Bliss Knapp, Yonkers Public Library Hall, 3:30 p.m., Oct. 15.

TESTIMONIES OF HEALING.

Out of the fulness of a thankful heart I will try to tell, at least in part, what Christian Science has done for me within the past six years. I was healed of a serious abdominal trouble of six years' standing, after having tried many remedies prescribed by several eminent physicians. My kind home physician said, "Wiser men than I am have found this malady to be incurable," so I gave up all medicine, also dieting, etc., and began to search for other means. Two years more passed, in which a complication developed that rendered life a burden and death was looked for as the only means of escape.

About this time a copy of *The Christian Science Journal* was given me, and after reading what to me was a remarkable experience,—the healing of a so-called incurable disease,—I knew that this was the same healing which Jesus did, and that Christian Science must be the right practice. I felt that Jesus' work was again being done upon earth through the power of God understood, and I was filled with joy, because I knew I should find it. For several weeks I read some copies of the *Journal* many times, and then a friend brought me the Christian Science text-book, "Science and Health with Key to the Scriptures." After nine months of constant reading and study of this wonderful book, by day and night, my physical healing was complete, insomuch that heart failure, defective eyesight, a dropsical condition of the lower limbs—all painful conditions—were gone. I could walk and even run without fear of exhaustion. I was not only healed of the disease, but I was changed, radically changed in mind and method. I had learned that God is good and good only; that man as His idea reflects good and good only.

During the past six years of study I have been healed of a sense of grief and bitterness, disappointment in personality, and sin. I have learned that selfishness is always sorrowing, and profiting thereby my whole life, even to my facial expression and my voice and figure, has changed. Every day I am grateful because I can see God and man more nearly aright. Loftier aims and holier purposes possess my thought, while "joy is no longer a trembler nor is hope a cheat" (Science and Health, p. 298). I am deeply grateful to God for giving mankind this healing truth through Mrs. Eddy, because in her teaching I find the living, saving presence of Christ that glows through the hearts of men, redeeming them from sickness, sin, and death. I am grateful to her for giving me a concept of God as All,—good and just, and infinitely tender toward all His creation,—the God that is Mind, eternally governing and guiding each and every obedient disciple through the consecrated life and irrevocable word of His messenger. I am likewise deeply thankful for all that Christian Science has done for all mankind. Words fail—they that love will understand.—EUGENIE S. HAUSER, St. Louis, Mo.

About three years ago I saw the truth about God, the universe, and man which Christian Science teaches. The following shows how I reached a scientific conclusion: I had for nine years suffered from nervous trouble, but found no cure, after having tried everything that presented itself, until finally it was my fortune to be associated with a Scientist in the same office. I saw her life, felt her influence, and this led me to secure a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and commence to study its teachings. It appeared to be fair and logical, and this appealed to me and caused me to search very earnestly for the truth; but I could not seem to be satisfied until a panic came which brought such great material loss that I did not see how I could overcome it.

Then the thought came to me to seek God earnestly through Christian Science, so I commenced with the Bible

Digitized by Google

and Science and Health. In the first chapter of Genesis I read as follows: "And God said, Let us make man in our image, after our likeness." It appealed to my reason that if man is made in the image and likeness of God, who is Spirit; we must be spiritual, so all my sufferings and dread of everlasting punishment must be untrue, for the scientific statement of being (as found on page 468 of Science and Health) states that "there is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation." Having made this discovery, I commenced to climb, for it did seem that I was climbing a high mountain which was very rough, especially on the start.

I was then called away on business, and although my oldest boy had a fever, I obeyed the call, studying the Bible and Science and Health at every opportunity, and this brought to me sufficient means to meet my present need, which was very great at that time. For this I was very thankful, and almost before I realized it every sorrow, every burden, and every trouble disappeared, and I found myself, as it seemed to me, on the heights of Truth. I saw nothing but love, for the whole universe seemed to be the expression of Truth, Life, and Love, and I was part of it. This was surely "a new heaven and a new earth," the spiritual universe. All my sorrow and sin seemed to be as nothing, or like the mist. I was so overjoyed that I could scarcely talk; in fact, I did not know how to talk in the old way, because I had seen the nothingness of material things so clearly that I did not know how to speak of them. I was like a child coming into a new world. When I returned home, my family did not understand me, nor did I know how to explain, only that I was happy. When I met the practitioner, who had been very kind and patient, there was not a word said, but she knew I had found the truth.

For this wonderful discovery I am grateful to God, and also to our loved Leader. Since this experience I have found that Spirit, God, is the only substance; that Mind guides, directs, and shows His children where to find the best in the land.—JOSEPH E. BOWEN, Norfolk, Va.

With the hope that some one who is coming into Christian Science in the midst of seeming opposition may be encouraged thereby, I offer the following testimony. When I took my stand for Truth, and knew that it was the fountain of living waters, of which if one drank he would never thirst again, I met with seemingly great opposition. Being one of a large family, none of whom entertained the right conception of the teachings of Christian Science, there seemed to be much to overcome, and like other students I longed to get away by myself and study unmolested. This did not seem the wisest course to take, however, and therefore I remained at home, intending to press on, no matter what happened.

To my limited understanding I wanted to overcome everything at once, but I found that only by working out of each phase of error that presented itself could I make real progress. Though seemingly surrounded by an impassable sea, my way became clear when I knew that God was with me and would never forsake me. By remaining at home and meeting the situation in love, I learned many lessons which I could not have learned had I gone away. The leaven commenced to work. One by one the shackles fell away, and after several years of patient perseverance, now in a valley, now on the top of a mountain, I began to rejoice in my tribulation and to be glad that I had these opportunities to overcome error with Truth. Every time an obstacle was put in my path and overcome in the right way, it became transformed into a stepping-stone to that higher consciousness of Life and Love.

During this process of elimination I have realized the meaning of the words of Jesus when he said, "By their fruits ye shall know them," because I knew the only way to overcome this erroneous concept of what Christian Science is, was to live it to the best of my ability. In order to do so I had to look constantly within and turn the search-light of Christian Science into the very depths of human consciousness, so that I might uncover the errors which were holding me in bondage to material ways of thinking. The victory is great over the uprooting of a single weed. Mrs. Eddy says in "Miscellaneous Writings": "The warfare with one's self is grand" *(p. 118)*, and so I am finding it to be. I can truly say I am glad I had so much to work out of, because I know that all I know, and the hardest lessons I have learned, I would not have profited by except for this seemingly great opposition.

I have proved the power of Truth to heal and save in my own experience, and my gratitude to our dear Leader, who has so lovingly and patiently led us step by step to a more spiritual, more practical apprehension of the Scriptures, thus blessing all mankind, is without bounds.

EUGENIA LOCKWOOD, Newton, Mass.

I gladly testify to my healing in Christian Science. In the fore part of April, 1909, I was treated by a practitioner, as I was suffering from an acute attack of cold. I had to do some work in repairing a business block, some portions of which had to be done at night after the stores were closed up. On two occasions we had to remain all night, and it was very heavy work. At the start I did not think I could possibly do the work, and I could not have done it had I not received great help from Christian Science treatment. I however got along very nicely, and kept up my end of the task, thanks to the power of Truth.

EDWARD ROSE, W. Berkeley, Cal.

About three years ago I took treatment in Christian Science in order to overcome the fear of staying alone. Besides this, one of my toes was doubled under, so that I could not straighten it out, but in a short time these ills were met, and some other ailments of long standing were also overcome. Now, in place of fear and dread, the ever-presence of divine Love is established in thought as the reality of being.—MRS. ETTA W. ROSE, W. Berkeley, Cal.

It is four years ago that I first read "Science and Health with Key to the Scriptures" and found, at last, an answer to the question I had been hopelessly asking for years: What are we? In the course of this questioning I saw very plainly that, as Mrs. Eddy puts it, "all sin is of the flesh" (Science and Health, p. 311), and it seemed so absolutely unjust that an omnipotent God, who could have made us spiritual and perfect, should have put us into the flesh with every instinct opposed to good. The church teaching did not help me in the least; the material theory of evolution I entirely rejected, and then I heard of Christian Science. I saw at once that its teachings solved this problem absolutely and finally if it were true; and I knew, when I had finished the chapter on Genesis, that it is true. With deep gratitude I can truly say that it has brought me peace, health, and happiness.

Through the study of Christian Science and occasional help from practitioners I have been healed of a severe stomach difficulty, bad headaches, nervous troubles, etc., after twelve years of pain and misery; and—for which I am still more grateful—I have found an understandable God and an object in life. My gratitude to Mrs. Eddy for having first discovered this truth, and then having stood for and kept it unadulterated for us, can only be proved by my life.

LAURA PORTSMOUTH, East Sheen, Surrey, England.

As I awoke one morning recently, a song of gratitude was singing itself in my heart for my healing in Christian Science. My Quaker ancestry made good soil for the Uni-

Digitized by Google

versalist teaching that God is love, and for the added truth of Christian Science to take root. I have now found that God heals our diseases as well as forgives our iniquities. I am seventy years of age, and in July, 1909, it appeared that I was growing feeble. My physicians had stated that my liver was affected, but I am happy to say that after the first treatment in Christian Science I was freed from pain. This meant much to me, for I had not been able to sleep well. The complete healing took some time, but during that time, with a practitioner's patient and loving help, I learned the beauty and efficacy of Christian Science.

Mrs. Eddy's clear and logical exposition of divine Truth will indeed bring full salvation to sick and sinning humanity. I have proved through obedience to statements of *truth, as found in* Science and Health, that I have dominion *as given us in our divine birthright.*

Having been associated with those great women, Susan B. Anthony, Lucretia Mott, Elizabeth Cady Stanton, Lucy Stone Blackwell, and knowing their work, I greatly appreciate the work that Mrs. Eddy has done in placing woman side by side with man in the pulpit of her church.

REV. AMANDA DEYO, Glen Cove, L. I., N. Y.

I was reared in an orthodox faith in which I believed implicitly, and dearly loved the church even after I found that some of the clergy were not infallible and sometimes fell into grievous errors. When I discovered that they could make mistakes, I began to think for myself, and this I did most thoroughly, beginning with an effort to prove logically the existence of God, and from this came all which followed in my experience.

I suffered dreadfully during the struggle, and used to look with earnest longing on those who simply believed, and wished I might do the same. In the mean time I gave up a Sunday school class which I had been teaching and rarely attended the church. I could no longer teach what I did not know, and I did not wish to take an active part as a member of an institution in which I did not wholly believe. I decided to search the Scriptures, for in them rested my only hope, and at last I found a verse in John's gospel which I determined to work out in my experience: "If any man will do his will, he shall know of the doctrine." I would earnestly endeavor to obey all the good I knew, and I trusted that then I should know more of good. Through obedience would come revelation. Thus I found rest in becoming "poor in spirit," and I was led to the kingdom.

After this I observed a family who I had been told were Christian Scientists, and whose daily home life was so harmonious that I asked for the loan of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I read it at a time when I had had three operations on my eyes and was threatened with a fourth. For a year I had been able to use my eyes very little, and at that time could not read at all at night and only for a few minutes at a time during the day, although I was wearing glasses constantly. I took the book one evening at about seven o'clock, and read until midnight; the next evening I did the same, and feeling that it was incongruous to wear glasses, I took them off. Later, I wore them a little, and then a Scientist told me I had better destroy them. I did so, and never again had any temptation to wear them, nor have I had any further trouble with my eyes.

After this time counterfeits of Christian Science were presented to me in various forms, and I visited churches of different shades of belief in my continued searchings for truth, until I came to the Christian Science church and felt there was more good there than anywhere else. The first time I attended a Christian Science service I felt as if I were in heaven. At first I did not accept all the teachings of Science and Health, although I felt it was the most exalted work I had ever read, with the exception of the Bible. I would take for a month or so one little phrase or sentence, and try to make it part of my life, until at last I knew that the whole teaching was the truth. By putting into practice what I read, I was able to demonstrate the truth of the statements. It is scarcely necessary to say that in answer to my earnest search I found positive proof of the ever-presence and all-power of God, good.

I did not have a practitioner. My family not being Scientists, I seemed compelled to do my own Science work or else have a physician. The urgency of the case was the cause of my awakening to Truth's demands, and the work was done. I am thankful I was thus forced to learn how to do my own work. I was healed of catarrh in a very bad form during an unusually inclement winter in a city to which because of its nearness to the sea I had feared to go, and in which I had suffered particularly. I was healed of intestinal and stomach trouble, also of extreme nervousness and resultant maladies, which combined had resulted in a semiinvalidism considered hopeless by the physicians.

After my healing in Christian Science my good health was so strongly established that when my baby boy came the birth was normal, and the third morning I was at my desk before six. On the fifth day, my servant and nurse leaving unexpectedly, I did much of the work for a family of five. My teeth had been very poor, but after I became interested in Christian Science I did not have a cavity for five years, which the dentist thought very remarkable. Once, after I had had rather severe work done, the dentist said he was much pleased because I had borne it so well. I had felt scarcely any pain, and told him that Christian Science had helped me. He said he had other Christian Science patients and that he wished all his patients were like them. My children are unusually robust and have had no diseases. My little girl of three, if she has some childish trouble, will call quickly for help in the truth, and her little brother, not much older, eagerly asks for the same help. I find however that the greatest part of Christian Science is the healing of sin. I rejoice more over the uncovering and destruction of some sinful trait of my own character than in the greatest physical healing.

It seems to me that Christian Science is the call to all weary wanderers to come home. We rejoice, now that we are finding our home in infinite Mind. When a girl, I had been oppressed by the terrible suffering of humanity, for whom I had an intense love and a great yearning to relieve. I felt there must be a solution to the problem, and my most earnest, constant desire was to find this solution and I felt confident I should. I now know that the solution is Christian Science, and in this teaching my prayer has been answered beyond my highest anticipation.

My gratitude and reverence for Mrs. Eddy grow daily, as my blessings are discovered. I think I am most grateful for her wonderful courage, her self-immolation and never-ending perseverance, which enabled her so to inspire us that we might see the nothingness of the sin in which we had believed and by which we had been blinded.

MARY GERTRUDE BERGHELL, Hillsboro Inlet, Fla.

More than a year ago I had a severe attack of rheumatism in my arm, which made it very painful for me to use it. I called a Christian Science practitioner to help me, and after a few treatments I was entirely healed. I am very grateful for Christian Science, as it has been very helpful to me in many ways.

MRS. MARY E. ALEXANDER, Cambridge, Mass.

[Translated from the German.]

I wish to express my deep gratitude for the many blessings which I have experienced through Christian Science. Some two years ago I heard of it through a sister-in-law. I was a small tradesman and at the time was struggling with difficulties and cares. When I started a business of my own

Digitized by Google

I was quite successful, but through so-called "good friends" I got into the habit of hanging about bars, and allowed this habit to take such hold on me that my workshop gradually ran down, and I was without work and hardly able to supply the daily needs of my family. My nerves were shattered through drink, and my wife was obliged to put me into a sanitarium.

While shut off from the outer world, but not from God, it suddenly dawned upon me how much good I had already experienced through divine Love. I am most grateful to the Christian Science practitioner, who worked indefatigably during all this time, for through her efforts I have experienced the power of Truth in every way. I used to be irritable, but I now go to my workshop with the love of God in my heart. God's goodness and omnipresence have furnished me with plenty of work and with a home in which harmony reigns. Next to God, I am grateful to our beloved Leader, Mrs. Eddy, for the blessed revelation of God and man.—HERMANN GNAUCK, Dresden, Germany.

[Translated from the German.]

It is with a feeling of deep gratitude that I wish to testify to the great help which I have experienced in several instances through Christian Science. I have already told of help received by myself, and would now tell of my husband's healing. He had been rather nervous in years past, and as we went through hard times he acquired the drink habit, the result being that his health and ability to work failed, so that we even suffered want. He would often become irresponsible, so that we were apparently in great danger.

While in this great need we found help in Christian Science. A practitioner began to work for my husband, with the result that the attacks quickly disappeared, and we were always protected; but in spite of the faithful work complete healing was not attained for a long time. The reason, as I can see now, was due to errors in ourselves, which we did not discover at the time, so that we had to learn much through experience. My husband's condition became such that he had to be placed in confinement. In my distress I went to see the practitioner, and told her about the seemingly hopeless condition we were in, and she lovingly comforted me and assured me that with God all things are possible. The lady again took up treatment for my husband, and, thank God, a change took place at once, and his condition improved. As he told me later, he immediately felt the beneficent influence of the treatment, and his healing went on quickly, so that after a few days he came home perfectly well, to the great astonishment of the physicians, who expected him to be incapacitated for a long while. The pain from which he used to suffer has also disappeared; he has become industrious and punctual, and our circumstances are improving, so that we are able to pay off debts, and God's loving help is clearly recognized.

I feel that I cannot fully express my gratitude for the blessings which divine Love has had in store for us during these hard times. Help always came, often in an entirely unexpected way. One Sunday, my youngest child was suddenly taken very ill. The vomiting, especially, occurred so frequently that the child became very weak, and toward evening lay motionless. I asked my husband to secure help before the night, and soon after the child rose up in bed and ate some food, whereas he had asked for nothing during the day. His eyes became bright, and although the attacks occurred a few more times, they ceased completely during the night, so that the little fellow was well by the next morning. His complete recovery soon followed. We thank God for the quick help brought about in Christian Science, which is truly marvelous. One cannot help thinking of Mrs. Eddy with constant gratitude for her work, through which so much sorrow and pain has been overcome.

IDA GNAUCK, Dresden, Germany.

I have long desired to express my gratitude for Christian Science, for it is to its teachings that I owe my present health and happiness. In the winter of 1909 I was taken sick, and the symptoms were such that a physician was called in to diagnose the case, as it seemed to come under the jurisdiction of the board of health. The doctor, a well-known physician in this city, attached but little importance to the case, and said there was no indication of anything serious; but the conditions became worse and he was again called in, and after having made a further examination said I was suffering from a bad case of typhoid fever. This later developed into a lung affection.

The doctor, as he had done the necessary work for the health board, was then dismissed, and a Christian Science practitioner was given charge of the case, for though the immediate relatives were not believers in Christian Science and my own understanding was small, I begged to be allowed Christian Science treatment, for my trust in God was great. Once after that, when I seemed to be very low, the physician was called in again. This was not on account of my wishes, but because my family insisted upon it. As I grew worse rather than better, he was again dismissed, and in a short time therefrom I began to mend, and after having been bedridden from December, I was able to be up early in February, 1910.

After the lung trouble was overcome, an abscess formed on my breast, but except for one hour, when I became impatient, I had no pain whatsoever and it quietly came to a head and broke with no harmful results. I now feel perfectly well in every way. This experience was one of the many glorious proofs I have had of the healing power of Christian Science, and I am happy and more than grateful for having been shown the way. Ever since this experience I have found Christian Science a daily help, and my one aim is to gain in spiritual understanding through the study of the Bible and our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. By living rightly I have also been able to lay off eye-glasses, which I had worn for ten years. For all these blessings I am unspeakably thankful to God, and grateful to our beloved Leader, who has shown us this new-old way.

JOSEFINE STARKL, New York, N. Y.

I can think of no better way to express my gratitude for Christian Science than to tell others of some of the benefits I have received from it. Four years ago I was suffering with very severe attacks of acute stomach trouble, said to be caused by anemic condition of the blood, and for more than a year I could eat only certain light foods. After two or three treatments in Christian Science, I was entirely healed and able to eat anything I wanted. While reading Science and Health I was also healed of hernia for which I had worn a truss over thirteen years. I have not worn it now for more than two years, and feel no ill effects whatever.

I am also very grateful for the wonderful light which Science and Health has thrown upon the Bible that before seemed so puzzling.

MRS. EMMA J. NASH, Grand Rapids, Mich.

I wish to testify to the power of divine Love to deliver from evil. On May 30, 1910, my son and I started to attend the Memorial day exercises, and met an automobile coming over a rise of ground quite swiftly. Our team was frightened, and tried to turn around so suddenly that one horse fell down, then the other one fell over him and neither was able to rise. My son jumped out, and the five men who were in the automobile came to our assistance. They tried to take the harness off the horses, but they had to move one of them before they could do so, which they did by throwing a lasso over his hind feet. Both were strong young horses and might have kicked and done much

Digitized by Google

damage to themselves and the carriage; but to the surprise of all they kept perfectly still till the harness was removed, then they got up very quietly, and it was found that they were entirely unhurt, and did not even seem excited. Nothing was broken, and we soon were on our way.

The men in the automobile said it certainly was a miraculous escape, but Christian Science teaches us that God is Love and God is All, and that if we put our trust in divine Love, we shall be delivered from evil.

MRS. A. J. DICKINSON, Chamberlain, S. Dak.

My heart overflows with grateful love that we are privileged to have our Leader's poems in book form. This is indeed another one of divine Love's blessings to humanity of good will and peace on earth. I have never known a dark hour or a struggle with mortal sense that some declaration of truth from one of these poems, repeated and held to, has not calmed the fear and brought peace and love and sunshine into my consciousness.

I wish to relate a little incident illustrative of this. About six years ago, when my oldest boy was five months old, he was exposed to a throat disease. My sister's little child had suffered from this disease, and the case having been fatal, my sympathy for her sorrow was very great. When my baby began to manifest symptoms of this disease, I was advised by a Christian Science practitioner to call a physician, and I did so. The physician advised me to watch the baby closely and to call him again. My fear, however, was so great that I was walking the floor in anguish, holding the child close to my heart, trying in a faint way to realize God's presence and love. I was then a very young Scientist as well as a young mother.

As I was reaching out to God to send me relief, this verse from "Christ My Refuge" (Poems, p. 12), came to me:

And o'er earth's troubled, angry sea
I see Christ walk,
And come to me, and tenderly,
Divinely talk.

As I repeated these beautiful lines I found that the fear had subsided, and there came into my thought a message of love as expressed in the first verse,—

O'er waiting harpstrings of the mind
There sweeps a strain,
Low, sad, and sweet, whose measures bind
The power of pain.

Soon my baby was entirely well, and this is only one of many experiences of the "healing, hope, comfort, strength, and peace" that have come to me and mine through these "rare gems of true inspiration" (Editorial in *Sentinel*, Nov. 5, 1910).

I had a wonderful demonstration of the power of Truth at the birth of my third child. At the two other experiences instruments were used and the suffering was dreadful. The physicians said that no other result was possible in my case, but this prediction was set aside by the faithful study of Mrs. Eddy's teachings, as found on page 463, lines 6-20 especially. The result was wonderful, and the child is a perfect joy to us. If mothers only knew what Christian Science can do for them in training their little ones, how they would rise above the belief in materiality! If we would be faithful in overcoming every impure thought, and "exalt every valley of sin" (*Ibid.*, p. 61), humanity would discern the truth of being and find the highway of holiness.

MRS. ETHEL S. ACKLEY, Palo Alto, Cal.

What a vast proportion of our lives is spent in anxious and useless forebodings concerning the future—either our own or those of our dear ones. Present joys, present blessings slip by and we miss half their flavor, and all for want of faith in Him who provides for the tiniest insect in the sunbeam.—PHILLIPS BROOKS.

FROM OUR EXCHANGES.

[*Standard.*]

In bringing men to Christ we must seek to establish such relationship between the soul and its Lord as will issue in likeness to himself in all things. The spirit must be his spirit, the ministry his ministry. If this be true, then we have but to turn to the records of Jesus' life to ascertain what should be included in our ministry as his disciples. We have a clear setting forth of the ministry of Jesus. He went about doing good. He fed the hungry, healed the sick, he called men to repentance. He relieved physical distress, he demanded lives of loving obedience to God. His was a ministry of redemption from sorrow, pain, and sin. There is not a hint in the New Testament that Jesus ever felt it his duty to refuse physical help in order to give life to the soul, nor is there any evidence that he was content with a ministry that concerned itself only with physical relief. His service was commensurate with human need, and that need was and is and always will be both physical and spiritual. That the spiritual life is vastly more important than the physical he made very plain; and he also revealed his conviction that the surest way of appeal to the spirit is sometimes through ministry to the body.

Is it safe to follow Jesus Christ? No disciple of his will question it; and if so, the character of present-day Christian ministry is settled. There has been no such change in human conditions as will warrant the assumption that important elements in the ministry of Jesus may be omitted from our own scheme of Christian activity. If we did not know that Jesus answered the appeal of the sick and needy when he was upon earth, yet those who embody his spirit of compassion must needs express that spirit in concrete forms of helpfulness. The true disciple of Jesus does not ask himself if it is his duty to succor the unfortunate and distressed. His ministry is spontaneous, automatic. He cannot be what he is and fail to answer the cry of suffering ones.

[Edward Shillito in *Christian World.*]

It is high time that the Christian church abandoned altogether its somewhat ungracious attitude to modern science; there are faults, doubtless, on the other side; these we must leave; but, to be quite frank, science has been more ready to confess its mistakes than the church, and in any conversations between the two a more generous tone on the part of the church would help greatly to an understanding. Very many Christian thinkers are blameless in this matter; they know how great a debt they owe to science in this modern world, but the average man in the church needs perhaps to be reminded not only that science is far from being the enemy of the faith, but that in its method and spirit it has proved itself a true friend of the faithful.

We may speak without any exaggeration of "science" so long as we think not of any dogmatic conclusions but of a spirit and method; scientific men are in one sense a body animated by a common intellectual life; when they meet they are like a true church, which has many members but one spirit; certain methods are assumed, certain others are implicitly rejected; one end is accepted by all; one standard measures all achievements. They have one faith and one hope of their calling.

[Sir Harry Hamilton Johnston in *Contemporary Review.*]

If only . . . we could agree upon a common interracial religion, and that the most simple, undogmatic form of Christianity—Christianity without the creeds that were unknown to Christ! The Christian principles that were laid down in the authentic gospels and epistles still remain unsurpassed as a rule of conduct, as a basis of practical ethics. They are unconnected with totemism, sabbaths, fetish-

Digitized by Google

worship, mysticism, vexatious observances, litanies, and the disputable adjuncts of a religion. If we could agree to define and adopt such a basis and make it the state religion of every country, with leave to each person and community to add, on their own account, the elaborations of ritual necessary to some individualities, we should have gone far to establish a brotherhood of men, a brotherhood which need not mean necessarily a mingling of blood, but a common sympathy and interest in the development of humanity. Applying Christian principles, the white man would treat the other races of mankind with kindness and justice, without scorn or harsh impatience; and they, on their part, would cooperate with him in the tremendous struggle with the blind and heartless forces of nature which ever and again seem to threaten man's very existence.

[Charles F. Dole, D.D., in *Christian Register*.]

We live in an eventful time. Human history discloses no more stirring or interesting period. The most tremendous problems are before us, filled with practical moment. I know not when there was ever a more urgent call to serious thought, to earnestness, to generous civic and public devotion. The wonderful developments of our material civilization only go to show how barren of happiness they are, unless man can work out a spiritual civilization so hardy, patient, and humane as to control and temper and distribute our vast new wealth for the largest possible welfare of mankind. The church needs to be far better adapted than it now is to this work, while the need of what the church stands for seems more tremendous and imperative than ever.

[Rev. Charles R. Brown, D.D., in *British Congregationalist*.]

When I speak of the second coming of Christ, I am not thinking of one single isolated phenomenon, of the visible appearance of some radiant portentous form in the sky, to which men may look up as they looked up at Halley's comet a year ago. I am thinking of a great moral process. As the ideals and truths of Christ come to be enshrined in the practices of men, so his kingdom comes, so he himself comes. He only comes as he rules your will and mine. He only comes as he establishes the spirit of his gospel in these social, political, industrial principles which obtain among men. He only comes as that for which he stands becomes supreme in the estimation and practice of those who profess to be his followers.

[Prof. Walter Rauschenfusch in *Universalist Leader*.]

Our nation has long been drunk with the lust of money, and has sacrificed its democracy, its social equality, its endowment of natural resources, its human compassion, and a good deal of its Christianity to enable those who could to get rich quick. It was sinful and unashamed. Now gradually we are finding that "the wages of sin is death," for nations as well as individuals, and we are looking over the havoc which our mammonism is making with a shock of horror and repentance. I wonder if any nation in times of peace and prosperity has ever passed through such shame and self-searching as our people has borne during the last five years.

[Rev. J. R. Miller, D.D., in *Christian Intelligencer*.]

Every day we make beautiful by our faithfulness lifts our feet to a new and higher plane, and sets a better standard of living for us. We should never go back again to the things we have left behind. Perfection is the goal set before us, and we are never to cease striving for it. If we can be faithful to our trust for one day, we can be faithful another, and then another day, ever climbing upward. That should be our aim until self has been altogether forgotten, lost and left behind in the absorbing passion to please God and do His will in all things and guard everything, small and great, that He entrusts to us.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan*, and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine*. These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphlets will be found listed on the opposite page, with prices for single copies and quantities.

"Excerpts from Editorial Comments" dealing with the life and work of Mary Baker Eddy which appeared in the *Sentinel* from Dec. 17, 1910, to Feb. 18, 1911, including the special editorial tributes in our own publications, and the *Outlook* article by Frederick Dixon, is published in two styles of binding. For prices see opposite page.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy. Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published *every* afternoon, *except* Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $2.50 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1919.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind-healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy, $6.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 93 pages, cloth binding, marbled edges. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 40 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 25 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $1.00; 50 copies, $1.80; 100 copies, $3.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $2.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25 – £0 5 s.;	5f.;	Mk. 5.00;	F. 6.45
2.25 – 0 9	9	9.00;	11.60
2.50 – 0 10	10	10.00;	12.85
4.00 – 0 16	16	16.00;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

Frank Lyon, attorney for the interstate commerce commission, who has just returned from Oklahoma, where he has been hearing the pipe line case, says that this case promises to be one of the most important undertaken by the commission. It was alleged at the hearings that the pipe lines are under the complete control of the Standard Oil Company. Positive statements were made by independent oil producers that if they were accorded the same rates as the Standard Oil Company there would be no danger of their being put out of business by that company. It may lead to a supreme court ruling declaring the pipe lines common carriers.

George W. Perkins, former partner of J. Pierpont Morgan, urged before the Detroit Board of Commerce the selection of a Congress commission to devise a law to regulate the interstate business of the big corporations. He proposed that corporations submit to the government at intervals statements of the operation of their business, capitalization, etc., "so that the government might say to the labor employed, to the consumer and the investor, that the statements these men are making are complete and honest."

New York city's department of education announces that $10,258,870 has been made available immediately by the board of estimate for the erection of new school buildings and additions. The new funds will be sufficient, it is estimated by the building committee, to provide twenty-four school buildings, four additions, and to buy eleven sites.

In New Jersey sample election ballots were mailed to all whose names were on the registration lists. In the city of Newark alone eleven thousand of these letters were returned because the persons to whom they were addressed could not be found. Most of these addresses were found to be at empty houses and vacant lots.

Direct primary nomination laws were given their initial trial last week in Massachusetts, New Jersey, California, and Maryland. While the results were mixed, it puts into the hands of the voters a power to break machine rule and boss control wherever the people are in earnest, as was clearly proved by the vote in a number of cities.

Advocates of federal control of natural resources made their first move in the public land convention at Denver last week, when resolutions were offered declaring the natural resources of the nation the property of all the people of the United States, indorsing federal control of forests, and declaring in favor of the national control of streams.

Twenty-six thousand bankers of the United States, members of the American Bankers Association, will go into the money order business in the near future, it is learned, and bid for the seven hundred and fifty million dollars of business that the government now handles annually.

Attorney-General Wickersham, it is reported, has "agreed decrees" with the electrical trust, the Du Pont Powder Company, the Southern Wholesale Grocers Association, and probably one with the International Harvester Company and possibly one with the steel trust.

The Legislature of New York has passed a direct primary nomination law and so kept the preelection pledge of the controlling party. Governor Dix announced that an extra session would be called to pass such legislation, if the regular session failed to enact it.

Aviator C. P. Rodgers, who started from New York in an attempt to cross the continent and win the fifty-thousand-dollar prize, was crossing Illinois at the beginning of the week.

International.

The Calcutta improvement bill has now passed through the Bengal legislative council after a discussion lasting six days. In 1876 a commission drew attention to the overcrowding which prevailed in the northern quarter of Calcutta. In one ward, in fact, there were as many as one hundred and forty-five thousand persons to the square mile, and in the north wards generally eighty per cent of the total area was taken up by solid masonry buildings. The bill provides for the expenditure of five million five hundred thousand pounds. An important part of the duties of the trust which is to carry out the provisions of the bill, will be the construction of a system of new roads, sixty feet wide, at a cost of some three million three hundred thousand pounds. Open spaces are to be provided at a further cost of one million one hundred and forty thousand pounds. Six hundred and sixty-six thousand pounds is set aside for the provision of accommodation for persons who have been displaced by the operations of the trust and for land which is to be acquired to provide for the normal growth of the population for a generation to come; and three hundred and thirty thousand pounds has been allocated to the preparation of the land for building.

The royal commission appointed by the provincial government to investigate taxation problems throughout British Columbia has begun its sittings. Its chief purpose is to investigate the working of the assessment act recently enacted, and other matters relating to taxation, and to make its recommendations as to the most feasible plan for tax reduction.

The process of breaking up the great estates in England is going steadily on. Day after day the news finds its way into the papers that some estate or another is being divided up among the tenants and so passing out of the hands of some great ground landlord.

It is reported that a scheme for the formation of an industrial court to deal with disputes between employers and their men is under consideration by the board of trade of London, and that an announcement on the subject may shortly be expected.

A rough draft of a home rule bill for Ireland has been prepared for submission to the cabinet. It provides for a grant of fifty million dollars to start the new Parliament.

It is estimated that the gold output of South Africa for 1911 will be forty million pounds sterling.

Industrial and Commercial.

One hundred Pennsylvania granges, representing sixty thousand farmers of that state, met in New York city last week to complete arrangements for cooperative distribution and marketing of their products. Arrangements already have been made for shipping butter and poultry direct to the retail dealer, while other farm products will soon be delivered in the same way, declare the officers of the association. The business manager of the association says the grangers believe that under their new working arrangement they will be able to give their products to the consumer at lower prices and still make as much, if not more, money for themselves.

A rich millinery importer of New York, who pleaded guilty of being concerned in a conspiracy to undervalue goods imported to this country, was sentenced by Judge Hough in the United States circuit court to serve four months in the penitentiary and to pay a fine of one dollar. In sentencing the man, Judge Hough said he believed the defendant to belong to a class who have been corrupting business methods in the United States for many years and that smuggling for profit must be stopped. The defendant, after his arrest, made a settlement with the government for one hundred and twenty thousand dollars.

The investigation carried on last year by the department of agriculture, cooperating with lumber manufacturers in the South, to determine the saving that can be effected by using odd lengths of lumber as well as even, has begun to bear fruit. The investigation showed that a material saving was practicable, and at a recent meeting of the Southern Lumber Manufacturers Association the fact was brought out that a beginning has been made in putting the new plan into practice and that an increase in the sale of odd lengths is anticipated for the near future.

Announcement is made of the incorporation of the Atlantic & Pacific Transport Company of New Jersey with an authorized capital of fifteen million dollars. The company has been formed to bid on the ocean mail services now being advertised for by the postmaster-general, which call for weekly service between New York and Colon, New Orleans and Colon, San Francisco and Panama, and fortnightly between Seattle and Panama, and it is proposed to establish and maintain these ocean routes.

The new "cut-off" of the Atchison, Topeka & Santa Fé railroad from Dodge City, Kan., to Colmar, N. M., will be, it is declared, the straightest long line of railroad in the United States. The route will follow a line as straight as a yard-stick for one hundred and fifty-seven miles, without a curve, and on a grade not exceeding seven feet to the mile. In all that distance it will not touch an established town. When completed it will save fully five hours in the transcontinental time.

Operations for the development of several thousand electrical horse-power at Seven Mile rapids, on the Connecticut river, at a point near East Barret, Vt., about eight miles southerly of St. Johnsbury, have been started. The construction of a dam of considerable height, which will set back the waters of the river a distance of nearly fifteen miles, is soon to be begun, according to report.

Five hundred bushels of potatoes were bought by Mayor Shank of Indianapolis, Ind., and offered to the public at 75 cents per bushel in the public market. In four days the commission price dropped from one dollar and forty cents to eighty-five cents. Another carload has been bought and will be offered at sixty-seven cents.

The fruit growers of Ventura county, California, will realize more than six hundred thousand dollars from their dried apricots. The returns show about twenty-two thousand tons of dried apricots for the county.

Beet growers of the Greeley district of Colorado will receive between one million six hundred and fifty thousand and two million dollars for their crop this season, from present indications.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

CAN ANGER EVER BE RIGHT.

JUDGE CLIFFORD P. SMITH.

EVEN the best dictionaries in the course of recording usage must sometimes record current conceptions of right and wrong. Thus one of the latest and largest dictionaries has this to say of anger: "Anger is keen or hot displeasure (usually with a desire to punish) at what is regarded as an injury or injustice to one's self or others. It may be excessive or misplaced, but is not necessarily wrong." Here is probably an accurate statement of popular ethics or morals. According to this criterion the rightness or wrongness of anger is a matter of degree and direction. If it is moderate and is directed toward one who has inflicted an injury or injustice, it is not wrong but right.

Popular religion also agrees with this notion, or even gives anger a better character than does ethics or morals. Thus a well-known doctor of divinity, whose sermons are widely read, recently published the following comment on a letter received by the periodical of which he is editor: "Anger is not always wrong. 'Be ye angry and sin not' is the divine law, because it is the divine ideal." According to this authority it is a Christian duty to be angry at least part of the time. Anger is a virtue and one's ideals are lacking unless they include some measure of anger.

It is a curious thing that Paul's words should be taken as an injunction instead of a question. We have no punctuation by him; but the six words are just as apt to mean, "Be ye angry, and sin not?" as to mean, "Be ye angry and sin not." Farther on in the same epistle the writer said, "Let all bitterness, and wrath, and anger, and clamor, and evil speaking, be put away from you, with all malice: And be ye kind one to another, tenderhearted, forgiving one another, even as God for Christ's sake hath forgiven you." In his letter to the Colossians Paul speaks of anger in the same way. It is therefore evident that Paul did not advise the Ephesians to cultivate anger as a virtue; he asked them if it were possible to be angry without sinning, implying that it was not; and then he plainly admonished them to put away anger and be kind and forgiving.

The elements of human nature that would justify its weaknesses may insert words as well as punctuation marks in order to get the sanction of Scripture. In the common English version of the Bible, Christ Jesus is quoted as saying, "Ye have heard that it was said by them of old time, Thou shalt not kill; and whosoever shall kill shall be in danger of the judgment: but I say unto you, That whosoever is angry with his brother without a cause shall be in danger of the judgment." This version, completed in the year 1611, was based on Greek manuscripts which contained the words translated "without a cause." Since then so many ancient copies of the Greek text have been discovered which do not contain these words that the revised and other modern versions omit the words "without a cause." As a whole the evidence leads to the conclusion that the words thus translated were not in the original text, and that the Master taught, without qualification, that anger is a sin,—a sin like that which kills. There can be no doubt that he said, "Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you and persecute you; that ye may be the children of your Father which is in heaven."

The supposition that anger can ever be right springs from a false sense of God and man. Our Father which is in heaven is universal, unchangeable divine Love, and His children derive their qualities from Him. Any thought, word, or deed that does not express the nature of God, divine good, is foreign to man and has no actual existence. The beloved disciple said, "As he [God] is, so are we in this world." This saying has been taken to mean that God is like a human being; that His nature includes the weaknesses and passions which material sense imputes to man. But John could not have meant that, for he also said, "This then is the message which we have heard of him [Christ Jesus], and declare unto you, that God is light, and in him is no darkness at all." When John said, "As he [God] is, so are we in this world," he must have meant to refute the notion that man now is a mingling of good and evil with a chance of being something different after death. He must have meant to declare the eternal fact in Science that man is one in being with God, notwithstanding the false testimony of material sense. In this view of reality there can be no actual cause or occasion for becoming angry, for anger is based upon the supposed reality of evil.

The Discoverer of Christian Science elucidates this subject with these words: "It encourages sin to say, 'There is no sin,' and leave the subject there. Sin ultimates in sinner, and in this sense they are one. You cannot separate sin from the sinner, nor the sinner from his sin. The sin is the sinner, and *vice versa*, for such is the unity of evil; and together both sinner and sin will be destroyed by the supremacy of good. This, however, does not annihilate man, for to efface sin, *alias* the sinner, brings to light, makes apparent, the real man, even God's 'image and likeness'" (Retrospection and Introspection, p. 63). We can and should, therefore, separate sin from man, for while sin and the sinner are one, that one is sin. The individual who becomes angry thereby identifies himself with evil and has not yet learned this primary lesson of Christian Science, "that evil is the awful deception and unreality of existence" (Science and Health, p. 207).

The absolute distinction which Christian Science makes between good and evil establishes a definite standard and one by which much that the human conscience excuses or even approves is found to be classified as evil. According to the ethics of Science no thought can be considered right which does not abide in God—which does not express divine Principle. Anything short of this is at best a choice of evils. This rule was implied by John when he said, "All unrighteousness is sin." "Whoso abideth in him [God] sinneth not." Moreover, if the so-called human nature (a mingling of good and evil) were really man, it could never become essentially different from what it now seems to be. Hope of salvation is justified by the fact that evil is unreal—that the whole of man remains when the belief in evil has been subtracted.

EXPRESSION THE CURE FOR DEPRESSION.

IRVING C. TOMLINSON, M.A.

CHRISTIAN SCIENCE is found to be "a very present help" in overcoming the false claims of depression, discouragement, self-depreciation, self-condemnation, and all their unsubstantial ilk. In the old way of thinking, mortals often seem unable to banish the blues, but Christian Science explains that in reality there are no blues, and that the belief in them can be overcome by the truth. Blue thoughts can never be imposed upon us when we understand that we have no more right to entertain them than we have to welcome thoughts of theft or falsehood. We know that they are without substance or reality, for only the right is real. Every sense which is not good comes neither from God nor from the true man.

A feeling of gratitude is a closed door against these unwelcome visitors. If they try to take up their abode with us, let us remember how much we have for which to be grateful. When we are truly grateful to God for all His blessings, how insignificant seems whatever is unlike Him! In her own words (Poems, p. 4) our beloved Leader has given us the remedy for the false sense of depression when she says,—

> Wait, and love more for every hate, and fear
> No ill,—since God is good, and loss is gain.

On reflection it will appear that depression is the child of repression, for we get only as we give. When we are giving out love, we are receiving love. If we withhold the good, the good is withheld from us. Inversely, the cure for depression is expression, for if we will but give to others the love which is given to us, we cannot be depressed, for Jesus taught us to pray, "Forgive us our debts, as we forgive our debtors;" and Mrs. Eddy has given us its spiritual significance: "Love is reflected in love" (Science and Health, p. 17). God is ever seeking to manifest His love through us. If we repress that love, we feel the lack and call it depression. If we abundantly reflect this abundance of love, then we have that sense of freedom and gladness which we call health, harmony, joy, peace, heaven.

The prophet Isaiah says: "Ho, every one that thirsteth, come ye to the waters." Christian Science teaches that those who are governed by God, who reflect the divine, become fountains whence flow living waters of love and truth. The reservoir of divine Love is inexhaustible, but too many so-called Christians by repressing love permit themselves to become like unto the "dry water courses" of the wilderness. The clarion note of Christian Science is that God has given man dominion. All depression, all discord and inharmony, are the outcome of wrong thinking; health and harmony are the product of right thinking. As our revered Leader counsels, let us "love more." So shall we be to the thirsty perpetual and abundant fountains of living waters.

GUARDING OUR LITERATURE.

S. BELLE GORHAM.

TRULY the greatest gift that has come to this age is the Christian Science text-book, which elucidates so clearly and accurately the teachings and practice of the Master. It sets aside all the rubbish of human opinion and speculation which have so long obscured our vision of Truth, and it has again made plain the straight and narrow way. This priceless gift, the healing truth contained in "Science and Health with Key to the Scriptures," by Mrs. Eddy, is God's gift to humanity throughout the ages to come.

Those who today have accepted this gift are bearing witness to the blessings which it is daily bringing to them, and perhaps nothing gives them greater happiness than the opportunity to bear this message to others who are ready for it. We might say, then, that each one who receives the message of Truth, as our Leader has presented it to us, receives it not only for himself, but in trust for all who may afterward come to him for it, and he is to this extent its guardian. According to Webster, a guardian is "one who guards, preserves, or secures; one to whom any . . . thing is committed for protection, security, or preservation." We know that nothing can ever injure the truth, for it is indestructible; but the purport of its message to humanity became obscured, long ago, through adulteration and carelessness in the copying of manuscripts, and a similar tendency today cannot help to preserve it for this generation and for generations to come.

Each of us to whom the message of Truth comes through our Leader's works, or through any of our carefully edited periodicals (the channels provided by our Leader), should guard it most sacredly, and to those who are ready for it we should give it in its purity and entirety, and not through fragments copied, whether correctly or incorrectly, from these sources. We ourselves should never be satisfied with less than the original, and we should give nothing less to others. "But," many have said to the writer, "I have just copied a paragraph for my own use, so that I may take it with me to study while I am riding on the car." Inaccuracy is a tendency which cannot be guarded against too carefully, and the surest way to avoid it in connection with our authorized literature is to keep to the original always. If we are willing to study it from copies, we can never be sure that we are giving it to others with absolute correctness, for that with which we fill our own mental storehouse will be that which we will have to give to others. If our mental storehouse is filled with unadulterated truth, we shall have only pure and unadulterated truth to give to others. Shakespeare says,—

> To thine own self be true,
> And it must follow, as the night the day,
> Thou canst not then be false to any man.

Any thought, therefore, which would suggest to us that we are losing some good by such strict adherence to right, is but a false argument. If this is plainly seen, we do not need to be reminded that all literature sent out by The Christian Science Publishing Society is copyrighted, and in the case of our Leader's works with "all rights reserved." Mrs. Eddy speaks clearly and unmistakably to the point on this subject, in her article entitled "Advice to Students," in "Miscellaneous Writings."

A short time ago an incident occurred in the writer's experience which may serve as an illustration of the care that each one of us should take in helping to guard our literature faithfully. It was my privilege to take charge of a Christian Science reading-room in the West, and one day a young lady came in with a friend to read. Presently she took out a pencil and note-book, and when asked what her intention was, she replied that it was to copy something from one of our books; so as kindly as possible the right thought was presented to her. In conversation it developed that she had been interested in Christian Science but a few weeks, during a visit from her home, a little town in the North. She had no present means of purchasing a copy of our text-book, and her hunger for the truth had led her to copy passages in her note-book from time to time, as the opportunity had presented itself. She was to return to her home next day, where she knew of no one being interested in Christian Science, with only these copied fragments to show to her family or to any one who might want to hear of the message which our Leader has given to the world. And yet, after a moment of evident struggle, she accepted the right thought about this lovingly and gratefully. The truth had already become so sacred to her that she had no desire to use it unwisely.

Happily I had an extra copy of Science and Health of my own, and told her that she was welcome to the loan of it until she could get one for herself, if she would go

Digitized by Google

to my house for it, some blocks away. Out in the rainstorm she went to get it, returning to buy a *Quarterly*, and to express her thanks with a full heart; and I had the joy of knowing that the text-book itself, instead of copied fragments of it, was taken to her home town, to publish there the glad tidings in their purity and entirety. A few days later her friend told me that before leaving for the North the young lady had destroyed all copies which she had made.

Willing, loving obedience to Truth's demands has marked every step of our beloved Leader's pathway, and it was her faithfulness which fitted her to become entrusted with the message which she gave to us. Let us willingly and lovingly obey God's demand of us to keep it pure.

PROGRESSION.

MAJOR FAITHFULL CUMBERLEGE.

CHRISTIAN healing, without the use of matter or any material means, has been proved to be a practical method within the reach of all mankind and as efficacious now as in Jesus' time. It is a big step, however, from the admission that this is so, to individual demonstration of the power of Truth to heal a difficult case. Those who wish to take this step, and who cast about to see how they may get on the right line, quickly find that they stand greatly in need of spiritual sense. To remedy this lack it is necessary to devote time and energy to the gradual acquirement of a more thorough and correct knowledge of God, Spirit, and of the real, spiritual universe, through systematic study of the Scriptures, of Mrs. Eddy's writings, and the literature sent out by The Christian Science Publishing Society. The task will be facilitated proportionably as the student is patient, enduring, and self-denying; that is to say, is "willing rather to be absent from the body," in order "to be present with the Lord," to adopt and pursue the lofty ideals of that Mind which was in Christ Jesus.

"Ye must be born again," said Jesus, recognizing mankind's dense ignorance of Truth. Therefore a kindly warning against unreasonable aspirations is helpful to those who are learning their early lessons in Christian Science, and encourages those to persevere who might otherwise ignorantly expect to reap before they had sown, and so suffer disappointment, and perhaps doubt, because of unrealized expectations. It is a great help to the student to acquire a proper sense—neither excusing nor accusing—of mankind's present great distance from "the measure of the stature of the fulness of Christ," and of the reformation of self which is to be effected before men may reap all the fruits of Christlikeness.

Such a warning, endorsed by a reference to and perhaps a simple explanation of Jesus' forewarning, is especially comforting when, as sometimes happens, the physical, moral, and spiritual regeneration which comes of Christian healing is slow in appearing in some particular direction where it is most longingly awaited. This seeming delay is not due to any lack of potency in God, the Principle of Christian Science, who speaks and it is done, but the truth comes slowly to mortal sense because mortals are such slaves to their material beliefs. They are themselves responsible for the continuance of their sense of sickness or sin, as the case may be, from which they seek to escape, for their subservience to their material sense of the discord has the effect of holding its characteristics in their thoughts long after the truth has been made known to them and has healed them, as will eventually be shown to have been the case. "Idiotic" would appear to be the very mildest of terms that such perverseness deserved, did we not remember how very real the world of sense still seems to be, although we know now that the thoughts of mankind constitute all there is of it.

If we wonder at any time why the wholeness of man in the image and likeness of God is not being more quickly realized, now that human reason is on the side of Truth, we need only pause a moment to examine the minute details of some complex structure which purports to be composed of matter, and remind ourselves how the illusory vision of mortal thought called matter seems successfully to deny *in toto* and defy the testimony of Mind; then our questioning will give place to a sense of contentment to await patiently the fruits of further progress and gratitude that Christian Science has enabled us already to achieve so much.

Mortals should not be put off by apparent failures, and they will not be moved by them unduly when they have grasped the fundamentals of Christian Science and appreciate properly the unpreparedness of present-day human thought for higher demonstration of spiritual being. But it should be explained in good time to students of Christian Science that non-success in any right endeavor is only partial and temporary; that it is largely due to mankind's lack of understanding of the truth about God and the real universe, wherein Spirit is all and matter has no place; but that individual growth in spiritual understanding never fails to achieve a measure of success in exact proportion thereto.

It may be pointed out that once God is understood, even in the smallest degree, and the good effect of this understanding on health and human affairs generally is observed, a sense of confidence is established in the mind of the student, which grows with every fresh experience and fosters an ever increasing faith in the allness and omnipotence of God. Then, in proportion as God's omnipresence is recognized and implicit trust is placed in the sufficiency of the divine guidance which is always available, he who has eyes to see and ears to hear the promptings of Spirit begins to reject the selfish inclinations of material sense which formerly governed him, and which always lead to disease and death; with the result that he begins to be led unerringly by the divine Mind, God, in the way which passes through peace of mind, bodily health, and human prosperity to the goal in Spirit. But until mortals have learned to walk altogether humbly with their God,—"to do justly, and to love mercy,"—they remain more or less swayed by material beliefs, and must reap as they sow.

On the other hand, students of Christian Science may rightly be encouraged with the inspiring truth that steadily increasing power in demonstration is the sure reward for growth in grace. Abundant grace comes sooner or later to every one who tries persistently to practise the Christian virtues every moment of the daily life, being possessed with a great longing to be kindly, forgiving, and unselfish, to labor for the good of others, and to reflect endurance, faithfulness, and benevolence. Mankind's receiving of good is always in exact proportion to their earnest seeking after God.

PEACE.

MYRTLE CLARK HOVEY.

"PEACE I leave with you, my peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be afraid." So spake the great Teacher, and these words were given to the world at a time when to mortal sense the very antithesis of peace seemed rampant. Is not this teaching, however, a lesson for us today, as much as it was for the Master's disciples in the days of old?

When error seems to be doing its worst, and by its very insistence would make us believe in its reality, do we not need to ponder often the words of Christ Jesus, as, after describing the mental turmoil of the "last days," he said to his students: "See that ye be not troubled." He never taught that peace was to be won by indolence or inactivity, but he who was the embodiment of ceaseless activity in righteousness (right thinking and doing), promised that those who followed him, doing the works which he did, should have peace. He said, "My peace I give unto you,"

Digitized by Google

—the peace that cometh from an absolute understanding of the allness of God and the nothingness and powerlessness of evil of every name—excepting the power to destroy itself.

In Science and Health (p. 264) our dear Leader gives us some beautiful thoughts in regard to the real, spiritual universe of God's creating; and they were brought forcibly to the present writer's thought, not long since, as she sat on the beach in a beautiful little town near the sea, just at the close of day, and watched the afterglow of the setting sun, which had seemingly dropped into the ocean, behind the islands to the southwest. True to its name, the Pacific ocean was calm and peaceful; the air was soft and balmy, and save for the swish of the waves and an occasional bird-note all was quietly serene, while the sky above the ocean was all aglow with the most wonderful coloring, which was marvelously reflected in the water as well as on the mountainous islands some twenty odd miles distant.

The day's newspapers had contained accounts of the blizzards and zero weather which were prevailing in the East, and as the writer pondered on the seeming impossibility of such conditions being present anywhere, when all nature was speaking to her of perpetual warmth and comfort only, she caught a fuller glimpse than ever before of the unreality of evil as typified by wintry blasts and stinging cold, and of the allness of God and the omnipresence of divine Love which were expressed in the beautiful scene outstretched before her and in the harmony of her surroundings. Thus she was enabled to see more clearly than before that the evidences of sin, sickness, and death, which seem at times to clamor so loudly for recognition, are unknown to and unheard by "that consciousness which God bestows" (Science and Health, p. 573); and that only as we continually, faithfully dwell "in the secret place of the most High," are we permitted to experience "the peace of God, which passeth all understanding," and to obey Christ Jesus' injunction, "See that ye be not troubled" by the processes which point to error's self-destruction, for these but foretell the establishment of enduring peace.

IMPERSONALITY OF TRUTH.

WILLIAM E. BROWN.

If there is one thing more than another for which the world owes our Leader, Mrs. Eddy, a debt of unfailing gratitude, it is her continuous insistence upon the impersonal nature of Truth. For years she counseled her students and followers not to look to her personality for guidance, but to the eternal Truth which through her was revealed to the world. She early recognized the danger of depending upon personality instead of Principle, and wisely took steps to avoid the establishment of personal authority in regard to herself and also in connection with the Churches of Christ, Scientist. Of personal worship she has written thus in the pamphlet "Personal Contagion": "Every loss in grace and growth spiritual, since time began, has come from injustice and personal contagion. Had the ages helped their leaders to, and let them alone in, God's glory, the world would not have lost the Science of Christianity."

No more selfless revelator and teacher of spiritual truths ever lived than the Discoverer of Christian Science. She rebuked personal adoration and requested her followers to abstain from all that savored of personal homage, ever exhorting her students to follow her only as she followed Christ. This selflessness, this meekness, evidences the divine nature of her message to mankind and encourages the student to lean upon Principle to guide and direct his every action. What supreme satisfaction to realize that one can appeal direct to divine Love for counsel and guidance; that he is free, like the high priests of old, to enter the holy of holies and commune with the Father of all.

Christian Science, the exact knowledge of Christianity, is not true merely because it was taught by Jesus in the first century or by Mrs. Eddy in the twentieth century. On the contrary, these teachers taught that which had always been true. In reply to Pilate, Jesus said, "For this cause came I into the world, that I should bear witness unto the truth." This truth had existed throughout all time, and the great Teacher was simply bearing witness to it. How helpful is this thought that Truth is ever present, ever manifesting itself when fitting channels are provided. This idea is beautifully expressed in the words of a most helpful hymn by Archbishop Trench, who urges mankind to "make channels for the streams of love," and he reminds us that "love has overflowing streams, to fill them every one."

Emerson tells us that all men may think the thoughts which Paul thought if they are only in touch with their source. Jesus said, "If any man will do his will, he shall know of the doctrine, whether it be of God, or whether I speak of myself." Truth, then, being impersonal, must be gained in an impersonal manner. All that a human teacher can do is to state the truth, point the way and give some evidence that what he teaches is true, but the realization of this truth and the ability to demonstrate it come only, as Mrs. Eddy says, "through silent utterances and divine anointing which quicken and increase the beneficial effects of Christianity" (Science and Health, p. 367).

Jesus constantly strove to direct his disciples' thoughts away from himself to the truth he was teaching them. Evidently this was an oft-repeated lesson not thoroughly learned by his students, for he finally said to them, "It is expedient for you that I go away: for if I go not away, the Comforter will not come unto you." Experience shows that the tendency of the learner is to lean heavily upon the teacher, much more so than the pupil is aware. Often when the teacher is not accessible and the student is obliged to work out problems with the aid of the law and rule he has been taught, then real progress is made, and not only so, but enduring progress, for that which is gained through individual effort of this kind is permanently fixed in consciousness, and is ever ready to aid in solving higher problems.

The neophyte in Christian Science frequently makes the mistake of attempting to guide his own career by the experience of others, and in the constant running to and fro for advice, and the putting of many questions, much valuable time is consumed and confusion of thought is begotten. The beginner in the study of this great Science of Life will do well to remember that each individual possesses a separate and distinct identity whose needs in many respects are quite different from those of his neighbor, and as a rule he will make more genuine progress through his own study and application of the teaching of Christian Science. Indeed this is one of the great blessings of class instruction, that it prepares and encourages one to work out his own salvation, assisted by an ever increasing measure of spiritual understanding which results from the constant endeavor to overcome and destroy all that is unlike the Mind of Christ.

Christian Science teaches and demonstrates that all may have immediate access to infinite Mind without the necessity of personal mediation, and this growth will go on until, in the language of the Revelator, we shall be made "unto our God kings and priests: and we shall reign on the earth."

Be proud of material possessions, or vain of personal achievements, and all will be taken from you: riches will dwindle; past glories will fade; men will revile and persecute you: for you have bowed down to false gods, and shut yourself off from the real power of the universe—the one God, good,—of whom, and through whom, and by whom, as Paul says, "are all things."

SELECTED ARTICLES.

[Henry Deutsch in *Minneota* (Minn.) *Mascot.*]

Divine power we cannot describe, because the finite has not the capacity to give expression to the infinite; but in the moments when we rise above the sordid tastes, appetites, and passions of the human mind, and turn our gaze toward the spiritual, we are able to catch some glimpse of this power through the sense of the nearness and presence of the all-pervading Spirit, manifest as infinite Love.

It is upon this foundation of absolute faith in an infinite God, that Christian Science is based,—faith, defined in the Scriptures as "the substance of things hoped for, the evidence of things not seen," coupled with the understanding that it is possible here and now to gain a sense of that presence and its manifestation, in a body restored to health and a man manifesting the harmony of Soul. There is nothing occult nor mysterious about Christian Science or its operations. As Mrs. Eddy says, "These mighty works are not supernatural, but supremely natural. They are the sign of Immanuel, or 'God with us,'—a divine influence ever present in human consciousness and repeating itself, coming now as was promised aforetime" (Science and Health, Pref., p. xi.).

It would be difficult to find any creed, of the many in the Christian church, that follows so closely and adheres so conscientiously to the teachings of the Master as does Christian Science, and that not only in the letter but in the spirit, because Christian Science teaches that its followers must take the undivided garment and obey the Master not only in part but wholly.

Christian Science attributes to the Master all the glory and the honor and the reverence that is bestowed upon him by the other Christian sects, and then goes one step farther and adds to the others the tribute of respect, by declaring that he meant not only that his words should be followed in part, but wholly; that when he said, "Preach the gospel" and "heal the sick," he meant the latter as well as the former. Christian Science recognizes the Master as the Saviour, but robes him with a greater glory when it honors the saving, divine Principle which he taught and exemplified, rather than the human personality which illustrated it. It honors the Master to the highest extent that he can be honored, because, not satisfied with merely saying that it believes that the Principle he taught has power to save from sickness as well as sin, it proves the verity of its faith by the test which the Master proclaimed as the sign of those who followed him, "By their fruits ye shall know them;" and "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

Christian Science teaches that evil and sin do seem real to the material sense, even as sickness seems real to the person suffering therefrom. Likewise two parallel lines of railroad track seem to converge and meet; a mirage seems an actual picture, and in innumerable other instances we find that things seem real to the physical senses which under the explanations of science are shown to be without foundation or reality, and thus are classified as mere seemings or deflections from the actual. In the same way Christian Science treats deflections from what must be the actual reality. The Scriptures declare that all things were made by God,—"All things were made by him; and without him was not any thing made that was made." The Scripture also says that "God saw every thing that he had made, and, behold, it was very good."

It is impossible to conceive of God as Spirit, as Love, and at the same time clothe Him with the possibility of hate, sin, or evil, or hold Him responsible for the creation thereof. Christian Science teaches that God never created evil, and therefore—inasmuch as He has created everything—evil is not an actuality, but is simply an erroneous conception arising from the absence of a clear thought of God, just as darkness, which seems to be real, is in fact only the absence of light.

We claim that only the good is, or can be, real and eternal, and it must necessarily follow then, that, viewed from the standpoint of the ultimate, evil is unreal, or simply the absence of good; that when consciousness is filled with the idea of God, good, Truth and Love, all conception of evil will be proven to be an unreality. This is not a mere theory, but is susceptible of proof, and in thousands and thousands of cases, in all sections of the civilized world, one may find evidence to substantiate this claim of Christian Science.

Christian Scientists are not primarily interested in the betterment of their physical condition, but it has been found in the brief experience of thousands that when human consciousness is stirred and turned from the contemplation of things mortal and material to things immortal and spiritual, when it is freed from sin, appetites, and passions, the outward manifestation is the healing of the physical body. But in the lives of those whom Christian Science has touched, it will be found that the great appreciation is not so much for the physical healing as it is for the sense of spiritual uplift, and the glimpse of the nearness of God, which brings to man a clear comprehension of his unity with his Maker.

So long as truth endures, Christian Science will endure as a religion, because it is founded on truth, the teachings of the Master, and they are eternal. Its astonishing growth within the comparatively brief period of its existence augurs well not only for its continued duration, but for a most fruitful future. It cries to the world, the sin-sick and despairing, "Ho, every one that thirsteth, come ye to the waters;" and to those who heed it offers, not the vain promises of a future impalpable salvation, but a present-day redemption from sin, suffering, and disease, a practical realization of what the Master meant when he said, "The kingdom of God is within you." Christian Science is indeed the Comforter whose coming the Master foretold, and it has fulfilled in this age the promise of the Master, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

[Charles K. Skinner in *Escanaba* (Mich.) *Morning Press.*]

If to permit the use of its columns for the correction of misstatements made by another publication—whether against Christian Science or any other topic or personality—constitutes championship, the *Morning Press* has that honor. It was certainly an act of courtesy on the part of its editor, which would doubtless be extended to any other organization in like circumstances. It is certainly appreciated by all fair-minded people of Escanaba. The fact that the editor of another paper could not grasp the meaning of the statements respecting a recent critic, does not prove that the majority of your readers did not understand them. It has been well said that one taking up the New Testament with a sense of hatred toward Jesus and with an opposition to his teachings, could gain no understanding from them. The same may be said of those who read the text-book of Christian Science, Science and Health, for the purpose of criticism and not in the spirit of honest investigation.

With regard to the sermon from the minister in question concerning Christian Science, the gentleman has made a number of assertions that can be considered only as his personal opinion or misapprehension of this religion. Assertions without proof, like clouds without water, are the favorite method of opponents of any subject which they

Digitized by Google

do not understand, but they constitute no argument in the minds of the earnest investigators. It is in the memory of many still living that the inventor of the telegraph was jeered and scoffed at for his temerity in insisting that general correspondence could be carried on in a quicker way than by the post. Still later, words could not express the disgust of the unprogressive for the individual who had faith in the wireless method of communication. None of these scoffers, however, could give any reason for their position, only it was "agin all reason," as an old pioneer of the early days said of the locomotive before he had seen it. In this present hour of advancement the people are not sitting idly by and accepting for truth every unfounded assertion that comes from the pulpit or platform. They ask for a reason and the proofs.

One objection to Christian Science was because of "its absolute dependence upon God." This is a most astounding statement to come from the clergy, as reliance upon God at all times and in all places is the fundamental teaching of the Bible. In the Psalms we read, "No good thing will he [the Lord] withhold from them that walk uprightly." Let the faint-hearted read these words; "Commit thy way unto the Lord; trust also in him; and he shall bring it to pass." Where can more positive assurance be found of the unchanging love and care of God for His children than in the ninety-first Psalm and in the seventh chapter of Deuteronomy? The Bible is full of God's promises of help and succor to all who trust Him and are obedient to His teachings. But how many do trust Him and are obedient? The only demand made for all the blessings that we can possibly need is right living; and right living means first right thinking, next right acting. It means a close observance of the golden rule. How many are willing to analyze their own thoughts and actions to such a degree? How much selfishness on every line would vanish, how much hatred, malice, dishonesty, debauchery would flee away, if the world for one short day would keep the two commandments: "Thou shalt have no other gods before me," and "Thou shalt love thy neighbor as thyself"!

Christian Science is trying to teach the world to practise right living in every-day life. If its plan of overcoming evil differs from that of other religious denominations, why criticize it if there is no interference with others' rights? Jesus gave but one rule by which those who kept his commandments should be known, and that was that they should do the works which he did. It would appear, then, that the practice of any religion which changes an evil man or woman into a respectable citizen, reforms a drunkard, comforts the sorrowing, and heals the sick, could not properly be called a "public injury" or "a grievous wrong."

There is nothing in the teaching of Christian Science that suggests "no food, no fresh air, no water, no washing." This interpretation is but an inference of our critic. The facts are, and cannot be set aside, that in Christian Science homes, schools, and churches, sanitation in every form, good food and clothing, is at least as much if not more in evidence than in most other places. The doors are open, let any opponent prove his contention. We are told that to believe the Scripture, "Take no thought for your life, what ye shall eat, or what ye shall drink," is blasphemous if taken in the sense ascribed by Christian Science, viz., that we are to recognize "God, the Father and Mother of all, as able to feed and clothe man as He doth the lilies" (Science and Health, p. 530). In considering this point it is well to be clear as to whether we really believe God to be omnipotent, and whether we think Jesus was teaching what he knew about God. Also, whether an assertion by one who has not been able to work out a problem is to be considered more valuable than a statement by those who have done so successfully. It is simply a question as to whether one believes that God is all powerful and able to do His own will without the aid of matter, or if a frail mortal must be called in to assist.

Christian Science in no place teaches that one is to sit and fold his hands and wait, Micawber fashion, for "something to turn up." Mrs. Eddy says the watchword of Christian Science is "Work—work—work" (Messages, p. 20), and Christian Scientists are taught that true spirituality means to do our work, whatever it is, in the best possible manner, as it were for God. It further teaches that when we do our work faithfully from a right motive, we are to "take no thought for the morrow;" that the same loving care which Jesus taught men to expect from God will protect, guide, and guard him who truly trusts God.

The words quoted by our critic, "We are finding more and more, that food does not sustain life," are true when understood, and one does not need to be a Christian Scientist to admit this. When we realize that God is the only Life that is real, how is material food to sustain that Life? Jesus said, speaking of the spiritual food, "I have meat to eat that ye know not of," and yet he partook of the food brought him by the disciples. His concessions to material things, however, were made that he might place himself on a level with the understanding of the people. He said to the disciples, "It is the spirit that quickeneth; the flesh profiteth nothing."

[Edward W. Dickey in *Los Angeles* (Cal.) *Herald*.]

One of the oldest questions in Christian history is, "What shall I do to be saved?" and the answer is, "Believe on the Lord Jesus Christ, and thou shalt be saved."

Christendom has been trying for two thousand years to determine what constituted an acceptable belief in Christ, or in other words the Christ-way, and in so doing has externalized itself into something like one hundred and sixty-five different sects with a widely divergent sense of creed and practice. This in and of itself constitutes *prima facie* evidence that none have been following the Christ-way. It is not possible for the Christian to believe them all nor to reconcile their different interpretations of Christ, as they are in many respects, both as to statement and practice, irreconcilable. Quite apart from what critics may say in the matter, and apart from all discussion and debate thereon, there must exist and always has existed the truth about God, man, and Christ. In other words, there must be and always has been a Christ-Science or Christian Science. The very existence of being proclaims a truth about it, and the very existence of the Christ proclaims an exact truth about it, and this is of necessity a scientific way and a Christian way. Jesus said, "Ye shall know the truth, and the truth shall make you free."

This Christ-knowing, or Science of Christianity, must from its very nature be infinite in scope and purpose and all inclusive. Mrs. Eddy, therefore, properly declared that "outside of this Science all is mutable" (Science and Health, p. 202). Again, this Christ-way cannot from its very nature be discerned from a material basis. Being the way of Christ-knowledge, it must be built upon the everlasting foundation of demonstrable truth, which emphasizes a correlative fact, that a person who has not tested and proved Christian Science is not in a position to pass judgment upon it. This is an axiomatic truth wherever and whenever Christian Science may be under discussion, as much so as though mathematics were being debated.

Christian Science, in stating what constitutes an acceptable belief in Christ, declares, first, that "Christ came to do the will of God," which is in accord with his statement, "I seek . . . the will of the Father." In doing the work of the Father, he therefore acted in accord with the changeless will and plan of God, who the Scriptures declare is without "variableness, neither shadow of turning." When, therefore, he healed the sick and the sinning he did it in the only right way. Christian Science further shows that the one right way is a changeless way and extends throughout

Digitized by Google

the cycles of eternity. As a further declaration Christian Science declares that the evils which Christ came to destroy were not of God or Truth, therefore not real. It is upon the basis of the unreal or fictitious claim of evil to power and reality that Christian Science destroys all that is not like God. It is doing what some one very aptly described as "turning things upside down, in order to turn them right side up."

Christian Science, then, does not deny the need of a Saviour, the atoning power of Christ, nor the spiritual value of the resurrection and ascension. It is true that in many of these theological points it disagrees with those of other churches, but Mrs. Eddy points to the fruits of her teaching as sufficient evidence of their spiritual source and worth. The overlooking of evil, or the teaching that "lying is a virtue," is a denial of Christian Science and not even remotely akin to what it teaches. One who sins or indulges in evil in thought or deed identifies himself with it, makes it a reality, and in the language of the Scriptures is heaping up "wrath against the day of wrath." Christian Science does not regard evil as a person, nor is it reasonable to infer that the Scriptures so teach. It is stated that the Master cast seven devils out of Mary Magdalene. Were these seven persons in one person? or were they evil beliefs? The origin of the word devil means evil, and Jesus spoke of the devil as having "no truth in him," and being "a liar, and the father of it." He spoke of the woman whom Satan "hath bound," and certainly God had not bound the woman, for Christ Jesus straightway healed her of her infirmities. This is Christian Science practice.

[Frank Bell in *Stroudsburg* (Pa.) *Times*.]

A writer in the Bible question department of a recent issue undertook to answer the question why professing Christians generally do not endeavor to carry out the Master's command to heal the sick as do the Christian Scientists. His only response to this well-put query is an expression of his personal opinion that "these miraculous powers were given to the twelve apostles only, with the added power of conferring these gifts upon others; but that those upon whom the gift of healing was bestowed were unable to confer it upon others, hence it ceased to be with the church."

The inaccuracy of our friend's presentation of this subject is shown in the fact that he disregards the statement in Luke x, that the Master appointed, in addition to the twelve, "other seventy" disciples also, and sent them "into every city and place" to "heal the sick that are therein," and that they reported to him their great success in this work. Almost the last recorded words of the Master to the eleven were: "Go ye therefore, and teach all nations, . . . teaching them to observe all things whatsoever I have commanded you." He did not say all things except the healing of the sick. Elsewhere he said: "He that believeth on me, the works that I do shall he do also." Certainly the works that he did included the healing of the sick by purely spiritual means, and certainly the ability to "believe" on him did not pass away with the apostles and their immediate associates. There is abundant record that for at least three centuries the church did not undertake to divide the command of its Founder, "to preach the gospel, and to heal the sick." "These signs," said Jesus, "shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." It is not on record that he gave any other definition of a Christian.

The intimation that Christian Scientists neglect the injunction, "Freely ye have received, freely give," is wholly uncalled for and without justification. A little investigation would have shown our critic that Christian Scientists generally, and Christian Science practitioners in particular, are devoting much more of their time, thought, and means freely for the benefit of their fellow men than they were able to see their way clear to give before becoming Christian Scientists. Those who abandon secular pursuits and devote themselves wholly to the work, must needs look to the beneficiaries of their efforts for the necessaries of life; but that is a condition common to all religious bodies, and is in keeping with the Scriptural rule that "the laborer is worthy of his hire."

Finally, it should be said that if the healing of the sick by spiritual means is one of "these signs" that "shall follow them that believe," such healing is neither miraculous nor merely "the power of mind over matter," but the natural working out of good that inevitably follows the overcoming of sin, fear, and other obstructing elements in human consciousness. There is abundant evidence that Christian Science does all that is claimed for it, but no one need either accept or reject this statement on the mere say-so of some one else. It is available for all, and those who wish to put it to such tests in their individual experience as will satisfy themselves, may learn at first hand that no good that was possible nineteen centuries ago is denied to "them that believe" today.

[Charles W. J. Teucant in *Glasgow* (Scot.) *Record and Mail*.]

If *materia medica* were an exact science, which could be depended upon in every case, there would be no need for any other system of healing. Nearly two thousand years ago, Jesus Christ presented to the world a perfect method of healing sin and disease and destroying death. He was never known to fail in a single case, no matter what the malady. He taught his disciples to heal all manner of disease and sin, and to raise the dead, and when they seemingly failed in the case of the lunatic boy, he stated that their failure was due to their unbelief, and said, "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place; and it shall remove; and nothing shall be impossible unto you. Howbeit this kind goeth not out but by prayer and fasting."

Now Christendom has accepted the fact that the method of Jesus Christ is the only one whereby the sinner can be saved; then why does it not accept the same method by which the sick should be healed, especially since our Master classified sin and disease in the same category, and healed them by the same spiritual means? Has Christendom found a better way in the present-day systems? We doubt it. It is a matter of common knowledge that the early Christians, for over two hundred years after Christ Jesus left this earth, were able to heal the sick and raise the dead by the prayer of spiritual understanding.

Christian Science is the rediscovery of the scientific method by which Christ Jesus, his disciples, and the early Christians attained their wonderful results, and cases of every known disease, functional and organic, have been perfectly cured by this means—cases, too, which had baffled all other methods of healing.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

"ROTATION IN OFFICE."

WE have received a number of requests for the republication of what our Leader wrote as defining her meaning of the phrase "rotation in office," and we are glad to comply with these requests. The following statement by Mrs. Eddy is taken from her letter published in the *Sentinel* of March 13, 1909:—

"By 'rotation in office' I do not mean that minor officers who are filling their positions satisfactorily should be removed every three years, or be elevated to offices for which they are not qualified."

"ASK OF GOD."

As we study the writings of Mrs. Eddy we cannot fail to note that she is continually admonishing Christian Scientists to turn to God, to seek divine guidance in each and every problem that presents itself, rather than to depend upon fallible human personality. This divine guidance is what she ever sought for herself,—she could say with the psalmist, "The Lord is my strength and my shield; my heart trusted in him, and I am helped: therefore my heart greatly rejoiceth; and with my song will I praise him."

It was, therefore, but consistent with Mrs. Eddy's own practice and faith, when her students, recognizing in her the one who had set their feet in the heavenly way, sought to make her their conscience, to place upon her the burden of decision as to the right or wrong of any question, that she should remind them of the counsel of St. James: "If any of you lack wisdom, let him ask of God, that giveth to all men liberally, and upbraideth not; and it shall be given him;" that she should strive to turn their gaze heavenward, to seek of God.

It seems, sometimes, that we must talk over our own particular perplexities with some one else, but he is our true friend who points us rather to the infiniteness of divine wisdom; that there is no problem that can confront Christian Scientists which is not possible of solution through the turning to divine Mind, the unchanging God whose ear is ever open to them that put their trust in Him, who ask aright, "nothing wavering." Where we are most likely to err is in thinking that it is only when sickness and sin beset us that we have any need to "ask of God;" but the same Principle that heals and saves is equally applicable, equally available for the solution of the problems which come to those who feel themselves responsible for the proper conduct of their local church affairs, yet make the mistake of leaning upon mortal judgment rather than omniscient and omnipotent Mind.

There is, however, one important and essential factor in this turning with our every need to Him who is Life, Truth, and Love, and that is that we must seek Him, as the Master declared, "in spirit and in truth;" must recognize that God is Spirit and that His creation is spiritual and good only. We read in Science and Health (p. 13): "If we pray to God as a corporeal person, this will prevent us from relinquishing the human doubts and fears which attend such a belief, and so we cannot grasp the wonders wrought by infinite, incorporeal Love, to whom all things are possible." We must know that true prayer, as taught in the chapter on that subject in Science and Health, is efficacious for our every need, that the Principle of Christian Science is illimitable and unchanging, and thus realize that harmony to which we are entitled. We must demonstrate the supreme power of omnipotent Mind in all our affairs, also that God is not a respecter of persons and that He is revealed to those who seek Him aright, who do not ask amiss.

If, on the contrary, we depend upon human opinions and advice as guides to our actions and to bring about harmony in our affairs, we lose opportunities to prove the omnipotence of God. Like the disciples we may toil all night fruitlessly, be tossed hither and thither on the restless, ever changing sea of mortal theories, until the dawn breaks and we hear the Christ bidding us, "Launch out into the deep." If we heed his command, cast aside the material dependences and conflicting human opinions that have profited us nothing, put our trust wholly in Him who is able to save even to the uttermost, without whom not a sparrow falleth, we shall not find our confidence misplaced, we shall know of a surety that God, good, alone governs, and the problems that have so perplexed us in the darkness of doubt and despair will have found their only possible solution in the clear light of unerring wisdom.

ARCHIBALD MCLELLAN.

"A WILLING MIND."

A GREAT deal is said at the present time about the power of the human will, indeed there are many who mistakenly suppose that Christian Scientists attempt to heal themselves and others by means of will-power, when it is instead the surrender of the belief that man has a mind separate from God which is the first step toward healing. It would seem as if it were an easy matter to take this step, but the struggles of humanity to have their own way, from childhood up, prove that the opposite is true; that a mighty struggle with mortal sense is needed before we are ready to say, under all circumstances, "Not my will, but thine, be done."

Even the great Teacher had to meet and master the universal belief in a material or carnal mind, but happily for us he knew beyond all question how this must be done when he said, "The spirit indeed is willing." In the strength of infinite Truth he pressed on to victory, knowing that the fleshly mind could neither help nor hinder his demonstration. Many of us begin the day with the prayer, "Thy will be done in earth, as it is in heaven," but how many are there who render willing service to the demands of God's law each hour of the day; yet in this way alone can we help to bring about the fulfilment of our own prayer.

It is deeply interesting to note the many references throughout the Bible to the "willing mind." David counsels his son Solomon to know God and to "serve him with a perfect heart and with a willing mind." He also bids him seek out "for all the service of the house of God . . . every willing skilful man, for any manner of service." How often we hear it said that some one is such a valuable servant mainly because of his or her willingness to respond readily and cheerfully to every right requirement. On the other hand, there are those who waste their energies in a fruitless struggle on the side of the undisciplined human will, which ever seeks to have its own way, however much it may obstruct progress, a tendency which explains many cases of slow healing. We should always remember that healing could never be slow if God's will prevailed. The apostle Peter assures us that "the Lord is not slack concerning his promise," and that He is "not willing that any should perish." People speak of obstinate ailments, but these are often largely due to obstinacy of disposition, possibly dating back to childhood.

The remedy for every manifestation of error is intelligent recognition of the divine will and ready obedience to its demands. Here some may ask what this implies, to which it may be answered that perfection is the unceasing demand of God's law; yet no one need be discouraged because he is unable to reach the goal at once, for St. Paul

Digitized by Google

tells us that "if there be first a willing mind, it is accepted according to that a man hath." Mrs. Eddy says that we must be willing to sacrifice everything to gain holiness, wholeness, and that "prayer, coupled with a fervent habitual desire to know and do the will of God, will bring us into all Truth" (Science and Health, p. 11). This recalls the prophet's assurance, "If ye be willing and obedient, ye shall eat the good of the land."

The perfect poise and quiet strength of one who, no longer a slave of human will, reflects in obedience the will of infinite wisdom, who holds ever to the Christ-ideal, recalls the prophet's words, "He shall not fail nor be discouraged," for he knows that to the willing mind each step brings a nearer realization of the perfect will of God.

ANNIE M. KNOTT.

MIDST TURBULENCE, YET UNTROUBLED.

THERE are many Christian people who are tempted to be more or less disturbed—and some of them are Christian Scientists—in view of the fact that the many seem to be getting so far away from that peaceful pursuit of an established order which is so agreeable to human sense. In the religious as well as in the political and the economic world, disagreements and disharmonies are so pronounced today as to beget in the hearts of those who are not grounded and stablished in Truth, a sense of unrest which sometimes breeds weakening anxiety and heartache. Especially are some troubled with the fact that dissensions and divisions should have appeared in the church, to provoke in some instances the world's contempt even for the very word, Christian.

These people are right in being discontented with anything and everything which is unideal, which does not speak for the peaceful rule of Love and Truth, but they make a mistake in forgetting that assertive manifestations of opposing error have invariably attended the appearing of the Christ-idea; and more, that these phenomena are sure evidences of the presence of this idea. The uncovering of falsity by Truth, the eternal condemnation of it in human consciousness, has always seemed to excite the error, though Truth's statement respecting it, "I never knew you," remains forever true; and thus, though he was the embodiment of gentle goodness, the coming of the Son of man precipitated that exhibition of passion and hatred which culminated in history's greatest tragedy.

This resistance of mortal sense to God's redemptive word has been manifested not only in the experience of every great leader of reform, including her whom Christian Scientists have occasion to love and revere beyond words, but in the consciousness of every truth-seeker. Tempers and dispositions which have remained so latent as to have been quite undiscovered to us, perchance, may have suddenly asserted themselves in a way that surprised us as well as our observing friends, and all in evidence that the truth, to which we may have presented but a half open door, has come into our lives to turn and overturn until he "whose right it is" shall be enthroned. To understand these phenomena of error is well, to be disturbed and discouraged by them, or to make much of them in our own thought or in our intercourse with others, thus magnifying their threatened ills, is unwarranted and unwise; and here again, to follow the loving counsel, "Allow nothing but His likeness to abide in your thought" (Science and Health, p. 495), is the one way to find repose and peace.

Every such experience, however, does call upon Christian Scientists to be, not anxious, but alert, self-commanding, consecrated, spiritual, sovereign in Christ. No one ever excited the sea of mortal sense so violently as did the Master, but at the moment when its waves threatened to engulf him and his followers, he spake the word which ruled them and there was a great calm. He was able to walk upon the troubled waters, and this it is ours also to do. It is here that we have most frequently and most lamentably failed. He who cannot meet the assaults of error which his own declarations of truth may have precipitated, is likely to suffer defeat and leave in the one addressed a condition of thought which is less promising than that which preceded; but he who in the presence of every event rises "in the strength of Spirit to resist all that is unlike good" (*Ibid.*, p. 393), will find in every untoward manifestation of error opportunity to demonstrate the present power of Truth to prove the nothingness of vaunted evil, the abiding efficiency of the Christ to overcome all opposition and save unto the uttermost.

JOHN B. WILLIS.

AMONG THE CHURCHES.

WILMETTE, ILL.

First Church of Christ, Scientist, corner of Tenth street and Central avenue, was dedicated Sunday, Sept. 24. Services were held at 10:45 a.m. and at 3:30 p.m., and both services were largely attended. The church has been built five years, but Christian Science churches are not dedicated until entirely paid for. The dedication address, delivered by the president of the church, was in part as follows:—

This material church, a symbol of "the structure of Truth and Love (Science and Health, p. 583), was organized Nov. 10, 1896, by a few earnest seekers after Truth, who leased a store on Central avenue in which to hold services. Later they moved to Jones Hall on Willmette avenue. It was while holding services in the hall that active work was begun in selecting the lot and making plans for the church. The laying of the corner-stone was on Oct. 5, 1905, and the opening services were held May 13, 1906. Since that time they have purchased the organ and lifted the entire indebtedness upon the building, demonstrating, in a measure at least, that "divine Love always has met and always will meet every human need" (Science and Health, p. 494).—*Local News.*

VIRDEN, MAN.

In the spring of 1904 a number of people in Virden who had become interested in Christian Science through friends who had been healed of diseases, some of which are generally regarded as incurable, united and formed a Christian Science society. The membership gradually increased and in April, 1905, First Church of Christ, Scientist, was organized. In 1906 a desirable building site one hundred by one hundred and seventeen feet, at the corner of Queen street and Ninth avenue, was purchased by one of the members for the church, and by 1909 the purchase price was fully repaid to this member.

The church services have been held since 1905 in the Fire Hall, which has answered the purpose very well. The matter of erecting a church was recently taken up by the members, and plans have been prepared. The building designed is modest, but tastefully finished, and will be in brick-veneer, Virden brick being principally used. It is calculated to meet the present needs of the church, and lends itself to future expansion.—*Empire-Advance.*

WINSTED, CONN.

The corner-stone of the Christian Science church edifice was laid early this morning [Sept. 26], there being present only the building committee and governing officers of the society. The service consisted of readings from the Bible and the Christian Science text-book, Science and Health, after which the corner-stone was put in place and the clerk placed within it a sealed copper box with its contents. After the stone had been sealed, the service was concluded with silent prayer, followed by the audible repetition of the Lord's Prayer.—*Winsted Citizen.*

THE LECTURES.

SYDNEY, N. S. W.

Aug. 17 North Sydney had its first Christian Science lecture. The lecture was by William D. McCrackan, M.A., and was given in the Warringa Hall, Neutral Bay, where Second Church of Christ, Scientist, Sydney, holds its services. About five hundred were present, and considering that the district is purely suburban and residential, and is served by a rather infrequent car service, we are all delighted with the attendance. The lecture itself was splendid, just the thing for a community that knows little of the subject. It was listened to with marked attention, and at the close the lecturer was heartily applauded. The chair was occupied by our chairman of directors, James Peddle, and his opening remarks were as follows:—

At Boston, Massachusetts, in the United States of America, there is established The First Church of Christ, Scientist, which is the central Christian Science organization. The First Church of Christ, Scientist, has instituted as one branch of its activities, a board of lectureship, which is composed of a number of those Christian Science students whose work, experience, and understanding of its teachings especially qualifies them to lecture on this subject. In order that the object for which the Christian Science board of lectureship is established may be attained, every branch Church of Christ, Scientist, throughout the world is entitled to call on a lecturer, and provide at least one public lecture every year.

Second Church of Christ, Scientist, Sydney, was organized on the North Side a few months ago, and it has been its privilege to invite the residents of these northern suburbs to attend Warringa Hall this afternoon, to listen to William D. McCrackan, M.A., a member of the board of lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, who will speak with authority, and tell us of the facts of Christian Science, and the truth about its Discoverer and Founder, Mrs. Eddy, as far as the time limit of a single lecture will permit. The teachings of Christian Science are so simple, its reasoning and conclusions so logical, and the beneficial results following its study so striking, that it should command the attention and arouse the interest not only of the weak, the sick, and the sin-burdened, but also of the cultured and the strong, of all seekers after truth, of all who desire to see humanity uplifted. Opposition to and adverse criticism of Christian Science is always opposition to and criticism of a false concept of its teachings; but when the truth is understood and the false concept destroyed, opposition and adverse criticism cease.—*Correspondence.*

CHARLEVOIX, MICH.

A lecture on Christian Science was delivered at Charlevoix Theater, Sept. 1, by Judge Clifford P. Smith. The introduction by Willard A. Smith was in part as follows,—

The days of scoffing at Christian Science are past. When the cult was founded by the late illustrious Mrs. Eddy, the crusade against its teaching was aggressive and virulent. Even the distinguished Mark Twain attacked it with his biting sarcasm. But the milder criticisms of the hypercritical soon supplanted the scoffing of the intolerant, and we have come to see Christian Science lauded in the Senate of the United States by a member of that dignified body who was snatched from the jaws of death by its healing ministrations.

This change in the world's attitude toward Christian Science but exemplifies the truth of the adage that the tree shall be judged by its fruits. And here I personally wish to state that I am profoundly impressed not only with the works of Christian Science, but with the sublime faith and exalted personnel of its votaries.—*Charlevoix Sentinel.*

OCEAN PARK, CAL.

On Friday evening [Sept. 8] William R. Rathvon of Denver, Col., delivered an interesting lecture at Masonic Temple, before a large and appreciative audience. He was introduced by A. M. Jennings, who spoke as follows:—

We are assembled here for the purpose of gaining knowledge, the only knowledge of really great value, the knowledge of the truth about God, and man in His image and likeness. Christian Scientists know that they receive comfort and happiness in proportion to their understanding of this all-important subject, and that they are correspondingly saved many undesirable experiences. Christ Jesus demonstrated his great understanding by healing sin and disease and by the overcoming of death. Christian Scientists are humbly trying to follow his example, as all mankind was admonished by him to do.—*Santa Monica Journal.*

SEATTLE, WASH.

Frank H. Leonard delivered a lecture on Christian Science under the auspices of First Church of Christ, Scientist, on Sunday afternoon, Sept. 17, in the Moore Theater. Thirty minutes before the hour set for the beginning of the lecture, every seat was taken. The lecturer was introduced by Fred H. Lyons, an attorney, who spoke as follows:—

The presence of this great audience is indicative of the wide-spread interest in the subject of Christian Science. Personally I can make claim to but little knowledge of the subject; but it has been brought to my attention and into my thoughts in a practical way, and I believe I am qualified to say that as an influence it is entirely for good and never for evil; and from my observation of it I believe that the results of its teachings and practices are altogether good and never bad.

I can therefore understand and appreciate the claim made on its behalf, namely, that when it reaches its full fruition evil will be entirely eliminated from the world, and mankind will attain a state of perfection, physically and spiritually. Surely a doctrine which holds out this promise, and gives us demonstrations indicating that we may expect its fulfilment, at least in a great degree, is worthy of our serious interest; and it is this interest, and a desire to know more of its basic facts, that has assembled us here today.

Correspondence.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Asheville, N. C.—Judge Clifford P. Smith, Auditorium, 3:30 p.m., Oct. 22.
Camden, Me.—Willis F. Gross, Church Edifice, Oct. 27.
Charlotte, N. C.—Judge Clifford P. Smith, Academy of Music, Oct. 24.
Cheyenne, Wyo.—Francis J. Fluno, M.D., Elks Hall, Oct. 26.
Connersville, Ind.—Frank H. Leonard, Lyric Theater, Central avenue, between 6th and 7th streets, 3:30 p.m., Oct. 22.
Cranford, N. J.—Prof. Hermann S. Hering, Church Edifice, Springfield avenue and Milne street, Oct. 23.
De Kalb, Ill.—Bliss Knapp, Church Edifice, Oct. 24.
Enid, Okla.—Hon. Clarence A. Buskirk, Loewen Theater, Oct. 22.
Fall River, Mass.—Willis F. Gross, Music Hall, Oct. 24.
Fremont, Ohio.—Frank H. Leonard, Colonial Hall, Oct. 24.

Westmount, Province of Quebec.—Virgil O. Strickler, Victoria Hall, Oct. 27.
Wilmington, Del.—Virgil O. Strickler, New Century Club, Oct. 19.

Man was not made for things that leave us,
For that which goeth and returneth,
For hopes that lift us yet deceive us,
For love that wears a smile yet mourneth;
Not for fresh fruits from the dead leaves springing
The cyclic recreation which, at best,
Yields us—betrayal still to promise clinging—
But tremulous shadows of the realm of rest:
For things immortal man was made,
God's image, latest from His hand.

"The Autumnal Ode"—AUBREY DE VERE.

TESTIMONIES OF HEALING.

[Translated from the German.]

I wish to express publicly my deep gratitude for the help which I have received through Christian Science. Last year I was suddenly taken down with appendicitis, and the physician whom we called in at once sent me to the hospital, in order to have an operation performed. The first operation being unsuccessful, another was contemplated. My parents, having heard of Christian Science in the mean while, had attended the services and meetings regularly, and concluded that real help could not come in any other way. The operation was not performed, and before long I had so far recovered that I was dismissed from the hospital; but two weeks later the old pain set in again.

Christian Science treatment was then taken up, and after the second treatment I was able to ride to the practitioner's home, and in a couple of weeks felt entirely well. I then went on a visit to an aunt, and there was taken once more with the same pain. The trouble was, however, overcome through Christian Science within three days, and I was thoroughly convinced that disease and sin are not real and that they have no power over us. My brothers and sisters, who often had to miss school on account of ill health, have been healed of all their troubles. For these great blessings we are grateful with all our heart to God, and next to Him to Mrs. Eddy.—IDA FIEK, Hannover, Germany.

In March, 1904, I first heard of Christian Science, and at this time I was very much dissatisfied with religion. I wanted to get away from it, although I still believed that there was a God. Some time after this I purchased property in the city, and to my surprise found that Christian Science services were held in the residence next door to my home, which fact only served to make me more antagonistic to what I thought Christian Science to be. I was invited to attend these services, but refused to do so. My wife, however, commenced to read the literature, and was quite interested in it; but I could not see any virtue in it, partly because, no doubt, I loved the world's ways too well, and was afraid that Christian Science would not agree with them.

In April our boy had an attack of measles. He had been in bed two days when a lady living next door learned of it, and asked my wife if she had any objection to her treating the boy, to which my wife replied that she had not. This was in the morning, and when I came home at noon the boy was up and out of doors playing. Well, my surprise can be imagined, but I was very much alarmed when a week later my wife came down with the same disease. She, however, did not feel any need of going to bed, but did all of her work, both in and out of doors, and very quickly recovered from the illness. This experience also left her with good eyesight, whereas she had weak eyes before. I then asked the lady who did this healing work, and I was told that it was God. I asked for further information, and was told to study the Bible. I did not have one in the house, but got one at once, and began to read at the first chapter of Genesis. From that time I never let a day go by without reading more or less of it. I had been very much in the habit of swearing, which took me all that summer to overcome. I also smoked heavily, but this was overcome very quickly, as well as the liquor habit. These were all done away with by studying the Bible, and getting its spiritual understanding, as this lady would explain it to me.

Here I would like to speak of another healing. In July, 1888, when living in Ohio, my father took me to Cincinnati, to the best eye doctor he could find, but we were told that nothing could be done for my eyes, except to wear glasses, which I at first refused to do. I was then told that I would

Digitized by Google

become blind in a short time if I did not; so I consented. About the year 1900, I consulted another specialist, who had a wide reputation, one of the best that could be got. He told me that my left eye was beyond help; I could not read with it, even with the strongest glass he could give me.

In May, 1905, after I had been studying Christian Science over a year, the thought came to me that if God is not a respecter of persons, and if He had healed others, He would heal me; so I decided to leave my glasses off the next day. I did so, and suffered very much; but the following morning I went to town to ask the lady already referred to for help. I told her what I had done, and she said it was all right. I went home, and that night I read the Bible for two hours by lamplight without suffering any—my eyes were healed. Without doubting, I went to town, sold the gold frames, and the other pair, which I could not sell, I threw into the Arkansas river, when I crossed it going home. I can thankfully say that I have felt no need of glasses since.

Had this lady mentioned Science and Health to me at first, instead of the Bible, I probably would have rejected Christian Science. I am truly thankful to the friends who so kindly made known to me this Christ-healing, also that I have been allowed the great privilege of class instruction. Most of all, I am thankful for the spiritual quickening, and thankful to God that there has been one found among us who was good enough to become the channel for the revelation of this truth.—FRANK C. HEISER, Junction, Okla.

I thank God that our Leader had strength of character and integrity enough to prove true to God, to go on and present Christian Science to the world, to teach us the truth about God and man. One night I awoke with a very bad attack of bowel trouble, but I had the benefit of having read Christian Science literature, and I at once knew that God did not make me sick, that God is the only creator and that He creates only good; and in half an hour I was well again.

I would like to tell of another experience which I had with Christian Science. One summer, at the beginning of the hot weather, I realized that we do not need to suffer from the heat when God never made anything that can cause distress. The result was that I did not suffer nor even feel discomfort from the heat all summer. I am truly grateful for Christian Science.

ELLSWORTH M. SKINNER, Kansas City, Mo.

I have thanked God daily during the last three years for the great benefits I have received through Christian Science. I came to it for physical help, as I had been treated by different doctors for several years and was very much discouraged, as I did not get better, but seemed to take on new diseases in addition to those I had.

I was said to have organic trouble and an abnormal growth, with almost continual pain in my side. There was a constant feeling of fatigue and nervousness, which made me melancholy and irritable. Besides all this I suffered from headaches, which would last two and three weeks; also a tendency to colds and cough. All these ills were destroyed in a few months under Christian Science treatment, and I feel as though I cannot be thankful enough for this wonderful truth.

I had suffered from neuralgia ever since going to school, and had an attack, a few months before I came to Christian Science, which lasted over two weeks, and I had two physicians before I was relieved. Shortly after coming to Christian Science, I had another severe attack, which was cured in four days' absent treatment and has never returned. I speak of this to illustrate how much quicker and more effectual this treatment is than the material methods.

About the time I began to study Christian Science, I had had a corn on my foot for several years which was very painful, and a member of my family prevailed upon me to try some sort of a plaster for it. As a result a black spot formed on the toe and penetrated to the bone. I let it go for a few weeks, but it finally became so painful that I could hardly walk without limping. I took one or two treatments in Christian Science for it, and in two weeks the diseased flesh was lifted out and there has never been any pain in the toe since.

While I came to Christian Science for the physical benefits, my one aim in studying now is for more spiritual understanding, and I do not regret any of my past suffering, because through it I was compelled to seek God; and in seeking Truth I found happiness and freedom.

MRS. RENA W. KELLY, Chicago, Ill.

It is with deep gratitude that I tell of some of the blessings I have received in Christian Science. Three years ago I came to it for physical help. I had been under medical treatment for over twenty-nine years, suffering from what the doctors called a complication of diseases, including serious stomach, bowel, and liver trouble, also rheumatism and neuralgia. I had been told by several doctors that my case was incurable. Two years before I came to Christian Science my dear husband passed on, which caused me great sorrow, and this was followed by extreme nervousness and sleeplessness.

I then seemed to lose all hope. My attending physician and also my friends thought I would soon follow my husband, but I lived on, continuing to suffer both mentally and physically, and in this condition I came to Christian Science for help. I knew nothing at all about it, nevertheless after the first treatment I felt very hopeful, and really believed that I would be healed some day. After the second treatment I was absolutely healed. I had told the practitioner that I only wanted physical help, but I was not satisfied. I longed to know more of the truth that had made me free, and I continued to go to the practitioner for several weeks, that I might learn more of this truth. After I knew I was healed I threw away all the material remedies which I had been using, and I have never had any need for them since.

While I think my physical healing marvelous, it is nothing compared to the spiritual quickening which I have received through the teachings of Christian Science. I am so thankful that I can, with the little understanding I have gained, not only help myself but also my fellow men. Words cannot express my gratitude to God for the many blessings I have received. I am also grateful to our Leader, Mrs. Eddy, for giving us Science and Health, which has indeed opened the Scriptures to me as I never knew them before. I realize more and more each day that God is All-in-all, and I do put my trust in Him.

MRS. ELLA A. MITCHELL, New York, N. Y.

I gladly give this statement of my recovery from what appeared to be a most serious illness, as a result of Christian Science treatment. I regard it as a splendid demonstration and thank God with all my heart. I hope that my experience may be helpful to some one who reads our periodicals. I was in bed for the greater part of a week, with all the symptoms of complicated acute lung trouble. My wife is the daughter of a physician, and is a skilful nurse who has had experience with that kind of illness, and she declares that the ailment was of the type stated and that for three days my temperature indicated alarming conditions. Unable to overcome the conditions which seemed to exist, my wife telephoned to a Christian Science practitioner several miles away, and absent treatment was begun. Relief was almost immediate; soon the fever left me, and within a week the cough had disappeared, the functional

Digitized by Google

disturbances had ceased, my appetite returned, and I found myself again in good health.

It is not enough for me to say that I am grateful to God for this speedy recovery from an illness which, under the best medical treatment (judging from the experience of a friend of mine), if successful, would require from a month to six weeks for healing, with perhaps two or three weeks of convalescence; but I am keenly sensible of the debt I owe to the world's greatest benefactor since the days of Christ Jesus, Mary Baker Eddy, the Discoverer and Founder of Christian Science, that purely spiritual method whereby Christ Jesus healed the sick, cast out demons, cleansed the lepers, and raised the dead. How can we better show appreciation of the great work of our beloved Leader than by being and doing good? Mrs. Eddy's own words in concluding the article "Harvest" in the *Independent* (*Sentinel*, Dec. 1, 1906), are encouraging and wholesome for us all: "It is of comparatively little importance what a man thinks or believes he knows; the good that a man does is the one thing needful and the sole proof of rightness."

Reliance upon Truth always brings us closer to God, where error ceases to "rage and imagines a vain thing" (*Ibid.*). To rely wholly upon Truth is to do good to the whole world. When I think of what Christian Science has saved me from, of the peace and harmony it has brought into my home life, of its gentle ministry in helping me to conquer resentment, ill temper, impatience, and a horde of other erroneous beliefs, I find myself in awe of the power of divine Love, and wish with all my heart that all the world might share its blessings.

JOHN F. PHILLIPS, Roslindale, Mass.

Remembering that "a just acknowledgment of Truth and of what it has done for us is an effectual help" (Science and Health, p. 372), I venture to relate some of my experiences as a student of Christian Science. In the autumn of 1892 the subject of Christian Science was first presented to me. The name seemed singular, but withal inspiring. When it was explained that it was the very teaching and practice of Jesus of Nazareth, which had been discovered by Mrs. Eddy, I found myself unhesitatingly accepting the statement as true, and glad that it was true.

The following winter I entered a class taught by a lady in a near-by city, but spiritual perception was so overcast by clouds of care and consciousness of sin that the seed did not bring forth any visible results for a number of years. Yet during all this period I had not the slightest doubt that Christian Science was demonstrable truth; it was only that I had failed to grasp its spiritual import. At this time something urged me to find a member of the class referred to, and I spent a day in the search before finding her. After a few minutes she suddenly said, "Are you still studying Science and Health?" In reply I told her that I had not seen the book for some time. When she spoke again it was with an earnestness that impressed me deeply. "The best thing for you to do is to get that book and go to studying it again," she said. In a few days I gave up the work in which I was engaged, and eagerly began the study of the volume so dear to all true Christian Scientists.

For a number of years I had been in bondage to the use of tobacco, and when I learned from Science and Health that its use was not in line with the teachings of Christian Science, it came as a great shock, because I had an intense longing to be a Christian Scientist, gained from my close study of the text-book. Then the trial came. Which shall it be? "No man can serve two masters," said Jesus. The Christ won, and the desire for the weed was forever cast out. That was over eleven years ago, and I have been entirely free from that bondage ever since. After the first three days I felt no ill effects from not having the usual sedative.

Since the above experience the practical application of the Christ-cure to remove both physical and moral ills has become better understood. I have been healed of bowel disorders, an eruption on the face, and other ailments too numerous to mention. As for moral and spiritual conditions, it is but fair to acknowledge Truth as an effectual help in dispossessing thought of its false beliefs, sin and sensuality, and in the letting in of love for the good, the pure, and the true. During this time I have been made a channel through which help and healing have come to others, for which I am truly thankful. My gratitude to God for His great goodness in giving us such evidences of His love, as shown in the lives of Jesus the Christ and our beloved Leader, grows greater as the errors of sense vanish one by one.

ALVA B. AMMERMAN, Puyallup, Wash.

I feel it my duty to testify to what Christian Science has done for my little son. At the age of six years he had a fever. He had four physicians who took care of him, but he was left with impaired hearing, and each year it grew worse. At last I wrote to a dear friend, and asked her if she thought my child could be cured. Her answer was, "What cannot God do?" She sent me some Christian Science *Sentinels*, and we began to read them. She also sent me the name of a Christian Science practitioner. I wrote at once and told the practitioner of my son, and the letter I received I shall never forget. I gave the child into God's hands, and today my boy can hear better than I. Thank God for Christian Science!

My heart overflows with joy, gratitude, and boundless love, and may I prove in works, not words alone, that I am a meek and humble follower of Christ.

MAE SHEELY, Clayton, New Mexico.

It is only a year and a half since I came into Christian Science, and during that time I have longed to tell the world about it, so I send these words, trusting that they may be as a ray of light to some one who is still in the wilderness of material thought, and that those who see the light may keep it steadily before their gaze, until it leads them to liberty.

I did not come to Christian Science for physical healing, but a sister who is a Scientist and who had been visiting in our home, left with us a few copies of the *Sentinel*. As I was reading them, one day, I found such lovely thoughts that the more I read the more I wanted to. I became greatly interested, so this same sister sent me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, which became my daily companion. One day, after having read this book through, I found that I did not need the glasses which I had been wearing for five years. I took them off, and can truly say that my eyes are perfectly well and have not given me any trouble since. Words fail to tell how thankful I am for this one demonstration of Truth's power, for my eyes had previously given me much trouble.

I have had other demonstrations, which to me mean much. I was operated upon, six years ago, for appendicitis, and since then I have at times suffered a great deal from my side; but now I never feel any pain at all. I have also overcome many other discordant conditions, and for this I am truly thankful. It is wonderful to know that we can meet and overcome all physical discord, but this is nothing to be compared with the spiritual healing. The Bible has become a new book to me, and I feel truly thankful to God, who has given to the world one worthy to give us a "Key to the Scriptures."

I am deeply grateful for Christian Science, and would

Digitized by Google

say that money could not buy the understanding I have gained through reading the Bible with Science and Health. I am thankful, too, that early in life I have gotten into that straight and narrow but well-defined path which leads to life eternal, and it grows ever brighter as I realize that it is the same path which Christ Jesus trod. Even now, as I look ahead, and above the so-called material senses, I can see the beckoning hand and hear the "still small voice" of Love saying, "Come unto me." My daily prayer is that I may ever follow in the Master's footprints, and that in so doing I may help others along the way.

MRS. EUNICE FINCHER, Mansfield, La.

I was on the stage, singing in chorus, when I first took up the study of Christian Science. So long as I can remember I had always been of a timid, sensitive, and despondent disposition. Feeling that I was not what I should be mentally and physically, and having always been a searcher for real happiness and the truth about man, I searched in public libraries, read the works of many philosophers, books on religion, etc., attended many lectures, thoroughly investigated all the isms, including so-called mental science, from the study and practice of which I suffered much. Instead of improving, I kept on getting worse. I then commenced to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, with the result that in about a year's time, by studying this book in conjunction with the Bible, I have been completely healed of rheumatism, a throat trouble, extreme depression, and an inability to think at all sometimes, which was very embarrassing. All these conditions have been permanently healed through the study of Christian Science.

Although there are still many erroneous thoughts to be cast out of my consciousness, I know that through God's help they will be replaced by thoughts of Truth. I am very grateful that I am able to demonstrate the power of Truth and to reflect, if only in a small degree, our Father-Mother God. I hope that my sincere testimony will help somebody else who is in bondage to sin and disease to take courage, for if we are grateful and faithful and put into practice what knowledge of Truth we have, we shall receive more from divine Love. I am indeed very grateful to our heavenly Father for voicing through our dearly beloved Leader the wonderful revelation of Life, Truth, and Love.

ARTHUR RAYKOWSKI, New York, N. Y.

[Translated from the German.]

It is with a grateful heart that I testify to the blessings which have come to me through Christian Science. In September, 1910, my eleven-year-old daughter was taken very ill. She had hemorrhages of the lungs, and the physician stated that it was a disease of the abdomen and stomach, with indications of a fever besides. The bowel condition was very serious. She was however entirely well within three days under Christian Science treatment, and is in better health now than ever before. Three of my children were healed last summer of an attack of illness with one treatment, and I could fill several pages in telling about the blessings I have received. I am grateful with all my heart to God, and also to Mrs. Eddy.

MRS. H. PFLUG, Montclair, N. J.

It is with a deep sense of gratitude to God that I send this testimony of healing through Christian Science. Eight years ago I frosted my feet, and each year for five years, when the first snow fell the painful condition returned, and continued until late in the spring. Every remedy we heard of was tried, but nothing cured or even relieved me. The swelling and the pain were so intense at times that I could not stand. The sixth winter, when the first snow fell, I looked for the old condition, and it did not fail me. During the previous summer I had become interested in Christian Science, and I determined to try this new remedy. It was with trepidation at first, but this feeling disappeared when, at the end of the first week's treatment, I was healed. So complete was the healing that I forgot even to think about the old condition during the entire winter.

I am a young girl and a young Scientist, but the slight knowledge of Truth which I have gained through the aid of Science and Health is priceless to me from both the spiritual and the physical standpoint. I have received physical healing, but more than that, mental regeneration, and for this I am deeply grateful. May this testimony, humble as it is, help a little, be as a seed of love to lodge in some other young person's heart, that this one may have the perfect peace which comes through the understanding of God in Christian Science.

H. MARGUERETE DELANY, Ocean Grove, N. J.

I wish to express my gratitude for what Christian Science has done for me. From childhood I was constantly under the care of doctors. I had several operations for catarrh, and about eight years ago I was taken with an illness which left me with a very bad form of bowel trouble. I was obliged to take medicine every day, and had two severe sick spells each year, including two very bad attacks of inflammation, until, finally, I was taken with appendicitis, for which the doctors claimed there was no cure apart from an operation, to which we were very much opposed.

I tried different doctors and medicines, but with no relief. I was also a nervous wreck, besides having headaches and biliousness. I became desperate; I felt that the doctors could not help me, so I thought I would try Christian Science before risking an operation. I went to a practitioner, not having much faith, as I had not the true understanding; but, greatly to my surprise and joy, after the first treatment I felt much relief, and at the end of two weeks I was entirely healed. I have not had any of those ailments since, and I am very happy and enjoy every moment of my life. I have not only gained health and happiness, but I have also gained a spiritual understanding of this great truth. I am indeed grateful to God for the understanding of Christian Science, and also to our beloved Leader, Mrs. Eddy, for pointing out the way to the kingdom of God.

MRS. MINNIE B. NASNEC, Cedar Rapids, Iowa.

When I think of the many blessings which I have received in Christian Science, I know that I can never be grateful enough to God, or to Mrs. Eddy, who has given this understanding of Truth to us. When I was a little girl one foot and limb was badly twisted and deformed, and for many months I was not able to walk a step; but through Christian Science it was gradually restored, until today no one would believe I was once lame. I was also healed of a skin disease and a bronchial trouble, besides a most unhappy disposition.

For these demonstrations I am indeed very thankful, and I know that with God all things are possible.

REBA LLEWELLYN, Oakland, Cal.

I desire to add my testimony to the many others that have been given, in the hope that some mother may be helped as I have been. I have had many beautiful demonstrations of Truth's power since becoming a follower of Christian Science as revealed in "Science and Health with Key to the Scriptures" by Mrs. Eddy, but this one seems

Digitized by Google

the greatest to me just now. My little baby girl, one year and a half old, climbed up to the window-sill and drank gasoline from a bottle which had been left there. The practitioner on whom we call was out of town, but our maid, who is a Christian Scientist, took the child up and declared the truth for her at once. I was so frightened that I seemed not to know what to do at the time, as the baby seemed nearly gone. In about two hours, however, she was perfectly well, running about the house, playing and laughing in her usual manner.

We are indeed grateful to God, and to our dear Leader, Mrs. Eddy, who has given to the world the spiritual understanding of the Bible, making such blessings as the above possible here and now. The Master said, "If they drink any deadly thing, it shall not hurt them." In Christian Science we prove these words true.

MRS. LAURA BOARD, Chicago, Ill.

I have waited over seven years to acknowledge through the *Sentinel* the many benefits I have received since I turned to Christian Science for help, and I am sure that it has not been lack of gratitude. When I first heard of Christian Science I was living in a western town, and an aunt, who is a practitioner, was visiting in our home. I had at this time just returned from Kansas City, Mo., where I had been sent by my parents to have my eyes tested. The oculist informed me that I must wear glasses all of the time for several years. They had annoyed me greatly, and it seemed that I would never become accustomed to wearing them, so I gladly agreed to take them off and accept the treatment my aunt so lovingly offered. I was healed immediately, and did not need to put the glasses on again after the first treatment.

A year later I found it would be necessary to have considerable dental work done, an ordeal which had always caused me much suffering. I was not well at the time, so I took Science and Health and the Bible and read and studied for a month or more. I then kept my appointments with the dentist, day after day for a week, and felt no discomfort. I have had a good deal of dental work done since this time, but I have not dreaded it at all, feeling confident that whatever is necessary can be accomplished without suffering.

Each day we have proofs of God's loving presence and protection in our home, and have never felt any desire for nor faith in the old remedies which we have forsaken. I am so thankful for our Christian Science literature. Many times when I have been struggling with a sense of discord, I have found what I most needed in an article or testimony in one of our priceless periodicals, and it is deeply gratifying to be made acquainted through the *Monitor* with the important affairs of the day without being startled by accounts of disaster.

I give thanks to God, and feel deep gratitude to our beloved Leader, Mrs. Eddy, for every blessing that is mine, and it is my daily prayer to be watchful, and to strive to assimilate more of the spirit of the Master.

MRS. JANE D. ARMOUR, Chicago, Ill.

Again I see the patient brow
That palm erewhile was wont to press;
And now 'tis furrowed deep, and now
Made smooth with hope and tenderness.

The love that cast an aureole
Round one who, longer to endure,
Called mirth to ease his ceaseless dole,
Yet kept his nobler purpose sure.

"The Hand of Lincoln."—EDMUND CLARENCE STEDMAN.

FROM OUR EXCHANGES.

[Rev. G. F. B. Hallock, D.D., in *New York Observer.*]

That face looks good to us through which genuine goodness looks at us. The real looking of a face is not from what is on it of color or form, but from what is behind it, looking out of it. If good is behind a face, it is good looking. Good looking out makes good looking at. Isaiah bore witness to this by the opposite when he said of the evil dwellers in Jerusalem that "the show of their countenance doth witness against them." We talk about "speaking countenances," and well may we, for faces have a voice and influence that words can never have. The eyes, the brow, the lines of the whole visage, speak out as the tongue can never speak. The face is not merely physical; it changes inevitably as the inner man changes. Hard thoughts, evil desires, selfish ambitions, show through the countenance, as in no other way. And the influence of these inner thoughts and purposes of ours is felt by those who merely look at us. It is not enough that we should have a care about words and deeds as influencing others. The very countenance itself, lighted from within, should speak forth a clean, wholesome message to all who look us in the eyes. Well does Dr. W. C. Gannett say: "Splendor within is the only thing which makes real and lasting splendor without. Be beautiful, and you will by and by seem so. Carve the face from within, not dress it from without. Within lies the robing-room, the sculptor's workshop. For whoever would be fairer, illumination must begin in the soul—the face catches the glow only from that side. It is the Spirit's beauty that makes the best face, even for the evening company; and the Spirit's beauty is the only beauty that outlasts the work and wear and pain of life."

[Rev. Paul Sperry in *New Church Messenger.*]

A man's life is not complete in the deeds he does, but in the continuation of a desire and an ability to do more and better deeds. The actions and accomplishments are chiefly valuable for the effect there has been upon the man in the process of doing them. Of course the good deeds help others, and they are valuable for that reason, but so far as the doer is concerned the ultimate value lies in the stimulation of the love of service, the impulse of charity which is engendered. Therefore the good deeds are to be closely examined, not merely for the use they can perform in the nourishment of the world's best life, but because they afford the surest evidence of the kind of life in the will that gives birth to them. So many times we hear people ask, and indeed we ask ourselves, if we can know our ruling love. There can be no safer or more searching answer than that which the Lord suggests in his advice about the tree which is known by its fruits. It was a figure and a principle which our Lord emphasized by frequent repetition, as if to insist that it is the central lesson of character making. "Do men gather grapes of thorns, or figs of thistles? Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit. . . . Wherefore by their fruits ye shall know them."

[*British Congregationalist.*]

The psalter has a nobler song, "Thou art very great; thou coverest thyself with light as with a garment;" and Paul speaks of "the King . . . dwelling in the light which no man can approach unto." The boundaries of our knowledge are not darkness but light. The last word of science in its attempt to explain the world stands, not shivering on the confines of eternal night, but dazzled on the confines of eternal day. It has its limit not because there is nothing more to see, but because the eye is overwhelmed. It is agnostic because it cannot look into the sun. Its ultimate mystery is always the mystery of its own vision and knowl-

Digitized by Google

edge, how it sees and understands at all. Its last wonder is light, "the true Light, which lighteth every man that cometh into the world." Its final barrier is made of sunbeams. It is the rainbow round about the throne that hides the throne and Him that sits thereon. "Verily thou art a God that hidest thyself." God hides Himself by hiding nothing; He reveals Himself by hiding Himself. He shines in the eternal heavens, and, though in His light we see all else, we read that "no man hath seen God at any time." The Word is made flesh; He hides Himself in the softened beauty of Jesus Christ, and then "he that hath seen me hath seen the Father."

[*Christian World.*]

The judgment, as depicted in the gospels, is a classification. It is a statement of what people are; of what they have made themselves. "You have been so and so; you have done so and so. That defines what you are; and just as the horse, by being a horse, has the place and treatment assigned to horses, so you will get your place and treatment according to—what you are." That is the essence of it. The universe has no other way of dealing with men or things than that of putting them into the places to which they belong. That is the inexorable law of all things in the heavens above and on the earth beneath. This judgment is a present one and a future one. "Now is the judgment of this world," says Christ in one place. Elsewhere he puts the judgment in the future. Both statements represent the truth of things. We are now being judged; for we are now in the place to which our deeds and character have brought us. And the law of "now" is the law of "then." For the future also is a future of judgment.

[*Outlook.*]

The mechanical appliances which lengthen the range of the eye and carry the voice over half a continent are crude symbols of the immense reach of the spiritual nature which has infinity, eternity, and immortality before it: infinity, room in which to bring out all the power, beauty, and fruitfulness of the soul; eternity, boundless time added to boundless space, so that all processes of growth may fulfil themselves in endless progression of flower and fruit; immortality, the unwasted vitality which flows with increasing volume through deepening channels and gives the soul the power to possess the vastness of space and illimitable time for growth.

[Richard Braunstein in *Standard.*]

When the change comes, it will be the result of keeping society conscious of its needs until it can be aroused to action. The evils of society can never be removed by simply crying them down. The real task is to remove the causes of the results we so vigorously decry. The industrial problems of today will never be solved by running down organized labor, nor by abusing the organization of the capitalists, but rather by giving to all men the facts that will arouse their innermost sense of justice and lead them to deal justly with their fellows. Brotherhood implies sonship; and the ideal religious life implies religious regeneration.

[*Christian Advocate.*]

The Bible speaks of the light of God's countenance. The same light is seen also in the countenances of His people. A pure heart makes a shining face, a cheerful voice, and a radiant life. Such people are welcome in the church, in the home, and in every place. They bring comfort, encouragement, and good cheer. They scatter sunshine everywhere. "Let your face be like the morning."

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Fluno, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan*, and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine*. These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $5. *On earlier volumes write for prices.*

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE: ITS RELIGIOUS PHILOSOPHY. By HON. CLARENCE A. BURRICK.

CAUSATION: VIEWED IN THE LIGHT OF CHRISTIAN SCIENCE. By FREDERICK DIXON.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind-healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy, $6.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

4.00— 9/16	;	5	;	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

The United States supreme court convened at noon, Oct 9. The government moved to advance its case under the Sherman antitrust law against the Union Pacific, the Oregon Short Line, and others intended to prevent the ownership of stock in competing roads, which was decided against the government by the United States circuit court of appeals for the eighth district. The court will remain in session until the last of next May and will consider as many of the eight hundred cases now on the docket as time will permit. An estimate has it that the court will dispose of about four hundred cases during the term, but that about two hundred additional cases will be docketed before next June. The antitrust suits are those against the principal anthracite coal-carrying railroads and coal-owning companies; against the railroads operating the bridges over the Mississippi at St. Louis, and against James A. Patten and other business men, who are charged with obtaining a corner on the cotton market. The court will be called upon to decide also the Minnesota rate cases, which involve the power of the states to regulate railroad fares within their borders.

The German balloon, Berlin II, has been unofficially announced at the Aero Club of America as winner of the James Gordon Bennett trophy. In winning the trophy Lieut. Hans Gericke landed at Ladysmith, Wis., having traveled four hundred and sixty-eight miles. Lieutenant Gericke was given up as lost last year in the international race, which started from St. Louis. He was in the air forty-two hours, traveling eleven hundred miles and landing in the wilderness of Canada, from which he and his aide emerged four days later after enduring many hardships. Gericke also was given up for lost last summer when he went up from Berlin in the Germany elimination race and drifted out over the North sea. He was sighted in England, but was again lost from view over the North sea, finally landing in France. The nearest rival of the German balloon in this year's race was the Buckeye, piloted by Lieut. Frank Lahm of the United States army. It landed near La Crosse, Wis., three hundred and seventy miles from Kansas City.

The treasury department has an opportunity to save the government almost four hundred thousand dollars a year if its officials act according to a recent ruling of the comptroller of the treasury and order power presses installed for the printing of currency. A saving of about eight hundred thousand dollars a year has been estimated if all currency and bonds, notes and checks could be printed on power presses, as all internal revenue stamps now are, but the unions have insisted on hand work. The treasury department several months ago virtually made a proposition guaranteeing that no one should lose his place through the change and that wages would be increased, but the unions remained obdurate. They allege—what the director of the bureau and treasury officials deny—that the character of the work would suffer if power presses were used.

Secretary Meyer announces at the close of the first inventory at the Washington navy yard in twenty-five years that there is a discrepancy of $3,288,271 between the material on hand and that called for by the books. This discrepancy is attributed to loose bookkeeping methods, rather than to any moral turpitude. The Washington yard was the last to have the new accounting system established. Boston, New York, Philadelphia, Norfolk, Portsmouth, Puget Sound, Mare Island, Charleston, Cavite, and Olongapo yards preceded Washington.

Hearings have begun in the chancery court of New Jersey in the suit against the National Sugar Refining Company of New Jersey and the heirs of Henry O. Havemeyer to compel the forfeiture of ten million dollars' worth of common stock in the company, alleged to have been issued without consideration to Mr. Havemeyer in 1900. Twenty-five lawyers answered for the defense. A mass of testimony, requiring many days for recital, is scheduled to come before the court.

Four wall paper manufacturers and four wall paper jobbers have been indicted by the United States grand jury at Cleveland, O., charged with a conspiracy in restraint of trade in violation of the Sherman law. According to the indictments thirty-seven concerns from coast to coast are members of the Wall Paper Manufacturers Association and twenty-seven concerns are members of the jobbers organization, practically controlling the country's wall paper output.

G. P. Rodgers, who entered the competition for the fifty-thousand-dollar cross-continent aviation prize, reached Kansas City, Mo., Oct. 11. As a year, the time limit for entering the competition, has passed since the prize was offered, it has been withdrawn. Rodgers had covered practically half the distance in about twenty-five flying days. By the terms of the competition the flight had to be completed in thirty days.

Under an emergency message from Governor Dix, a bill amending the New York city charter so that the board of education and the board of estimate may at once take action to provide equal pay for the New York city school teachers, was passed.

Charles W. Eliot, forty years the active head of Harvard University, has made plans for a world tour which will occupy eight months and will cover about forty thousand miles.

International.

With a view to mitigating the conditions resulting from the extraordinary rise in food prices, the city of Berlin, Germany, has gone into business as a wholesale food merchant. It embarked formally on the experiment recently when at ten of the big market places quantities of sea fish, purchased by the municipality, were placed on sale. According to the plan adopted by the city council, agents have been sent to Geestemuende, the great fishing center on the North sea, to contract for the purchase of carloads of sea fish at the best obtainable wholesale prices. On arrival in Berlin the fish is sold at a low cost to the retailers, by whom it is distributed among the consumers. The retailers, however, bind themselves to sell at prices fixed by the city. It is planned to open later seventy branch markets under municipal control, and possibly to extend the plan to include other varieties of food. Some of the smaller cities near Berlin already have arranged to undertake the purchase of wholesale supplies of potatoes and other vegetables to be distributed in a similar way. In Budapest, to allay the popular agitation against the high prices of food, the city authorities have resolved to try what municipal ownership can do to improve the situation. After conferences with the government the mayor announces that the city council is planning several relief measures. First among them is the enlargement of the municipal bread factory, which is said to have proved, so far, a great success. The capacity of the factory is to be increased threefold. Then it is proposed to establish a central milk market, and, further, to build extensive abattoirs, the cattle for which will be bought direct from the breeders. Lastly, the city intends to convert large areas of ground into market gardens, the products to be sold through a central organization.

Next month King George and Queen Mary will journey to India, there to receive the homage of chiefs. The durbar, which is the Indian aspect of the British coronation, will be held in Delhi on the twelfth of December. King George and Queen Mary will be the first of the British rulers to present themselves to their people in their overseas dominion. On the ninth of November their majesties and their suite will embark at Southampton on the Peninsular & Oriental liner Medina, their newest vessel and specially chartered. Four first class cruisers will form the convoy—three cruisers besides the Cochrane.

The Boston Chamber of Commerce favors radical changes in the building laws of the city to improve the fire hazard conditions, the substitution of motor apparatus and the appointment of additional firemen, and recommends the passage of a law creating a fire bureau, to act in much the same manner as a coronor's jury investigates a crime.

A congressional committee is investigating the efficiency shop management which is being introduced into government institutions. It is strenuously opposed by the workmen in some of the shops.

Industrial and Commercial.

As an indirect result of the forest fires in Maine last summer, the owners of timber lands on the Kennebec watershed have organized a corporation known as the Kennebec Valley Protective Association. The purposes of the corporation are to protect the forests from fire where the measures taken by the state are not adequate, to encourage the practice of forestry, develop the storage of water for power purposes, and to protect the fish and game. The capital stock is divided into two thousand shares of five dollars par value each, and the by-laws provide that the corporation shall be financed by assessments upon the shareholders proportioned to the acreage owned.

Results are reported from the recently established fire-tower system in Massachusetts for the protection of the forests against fire. Of the fifteen towers provided for in the plan seven are now in operation, with a watchman in charge of each on a constant lookout for fires within his territory. The watch-tower on Mt. Wachusett in Princeton, a section of abundant forests, was the first to be opened and in the few weeks of its existence it has reported thirty fires, all of which were put out between two and thirty minutes after they had been discovered.

The *Manufacturers' Record* says that a thirty-million-dollar consolidation of iron and steel and coal interests in Alabama of great magnitude and far-reaching importance, bringing into the development of that district great financial forces not heretofore identified with it, is now rapidly materializing through final plans which have been worked out for the completion of the merger of the Alabama Consolidated Coal & Iron Company and the Southern Iron & Steel Company.

Exceeding one million five hundred thousand barrels, the apple crop in Annapolis valley, Nova Scotia, the most prolific apple producing section in the world, is larger this year than ever before known in the history of apple growing in this country.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

GRATITUDE.

REV. WILLIAM P. MC KENZIE.

WHEN a man has developed a sense of gratitude, he declares himself to be among the blessed; for the fundamental fact in gratitude is not only that a man has blessing, but that he knows he has. This knowing and valuing of good puts one in the direct line for accession to greater good, for the law of gratitude or appreciation was clearly stated by the Master: "Whosoever hath, to him shall be given, and he shall have more abundance."

If the grateful mind is hospitable to blessing and makes happiness its guest, the complaining mind on the contrary fails to value the good it might enjoy, and so loses capacity to enjoy it. The law of ingratitude is always, "Whosoever hath not, from him shall be taken even that which he seemeth to have." Appreciation of the good we have, tends to make it permanent. Grateful recollection of blessings which we have had becomes a factor in making us ready to receive other blessings. So, whether we have gladness in possession or joy in memory, it is well to be grateful.

The most satisfactory reward that can come to a statesman, hero, or other minister to mankind, is the loving gratitude of those he has saved and served. By the time a man is great enough for genuine service, he has outgrown desire for the ordinary sordid rewards of service. That which is material and temporal cannot satisfy his heart. He longs for what is spiritual and real, and so, if he can win for mankind such conditions as will make men love him for his labor and be grateful for his work, even though he seem to lose his own life in the toil, he is yet satisfied.

The desire for the grateful regard of men is so great that the unthinking seek to buy it with gifts. The thing itself is beyond price, and yet may be very honestly earned. For example, we have the proverb, "A man that hath friends must shew himself friendly." But friendliness must be the expression of character, not the outcome of the purse. Real friends do not express their gratitude by exchange of gaudy and frivolous gifts, but by the flow of good will renewed every day, and by appreciation which is a valuation at their true worth of the qualities manifested in a friend. Such appreciation enriches the life. The prophetic expectation of a friend often inspires a man to greater advance in service than he could have reached alone. When Kingsley was asked the explanation of his heroic life, he simply said: "I had a friend."

The gift which inspires true gratitude must not go alone, else millionaires might monopolize the gratitude of men. It is ever true, as Lowell says, that "the gift without the giver is bare." That which brings to others the blessed feeling of benefit and comfort wherefrom springs this spontaneous gratitude, must be something not petrified and material, but vital, flowing, enduring, reliable. Hence the good will which gives a visible gift is greater than the gift; and the receiver looks upon the gift as the symbol of that which is unseen; and what he values is that unseen reality which will endure when the material sign has fallen to dust.

Consider the life-work of the Christian Scientist and its reward! Many statesmen and philosophers have desired to know how to do good, and have not won to surety in their methods. Many wise and thoughtful men have planned to benefit and save mankind, and have failed in their efforts. But now has come both discovery and unfolding of a right method whereby the best good can be brought to the race, and the Christian Scientist is proving to others how they may be benefited and healed as he has been. If he do his work modestly and kindly, there flows to him unceasing gratitude as life after life is made blessed by evidence of healing, and proof of that ever-available cause, the God of our salvation.

Blessed is the man whose heart is a wellspring of gratitude because he knows the precious love of God. Blessed is the man to whom others are grateful because he has loved them enough to reveal to them the true God whom he loves.

"USE HOSPITALITY . . . WITHOUT GRUDGING."

JEANIE C. E. ANDREWS.

THERE are four instances in the New Testament which show the importance attached by the early followers of our Master to the duty of showing hospitality. Paul, in his epistle to the Romans, enjoins it on the whole Christian brotherhood, and in his epistles to Timothy and to Titus, when speaking of the type of Christian to be chosen as bishop of the church, he says that it must be one "given to hospitality." It is evident, too, that he deemed this an essential quality in one who would shepherd the fold of Christ, for we find it joined to such requirements as these: vigilance, sobriety, good behavior, the love of good men. It is thus seen that to show hospitality was an essential mark of the advanced student of Christ Jesus' teaching in St. Paul's day, and therefore an essential mark of the true student in all days.

Since this is so, it is well for us to ask ourselves what we conceive to be the meaning of hospitality. Webster defines it as "entertainment of strangers or guests without reward, or with kind and generous liberality," and this definition is very generally accepted as adequate. But how little any word definition can express of what hospitality has meant to each of us. Thought lingers lovingly over many scenes of gentle and sweet home life in which we have shared as loved and welcome guests. Memory turns gladly to pictures of courteous, open-hearted manhood, of sweet and gracious womanhood, of happy, laughing childhood; it recalls the hours spent in stately homes where all that material wealth could procure of comfort and enjoyment was lavished upon us,—homes where all the treasures of art were open to us, where the results of intellectual work, of scientific research, of earnest literary labor, of clear, far-seeing poetic inspiration were unfolded to us; homes, too, where (though the treasures of wealth and

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

learning seemed less prominent) we drank deep drafts of cheer and shared the daily work and duties which in their expression of sweet, simple human affection make of a house a home.

In every case, whether sharing the experiences of rich or poor, simple or learned, one wish was always manifested, one desire always present, namely, the desire to make us know our welcome, to give us of their best, to be kind to us, to provide for us a season of sweet refreshment. Beautiful and sweet, however, as we feel the human sense of hospitality to be, and gladly as we own our privilege in giving and receiving it, as Christian Scientists we must look beyond this fleeting human sense to find the true meaning of the divine command to "use hospitality . . . without grudging." In order rightly to obey it, it is of paramount necessity that we recognize what it is to which in divine Science we must be hospitable. In Science and Health (p. 269) Mrs. Eddy declares that "metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." It is clear, therefore, that in the understanding of hospitality in Science we must leave behind us the belief that the entertainment of one set of human personalities by another set of human personalities, with the best that they can offer in matter, is a fulfilment of the divine requirement; we must go deeper, to find the divine idea of which this belief is only the counterfeit. Properly to entertain any one, hospitality must be extended mentally to all right ideas. Thus, to be hospitable to one another without grudging, is to be hospitable to the other's point of view, and that without envy, rivalry, or narrowness. It is to have a real desire to recognize the true motive, aim, purpose, and excellence of one another, to welcome every inspiration, every gleam of light another shows us, to try to see and value the treasure of ideas which they offer us, to share ours with them, to put no one off with the second best but gladly and generously to give them mentally our best and highest, and to give with the knowledge that they can value and understand it.

We see, too, that, just as in the human experience the courteous, open-minded host puts his own desires and plans and wishes aside, in the desire to happify each moment for his guest, so the courteous, open-hearted consciousness will seek to immolate personal sense and personal desires and opinions and to be so pure and detached from egotism of every sort, so free from personal sense and self, that it can gladly welcome and justly and fairly weigh and balance the ideas, motives, and purposes of others, generously accepting and recognizing all that is beautiful and real and true, and blotting out all belief in anything unreal and untrue.

The gracious sweetness of the mental host will always present the calm unruffled sense of deep true spirituality, which knows neither prejudice, envy, dogmatism, nor distrust, but only the gentleness and readiness the Master showed,—what Matthew Arnold has called "the sweet reasonableness of Jesus." This attitude of mental hospitality is easily maintained toward the humble, the childlike, the spiritually grand. The test comes when we are required to exhibit it also toward the seemingly conceited, bumptious, self-assertive, and small, but the law of God is uniform and universal in its requirements, and obedience to it can never be either futile or unnecessary. If we lovingly welcome every idea that is pure, selfless, and meek, we shall quickly uncover and destroy the false sense which is telling some one that self-assertion in any form can bring respect or satisfaction, and stimulate the true sense that honor and nobility are to be found only in meek humility. If we persistently cling to the Christ-ideal ourselves, fixing our heart on the treasures of the kingdom of Truth, we shall radiate such sweetness and light as will illumine the dark places in the consciousness of every guest who comes to us.

Another occasion on which selfishness would tell us that this demand for mental hospitality is rather a grievance, is when we think we have already got to the very highest point of view that can possibly be presented on some subject of thought, and need have no other presentation of it offered to us. We may perhaps be guarding it jealously, as a kind of personal possession, as something too sacred for us to risk its obscuration by the comments of our fellow-men; but this attitude is only the result of a belief in mental aristocracy and of fear, fear of being robbed of what we have seen of good. This fear is erroneous, since all we have ever known of the truth we know forever. Even when we believe we see higher methods and better ways of presenting the truth than some of our brothers have yet perceived, we can at least be hospitable always to the good intent, can always be open-hearted and open-minded. This obedience to God's law of hospitality will always be rewarded, and ofttimes we shall find that in entertaining the views of Truth which others have presented, we have been entertaining "an angel unawares."

We recognize that we are sometimes in danger of exclusiveness and parochialism, of ignoring much that is beautiful and good in human effort, in our desire to be loyal to the good we see to be more strictly metaphysical. This, too, is the result of fear, and is limiting and narrowing in its effects. Our Leader says, "Whatever inspires with wisdom, Truth, or Love—be it song, sermon, or Science—blesses the human family with crumbs of comfort from Christ's table" (Science and Health, p. 234). In this saying she shows us that true Christian Scientists must share and recognize gladly the universal fellowship of good, and not only did she say it, but she started out to prove it, and this proof took shape in our daily paper, *The Christian Science Monitor*.

Surely no more perfect example could be conceived of obedience to the command we have been considering. Though the *Monitor* is representative of the Christian Science attitude of thought, though it never wavers in its steady conviction of the one way, one method, one Principle, and one rule of demonstrating this Principle, it opens wide its hospitable pages to everything that tells of righteous human effort, motive, desire, and purpose. It puts every point of view forward impartially, and gives credit to every good intent. It indeed uses hospitality ungrudgingly to all that makes for the progress of humanity. Recognizing the brotherhood of mankind, the oneness of their interests, the certainty of their advancement out of the belief of competition into the privilege of cooperation, it quietly and unostentatiously insists that the forever law of universal Love, when recognized and demonstrated, is heaven.

While its offices are a very threshing floor on which the wheat is separated from all the useless husk and chaff of meaningless, worthless, or unsavory detail, it retains with real spiritual discernment everything that holds the promise of unfoldment and benefit for man. We are told that at its first appearance it was criticized as a mad attempt of transcendentalism which must end in failure, but in the first year of its life this criticism was forgotten, for it had proved its right to exist and to exist as an immense success, because it is Christian, beneficent, and kind, a courteous, open-minded, sweet and gracious host who uses "hospitality . . . without grudging," evermore inviting its contributors, no matter of what nation, religious persuasion, or political view, to unite in obedience to the eternal law, "Let brotherly love continue."

CRITICISM.

MARTHA SEAVER.

JESUS, the master Metaphysician, was also the master critic. He knew the Principle of the Science of Life better than any other; he was fully competent to criticize, yet he said, "I judge no man, and yet if I judge, my judgment is true;" and he added, "Ye judge after the flesh." Here, then, Jesus pointed out the mistaken way of criticism and

Digitized by Google

gave us the correct method. We judge "after the flesh" when no mortal concept can be a standard for just judgment. Jesus judged no man—he knew man to be perfect, needing no judgment; and that "judgment is true" because it shows the nothingness of the man who seems to be flesh with all its errors. This was his Father's business, and he was so busy about it that he had no time or thought to magnify anything but the Lord. Can we say as much? His strict attention to the Father's business restored to the widowed mother her only son, and brought reform to the sinning in the judgment, "Neither do I condemn thee: go, and sin no more." Can we expect to heal and restore when our criticism approaches so perilously near to condemnation as to make a reality of the error?

Jesus' criticism was truly "just judgment" and not, like that of mortals, "according to the appearance." His was powerful to heal, while that which is based on fleshly evidence often inflicts a needless wound by trespassing upon the divine right of self-government. When we understand man as Jesus understood him, perfect, even as our Father in heaven is perfect, we too shall find it unnecessary to judge him, and this "correct view" (Science and Health, p. 477) will heal the sick even as it did in Jesus' experience. Let us then use Jesus' rule for criticism and no longer break the bruised reed and quench the smoking flax, but "send forth judgment unto victory."

THE VITAL PART.

RAYMOND CHURCHILL.

A MANUFACTURER'S first consideration in seeking a location is the question of a good water supply. No factory can be run without some kind of power, for on this important possession the successful pursuit of the business absolutely depends. The writer formerly had occasion to pass daily through the largest brass mill in the world, and its varied processes impressed him as a wonderful application of ingenuity and thought.

At the rear end of this immense plant, in an insignificant little room, compared with the vastness of the other departments, were the engines. Out of sight and knowledge of the ordinary visitor, their faint throbbings seemed but an incident in contrast to the noisy vibrations of the other machinery; yet how valueless would all this costly machinery have been if disconnected from the engines. It might be said that the power was really the life of the machinery, which would be a wholly useless construction apart from the power plant.

Have we not here a useful lesson for us in our practice of Christian Science? Our revered Leader says in our textbook (p. 113), "The vital part, the heart and soul of Christian Science, is Love. Without this, the letter is but the dead body of Science,—pulseless, cold, inanimate;" to which statement the words of Paul seem closely correlated: "Though I have the gift of prophecy, and understand all mysteries, and all knowledge; and though I have all faith, so that I could remove mountains, and have not charity [love], I am nothing." "I can of mine own self do nothing," was the declaration of the great Teacher, who taught that those mighty works were wrought through his inseparable connection with that God who is the only power, the Love upon whom our existence absolutely depends.

Our beloved Leader tells us that "the underived, the incomparable, the infinite All of good, the *alone* God, is Love" (Miscellaneous Writings, p. 249). How fruitful and harmonious are the activities of life when Love is the motive power! As joyful laborers in our Father's vineyard, let us remember that our first important duty is to

> Make channels for the streams of love,
> Where they may broadly run;
> [Since] love has overflowing streams,
> To fill them every one.

THE CITY.

ALICE HALE COHEN.

RECENTLY it came into my experience to travel through many cities in a short space of time, each day finding me confronted by some new condition as I moved rapidly from place to place. One day it would be excessively hot with clouds of desert dust obscuring the horizon. The next day, as a higher altitude was reached, the night air would be sharp and cold. All of these conditions, passing in rapid review, and claiming to injure or to bless, seemed a very Babel of confusion. Through acceptance of the testimony of the material senses, a material universe with its so-called laws was acknowledged, and physical conditions arose in conjunction with these laws. This tended to darken thought still further, and I at length awakened to find myself dwelling mentally in a series of cities hid deep in the obscurity of the valley, instead of in the one city set on the hill of exalted thought.

At length, discerning that I had been traveling over the hard road of the physical senses, I took refuge in the understanding of spiritual creation, and found myself in the holy city of our God, wholly good and undivided, inseparable from government according to God's law. Gratefully taking up the task of dematerializing and spiritualizing thought, and strengthened by many passages from the Bible and "Science and Health with Key to the Scriptures," I discerned, instead of a succession of changes from one belief to another, the true succession of the unfolding of spiritual ideas. The city of the great King was revealed, and in its light, the light of unbroken reality, the ghostly cities of sense began to fade, even as a mirage, which for all its claim of closely counterfeiting reality cannot deceive those who know what really occupies the place it appears to usurp.

The real city discovered, the next question which arose was how to dwell therein here and now. Again turning from the material to the spiritual sense of creation, it was perceived that man dwells not in houses made with hands, but in the consciousness of God, good. Then, this being the case, when confronted by the enemies which besiege our city,—the armies of material thoughts trying through specious arguments to lead us to stray from our rightful habitation of spiritual consciousness,—we have only to abide steadfastly in good, to continue unabated and uninterrupted in our obedience to the First Commandment, to detect a path to be avoided in every suggestion which would seek to divide the one Mind into many,—God into gods. "The secret place of the most High . . . under the shadow of the Almighty," was seen to be the quiet habitation wherein there need be no stress nor struggle to abide; that the only stress and struggle arises from the endeavor to abide in the dream cities of sense, wherein is no real substance, no real foothold, no real foundation, nothing on which to stand.

It was seen that mankind wanders footsore and weary, seeking health in altitude, in dry climate, in cold, in heat, the things which claim to benefit one proving fatal to another. Seeking to find rest in man-made laws, they drink from springs of water which are both sweet and bitter; they are thrown hither and thither as on a rapidly revolving disc, rising with each failure more weary and discouraged, yet returning to the disc in the hope that some lucky throw will cast them in the right place. I saw that in my temporary desertion of the consciousness of God, I too had been thrown into confusion, and that the only way out of it was in turning from sense to Soul. This affords a path to the city of our God so simple that the least of His little ones may find it and abide therein. Simplicity was seen to belong to Truth's ideas and complexity to error.

Once again a deep sense of gratitude to our beloved and steadfast Leader came to me, for I knew it was because of the light she has brought to our path through Christian

Digitized by Google

Science that the lost city had been restored to me, and that I was able to grasp the meaning of Isaiah's words, "Look upon Zion, the city of our solemnities: thine eyes shall see Jerusalem a quiet habitation, a tabernacle that shall not be taken down; . . . And the inhabitant shall not say, I am sick: the people that dwell therein shall be forgiven their iniquity."

SPIRIT KNOWS NO CASTE.

JANE L. VILAS.

SOME years ago, an employee of the English government, stationed at Bombay, being of a somewhat philanthropic turn of mind, conceived the idea of making use of his vacation by a journey to the plague-stricken district of Cashmere, with the hope of bringing succor to the afflicted ones. In making the trip, his native servants, who had some caste, forsook him one by one, fearing contamination, and he finally found himself at his destination with but one, a representative of the lowest caste, who thought he had nothing to lose. Accompanied by this faithful one, however, he pressed on from hut to hut in a deserted quarter, finding here and there poor creatures who had passed beyond human aid. At last in one desolate abode he discovered one who was still alive, but who had been abandoned to die by his own people. The Englishman stayed by him, and gave him tender care and attention till he seemed on the highroad to recovery, after which he went his way. Weeks passed, and he was again in his office, when one day the door opened and a native entered with the usual salaam. In response to an inquiry as to his business, the reply came, with the florid address of the Orient, "Woe is me, for I am an outcast among my people! I was left to die, and through the instrumentality of the sahib I am brought back to life, and am now contaminated, and my people will not receive me till I buy back my caste. The sahib knows I am poor, and he is responsible for my life, and he must either support it or buy me back my caste."

Though this incident happened a number of years ago, and in far-off India, where indeed like conditions prevail to some extent at the present time, it has been brought freshly to mind while pondering the many cases in which here in our own midst unnumbered people are not only left to die, but condemned to death daily, because this drug or that drug, this system of hygienic treatment or some other method of manipulation (all the outgrowth of accepted theories of life and power in matter), fails to restore them. Then when Christian Science comes "with healing in his wings," the so-called mind of mortals argues thus to itself: "My way is the only way. I refuse to recognize any other." Christian Science brings a kindly and compassionate message to the afflicted. It administers of the potency of Spirit. It teaches of the one eternal good, universal and all-inclusive; one Mind, and that all harmonious; one Life, and that indestructible. But mortal mind, the pretender to the throne of omnipresence, omniscience, and omnipotence, holds up its hands in horror and refuses to submit to Truth.

He who has overcome his self-will, his self-righteousness, his belief in a mind apart from the one Mind, and is thereby healed, is full of a new consciousness of life and health, and in the very nature of things he longs to share it with his brother. He hastens to him joyously, holding out to him the good which has been disclosed to him. What then happens? In too many instances, alas, comes the response, "This was not done by our method; and we will not accept it." Then comes seeming antagonism, a period when error separates itself from Truth by refusing to affiliate with it or even to recognize it. Then is the Master's prophecy fulfilled: "The brother shall deliver up the brother to death, and the father the child: and the children shall rise up against their parents, and cause them to be put to death." Then error may say, "Behold how Christian Science separates families! Have nothing to do with it."

When Christian Science causes separation, it is a separation of the wheat from the chaff. Any other sense of separation is the action of error excluding itself from the presence of Truth. As our revered Leader, Mrs. Eddy, says, "error is a coward before Truth" (Science and Health, p. 308). Nevertheless it is quite persistent, and only after many and repeated attempts (for we are told that after Jesus had overcome the temptations in the wilderness, the devil left him but "for a season"),—after many and repeated attempts of error to assert itself, does the Christ-consciousness prevail, and error flees away—disappears.

THE CHRIST-APPEARING.

WILLIAM H. ECTON.

IN the first epistle of John we read: "When he shall appear, we shall be like him; for we shall see him as he is." This text was pondered much by the writer, prior to his acceptance of Christian Science; and while seeking to analyze the statement as to why the simple act of seeing God would make us like Him, Truth's reply was, "Blessed are the pure in heart: for they shall see God;" in other words, until we become pure in heart we are unable to take cognizance of the divine manifestation.

A few illustrations may serve to broaden the scope and enlarge the significance of this truth, namely, the impossibility of the presence of both light and darkness at the same time, also the futility of attempting to bring darkness into light, light being always the displacer of darkness. We have further the self-evident fact that no two things can occupy any one space at the same time. The apostle John gives us several absolute and definite statements about the impossibility of anything opposed to God's likeness being conscious of God's existence, namely, "God is light, and in him is no darkness at all;" another, "He that loveth not knoweth not God; for God is love."

From these premises we may readily see the absolute and positive demands made upon every one who claims to be a Christian. Christ Jesus said, "Be ye therefore perfect, even as your Father which is in heaven is perfect." Paul's exhortation to the Philippians, "Let us, therefore, as many as be perfect, be thus minded: and if in any thing ye be otherwise minded, God shall reveal even this unto you." In other words, it is a demand for perfection on the part of every one of us, if we claim to live the truth we know today and each succeeding day. By so doing, where can we stop short of at-one-ment with infinite perfection, and thus to know God even as also we are known of Him.

[Written for the *Sentinel*]

"PEACE, BE STILL."

ARKY D. CONNER.

WHEN the waves dash high and the storm-winds roar,
And my barque seems frail and lone,
When far, far away is the sheltering shore,
And so near the seething foam;
Through the starless night comes a gleam of light,
As I lift mine eyes to thee,
And above the tempest thy "Peace, be still,"
Commands the turbulent sea.

O wondrous calm, O priceless peace,
O Christ-love, always here
To calm the waves and still the storm,
How could my heart know fear?
No night so drear but thy truth brings light,
All storms at thy word doth cease:
Through all the years would I list to thy word,
Thy love-laden message of peace.

SELECTED ARTICLES.

[*London* (Eng.) *Daily Chronicle.*]

A batch of *The Christian Science Monitor* falls upon the table. It is good reading. And one asks whether there is another religious sect in the world that can run a daily paper of American bulk and make a profit. The *Monitor's* censorship is insistent. It prints nothing but good news. And when you have read all the disasters and crimes of the world, you may look through the *Monitor* and take your antidote of cheerfulness.

[*Boston* (Mass.) *Transcript.*]

Through the lists in *The Bookman* and elsewhere it is comparatively easy to keep track of the popularity of current fiction, as well as of some of the non-fiction and juvenile books. The St. Louis Public Library publishes this year, as it did last year, a list showing the preferences of its readers in non-fiction as represented by the loan of books at the central building. It will be noticed, as in the list of last year, that Mrs. Eddy's book leads all the rest with triumphant ease, the number of copies of Science and Health in the library being fifty-eight, number of times issued, two thousand one hundred and thirty-five. "Innocents Abroad" by Mark Twain, with fifteen copies, was issued fifteen hundred and seventy-six times.

[Editorial in *Mulford* (Ore.) *Sun.*]

Doubtless the name of Mary Baker Eddy has graced the space of more printed pages than that of any woman of times ancient or modern. Such is not necessarily greatness, but it is somewhat indicative of the potentiality of the woman and of her place in the world of affairs. Regardless of our judgment of Mrs. Eddy and her teachings of Christian Science, she was and is the center of an epoch. Without attempting to express a judgment of the Christian Science faith, to say whether it is an incident in an epoch or is the epoch, we are constrained to admit the benefits of this life and its works. It is not necessary to argue on the unreality of matter and the delusion of death to glean good from Christian Science teachings.

Be all these things as they may, there are many sane folk who have discovered that healthy minds and healthy bodies are usually concomitant, that cleanliness is godliness when it includes both the intellect and the physical being. These same folk have faith in the curative qualities of a laugh, they dispel their dyspepsia with giggles and take allopathic doses of joy as a prophylactic against the glooms. Scientists teach mental sanitation, clean thoughts, and clean deeds. They deny disease and then forget both the disease and the denial. They are too engrossed in the joy of mere living and loving and laughing to catch the measles or feel pains about the appendix. Their faith is one of the forward gaze, well epitomized in "at sunrise every soul is born again."

Whatever the judgment of the future may be, these teachings of health are secure. Clean thoughts, a happy frame of mind, the forward look, smiles and joy unbounded, serenity of mind and body, and the perfect ease of self-assurance, tend to a successful life and sweet dreams o' night.

[Editorial in *Elizabeth* (N. J.) *Journal.*]

It is none of our business, of course, but those who see in the New York hotel proprietor who died under Christian Science treatment "another victim of Eddyism" may as well recall that persons under treatment by followers of the dominant school of healing have been known to die from malaria and ptomaine poisoning. Whether the patient would have recovered under any treatment is a question which any one may answer to suit himself. In any event, the deceased was during his lifetime a man of greater ability than is possessed by most of his critics, judging from the success attained by him in business matters. He may have been mistaken, perhaps he was, but it is only fair to give him the benefit of the doubt.

[E. M. Ramsay in *Dundee* (Scot.) *Advertiser.*]

I was sorry to see in the "Literature and Art" column that the writer speaks of Mrs. Eddy as having practised "the quackery of mental healing." In the earlier paragraphs of his article he gives an amusing account of some of the strange remedies prescribed in ancient times for the relief of the sick. Unlike as are these remedies to those which would be given by a modern physician, they have this point in common—the cure is supposed to be effected by something which the patient eats, drinks, or wears.

Christian Science, on the other hand, declares that all abnormal bodily conditions are the outward expression or manifestation of erroneous thought, and that in order to improve the health of a man his thinking must first be improved. This point of view is rapidly gaining ground, and it will be conceded on all hands that a marked advance in the moral standard of the country would be followed by a marked improvement in health. All recognize that certain illnesses are the direct effect of sin, and that anxiety, fear, and grief militate against health. Is it then unreasonable to suppose that other complaints may originate in unhealthy mental conditions?

Hundreds of men and women all over this country have seen for themselves that as through the study of Christian Science they get a clearer understanding of God and of the true nature of man, their health improves. By this study they are enabled to part company with many of the hard thoughts, unforgiving thoughts, critical, unkind thoughts which they have long harbored; they are able to see as selfishness and egotism the oversensitiveness, nervousness, apathy, and sense of failure which have dogged their footsteps; and they also find that as these errors disappear before the better thoughts which are entering their consciousness, they get rid of many of the ailments from which they have suffered. In the language of St. Paul, they are being transformed by the renewing of their minds.

People in general have no idea how much of their bodily ill health is the direct outcome of a hard attitude of thought. Let us hate no man, no party, no class, but walk in the gentle, humble, serene consciousness of God's presence and guidance, regarding sin as ignorance to be healed by the power of Truth and Love. Courage, joy, self-discipline, and kindliness are the best of tonics, and a change to purer thoughts will do even more for us than will a change to purer air.

[C. R. Munro in *Newmarket* (Ont.) *Express-Herald.*]

Christian Science has been steadily and surely gaining a higher place in the estimation of the public, as evidenced by the increasing number of persons daily coming to it for help and comfort. Had it done nothing more than the critic gives it credit for, it deserves the gratitude of mankind. It is, therefore, not surprising that it should meet with some opposition from the established systems of religion and medicine from which it differs so radically, for every pioneer in the great movements of the world has been met with the same opposition. Even the apostle Paul was called "a pestilent fellow" because he taught something different from the prevailing systems of his time. Christian Science is proving by actual demonstration, by doing the "works" which Jesus demanded as evidence of an understanding of his teachings, that it is the greatest blessing which has come to the world since the days of our Master.

Critics used to say that Christian Science did not heal

Digitized by Google

anything, but they have long since had to retreat from that position. Now they say that Christian Science does heal some things, but that it cannot heal organic disease. There is, however, such a mass of evidence to show that it has healed many hundreds of such cases, that it is somewhat late in the day to deny the fact. *The Christian Science Journal* and the *Sentinel* contain in each issue several pages of testimonials of healing, many of them of pronounced organic disease. I would also refer any inquirers to the book entitled "Christian Science as a Religious Belief and a Therapeutic Agent," by B. O. Flower, formerly editor of the *Arena* and now editor of the *Twentieth Century Magazine*, who is recognized as one of the foremost writers and most careful investigators in America, of all subjects dealing with human progress and achievement. Mr. Flower is not a Christian Scientist, but his investigations were very thorough and impartial, and the results very convincing. He cites a number of remarkable cases of healing of organic disease, including tuberculosis, cancer, and other things equally as bad, all in advanced stages and, according to medical testimony, hopeless. The cases are vouched for by reputable medical men, and supported by sworn statements of eye-witnesses.

Christian Scientists, according to our critic, should go to the battlefields, to the hospitals, to the leper colonies, and heal at once all the sick folks who are there. Before replying to this, may we ask him why he does not do this work himself if it is the right thing to do? The command of Jesus to heal the sick is certainly as applicable to him as to any Christian Scientist, and until critics are able and willing to do their share of this work, it is at least very poor taste to criticize others for not doing it. However, there are several very good reasons why Christian Scientists do not heal all the sick people in hospitals, etc. First, they are taught they have no right to treat any person mentally without being requested so to do, just as a man has no right to enter another's house and take possession without permission. Second, most Christian Science practitioners are so busy attending to those who come to them for help that they would have no time, even were they so inclined, to force themselves on those who do not wish their assistance. All who desire the treatment of Christian Science may have it, and no one need be deprived of the privilege. If Christian Scientists took any other ground, they would at once be accused of proselyting and of forcing their teaching on those who do not want it.

We heartily echo the sentiment of our brother when he says, "Let us face the facts of life," but let us face them as did Jesus, by knowing the truth about them, the truth which he said would make free. Christian Science has no quarrel with any one or any class of persons. It only asks for fair treatment. There is still no better advice than that of Gamaliel of old: "Refrain from these men, and let them alone: for if this counsel or this work be of men, it will come to nought: But if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God."

[H. L. Conger in *Reporter*, Two Rivers, Wis.]

The universe is far more real to a Christian Scientist than to a materialist, as all who have turned to this truth will testify. The statement by our friend that it is through the law of suggestion that the healing of disease is accomplished in Christian Science practice, does not make it true, for all who have any knowledge on this subject know that it is through the application of the law of God. The so-called law of suggestion has been used in many instances, as in mesmerism and hypnotism, but its effects have never been to cause regeneration mentally, morally, and spiritually, as is the case in the Christian Science healing. Many times those who have been to hypnotists for healing have finally turned to Christian Science for relief, and been blessed. Mrs. Eddy says in "Science and Health with Key to the Scriptures," on page 186: "Erring human mind-forces can work only evil under whatever name or pretense they are employed; for Spirit and matter, good and evil, light and darkness, cannot mingle."

We are glad that our critic recognizes the fact that this truth is beginning to be felt universally, among the learned as well as among the so-called ignorant, and if all "epidemics" were as beneficial as this, the brotherhood of man would soon be established. If the many cases of healing were the only "fruits" of the Christian Science doctrine, then our critic's remarks would be more to the point; but the healing is only a small part of the fruits, and any system that can show improved and happier lives, as well as better moral and spiritual conditions, cannot lightly be tossed aside by the ridicule of those who "know not what they do."

[John L. Rendall in *Sioux City* (Ia.) *Journal*.]

Our clerical critic is probably not aware that Christian Scientists, as a Christian people, are doing as much in their way to preserve the health of mankind and to overcome discord and disease of every name and nature as are members of other denominations. In his arraignment of Christian Science this minister evidently is not aware of the fact that Christian Scientists consistently depend upon the promises of healing through the power of God which are given in the Scriptures. If this be "modern hocus pocus exorcism" then the practical example of Jesus Christ and his disciples in their healing of the sick comes under this head, for Christian Science in its healing activity is identical with that of the great Master.

Christian Scientists have absolute faith that God's promises are operative at all times, and that when Jesus said, "Whatsoever ye shall ask in prayer, believing, ye shall receive," he meant exactly what he said. The psalmist states, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling." Christian Scientists have proved that purity of thought results in purity of action, includes absolute cleanliness, includes conditions of hope, confidence, and expectancy of good, those conditions which are conducive to the highest and best results morally, physically, and spiritually, and their constant endeavor is to inculcate within the thought of humanity that faith and confidence in God which is sufficient protection to those who have it.

Christian Scientists are fully entitled to be known as such. In the first instance, they are Christians, which means that their constant endeavor is to be like Christ, to do good to all mankind, and to preach and practise the doctrine of God's unchanging love for mankind. They are Scientists because they intelligently understand the scientific relation of God to man; because they have "exact knowledge co-ordinated and systematized," by reason of which they obtain satisfactory results; therefore the term Christian Scientists, as applied to these people, is not a misnomer, but is entirely appropriate.

Christian Scientists have learned that disease cannot be overcome by engendering fear, that it is not abolished by making vicious mental pictures or depicting its awfulness, but that it can be and is overcome through purity of thought and right living, combined with a right understanding of man's relationship to God. It is their constant effort to aid in freeing humanity from the fetters which have bound them to sickness, sin, and disease, and to bring about higher and better conditions in every respect.

[John H. Wheeler in *Marshall* (Mo.) *Democrat-News*.]

Mrs. Eddy specifically points out that God alone is the creator of all, and Lord over all. She further reiterates this by declaring God to be both Father and Mother of all; the only first cause, the common parent of all; therefore,

Digitized by Google

the purpose of these teachings, dealing so ably with the vast problem of life and infinite being, cannot be misdirected into channels of personal emulation by the mere claim of any one, and thus lose the spiritual hues and impersonal leadings of divine Mind.

Every word of Mrs. Eddy's revelation is in deep sympathy and accord with the Bible and John's version of creation. "In the beginning was the Word, and the Word was with God, and the Word was God. . . . All things were made by him; and without him was not any thing made that was made." This sense of completion in God is further elucidated by Mrs. Eddy, where she says, "Christian Science explains the nature of God as both Father and Mother" (Messages to The Mother Church, p. 46). All men admit that the creation which surrounds them must have a common source. Even to acknowledge that we exist is to admit an origin, a cause or creator for this existence, and in the Christian world this cause is generally called God. For does not the Bible declare God to have said: "I am that I am," for "I am God, and there is none else"? Mrs. Eddy's definition is only calculated to make plain to human understanding this nature of God in terms that will signify a complete cause within and of itself. What grander and more comprehensive attributes could be conceived of than the endearing terms Father and Mother, as applied to God, the Supreme Being of the universe? Does it not indeed bring Him nearer to our human sense of a perfect parent's characteristics, thus to lessen the apparent separation between God and man?

Again, in Science and Health, the text-book on Christian Science, p. 507, Mrs. Eddy thus defines this compound nature of God and His mode of parental government: "Spirit duly feeds and clothes every object, as it appears in the line of spiritual creation, thus tenderly expressing the fatherhood and motherhood of God;" and this tender and expressive sense of God's character awakens a deep response in the breast of men through the conviction that God does care for His children. Its assurance is indeed the peace which passeth understanding. Jesus said: "Call no man your father upon the earth: for one is your Father, which is in heaven," and he could have said no less of our mother, when considering the actual parentage of man, as He endeavored to remind him that now is man the image and likeness of God. Logically, then, God is the Father and Mother of man. It is true our human ignorance may temporarily hide the fact from us, but even this will vanish before the truth of our relationship with God, as we follow Christ in the way he appointed, enabling us here and now to become "heirs of God, and joint-heirs with Christ" through spiritual growth and progress, whereby we put off the old man with his deeds and put on immortality.

The benign mission of Christian Science is to arouse mortals from a selfish material sense of life to feel John's utterance, "Now are we the sons of God;" but not to direct mankind to a personal worship of any one, and especially not to the deification of aught but God, for it would thereby lose its spiritual force and power to heal and save if such vagaries were incorporated into its religious teachings. For with Paul we devoutly declare: "One God and Father of all, who is above all, and through all, and in you all."

[Ezra W. Palmer in *Clay's Review*, Denver, Col.]

Christian Science bases all its reasoning on God, Spirit, and man and the universe spiritual, immortal. It draws a clear sharp line of distinction between the real and the unreal. God is real, and that also is real which proceeds from God, postulates universal law, and like God is spiritual and wholly good, and which when applied to man brings peace, harmony, health, and never-ending happiness. Thus to obey the golden rule, to love God and man, to heal the sick and rescue the sinning, would be to live according to reality. Christian Science classes that as unreal which is unlike God. St. John declares God to be Love, therefore hate is not of God. So also sin, sickness, and death, being unlike God, are not real. They are contrary to the nature of God and therefore are evanescent, ephemeral, perishable. Jesus healed the sick, reformed the sinner, raised the dead, because he knew God aright, because he understood the distinction between the truth (reality) and the misconceptions of mortal man (unreality).

The beginner in Christian Science quickly learns that clear thinking is absolutely essential if he is to preserve this distinction between good and evil, between the real and the unreal. If he would follow the Master, he must lay hold on reality, the imperishable things of the Spirit. Christian Science heals the sick, frees the sinner, and opens to every man who desires to know, the way of eternal life; but to do these things, clear thinking is a prime requisite. No medley of sense impressions, no vague generalities of disease as "superfluity of thought" as your article states, no massing of good and evil, will ever accomplish these results, and such modes of thought or action are entirely foreign to Christian Science. Christian Science does not obscure the clear-cut commands of the Decalogue nor any of the commands of the Bible. It lays stress on the Ten Commandments, recognizing them as mighty to lead men to God, to protect society, and to uplift humanity. Perhaps no other religious organization insists so strongly on observing the Decalogue as the Christian Science church. In the Christian Science Sunday schools the basis of the work for the children for several years is the Decalogue, the Lord's Prayer, and the beatitudes, and the children are thoroughly grounded in these as fundamental to the upbuilding of Christian character.

[Nellie M. Johnson in *Omaha* (Neb.) *World-Herald*.]

Succinctly defined by Mrs. Eddy, the mission of Christian Science is "to injure no man, but to bless all mankind" (*The Christian Science Monitor*, Nov. 25, 1908). This definition but restates the golden rule, and the follower of Christ heeds this behest; constantly he strives to express, in thought and deed, to all who come within the radius of his life, kindness, mercy, patience, unselfishness, and the other qualities of divine Love.

A departure from this line of conduct may indicate not so much a desire for evil, as ignorance of good and the way to achieve it. Christian Science explains this way so simply that a child can demonstrate it in a degree, and yet its teaching is so profound that the scholar, catching its import, discovers his thought allied to a star, which, faithfully followed, leads to God's endless day. In the unfolding of this day is found a surcease from sorrow and suffering, for man recognizes himself as God's child, endowed with every good thing, and the capacity richly to enjoy these blessings.

ADMISSION TO MEMBERSHIP IN THE MOTHER CHURCH.

The next admission of candidates will be Nov. 3, 1911. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Oct. 25, 1911.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 2, 1911, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

JOHN V. DITTEMORE, *Clerk*,
Falmouth, Norway, and St. Paul streets, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

[Reprinted by request from the *Sentinel* of July 17, 1902.]

WORDS FOR THE WISE.

THE Mother Church by-law, relative to a three years' term for church readers, was entitled to and has received profound attention. Rotation in office promotes wisdom, quiets mad ambition, satisfies justice, and crowns honest endeavors.

The best Christian Scientists will be the first to adopt said by-law in their churches, and the readers to retire *ex officio* after three years of acceptable service as church readers, to higher usefulness in this vast vineyard of our Lord.

The churches who adopt the aforesaid by-law will please send to the editor of our periodicals due notice thereof.

MARY BAKER G. EDDY.

Pleasant View, Concord, N. H., July 12, 1902.

[Reprinted by request from the *Sentinel* of July 24, 1902.]

AFTERGLOW.

Beloved Students:—The by-law of The Mother Church, stipulating three years as the term for its readers, neither binds nor compels the branch churches to follow suit. And it applies only to Christian Science churches in the United States and Canada. Doubtless the churches adopting this by-law will discriminate its adaptability to their conditions. But if now is not the time, the branch churches can wait for the favored moment to act on this subject.

I rest peacefully in knowing that the impulsion of this action in The Mother Church was from above. So I have faith that whatever is done in this direction by the branch churches will be blest. The readers who have filled this sacred office many years, have beyond it duties and attainments beckoning them. What these are I cannot yet say. The great Master saith: "What I do thou knowest not now; but thou shalt know hereafter."

MARY BAKER G. EDDY

Pleasant View, Concord, N. H., July 21, 1902.

POSSIBLE AND PRACTICABLE.

IT is said that when Professor Morse was struggling to introduce the telegraph which he had invented, a certain congressman who with others had voted to appropriate a sum of money for the construction of an experimental line, was opposed for reelection on the ground that he had wasted public money upon a scheme which was entirely impracticable; and he was defeated for this reason. In much the same way, Christian Science has been opposed because of the educated belief that the only way the sick can be healed is through the administration or application of material remedies.

The prevailing belief that the telegraph was impracticable readily gave way before the accomplished fact of telegraphy, and the present generation has become so familiar with this means of communication that it can scarcely realize there was a time when telegraphy was unknown. In the same way the belief that mankind are subject to diseases which can be overcome only by material remedies, is giving place to the understanding that disease is not a part of the reality of man's being; and in human experience men are healed today through spiritual means as they were healed by Christ Jesus and his immediate followers in the dawn of the Christian era. The telegraph became an accepted fact because people were given the opportunity to make use of it, and to see for themselves that it did what was claimed for it.

Christian Science likewise is becoming an accepted fact to a constantly enlarging portion of humanity, for the same reason and in the same way. That which seems to stand in the way of universal acceptance of this teaching at the present time is an inherited belief that disease cannot be cured except through material means; and that when material means fail, disease is incurable. The strangest thing about this belief is, that it exists notwithstanding the central, most influential, and best known figure of history proved beyond doubt that it was untrue. Just to the extent, however, that Christian Scientists, following in the footsteps of their great Master, prove by their works that this belief is still untrue, it will vanish from human experience, even as the false belief about telegraphy vanished before the actual demonstration of its utility.

The only hope of the eighty thousand or more organized physicians who are trying to intrench themselves, through federal and state legislation, in the monopoly which they have until recently enjoyed with undisputed sway, lies in their ability to perpetuate the belief about medicine which has so long obtained; therefore the need at the present time, of those who would be free, is not only to oppose all efforts to obtain such legislation, but above all else to labor to dispel the belief that means other than those employed by Christ Jesus are necessary to the healing of disease. There is no more effectual way of accomplishing this than for Christian Scientists to continue to do the works which the Master declared they that believed on him should do, so that the "signs following" may be to the world a proof that they are his disciples in word and in deed. Even the Master advocated the argument of demonstration when he said, "If ye believe not me, believe the works;" and they who scoff at the teachings of Christian Science have no argument wherewith to refute its healing works.

There are in the ranks of Christian Scientists today unnumbered thousands who through the ministrations of our Leader's teachings have been restored to health and usefulness after the verdict "incurable" had been pronounced on them by medical authority, and the responsibility rests upon each one of us to do our part, whatever it may be, in the continued demonstration of the superiority of the Christ-healing, until there shall be none to deny its utility in the salvation of mankind from sickness as well as sin.

ARCHIBALD MCLELLAN.

THE SELF-COMPLACENCY OF BELIEF.

THERE is a current saying, by way of definition, that orthodoxy means "my doxy," heterodoxy "the other man's doxy;" and one cannot read very far in the history of religion, nor observe very carefully the mental habits of mankind, without realizing that this humorous putting of a point voices a fact which enters into the determination of some of this life's greatest issues. The significance of the matter is seen when we remember that religious opinions are, for the most part, a product of education and environment; that they often prompt to the zealous if not passionate defense of ideas respecting a subject which the individual has not even tried to compass or think through for himself, and that the spiritual progress or decadence of men and nations alike is traceable in no small degree to mental predispositions. People not only inherit their religious beliefs, but in the case of a vast majority they are content to accept this inheritance without any patient and purposeful inquiry into its meaning, or into the warrant in reason or revelation for their beliefs, and yet how frequently those who differ from them are branded as heretics.

The rule of undigested convictions, of teachings which

Digitized by Google

have been accepted by men for no better reason than that their fathers accepted them, has been so long and so blighting in its influence upon human mentality that Jesus' description of certain men of this world as lovers of darkness rather than light, still seems entirely in keeping to those who rightly perceive that darkness stands for and includes all erroneous thought. What is true of religious beliefs in this connection is particularly true of medical beliefs; the fact that a physician has pursued his studies in a given institution or been associated with a given school of practice means for the average man that he has accepted a given point of view as correct, and is ready to condemn any opposing thought as though he were the exponent of *demonstrated truth*, rather than of a prevailing belief which, as he well knows, will ere long give place to another belief of its kind.

The extent of this habit of entertaining ill-grounded opinions, and of outcasting those who have been educated to think otherwise, is equaled only by its inertia, and it constitutes one of the greatest hindrances to Science and to the spiritual advance of the race. It passes judgment not upon the verity of being, the positive of demonstrated truth, but upon a world-wide assumption which, while expressing itself in terms of assured knowledge, is but that audacity of error to which he must have referred who declared that the world's greatest need today is "the negation of its negative." Christian Science is revolutionizing thought by awakening men to the fateful falsity of this mental habit. On well-nigh every page of "Science and Health with Key to the Scriptures," the text-book of Christian Science, will be found some phrasing of its author's untiring insistence that the only orthodox truth is a demonstrable truth; that while we cannot originate truth, it is our *high calling* of God, our supreme privilege and our most important business, to prove its verity in every experience and event. No one can honestly open his mind to this teaching without experiencing a general clearing out of cant, that emptying of the vessels of thought to which Mrs. Eddy refers when she says, "Christian Science, properly understood, would disabuse the human mind of material beliefs which war against spiritual facts" (Science and Health, p. 130).

When the caste complacency of religious and medical belief is broken up, when thought is emancipated from the contented enslavement to traditions, then, and then only, can we truly "open the door" in answer to Truth's patient and loving, but unintrusive "knock."

JOHN B. WILLIS.

RESPONSIVENESS.

THE wise man said: "The preparations of the heart in man, and the answer of the tongue is from the Lord." This points to the recognized guidance of the one Mind, and shows the need of alert responsiveness on the human side. Even in our earthly relationships there is little real interest between those whose tastes and habits are wholly different, though they may be related by ties of kindred; but just here it may be remarked that there is nothing which so tends to draw people together as love of the truth. In the presence of this vital consideration culture and learning take second place, and spiritual understanding is given the priority which is ever its due. On the other hand, after we have awakened to the truth of being, we become aware of a "great gulf" which separates us from those who still hold that man is material, with a doubtful chance of becoming spiritual after death. Though we may talk across the gulf, as did Abraham and Dives, we do not really commune, and never can until the chasm is bridged by the understanding of divine Love.

We are all conscious at times that it is difficult to correspond with those who have no great interest in common with us; we do not answer their letters at once as we do those of the friends whose interests are identical with our own, and this may serve to illustrate our relations with the all-Father, God. How often do we hear the sorrowful plaint that prayer is unanswered, importunity apparently denied audience on the divine side, while the petitioner vainly struggles to content himself with the supposition that God has a good reason for ignoring the request, or at least for delaying its answer. Some one has said that many are made atheists because they ask for that which God cannot bestow, but a Christian Scientist would hardly agree to this, for our text-book tells us that the infinite cannot "do less than bestow all good;" also that "to all mankind and in every hour, divine Love supplies all good" (Science and Health, pp. 2, 494). There is "no good thing" that God is not ready to bestow, but responsiveness to the divine nature is needed on our part,—a recognition of the fact that as His children we have a kindred nature, with pure motives and affections,—for not otherwise can we truly draw near to God, commune with infinite Love and wisdom, and gain an early answer to our prayer whatever be our need.

In the prophecy of Zechariah is a remarkable passage which has helped one Christian Scientist to understand the spiritual process that is needed in order to make human sense truly responsive to the divine. It reads, "I will bring the third part through the fire, and will refine them as silver is refined, and will try them as gold is tried: they shall call on my name, and I will hear them: I will say, It is my people: and they shall say, The Lord is my God." The preceding verse implies that two thirds of that which seems to constitute human consciousness,—its material beliefs,—will be consumed in the purifying process, by the fire of divine Love, and that then thought will be prepared to commune with God. This is made very clear by our revered Leader, who says, "Thought passes from God to man, but neither sensation nor report goes from material body to Mind. The intercommunication is always from God to His idea, man" (Science and Health, p. 284). Our Master said, "I know that thou hearest me always"! If we are truly responsive to Truth and Love, we, too, can say this, and prove it, as did he, in the healing which shows that the loving Father is ready to respond to every call of the child who knows and loves Him.

ANNIE M. KNOTT.

SEMIANNUAL LECTURE IN THE MOTHER CHURCH.

The First Church of Christ, Scientist, in Boston, Mass., announces a free public lecture on Christian Science by Willis F. Gross, a member of the board of lectureship of The First Church of Christ, Scientist, Boston, Mass., in the Church Edifice, Falmouth, Norway, and St. Paul streets, Back Bay, Boston, Thursday evening, Nov. 2, at eight o'clock. The public is cordially invited.

AMONG THE CHURCHES.

CHAMPAIGN, ILL.

A popular spot on the Chautauqua grounds is the large tent placed in position by the Christian Scientists of this city; and yesterday [Aug. 16] those in charge estimated that six hundred visited the headquarters.

Every little detail looking to the convenience and pleasure of the public has been provided, including ice water, a telephone, a typewriter, a writing-desk, and a registration book, in addition to rocking-chairs, a lounge, plenty of reading (including books and newspapers), a mail box, and souvenir post-cards. On the whole it is rather remarkable that so many conveniences are to be found under one tent, and a place where everybody is welcome. A spirit of good fellowship prevails to an extent that is contagious.

Champaign Gazette.

THE LECTURES.

LOS ANGELES, CAL.

A lecture on Christian Science was delivered in Third Church (Simpson Auditorium), Sept. 10, by William R. Rathvon. He was introduced by F. E. Woodley, who said:—

"It is written, Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him." During ages past man has been believing the evidence of the material senses to be the truth, and matter to be substance, the foundation of his existence. In this belief man has not found the peace "which passeth all understanding," neither has he found harmony nor his God-given dominion; but he has found suffering, failure, sin, disease, and death.

The question therefore is, How may we rid ourselves of these discordant conditions, and have the good which God has provided for His people? Mrs. Eddy tells us in Science and Health (p. 206), "Suffering or Science must destroy all illusions regarding life and mind;" and as man does not desire to suffer, he is seeking for Science. We are gathered here this afternoon to learn of this Science and its Principle,—the truth that makes men free. And I know that we shall be greatly benefited by this opportunity of hearing an address on this subject.—*Correspondence.*

PORTSMOUTH, N. H.

Judge Clifford P. Smith lectured on Christian Science Sept. 10, at Freeman's Hall. He was introduced by Mayor D. W. Badger, who said:—

I have been invited here this afternoon by members of the Christian Science society of this city to introduce the speaker, Judge Smith, who will lecture to you on the subject of Christian Science. While not professing to be a Christian Scientist, I am very glad to perform this service; not only because of a desire to serve any worthy cause, but because of the fact that I have never personally gone into the minute analysis of the theories and practices of Christian Science, and am therefore glad of an opportunity to listen to the learned gentleman who is so well qualified to discuss this subject.

As I understand it, the Christian Science religion is the only religion ever founded by a woman, and its Founder, the late Mrs. Eddy, occupies a most enviable position among the famous women of the world. Furthermore, Christian Science enjoys the distinction of having had the most extraordinary growth of any movement of its kind perhaps in our history. The old adage that "a man is known by the company he keeps" is applicable to a society, and a society is also judged by its accomplishments. As I have already said, I know but little about the theories and practices of this movement. Quite often, however, I receive in my mail copies of a newspaper which emanates from this organization, called *The Christian Science Monitor*, and I am very favorably impressed with this example of clean journalism,—its omission of exaggerations and sensational display of questionable news, perhaps more accurately described by using the vulgar term "yellow journalism," which I am sorry to say appears so prevalent in many of our American newspapers of today. I feel, my friends, that if this is one of the products of Christian Science, it is well worth our time to learn more about it.

Correspondence.

NELSON, B. C.

Prof. Hermann S. Hering delivered a striking address on Christian Science at the Congregational church yesterday afternoon [Sept. 24]. The speaker was introduced by C. R. Hamilton, K. C., who said that he was a member of the Church of England, and had no idea of changing; but he considered that Christian Science had rediscovered a great truth in its application of mental healing as practised, according to the Bible, in the early days. The world owed a great debt to Christian Science, said Mr. Hamilton, who declared that intolerance should have no place in the minds of a modern people—*Daily News.*

ABERDEEN, WASH.

Frank H. Leonard delivered an interesting lecture on Christian Science at the Grand Theater last night [Sept. 19] before a very large audience. He was introduced by F. W. Loomis, who said in part,—

There are in this world a great many people who are accustomed to look upon religion as something entailing great inconvenience; something which they can take into their daily lives and honestly live only at a material sacrifice and loss of happiness. It has always seemed to me that if the universal instinct of humanity to worship and to seek communion with a higher and but partially comprehended power were true, then its manifestation should be as natural as the tinted petal of the flower or the song note of the bird; and like them, too, that it should not deface nor mar, but should add to and complete that which it adorns.

This, I take it, is one of the lessons taught by Christian Science. Its votaries in every community seem to be healthful, happy, sane, and successful. They would be understood; they would clear the atmosphere of the ignorance and misapprehension which exists concerning the fundamental Principle of their faith; they would bless others with the truth which has blessed them.—*Aberdeen World*

LA GRANGE, ILL.

First Church of Christ, Scientist, was well filled Monday evening [Sept. 25], when Virgil O. Strickler delivered a lecture on Christian Science. Avery Cooley of Riverside introduced the speaker of the evening, saying:—

There is one aspect of Christian Science from which there is no appeal—its healing. It is nearly twenty centuries since Jesus restored the sight of the man born blind, but the one great fact from which he could not be shaken is the one from which the inquirer today finds no escape—"One thing I know, that, whereas I was blind, now I see." Out of the necessity for answering the inquiries of the public about Christian Science, has grown the board of lectureship of The First Church of Christ, Scientist, in Boston, Massachusetts, whose members speak with authority on this subject, and we are to have the privilege tonight of listening to a member of that board.—*La Grange Citizen.*

FORT WAYNE, IND.

Before a large audience at Minuet Hall Sunday afternoon [Oct. 1] Bliss Knapp delivered a forceful address explanatory of Christian Science. The Hon. T. E. Ellison, in presenting the speaker, said in part,—

It is claimed by Christian Scientists that the message of the Christ as it appears in the Bible,—the message of peace, health, and immortality that he uttered and demonstrated by the healing of the sick, the forgiving of sin, and his victory over death,—is still going on in tones undiminished in love and power, and as easy of demonstration as it was in the days when we speak of his being on earth as the man Jesus. That this message has been made clearer and more easily apprehended by the discovery of our Leader, Mrs. Eddy, in our text-book, "Science and Health with Key to the Scriptures," which she caused to be printed and given to the world in 1876, we most sincerely claim. Since that time—like those thousands who at the command of Christ Jesus sat down in the desert and were fed till all were filled, from the five loaves and two fishes—many thousands have

Digitized by Google

demonstrated the correctness and reliability of her teachings. That these truths are demonstrable we declare unto you in the language of the father who, when his child was healed, cried out and said, "Lord, I believe; help thou mine unbelief."—*Fort Wayne Sentinel.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Amesbury, Mass.—Willis F. Gross, Y. M. C. A. Hall, Oct. 31.

Atlanta, Ga.—Prof. Hermann S. Hering, Lyric Theater, 3:30 p.m., Oct. 29.

Bangor, Me.—Judge Clifford P. Smith, City Hall, Nov. 3.

Belmont, N. Y.—Frank H. Leonard, Ward Hall, 3 p.m., Oct. 29.

Berlin, Ont.—Rev. William P. McKenzie, Church Edifice, Oct. 31.

Birmingham, Eng.—Bicknell Young, Town Hall, Nov. 14.

Boston, Mass.—Willis F. Gross, The Mother Church, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul streets, Nov. 2, 1911.

Brantford, Ont.—Bliss Knapp, Conservatory of Music, 30 Nelson street, Oct. 22.

Brockton, Mass.—Clarence C. Eaton, The Globe, 4 p.m., Oct. 29.

Fitchburg, Mass.—Clarence C. Eaton, City Hall, Oct. 30.

Goldsboro, N. C.—Judge Clifford P. Smith, Court House, Oct. 26.

Grand Rapids, Mich.—William R. Rathvon, Powers Theater, Nov. 3.

Great Falls, Mont.—Virgil O. Strickler, Opera House, Nov. 2.

Greenville, Mich.—Rev. William P. McKenzie, Congregational Church, Nov. 3.

Hamburgh, N. Y.—Frank H. Leonard, Kopps Opera House, Oct. 31.

La Crosse, Wis.—Francis J. Fluno, M.D., First Congregational Church, Oct. 30.

Milford, N. H.—Willis F. Gross, Town Hall, Oct. 30.

Minneapolis, Minn. (Fifth Church).—Virgil O. Strickler, Auditorium, Oct. 31.

Nashua, N. H.—Willis F. Gross, Universalist Church, Main and Pearl streets, Nov. 3.

New York, N. Y. (First Church).—Judge Clifford P. Smith, Church Edifice, Central Park West and 96th street, Oct. 31.

Palo Alto, Cal.—Bliss Knapp, The Armory, Nov. 6.

Paris, France.—Bicknell Young, Washington Palace, 14 Rue Magellan, 9 p.m., Nov. 9.

Passaic, N. J.—Clarence C. Eaton, Smith Academy, 42 Pennington avenue, Oct. 26.

Philadelphia, Pa.—Judge Clifford P. Smith, Church Edifice, Walnut street, west of 40th, Oct. 28 and 29.

Poughkeepsie, N. Y.—Virgil O. Strickler, Collingwood Opera House, 3 p.m., Oct. 29.

Racine, Wis.—William R. Rathvon, Guild Hall, Nov. 2.

Roanoke, Va.—William R. Rathvon, Jefferson Theater, 3 p.m., Oct. 29.

Rochester, N. Y.—Rev. William P. McKenzie, Lyceum Theater, 3 p.m., Oct. 29.

Rome, Ga.—Prof. Hermann S. Hering, Rome Opera House, Oct. 31.

Sharon, Pa.—Frank H. Leonard, P. H. C. Hall, Oct. 30.

Sioux City, Iowa.—Bliss Knapp, Auditorium, 3 p.m., Oct. 29.

Syracuse, N. Y.—Willis F. Gross, Wieting Opera House, 4 p.m., Oct. 22.

Taunton, Mass.—Willis F. Gross, Odd Fellows Hall, Oct. 29.

Weeping Water, Neb.—Bliss Knapp, Church Edifice, Oct. 30.

TESTIMONIES OF HEALING.

Words cannot express my gratitude for what Christian Science has done for me, so I am going to give a brief outline of my case and my condition before coming into Christian Science. I was said to have been born with infantile partial paralysis of the right side, caused from injury at birth. I was very delicate as a little baby, so my aunt took me to a doctor, who said I had spinal trouble. I was under his care for a long time, but got no better. I could not sit up, walk, or talk, or use my right arm and leg. I was about five years old at this time.

I was then given magnetic treatment, and after the second treatment I did walk a few steps alone, the first I had ever walked, but after that I grew weaker, and could not even finish the ten treatments arranged for. My people then took me to a very fine physician and surgeon from New York, who said I had hip disease and must be operated upon at once before it was too late. I was taken to a hospital, and he operated on me, then put my right leg in a plaster cast for ten weeks, and ordered two braces for me, one for day and one for night. While under this treatment, the doctor died very suddenly, so we had to try something else. Electricity and massage were then applied to my right side. I had massage for two years or more, then rubbing and osteopathy for nine months. In the latter treatment my ankle was badly injured; so I was worse off after I got through than before I commenced.

All kinds of braces and shoes were bought for me, but all were failures. My right side would not grow as fast as the other. I was examined by some of the best doctors and specialists in Los Angeles. They all said the same, that there was no operation or anything that would cure me, that I would always be a cripple, so must make the best of it. I could not talk, use my right arm and hand, or walk without a brace from waist to ankle, the disease extending from my tongue to the toes on my right side. By this time I was fifteen years old, and my people had tried everything they heard of. My right arm and leg were now four inches shorter than the left, and I was having another brace made when Christian Science found me.

The practitioner said I must take off the brace to let my leg grow; so I did, but could not walk a step without it. I crawled on my hands and knees for three days, then I learned to use crutches, and in two weeks I threw away the crutches and walked without them, but limped. In nine months' treatment my arm and leg each grew naturally and also caught up two inches with the other side. After the first treatment I was healed of a chronic bowel disorder, and later of bronchitis, catarrh, and other ailments. I learned to talk and use my right hand and do things I could never do before, and my whole body developed very rapidly. It would take me hours to tell all I have received in Christian Science. I have been going to school four years now, and only missed two weeks, in an attack of measles. I was healed in three days, but the health officer would not let me go back to school. I am now going to business college, during summer vacation. My demonstration is not yet complete, as my ankle turns some, and that side has not entirely caught up with the other; it is one inch shorter now, making three inches it has caught up with the other side. My speech is not perfect yet, as some words I cannot pronounce correctly, but I am sure I will be entirely healed when I use what I have been taught.

I need not say how grateful I am for what I have received in Christian Science the last three years, taking treatments from a practitioner for one and a half years, and since then doing my own work. I am grateful to God for Mrs. Eddy, for her grand and noble life, and for Christ, Truth, that is guiding us out of darkness into light.

ODIN FERN, South Pasadena, Cal.

I had been a member and worker in one of the churches since fourteen years of age, but when trials and perplexities crossed my path I became dissatisfied with my concept of God and ceased to attend any church. I read many things which were suggested, but could not prove true what I read, and I was in this state of mind when Christian Science was brought to my notice. The healing rays of Truth as taught in "Science and Health with Key to the Scriptures" by Mrs. Eddy, dawned upon my thought in April, 1904. Through the reading of this book I was healed in a few days of eye trouble for which I had worn glasses over three years.

I was also healed at the same time of an internal trouble from which I had suffered for over twelve years. I had been treated by five different physicians and had resorted to an operation, but with no relief. At the time I began to read the text-book of Christian Science I was relying upon the use of a very powerful drug to stop the attacks of pain caused by this abnormal condition. I was a great believer in drugs, but instantly saw that to endow them with power was to break the First Commandment. The entire medicine-chest was emptied at once, with the exception of one drug, for I was afraid the pain might return and I had not fully realized that I had been healed, so thought it would do no harm to keep this medicine. This thought held sway for a couple of days, when I realized that God is greater than any drug, and that since He had healed me He was able to keep me well. Thus the false god was dethroned and destroyed.

A year later I faced the fact that I must earn my own living; I had not been trained for this, and the city in which I was then living was said to be a very hard one in which to find employment; but I had learned my relationship to God and that He who provided the manna for the children of Israel had not ceased to be God; I was His child, and I would trust Him. A dear Scientist interested herself in my behalf, and in less than two weeks I had a remunerative position. From that time on, my every need has been supplied. Sometimes the way has seemed dark and long, but I have proven to my entire satisfaction that God can "furnish a table in the wilderness." To those dear ones who are struggling in the desert of fear, doubt, and uncertainty, I would say, Be faithful in obeying the instructions so lovingly given in Science and Health; study them with the receptive thought of the little child, and before you realize it you will find yourself entering the promised land of freedom.

No words can ever express the deep love and gratitude I feel toward her whom God chose to bring to the hungering ones of this age the bread of heaven.

MRS. CAROL KIMBERLEY, Los Angeles, Cal.

Like many others, I came to Christian Science for help when all else had failed. I had what doctors called stomach and liver trouble, and had become a wreck both mentally and physically. Words utterly fail to express my condition at that time, but I struggled on, trusting God, who I thought had willed this condition for me. But, thanks to His holy name! I was about to reach the turning-point in my experience, and this is how it came about. One day, while in a desperate state, I was persuaded to go out for a while, and as I was standing on a neighboring street, almost unconscious, as it seemed, of any of the surroundings, a little paper fluttered to my feet. I stooped to pick it up, and found on the margin the words, *Christian Science Sentinel*. Somehow I had a great desire to read that little leaf, but when I was ready to return home it was missing, and I did not know one thing of its teaching; but I kept thinking about it, and next morning, as I went for a walk (as this was the wish of my physician), going by the same place the little leaf came fluttering to my feet again. I took it home and began to read; and found that it spoke of "Science and Health with Key to the Scriptures," which I sent for immediately, and also sent to Kansas City for help. My request was responded to at once, and after a time I began to improve. I kept clinging to God as my only refuge, and as my understanding of God changed, my body reflected the truth. Today, after more than two years since I began the study of Science and Health, I rejoice with joy unspeakable for what I have learned in Christian Science.

I rejoice more for what I have learned of God and man's relation to Him than for the physical healing; but it is such a blessed thing to know that where one is the other is sure to be. I know now that to know God aright is Life eternal, and I do sincerely thank Him for Christian Science and for Mrs. Eddy, who was found pure enough to lead such a host out of Egyptian bondage into the freedom of the children of God. I am striving as best I know to live Christian Science. I study the Lesson-Sermon every day, and I also take the *Sentinel*, for it is to me a messenger of light.

MRS. MAGGIE GREENSLATE, Downing, Mo.

I wish to express my gratitude for the healing of an abscess and congestion of the breast; also the immediate healing, in one treatment, of a bad cough in the case of my little girl, also a bad earache. For the healing of all these and many other ailments I am truly thankful to God, also to Mrs. Eddy. The spiritual uplifting I have received is beyond all understanding.

MRS. E. JOHNSON, New York, N. Y.

In Christian Science I have found health and happiness. It found me as it has others, doubting and wondering as to what is "worth while." I had an ideal mother and a good honest father, but I see now that our trouble was that we knew not God aright, yet we would have been shocked had any one told us this. God was to me a personal deity, far away in the starry heavens, to whom I used to appeal for special dispensations.

When I was led to see the Christian Science concept of God, it seemed like a revelation. It was a reasonable and practical concept, and it has become a great comfort, casting out fear and thus healing. Through this Science I have been healed of severe headaches which several doctors had declared they could do nothing for except to provide medicine to take whenever an attack came,—and they seemed to come oftener; but thanks be to God I have been healed in Christian Science by the aid of a practitioner.

I have also found this Science a great help in many directions. I wish hereby to express my gratitude to God, to Mrs. Eddy, and to all who have helped me this far on the journey from sense to Soul.

L. EMMA PYLE, Philadelphia, Pa.

With gratitude in my heart I wish to tell what Christian Science has done for me. At the age of seventy years I was a nervous wreck, physically. I had been treated by many physicians, two of whom were specialists on nervous diseases, and they had pronounced my case locomotor-ataxia, and said it was incurable. I also took electrical treatment, but received only temporary help. I had taken much medicine, but found no relief. I then lost all faith in drugs, and as a last resort I commenced to investigate Christian Science. I read the *Sentinel* and *Journal*, then asked for and received treatment. After the second treatment I found great relief, and had no further use for a cane, though for three years I had not been able to get up steps without help. After a few treatments I could do it without any help. I had a great fear of everything, but this is gone. I had used tobacco for fifty-five years, but now I have no appetite for it.

Digitized by Google

I am praising God for all these blessings,—not only for the physical healing, but for the understanding of God as Love. I am perfectly well, and was so after a few months' treatment together with the earnest study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I attend the Christian Science service, which I think is a great help. I hope this testimony may encourage some one else who fears that his age may be against him. It has been proven to me that our heavenly Father does not forsake us because of our age.

JOHN E. MOTTER, Sr., West Alexandria, Ohio.

I have received so many benefits that in giving my testimony I hardly know where to begin. What brought me into the actual study of Christian Science was an experience that I had about six years ago. I was operated upon in a hospital in Memphis, Tenn., for appendicitis, with serious complications. I remained in the hospital eight weeks, and after leaving there it seemed necessary for me to go to the doctor's office every day to have the wound attended to. The physician told my parents that I would never be able to go back to my work, which was on the stage; that I would be an invalid. I became discouraged at this time, and thought of a Christian Science practitioner whom I had known all my life. I discontinued my visits to the physician, and instead went to the practitioner daily for two weeks, and at the end of this time I was completely healed. While I was under treatment my mother came into the room one day and found me reading a large family Bible, which I had never been accustomed to open except to look at the pictures. She thought that I had suddenly gone crazy, and when I told her that I was taking Christian Science treatment, she became quite excited; but she is now very grateful for my healing and for all the blessings it has brought to me.

In September, a few weeks after I was healed, I was back in New York at work, and have never had any bad effects from so doing, although many predicted otherwise. I met with a severe sprain in the fall of 1900, but with some help from a Christian Science practitioner I never missed a day from my work. The following winter I traveled from New York to California, and although I had severe attacks of cold yet I sang at every performance. In Colorado, where the altitude is high, theatrical managers have been known to ring down the curtain, as many of the performers seem to become faint. I, however, wired for a week's treatment, and never sang better and had no discomfort from the altitude. In different places I would always inquire if they had Christian Science services, and was glad to find through the West and middle West that Science is everywhere. In my travels I have met some wonderful Scientists.

To those dear people who are not Scientists, I would say that if they only knew the peace, happiness, and harmony it would bring them, they would begin its study and would then realize that God is omnipotent and that He heals all our diseases. For all the good that comes to me constantly, I am truly thankful to God, to Christ Jesus the Wayshower, also to Mrs. Eddy for giving us an understanding of the Bible through that inspired book, "Science and Health with Key to the Scriptures."

BESSILEE MERRILL, Memphis, Tenn.

Hoping that my experience may through the power of divine Love lead some other weary wanderer to know the truth that has been of such inestimable value to me, I give this testimony to some of the many blessings which have been mine since coming into Christian Science about four years ago. While never a confirmed invalid, yet for many long years I suffered from stomach trouble, melancholy, and nervousness, so much so that I often wished that He whom I was taught to believe was a God of love would take me to Himself.

In 1892 a copy of "Science and Health with Key to the Scriptures" was loaned me. I did not, however, study it, but simply gave it a cursory perusal; therefore I did not derive from it the benefit that I should have. I had before this very little faith in drugs as a remedy for my ills, and the reading of Science and Health destroyed that little. I had also lost the simple trust in the God of my childhood. I believed that there must be a first cause or creator; that He must be the author of good and evil, and therefore not a God of love, and from a human standpoint not a God of intelligence. I was so sure of my own conclusions that I ridiculed the idea of ever again putting my trust in such a creator.

I had often heard of the healing done in Christian Science and noted the criticisms of the press. I was, however, inclined to be liberal, on the ground that I had not given the subject a fair investigation, but was of the opinion that the healing came about through the power of mind over matter. This mental state, to one who had been a member of an orthodox church and a Sabbath school teacher, was not conducive to happiness, and while for many years the Bible was a closed book to me, except for ridicule, yet I longed for the truth and for a God whom I could love. I often wished for the simple faith or trust in God which I saw in many of my friends. As through all ages, the question "What is truth?" had often appealed to me, also the statement of Christ, "Ye shall know the truth, and the truth shall make you free." A casual visit to a Christian Science church, and the more than average intelligence depicted in the happy faces of its members, caused me to think that they must have what I so badly needed, namely, the truth.

While in this state of mind I learned that my extremity was God's opportunity. I was attacked by a combination of physical troubles, accompanied with a great fear of a recurrence of nervous collapse. My wife suggested that as I would not take medicine I might try Christian Science. She spoke of several dear friends who were Scientists, one of whom was a practitioner. An appointment was made, and I met the friend, who proved to be a friend indeed. She talked lovingly to me, and then gave me treatment. I was a willing subject, yet most skeptical. She advised me to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, and especially to dwell upon the "scientific statement of being" (Science and Health, p. 468). I did as she requested, and this was the turning-point in my life, as I was led to reason that this seemed to be the truth, and but a little further thought convinced me that it was. With this came the realization that my physical and mental troubles had vanished to their native nothingness. Thus fled before the light of Truth what had been to my unenlightened mind the troubles of long and weary years.

Then I knew what our great Wayshower meant when he said, "The truth shall make you free." Then, too, I discovered that in the priceless text-book I had a "Key to the Scriptures" by which the floodgates of truth had been opened. Innumerable passages of the Bible which I had learned in my youth became clear to me; old things had passed away, and all things had become new. Now I know, at least in part, what the fatherhood of God and the brotherhood of man means; that all which reflects God is perfect and that what does not is but an illusion of so-called mortal mind, which is no thing.

When I realize that all these blessings have come to me through the study of the Bible as explained in our text-book, I cannot find words to express adequately my love and gratitude to God that I should have lived in the age of Christian Science. Truly divine Love has been leading me these many years, even when I knew it not. My daily prayer is that I may be enabled to follow the leading

Digitized by Google

of Truth as did that noble woman who has with so much labor and love blazed the way.

JOHN CARTER, New York, N. Y.

Through a dear friend I heard of Christian Science about fifteen years ago, but until three years ago I gave it no thought. My husband and I then became interested in it through a friend who brought us the *Sentinel* to read. We began this reading with rather desultory interest, this continuing for several months, when a very painful case of sciatica which had troubled me many weeks became more distressing each day, and forced me to seek help either in Christian Science or *materia medica*. I decided to turn to Christian Science, sought out a practitioner, and was healed instantaneously, as I was free from pain that night. For a few days there was a slight lameness in one of my ankles, but the disease was moving off, and at the end of the week it was gone and has never returned. That "Mind is the source of all movement and there is no inertia to retard or check its perpetual and harmonious action" (Science and Health, p. 283), had been clearly proven to me. The reading of "Science and Health with Key to the Scriptures" by our dear Leader brought a realization of the truth of her writings, and I was grateful for the Christ-cure which she has revived in this age.

At another time a distressing ailment was overcome, and about a year ago, since going through class, I was able to meet with the truth a sudden and severe attack of illness. The pain was very severe, and being alone when it manifested itself, my first thought was to telephone a practitioner for help, but I decided to trust Truth, and after dwelling upon the "scientific statement of being" and then Mrs. Eddy's interpretation of the last sentence of the Lord's Prayer (Science and Health, pp. 468, 17), I realized the power of God to overcome error, and in two hours I was free from pain. By morning there was no evidence of pain or weakness, and I resumed the ordinary home duties. Three times before coming into Christian Science I had suffered from this disease, each time needing a physician, and was ill a week, at the end of which time I had the appearance of one who had been through a serious illness. Many times Truth has freed me from some inharmonious condition, and it is with grateful recognition of this that I send my testimony, hoping it will bring to some one else the desire to know the truth. Aside from the healing of physical ills, there has come a spiritual uplifting whereby daily problems are met.

More and more I see that Christian Science is the Christianity we have thought unattainable on this plane; but the Christ-spirit is ours for today, and as we strive for that Mind "which was also in Christ Jesus," we shall overcome all that is unlike God. I am indeed grateful to God for leading dear Mrs. Eddy in her unselfish search for and her demonstration of this truth.

MINNA G. CARTER, New York, N. Y.

I feel that it is time I paid my tribute to Christian Science, and perhaps thus be the means of encouraging some one who is seeking help. Through my daughter's healing, I began to investigate its teachings, and found through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, a great spiritual blessing. This wonderful book unlocked to me the Bible, which before I had read many times, but had never obtained the spiritual meaning. Some time ago I fell, and to mortal sense severely injured my knee. Had I relied upon material means I would probably have been unable to use the knee for six weeks, as I had had a similar accident before; but through the aid of Christian Science I was enabled to walk in a week.

For this, and for many other blessings, I am indeed grateful, and my heart is filled with love for the noble Leader through whom this glorious truth has come to us. That God is an ever-present help in time of trouble has been made clear to me during the past two years, and I am very grateful for the truth which has done so much for me.—MRS. M. A. HOFFMAN, Norfolk, Va.

With a heart full of gratitude for many blessings received through Christian Science, I offer my testimony to the healing power of Truth. I have been lifted out of the valley of despair, and to some extent have found the ideal life for which I had longed from childhood, and thought has been uplifted to higher and holier aims. Some time ago I called a Christian Science practitioner over the telephone to treat me for toothache. There was evidence of a cavity in the tooth, but I said nothing about it, and in one absent treatment the tooth was restored whole again. This remarkable case of mental dentistry makes me know more of the allness of God as the only healer, and with thankfulness to God, and to Mrs. Eddy, who has so graciously pointed the way to humanity, I am earnestly striving for the truth.—EFFIE RUGG, Cheyenne, Wyo.

I became interested in Christian Science about six years ago after being healed of a severe case of stomach trouble. Since that time I have relied entirely on its teachings, and have found it an efficient help in all times of discord. The demonstration of healing that I wish to give here is that of my husband's mother, who came to spend a few weeks with us, and while here tripped and fell, injuring the ankle bone severely. Physicians were called, the bone set, and a prediction made that on account of her age (she was seventy-three at that time), she would not be able to be about for three months or more.

When my husband asked me what we had better do, I told him that if she were my mother I should certainly place her under Christian Science treatment, and this he was willing to do and did do immediately. A practitioner was notified and treatment begun, though mother was not told of it until the next morning, since she knew nothing of Christian Science; but she was pleased when she learned what was being done for her. She rested nicely the first night and day, with very little pain, and the second day she sat up, resting the foot and ankle on a chair. Each day she would sit up a little longer, until she sat up all of the afternoon without being in the least fatigued. At the end of three weeks, when I removed the bandages, the ankle and foot were still a little swollen, but she continued to improve each day until the healing was complete. After the third week she was going about without any help, and during the fifth week she went down the steps, walked out into the yard and back without any assistance whatever. In addition to the above healing, kidney and stomach trouble, also rheumatism of several years' standing, were overcome. Many times she would say, "How thankful I am to God, and to Mrs. Eddy, for this healing." At the end of seven weeks the work was complete. With the exception of a slight limp when walking, the foot and ankle were as perfect as before the accident.

Through this healing my husband became more interested in Christian Science, going over the Lesson-Sermon with me each day. A brother who came to take our mother home also became interested, and while here he had the privilege of attending a Christian Science lecture which very much impressed him. For all of these blessings, and for very many others, we are truly grateful to God, and also to dear Mrs. Eddy.—ALICE BOETTLER, Florence, Col.

The foregoing is a true and correct statement of the healing of my mother through Christian Science treatment.

GEORGE BOETTLER, Florence, Col.

[Translated from the German.]

I wish to express my gratitude for the great help which I have received through Christian Science. For five years I suffered with nervousness, great weakness, and constant uneasiness. I know now that the cause of my troubles was unbelief, or lack of faith in God, good. I could not reconcile the misery of this world and my own experiences with the idea of a loving God, and at that time was seeking after the truth, but as it seemed in vain. At the age of twenty-six I attended the normal school at Hannover, with a view of supporting myself as a teacher. Two years later my trouble grew so much worse that I had to interrupt my studies and lost all hope of ever attaining the goal I had set myself. I consulted several physicians, but they could not help me, and my condition became almost hopeless. Christian Science then came into my life, and it was like a beam of light coming into darkness. I had heard of this teaching through acquaintances, and while reading some of the literature, in my innermost thought a voice seemed to tell me that it was from the God whom I had so long been seeking—it was as if I felt the touch of infinite Love. I applied to a practitioner, and with her help the work was begun. It meant a hard struggle, and doubt seemed to drag me down over and over again. It is with a grateful heart that I think of how the dear practitioner would recognize my difficulties and always find the proper answer to meet the situation, thus gradually bringing freedom to my oppressed mind. I soon discovered—and I believe this is the experience of every one who turns to Christian Science—that the underlying thought or procuring cause of my trouble was fear.

In overcoming this sense of fear through trust in the omnipotence of God, I gradually acquired control over the inharmonious conditions. Treatment in Christian Science was begun at Easter, 1909, and by the following August I had sufficiently recovered to be able to take up my studies again at the normal school and work more steadily than before. In the beginning of February, 1911, I passed my examination, and in this instance also experienced the power of Christian Science. Whereas the least occurrence used to upset me, I experienced a wonderful peace of mind both before and during the examination. When fear seemed to assail me, I would cling to God all the more, and try to realize that I was His child and that He would not forsake me. I thus owe to Christian Science health, a profession, and what is more than all else, the certainty that God cares for His children, for He is infinite Love, and is willing to bestow all blessings, if we but understand how to receive. I wish with all my heart that many people would through Christian Science come to the recognition of this fact, and I herewith express my deepfelt gratitude to Mrs. Eddy, the one who was chosen by God to bring to the world this saving truth. Above all, I thank God, our Father.

MARGARETE LINDEMANN, Linden-Hannover, Germany.

[Translated from the German.]

I too feel greatly indebted to Christian Science, as through it I was healed of a very serious ailment caused by blood-poisoning. For nearly two years I suffered from a severe affection of the bone in the right upper arm and shoulder blade. The two operations to which I submitted brought only temporary relief, and the purulent matter kept accumulating, so that I became afraid lest I should lose the use of my arm altogether. This did not happen, fortunately, for help came through Christian Science, when it was most needed. Ten days after treatment was taken up by a practitioner, the diseased condition was completely overcome, and I can now use my arm as freely as before. For this wonderful instance of healing, as well as for all the good that I have received through Christian Science, I herewith express my deep gratitude.

G. SCHMID, Grüt b. Wetzikon, Ct. Zurich, Switzerland.

FROM OUR EXCHANGES.

[Rev. U. S. Milburn in *Universalist Leader.*]

Jesus is becoming more and more a real and vital fact in the affairs of the world. Not the Christ of dogma evolved by the church, but the lovable Jesus of history revealed in the gospels. The influence which he has exerted, the love which he has revealed, the precepts which he taught, the tenderness which he manifested, the justice which he unflinchingly administered, the hope which he reflected, the faith divine which he instilled, are greater forces in the world at this moment than at any time in the remote or immediate past.

He who is abreast with the times, who keeps pace with unfolding truth, who adjusts himself to the new thought-center, hears and can interpret the language of the day, has no difficulty as to his faith in religion. He lets go of the good past with joy, to grasp the better present. Questions of the past are nothing to him; he identifies himself with the new issues, problems, work. He has not only a new speech, but a new religion—forever old, but reborn with each generation of men, a divine reincarnation, each stage more beautiful and useful. He has cause for rejoicing, rather than occasion for complaint. He sees that "new occasions teach new duties;" his religion expands; his vision is clarified; his horizon is enlarged and rimmed with a rosy light of hope sublime.

[Rev. Charles G. Ames, D.D., in *Christian Register.*]

Our fears, as well as our hopes, have inward causes. It is fortunate for us that we can only keep faith alive by faithfulness. No man ever felt full confidence in God while wilfully breaking His laws. All badness in us makes us blind to His goodness, and makes us afraid that He will let things go to the bad. The perfect love that casts out fear is the love that clasps both divinity and humanity. No man feels forgiven till he forgives, nor takes hold of divine help till he tries to help himself. To rest and rejoice in that good purpose of God which is within and behind our life, we must make that purpose ours; we must choose for ourselves that life of filial and fraternal rectitude which He chooses for us. How can we feel that all things work for good, unless we are working for good? If one finds his life unfolding into conscious spirituality, into wisdom and love as vital and guiding principles, into trustful, happy sonship, it will slowly dawn upon him that this is a sharing of the infinite and universal life; that he and the Father are one.

[*New York Observer.*]

This age is characteristically sense-ridden and appetite-indulging—not always indeed in gross, repellant forms, but in stylish, conventional ways of selfish, Sadducean indulgence. Its temper is not so much speculatively skeptical as it is languidly sensuous and stupidly earthly. Men seek the things that seem rather than the things that are; the things that do appear in place of the realities that are forever fundamental and intrinsically valuable—the substratum of all true thought and pure life. The greatest need of the hour then is not more gold, but more God—more prayer and more vision. We must learn to see, and to see what we ought to see we must look in the right place; that is, above. We must gaze as Paul did straight into the heavens, that there in the breaking clouds we may catch a glimpse of the radiant, reigning Christ.

[*Congregationalist and Christian World.*]

The secret of escape from the pressure of the old is to read into it new meanings and address it with new power. This is always blessedly possible. The change we seek must come not from the outside in, but from the inside out. We

Digitized by Google

do not need the renewal of our tasks, the reconstruction of our relationships, we need the renewal of our spirits. This is the prayer that lies at the heart of the psalm which voices humanity's sense of strained inadequacy in the face of life's flaming imperatives: "Renew a steadfast spirit within me." A new spirit makes a new world. It transcends all tragedy of fault, builds stairs of light out of the very abysses of failure, and drives the fret born of routine like chaff before it; but only as it is steadfast, winning new triumphs upon dear and familiar fields.

[*Christian Commonwealth.*]

Jesus said: "Be ye therefore perfect, even as your Father which is in heaven is perfect." He knew that was possible and impossible; impossible today or tomorrow, yet possible by slow growth; impossible, perhaps ever, as a goal, but possible from that moment as a direction. Jesus was therefore very sympathetic with sinners, and very appreciative of small efforts in the right direction; he was ready to value the cup of cold water. We must preach the ideal, but we must remember that the function of the ideal is to act as a draw in its own direction; it is not so much an end as a means. If it is rightly presented by a man who has knowledge of and sympathy with the practical difficulties of life, the preaching of the ideal will be effective for good.

[*Outlook.*]

The religion which Jesus Christ brought into the world was a sublime audacity; to one who knew Europe and the East at the moment when he appeared, it must have seemed devised for the express purpose of inviting defeat. And such an observer would have been justified by the event; it was defeated, its leader was killed, its disciples scattered. But its defeat was victory; the execution of its leader was the consummation of his sacrifice and the darkness out of which came the glory of the resurrection; and the scattering of the disciples was the sowing of the seed broadcast over the world.

[*British Congregationalist.*]

The friends of a great man always tell us that the man was so much more than his words or his deeds; what he was meant far more than all he was able to do. He never had an opportunity to express all that was in him. At the last this is true of every Christian heart. It cannot take joy in things done, because there is something greater; there are possibilities as yet unrealized; there is a life hidden with Christ in God; there is a name written in heaven.

[*Zion's Herald.*]

The people of our churches do not see in their ministers the irresistible love-passion that always fills churches and throngs altars. There is no use in longer disguising the facts. We have become a professional ministry rather than a passionful ministry, and we are reaping the natural and blighting results. At the same time the people are hungering, as we have never seen them, for the preaching of the clear and fundamental truths of the New Testament.

[*Living Church.*]

Clearly, if it was legitimate of Almighty God to raise up men in the sixteenth century to correct the mistakes of the thirteenth, it must also be legitimate for Him in the twentieth century to raise up those who may correct the mistakes of the sixteenth.

[*Churchman.*]

The glory of our age is that men are growing impatient of the mere human point of view and are lifting their eyes upward to him who is "the way, the truth, and the life."

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herald*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Flumo, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan*, and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine*. These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $3.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 29 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

ITEMS OF INTEREST.

National.

Judge Killits of the United States district court has rendered a decree in favor of the government in the case brought by the United States attorney-general in Cleveland against the General Electric Company and about forty subsidiary companies controlled by the General Electric Company. The decree, in effect, orders the General Electric Company to conduct all its business under its own name, and the dissolution of the National Electric Lamp Company and about thirty-five subsidiary corporations.

In a "consent decree" handed down by the circuit court for the northern district of Alabama the Southern Wholesale Grocers Association, prosecuted under the Sherman law, is forbidden from coercing manufacturers to sell only to association members or those whom it recognizes as wholesalers, and is proscribed against conspiracy to maintain or to coerce manufacturers to fix limited selling prices.

In the United States circuit court at Baltimore, Md., Judge John C. Rose rendered a decision in favor of the government in its dissolution suit against the Standard Sanitary Manufacturing Company and others, the so-called bathtub trust. The action was brought under the Sherman antitrust law. While this decision is in a separate case from the criminal action against the alleged trust at Detroit, the proceedings concern the same subject-matter and are against the same defendants. The criminal cases, which concern more than a score of firms and individuals alleged to be in the bathtub trust, probably will come up at the November term of the federal court at Detroit. All the defendants have pleaded not guilty.

Dismissing four suits brought by the Krupp Company of Germany against the Midvale Steel Company of Philadelphia to restrain the Pennsylvania corporation from infringing the patents for a process of manufacturing armor plate, the United States court of appeals in a decision by Judge Buffington sustains the opinion of the circuit court, which decreed that the evidence produced before the lower court was "not sufficiently satisfactory either in quality or amount" to establish infringement. The appellate court further declares that two certain claims in two of the Krupp patents are invalid, and that, therefore, there could not be an infringement.

More than ten thousand delegates, representing every state in the Mississippi valley and most of the middle western states, were expected to attend the Lakes to the Gulf deep waterway convention which opened in Chicago last week at the Auditorium. The slogan of the association is: "Fourteen feet through the valley." A minimum initial depth of fourteen feet is advocated for the Mississippi river and its tributaries, with the indorsed desire for a final depth of twenty-four feet. It is the object of the association to give the central states a waterway which will float the largest freight and passenger vessels.

The discrepancy of three million dollars shown by the books of the Washington navy yard between the material on hand and the amount called for by the accounts, has been reduced to nine hundred and twenty-five thousand dollars, according to a statement issued at the navy department. As at first reported, bad bookkeeping methods were responsible for the shortage shown. Neglect to strike from the books the value of the batteries aboard the Florida and Utah, a sum of one million eight hundred thousand dollars, was one error found by the accountants. The department expects there will be a further reduction.

Gov.-Gen. W. Cameron Forbes has blocked a combine of rice traders to raise the price in the Philippines. Suspecting the combine and acting on the insular bureau's authority, Mr. Forbes arranged for an adequate supply of American corn to replace the rice and for purchase of cargoes of rice in bulk in Indo-China and for its sale at cost to the natives. As soon as the rice traders found that the Philippine government was entering into a competition with them, they began to reduce prices and Governor Forbes cables that the figures will soon be at a normal point.

No valid action was taken by the last New Hampshire Legislature in the passage of the act authorizing the purchase of Crawford Notch by the state, according to an opinion of the supreme court. On the second reading of the bill in the House it was amended by striking out the specific appropriation of one hundred thousand dollars and leaving the amount to be expended by the state at the discretion of the Governor. The clerk of the House entered the amendment on the jacket of the bill, but failed to incorporate it in the measure.

The Massachusetts Institute of Technology has chosen for its new location a tract of about fifty acres in Cambridge bordering the Charles river basin, directly across the river from Boston and near the Harvard bridge. The assessed valuation of the property is about three quarters of a million dollars. This gives the institute a splendid location and insures a harmonious and artistic development of a piece of property having a long frontage on the river basin, that might otherwise be covered with a motley group of structures.

After several years of effort the women teachers in the public schools of New York city have succeeded in being put on the same salary basis with men. In signing a bill to this effect, recently passed by the Legislature, Mayor Gaynor says that instead of lessening the number of men teachers the law would cause an increase, because it would remove the economic reason of appointing women teachers because they were paid less. The change will increase the city's annual expense budget three million five hundred thousand dollars.

Jersey City is now owner of the water works built for it at Boonton, N. J. Checks for $7,092,000 have been given the Jersey City Water Supply Company, which built the water works, and has been selling water to Jersey City at the rate of five hundred and thirty thousand dollars a year. The city will pay four hundred and twenty thousand dollars a year on its water debt and for maintenance.

The state of California at its recent election voted in favor of woman suffrage by a small majority.

International.

The foreign consuls at a conference at Hankow, China, decided not to comply with the Chinese request that they employ foreign gunboats to prevent the revolutionaries from crossing the river to Hankow. The revolutionaries sent a circular note to the consuls, asking that foreigners remain neutral and assuring them that they would not be harmed. The revolutionaries won a notable victory, gaining possession of the city of Wu-Chang. The revolutionary committee issued a proclamation exhorting its followers not to harm the citizens of other countries, and the wishes of the committee have thus far been respected.

The department of agriculture of Ireland proposes holding at Ballsbridge a conference of fruit growers and others interested in horticulture. The object of the proposed conference is to inquire into the present position of fruit growing in Ireland, and to obtain the opinion of those qualified to speak on the subject as to the best methods that can be adopted for the encouragement of the industry. Special attention is to be paid to the question of the adoption of standard packages for fruit and to marketing requirements generally.

The international sugar conference has been summoned to meet at Brussels to consider a request made by Russia that she be permitted to denounce the agreement of 1907 whereby her sugar exports were limited until 1913. Russia's reason for this request is the exceptional crop. Her stocks are overwhelming, and she wishes to increase her exports. If the request is granted the price of sugar will fall in all European markets.

The gradual elimination of the second class on English railways has begun, and now the London & Northwestern has decided to abolish its second class accommodation at the beginning of the new year. A start is to be made on certain sections of the line in the north of October, and the second class carriages will be converted into thirds.

For the purpose of settling industrial disputes the English government has established an industrial council, consisting of the leading representatives of the employers and the working men, under the chairmanship of Sir George Ranken Askwith, controller general of the commercial, labor, and statistical departments of the board of trade.

Two hundred manual laborers of Oxford are meeting daily at Balliol College for the study of social and economic problems, and are attending the lectures given by the college professors, while the college authorities are permitting forty of the poorest to live at the college during the period of their studies.

The campaign has begun anew in Berlin against the wearing of birds' plumage in women's hats. An eminent professor points out in one of the most widely read Berlin papers that if the wearing of birds of paradise does not cease the beautiful little creatures will soon be exterminated.

Industrial and Commercial.

Close on one million bales of excellent cotton were grown last year in Russian Turkestan. It is said that the land suitable for cotton growing in Turkestan is ten times the area of that on which cotton is at present grown. What appears to have prevented the extension of cotton cultivation in this district, however, is the lack of railway communication. This is likely to be remedied by the forthcoming construction of the Semirechinsk railway, which will link up Turkestan with the Siberian line.

The newest line of the Hill system of railroads has just been opened to traffic and runs south from the Columbia river to Bend, in central Oregon, a distance of one hundred and sixty miles. It is known as the Oregon Trunk railway and was built jointly by the Great Northern and the Northern Pacific at a cost of about eleven million dollars. It will be built farther south, probably to the California line, as settlement of the country warrants. Another line is expected to be built at right angles to it, crossing the state from east to west.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

UTTERING TRUTH.

BLANCHE HERSEY HOGUE.

THE Holy Scriptures, interpreted in the light of Christian Science, set before the world the whole truth of being. "Truth is revealed. It needs only to be practised," as Mrs. Eddy writes on page 174 of the Christian Science text-book, "Science and Health with Key to the Scriptures." To practise the truth means to understand, think, speak, act, and in all ways obey the truth; to reflect in our thinking God's spiritually true thoughts, and to let the vitality of this right idea actuate us in all things. Talking about the truth is not practising it. Living the truth in an increasingly corrected life is the only utterance of it that is availing.

The understanding of spiritual truth does not come to make us easier in the flesh, but that through quickened spirituality we may rise out of the flesh. Holier thinking means holier living here and now. We are, therefore, reflectors of God's presence and power through spiritual understanding and doing, for one purpose: namely, that divine Mind may repeat its thinking in us and through us, and so benefit the world; not primarily that we may have the joy of reflecting, not that we may receive and keep to ourselves even spiritual things; but that in receiving we may give again to all mankind. That which absorbs light and does not send it abroad is no reflector. That which reflects gives instantly as it receives. Drawing nothing from within itself, keeping nothing for itself, but lending its whole being to receive that it may shed light around it, the reflector serves the light and the whole world that would be lighted, losing sight of itself in the process. Clean and rightly adjusted to the light the reflector must be: careful to be placed for the receiving, but always giving, giving all that is given to it radiantly and without partiality.

The true Christian is a reflector of divine Mind in just this way, as Christian Science tells us, when he thinks and utters and lives the truth. Primarily the work of reflecting is mental. Individual thought must ever hark back to God, must turn constantly to His word, His law, His activity. Thus receiving, it brings God as a living presence among men. Thus receiving, it can give and give again. "Truth talked and not lived," Mrs. Eddy writes, "rolls on the human heart a stone" (Miscellaneous Writings, p. 293). Truth received into a clearing understanding, however, and cherished in a chastened heart, is lived, and will utter itself according to its own laws in every life it animates. The truth, as mortals have for ages searched for it, may seem to many something unknowable; but it is simply whatever is right and real and true about God and man and the universe, and it is not strange that a truly Christian Science comes now into the world to reveal what is true and to bring it into demonstrable relation to the affairs of men.

The truth about God and man, as it is set forth in the Scriptures and interpreted by Christian Science, does not belong to one person more than to another; does no more for one than for another; is no more true when uttered in one age than when spoken in another. As the truth is just what is true about the law, action, power, and presence of God, and its effect upon the happiness and health of men, correct Christian teaching concerning the truth opens to all a usable knowledge of the facts of existence; and this utilization of the truth does away with the ignorance, superstitions, and myths which have formerly ruled us. Thus the truth must be actually lived, consistently uttered, in cleansed lives, if our thoughts are to be reflectors for God. Thus received and sent abroad, truth is rightly uttered, and so in its appearing sets right everything that concerns mankind. Concerning the vitality of all that is true, James Russell Lowell has written:—

> Get but the truth once uttered and 'tis like
> A star new-born that drops into its place
> And which, once circling in its placid round,
> Not all the tumult of the earth can shake.

The Scriptures, the Christian and ethical teaching in all ages, and now the spiritual instruction afforded in our own time by Christian Science, have surely uttered the truth, and it becomes the task of the student of spiritual things to continue that utterance in his own thought by thinking the truth and by refusing to think error. There is a difference between thinking truth and thinking about truth. The one is reflection, the actual existence of spiritual and true thoughts, divine Mind animating us with right ideas; and it may be noted in passing that this is true Christian Science treatment. The other is a mental attitude which looks on at the activity of Truth, wishes for it perhaps, and has many opinions concerning it; but this is not reflection, nor even the utterance of truth.

Simple childlike surrender to divine Mind, the vigilant effort to let divine thoughts fill us, means the putting away of all evil thinking, all gossip, criticism, unkindness; means the making of no evil real at any moment; means the uprooting of our own sense of sin, while laying down our own wills and turning from our own policies and plans to find God's plan for all. We must, in short, stop thinking matter, sin, disease, death, and let the activities of Spirit, Life, Love, Truth, possess our thoughts. Hour by hour we must see as God sees, think as God would have us think. So doing, we can never suggest evil, never pass on a fear, a discouragement, a temptation. Under this heavenly discipline we will always be uttering the beauty of holiness; always making true statements and letting them work out their blessing—this, even when perhaps we cannot talk about Christian Science; for we can always in all our conversations emphasize the power of good. And the reward? Just the sure confidence that good will always prevail; that happiness is always here; and with this, proof upon proof that healing from all sin and pain and trouble attends surely upon the unselfed effort to be a right thinker.

Truth unuttered does not enter consciously and actively the field of our human experiences. Truth exists, eternally to be discovered and practised; but it must be found and our thoughts must be open wide to it—it must be uttered to us and in us—if the motion of its heavenly activities is to deliver us from untruth. Truth in action, Truth govern-

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

ing, Truth flooding all human thinking, means Truth saving us; and this is right prayer, right Christian Science treatment. "Get but the truth once uttered," as Lowell has so magnificently said—and then trust it! Surely no assault can disturb its "placid round," for the movements of Truth are infinite, its power unending. Of Christ Jesus and his dependence upon the truth which he said we should know and which he promised should make us free, Mrs. Eddy writes: "His words were articulated in the language of a declining race, and committed to the providence of God. In no one thing seemed he less human and more divine than in his unfaltering faith in the immortality of Truth. Referring to this, he said, 'Heaven and earth shall pass away, but my words shall not pass away!' and they have not: they still live; and are the basis of divine liberty, the medium of Mind, the hope of the race" (Miscellaneous Writings, p. 163).

Had Jesus not uttered God's word, had prophet and disciple and Christian martyr not repeated it, had Mrs. Eddy not reiterated it for our saving apprehension today, when could God's kingdom have come on earth? And when we, as the professed followers of Christ Jesus, throw out into consciousness the reflection of Truth as known by us,—true thoughts, true statements, and true deeds,—then surely we are helping on the coming of that kingdom.

UNITY.

A. B. FICHTER.

In all ages the great value of unity has been recognized by men of loftiest vision, and the illustration of the bundle of sticks, exemplifying the strength which unity confers, may have come to more than one nation along its course of development. Heroic sacrifices have been made in republics for the maintenance of unity in several historic instances, the most notable of these probably being the valiant struggle of the United States of America in their determination to preserve the Union. There is, nevertheless, much to be learned, and mankind is only beginning to recognize what it is losing in daily experience of good by the absence of a more decided realization of unity, concerning which the psalmist sang: "Behold, how good and how pleasant it is for brethren to dwell together in unity." He also likened it to the precious ointment which was used in the consecration of Aaron, the first high priest, of whom it is said that he was "to make an atonement" for the purpose of cleansing the Levites; and also "that there be no plague among the children of Israel," all of which seems to point to a healing office of the priest who was thus anointed.

The oil which symbolized to the ancient Hebrews consecration, or setting apart for the service of God, was used on many occasions, notably by Samuel when he anointed David, after careful scrutiny and under divine guidance, to become the future king of Israel. In this manner David became "the Lord's anointed," foreshadowing the more excellent hope of the Messiah, of whom the psalmist prophetically sang, "God, thy God, hath anointed thee with the oil of gladness above thy fellows." The word Christ, a modification of the Greek synonym for "The Anointed," lifts thought to the understanding of our Master's work for humanity, the atonement, resulting in the healing of every "plague among the children of Israel."

The early church adhered to the use of the oil of consecration; also for the purpose of healing as indicated in James' epistle. To this healing oil the psalmist likens the achievement of unity among brethren, by saying of the oil that it "went down to the skirts of his garments." Here he seems to imply that the healing influence of unity, the honest consecrated striving for the good of all, will permeate and reach into every internal and external mode of thought, expression, and action. In another Messianic psalm this gracious effect of the healing influence finds expression in the words, "Thy garments smell of myrrh, and aloes, and cassia," which passage might be transcribed in Mrs. Eddy's cherished words (Poems, p. 12),—

> thoughts, illumed
> By faith, and breathed in raptured song,
> With love perfumed.

To dwell in unity is accomplished by the desire to further peace and good will among men, to consecrate oneself to the service of good for all, thereby to minimize friction and discord; in other words, to bring out the real purpose of man,—the reflection of Love and the glorification of God, good. This undoubtedly is to heal not only dissension, misunderstanding, ill will, resentment, and anger, but also their accompanying physical symptoms, and so bring harmony even to the skirts of the garment, the outward external physical manifestation; and, as if the first verse of the psalm were not sufficiently plain in its inference that healing is a resultant of unity, the psalmist continues: "As the dew of Hermon, and as the dew that descended upon the mountains of Zion: for there the Lord commanded the blessing, even life for evermore." The material symbol, however, the precious ointment, is not the healing agent; this power inheres in spiritual desire, and the sincere effort to dwell in unity.

The loss of the healing power in the primitive Christian church seems to coincide, some think, with the imperial and consequently universal recognition of Christianity as the state religion, and the subsequent development of worldly ambition for wealth and power. This may be so, but it is certain that it does coincide with the first great dissension and resultant disputations and divisions inside of the church, which have not yet been healed, but have increased until today there are something like four hundred divisions and subdivisions in the Christian church. Is it any wonder, then, that the world is not experiencing the healing power of the One "altogether lovely,"—"the only begotten of the Father"? No wonder, either, that rigorous efforts are being made in all directions to begin the healing of some of the schisms and reconciling some of the minor divergences in order to make more real the laudable desire for brethren to dwell in unity.

It will be necessary, however, to make a more genuine and sincere advance than the one recently suggested by some prelate, who proved his readiness for unity by offering a hearty welcome to all who would be willing to accept his particular teaching and dogma. St. Paul's vision was of "one Lord, one faith, one baptism, one God and Father of all," and within the heart of every sincere thinking man there is doubtless growing the conviction that beneath all the difference of opinions, of hair-splitting dogma and wordy creed, there is the great spiritual fact of absolute Truth, on which all can and ultimately will unite, if they will but lift thought high enough, beyond historical barriers, beyond bigoted fear-bound superstitions, man-made self-opinionated traditions, and will fearlessly accept the liberty of the sons of God.

Science and Health points the way to the realization of unity, made possible by the acceptance of its teachings of the one Father—the one Mind. On pages 340 and 469 we read: "One infinite God, good, unifies men and nations: constitutes the brotherhood of man: ends wars; fulfils the Scripture, 'Love thy neighbor as thyself.'" "With one Father, even God, the whole family of man would be brethren; and with one Mind and that God, or good, the brotherhood of man would consist of Love and Truth, and have unity of Principle and spiritual power which constitute divine Science." The teaching of Christian Science and its glorious apprehension of the true unity found in the one Mind "which was also in Christ Jesus," is proved daily by the healing it brings into the lives of thousands who turn to it, for this truth destroys what Jesus said he came to destroy, "the works of the devil," the one evil.

Digitized by Google

The church which is composed of those who are seeking to demonstrate the rule of the one Mind must of necessity be a church in which absolute unity is expressed. It therefore becomes the duty of every member of this church to bring out in daily prayer, in every thought, in unceasing endeavor, and in constant purpose such a desire for unity as will silence everything that makes for friction and disharmony. If one should be tempted to feel that fairness and justice are not expressed toward him or toward some dear friend, he has surely learned in Christian Science how to overcome self-will, self-assertion, and self-pity in himself, and need not be in bondage to evil suggestion. Any who are seeking to become more prominent in church activity than their fellow workers seem to favor, can easily know that every one is in his place and order where he is serving Truth, if willing and obedient, and that all honest service must bring the commendation for faithfulness over a few things; namely, "I will make thee ruler over many things."

Christian Scientists well know that to keep their gaze fixed on Principle and away from personality is the only way to overcome the temptation to allow self-will, resentment, or any other wrong thoughts to assert themselves. The more they realize the meaning of the eternal "I AM," and man as His reflection, the stronger will they be in rejecting the errors of dissension, strife, and variance which sometimes seem to be potent in their negation of the fact of unity. But unity as Christian Science demonstrates it is too precious a gift to be thus hidden, for it is essential to the healing of the world of its sickness, sorrow, want, woe, sin, and death, and therefore every other consideration should and will be turned aside by the true Christian Scientist. A personal sense of seeming injustice,—our good evil spoken of,—or lack of recognition for faithful service, all these should fall before the demand for unity.

Jesus prayed "that they may be one, even as we are one." Can this ever be, if we are not willing to "lay aside every weight, and the sin which doth so easily beset us," and give up all for Christ the Anointed—not necessarily houses and friends and family ties, honest possessions or laudable aims, but surely all of self, every claim of spiritual superiority, every expectancy of personal reward, every desire for personal recognition or prominence. Honestly working in this way, we shall be able to do our share toward the realization of unity with the brethren: we shall be impelled to gain more of that spiritual elevation symbolized by Mount Zion, where God has promised the blessing, even life for evermore, the healing not only in individual experience, but of the whole world,—even "the healing of the nations."

"PATIENCE."

ERNESTINE HADKINSON.

THERE are moments when we are more than ever impressed with the wonderfulness of the teachings of Christian Science. They include vastly more than mankind has ever dreamed of. Words which we have thoughtlessly spoken take on a higher sense when analyzed in the light of Truth, and lessons are learned for which we cannot be too grateful. Not long ago the question was asked: "What is the meaning of the word 'patience'?" In the old way of thinking the word implied waiting for something. The dictionary defines it as "the power of suffering with fortitude; perseverance; enduring without murmuring, etc." In the Scriptures we read, "Let patience have her perfect work." Here the word means perseverance, although it could not be perseverance in suffering, but rather perseverance in knowing the truth, which Jesus declared would free mankind from suffering. In "Science and Health with Key to the Scriptures" (p. 242) we read of "patient obedience to a patient God;" and this brings up the question, Is God patient? and if so, can He be waiting? He who "spake and it was done" could not be waiting in the old sense. The word here necessarily takes on a higher meaning and stands for knowledge. God is Mind,—"the great I AM; the all-knowing, all-seeing, all-acting, all-wise, all-loving, and eternal; Principle" (Science and Health, p. 587), knowing nothing but good.

To be patient in this higher sense must therefore mean to know what God knows, namely, good only! This knowing would blot out belief in evil and obliterate the fear of failure to demonstrate absolute good. It would also do away with the fear which would make us believe that it sometimes takes a long time to bring out a demonstration, a proof of the allness of good, and would turn away thought entirely from any form of sense testimony and keep it fixed in and on the knowledge of God and His infinite manifestation. We would then never say that a case took long to heal, well knowing that with thought steadfastly fixed on knowing only what God knows, on the life "hid with Christ in God," upon the truth of the real man's being, consciousness could not take in a belief of error of any sort, and so would naturally reject any mistake about God's creation.

Patience would mean standing fast "in the liberty wherewith Christ hath made us free," and not be any more entangled in "the yoke of bondage." It would mean reflecting that one Mind, that perfect understanding which is the "I AM," and cognizant of nothing outside of its own perfection. Patience, then, might be defined as steady control of thought: the mental poise which cannot be disturbed or shaken, or thwarted out of its right path ("the narrow way"); and so, in letting the human yield to the divine in "patient obedience to a patient God," we shall prove that purity of thought which will fulfil in us the promise, spoken of old: "Blessed are the pure in heart: for they shall see God."

THE IMPRINT OF THE PRESENT.

J. PARKER NAUGLE.

THE present is undoubtedly a period of strong, persistent, and enlightened effort for the social and moral elevation and material welfare of mankind. We point with honest pride to modern mechanical inventions and achievements, and the mighty constructive energy evidenced in the conquest over earth, air, and sea, as a stamp which this epoch has imposed upon the ages. These grand achievements are but the waymarks of man's material progress, yet they point the finger, and declare with the voice of clear-sighted prophecy and reasoning, for higher, grander, and more enduring achievements, even man's grasp of the great imperishable truth that "all is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). Up to the understanding of this statement in its fuller delineation by our Leader, all the great centers of civilization are being directed. To every country and in every clime the glorious message of freedom has come, and the means of deliverance from sin, disease, and death is being placed within the reach of all.

"Science and Health with Key to the Scriptures," with its living, pulsating truths, is opening up and unfolding anew the Bible, disclosing a mine of precious jewels. It is arresting the attention and attracting the study of men as never before, and the deeper they delve the more gems they find, gems of precious thought, "of purest ray serene," that have been hidden away for centuries, but are now found, through the revelation of Christian Science, to be the living attributes of Love, "who healeth all thy diseases," and that are applicable to our every need, even as Mrs. Eddy sets forth in her inspired and inspiring words, "Divine Love always has met and always will meet every human need" (Science and Health, p. 494).

Again has dawned the light in human understanding, and again mankind is called upon to retrace the way, to come

Digitized by Google

out of its wanderings through the maze of mortal mind theories, deductions, and dogmas, and enter the domain of science, relinquishing all doubt and mere belief for the possession of certainty. In the accomplishment of this task our Leader, through her teaching and her published works, has brought us back to primitive Christianity, even to the manger where lay the infant idea of Truth. And here we may pause, lay aside every earthly care, and rejoice, express our gratitude and give our treasures of love to her who has led us forth to the demonstrable knowledge that God is "a very present help," as the psalmist declares Him to be: that the same peace, the same presence and power that brooded over the manger, protects today as of yore every aspiring heart.

Now indeed may the world rejoice in the knowledge of the same presence and power that was with the Master in the desert place, multiplying the loaves and fishes, and that its living Principle is again being demonstrated; that the same directing wisdom which counseled the fishermen who had toiled unavailingly through the night, that they cast their nets on the right side, is available today to direct our every movement, until we may hear the command to "draw forth," at the dawn of a higher spiritual realization. Surely at such an hour we may exclaim, in the words of Peter, "Master, it is good for us to be here." Let us therefore resolve in this moment to demonstrate this divine message heard and expressed through the great revelator: "Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God."

"BE STILL, AND KNOW."

FLORENCE STRATTON WEAVER.

If one were called on to face the whole world and explain in one sentence Christian Science, it would seem as if no better statement of its requirements could be found than the simple words of the forty-sixth Psalm: "Be still, and know that I am God."

In looking back into the old thought we can see perhaps that in us there was no lack of daily Bible study, no lack of daily prayer; but we can see that there was a great lack of both quiet and knowledge; and it was not until we began to study Christian Science that we could realize why it was that we could not be still. It was as though a mother were taking her child through a long dark passage, and should say: "We are going to pass a great live monster, but if you will keep very close to me and hold tight to my hand, I will not let him hurt you." We can see that, although the child might keep ever so close and hold ever so tight, his consciousness would in all probability be filled with fear of the monster rather than with trust in the mother, however great at ordinary times his love for his mother and his faith in her.

But consider another situation and hear the mother exclaim: "We are going to pass a fearful looking monster in our walk through the dark, but he is not alive, he is not real; he is only a dressed-up image and cannot frighten you, because, as I have told you, he is only a make-believe." We can be sure that in this latter case there would be no alarm. So, in the old thought, although we loved St. Paul's words when he assured us that he was "persuaded that neither death, nor life, nor angels, nor principalities, nor powers"—nothing whatever—could "be able to separate us from the love of God," still we were not healed of our sickness, we were not delivered from the knife; we could not get rid of "the sin which doth so easily beset us," and this for the reason that, precious as these words seemed, they were thought to refer to some far-off time in some far-off place, when after the battle of life was over and we ourselves were "saved; yet so as by fire," we would be able to look back and acknowledge that somehow all things had worked together for our good.

This was an inadequate comfort for our present-day sorrow and suffering, but when Science and Health was placed in our hands, and we read the author's immortal explanation that "evil is a negation, because it is the absence of truth. It is nothing, because it is the absence of something. It is unreal, because it presupposes the absence of God, the omnipotent and omnipresent" (p. 186), then the scales began to fall from our eyes. How gladly we went back to St. Paul and his precious words, exclaiming with him "that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord;" for we saw that all these things are nothing, and can do nothing, and that the love of God, which is in Christ Jesus our Lord, was, is, and ever will be the only fact of existence.

As Christian Scientists we are learning "that we can become conscious, here and now, of a cessation of death, sorrow, and pain" (Science and Health, p. 573); that we can "be still, and know that I [divine Love] am God."

CHEMICALIZATION.

GEORGE H. KINTER.

Chemicalization is a term which was coined in the notable word-laboratory of our revered Leader, and it is well calculated to express an idea for which she found nothing serviceable in the lexicons. Rightly applied, it is a valued addition to one's vocabulary in Christian Science, though an incorrect use of it may do some harm, temporarily. It may be helpful, therefore, to point out a certain misuse of the word, by reason of which a slight misconception of Mrs. Eddy's teaching is to some extent, though by no means generally, prevalent among Christian Scientists.

Students have been known to fear "a chemicalization" and to speak of it somewhat lightly, describing undesired conditions as "a chemical." The exact language of our text-book on the subject under consideration is emphatic and explicit; there is no room for conjecture, for a but, if, or perhaps. The Discoverer of Christian Science, who has demonstrated its propositions, says that "mental chemicalization follows the explanation of Truth, and a higher basis is thus won" (Science and Health, p. 453). Then we should not shrink from, but welcome this mental disturbance, for it surely betokens good results in the near future. This is seen in another statement by Mrs. Eddy, to wit, "The effect of this Science is to stir the human mind to a change of base" (Science and Health, p. 162).

Let us, therefore, no longer, with apprehensive look and mien, attribute to chemicalization every trouble that arises, nor flippantly denominate as such each unpleasantness that may present itself, lest one of the most forceful of our newfound words be shorn of its power through a mistaken sense of its meaning on the part of the uninitiated.

Among the learned who study philosophy one meets some individuals who study it, not, as most of them do, merely professionally, but for the sake of their own souls. It is difficult for these learned men to free themselves from the scientific superstitions in which they have grown up and matured, and by the service of which conspicuous worldly success is so often obtained. But some of them, possessing live, sincere, and moral natures, unceasingly strive to liberate themselves. Realizing in their inner experience all the narrowness, or, to put it plainly, the stupidity, of the materialist view of life, which is incompatible with any moral teaching, they are inevitably drawn to the acknowledgment of a spiritual principle as the basis of everything and to the question of man's relation to that spiritual principle.—Count Leo Tolstoi.

SELECTED ARTICLES.

[Alfred Farlow in *Worcester* (Mass.) *Telegram.*]

In the introduction to his discussion of Christian Science, as reported, our clerical critic recommends the study of certain criticisms of Christian Science before the study of the Christian Science text-book. I wonder if he would recommend that those whom he would lead into an acceptance of God's Word should prepare themselves therefor by reading the books of skeptics and infidels, which are calculated to prejudice the mind of the student and prevent a correct understanding thereof? Why not place the Christian Science text-book in the hands of the student and let *him* decide for himself, without comment, as to its merits? If its teaching, as the gentleman declares, is indeed nonsensical, it would be unwise for the reverend gentleman to in any way mar or correct its nonsense by comments. On the other hand, as a Christian minister, one who is advocating the truth, he would not be interested in any unfair presentation of the book.

But there is another point which needs to be added here. In the Christian Science movement, one is not permitted to assume the role of teacher until he has demonstrated his certain and unmistakable understanding of Christian Science by at least three years' practice in healing the sick, for the same reason that a mere believer in mathematics is not considered competent to teach mathematics; he must have demonstrated its rules. One can no more skip the examples for practice in his Christian Science career than in his mathematical career. One cannot make sure, even to himself, that he understands the teaching of Christian Science, without testing his knowledge by healing the sick according to its rules, and we think we are justified in asking our clerical critic how many years he has practised Christian Science and how many persons he has healed through his understanding, as a means of demonstrating to himself as well as to others that he understands the subject well enough to enter into the more advanced task of teaching it.

There is nothing mystical in Christian Science, although it deals wholly with the unseen spiritual facts of being. It plants itself unreservedly upon the Scriptural declaration that God is Spirit, and thus far no critic has ever attempted to assume that any statement contained in the Christian Science text-book is not consistent with its premise. Surely, a Christian minister would not object to anything which appeals to the spiritual nature of the individual, and which teaches him to depend more upon Spirit and less upon matter.

Mrs. Eddy taught that the divine Mind is the only real cause, and healed the sick on that basis. The prayer which heals the sick in Christian Science is in exact accord with the teaching of the Bible. The practice of our Lord was based upon the same system of declaring the truth and rebuking sickness and error, as is employed in the practice of Christian Science. Far from having no knowledge whatever of the science of logic, Mrs. Eddy is entirely logical in her teaching. While she does not teach that God is person in a limited or anthropomorphic sense, she declares that God is person in an infinite sense. She does not teach that God is to be found in materiality, but she declares that He is the all-wise, all-loving heavenly Father, who is infinite Spirit, Mind, Truth, Love, good, as the Scriptures declare. She describes the universe as the manifestation or product of divine Mind—not the substance of divine Mind, but the manifestation of Spirit—and man, to use a Scriptural phrase, as the express image of His person, or His image and likeness.

Our clerical critic accuses Christian Science of being young. He forgets evidently that this young idea is the outcome of the research of ages, just as are all our modern improvements. It is because Christian Science gives something new to the world that it gives added peace, harmony, and health thereto. Our critic complains because Mrs. Eddy does not give place to the material in the world, because she plants herself uncompromisingly on the proposition that Mind is the only real substance. He might have brought the same charge against the Master of Christianity, for he declared: "It is the spirit that quickeneth; the flesh profiteth nothing," which means that Spirit alone gives life and existence, Spirit is the only cause, and therefore flesh is altogether unprofitable; that is, matter plays no part whatever in the divine economy, it profits nothing, amounts to nothing, is nothing, because Spirit is the only cause. Thus it may be noted that the Master was true to the scientific declaration that like begets like, and made the same sweeping declaration concerning the unprofitableness and the nothingness of matter which Mrs. Eddy makes.

However, it may be well to say here that the abstract declaration that matter is unreal does not give an adequate and satisfactory understanding of Christian Science. It needs the fuller explanation given in the Christian Science text-book. Science corrects one's understanding of creation by correcting one's understanding of cause, and reveals the fact that the universe is spiritual and not material; that the material is nothing more than a false belief about the spiritual, that it is a material concept of spiritual things. While Christian Science teaches that sin is no part of the very good things which God created and therefore has no deific standing, it insists that sin will not become unreal to the individual until he ceases to sin. Christian Science does not ignore sin or disease, but recognizes that it is a false concept and predisposition which must be grappled with and overcome intelligently.

Our critic declares that only functional difficulties can be cured by Christian Science. This, of course, is simply an assumption on his part, for, as we intimated at the outset, probably he never has practised Christian Science. The fact is that multitudes of organic troubles have been healed by Christian Science, and every Christian Science practitioner will testify that he has succeeded quite as well in the curing of such diseases as he has in the curing of functional disorders.

[Charles D. Reynolds in *Granite State News.*]

In a recent article entitled "Material Things: Are they Real or a Delusion?" the writer refers to Mrs. Eddy and her followers as harboring a delusion and as failing to establish the proof of the correctness of her interpretation of the Scriptural teaching concerning the unreality of matter, disease, and death. Careful thought ought to correct such a hasty conclusion.

To the personal senses Jesus passed through the experience called death. Did it prove that his teachings were untrue, and that all his disciples who have tried to follow him, including Mrs. Eddy, are mistakenly harboring a delusion and should renounce the doctrine? Mrs. Eddy never taught that mortals would not pass through the belief of death. Neither did the Founder of Christianity. He taught that materiality, sickness, and death will cease only as they are overcome. Mortality must be "swallowed up," or destroyed, according to the language of Paul. It is true, as the writer says, that popular theology does teach that God united the material and the spiritual in a mysterious inexplicable way, and that this cooperation is therefore divinely necessary and right.

In opposition to this theory, however, stands the inspired teaching of the Bible, as well as the teaching and example of Christ Jesus. This materialistic worldly theory, held by mortals, is everywhere denounced in Scripture as something which is contrary to Truth, and responsible for sin and suffering. To point out the evil of this human theory or belief, and lead men away from materiality to spirituality,

Digitized by Google

is the great theme which underlies the Ten Commandments, the sermon on the mount, the eighth chapter of Romans, and Revelation. The Scriptures everywhere represent that matter and Spirit are a divided kingdom. Materiality is not partly right and partly wrong. All materiality must be finally rooted out. In this way we shall serve but one master; the eye will not be double but single; and our treasures will be found to be in heaven and not on earth.

Paul clearly understood the teaching, and urged its better application by the followers of Christ Jesus when he wrote: "Walk in the Spirit, and ye shall not fulfil the lust of the flesh." "He that soweth to his flesh shall of the flesh reap corruption." He saw this teaching fully presented in the Old Testament. But as then he that was born after the flesh persecuted him that was born after the Spirit, even so it is now. Nevertheless, what saith the Scripture? "Cast out this bondwoman [materiality] and her son [evil fruits]." The command, "Set your affection on things above," clearly voices Scripture, and Christian Scientists prefer to hold to it.

[*Philadelphia* (Pa.) *Inquirer.*]

A good many people will have read the remarks lately made on the microbe question by Dr. Alvah H. Doty, health officer of the port of New York, with a sense of lively satisfaction and some feeling of relief. Their tenor was that the maleficent influence and activity of the omnipresent microbe as an agent for the destruction of health and life had been absurdly exaggerated, and that if people would think less and worry less upon this subject it would be a great deal better for them.

Dr. Doty expressed the opinion, and it is an opinion in which many will agree with him, that a large part of the agitation over microbes which has gone on within the past few years is to the last degree irrational and absurd. People have gone microbe crazy. They have read without clearly understanding the medical dissertations about the extent to which diseases of all kinds are occasioned by these microscopical organisms which get into our systems and become perniciously active there, and many of them live under a constant apprehension lest their own system be invaded by these invisible enemies at some time when they are momentarily off their guard.

The trouble is that it is so difficult, yes, virtually impossible, to maintain a sufficiently vigilant and effective outlook for these innumerable and omnipresent invaders of the human frame. Nothing that we touch, taste, or handle is immune from their presence, so we are told; and there is never any telling how soon or at what moment any one of us may fall a victim to their destructive operations. Such is the prevalent idea for which the little knowledge declared by Alexander Pope to be a dangerous thing must be held responsible, and it is the gratifying feature of Dr. Doty's deliverance that it tends to dissipate what has become a sort of national obsession. He says that there is a whole lot of humbug about this microbe business, and that the people who lie awake nights shivering lest a microbe should catch them are very foolish. How often have we been told that there was danger in handling a dirty banknote because so many billions of deleterious germs are likely to be distributed over its surface. Probably not many have been deterred by this warning from handling all the banknotes that came their way; and yet it is satisfactory to be assured that they may be handled, microbes and all, without the slightest risk.

It is the same with other things which have in a like manner been placed under the ban. The chances are that they are quite innocuous and that the danger which they are supposed to present is wholly imaginary, and it may be set down as a principle of universal application that to be so solicitous about keeping one's health, to be so anxiously apprehensive of the causes which threaten it, is a serious mistake. This is one of the respects in which Christian Science has been beneficial and one of the secrets of the amazing success which has attended its propaganda. Those who have accepted and are faithful to its doctrines are not constantly thinking about their bodily condition and fearing that they may fall sick. They have full faith that their good health will continue; and instead of worrying about eventualities entirely beyond their power to control, they take its continuance as a matter of course.

Our forefathers, knowing nothing about microbes, took no precautions against them, yet they enjoyed as good health as we do, and lived as long. Let us set aside hysteria and be guided by the promptings of plain, ordinary common sense.

[E. M. Ramsay in *Dundee* (Scot.) *Advertiser.*]

The students of Christian Science admit in all humility that they are taking only the first steps in this new-old path. They have no quarrel with those who are doing their best to help the world by other methods, nor do they try to induce those who are satisfied by these methods to resort to Christian Science. Cures have been effected in this present age which to those who have not studied this subject would appear miraculous, and we are convinced that the time will come when our Lord's prediction will be fulfilled: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

We are convinced that the miracles recorded in the gospels were not brought about by any special intervention of Providence—that is, through the breaking of law—but were performed through a clear perception of the fundamental governing law of the universe, the nature of God. This law is of course equally available today. God changes not; it is we who must put off our false beliefs in order to become conscious of His power and presence.

[Oscar E. Drummond in *Sind Gazette*, Karachi, India.]

The following is an extract, from an envelope forwarded to me by the Rev. ——, along with some literature on Christian Science, returned under the false impression that I had sent the same to him. On the envelope was written, "I Cor. xiii, last verse. Returned with thanks, unread. I am a firm believer in Christ and Christianity and the Holy Bible (Genesis to Revelation). 'Resist the devil, and he will flee from you.'"

I have only recently arrived from Glasgow, and while there I had the good fortune to be introduced to several Christian Scientists, and even attended their church, wherein, by the by, strangers are always welcome, the best seats being reserved for them. No private pews there. Thus, after a very long search for truth in orthodoxy, heterodoxy, and "isms," I found something sound, substantial, and sensible, that gave me food for thought, and that was Christian Science. Meanwhile, articles kept appearing against Christian Science, not only in Glasgow, but in several English papers all over the world. On inquiry and investigation, I discovered that these articles were invariably written by people who knew little or nothing about Christian Science teachings, or who but echoed what they heard through other channels. You will observe that the Rev. —— has been running on the same lines, and has gone off on a false siding of the question at issue. Please note also that he clearly states he returned the literature "with thanks, unread." In the same breath he remarks that he is a believer in everything called Christian, yet he requests me to resist the devil and he will flee from me.

How does this person know that Christian Science is of the devil, if he knows nothing of its teachings, and also refuses to read its literature? If he had done so, he would have found that Christian Science embraces the

Digitized by Google

Holy Bible and everything Christian. I leave this question open for the reverend gentleman to answer, as I fear further comment on the subject would fall on deaf ears. In conclusion I say, "By their fruits ye shall know them."

[*Oregonian*, Portland, Ore.]

That the church of today lacks power to heal disease because it does not pray enough, was the statement made by Dr. W. B. Riley, pastor of the First Baptist church of Minneapolis, in his sermon at the White Temple. Dr. Riley took as his texts yesterday the accounts of Christ's healing of a man having the dropsy, of Peter's healing of the lame man at the temple, and of the apostle Paul's call to Macedonia.

"In one respect, at least, the Pharisee of old was in perfect line with the modern skeptic," said Dr. Riley. "He doubted the reality of the supernatural and proposed to subject the proposed miracle to the scientific test of observation and experiment. The Christ who failed not in the Pharisee's house will not fail before the assaults of twentieth-century skepticism. The miraculous power of Jesus is as definitely established from an historical standpoint as is his name and character.

"That Christ expected the exercise by his followers of healing power, is clearly proved in the reproach he administered to his disciples on one occasion of its failure. After all our wriggling endeavors to escape the Bible doctrine of divine healing, the fact remains, and the church is becoming increasingly conscious of it, that our powerless spirit is our prayerless spirit, for 'the prayer of faith shall save the sick, and the Lord shall raise him up.' It is time we began to confess our 'faults one to another, and pray one for another, that ye may be healed.' Every invalid member of this church is a challenge to prayer and a call to the exercise of faith in the importunate pleading of the promises of God. Great as is the need of prevailing prayer to bring again the gift of healing to the church of God, it is not greater than, perhaps not so great as, the need of a reviving of Scriptural instruction."

[George Shaw Cook in *Elgin* (Ill.) *Courier*.]

A late issue quotes three reasons given by the Rev. A. F. Purkiss for the success of Christian Science, the last being "absolute trust in God" and "the supremacy of the spiritual over the material." History warrants the belief that twenty or more years ago a minister of the denomination to which the reverend gentleman belongs would not have found even three points in favor of Christian Science. Is it not fair to assume that a little more knowledge of what Christian Science is accomplishing for the good of mankind, and a little more familiarity with its fundamental teachings, will remove all objections to it in the thought of those who are seeking the betterment of humanity?

The teaching of Christian Science regarding the nature of matter seems to be a stumbling-block to many, in common with our present critic, but this is often due in part to previous education along different lines, which tends to prejudice the student. Yet since the theories of material science regarding the nature of matter have been subject to so many revisions, is it not possible that further changes will prepare thought for the general acceptance of Mrs. Eddy's statement on page 468 of the Christian Science text-book, "Science and Health with Key to the Scriptures": "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all. Spirit is immortal Truth; matter is mortal error. Spirit is the real and eternal; matter is the unreal and temporal." The foregoing is perhaps the most radical statement contained in Science and Health, and a careful study of the book as a whole will show that Mrs. Eddy makes full allowance for the appearance of reality which matter and evil present to human sense. That the physical senses cannot, however, be depended upon to testify to the true nature of that which is eternal and real, is indicated by the words of Paul, who said in substance that "the things that are seen are temporal, but the things that are not seen are eternal." Mrs. Eddy defines substance as "that which is eternal and incapable of discord and decay" (Science and Health, p. 468). What we call matter, therefore, is not eternal, neither is it incapable of discord and decay.

[George A. Law in *Waterbury* (Conn.) *Republican*.]

The writer has no desire to discuss or argue upon questions of theology; but since our critic has said that "we are living in perilous times and many professed Christians are being deceived," it becomes eminently consistent to show from his own statements wherein he himself is "deceived" as to much of the teaching of Christian Science.

The belief that the material universe is not of God's creating is not held exclusively by Christian Scientists, but is shared by many eminent philosophers and scientists throughout the world. Christian Science rests absolutely upon the Scripture wherein God is declared to be Spirit and the one creator; thus His creation, including man in His image and likeness, cannot be material but must be spiritual. Christian Science teaches that the material universe and sin and sickness with the accompanying experiences are real to our immature, false sense of things; that as we gain a better understanding of God, and of man's origin and birthright, we are able to discern and realize more and more of the spiritual, in which sin, sickness, and death have no place; thus to the degree that this truth operates and one allows the spiritual law to govern, he manifests or expresses God, and in this proportion he represents God.

Jesus was the highest representative of God because of his recognition of the spiritual, allowing God's will to govern his thought and action. The systems to which our friend has referred are based upon hypnotism, will-power, or the action of the human mind. St. Paul called this will the "carnal mind" or "enmity against God," and Mrs. Eddy has termed it "mortal mind." The reason that Mrs. Eddy's teachings are accepted is that she recognized, as Jesus taught, that healing results from the operation of divine law, in which the material can have no part. Jesus emphasized that healing follows as a natural consequence of right thinking and living. He said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Freedom from sin, sickness, discord, inharmony, etc.; that is, all good, is the reward of righteousness, and it follows as a natural result.

The late Dr. Hodge of Virginia used to tell of two Christian men who "fell out." One heard the other was talking about him, and he went to him and said, "Will you be kind enough to tell my faults to my face, that I may profit by your Christian candor and try to get rid of them?" "Yes, sir," replied the other, "I will do it." They went aside and the former said: "Before you commence telling what you think wrong in me, will you please kneel down with me, and let us pray over it, that my eyes may be opened to see my faults as you will tell them? You lead in the prayer." It was done, and when the prayer was over, the man who had sought the interview said: "Now proceed with what you have to complain of in me." But the other replied: "After praying over it, it looks so little that it is not worth while talking about. The truth is, I feel now that in going around talking against you, I have been serving the devil myself, and I have need that you pray for me and forgive me the wrong I have done you." Much fault-finding would thus result, if the same method were employed. The greater fault is many times in the fault-finder.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

SUBSTANCE AND SHADOW.

MUCH as is being accomplished at the present time by the more public methods of placing Christian Science rightfully before the world, the real work which counts, that which is most convincing of its potency, is the healing of the sick that is daily taking place through the understanding and application of its teachings. Mrs. Eddy knew this; she saw from the beginning of her great undertaking that she must prove her faith by her works before she could hope to gain a hearing, and in Science and Health (p. 109) she tells us that demonstration was a factor in arriving at the absolute conclusions of Christian Science; that its truths she had discovered must be "supported by sensible evidence," its divine Principle "demonstrated by healing the sick and thus proved absolute and divine."

Mrs. Eddy simply followed the Master's methods. The great Teacher bore a wonderful message to the children of men, but it was not until he began to heal the sick before their very eyes that the rabbis and priests began to question by what power these works of healing were wrought. They could but admit it was greater than they themselves possessed. In one of her later messages Mrs. Eddy writes: "Had not my first demonstrations of Christian Science or metaphysical healing exceeded that of other methods, they would not have arrested attention and started the great cause that today commands the respect of our best thinkers" (Messages to The Mother Church, p. 53).

Christian Scientists will do well to keep this statement of our Leader ever before them, so that they will not be led away from the substance of Christian Science to pursue the shadow of form and ceremony. Each one of the activities of the Christian Science church, the church service, the reading-rooms, the lectures, the periodicals, has an important place in the growth of this movement, but each of them would be ineffective, without impulse, were it not for the healing that is being done quietly and unostentatiously through the ministry of those who have consecrated themselves to this work which our Master said should be the distinguishing mark of his followers. The hundreds of Christian Science churches and societies that are in existence today all had their beginning in the healing of the sick, whereby attention was drawn to the efficacy of this teaching and one after another was brought into the field. It is equally true that no Church of Christ, Scientist, can hope to maintain its prestige in the community unless it continues to manifest this vital element of healing.

Mrs. Eddy writes in "Retrospection and Introspection" (p. 54): "The work of healing, in the Science of Mind, is the most sacred and salutary power which can be wielded." The one feature of Christian Science by which it differs from all other religions is this healing work, but it must not be supposed that the healing of sickness is the sole aim of Christian Science. The aim of Christ Jesus was to save men from their false beliefs which led to sin and death, and to bring them into a true understanding of God and their relationship to Him. It was this understanding that healed the sick in Jesus' time, and it heals the sick today. Without the healing work that was done by our Master and his immediate followers there would have been no proof of the truth of his doctrines, and without the healing work of today there would be no proof of the truth of Christian Science as taught by Mrs. Eddy. It is, therefore, the peculiar and glorious privilege of every Christian Scientist to be a witness for the faith, to show forth by his works that he has attained to a practical understanding of the gospel which Christ Jesus came to proclaim,—the gospel he bade his disciples preach "to every creature. . . . And these signs shall follow them that believe: In my name shall they cast out devils; they shall speak with new tongues; . . . they shall lay hands on the sick, and they shall recover."

We must be careful, however, that our work is done with the right motive. The apostle James asks: "Who is a wise man and endued with knowledge among you? let him show out of a good conversation his works with meekness of wisdom,"—the wisdom that is "first pure, then peaceable, gentle, and easy to be intreated, full of mercy and good fruits, without partiality, and without hypocrisy." We have no right to expect divine recognition, God working with us, unless we have within us that love for God and man which Mrs. Eddy tells us is "the true incentive in both healing and teaching" (Science and Health, p. 454).

ARCHIBALD MCLELLAN.

THE VITAL MESSAGE.

AT the present time a great deal is being said, both by the religious and secular press, as to the real function of religion. This discussion is undoubtedly called out by the fact, which can no longer be obscured by a blind determination to follow a beaten path, that formalism in religion can never meet the world's great need of something vital, life-giving. This was clearly perceived by the prophet Isaiah, seven hundred and fifty years before the Christian era, when he wrote, "Bring no more vain oblations; incense is an abomination unto me . . . the calling of assemblies, I cannot away with; it is iniquity, even the solemn meeting." Then he goes on, "Cease to do evil; learn to do well," and this has been the demand of spiritual sense in all ages. In proof of the awakening of humanity to the need of a clearly defined concept of religion, we have the following from one of the leading dailies of Michigan:—

> I wish every clergyman would preach once a year a sermon on the ministry of religion, its place in the world, its objects, and its problems. I suppose they have this in the seminaries, but as a matter of fact the people need to know these points as well as those who aspire to the pulpit or altar. The mechanic, the editor, the artist, the writer, the scientist, the politician, the athletic director, the teacher—every one of them can justify his place in the world, and the minister of religion should give his own economic justification as well. The minister of industry, the minister of art, the minister of literature, the minister of science, the minister of knowledge, the minister of domesticity, some one of these titles fitting us all, can readily state our place, our right, and our service in the world, and I should like to ask the clergy of Detroit, for their own sakes, to do this, too.

At considerable length and with much fairness the article from which the above excerpt is taken goes into the general proposition that obedience to all truth taught from the pulpit should be insisted upon, its application pressed home. Here we are reminded of one of the first public appearances of Christ Jesus as a religious teacher, when in the synagogue at Nazareth he read these impressive words from the prophecy of Isaiah: "The Spirit of the Lord is upon me, because he hath anointed me to preach the gospel to the poor; he hath sent me to heal the brokenhearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised, to preach the acceptable year of the Lord,"—a wonderfully inclusive program of divine service! But the great Teacher did not stop here, he reminded them of the demonstrations of spiritual law in bygone days, the cleansing of the leper and the raising from death of the widow's son, and as he closed the sacred record he said: "This day is this scripture fulfilled in your ears." Wherever he went he fulfilled the Scripture, and pressed its full demand upon his auditors, but on this occasion we are told that the listeners, who were

Digitized by Google

unwilling to heed this message of Truth, were enraged and attempted to kill him.

The carnal mind has not grown any better since that early day, and would still drive out of the synagogue those who insist upon the demonstration of the truth taught therein. It prefers to feed upon the husks of theory, and offers as man the image of Adam, a fallible creature of clay, rather than the perfect likeness of Spirit. The former "is not subject to the law of God, neither indeed can be," while the man "born of God doth not commit sin," because he continually expresses the divine nature.

Christian Science teaches that the true function of religion is to keep ever in view the real man, the divine idea, and Mrs. Eddy tells us (Science and Health, p. 477) that "this correct view of man healed the sick" in Jesus' day, and will do as much for us if we cherish the true and reject the false. The one who holds to this ideal will indeed "justify his place in the world," and by true living help to solve all the problems that confront humanity, for nothing less than the spiritualization of human consciousness is equal to the task of uplifting the race and giving men the more abundant life offered by Christ Jesus.

ANNIE M. KNOTT.

HINDRANCES MADE HELPFUL.

THE writer of the twenty-seventh Psalm dwells upon the authority and power of God which are pledged for the salvation of "the meek of the earth," and then adds by way of assurance, that the very wrath of man shall be made to praise Him. This declaration of the eternal supremacy of Truth, even to the realization of gain from the resentment of error, naturally leads us to recall that crowning cruelty of human hate which served to bring within the grasp of human understanding the glorious reach and power of divine Love as revealed in Christ Jesus. We think, too, of the persecutions of the early Christians, which resulted in the sowing of the redemptive seed of Truth in every land whither they were driven.

With the growth of material sense Christian believers lost the expectation of divine deliverance from threatening ills which signalized the early church, and it is only as spiritual awakening is experienced through the practical demonstration of Truth's ever-presence that the providential guidance and overruling in human affairs is again relied upon and rejoiced in. Christian Science is bringing to men a new sense of the serviceability of divine law in their behalf, by proving in all the world that it is the prerogative, aye, the very genius of true faith, to rule in righteousness, to extract good from every possible show of mortal resistance to the authority of Truth and Love.

Realizing this sovereign relation of "the knowledge of God" to life, St. Paul dared to voice his splendid challenge to error. "Who shall separate us," he cries, "from the love of Christ? shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword? . . . Nay, in all these things we are more than conquerors through him that loved us." And yet it would seem that this is the offense of Christian Science, in the thought of some, that it declares for the lawfulness and naturalness of this practical, day-by-day overcoming through Christ in which the great preacher thus gloried. Surely no evidence of the removal of much present belief from the apostolic point of view could be more conclusive!

One illustration of the working of this divine law by which seemingly untoward circumstances are being made to further the ends of the gospel, is surely becoming apparent, even to the most obtuse today. If one had anticipated the coming of Christian Science to rebuke the materiality and unfaith of twentieth-century religionists, he would surely have concluded that conservatism and prejudice would present a serious handicap to its general advance, and that long and patient effort would be called for to reach and inform public thought. Such a prophecy would have been found true so far as the fact of antagonism is concerned, but faulty in not taking into account the contribution which this fact was to make to the dissemination of the knowledge of the truth. Published misstatements of Science have called forth corrections at the hands of its representatives, until the readers of well-nigh every newspaper in the world have come to know something of it and its healing ministry. The "wrath of man" has most signally helped to advance the idea it sought to slay.

It has been well said that "the Lord knows how to make stepping-stones for men of their defects." This can come about, however, only as each learns in Science that the same divine law pertains both to the little things and the large; that he is "always living at the point of opportunity," and that he may so understand and utilize the spiritual equation of life as to wrest a gain from every experience to which he is subject.

JOHN B. WILLIS.

NOTICE.

In section III of the Lesson for November 5, 1911, the tenth Science and Health reference should be page 576 instead of 567.

AMONG THE CHURCHES.

SHARON, PA.

The usual simple service marked the dedication on Sunday [Aug. 27] of First Church of Christ, Scientist. The church history is in part as follows:—

First Church of Christ, Scientist, of Sharon, Pa., was organized Oct. 25, 1899. A charter was applied for and granted on May 21, 1900, the number of members at that time being eighteen. On Sept. 5, 1900, a building fund was started; and on April 1, 1902, the lot on which this church now stands was purchased for three thousand dollars.

Ground was broken for the church edifice in May, 1905, some three years later; and on June 13, 1905, the corner-stone was laid. The building was completed and formally opened on Jan. 21, 1906. The church building cost seven thousand dollars; and this,—together with the cost of the lot, making in all ten thousand dollars,—was paid by voluntary subscriptions, no one outside the faith being asked for a contribution; and no one but the treasurer knowing what any one person contributed. No Christian Science church is dedicated until paid for; and the clearing of all indebtedness on July 13, last, made the dedication of today possible.

Sharon Herald.

NEW YORK, N. Y.

Second Church of Christ, Scientist, borough of Manhattan, city of New York, was formally dedicated on Sunday morning, Oct. 8, the service being repeated in the evening. There was no unusual program. The regular order of Sunday service was followed, with the exception of a few remarks by the chairman of the board of trustees, who gave a brief history of the church since its organization in 1891, and a reading and announcement of dedication by the first reader. W. D. Baldwin, chairman of the board of trustees, said in part,—

To me, as chairman of your board of trustees, has been allotted the privilege of making the formal and official announcement that through the loving and generous act of

Digitized by Google

our beloved Leader, the Rev. Mary Baker Eddy, this church has been placed in a position where we can most humbly and gratefully participate in this dedicatory service.

It seems right and fitting at this time to give a short history of this Second Church since its beginning, just twenty years ago. Second Church of Christ, Scientist, was organized at the request of our Leader, Mrs. Eddy, by Mrs. Laura Lathrop, who in conjunction with nine students of Christian Science incorporated this church in October, 1892. The first service was held in a private residence on West 39th street. A move was soon made to a large room in Carnegie Music Hall, where services were conducted for several Sundays, until permanent and larger quarters were obtained in Hodgson Hall, corner Fifth avenue and 45th street. Here we remained for four years and grew to a membership of fifty with an attendance of one hundred persons. Here the building fund for this church edifice was started, but the movement did not assume active form until several years later. From Hodgson Hall we moved to Scottish Rite Hall, corner of Madison avenue and 59th street, and worshiped there nearly five years. During this period we began to look about for a suitable location for building purposes, and finally selected this present site.

Ground was broken in December, 1898, and early in the morning on Easter Sunday, April 2, 1899, the corner-stone was laid with impressive ceremony. Later it was felt that the structure would not be capacious enough, and an additional strip of land twenty feet wide was secured in the rear, thus providing the necessary room for the present building. On Easter Sunday, 1901, the church was opened, and has continued to be open from that time for regular services with an ever increasing regular attendance. At the opening services there was read a most beautiful letter from Mrs. Eddy, which seemed especially applicable to that occasion, but is equally appropriate to-day, and I shall therefore read it to you.

"Pleasant View, Concord, N. H., April 5, 1901

"To Second Church of Christ, Scientist, New York City, N. Y.

"*Beloved Brethren*: Please accept a line from me in lieu of my presence on this auspicious occasion. Hope springs exultant on this blest morn. May its white wings widen over this white temple and soar above it, pointing the path from earth to heaven; from human ambition, fear or distrust, to the faith, meekness, and might of him who hallowed this Easter morn.

"Now may his salvation draw near, for the night is far spent, and the day is at hand. In the words of St. Paul: 'Render therefore to all their dues: tribute to whom tribute is due, custom to whom custom . . . honor to whom honor. Owe no man anything, but to love one another: for he that loveth another hath fulfilled the law.'

"May the benediction of 'well done, good and faithful' rest worthily on the builders of this beautiful temple, and the glory of the resurrection morn burst upon the spiritual sense of this people with renewed vision, infinite meanings, endless hopes, and glad victories in the onward and upward chart of being.

"With love,

"Mary B. G. Eddy."

The circumstances which have enabled us to hold this dedicatory service to-day are known to all, and our gratitude for the loving remembrance of our Leader is unbounded; we should, however, temper any thought of joy or exultation with a deep sense of humility and responsibility. The cause of Christian Science as a whole is of far greater importance than the single individual interest of any branch church, and we shall lose the full blessings of our gift if we hold in our consciousness any other thought save one.

THE LECTURES.

SAN DIEGO, CAL.

William R. Rathvon delivered a lecture under the auspices of First Church of Christ, Scientist, San Diego, in the new church edifice, Thursday evening, Sept. 14, before an audience which filled the large auditorium to its utmost capacity. The lecturer was introduced by Courtland C. Manning of the local church, who said in part,—

It has often been said that the growth of Christian Science is remarkable. To those who are students of this Christ truth, it would indeed be remarkable if Christian Science did not grow, for it offers only that which is good, and takes from us all that is bad. To suffering humanity it brings health and strength; to the home and fireside it brings contentment and happiness; and to the earnest seeker after truth it brings that "peace of God, which passeth all understanding."—*San Diego Union.*

ROME, N. Y.

A large and attentive audience listened to a lecture on Christian Science delivered by Judge Clifford P. Smith of Brookline, Mass., in the local Christian Science church last evening [Sept. 18]. The lecturer was introduced by the second reader, Miss Frances E. Cady, who said:—

We welcome you here to-night to listen to a lecture on Christian Science. The message which Christian Science brings is not new—it came of old to the shepherds watching their flocks by night on the Judean hills—it is, "On earth peace, good will toward men," and was fulfilled in the life and works of Christ Jesus, who said, "He that believeth on me, the works that I do shall he do also." In a time of great need this message was revealed to our Leader, Mrs. Eddy. She tells us that when God called her "to proclaim His gospel to this age, there came also the charge to plant and water His vineyard" (Science and Health, Pref., p. xi); so she has provided in many ways for all who desire to know of Christian Science,—in the text-book and her other writings; the Christian Science publications; and the board of lectureship; and, as a result, thousands have found peace and healing.

There are those in this audience who would gladly say that they have been spiritually uplifted and physically healed through Christian Science—through a nearer, dearer, and more practical understanding of God, the God who is ever present and unchanging good, the God who is Love. To those who are not Christian Scientists, let me say that we hope the message which you are to hear to-night will quicken your thoughts into a desire to know more of this truth which heals and saves.—*Rome Sentinel.*

CLEAN, N. Y.

There was a large attendance at the lecture given yesterday afternoon [Sept. 22] by Virgil O. Strickler at the Church of Christ, Scientist. Mr. Strickler was introduced by W. Willard Ross of Salamanca, who said:—

The wise man hath said: "The thing that hath been, it is that which shall be; and that which is done is that which shall be done: and there is no new thing under the sun. Then what will be good and true to-morrow is good and true to-day, and what is good and true to-day was good and true yesterday. Thus it is evident that all good is the outgrowth of a consciousness of that which already exists. In other words, we see we might have had a Christ to-day, if we might have had a Christ two thousand years ago. For the fruits of the Christ, were in existence then as they are in the coming years may invent the

Digitized by Google

the laws upon which they are to be constructed are in existence now, only awaiting perception and application.

So Christian Science comes to you and to me to awaken us to the fact that Truth will never be truer than it is today; that God will never be more available and ready to save; that mortal man need not postpone the day of salvation, or die in order to enter heaven; because here and now, at the very doors of sinning human consciousness, are the ever-operative laws of immortal being; the redeeming, healing, and purifying forces of divine good only awaiting our perception and utilization. And what a hope-lighted thought is this! If there be one present today whose heart is heavy, one whose life expresses disappointment and failure, one whose body is pain-racked and burdened with disease,—if there be such a one, and he shall catch some glimpse of light, some ray of divine Truth, so that he may be led to investigate this great and demonstrable Science and find his ultimate freedom and dominion, then the purpose and desire of those who have provided this lecture will have been realized.—*Olean Herald.*

PRINCETON, IND.

The court room of the Court House was well filled Thursday evening, Oct. 5, to hear the lecture on Christian Science by the Hon. Clarence A. Buskirk. The speaker was introduced by the Hon. Henry Kister, who said in part,—

There are many different views on the subject of religion. What every intelligent man and woman wants, or should want, is more knowledge concerning the truth that will make us free; a better understanding of our relation to God; a better understanding of the Master's teachings; a better understanding of divine law and divine Principle. The Christian Science religion gives us some new ideas concerning our relation to God and of the Master's teachings; it gives us some new ideas about the divine law and divine Principle. It has an increasing number of intelligent men and women who have made a careful study of it as its followers. This should commend it to the careful and considerate study and investigation of every intelligent man and woman in search of the truth which our Master said would make us free.—*Correspondence.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Albany, N. Y.—Frank H. Leonard, Harmanus Bleecker Hall, Nov. 5.

Albany, Ore.—Virgil O. Strickler, National Guard Armory, 4th and Lyon streets, Nov. 7.

Berlin, N. H.—Frank H. Leonard, Gem Theater, Nov. 7.

Bolton, Lancashire, Eng.—William D. McCrackan, M.A., Grand Theater, Churchgate, 3:30 p.m., Nov. 19.

Brookline, Mass. (Auspices The Mother Church, Boston).—Prof. Hermann S. Hering, Beacon-Universalist Church, Harvard street (near Coolidge Corner), Nov. 9.

Cambridge, Eng.—Bicknell Young, Church, Panton street, 5 p.m., Nov. 16.

Cambridge, Mass.—Willis F. Gross, Scenic Temple, Temple street, Central square, 3:30 p.m., Nov. 5.

Canajoharie, N. Y.—Frank H. Leonard, Wagner Opera House, 3 p.m., Nov. 5.

Columbia City, Ind.—Francis J. Fluno, M.D., Tuttle's Opera House, Nov. 6.

Columbus, Ga.—Prof. Hermann S. Hering, Chase Conservatory, Oct. 30.

Columbus, Ohio.—Clarence C. Eaton, Memorial Hall, 3 p.m., Nov. 5.

TESTIMONIES OF HEALING.

A little less than two years ago I first heard Christian Science mentioned in other than tones of ridicule, and first learned of the existence of the book called "Science and Health with Key to the Scriptures." At that time I was hourly enduring mental as well as physical suffering, for I had been condemned to an early closing of my life on account of heart trouble, said to be hereditary and organic. It had been very much aggravated a year before by a shock and mental strain. Troublous conditions at home induced me to bear the burden of this knowledge alone, and when this could no longer be done on account of periods of unconsciousness, I consulted doctors other than the ones who had given me no hope, vainly believing that from some one I might get help. The dictum was, "No more than a month, probably, before you reach home." Then, in order not to worry my people, I went away to die.

In a short time I was put to bed, and while there, only half conscious, being drugged to relieve pain and coughing, I managed to write a note to a Christian Science practitioner in New York, hundreds of miles away (for I was then in Canada), one who was merely a name to me and of whose methods I was as ignorant as I am of Sanscrit; but before I knew whether she had received my letter, I was out of bed, and in a few weeks I could say that I was healed. The pain utterly disappeared. I gained in a marvelous way, and the dread and terror born of the wonderment as to what the next moment might bring to me, a fear so keen as almost to deprive me of reason during the long hours of the night,—all these were dispelled, and the peace which has been given me is indeed beyond human understanding.

My gratitude to Christian Science for physical restoration is great, but the joy and satisfaction I derive through at last learning how to know God is unspeakable. Some minor ills were overcome at the time when I was receiving treatment, and I cannot close this statement without mentioning the vigor which was given my right arm, it having been semiparalyzed by the hasty injection of a powerful drug five years ago, when I was suffering from my heart. Aside from the distress which this caused me, the inconvenience was, to say the least, trying, as I could not use my arm either in work or in play. I dragged it from doctor to doctor, and, after having it massaged, electrified, and blistered, was told to endure it as best I could, for it was in a hopeless as well as helpless condition. Now, by the aid of Christian Science, I use that arm continually and have almost forgotten its former uselessness.

Surely, no one has more cause than I to be thankful to God, and grateful to Mrs. Eddy, for I am well, happy, and at peace.—MAUDE SEYFERT, New York, N. Y.

I am very grateful for Christian Science. I know this truth is a blessing to mankind, that its law is the law of growth and progress and fulfilment; that it admits of no discouragement, but brings to all honest seekers that peace "which passeth all understanding." I did not come into Christian Science for physical healing for myself, but for a dear one. All that could be done in a material way by the best physicians here and elsewhere had failed. Each day new remedies or methods were used without finding relief, the patient only growing worse. As a last hope we were asked to try Christian Science, and through it we indeed found the "great Physician."

Then came also my healing. I was a great sufferer from severe headaches and nervous troubles, at times losing the use of my hands. Every treatment known to us was given me, but it was of no avail. All I could see before me was the loss of the use of my hands. I dreaded the nights, wondering what condition I would be in the next morning; but I was healed in Christian Science with a very few treatments, and being a physician's daughter, this was marvelous to me. I also found I needed spiritual healing far more, and this truth has led me to find a pearl of priceless value, in being able to understand the Bible better. I have learned in Christian Science that good is ever operative through man when the human consciousness is responsive to the divine Mind. It is daily teaching me to eliminate self, to cast out the fear of criticism, to be loving and lovable, and to do to others as I would have others do to me.

God has abundantly blessed me in all my efforts, and my daily prayer is that I may be worthy to tell some one of the abundance of the Christ-joy. I am grateful to God, also to our dear Leader for the Manual and all our literature.—MRS. EDDA K. ILIFF, Indianapolis, Ind.

In the hope of doing good to some poor sufferer, I send this little message, in thankfulness to God, to our blessed Redeemer, and to our dear Leader, Mrs. Eddy, for the healing truth found in Christian Science. I have been healed of many ills, among them rheumatism in the feet of the worst kind, also of a very weak back, and eye trouble for which I used glasses. I have been helped and healed many times, and I am truly thankful to God for it all.

ELWIN F. DONER, Portland, Ore.

After six years' study of Christian Science, and an entire reliance upon its healing methods for that time, I find it difficult to know where to begin to tell of the blessings it has brought to me. As my own healing was what led me to Truth, I will confine myself to that for the time being.

I was never strong, and was constantly taking tonics, both as a schoolgirl and after marriage. In addition to this condition, I developed hereditary stomach trouble. The birth of my first child brought on an affection which never left me for thirteen years. I obtained temporary relief through medical treatment only for a short time, and then any unusual exertion or worry would bring on the suffering worse than before. During these thirteen years I was scarcely out of the doctor's care for more than two months at a time, and was always having to take medicine. The stomach trouble became more aggravated as time wore on, in spite of careful dieting and obedience to so-called health laws. I was finally reduced to invalidism by periodical attacks of this ailment, which were so acute that nothing could relieve but hypodermic injections, and from which it would take weeks for me to recover.

After two years of such suffering, the attacks becoming more frequent, I was taken down with peritonitis, with complications of kidney-stones and an abscess which required an operation. I had two relapses after getting up, and was certainly in a very serious way. I was thoroughly discouraged with *materia medica*, and had taken a course of physical culture, massage, etc., but with no permanent relief, or even much benefit at the time. My friends had already told me of Christian Science and what it had done for them, so I started with the treatment. In two weeks' time everything had yielded to such an extent that I knew I was healed, and stopped treatment. My strength steadily increased, I was able to eat anything I wanted, and for the past five years I have been perfectly well and strong, never having had such strength and health before in my whole life.

The teaching of Christian Science immediately appealed to me, and the marvelous revelation of God, Spirit, and man as His image and likeness, hence spiritual, has never left my consciousness with its message of love and courage. I have told only a small part of what Christian Science has been to me, for the physical healing is but the outcome of the inward illumination or understanding, and that cannot

Digitized by Google

be told in words, but by the same works that Jesus did and commanded his followers to do. I have found that when I follow the divine rules laid down for us in the Bible, and explained to us more fully in Mrs. Eddy's book, "Science and Health with Key to the Scriptures," I have been able to heal pain and discord and make my life a useful and happy one, instead of one filled with suffering and disappointment.

Is it any wonder that we who have received such benefits think of Mrs. Eddy with the utmost gratitude and love in our hearts for her brave stand against "the world, the flesh, and the devil," in order to give us Jesus' religion, "pure and undefiled" in Christian Science!

Mrs. Ethel M. Whittier, Rutherford, N. J.

I have been helped so much by reading the testimonies in the *Sentinel* and *Journal*, that I would like to add my own, in the hope that it may help some one else. My baby, two years old, was healed in Christian Science of a painful condition of the eyes which is rarely helped by *materia medica;* also healed a year ago of a very severe attack of bowel trouble, from which her weight was greatly reduced in a few days and it was not believed that she could live. She has, however, been well ever since, and has cut all her teeth without any trouble at all. In my own experience I have been healed of a bad burn by one absent treatment, there being no scar or mark left.

We feel very grateful to God, also to Mrs. Eddy for making these blessings possible.

Mrs. J. H. Budds, Los Angeles, Cal.

I am truly glad for the change of thought that has come to me through the study of Christian Science. It was for a better and truer knowledge of God that I began to study Mrs. Eddy's writings, and I am continually filled with wonder, love, and praise because of the great and satisfying truth which has been and is being given to the world, through her love for and devotion to Truth.

I have been privileged to receive class instruction, and for this I shall never cease to be grateful. I have been able to make some small demonstrations, if any change from bad to good can be termed small, one of which I will relate. In passing through one of the heavy doors at a railway station, it swung to and I was thrown with great force to the concrete flooring and against a baggage truck. I was assisted to rise and was asked if I was badly hurt. I did feel rather unsteady, but with thanks I declined the proffered medical aid and all remedies. Saying that I would sit quietly awhile, I continued to declare the truth, and by and by I took a walk about town, as I was starting to do at the time of the accident. Two hours later, when my train was ready, all evidence of the accident was gone, and there was no unpleasant effect afterward. For this I am inexpressibly thankful. Truth is gradually, even if slowly, discovering itself to my consciousness. There are regrets sometimes that I do not understand more readily, but I am never discouraged, knowing that all things come to him who waits on God.—Mrs. W. T. Darling, Woodstock, Vt.

I never heard of Christian Science until about five years ago. At that time I certainly was a most miserable mortal, as I was in the wilderness, without God or hope. I could not see anything to live for, and nothing to look to but the grave or the asylum. I was seemingly loaded down with every disease that flesh is heir to; had been going on crutches for months, and was laid in bed for months. I had not lain on my left side for years, with heart disease; besides I was troubled with so-called Bright's disease. I had erysipelas and neuralgia, in fact I never knew what it was to be a day without some ailment for twenty-five years, till the truth came to me through "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had been taking medicine all this time, but the more I took the worse I was getting; so I gave up all hope of ever being better. Our Leader, Mrs. Eddy, tells us in Science and Health that "man delivered from sin, disease, and death presents the true likeness or ideal" (p. 57), and I know that her words are true, for I can say today, with a heart overflowing with love for God, through Mrs. Eddy, that I am a far better man than I was twenty years ago; for, as St. Paul says, "I am free born." Now I know that I am free, for I have not taken a drop of medicine for the last three years, and have no need of any. I have no pains or aches, no load of care, but am daily working and praying that I may know more of the truth, that I may have the Mind "which was also in Christ Jesus."

It seems to me that I can never thank God enough for Mrs. Eddy, and for all the blessings I have received. I know I would not be here today to give this testimony, if it were not for what the truth has done for me through Science and Health. Christian Science with its wonderful healing power has cured me of all my diseases; and the Bible, together with the text-book and Mrs. Eddy's other writings, is my daily companion. I read very little else, for those writings are the joy of my life. I have no pleasure in the attractions of the material senses any more, knowing that there is no truth in them. As I write, my heart overflows with love for God, who has given us this great truth, which is all the world to me.

John Sullivan, Youngstown, Ohio.

For eight years before I knew anything of Christian Science, I had been suffering from a complication of diseases which the physicians said could not be cured by *materia medica*. I was a sufferer from varicose veins, this trouble being in so aggravated a form that I could not get a rubber stocking large enough to wear comfortably. I also suffered from a chronic bowel disorder and severe headaches. Dropsy also had set in, and I was beyond the help of human skill.

I was thoroughly healed by Christian Science of all these ailments in fourteen treatments, and I have been a happy and well woman ever since. For the past ten years I have been reading the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, and they have been my daily food during that time. These words in Science and Health have been a great comfort to me in time of need: "The realization that all inharmony is unreal brings objects and thoughts into human view in their true light, and presents them as beautiful and immortal" (p. 276).

I certainly feel grateful to God for what Christian Science has done for me, and I am thankful to Mrs. Eddy, who has brought the light of Truth to the world at this time.

Mrs. Meta Pahl Morlang, Parkersburg, W. Va.

I have long felt a desire to express through the *Sentinel* my gratitude for my healing, and also for the many other blessings which have come to me through Christian Science. For many years my life seemed to be one weary struggle, and at last I consented to undergo an operation which the physicians said would make me a well woman in three weeks. It was however nearly six weeks before I was even lifted from the bed. After this I gained very slowly, but greater relief followed, until about five years later, when I was again in bed nearly all winter, physicians at this time declaring that there was nothing left on which to build up.

Christian Science had been presented to me, but I would not listen. However, after I had exhausted *materia medica*, I very reluctantly consented to send for a practitioner. The healing came slowly, but with it came such a sweet peace and restfulness, instead of the worry and anxiety which

Digitized by Google

always had attended the use of medicine. As a result my family are all studying our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the truth has been our only physician for almost five years. I think if I am more grateful for one thing than another, it is for the removal (in a great measure) of the disposition to worry, which always had seemed to be a part of my daily duties.

I am now able to do any kind of work, and walk as far as I like without any of the old troubles. Also, through the understanding that has come to me in the study of the Bible, as illumined by Science and Health, I have been able to help others as well as myself. For all of these blessings I am trying each day to prove my gratitude to God, and to Mrs. Eddy, our Leader, who has so faithfully pointed the way and has revealed this truth so clearly that all who will may demonstrate it for themselves.

MRS. D. E. ARMITAGE, Sioux City, Iowa.

Having received much help and encouragement from the testimonies in the *Sentinel*, I can no longer refrain from offering mine to others in the spirit of thanksgiving for all that Christian Science has done for me and mine. Five years ago this great truth found me ill with constant suffering from neuralgia, throat trouble, and severe stomach and bowel affections. I did not seek the truth until all material remedies had been exhausted, and I was then healed in one treatment of the throat trouble, which was in a most aggravated form. I laid aside glasses which I had worn for ten years, after reading Science and Health for four weeks, and the neuralgia has gradually disappeared into its native nothingness.

Nearly every member of my family has experienced the healing power of Truth, in one way and another. A little nephew, who is now over three years old, was born with one foot crippled. A surgeon was consulted when he was six months old, who said it might require two operations to straighten it, and he would not promise that the same would accomplish the desired end. The child wore a braced shoe for a little time; but Christian Science was finally resorted to, with the result that when he was twenty months old his little foot was normal, so that it was difficult for his mother to remember which one had been deformed.

Christian Science has enlarged my usefulness and taught me that there is nothing too difficult for us to accomplish, nothing too high for us to attain, since God is our strength and intelligence. For this knowledge, and all the blessings that follow in its wake, I am profoundly grateful to dear Mrs. Eddy.—ANNA J. NICHOLAS, Chicago, Ill.

About five years ago our next-door neighbor, an elderly lady, was healed through Christian Science treatment of a disease said to be incurable. That was my first knowledge of it. I went to the same practitioner for treatment for rheumatism of many years' standing, and also for periodical headaches. I was healed of these ills in about one week, and am free from suffering.

I then commenced the study of "Science and Health with Key to the Scriptures," and I have now also read most of Mrs. Eddy's other works. After being healed of the two above-mentioned troubles, I still indulged in intoxicants until about eighteen months later. I then began to declare the truth for myself, for this evil, and the one treatment cast it out for good, although I had been a drinking man for forty years. For nearly twenty years I was not able to stand on my feet long enough to earn my living at work of any kind, but at this writing I am able to work as well as most men at sixty years of age. I have also gained enough knowledge of Christian Science to help others. I am indeed grateful to God, to the Wayshower Christ Jesus, and to our Leader, Mrs. Eddy, for all these blessings.—ADAM FORSTER, Los Angeles, Cal.

About six years ago my little boy, then two years old, had what the doctors termed blood-poisoning. They treated him for eight months, operating four times, and at last it was decided to remove several fingers. They said further, that if this did no good they would have to remove his hands, as gangrene had set in.

The day before the one set for the operation, a friend asked me why I did not try Christian Science, and gave me the name of a practitioner. I applied that same day for help for my child, who seemed to be a physical wreck. I was told that there was no need to remove his hands, as he would soon be all right. In five weeks he was like another child, and walked the floor clapping his little hands and singing. The practitioner had not seen him for nearly five years until recently, when she remarked what a fine, manly little fellow he was. I said, "Yes, but only for God, Mrs. Eddy, and Christian Science I would have no such boy." I am indeed grateful for this wonderful blessing.

MRS. SUSIE CARTER, Portsmouth, Va.

I wish to tell others what a change Christian Science has brought about in my life. I was led to it for physical aid about two and a half years ago, through the understanding of an aunt who is a Scientist. I had been in poor health for over four years with stomach trouble and its accompanying bad effects, and had lost all faith in material means when I turned to Christian Science for help. I wrote to my aunt to give me treatment, which she did for three or four months. I improved slowly, but was very anxious to learn more of Christian Science, so in March, 1909, I made a trip to see my aunt, and also attended two Christian Science services. I was very much impressed with the services and also with the Scientists whom I met. They received me cordially and I thought they had the happiest faces I had ever seen.

I had a great desire to be a Christian, to know the truth, and I felt that this was the religion for which I was seeking; so I purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, also a *Quarterly*, and was given some literature. I also subscribed for the *Sentinel*, and began to study Christian Science. The good I have obtained from this study is more than I am able to express in words. My general health is better than it has been for years, and the spiritual healing, the joy and peace that have come into my life, is beyond expression. I have not used any material remedies whatever since I began this study, and I have had some beautiful demonstrations for myself and husband, for which I am thankful. I have yet some obstacles to overcome, but one by one they are leaving, and instead comes the peace that passeth understanding.—MRS. BERNICE BONDS, Kensett, Ark.

For many years I read the Lesson-Sermons from a sense of duty, but I thought I would keep on, as others got help from the study; but when my last baby was born, I saw what is gained if we seek first the kingdom of God. At this time only my mother and husband were with me, but I had absent treatment from a Christian Science practitioner. I got up after the child was born, and after breakfast I read the Lesson as I had always done, and found that it was not necessary for me to go back to bed.

I feel very thankful for Christian Science, and would not give up my understanding of Truth for all the gold in the world. My hope and desire is to be able to help suffering humanity to know Truth's power.

MRS. LAURA E. MELL, Chicago, Ill.

In the spring of 1909 I had a very bad fall and injured my left side severely. I was unable to breathe and lost consciousness three times, suffering greatly at each return. A Christian Science practitioner was then called, and I was

Digitized by Google

immediately relieved. I passed a comfortable night, and the next morning was able to dress and take the car to my mother's home in a distant part of the city. In five days I was completely healed, all pain, soreness, and swelling having been overcome. I was also conscious of a great spiritual uplifting at this time, such as I had never experienced before. I have had many evidences of the healing power of Truth, but this was to me a most wonderful proof. I have been healed of a chronic bowel disorder, painful corns, quick temper, great mental depression, and fear of a so-called inherited disease.

I am indeed grateful to God for the many blessings that have come to me in Christian Science, also to our dear Leader, for it is through her teachings that we are able to receive these blessings which are ever at hand. My desire is daily to live this truth.

MRS. CLARA J. LEWIS, Oshkosh, Wis.

Having enjoyed the blessings of Christian Science for over three years, I wish to give a testimony of gratitude. I was healed of chronic bowel trouble, and of severe headaches from which I had suffered since a child. I have also laid aside glasses, after having had trouble with my eyes for many years. I count as my greatest blessing the healing of a very discordant disposition, which the correct understanding of God and man's relation to Him, as taught in Christian Science, is enabling me to overcome.

Christian Science is teaching me to be humble and to surrender self, so as to be receptive to the truth, and to love my neighbor as myself. It is also teaching me to rely on God for all my needs, physical, spiritual, and financial. My daily prayer is to live this truth every hour of my life.

MRS. MINNIE H. WALKER, St. Louis, Mo.

I can no longer withhold an expression of gratitude for the benefits I have received from Christian Science. It found me a wreck, mentally and physically, from years of sorrow and trouble. It had seemed a constant stream from childhood, until my cup of sorrow was filled to overflowing and my cross seemed too heavy for me to bear. I was ready and willing to lay it down, for ambition and hope had fled and life was not worth the living. It seemed as though nothing worse could happen than had already come to me, but here it was that Christian Science found me and brought me out of the gloom into the blessed light of Truth. After a few treatments from a practitioner I am healed of nervous trouble, and also of a chronic bowel disorder. For years past I had suffered from a weak heart, but now I am able to go up and down stairs and about my work without any suffering or ill effect whatever.

I am indeed thankful to Christ Jesus the Wayshower, to our dear Leader, Mrs. Eddy, and above all I am thankful to God for the blessings He has bestowed on me. I am truly grateful for Christian Science.

MRS. GEORGE S. CAMPBELL, East Watertown, Mass.

[Written for the *Sentinel*.]

SYMBOL AND REALITY.

DAVID F. GARTON.

Deep in the quiet of the wood I sit,
Embowered in sylvan beauty fresh and green;
Where happy birds are singing as they flit,
And nothing seems to mar the peaceful scene.

A placid lake laps softly at my feet;
Majestic swans sail grandly on its breast;
The fragrance of the water-lilies, sweet,
Delights my sense, I find content and rest.

If we are granted such supernal bliss
When but the symbol meets our mortal view,
What must it be when we awake from this
And know the all-harmonious good and true?

FROM OUR EXCHANGES.

[Rev. G. Silvester Horne in *Zion's Herald*.]

The kingdom of God, said Paul, is righteousness. The fight for justice and right is a strenuous and arduous fight, and has fewer emotional satisfactions than are experienced by those who obey only the impulse to do the kind and generous thing. I am not going to decry the spirit of charity. It is a very beautiful fruit of the Christian tree, and that tree is barren indeed without it. But I am bound to say this, that whenever we are tempted to put generosity before justice we are building an edifice without laying our foundations; we are trying to get at the supreme luxuries and gratifications of our religion without laying upon our souls the burden of its primary responsibilities and fundamental duties. We talk of the church of Christ as if she existed to be a sort of universal hospital—to bind up the wounds of those who have suffered hurt from the cruelties and injustices of life. Her first business is to end these injustices and cruelties, so that men and women and little children shall be hurt by them no more. We talk as if our business was to take the little ones who are stunted and depraved by being suckled in dram-shops, and try to nurse them back to health and morality; but our real business is to prevent their being taken into these places, and to win for them a fair start and chance in life. We talk as if our main business was to comfort and cherish the poor, mutilated victims of King Leopold's fiendish rule upon the Congo; but our real business is to end that tyranny, and establish righteousness throughout that bloodstained land. We talk as if our business were to add a few soothing comforts to the lot of the victims of sweated industries, but our business is to fight for fair wages, wholesome dwellings, and all just and honorable conditions of life. Once let it be assumed that the kingdom of God is charity, and not righteousness, and you breed the effeminate strain of Christian, and you may as well abdicate all pretensions to be concerned for the establishment of God's will on earth even as it is done in heaven.

[*Christian World*.]

Is the decay in church attendance then, and similar symptoms, evidence of a decay of Christianity? Is there evidence anywhere that the Founder of Christianity placed the decay or growth of Christianity in a census of church attendance? This question, we are convinced, is one not so much of religion as of a new social and economic condition; it is a question of our having now eighty per cent of our population crowded into stuffy cities, mewed up in stifling homes and workshops and factories. The modern Sunday is the rush of human lungs to the open air; of hungry eyes to a sight of green fields, of cramped muscles to a place to stretch them in. Added to that is the fact that literature has so largely taken the place of the sermon; is often so much better a sermon, and listened to under much easier conditions. The gospel inside the church is suffering grievously from stuffiness; the gospel outside the church, in a freer air, is everywhere winning new triumphs. One might say that the Christianity of today, as compared with that of yesterday, exhibits the change from a liquid to a gas; has broken out from a fixed to an elastic form; has become less and less an institution and more and more an atmosphere. The sermon on the mount never had a more attentive hearing. The substitution of Christ's spiritual for the devil's animal never had a more promising future.

The prospects of the church for the time now before us will depend on the way in which it adapts itself to the new conditions. The people are all for the open, in mind and body, and the church must also come into the open. It has upon it an enormous charge. It is the depository and the nucleus of all that is most precious to human life. The world cannot get on without its force and its message.

[Robert L. Kelley in *Standard*.]

"And whosoever shall compel thee to go one mile, go with him twain." To go the first mile and no farther is to know the letter of the law, never its spirit. What does this mean? To consider the law an end in itself, what does this lead to? Slavery to a dead orthodoxy. And Jesus, as he went the second mile, gave the dead orthodoxy of his day a severe arraignment. If Jesus were here today, as then, would he not find many marking time at the first mile-post, hedging themselves behind the letter of the law of their credal forms, slaves of a dead orthodoxy? So much lies beyond in that second mile of Jesus, an orthodoxy of life as well as belief. His words are, "Except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no wise enter the kingdom of heaven."

No class ever made a more earnest attempt, attended by failure, to attain a high plane of righteousness than did the Pharisees. If there was any class of people which Jesus tried to save from themselves, it was this class. That class placed itself beyond the reach of his message. Jesus Christ protested against righteousness according to a formula, against righteousness spelled "riteousness." Jesus placed under indictment the empty formalism of his day. So he said, "Except your righteousness shall exceed," and the Greek word yields to the translation, "go beyond." Not simply the first mile, loyalty to religious rite, but the second mile which meant right living; not simply the first mile in that which expended its force upon self, but the second mile which ushered one forth into the field where man owed his fellow something, in the world of social relationships and responsibilities; not simply the first mile of preaching righteousness, but the second mile of practising the same.

[Rev. Francis W. Gibbs in *Universalist Leader*.]

The church must proclaim ever more loudly that the gospel of the kingdom is the gospel of unselfishness; that the truth of Jesus touches every part of life and living; that the cultivation of character, the growth of the spirit, has to do with brotherly love, equal opportunity, health, happiness, prosperity, justice, purity, honesty, here and now. The church will find in this day a most excellent opportunity to show the real and eternal worth and truth of the relationship of man to man, God to His world, and Christ's gospel to all the things that pertain to life and living. Here is the opportunity for us who are a part of the church of Christ to show the breadth and depth of the religion we embrace.

What, then, shall we do? Simply this: live the largest life we know, the truest life that we can conceive, keep an open mind and a warm heart, be receptive and be sincere. Let Christ lead us in all things. If you wish a text, let it be this: "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength. Thou shalt love thy neighbor as thyself." These two thoughts cannot be separated. To obey them both is to live, and to live is to love and serve.

[*British Congregationalist*.]

We may find difficulties with the metaphysical doctrine of Christ's divinity, but from metaphysics turn to the facts of life. We see him leading men into the knowledge of God, substituting for superstition and fear, trust and filial love; we see him recreating men, getting clean men out of unclean, strong men out of weak, saints out of sinners; we see him keeping these changed men faithful and steadfast right through life. There may be a thousand difficulties to explain, but one thing we know—that is, God's work. And when we see Jesus doing it, we too can say with John, "We know that the Son of God is come."

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Flumo, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan*, and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine*. These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy. Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $1.00; 50 copies, $1.80; 100 copies, $3.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25— £0: 5 s.:	2d.:	Mk. 5.30;	F. 6.45
2.25— 0: 9 :	3 :	9.50;	11.60
2.50— 0: 10 :	3 :	10.60;	12.85
4.00— 0: 16 :	5 :	16.90;	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

A petition asking for the dissolution of the United States Steel Corporation and some of its subsidiaries has been filed in the United States court in Trenton, N. J. The petition was prepared by Jacob M. Dickinson, former secretary of war, who had been retained by the government as its special counsel in the case. The petition charges the steel corporation and those subsidiaries which are named as defendants with maintaining or attempting to maintain a monopoly in the steel business, and alleges that direct connection exists among the steel corporation and all the large railroads and steamship lines, the Standard Oil Company, the Pullman Palace Car Company, the International Harvester Company, and the Western Union Telegraph Company; that the stock of the Tennessee Coal & Iron Company was "hammered" in order to obtain control of the company and that the information given President Roosevelt at the time of gaining that control was misleading, with the intent to prevent governmental intervention; that by threatening a general financial calamity it forced out a rival of high potential possibilities and "unlawfully acquired a power which is a menace to the welfare of the country and should be destroyed"; and that through "interlocking directorates" the corporation held power in other vast corporations, this method being "more refined, more euphonious, but none the less effective than pools."

A comprehensive improvement in the administration of the customs service is planned. Beginning Nov. 1, 1911, all appraising offices throughout the country will submit to the appraiser at New York, either weekly, daily, or monthly, as the case may be, a sample label covering each article of merchandise appraised during the period in question, with certain exceptions. Each sample and label will be carefully compared by the appraising officers of New York with the returns of that port and with the returns of similar merchandise at the other ports of entry, and all discrepancies will be made the subject of correspondence between the appraisers at New York and the customs officers reporting on the same merchandise. The primary aim of the new plan is to bring about uniformity of classification and appraisement, thus at once minimizing the labor of the treasury department and so standardizing the methods at each port of entry that the business world will be saved much time, money, and litigation.

The attorney for the United States Packing Company of Chicago has announced that in behalf of his client he has obtained in the United States circuit court summons for twenty-nine commission merchants and jobbers, constituting a so-called poultry trust in New York, in a suit under the provisions of the Sherman law. The action is to recover actual damages of seventy-five thousand dollars and an additional sum of two hundred and twenty-five thousand dollars as penalties for alleged interference with interstate commerce.

City and town governments throughout the state of Massachusetts are asked to urge the passage by the next Legislature of a bill permitting them to build underground conduits for carrying the wires of the telephone, electric, and municipal systems, and for the payment of nominal rentals by corporations using the conduits. The bill will also include a provision for the removal of all but trolley poles within the cities and towns adopting the bill within a certain length of time from its adoption.

The Hoey bill passed by the New York Legislature and inspired probably by the tragic fire in the Triangle shirt waist factory, places New York in the front of municipalities in the concentration of authority and responsibility for preventing fires in factories and similar buildings. It empowers the fire commissioner not only to order the correction of inadequate channels of exit, but to enforce his order by causing any building in which imminent peril exists to be vacated.

The Massachusetts Institute of Technology has completed plans for building a permanent summer school of civil engineering on Gardner lake, East Machias, Me. The plans call for three wooden buildings set on concrete foundations. Attendance at this camp for six weeks in the summer vacation following the second year at the institute will be required of all students in the courses of civil and sanitary engineering.

The Atlantic Deeper Waterways Association, which has just met at Richmond, Va., is to meet at New London, Conn., next year. A resolution was adopted appointing a committee to urge upon President Taft and Congress legislation carrying into effect recommendations by the boards of engineers of the United States army for the extension and improvement of the intracoastal waterways system.

Attorney-General Wickersham appears personally before the United States circuit court in New York city to make answer for the government in opposition to the plan proposed by the tobacco trust for its reorganization. Independent tobacco men will also appear and oppose the plan.

Suits charging violation of the anti-trust law were filed by the government at St. Paul against the Northwestern Lumbermen's Association, the Lumber Secretaries Bureau of Information, the Lumberman Publishing Company, and the owner of a private detective agency.

Contemplating the tearing down of Gore hall, the present college library, and the erection of a larger structure on this site, a committee of the board of overseers of Harvard University has submitted plans for a new library building to cost two million dollars.

The board of estimate of New York city has passed a resolution to purchase the site of Dreamland at Coney Island, and a plot of ground at Rockaway for park purposes at a cost of $2,225,000 and involving an outlay eventually of perhaps five million dollars.

Kansas country schools this year for the first time started to give seven months of instruction. For the first time in its history as a state Kansas appropriated nearly four hundred thousand dollars state funds for its common schools.

International.

Gen. Li Yuan Hung, commander of the rebel forces near Hankow, has proclaimed himself provisional President of the new republic of China. Notification of the general's action has been duly received by the foreign consuls, who are assured that the provisional government will do all in its power to protect foreign interests. It is believed that General Li's announcement of himself as President will be accepted by the revolutionists throughout the country.

That the revolution in Mexico which displaced Diaz as President and substituted Madero did not unsettle business to any material extent, is indicated by the returns of that country's foreign trade for the fiscal year 1910-11, which show that the imports for that period were larger by nearly eleven million dollars than those for 1909-10, and the exports nearly thirty-four million dollars larger.

The water running over the spillway of the Wachusett dam in eastern Massachusetts, which is under the supervision of the metropolitan water and sewerage board, is to be turned into economic use in generating electric power through a turbine motor, and the power will be sold for commercial purposes.

The Swiss league for the protection of nature has undertaken to preserve in all time to come some of the beauties of the land of mountains and lakes, which are fast disappearing under the name of progress.

A flow of one million gallons per day of water has been struck in the Cairns bore in the Charlesville district, near Brisbane, Australia, at a depth of 2,350 feet.

The business of the National Telephone Company is in the near future to be taken over by the English postoffice department.

Italy formally notified the powers last week of its annexation of Tripoli.

Industrial and Commercial.

Baltimore and southern financial interests, in conjunction with New York bankers, have organized the Interstate Chemical Corporation of Virginia, with a capitalization of $7,250,000. The concern, which owns several extensive fertilizer plants and a Florida phosphate rock company, will extend some of the existing fertilizer plants and build several new ones.

To bring about increased business efficiency among its sales department force the Carnegie Steel Company has organized a school for salesmen. Practical instruction is given in all of the details of the manufacture and the basic principles of iron and steel. The course will be of six months' duration.

The state railroad commissioners of Maine have voted to authorize a bond issue of five million dollars by the Portland Terminal Company to enable it to take over the property of the Boston & Maine and Maine Central railroads in Portland, Westbrook, and South Portland.

The cotton spinners of Manchester, England, propose to buy their raw material direct from American merchants and planters hereafter, and not to buy through Liverpool middlemen. The Manchester manufacturers will thus save two good-sized profits to brokers at Liverpool.

Apple orcharding in the United States is in better shape this fall than for some time past, with more merchantable fruit in sight for storage and winter markets and reasonably good prices prevailing and a total considerably larger than the average of recent years.

The exports of indigo from India during the fiscal year ended March 31, 1911, amounted to 1,806,048 pounds, valued at $1,735,170, as against 2,022,832 pounds the previous year, valued at $1,172,718.

At a special meeting the directors of the United States Steel Corporation formally decided to cancel the corporation's lease of the Great Northern ore properties.

The beet crop from all Europe is estimated as 5,875,000 tons, compared with 8,095,000 tons last year.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE PEACE OF GOD.

WILLARD S. MATTOX.

THE human heart has many longings, but desires nothing quite so much as peace. Some men crave wealth or position or fame. There are few, if any, who do not want to love and to be loved, but fundamental to every ambition, underlying all other expectations, is the reaching out of the heart of humanity for peace of mind and body. Wealth may be gained, but too often it is at the sacrifice of peace. Honor and reputation may be won, in the more sober walks of life, or "at the cannon's mouth," but not always are they the handmaids of a tranquil mind. The cry of the weary and heavy laden, of the burdened ones of earth, of pain-racked invalids, of the thousands discouraged by the weight of guilt and condemnation,—the universal appeal of all these is for peace.

And what is the answer to this cry? Is there no recompense for the disappointments of earth, no placid haven into which the storm-tossed bark may steer and be at rest? Must we be forever buffeted by "outrageous fortune"? Is there no solace for grief, no surcease from pain? And if there is a way of salvation from all of the discouragements and failures of life, where may it be found? If we seek our happiness in the pursuit of wealth, and find no satisfaction; if we bind to us many friends, and find, soon or late, the bonds are sundered, where and how shall peace be consummated?

These are every-day questions, practical questions, and since they touch every life, they require a practical answer. These questions do not press for answer upon all, at the same time, but into every human experience, at some time or other, there creeps the canker of dissatisfaction with mortality, with its sham substance, its sham pleasures, its unreal rewards, and then the individual faces these questions, and facing them it is inevitable that he shall find the answer. "This poor man cried, and the Lord heard him," epitomizes humanity's cry for peace, and the divine answer.

Probably no one sentence in the language furnishes a more concise or satisfactory answer to the question, What constitutes peace and where may it be found? than does Isaiah's wonderful assurance, "Thou wilt keep him in perfect peace, whose mind is stayed on thee." This is a favorite text with Christian Scientists, and its practical value has been realized in so many instances that its truth cannot be doubted. This text sustains the teaching of Christian Science that "heaven is not a locality but a divine state of Mind" (Science and Health, p. 291), and that to be truly blessed, one must turn thought away from the material history to a contemplation of spiritual things. Through thousands of years of vain struggle, mortality has failed to find peace in matter. Looking always for his happiness outside himself, mortal man has never known and can never know what it means to be at peace. Living in a false, objective universe of matter, imagining that success and the elements of happiness were external to his own consciousness, endeavoring always to compel peace to come to him from without, setting up utterly false standards, pursuing the *ignis fatuus* of material pleasure, mortal man has never found and never can find peace; and this because the sense of mortal selfhood must be given up before peace can be attained.

Jesus said, "The kingdom of heaven is within you," and Christian Science is emphasizing this teaching today. Christian Scientists are learning that perfect peace, or the kingdom of heaven, is not reached by a journey, nor by the eager striving of self-will; it is not "out there," it is "within you," ever at hand, attained by giving up, by surrendering the human will, by exchanging the mortal mind for the Mind that was in Christ Jesus. Persons cannot give us peace; the accumulation of material possessions certainly cannot give it; it does not depend on anything we achieve, nor yet on anything that others may do to us or for us. It is not to be found in environment, nor circumstance. It is, like the kingdom of heaven, "within you."

"Thou wilt keep him in perfect peace, whose mind is stayed on thee."

"THEN OPENED HE THEIR UNDERSTANDING."

MABEL S. THOMSON.

IT is a subject of never-failing interest to the student of Christian Science to observe in his study of the gospels how very slowly those who followed Jesus, and saw his works and heard his words, awoke to the realization of the fact that questions of far deeper import than the healing of a few sick people were being unfolded to them, and through them to the world. Those who were closest to him seemed to have understood very little of the vast spiritual truths which he was bringing to light, and even after his resurrection it is probable that the majority of those who followed him still saw in him only a man who had drawn them with an ineffable sense of God's love, and who did marvelous works, the spiritual signification of which still remained dark to them. Even the marvelous works in themselves were not sufficient to awaken a spiritual understanding, for the people were accustomed to wonder-workers of many kinds, and on one occasion they exclaimed, "We never saw it on this fashion," implying that although they had seen many extraordinary things accomplished by exorcists and magicians, they certainly had never seen anything so striking as this latest wonder. But there the majority were content to leave it, merely "glorifying God" without searching further into the cause of these wonderful events.

When Jesus put that tremendous question to his immediate disciples, "Whom say ye that I am?" it was a moment fraught with incalculable issues. A profound student of the gospels has pointed out that this question was put to them at a time when in all likelihood they had been touched by the doubt and unrest which surged up in the mind of the multitude after John the Baptist had been beheaded. It is evident that popular thought had wavered at times in its allegiance to John, or to Jesus as being the greater

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

prophet, and no doubt had looked to Jesus to rescue the Baptist in some miraculous manner; but when he went about his own work and did not turn aside on John's account, it is probable that the faith of many was shaken.

The answer which Jesus made to Peter's confession of faith shows how deeply he felt the vital importance of that moment, for it contains the prophecy of the foundation and omnipotence of his church. In her discussion of this point in Science and Health (p. 137), Mrs. Eddy draws attention to the fact that it was Peter's recognition of the Christ manifested through Jesus which called forth the benediction he received, for this perception and declaration of the truth must have lifted all the apostles to a point of view from which they could begin to catch glimpses of the profounder issues of their Master's work. And yet how dense the materiality of this outlook still remained, is evident from the account of the walk to Emmaus after the resurrection, and of the first time Jesus appeared to the assembled apostles and showed them his hands and feet. "Then," says St. Luke, "opened he their understanding, that they might understand the scriptures" and all that they foretold about the Christ.

The religious history of the following centuries has been an account of the gradual darkening of this understanding of the Christ. Here and there all down the ages, it is true, the light has shone through the darkness and for a little time an increase of spiritual activity followed, only to be again obscured by the materiality of human thought. The greatest work achieved by our revered Leader, in giving Christian Science to the world, is that the human consciousness has at last been awakened to an understanding of the Christ in such a manner that it can never again be lost, and one of the most remarkable things about this restatement of the Christ-teaching is that it makes its appeal exactly as Jesus made his, and to the same kind of people.

Although Christian Science is preeminently scientific, and contains the profoundest philosophy ever given to the world, it still comes first to the common walks of life, "to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised." Again we find, as at its first appearing, that those who accept it and work for it are the active doers, not the passive thinkers of the word, and in the light of history it is not difficult to see why this must be so. Many of the great truths about God and man's relation to Him have been stated by the great philosophers and religious teachers from time to time, but in such a manner that they have remained academic utterances, taking no hold upon the active life of the multitude. Jesus, on the other hand, did not so much speak those truths; he rather lived them, and showed their relationship to common human experience, and it remained for the Discoverer of Christian Science not only to demonstrate the spirit, but also to gather together and to restate all the utterances of the letter, together with many never before stated, thus forming a complete Science of life, with rules for its demonstration, of which she herself says that "Christian Science may absorb the attention of sage and philosopher, but the Christian alone can fathom it" (Science and Health, p. 556).

"THE CENTRAL POINT."

ALBERT L. MC BRIDE.

THE complications are many which appear in the problems of mortal experience that daily present themselves for solution, and without clearly defined rules of action mental chaos may ensue. The account of evil's origin, as given in the second chapter of Genesis, describes such mystification. Evil's method remains the same, in presenting its claims to individual consciousness in the affairs of today, as in the original Scriptural account. Referring to the Old Testament narrative, Mrs. Eddy says: "It would almost seem, from the preponderance of unreality in the entire narrative, as if reality did not predominate over unreality, the light over the dark, the straight line of Spirit over the mortal deviations and inverted images of the creator and His creation" (Science and Health, p. 502). The same discrimination is needed in dealing with every-day conditions that is needed in the study of the Scriptures.

The refusal to accept as a law of being that which is a departure from law, calls for keen spiritual discernment on the part of the Christian Scientist. It enters alike his spiritual realization and study in the privacy of the closet, and his daily round of practical application of what is therein realized. The epistle to the Hebrews deals with the old and new covenants with clear and convincing conclusions as to the central point: "I will put my laws into their mind, and write them in their hearts: . . . I will be merciful to their unrighteousness, and their sins and their iniquities will I remember no more." This is the better way, the divine way, and offers universal salvation. To follow the divine plan, namely, to have the divine law written upon the heart and mind, is the only way of release from the human belief in bondage to the retributive measures of the old covenant.

The penal clause of the old covenant should be summarily dealt with when its claims present themselves with physical evidence to human consciousness. Sins and iniquities should be no more remembered, if we would annul the old covenant penalty which reads, "Visiting the iniquity of the fathers upon the children unto the third and fourth generation of them that hate me." The law of Love is an actuality, and written in the mind and hearts of men it excludes the remembrance of the mortal or false basis of heredity, the offering up of the child upon the altar of a human sense of mortal parentage, even as Abraham would offer Isaac. Accepting man's rightful heritage under the new covenant, having written in our hearts the law of Love, is the divine way of sparing the child of today and avoiding the tragedy, as Abraham released Isaac.

Mrs. Eddy clearly perceives and definitely states the point in Science and Health: "The central fact of the Bible is the superiority of spiritual over physical power;" and again she writes: "The superiority of spiritual power over sensuous is the central point of Christian Science" (pp. 131, 454). This spiritual fact is our divine Comforter today and eternally. In Hebrews we read, "Now that which decayeth and waxeth old is ready to vanish away." The mortal sense of physical power never had actuality, and sensuousness is never the origin of life. Consciousness of the superiority of the spiritual fact over the material adverse, is leavening the entire lump. Human belief in the actuality of evil's material claim of a law of perpetuity is in its decadence and is ready to vanish away.

Human love, parental desire, should actuate us to strive patiently and earnestly in the application of this vital point in the home and in every line of scientific endeavor for others. It is, however, in its broader application to the daily affairs of men, where the circles of human lives touch and with more or less of friction at the point of contact, that the practice of the truth is needed as the expression of the divine impress of this new covenant on individual mind and heart. The retributive nature of sensuous belief would attribute all the cause of friction to others, but the Christian Scientist knows that all which manifests discord is individual belief in its actuality. The strong impersonal statements with which Jesus uncovered the belief of life in matter still apply. "He was a murderer from the beginning;" "There is no truth in him;" "He that is of God heareth God's words."

The great need is for the practical application of "spiritual power" where friction seems to be, where sensuous belief in physical power or power apart from omnipotence has been permitted. That belief may seem to be manifest-

Digitized by Google

ing itself as friction in state, municipal, or national organizations, or even under the guise of church organizations, but its most startling effects at the present day are in discordant domestic relations. This seeming discord, however, when analyzed, may be expressed in the words of an old hymn:—

I only design
Thy dross to consume and thy gold to refine.

In every instance that thought turns away from reliance upon the physical or sensuous belief in power apart from God, to the new covenant to which the Hebrew writer directs the attention of his brethren and to which Mrs. Eddy so clearly and consistently directs thought today, in every such instance the proof of Truth's power is manifested. All must follow the straight line, the narrow way in Christian Science, to come into possession of man's divinely allotted estate, under this new covenant of God to man: "Their sins and iniquities will I remember no more." The divine plan must be followed in every point by Christlike followers of Jesus Christ. God's plan is one, the only, the universal plan, and its perfect manifestation can only be realized when the millennial condition is reached in which "they shall not teach every man his neighbor, and every man his brother, saying, Know the Lord: for all shall know me, from the least to the greatest." Until this condition is reached, our Christian work is to teach, by demonstration, precept, and example, the truth which must first have been written in our individual minds and hearts. Thus only shall vanish away that which waxeth old.

THE MESSAGE OF THE MOTHER CHURCH.

GERTRUDE TOWNE.

It was my privilege to attend services in The Mother Church for the first time one beautiful sunny morning of December, 1910. The air was clear and cold, and as I walked across the square that makes such a beautiful approach to the church, the chimes rang out a loving welcome. Looking eagerly up at the structure of stone, I was not so much impressed by the edifice, attractive as it is, as by its spiritual significance. The symbol was lost in the idea for which it stood. I was seeing not a material monument, but "the structure of Truth and Love" (Science and Health, p. 583), that loomed up large and promising.

Seated within the spacious auditorium, the stillness broken only by sweet strains from the organ, the soft light from the great dome falling upon us, one instinctively closed his thought to material things and waited to receive the spiritual message which comes to every listening heart. Clearly, distinctly, convincingly it came to me. The music, the light, the very atmosphere, all sang together, "To him that overcometh;" and I thought of the many promises given in the book of Revelation "to him that overcometh." I thought of Christ Jesus, who had overcome the temptations of the flesh that he might show us the way of Life; and I thought of our Leader, who, all alone in this age, stood so dauntless and unafraid, overcoming obstacle after obstacle that she might give to suffering humanity a new understanding of the truth that makes free. I also thought of the countless numbers who, in gratitude for blessings received through Christian Science, had contributed to the building of this Mother Church, and I said to myself, It is good to be here! Through the hymns, the solo, the Lesson-Sermon, the benediction, I still heard, like a beautiful *motif*, the message which seemed specially meant for me, "To him that overcometh."

All of us, at some period of our lives, hear the voice of the tempter, saying, "This do, and I will make you a ruler of men." Well for us if we resolutely face the enemy with the words of the Master, "Get thee behind me, Satan;" for Mrs. Eddy tells us that, "resisting evil, you overcome it and prove its nothingness" (Science and Health, p. 446). But "the heart knoweth his own bitterness," when it has failed to overcome or has stood out against the divine command to take up the cross and leave all for Christ, Truth. Therefore the message came to me as a warning and an assurance,—a warning to be on guard, watchful, alert, that I might detect error, whatever the guise it may assume, and detecting it might handle it and prove its utter powerlessness, as Moses at God's command handled the serpent and proved it a staff upon which to lean; an assurance that as I overcome, prove myself worthy, I shall inherit all things and wear the crown of rejoicing.

So the message of The Mother Church which came to me that December morning is a message for all time, strengthening me in the hour of temptation, cheering me in the darkness of seeming defeat, renewing my courage, my faith, my trust in the one God, who is Life, Truth, and Love, and through whom we can and do overcome all that is unlike God, good.

OUR PRIVILEGE AND DUTY.

MABELLE DENTON SMITH.

In the Church Manual, under "Extract from a letter in 'Miscellaneous Writings' by Mary Baker Eddy," we are told, relative to the rules and by-laws, that "they were not arbitrary opinions nor dictatorial demands, such as one person might impose on another. They were impelled by a power not one's own, were written at different dates, and as the occasion required." It is highly important, therefore, that all who wish to progress in the knowledge of Christian Science and do good healing work be thoroughly familiar with and imbibe the spirit of our by-laws. In Article VIII, Section 14, we are told: "It shall be the privilege and duty of every member, who can afford it, to subscribe for the periodicals which are the organs of this church." As we are obedient to this by-law it helps to destroy a sense of fear, of limitation, and it awakens thought to rely more wholly on God.

Possibly my experience along this line may be helpful to some who are laboring under a belief that they cannot afford to subscribe to the periodicals. I had been studying Christian Science a few months, had derived much benefit from it, and enjoyed reading the articles in the *Sentinel* and *Journal*. (These were loaned me by a friend, and occasionally I purchased a copy for myself.) One day, however, when a friend suggested that I subscribe for the *Sentinel*, I told her I did not feel I could afford it. Nothing more was said on the subject, but when I returned home I began to question the reply I had made, having at this time reached a point in Science where I knew it was absolutely necessary to be honest with myself as well as with others. I then realized that I was robbing myself, denying the power of God to meet my needs, and that my reply had not been an honest one, for I well knew that to subscribe for the *Sentinel* meant no real deprivation.

Along with the belief of financial lack came the argument that I did not have time to read these periodicals,—another phase of limitation. Again I questioned the trend of thought and decided that I could not afford to be without the periodicals. Heretofore much money had been spent on doctors, hospitals, and drug bills, and much time had been lost in sickness, to say nothing of the suffering. Christian Science was meeting my every need along these lines; the articles in the *Sentinel* and *Journal* had done much to uplift my thought, they had given me a clearer understanding of God; Truth was healing me, and was making me a happier and better woman. The result of this inward questioning was that I not only subscribed for the *Sentinel* and *Journal* for myself, but considered it a privilege to include a subscription to the *Sentinel* for a friend.

When the argument presents itself that we cannot afford

Digitized by Google

to subscribe to our periodicals, let us examine our thought carefully, let us compare our experiences before we knew of Science with our present condition, let us recall how we spent our money in past years, and the benefits actually received therefrom. If this investigation is an honest one, and we are sincere in our desire to progress in Science and to know more of God, I am sure the way will be provided for each to subscribe to at least one of our periodicals. Mrs. Eddy says (*Christian Science Journal*, September, 1898): "Rest assured that He in whom dwelleth all life, health, and holiness will supply all your needs according to His riches in glory."

GIVING NO OFFENSE.

NAPOLEON ROSS.

As the Christian Scientist studies the writings of St. Paul and reads the Biblical records of the apostle's steadfast devotion to the cause of Truth under conditions that to human sense were sometimes beyond endurance, he is drawn to that great exponent of righteousness, and learns to love him with the love that unites in the bonds of fellowship all those who work unselfishly to lessen evil in the world, whether in the past or at the present time. Paul proved by his works that he possessed the spirit of Christ Jesus' teachings in large measure. At the same time he insisted upon obedience to the letter and wasted no words in telling his followers their shortcomings and how to correct them. In this connection, it is interesting to note what he says in his second epistle to the Corinthians. There he writes as follows: "We then, as workers together with him, beseech you also that ye receive not the grace of God in vain. . . . Giving no offense in any thing, that the ministry be not blamed." He then, with rhetorical splendor, exhorts the Corinthians to measure their acts by the standard which he had given them, and thus to reflect only credit upon the cause for which the Master went to the cross, and for which Paul himself is said to have later suffered execution at the hands of the Romans.

The phrase quoted should be indelibly impressed upon the consciousness of every one identified in any way whatsoever with the Christian Science movement. The truth has always existed, but few have lived close enough to it to prove to the world that men can be pure, upright, unselfish, and free from the so-called law which says that they are subject to sin, disease, and death. Jesus said, "Ye are the salt of the earth: but if the salt have lost his savor, wherewith shall it be salted? it is thenceforth good for nothing, but to be cast out, and to be trodden under foot of men." We cannot afford to deviate a hair's breadth from the fine high standard established by him who spoke and acted as none had ever done before. If we are tempted to indulge in habits that are not salutary, in frivolity, in idle gossip, in questionable business transactions; in fact, if we are doing anything that is open to criticism, we owe it to our cause and to her who founded it to "touch not the unclean thing," but to come out and be separate. We should be willing to do this, if not for our own sakes, then for the sake of those who would be freed from care and suffering, that they may know there is indeed a divine Principle, by living in accordance with which men can attain to a free and happy life.

In her wonderful chapter on Prayer, every line of which pulsates with divine Truth and Love, Mrs. Eddy says: "The Divine Being must be reflected by man,—else man is not the image and likeness of the patient, tender, and true, the One 'altogether lovely;' but to understand God is the work of eternity, and demands absolute consecration of thought, energy, and desire" (Science and Health, p. 3). The world knows that our beloved Leader and the cause which she founded stands for something higher and purer than most people are willing to accept; hence it expects more and insists upon more from Christian Scientists than it does from others. Naturally enough, outsiders judge Christian Science by Christian Scientists. They watch us in our every movement, and we must therefore have the standard of "the high calling of God" always before us, and so live that our lives will be above criticism, "giving no offense in any thing, that the ministry [our cause] be not blamed."

"COME AND SEE."

C. W. HASKINS.

THE above laconic expression was the reply of our Master to the inquiry of his two disciples, "Where dwellest thou?" as recorded in the first chapter of John's gospel. We are not told where his dwelling-place was, only that his disciples "went and saw" where he dwelt, and abode with him the remainder of that day. In seeking Christian Science we must respond to the same simple but kindly invitation, "Come and see,"—see if it is not the one thing needful to our happiness and prosperity, see if it will not help us in every way.

The writer well remembers his first talk with a Christian Scientist who with his family had just removed to our village from South Dakota, and were being pointed out as nice people who held peculiar religious views. To the inquiries, "Are your people Christian Scientists?" and, "Do they give treatment?" he replied in the affirmative, but to the question, "Of what do the treatments consist?" he said, "Come and see. Come to my house next Wednesday evening, and we will try to explain some of the fundamental teachings of Christian Science." A promise was given to do so, but during the intervening days much speculation was indulged in as to the course pursued in the healing of disease.

True to my promise, however, I was on hand at the appointed hour, and like so many others I found the service very different from what was anticipated. This was also true of the individual experiences and demonstrations of healing which were related. The latter did not at once appeal to me, for although given with the utmost sincerity the impression prevailed that they emanated from a too sanguine temperament, or perhaps from visionary ideas, owing to overwrought nerves. Moreover, who had ever heard of the healing of disease without the help of *materia medica*, since the early years of the Christian era?

However, the Bible reading had been happily chosen, and the selections from Science and Health were so apt, that my veneration for God—so long dormant, owing to a misconception of Him, from a too vigorous puritanical training—was revived, and I wanted to know more of the teachings of a God who is Love and not endowed with the propensities of hate and revenge. I had gone to that service with a desire for physical healing uppermost in my mind, but I came away rejoicing in the new conception of an all-wise loving Father, whose ultimatum to His children did not culminate in endless punishment for doing things that He had made it not only possible but probable that they would do. It was not an excited fleeting impulse that possessed me, but a philosophy worthy of investigation and demonstration, a science to be known.

Christian Science always holds out the same loving invitation to all inquirers, "Come and see," and it emulates the hospitality of him who "spake as never man spake," and who made it enjoyable for his guests to abide under his roof.

Be a little child! Begin today,
Trust thy Father's love; this the way.
Heaven's sweetest joy is surely thine
When thou'rt become a child divine.

ELIZABETH MALLORY.

SELECTED ARTICLES.

[From *Cannon Falls* (Minn.) *Beacon.*]

The *Beacon* is in receipt of a handsomely bound little volume containing editorials gathered from the press of the world touching the life and work of Mrs. Mary Baker Eddy. Judging from the tone of these comments, the attacks to which she was subjected during the last years of her busy and useful life but served to strengthen her in the esteem and veneration of the press. So far as we have reviewed the book, but one or two of the extracts give any evidence of having been written by the followers of Mrs. Eddy among the editorial writers of the country; the work evidently having been edited with a view to showing the appreciation in which this venerable writer, teacher, and Leader was held by the press aside from her followers. From this viewpoint it is truly a remarkable collection, and one we believe to be fully deserved by the Founder of Christian Science.

[H. L. Conger in *Wisconsin Journal of Education.*]

My attention has been called to the article in your June issue, entitled, "A Monumental Blunder," in which you credit the defeat of the "Medical Inspection Bill for School Children" to the "adherents of the Christian Science faith."

In the interest of pure facts we would say, that from the time this bill was introduced up to the committee hearing, the fight was made by the National League for Medical Freedom. A great many Christian Scientists, as individuals, are members of this league. Its membership, however, includes followers of osteopathy (the chairman of the state committee being a prominent practitioner of the school, living in Milwaukee), the Eclectic Society, and other schools of medicine and healing. The league is much broader than the Christian Science movement, and will eventually include all those who favor individual choice of medicine or medical freedom.

Nobody is opposed to Christian Science, though many are opposed to what they think it is. As a matter of fact Christian Scientists recognize the existence of disease in human experience, and call it by the same name that is employed by others, although they differ from some as to its nature and needful remedy. The bill was no more objectionable to Christian Scientists than to the general public, who recognized in it the effort to curtail individual privilege. Now let us remove all bias or prejudice for a moment and consider some of the opinions of physicians regarding *materia medica;* then perhaps we can decide as to the efficacious results of a compulsory medical inspection bill proposed by one school of medicine.

Dr. R. M. Davis, of Chicago, once said: "I have practised medicine in this city for thirty years, and I state to you that I have no confidence in it. No man can tell when he gives a drug whether it will bring relief to the sufferer or hasten his death. I regret that I have practised medicine, when nine times out of ten our miscalled remedies are absolutely injurious to our patients, suffering from diseases of whose real character and real cause we are absolutely ignorant."

Prof. A. H. Stevens of New York College of Physicians and Surgeons says: "The older physicians grow, and the more attention they give to the subject of *materia medica,* the more skeptical they become of the virtues of medicine, and the more they are disposed to trust to the power of nature."

C. F. Shoemaker, president of the Philadelphia Drug Exchange, said to the House committee on municipal affairs at Harrisburg, Pa., four months ago: "Now it makes no difference, or not very much difference, what a manufacturer puts in a patent medicine, because, after all, the efficacy of medicine depends upon faith, inflated by imagination, or publicity made efficient by faith."

From the above do you not think the committee wise in their action? On the other hand, Christian Scientists believe and have proven that prayer is more potent than pills; and they have divine authority for so doing. In Mark xi, 24 we read: "Therefore I say unto you, What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them." A large part of Christian Science work is protective work, and the Christian Science children are not afraid of "the pestilence that walketh in darkness; nor . . . the destruction that wasteth at noonday;" and this same protection is for anybody who wants it; it is free.

Christian Scientists are daily overcoming disease in themselves and others. The credit for this overcoming they give to God. With heartfelt gratitude and joy they echo the words of David: "Bless the Lord, O my soul: and all that is within me, bless his holy name. Bless the Lord, O my soul, and forget not all his benefits: who forgiveth all thine iniquities; who healeth all thy diseases." While they are loath to force their views and beliefs on others, they are sometimes obliged to take a stand to support the opposition to unjust medical tyranny. They would not deprive any school child of its medicine, would not prevent his examination by any doctor, but do protest most vigorously to being compelled by law to submit themselves (or families) to compulsory medical examination by any physician not of their own choice.

When the public thought is educated up to this standard, and our public schools, boards of education, and legislatures pay more attention to God and less to man, give more thought to ease and less to disease, no drastic medical bills will be needed, for diseases of all kinds will be nipped in the bud by using the preventive before the curative stage is reached.

[D. M. Ely in *Mt. Vernon* (O.) *Republican-News.*]

The healing power of Christian Science is definitely defined in the first paragraph of the opening chapter of the text-book of Christian Science, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, as follows: "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God,—a spiritual understanding of Him, an unselfed love." That the healing of the sick through the prayer of the righteous was confined to any particular time or to any chosen few, is not substantiated by Bible records or by the teachings of Jesus. Both before and after the Christian era we have records of the sick being healed through an understanding of God's law. Many instances of the healing of the sick and the raising of the dead by the prophets are chronicled in the Old Testament.

In Luke's gospel is recorded the sending forth of not only the twelve, but also of the seventy, who returned again with joy, saying, "Lord, even the devils are subject unto us through thy name." It is also related in the book of Acts that Paul, who was converted to Christianity after the crucifixion of Jesus, cured various diseases, insanity included, during his ministry in Asia, and raised the young man Eutychus who fell from the third loft and was taken up dead. Paul also proved the viper to be harmless and healed the father of Publius, who was stricken with the bloody flux; and not only do the Scriptures record "signs following," but in Gibbon's "Decline and Fall of the Roman Empire" we find that for some hundred years the early church fathers healed the sick through prayer.

What words in the Bible are more explicit than these from Mark's gospel, in which the Master gives his final injunction just before his ascension: "And he said unto them, Go ye into all the world, and preach the gospel to

Digitized by Google

every creature. . . . And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." Christian Science is proving that God is the same today, tomorrow, and forever; and that the signs do follow now as aforetime is testified to by thousands who have been healed from sickness and sin.

Mrs. Eddy says in "Miscellaneous Writings" (p. 195): "It has been said that the New Testament does not authorize us to expect the ministry of healing at this period.

"We ask what is the authority for such a conclusion, the premises whereof are not to be found in the Scriptures. . . . 'He that believeth on me, the works that I do shall he do also.' That perfect syllogism of Jesus has but one correct premise and conclusion, and it cannot fall to the ground beneath the stroke of unskilled swordsmen. He who never unsheathed his blade to try the edge of truth in Christian Science, is unequal to the conflict and unfit to judge in the case: the shepherd's sling would slay this Goliath. I once believed that the practice and teachings of Jesus relative to healing the sick, were spiritual abstractions, impractical and impossible to us; but deed, not creed, and practice more than theory, have given me a higher sense of Christianity."

[A. W. Mainland in *Leader*, Regina, Sask.]

An issue of recent date contains excerpts from a sermon in which the clergyman makes statements in regard to Christian Science that are misleading. We appreciate his kindly references to Mrs. Eddy's work in emphasizing the teaching that "God is Love" and the need of faith.

Christian Science does not teach that strychnine could be given to any one without injury. It not only does not endorse the use of poisons in any way, but claims that poison should not be used at all for healing purposes. It is true that Christian Science teaches that a correct understanding of God will enable one who has taken poison by mistake to overcome the effects of it. In doing this they are only fulfilling Jesus' statement in regard to "them that believe," that "if they drink any deadly thing, it shall not hurt them."

Mrs. Eddy does not claim that in this age it is possible for any one to overcome death. In "Unity of Good" (p. 43) she says: "This generation seems too material for any strong demonstration over death. . . . I have by no means spoken of myself, I *cannot* speak of myself as 'sufficient for these things.'" Jesus said: "If a man keep my saying, he shall never see death." The practice of Christian Science is as yet in its infancy. It cannot reasonably be expected that those who profess to follow it can obtain results in the beginning of their study which are really the ultimate of the teachings of Christianity. Paul said, "The last enemy that shall be destroyed is death."

It is not claimed for Christian Scientists that they are able to heal every case of disease that comes for treatment. A preacher of the gospel devotes his time and energies to converting sinners, yet it would not be just to criticize him because every one who listens to his appeal for better living does not become obedient to the message of Truth. Perfect results have not as yet come from any phase of human endeavor. For any one to wait to attain perfection before attempting to bring out good results would greatly limit the achievement of good. It is only through the constant practice of any science that it is possible to grow into a more perfect understanding of it. Every one who puts forth an honest effort to do good and relieve the sufferings of mankind should be encouraged.

One of the reasons why Christian Science is misunderstood is because of a lack of understanding of its terminology. Mrs. Eddy has taken the same liberty as writers on other scientific subjects, and uses certain words in a definite, technical sense. She uses the word "real" as synonymous with that which is eternal and indestructible. It is in this sense that she speaks of life as "real," and its opposite, disease and death, as "unreal," or something that can be overcome and destroyed.

It is entirely erroneous to state that Christian Science has anything in common with hypnotism. It heals not through the suggestive action of the human mind, but through a recognition of the ever-presence of God and His loving care for His children.

[Royal D. Stearns in *State Journal*, Lincoln, Neb.]

In a recent issue of the *State Journal* a statement was published from the city of Lincoln board of health relating to Christian Science which is somewhat misleading. If *materia medica* always healed, there might be some reason in all accepting its ministrations in case of sickness or ailments of any kind, but in view of the relative success and failure of medical practice and Christian Science practice, Christian Scientists are fully justified in relying upon Christian Science for their health. *Materia medica* has not proved its case through the thousands of years since its first appearance in Egypt and China down to the present day. In spite of the great labor expended, the sacrifices made, and the never ending experiments undertaken, sickness has not only not been banished from the world at large, but the number of cases has constantly increased.

Such is the condition of affairs in the world today, to which Christian Science comes as a liberator from the bondage of unsuccessful conservatism. It brings an explanation of the nature of disease which proves itself to be correct by the multitudes of its cures. Moreover, when the explanation given by Christian Science is found to be more in keeping with the teachings of the world's great philosophers than with the unstable popular assumptions of the hour, the public should not fear to alter its preconceived views to meet the demand of progress.

Christian Scientists are law-abiding citizens, and carefully observe quarantine regulations; at the same time they wish to keep abreast of the times, and they claim the right of pointing out the instability and shifting nature of some theories imposed on the public in regard to the healing of the sick. Christian Scientists are not engaged in opposing any means which may be used for alleviating suffering and restoring the sick; they have found a method which experience has proved to be abundantly helpful in time of need. They only ask fair-minded people to test for themselves the efficacy of what they have found so beneficial. Christians are also reminded that Jesus never made any distinction between organic and functional diseases, nor advised his followers to do so, but a careful analysis of his cures will reveal many startling instances of his successful instantaneous healing of all forms of ailments without the use of material remedies. Christian Scientists would not consider themselves worthy followers of the great Master if they should yield their inalienable right to follow in his footsteps.

[Edward W. Dickey in *San Bernardino* (Cal.) *Index*.]

In a late issue there appears a discussion of hypnotism in which the writer expresses it as his opinion that Christian Science practice is the "laws of hypnotism under popular dress." This is so emphatic a misconception of Christian Science practice that it needs unqualified refutation. In speaking of the nature of Christian Science practice, Mrs. Eddy writes on page 104 of her book "Science and Health with Key to the Scriptures" as follows: "The medicine of Science is divine Mind; and dishonesty, sensuality, falsehood, revenge, malice, are animal propensities and by no means the mental qualities which heal the sick. The hypnotizer employs one error to destroy another. If he

Digitized by Google

heals sickness through a belief, and a belief originally caused the sickness, it is a case of the greater error overcoming the lesser. This greater error thereafter occupies the ground, leaving the case worse than before it was grasped by the stronger error."

Hypnotism always involves control or domination; it can be practised in no other way, and is bound sooner or later to sap the mental integrity of its victim. It is gratifying, therefore, to see public attention called to this evil in order that all may protect themselves from it. It is strange that one who condemns hypnotism as villainous should recommend it as a remedy for anything. We cannot hope to "gather grapes of thorns, or figs of thistles," nor is it possible for the same fountain to "send forth at the same place sweet water and bitter." It follows, then, that a mental practice which is susceptible of wrong use should have no use nor be given any expression whatever.

Christian Science practice is based upon an understanding of the power and presence of God as the one infinite, divine Mind. The student is ever conscious in his practice of the words of the Master, "I can of mine own self do nothing." He realizes with the Master that "my Father worketh hitherto" and that "he doeth the works." This scientific treatment or prayer benefits both practitioner and patient, and elevates him morally as well as physically. Furthermore, it equips him with an understanding of God that enables him to forestall and destroy all despotic action of the human or mortal mind. The problem of hypnotism is one "not lending itself to easy solution," and we should be ever watchful of our trust in God as our sole protector and preserver.

Christian Science is freeing multitudes from evil influences, including those dark and devious ways of what Paul so aptly named the "carnal mind," which robs and slays unseen and which does its work so subtilely that it is scarcely perceived. This Science is rapidly dispelling the apathy and indolence toward all hidden forms of evil which must be grappled with and destroyed before humanity gains its full measure of freedom.

[H. Farmer Hall in *Brighton* (Eng.) *Gazette.*]

The pamphlet attacking Christian Science, as noticed in a recent issue, contains apparently serious accusations to any one unacquainted with the teachings of Christian Science. But does our critic really think that the hundreds of thousands of intelligent men and women who accept the teachings of Christian Science, have done so on the frail and silly basis that he attributes to them? Is it not more likely that our critic has himself failed to perceive that which has attracted so many others? It would appear so, after one has read the little pamphlet comprising his three sermons, literally filled with false charges, misrepresentations, and misconceptions of Christian Science. Of course, when our critic speaks of Christian Science as a heresy, it is well to remember that past history teaches us that the heresy of today is often the accepted belief of tomorrow; and even at this hour a Church of England minister is not free from the charge of heresy in the eyes of those who do not hold the same view with regard to Bible teachings as he does.

At the end of this pamphlet there is, I see, an account of an inquest held upon a certain lady, whose case was pronounced hopeless by the medical fraternity, who died though she had received help from a Christian Science practitioner. Does the public realize, I wonder, that never a case dies under Christian Science treatment, but that it is immediately brought into the coroner's court? When one considers the admittedly large number who are turning to Christian Science for physical relief, of which a very considerable percentage are cases previously given up as hopeless by the doctors, is it not a wonderful testimony to the success of Christian Science methods that there are so few inquests? For forty years Christian Science has been criticized and condemned; but the world is changing its views, and many who in the past have failed to consider the subject from an unprejudiced standpoint are now awaking to receive gladly the message that Mrs. Eddy has delivered to this age.

It is, of course, impossible to attempt any detailed reply to the clergyman's pamphlet in the space that a letter permits. Any who desire to study the subject, however, should go for information to the text-book itself ("Science and Health with Key to the Scriptures" by Mrs. Eddy), rather than lean upon the doubtful statements contained in pamphlets and books, written from various motives, all with the object of discrediting Christian Science and Christian Scientists.

[Alfred Farlow in *Springfield* (Mass.) *Union.*]

A clergyman is reported as having spoken disparagingly of those religionists who advocate the possibility of healing the sick through divine power, as distinctive from the employment of material means. He declares that "the world will laugh in scorn at Christianity unless such things are stopped."

What does the gentleman propose to do with the Scriptural teachings on this subject? Jesus and his apostles healed through divine power alone. Shall we look back with derision and scorn upon their methods? The Master of Christianity declared, "He that believeth on me, the works that I do shall he do also;" and he commanded his disciples to "preach the gospel" and to "heal the sick, cleanse the lepers, raise the dead, cast out devils." The Scriptures everywhere indicate that the pure gospel of truth is a healing gospel. Has Christianity changed its form? It is our understanding that the Master's instructions to his disciples hold good for all time.

One may be a Christian to a certain extent without being able to do all that the Master did, but according to his teaching one is not a Christian to a full and sufficient sense except he attains to that understanding of spirituality which enables him to be followed by the same results that attended the Master's efforts.

[From *Utica* (N. Y.) *Press.*]

People do not care to hear about your aches and pains, and are usually anxious to occupy the time telling about their own. All think that their troubles are greater than those of any one else, and there are precious few willing to obey the injunction which says: "Count your blessings." Of course pretty much everybody has more blessings than trouble, if they were only willing to look at it in that way, and troubles have a habit of growing with every narration, when as a matter of fact the sensible application of the teachings of Christian Science will pretty surely lessen and perhaps remove them altogether. Troubles are magnified by thinking about them and multiplied by talking about them.

I pray not for a day of rest,
But long Thy will to do
In quiet way;
I only crave Thy sanction blest
In all I strive to woo
This God-giv'n day.

It matters not the praise of men,
For what the world doth say
Is vague and chill;
I only long to know that when
Twilight enwraps the day
I've done Thy will.

JENNY A. PAMPERIN.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

THE GOOD OF THE CAUSE.

WITHIN the next few months, in many of the branch churches, there will be occasion for members to give earnest consideration to the selection of their church officers for the ensuing year, and in some cases they are even now looking about them for available material. That there is in general an earnest, honest desire in all things to act in conformity to the teachings of divine Science, is evidenced by the numerous letters of inquiry bearing on this subject, in its various phases, that have been received at headquarters.

It was, therefore, with a view to eliminating some of the would-be complications through the light thrown upon them by our Leader's clear statements, that her interpretation of the phrase "rotation in office" was republished in the *Sentinel* for Oct. 14, and "Words for the Wise" and "Afterglow" in the *Sentinel* for Oct. 21. Our Leader has also given us a by-law which is of special importance in its pertinence to the question in hand. Between this date and the date at which most of these elections will be held, the by-law entitled "A Rule for Motives and Acts" (Article VIII, Section 1, Manual of The Mother Church), will have been read three times at the church services. There are many who will intuitively see the application of this by-law to the election of officers, while others may not, without their attention being called to it. Experience has shown, however, that on no other occasion are Christian Scientists so liable to be tempted to indulge "animosity" or "mere personal attachment" (Manual, p. 40) as they are at these elections.

There is no valid reason why every member of a branch church who is interested in its welfare and that of the cause at large, should not be so well posted about the qualifications of his fellow members for the duties of the various offices, that he can vote intelligently; and in fact it is his duty to post himself for this very purpose. Beyond all this, however, it is his further duty to make this important function of his church-membership a matter of prayer and demonstration, and unless this duty is conscientiously performed there is little hope of securing the best results. The entire teaching of Christian Science is against "personal domination," and the wide-awake Christian Scientist is at all times on guard against "influencing or being influenced erroneously" (Manual, p. 40). As a rule the Manual contains some provision which either directly or indirectly has a bearing on any question which may arise in the conduct of church affairs, and every member of the church should be so familiar with the Manual, through prayerful study of its letter and spirit, that such problems can be intelligently and promptly dealt with.

The deciding factor in all these questions should be the good of the cause. Thoughts of self-seeking, gratification of personal ambition, desire for place and power, domination of wealth or social position,—all these are as nothing when weighed in the balance against whole-hearted, loyal service for the upbuilding of the cause so dear to every true Christian Scientist that all else must needs be subservient to its interests.

In one of her messages, our Leader gives us this inspiring thought: "To live and let live, without clamor for distinction or recognition; to wait on divine Love; to write truth first on the tablet of one's own heart,—this is the sanity and perfection of living, and my human ideal" (Messages to The Mother Church, p. 76). Like St. Paul, our Leader counted the world with its fleeting show well lost if thereby the cause of Christ were forwarded, and we shall do well if in our daily living and in our relations to the church and to the cause we are actuated and guided by the same high purpose.

ARCHIBALD MCLELLAN.

THE MORE ABUNDANT LIFE.

READERS of the text-book of Christian Science wonder sometimes why its author should have laid such stress upon the teaching that there is no life in matter, but those who have come to realize how this mortal belief wields its debasing influence in every realm of thought, have no trouble in discerning the sufficient reason for her reiterations. Multitudes of intelligent people still think of Spirit, God, as having been expressed or embodied in Spirit's opposite—Truth in error, perfection in imperfection, light in darkness! and the rule of this belief explains that tragic human struggle which has been as persistent as history.

Thus associated in thought with the things which are transitory and unideal, human life becomes identified with their fate, the sport of non-intelligence, dawning in mystery and dying in the dark! St. Paul crowds the annals of this mortal sense into a single trenchant phrase when he says, "In Adam all die;" and it was in compassionate regard for the victims of its sway that Christ Jesus made his supreme statement, "I am come that they might have life, and that they might have it more abundantly." How sadly do men need now, as in the early days of Christianity, to enlarge their thought of life and to separate it forever from dependence upon matter. The attainment of a larger life imperatively demands first the attainment of a nobler sense of life.

In the symbolism of the Old Testament life is often referred to as a pure river of water, and St. John speaks of it as proceeding out of the throne of God." Thought is thus directed to God as the immediate source of all being and all good, and this is the sufficient explanation both why and how Christian Science brings health and happiness to men. It teaches us that Mind and Life are one, and a right sense of the abundance of our possible life will therefore be gained as we acquire the habit of thinking of it as the manifestation of this infinite intelligence. Thought begins to move in a larger curve when we remember that intelligence is always expressed in action. We can no more conceive of an inactive mind than of a dead life. "Mind produces all action;" "We tread on forces. Withdraw them, and creation must collapse. Human knowledge calls them forces of matter; but divine Science declares that they belong wholly to divine Mind" (Science and Health, pp. 419, 124).

These words of Mrs. Eddy give a new significance to the psalmist's exclamation, "When I consider thy heavens . . . the moon and the stars, which thou hast ordained." God's creation is recognized as the going forth of Life, the expression of the behest of infinite intelligence at every point, so that materiality and decay are wholly excluded from the domain of reality. All truth-seeking men today, including those who are peering into the realm of the telescope and of the microscope, as well as those who are seeking to find God in the revelations of the inner life, are being moved by the sweep and sublimity of this concept of the allness of Mind, the vastness of that Life whose wealth of resources and of power are available to man; and when in his apprehension of the truth of being one is able to say "God is my Life," he has laid hold of that abundance which constitutes the riches of his inheritance in Christ. He has begun to define and demonstrate the "life eternal" which Jesus identified as the consciousness of God. How fitting are the poet's words:

O, then, give thanks to God on high,
Who life to all is giving;
The hosts of death before Him fly,
In Him we all are living.

JOHN B. WILLIS.

Digitized by Google

SCIENCE VS. SUPERSTITION.

DURING the last half century a great change has come over the world's thought, a scientific view of things having to a large extent done away with superstition as it was linked to beliefs concerning God, man, and the universe. There is, however, no denying the fact that the attitude of physical science toward religion has been mainly destructive,—that it has done little or nothing to reveal the truth which religion ought to teach, but which has unfortunately been obscured by the acceptance of superstition and mere belief about God and man. On the other hand, Christian Science approaches the entire Bible with reverence, and while discarding superstition affirms that "Truth spares all that is true" (Science and Health, p. 474). Thus we learn how we may find all through the Scriptures the needed inspiration, "reproof," "correction," and "instruction in righteousness."

Physical science on the other hand by no means "spares all that is true." In attacking some of the grosser forms of superstition, which are themselves an outgrowth of material belief, it does not seek to discover the spiritual facts which they counterfeit, but with destructive criticism denies *in toto* the spiritual idea which points to Life as God. Thus we have from physical science a denial of the healing works of Christ Jesus, and from many of its supporters a denial of Jesus' resurrection and ascension, which our revered Leader characterizes in Science and Health as "his mighty, crowning, unparalleled, and triumphant exit from the flesh" (p. 117). The advocates of material science take the position that as the miracles are outside of material law, they have no relation to science, and so Christian people must either disbelieve them or think of them with superstitious reverence. The latter alternative of course denies to them the privilege of attempting to repeat the Master's works, although he expressly commanded his followers to do this very thing. Christian Science declares that the so-called miracles of Christ Jesus were a manifestation of divine Principle and spiritual law, and as such may be demonstrated by any one who has the requisite understanding. This demonstration is based upon Science, and is entirely separate from superstition of any sort.

In attempting to get rid of superstition, many professed Christians have ceased to believe in the ministry of angels as having any relation to the present time at least, yet in almost every great event recorded in the Bible they have an important place. Throughout the whole earthly life of our Lord, from the annunciation of his birth up to the guardianship of his tomb, we are told of their presence. After the temptation in the wilderness they "ministered unto him," and Luke tells us that in his momentous struggle in Gethsemane an angel came and strengthened him. As we follow the history of the early church, as recorded in Acts, we find many instances of deliverance wrought through angel visitants, and in Revelation their agency in human affairs appears to be perpetual.

As we read the definition of angels, given in Science and Health (p. 581), thought is lifted above the darkness of superstition into the clear light of spiritual Truth. It reads: "Angels. God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." Is it any wonder that "these angels deliver us from the depths" (p. 567)? Again we are told that "angels abound in the spiritual atmosphere of Mind, and consequently reproduce their own characteristics" (p. 512). We read in Acts that when Stephen was undergoing martyrdom his face was like the face of an angel, and as we heed the divine messages which surely come to us in every hour of need, we shall by entertaining angels be delivered from the bondage of superstition, of fear, of disease and sin, and strengthened as was our Master for complete and final victory.

ANNIE M. KNOTT.

AMONG THE CHURCHES.

BOSTON, MASS.

The First Church of Christ, Scientist. Services: 10:45 a.m., 7:30 p.m.; Sunday school, 10:45 a.m.; Wednesday, 7:30 p.m. In the new church edifice, Norway, Falmouth, and St. Paul streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading Rooms: Berkeley building (suite 306-307), 420 Boylston street; open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company building (second floor), southwest corner Devonshire and Milk streets, opposite Post Office; open daily, except Sunday, from 9 a.m. to 5:30 p.m.

POCATELLO, IDAHO.

The latter part of July we decided that we should have to find another building in which to hold our services. As we could not find a desirable place, we decided to make our demonstration and erect a building that would meet our need for a few years on the lots we had purchased last spring. We had plans drawn for a structure twenty-four by forty feet. Work was begun Aug. 12, and on Sept. 3 we held our first service in it. The building and furnishing has cost fifteen hundred dollars, and we are very grateful that we have a home of our own in which to worship.

Correspondence.

RUTLAND, VT.

First Church of Christ, Scientist, held the first service in their new church on Cottage street Sunday, Oct. 1. There was no special opening service, the regular Lesson-Sermon being followed in its usual order. The architecture of the church, which is colonial with four Doric columns in front, is particularly attractive, owing to its simplicity and the absence of ostentatious ornamentation. The color of the exterior of the edifice is white with a slate-colored dome; the interior is done in cream and white. The main audience-room, twenty-eight by forty-five feet, is capable of seating two hundred people. The location of the church is excellent, being in the residential section but very convenient to the business center of the city and easily accessible to all car lines.

From a handful of worshipers, meeting here and there in rooms and small halls, the growth in the past thirteen years has been slow but steady, and the members are all most happy in the possession at last of a church home of their own.—*Correspondence.*

LINCOLN, NEB.

At half past six this morning [Oct. 6], in the presence of the building committee and official boards of First Church of Christ, Scientist, the corner-stone (of Concord granite) of the new church edifice, on the corner of Twelfth and L streets, will be laid.

On Oct. 10, 1902, in response to an invitation extended to the Christian Scientists of Lincoln and vicinity, to meet for the purpose of organizing a Church of Christ, Scientist, about one hundred and twenty-five persons assembled in the hall in the Farmers' and Merchants' building and proceeded to organize First Church of Christ, Scientist, of Lincoln, Nebraska, to take the place of and supersede First and Second churches that had previously existed. At this meeting articles of incorporation and by-laws were adopted. The membership book was opened to receive the names of those who desired to enroll themselves as charter members. The book was allowed to remain open for thirty days, and

Digitized by Google

all who availed themselves of the opportunity during that time were counted as charter members. At the close of the period one hundred and thirty-three persons had signed the book.

The hall in the fraternity building was leased for the services of the church, and the congregations for the first few months averaged between three hundred and four hundred. The attendance steadily increased, and it was soon seen that more commodious quarters would be needed, and the question of building a church began to be agitated. About seven hundred dollars had been paid into the treasury as a nucleus for a building fund at the time of the organization of the church. At the annual meeting on Oct. 9, 1903, a building committee of five members was elected. The committee decided on two lots, corner of Twelfth and L streets, on March 14, 1904. There was at that time about two thousand two hundred dollars in the building fund. The price of the lots was seven thousand dollars and the committee agreed to pay three thousand five hundred dollars, one half of the purchase price, in twenty days from the time of the purchase, March 14. A meeting of the church was called and a statement of the transaction made to the members, showing them that it would be necessary to have twelve hundred dollars more in twenty days. At the close of the twenty days five thousand dollars was paid on the purchase price, instead of three thousand five hundred dollars, and within a reasonably short time the balance was paid. Work was then started on a fund to build the church, but shortly afterward the building of the extension of The Mother Church in Boston was undertaken, and the work of raising a building fund for this church was suspended in order that aid might be more freely given to The Mother Church.

Plans for a church building to cost between sixty-five thousand and seventy-five thousand dollars had been adopted, but as the church was not yet ready to undertake so extensive a work, the plan was presented of building that part of the structure which would eventually be used for a Sunday school room, to be used for holding services until the main part of the building could be undertaken. On Feb. 21, 1907, a contract was signed for the erection of this first structure, and on Thanksgiving day of the same year the first service was held in the church, and was the occasion of much rejoicing. In the spring of 1908 it was decided to put in the stone foundation for the balance of the structure, and this was completed about the first of July, the total cost, including lots, up to this time being thirty-six thousand eight hundred and eighty-eight dollars. No further building operations were undertaken, but the work of accumulating a fund of sufficient proportions to warrant a movement looking to the completion of the balance of the structure, was continued. At the semiannual meeting held July 6, 1911, the church ratified the action of the building committee in letting a contract for the completion of the church for the sum of fifty-four thousand four hundred dollars.

The church building when completed will be a two-story brick and stone structure, built fireproof up to the second floor, and will cost, including the site and furnishings, not far from one hundred thousand dollars. It is about ninety by one hundred and twenty feet on the ground and will be fifty-four feet from the grade line to the peak of the roof. The first floor will contain the Sunday school room—the room now occupied for church services—surrounded on three sides by a foyer. The main auditorium will occupy the entire second floor, and will be arranged to seat one thousand persons. There will be no galleries. The exterior is of light pressed brick with Bedford stone trimmings. The walls are now completed up to the second floor, and the steel work is in place. It is expected to have the building enclosed and under roof by Jan. 1, 1912.

Nebraska State Journal.

THE LECTURES.

SAN FRANCISCO, CAL.

"Christian Science: The New Light upon Old Truths," was the subject of a lecture delivered in Pavilion Rink yesterday afternoon [Sept. 17] by William R. Rathvon. He was introduced by Mrs. Fred Breyman, second reader in First Church of Christ, Scientist, in this city, who said:—

If I were asked what convinces people that Christian Science is the truth, my reply would be that its teachings and its works furnish proof that it is the fulfilment of the promises of God, who says: "Unto you that fear my name shall the Sun of righteousness arise with healing in his wings;" and I stand before you this afternoon a witness to God's promises fulfilled through Christian Science. Christian Science is practical, demonstrable truth, and every one who so desires can prove this for himself. Jesus healed the multitudes of all manner of diseases. He did this in accordance with a law which he understood. This law is available today, and is in a large measure accepted and demonstrated by thousands, through the understanding of Christian Science.—*San Francisco Examiner.*

VIRDEN, MAN.

A lecture on Christian Science was delivered in the Lyric Theater on Monday evening, Sept. 25, by Judge Clifford P. Smith. The speaker was introduced by Charles K. Newcombe, inspector of collegiates for Manitoba, who said in part,—

We have just come through a bitter political contest, and it is good that we can now come together for that which we can all unite in; namely, the pursuit of truth. You may remember the words of that good old doctor of divinity, Gamaliel, who, when the ministers of the gospel were brought up to have punishment meted out to them, said in effect that if the gospel these men preached was the truth it was impossible to overthrow it, and if it was error it would fall of itself. Now, I know nothing at all of Christian Science, but during the last two years my daily duties have brought me into close contact with several people who are adherents of this faith; and I have been impressed with the fact that they have some hidden source of strength which enables them to meet the problems of life with courage and equanimity. I am very glad to be here tonight to listen to an explanation of this teaching.

Empire-Advance.

KANSAS CITY, MO.

Prof. Hermann S. Hering lectured in Convention Hall Sunday afternoon [Oct. 1] upon Christian Science. In spite of the inclement weather his audience numbered six thousand people. The lecture was given under the auspices of the Christian Science churches of Kansas City, and the speaker was introduced by Dr. J. M. Tutt, reader in First Church of Christ, Scientist, Ninth street and Forest avenue, who said in part,—

In the year 1875 the Rev. Mary Baker Eddy, the Discoverer and Founder of Christian Science, gave to the world the text-book, "Science and Health with Key to the Scriptures." The divine mission of the book was promptly revealed by the wondrous changes its study wrought in the lives and bodies of those who sought within its pages the truth. To be understood is heaven's greatest boon. It lightens the burden and brightens the path to many a weary and aching heart. In his great longing to be understood Jesus asked of his disciples: "Whom do men say that I, the Son of man, am?" The reply revealed the world's gross misunderstanding of Jesus and his mission. Yet—according to his teaching—to know the Christ and the Father who sent him was the very essence of eternal life.

BELLINGHAM, WASH.

Frank H. Leonard delivered a lecture on Christian Science in Central Hall Sept. 21. He was introduced by Attorney W. J. Biggar, who said:—

In the second scene of the fourth act of that marvelous and beautiful play, "Twelfth Night," there is one of the greatest declarations in the literature of the world. It is this: "There is no darkness but ignorance." This sentence is something more than an expression of poetical sentiment; it is also a statement of scientific truth, for if the history of the human race teaches one thing more than another, it is that most of the woes, troubles, sufferings, sorrows, and wrongs of humanity have been largely due to the failure, inability, or neglect of man to understand correctly the conditions of the seeming limitations with which he is surrounded, or to comprehend his power to overcome them. We know that just in proportion as the human race has been able by means of intelligence to emancipate itself from fear, which has been correctly called "the jailer of the mind," has it become really free. Any creed, sect, or belief, therefore, whose cardinal purpose is the liberation of the mind from the Bastile of fear and the destruction of superstition, by pointing out how man, who was made in the image of God, can successfully overcome the seeming troubles and limitations which beset him, merits the careful and thoughtful consideration of all.

Personally I know but little of Christian Science, but I understand that it teaches that God is good; that all of His work, including man, is good, and that the prevailing force in His universe is love. It teaches that what we call sickness, disease, trouble, and sorrow have no place in God's universe, and that they are all errors due to wrong thinking and an erroneous conception of the relation of God to His universe and of man to his God. Christian Science, I apprehend, is endeavoring to realize in the everyday life and activities of mankind the great truth uttered by Jesus Christ when he declared that "the kingdom of God is within you." Surely, then, no one should condemn or criticize its teachings without investigating them. All of us should hear before deciding, and it is for this purpose that we have come here tonight, in order that we may get more light on this important subject.—*Correspondence.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Allegan, Mich.—Hon Clarence A. Buskirk, New Auditorium, Nov. 14.

Altoona, Pa.—Francis J. Fluno, M.D., Mishler Theater, 3 p.m., Nov. 12.

Athol, Mass.—Francis J. Fluno, M.D., Unity Hall, Nov. 14.

Bay City, Mich.—Clarence C. Eaton, Masonic Temple, Nov. 6.

Billings, Mont.—Virgil O. Strickler, Opera House, Nov. 16.

Blackpool, Lancashire, Eng.—William D. McCrackan, M.A., Grand Theater, 3:15 p.m., Nov. 26.

Bloomington, Ill. (First Church)—Judge Clifford P. Smith, Church Edifice, Monroe and Prairie streets, Nov. 16.

Bloomington, Ind.—Clarence C. Eaton, Court House, Nov. 14.

Brattleboro, Vt.—Frank H. Leonard, Auditorium Nov. 13.

Bridgeport, Conn.—Judge Clifford P. Smith, Universalist Church, Nov. 10.

Bristol, Eng.—Bicknell Young, Colston Hall, Nov. 23.

Catlettsburg, Ky.—Clarence C. Eaton, High School Auditorium, Nov. 13.

Chelsea, Mass.—Judge Clifford P. Smith, Church Edifice, Reynolds avenue, Nov. 7.

Darlington, Eng.—William D. McCrackan, M.A., Mechanics Hall, Nov. 27.

Erie, Pa.—William R. Rathvon, Masonic Temple, Nov. 16.

Fairbury, Ill.—Rev. William P. McKenzie, Central Opera House, Nov. 6.

Flushing (L. I.), N. Y.—Francis J. Fluno, M.D., League Building, Nov. 13.

Halifax, Yorks, Eng.—Bicknell Young, Mechanics' Hall, Crassley, 7:30 p.m., Nov. 21.

Hudson, Mich.—Willis F. Gross, Fowles Opera House, Nov. 13.

Hull, Yorks, Eng.—William D. McCrackan, M.A., Royal Institution, Albion street, Nov. 23.

Indianapolis, Ind. (First Church)—William R. Rathvon, Murat Theater, Nov. 12.

Jamaica Plain, Mass. (Auspices The Mother Church, Boston).—Prof. Hermann S. Hering, Eliot Hall, Eliot street (near Center street), Nov. 16.

Jonesville, Mich.—Clarence C. Eaton, Theater Building, Nov. 7.

Littleton, N. H.—Frank H. Leonard, Masonic Hall, Nov. 14.

London, Eng. (First Church).—Bicknell Young, Queen's Hall, Langham Place, W. C., 3 p. m., Nov. 24.

London (Putney), Eng.—Bicknell Young, Wandsworth Town Hall, 8:30 p.m., Nov. 28.

Louisville, Ky.—Clarence C. Eaton, Macauley's Theater, Nov. 12.

McKeesport, Pa.—Judge Clifford P. Smith, White's New Theater, Walnut and Seventh streets, 3 p.m., Nov. 12.

Newtonville, Mass. (Auspices The Mother Church, Boston).—Prof. Hermann S. Hering, Temple Hall, Masonic Building, corner Newtonville avenue and Walnut street, Nov. 13.

Northampton, Mass.—Frank H. Leonard, City Hall, Nov. 12.

Paris, Tex.—Willis F. Gross, High School Auditorium, Nov. 17.

Pomona, Cal.—Bliss Knapp, Fraternal Aid Opera House, Nov. 16.

Redfield, S. D.—Hon. Clarence A. Buskirk, Opera House, Nov. 10.

Salem, Mass.—Prof. Hermann S. Hering, Empire Theater, Nov. 12.

Salem, Ore.—Virgil O. Strickler, Grand Opera House, Nov. 10.

Santa Ana, Cal.—Bliss Knapp, Grand Opera House, Fourth and Bush streets, Nov. 14.

Somerville, Mass. (Auspices The Mother Church, Boston).—Prof. Hermann S. Hering, Anthoine Hall, 136 School street (near City Hall), 3 p. m., Nov. 12.

Terra Haute, Ind.—Judge Clifford P. Smith, Grand Opera House, Nov. 13.

Tomah, Wis.—William R. Rathvon, Armory, 3 p.m., Nov. 5.

Waukegan, Ill. (First Church)—Judge Clifford P. Smith, Church Edifice, Nov. 14.

Winthrop Center, Mass. (Auspices The Mother Church, Boston).—Prof. Hermann S. Hering, Knights of Columbus Hall, corner Pauline and Fremont streets (near Winthrop Center station), Nov. 14.

Youngstown, O.—William R. Rathvon, Masonic Temple, Nov. 14.

Zanesville, O.—William R. Rathvon, Gold Hall, Schultz Opera Block, Nov. 13.

CHANGE OF ADDRESS.

The address of Judge Septimus J. Hanna, member of the board of lectureship, has been changed to 520 Oakland avenue, Pasadena, Cal.

Digitized by Google

TESTIMONIES OF HEALING.

I wish to acknowledge gratefully the great blessing Christian Science has been to me, and to tell something of the peace, the joy, and the healing which I have experienced. A dear friend interested me in it early in 1907. About that time I was feeling dissatisfied with life's experience and prospects, and was seeking the truth about life. In our family we believed we understood life in accordance with God's law as revealed in Scripture, but we had not found the fulfilment of the promise, "For they [the words of Truth] are life to those that find them, and health to all their flesh." Four out of a family of six had suffered and passed on from a lung disease, and we believed this was in accordance with God's will.

My own health had never been satisfactory, and it did not improve through material remedies. I found considerable benefit by leaving office work in Edinburgh to engage in farming in Manitoba, but this change had not brought the solution to life's problem for which I was continually seeking. After years of partial neglect I again became interested in the study of the Bible, for though I could not reasonably reconcile myself to the way of salvation as taught from the various pulpits, I felt convinced that a right understanding of Jesus' teaching would solve all difficulties. I was very much impressed on reading the first chapter of "Science and Health with Key to the Scriptures" by Mrs. Eddy. There was something in it which I had never experienced before, which brought spiritual uplifting and an interpretation of Scripture quite beyond my expectation; also the conviction that its teaching was true remained with me. Later we heard a lecture on the subject which encouraged my friend and myself to make further inquiries at the home of the local Christian Science practitioner. The spiritual atmosphere in this home and the meeting with those whose consecrated lives were proofs of the practical nature of their religion, quite convinced us that in Christian Science we had found the "bread of life." In the light of the explanations given in answer to my inquiries, text after text of Scripture glowed with new light and deep import, and since then I have received continual help from the study of the Bible and the Christian Science text-book.

It is not too much to say that Christian Science has completely changed my life's prospects. My health has decidedly improved, and this truth has healed me of a functional disease which had troubled me since childhood. Many times I have had help from a Christian Science practitioner with excellent results, of which I here give the following proof: In March, 1909, I became subject to severe nosebleeding, which continued, though not frequently, for several days. Being unable to free myself from this condition, and becoming alarmed at its continuance and the faintness and weakness which followed, I had help from a practitioner. Strength was at once restored, so that I continued at my work; in two or three days all trace of the trouble disappeared, and I have been free from it ever since. I was also remarkably healed of illness which came upon me after a long rough cycle journey. Through the uplift gained by reading pages 384 and 385 of Science and Health I found myself suddenly well.

Christian Science has proved to me that it is not necessary to work outdoors to preserve health. Although engaged in office work, my health has much improved through constant study of this Science, and lately, in qualifying for a position, I had to undergo a medical examination, with the result that the doctor gave me a clear certificate. In seeking through Christian Science for the explanation of cause and effect, and in trying to apply it in all life's experience, results have not always been manifested immediately, but the purification and spiritualization of thought resulting from patient endeavor and increased understanding of God has been thereby of double blessing.

I would also state that my friend who introduced Christian Science to me was very soon restored to good health through it, and he is now enjoying life through the understanding of Truth thus gained. These proofs are the natural result of a scientific understanding of God, which, as Jesus said, "is life eternal." Christian Science gives the spiritual interpretation of the Bible and the truth about God as divine Principle. I have come to value the Bible in a way I never thought of before. Christian Science has not only made the Bible my daily study but calls upon me to practise what I understand.

With an increasing appreciation of innumerable blessings which have come directly through Christian Science, entering into every department in life, I thank God for the great work of our dear Leader and her self-sacrifice in presenting to the world the truth about God, divine Love, in whom "we live, and move, and have our being."

JOHN A. C. FRASER, Virden, Manitoba.

I desire to express publicly my gratitude to God for the many blessings received through Christian Science. The healing of my little daughter was to me a most marvelous and wonderful proof of the power of Truth. After her birth she seemed to thrive well, until about the sixth week; then suddenly one evening she was stricken with extreme nausea, which the physician afterward pronounced acute stomach trouble. I laid the child in her crib, and on going to her a short while after this I found her cold and to all appearance lifeless. I was filled with fear, but took the child in my arms, clinging tenaciously to the thought of God as Life, eternal and immutable. In a short while I was able to get a Christian Science practitioner by telephone, and told her of the seeming condition. Her brief declaration of absolute Truth calmed my fear, and my child was restored. Through the persistent and faithful work of the practitioner, she is today a healthy, happy child. My baby boy was also at the age of six weeks in such a condition that he was beyond the aid of a physician. He was unable to retain any food, and the ailment soon developed into a serious bowel disorder, but again the power of Truth saved my child.

I found the truth most efficacious at the birth of my children, having painless parturition. I am indeed grateful for Christian Science and the help it gives me in the training of these little ones. I so often wonder how I could get along without this glorious truth, and I am deeply grateful to Mrs. Eddy for making this way possible for us.

MRS. H. O. WENTE, Cincinnati, Ohio.

After six years' study in Christian Science, I feel impelled to say a few words for the great blessing which Mrs. Eddy has given the world, and with the hope that it may meet the eye of even one who is struggling to find health and happiness. In searching from church to church I became an agnostic, because I found not the rest I sought; so, though I was prejudiced and stubborn, physical ills compelled me to try Christian Science as a last resource. I did not want the religion; I thought I had had enough of that.

From infancy I was considered a delicate child, with weak lungs, throat trouble, bad stomach, and many other ailments. For twenty-five years I suffered, food especially hurting me, so that I was starved and miserable. I tried all kinds of doctors, and was faithful to their directions, also dieting, fast-cure, massage, baths, etc.; but nothing helped me. I then took up psychology, and studied it quite extensively, also so-called mental healing, and for a while I seemed better; but when a final severe test came (it was acute lung trouble), it left me terribly depressed and melan-

Digitized by Google

choly, a mental condition which I could not shake off or even describe. Later, the same trouble again appeared, when I was visiting in Memphis. I then tried Christian Science for the physical relief alone, never thinking to mention the mental condition so distasteful to me, but I got healing for both. They were gone, never to return, and the relief came in less than an hour. Not until then did I understand Jesus' saying, "If I by Beelzebub cast out devils, by whom do your children cast them out?" also Mrs. Eddy's statement respecting "the sunlight of Truth" (Science and Health, p. 162). This one experience showed me conclusively the depth of Truth and the purity of Christian Science healing and its superiority over all other methods.

The beauty and benediction of that first treatment rests on me yet and ever will. Words cannot express my gratitude for the sweet revelation and teachings of Christian Science, for it truly gives us that peace of which the world knows nothing.

MRS. WERNER HERHOLD, Kansas City, Mo.

Before coming to Christian Science I was very ill, and used medicine, electricity, hygiene, etc., without any relief. I had been confined to my bed twenty months, and had not taken a step in that time. It was then that we first heard of Christian Science and decided to give it a trial. After being treated two weeks by a faithful Christian Science practitioner, I was perfectly healed. I arose from my bed and walked across the room, then stood still, and with my mother gave God thanks. This occurred about nine o'clock in the morning, and at eleven I went to the dining-room, ate a hearty dinner, and to the surprise of all I was indeed effectually healed. I had not retained a particle of solid food for months before this experience, but have had no return whatever of either disease, and today am a healthy, hearty woman.

My husband also believes in Christian Science, and our little boy, over three years old, has never taken a drop of medicine. I have had some beautiful demonstrations in our little family, and have also been able to help others. I do indeed feel grateful for Christian Science, for the literature, and to those who have helped me to know this truth which makes free. I am also grateful to Mrs. Eddy, who has so lovingly pointed the way, and my prayer is that I may be worthy the name of Christian Scientist.

MRS. NETTIE R. JENKINS, Folkstone, N. C.

Nearly six years ago I was advised to try Christian Science, after the doctors held out no hope of my recovery. My mother had passed on with the same trouble which I had, a so-called tubercular disease of the throat. The doctors gave me a powerful drug as a last resort, and this left me in a worse condition than before, as it added to my already heavy load by putting my stomach in such a condition that I would go for days without eating.

I called on a Christian Science practitioner principally for the throat trouble, on account of the cough. After receiving the second treatment she advised me to go home, eat my supper, and retire. I told her I was afraid to eat, but she said that I could eat anything I liked. I did so, and have never had any trouble with my stomach since that time. The other trouble yielded more slowly, and it was this that kept me anchored to the truth, but the first healing of my stomach proved to me that there were many useful, happy days in store for me. I knew I could be healed, and that much depended upon my own efforts; so I set to work studying "Science and Health with Key to the Scriptures" by Mrs. Eddy, and since that time I have been enabled, through this inspiring truth, to get help physically, financially, morally, and spiritually, besides having had the pleasure of extending a helping hand to others in need by leading them to this fountain of life.

H. E. BRANDT, Los Angeles, Cal.

Three years ago I started to investigate Christian Science. I purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy and began to study it. Stomach trouble of fourteen years' standing was overcome, also nervousness and a very discontented disposition, an unsatisfied longing for something to make me happy. I have found it all in the study of Christian Science; every need has been met, and I feel like a new person, I am so happy, healthy, and contented. I have found Christian Science to be the Comforter of which Jesus spoke when he said that he would send the Comforter to lead us into all truth.

I am indeed very thankful to God for leading me to Christian Science, and also to our Leader, Mrs. Eddy, who was unselfish and loving enough to receive it and make it known to us. "Blessed are the pure in heart: for they shall see God."—BESSIE RYAN, Tacoma, Wash.

During a number of years I have looked to the teaching of Christian Science, as found in the Bible and in Mrs. Eddy's writings, for the ordering of my daily life, and I value the experiences of these years as I do those of early childhood, which afford one so much happiness and satisfaction to recall. As it seems to many an inquirer a radical step to depend upon Christian Science for physical aid, I am glad to add that I have found it available in such need, and I believe the divine Principle of Christian Science to be the God of the Bible. In more than one instance, since studying "Science and Health with Key to the Scriptures," I have been enabled to do my daily work, when threatened by sickness, whereas formerly I should not have had the courage to have attempted the task; thus proving the great practicability of Christian Science. It seems to me that Mrs. Eddy's discovery brought what the poet Lanier looked for when he wrote,—

Till Science to knowing the Highest shall lovingly turn.

MARCIA R. BOWMAN, Cambridge, Mass.

I came into Christian Science nearly three years ago, through the healing of my eyes. I had worn glasses for twenty years, and in that time had suffered greatly with my eyes. As my sight was failing so fast, I took a friend's advice and turned to Christian Science. In two weeks I was entirely healed, and after the second treatment I laid my glasses away. I was also healed of other complaints at the same time. I am more grateful than words can express, and daily thank God for the priceless blessing of Christian Science. I am very grateful to our dear Leader, especially for having provided us with the literature that is giving to mankind this spiritual illumination every day, teaching this great truth which indeed sets us free.

MRS. A. BERTRAND HALLER, Lancaster, Ohio.

In studying a Lesson on "Love" I was forcibly reminded of how much I owe to Christian Science, and I wish to express something of the gratitude which fills me to overflowing—gratitude to God, the divine Principle, Love; also to our beloved Leader, Mrs. Eddy, whose teaching is showing me how to love. I love her for her grand and noble life, her unselfish works in behalf of a heartsick humanity, and for her wonderful writings, especially "Science and Health with Key to the Scriptures," because it has unlocked the Bible, which heretofore had been a closed book to me.

For twenty years I was without hope and "without God in the world," searching for Truth in many creeds, doctrines, and theories, leading a loveless life, yet always hungering to love and be loved. When Christian Science was presented to me thirteen years ago, I turned from it as simply another religion,—prejudiced without investiga-

Digitized by Google

tion. During the seven following years our little boy and I were much in need of physical healing, but *materia medica* was our sole dependence. Later, however, I realized most gratefully how much help we had received from the beneficent influence of Christian Science in many a severe illness of the child, through the loving thoughts of members of my family. Through continual unhappiness and ill health I was finally driven to seek refuge in the arms of divine Love, and I found in these lines: "Spirit's senses are without pain, and they are forever at peace" (Science and Health, p. 214), my first glimpse of the truth. In consequence of this I also found healing from an eye trouble which was causing me much discomfort just then. Who can ever forget the joy that comes with the understanding of God as Love. Other ills, such as rheumatism, stomach and bladder trouble, were each in turn quickly overcome through the power of Truth, as well as many minor ailments both for myself and son, and more recently a severe attack of bowel trouble, also an affection of the eyes.

I can truly count my blessings in physical, mental, and moral healing, yet the greatest is the assurance that God is Love, which helps me to be a better wife to a most patient and kind husband, as well as a better mother: to overcome impatience, self-will, and many other sins: to know that there is no law but the law of Love, God's law. While the road at times seems rugged, much help comes to us from the study of the Lesson-Sermons and our splendid literature, and I am encouraged to go on trying to prove myself worthy of the blessings of Christian Science, so that I may help others even as I am helped.

MRS. MARGARET M. FARMER, San Benito, Tex.

I take this opportunity to express my heartfelt thanks to God for the many blessings which I now enjoy through the study and application of the truth as given to us in "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had suffered two years with what the doctors pronounced gall-stones and black jaundice. From this latter trouble I had become darker than an Indian. At last they told my husband that nothing would save my life except an operation, but as two of our family had been on the operating-table, and both had passed on, we did not care to try it again.

At this point my husband decided that we would try Christian Science. He at once wrote to a practitioner in a neighboring city, who gave me absent treatment for one week. At the end of that time I was able to be taken to her home, where I stayed for three weeks, and then went to visit a sister. I, however, kept up the treatment a few weeks longer, and came home healed, and from then on I have worked at anything I wished to do. We have had many demonstrations in our family,—with our children and grandchildren,—since that time.

This was in the fall of 1908, and I have gained greatly in weight, but best of all I and my family have learned the power of Christian Science to uplift and bring us into a better understanding of God and man. It makes the Bible a new book, one which we all love to study and to make the guide of our daily living. Every day I have fresh proofs of the power of Truth to heal both disease and sin, and I feel very thankful that there is a divine Principle by which we may be guided. Christian Science has taught me that Jesus' promises are for us now and at all times.

MRS. ALLIE CAMPBELL, Arcadia, Kan.

From childhood I had been troubled with abscesses in one ear, occasioning a very offensive and almost continual discharge. An eminent specialist declared that he could do nothing for me; that this disease would always trouble me. I listened to a lecture on Christian Science which was given in Calais, Me., and I was healed. From that day to this, nearly two years, my ear has been clean and the entire condition normal. As I had always regarded this as a chronic ill, I do not think I ever expected healing for it, so it was surely a case of "before they call, I will answer."

I cannot express the joy which this proof of God's power gave me; my life must express my gratitude.

NELLIE M. MCADAM, St. Stephen, N. B.

I wish to testify to what Christian Science has done for me, physically, spiritually, and financially. Physically, I have been healed of an acute stomach disorder of over three years' standing, during which time I was continually under a doctor's care. I turned to Christian Science as a last resort, and after five weeks' treatment I was healed and had been given enough understanding of God to demonstrate the truth for myself, so that I daily grew out of the old thought of fear and sickness. Spiritually, I feel that I have found God for the first time. From early boyhood I had a distaste for going to church and studying the Bible, but I now find church an interesting and pleasant place to go to, and the Bible and Science and Health are read daily with interest and a better understanding. I have come to know through Science that something more than a good moral life is expected of us. Financially, I have not had my income increased, but I seem to accomplish more with what I have than formerly.

It is with much gratitude to God for His goodness to me, and to Mrs. Eddy for her faithfulness in giving us the truth, that I write this testimony.

CHARLES S. KIDDER, Detroit, Mich.

It is impossible to tell of all the blessings which have come to me through Christian Science. Three years ago I was the most cynical person imaginable. I had lost all faith in people and it seemed that God was both cruel and unjust. Through a mere chance, as it then seemed to me, but which I now know was a wonderful demonstration of the leading of divine Love, I went to live in a Christian Science home, and gained my first knowledge of Christian Science there. When on the verge of a nervous breakdown, I tried its treatment, and I was cured in two weeks not only of this complaint, but also of chronic bowel trouble and an eye difficulty for which I had worn glasses about sixteen years.

I can never be thankful enough to divine Love, whom I have learned to know, or to our Leader, Mrs. Eddy.

MRS. C. S. KIDDER, Detroit, Mich.

I wish to tell others of the benefits received through the careful study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I have been interested in Christian Science over five years. The text-book was given me to read, and knowing nothing of Christian Science, I approached it with open mind. The first sentence of the Preface riveted my attention, and before I had read the first page I knew I had found that which I had long sought, a guide to Truth; and such it has truly proved to be. Such a sense of peace came that I longed to know what had caused the change from the depressing troubled sense that had burdened my thought. By the time I had read the chapter on Prayer, I found that I did not need to use glasses any more, and I was thankful, because I had for fifteen years depended on them. This demonstration filled me with rejoicing. As I have followed the teaching of our dear Leader, step by step the way has grown brighter, and every form of error has been quickly met and conquered. Some of the ailments that were called incurable in *materia medica* have been stubborn, but Truth has won the victory over sciatic lameness that obliged me to go backward down stairs for more than two years. Another experience was an attack of mental derangement, which caused three doc-

Digitized by Google

tors to send me to the state hospital for the insane. While in this mental condition (from Sunday till Wednesday) I never ceased to repeat "the scientific statement of being" (Science and Health, p. 468), and I was completely restored, so that I was sent home.

Truly God is good to all those who put their trust in Him! Can any wonder that my gratitude to God for Christian Science is unbounded. With peace and joy have come the working out of many problems. I have proved for myself that "no good thing will he [God] withhold from them that fear him."

MRS. LUCY A. HENDRICK, Providence, R. I.

On the 4th of July, 1908, my mother became very ill and wandered from home, saying and doing things which convinced us that she had lost her power of reasoning. On the following day we were advised by two well-known physicians to place her in a sanitarium at once, which we did. When we visited her a few days after, I am glad to say that she seemed to have completely recovered, and she was released from the sanitarium very soon after. We cannot help but see that Christian Science has done a great deal for mother in many ways; viz., in the healing of lameness, nervousness, and mental trouble.

F. O. HENDRICK, East Orange, N. J.

With a desire to help in the spread of the good tidings, I will tell of some of my experiences in Christian Science. So far as our family is concerned, I am alone in Christian Science. About a year ago my mother was very ill with a prevalent complaint which lasted in her case several days. I also experienced the same trouble very severely for a few hours, but through patient application of the truth I was able to continue work and am now well. While closing a mail box not long ago, my finger was caught between the lid and box, but by instantly holding to the truth no suffering was experienced.

For these proofs of spiritual progress I can say, "Thanks be to God, who giveth us the victory." My testimony would not be complete without an expression of appreciation of the unselfish and divinely directed work of Mrs. Eddy, who has given to the world a practical Christianity.

THOMAS JOHN WATSON, South Madison, Wis.

[Written for the *Sentinel*.]

TRANSITION.

MARY L. CUMMINS.

"WHERE art thou?"—thou false fear of threat'ning ill,
Thou vague materiality, lurking still
In some far-hidden undergrowth of thought,
Or some unyielding clutch of human will!

Adam, come forth! Show to omnipotence
The stumbling, trembling form of finite sense.
Reveal thyself for what thou art, and know
The weakness of thy wavering defense!

Forth from the garden of enlightened thought,
Back to the utter baselessness of naught
Thou needs must go, that in thy place may come
The quick'ning Spirit revelation brought.

Now the last Adam—Christ, the Truth—is near,
Uprooting every noxious weed of fear;
Bringing a mental garden of the Lord,
Proving that paradise is now and here.

FROM OUR EXCHANGES.

[*Christian World.*]

One conspicuous temptation of our time is a religious temptation. The immense, one may say the revolutionary, movement of modern thought, has produced among average people two attitudes on the question of religion. On the one side we find simple souls who seek safety in a rigid conservatism; in the close shutting of their eyes to all discoveries, all researches which seem to militate against the traditional views. They fear that if they give up one thing they must give up all. As Eucken puts it, "They believe the impossible in order to preserve the necessary." This attitude can have only one future. It will die with this generation. It will die as surely as the pre-Copernican astronomy has died, killed by the sheer weight of facts. But there is another widely spreading attitude, and much worse. It is that of giving up religion because some dogmas supposed to belong to it have fallen into disrepute. That this position is infinitely more stupid than the other, as stupid as denying the stars because we have a new astronomy, as ceasing to build on the rocks because we have a new geology, is to thinking minds sufficiently evident. But we have today to deal with a great mass of unthinking minds, and the results of this new temper are seen everywhere in a shrinkage in the sense of life's higher values. Men are taking low views of themselves and of the universe they live in. Their sky has closed in; they are shut out from the high lights, and fight like rats in a cellar for the goods they can find there. The world of today is tempted, as almost never before, to fling away its pearl of price, its living bread, and to perish for want of it. Against this vast temptation there is only one remedy. It lies in that refinding of God for ourselves and our neighbor; in that rediscovery of the spiritual values; in that resurrection of the living gospel from the tomb in which convention and superstition have immured it, which is today the one task of the church and the one hope of mankind.

[Prin. W. F. Adeney, M.A., D.D., in *British Congregationalist*.]

Nothing can be more significant as one of the signs of the times than the fact that the growing neglect of the church idea which we are witnessing in the present day is contemporary with the increasing self-consciousness and power of the democracy. This is a grave juxtaposition of tendencies. So long as the aristocracy was dominant, its neglect of the church did not count for much, if only the hearts of the dumb, inexpressive multitude could be thought of as beating true. But now the democracy is rising like a flood, and the people have an awakened feeling that at last they are coming into their own.

Here, then, we might say, is a fine opportunity for the development of the spirit of brotherhood which is essential to the church idea. When we have broken down the barriers of privilege and exclusiveness, when we have escaped from the last relics of feudal serfdom, we should be just in the condition to appreciate that spirit of comradeship expressed in Paul's exhortation: "Bear ye one another's burdens, and so fulfil the law of Christ"—an immensely expressive exhortation, occurring where it is in the epistle to the Galatians.

[*Outlook*.]

The problems which interest men now are sociological, not theological; vital, not philosophical. What our relations are to each other interests this age more than what are our relations to God; and how we ought to live more than how we ought to think. What does the golden rule mean to the mistress in the parlor and the cook in the kitchen; to the manager in his office and the factory hand at his machine? What does "Give to him that asketh of thee" mean to an age that has learned that indiscriminate

Digitized by Google

charity does not relieve poverty, but increases it? What does "Thou shalt not kill" mean to an industry which is stunting the character and shortening the lives of boys and girls by child labor? What "Thou shalt not commit adultery" in a nation which grants two hundred divorces every court day in the year? When ministers talk intelligently on these subjects, congregations listen, newspapers report, the whole public takes notice. The people have little patience with the minister who dogmatizes or sentimentalizes on these questions; but if he has studied them, knows them, and can give rational counsel upon them, the people are interested and can be guided.

[Rev. L. O. Williams in *Universalist Leader.*]

It is a time for frankness. Is the real offense of the church a hostility toward the masses, or is it that the church insists on holding up ideals which disturb the slumbers of an easy-going utilitarianism? Men must be fed and clothed and housed. They need friends in sickness and in trouble. They need pleasure and recreation, diversion, and amusement. Whatever furthers these interests, of necessity has a place in their scheme of life. But when the church which has met every demand in these directions begins to talk about duty, and justice, and the hard things of the moral law, when it begins to insist on a bread that is not baked in an oven, and raiment that is produced in no loom, and houses not built with hands, and pleasures not connected with sensuality, and faith and hope and love as an asset in life, is the multitude still interested? Jesus went to the cross quite as much through the defection of the masses as through the activities of the Jewish priesthood. Is the real reason for the neglect of the church that it has failed to represent its Founder, or that it represents him too faithfully and too well?

[Rev. Joseph Bennett in *Western Christian Advocate.*]

The carnal man must die that the spiritual man may be made alive and bear the fruits of the Spirit. If we have not the fruits of the Spirit, which are love, joy, peace, longsuffering, gentleness, goodness, faith, meekness, temperance, we are not followers of Christ Jesus and we must not deceive ourselves by thinking that we are. Paul said, "I am crucified with Christ, yet I live." He did not mean that in a literal sense he was dead, that he had ceased to breathe and act and move about among men, but that he had ceased to follow the inclination of his own will. Not until we have died out to our own evil inclinations and have nailed every unholy desire to the cross, shall we exemplify the life hid with Christ in God.

[Rev. Ozora S. Davis in *Zion's Herald.*]

Is it not time for all lovers of the Bible to cease their foreboding and contention long enough at least to ponder the fact that the inspiration of the Bible is not a quality that was once given to sixty-six books in a sacred collection, but, rather, it is a quality which, if it exists at all, exists now, and is an active power radiant from the Bible in the twentieth century? There can be no doctrine of the inspiration of the Bible that does not flow from the fact that the Bible does still inspire living men.

[*British Congregationalist.*]

It is always a peril when individuals or communities begin to regard themselves as the outstanding favorites of the Almighty. It invariably leads to self-conceit rather than to a healthy self-esteem. It lulls to ease rather than inspires to service. It is creative of lassitude, it does not give rise to chivalrous campaigns. It emasculates rather than invigorates; it does not make either blood or bone.

[*Zion's Herald.*]

Christianity is a rising tide. Every generation sees the high water-mark pushed up at least a little way farther toward the ultimate goal of the waters of salvation. Let us not lose heart. The tide is coming in!

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Fluno, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan,* and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine.* These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind-healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large sized book), single copy, $6.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $3.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of *Divine Science, alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor,

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Annual subscription price, payable in advance, postpaid, for the United States, Canada, Mexico, and Cuba, $2.00; six months, $1.20. Single copy, five cents; 25 copies to one address, $1.00; 50 copies, $1.80; 100 copies, $3.00.

For all other countries add 50 cents to the annual rate, for postage. Single copy, six cents; 25 copies, one address, $1.25; 50 copies, $2.25; 100 copies, $4.00.

For subscriptions in quantities please refer to our catalogue.

Subscriptions to the SENTINEL will begin with the first of the month, and include all issues for the month named as expiration date on the wrapper. XI indicates the year 1911; XII, 1912. The receipt of the periodical by the subscriber and the notation on the wrapper will be our acknowledgment of the subscription.

Bound volumes: Current year or two years previous, cloth, $3.00; half calf or half morocco, $4.50. On earlier volumes write for prices.

Equivalents of United States money:

$1.25—	0: 5 s.:	2d.:	Mk. 5.30:	F. 6.45

4.00—	0: 16 :	5 :	16.90:	20.60

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

"Give Alaska home rule and it will solve the great problems of the country," says Gifford Pinchot, who has returned from his trip to Alaska. "There is a fashion now of depreciating the resources of Alaska," said he. "They used to say they were of great value, but now they say they were exaggerated and are not much worth taking. But my impression of Alaska is that it is enormously rich and worth while. It will make one of the most valuable resources of the United States. Alaska is going to make an immense contribution not only in a material way, but in hardy manhood and womanhood."

"I found Alaska a country of great mineral and agricultural possibilities; indeed, I should go farther and say a country of great mineral and agricultural probabilities, needing development, ready for development, and inviting development, but held back chiefly by inadequate transportation facilities and inadequate laws," said Secretary of the Interior Fisher, who recently made a trip to Alaska.

Acting in accordance with an opinion handed down by the attorney-general, Governor Bass of New Hampshire and his council took the first steps toward the acquisition of Crawford Notch as a public preserve when they ordered a survey of the territory. The Legislature voted in favor of the proposition at the last session, but through an error on the part of a clerk the copy of the act submitted to the Governor and signed by him did not have an amendment which had been passed providing for an unlimited appropriation.

Mayor Shank of Indianapolis, Ind., now that he has disposed of seven carloads of potatoes and a carload of pears, practically at producers' prices, plans to provide the city's consumers with pork and apples in a similar way. While plenty of apples are spoiling on the ground nearby, the fruit is selling at seventy cents to one dollar a bushel in the city. The mayor proposes to sell a carload at thirty to forty cents a bushel. He says also that he finds he can buy dressed hogs from farmers at six cents a pound.

Rich potash deposits, said to contain more than enough to supply the needs of the United States, have been located in the West by scientists of the department of agriculture, according to Secretary Wilson. This discovery, the secretary declares, will mean a saving of twelve million dollars a year to this country, as heretofore the United States has been spending about that sum annually in buying its potash from Germany. Secretary Wilson would not state where the deposits were situated.

The city of Detroit, Mich., has won its contest with the Detroit United railway for three-cent fares. The company grants eight tickets for a quarter from 5 a.m. to 8 p.m. and six tickets for a quarter during the night hours, with universal transfers at all hours. The company agrees to sell its system to the city on six months' notice, to build extensions of not less than ten miles each year, the city to pave between the tracks.

C. P. Rodgers, who started from Sheepshead, Long Island, N. Y., Sept. 17 in an aeroplane, reached Pasadena, Cal., Nov. 5. The total number of days consumed on the trip was forty-nine. On twenty-eight of these days he made longer or shorter flights. His actual flying time was eighty-two hours and four minutes. The distance covered was 4,231 miles in 4,921 minutes, and the average speed was 51.59 miles an hour.

Attorney-General Wickersham's brief filed in the United States circuit court on the American Tobacco Company's reorganization plan, says that the plan is evasive and generally unsatisfactory. He asks that under whatever plan may be approved the government have permission at any time within five years to intervene and restrain the further workings of such plan, provided it does not bring about the conditions desired.

A sweeping interpretation was given by the supreme court of the United States to the federal safety appliance acts, when it held that the law is violated by shipments from one point in a state to another point in the same state, if carried in a car not properly equipped, but which is used on a railway that is a highway for interstate commerce.

For the first time since 1883 the post office department, during the fiscal year ending June 30, 1911, was conducted at a profit. In twenty-four months the conduct of the postal service has resulted in changing a deficit of $17,470,770 for the fiscal year 1909 to a surplus of $219,118 for the fiscal year 1911.

Twenty-one missionary societies, representing eight denominations, contributed to missions last year $13,358,000. The annual amounts given directly for maintenance of all Christian work in America, by all bodies, is estimated at three hundred and twenty-five million dollars.

The Taylor system of scientific management probably will be installed in the government arsenals. Secretary of War Stimson has expressed the view that the system will work to the welfare of the government and the workmen.

From March 6, when the orders for the mobilization of the American troops along the border during the disturbances in Mexico were issued, to the end of the fiscal year, June 30, the expense was $1,730,526.72.

The Armour Grain Company of Chicago is charged by government agents with producing a corner in wheat in violation of the Sherman antitrust law.

President Taft returned to Washington Nov. 1, after an absence of over two months. During this time he has traveled over fifteen thousand miles.

The Oregon case to test the constitutionality of the initiative and the referendum is before the United States supreme court.

President Taft has appointed Nov. 30 as Thanksgiving day.

International.

The appearance in South Water street, Chicago's great produce market, of some tubs and bricks of western Canadian butter from the government creameries of Saskatchewan, has called the attention of the commission men to that country as a possible butter competitor of the Fox river valley district in Illinois and Wisconsin. Four years ago the government creameries of Saskatchewan were patronized by only two hundred and fifteen farmers. According to a recent report of the dairy branch of the Saskatchewan department of agriculture there are two thousand farmers now who are regular patrons. The provincial governments of Manitoba, Saskatchewan, and Alberta are doing all they can to encourage dairying and other forms of diversified farming, and in this work are being helped by the railroads. The Canadian Pacific railway has dairy departments on its ten thousand acres of demonstration farms conducted in the western provinces. The success of alfalfa in western Canada has made the success of dairy farming a certainty.

The national trust for places of historic interest or natural beauty in England, was instituted in order to protect and preserve such places whenever possible, and when other means of accomplishing this end fail, an appeal is made to the nation for support. Just now a scheme is on foot for the destruction of the old bridge over the Derwent at Portinscale, Cumberland, and the erection of a modern one in its place. The national trust committee is anxious to preserve the old bridge. It is also trying to purchase Colley Hill, Reigate, in order to secure the site as a public open space and keep it from building and other disfigurement.

The Chinese throne has acceded to the demand of the National Assembly for a complete constitutional government. In an imperial edict the throne humbly apologizes for its past neglect and grants an immediate constitution, with a cabinet from which nobles shall be excluded, and a free pardon for the rebels and all political offenders. Town after town still continues to fall into the hands of the rebel troops. Overtures are being made to the rebel commander by the government, in the hope of satisfying those in revolt and causing a cessation of hostilities.

Industrial and Commercial.

Mudeira Hill & Co. of Philadelphia, whose anthracite region headquarters are at Pottsville, Pa., has consummated the largest coal deal of the last decade. It involves the control of the Lawrence, Bear Ridge, and Stanton collieries in Mahanoy valley. Owing to the primitive machinery used in previous operations, they were allowed to fill with water, completely submerging valuable coal measures, from which it is estimated one billion tons in the aggregate can be secured. These collieries will be pumped out, extensive development introduced, and then employment will be given to two thousand hands. It is believed that these three collieries will be jointly capable of producing one million tons a year.

As an industry, fishing yields the United States the respectable yearly product of $54,931,000. This is well over half the annual gold output, or of the barley cr It is over twice the rye crop, and nearly twice that of flaxseed. It is three times the value of the rice crop, and five times that of the buckwheat crop.

Putting experts on an engine of the Lehigh Valley railroad, with supervision, the result was that the amount of coal used between Buffalo and Jersey City amounted to fifteen tons and seventy pounds; while the amount of coal usually consumed on this run is between twenty-five and thirty tons.

The sale of all the oil lands, producing wells, pipe lines, and refinery and other holding of the Pearson Syndicate in Mexico, to the Standard Oil Company, has just been made, according to reports. The price is said to be in the neighborhood of twenty-five million dollars, gold.

A syndicate of English capitalists is planning to acquire the independent telephone companies in New Jersey, Pennsylvania, West Virginia, Ohio, Indiana, and part of Illinois. The transaction involves ten million dollars in cash and twenty-two million in bonds.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

WHAT HAS HAPPENED?

CLARENCE W. CHADWICK.

IT is indeed true, as our text-book says, that "the time for thinkers has come" (Science and Health, Pref., p. vii). There are many who imagined that they were thinking deeply along different lines before Christian Science was brought to their attention, whereas they were dealing wholly with the world of phenomena and had not, perchance, in one single instance penetrated to the realm of the noumenal or real. The authority for this statement lies in the fact that the practical demonstration of the power of Truth to correct and obliterate the effects of wrong thinking was nowhere recorded in the pages of human history from about the third century, A. D., to the advent of Christian Science, A. D. 1866.

The proposition that "God is All," or, to use the language of Christian Science, "All is infinite Mind and its infinite manifestation" (Science and Health, p. 468), requires in one sense a higher order of thinking for its solution than does the most difficult problem of mathematics or the most abstruse statement of philosophy. This by no means signifies that the most humble thinker, the individual of limited literary or educational training, may not be able to grasp and to apply the facts of divine Science; on the contrary, experience often proves that the highly educated or intellectual mentality is the one to murmur or stumble over spiritual or metaphysical propositions, while, as of old, "the common people" hear and adopt the truth gladly.

The leaven of the Christ-teaching, operative today in the demonstration of Christian Science, is causing all classes of people to inquire more persistently into causation. They are slowly but surely yielding their unprofitable belief in intelligent matter and looking more deeply into divine Mind for a sane and logical solution of human problems. When the testimony of the senses is reversed, when so-called natural law is annulled, when matter is absolutely discarded a results obtained which for centuries past have been thought possible only through material agencies, it is but natural that the quickened sense of the twentieth-century thinker should query, What has happened? The demonstration of Christian healing inaugurated by Christian Science has already set the Christian world "a-thinking," and the signs of the times certainly indicate that the human mind is rapidly approaching the limits of its self-assumed ability to do what Jesus himself declared could not be done by human will, but by divine power alone.

Many are finding out that the divine Principle of scientific healing cannot be understood by jumping at conclusions. The so-called human mind, holding doggedly to a material basis from which to explain the phenomenon of healing, can do little else than expose its own ignorance of the operation of spiritual law in human consciousness. According to Jesus' teaching, only "he that is of God heareth God's words," so that the so-called human mind must sooner or later surrender its claim to intelligence and power and humbly acknowledge that omniscience is the only thinking or intelligent Mind there is, consequently the only power to think, act, perform, or bring to pass. This acknowledgment alone will equip human consciousness with the sword of spiritual truth by which it may and must decapitate its own valueless theories and opinions, and so make way for the complete appearing or coming of the saving Christ-idea, "the only begotten Son of God."

When we contrast the mental attitude of the sleeping past and the awakening thought of the present, we find assurances of the kingdom of heaven at hand. The professing Christian, asleep to the eternal facts of being, succumbs to the belief of sickness, summons the imaginary aid of matter, experiences physical relief, and says, I was sick, but am now well. He does not go any farther into the question of cause and effect, but is content to believe that man is of such a complex nature that it is possible for him to be one thing today and the opposite tomorrow. He classes sickness and health together, calling one just as real, and often God-sent, as the other, and then resorts to every known material agency to thwart the divine purpose. Not once does he seriously question, but accepts uncomplainingly the theory of false theology, that the individual who (by way of illustration) succumbs to the liquor habit and acts out the belief of delirium tremens is being punished by God for his sins; which is equivalent to saying that the devil, or one evil, supplied him with the whisky, while God sent him the delirium tremens. Such inconsistencies do not encourage Christian effort, they do not lead thought out of matter into Mind; they neither appropriate the things of an all-good God nor give them unto the creature.

Christian Science, on the other hand, has instituted a court of inquiry, and the result is a thorough and scientific investigation of the case in hand. The findings are these: (1) That God is good and the creator of good only; therefore He does not and could not send sickness or sin. (2) That man, being created in the image and likeness of good, must be and is spiritual and perfect, just as God made him, and cannot therefore be sick or sinful. (3) That sickness and sin are simply godless beliefs of the so-called carnal or mortal mind, and are therefore without Principle, law, power, or government. (4) That the law of God understood and demonstrated destroys not only the evidence of disease and sin, but also all belief in them. (5) That God being Spirit and All-in-all, nothing apart from Spirit can be known as real and eternal, any more than it is possible to know that two and two are five; consequently matter must be and is of human origin or conception, and cannot express the nature or character of Spirit. (6) That divine Mind is the only healing power, acting through spiritual law, which makes it practically available to every man, woman, and child who appeals to it intelligently for aid.

With this information at his disposal, the student of divine metaphysics can answer the query, What has happened? When a benighted mortal sickens and then "gets well," as he terms it, through material means, the Scientist knows that intelligent Mind has played no part in

Copyright, 1911, by The Christian Science Publishing Society.

Digitized by Google

the experience, but that an erroneous belief of disease has been displaced by a less discordant belief, called a belief of health. Matter has been dignified with intelligence and power, and the poor mortal is left to dream on, ignorant of the Science of real being, without any moral awakening. The so-called cure effected on a material basis he knows to be a mortal-mind cure, for had human thought played no part in it, there would have been no change of belief in evidence.

In marked contrast with this "getting well" experience is that of real Mind-healing, where matter is altogether excluded and the intelligence and authority of the Christ-mind is appealed to for the relief that can come from God alone. When a mortal is healed in Christian Science he has actually lost some portion of his materiality; "the old man" consciousness has been purged of some of its grossness and an improved mentality testifies to improved bodily conditions, a glimpse of the new creature in Christ is in evidence. The fear of disease and death has given way to a higher faith and trust in things spiritual and eternal. The inclination to sin has received its death-blow, and thought is uplifted to apprehend the real meaning of the word health as being a condition of Mind and not of matter. The admission is no longer made that God's man was ever sick or sinful or ever can be.

The dream of life in matter, in other words, has been so far dissipated as to let in the light of spiritual radiation; the Christ has come with healing in his wings, and the "still small voice" is heard to say, "The kingdom of God is come nigh unto you;" "This is the way, walk ye in it." The door to the kingdom of heaven on earth is opened for the first time, and the mortal begins to work out his own salvation, to find the truth of his being here and now.

UNFOLDMENT.

LAURA B. DOORLY.

RECENTLY a new meaning of the following texts came to me: "First the blade, then the ear, then the full grain in the ear;" and "The last shall be first, and the first last." These passages had clamored insistently at the door of thought during the *Monitor* meeting held in First Church of Christ, Scientist, London, and as the character of this great daily paper unfolded itself to me, I discerned that this last mighty move by the Discoverer and Founder of Christian Science is indeed of paramount importance as a healing and regenerating influence and as a means of preparing the world for this healing and redemptive truth.

A brief historical sketch of the publications helped us to realize that the *Monitor* is a natural outcome of the Christian Science movement, as its motto so aptly shows, "First the blade, then the ear, then the full grain in the ear." *The Christian Science Journal* may be likened to a sturdy blade, appearing as a promise even in the midst of winter days; the *Sentinel*, a sign of more abundant fulfilment; and now the *Monitor*, which, like the manna in the desert, comes daily with its supply of true thinking; a wise guide, a fearless instructor, inculcating the missionary spirit, turning thought from short-sighted parochialism and merely local interest to the wider vision; teaching the individual to desire and to strive for the establishment of justice, humanity, progress, and peace—irrespective of party, nation, or creed.

Some one spoke of the *Monitor* as a divine idea, and said that as such it had always existed. And why not? Does not a divine idea reveal the good and the true in everything, wherever it may be, and lift it up for all men to see? Mrs. Eddy says that "no wisdom is wise but His [God's] wisdom; no truth is true, no love is lovely, no life is Life but the divine; no good is, but the good God bestows" (Science and Health, p. 275). If the *Monitor* is publishing only things "of good report," then its appearing is most certainly the appearing of a divine idea, and being so, it has always existed, and our need is to recognize it, to love it, and to support it. The *Monitor* enters gently the human consciousness, and gives milk to babes, feeds men with the bread of heaven,—adding an ideal here, changing a viewpoint there, purifying every channel of thought; and so in time right thinking will reign supreme, and the government of Mind be seen to be established.

The beauty of Christian Science is that it comes to us so naturally, like a benediction—a tender, blessed thing, "changing chaos into order and discord into the music of the spheres" (Science and Health, p. 255). It touches all our human experiences and glorifies them, giving a zest, a hope, an interest, even to "the trivial round, the common task," which once appeared so dreary and so gray. It tells us how Love spreads loving arms around the world, saying, "Come, my children,—you all belong to the one Father-Mother God." The *Monitor* as a messenger of Love is to teach one about the other, for the interest of one is the interest of all, what relates to the welfare of one touches all the rest. Our need, then, is to lift up our eyes, and "learn of the real and eternal" (Science and Health, p. 208).

The *Monitor* as a missionary reaches every country and touches every condition of thought with its cleansing spirit; it gets down among the people and helps them to lift themselves up. If all Christian Scientists would recognize what this paper stands for, they would be approaching Mrs. Eddy's discernment when she set it in motion; and though it is "last" in the order of its appearing, the *Monitor* "shall be first,"—first to break up the fallow ground of consciousness, to reach millions of weary mortals, the first to bring light to a great company of people seated in darkness, dealing with effects instead of causes, fighting each other instead of uniting in tackling their common enemy, false belief.

Christ Jesus said that the angels would in time of harvest gather out of God's kingdom on earth "all things that offend." The sweet, strong influence of the *Monitor* is being felt everywhere that goodness is desired and believed in, and it is the privilege of every Christian Scientist to extend and broaden this influence, until the brotherhood of man shall be a recognized fact in which all rejoice.

THE CHILDLIKE MIND.

MAY BELCHER.

IT is only when we begin to make some progress in our understanding of Christian Science that we are able to see the immense importance of our Master's words, "Verily I say unto you, except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven."

Many of us, when we first start to study Christian Science, strive to comprehend spiritual truth from the standpoint of our human intellect and material intelligence. How foolish this is we do not see at first, and we wonder why it is we cannot gain the quick understanding, followed by demonstration, which has come to one who we know is what the world calls uneducated and unlearned. It is not until we see how useless human cleverness is, and how we are unable to solve the simplest problem in Christian Science through its aid, that we are willing to lay aside our false belief of education and start to learn the alphabet of true education. We find we have to unlearn so much that before we prided ourselves upon knowing, it is well nigh a complete reversal of all our most cherished opinions and beliefs. One after another false idols are destroyed and the true ideas are substituted for them.

In the place of pride of intellect we have to learn humility; love of power must give way to the willingness to serve; self-reliance, a quality we always looked upon as something to be striven for and cultivated, has to be given up for something higher; in its place we must put absolute reliance on and trust in God; self-righteousness, self-justifi-

Digitized by Google

cation, with their inseparable companions criticism and condemnation, must make way for the perfect love or charity that "thinketh no evil." When all these various errors are at last seen in the true light, then we begin to understand faintly what Jesus meant by those wonderful words.

A child is so truly humble! It never occurs to the simple child mind that its opinions are of any value or importance. Then, again, think how absolutely the child relies on those in authority over it; it never enters its head to doubt the love, wisdom, and justice of its parents. No matter how naughty and disobedient the little one has been, it knows that as soon as it is really sorry for and has confessed its fault, forgiveness and love will at once be lavished on it. Criticism and suspicion, which are the bane of older people, have no place in a child's consciousness; it accepts people and events with simplicity, it never searches round for hidden or sinister motives, but just takes everybody and everything as it finds them. No dark fears or forebodings as to the future cause worry or anxiety to the child; rather does it live happily and contentedly in the present, safe and confident in the willingness and ability of its parents to provide for all its simple every-day needs.

The first lesson every child has to learn is that of implicit and unquestioning obedience. At first the child will rebel and try by every little artifice in its power to gain its own way, sometimes it will argue and question and resist the authority, and it may be that punishment has to be resorted to before human stubbornness will consent to be governed by higher authority, but those who are older and wiser know that without perfect and prompt obedience there can be no real happiness for the child.

We who are but "children of a larger growth" find that our first lesson in Christian Science is also that of obedience,—obedience to God's perfect spiritual law of love and harmony, which alone can bring us health, happiness, and peace. So long as we resist that perfect law and try to keep our material concept of God and man, and to put our human opinions and desires first, or in any way to blend the material with the spiritual, we can never realize that perfect peace which passes all understanding. Nothing short of the complete surrender of the human will can fit us to enter into the kingdom.

This obedience to Truth, moreover, must be gladly and joyfully rendered. Like a child who rebels against some wise decision of its parents, because it is unwilling to make the sacrifice of its own will or pleasure, and has not sufficient knowledge to see how necessary to its own well-being and progress this decision is, we too are sometimes unwilling to yield the prompt obedience which past experiences should have taught us to give. We have no excuse for not rendering this obedience, because we have proved, by the many blessings and proofs which have come to us at other times, that each forward step required of us is directed and governed by divine Mind, and that fresh blessings to all humanity follow in its train.

The qualities of the childlike mind are of incalculable benefit and assistance to us in our intercourse with our fellow-men. The harshest, coldest thought is melted by the simple love and trust which a little child instinctively gives to all around it. The most degraded of human beings often have a vulnerable spot where children are concerned, and many lives have been purified and sin forsaken through the pure love and fearless trust of a little child. If we also cultivate those qualities of love and trust which are such an essential feature of the child mind, the same results must follow in our intercourse with those around us. We all know how, when we are with some one who expects only the best and highest from us, we almost unconsciously strive to live up to and be worthy of their ideal.

So, if we are putting trust and love in our fellow-men, instead of suspicion and hate, knowing that the one perfect Mind governs all humanity, our expectations will be realized, and we are thereby helping to free them from the false belief that evil has power—the chain with which human beliefs try to bind us—and are leading them with us into the kingdom of heaven. Let us, then, strive each day to become as little children, obedient, humble, trustful, and, above all, loving.

AWAKENING.

ETHEL MAUD NICHOLSON.

THERE are perhaps very few Christian Scientists, even among those who before coming into Science have found inspiration and help from the study of the Bible, who do not acknowledge again and again the wonderful value of the new teaching as an aid to the understanding of the old truth. Take the words of the psalmist, "I shall be satisfied, when I awake, with thy likeness,"—to the present writer they always gave the impression of a sudden awakening, as from sleep, a sudden stepping into a heritage of immortality and bliss. It was to be not only a quick change but it was to be a very complete one, or how were we, knowing as we did know, on what we based our ideas of happiness, to find simply in the presence of God the "fulness of joy"?

But, if we take those same words and compare the process with the awakening of the earth in springtime, the daily unfolding and development through a power none the less real because unseen, we begin to feel more hope of one day approaching the likeness or reflection of infinite good. We as mortals do not expect to step from the grasp of an icy winter into the softness and warmth of a perfect spring. There must be the gradual breaking up of the hard frozen ground, the gradual lengthening of the days, before the first green leaves unfold, the first timid blossoms appear.

Is it not so with our human experience of growth in Christian Science? Only as we let the consciousness of divine Love break up our frozen pride, our cold prejudice, only as we rise and rejoice in the clearer light, do we find any cause for satisfaction in our deepening likeness to the One "altogether lovely." And with the understanding of a present immortality come little by little those small demonstrations over sin and sickness, so uplifting and yet so humbling, which fill us with a gratitude almost too deep for expression as we realize that "this land that was desolate is become like the garden of Eden."

BY THE WAYSIDE.

ROSALIND C. PRATT.

DURING a recent extended trip through the far West and Pacific coast cities, it was my privilege to visit and enjoy the splendid system of Christian Science reading-rooms and church services, an experience which has emphasized anew and given me a keener realization of what this work means toward the world's uplift and redemption. With praise and gratitude to God for the gift of one whose spiritual insight, foresight, and unselfed love made this possible, I know that I voice the feelings of many travelers in sending a word of appreciation and encouragement to these loyal and patient workers at the post of duty in every department connected with the publication of our Christian Science literature.

On one occasion, in the heart of a desert where the one local attraction was the only but sufficient reason for the large hotel, what was our surprise and delight to note *The Christian Science Monitor* on sale. On another occasion, several copies of current issues of our periodicals were placed on the lobby table of a city hotel. In a few moments they had disappeared, but were readily traced, as they were in the hands of readers in various parts of the room. How

and to what extent the coming of Christian Science is liberating the enslaved thought, lifting grievous burdens, and establishing the brotherhood of man, is evidenced by the radical change of attitude over the wide range of experiences which make up the sum of human history. This is shown in the intermingling of nations, the welding of North, South, East, and West; while differing religions have lost in a large degree the keen edge of antagonism. One of the most marked changes noted by the traveler is the freedom from many of the fears which formerly attacked those who were journeying, for seldom does one hear anything regarding the good or bad effects at one time thought inseparable from change of climate or diet. Microbes and bacteria seem to have been relegated to oblivion, and even the habit of getting tired appears to have gone out of fashion. If now and then some "Aunty Doleful" or a disgruntled traveler tries to get an audience, it is rather an amusing object-lesson to note how quickly they are left and let alone.

Among one's fellow travelers one meets many students of Christian Science, and it is a pleasure to note the uniform persistence of the one theme, viz., unity, loyalty to Principle, obedience, and steadfastness; in other words, that each and all be true to the high purpose and the cause which they represent. One field in particular seems to have impressed the visitors in general. As some one said, in alluding to it, "it is a rich church." A brief mental inventory revealed something of its wealth, which consisted of a rich store of humility, vast possessions of brotherly love,—a veritable gold-mine,—its rich ore being the forgiving and forgetting of those things that are behind. Today the stranger rejoices in the unity which found outward expression in the beautiful church edifice, and the harmony so wonderfully expressed both without and within.

Is not this another proof of our revered Leader's clear vision of the church as "that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick" (Science and Health, p. 583).

"THE CHURCH THAT IS IN THEIR HOUSE."

EVA S. W. WILLIAMS.

BEFORE becoming a member of The Mother Church and of a Christian Science society, the writer used to be greatly puzzled by St. Paul's love, so often and so clearly expressed in his epistles, for the churches of Asia. How could he feel such an intimate and personal affection for corporate associations, the greater number of whose members, even in churches of his own planting, must have been individually unknown to him? This seems to have been the mental question. But it was quickly answered by observation and experience of the spirit of love and unity which normally pervades and animates the gatherings of those who meet in order to read or to listen to the Christian Science Bible Lessons. Is not apostolic history seen to be repeating itself when we consider the words of St. Paul in the last chapter of I Corinthians, "The churches of Asia salute you. Aquila and Priscilla salute you much in the Lord, with the church that is in their house"? Who that has attended one or more services of some branch church or society, services held perhaps in the earlier days by some members "in their house," —a procedure calling often for no less courage and self-immolation than are called for in the formation of a "Church of Christ, Scientist," does not thereafter hold for the same a permanent fellow feeling and interest?

Under the title of "Recognition" there stands in the Church Manual (Art. XXIII, Sect. 12) a by-law which reads thus: "In order to be eligible to a card in *The Christian Science Journal*, churches and societies are required to acknowledge as such all other Christian Science churches and societies advertised in said *Journal*, and to maintain toward them an attitude of Christian fellowship." Section 1 of the same article contains the words, "Each Church of Christ, Scientist, shall have its own form of government." What scope for individuality and freedom of action, and withal what a bond of unity, is involved in these few lines! But we are led on to a consideration of Mrs. Eddy's scientific understanding and explanation of the word "church" (Science and Health, p. 583), and also to what she says in the chapter on Atonement and Eucharist, namely, "Our church is built on the divine Principle, Love. We can unite with this church only as we are new-born of Spirit, as we reach the Life which is Truth and the Truth which is Life by bringing forth the fruits of Love,—casting out error and healing the sick" (Science and Health, p. 35). With this church there is no membership that is permanent except the member continues to maintain a loyal attitude and to prove in some measure his fitness for the privilege that is his.

The writer's experience was one of many heart-searchings. Admitted without undue delay to the desired position as "member of The Mother Church," she found—not for days or months, but for years—that she feared lest there should be a falling away and the consequent loss of what was of all things most highly prized. Sometimes, when to discouraged mortal sense there would seem to be hopeless failure to "hold the banner of Christianity aloft" (Science and Health, p. 426), she would almost write to the Christian Science Board of Directors, to tell of her unfitness and to offer her resignation from membership. But the same post would have conveyed also a request to be put on probation for a year from the same date; so the reason for executing the project did not appear logical.

Since then it has become ever more apparent how thankful we have reason to be for the support given to all who are working within the vineyard rather than standing idle without, even until the sixth or ninth hour, taking the vineyard as typical in this instance of the church we love and wish to serve.

"ALL'S WELL."

EVELYN Y. STEELE.

THE good old custom, which still obtains in some places, of a watchman patroling the streets at night, calling out the hours as they pass, and adding the comforting assurance that "All's well," has, I think, a special signification to Christian Scientists. From the very outset of my study of the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy, even before I knew how to pray in the better way, when I felt like repeating the petition of the disciples, "Lord, teach us to pray," even then this study gave me comfort and an assurance that "all's well."

If one is loyal to the teachings of Christian Science—to the Bible and the text-book, the Manual, and the other writings of our Leader—all is well, no matter what temptation confronts us. The Bible is full of passages which give the promise of protection. This is graphically illustrated in the chorus from Mendelssohn's well-known "Elijah": "He, watching over Israel, slumbers not nor sleeps." In the *Sentinel* of March 31, 1906, Mrs. Eddy says, "Christian Scientists are fishers of men. The Bible is our sea-beaten Rock . . . It stands the storm. It engages the attention and enriches the being of all men." As one assimilates these precious truths, he can bring to others the "all's well" of its teachings.

SELECTED ARTICLES.

[Frederick Dixon in *Clarion*, London, England.]

A recent writer in the *Clarion* asks on what Christian Science "depends for its potency" if not "upon things material, nor supernatural, nor upon faith." Now, at the outset, I do not know what this critic means by faith, and it would take considerable space to disentangle the various concomitants of the word. If he means what Philo meant, and Philo, be it said, was a Jew and a contemporary of Jesus and the apostles, that it was the perception of spiritual causation, then Christian Science depends on faith; but if he means by faith what St. Gregory meant when he said that there was no faith in accepting something of which your reason gave you assurance, and this is the common interpretation of the word, then Christian Science does not depend on faith. The one is the scientific faith of a thinker based on his growing understanding of spiritual law; he has faith, that because he has overcome a headache by a slight perception of spiritual law, he will gradually acquire the full knowledge of the truth which is to make the world free. The other is the blind faith of the man who accepts, through an appeal to his emotions, the most dogmatic and unconvincing assertions. The one appeals to reason, which Mrs. Eddy describes on page 327 of Science and Health as "the most active human faculty." The other ultimates inevitably in intolerance and persecution.

Next, Christian Science does not rely on things material, because it regards matter from the same standpoint as the idealistic school of natural scientists—that is to say, either as the subjective condition of the human mind, or as the product of energy. In either event it is a mere phenomenon, and phenomena can only be affected through the causes producing them. At this point, however, Christian Science separates itself entirely from the teaching of natural science. It insists that neither the human mind nor energy is the real cause of anything that exists, but that the sole cause of all real phenomena is divine Principle, and that as this Principle is spiritual, the only true phenomena are spiritual. The human mind or energy is then but a counterfeit or negation of the true Principle, which is divine Mind, just as material phenomena are, in turn, nothing but the counterfeits or negations of the real phenomena which are spiritual and not material.

It is at this juncture, I think, that the confusion arises in the critic's mind as to the meaning of the word "supernatural." The natural scientist confines science to the explanation of secondary causes or physical facts, and puts aside primary causes or spiritual facts as beyond the ken of men in this world. The Christian Scientist disputes this contention, which to him is a mere begging of the question. He insists that spiritual knowledge is much more scientific than material knowledge, inasmuch as it is based on the primary or absolute instead of on the secondary or relative. This, he explains, is the meaning of the phrase in the New Testament translated knowledge of God, but which should, of course, be translated full or exact knowledge of God, and so of Truth. And finally he declares that this knowledge was demonstrated by Jesus through the miracles, which were nothing but the object-lessons in support of his teaching, and that it can be again so demonstrated today.

For centuries the world has regarded the miracle as a violation of law, and even Hume so defined it in describing it as due to the interposition of the Deity, and, as such, supernatural. A more comically ridiculous theory was surely never put forward by a great thinker. A violated law has ceased, *ipso facto*, to be law, the Principle of the universe is reduced to the chief law-breaker, and chaos reigns supreme. Christian Science denies, *in toto*, that the miracle is supernatural; it claims, on the contrary, that it is divinely natural. It explains it simply as the inevitable effect of man's growing perception of spiritual causation and law. The two Greek words quite arbitrarily and incorrectly translated "miracle" in the New Testament mean simply, the one an act of power, the other a sign. The miracles of Jesus were simply acts of power to a people who believed physical causation and material law to be the only realities; while to a people looking for some proof that his teaching was true, they were certainly signs. It was so Jesus himself spoke of them when he bade those whom he taught, if they could not believe for the words' sake, believe for the very works' sake.

[E. B. L. in *Brooklyn* (N.Y.) *Eagle*.]

The point most of us overlook in our adverse criticism of those who resort to prayer to heal disease is that they are for the most part men and women who have looked in vain to the state-favored schools of healing to help them. They agree with Coroner Feinburg that the one remedy for a hole in a dike is to plug it. They are human beings in search of just such a specific remedy. Along comes the practitioner of a cult that declares man's life is not a thing apart from his Maker; that the discords of the flesh are manifestations of failure to rely wholly upon that fact and to trust God without limit, without resort to a material drug,—an inert and non-intelligent thing, as much so as a wooden idol. To this the abandoned man naturally listens, and as he looks deeper into this phase of the problem before him he finds that all literature, sacred and profane, tells of wonders wrought by men of faith in the name of that immanent God. Deep down in his heart is a response to this call which he cannot explain. Very soon he comes to see that there is a power in thought which he had not realized. He believes he has found a specific and a panacea.

Any criticism made against a religionist for his absolute faith in God as the healer of his diseases is superficial if it does not take into account the profundity of this race-old metaphysical phenomenon—no coroner can muster the arsenal of pathology to batter down the fortress of the soul which declares "the flesh profiteth nothing."

[Alfred Farlow in *Townsville* (Queensland, Australia) *Star*.]

Christian Science is based upon the Scriptural teachings concerning the omnipotence and the "All-in-all" of God. "It is the spirit that quickeneth; the flesh profiteth nothing." The major premise of the Christian Science syllogism is the Master's declaration, "God is Spirit" (Rev. Ver.); and every statement contained in the Christian Science textbook is consistently deduced from this premise. Thus it may be noted that the teaching is Christian; and since the Master's teaching is true and therefore scientific, we may note the propriety of the name Christian Science. You say the adherents of Christian Science are often "highly respected and intelligent men." Since men who have deported themselves in such a manner as to become highly respected have demonstrated their excellent judgment, would it not be well to heed the fact that so many intelligent men have accepted Christian Science, and take this as an evidence that Christian Science is a good thing? In any event, the multitudes who have accepted this religion, after having made a thorough investigation of the teaching and having thoroughly tested its efficacy, have continued in their adherence, and this is strong evidence of the intelligibility and the usefulness of Christian Science.

It is the omnipotence and omnipresence of divine Love which destroys sin and disease in Christian Science; and it is this fact which marks the distinction between Christian Science and the exercise of the human will which is called hypnotism or mental suggestion. Christian Science plants itself unreservedly upon the Scriptural teaching concerning God and His creation. It endorses the teaching that God is good, and that He made all that was made, "and, behold,

Digitized by Google

it was very good." It endorses the teaching, "Yea, let God be true, but every man a liar;" that is, let Spirit, God, constitute the basis of all truth, even though it shall make everything else a lie. Christian Science does not teach that disease and evil are not real to erring human existence, but that they have no divine standing, simply a relative existence which can be destroyed by Truth.

[Edward W. Dickey in *Los Angeles* (Cal.) *Clarion.*]

If there is any one place where the practical, helpful influence of Christian Science is needed it is in the busy "marts of trade." We are all more or less familiar with what are termed "trade conditions," and with the powerful influence of fear which from a multitude of causes will arise and paralyze the channels of business activity. Men are coming to recognize the fact that these are unnecessary things, and when the danger has passed often remark that it was all unnecessary. Christian Science brings to this condition of fear, with all the envy and self-seeking that go with it, a positive and practical remedy—the "perfect love" that "casteth out fear."

The man or woman who makes Christian Science the key-stone of his life, soon realizes that his first concern is to obey the "first and great commandment," and the second which "is like unto it." Those who fulfil the commands of the Master to seek "first the kingdom of God," soon find that the other things are relegated to their proper place. "Love for God and man," Mrs. Eddy writes on page 454 of "Science and Health with Key to the Scriptures," "is the true incentive in both healing and teaching. Love inspires, illumines, designates, and leads the way. Right motives give pinions to thought, and strength and freedom to speech and action." The Christian Scientist who is thus purifying his thought of fear and belief in evil, soon has these untoward conditions supplanted by confidence and trust. Instead of the demands of self-interest he finds and readily obeys the demands of the "golden rule." By making it his chief concern to see that he is obeying the demands of God in every detail of his work, he soon seeks the path that brings the greatest good to the greatest number. He begins to see whether or not he is serving his employer as he would like to be served; to study whether he is sparing his competitor the things he would like to be spared; in fine, to see whether he is proving that he is loving his neighbor as himself. The Christian Scientist sees and appreciates that this loving spirit of helpfulness—the spirit of the Master—is what the business world greatly needs.

[R. Stanhope Easterday in *Warsaw* (Ind.) *Union.*]

If there is so much Scriptural justification for sin, sickness, and misery as our critic contends, why did the Saviour spend so much of his time while on the earth eliminating such conditions from human experience, at the same time declaring that his "mighty works" were in fulfilment of the law and in direct accord with the divine will? And if, furthermore, Christian Scientists succeed in healing disease, on the basis of the denial of its reality, in the reasonable light of a wholesome faith in the reality and allness of good, while those of their brethren who so stubbornly argue for the actual existence and reality of misery are not today even claiming to be able to fulfil the Master's command to "heal the sick" as well as to "preach the gospel," is it not reasonable to concede some shadow of possibility to the Christian Scientist's views on this point?

As to the mere doctrinal points raised by our critics, these are not logically apropos, as the essentials of Christianity are easily deducible from Scripture and are provable in "signs following." Mere doctrinal points can, in the estimation of the Christian Scientist, be left to future unfoldings of infinite Truth as a part of the "many things" which the Saviour had yet to say when he left the earth. The essentials of Christian faith will be found, however, reasonably elucidated by Mrs. Eddy in the aforenamed Christian Science text-book, Science and Health. These elucidations, if read by our readers with unbiased minds, will serve to give a far different view of Christian Science to that outlined by our critics.

Conceding that Mrs. Eddy was as a child and as a young woman in poor health, our critics have entirely overlooked the fact that the Science which she discovered healed her of all this and enabled her to spend over forty years of her life in healing and regenerating hundreds of thousands of earth's sin-sick and suffering mortals, by outlining to them through her published writings that understanding of the Christ-method of spiritual healing without drugs which she deduced from the Scriptures and which first healed her. Mrs. Eddy never "charged one hundred dollars for a prayer," and she used no formulas in her healing work. Mrs. Eddy was never a spiritualist. She investigated spiritualism, along with homeopathy and numerous other religious and pathological systems, in her reasonable effort to find the truth, which she finally discovered in Christian Science after having failed to find it elsewhere.

There is nothing in Mrs. Eddy's teachings to indicate that she ever believed she would not experience death, and our critic's allegation to the contrary is but another evidence that he does not understand Christian Science. We tremble also at the thought of one human being essaying to hurl after the departed a cruel taunt to the effect that the grim monster had been victorious. Such essaying of judgment by one not himself entirely "without sin," is to say the least unseemly.

[H. Coulson Fairchild in *Jersey City* (N. J.) *Journal.*]

If Christian Science practice were such as our critic indicates, no Christian Scientist could endorse it, but we are glad to say that he has not described adequately the practice of Christian Science. It seems to me that his reply is irrelevant to his first proposition, which was: "Any physician will tell you that Christian Science is unable to do anything in the matter of restoring health where a pathological lesion exists, as in distinct cases of tuberculosis, typhoid fever, or locomotor ataxia where the spinal cord is affected." In reply to our critic's proposition, I cited three cases cured by Christian Science treatment after these cases had been given up as hopeless by doctors of medicine. One was a case of cancer, another a distinct case of tuberculosis of the lungs, the third a case of spinal disease where mechanical appliances and braces were used to support the child's body. These well-authenticated cases, which were cured under Christian Science treatment, were presented in refutation of our critic's quotation that Christian Science is unable to do anything in the matter of restoring health where a pathological lesion exists. The only reply which our critic vouchsafes to this, as indicated in his article published Dec. 30, is this: "As to the three cures mentioned by Mr. Fairchild, I note that all three cases were for a time under medical treatment, and they had in all probability, like any number of other cases, reached the point where nature was able to cure herself; the province of all medical treatment being to assist and accelerate this process."

It appears to me that he has given altogether too much credit to medical treatment for bringing these cases up to the point where, as he says, "nature was able to cure herself." The fact is that these patients had all abandoned medical treatment in despair, and is it not an unusual coincidence that nature began to work just as soon as Christian Science treatment was administered? If such is the action of nature, and she only begins to cure when medical treatment ceases, would it not have been better if the hundred and forty thousand who are said to die daily under medical

Digitized by Google

treatment had resorted to Christian Science, so that nature could effect the cure unhindered by material means?

Certain other thoughts arise in connection with these cases. For instance, some contend that medicine does not remain long in the system, and in cases of tuberculosis the latter-day physician sometimes recommends air, sunshine, hygiene, etc., as a cure. When a cure of tuberculosis is effected by Christian Science treatment after air, sunshine, hygiene, climatic conditions, etc., have failed, what then cures the patient? The answer can only be that "man's extremity is God's opportunity;" as a last resort we turn to God and are healed.

I am reminded of a case I know about, where a lady was bedridden for five years, unable to do her housework. She received careful medical attendance, but at the end of five years she was still a bedridden woman. She turned to Christian Science and was healed in three months' time so that she was able to arise and walk and do her daily household duties. Some of the neighbors said: "It is the after-effects of the medicine." Others said, "She could have done it before if she had wanted to." But the fact remains that when Christian Science treatment was administered the woman recovered. Now there are thousands of well-authenticated cases of Christian Science healing, and it cannot be that all of them are due to the after-effects of medical treatment, and we doubt if any of them are the results of such so-called after-effects.

In the critic's reply of Dec. 30 I cannot make out whether he believes it to be the divine Mind or human will-power and suggestion which effect the cures in Christian Science; but Christian Scientists understand that their cures are not based on human will-power, for willing the sick to recover is not Christian Science. If, however, the cures be effected by the power of God, He cannot be "overworked," and therefore the Principle of Christian Science cannot be "overworked." Human will-power and mental suggestion are repudiated by Christian Science and are not the Principle thereof. On the other hand, we agree with our critic that faith in the power of mental suggestion and concentrated so-called human will has been "overworked," for this belief is without power to do good or evil. Christian Science teaches that the Mind of God, the Mind which rules the universe, is the only power.

[Ezra W. Palmer in *San Juan Democrat*, Aztec, N. M.]

Christian Science is the religion and practice of Jesus made applicable and serviceable to modern life. Christian Science is based on the Bible and the Bible alone. In doctrine and precept, in preaching and practice, it follows the Biblical precedent. It teaches, as does the Bible, that God is Spirit and man spiritual, and that therefore only through spiritual understanding can man know God aright, or gain true peace and harmony. Through the spiritual understanding gained by the study of the Bible and Science and Health by Mrs. Eddy, the sincere student heals the sick, reforms the wicked and sinful, and because of the new light shed on the Scriptures the Bible promises glow with new beauty and deeper meaning. It is safe to say that no other religious movement since the time of Christ Jesus has stirred in so short a time such vast numbers of people to turn to God as has Christian Science.

Historical evidence is conclusive that not only did Jesus and his disciples heal the sick by the power of prayer, but that for three hundred years after the ascension the healing of sickness by prayer was a prominent feature of the early church. When creed, dogma, and pride of temporal power crept into the church, the vital healing gospel which Jesus gave to the world was lost. This darkened condition of men's thoughts continued for long centuries, lighted only occasionally by isolated cases of healing, until Mrs. Eddy gave to the world the scientific statement of Christianity in Science and Health, showing that the Bible is based on a clearly demonstrable Principle, and that healing the sick, raising the dead, destroying sin are not miraculous events contravening divine law, but in strict conformity to that law, and as clearly demonstrable when spiritually understood as is a problem in mathematics. In proving that the real universe is spiritual, perfect, and immortal, "an house not made with hands, eternal in the heavens," Christian Science has also made it clear that sin, sickness, poverty, discord, death, and all the myriad other forms of evil, are not a part of the true spiritual universe, the universe of God, and that therefore in destroying them the Christian Scientist is not only following the example of Jesus and his disciples, but also working in conformity to the divine will.

Christian Science interprets law, the basic law of the universe, and when the splendor of Mrs. Eddy's unfoldment of the nature of God and His creation is made apparent to the individual, he never flounders among conflicting isms and theories. He never mistakes the false for the true. He knows, and moreover he proves that he knows, by demonstrating the power of God to heal the sick, destroy disease and the ills of humanity, and give man permanent and satisfying peace.

In this understanding of spiritual things no confusion of thought is necessary. To see that the spiritual only is the true, and to adjust our thinking to that tremendous fact, sometimes requires time and it always requires steadfast and earnest effort, and the desire to know the truth, no matter how her garb may differ from our preconceived notions. To understand Christian Science, one must approach the subject with an unbiased mind, hungering and thirsting after righteousness. To such as these Christian Science unfolds the beauty of holiness, and proves beyond one's most sanguine hope that God is ever-present Love and ever available.

Our critic does not understand the Christian Science teaching of the unreality of death. Perhaps if he would compare some of the Bible references on this subject with the teachings of Christian Science, he would see more clearly the consonance of Christian Science teachings with the Bible. Jesus said, "If a man keep my saying, he shall never see death." If to keep the saying of Jesus will abolish death for the individual, it is difficult to see how death can be real, as the real is indestructible. Death cannot manifest itself where right understanding of God illumines man's consciousness. It was on this basis that Jesus raised Lazarus from the dead, restored the widow's son, and himself overcame death after his three days in the tomb.

[Written for the *Sentinel*.]

THOU KNOWEST BEST.

EUGENIA BEATRICE MABURY.

In other days of other years afar,
To all life's vaunting joys I gladly turned,
Mine own self-will, my happiness, the quest—
And yet in vain! For this I had not learned:
Thou knowest best.

Through tears and trials still 'tis ours to prove,
Or soon or late,—for so to choose we may,—
There is no gladness, harmony, nor rest
Until we do Thy will, content to pray:
Thou knowest best.

Beyond the dim horizon's distant hills
I cannot see the path, nor trace the way
My feet shall walk. Nor do I ask, What test?
What gain? Enough for me it is to say:
Thou knowest best.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

FOR THE WORK'S SAKE.

WHEN Jesus healed the sick on the shores of Galilee, in its towns and villages and by its roadsides, as recorded in the gospels, we can scarcely assume that he did this work simply that the sick might be healed, but rather because it seemed to him a necessary incident in exemplification of the gospel he preached,—a gospel which invariably heals the sick when it is understood and practised.

It would appear, from the great Teacher's primary instruction to the twelve, as he sent them forth on their world-mission, that his chief purpose was to establish in men the knowledge that the kingdom of God was at hand. It was inevitable that this knowledge of the omnipotence and omnipresence of God should destroy error and evil of every name and nature, and that his disciples who had listened to his instructions and had seen him perform those wonderful works of healing in exemplification of the power of Truth to heal from sickness as well as save from sin, should have come to regard the healing of the sick as part and parcel of their work. In other words, Jesus recognized, nor could his disciples fail to perceive, the need for convincing humanity by such works as these that the doctrines he taught, though new and perhaps startling in their departure from the "letter" taught by the scribes and Pharisees, were nevertheless not "vain babblings."

So far as the present need for a convincing presentation of the gospel is concerned, times and people have not changed in the slightest, and in that respect the first century of Christianity and this twentieth century are identical. Mrs. Eddy recognized this parallelism when she wrote: "Jesus proved to perfection, so far as this could be done in that age, what Christian Science is today proving in a small degree,—the falsity of the evidence of the material senses that sin, sickness, and death are sensible claims, and that God substantiates their evidence by knowing their claim" (No and Yes, p. 38).

Jesus' "great commission" to his followers was to heal the sick and to preach the gospel, and he made plain their coincidence when he named as a proof of "them that believe" that recovery should follow their ministrations to the sick. In view of the Master's direct statement to this effect, are we as Christian Scientists exceeding our privilege in declaring that only to the extent that Christianity is obeying the command of this "great commission" is it in fact Christianity? The kingdom of God is "at hand" now, even as it was when our Master impressed its immanence upon his immediate followers. It was through his perception of the all-power and presence of God and man in His image and likeness that Jesus healed the sick and the sinning, and thus taught, as Mrs. Eddy tells us, "that the kingdom of God is intact, universal, and that man is pure and holy" (Science and Health, p. 477).

Jesus likewise impressed upon his followers the necessity to seek first the kingdom of God; not for the reason that all material things should be added to them, but rather for the kingdom itself, irrespective of any and all consequences; that the acquisition and possession of this "kingdom within" was the one thing to be desired and sought after, rather than the material possessions which like the bright-hued bubble vanish at a touch. He knew, however, and he made this point clear to his hearers, that it was an impossibility to gain the kingdom of God by an effort that had for its sole incentive the desire that the material things which he had enumerated might be acquired, and it must have been because of this that he laid such stress upon the search for the kingdom,—that the kingdom must be first, and that all material possessions were as naught when weighed in the balance against it.

Mrs. Eddy writes in "No and Yes" (p. 46): "Man has a noble destiny; and the full-orbed significance of this destiny has dawned on the sick-bound and sin-enslaved." When mankind seeks "first the kingdom of God, and his righteousness," in the sense that this seeking is for the sake of the kingdom itself, and every other desire is eliminated, then indeed will the kingdom of God be within men, and the sick will be healed as surely as they were in the earthly experience of Jesus. We need to keep continually before us the fact that work in Christian Science, to be certain and effective, must be for the work's sake,—must be unselfish, loving, and compassionate. Then, and then only, is the kingdom of God come nigh unto us.

ARCHIBALD MCLELLAN.

LAW AND OBEDIENCE.

IN talking recently with the pupils in a Sunday school class on the subject of the commandments, the writer asked these young people of what practical value law would be in human experience without obedience. It is self-evident that law must be operative on the human plane, and that responsiveness to the demand of every just law gives a larger sense of freedom, rather than restriction, as so many seem to imagine. Divine law implies divine protection,—it safeguards life and all that makes life desirable; yet without obedience the protection is missed and instead we have penalty, which so many mistakenly believe to be divinely inflicted. Disobedience to God's law of necessity brings penalty, for the very reason that obedience brings blessing and protection, and without obedience these cannot be realized. The psalmist says, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling." Neither ignorance of divine law nor disobedience to it can secure the protection which we all need and desire.

In Science and Health (p. 183) we read, "Obedience to Truth gives man power and strength." Obedience, rightly understood, is a spiritual quality, and it tends to lighten every burden by making every duty easy. Even on the physical plane a ready obedience to every right requirement does wonders in the way of agility, suppleness, and grace in bodily activity; whereas the mental habits of obstinacy and self-will not only affect the outward movements of the body, but undoubtedly influence adversely all its functions which ought to be controlled by the higher nature and reflect its obedience to spiritual law. For this reason, if for no other, children should be taught from their earliest hours the tremendous importance of obedience to right, and shown that this obedience will equip them to resist and set aside the unjust enactments of mortal mind, including its laws of disease, misfortune, and death, these having no divine authority. Our revered Leader says, "The entire education of children should be such as to form habits of obedience to the moral and spiritual law, with which the child can meet and master the belief in so-called physical laws, a belief which breeds disease" (Science and Health, p. 62).

People often wonder why their bodies do not yield to the declarations of Science which they make, when the trouble is that their thought has never been trained to that ready and intelligent obedience which leads to the highest results on every plane of endeavor. People also question the need of argument in the healing work of Christian Science, when it should be readily seen that mortal mind invariably stops to argue every demand which calls for obedience, and often contends for the wrong when it should

Digitized by Google

promptly surrender to the right. The arguments of Truth are therefore the most effective weapons wherewith to meet the resistance of the blinded mortal sense.

Let no one suppose for a moment that blind, unquestioning obedience to every human requirement is here inculcated. Far from it. Children and adults alike should, however, recognize the need of obedience in the home, the school, the Sunday school, and as they respond gladly to this demand they will find the wonderful protection of divine law which lifts us above the plane where the exactions of mortal mind are made. The one who understands how to work out mathematical problems would not be tempted to make mistakes; his knowledge of the science of numbers would be his protection against such errors. Much more does the understanding of spiritual law, strengthened by constant obedience, give the truest security. Paul counsels us to bring "every thought to the obedience of Christ." The sacred record shows that Jesus was obedient to parental authority in childhood and youth, and the spirit of obedience which he manifested gave him that dominion which brought a response even from the winds and waves; indeed nothing could resist it. We read in Hebrews that, having reached perfection through obedience to divine law, he "became the author of eternal salvation unto all them that obey him." Should we not then all seek to deserve Paul's commendation of the faithful in his own time, "Your obedience is come abroad unto all men"?

ANNIE M. KNOTT.

THE HEALING TOUCH.

WE are told that the common people heard the Master gladly, and when we remember the size of the audiences he addressed, the long distances which the many must have come to hear him, and the frequency with which they followed him from place to place that they might garner all his marvelous sayings,—the ease with which he reached the people becomes apparent, and we are brought face to face with the inescapable inference that, preached in its purity and power, the gospel must ever be irresistibly winsome.

In this twentieth century, however, it will be conceded that one of the most serious problems for the average minister is that of gaining the ear and holding the attention of those whom he would bless. Many a church bulletin today appeals largely to the world's love of entertainment, and with the ever-increasing complexities and distractions of modern life, this matter of securing a hearing for religious appeal seems to be growing no less difficult than vital. Happily for all mankind, Christian Science has come to make it clear that, when spoken in demonstration of its verity and healing power, the gospel will command attention today even as it did in the first century, and for the reason that it answers satisfyingly to the "heart's great need."

Science greatly broadens one's perception, and brings escape from the bondage of man-made castes and creeds. It consequently begins at once to lessen the impulse to judge men without considering the hereditary predisposition and educational bias of mortal belief, and it thus implants and nourishes that more kindly and compassionate regard for one's fellow men which they so quickly recognize and to which they so gladly respond. Love is now "reflected in love" (Science and Health, p. 17) and the fulfilment of the Saviour's prayer "that they may be one" is brought nigh. The joy of this active sense of brotherhood becomes an abiding possession, and we extend the hand of fellowship with a heartiness and spontaneity we had never known before.

More than this, the true Christian Scientist begins to think more scientifically and savingly about his brother. He no longer identifies the real man with material personality. The handicap of human sense which results from facts for which it is in no degree responsible begets that intelligent pity which, in union with the consciousness of Truth, gave such characteristic warmth and glow to the Master's attitude toward men.

Of yet further significance is the fact that Christian Science gives to every would-be helper of men the ability to prove to them the truth of the Master's words and their present efficiency. Whatever the human condition, its real savior is sure to win the "thank you" which means not only gratitude but teachableness, consent to one's incoming. The life-touch has been established and the way is ever open thereafter for the ministry of brotherhood.

It is our every-day privilege to comfort, to encourage, and to win men, and the joy and freedom of true living is experienced as we enter into this ministry of Christ, a ministry which is the one vocation that harmonizes with and glorifies every avocation of human life. It reveals to men the Master's healing touch.

JOHN B. WILLIS.

AMONG THE CHURCHES.

LOS ANGELES, CAL.

[The following letter is so indicative of the interest and enthusiasm attendant on the campaign for clean journalism as an essential factor in the general uplift of human thought, that we are glad to give it place in our columns.]

Editor-in-Chief, The Christian Science Monitor:—Last evening the six churches and two societies of Greater Los Angeles met together in the interest of the *Monitor*. This meeting was the largest and most helpful we have had in connection with the work for the *Monitor*. A number of individual experiences were given which vividly portrayed the helpful and regenerative work our paper is accomplishing. A deep feeling of gratitude was manifested, which took expression in the form of a resolution instructing the chairman to telegraph you the sentiment of the meeting. In accordance with this instruction, the following night letter was sent:—

"The members of the churches and societies of Greater Los Angeles, in joint meeting assembled for the object of extending the circulation of the *Monitor*, and thus fulfilling our Leader's purpose to elevate and purify the world's consciousness through clean journalism, extend to you their appreciation of the work accomplished by our daily paper. You may count on us at all times for cooperation."

WILLIAM E. BROWN, *Chairman.*

LAKEWOOD, OHIO.

A statement in the *Independent* of the issue of Sept. 21 says that the local Christian Science church has plans under way for a large church edifice. In order to correct any wrong impression that may exist, the members of this church ask us to state that while in due time they hope to have a church edifice of their own, their lot at the corner of Detroit and Virginia avenues is as yet only partly paid for; and that plans for a building will not be prepared until that is accomplished.—*Lakewood Independent.*

KINSTON, N. C.

The Christian Science church in Kinston has commenced the erection of a handsome church building on the corner of East and Gordon streets, which, when completed, will be most attractive in architectural design and convenient to the membership. It will have a seating capacity of about two hundred. Work is being rushed, that the building may be completed as soon as possible consistent with good workmanship.—*Free Press.*

THE LECTURES.

BOSTON, MASS.

The semiannual lecture on Christian Science was given Thursday night [Nov. 2] at The First Church of Christ, Scientist by Willis F. Gross of the Christian Science board of lectureship. John C. Lathrop, first reader of the church, in introducing the lecturer spoke as follows:—

The Mother Church welcomes this additional opportunity when it can give to the public, through the means of a lecture, a clearer sense of the great truth of Christian Science.

Agassiz, the celebrated naturalist, said: "Every great scientific truth goes through three stages. First, people say it conflicts with the Bible. Next, they say it has been discovered before. Lastly, they say they have always believed it." This has been the experience of Christian Science, and it is interesting to note that many thousands of good people feel they are at this final stage, for, so naturally and inevitably have its great truths unfolded to them; so many vital and lasting benefits have they mentally and physically received through its ministrations; so absolutely convinced are they that its divine Principle and divine rules are demonstrably true and infallible, that they are certain its law and order are the law and order of God, and it seems to them now as though they must have "always believed it."

We are pleased to have with us this evening one who needs little introduction to a Boston audience. His long and successful labors in Science in this vicinity; his luminous literary contributions, and his devotion to this cause, I believe have, in the opinion of many in this community, amply fitted him to speak instructively and authoritatively on this important subject.—*Christian Science Monitor.*

SYDNEY, N. S. W.

On Sunday afternoon, Sept. 3, William D. McCrackan, M.A., delivered an interesting and well-attended lecture on Christian Science in the Lyric Theater. He was introduced by Charles H. Gibbs, who said in part,—

The subject of Christian Science is attracting the attention of thousands of intelligent people of all classes in the civilized world, but some seem to get a wrong impression of what Christian Science really is because they do not consult the right source; that is, the text-book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. A board of lectureship was established by The Mother Church in Boston some years ago, with the object of correcting mistaken ideas and misrepresentations about Christian Science. The gentleman who will address you this afternoon is an accredited member of this board, and speaks with authority on this subject. I know that I am introducing him to an unprejudiced, generous audience, who, no matter what their views on religion may be, are all in pursuit of health, happiness, and freedom; and Christian Science, if rightly followed, opens the way to this attainment.

The progress of Christian Science is the marvel and wonder of the age, for it is not yet half a century since Mrs. Eddy, its Discoverer and Founder, published it to the world; and today it has circled the earth, carrying healing in its wings. I myself have been healed by Christian Science of long-standing troubles, so it gives me great pleasure to have the subject presented this afternoon to a Sydney audience.

Mr. McCrackan again lectured on Christian Science at the Town Hall, on Monday night, Sept. 4, to a large audience. He was introduced by Arthur Willis, J. P., first reader of First Church, who said in part,—

It has fallen to my happy lot to introduce to you tonight the gentleman who has been deputed by the board of lectureship in Boston to enlighten us with regard to the science or knowledge of the Christ,—Christian Science; but before doing so, I should like to say a few words. Some forty-five years back a woman lay on her bed, very sick and lonely; as she graphically tells us, "already within the shadow of the death-valley" (Science and Health, p. 108). She perceived the truth of the Master's teaching and was immediately healed. For years she sought the solution of this mind-problem. The search was rewarded, and gradually the revelation dawned upon her and a little band of followers gathered round her. This woman was Mary Baker Eddy.

In 1879 a church with twenty-six adherents was formed in Boston, U. S. A. There are now spread throughout the world thirteen hundred and sixty-seven recognized churches and societies, in which the one voice of prayer and praise and gratitude ascends ceaselessly for this knowledge of God which gives freedom from sin and disease. No wonder, when Peter and the apostles were being tried by the council, as told in the sixth chapter of Acts, that Gamaliel should in these memorable words have cautioned their judges: "Refrain from these men, and let them alone: for if this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God."

Correspondence.

SPOKANE, WASH.

A lecture on Christian Science was delivered Sept. 24 by Willis F. Gross. The introductory remarks by Edgar McLeod were in part as follows:—

We have come here this afternoon to hear something of a religion that, without the propaganda usually accompanying great religious movements, in less than half a century has spread its gospel over the globe and has stirred the world's thought profoundly. It has, moreover, dignified an appropriate religious representation in the five grand divisions of the globe. In our cosmopolitan cities we meet men and women from practically every civilized land who have felt the healing touch of Christian Science. No matter what our previous conviction, no matter how assured our position, the scope of this movement "must give us pause," and compel the question, What force or basic law is back of this healing religion that makes its appeal to so wide a range of thought and experience?

The response which Christian Science has met in every quarter of the globe, in every section of society, shows the universal yearning for a higher and more spiritual interpretation of life and its uses than our schools and our systems have given us; men and women are learning the insufficiency of material successes, achievements, and triumphs to meet the heart's longing for that peace which can only come through a more spiritual apprehension of life. Christian Science has given the world a God for whom it makes no apologies; a God who is "of purer eyes than to behold evil,"—the same God of whom Jesus told the woman at the well; a God who must be worshiped "in spirit and in truth."

With all we owe mythology for its literary wealth and classic beauty, the heart is revolted to find the gods of Olympus in general synod planning not only for the good and happiness of the children of men, but also for their sorrow and undoing. I think there is nothing so gloomy and terrible in the history of the race as the belief that appears to have been shared alike by pagan, Turk, and Christian, that God visits His children not only with good, but often with evil. In Christian Science, however, we learn that God sends no evil or sorrow on His children, but heals their diseases and tenderly cares for them in all life's vicissitudes when His laws are understood and enforced.

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Adrian, Mich.—Prof. Hermann S. Hering, Croswell Opera House, Nov. 24.

Aldershot, Hampshire, Eng.—Bicknell Young, Alexander Hall, 3 p.m., Nov. 29.

Altus, Okla.—Clarence C. Eaton, Court House, Nov. 21.

Aurora, Ill.—Judge Clifford P. Smith, First Congregational Church, 3 p.m., Nov. 19.

Brighton, Sussex, Eng.—William D. McCrackan, M.A., Hove Town Hall, Nov. 30.

Buffalo, N. Y.—William R. Rathvon, Convention Hall, Nov. 17.

Chicago, Ill. (Third Church).—Judge Clifford P. Smith, Church Edifice, Washington boulevard and Leavitt street, Nov. 20 and 21.

Chicago, Ill. (Seventh Church).—Virgil O. Strickler, Church Edifice, 5318 Kenmore avenue, Nov. 23, 24.

Cincinnati, Ohio (First Church).—Virgil O. Strickler, Music Hall, Nov. 21.

Fresno, Cal.—Bliss Knapp, Barton Opera House, Nov. 20.

Galena, Kan.—Clarence C. Eaton, Opera House, Nov. 23.

Hanford, Cal.—Bliss Knapp, Hanford Opera House, Nov. 21.

Ithaca, N. Y.—William R. Rathvon, Christian Science Chapel, University avenue and Cascadilla Park, Nov. 21.

Jersey City, N. J.—Prof. Hermann S. Hering, Orpheum Theater, 3 p.m., Nov. 19.

Joplin, Mo. (Second Church).—Virgil O. Strickler, Joplin New Theater, 3 p.m., Nov. 19.

Kirkwood, Mo.—Hon. Clarence A. Buskirk, Church Edifice, Washington and Clay avenues, 3 p.m., Nov. 19.

Lawton, Okla.—Clarence C. Eaton, High School Auditorium, Nov. 20.

London, Eng. (Second Church).—Bicknell Young, Church Building, Palace Gardens Terrace, Notting Hill Gate, W., Nov. 30.

Madison, Wis.—Prof. Hermann S. Hering, Women's Building, Nov. 23.

Miami, Okla.—Clarence C. Eaton, District Court Room, Nov. 24.

Newburgh, N. Y.—Prof. Hermann S. Hering, Palatine Hotel, Nov. 17.

New York, N. Y. (Second Church).—William R. Rathvon, 68th street and Central Park West, Nov. 24.

Norfolk, Va.—Frank H. Leonard, Granby Theater, 3:30 p.m., Nov. 19.

Oklahoma City, Okla.—Clarence C. Eaton, Overholser Opera House, 3 p.m., Nov. 19.

Oneida, N. Y.—William R. Rathvon, Salvation Army Citadel, Nov. 20.

Pittsburgh, Pa. (First Church).—William R. Rathvon, Memorial Hall, Nov. 23.

Peoria, Ill.—Judge Clifford P. Smith, Mohammed Temple, North Monroe street, Nov. 17.

Portersville, Cal.—Bliss Knapp, Nov. 23.

Ridgewood, N. J.—Prof. Hermann S. Hering, Opera House, Nov. 20.

Rutland, Vt.—Frank H. Leonard, Church Edifice, Nov. 16.

Seattle, Wash. (Fourth Church).—Judge Septimus J. Hanna, Moore Theater, 2:30 p.m., Nov. 19.

Southport, Lancashire, Eng.—Bicknell Young, Cambridge Hall, Nov. 27.

St. Louis, Mo. (First Church).—Hon. Clarence A. Buskirk, Church Edifice, Kingshighway and Westminster place, Nov. 16.

Topeka, Kan. (First Church).—Francis J. Fluno, M.D., Grand Opera House, 3 p.m., Nov. 19.

Utica, N. Y.—William R. Rathvon, Majestic Theater, 3 p.m., Nov. 19.

Wheaton, Ill.—Judge Clifford P. Smith, Library Hall, Nov. 19.

TESTIMONIES OF HEALING.

With a heart overflowing with gratitude, I wish to express through the *Sentinel* appreciation for the many blessings which Christian Science has brought me. I first heard of it about three years ago, at a time when the most prominent physicians in the city of Cincinnati (my home town) pronounced my case a severe organic malady, and advised an operation as my only means of recovery. Although I was a great sufferer at this time, and in a very run down and nervous state, both physically and mentally, I was at first reluctant to try what I believed Christian Science to be.

My friend, who had spoken to me of Christian Science though not a Scientist herself, had heard what it had done for others, and knowing how intensely I suffered, she urged me to take treatment from a practitioner. This I finally consented to do, and much to my joy I was healed of the so-called organic disease in three weeks. The nervous disorder, however, was not so ready to yield to the power of Truth, but it has now entirely disappeared into its native nothingness.

In August, 1909, I was threatened with severe pains and inflammation of the right side, evidently symptoms of the same disease for which I had been treated the previous summer. I consulted a Christian Science practitioner in Memphis, and the trouble was entirely overcome in from three to four weeks. For two years I have had entire freedom from this disease, and for this physical healing I am more grateful than I can express; but for the spiritual apprehension of the Scriptures which I have gained, I am even more grateful each day. I am now enabled to read the Bible understandingly, which was something I had never before been able to do.

I hardly believe that any one could have come into Christian Science under greater difficulties than those which seemingly confronted me. Reared in a strictly orthodox Jewish family of six children, the opponents to my acceptance of the truth were many, and naturally much antagonism and criticism was the outcome of what they believed Christian Science to be; but I have bravely borne the cross, and have the crown of rejoicing. While my healing has never been acknowledged by my family, I know it has been through God alone. I also feel that the good seed has been sown in my home, and will bring forth its fruits in due season.

For all that Christian Science has done and is doing for me and mine, both physically and morally, I am more grateful each day to God, to Christ Jesus our Wayshower, and to our beloved Leader, Mrs. Eddy. I hope so to live as to let my life attest my gratitude and sincerity.

FLORENCE R. HEIDINGSFELDER, Memphis, Tenn.

I am very grateful for the opportunity afforded me when a child to attend the Christian Science Sunday school for about four years. During that time I was twice brought out of severe illness through the healing power of Christian Science. I also had many proofs of its efficacy in case of accidents and minor sicknesses. At the age of nine years, having been left without father or mother, I went to live with relatives who were very much opposed to what they thought Christian Science to be, so that for several years I did not hear it mentioned. Although I remembered the physical benefits I had received through its help, I failed to make use of its teachings; but I now know that the seed sown in my thought at that early day was the cause of my constant longing for something higher and better than I had found.

At the age of fourteen I joined a church, but was not contented there. As I grew older I became more discontented, and wandered around to the various churches, to see if I might find one whose followers seemed to be

Digitized by Google

happier or better for having that religion. But I found none until I returned to Christian Science, and it proved to be the religion I needed. To me it is everything,—the present help to which I turn for every need. I have had many proofs of its healing power, and I have also been able to overcome a bad temper which would manifest itself at times; but my greatest troubles were discontent and worry over past experiences. It had seemed that fate was against me, and although I always tried to do right, everything seemed to turn out wrong. I was both unhappy and discouraged with life, and would have welcomed an end.

I am now glad to say that I have been able to bury the past. I trust the future to God, and live just for today in His loving care. I find that trials prove to be blessings, and "all things work together for good." I have learned that Christian Science never fails us, no matter what the need may be, if we live up to its teachings and apply them.

Some time ago, in stepping out of the bath tub, I slipped and fell, injuring one of my toes severely. I immediately declared the truth, and without any fear or sense of pain I raised the toe into its proper place, but by the time I was ready to put on my shoe the foot was very much swollen. I took up Science and Health, read it for some time, and worked for myself to the best of my understanding. I knew that as God is the only power, there was no other power which could keep me from my duty as teacher in the Sunday school the next morning. I again worked for myself when I retired that evening, and also in the night when I wakened and found the foot still swollen. Turning on the light, I read Science and Health for about an hour, and went off to sleep, feeling assured that all would be well by morning. It was so,—the swelling was all gone, and although the foot was still discolored that also passed away in a day or so, and the toe was as perfect as ever, except for a ridge around where it was broken, which remained for about two weeks. Suffice to say that I went to Sunday school the next morning, and walked some distance after church. In the afternoon I went to a Christian Science lecture without experiencing the least pain or inconvenience.

For this healing and many other benefits and blessings I have received through Christian Science, I am indeed very thankful to God. I am also grateful to Mrs. Eddy for showing the world how to obtain the truth which heals and saves.—Miss Ada Turley, Los Angeles, Cal.

[Translated from the German.]

It is with a grateful heart that I think of the wonderful help which Christian Science has brought me. Since early childhood I had suffered from ill health, and conditions became almost unbearable as I grew up. I consulted several physicians, whose opinions differed very greatly, and I was treated according to the diagnosis of each. I then held a position as a saleswoman, and as I was not benefited by all the medicine I was taking, the examining physician sent me to a convalescent home, whence I returned home feeling that I was able to resume my position; but there was no lasting improvement, and the old troubles returned with renewed force. To the former ailments difficulty in breathing was added, and my condition grew such that I thought I would have to give up my position.

Then something wonderful occurred! The lady who was the head of the firm told me that she had been healed through Christian Science of a disease considered incurable by *materia medica*. I listened to all this as to a fairy tale, and could hardly believe that I too might be healed, but the address of a Christian Science practitioner being given me, I went to see her and asked for treatment. This was early in December, 1909, but as I intended to go back to Breslau three or four weeks later, in order to take a permanent position as an office clerk, the treatment was postponed. The practitioner handed me a few copies of *Der Herold der Christian Science*, saying there was no reason why I should not recover my health through reading this literature; so I began to read it diligently, and experienced a change which was noticeable to all who had been aware of my former condition. The prediction of the practitioner came true, for when I went to see her again I was well.

Through the recognition of the healing and liberating truth, as presented to us by our revered Leader, I have become a new woman mentally and physically, and when thinking of her untiring and consecrated work for humanity I feel that I can give no adequate expression to my gratitude. With the growing apprehension of the immortal truths which she has given to humanity, my desire increases to live in accordance with her teachings, that I may do my share in order to have them realized—that the kingdom of God may be established on earth.

Margarete Schlegel, Breslau, Germany.

With a heart full of gratitude for Christian Science I give my testimony, hoping it will benefit some one who is seeking to be loosed from bondage. One evening in June, 1910, while about my work at the factory, I was suddenly taken ill, and consciousness seemed to be leaving me, so that I was unable to tell any one what to do for me; but they did the best they knew. I was put into an automobile and taken home, and while on the way I was at times conscious enough to wonder what had become of my right hand and arm. I then found that I had lost the use of my entire right side. When I reached the house my wife met me at the door and assured me that I would be all right, as I was already being treated by a Christian Science practitioner. This was about seven o'clock, and an hour later I suddenly got up and walked around the room; my wife prepared me some supper and I ate heartily. About nine o'clock the bosses of the factory came in to see how I was getting along, and were surprised to find me sitting on the front porch ready to speak to them. They told me not to think of coming to the factory the next day, as it was Saturday and I would have a couple of days to rest up; but to their surprise I was able to be there the next day. I stayed until noon, and came home feeling perfectly well and proceeded to cut the grass on the lawn.

This was to me indeed a wonderful proof that Christian Science is the truth which makes men free. For this healing and many other blessings received I am deeply grateful to God, and to our beloved Leader, Mrs. Eddy.

Jacob H. Kline, Norwood, Ohio.

I feel it my duty to tell others some of the many blessings we have received through Christian Science. It has made our home a place of peace and harmony, in place of one of discord and suffering. When we came into Christian Science eight years ago, I was healed of a cough of nine years' standing, and later was healed of a fever in its worst form, when four persons passed away from it in our little town under the care of physicians. I was, however, healed, and was strong and well and did the work for eight in the family. Our daughter was healed of a distressing nervous trouble of about ten years' standing, and our children who were subject to a severe throat trouble every winter are now entirely free from it.

We have had some serious accidents, but through the understanding of God's protecting care they were overcome. I find that we need not fear if we follow in the footsteps of Truth. Mrs. Eddy tells us that we should keep our minds so filled with Truth and Love that there will be no room for error to enter in, and I am trying to remember Christ Jesus' words: "I am with you alway, even unto the end of the world." I thank God, and I am grateful to dear Mrs. Eddy, for all the blessings we have received in Christian Science.—Hattie Goodman, Alexander, N. Y.

Digitized by Google

I can but feel truly thankful for the blessings that have come to me, as I look back to the time of my sickness, when all seemed darkness. For five years I had been under the care of doctors most of the time. I also went to a specialist, who helped me at first, but each time the trouble came back again. At last I became so greatly discouraged and so weak that I gave up trying to fight against the disease any longer. I was a professing Christian, and felt that God put me here for a purpose; therefore I must not be discontented. I counted my blessings, and knew they were many, but I could not see the bright side of life.

After I had lost all faith in medicine, I was asked by a friend to try Christian Science; but like many others I had inquired about it some time before, and had gotten my information from people who knew very little more about it than I did. Their opinion, together with some articles I had read, gave me a wrong impression and turned me against this Science; but I was getting worse, and as I had my school work to do I decided to try it. From the first treatment I never took any more medicine, and this was nearly three years ago. Before that time I wore glasses and was troubled with a bowel disorder, but I am glad to say that I have not worn glasses since the first week after I began to take treatment. I grew steadily better, until I could say I was well. The people with whom I am associated in my work as a teacher remarked about the improvement in my health, and my work in the following year was a good test, as it was more difficult than during any year I had taught; but I did not get discouraged, and the nervousness never came back.

I hope this testimony may lead some one to find the bright side of life as I have found it. I give my thanks to God for the blessings I have received.

VELMA L. KINSEY, Englewood, Ohio.

The time has arrived when I feel that I ought to give my testimony, which may be of help to others, especially those of my own country, Switzerland. Seven years ago I left Geneva for England, after having gone through illnesses of every description. The climate of England seemed to be very bad for me; I was constantly ill, and after a few weeks something led me to go to America. Arrived there, I was given the opportunity of traveling in Canada, in Texas and the West, but with no improvement to my health. After this trip I tried to work again as a teacher, and obtained a most desirable position in a good school, where I had everything to make me happy, but after a few months my health broke down completely. The doctor gave me little hope of recovery, and advised me to leave America, saying that the climate was not suited to me.

This was perhaps the hardest moment of my life, and the future looked very dark. I went to New York, where I was almost too ill to go out. Some few years before I had lost two brothers, with lung and heart disease, and on account of these two fatal illnesses in our family, the doctors naturally gave me up. I had heard of Christian Science from some English friends before I had left Geneva, and one day in New York the thought of this came back to me, and at once it came into my mind to try it, as I was very unwilling to return to Geneva. This was the turning-point for me. I obtained Mrs. Eddy's book, and the first time I opened the Bible the truth was revealed to me. I felt that I had no longer any need of doctors or medicine, which I had taken in great quantities all my life. My cure might be said to have been instantaneous, for from that moment all pain left me, and morally and physically I was a changed being. A month later I resumed my work in perfect health, and from this time I have been uniformly happy and successful, and have never had the slightest return of illness in any form.

I hope this testimony may help many others who are perhaps in the seemingly hopeless condition that I was six years ago. I am now a practitioner in the field, and I have been the means of bringing health to many others. I would express my deepest gratitude to God for my wonderful healing, and at the same time give voice to my love and esteem for our beloved Leader, who has shown us the way which otherwise was hidden from our eyes.

JULIA HIERTZELER, Geneva, Switzerland.

[Translated from the German.]

It is with a grateful heart that I wish to tell of the blessings I have experienced through Christian Science. For sixteen years I suffered with severe attacks of gallstone, and was treated unsuccessfully by many physicians. I also tried many remedies, but in vain. During the last three years the condition became so aggravated that I was seldom able to be up, and had to stay in bed the greater part of the time. My bowels were so inactive that artificial means had to be employed all the time. The physician could not reassure me, but said that unless an operation was performed, my trouble would grow worse.

I then heard of Christian Science, but could not understand its teachings at that time, for I was convinced that God sends suffering and that we must submit to it patiently. The fear of the operation robbed me of my peace, however, and my thoughts constantly turned to Christian Science. Finally I applied to a Christian Science practitioner, who lovingly took up treatment. I attended the meetings regularly, and became aware of the fact that my condition improved daily. Gradually I began to understand that God is Love, infinite good, and that He does not afflict us. Through Christian Science I have received health and found contentment, and I am convinced that the error will not manifest itself again, if I strive for the truth diligently and faithfully. I am deeply grateful to God for all these blessings, and I thank Mrs. Eddy for having shown us the way to truth.

CHRISTIAN BUCHHEISTER, Halchter (Herzogthum Braunschweig), Germany.

In the summer of 1904, when in great need of help, everything possible having been done for me, materially, that could be done, during years of wretchedness, I decided to try Christian Science. I had not much faith in it, but wrote and asked a dear relative, who had been healed in Christian Science, to treat me for throat and lung trouble. My mother had passed on with this form of disease when I was only three years old; later a sister, just two years previous to this a dear brother, and now it seemed that my time was near. From the first treatment in Christian Science, however, I began to improve. I had been so weak that at times I could not speak, could hardly walk a block, and could not get out in the night air without coughing continually. People have told me since then that they thought I would not be here much longer.

I took absent treatment for a few weeks, then the practitioner came to my house and stayed with me about a week. We then went to St. Louis to attend the World's Fair, and while there I attended my first Christian Science service at First Church. This was on Wednesday evening, and I went again on Sunday. I cannot describe how wonderful it all was to me to see Love reflected in so many bright faces. I thought the testimonies that were given on Wednesday night were wonderful. I had never seen any of the people before, but they did not seem like strangers to me.

My healing might be called slow, but I can truly say that these seven years have been the happiest of my life. I have had the pleasure of attending services in Memphis and Nashville several times, but have never lived where there were many Scientists. When I was healed I lived in Paragould, Ark., and was the first who was healed there so far as I know. I have one daughter in Science. We were

Digitized by Google

received as members of The Mother Church at the same time, and others of my family have been greatly benefited.

I was once taken very suddenly with blood-poisoning, caused by a bad burn. I went to my room and fell on the bed, asking my daughter to help me and that quickly. We spoke of sending a message to a practitioner, but after a little while I was able to write a few lines to her. I kept Science and Health right by me all day, and would read as much as I could at the time. The next morning I was well and able to go anywhere I wanted to go. If I should try to tell all the blessings that I have received, I do not know when I would stop. I am never tired, I can eat anything. In the old thought I was unable to do this. I was also miserable from fear of storms; now I know God is ever present and can take care of all who put their trust in Him. For all these blessings I am most thankful to God, also to our dear Leader, Mrs. Eddy. I am also grateful for the *Sentinel* and *Journal*.

MRS. ELEANOR T. BOWERS, Hickman, Ky.

It has been my desire for a long time to tell others of the many blessings I have received through Christian Science. It has removed many inharmonious conditions, such as colds, weakness, fevers, and stomach trouble; but most of all, it has brought great joy to me by removing a feeling of despondency which had been hanging over me a long time. If I had received no other help in Christian Science than this, I feel that the least I could do is to express my gratitude for this one blessing, for which I am indeed very thankful. My greatest desire now is to know more of this truth, and to express my thankfulness to God, and also to Mrs. Eddy, by living the Christ-idea every day.

MRS. ANITA TROXLER, Hanford, Cal.

[Translated from the German.]

One of my daughters was ill since childhood from a supposedly inherited disease; at the age of ten and a half she was at the point of death, and no physician could afford relief. A woman whom I knew brought a Christian Science practitioner to our home, and she took the child from what seemed her death-bed. I protested, saying that the child could live no longer; but as the Scientist was so sure, I let her do as she desired. She took my daughter home with her, and the child was restored in Christian Science through the understanding of divine Love. She is now thirteen years old, and a healthy and strong girl—a testimony to the power of Truth to heal.

MRS. KASMER, Chicago, Ill.

In January, 1907, I went to live with a lady who explained to me about Christian Science and took me to the church. I began to attend the Sunday school here, and hope to continue until I am twenty. I wish to tell of my sister's healing through Christian Science, as mentioned by my mother. Before she was eight years old she had St. Vitus' dance, and for three years could not go to school. The attending physician said there was no hope for her. My parents were told that she could not live, that it would be better for her to die. For five weeks she was unable to swallow, and had no control of her head. On June 25, 1907, another physician was called, who said she could not live more than two days, and might die at any time.

The following day a lady asked my mother to try Christian Science. She sent for a practitioner, who told them that God was able to do the work; that they should not fear. The lady was on her way to church, and said that if on her return it seemed necessary, she would come to the child. During the hour of service my mother went to the bedside and took away the hot water bags, etc., having decided that they were of no avail. The next morning the practitioner went to my home, and expected to bring my sister back with her, but my mother refused to permit it, and said, "I will tell you why she cannot go. She is going to die, and I would not want that to happen at your house, and you would not want it to either." She was told to thank God that Christian Science could overcome all this fear, and that they could get ready and come to her home. At three o'clock the practitioner went home and my sister was with her. They had walked three blocks and transferred twice on the street cars. My sister slept well that night, and in one week she could swallow and had control of her head. In a little over three weeks she was entirely healed. The fifth week she started to attend the Christian Science Sunday school, and has attended the public school regularly since January, 1908. We are all very thankful for this wonderful healing, and are learning to live our gratitude to God, and also to our dear Leader, Mrs Eddy.

LOUISE KASMER, Chicago, Ill.

Christian Science was brought to my attention nearly five years ago. I began by studying "Science and Health with Key to the Scriptures" by Mrs. Eddy, and read some *Sentinels*, also a lecture which had been given to me. I was not then looking for any physical healing, but I was interested in this literature, which seemed to bring me something I had been seeking for years. My hunger for an understanding of God had never been satisfied, although I had been a church-member for many years. After reading Science and Health for three weeks, I laid aside the glasses which an oculist had told me I would always need, as one eye had very defective vision; but I have never worn glasses from that day to this. Numerous are the cases of pain and suffering which I have witnessed go out before the presence of Truth.

I am very grateful for this knowledge of Truth, as the understanding has given me many an opportunity of proving God's presence with us daily in the home as I make application of the Principle of Christian Science. My growth seems to have been slow, but this has caused me to study harder and work more assiduously to prove my faith by my works. It has been my great joy to have class instruction, and the clear teaching given us in the literature sent out under the wise directions of our Leader is an abundant source of wealth. When I look back over the years gone by, and see out of what darkness I was led, I am truly grateful to Mrs. Eddy for having brought to us this new-old truth. The stone is indeed "rolled away from the sepulcher," and I can best express my gratitude to God, and to Mrs. Eddy, by striving for the Mind "which was also in Christ Jesus," seeking daily for the "hidden manna" and serving God faithfully every day by the prompt removal of error in all its forms.

MRS. CLARA GAMMON, Keota, Iowa.

Christian Science first came to my notice about six years ago, when a friend of mine who had been healed loaned me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I had read but a few lines when I felt that I had found something which I needed, although I once thought I had all one could ask; but the knowledge of God, and man's relation to Him, I had not. I had no special religious training, but my dear mother had often told me to do right and fear nothing. I would go to one church and another with my girl friends, and tried to be interested in the sermons, but nothing had ever inspired me with a desire to read the Bible; so first of all I am very grateful for Christian Science because it led me to read that grand old book.

I believe that the very first thing I gave up, after starting to read Science and Health, was a belief in the power of medicine. I felt so happy that I had found the truth, although I had not then been able to test it. About a year after I came into Science, however, the opportunity came.

In the old thought I had a great fear of childbirth, but this was all overcome when my little boy was born. The experience was a revelation of divine Love to me; I had such faith in God that I desired no material help. I knew that God is no respecter of persons, and the knowledge I had gained satisfied me; consequently everything was natural and the birth painless. I was not sick or even weak a minute at any stage of this experience. How I loved God, and all the prophets of old, and Christ Jesus. Last but not least, I was deeply grateful to dear Mrs. Eddy for bringing to our perception what had always been true. How grateful I felt in my own consciousness! I did not need several proofs, one was enough.

My boy is now five years old, and is in perfect health. He had an attack of whooping-cough, but it was overcome in Christian Science. I know I have started right, and my desire is to be able to live this truth.

MRS. EMMA COFFEY, Centralia, Ill.

I wish to express my gratitude for what Christian Science has done for me. For about five years I suffered from a complication of diseases, one of which physicians told me could not be cured without my undergoing an operation. In the spring of 1909, when I threw away my medicines and told my physician that I was going to try Christian Science, he told me that it could do me no good. But I employed a practitioner, and in a short time my healing came, and I have enjoyed good health ever since. One of the diseases of which I was healed was diagnosed as a most serious affection of the kidneys.

I am thankful to God, and also to our Leader, Mrs. Eddy, for the benefit which I have received.

MRS. FLOYD GUILD, Hornell, N. Y.

[Written for the *Sentinel*.]

IMMANUEL

WILLARD M. GRIMES.

YEARS had I toiled, yet toiling only seemed
To bring me failure, where I hoped success,
Bearing me farther from the prize I sought.
I grew discouraged, for each morning brought
New trouble, fresh despair; I could not press
Along the darkening way, when—lo, there beamed

Across my path a star that traveled on!
In wonderment I left my care and went
To mark its course, to watch where it should go.
It led me through a wilderness of woe,
But, as I faltered, all the firmament
Was kindled with its light, and then—'twas gone!

In fear I fled, but as I fled a voice,
Above the inward cry of self and sin,
Commanded strife and all confusion cease,
And wait the coming of the Prince of Peace,
The Comforter of God, that from within
Bids mortals ever to rejoice, rejoice!

In faith I turned again, and paused to hark,
When myriad angels joined in praise on high,
Bringing glad tidings to a weary earth,
Proclaiming through eternity the birth
Of God's idea—the man not doomed to die;
And light immortal lit the path once dark.

In joyful worship to the Christ I knelt,
And offered all the earthly wealth I had—
Gold, frankincense, and myrrh; yet in my heart
I knew these not enough; I must depart,
Take up my work anew in ways more glad,
And live in deeds the gratitude I felt.

FROM OUR EXCHANGES.

[James De Normandie in *Christian Register*.]

You may say then, Is it not a time of discouragement for us all in this social and business world and this widespread and open denunciation of the church? By no means. This is to me an age of encouragement and hope. In all these deep-seated movements I read an appeal, an awakening to more of that truer spiritual religion out of which life and peace must come. The church has not failed, Christianity has not failed, religion has not failed. The difficulty is that the church does not quite know how to adjust itself to the new conditions of thought and life. It hears the demand, loud, increasing, universal, for a truer religious life. A fierce light has broken upon it, and the light reveals how much of the same spirit which brings the world's unrest has entered the church, and it goes on in the old darkness. "The light shineth in darkness and the darkness comprehendeth it not." But it will, and its high ideals will be made more effectual than ever, only it must still hold to its mission of presenting spiritual verities, and not be turned away to fruitless preaching or discussion of all the social activities of which the air is full. Every doctrine of the church which seems to us harsh and cruel and false, and now discredited among intelligent men, except theologians, had a natural and necessary development out of received views about the inspiration or revelation or infallibility of the words of the Bible and about the divine government; but they are outgrown, they are like some of those wharves on our old seaport towns, riddled and weakened by the lithodomi, those silent borers of the eternal seas, and the church cannot bring itself to another interpretation of its doctrines and another application of its energies. It is not making of religion what the age demands of religion. But the better life will come, and it will come in and through the church, which is girding itself as never before to bear witness to a higher spiritual life. A time comes to society, as to the individual, when the ravages of covetousness and self-indulgence can no longer be borne. If you suppose infinite goodness, you have indefinite and constantly renewable possibilities in man. The idea that human nature—you and I—can be changed, born again, is one upon which, rightly received and rightly interpreted, lies the hope of the world. No one can be a pessimist who believes that God rules in the affairs of men. Every one who in any high way believes in the fatherhood of good, must be an optimist.

[Rev. Walton W. Battershall in *Churchman*.]

A certain type of mind and of churchmanship becomes nervous and intolerant at this perpetual readjustment of thought and method. It hates to be dislodged from its easy cushions, where it can repeat ancestral formulas and need not fatigue itself by trying to adjust old truth to new truth. On a higher plane of thought and conscience, we all demand truth that is fixed and absolute and beyond the drifts of the current thinking. For the ordinary navigation of life men ask for charts, which shall mark authentic lights and verified soundings. They want a compass that plays true. Organized life is possible only by moralities that are changeless and universal, and are put into laws that say what they mean. Those who desire to do right want to know what is right. Every age and clime and race, with all the local variations in tradition and custom, therefore, has its Mount Sinai; and from every Sinai the same divine voice declares substantially the same elemental moralities. The application and enforcement are the only points that vary. They all give echoes of the two stone tables of the Hebrew Sinai, to which Christ gave his penetrating interpretation. Everywhere social and personal morality has been and will ever be rooted in religion.

[*Congregationalist and Christian World.*]

The materialistic spirit is everywhere. It stupefies the conscience and makes multitudes content with transient, outward satisfactions. The strain and tension in the world of industry are putting civilization to the test. Conditions, which on the other side of the Atlantic have brought the leaders of the churches throughout Great Britain to a point of anxiety never before reached, are paralleled or are likely to be paralleled in this country. The dominant questions of the next few decades are: Can Christianity put an end to strife between masters and men, can it make men and women in all ranks fair and loving and kind, can it evangelize the nations, can it organize the world of industry and the world of nations so that peace, good will, and cooperation shall supplant violence, the lust for territory, racial animosities, and devastating wars?

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

If you treat a man like a brute beast here, what do you expect him to be on the other side of death? If his soul has been starved and stunted here through the starving and stunting of his body, will it suddenly become different elsewhere? Of course it will not, and that is precisely why all effort for the remedying of social evils is truly spiritual work and ought always to be inspired by a truly spiritual motive. Of itself it can do nothing to elevate the soul; the rich are no more spiritually-minded than the poor; but at least it does something to supply the opportunity for the spiritual nature to assert itself and rise above the level of mere animalism, and the nobler and more brotherly the desires of those engaged in such service the more likely is it to attain its end.

[*Christian World.*]

Christianity is cast into the cosmic system; appears as a part of it, and must therefore of necessity be subject to its laws. Never has it been a static, but always a dynamic. Even its seemingly most stationary elements obey those laws. You speak of its Scriptures, of its doctrines, as there in permanence. No. As a factor in human life they change with every human being they touch. There are as many Christianities as there are Christians. Are the Scriptures the same to the child who spells his way through them as to your professor of Biblical criticism? You may call your Book the same. It is never the same in the souls that read it, and they are here the matter in question.

[*Watchman.*]

The Bible does not teach that salvation consists merely, or even chiefly, in happiness hereafter. Its teaching is rather that this happiness comes, not as a special gift from God, but as the result of a process of purification from sin, and this process of cleansing is salvation. The process of purification from sin is one to be accomplished here and now. That is salvation. There is no other time which we are authorized to hold out as a day of salvation than the present. But all who trust in God may look for complete sanctification, perfect salvation at "the coming of our Lord."

[*Outlook.*]

As the boy felt in his heart the reality and wonder of a greater world before him, so the man knows that he is at the beginning, not the end, of his career; and that, as there is a lesser world behind him which was touched with the illusion of permanency but endured only for the brief span of his childhood, so the life in which the man shapes and trains himself is but a more advanced school; prophetic, as all schools are, of coming opportunity and skill and power and life.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel*.

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel*, *Journal*, and *Herold*, whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Fluno, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan*, and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine*. These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Digitized by Google

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.20. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE: ITS RELIGIOUS PHILOSOPHY. By HON. CLARENCE A. BUSKIRK.

CAUSATION: VIEWED IN THE LIGHT OF CHRISTIAN SCIENCE. By FREDERICK DIXON.

CHRISTIAN SCIENCE: A RELIGION OF DOING. By JUDGE WILLIAM G. EWING.

CHRISTIAN SCIENCE VS. FINITE SENSE. By FRANCIS J. FLUNO, M.D.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. By JUDGE SEPTIMUS J. HANNA.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. The Original, Standard, and only Text-book on Christian Science Mind-healing. Price (cloth), single copy, $3.18; two to twelve books (cloth only) to one address, each, $3.00; twelve or more books to one address, each, $2.75. Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy, $4.00; twelve or more to one address, each, $3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy, $5.00; twelve or more to one address, each, $4.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large sized book), single copy, $8.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $3.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 20 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Entered at the Boston, Mass., post-office as second-class matter.

ITEMS OF INTEREST.

National.

Franklin K. Lane, interstate commerce commissioner, in an interview urges the creation of a national corporation commission, with power of control and regulation over large business enterprises similar in character to the interstate commerce commission. Mr. Lane makes a sharp distinction between railroads and private corporations, in view of the great powers of eminent domain, making charges for transportation, etc., possessed by the former, but believes that both should be under the control of the federal government. His theory is that all these enterprises are rendering a public service, that along with federal control of trusts should go also a right on the part of small enterprises to agree together as to a minimum price, to protect themselves against ruthless competition that would be ruinous. "If two plants are created where one would do the work," says Commissioner Lane, "there is no economic necessity for one of them, and the burden should not rest upon the public to support both when they have combined together; but if there is a demand for the product of these enterprises they should be allowed under proper control to protect themselves against destruction."

In the United States circuit court demurrers have been filed by officers of the United Shoe Machinery Company to the indictments returned against them for alleged violation of the Sherman anti-trust act. The defendants deny that their business comes within the scope of the act, inasmuch as the machinery that they sold and loaned was entirely covered by letters patent. They contend that the monopoly established by the patents is all-embracing; and they further say that the concerns whose portion of trade and commerce they are charged with grasping and drawing to themselves, were not engaged in interstate commerce. They further allege that the organization of the United Shoe Machinery Company was simply the combining of companies engaged in manufacturing and leasing complementary and non-competing machines, and in no way restrained the interstate trade carried on by the defendants.

Armour & Co., following the example set by a number of this country's railroads and other big corporations in the last ten years, has started a pension plan for the benefit of fifty-five thousand employees. The company itself has set aside one million dollars to start the pension fund. The fifty-five thousand employees will pay three per cent of their salaries annually into the fund and will receive two per cent of their salaries at the time of their retirement for each year they have served. Employees, for example, who have served the company twenty-five years will receive an annual income equal to fifty per cent of their salary at the time of their retirement. Fifty-seven years is the minimum age for retirement, and an employee must have served the company for twenty years. Provision is also made, however, for employees who have served the company only fifteen years, but who have become incapacitated.

The introduction of a course of agriculture into the curriculum of the technical high school of Newton, Mass., as a means of broadening the vocational training offered by the school, is to be brought about, following the successful experiment of having pupils take charge of trees planted in a municipal nursery on the school grounds. A model truck farm is to be carried on at the school. A tract of land nearly an acre in extent is to be prepared for the sowing of the seed in the spring. Pupils in the drawing classes of the school will prepare blue prints plotted to scale, which will be followed to the minutest detail when the crops are planted. All the work in caring for the "farm" will be done by the boys under supervision. The products will be used in the school kitchen, where every school session a course dinner is provided for eight hundred pupils by the domestic classes.

It is reported that the National City Company of New York city, recently organized to hold securities, make investments and transact other business for the National City Bank, and which immediately aroused the suspicions of Attorney-General Wickersham, will dispose of all its shares of other banks, estimated to have a market value of between five and six million dollars. This action is to be taken, it is understood, to forestall a possible adverse decision on the right of a subsidiary of a national bank to hold stocks of other banks. This privilege is denied by law to national banks and Mr. Wickersham has maintained that it is not proper for such an institution to control a company formed for the purpose of handling business which the bank itself is forbidden to handle.

The prohibitory amendment in the Maine constitution is retained. While the official returns of the late election as originally tabulated showed twenty-six majority in favor of repeal, the corrected returns as finally approved by the Governor and council show seven hundred and fifty-eight majority against repeal. A special session of the Legislature will be called, probably in February. Then another amendment to the constitution will be proposed, giving prohibition to the country districts and local option to the cities.

The stern section of the wreck of the Maine will be floated out to sea and buried. The bow will be hacked to pieces, hauled on barges and dumped into the sea. The rear section is uncovered and is in excellent condition. The bow of the ship, where the explosion occurred, is a tangled wreck of boilers and girders, and will not be completely uncovered for at least three months, probably longer, depending on whether or not Congress appropriates two hundred and fifty thousand dollars for the work next month.

Mayor Brown of Kansas City on Monday afternoons holds what he calls his "mayor's cabinet"—a heart-to-heart session with a representative group of business and professional men about the affairs of the community. When the mayor assumed his office he said: "I don't think any man is able to run a city as it should be run if he must depend solely upon the advice, counsel, and assistance of party leaders and politically elected officials. I know that I am not wise enough to do this. I need help."

International.

The contents of the Franco-German accord show that Germany recognizes the right of France to establish a protectorate in Morocco, while both nations engage to obtain the adhesion of this accord of the other signatories to the Algeciras agreement. The whole French press is pleased over the conclusion of the affair. The German press is critical and thinks the results are too meager. For France a great empire is created in the north of Africa, consisting of Tunis, Algeria, and Morocco. France cedes to Germany about two hundred and fifty thousand square kilometres in northern French Congo, touching the German Kameruns. The territory ceded is inhabited by about one million negroes and has a commerce valued at sixty-two million four hundred thousand dollars annually.

The Canadian minister of labor has instructed Judge Laurandeau of Montreal to resume the inquiry into the charge that the United Shoe Machinery Company is a combination in restraint of trade. When the inquiry was begun over a year ago by the board of which Judge Laurandeau is chairman, an appeal was taken by the company to the privy council of Great Britain, the court of last resort in Canadian jurisprudence. The privy council has decided against the company and the government will now press the case to a conclusion. The board will meet at Quebec.

The local authorities of Richmond and Twickenham, England, and other local councils are working together in accordance with the town planning act to preserve as far as they can the beauties of their neighborhood and in particular those along the banks of the Thames between Richmond and Teddington, from the hands of the builder. It is proposed to formulate a scheme which will safeguard all the surrounding districts.

The cause of the revolutionists in China still continues to make progress, and town after town is joining their side. The rule of the Manchu dynasty, after two hundred years of power, seems surely destined to be completely overthrown and a republic established in its stead. The native Chinese have never been reconciled to the rule of the usurping Manchus.

Italy occupies the city of Tripoli. Turkey has appealed to the powers against what it claims is an unwarranted act. Reports have been made that the Italian troops are treating the Arab population in an inhuman manner, but later reports discredit this.

Dr. Wu Ting-fang, a former popular Chinese minister to the United States, has been chosen director of foreign affairs in the reform government established by the revolutionists in the province of Kiang-Su.

Tattershall castle in Lincolnshire has been finally purchased by Lord Curzon to prevent its reported demolition and removal to America.

Industrial and Commercial.

W. I. Pack, supervisor of the Uinta forest, with headquarters at Provo, Utah, reports another fire season closed with a clean record for the patrol force, not a single fire having gotten beyond control this year. Before this forest was proclaimed by President Roosevelt fires in that region were frequent, often burning for weeks uncontrolled. The forest area embraced by the Uinta national forest, comprising over 1,285,000 acres, is on the west extension of the high and rugged Uinta range and on the Wasatch range. It protects the heads of many streams important in irrigation and as a source of water supply for hydro-electric power plants.

A new corporation is about to be formed under the name of "F. W. Woolworth Company," to take over stores in New York, Buffalo, Wilkes-Barre, Pa., Fall River, Mass., Scranton, Pa., Watertown and Schenectady, N. Y., also a controlling interest in the English business of F. W. Woolworth & Co., Ltd. There will be under one control over six hundred five and ten cent stores doing business in the United States, Canada, and England. The new company's capitalization will be sixty-five million dollars.

"WHAT I SAY UNTO YOU, I SAY UNTO ALL—WATCH" JESUS

[From *The Christian Science Monitor.*]

THANKSGIVING DAY PROCLAMATION.

PRESIDENT TAFT'S Thanksgiving proclamation issued today [Oct. 30] calls upon citizens of the United States to celebrate Nov. 30 as a day of thanksgiving and prayer, as follows:—

"The people of this land having by long sanction and practice set apart toward the close of each passing year a day on which to cease from their labors and assemble for the purpose of giving praise to Him who is the author of the blessings they have enjoyed, it is my duty, as Chief Executive, to designate at this time the day for the fulfilment of this devout purpose.

"Our country has been signally favored in many ways. The round of the seasons has brought rich harvests. Our industries have thrived far beyond our domestic needs, the productions of our labor are daily finding enlarged markets abroad. We have been free from the curses of pestilence, of famine, and of war. Our national councils have furthered the cause of peace in other lands, and the spirit of benevolence has brought us into closer touch with other peoples, to the strengthening of the bonds of fellowship and good will that link us to our comrades in the universal brotherhood of nations.

"Strong in the sense of our own right and inspired by as strong a sense of the rights of others, we live in peace and harmony with the world. Rich in the priceless possession and abundant resources, wherewith the unstinted bounty of God has endowed us, we are unselfishly glad when other peoples pass onward to prosperity and peace. That the great privileges we enjoy may continue, and that each coming year may see our country more firmly established in the regard and esteem of our fellow nations, is the prayer that should arise in every thankful heart.

"Wherefore I, William Howard Taft, President of the United States of America, designate Thursday, the 30th of November, next, as a day of thanksgiving and prayer, and I earnestly call upon my countrymen, and upon all that dwell under the flag of our beloved country, then to meet in their accustomed places of worship to join in offering prayers to Almighty God and devout thanks for the loving mercies He has given us.

"In witness thereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done at the city of Chicago this 30th day of October, in the year of our Lord one thousand nine hundred and eleven, and of the independence of the United States of America the one hundred and thirty-sixth.

"By the President:

"WILLIAM HOWARD TAFT.

"P. C. KNOX, *Secretary of State.*"

BUILDING.

M. G. KAINS, M.S.

IN any large city, buildings which have survived their profitable usefulness are often torn down to give place to more modern, more profitable ones. Not infrequently, after the old houses and the débris have been cleared away, the earth is removed until the rock is reached, so that the foundation of the new structure may be placed upon a solid basis. In many localities the rock is so near the surface and the land has such a high value that the rock itself is drilled and blasted to the depth of many feet, thus insuring not only a sure foundation but a more or less considerable area which may be utilized by the occupants of the building; but not until all the débris, the soil and the blasted rock, has been removed, does the actual process of building begin. Then the foundation is laid and the superstructure erected upon it.

To look at the work during the process of demolition of the old building, during the period of excavation, or even while the new structure is being erected, one is almost sure to be impressed by the apparent confusion of everything. Here are piles of seemingly useless materials saved from the old house, there are heaps of broken rock, sand, brick, and lumber. To the untrained eye it looks as if no sort of order could be brought or wrought out of such chaos. The grimy men working here and there seem to be making slow progress, if any progress at all, from day to day, and yet hourly they are forwarding the work by their slow activities, and all are performing their parts in obedience to a definite plan which was prepared before the first work on the old building or the ground began.

We are so accustomed to this *modus operandi* that we think little or nothing of it, yet it furnishes a lesson which may be of service in our study and application of Christian Science. When our attention is first called to this teaching as a mode of living, our mental ground is already encumbered with more or less undesirable thought structures which must be demolished. Yet these mental structures may contain many things that will prove useful in the erection of more worthy mental structures. In the work of demolition of the old, therefore, we must needs be careful not to destroy the useful with the useless. Those things which are certainly useless may be disposed of at once. Yet doubtless we will find many things which we will not value at their true worth, and these may be set aside for the time being, until we can determine whether or not they may be employed in working out the new plan.

Having once established ourselves upon the rock basis, the "sure foundation" of Truth, the erection of our new mental building may begin. In order to erect a worthy structure, however, it will be necessary for us to examine all of the mental materials we are to employ to see that each is worthy and true, for in the erection of our new building—unless we remember Isaiah's warning: "Judgment also will I lay to the line, and righteousness to the plummet"—we shall have built no better than before, and we shall suffer the consequences: "The hail shall sweep away the refuge of lies, and the waters shall overflow the hiding place."

But more important still is the demand that we examine the plan, so we may know that we are progressing correctly. For, no matter how excellent may be our materials, unless we utilize them in the correct way and put them in

their proper places, as called for by the plan and the specifications, we cannot be successful in our efforts at construction. Indeed, in many cases this has been the chief trouble in our former building; we have perhaps had good enough thoughts, but we did not recognize their true character and placed them incorrectly, giving some minor ones undue prominence and others which should have been prominent we subordinated, solely because we did not have a plan at all, or we had a plan that was not properly drawn, or we did not know how to interpret the correct one.

It is as foolish to try to build with no plan as to try to steer a ship without a rudder. Yet many people seem to think that they are making progress when they are only piling and repiling their building materials in more or less ugly and conspicuous heaps. While this is deplorable, it is perhaps no less unfortunate for the ambitious builders than to build with an incorrect or an incomplete plan, for unless the various parts are correctly placed, and unless all of the building materials necessary to completion are used, the structure is likely to collapse at any time, and this is true of institutional as well as of individual buildings. Neither of the cases cited, however, is any better than that of the individual who tries to follow the true plan without being able to interpret it correctly. His structure is sure to come to grief sooner or later.

We are not concerned with these cases beyond pointing them out. What we are concerned with is the correct interpretation of the true plan. What, then, is this plan and how is it to be interpreted? Christ Jesus presented it nearly two thousand years ago, but it has so often been misread and misapplied that, though it is said to have been employed in the erection of many apparently noble structures, these are lacking in some of the characters essential to the original plan. Had they been "built upon the foundation of the apostles and prophets, Jesus Christ himself being the chief corner stone," they would have been joined in him "in whom all the building fitly framed together groweth unto an holy temple in the Lord: in whom ye also are builded together for an habitation of God through the Spirit." But so general had the confusion of thought become that the desire for a restatement of the original plan became necessary, and this need has been supplied by the Christian Science text-book, which interprets the plan so plainly that any one who desires to build from a spiritual ideal may do so without difficulty.

The recognition of the shortcomings of human structures, institutional as well as individual, led to such earnest search for the original plan that this was at length found and given to the world in "Science and Health with Key to the Scriptures." This book may seem to some people to be hard to understand, and this seeming is due in part to the prejudice of the reader, in part to the limitations of written language. Nevertheless, when we enter upon an open-minded, careful study of the book itself, and no longer depend upon other people's opinions concerning Christian Science, the seemingly obscure parts become lucid, and the plan which Christ Jesus presented not only becomes clear but workable. This statement is attested by the changed lives of thousands who have found that the demolition of their imperfect mental structures has not necessitated their loss of anything which was really good; on the contrary it has not only saved all the good they ever possessed, but has also added a wealth of good beyond their dreams. Through the rules of construction set forth by Mrs. Eddy they have been able to prove that the Master's plan is applicable to-day, for they have found it possible not only to preach the gospel as the apostles did, but they have proved the correctness of this preaching by the signs which Jesus declared should characterize the labors of those who understand what he taught.

In our day and age, therefore, humanity is presented with the opportunity of rebuilding its thought structures after the pattern shown in the mount, and worthy of Him who is the real builder and who works with us "both to will and to do of his good pleasure."

TRUTH CONSTRUCTIVE.

GRACE SQUIRES.

THE disastrous results of working in the negative may confront even the best of Scientists at times, and to the young student in particular this confusing experience is only too common. In his battle with evil, unless he keep sharp watch, his denials of error are apt to outweigh his affirmations of Truth. If one were to keep his vision fearfully focused on the confusing error, it will seem to roll mountains high in his experience and even threaten to obliterate his sense of the actual.

The defeat and suffering that to many mortals have made quite the larger part of their personal experience before coming to Christian Science, has pushed the concept of a loving Father to the vanishing point, and it is right here that the work of the Scientist lies—to bring that which seemed distant, intelligently close to his vision, in order to push the belief in evil, which was painfully close, away. He needs to think of God, divine Love, of His harmony and His peace and joy. On page 260 of Science and Health Mrs. Eddy expresses the thought that if our model is Judas, we cannot delineate the face of the Christ. If one's mind is focused on any painful condition, he cannot outline harmony, try as long and desperately as he may. To say, however vehemently, "Two times two does not equal five" gives no assurance that we know what it does equal. We may be thinking it equals six, for aught to the contrary. On the other hand, to declare the truth of being with clear intelligence amounts to much. When something confronts us that is not divine Love, that something seems all too real. What seems not at all real to us in such a moment is God's nearness and allness, and this gives significance to our Leader's declaration: "Clad in the panoply of Love, human hatred cannot reach you" (Science and Health, p. 571).

The writer once noticed that it was impossible to tell whether her train or the one beside her was moving, and she remained in doubt so long as she looked into the confusing phenomena. When, however, she turned her gaze to an object which she knew could not move, she was instantly informed as to the truth. So should we turn away from the confusing phenomena of mortal life and focus our thoughts on that which is "the same yesterday, and to-day, and for ever," the unchanging love of God.

Too often we forget the "unsearchable riches" that are open to our quest, and instead spend a great deal of time looking into error, fearing it, personalizing it, congratulating ourselves, perchance, that now we have found it, making mental thrusts at it, and growing more weary and disheartened with every step. The one supreme fact which differentiates the faith of the Christian Scientist from that of all others is his reliance upon Truth. Its prominence in his consciousness measures his success in demonstration. Who, knowing that two times two equals four, concerns himself with what they do not equal? Our Leader tells us that "he who has the true idea of good loses all sense of evil" (Science and Health, p. 393). Christian Science is wonderfully simple when understood. If a long and discouraging struggle is taking place, it may be a result of the fact that the sufferer is working negatively, seeing the error and failing to see the truth. Christ Jesus said, "Come unto me, all ye that labor . . . and I will give you rest"; and if we put ourselves in this mental alignment, God will do for us "above all that we ask or think," even according to Jesus' words, "The Father that dwelleth in me, he doeth the works."

THE BUSINESS MAN AND PRAYER.

CARL HORTON PIERCE.

WHAT business man has not prayed? And what business man has not felt that at times his prayers were unanswered because they fell short of the fruition which to his sense ought to have come to him by reason of earnest labor and honest endeavor? Certainly this has been the lot of many, and at such times, when honest hope and good motive warrant success, the business man may ask himself, "What is the matter with my prayer?" Concurrent with this question, the student of the times sees this phenomenon, that whereas in the human stress and strife of business there seems to be a concentration of responsibility and money control, on the Godward side there is the making toward universality, unity of men and nations, brotherly kindness, and, withal, a divine economy. These two tendencies, essentially the antipodes of each other, seem to be at war; but in reality they are not, because one is the real and the other the non-lasting or unreal condition.

Christian Science enters the arena to explain, as no other system of Christianly economic study has ever done, how it is that a man can be a Christian and yet stay in the business whirl; how a man can love his neighbor as himself and yet have a crust to himself; how a man can pray aright and effectively. As the correct view of astronomy cannot be gained unless the student takes an imaginary position outside of the mundane sphere, so the business man is aided in his vision of his eventuality the moment he assumes a focal point outside the material sense of gain and loss. Christ Jesus, our Exemplar, with unerring exactness and simplicity said that men ask amiss when they ask for things that they may consume them upon their material desires.

"But," the business man may say, "I do not ask for things that I may be selfish with them. I ask in order that I may give bread and butter to my family." How true it is that many men think they only ask for the necessities; but given these, they ask for more. Given a finger, they ask an arm. And he is a good Christian Scientist indeed who, given an overwhelming business success, can yet maintain such modesty and simplicity of living that the simplest needs only are catered to, while all of the residue is given to the promotion of God's cause on earth. Not so the ordinary man! Give him abundance over and above his immediate wants, and the human mind thinks of a hundred other wants. At the moment when his need was great, he thought he desired only the necessities; now, with those needs met, he is lusting after "purple and fine linen."

This is a tendency of the human mind and it perchance explains why our most earnest prayers are often unanswered. Mrs. Eddy says, "Love is not hasty to deliver us from temptation, for Love means that we shall be tried and purified" (Science and Health, p. 22), until such possibility as our being spoiled by these and similar temptations shall be removed, and we shall be found to desire only those things which avail in the establishment of Christ's kingdom. How many men are praying solely for this great event? How many are rather praying that the important "deal" which is to come to pass on the morrow (they fervently hope) will be put through without delay, so that their families may have more luxuries and pleasures?

Mrs. Eddy calls for "a clearing up of abstractions" (Miscellaneous Writings, p. 174). She says: "Let us come into the presence of Him who removeth all iniquities, and healeth all our diseases." There is the crucial, the actual test. Our iniquities! Instead of trying to get a practitioner to heal our business difficulties, let us get at our own wrong thinking and wrong doing. This is where our prayers should start. Is one a sharp and shrewd business man, priding himself on this kind of a reputation: let him analyze the sharpness and shrewdness and see how it corresponds with the doctrine laid down by the Master in the fifth chapter of Matthew, where we read: "Blessed are the merciful: for they shall obtain mercy." "And if any man will sue thee at the law, and take away thy coat, let him have thy cloke also." "Give to him that asketh thee, and from him that would borrow of thee turn not thou away." "Ye have heard that it hath been said, Thou shalt love thy neighbor, and hate thine enemy. But I say unto you, Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you; that ye may be the children of your Father which is in heaven."

Jesus said: "I will pray the Father." Does the business man aspire to pray to that same Father to whom Jesus prayed, and whose answer never fails? Then, plainly, his business methods must conform to the rules laid down, in the keeping of which one hears the words: "If ye continue in my word, then are ye my disciples indeed." The Master added that whosoever would keep these commandments might ask whatsoever he would, and it would be given him. How do men today make this practical? By remembering this focal point outside of the business world and reverting to it as often as possible, so that they may keep their thought clear. And what is this focal standpoint—the standpoint of Spirit. And what is this platform of Spirit, as expressed in Christian Science? That Spirit, God, is All-in-all; that man is His image and likeness; and that man and the spiritual universe constitute the whole of God's creation. In reality, there is nothing else.

What happens, then, to all material thoughts? The Bible teaches that they are "vanity"—nothingness. What becomes of the spiritual thoughts? In Proverbs we read, "Commit thy works unto the Lord, and thy thoughts shall be established." If a man sows shrewdness and "cunning craftiness" and "seditions" and "lying" and "sharp practices," what will be the end of this sort of sowing? Failure, and destruction of the errors. If he sows according to the sermon on the mount, what then? He will reap enduring riches. What will happen if he gains material substance, so called, simply that he may spend it upon those he loves? He ofttimes injures those whom he would bless. What is the result of seeking to follow in the footsteps of the Master? "He that loseth his life for my sake shall find it." Whoso turns from the material thought of earning luxuries for relatives and himself, and devotes himself to the thought of work for God, shall receive in this life "an hundred fold, and in the world to come life everlasting."

Into what insignificance sinks the transaction that is to be consummated tomorrow, in comparison with the steady, calm, exalted thought that one is working for God; that one is doing each day what God has for him to do; that God's will is now being done; that the manna falls day by day for daily needs, and there needs not to be anything more than this, for this is sufficient; that "God gives [us] His spiritual ideas, and in turn, they give [us] daily supplies" (Miscellaneous Writings, p. 307). Furthermore, our beloved Leader here gives us the specific command: "Never ask for tomorrow: it is enough that divine Love is an ever-present help; and if you wait, never doubting, you will have all you need every moment."

What a quietus all this puts on our feverish haste to become rich! All the bustle, the "tense tension" of the human hurry fades. Calm is restored; the poise whence men and women can carefully think; that calm wherein the "still small voice" of duty can dictate the sweet demands of Love, obedience to which unfolds brotherliness and Christian charity. In this sacred sanctuary of Truth He shall surely "give his angels charge over thee." We need to conform our prayer of affirmation, realization, and strong reliance to the standard set forth in the Bible and Science and Health. If we do this, the "deals" that do evolve will be those sent us by divine Love and wisdom, and every one who tries this form of prayer—which is answered—can truly say that God's way and thoughts are higher than ours, even as the heavens are higher than the earth.

Digitized by Google

Conformity to the law of Love gives to prayer the strength of conscious conviction that it is already answered, and yet how many a man has said: "Go to so-and-so for your healing. I'm a business man. So-and-so makes a practice of healing. I suppose I'll get there some day. I make a practice of not being too radical in my Science." Then he turns the corner and utters a fervent prayer for the prosperity of his business. What would be thought of a practitioner who would do this? It has been said that no case can come to us that cannot be healed, because in the operation of the law of harmony nothing can enter our experience which Truth cannot heal.

If it is Truth that heals, and if we, even as business men, have been given an insight through Christian Science into the truth that heals, what right have we to disregard the Bible and turn away the one that asks for treatment? The demand of the Master and of our Leader is emblazoned on the walls of our churches and deep in our hearts: "Heal the sick." Does the business man really desire that God would give him a better understanding of Christian Science, so that he may the better heal the sick during every spare moment? If he does, then he is praying aright and such prayer is answered because he is putting his desire into practice. Jesus said that there would be those who would make excuses; that some would plead the excuse of a wife, a farm, a pair of oxen, etc.

All of these answers are the arguments of mortal mind and have no valid claim upon our attention. As we resist them they flee from us, giving us the freedom of the sons of God to realize that in reality God will never ask of us what we cannot perform. He never asks us to run before we are able to walk; He always reveals that a man who leaves all for Christ fares better a thousand fold than he ever did before. He never asks a business man to leave the business world before he is ready for the step, but He does reveal that the willingness to become childlike and to sacrifice everything for Christ fits the thought for the step, as our Leader has said. And the business man who thus prays finds that his "wants" are eliminated; that his "needs" are startlingly few; that the "aliens" are indeed his "plowmen" in so far as his "alien" thoughts have brought about the very conditions which forced him to find Truth; that he is not made to delve more and more in material thoughts and conditions; that he is now learning the value of a practical understanding of Christian Science wherein all prayer is answered. Verily, to such God says: "Before they call, I will answer."

THE PURPOSE OF DEMOCRACY.

GRACE B. TOWNSEND.

THE thoughtful observer of the times will ask as the question of today, What is the form of church government most consistent with the teaching and practice of Christian Science, and why is it so? An answer to the first question is given by the by-law of The Mother Church which states that "each branch church shall be distinctly democratic in its government" (Article XXIII, Section 10); but it contains no statement of why such should be the form. Respecting our place in the world, our Leader says, "The Christian Scientist has enlisted to lessen evil, disease, and death" (Science and Health, page). Just so far as we elevate and purify every material situation with which we have to deal, to that degree will we hasten the day when the material structure, whatever it may be, will give place to the spiritual fact. It behooves us, therefore, as thoughtful Christian Scientists, to consider what is the contribution to the world of our church organization?

It is necessary here that we keep clearly in mind the meaning of the word democracy. It is derived from the Greek demos, people, and kratos, to rule, or be strong; hence it is a "government by the people, a system of government in which the sovereign power of the state is vested in the people as a whole, and is exercised directly by them or their elected agents" (Century dictionary). A republic, on the other hand, is "a government in which the executive power is vested in a person or persons chosen directly or indirectly by the body of citizens entitled to vote" (Century dictionary); a government, therefore, in which the people do not directly exercise their strength.

In securing a charter the church becomes legally a corporation, and the form of organization usually convenient for corporations and so adopted by them is similar to that of a republic. It therefore becomes the duty of every Christian Scientist to see to it that the organization of the church is managed along democratic lines. For one thing, he is not to delegate the entire power to an executive body, but to keep the church body strong. In acting from this basis, he uncovers and destroys the mental suggestion which says that personal power gives pleasure and is legitimate; he will cease to desire to see the weaker swallowed up and the ambitious exalted; and he will be watchful not to imitate in system and detail a merely human method of doing business. Thus as he progresses he will begin to realize that the true organization seeks to "construct or modify so as to exhibit or subserve vital processes" (Century dictionary). Let us understand what this vital process in Christian Science must be. It is the continued and continuous realization of man's oneness with the Father and of his inherent power to do perfectly all that comes to him to do. There is but one form of organization known to humanity today which is ideal enough to fill in any sense a demand so lofty. It is that of pure democracy, and thus is the reason for our Leader's choice made clear.

Here we pause with gratitude to count the blessings which this true democracy gives to us. The man and the woman, the experienced and the inexperienced, the teacher and the student, work side by side, equally interested, equally respected. All in humility, but with serious purpose, know that it is their duty to fit themselves spiritually for any office which the church may have,—for becoming a member of its board of directors, for president or reader; and all do it naturally, without pride, as a boy or girl goes from year to year to a continually advancing class. Each takes his place in the meeting, each is free to express his own conviction, each grows more self-reliant, cares less to follow the opinion of another, and is in consequence less open to outside influence. Through frank but serious discussion, through different points of view, through calm, impersonal consideration of vital issues, the individual thought grows in strength and understanding and is more fit both to govern and to be governed. Such meetings, even though widely differing views may be expressed (granted they are honest), do not argue lack of unity, but rather a normal, healthy growth and legitimate thirst for the experience which leads to understanding. At the same time, when any specific matter is decided by vote of church-members, it becomes the sacred privilege of the minority loyally to support the majority and thus fulfil the golden rule.

Step by step through the perfect freedom of democratic rule is the aim of Christian Science in turn fulfilled, and the truth permeates and uplifts every act of the true Christian Scientist. Less and less does his thought turn toward outward organization, more and more toward God and the understanding of His will. This is the helping the world to see that organization is a "shelter to be sure, but only thus it becometh us to fulfil all righteousness," while being healed himself of any belief in the power of a merely material structure or organization to bless. Thus and thus only will be prove that the church, more than any civil institution, at present is the cement of society and it will be the bulwark of civil and religious liberty. Thus will he do his part to bring about the day when, as Mrs. Eddy goes on to say, "the religious element of Church of Christ shall exist alone in the affections, and need no organization to express it" (Miscellaneous Writings, p.).

SELECTED ARTICLES.

[Frederick Dixon in *Empire*, Calcutta, India.]

An article in your paper on "Freak Religions," in which Christian Science is mentioned, has just been brought to my attention. As in it you ask a question which has caused a good deal of interest lately in the press, I think your readers may be glad to learn how Christian Scientists view the matter referred to. The question resolves itself into this, Now that Mrs. Eddy has passed away will Christian Science pass away, too? I may say at once that nobody with any knowledge whatever of the Christian Science movement would have the slightest difficulty in returning an absolute negative. For the last twenty years Mrs. Eddy's days were spent in the seclusion of her house at Concord, from whence she moved to another house on the outskirts of Boston. Here, surrounded by a few helpers, whose devotion to her will some day become historic, she passed her time in entire seclusion, working for the cause of Christian Science. Nobody will ever know her work during those years for the establishment of the cause throughout the world. It constituted one of the most marvelous instances of selfless surrender to divine Principle which humanity has ever seen.

Mrs. Eddy's very method of working, however, withdrew her physical personality from the movement, and her labors were devoted very largely to teaching Christian Scientists that the demonstration of Truth rested on the understanding of Principle and not of person. "What went ye out for to see?'" she asks in a little pamphlet known as "Personal Contagion." "A person or a Principle? Whichever it be determines the right or the wrong of this following." And a little later in the same pamphlet she says, "There was never a religion or philosophy lost to the centuries except by sinking its divine Principle in personality. May all Christian Scientists ponder this fact and give their talents and loving hearts free scope only in the right direction!" It was because Mrs. Eddy builded in this way, on Principle and not on personality, that the Christian Science movement is rolling steadily today across the world, establishing its churches and its meetings wherever it reaches, not on a basis of belief in a person, but on the basis of that understanding, described by Jesus the Christ himself as the knowledge of the truth which would make the world free; and because it is so established its teaching is capable of demonstration in the way he demanded when he said, "He that believeth on me, the works that I do shall he do also."

During all the years of Mrs. Eddy's retirement the executive work of the movement was entrusted to those in whose wisdom and understanding of Principle she herself had the highest confidence. They were not, as many foolish people thought, engaged in merely registering her decisions; they were engaged in working out through their own understanding of Principle the problems which came daily to them for their decision. She was always the head of the movement; always there to give her advice when asked; always there to offer the kindest and keenest criticism of what was accomplished. At the same time she was careful not to dwarf the initiative of those who were responsible for the executive work by keeping them in leading-strings. With them it lay to plan, with them it lay to execute, conscious that their work was to understand the Principle she was endeavoring to teach them, and by acting in accordance with that Principle to fulfil, not her demands, but the demands of Truth. The unity of the Christian Science movement, which will prevent its ever being overcome by disruption, is based on a common understanding of divine Principle and not on the following of individual leaders with varying degrees of spiritual perception. In the fact that there is no human leader of the movement the world saw its downfall. It is precisely because Mrs. Eddy so fully understood divine Principle as to leave the movement to the guidance of Truth and not to the guidance of men, that its stability is today assured.

[From a report in *New York* (N. Y.) *Herald*.]

Asserting his belief that disease, both organic and functional, may be cured by prayer, the Rev. Dr. Willard F. Ottarson, at Bethany Congregational church, 455 Tenth avenue, said yesterday [Nov. 5] that he had become convinced that Christian Scientists are right in their theory of healing.

"Death and disease could not be present in the world," said Dr. Ottarson, "if sin had not introduced them. It is a great and fundamental truth that all evil is the result of sin. The destruction of sin will rid us of death, disease, and every other evil. We all believe God can cleanse away sin. We also believe He can heal disease. We believe He does cleanse us of sin, but most of us do not yet definitely believe that He does heal disease. The apostles believed it. Christ cured all kinds of diseases and even restored the dead to life. I firmly believe the time will come when we can conquer disease by the aid of God as we now conquer sin."

Dr. Ottarson cited the case of his own sister, who, he said, was cured of a cancer by prayer. "She was a devout woman," he said, "and she continued to pray after her physicians had told her it was incurable. A small blemish on her face is all that remains. I know of a case of a well-known pastor afflicted with cancer. Eminent specialists had said he could not be cured. Christian Science was called upon, and after a course of prayer he was absolutely cured. Another case was of a woman whose lower limbs had been paralyzed for twenty years. A sister of a business man had been blind for three years. Christian Science restored her sight. A woman suffering from blood-poisoning tried Christian Science as a last resort. A physician, one of the most eminent in the East, had said she could not recover. After two weeks of treatment by prayer she was cured, and the physician announced that a repetition of such an incident would cause him to abandon practice."

Dr. Ottarson said he had no thought of becoming a Christian Scientist, but would remain a minister of the Congregational church. He stated that he believed it to be as much the function of the church to heal disease as to heal sin.

[Charles K. Skinner in *News-Indicator*, Fremont, Mich.]

Some one has said that it is good policy to leave some things unspoken. After reading two articles on what a writer represents Christian Science to be, I am inclined to think the statement is true. The fact is, the gentleman has made a man of straw, which he has vigorously belabored for the edification of your readers, and his attempted witticisms are out of place, considering his misapprehension of the subject. First, our critic says, "The Bible does not teach that God is all." It would seem that he has read the Scriptures to but little purpose if he has overlooked the many statements in the New Testament in which God is referred to as all in all. In Jeremiah we read, "Can any hide himself in secret places that I shall not see him? . . . Do not I fill heaven and earth? saith the Lord."

As to the reality of matter, Christian Science takes the position that all of God's creations are spiritual, perfect, and eternal, as expressed in the first chapter of Genesis, in which God said: "Let us make man in our image, after our likeness: and let them have dominion . . . over all the earth." "And God saw every thing that he had made, and, behold, it was very good." Christian Science does not charge that, after having created perfection, God then made imperfect man and a universe subject to sickness and

Digitized by Google

decay. This theory of creation is but the expression of the carnal or mortal mind externalized in the belief of another power, another creator. To the material senses matter seems a reality, for matter is all they can comprehend, but these senses are no more real to God and the spiritual man than is matter. This position taken by Mrs. Eddy, and once scoffed at by the learned physical scientist, has been accepted by many noted scholars of our age. Professor Ostwald of the University of Leipsic, Germany, writes, "Matter is a thing of thought." Grant Allen says, "The universe as known to us, consists wholly of Mind, and matter is a doubtful and uncertain inference of the human intelligence." Mr. Huxley, Professor Bowne, Professor Dorris, and many other students of deep research take the same position. It is true that the Bible states that "God is a Spirit," but the revised edition reads, "God is Spirit," filling all space. Christian Science teaches that man is the image and likeness of God, Spirit; hence he is spiritual.

The writer says that "man is not coexistent with God." If man is the image and likeness, he is certainly coexistent with God, and any other position would be impossible. This coincides with the Bible. Does our critic deny it? Christian Science does not accept a man of dust as God's creation when He had already created a perfect man. Even the thought is an insult to the Almighty. The material senses are unreal and deceptive because they have brought the race no nearer to the understanding of God and the real man than it was six thousand years ago. They tell us nothing of the spiritual, and make very many mistakes as to the material. Job had learned this when he said, "Canst thou by searching find out God?"

As to the unreality of sin, Christian Science teaches that sin is unreal to God and the true man, for it is not a creation of God, and can therefore be destroyed by the power of God. The text-book, Science and Health, is filled with warnings against yielding to or being overcome by the claims of sin, and our critic could not have overlooked them. On page 210 we read: "To mortal sense, sin and suffering are real, but immortal sense includes no evil nor pestilence;" and again, "Christians . . . must grapple with sin in themselves and in others, and continue this warfare until they have finished their course;" "The way to escape the misery of sin is to cease sinning" (pp. 29, 327). In her message of 1898 to The Mother Church, Mrs. Eddy wrote: "Sin is like a dock-root—to cut off the top of it does no good; the roots must be eradicated or it will continue to grow."

Christian Science teaches that sin is thought before it is acted, and if the evil thoughts are destroyed there can be no externalization of them. No man or woman ever did a good or a bad thing in their lives that was not thought at first. It is true that sin is often an unconscious thought in later years, but at the start it was a suggestion, an ignorant or wilful belief of pleasure in wrong-doing. To show men and women how the first steps in error or sin may be overcome, is what Christian Science is trying to do. This accords with Jesus' teaching, which was that to look upon an object with a wrong thought was a sin in itself.

Mrs. Eddy taught no "theories," but stated the demonstrable facts of divine Science. Those who deride and scoff at the teachings of Christian Science unconsciously place themselves in the position of those pioneers who had never seen a locomotive or a steamboat, and who therefore would not believe that transportation could be accomplished by any other means than horses or oxen. So indignant did they become at the wonderful stories of long steam trains loaded with tons of freight moving as fast as fifteen miles an hour, that a meeting was held and their informant was rated an impostor, one aged scoffer saying, "It can't be so, for it is ag'in all reason." Since then the world has seen such wonderful advance along the lines of steam, electricity, compressed air, water-power, light, telephone and telegraph invention, and in water, land, and air transportation, that he is indeed rash who challenges the possibilities of mind to express itself in any manner whatever. Having seen all these things in their externalization, who will say that God (infinite Mind) does not express Himself spiritually with those who are reaching out for a better, clearer understanding of Him in His image and likeness—man. The promise is in the Scriptures, "Seek, and ye shall find," "If ye seek him; he will be found of you." Shall we take God's word, or shall we not?

This critic challenges the cures of Christian Science. At the present hour Christian Scientists do not claim to be able to perform all the wonderful works of our Master, and yet the commands, "Go ye into all the world, and preach the gospel to every creature," "Heal the sick," are as imperative as ever. The promises to those who are obedient are no less positive. "He that believeth on [understandeth] me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Christian Scientists understand that in the same ratio of their spiritual growth they will be able to do better work, but they also know that if they do not make an effort to be obedient in the smaller things of life, they cannot hope for the blessings promised.

It is related that even Jesus' disciples were, in one instance at least, not able to heal a certain person who was brought to them. The Master did not deride them for their failure, but showed them that it was due to a lack of spiritual growth which they might and did attain to later on. Christian Scientists do not claim to do any work of themselves nor do they "monkey" (as our critic so graciously asserts) with the sick. Jesus did not claim to do the works by his own power. He said, "I can of mine own self do nothing;" that is, as he elsewhere explained, "the Father that dwelleth in me, he doeth the works." The reference to letting little children die of diphtheria is in very poor taste, when the statistics show no lessening of mortality under medical treatment. The reports from the state board of health show the deaths from diphtheria alone to be at a rate running from 10.4 to 15.8 during the past five years, the lowest being in 1908 and the highest in 1910 after the much lauded advance in medical science. As a matter of fact, there have been no cases of "anguish" with children as described by our critic except in the minds of such critics. Christian Scientists are willing to compare cases under Christian Science treatment with those under medical treatment. Let it be borne in mind that they have no unkind thought toward the honest physician, as many have warm friends in that profession. They know of many instances of self-sacrifice and devotion on the part of the physician and honor him for it.

Our critic goes on to say, "No child's life in Fremont is safe if taught there are no accidents in divine Providence." Is it not apparent now that Mrs. Eddy is teaching of the spiritual realm and man, and is it asking too much to conceive that if one did realize his birthright of dominion over all, here and now, no accidents could come to him? The little child taught that God is its Father and Mother and that no harm can come to His true child, can and does reach out to that infinite source of protection and passes through "dangers oft unseen" because of that wonderful care of the great Father over His children. Because of this, however, Christian Science does not teach carelessness nor bravado; it teaches common sense in every detail of life. Christian Scientists eat when hungry, wear clothing for comfort and decency, protect themselves from storms, and avoid unnecessary exposure to accidents. At the same time, they know that if duty calls them into any danger and they rely on divine Providence, they will be protected.

We are glad to note the admission that "Christian Science

Digitized by Google

has helped many people to rise above worry, fret, and fear." A well-known writer once asked, "What man is there who would not dispense a liberal amount of his income to have the freedom from worry, fret, and fear that the Christian Scientist has." Yes, diseases are errors, our friend to the contrary notwithstanding. If they are not error, they must be truth. Christian Science demonstrates that even so-called infectious diseases are fears consciously or unconsciously externalized, and when the fears of patients and friends are subdued, the disease is quickly met. The statement that the failures of Christian Science are innumerable is unworthy of one who stands as an exponent of the gospel. The list of one hundred such failures which he claims to have has been proved to be without foundation, and its author has been challenged several times to give the names and addresses of the patients for identification, but has refused.

Any fair-minded person who desires to prove the truth of the foregoing statements as to the teaching of Christian Science can do so by a careful study of the Christian Science text-book and other writings by Mrs. Eddy.

[Edward W. Dickey in *Riverside* (Cal.) *Press.*]

It should be remembered in considering or discussing the subject of Christian Science that it is essentially common sense and reasonable in its every application to human conditions. It has a scientific premise and must of necessity have a scientific conclusion. It is built upon a spiritual platform, and is most logical and consistent in its every declaration. It often happens that critics fail to note this fact; and in consequence, when they encounter the statement set forth by Christian Science, that all evil is unreal, they draw a conclusion from this statement which is not in accord with what this Science teaches. The premise of Christian Science is that God is Spirit, and that He is good. From this it consistently deduces the conclusion that man and the universe are spiritual and good. It teaches that God is the only power, and therefore all power is good. It teaches that God is Mind, and therefore all power is in and of divine Mind. It declares that all the facts of being are real and good. It must follow as a scientific conclusion that the things of the flesh which are finite and discordant are not real.

It is here that Christian Science emphasizes its reasonableness and shows its students the paramount necessity of overcoming instead of overlooking all that is unreal and evil, but which claims to be a real part of human experience. That this teaching is reasonable and right is shown by the results it produces; for Christian Science has come, in the language of the Scriptures, "that they might have life, and that they might have it more abundantly." It has not come to controvert anything or anybody, but to fulfil. Its message is that loving invitation of the Master, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

[John L. Rendall in *Washington* (Ia.) *Democrat.*]

The reference to Christian Science as a fad does not indicate the nice discrimination in language which should proceed from one occupying the position of a Christian minister. The Century dictionary defines a "fad" as "a trivial fancy adopted and pursued for a time with irrational zeal; a matter of no importance." To designate Christian Science as "a trivial fancy" is not only to ignore the facts connected with it, but also impugns the intelligence and character of a large number of people who have been immeasurably benefited because of the redemptive influence of this teaching. Moreover, it would stigmatize as "faddists" those who have the temerity to believe that the words of the apostle James are true, "And the prayer of faith shall save the sick." Mrs. Eddy, in "Science and Health with Key to the Scriptures" (p. 487), has defined the prayer of faith as follows: "This faith relies upon an understood Principle. This Principle makes whole the diseased and brings out the enduring and harmonious phases of things."

[C. R. Munro in *Ottawa* (Ont.) *Citizen.*]

If the committee of English physicians who reported in effect that all forms of mental and spiritual healing, in which they included Christian Science healing, were the result of mental suggestion, had really investigated the facts of the matter from the standpoint of the true investigator, they would have found:—

1. That Christian Science healing is absolutely spiritual, even as Jesus' healing was wholly spiritual, and that this healing is the very antipode of mental suggestion, which depends entirely upon the belief in the power of one human mind to influence another; while Christian Science healing is based entirely on the understanding that the divine Mind, God, alone heals, and repudiates absolutely the so-called power of the human mind. Only as the Christian Scientist subjects his own human will or mind to the divine Mind, "this mind . . . which was also in Christ Jesus," can he bring out the true healing. Another difference between Christian Science and all other forms of mental healing is that while those systems which make use of the supposed power of the human mind may be used for evil as well as good purposes, Christian Science cannot possibly be misused, teaching as it does the absolute powerlessness of evil and the omnipotence of God only.

2. That Christian Science has healed hundreds of cases of organic disease, many of which were considered incurable. Evidence in support of this healing is so abundant and easy of access to the serious investigator, that one wonders if the committee referred to really tried to gain correct information, or whether they confined their inquiries to those whom they knew would give adverse opinions on the subject. At any rate, the investigation so far as Christian Science is concerned was no investigation, for the facts were not reached.

For the benefit of any who may be interested, I would refer to the book entitled "Christian Science as a Religious Belief and a Therapeutic Agent," by B. O. Flower, a well-known magazine editor. Mr. Flower is not a Christian Scientist, but he made a thorough and impartial investigation of the subject, and the results of his inquiries are set out in his book. He recounts a number of cases of the healing through Christian Science of the most pronounced forms of organic disease, including cancer, tuberculosis, etc., which were considered incurable by all medical means; and he cites prominent physicians in both England and the United States in support of his statements, as well as affidavits from reputable eye-witnesses of the various cases. To the irresponsible statements made by those who have not looked into the matter carefully, that Christian Science does not heal organic disease, the above book is a complete and satisfactory answer.

[From *La Grande* (Ore.) *Observer.*]

Members of the Christian Science church in La Grande have the thanks of the *Observer* for an interesting volume on the life and work of the late Mary Baker Eddy. It is a story of a wonderful woman, regardless of whether or not one may believe her religion. She was a strong character and a leader of pronounced ability.

Eager clutching at the delights of natural life, and making it one's chief aim, is the sure way to lose all its sweetness and to miss the higher life; while the subordination, and, if needful, the sacrifice of "life in this world" leads straight to the possession of "life eternal."—ALEXANDER MCLAREN.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

"STEADFAST IN TRUTH."

In open warfare, when the aggressor heralds his approach with such bombastic challenge as that with which the Philistine giant advanced upon the army of Israel, one is usually on the alert and ready for defense; on guard, as it were. When, however, the overture is veiled, and the thrusts are silent and insidious, it is sometimes with surprise that we awaken to the necessity for being ever on guard, to "stand porter at the door of thought" (Science and Health, p. 392) unceasingly, lest evil in some one of its many guises find entrance.

One thing which Christian Scientists should keep before them at all times is the imperative need to guard their thought—hold it clear of all save the unadulterated teaching and practice of the great truth which they have received through the work and writings of Mrs. Eddy. Well knowing the efforts which had been made, and which doubtless would be made, to contaminate the pure spiritual teachings of the Science which she had discovered and founded, Mrs. Eddy said, as long ago as 1885, in a sermon preached in Boston: "Few people at present know aught of the Science of mental healing; and so many are obtruding upon the public attention their ignorance or false knowledge in the name of Science, that it behooves all clad in the shining mail to keep bright their invincible armor; to keep their demonstrations modest, and their claims and lives steadfast in Truth" (Miscellaneous Writings, p. 171).

Daily we have increasing reason to be grateful to the far-seeing wisdom of our Leader not only in warning us to leave no door unguarded, no crevice unprotected, but in providing so fully the means for this defense. We have a plenteous store from which to draw in our search for truth,—the Bible, "our sufficient guide to eternal Life" (Science and Health, p. 497), and the writings of our Leader, based upon God's word to His people; and if we use these both wisely and well we shall have all that we need. Mrs. Eddy emphasizes this in her answer to the question, "How can I progress most rapidly in the understanding of Christian Science." She writes, "Study thoroughly the letter and imbibe the spirit. Adhere to the divine Principle of Christian Science and follow the behests of God, abiding steadfastly in wisdom, Truth, and Love" (Science and Health, p. 495).

These sayings of our Leader are calls to the highest and holiest living of which men are capable, and the earnestness and consecration with which they are put into practice will best denote the capacity and growth of students of this Science. Jesus commended to his followers the knowledge of God, which he assured them was eternal life, and Mrs. Eddy's words which we have quoted are but a reiteration of this essential tenet of Christianity. The effort of evil is to make all Christians dull and inattentive to the study and practice of the Master's teaching, and this is the reason for the lack of faith, and the discouragement of so many who have tried to find God through faith without works.

Christian Scientists should be especially awake to the claims of evil that would make them apathetic or sentimental rather than practical in their application of the Master's teachings to all the affairs of life. They should know that to "prove all things" is the only consistent course which they can pursue, and the only course which will enable them to do their share in advancing the cause for which their Leader worked so unselfishly and effectively. Her love for humanity was so great that she gave "all for Christ," and in this she set us an example which, if persistently and consistently followed, will keep the light of pure Christianity burning eternally.

ARCHIBALD MCLELLAN.

THE HEART'S FAR CRY.

The struggle of unrestful sense has been so vast, so continuous, and withal so personal with each one of us, that we are led to think of it as the incense of mortal hope ascending for ever and ever. Lured by that ever expectant, ever disappointed desire which often degenerates into a consuming appetite for some bauble of earthly gain or achievement, men are led to forget the rights of others, and to sacrifice rectitude and every other sweet and blessed thing for the realization of an expectation which has never been fulfilled and which never can be.

Nevertheless, how authoritatively does this restless longing witness to our superiority to the animal, to a capacity for progress, aye, to our nobler nature's kinship to God, apart from whom mankind are ever companioning with turmoil and with tears. Thus the tragedies of life bring high disclosure, for they tell of the unnaturalness of a life of disappointment and sorrow, they reecho the decree of heaven that men must be reconciled to God, and there is no escape from this mandate. Though submerged in the so-called pleasures of sense, or the struggle for prominence and power, men still find that they have to do with a deeper want, which will not cease to cry out for the living God.

Job's plaintive cry, "Oh, that I knew where I might find him! that I might come even to his seat!" expresses this spiritual aspiration. It tells of that unsatisfied seeking for the good and true which is one of the most pitiful as well as one of the most encouraging facts of human experience. It is interesting, however, to note that this cry of Job is expressed in terms which to those instructed in Christian Science reveal one of the important reasons why efforts to find God have so often failed. The Christian Scientist has come to see that nothing hinders the attainment of a demonstrable knowledge of God more surely than His localization in our thought, the belief that He has place relations; and this for the reason that it speaks for our limitation of the divine nature, that false concept to which Mrs. Eddy refers when she says, "Human philosophy has made God manlike" (Science and Health, p. 269).

This is one of the most distinguishing and fundamental teachings of Christian Science, that God is omnipotent Truth; that there is no far-away-ness to His place and power. The moment we place any limitation upon the ideal, that moment we assault its essential nature, and would thus unwittingly destroy it; and the psalmist-poet must have had the rebuke of this devastating denial of the divine nearness in view when he wrote that wondrous passage, beginning: "Whither shall I go from thy spirit? or whither shall I flee from thy presence?"

The significance of the Christian Science concept of God as divine Principle becomes more clear as we think of how inseparable from us is every universal or axiomatic truth, that which we accept by virtue of our intuitive recognition of its verity. Such truths are forever present and forever available to all. They are forever at hand, and not afar off. Every basic law of mathematics is thought of in this way, and when God is regarded as the Principle of being, of all law, order, action, and intelligence, from that moment we begin to have a new sense of the impossibility of the divine removal, and the psalmist's words are thereafter fraught with a new and significant meaning.

Job's cry, the cry of every heart, perchance, in its Gethsemane, is the cry of a fettered sense, an unperfected aspiration. To apprehend the universality, the omnipres-

Digitized by Google

ence of divine Truth, is to begin to make it ours. Each can find and appropriate it without let or hindrance, because he knows it belongs to him as it belongs to all, and Christian Science is satisfying the heart's deep longing by acquainting it anew with God, whom it reveals as "universal, eternal, divine Love" (Science and Health, p. 140).

JOHN B. WILLIS.

THE JOY OF OVERCOMING.

In the fifty-first Psalm we read, "Restore unto me the joy of thy salvation," a prayer which finds a wonderful response in the Master's words, "I say unto you . . . joy shall be in heaven over one sinner that repenteth, more than over ninety and nine just persons, which need no repentance." These words close the parable of the sheep which was lost and afterward brought back with rejoicing to the fold.

Here we may ponder with profit the definition of "sheep," as given in the Glossary of Science and Health (p. 594). It reads: "Innocence; inoffensiveness; those who follow their leader." The "sinner that repenteth" is no longer a sinner, but a representative of the spiritual qualities here presented, which must ever find a welcome in heaven because it is really their birthplace. On the other hand, the errors which originate in material belief cannot come into the presence of God, but, as our revered Leader says, "must dwell in dreamland, until mortals arrive at the understanding that material life, with all its sin, sickness, and death, is an illusion;" and when this understanding is reached in Christian Science, "joy is no longer a trembler, nor is hope a cheat" (Science and Health, pp. 543, 298). It goes without saying that the attainment of innocence, or purity, involves the overcoming of the mortal beliefs which cause men to stray from the path of obedience to divine law, and to lose sight of the Christ-idea which ever leads toward health, happiness, holiness.

In the psalm already quoted, we find full acknowledgment of sin and a fervent prayer to be delivered from "bloodguiltiness," and this is followed by the statement, "Thou desirest not sacrifice; else would I give it." No, for we read, "Thou desirest truth in the inward parts." When the truth of being is recognized and obeyed it brings joy everywhere, for the spiritual process which is involved leaves no dark stain on the human consciousness. It means that the man of God's creating is to take the place of the poor trembling culprit of mortal sense who shrinks from the demand of Truth, "Where art thou?" God's man, on the other hand, needs never to shirk any demand of Truth, for he knows that each and every requirement of divine law means salvation to all mankind, points to the overcoming of all that is unlike God, and that dominion which is the crown of all true endeavor.

It is true that the one who rises out of the depths of error at the call of Christ, Truth, must prove to himself at each step of the way his sincerity and singleness of purpose, until he can say, as did the psalmist, "I delight to do thy will, O my God." More than this, he may often be called upon to prove his sincerity to those who may have known him in the past as a sinful mortal, but the effort to do this can only add to his strength, for all the great and glorious things promised in Scripture are not for the self-righteous who think they need no repentance, but "to him that overcometh." What if one still suffers the pangs of remorse for past sins? Is not this promise enough, "There is therefore now no condemnation to them which are in Christ Jesus, who walk not after the flesh, but after the Spirit"? What if one's fellow men doubt his spiritual attainment? Cannot this be quite forgotten in remembering the joy which the angels of God feel in beholding the real man rising above the dark clouds of materiality to claim his own?

There is much for each one of us to overcome before the perfect likeness can be recognized, but "if God be for us, who can be against us?" and right here we are assured, "It is God that justifieth." God justifies us by making us what He would have us be, by enabling us to overcome both sin and disease, destroying love for the one and fear of the other, and we have this assurance of the Master, that the joy which is born of spiritual victory "no man taketh from you."

ANNIE M. KNOTT.

AMONG THE CHURCHES.

QUINCY, ILL.

The beautiful new Christian Science church at the corner of Eighteenth and Vermont streets was crowded yesterday [Sept. 3] at both morning and evening services, with members of the society and its friends, who came to view the handsome interior of the edifice and participate in the interesting and impressive service. It was a representative Quincy audience at both services, which were identical, people coming from all parts of the city.

The historic sketch of the church as read at both services was very interesting. It was in part as follows:—

The first formal organization of Christian Science adherents in Quincy was June 30, 1889. In September, 1891, this society was organized and incorporated under the state law of Illinois as "Quincy Church of Christ, Scientist." Eighteen persons signed their names as first members, two of whom were students of Mrs. Eddy. On Jan. 4, 1896, by vote of its members, the name was changed to "First Church of Christ, Scientist, of Quincy, Illinois." In October, 1905, a committee was appointed to look about for a suitable location for building purposes. It was found that the present site, which seemed most desirable to the committee, could be bought for one thousand two hundred and fifty dollars, and the lot was purchased and the first payment made Nov. 18, 1905.

The lot being paid for by the following March, the church at once began to collect a building fund. In July, 1907, plans by a local architect were drawn for a church edifice, at an estimated cost of eight thousand dollars, to seat about two hundred and fifty people. As time went on, new members were added to the church and the congregation increased in numbers, so that it was quite evident that a larger and better building than was first contemplated was really necessary. In December, 1909, an architect was again consulted for plans for a building to cost about twenty thousand dollars, with an auditorium to seat five hundred. In May, 1910, ground was broken; the corner-stone was laid Dec. 8, 1910, and the church was completed Aug. 31, 1911.—*Quincy Herald.*

BIRMINGHAM, ALA.

The building of First Church of Christ, Scientist, has just been completed, and service will be held in it this morning [Aug. 6] at eleven o'clock. The structure stands on a spacious lot in the heart of Birmingham's picturesque residential district, Eleventh avenue and Twenty-first street, South Highlands. The architecture is of the colonial period. The main auditorium has a seating capacity of five hundred, and the effect suggests a sense of spaciousness under a strong, clear light. The exterior is in stucco. A conservative appraisement would place the value of the property at twenty-five thousand dollars.

The present organization was formed twelve years ago with a membership of only six persons, in a Highland avenue home, about a block from the site. The growth of the membership and congregation has been continuous since that time.—*Birmingham Age-Herald.*

THE LECTURES

BERLIN, GERMANY.

A lecture on Christian Science was delivered by Bicknell Young, member of the board of lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., at the Beethoven Saal Köthenerst. 32, Berlin, on Tuesday evening, Sept. 26, under the auspices of "Erste Kirche Christi des Scientisten, Berlin." There was a large, attentive, and earnest audience, whose sympathetic attitude toward the distinguished lecturer revealed the depth and strength of the Christian Science movement in Berlin. Dr. Carl Grauer, in introducing the lecturer, said:—

While the teachings of Christian Science, to the reader of the text-book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, may appear clear because they are logically correct, being evolved from generally acknowledged hypotheses, the truth of this teaching must however be even more strongly acknowledged, if it is possible to produce practical proofs of its validity. After the Discoverer and Founder of Christian Science, the Rev. Mary Baker Eddy, had repeatedly proved the correctness of her systematically compiled knowledge, which she had gained from the study of the Bible, she was entitled to name her teaching "Science;" and because she founded her attained knowledge on the teaching of Jesus Christ, to name it "Christian Science."

Christian Science like natural science does not demand blind belief, but like all other scientific systems it bases the truth of its teachings on proofs, and just on this fact rests the great importance of this new yet old religion; through the study and application of which an ever growing trust in it is gained, and this is founded on the increasing proofs through which the correctness of its teachings is constantly being supported and strengthened, and because of this trust the rapid increase of adherents to this religion becomes explicable. Any one who has been healed of some physical ailment, and has further been privileged to experience through Christian Science the freedom from moral and mental disharmony, has the desire to know more of Christian Science. "To those leaning on the sustaining infinite, today is big with blessings." It is with this sentence that Mrs. Eddy begins the Preface of her text-book, and as a matter of fact, were all those who already have received such blessings through Christian Science assembled in one spot, and if to each should be allotted only a moment's time, it would last indefinitely to hear all those who had experienced the blessed influence which this teaching has brought to them. Also in our midst are many who could rise and testify to the profound importance which Christian Science has become to them in their lives. There will also be many here who would like to hear some particulars on this vital subject; therefore we all are glad of this renewed opportunity to hear a coherent lecture on Christian Science, and welcome most heartily the speaker of the evening.—*Continental Times.*

CHICAGO, ILL.

Virgil O. Strickler lectured under the auspices of First Church of Christ, Scientist, in the church edifice, Sept. 26, 28, and 29. On the third evening he was introduced by John C. Ryan, who said in part,—

The lecturer of the evening has already been introduced to two large audiences in this church this week, so I shall spare him an extended presentation this evening. Whenever I am called upon to take any part in Christian Science work, it is always a source of great pleasure to me to refer to some act or word of our revered Leader, Mary Baker Eddy, to whom the world will some day accord her rightful place for what she has accomplished for humanity, and I hope the time will never come when Christian Scientists will omit to acknowledge publicly their grateful appreciation of what she has done for them.

In the year 1884 Mrs. Eddy came to Chicago to teach a class in Christian Science and to start the work here. She found lodging in a boarding-house somewhere in the vicinity of Randolph and Market streets and was given the use of the parlor for her class. When the nature of her teaching became known, she was forced to move after one or two lessons had been given. She found another place, and was also requested to move from it before the completion of the lessons. Finally a third place was secured, in which she was permitted to finish the course of instruction. Think, my friends, of the wonderful courage of that lone woman who for many years patiently endured the jeers of a misapprehending public, and the many vicissitudes through which she passed, and for what? Not for the aggrandizement of self, but that mankind might learn of a way through which it could be set free from the bondage of the material senses. I believe she was a messenger sent from God, and that she knew she was giving to the world the same great truth that Christ Jesus taught and practised and commanded his followers to practise nineteen hundred years ago.

The growth of the cause of Christian Science in this city alone, since that small beginning in 1884, only twenty-seven years ago, has been phenomenal, and could not have been possible without the proof of its teaching as shown by the healing work. A noted divine of Chicago recently stated in the public press that "the mind dominates the body; an angry mood changes the blood chemically. Man has pushed his way to the verge of matter, which means that the coming man must be more spiritual and less material to hold his own." A few weeks ago a celebrated physical scientist stated that "the universe was made by mind, whose attributes are entirely mental." These are indications of the trend of thought from a belief in the power of matter to the recognition of the fact of the allness of God. The lecturer will tell you something of this teaching, and let me assure you that to the extent you give earnest heed to what he says, and honestly and fairly judge his statements with the same open mind that you would any argument you knew to be true, to that same degree you will be benefited.—*Correspondence.*

KALISPELL, MONT.

Clarence C. Eaton of Tacoma spoke on Christian Science at the Opera House last night [Oct. 2]. Judge Erickson introduced the lecturer to the audience, saying:—

In order that I may not appear under false colors tonight, let me make a confession: I am not familiar with many of the doctrines of Christian Science. This, however, is an age of research, and perhaps in no time has man made a more strenuous or determined effort to improve his condition and environment; in fact, to correct and uplift the conditions that govern society today. We are told that Christian Science is founded upon the words of the Bible, upon the God of the Bible, and if this be true, I think there must of necessity be many of its teachings that are a help to society and a step toward higher and better things.

Daily Inter Lake.

POLO, ILL.

Bliss Knapp delivered a lecture on Christian Science Oct. 5 in the lecture room of the Public Library, to an intelligent and interested audience. He was introduced by Mrs. Annistine Waterbury, first reader, who spoke as follows:—

As Paul stood before King Agrippa, accused of many things, so Christian Science stands before the bar of public

Digitized by Google

opinion today. Paul counted himself happy because he was permitted to answer for himself touching the things whereof he was accused. In like manner Christian Scientists are happy to give a reason for the hope that is in them, and it is for this purpose that the Christian Science board of lectureship has been established.—*Correspondence.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice, it is assumed that the lecture will be given in the evening.

Amsterdam, N. Y.—William R. Rathvon, Pythian Temple, Nov. 27.

Beloit, Kan.—Clarence C. Eaton, Church Edifice, Third and Hersey streets, Nov. 28.

Beaver Falls, Pa.—Willis F. Gross, Lyceum Theater, 3:15 p.m., Nov. 26.

Bromley, Kent, Eng.—Bicknell Young, Drill Hall, East street, Dec. 5.

Bradford, Yorks, Eng.—William D. McCrackan, M.A., Mechanics Hall, Dec. 7.

Camden, N. J.—William R. Rathvon, Temple Theater, 415 Market street, 3:30 p.m., Nov. 26.

Chanute, Kan. (First Church).—Willis F. Gross, 3 p.m., Nov. 19.

Chicago, Ill. (Third Church).—Judge Clifford P. Smith, Church Edifice, Washington boulevard and Leavitt street, Nov. 20 and 21.

Chicago, Ill. (Eighth Church).—Frank H. Leonard, Church Edifice, Michigan boulevard and 44th street, Nov. 27 and 28.

Detroit, Mich. (Second Church).—Prof. Hermann S. Hering, Church Edifice, East Grand boulevard, near Jefferson avenue, 3 p.m. and 8 p.m., Nov. 26.

Ely, Nev.—Bliss Knapp, Eastely Auditorium, Nov. 27.

Lawrence, Kan.—Willis F. Gross, Church Building, corner Massachusetts and Lee streets, Nov. 20.

Logansport, Ind.—Virgil O. Strickler, Elks Hall, Nov. 20.

London, Eng. (Third Church).—William D. McCrackan, M.A., Curzon street, Piccadilly, 8:30 p.m., Dec. 4; 3 p.m., Dec. 5.

Every great historic fact is the expression, the realization of an idea; and this idea constitutes the essence, the greatness, even the truth of the fact; a fact without an idea is a body without a soul.—GODET.

TESTIMONIES OF HEALING.

Through applying the truth as found in the Bible, and "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have found a way to be well, after having been pronounced incurable by doctors; and I shall never be able to express in words my gratitude to God for giving to Mrs. Eddy that wonderful gift of spiritual illumination. Christian Science has shown me the way to health and happiness, and has proved conclusively that as God's child I do not need to be sick.

Previous to March, 1909, I had been troubled with pains in my leg for over six years, and at the end of March I took to my bed and did not walk again for six months. In April the doctors held a consultation and pronounced me incurable, saying (though they did not tell me at that time) that I could not get well. The doctors pronounced the disease tuberculosis of the bone. I submitted to an operation on June 22; my leg was put in a plaster cast two different times, and was kept so for over seven weeks. I left the hospital after five weeks, on the road as I thought to good health, but after I had been home four days I seemed to have lost all I had gained by the operation, and the leg broke out again very badly. The surgeon who performed the operation was consulted by the doctor who had attended me through all this illness, and a remedy was prescribed and used for weeks, but with no good result. The surgeon was again consulted, and he then said I would have to go to the hospital and submit to another operation, and perhaps two; that if I did not, I would never be able to walk again, but have to lie in bed indefinitely, with the outcome a life of miserable invalidism.

It was at this time that I had the opportunity to learn something of the truth which makes us free. Having a sister who is a Christian Scientist, I inquired of her how I might learn something of this truth, and after explaining something of its teachings, she directed me how I might get help, and my daughter was sent to find a practitioner. It was late in the evening when the good lady was found, so she gave me an absent treatment, while my daughter waited. The practitioner also sent a copy of Science and Health, with the cheering message that there was yet hope for me. The next morning she came to see me, and I shall never forget how we were lifted from blank despair into hope, as we were assured most positively that God never sent this affliction upon me. I experienced a spiritual uplift such as I had never known before; it seemed to me that this explanation of divine Love was most reasonable, and that I could accept it as the truth. In less than three weeks I had learned enough of the truth to get out of bed unassisted except by divine Love and Truth; I walked from one room to another, and then down the stairs to the porch. What a blessing it was to know that God heals all our diseases!

In a few months I was able to go to work again. I had sought a fuller understanding of the truth in those few months, with the result that I have been the avenue through which others have been brought from sickness and despair into health and happiness. In writing this acknowledgment of my experience of God's love for His children, I think it right to state that the practitioner made all her work as impersonal as possible, always saying that we must express the truth of man's being. My wife, who had been afflicted for over twenty years, on learning of this blessed truth threw her material remedies away and began to improve from that very time. She is better now than she has ever been at any time, and feels well and strong, for which we are indeed grateful.

To say that I am thankful for what Christian Science has done for me and my family does not convey, nor can words be framed to express, my gratitude to God, also to

Digitized by Google

Mrs. Eddy for having made the way of salvation so plain. I find my greatest happiness in trying to help others, and I want to live so that I may show by my actions that I am indeed a follower of the Master. It is my desire to have in me the Mind that was in Christ Jesus when he went about doing good. I sincerely hope that others who read this testimony will find such encouragement in the truth that it will help them out of the darkness of mortal thought into the light of everlasting Love, and I know that God will do for them what He has done for me and mine.

R. P. VAIL, Jersey City, N. J.

Three and a half years ago, on a to me very memorable day, Science and Health was brought me by a lady who was a student of its teachings. For six years prior to that afternoon, I had suffered from an internal disorder, also from nervous collapse, enduring that which no tongue or pen could describe, both mentally and physically. During that time I had many physicians (seven from New York city and Brooklyn), all of them able men so far as medical skill was concerned, and they did all that could be done by material means to relieve my suffering. Nearly all of them advised an immediate operation, to which I would not consent.

On one occasion, when I had suffered everything mentally and physically, night came on and I was almost ready to give up the struggle, but before lying back on my pillow there came from the very depths of my being this cry, "O God, if Thou art, show me the light that will lead me out of this suffering." It was on the following afternoon that Science and Health was handed to me, and I was healed immediately. After reading but a few pages I emptied the contents of a bottle of medicine that had just been purchased. I was not only healed of the internal and nervous trouble, but also of a bowel disorder which was chronic and for which I had been treated for years by various doctors but had never been permanently relieved.

From the day that I came into Christian Science I have never used any material remedy and have never needed one, for I have been healed—perfectly. I also had a felon on one of my fingers, and while it lasted the usual time, it never gave me the slightest inconvenience. Another demonstration was made in respect to my feet, from which I suffered greatly in warm weather, having bunions and also corns; but after my healing, while in a mountainous country, I walked ten miles, all the party declaring that I could never make the trip. I was, however, the only one who did not sit down to rest either going or returning, and they all marveled at it and could not understand how I could do it. My husband was cured of the tobacco habit after he had smoked for sixteen years. This healing was to him very wonderful. He was also cured of chronic stomach trouble, for which he was always taking medicine, but he has never taken any since our coming into Science.

For these great blessings we are grateful beyond any verbal expression, both to God and to our beloved Leader, Mrs. Eddy.—SYLVIA KISHIMA, New York, N. Y.

I owe so much to Christian Science that I feel it is my duty to send my testimony. I did not come to Christian Science for any bodily healing, but for a true religion. It came to me in a time of great trouble, and I found it indeed a real comfort. Since then, over two years, I have had many proofs of the truth and its healing power.

The greatest demonstration made to me was eight months ago, in the painless birth of twins. I had five children before coming to Christian Science, and each time had experienced great suffering and been confined to the bed for a month afterward. This time, with Christian Science help, I felt no pain, and the following day I was down to dinner, feeling quite strong.

Measles, fever, colds, injuries, and many other ills which come to a family, have all been met and overcome with Christian Science during the past two years. But what I feel the most grateful for is the improvement which I have realized in my own character, for it brings more happiness to me and in the home. I hope to grow daily, and to be worthy of the name Christian Scientist. I am indeed thankful to God, also to Mrs. Eddy, for the true knowledge of divine Love.

MRS. LEGH BARRATT, Brundall, Norfolk, England.

[Translated from the German.]

Last year, in September, I noticed a hard lump in my left breast. I became alarmed and went to see a physician, who told me that, although the condition was not yet serious, an operation would probably become necessary. I was very much frightened, and a few days later I began to feel pain in my breast. I had heard of Christian Science, however, and started off for Frankfort-on-the-Main, where I called upon a practitioner. I derived a great deal of comfort from my visit, and took home with me from the reading-room Mrs. Eddy's book, "Science and Health with Key to the Scriptures." The practitioner took up treatment immediately, and two days later the pain left me. The hardened place has now completely disappeared; I am perfectly well, and rejoice in boundless gratitude to God. I have been reading Science and Health diligently all this time, and am a happy attendant of our church every Sunday.—JENNY KNUTZEN, Heidelberg, Germany.

First of all I wish to say that I am thankful to God, and to His servant, Mrs. Eddy, for the quick response to my call for healing. Five years ago a friend loaned me a copy of Science and Health, which I carefully and earnestly read, hoping to see the light and to know the truth which I have since found. For thirty-five years I had suffered from illness, a stomach trouble which grew worse from year to year, until I realized that I must have help. During this time seven doctors had prescribed for and treated me, so I became greatly discouraged. The lady who loaned me Science and Health two months previous to a severe attack, asked me why I did not try Christian Science. I then said that I would and she hastened to the telephone and called a practitioner, who gave absent treatment at once. In thirty minutes I was sleeping peacefully, and when I awoke I felt better than I had done for years. With two treatments I was entirely healed. I can indeed say that I am thankful for this blessed truth.

MRS. MARY A. BATES, Grand Rapids, Mich.

I was healed in Christian Science of the effects of poison ivy on my face in two treatments. This was about the beginning of June, 1910, and the following week my mother was cured in two treatments of a very bad case of erysipelas on the leg.—MRS. MARIE KUDER, Mamaroneck, N. Y.

I am glad to testify to the practical good that Christian Science has brought into my life. For the healing of physical ailments I have found Christian Science to be a present and always effective remedy. A tendency to take cold from exposure or sudden change of weather has been overcome through the knowledge gained from Science and Health, that God "is not the author of barbarous codes," that man is spiritual and subject to spiritual laws only, and that "matter can make no conditions for man" (pp. 381, 120). As a cure for moral ailments it is now plain to me that a knowledge of God and His Christ, as taught in Christian Science, is the one and only remedy, for this gives to humanity higher and purer motives and aims, all leading upward. This spiritual tendency accomplishes that which the fear

Digitized by Google

of punishment fails to do, and enables men to be truly honest.

Mrs. Eddy, in "Science and Health with Key to the Scriptures" as well as in all her other writings, has so lifted up the Christ-ideal that one feels irresistibly drawn toward Spirit and all things spiritual, because of the purity and loveliness thus revealed, and he voluntarily turns his back upon all that is fleeting and false, thus proving the words of our Master, "And I, if I be lifted up, will draw all men unto me;" and again, "No man cometh unto me except the Father which hath sent me draw him." What an ever increasing debt of gratitude the world owes our dear Leader, Mrs. Eddy, for giving Christian Science to its suffering ones, and we all owe much to her faithful helpers, The Christian Science Publishing Society and the contributors to our periodicals, for making the *Sentinel, Journal, Herold,* and *Monitor* what they are, a blessing to all mankind.

To those to whom life has seemed a failure or a very uneven battle, I can heartily recommend the study of the Christian Science text-book, "Science and Health with Key to the Scriptures."—N. H. MARTYN, Riverside, Cal.

Words are inadequate to express the good I have received from Christian Science. Four years ago I had a serious bite from a dog, but I was healed in Christian Science after *materia medica* had failed. I have also had a very wonderful healing by the same means for my little daughter. Her case was a skin disease in a very bad form. I am indeed grateful for Christian Science, and am growing more so each day, as I am able to help myself and my family.—MRS. MARTHA RIES, Oskaloosa, Iowa.

It is with love and gratitude that I send my testimony to tell the many readers of our Christian Science literature what it has done for me. I had been suffering very much with rheumatic trouble and an eruption, besides many other ills that afflicted me very much for a few years. I did not employ doctors, as I knew they could not cure me. I tried medicine, but I could not get any relief that would last long.

About four years ago I became acquainted with Christian Science healing through some whom doctors could not help, and I thought I would see what it could do for me. I wrote to a practitioner, and took absent treatment. I also bought a copy of "Science and Health with Key to the Scriptures," and found it very interesting. I did not understand it very well, but I tried to get all the good out of it I could, and it was not very long until many of the ills had left me. The rheumatism was slow to yield, but it left when Truth and Love took their place in my thought, and I can sincerely say, with many thanks, that I was healed through Christian Science. I gained in flesh and in strength, and now I am well, at seventy-seven years of age.

I am very grateful to God, and to Mrs. Eddy for the physical healing and the many blessings and proofs I have had in the past; also for the peace of mind which has come to me. I am very thankful, too, for the understanding I have received of Christ, Truth, and how grateful we should be to Mrs. Eddy for her faithful and patient striving to enlighten humanity in the truth that makes us free. I have tried to live a Christian life for many years with what understanding I have, but I do not belong to any Christian Science church, as I am so far from any that I cannot attend. I have the Bible and Science and Health, however, also the *Sentinel* with our other literature, and I am trying to work out my own salvation by the light of truth.

MRS. ELIZABETH BARGER, Butternut, Mich.

About two and a half years ago my general health began to run down. My eyes in particular troubled me very much, and as I was very fond of reading it was a great trial to me to not be able to use them as I wished; but by having some one read my lessons to me, I managed to keep on in school for the rest of the term. Just about this time my oldest sister was healed in Christian Science of a severe eye trouble, after having tried glasses and other things. All the next summer I was worried because I could not go on with my studies and graduate with my class, but when school began I started in, thinking I would do the best that I could. I went part of the day until after Christmas, but as my health became worse I stopped altogether. I had some treatment in Christian Science, but I did not get relief at once, and so I tried medicine again. I was getting thinner and weaker every day, and few people thought that I would ever recover. One doctor told me to stay in the fresh air as much as possible and eat all I could, but the bright light outdoors hurt my eyes so that I had to keep a dark cloth over them most of the time. Besides this, everything that I ate caused me to suffer. Another doctor thought a change of climate might be helpful.

When I had decided that there was no material help I was willing to give up medicine and leave all to God. My sister wrote for absent treatment, and I was completely healed in two weeks. I was able then to realize clearly what is meant by the statement, "Man's extremity is God's opportunity." I regained flesh and strength very rapidly, and have gained wonderfully in every respect. Many friends say that my healing is a miracle.

I have found in Christian Science that the word of Truth is a constant companion and a savior from all evil. It is not surprising that I feel very grateful for Christian Science, when three out of our family have been healed of serious ailments by it.

BERTHA KERR, McAlester, Okla.

To say that I am grateful for Christian Science is to express it mildly. I have depended upon it for healing for three years. I was for forty years troubled with so-called "milk-leg," with constant discharge; but this was healed in two weeks' treatment under Christian Science. Later, while on a visit in Ohio, I suffered from pains and swelling of the knees, caused I thought from going up and down stairs, as I had not been used to it. I wrote to a practitioner in my home town, and was quickly healed. This seemed marvelous to me, as I was so many miles away. Some time after this I had a severe attack of cold, and through relatives was persuaded to call in a physician. For three weeks I grew worse, was so weak that I could not sit up or eat anything, while the pain in my head was unbearable. I finally said that unless I had help soon I could not last long. A Christian Science practitioner was then called in, and after an hour I was up and dressed, and went to the table and ate a hearty supper. Other proofs of Truth's power were the healing of croup, severe pain in the eye, and throat trouble. All these were quickly overcome.

I am seventy-seven years old, and feel that I owe my good health to Christian Science, as I do all my work. I am certainly grateful to God, also to Mrs. Eddy, and my desire now is to be worthy to be called a Christian Scientist. I hope this will help some one who is struggling along in the material way.

MRS. B. E. TAYLOR, Neodesha, Kan.

With a heart overflowing with thankfulness to God, and gratitude to Mrs. Eddy, for the many blessings received in Christian Science, I write these few lines. After wearing glasses for many years, my eyesight became so poor that it was impossible for me to be fitted with other glasses. I suffered a great deal of pain in the eyes and head, and was unable to read, or sew. At this time, when I was

Digitized by Google

almost in despair, a dear friend told me of Christian Science, and I was healed in one treatment, so that the pain was entirely gone. I took off my glasses, and can now read the smallest print and sew all day long without any bad effect, through the knowledge which came to me that eyes mean "spiritual discernment" (Science and Health, p. 586).

Christian Science has been a wonderful help to me in every way. In December, 1909, my son (an only child) passed on, under *materia medica*. He was traveling when taken ill and was sent to a hospital, but I was able to be with him the last few days. If it had not been for the help of a dear practitioner during this awful time I could not have endured the trial. I have come to realize that God knows no separation, and that in His presence is "fulness of joy." I longed to do some work for God, and my prayer was answered. I invited a few Scientists to meet at my house, and we soon formed a Christian Science society. We have now a nice place on the main street, where we have regular services and Sunday school, and maintain a reading-room. The growth has been quite wonderful. When we began, we did not know where to look for readers, or a practitioner, but we found them right among our own members. At first they were afraid, but the thought came quickly that we of ourselves can do nothing, but that God can do all things. With this in thought we now have excellent readers.

It has been my glorious privilege to do some healing work, and in doing this work my sorrow has been turned into joy. I can indeed say that Love has given me "the oil of joy for mourning, the garment of praise for the spirit of heaviness."

MRS. MARY PELZER, Mamaroneck, N. Y.

We hear a great deal said about Christian Science parents leaving their children to suffer by not having *materia medica*, and I wish to give a fair statement of what Christian Science does for children. Twenty-two years ago a little babe, under medical treatment, was taken from me, leaving me with bitter thoughts toward God for taking my little one, as I then believed He did. My pastor told me it was for some purpose, perhaps to draw me nearer to God; but I had prayed so earnestly for my child to be spared, that I felt I could never pray again. Now, thanks to Mrs. Eddy's teachings in Science and Health, we know how to pray so that our prayers may be answered. No one but a Christian Scientist can tell what a blessing this is. I thank God that I have found this blessed truth, which sets us free spiritually and physically. I have found it a great blessing in bringing up our children. The little ones realize the wonderful help they receive through Christian Science, while still babes. One evening my son's child, who was just beginning to walk, burned his feet very badly. His father carried him half a mile to our home, the little fellow crying all the way, but in an hour's time he was relieved and slept well all night. Next morning he got up and played and ran about. In a few days his feet had healed without a scar.

Two of the little ones had a fever in its very worst form. For a few days it seemed that they could not recover, but by clinging steadfastly to Truth, and realizing those inspiring words of Mrs. Eddy, "Divine Love always has met and always will meet every human need" (Science and Health, p. 494), in one week all discordant conditions had disappeared; the children were able to sit up, and in less than two weeks they were as well as ever. One more proof that Christian Science is what we need for our little ones! A short time ago my husband, who had been sick but was then feeling better, sat eating his dinner. All at once he said he must lie down, but when he tried to rise he fell over and to all appearance was dead. I stood in perfect terror, thinking he was gone. At this moment our little granddaughter, only four years old, came running to my side, and said, "Grandma, God is Love, God is All." These words, uttered by the little one, brought me to a realization of what I was doing. I commenced to declare aloud the truth, and in a few minutes I could see that the child was right. God is All. God is Life, and ever-present divine Truth soon destroyed all evidence of error. I feel certain that had it not been for the little child my husband would not be with us today. How true are the words of Scripture, "A little child shall lead them"!

I send this testimony with the hope that it will encourage other parents to cling to Science and Health as a guide for their little ones, as well as themselves. "Out of the abundance of the heart the mouth speaketh;" yet words are inadequate to express my gratitude to God, and to Mrs. Eddy for showing us how to understand the Master's teachings. I know that God's blessing will extend over every Christian Science family, and that many more will be brought to accept the truth which sets free the little ones as well as the parents. Jesus said, "Suffer the little children to come unto me." How, then, can we do otherwise?—MRS. ESTELLE SLOPPY, Prosser, Wash.

About three years ago I was healed of severe acute lung trouble. I was unable to lie down, as I could not breathe, but within six days I was healed by Christian Science and was able to be up and attend to my household duties. The doctors had said that they had no hope for me, and that there was no help for me in the line of *materia medica*. Before this attack I could only walk a few blocks, but God has healed me of all these ailments through the understanding gained by reading "Science and Health with Key to the Scriptures" by Mrs. Eddy, and with the help of a practitioner. I was also cured of fainting spells and constant dizziness. I had worn glasses for over eight years, but laid them off after having one treatment in Christian Science.

The truth as given in the Bible and Science and Health has been my daily help in these last three years, together with the Christian Science periodicals, which are daily food for me and mine. I am truly thankful to God, also to Mrs. Eddy, for my healing and all these blessings.

MRS. LOUISE GRABO, Chicago, Ill.

One evening in April, 1910, I was taken suddenly with severe pain in my heart, and other alarming symptoms. My husband and I began to declare the truth and strove to realize that God is Life, but a great sense of fear overshadowed us, as I seemed to be passing on. Help was then asked for in Christian Science, and a practitioner immediately took up the work for me, with the result that in less than half an hour all pain vanished and I fell into a peaceful sleep. I have had no return of this trouble, and words cannot express my deep gratitude to God for this provable truth which has been revealed to us in Christian Science.

MRS. BLANCHE R. BEGOLE, East St. Louis, Ill.

I wish to return thanks to God for what Christian Science has done for me. Three years ago last June I severely injured my ankle, and called on a practitioner to attend me. After this she noticed that I had my son, who was then fourteen years old, tied in bed with a broad, strong tape line to prevent him from getting out of bed while asleep and walking about the house, which he had been in the habit of doing ever since he was able to walk. As we had had the best doctors of the city to treat him for this trouble, we finally thought it best to tie him in bed. She told us that we should take a different method, now that we were coming into Christian Science, and advised us to untie the boy. She then treated him, and I am happy to say that while it is now past three years, he has never

Digitized by Google

walked in his sleep but once since, and we have never tied him.

I, myself, had worn a truss for thirty-two years, but for the last three years I have not worn it. For these healings in Christian Science I am very thankful to God, also to Mrs. Eddy.—E. F. MARITZ, St. Louis, Mo.

I feel that I must show my gratitude for the many benefits I have received in Christian Science by giving this testimony, in the hope that it will help others who are suffering as I was. For several years I had been troubled with severe headaches, which would sometimes end in bilious attacks, unless I kept very quiet. If I took even a short railway journey, it would bring on an attack which sometimes lasted for days, but since coming into Science I have traveled long distances without a sign of illness.

In November, 1907, a friend told me of her healing through Christian Science, and I saw so great a change for the better since the last time I had seen her, which was some weeks before, when the doctors said they had done all they could for her, that I thought I should like to know more of this religion, of which I had never heard until that night. I accordingly went to a Christian Science service the next Sunday. I thought it very impressive, and felt it was the truth that I was hearing. I had attended church all my life, and yearned for something more than I received. I borrowed the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and afterward bought a copy. I studied earnestly, and attended the services regularly without any thought of physical healing; but after six weeks' reading of that book, I found to my surprise that I had not had a headache since the first service I attended. I was also able to leave off my glasses without any ill effects, and I have never worn them since. I can see perfectly well to read any type, however small, while worry and many other minor ailments have been overcome with the little understanding of the truth I have gained.

I am thankful to God for the physical healing; but more so for the better understanding which Christian Science has given me of the Bible, and for the spiritual awakening I have had. Gratitude is also due to Mrs. Eddy, who was courageous and good enough to show this truth to a waiting world. My daily wish is that I may be a channel for Truth and Love, that I may be able to help others to see their way out of the bondage of material sense into the glorious liberty of the children of God.

ALICE TATHAM EASTWOOD, Blackpool, Lancashire, England.

[Written for the *Sentinel.*]

A RAY OF LIGHT.

AGNES FLORIDA CHALMERS.

PERPLEXED with problems of a weary day,
Condemning all whose words had caused me pain,
I turned with lagging step my homeward way,
And prayed that I might find the light again.
The Father heard my prayer. A little child
Played near my path, with pebbles in the sand;
The tender, fading sunlight seemed beguiled
To lend the child more light, and thus betray
Each twilight shadow and the skies of gray,—
And as I passed he smiled and touched my hand!
Yes, this was all,—a sweet child's loving touch,
And smile, pure as the sunlight's gladsome ray;
I knew at once I loved mankind so much.
The joyous gospel of the child at play
Awakened me again to sing and pray.

FROM OUR EXCHANGES.

[*Churchman.*]

The time has also gone by when those who profess other forms of worship can proclaim themselves as the sole court of appeal by which all of the various types of worship can be judged. There is no indifference in this attitude, for let it be remembered that this generosity comes from an age of Christianity which is more active in spreading the name of Christ among non-Christian peoples than practically any other period of the church's history since the apostolic time. It also comes in a period of the church's history when Christians of every name are convinced that the broad principles of social right and justice should be applied to legislation, government, philanthropy, and business life. All of us should want to be faithful to the Reformation where the Reformation has to teach us faithfulness to Christ. All of us should want to be faithful to the medieval church which produced wide enthusiasm and great men such as Francis of Assisi. But this kind of faithfulness should not obstruct the vision of a broadening faithfulness that can find its satisfaction, not in the deeds and phrases which divide Christian men from one another, but only in loyalty to the absolute command of Christ himself that those who accepted his religion should do his work as the children of one family, with the badge of a common brotherhood.

[Rev. Roger S. Forbes in *Christian Register.*]

You may try to reform humanity from now until your working days are over, and you will probably fail; but if you are in tune with humanity, if you appreciate your fellow men deeply, if you venerate them for and believe in the reality of the possibilities bound up in them and waiting to be released, you can invite them to go onward and upward with you to better things: you can say, "Come," and they will never desert you. Your lips will surely be graced with a magical kind of oratory. The shepherd from the hills of Nazareth always went before his sheep, never applied his staff to their backs. He was not a commander. He was a lover,—a lover of mortals. When he said "Come," the word did not grate upon their ears. They heard his voice? Yes, and they also knew it.

Others have said that we ourselves and the influence which we exert upon others are one and the same. To separate ourselves from our influence is impossible in the sight of God. We are what we mean to those who have had a chance to become truly acquainted with us. How do you know whether you are spiritually well or sick? By observing the manner in which you affect those with whom you come in contact.

[*Christian World.*]

Revolutions, said Mirabeau, begin in the best brains and filter down from them to the masses. The revolution that is now in actual process among us has followed that law. The conditions under which multitudes of our poor live have become more intolerable to the really great among us than to the people themselves. We are today in the presence of an idealism, a Christianism, we will say, that refuses to enjoy itself except in procuring a general enjoyment. It does not want to live in palaces while other men herd in hovels. If the comfort of the whole means sacrificing the luxury of the few, it will call for that sacrifice. It sees with an ever-clearing vision how little of this world's goods are needed as requirements of the fullest, freest, noblest life. Give a man his work, his friends, his love, his faith; give him art and beauty, the splendor of the heavens and of the earth; the love in his heart answered by the love of all other hearts, and what more does he want? These are the things which are becoming growingly clear to high and low, to rich and poor.

[*New York Observer.*]

Paul said, "I die daily," and every man does, in respect of various lesser values of life, which perish that the new and better man—that is, the spiritual man—may have his advent. The analogy holds also in the sphere of society, which, if it is to survive in purity and strength, must, like the spiritual man, be renewed every day; nor will this renewal be without its price and its cost in heroic moral conflict and positive, aggressive attacks upon the strongholds of sin. Now, whatever defects and failures may justly be charged to organized Christianity as viewed in any particular church or denominational groups of churches, it is indisputable that Christianity itself works, so soon as anybody anywhere believes that it will and sincerely tries to put it in practice. The gospel is a force, a positive contribution to human life, and if at any time or in any place a religious movement fails of success, that movement is not to be identified with the gospel; or, if it is only partly a success, that portion of the effort which represents real advance is due to gospel motives, persuasions, and graces.

[Rev. R. H. Potter in *Advance.*]

Men indict our age as an age mad in the pursuit of pleasure. He who has vision to see will discern that the mad rush for pleasure, the ceaseless touring of the rich, the restless excursioning of the poor, the lavishing of money on costly dinners and on cheap picture-shows—this unslaked thirst for excitement which moves the masses of our people, which makes of the purveying of amusement a vast business which artificially fans the flames which heat it—all this is a symbol, an outward expression, of the appeal from the hearts of men for rest and peace. It betokens the spiritual impoverishment, the fear of quietness and of meditation and solitude that go with a conscience ill at ease and a life unreconciled to the mystery of things; the heart of the world, the God of life.

[Dr. Wilfred T. Grenfell in *Congregationalist and Christian World.*]

Conventional religion says that Christ's message is, "Follow the teachings of other men who know better than any one else." They may know Hebrew and Greek and theology better, but the monitor God puts in an honest man's own heart is a far better interpreter, because Christ asks us for a translation into deeds, not words. Christ says no man is a Christian who has not his spirit. Christ never asked for submission to a cut and dried creed, or sought admiration or adoration. He asked for the brand of faith that stands for following him, which kind of faith is simply a synonym for salvation.

[*Christian Work and Evangelist.*]

One of the things toward which the minds of all prophetic souls in the church is turning is the reunion of Christendom. In five or ten years a great world conference of faith and order is to be held to consider this question. Here is a comparatively untried field, but one of vastest scope and incalculable significance,—to make one again all the Christian forces of the world, that united they may build the beautiful city of God in the world. It is a challenge surpassing all other calls the world is uttering.

[W. H. Fitchett in *Public Opinion.*]

One of the certainties of the future, in the judgment of the present writer, is a new authority which Christian faith will take, largely as the result of science, which, like Kepler, will learn "to think God's thoughts after Him." But this authority may express itself in terms which at first the churches will not recognize.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Fluno, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan,* and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine.* These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy, Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.25. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents, each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents, each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

SALE PRICE, POSTPAID: Single copy, 10 cents; twelve copies, ONE ADDRESS, $1. Foreign rate, single copy, 12 cents; twelve copies, ONE ADDRESS, $1.25.

Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large sized book), single copy, $6.00; twelve or more to one address, each, $5.75. Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in *The Christian Science Journal* since 1883, with revisions and additions. Price (cloth), single copy, $2.25; twelve or more books to one address, each, $2.00. Morocco, limp, round corners, gilt edges, convenient for pocket, single copy, $4.00; twelve or more to one address, each, $3.75. Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy, $5.00; twelve or more to one address, each, $4.75. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $3.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers, gilt top. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

COMMUNION MESSAGE, June, 1902. The annual message to The Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Mary Baker Eddy. Deckled edges. 20 pages. Price, single copy, 50 cents; twelve or more copies, 38 cents each.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, single copy, 60 cents; six to eleven copies, inclusive, twelve or more copies, 45 cents each.

CHRISTIAN HEALING. A sermon delivered in Boston. 20 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, single copy, 21 cents; twelve or more copies, 17 cents each.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, single copy, 50 cents; twelve or more copies, 40 cents each.

POEMS. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Price, single copy, $1.50; six or more copies, $1.25 each.

The above prices cover all charges for express or postage on shipments either domestic or foreign.

Quantity prices are on shipments to one address, but quantity lots at quantity prices cannot be made up of different books or of different styles of binding. *Attention is called, however, to the exception to this rule which is made in the cases of Science and Health, and of Miscellaneous Writings as given under these titles in this price list.*

Direct all orders for above works, and make remittance by New York draft or money order, to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

ITEMS OF INTEREST.

National.

The Elizabeth tunnel, the most important factor in the construction of the Los Angeles aqueduct, which has recently been completed a year in advance of the time required for the work, is 20,870 feet long, and is the second longest water tunnel in the United States, the Gunnison tunnel, which has a length of thirty thousand feet, ranking first. The Elizabeth tunnel, which is situated sixty miles northwest of Los Angeles, Cal., was driven through the crest of the Sierra Madre mountains in twelve hundred and forty working days. The new tunnel has a capacity of six hundred million gallons per day and a grade of one foot to the thousand. When the concrete is placed in position the tunnel will be nine feet six inches wide and ten feet ten inches high. The excavation was made from two directions, and so great was the precision of the engineering operations that when the two sections came together it was found that they met within one and one eighth inches.

Martin A. Knapp, presiding judge of the United States court of commerce and formerly chairman of the interstate commerce commission, told a large audience in the Houston Club of the University of Pennsylvania that a crisis is coming which will test the policy of the government's rate regulation system, and that if it fails governmental ownership will be the only alternative. This crisis will come within a generation, he said. He asserted also that there must be a general wage increase for all railroad men and for other workers, that the present system of railroad competition is ill advised, and that the railroads should be permitted to make uniformly profitable rates and thus destroy competition.

The supreme court of Missouri sustains the decision of a lower court in finding for the ouster of the International Harvester Company of America. The court not only ousted the company from its right to do business in Missouri, but imposed a fine of fifty thousand dollars, conditioned that if the company paid the fine, separated itself from the International Harvester Company of New Jersey, filed a statement of its business and showed to the court that it would obey the laws in the future, it would be permitted to continue to do business in the state.

Among the provisions of the will of the late Joseph Pulitzer is a gift of one million dollars to Columbia University for the establishment of a school of journalism, and the ratification of an additional million dollars for the same purpose, subject to certain conditions, which if not complied with by Columbia before the amount is paid over, will result in the sum going to Harvard University, one half of it for a school of journalism and one half for many unusual prizes and scholarships as set forth in the will.

Andrew Carnegie's gift of twenty-five million dollars to aid the cause of education will be placed in the hands of the Carnegie Corporation of New York, organized under a charter granted by the New York Legislature last June "to promote the advancement and diffusion of knowledge and understanding among the people of the United States." Mr. Carnegie's gifts to the public have reached a total estimated at over two hundred and twenty-two million dollars.

The comptroller of the currency has undertaken to stop, by moral suasion, the practice by banks of permitting customers to overdraw their deposits. He has instructed national bank examiners to take up the question with the national banks throughout the country. The overdrafts in national banks, as reported on the call of the comptroller of the currency, averaged thirty-three million dollars in the last five years.

More than three thousand samples of imported food and drugs analyzed at entry ports during the past year were found to be misbranded or adulterated. This was almost one third of the number examined. Similar results attended the work of the inspection force of the bureau of chemistry in its examination of interstate foods and drugs, among 6,800 samples 3,113 having been found to be misbranded or adulterated.

"Felon's stripes" as a punishment for "trust criminals" in the United States to end "commercial piracy under benevolent rules of reason" are proposed in a bill amending the Sherman antitrust law drafted by Representative Henry of Texas to be introduced in the House upon the opening of Congress next month.

The long-fought contest over the power of the interstate commerce commission to prohibit railroads from paying to operators of elevators all compensation for "elevating grain in transit," was finally decided when the United States supreme court held the commission possessed no such power.

New York city has a population equal to that of Boston, Kansas City, and San Francisco combined. It has an area of three hundred and twenty-seven square miles. It expends annually thirty million dollars on educational work. Its school attendance is eight hundred thousand.

The voluntary dissolution of the International Harvester Company, the so-called harvester trust, to meet the terms of the Sherman antitrust law, which has been the subject of negotiation for some time, has been under discussion in Washington at the department of justice.

The supreme court of the United States has decided that moving pictures, based on the scenes of a copyrighted book, may constitute an infringement of the copyright on the book or the reserved rights in dramatics.

The cost of the military occupation of the Philippine islands, based upon the figures furnished by the bureau chiefs, since Dec. 8, 1898, the date of the signing of the treaty of Paris, has been $117,480,403.

Mechanics, laborers, and other wage-earners of Massachusetts may have homes provided for them under certain safeguards, if the tentative draft of a bill prepared by a special homestead commission becomes a law.

The expenditure of nearly forty-four million dollars was made during the present year in road improvements in the southern states alone.

International.

The Medina, carrying King George and Queen Mary to India, left the harbor of Portsmouth, Eng., at 2.30 o'clock Nov. 11, to the accompaniment of a royal salute by the guns of the war-ships and forts. Enormous crowds on shore cheered as the royal vessel passed out. Along the seafront off Spithead eleven dreadnoughts, composing the first battleship squadron, and attendant cruisers, awaited the Medina and led her out to sea. Four first class cruisers will convoy their majesties to the far east. The fleet is due to arrive at Calcutta during the first week of December, and two days later the party will proceed by train to Delhi, which they should reach on Dec. 7. There will be elaborate ceremonies at Calcutta, and the Durbar proper at which his majesty will formally assume the title of King-Emperor will be held at Delhi on Dec. 12.

In the House of Commons last week John Dillon called the attention of the foreign secretary, Sir Edward Grey, to published statements by W. Morgan Shuster, the American treasurer-general of Persia, charging that Great Britain and Russia were obstructing his work and interfering with the independence of Persia. The secretary promised that he would deal with the matter in a statement to the House as soon as opportunity offered.

The long peach controversy ended last week when the Georgia syndicate, the non-syndicate, the non-syndicate interests, and the American dealers ratified the agreement. The contracts existing between the Americans and the non-syndicate firms which caused the trouble were cancelled.

More than eighty thousand Chinese took ship at Amoy last year for the Straits Settlements, the Philippines, and Formosa.

Industrial and Commercial.

The Panama canal commission recommends in its annual report that the government should retain, wholly controlled for its own vessels, but should sell them to the merchant shipping. The existing commissary, manufacturing plant, and hospitals, it was urged, should be continued for the benefit of government forces and shipping passing through the canal. It is proposed that the government should sell tools and appliances needed by ships, should dock and repair ships, and construct a dry dock and a machine shop. The commission recommends early legislation covering canal tolls, organization for the operation of the canal and for government of the Canal Zone. Fortification was recently demanded in order to relieve the commercial world of the use it may make of the great waterway, or the cost of sending ships through it, and just when it will be opened.

After working quietly for four months with a few assistants, Prof. Stewart W. Young of Stanford University has discovered a chemical method whereby millions of dollars will be saved annually to the state of California in vegetation and livestock, a valuable by-product created from fumes of ore smelters, and an industry saved which has hitherto brought only destruction to the surrounding country. Professor Young calls his method the Stanford process. "Its purpose is to remove the sulphur dioxide gases from the smoke of smelting furnaces, particularly roasters," he says. "In some cases it becomes impossible to carry on the two industries of smelting and agriculture in the same district, and a number of important smelters, particularly that of the Guggenheim interests near Bingham, Utah, have been enjoined by court orders issued on complaint of farmers."

Apples grown in Georgia orchards won two first prizes and one second prize at the international exhibit at Spokane, in the heart of the western apple country. The state already has about fifty thousand acres planted in commercial apple orchards, and about four hundred thousand trees in bearing.

With the closing of the twenty-two salmon canneries in the state of Utah the year's record shows a total of seven million dollars worth of business. The season's output has amounted to 440,800 cases of canned tomatoes.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE IMPERSONAL TREATMENT OF EVIL.

SAMUEL GREENWOOD.

A POINT which Mrs. Eddy makes clear throughout all her writings is that evil cannot be treated or dealt with as a person. Since evil is not something which can be grasped with the hand or seen with the eye, it obviously cannot be overcome upon any material or personal basis. Christian Science offers the only practical solution for this problem, on the ground that evil exists only as the belief that there is an opposite reality to good, which would create man in God's unlikeness.

Christian Science designates this a false belief because, since God is acknowledged to be supreme, omnipotent, and omnipresent, there could be no opposite power or existence except in a suppositional sense. This belief is not and never was a person, any more than the belief that the earth is flat was ever a person. This supposition or belief did not originate with Adam, any more than it can be said to originate with mortals of the present day. It is shown to be no part of any individual, for as it disappears before the growing recognition of good, the person in the case feels himself becoming not less but more of a man in consequence. The position of Christian Science is sustained by the demonstrable fact that evil influences cease in the ratio that one yields to the government of good, and this leads to the inevitable conclusion that evil could have no power whatever over one whose consciousness is wholly filled with good.

The belief in personal evil has led mortals, from Cain downward, to turn their hand against each other, in the delusion that the removal of the personal offender would remove the cause of their dislike and fear. Even the children of Israel, although representing an advancing concept of God, believed their enemies to be persons instead of evil beliefs, and that they were accomplishing their own deliverance and fulfilling the divine will in slaying them; but history shows that evil has never been lessened or destroyed by such means. The destruction of the person has never helped nations or individuals to vanquish wrong, and each successive generation has had to cope with the same evils as its predecessor, the only relief being found in rising to a higher sense of brotherhood, mercy, and justice.

Christian Science reverses the material sense of things, showing that one's adversaries are not personalities, but phases of evil thought which assert their presence and influence within and not without one's own consciousness. Hence it is in one's own consciousness, and not in or as another person, that evil must be met and overcome. Hatred, malice, and other forms of error may seem to be presented as personal attacks, but it is only so in appearance, for though the person were removed we would still have error in our own thought to be reckoned with and corrected. Seeking to escape from or to overcome evil as a person, has no sanction in Christian Science, because God is therein understood to be the only intelligence. All false belief is mentally conceived and entertained, and must be eliminated by a process of mental correction; it cannot be successfully opposed or counteracted on the basis of outward effect. The contemplation of sin as having intelligence and volition arouses and augments a sense of retaliation; whereas to grapple with it as error, as having no more intelligence or personality than the belief that two and two are five, leaves thought free to forgive the offender, and to that degree one's salvation from evil is being accomplished.

Whatever represents man as sinful and imperfect springs from the root belief in a power apart from God. The Master called this belief a liar and the father of lies; and Christian Scientists, to be his followers, must treat evil of every kind on the same basis. It is plain that a lie is never a person, although one may, in his ignorance, be so deceived as to believe what is not true, carry out its delusions, and suffer therefor. But in such a case the lie does not merge into the individual nor lose its false nature. A student of Christian Science who adheres to the teachings of Science and Health views the claim of evil and denies it from that absolutely impersonal standpoint, and one does not yet understand its teachings who attempts to meet evil in any other way.

It is comparatively easy for a student to separate the evil of disease from his thought of person, and he may without difficulty maintain this mental attitude when the condition is that of wilful wrong-doing, so long as he is not himself involved; but the test comes when he believes that another is maliciously endeavoring to injure him. Does he in such a case think of—that is, treat—this error as a falsity? Does he obey the Master's injunction to "resist not evil," that is, give it not the reality it claims; or does he identify evil with man and make God's child a sinner?

It is important to be clear and decisive on this point, for the belief that evil has intelligence must be encountered, and unless it is settled according to the truth, we shall come under its influence until we learn that God is the only Mind. If we believe it is a person that is working against us, the counterpart of the evil is liable to enter our own consciousness through that belief, and this result will surely follow unless the error of investing evil with intelligence is seen and corrected. On the other hand, if we abide in the conviction that God is All-in-all, we are enabled to rebuke the evil mentally as a false belief, and to fulfil the Christian duty of loving them which despitefully use us.

The attempt to prevail over evil as a person places one in the company of those who would kill their enemies in order to conquer them, an opposite method to that which Jesus taught. One would shrink from striking another a physical blow, and would repudiate even such a desire, but its mental equivalent is present in all personal enmity or resentment. We do not wrestle with flesh and blood, as St. Paul wrote, neither are the weapons of the Christian warfare carnal. Even if those whom we may regard as our personal enemies were removed from our midst, would we realize any more freedom or dominion than we now possess? Would we in consequence be more zealous in the cause of Christ, or more successful in working out our salvation from a sense of evil? Would that event tend to

Digitized by Google

unself our affections, spiritualize our desires, or help us to heal the sick more effectually than we are now doing?

In our own thought we should always be our brother's keeper. If he has been led into sin, and we ourselves have suffered wrong thereby, we should be able to say in our hearts, "Neither do I condemn thee." That is what the Master did. To think that another is personally working to harm us, tends to darken our own thought, and to bind the error more closely to him. To name such a one in mental treatment, as being guilty of malicious malpractice, transgresses the rule of Christian Science, and makes us partners in the same evil. To be safe and loyal practitioners, it is indispensable that Christian Scientists separate evil of all kinds from their thought of person. Our work is to disprove the claim that man is separated from God, not to endorse it, and to hold fast to the fact of the real man's eternal unity with divine Principle.

"How oft shall my brother sin against me, and I forgive him?" Jesus' answer to this question implies that the time never comes when any one is justified in cherishing resentment against another. Even though we have reason to believe that another is entertaining thoughts of malice toward us, what have we to fear, if we are reflecting love in return? Evil has no means to harm when there is nothing in us that responds to it. So far as we are concerned, the important thing is, not whether others are thinking wrongly about us, but whether we are thinking rightly about them. Unless one is watchful to remember that God, or good, is the only Mind, there is a possibility of listening to evil suggestions, and so of becoming unwittingly an avenue for evil thought; but Christian Science gives a sure defense from all the attacks of evil in the recognition and understanding of the infinity of divine Love.

After all, what is there about so-called mental malpractice that some are tempted to contemplate so resentfully or so fearfully? Evil is not an intelligence. It does not know God's children; it cannot think about them, nor do them harm. Then why resent or be afraid of that which is neither person nor power, and which can, therefore, neither think, speak, nor act? We are not afraid of a shadow, because we know it to be harmless, an unreal appearance; and neither would we fear any phase of so-called evil if we knew it to be a false belief, as Christian Science teaches; hence powerless when its nothingness is exposed. The only anxiety we should have about this matter is to be sure that we are loving all mankind, thus giving hatred no entrance into our consciousness. Not that one should ignore any asserted evil activity, but that we should heed our Leader's admonition to be a law unto ourselves that it cannot harm us. (See Science and Health, p. 442). The apostle Peter asks, "Who is he that will harm you, if ye be followers of that which is good?"

SERVICE.

M. LOUISE BAUM.

FOR Christian Scientists every day is a day of thanksgiving, and perhaps that for which as they go on they most of all thank God and the faithful woman so long at the helm of the Mayflower venture of this age, is that she has opened the way, through the many avenues of the Christian Science organization, for all, even for the least and humblest, to work for the world.

Every one who is standing for this great truth of the present power of Love to heal and save and glorify, is serving his fellow man. Every one who takes on his lips the holy name of Christian Science is doing for the world what many great men have striven in vain to do—that is, those who wear this name worthily. Every one, for example, who attends the services of Christian Science faithfully, who is always at his post on every occasion, great small, in the large churches or in the small churches, is helping to hold aloft the banner of freedom for mankind. There is no one so humble and obscure who cannot in this single act of faithfulness lend his aid to this mighty work, while those who give of their material possessions to the work are investing in far better treasures than mines of gold and copper. Then there is the distribution of literature. There is no one who cannot send along to some one, somewhere, a copy of the *Journal* or *Sentinel* or the *Monitor*. The service done by such a sending forth of the white-winged messengers of Truth and Love is often far beyond the power of any individual to achieve. The loving motive which sent it forth has its reward pressed down and running over, even though the sender may never know whereto his messenger was sent.

Some one has said that it is the daily living of this teaching in the homes and in the various walks of life which really does most to convince the world of the power and beauty of Christian Science. It is not alone the people best known in the movement, those who stand in the prominent places, who are doing the most to spread Christian Science. After the text-book, "Science and Health with Key to the Scriptures," Mrs. Eddy's messenger, has come into a life and has cleansed and enlarged and ennobled it, then the daily influence that goes forth from that life, drawing others to seek the secret of its beauty and peace and activity, stands as the next most potent means of persuading the world that God is Love and that He is a very present help.

But none of the propaganda of this truth, through literature and lectures, can do the work of the hundreds of quiet, unheralded, every-day lives that are preaching this gospel by living it, and so as we approach the close of a momentous year let us all take new heart and consecrate ourselves anew to this work of world salvation. We are not living to ourselves. We are not striving merely for personal pleasure or peace, or even for our own spiritual progress. Not one thought or deed which uplifts ourselves can fail to leaven the whole. That we have not only ourselves to make happy and free and victorious, but the whole world to awaken to the knowledge of God, gives sweetness and courage and persistence, when if our motive were only selfish we might sometimes falter or grow weary. As one of our hymns expresses it,—

Oh, for their sake,—press thou on!

"NOW IS THE ACCEPTED TIME."

CARRIE YOUNG.

CHRISTIAN SCIENCE teaches us to deny evil, whenever and wherever we see it; and when evil is met and overcome in each individual consciousness, the whole world will be benefited thereby. In working out his life-problem along the lines of active right thinking, it becomes necessary for each individual to be awake to the fact that now is the time to overcome all evil with good. Now is the time to heal the sick; not to stand inactive, longing for a better time or a more convenient place. With Jesus, Mrs. Eddy tells us, "a fishing-boat became a sanctuary, and . . . the grove became his class-room, and nature's haunts were the Messiah's university" (Retrospection and Introspection, p. 91). This thought enabled a Christian Scientist recently to give a cup of cold water in Christ's name to some who were needy.

One morning while she was out driving on a country road, a man called out from a wagon she was passing and asked her to stop. To jump from the wagon and reach her carriage was the work of a moment; and in a very timid yet grateful manner he said, "Perhaps you do not remember me, but I want to thank you for the good you did for me two years ago. Don't you recollect I came to the hotel, and told you that I was very sick? You prayed quietly and

Digitized by Google

then told me to go and look up for my healing. Well, I was healed! And from that day to this I have been a well man. My mother, my wife, and our little baby are in the wagon. They are all sick, and I am bringing them to you now." "Now"! Instantly she realized the wonderful significance of that word "now"! If Jesus healed by the wayside two thousand years ago, the same deathless, living, triumphant Christ could heal by the wayside "now."

As the Scientist turned to the wagon she saw a sad, pathetic picture. One woman was propped up with pillows, holding a very sick baby in her arms; while another woman, weak and feeble too, asked her if they could be healed. Tenderly she told them that it was God's will that all His children should be well, and as He did not create sickness, there was no necessity for their being ill; that we should accept Jesus' loving invitation, "Come unto me, all ye that labor and are heavy laden," and realize right "now" the fulfilment of his promise, "I will give you rest." The atmosphere seemed very quiet and peaceful as she silently declared the truth, realizing man's unity with his heavenly Father; then she repeated aloud the Lord's Prayer, and with a few words of encouragement left them.

In a week the young man came to tell her (and with tears of gratitude) that not only were his wife and baby healed, but his mother was walking for the first time in two years. The joy that message brought, words can but feebly express! The Master's command, "Peace, be still," had been spoken; the troubled hearts had been calmed; and the great lesson learned, that with God it is always "now."

"A THORN IN THE FLESH."

MARTHA E. KILLIE.

WHO has not heard from childhood the familiar phrase, "A thorn in the flesh"? and does it not call up a memory picture of some good man (or woman) carrying, perchance, for many years, a burden of bodily suffering which he was ever fastening upon himself with the thought that his heavenly Father had sent, or was at least permitting, it for some wise purpose? To invest it with further sacred authority, did we not often hear some expression like this, "It is my 'thorn in the flesh.' Paul was a better Christian than I, but he had it to bear." Though to be counted a fellow sufferer with Paul may invest the case with somewhat of a religious halo, have we ever stopped to ask ourselves what right we have to do this, and, further, where Paul's thorn in the flesh really originated?

In his second epistle to the Corinthians, Paul says, "And lest I should be exalted above measure through the abundance of the revelations, there was given to me a thorn in the flesh, the messenger of Satan to buffet me, lest I should be exalted above measure." How clearly may we see in this statement that Paul does not in the remotest sense imply that God had sent this thorn. Could divine Love impart to His child aught which was the opposite of His own nature? No! Discord of every nature has but one source, and Paul recognized this when he declared that his affliction was a messenger of Satan. Satan, who is defined as the "adversary" of man; "the prince of darkness," is shown in the glorious light of Christian Science to be only another name for a belief in a selfhood apart from God.

Is not this belief of selfhood, which Paul (to make more emphatic) repeats in the above verse, that is in danger of being exalted above measure through the abundance of the wonderful revelations he has received? Is it not also this false and subtle claim of a selfhood apart from God which he designates as "the messenger of Satan"? Under how many guises does this selfhood appear! In Paul's case, it may have been pride, or, as his words imply, self-exaltation which buffeted him, and planted the thorn in his flesh; for evil, in whatever guise it may appear, can only buffet itself and is self-destructive; as we read in our text-book, "The only power of evil is to destroy itself" (Science and Health, p. 186). Once this messenger is uncovered in the light of Truth, it is easy to classify the message, for our text-book also teaches that "a false belief is both the tempter and the tempted, the sin and the sinner, the disease and its cause" (Science and Health, p. 393).

As "the tempter and the tempted" in Paul's case seems to have been self-exaltation, which followed his wonderful works and revelations, shall not we who have been nursing some fleshly ill, with what the tempter has led us to believe was a worthy Christian resignation, awake to find, and remove through the power of Truth, the thorn which has pierced us so long? Is it not possible that, instead of finding it on the mount of self-exaltation, we may, with humility, searching in the opposite direction, find that it has taken root in the soil of worldliness and unfaithfulness in our Christian work? Yes, may not even those who have, in years past, rejoiced in the light of the Christ-healing for themselves and others, find that they, too, are pierced with this "thorn in the flesh," and that how to be rid of it is a perplexing question?

Paul says (following the verse quoted), "For this thing I besought the Lord thrice, that it might depart from me. And he said unto me, My grace is sufficient for thee: for my strength is made perfect in weakness. Most gladly therefore will I rather glory in my infirmities, that the power of Christ may rest upon me." We may readily infer from this that the thorn was not at once removed; not until he had, through the sense of his own weakness and infirmity, proved the nothingness of self, and the all-sufficiency of God's grace; that he might glory not in self, but in the power of Christ alone. When this lesson was learned, then the thorn vanished into its native nothingness.

How do we know this? Just as we know that one minus one leaves nothing. Can a seed of error's planting remain in a consciousness which rests upon the power of Christ, Truth, alone? Hear the words of Jesus, "Every plant, which my heavenly Father hath not planted, shall be rooted up." We know that these glorious words are scientifically true. Then why, it is sometimes asked, did not Paul tell us later of his healing? Here we may remind ourselves that many who have far more time for retrospection than this wonderful apostle had, have forgotten or failed to announce to the world Truth's healing power which has been manifested upon their minds and bodies, and is it so very strange that Paul in his wonderfully active career, while forgetting the things that were behind, and ever pressing forward, should fail to stop and record the passing of the thorn which was to him "as a dream when one awaketh"? But could he have seen with prophetic vision the sad array of good men and women, all down the ages, who have appropriated that thorn, that messenger and message of Satan, planting it in their consciousness and watering it with tears and sighs, he too might have wept. Yet, after all, did he not leave an assurance of his healing which all may hear whose ears are attuned to the message? Indeed, what more convincing proof could he have given to the world that the rankling thorn was no longer there, than is later found in his ringing words to the church of Galatia, "Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage"?

It is with a heart full of tenderness for any who may have strayed from the light, and felt the piercing of the thorn, and the entanglement of the yoke of bondage, that the writer out of her own experience would say, Be of good cheer; rejoice, as Paul did, in the infirmities which have appeared only to wean one from the false pleasures of sense; and, as the heart goes out with renewed love and gratitude to God, striving constantly to realize and demonstrate the all-power and presence of divine Love and that there can be nothing else, then the bodily ill of whatever

Digitized by Google

nature will pass away—it will die of its own inanition. If the process may sometimes seem slow, we can still rejoice, knowing that if we are faithful Love's work is being made perfect in us, and sooner or later, in proportion to our absolute faith in God, and the scientific understanding and application of His laws as taught in the Bible, and "Science and Health with Key to the Scriptures," in place of the thorn and entangling yoke will appear, more beautiful and bountiful than ever before, the fruits of the Spirit,—health, holiness, love, joy, and peace.

A PURIFYING PROCESS.

JOEL T. ACTON.

SEVERAL years ago, while living in a cabin in the heart of the Rocky mountains, the writer visited a miner who operated near by a gold mining and refining plant, and who kindly explained the various processes followed. From the depths of a tunnel which penetrated the mountain, large blocks of porphyry and quartz were brought to the mill at the foot of an incline and there dumped into large hoppers. Under these hoppers was set in motion a mass of ponderous, noisy machinery that quickly reduced the ore to a fine sand, and a stream of clear water constantly playing on this sand, washed the grosser, lighter particles of dirt down the steep, rocky gulch. The ore was indeed washed and was clean, but not all. There remained in the pans below what appeared to be a glittering, beautiful black sand, which we were told contained, though it was effectually hidden from our view, the rich yellow gold. This black sand was so near the weight and otherwise so closely resembled the gold, that mere washing was useless and a more drastic measure had to be employed.

This sand with its hidden treasure was, therefore, gathered into cups, or retorts, and placed in a furnace. As the fiery blast increased, that which hid the gold was seen to melt, then to be consumed, and issuing in vaporlike smoke above the cups' rim, was wafted away. When asked his purpose in gazing intently at short intervals into the top of the melting-pot, the operator explained that nothing could endure the blast except the gold, and even this was melted to a shining yellow liquid, which, when pure, was smooth and placid and reflected perfectly the operator's face as he looked in from above the crucible. When satisfied with the appearance of the molten gold, he removed the retort from the furnace. Then the precious metal was weighed, and was soon added to that vast treasure which forms the firm foundation of a government's credit and a solid basis for a world's commerce.

Since receiving this simple lesson from the rugged miner with his melting-pots, the writer has found in Christian Science the abundant health and strength he was then seeking in climate and atmosphere, and though but a little distance has as yet been gained on the upward journey, this lesson is plainly seen to point to a broader, larger process, viz., the separation of truth from error in human consciousness. Divine Science reveals the Father, ever searching out and seeing in His spiritual creation His own perfect likeness! To human sense the process requires the melting, refining crucibles of Love's furnace, the never dying glow of which burns away the delusive sands, destroying all that is unlike God, "melting and purifying even the gold of human character" (Science and Health, p. 565), until there is absolutely nothing left "that can sin, suffer, be punished or destroyed" (Science and Health, p. 340). Thus, too, do the purifying waters of healing come to humanity through channels of His choosing, cooling the fevered brow, moistening the parched lips, washing away the grosser sands and soil of disease beliefs, and cleansing the garments until every thread is white and glistening as the snow on the mountain-peak.

When one is first rescued from the hidden tunnels of materiality, the accumulation of evil beliefs, such as sickness and poverty, falls easily away and is washed quickly down the valley. Then, if we heed the lesson and learn it well, we cheerfully press forward, joyfully entering upon the higher problems which our process involves, for Love has now opened our eyes and enabled us to detect quickly the falsity of the glittering, sparkling human sands, each one perchance labeled freedom, love, home, or rest; but not one of these delusions can ever reflect the divine likeness, and must anon yield and go up in smoky nothingness. Now what in Christian Science is this process and what does it involve? In Moses' day it took form as a journey from Egypt, but in this age our beloved Leader has called it a journey "from sense to Soul" (Science and Health, p. 566). She has assured us that there are no backward steps in this journey, and so far as we are able to demonstrate her teachings we prove that there are no backward steps, and we may rest assured that none have been or ever can be taken.

At times we may wonder what in the end shall endure this process. Who shall pass successfully through the purifying process, the crushing, the washing, and the burning? We have already learned from Christian Science that this so-called Christian warfare is no longer a contest with an outside power that can oppose itself to good, but that it is a change which takes place wholly within the individual consciousness; and, like as the frigid frosts of winter and the ice-mailed storm king are conquered and peacefully lay down their weapons at the approach of gentle, smiling spring, so will it ever be in this purifying process, for it is a silent victory.

We see, then, that it is possible to awake, draw aside the curtains that shade the windows of our own mental abode, and look out upon "a new heaven and a new earth." The fiery process within is ended, the gold of true character is found to be the firm foundation of the divine government, and we are satisfied, for "we shall see [reflect] him as he is."

[Written for the *Sentinel*.]

LOVE'S GLAD MESSAGE.

SARAH MC BRIDE.

THANKFULNESS and praise abounding,
Hark the glad hosannas sounding.
Earth and heaven their welcome sing,
Christ is risen and doth bring
Healing to both serf and king.
Rise, ye sleepers, Love hath spoken!
In your hearts is peaceful token.
Sweetly sounds the heavenly strain,
Thousands shout the glad refrain,
In a consciousness set free,
Answering in sweet melody,
Now the Christ hath come to me.
Saviour, hear us as we sing,
Christ our light, our joy, our King!
In Thy love we dwell forever,
Ever thine, Thou gracious Giver,
Nearer Thy great loving heart,
Clinging closer lest we part,
Ever keep us close to Thee.
Shine upon us all the way,
Even all the darkest day.
Nearer, nearer still to Thee,
To Thy loving arms we flee,
In that blessed haven rest,
Now and ever by Thee blest.
Ever heed Thy gentle call,
Loving Father, Thou our all.

[Frederick Dixon in *Outlook*, London, England.]

In a recent issue the writer of the "Finance of the Week" explains that the world is learning that financial panics are not to be cured by Christian Science. Will you permit me to say that I have serious doubts whether he himself knows exactly what he means? If by Christian Science he means that to declare a panic does not exist, when to the human senses it obviously does exist, he is simply stating that, like very many other people, he knows really nothing of the meaning of Christian Science. Now, Christian Science is the only thing that ever will overcome financial panics, for the simple reason that it is the only teaching which will destroy the causes in which panics originate. It may be said, roughly, that panics arise from fear, sometimes genuine, sometimes groundless, according as they are caused by improper financial methods or by mere ignorance or malice. It is impossible in the length of a letter to go into the question of Christian Science teaching on so large a scale. It must suffice to point out that it is the object of Christian Science to show people how they may learn to live so as to grow more and more into a mental at-one-ment with divine Principle. It may be said that all religious systems have had this aim, and have all alike failed. But it is precisely because they have worked on an emotional rather than on a scientific basis that this has been the case. Appeals from the pulpit to the emotions of a congregation are very powerful at the moment, but they commonly cease to have any effect within a few hours. Christian Science, on the other hand, is the attempt to show men that there is an absolutely scientific Principle in religion, and that as this scientific Principle is realized, its effects are far more definite than those produced by obedience to the laws of natural science.

A scientific knowledge of God is necessarily the most absolute knowledge of Truth available, and Christian Science teaches that it was this absolute knowledge of Truth which Jesus strove, through his teaching, to impart to the world. In this way the miracle became exactly what the Greek words translated "miracle" would imply, the object-lesson in proof of the accuracy of his theology. The miracle was devoted largely, but not entirely, to physical healing, apparently because Jesus saw that, constituted as the world was, the attempt to help it could best be made on that basis. The consequence was that when the disciples of John came to inquire of him if he were the Christ, it was to these works of physical healing that he mainly referred them, but he wound up with the statement, "to the poor the gospel is preached." Now the poor obviously were not alone those who enjoyed less of the world's goods than their neighbors. There was no class of men who needed the gospel more than the scribes and Pharisees. The poor were those who were ignorant of Truth, who had not acquired in any degree a scientific knowledge of God, any degree of that knowledge of Truth which was to lead them into all Truth.

Christian Science is simply the teaching of Jesus made practical for the world today, and as through its teaching the world learns more of absolute Truth, and so gains a more scientific knowledge of God, it will learn to destroy mentally the very causes in which financial panics originate. But no one, except some people with a very quaint notion of what constitutes Christian Science, believes that Christian Science attempts to heal the sick by simply telling a sick man that he is not sick, or assuring a man in the midst of a financial panic that there is no panic. Such absolutely unrelated opinions would be about as valuable as telling a man who knew nothing of evolution that his remote ancestor was a jellyfish, or telling a man who knew nothing of natural science that his body consisted of nothing but a series of vibrations.

[Alfred Farlow in *Indianapolis* (Ind.) *Star*.]

In a recent issue of the *Star* a critic expresses his agreement with my point that if the medical fraternity fails to save certain persons "in the incipiency of their troubles, they cannot reasonably complain because Christian Science fails to rescue them in the more advanced and formidable stage of their disease." He adds that "only good would result under such circumstances," and that "any case healed under these circumstances points to the fact that such a person had been overdosing in medicine, or had been applying material help in a manner out of harmony with natural law, in which case Christian Science does help, because it changes the patient's thought and indirectly nature is given a chance."

In the light of such an admission one might well conclude that thousands of persons die every day from "overdosing in medicine," or the application of "material help in a manner out of harmony with natural law," who might be saved if they would turn to Christian Science. Under such circumstances, it seems to us that our critic would be more consistent if he spent his time urging those who are failing to recover under medical practice to turn to Christian Science, rather than in condemnation of Christian Science.

The gentleman declares that the danger of Christian Science lies in "applying it without reserve to innocent children." Are not children quite as frequently "overdosed" as adults, and are they not quite as liable to the application of "material help in a manner out of harmony with natural law" as adults, since the same physician makes the application to the child as makes the application to the adult? The "innocency" of children is respected quite as much in Christian Science as in medical treatment. Moreover, Christian Science has proved itself quite as effectual in the treatment of children as in the treatment of adults. The children of Christian Scientists are quite as healthy as those of non-Christian Scientists.

It is reasonable to assume that almost the entire population of the globe, especially those of recent generations, have been trained to depend upon material remedies of some sort,—that is, some means less than God,—as a remedy for sickness; and yet all material remedies have eventually failed utterly. Most of the world's population has passed away while struggling to recover health by the use of material remedies. Thus it is shown that in a sense the failure of medical practice has been universal; and surely such practice ought not to claim the sole guardianship of the public health and insist upon it that the public shall not experiment with new methods.

Wholly apart from the direct beneficiaries of Christian Science, it is safe to assume that millions have been indirectly benefited because of the moral effect of those who are learning to depend more upon Spirit and less upon matter as a means of health. Christian Science has emphasized the importance of spiritual life and the insignificance of mortal existence, and has inculcated a love for the spiritual and a willingness to sacrifice unnecessary fleshly indulgences; and thus it may be noted, as we have said, that the benefits of Christian Science have extended far beyond the Christian Science church.

Our critic declares that one of the dangers of Christian Science is "the effort of overzealous persons to live up to the extremely false parts of its teachings when they are once thoroughly converted to the theory." Then he offers as an example Mrs. Eddy's teaching that fatigue is not bodily, but mental. We think that a large percentage of those who are outside the Christian Science movement are prepared by experience to endorse this conclusion. It is quite generally understood that the mental has much to do with the physical. Non-Christian Scientists are themselves proving the truthfulness of this teaching every day in a greater or lesser degree. Christian Scientists are not more liable to "overdo" because they understand fatigue to be a mental

Digitized by Google

condition than they were when they believed it to be a bodily condition, for the new teaching does not lead to the ignoring of human ills, it simply offers a mental instead of a physical diagnosis of them. Christian Scientists recognize that evils exist in erring human experience and must therefore be intelligently dealt with.

Our critic did not need to wait for the advent of Christian Science to offer his criticism. He might have found quite as ample grounds for it in the Scriptural teaching. Jesus said: "Take no thought [be not anxious] for your life, what ye shall eat, or what ye shall drink; nor yet for your body, what ye shall put on. . . . But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." When the full stage of manhood in Christ is attained, then it will be possible to "take no thought" whatever from a material point of view, for one will have attained to that spiritual height wherein Spirit becomes to him the only reality.

Christianity has been in vogue nearly two thousand years, and no harm has yet come from the radical teaching which we have just named. Christian Science has been practised for about forty years and no harm has come from its teaching. If meanwhile there are fanatics who have misunderstood the demands of Christianity or the demands of Christian Science, Christianity or Christian Science cannot justly be held responsible therefor. Foolish folk who adopt Christian Science will be foolish still, until through progress they cease to be foolish; but their mistakes should be charged to their foolishness and not to the sensible teaching of Christian Science which they fail to observe. Christian Scientists do not undertake to establish the spiritual law by ignoring the "natural law." They not only have regard for the spiritual estate to be attained, but also a wise consideration of the material and imperfect which is to be abandoned.

The gentleman asks: "Is not all natural law of divine authorship? Is it not all from the divine Mind that has all power and rules all?" The question at issue is whether God rules the universe directly or whether He has created the universe with certain inherent laws by which it may conduct itself independently of God. For example, physics undertakes to define the motion of the earth about the sun in the following manner: It declares that, owing to centrifugal force, the earth is prevented from being drawn into the sun, while centripetal force prevents it from flying off in a straight line, and thus the earth is kept on its regular orbit. But this explanation is no explanation at all, for it does not explain who or what poised the earth in order that it might have the centripetal force, nor account for the motion which made possible the centrifugal force. The all-important questions are: Who poised the sun in order that it might have the centripetal force, and who started the motion in order that it might have the centrifugal force? Is it not reasonable to suppose that the power which poised the sun and started the motion is able to keep it in its course without weariness, annoyance, or any species of incumbrance? Are we to believe that it is more convenient to man or to God to resort to *materia medica* than to rely upon omnipotent Spirit? Christian Science teaches that God is supreme; that even now, as late as the twentieth century, God rules and governs absolutely, everywhere and at all times; and he who realizes this fact most clearly, and is thereby able to rely upon it most implicitly, reaps the greatest degree of peace and harmony.

Materia medica ascribes its cures to the influence of medicine, and yet most physicians affirm that, unless the patient has confidence in the doctor and confidence in his medicine, he is not so likely to be benefited by the treatment. I knew a woman who had applied to Christian Science as a last resort and was readily healed. She immediately went to her physician, who was a family friend, to have him rejoice with her because of her recovery. He was apparently displeased, and said: "If you had come to me with the same confidence that you went to the Christian Scientist, I could have cured you."

The layman must be pardoned for asking whether medicine or confidence was the acknowledged remedy in this case. Christian Science engenders a large degree of confidence and hope because of its exalted teaching that God is omnipotent and everywhere present, and that therefore the troubles of earth, though mountains to mortals, can have no significance in His sight. When we learn to view our troubles from the standpoint of supreme intelligence, our confidence amounts to understanding. It becomes unbounded and our fear is utterly destroyed.

[John L. Rendall in *Marshalltown* (Ia.) *Times-Republican*.]

In your "For Sunday Reading" column there appeared an article under caption, "The Teachings of Christian Science," being the concept of said teachings which a clergyman erroneously entertains. He states, "Some of the dangers and heresies that inspire in Christian Science are selfishness—be good, and you will necessarily be well, strong, happy, and contented." If this is selfishness, then the Bible from beginning to end teaches selfishness. The whole mission of Jesus Christ and of his disciples and apostles was to instill into the consciousness of those with whom they came in contact the very thing which this critic terms selfishness. The teachings of the Bible throughout promise the rewards of health, strength, happiness, and peace to them that understand and love God. Christian Scientists are therefore perfectly willing to come under this classification, if this be indeed "selfishness."

Our critic states, "Ill health and trouble are not always a result of sin." Granted, and yet Jesus said to one whom he healed of the palsy, "Thy sins are forgiven thee." It may be stated as an incontrovertible fact that the sum total of ill health, trouble, discord of every sort, is inseparably associated with the sum total of sin.

No one can truthfully assert that "falsehood is taught in Christian Science." Truth and error do not mix. That which is true is eternally true, and that which is not eternally true has but a supposition of truth at any time. No Christian can logically claim that sin, disease, and death are eternally true, for the Bible teaches that they are but temporal experiences which yield to the final understanding of Truth. It is in this sense only that Christian Scientists deny the reality of sin, disease, and death.

Our critic objects to the Christian Science teachings concerning physiology, etc. Perhaps the main trouble is with his view-point rather than with the Christian Science teachings. It may be stated, without fear of successful contradiction, that Christian Science denies nothing that is true, neither does it affirm as true that which is not eternally true. Its teachings draw a distinct line between those things which are material seemings and the realities supernal. St. Paul brought this out clearly when he said, "For the things which are seen are temporal; but the things which are not seen are eternal."

The implication that Christian Scientists are ignorant and uneducated is completely refuted by the fact that they as a class are a people of more than average intelligence and educational attainment. In fact, they are so well educated as to have learned that some of the things which pass current for wisdom and knowledge can readily and to good advantage be dispensed with, for as St. Paul said, "The wisdom of this world is foolishness with God. For it is written, He taketh the wise in their own craftiness." Christian Scientists recognize the necessity for true wisdom and that understanding of God's law of which the wise man said, "Wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding;" and again, "Understanding is a wellspring of life unto him that hath it." It is this wisdom and understanding of eternal

Digitized by Google

Truth that Christian Scientists seek after. This includes whatever is true and real in human experience.

The truth or falsity of Christian Science does not depend upon human opinion, but upon scientific demonstration, and there is abundant proof of the divine efficacy of Christian Science in the healing of sin and sickness, and the consequent destruction of these apparent realities. He who opposes Christian Science and its application to the needs of humanity opposes at the same time the fundamental and essential teachings of the Christian religion. One who will consider these teachings from an unprejudiced view-point will find in them that which the world needs for its complete salvation from conditions which seem to prevail at this time.

That Christian Science heals the sick and reforms the sinner is no longer an open question. It has been proved to the complete satisfaction of hundreds of thousands of people. It is, therefore, inconsistent and altogether untrue for one to state that this beneficent teaching which heals, can at the same time be the cause of disease or aid in its production. The Bible states that the same fountain cannot send forth both sweet waters and bitter. It is impossible for any one to prove that Christian Science or its teachings has ever produced or caused sickness or disease at any time; therefore the gratuitous statement that this has been done is the result of complete ignorance of the subject, rather than that of familiarity with facts.

Christian Science is not an "opiate," as this critic states. It stimulates mental activity instead of stupefying it, and produces that thoroughly awakened condition of consciousness which recognizes the good in all that God has created, and which repudiates all else as no part of God's creation, for the Bible states that "God saw every thing that he had made, and, behold, it was very good."

[R. Stanhope Easterday in *Indianapolis* (Ind.) *News*.]

To declare, as does the committee of the British Medical Association, that there is "no difference in kind" between healing through divine and spiritual means and various forms of so-called mental or psychic healing, is wantonly and presumptuously to assail the fundamentals of Christianity, namely, the words and works of Christ Jesus. Our Lord in all of his healing declared, "My Father worketh hitherto, and I work," thus attesting the activity of the divine intelligence, or God, not of the so-called human mind, as the healing agency. He also pointedly declared of his follower in all ages, "The works that I do shall he do also." It is but reasonable to deduce that such "works" or "signs following" were to be achieved through the activity of the same divine agency.

Is it not true indeed that the presumptuous effort thus to account for the healings of Jesus and of the early church upon the basis of mental suggestion, belittles Christianity, strikes at the fundamentals of Christian faith, and incidentally indicates a very significant anxiety on the part of certain exponents of "purely medical treatment"? The fact seems to have been overlooked also that for forty years Christian Science has been healing all manner of diseases, including so-called "organic" diseases; and if, as the committee declares, "no evidence has been forthcoming of any authenticated cure of organic disease" by means of mental suggestion, we are forced to conclude that Christian Science, which is not mental suggestion, having effected such desired results, must not only differ from ordinary so-called mental methods, but must be vastly superior thereto.

Christian Science is, in brief, a recapitulation of the teachings of Jesus, and its practice is a revival of primitive apostolic healing as enjoined throughout the Scriptures. An ever increasing volume of incontestable evidence attests for Christian Science such origin and efficacy, and we leave our readers to find in the Scriptures such justification for purely material or humanly mental methods, and in the annals of these latter methods evidences of infallibility or unfailing efficacy. Until, moreover, such divine origin and universal utility are thus absolutely established for *materia medica* and mental suggestion, a reasonable leaving of the public to rational reliance upon prayer and spiritual methods for surcease from disease will not appear to be at all dangerous or illegitimate.

[Olcott Haskell in *Petaluma* (Cal.) *Courier*.]

With regard to associating the term "Science" with the word "Christian," there is no good reason for limiting the term science to that which pertains exclusively to physical phenomena. In Wyclif's translation of the New Testament the passage in Luke which in more recent translations reads "knowledge of salvation," was by Wyclif rendered in the significant words: "science and health;" and it is certain that Jesus and his disciples understood the laws (or science) of life better than did other men, for this understanding was demonstrated through the works of healing and regeneration which characterized the early history of Christianity. St. Paul recorded his understanding of spiritual law, when he wrote: "For the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

While scholastic theology may consider the "doctrine of original sin" as essential to Christianity, yet this doctrine has never destroyed one iota of sin; whereas Jesus, the Founder of Christianity, healed the sick and reformed the sinner through his understanding of the eternal goodness of God and of His creation. He said to his followers: "Be ye therefore perfect, even as your Father which is in heaven is perfect." With reference to the exalted ground taken by Jesus, Mrs. Eddy writes (Science and Health, p. 476): "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." While it is indeed true that the man who is the likeness and the image of God does not need a Saviour, yet one who has so far lost the true concept as to think and act in a sick or a sinful way does need to be saved; and in every instance where such a man is reformed and restored to a normal condition, the saving work of the Christ is manifest.

[Written for the *Sentinel*.]

PROPHECY.

KATHARINE J. SMITH.

COMETH the days when, not from belfry's throat,
Shall men be told of Christ to whom they kneel,
"For they shall be all taught of God," one wrote,—
In Shiloh's peace the Saviour's presence feel;
Not ever shall the children lisp the name,
Yet beg for answer whence and how he came.

Not far from realms of comet-haunted space,
Where planets flash and suns remotely burn;
Not from the pillars of a deathless race,
Whose state doth yet in tribal travail yearn;
Ere Abraham had birth in Chaldee wild,
God knew the form of His begotten child.

Truth's answer unto time is whispered low,
To humble hearts predestined Love doth speak;
As unto Judah's daughter long ago,
High favored all whose hearts He findeth meek,
Like hers, in maiden wonder, which adored
And sang, "My soul doth magnify the Lord."

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

"WITH SIGNS FOLLOWING."

A SHORT time ago a critic of Christian Science in a public address before a body of ministerial brethren called this teaching an "offshoot of religion." Just how scathing this critic intended his denunciation to be we do not know, but if he meant thereby that Christian Science is an offshoot of Christianity, which Webster defines as "the religion of Christians," he is nearer correct in his definition than he perhaps was aware, inasmuch as he thus unwittingly placed Christian Science on an equal plane with his own denomination in that Webster further defines Christianity as "the body of beliefs, practices, and sentiments developed from the teachings and life of Christ."

In support of this contention we would cite further the Websterian definition of Christian Science as a system of healing that "bases its teaching on the Scriptures as understood by its adherents." Do not other offshoots of "the religion of Christians" do likewise? Let us also note the definition of Christian and see wherein Christian Scientists fail to substantiate their claim to be humble followers of Christ Jesus. The dictionary defines a Christian as "one who believes, or professes or is assumed to believe, in Jesus Christ, and the truth as taught by him;" and especially, "one whose inward and outward life is conformed to the doctrines of Christ."

There is no trouble in finding what "the doctrines and precepts taught by Christ" are. There would be no New Testament were it not for these self-same doctrines and precepts. The four gospels are a faithful chronicle of the religion which Christ Jesus taught,—the "new commandment" on which, linked with the first commandment of the Mosaic decalogue, "hang all the law and the prophets,"—and the apostolic epistles and the Revelation of St. John all dated from and were based upon the Master's teachings. Not only, too, is the letter of these doctrines and precepts given by the sacred writers, but they also chronicle the works that Christ Jesus did in demonstration of them.

There is no doubt that the healing of the sick, which as practised by Christian Scientists is the chief ground of our critic's objection to this teaching, was one of these precepts and doctrines, for we find it conjoined with the command to preach the gospel, not only when Jesus sent forth the twelve and the seventy on their mission to mankind, but as his parting injunction. What carries most weight, however, is the fact that the Master emphasized the command to heal the sick, by performing these works himself.

Jesus declared that the ability to do such works as he had done should be the proof of belief in him as the Son of God, the Father that "doeth the works," and who would likewise confirm their trust in divine power. Jesus also included the recovery of the sick through the healing ministrations of the apostles among the "signs" which should "follow them that believe." No less distinguished a theologian than a former dean of Westminster is authority for the statement that these "signs" were tokens "of the near presence and working of God," a statement which is borne out by Mark in his gospel, where he tells us that when the disciples in obedience to the Master went forth to preach the word, the Lord worked with them and confirmed their preaching with the promised signs; in other words, they healed the sick and the sinning through the power of Truth. Such a large part of the New Testament, indeed, is given over to the record of the healing work wrought by Jesus and the apostles, that it may safely be assumed this work was of itself important, and distinctly a part of fundamental Christianity. Thus do we not only have a dictionary definition of Christianity, but we also have a very definite statement by Christ Jesus himself of what should be the distinguishing mark of "them that believe."

In the sense of this critic, to be an "offshoot of religion," and therefore of Christianity, is to have departed from the teachings of its Founder, and surely one may ask with propriety which body of believers in the doctrines and teachings of Christ Jesus has essentially departed from them,—the one which not only believes but also practises these teachings as Christ Jesus did, or the one which repudiates them as a present-day possibility? If we take the Master's rule for determining who his followers are, we certainly shall not need to exclude those who are doing the works which he commanded his disciples to do; and our ministerial critic was not particularly happy in his description of Christian Science, inasmuch as it is the only religion of today which is giving the same proof of its truth as did Christ Jesus. Neither is it seemly for one whose religion excludes the signs by which Jesus proved his Messiahship, thus to attempt to read out of Christianity the Church of Christ, Scientist, a body of men and women who for thirty-two years have consistently proved their faith by giving these signs, and "in his name."

ARCHIBALD MCLELLAN.

AN UNFOLDING SENSE OF LAW.

IT is well worth while to ask ourselves occasionally whether our understanding of divine law is broadening and deepening, whether we are applying it more widely to the varying problems of human experience and thus realizing more fully its protecting power. The Decalogue contains a statement of law which underlies all human codes that aim to establish righteousness among men, and for this reason the pupils in the Christian Science Sunday schools are encouraged and required to study it diligently. It is surely clear that the pupils and teachers alike should have with each passing year a more comprehensive grasp of the meaning and possible application of the Ten Commandments, for the Spirit which "giveth life" provides for unceasing growth.

This thought was recently taken up in studying the fourth commandment. It was readily seen and admitted that a great change had come over popular thought in respect to the observance of the Sabbath. No longer do professed Christians in general observe the day with the puritanical strictness which characterized many of the religionists of an earlier time, and which appears to be demanded by the letter of the commandment. It is true that we cannot go back to that which has been outgrown,—the man cannot become a child in a literal sense,—but we should see to it that our vaunted breadth really means growth in that which makes for true progress. Does the Sabbath, as we observe it, bring to us real rest, the calm mental atmosphere which evokes inspiration and prepares us for many days of strong purposeful activity? No one can deny that the intent of the Sabbath is the exaltation of the spiritual over the material, and as the other days are so largely devoted to material pursuits which bring weariness and ofttimes disappointment, there is the greater need of turning the gaze in another direction,—from sense to Soul.

It is true that the needs and experiences of one person cannot be made a criterion for another, but we all need to get closer to God, and this we can best do by understanding Him better. There is nothing wrong in seeking to go "through nature up to nature's God," unless we loiter on our way and never get beyond materiality. The one who does this robs himself and is apt to mislead others by the plausible argument that he is at least looking in the right

Digitized by Google

direction. In most Christian experience the Bible is closely associated with the Sabbath, and this is surely fitting, since the one shows the reason for the other. Mrs. Eddy says, "Good health and a more spiritual religion form the common want, and this want has worked out a moral result: namely, that mortal mind is calling for what immortal Mind alone can supply" (Miscellaneous Writings, p. 365). On page 364 we read: "The Bible is the learned man's masterpiece, the ignorant man's dictionary, the wise man's directory."

The Bible has been rightly named the charter of human liberty, and this is proved true by the thousands who in the light of Christian Science are finding in its spiritual teachings freedom from every form of bondage, mental and physical. Whether we study the Scriptures alone or at a family altar, we should not let any Sabbath day pass without gaining from this source fresh courage for the problems of the week. As the sacred Word glows with the holy light of divine Science, we cannot forget that our Leader drew from its pages the inspiration which gave this Science to humanity and brought the blessed healing ministry of Christ Jesus to our age as an eternal fact, nor should we forget the demand which rests upon us to study the Bible and obey its teachings.

"Remember the Sabbath day, to keep it holy."—keep it so that every day shall be sanctified by the true service of God and humanity; that whatever the hand findeth to do may be done with the might of Truth. Thus will the Sabbath give the strength and wisdom and gladness which tell of the one perfect Lawgiver.

ANNIE M. KNOTT.

THE GIVING OF THANKS.

GRATITUDE for the things that conduce to comfort and wholesome living,—this is well, but every broadening man has begun to realize that the nobler, more significant thanksgiving compasses the lives which have made for humanity's freedom and progress, the lives which were consecrated to and became the channels of that liberty and love without which there can be no wealth or happiness.

As representatives of the human race, we all begin with hunger, and hence we must legitimately acquire the things which satisfy hunger. This common want soon differentiates itself, however, into forms that range above the physical. We hunger for life, opportunity, knowledge, growth, all the higher possessions which we think of as pertaining to and enriching personal and religious liberty, and here we should begin to realize our unnumbered occasions for gratitude that among our forbears were those who fulfilled the Scripture requirement of loyalty to their highest convictions of truth and duty "until death."

Especially are we who are the sons of the Pilgrims reminded of our immediate and unmeasured indebtedness to their sterling Christian integrity, their unyielding adherence to the sense of right, their willingness to suffer and to die if need be rather than become subservient to any personal domination in matters of conscience. In his story of "The Genesis of the New England Churches," Dr. Bacon has summed up in the following words the reasons which led the settlers of Plymouth to face the known and unknown hardships incident to their great adventure. He says: "It was for the sake of assembling freely to worship God according to the simplicity and purity of the New Testament, and to be edified by the ministry of the Word."

Here was a purpose which laid hold upon the deep things of life, which sprang from a careful weighing of spiritual issues, and which was considerate for the nations yet unborn; and we are not surprised that their advisers and leaders, those who had thought their way out into a clear conviction of Christian duty and freely placed their all upon the altar of fealty to God, were of the type of Robinson and Brewster and Bradford. In their resistance to would-be ecclesiastical domination many brave men like Thacker and Copping had gone to their death unflinchingly, and these too could bear the sufferings of that first terrible winter on the shores of Massachusetts bay without reserve and without complaint. Grateful appreciation, that inspiring sense of indebtedness which leads us not only to rejoice in the nobility of those whose virtue and self-sacrifice has contributed to the enrichment of our lives, but to desire to emulate their devotion, to prove as true to our light as they were to theirs,—this thanksgiving and this alone is worthy of us, and it should ever grow richer, deeper, more gladsome, and more zeal-impelling for God.

No one can trace his blessings to their source without discovering his personal obligation to every true man and woman of the past. Directly or indirectly all have borne some burden, made some sacrifice, or fought some battle for us, and the meaning of our place and privilege and obligation will be vastly enlarged as we think of what a convergence of unselfish determinations and heroic deeds our every-day freedom and our common joys represent.

All this is of peculiar significance to Christian Scientists today because of their nearness to one whose ability to meet condemnation and contempt, to suffer ridicule and reviling without an answer save in charity, speaks for that devotion to "the word of Truth," and that conformity to the law of Love, which are the only true hall-marks of Christian discipleship. He who cherishes an actively expressive sense of indebtedness to others is assured of an ever-expanding usefulness and an ever-increasing joy, while his gratitude to God will sweeten every hour and place and undertaking with the incense of praise.

JOHN B. WILLIS.

AMONG THE CHURCHES.

DAYTON, OHIO.

Among the many interesting and attractive features of the Montgomery county fair this year is a reading and writing tent and rest room, under the auspices of the two Christian Science congregations of this city. A large sign on the outside reads: "Christian Science Reading Tent," and a smaller one, "Visitors are welcome." The tent, eighteen by thirty feet, is very attractive inside, decorated with palms and furnished with comfortable wicker chairs, a cot, a writing-table, and reading-tables with Bibles and Christian Science literature. The tent is provided with a floor and covered with druggets. A water tank with ice water is provided for visitors. A small sign, "Take one," on a bundle of literature to be given away, is noted.

This tent is provided as "a refuge from the storm, a shadow from the heat," for all who would like a few minutes' rest and an opportunity for good reading. Such a tent was maintained at the army encampment in Chicago a few weeks ago, and was very much appreciated by the officers of the army.—*Dayton Journal.*

BERKELEY, CAL.

The new Church of Christ, Scientist, will be opened for services tomorrow night [Aug. 16] at eight o'clock. The new edifice, which is located at the corner of Dwight way and Bowditch street, will not be completed before October, but services will be held in the building every Wednesday evening, beginning tomorrow. The services have been previously held in Wilkins Hall on Haste street.

The structure is built in the mission style of architecture and when completed will be one of the prettiest church edifices in the city. The total cost will be fifty-four thousand dollars.—*Berkeley Gazette.*

THE LECTURES.

MARSHALLTOWN, IOWA.

Judge Clifford P. Smith delivered a lecture on Christian Science in the New Odeon Theater, Friday evening, Sept. 29, to a very appreciative audience. The speaker was introduced by Atty. Leonard Carney, who said:—

We, the men and women of today of every belief and faith, demand the truth. To some of us the test of truth is our blind reason, our intellect, our judgment. Yet even to such the truth of many phenomena of life is unexplained, for who can tell us the mystery of love, its height, breadth, depth? The single test of truth is in its results.

As we observe Christian Science, it is not a science of books, but a Science of deeds. It is not a science of theory so much as it is a Science of proven fact; proven not by the lives of a few of its leaders alone, but by the lives of thousands who are daily accomplishing what may appear to us to be the impossible. Its numbers have grown because each one has demonstrated his ability to prove in some part the things that he professes. Christian Science must prove its truth under all conditions and all circumstances, else it is true as to none. We have all observed its beneficent results in certain cases; but we shall be more loyal to our judgment to deny its applicability in any instance, than to admit its usefulness in some and not in all.

If I rightly understand it, we come here tonight not to lay aside "the cares that infest the day," but to learn that the cares and anxieties which seem to consume us are but a troubled dream; and that the truth which has worked in the instances we have observed will work and does work continually and unceasingly in every circumstance of life.

Correspondence.

PARK CITY, UTAH.

A splendid audience gathered at the Dewey Theater Tuesday night [Oct. 3] to listen to a lecture on Christian Science given by Frank H. Leonard under the auspices of the local Christian Science church. Supt. C. L. Martin in introducing the speaker said:—

It is with pleasure tonight that I have the privilege of coming before an audience interested in a cheerful interpretation of Christianity, to introduce a representative of a hopeful system of religion. There have been many systems of philosophy, but the world is turning its back on the dark-cloud type and is asking with desire for the sky-blue tinted kind. In the natural evolution of the race, the overvalued materialism must give way to truer appreciation of the spiritual—the approach to God.—*Park Record.*

PASADENA, CAL.

On Oct. 3, in the church edifice, before an audience of fourteen hundred people, Francis J. Fluno, M.D., delivered his lecture, "Christian Science: Pure Metaphysics." That the people of this day are hungry for the truth was evidenced by the rapt attention with which every one in this great concourse listened to the speaker during the entire evening. He was introduced by John L. Mothershead, Jr., president of the church, who spoke as follows:—

There is one point on which the members of this entire audience will undoubtedly agree, which is that no permanent result is obtained in any line of activity unless the underlying truth of that activity is sought after and found. The schoolboy realizes that the basic truth of mathematics must become apparent to him before he can obtain the solution of the problems which mathematics may present. And we know that in the proportion that he finds and applies the truth he gets results.

So we in the broader school of every-day life know that we may only express harmonious activity when we are conducting our lives in accordance with the truth of our existence. However, when it comes to deciding in what direction the search for that truth shall be made, there will no doubt be many different opinions represented here. But of this thing I am sure, that we all want to be happy, we all want to be well, we all want to be at peace with ourselves, and we shall all agree that the knowledge of the truth about ourselves will bring these results. Christian Science has already brought these results for many hundreds of thousands of people, and your presence here shows that you desire more information about that Science.

Correspondence.

CRESTON, IOWA.

A good-sized audience listened to William R. Rathvon on "Christian Science: The New Light upon Old Truth," at the Court House Thursday evening [Oct. 5]. The lecturer, although he may not convince his hearers that his theory of theology is the right one, yet does give them food for thought. Adam Pickett, superintendent of the Creston schools, introduced the speaker, saying in part,—

From the infancy of the race to the present time three great problems have been ever present for solution: the universe, God, and man. When man first found himself in the lap of nature his attention was attracted to the universe, or cosmogony and cosmography. As he studied the uniform movements of the heavenly bodies and the forces of nature, he became convinced that such conditions could not exist without intelligent guidance, and thus the idea of a God dawned upon him. As he measured the distances of the stars and computed the rates of their onward marches and discovered the harmony and symmetry of the laws of nature as well as nature's God, it dawned upon him that the greatest problem of the three was man himself. For since the days when the oracle admonished Solon with the words "Know thyself," the problem has been ever present for solution. Some of us have the idea that there is nothing in this world but matter; others of us that there is nothing but mind; while still a larger number of us believe that man is a dual creature made up of mind and matter. But when we arrive at the conclusion that man is made up of mind and matter the problem becomes more difficult. Small minds can easily solve such problems, but men who do their own thinking find the solution more difficult.

I have made these suggestions as an introduction to the speaker in order that you may see the problems with which we have to contend, in order that we may lay aside our glasses and see things as they are and be open to the truth. For most of us examine the truth through lenses,—some through a Methodist lens, others through a Presbyterian lens, others through other denominational lenses. Let us for the time being lay aside our prejudices and be open to the truth, even at the expense of abandoning some of our beliefs.—*Creston Advertiser.*

LINCOLN, NEB.

A lecture on Christian Science was given at the Oliver Theater Sunday night [Oct. 8] by Virgil O. Strickler. He was introduced by Mrs. Caroline Phillips, who said in part,—

Christianity as taught by Jesus is for all time. It can never change in statement or in proof and is known by the signs which he said must follow. Jesus' theory and his practice, or proof, are one and cannot be separated. Christian Science appeals to humanity with its joyous and inspiring promises of deliverance from all our ills, and assures us of man's relationship to God. One does not have to agree with the teachings of Christian Science to recognize and admit the great work it is doing and has done for mankind.—*Nebraska State Journal.*

LECTURES TO BE DELIVERED.

Unless otherwise stated in the notice it is assumed that the lecture will be given in the evening.

Alpena, Mich.—Prof. Hermann S. Hering, Temple Theater, Nov. 27.
Alhambra, Cal.—Judge Clifford P. Smith, High School Auditorium, Dec. 8.
Baltimore, Md. (First and Second Churches).—Virgil O. Strickler, The Lyric, 3 p.m., Dec. 3.
Belfast, Ire.—Bicknell Young, Ulster Minor Hall, Dec. 3, (4th?).
Central City, Nev.—Bliss Knapp, Grand Opera House, 3 p.m., Dec. 3.
Des Moines, Iowa.—Bliss Knapp, Church Edifice, Dec. 4.
East St. Louis, Ill.—Prof. Hermann S. Hering, Church Edifice, Summit avenue and Washington place, 3 p.m., Dec. 3.
Elmira, N. Y.—Willis F. Gross, Federation Hall, Church and State streets, Nov. 28.
Evanston, Ill.—Frank H. Leonard, Church Edifice, Chicago avenue and Grove street, Dec. 1.
Evansville, Ind.—Prof. Hermann S. Hering, Evans Hall, corner Fifth and Locust streets, Dec. 5.
Fort Scott, Kan.—Frank H. Leonard, Opera House, Dec. 5.
Jefferson City, Mo.—Prof. Hermann S. Hering, Carnegie Library, Dec. 7.
Kansas City, Mo.—William R. Rathvon—
First Church, 9th street and Forest avenue, Dec. 4.
Second Church, 31st street and Troost avenue, Dec. 5.
Third Church, Morton's Hall, Westport avenue and Main street, Dec. 3.
Lakewood, Ohio.—Frank H. Leonard, McCaskey's Hall, Detroit and Belle avenues, 3 p.m., and 8 p.m., Dec. 3.
Lancaster, Ohio.—Virgil O. Strickler, City Hall Auditorium, Nov. 27.
Ludington, Mich.—Prof. Hermann S. Hering, Lyric Theater, Nov. 28.
Macomb, Ill.—Prof. Hermann S. Hering, Universalist Church, Dec. 1.
Mobile, Ala.—Clarence C. Eaton, Battle House Auditorium, Dec. 3.
Monroe, Wis.—Bliss Knapp, Turner Hall, Dec. 5.
Montgomery, Ala.—Clarence C. Eaton, Church Edifice, Dec. 5.
Nevada, Mo.—Frank H. Leonard, High School Auditorium, Dec. 7.
New Rochelle, N. Y.—Willis F. Gross, Loew Theater, 190 Main street, 3:30 p.m., Dec. 3.
New York, N. Y. (First Church).—Virgil O. Strickler, Church Edifice, 1 West 96th street, Dec. 5.
Oakland, Cal. (Second Church).—Judge Clifford P. Smith, Idora Park Theater, 3 p.m., Dec. 3.
Ottumwa, Iowa.—Prof. Hermann S. Hering, Grand Opera House, Dec. 8.
Pensacola, Fla.—Clarence C. Eaton, San Carlos Auditorium, Dec. 4.
Portsmouth, Eng.—Bicknell Young, Dec. 12.
Redondo Beach, Cal.—Judge Clifford P. Smith, Pavilion Auditorium, Dec. 7.
Sacramento, Cal.—Judge Clifford P. Smith, Clunie Theater, Dec. 4.
Sapulpa, Okla.—Frank H. Leonard, Lyric Theater, South Main street, Dec. 8.
St. Joseph, Mo. (Second Church).—William R. Rathvon, Shubert Tootle Theater, 504 Francis street, Dec. 7.
St. Louis, Mo. (Fourth Church).—Prof. Hermann S. Hering, Church Edifice, Page boulevard and Montclair place, Dec. 4.
Toronto, Ont. (First Church).—Bliss Knapp, Massey Music Hall, Dec. 7.
Waverly, Neb.—William R. Rathvon, Waverly Hall, Dec. 8.

TESTIMONIES OF HEALING.

Twelve years ago, I read "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I read it through with criticism, and made notes and citations, and I frankly confess that I rejected its teaching then, without understanding it. Myself and family remained with the adherents of *materia medica* another six years, when a case of croup brought the doctor to our home at two o'clock in the morning, and she remained with us for seven hours, giving medicine every fifteen or twenty minutes. For several days the cough, medicine, caution, and fear held us in bondage; in fact, the remainder of the winter was passed in fear and trembling.

During the summer we found it necessary to consult a Christian Science practitioner for our penury and woe. We began to read and study, in accordance with the instructions of our guide, and as much as possible to "fear no evil." The following winter (now five years ago), the same child awakened us one night with symptoms precisely the same as those of the year before. We telephoned to the Christian Science practitioner and stated the conditions to her. She replied: "All right. Do not have any fear for the child, and I will go to work." These words are as music to us every time the experience is recalled. We obeyed her instructions, and in the morning we found that both the croup and our fears were gone. From that time to the present Christian Science has been our stay alway.

Recently, through carelessness in using wood alcohol in a gasoline stove, there was an explosion which threw the flaming fluid upon my face, and before the blaze was out I had rubbed off several pieces of skin. I called my wife from another room, and we began our work in calmness as we continued the preparation of the breakfast. I sat down and ate as usual, got on my bicycle and rode about two miles, and was at my bench work in a machine shop on time. At the end of twelve hours the first outward attention was given my face by cleaning it with a cloth and enough vaseline to remove the dirt. After this, soap and water was the only cleanser. The second day my face was swollen so that I was troubled about seeing my work, but by the third day the swelling was nearly gone and the burned surface was covered. The fourth and fifth days were "mending days," and on the sixth day the incrustations were fully half gone. The following day conditions were so nearly normal that I felt perfectly at ease in the mid-week meeting, where I found myself with a heart overflowing with love and admiration for her who had blazed the path which I now try to follow, but which was rejected twelve years ago simply because I knew not the language of the guide-post where she had shown the way to Truth as revealed in the Master's teaching.

It is truly worth the while, even if I was five years in learning enough of the rule to give us the results gained by this experience. There is peace and "painless progress" (Science and Health, p. 224) in a demonstration of this kind which cannot be explained without some acknowledgment of the healing power of Truth and Love. The textbook of Christian Science teaches that the truth is a learnable ever-present help for every-day use, and whither it leads I would follow.—ORR W. LEE, Watertown, Ill.

Through the understanding and application of the truth that "there is no power apart from God" (Science and Health, p. 228), I have been blessed many times. I wish to express my gratitude for the help received in times of both mental and physical distress, by the truth taught in Christian Science. We have been benefited each time we have called for help,—my son, husband, and myself gratefully acknowledging this. For ten years Christian Science

Digitized by Google

has been my only physician, and my nine-year-old son has never been given any other treatment than Christian Science.

I am grateful for all which has enabled me, step by step, to gain some understanding of divine Truth as understood in Christian Science.

MRS. GRACE S. BUNKER, Oskaloosa, Iowa.

Words are inadequate to express the gratitude which I owe to Christian Science for the many benefits I have received. I could fill pages, but will tell of just a few demonstrations of the truth. Before I came to Christian Science I was subject to severe headaches, which would last from thirty-six to forty-eight hours. My father and husband being physicians, everything was done to relieve me; but it was all to no avail, as the headaches would come every few days. The last which I had came on after I became interested in Christian Science, and I let in so much fear that I called for help from another Scientist. The thought then came to let this one do the work, but I recalled these words from our text-book: "Rise in the strength of Spirit to resist all that is unlike good. God has made man capable of this, and nothing can vitiate the ability and power divinely bestowed on man" (Science and Health, p. 393). I got up and went about my household duties, and I have not had a symptom of the ailment since then, for which I am most thankful.

For all the blessings that have come to me through Christian Science I am most grateful to God, and to our dear Leader, Mrs. Eddy, its Discoverer and Founder.

MRS. K. CHURCHILL, Marshalltown, Iowa.

I wish to tell what Christian Science has done for me. After I suffered for years from biliousness, rheumatism, and malaria, I was advised by an old friend to read "Science and Health with Key to the Scriptures" by Mrs. Eddy. I purchased the book, and during six years read parts of it, but never entirely through. I did not go to church as I ought to have done; but, although I understood very little of Christian Science, I found that I had no further use for medicine, though before this I had been a constant user of drugs.

I followed the livery business from the time I was eighteen years of age, was thrown into the company of drinking men continually, and in consequence indulged the drinking habit myself until I became a wreck; but after reading Science and Health I decided to try Christian Science for intemperance. I was then fifty years of age, and had not eaten a breakfast for more than a year. I saw a practitioner and took treatment, and next morning I ate a good breakfast. I did not drink any more for two days, then commenced again and kept it up for some time. I went back to the practitioner and asked her if she would try me again, and she said that she would, if I would read Science and Health and go to church. I promised to do so, and from that time on I have not had any appetite for drink, and this happened three and a half years ago.

While I was healed of the drink habit in one treatment, I was treated for a few weeks longer in consequence of physical complications. I attend the Wednesday meetings, and have learned much from them; I do not lose my temper and swear as I did, and I have learned to think better of my fellow men. In every way I am a healthier and a better man, and I am thankful to God, and to Mrs. Eddy for even the slight knowledge that I have of Christian Science.—CHARLES H. HOPPER, Fresno, Cal.

I cannot refrain from testifying as to the benefit I have received through Christian Science. I suffered greatly with asthma and rheumatism for years; had no rest day or night for many months, except through the use of opiates, and was unable to attend to my household duties. Doctors treated me constantly, but were unable to give me any permanent relief. The last physician I had finally admitted that he could do nothing for me, and advised me to try Christian Science. One Sunday morning I decided to follow his advice, and sent for a Christian Science practitioner. She could not come that day, but gave me absent treatment, which so relieved me that I fell asleep about eight o'clock that evening and slept for hours, the first refreshing sleep I had enjoyed for months. The next day I received treatment again, and in one week's time I was able to go to her office. This was about two years ago. I am now strong, able to do all my work, and am improving every day.

My daughter, eleven years old, had worn glasses for years, and could not see at all without them. The third Christian Science treatment enabled her to lay away her glasses, and she has never used them since, which was two years ago. Her sight is now perfect. I am truly grateful to God for the benefit of Christian Science.

MRS. R. L. ANDREWS, St. Louis, Mo.

This is to testify that my daughter was healed through Christian Science, in two absent treatments, of a severe injury to the right foot, the ankle being greatly swollen and very painful. In February, 1910, she was also cured of a severe acute attack of rheumatism, affecting the back and hips, with two absent treatments. For this I feel very grateful.—MRS. D. D. PETTIT, Sacramento, Cal.

To one who is of an anxious thought, feeling a sense of responsibility in daily affairs, Christian Science comes as an angel of light, lifting the heavy burden and bringing a sense of strength, buoyancy, and joy. The consciousness of the ever-supporting arm of our heavenly Father is a comfort which is beyond expression in human words, but it comes to all who patiently study the Bible and Science and Health.

Twelve years ago, through the loving work of a Christian Science practitioner, I was healed of catarrh, which had seemingly poisoned the whole system, and which the best specialists had pronounced incurable. I was healed in a few weeks, and am now a strong and healthy woman. My heart overflows with love and gratitude to Mrs. Eddy, for so unselfishly sending out to all the understanding which came to her from divine Mind.

MRS. EMMA M. CLARK, Washington, D. C.

Although I have been interested in Christian Science only a little over a year and a half, I feel that I want to give thanks for the good already received. I have been completely healed of an organic trouble of long standing, also of hay-fever and other ills. Besides this, the Bible has become a new book to me, since studying it in connection with the Lesson-Sermon. I want to express my deepest gratitude to God for His love and care; also to Mrs. Eddy, who has shown us the way. I am thankful for the loving help which has enabled me to understand better the truth, and I desire that my life shall attest my sincerity.

MINNIE W. ROUTCH, Boston, Mass.

I wish to express my gratitude to Christian Science for what it has done for me. Through the reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was permanently cured of the tobacco habit (chewing and smoking) of about twenty years' standing, also of the drinking habit, to which I had been a victim for the last fifteen years. I was at this time in the United States and very ill. My brother sent me a copy of the text-book, and besides the help mentioned its study has also greatly benefited me mentally and physically. All honor to its beloved Discoverer, the first among women to found a religion.

HERMAN LUNDH, Kristiania, Norway.

About three years ago I realized a greater sense of gratitude than ever before, and when I questioned myself as to its true cause, I found that it was not only because I had been healed of diseases which had resisted all medical treatment, but because at last I knew that there is a God,—one who loves us all. I had just been brought out of a very critical condition, resulting from a hereditary bowel trouble, according to some physicians, and therefore incurable. This had developed into stomach and intestinal disorders, attacks of appendicitis and gall-stones, etc.

In spite of various kinds of medical treatment and operations, I grew worse, until I was very weak from constant pain, and was depending upon powerful drugs and other material means to prolong my life. I was again advised by several reputable physicians to go to a hospital immediately for another operation; but a dear friend told me of her healing in Christian Science, and I decided to spend a few days in trying this wonderful cure. I asked a Christian Science practitioner for treatment, and from the first day I began to eat and digest my food, and grew strong and well very rapidly. I also found Christian Science a great help in childbirth.

I often think of Mrs. Eddy with love and gratitude for her having bravely given to the world this great truth as taught by Christ Jesus. It has shown me how to be a better woman, a more unselfish daughter, a better wife and mother; less anxious, for I know that God has only good for us all.—Mrs. Gladdys Kleinberger, Los Angeles, Cal.

This testimony must begin with an expression of deep gratitude for the many blessings which I have received through the study and application of the Principle of Christian Science. I am truly thankful, first of all, to God, the giver of "every good gift and every perfect gift;" then to our beloved Leader, whose great love for humanity has enabled her to be the means of uplifting thousands to an entirely new and better sense of life. For her noble example I am very grateful, and it is my earnest wish to follow it, in some measure at least. I am also grateful to the Publishing Society for the pure and helpful literature sent out.

When our second little boy was a tiny babe, I overtaxed my strength, which resulted in a hemorrhage, also a pain in the back which continued for over a year. Then our little daughter came, and six weeks later I was still an invalid. In addition to the conditions mentioned there was extreme weakness, so that I had to lie down nearly all the time. A severe case of inaction of the bowels also manifested itself, with aggravations which caused me great discomfort. My husband wished me to consult a physician, but a year and a half before that time I had taken a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy out of the public library and read it, and now I desired to give the truth contained in that book a trial.

From that first reading I had been healed of a chronic stomach disorder which had troubled me for nearly two years, and although at the time I attributed the cure to a change of diet, I now know that it was the action of Truth, even though I did not clearly understand it. The relief from worry and fatigue, and the sense of peace which followed, were very great; but error crept in, in the form of false reports when I made inquiries about Christian Scientists, for I had never known any one personally who believed in Science. Divine Love, however, did open the way when I was really ready.

Through an acquaintance I heard of a lady who is a Scientist, and sent word to her, asking if she would come and call on me. This she did, bringing me a copy of Science and Health, and saying that I might keep it as long as I wished. This dear Scientist impressed me with a sense of peace and love which pervaded all that she said and did, and at that time the sense of discord in my own life being uppermost, the contrast seemed very great. That night I began to read the text-book, and what a revelation it was! Where before there had been darkness, now there was light, and since then I have not cared to read anything except the Christian Science literature. The third day after I began to read the hemorrhage stopped, and the feeling of weakness was gone so that I was able to be on my feet all day at my work. My husband has ever since been a strong believer in the efficacy of Christian Science, because of the wonderful change which took place in my condition those first few days. I continued to gain very rapidly in strength, the hemorrhoids disappeared, and later the pain in my back, though that yielded more slowly; but it finally disappeared altogether. After several months of continued study of Science and Health, during which time every trouble that appeared to annoy the children or me was overcome, I made the acquaintance of a practitioner, who helped me with any problem which at the time seemed too difficult for me.

Another case which was healed just through the reading of Science and Health and the study of the Bible, especially the Lesson-Sermon, was that of our little boy's legs. It was the worst case of "bow-legs" that I ever saw, and I had been studying Christian Science about nine months before I seemed to have faith enough even to try to help him. My husband and relatives of the family advised putting braces on; but these we found were quite expensive, so the buying of them was postponed. One day, when consulting the practitioner about something else, she called my attention to the following passage in Science and Health: "Inasmuch as God is good and the fount of all being, He does not produce moral or physical deformity: therefore, such deformity is not real, but is illusion, the mirage of error" (p. 243); and she said to me, "This passage will help you in the work for the little boy." I went home feeling that there was hope after all, and I began to give the child systematic treatments, always declaring the truth as given in that special paragraph. In six months the change was so marked that many noticed it, and in less than two years his legs were so nearly straight that no one ever thought of noticing them; while formerly every one who knew the child spoke of it, and even people we saw on the street frequently passed remarks about him. He is now a straight, sturdy child, with an unusually good carriage.

Since beginning the study of Christian Science, neither the children nor I have used any material remedies for the many ailments which at first seemed to come to us. Now the children have perfect health and have had for some time. These are only a few of the many physical blessings which have come to us, and they are really the least, the greatest blessing being the spiritual awakening, the ability to understand the Bible and to know the meaning of many passages which had puzzled me; also the great peace which has come to me, taking the place of a sense of fear which was almost constantly with me.

Bessie L. Kraber, Yelm, Wash.

I wish to express my loving gratitude to our dear Leader for her courageous proclamation of freedom to all humanity, in the text-book, "Science and Health with Key to the Scriptures," from which emanated the scientific healing of the sick, the regeneration of the sinful, and the resurrection of many from the death decreed for them by *materia medica*. Through this great teaching I was healed from a supposedly incurable liver trouble, with which I had suffered all my life. I had sought advice and treatment from specialists in all our larger cities, but without any cure. The disease had reached the point where death seemed inevitable, and very near, when Christian Science was brought to my attention. From the day I turned to it as a last resort and found God, the only true God, five years ago, I have never taken any medicine.

I have since been healed of many minor troubles also. The human selfhood which I supposed must be subdued,

Digitized by Google

when I first commenced to study Christian Science, has through the application of the truth become a blessing instead of a detriment, for it is now being governed by God. Mrs. Eddy says, "Whatever is governed by God, is never for an instant deprived of the light and might of intelligence and Life" (Science and Health, p. 215). The material sense of constant pleasure or pain in matter has given place to the joyousness of spiritual consciousness. So much has this spiritual sense become a reality that when a friend asked me, some time ago, if I had sent in my testimony of healing to the publications, I was surprised to find that the healing from the death-dealing disease, and all its sufferings, had been entirely submerged beneath the uplifting of the spiritual realization of Truth, found in the Bible, which was illuminated by its study in connection with the Christian Science text-book.

I shall try to show my gratitude and express the joy of my spiritual growth by a life sustained and governed by the Christ-Mind, and consecrated to the truth, desiring each day to grow more and more into the stature of Christ, and to follow our beloved Leader in devotion to my brother man.—Mrs. Eleanor H. Burr, La Jolla, Cal.

Two years and a half ago my husband and myself became somewhat interested in Christian Science, and since then we have been actively interested. Many minor ills have been met and overcome by our own knowledge of God, gained through Christian Science, and we have been blessed by the help of practitioners at various times. I had often wished that I might experience a sudden healing, feeling that I would thus know God in a clearer way than before. Now I know that Truth was all about me, but I was not willing to recognize it; I wanted it to come to me in a startling way, and I got it.

Our baby, two and a half years old, fell down the cellar stairs, striking on her temple on the cement floor. When my husband reached her she was unconscious. She was put into my arms absolutely limp and seemed beyond help. The fear was great, but I declared the truth over and over, striving to realize that God is Life and that His child is perfect and indestructible. My husband felt that we must have help, and rushed across the street to telephone into New York city, twenty-five miles away, but before he returned the little one opened her eyes, pushed out her arms, slipped to the floor and stood erect. Instantly all fear vanished, and I knew the healing work was done. She vomited several times, but was perfectly comfortable and sat quietly in my lap. This was late in the afternoon, and by nine o'clock that night the discoloration had entirely disappeared. The child slept soundly all night and was perfectly normal, and there were no after ill effects.

My gratitude to Mrs. Eddy for what she has given to the world, for making it possible for us to know our Father-Mother God, is unbounded.

Eleanor Maling Ware, Sewaren, N. J.

It is with the deepest sense of gratitude that I tell what Christian Science has done for me, but an item only can be told. To me it has revealed a perfect, unchanging God. It has lifted me from the darkness of disease to the brightness of health, and I stand a living monument to Christian Science. From infancy I was greatly troubled with rheumatism, at times was perfectly helpless, and am now very grateful to be free from it. Although I had been a church-member for years, I did not understand the Bible. I had united with the church in the expectation of being enlightened on the Scriptures, but I did not gain this knowledge until I studied the Bible in connection with "Science and Health with Key to the Scriptures" by Mrs. Eddy.

After the birth of my first child I suffered from blood-poisoning, fever, and lung trouble. Physicians gave me up, and said I was dying; but I rallied. The next physician who was called said that if I recovered I would always be an invalid, as nervous and other diseases, also heart trouble, seemingly held me in a terrible condition. Five years later, when our second child was born, I set prejudice aside and accepted Christian Science. My healing was slow, as I had much to undo, but with earnest study I gained a spiritual understanding which was worth more to me than this world could give. Three years later our youngest child was born under Christian Science treatment. I realized no pain, helped to care for the little visitor, and to the material senses acted as my own physician. There was no one in the house with me at the time but a sister, who was a student of Christian Science. We sent for my husband, who came at once, and he asked me if I wanted a physician. I said that we already had the best physician, and it was then we three realized as never before that we had the only physician. I did not remain in bed a day, but ate as usual with my family.

I find this truth of much help in bringing up the children; it is truly an ever-present help. I could get along without my daily food better than without my daily study, and there are about twenty of my nearest relatives who are now faithfully studying this new-old truth. It would be needless for me to try to express in words my gratitude to God for these blessings, and to our dear Leader, who has so faithfully revealed this blessed truth to mankind.

Ella T. Bailey, Jackson, Mich.

Over seven years ago, through what the physicians claimed a general nervous breakdown, my eyes failed me completely and some eighteen months of this time was spent in hospitals and sanitariums under the care of five of the best oculists in the United States, with varying success but no permanent relief. Their advice was that an operation might help, but that this could not be guaranteed; and without the operation complete blindness would result. This condition prevailed until along in March, 1910. While able to get about the house with difficulty, I could not go away from home without an attendant and could not see to cross the street without help.

About this time Christian Science was suggested to me, and I began taking treatment. Now, thanks be to God, I can see and go wherever I wish, and I can read the Bible and Science and Health; my sight is getting better every day, and my general health is perfectly fine. I never felt better in my life; but the physical healing, while perfectly glorious, is nothing compared to the spiritual uplift that has come to me since I accepted Christian Science. This help has made me deeply compassionate for those who are suffering as I was, and my gratitude for this wonderful truth which has been so ably and unselfishly worked out and presented to mankind by Mrs. Eddy, knows no bounds. To God, and to all who have assisted me in learning of this truth that makes free, I am deeply grateful.

Mrs. Ella H. Beckwith, St. Joseph, Mo.

I was healed of lung disease over ten years ago; that is, I found the truth, and it healed me. I was at first spiritually benefited. I received this help suddenly; then my physical condition yielded and I was healed permanently through Truth. I have not taken a drop of medicine for over ten years.

I have not words to express the gratitude I feel, but I must say a word in favor of Christian Science, though I cannot tell the half that I have received through the understanding of Truth gleaned from study of the Bible and the text-book, "Science and Health with Key to the Scriptures," also Mrs. Eddy's other writings. After ten years' study of Christian Science I feel I have just begun; it is dearer to me today than ever before. These are the words that turned me to Christian Science: "Ye shall know the truth, and the truth shall make you free." These words

Digitized by Google

of the Master carried me through sorrow and trial. I knew I could not make any mistake in following his voice, no matter how hard the condition might seem, and I still stand listening for the word which turned me from fear to truth. I am deeply grateful to Christ Jesus, through whose blessed words and works I have learned what God is, where God is, and that I am nothing without Him; and I am thankful to our Leader, Mrs. Eddy, for bringing to us this healing truth.—MARY E. TREFF, St. Paul, Minn.

In or about 1890 I was suffering from various ills, bowel and kidney trouble, etc. I had not read any Christian Science literature, but I heard of a practitioner who lived five miles from us. I went to see her, and after she had explained the Bible in a very satisfying way to me, she gave me a treatment. I returned to my home, reasoning that if God is unchangeable, then He surely heals today as He always has, and that I need not be disturbed as I had been. The tempter came three times during the night, and there was a struggle each time; but the last was much less than the first, and I could truthfully say in the morning that I was healed, and my words were proved true.

I have since studied Christian Science under a teacher, and take all the Christian Science literature, and am proving daily that the Christ-way is the only way.

MRS. ANNA NYMAN, Mt. Carroll, Ill.

[Written for the *Sentinel*.]

FATHER, I THANK THEE!

MARY I. MESECHRE.

EACH day of every year my joyous heart
Keeps holy day; nor can I set apart
A single morn sufficient to express
My thankfulness.

For morning, noon, and night Thy blessings flow
Unceasingly; and everywhere I go
New joys await, to speak the constant care
Thy children share.

With open hands I stand before Thy throne:
That Thou hast given me is all Thine own,—
I thank Thee for my growing power to use
As Thou dost choose.

For every good I praise Thee, knowing well,
Since Thou art good, not any evil spell
Can cloud the life that with humility
Trusts all to Thee.

In reverence I thank Thee for all things—
For far faint whir of Pentecostal wings,
For tongues flame-freed, for instant power divine
That symbols Thine;

For lives reclaimed by Love from error's thrall,
For ears made quick to list a brother's call,
For answer borne by feet untiring, swift,
For hands that lift;

For warning words that bear no hint of blame;
For loyal friends who magnify Thy name
With steadfast aim; for joy Thy smile hath crowned,
My thanks abound!

Yea, for all things I praise Thee, and not least
Do I rejoice to keep this daily feast
To honor Thee who fillest all my days
With power to praise!

So for all gifts that on my pathway fall
I give Thee joyful praise! But more than all,
Grateful am I, O giver of all good,
For gratitude!

FROM OUR EXCHANGES.

[*Congregationalist and Christian World.*]

Our greatest concern must be for the simple, the commonplace, the undramatic, the seemingly unheroic, and yet, as the world is ordered, the absolutely indispensable. There is no great cause which is not being halted in its onward sweep by the dearth of lesser fidelities. Men who would die for their country will not go to the polls, or if they do as much as that, they will not exercise themselves to affect the counsels of their parties, the making of slates, the policies and platforms. Our churches are halted not by the want of the great, but by the want of the small. We are told that the church has lost her power because she has ceased to be an heroic and sacrificial church. We must kindle again, it is declared, upon altars smothered by the commonplace the old fire of sacrificial devotion. All this is true enough, but there are perils in it. God does not always open the doors of the heroic for men, and when they begin to open them themselves without fitting call, we are likely to achieve not the heroic, but the mock-heroic. You cannot kindle the high and exceptional fires of life except upon high and exceptional occasions.

No, we are not to displace the commonplace, we are to exalt it. Our salvation lies in new conceptions of the significance of the simple—in a new vision of the value of the lesser service. The scientists themselves are discarding the cataclysmic and are exalting long-continued creative methods in which, by processes wholly akin to those which reign in our serene and ordered world, the mountains themselves were lifted and the beams of the chambers of God laid in the waters. True enough the kingdom of God has from time to time advanced with the tumult and movement of changing armies, but more often it has waited upon simple fidelities and widened with the extension of undramatic duties and unnoted qualities.

[Rt. Rev. C. P. Anderson, D.D., Bishop of Chicago, in *Churchman*.]

I have tried to point out that we are passing under conditions that seem more or less alarming; that they are not alarming to the man who knows church history and who has a strong abiding faith in God; that they are not alarming to the man who can see that somehow or other the religious and spiritual nature will always find an expression, and though there may be periods of depression, better days are sure to come. I have been trying to point out that we are passing through certain chaotic conditions, in order that I may emphasize the fact that those very conditions are a call to the church, to the whole church, to every member and every organization in the church, to make that great battle for God in the future so that Christianity in this country will mean all that it is intended to mean, so that we shall yet have a national Christian conscience, because a national conscience exercises a greater power than a sectarian conscience can possibly exercise. Sectarianism has never proved itself to be capable of thinking continentally. It never built a great Christian university, it never converted a single nation. The only church that ever captivated nations and created a national conscience and built great institutions of learning was the undivided church of centuries agone, and you and I have got to create that sort of atmosphere for the future. There is our venture, and we shall have that venture. We will work it out along the lines of our Christian education and the application of the principles of religion to our national and social and industrial life.

[Prin. W. B. Selbie, M.A., D.D., in *British Congregationalist*.]

The world outside will never be impressed, nor will the life of the church within be healthy and progressive, until there is a closer correspondence between Christian practice and profession. It is useless to point men to Jesus Christ

Digitized by Google

while we ourselves are content to call him Lord, Lord, without doing the things that he says. Nor is it any use to preach to them the doctrine of the cross, unless the cross itself is passionately accepted by ourselves as the principle of the Christian life and service. So the fatherhood of God and the brotherhood of men must be brought down from the pulpit and the platform into the common working life of the church if they are ever to become saving doctrine for the mass of mankind. We shall need, too, to restore something of the old spirit of joy and pride in the gospel if we are to commend it to others with any great success. The eagerness and urgency of the message seem in these days to have been almost lost, and only a very real experience can restore them. The church that is possessed of saving truth and gives evidence of the same in the new and happy lives of her members will be at once evangelical and progressive.

[*Watchman.*]

The emphasis today should be laid upon present judgment which men are receiving in their character and experience. It is an age of psychological analysis, and if the effects of disobedience to the holy and perfect will of God are clearly seen, it will go far toward producing that sense of responsibility which will undermine careless pleasuring after the manner of Belshazzar. Conviction of sin is simply realization of things as they are, and enables a man to know himself and act with a clear view of the truth. When he learns that he is judged, he judges himself, and asks the help of God to gain clearer and fuller judgment and thereby seeks righteousness and avoids iniquity, preparing himself to meet the divine judgment of today and tomorrow.

[Rev. R. J. Campbell, M.A., in *Christian Commonwealth.*]

There is no life that is not in some degree an expression of the eternal Word. What has been seen to be grandly and centrally true of Jesus is true also in some measure of the humblest thing that breathes in God's wide universe. But in a higher sense it is truer of man than of the lower creation; all life that comes to self-consciousness is a ray of the eternal wisdom, a spark from the eternal fire. The Word has been made flesh in you and me as well as in our Lord and Master; the difference between us and him is one not of kind but of degree.

[*Christian Register.*]

All people interested in the life of the church will surely agree that a revival of religious interest is greatly to be desired. Expressions of hope for it and of determination to work for it abound on every hand. Many predict that it is coming soon. A goodly portion of the religious world begins to get into a state of mind not unlike that of the Jewish people just before the birth of Christ. Perhaps this mental state is in itself a kind of prophecy of some impending change.

[Harold Begbie in *Public Opinion.*]

More and more distinctly we perceive that the religion of Jesus Christ in its simplest form is the brotherhood of man—a brotherhood not ending in earthly advantage, but only as a way to the everlasting development of the indestructible self. . . . Materialism is the enemy. Out of materialism can come nothing but ugly strife and severing discord.

[Grant Wallace in *Los Angeles* (Cal.) *Tribune.*]

Men's meager conceptions of truth often are at war with each other, but no two truths ever conflict. Every truth in the world dovetails into every other truth. Only errors and half truths are in conflict with any correct statement of life's verities.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."

SOME OF MRS. EDDY'S WRITINGS originally issued in pamphlet form are now to be had in pocket and library editions. Description and prices will be found on the outside cover page of the *Sentinel.*

The volume, "Poems by Mary Baker Eddy" is specially bound; 79 pages.

In accordance with instructions given by Mrs. Eddy to her publisher on Sept. 13, 1910, an edition of "Rudimental Divine Science," printed in the New York point system of type for the blind, has been prepared and is now on sale. Price, prepaid, single copy 50 cents; six or more copies to one address, 40 cents each.

Orders for the books named above and the other works by Mrs. Eddy should be addressed to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE EDITOR.

All manuscripts submitted for publication in the *Sentinel, Journal,* and *Herold,* whether articles, poems, or testimonies, and all correspondence relating thereto, should be addressed to the EDITOR, and not to individuals.

FROM THE SOCIETY.

A new pamphlet has just been issued entitled "Christian Science *vs.* Finite Sense," a lecture given by Francis J. Fluno, M.D. 32 pages. Price, single and quantities, the same as the regular pamphlets listed on opposite page.

Two pamphlets of interest to our friends who read German have recently been printed by the Publishing Society, "Mary Baker Eddy: Her Purpose and Accomplishment" and "The Discoverer of Christian Science." The first article by Frederick Dixon was originally published in the *Cosmopolitan,* and the second article by B. O. Flower was published in his periodical, *The Twentieth Century Magazine.* These articles have been carefully translated into German, printed in the regular pamphlet style, and are of value for distribution among German readers.

Both of these pamphets will be found listed on the opposite page, with prices for single copies and quantities.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for the names of the churches and their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred, and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to J. V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Journal

Published Monthly.

Founded April, 1883, by Mary Baker Eddy. Discoverer and Founder of Christian Science, and author of the Christian Science Text-book, "Science and Health with Key to the Scriptures."

This monthly magazine is the official organ of The First Church of Christ, Scientist, in Boston, Mass. In addition to articles, lectures, and testimonies not published elsewhere, it contains a complete list of Christian Science practitioners, and a directory of Christian Science Churches, Societies, and Reading Rooms.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, single copy, one year, $2; six months, $1.00. SALE PRICE: Single copy, 20 cents. In all other countries add 40 cents postage for each annual subscription. SALE PRICE: Single copy, 25 cents.

BOUND VOLUMES: Current and past year, cloth, $2.50; half calf or half morocco, $3. On earlier volumes write for prices.

The Christian Science Monitor

Published every afternoon, except Sunday.

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5 a year, $3 for six months. In all other countries additional postage at the rate of $3 yearly is required. When delivered by carrier through a local news-dealer, 12 cents a week, payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year. One hundred copies, $1.25; foreign postage additional.

The Christian Science Quarterly

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION AND SALE: In the United States, Canada, Mexico, and Cuba, 50 cents annually; single copy, 15 cents; fifty copies or more to one address, 12½ cents each. In all other countries, 60 cents annually; single copy, 18 cents; fifty copies or more 15 cents each.

Subscriptions not accepted for less than one year. Subscriptions begin with current quarter unless otherwise designated, and terminate with the last of the month named on wrapper.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German. It contains original and translated articles bearing upon Christian Science, testimonies of healing, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science Churches. Improved and enlarged in 1910.

SUBSCRIPTION PRICE, PAYABLE IN ADVANCE, POSTPAID: For the United States, Canada, Mexico, and Cuba, $1 a year, 60 cents for six months. In all other countries, $1.25 a year, 75 cents for six months.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, single copy, $5.00; six or more copies to one address, $4.50 each.

CHURCH MANUAL. Containing the By-Laws of The Mother Church. Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

CHRIST AND CHRISTMAS. An illustrated poem. Price, single copy, $1.00; six or more copies to one address, $2.50 each.

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, single copy, $3.50; six or more copies to one address, $3.25 each.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, single copy, 65 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each. Leather covers (pocket). Price, single copy, $1.00; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, single copy, $1.06; six to eleven copies, inclusive, 85 cents each; twelve or more copies, 75 cents each.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 17 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 55 cents; six to eleven copies, inclusive, 42 cents each; twelve or more copies, 35 cents each.

RUDIMENTAL DIVINE SCIENCE. Printed in the New York point system of type for the blind. Price, prepaid, single copy, 50 cents; six or more copies to one address, 40 cents each.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, single copy, 32 cents; twelve or more copies, 25 cents each. Library edition, cloth binding, marbled edges. Price, single copy, 60 cents; six to eleven copies, inclusive, 50 cents each; twelve or more copies, 45 cents each.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, single copy, $1.50; six to eleven copies, inclusive, $1.25 each; twelve or more copies, $1.15 each.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Pebbled cloth covers. Price, single copy, 26 cents; twelve or more copies, 20 cents each.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, single copy, 26 cents; twelve or more copies, 20 cents each.
