PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, 60 cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half do. en; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50. prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Despatches from New York give the following account of the way Christmas was observed in that city:—

In the churches thousands of voices were lifted in prayer and hymn. The day was announced from high belfry and from brightly lighted altars. Wealthy and poor joined in the evidences of good will. They who had been blessed with an abundance of this world's goods spread the tables for their less fortunate fellow-men.

One of the features of the day was the dinner to nearly twenty-five thousand persons given by the Salvation Army. Frank Tilford entertained the newsboys, and the *Evening Telegram* distributed to its young agents free copies of the paper. Senator Sullivan gave a dinner in honor of his numerous constituents.

In all the public institutions there was an observance of the day, and all prisons and correctional institutions of the city spread the board appropriately. At the hospitals Santa Claus walked the wards, and Christmas trees laden with gifts and lights shone amid white walls.

Public and private charity gave happiness to the thousands, and all over the city the spirit of Christmas had full sway. In the outlying districts, where the wealthy have their country seats, the poor were better cared for and made more happy than ever before.

Cooper Union was packed to the doors Christmas night at a meeting held in celebration of the fifth international Zionist congress, which will hold its first session in Basle, Switzerland, and it is expected to be memorable for progress in the movement to re-establish the Hebrew people in Palestine under a government of their own. Meetings similar to the one in Cooper Union were held all over the world. Those interested in Zionism are awaiting with interest the report of Dr. Theodore Herzel, the founder of the movement, in regard to his interview with the Sultan of Turkey on his project of establishing in Palestine a colony of homeless Hebrews.

Lieutenant-General Miles, who returned to Washington from New York December 24, denied himself to all callers who desired to talk with him regarding the reprimand he received from the President and the Secretary of War. He sent out word that he had absolutely nothing to say about the matter. It is understood among his friends here that he will not ask for a court of inquiry or take any action whatever in the case.

Fully fifteen thousand persons saw the battleship Missouri launched at 11.12 A.M., Saturday, December 28, at the yards of the Newport News Shipbuilding and Dry Dock Company. Everything passed off in good shape, and a more successful launching was never seen here.

Governor L. M. Shaw of Iowa has been appointed Secretary of the Treasury by President Roosevelt. Secretary Wilson of the Department of Agriculture will remain at his post. Thus Iowa will have two members of Mr. Roosevelt's cabinet.

Edgar S. Maclay, the "special laborer" in the New York Navy Yard, who was the author of the attacks on Admiral Schley which brought about the Court of Inquiry, was discharged by President Roosevelt's order December 24, 1901.

Foreign.

A display of naval force by the world powers of the seas has been arranged as a part of the coronation ceremonies of King Edward next June, in which the United States and every other great nation supporting naval strength will be invited to participate. It is designed that this display shall surpass all previous efforts of the British Government to impress on other countries the extent and power of her navy, and will serve in a measure as an occasion for the lesser naval powers to vie with one another in the assembling of squadrons composed of their latest and most formidable types of sea fighters.

A despatch from St. Thomas states that no demonstration has occurred there against the cession of the Danish West Indies to the United States.

The only basis for the report was that a squad of marines from the Danish warship Valkyrian marched through the town. They were followed by the rabble, as is customary when a Danish warship visits the island, and the affair had no political significance whatsoever.

The despatch adds that the intelligent natives favor the sale of the islands.

Havana, December 25, 1901.—A banquet was given to the officers of the United States fleet to-day by the Cuban veterans. It was a grand token of gratitude toward the American navy. General Carlos Garcia presided. Governor-General Wood, in proposing a toast to the future republic, said that when the fleet came again it would find a stable government in Cuba. Rear Admiral Higginson thanked the Cubans and said the presence of the fleet had no political meaning. Captain McCalla paid a high tribute to General Garcia.

The first Christmastide of the Twentieth Century found Bermuda very prosperous. The billeting of several thousand Boer prisoners of war here, with their attendant guards; the erection of a bridge at the Somerset narrows and extensions at the dock yard works at Ireland Island have all augmented the population of the islands. Work is plentiful and business is brisk.

Berlin, December 25, 1901.—Emperor William, while walking in the environs of Potsdam yesterday, tossed several three and four mark pieces to poor looking persons whom he passed. The Emperor's Christmas bounty is never limited, but this year he has doubled his usual subscription to charitable funds.

Though the Pan-American Conference as a whole will undoubtedly fall back in the matter of arbitration upon The Hague convention, it is learned that a number of the South American nations will join among themselves to sign a separate convention of compulsory arbitration.

A French syndicate is making preliminary arrangements with the view of starting a fruit business in Jamaica. It is proposed to load two steamers every fortnight for different ports of Europe.

What seem to be authentic reports announce the settlement, by arbitration, of all disputes between Chili and Argentina. This has averted another South American conflict of arms.

Industrial and Commercial.

The Carnegie Steel Company paid off its workmen at Homestead, Rankin, Duquesne, and Braddock plants December 24, to enable them to spend money for Christmas. The regular pay-day would be Saturday. There was about $300,000 distributed in Homestead and Rankin, $200,000 at Duquesne, and $250,000 at Braddock. Many of the other large mills made an early Christmas pay.

The Electrical Review says that there are in operation in the United States 2,278,717 telephones. The total capital invested by the various telephone companies amounts to nearly five hundred million dollars. One company employs thirty-three thousand persons and handles a total of two billion calls per year.

Work on the two mammoth steamships for the Great Northern Steamship Company, at New London, Conn., is proceeding very rapidly at Groton, and it is expected that both vessels will be launched during the early summer.

General.

A solemn and impressive ceremony, the consecration of an oratory, marked the advent of Christmas, the Feast of the Nativity, at Mrs. John L. Gardner's Italian palace on the Back Bay Fens.

At the hour of midnight the Rev. William B. Frisby, D.D., rector of the Church of the Advent, celebrated the holy communion in the presence of Mrs. Gardner and the members of her household, and performed the act of consecration.

The utmost privacy characterized the ceremony, and only a few persons were present. A solitary carriage waited outside the walls of the palace to convey the officiating clergyman to his home at the close of the service, and this was the only indication in the vicinity that anything was occurring to vary the midnight stillness which usually prevails in the yet unfinished structure.

An event unique in theatrical circles took place at the Nebraska school for the deaf in Omaha, on Christmas eve. The pupils gave the play of "Cinderella" in the sign language. Special scenery had been painted, and to all appearances the deaf mutes acquitted themselves with glory.

Fifteen of the pupils were in the cast, which was headed by Miss Kittie Peterson and Master Earl Haller. To see the audience laugh without making a sound and to hear it applaud when the actors could not hear was amusing to the large number of spectators who could not understand the language used. A large out-of-town audience was present, a great number of former pupils of the school coming in from towns throughout the State.

William Ellery Channing, the last surviving nephew of Rev. Dr. William Ellery Channing, the eminent divine of a past generation, died about 6 A.M. Monday, December 23, 1901, at the home of his friend of nearly half a century, Frank R. Sanborn, in Concord, Mass., at the age of eighty-three years. Mr. Channing was a poet and the author of a number of books, nine in all. He resided many years in Concord, and was the last of that intimate brotherhood which made Concord famous,—Thoreau, Emerson, and Hawthorne, who were his dearest friends. Emerson was the first to recognize Channing's poetic genius.

James J. Cavanaugh celebrated his 111th birthday Christmas Day at Watertown, Mass. He is in fairly good health and yet active. He was in early life a tailor in London, Eng., and assisted in making clothes for Kings George III. and IV., whom he well remembers.

The highest inhabited house in Europe is the observatory building which was built in 1880 at the top of Mount Etna. It is 9,075 feet above sea level.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

About Christian Science.

Editor *Statesman.*

Since the recent false and uncalled-for statements have been made about Christian Science and its Founder in a public meeting, a number of our good citizens, desiring to know the truth about the matter, have propounded certain questions to me with the request that I answer them through the columns of the local press in order that they and others who are interested might have an authoritative statement from one who is in a position to make it. I therefore hand you the following brief answers to a few questions.

Please state the mission or purpose of Christian Science.

Its purpose is to heal and regenerate mortals; to give them an understanding of God and man, and of their eternal relationship; to cause them to forsake sin and love God; to reveal to them the necessity of right thinking as well as acting; to teach them to have one God and one Christ, and to love their neighbor as themselves. Christian Science reveals the practical import of Christ's teachings, and leads to all that is elevating, noble, and pure. It causes men to act as though they walked with God, and so it purifies society, politics, and business, and points to the establishment of God's kingdom on earth.

What relation does Christian Science bear to Hypnotism, Spiritualism, and Theosophy?

Christian Science bears absolutely no relation to any of the beliefs mentioned. Hypnotism is the action of one human mind on another, and it is possible to practise it from sinister motives. Christian Science places reliance solely on the divine Mind, and its faithful adherents can work no evil through its influence. Human will-power has no part in the healing and saving ministry of Christian Science, and its elevating effects are obtained through prayerful consecration and the operation of divine law. A hypnotist may be an infidel or an atheist, and yet successfully hypnotize; but the Christian Scientist, by the very logic of his religion, must be a Christian, a believer in God, and of pure morals in order to meet with any success. Thus it is seen at a glance that the finger of divinity rests on this Science, and the gulf between it and hypnotism can never be bridged. As to Spiritualism and Theosophy, their religious tenets are entirely different from those of Christian Science.

Does Christian Science teach belief in the Bible?

Christian Science is founded on the Bible. All churches of this denomination have the following statement, taken from "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, as their first tenet: "As adherents of Truth we take the inspired word of the Bible for our guide to eternal Life." It has often been said that Christian Scientists study their Bibles more than most people. Certainly a day seldom passes without some time being devoted to the study of the Scriptures.

Do Christian Scientists believe in the Divinity of Christ?

They most positively believe in the divinity of Christ. They look upon Jesus Christ as the perfect ideal; they strive to follow his commands, to live according to the example he set, believing him to be the "Way, the Truth, and the Life."

Do Christian Scientists pray, and what does Christian Science teach about prayer?

Christian Science teaches that it is both a duty and a vital necessity to pray. It reveals the fact that a mere repetition of words is not true prayer, and that true prayer consists in the heart's fervent desire to come nearer to God; to realize more of His presence, power, and grace, and to manifest the blessings received in our daily life. For an extended exposition of this subject the inquirer is referred to the beautiful chapter on "Prayer" in the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.

It is said that Christian Scientists antagonize theology and materia medica. *Is that true?*

The business of Christian Scientists is not to "antagonize" anything, but to lead men into living holier and more harmonious lives through the understanding of Christ's teaching. If our ways of doing this differ from those of popular theology and *materia medica*, we have only a difference of opinion as to how it shall be done, based on our experiences and understanding of the Scriptures, and no "antagonism." We accord to all men the right to solve the problems of life according to their highest understanding, and we reserve the same right for ourselves. If we sometimes seem to meet with unkind opposition from physicians and ministers, we know it is because they have no correct understanding of Christian Science, and in this case, we endeavor to cover such things with the mantle of Christ's charity, and to forgive as we would be forgiven. I rejoice to say, however, that in this day of enlightenment, many prominent physicians and ministers, realizing the great good done by Christian Science, give it their hearty support.

The writer has heard it said recently that a Christian Scientist would say to a mother with an afflicted child, "You have no child," and to a person with an afflicted hand or a sick body, "You have no hand or body." Why is this done?

It may be confidently asserted that it is *not* done by any Christian Scientist possessed of good judgment. If people who have only a smattering of the subject make such silly statements, the blame should not be laid at the door of Christian Science. To all human evidence the sick man is painfully aware of his body, and to tell him he has no body would neither benefit him, nor give him a good opinion of the speaker's sanity. If there be those who do such things they have yet to learn more of Christian Science. Instead of making such statements, the Christian Scientist would calm his fear, lead his thought away from his body to God, and so prepare him for the healing that comes in response to fervent prayer and in accordance with the Divine law.

Why do Christian Scientists attempt to heal the sick?

Because the sick are sorely in need of being healed, especially as they usually ask it after all material remedies

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

have failed them. Another reason is that it is a part of the practical teachings of the Master, and an evidence of true Christianity. He plainly declared: "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." It may be added that this statement was not for a few only, but for all "them that believe." The healing of thousands of cases of disease of all kinds, organic as well as inorganic, after they had been pronounced incurable, proves Christ's promise to be as effectual now as in the long ago. If my inquirer doubts this statement, I am ready to furnish the proof.

Can you make a positive statement about the life and character of Mrs. Eddy? What do people think of her in her own city?

It seems strange that there could be any doubt about the life and character of one who has inaugurated a great religious movement through which thousands are being blessed. "By their fruits ye shall know them." For about fifteen years I have kept in close touch with Mrs. Eddy's movements, and during that time I have repeatedly known of such acts of unselfish devotion; such love for the welfare of humanity; such Christian charity and forgiveness of wrong; such self-denial and unrequited labor for others, that I have often mused, with admiring wonder, on a life so pure and so free from earthly ambitions. I could write a volume on her philanthropy and devotion to the interests of her fellow-beings. If she is misrepresented, she only shares the fate of all the truly great and noble characters of history.

The question as to what the people in her own city think of her, can best be answered by referring to an utterance at the recent state fair held at Concord, N. H., the home of Mrs. Eddy. On "Governor's Day" at the fair, Mrs. Eddy was present as a guest of the authorities of the fair. On that day there were about fifteen thousand people present, and Hon. Chester B. Jordan, Governor of New Hampshire, made a brief speech, at the close of which he made the following kindly reference to Mrs. Eddy: "The noble, good woman who has done so much to beautify these grounds and buildings, and who is to be with us to-day, has given another evidence of her generosity in giving to the children of your city over two hundred pairs of shoes. . . . The Science which has such a large measure of Christianity attached to it is to be desired by all."

A visitor to Concord soon learns that Mrs. Eddy has the respect and love of its citizens, who never fail to show their sincere regard for her whenever an opportunity occurs.

Do Christian Scientists worship Mrs. Eddy, or claim that she is a second Christ? It has been so affirmed.

Whoever affirms that Mrs. Eddy is likened to Christ, or worshiped by Christian Scientists, either does so with an intent to prejudice the public, or through an ignorance of the subject so dense as to render him unqualified to discuss it. I know of nothing more displeasing or shocking to Mrs. Eddy than to be spoken of as a second Christ. She has never said or done anything to call forth such statements, and no authority for them is to be found anywhere in her writings. Christian Scientists are possessed of a keen sense of gratitude, and they love Mrs. Eddy for all she has done for the good of humanity. For more than a quarter of a century she has toiled ceaselessly for others, overcoming obstacles and meeting persecution with sublime courage and faith. And now we love to call this noble woman, whose brown locks have turned to snow, and upon whose sweet and tranquil face peace rests like a benediction, by the endearing term of "Mother." In thus expressing our affection and gratitude, we but render "honor to whom honor is due."

ROBERT L. ZILLER.

In *The Statesman*, Austin, Tex.

A Reply.

Editor Herald:—In a recent issue of the *Sheboygan Herald*, Rev. Chynoweth announced that he would preach a sermon on the subject of evil spirits, and their manifestations as seen in different beliefs, among which he names Christian Science.

This attracted our attention and we determined to go and hear how he could make it appear from a Scriptural basis, that the good resulting from Christian Science was due to evil spirits. This, of course, he failed to do. All he accomplished was to show his total ignorance of Christian Science, and that he was simply battling with his own misconception of Christian Science.

Mr. Chynoweth made some statements regarding Christian Science which were so entirely void of truth that we deem it but just to the cause which is benefiting thousands of hopeless and despairing people to make a few corrections through the press, which should always be a fair-minded avenue of enlightenment.

Mr. Chynoweth said that Mrs. Eddy took sin out of the world, while he sees so much of sin. So do we, and so does Mrs. Eddy. Otherwise there would be no need of Christian Science to help humanity to overcome sin and its results,—sickness and misery.

God did not create sin nor sinner, for He pronounced His creation good. Therefore in the Science of Christianity, we see that evil is not a reality though seeming real to our mortal senses; but through gaining a divine sense we are enabled to overcome much of sin and suffering.

Mr. Chynoweth stated that Mary Baker G. Eddy denied the efficacy of the atonement and the mission of Jesus Christ as the Saviour and Way-shower. We hope that misinformation actuated him in saying this, and that it was not a malicious perversion of facts, for nothing could be farther from the truth. For the sake of those who earnestly seek the Truth and have been misinformed we publish the tenets of the Christian Science Church, which will prove to any unprejudiced thinker that we do most emphatically acknowledge and worship Jesus the Christ as the redeemer and pattern of all mankind.

1. As adherents of Truth we take the inspired Word of the Bible for our guide to eternal Life.

2. We acknowledge and adore one Supreme Infinite God. We acknowledge one Christ namely the Holy Ghost or divine Comforter—and the son Christ Jesus—man in the divine image and likeness.

3. God's forgiveness of sin in the destruction of sin, and the understanding that sin and sickness are neither real nor eternal.

4. And atonement as the efficacy and evidence of divine Love, of man's unity with God, and the great merits of Jesus the Way-shower.

5. Universal salvation as demonstrated by the Galilean prophet, in the power of Truth over all error, sin, sickness and death; and the resurrection of human faith and understanding wherewith to seize the great possibilities and living energies of divine life.

6. We solemnly promise to strive, watch and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just and *pure*. (Science and Health, p. 493).

There would to-day be no such thing known as Christian Science, if the Galilean prophet had not explained, taught, and demonstrated it. He commanded us to emulate his example when he said, according to St. John, "The works that I do shall ye do also."

The essence of his doctrine, the Science of Christianity which healed the sick and sinful in his days, was lost sight of through pride, selfishness, and egotism; *i.e.*, self-righteousness and greed in the leaders, preachers, or teachers, who should have manifested the Christ Mind which was actuating Jesus in all his works. Now in our day, thank

Digitized by Google

God, this temporarily lost element of Christianity; *i.e.*, the healing power, is again healing the sick, proving the ever-presence of the "help in time of need."

When the study and instruction of Christian Science leads men into more peaceful waters of thought, making people better morally, spiritually, and physically, why, in God's name, do men persist in stoning it? Is it possible that they are wilfully and selfishly blind to the good it is doing to humanity? Why will they not read the text-book of Christian Science, "Science and Health with Key to the Scriptures," so that they can speak intelligently upon the subject and not put forth such gross misrepresentations.

It has been said that the men and women of sterling worth and mental ability of Sheboygan do not frequent the churches. Well, no wonder, when a preacher and teacher will stand in the pulpit and reiterate over and over again, "I do not know about this" and "I do not know about that." It certainly does not inspire confidence in his hearers. Why does he not simply read the Scriptures without explaining them if he does not understand.

Mr. Chynoweth acknowledges the possibility and practical value of healing by suggestion through the agency of the human mind or will power, and says it is extensively used by nearly all modern physicians in company with bread pills, with very good results. Is it not strange that he cannot see how much more good can be done through the understanding of the Truth which "shall make you free"?

"Ever learning, and never able to come to the knowledge of the truth." "Having a form of godliness, but denying the power thereof."

The Rev. Chynoweth said that an evil spirit entered the great and wonderful truth of Christian Science for which Mrs. Eddy might have been canonized, and told Mrs. Eddy that God was not a person but a great, indefinite, indefinable, illimitable lot of Spirit and Goodness which no one could love. Just think of it! Such thoughts coming from the pulpit. One who heard him, queried thus: Cannot the Rev. Chynoweth conceive of loving God without personal limitations? "God is Love." According to St. John, "God is a spirit: and they that worship him must worship him in spirit and in truth." The carnal, personal, limited love is not acceptable to God who fills all space, "in whom we live, and move, and have our being," who is omnipresent, omnipotent, and omniscient.

We must, through the Way-shower, Jesus Christ, and his Science of Christianity, learn the perfect love which casteth out fear, and thus we work out our own salvation through study,—mental and spiritual development,—but this vital energy is the very thing which is being stifled and dwarfed in the pulpit through the doubt that is preached, through the helplessness and general debility of such teaching.

History tells us that all great reformers began in the most obscure and modest way, because popular institutions dared not countenance and espouse advanced ideas for fear of the Pharisees or conservatives.

People of to-day are persecuting that which will bless them in time to come. When will they wake up and see what they are doing in the way of self-oppression?

Every lisp of the tongue, every scratch of the pen which serves to free mankind from the present-day thraldom and white slavery through educating and edifying the masses, teaching them that through enlightenment and mental development only comes our salvation from servitude to the Pharaohs and task-masters of to-day, all that tends along this line should be viewed in the light of blessing from Almighty God: "The true Light, which lighteth every man that cometh into the world."

Let no one fear to be seen investigating the Science of Christianity—the Truth that makes free—at the Christian Science Church, for only thus can one judge righteous judgment. MRS. KATE BANGS.

In the *Sheboygan Herald*, May 25, 1901.

Belief Gives Power.

"WHAT have a Man's Beliefs to do with his Salvation?" was the theme discussed yesterday by Rev. W. Hanson Pulsford at the Church of the Messiah, Twenty-third Street and Michigan Avenue. He said in part:—

The old idea that a man's eternal destiny for weal or unutterable woe depended on his acceptance of certain theological tenets is rapidly passing out of sight.

Salvation is coming to have a new and finer meaning. It rightly stands for a present condition; for vigorous, healthful life in the highest sense. The measure of a man's salvation is the measure in which he is realizing the finest range and capacity of his nature at the highest. Now, in this sense, his beliefs are indeed the essential condition of salvation.

Only here again we must remember that a man's beliefs are not that set of theological tenets under which he is supposed to rank himself. These are in most cases hardly part of his real life at all. They are worn as some well-used garment, of which he is hardly conscious. He accepts them just as he accepts the social conditions under which he is born, and, while sometimes resenting any attempt to disturb them, is rather disposed to admit that, on the whole, there are good people under all creeds, and that belief is not so essential a matter as it used to be thought.

If he holds a theory (according to his creed) that those who do not think as he does shall "without doubt perish everlastingly," it does not make him uneasy as to the fate of his friends. But, whether a man believes in a deeper sense, whether he has or has not definite strong convictions of his own, is an essential matter. It determines whether he is simply a drifting straw with the current or enjoys the delight of self-determined life. Indeed, the measure in which there are in any community men who have come to act under the mastery of reasoned conviction is not only the measure of salvation for the men themselves, but for the community.

Such convictions, based on the growing knowledge of the world in which we live, grow daily more possible. They are not obsolete theological abstractions like those of the creeds which we have handed down to us from mediævalism, but the truths in accord with experience through which alone our universe is intelligible.

Suppose a man has ceased to allow God to be to him a mere far-off abstraction framed on the lines of the God of the old Hebrew Scriptures, and has come to feel that the universe is simply thrilling with life rising ever to fuller and fuller expression about and within him. Suppose that it has become a conviction which every further advance of knowledge strengthens that the infinite power of the universe is the power behind his life, and that in so far as he meets his opportunities aright it will expand in him as fuller personal power. Does not a conviction like that give new tone and unity to that unfolding character which is salvation?

What if, again, instead of feeling that this universe is a puzzle, moving, now forward, now backward, by a sort of chance which no one can understand, he wins the reasoned conviction that it is one unceasing order of constant progress. Will not that conviction, in the measure in which it is his own, fill him with the power of a new attitude, make effectively for his salvation, for the measure of satisfaction he has in having made much of life?

It is the same with what we may call another article of the modern creed, the certainty that, after all, the value of life lies in inward qualities. That its joy or sorrow, its delight or its bitterness, depend not so much on its circumstances as on its inward strength. What a power in the struggle with fate this becomes!

To create convictions, to create them on the basis of fact and of experience, is to make for the salvation which is to create heaven here on earth.

Christian Science.

Owing to pressure on our space we are unable to publish several interesting letters on this subject, but wish to call attention to B.A.'s challenge.

Sir:—Christianity I know, and I understand the rudiments of science, but I confess that I am staggered by the union of two words which are so diametrically opposed in their meaning. The term Christian Science is contradictory in itself and an insult to one's understanding. I take it that the new religion is nothing but the old Faith-healing which has always had ready disciples among the lower classes, who love the miraculous and live on sensations. But what has this to do with science? What is there in this American-made Christianity to appeal to the cultured or, indeed, to any ordinarily educated man? Who are the followers of Christian Science? A handful of unknown men who have failed to make their way in life, and women of weak intellect and weaker nerves. I have never attended a meeting in the Upper Berkeley Street rooms, but feel confident that if I went I should recognize no well-known woman, and certainly no single public man. Yours truly,

Reform Club. B. A.

To the Editor of *The Onlooker.*

"B. A.," having sown the wind with his challenge last week, reaps the whirlwind this.

Dear Onlooker:—Truly the shifts to which the opponents of Christian Science resort are indeed remarkable. The letter by "B. A." in your issue of November 2, is well worth analyzing. He begins by saying "Christianity I know." Does he? I suppose he means his own interpretation of it. He then says, "the term Christian Science is contradictory in itself." Is it? It possibly appears so to him—why? Simply because man in his ignorance has placed his own entirely arbitrary meaning upon the word *science.* The greatest discovery of modern science was undoubtedly that of the law of gravitation. Newton discovered the law, but who was the author of it? God, who is the author and originator of all science; so that union of Science and Christianity, both of which have Divine origin, is not so incompatible as "B. A." seems to suppose.

Again asks "B. A." "Who are the followers of Christian Science? A handful of unknown men, who have failed to make their way in life, and women of weak intellect and weaker nerves." Indeed! could St. Paul be classed in this company, or the learned fathers of the early Christian Church, who, for at least three hundred years after the establishment of Christianity, both in their writings and lives, enjoined and practised this very same form of spiritual cure advocated by Christian Scientists to-day; or to come down to modern times I have only to mention such names as Mrs. Butler of Trinity College, Cambridge, Lord Dunmore, and a host of others. Are they, forsooth, unknown and of weak intellect? If America can teach us much in material matters, why cannot she teach us something also in intellectual and spiritual matters?

Christian Scientists simply affirm that all truth comes from God, and that these truths, or spiritual laws, were fully manifested to man through the Christ, who revealed to us these infallible laws through which all evil, including sin and sickness, can be destroyed *here* and *now,* and are equally applicable to all time. "B. A.'s" letter, however, would indicate that he is not unlike those self-appointed judges who always criticise without investigation, stating that they have never given themselves the trouble to attend a meeting, and have probably never opened (or if so only superficially) any book on the subject which, had they only taken the trouble so to do, would have afforded them a full answer to the very objections they themselves raise.

Yours, etc., EDW. W. LAMBERT, F.R.G.S.

Sports Club, S.W., October 3, 1901.

The Bible in Literature.

FOLLOWING is an extract from a sermon on "The Bible in Literature," by Rev. Camden M. Coburn, pastor of the St. James Methodist Episcopal Church of Chicago:—

The Bible is not only a book, but, as modern research has emphasized, it is a library of many books—sixty-six or more. It is a national literature, the production of many authors widely divergent from each other, not only in point of time but in culture, knowledge, taste, and literary style. Some of these chapters contain history and allegory so ancient that no other record in the world made mention of it until, in our times, the inscriptions on the banks of the Nile and the Euphrates have placed by its side contemporaneous corroborations of its truthfulness, while other chapters contain notices or biographies of men who are mentioned again and again in the Greek and Roman classics, and were written of by contemporaries of Virgil and Horace and Tacitus.

Each one of these Bible authors has marked peculiarities of style, favorite words and phrases and figures of speech. The Bible does not show the literary style of Jehovah, but of Isaiah, Ezekiel, and the Psalmists; of Luke and John and Paul, and each one of these writes in a style that is all his own.

Making Sugar from Beets.

IT is conceded that if America could produce all her sugar, it would be her greatest step toward complete commercial independence of the rest of the world. To raise the amount required for American consumption in our own country from sugarcane is acknowledged to be out of the question. To supply the deficiency from beets is the remedy. Few industries have shown greater progress in a decade than the beet-sugar industry. Ten years ago there were but three factories in the United States. To-day there are thirty-six.

To produce the 2,220,000 tons of sugar consumed annually in the United States would require about four hundred factories. A beet-sugar factory is the scene of many novel activities. The beets are brought into the sheds, the floors of which slope toward the centre. From these sheds, which usually have a capacity of five thousand tons, the beets drop into conduits, through which they pass to the factory proper and enter the washer.

After a thorough washing they are placed on an elevator and carried to the top of the building, where they are weighed and thrown into cutting machines. When the beets leave these machines they are in long, narrow strips. The diffusion battery next separates the juice from the pulp. After various processes the resulting sugar, as white as snow in appearance, goes to the evaporators, where it is dried by a current of hot air. It is then ready for the market. A beet arriving at the factory one morning will be transformed into sugar ready for the table by the following morning.

The area planted in sugar-beets in the United States last year was 136,305 acres, producing 794,658 tons of beets, for which the growers received an average of $4.39 per ton. The acreage this year is said to be nearly double that of last.

In Ohio, one of the newer states to take up the industry, the number of acres planted in beets was 2,200, and the total yield was 21,500 tons. The new and only factory in Ohio is located at Fremont. Other states producing sugar-beets are Colorado, Nebraska, California, Michigan, Indiana, New York, Washington, and Oregon.

Sugar-beet pulp, which is the principal by-product of beet-sugar, sells for fifty cents or less per ton. It is used for feed for cattle and sheep. Another by-product, the beet-tops, form a good fertilizer. They are also fed to stock.

Misstatements.

To the Editor of *The State Journal.*

In your issue of September 15 you copied misstatements of Christian Science.

Referring to the closing of her college in the height of its prosperity, with three hundred people clamoring for admission, he insinuates that Mrs. Eddy was obliged to do this because the Massachusetts authorities would not allow her to give diplomas. It was not for the purpose of obtaining diplomas that people attended Mrs. Eddy's classes, but for the purpose of being taught Christian Science, and her students would have paid the price of tuition as readily without a diploma as with one. It was not in any sense necessary that she should give diplomas in order to obtain fees.

That Mrs. Eddy has avoided Massachusetts except on Sundays is a falsehood which has been time and again refuted in the press. Only two years ago last June Mrs. Eddy was in Boston on a week day, and appeared before a public audience where she addressed three thousand people. That she has protected her publications by a copyright and thus guarded her cause by preventing the unwise use, as well as the adulteration, of her ideas, is worthy of commendation rather than criticism. This flippant critic severs from its context the statement, "Christian Science demonstrates that the patient who pays whatever he is able to pay for being healed is more apt to recover than he who withholds a slight equivalent for health," and seeks to represent this as an advocate of the influx of money into the pockets of Christian Scientists.

It is well known to Mrs. Eddy's followers that she has accepted many into her classes who had nothing to pay, while she has rejected from the same classes many who had the full price of tuition, because she did not consider them prepared for her teaching. It is also true that she gave the early part of her experience to gratuitous work in healing. She healed all manner of diseases, refusing recompense except in one case where justice demanded it to be otherwise. She gives two thirds of her time to her church, for which she refuses compensation. Indeed, she is the only officer in that church who receives no salary. She declined to receive a salary from her church when it was poor, and so made this proposition, to take one half of the money contributed at the close of her services. Now, in the light of common sense, what does all this indicate? Even this: that she has always labored for the good and justice of humanity and for the sole purpose of upbuilding the cause of Christ, and that there is no mercenary element in her nature. It is well known to others as well as to Christian Scientists that one cannot obtain something for nothing without demoralization. He whose word is law throughout Christendom declared: "The laborer is worthy of his hire." This rule is in accord with common sense, and not only appeals to Christian Scientists, but to all others of experience. I have never known any one to be turned away from Christian Science who was prepared to receive it, no matter how poor he may have been, and every Christian Scientist on earth has a free dispensary of his own, though he tries not to be imposed upon by the indolent and undeserving who prey upon their more thrifty neighbors under the guise of poverty.

The dirty insinuations of this man in respect to the teachings of Christian Science on the subject of marriage deserve public contempt. Mrs. Eddy teaches only that which she publishes in her books. Her instructions lead to legal public marriages. She leaves students to the consummation of their own views on this subject. In Science and Health her chapter on "Marriage" is universally admired for its chastity, its sound ethics, and practical value. It makes public this entire question. She gives her students no private instructions that conflict with her public teachings on this or any other subject. The libelous matter afloat, hinting at something nobody understands who is a Christian Scientist, but publicly declared by the viler sort, probably means something, but we do not know what that something is. Mrs. Eddy practises even better than she teaches, a fact which can be said of very few people.

While Christian Science shows that evil is not an entity in reality or in the sight of omnipotent God, Good, it also explains that a knowledge of this Science includes a due searching of the opposing errors in which we find ourselves entangled, and these errors, whatever may be their name or nature, must be overcome and destroyed in order that we be rid of them and their just reward. A student of Christian Science who is consistent therewith must cease from sin, or he ceases to understand this Science and cannot demonstrate it. ALFRED FARLOW.

In *The Nebraska State Journal.*

Notices.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address . . .	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Christmas Gifts.

BY MARY BAKER G. EDDY.

Beloved Students:—For your manifold Christmas memorials, too numerous to name, I group you in one benison and send you my Christmas gift, two words enwrapped,—*love* and *thanks*.

To-day Christian Scientists have their record in the monarch's palace, the Alpine hamlet, the Christian traveler's resting-place. Wherever the child looks up in prayer, or the book of life is loved, the sinner reformed and the sick healed—those are the signs following. What is it that lifts a system of religion to deserved fame? Nothing worthy its name save one lowly offering—love.

This period, so fraught with opposites, seems lit for woman's hope with Divine light. It bids her bind the tenderest tendril of the heart to all of holiest worth. To the woman at the sepulchre, bowed in strong affection's anguish, one word, "Mary!"—broke the gloom with Christ's all-conquering love. Then came her resurrection and task of glory, to know and to do God's will,—in the words of St. Paul: "Looking unto Jesus the author and finisher of our faith: who for the joy that was set before him endured the cross, despising the shame, and is set down at the right hand of the throne of God."

The memory of the Bethlehem babe bears to mortals gifts greater than those to Magian kings; hopes that cannot deceive, that waken prophecy, gleams of glory, coronals of meekness, diadems of love. Nor should they repine, who drink their Master's cup, over blossoms that mock their hope and friends that forsake. Divinely beautiful are the Christmas memories of him, who sounded all depths of love, grief, death, and humanity.

To the dear children let me say: Your Christmas gifts are hallowed by our Lord's blessing; a transmitted charm rests on them. May this consciousness of God's dear love for you, give you the might of love, and may you move onward and upward, lowly in its majesty.

To the children who sent me that beautiful statuette in alabaster—a child with finger on her lip reading a book—I write: Fancy yourselves with me, take a peep into my studio, look again at your gift, and you will see the sweetest sculptured face and form conceivable—mounted on its pedestal between my bow windows—and on either side lace and flowers. I have named it, my *white student*.

From the First Church of Christ, Scientist, in London, Great Britain, I received the following cabled message:—

December 24, 1901.

Rev. Mrs. Eddy, Pleasant View, Concord, N. H.

Loving, grateful Christmas greetings from members, London, England, Church. MILLER.

To this church across the sea I return my heart's wireless love. All our dear churches' Christmas telegrams to me are refreshing, and most pleasing Christmas presents; for they require less attention than packages and give me more time to think and work for others. I hope that in 1902 they will remember me only thus. *Dinna* forget that an honest wise zeal, a lowly triumphant trust, a true heart, and a helping hand, constitute man, and nothing less is man, or woman.

The New Year.

WE have entered upon the second year of the Twentieth Century. We now write 1902, A.D. A marvelous year has closed; a marvelous year, no doubt, has opened. Many great events have occurred since the dawn of this century. Many happy events, many sad ones. One of the sad ones was the death of England's great and good Queen Victoria. Another was the unfortunate taking off of America's great and good President McKinley.

Unfortunate wars have also marred the history of the first year of this century. England and South Africa are yet engaged in an unhappy conflict. The United States has not yet compassed peace in the Philippines. Wars and rumors of wars yet exist. Fortunately, however, the world's best sentiment is rapidly growing in the direction of peace. Arbitration, rather than conflict of arms, is the incoming order for the settlement of international disputes. War is discouraged by the best statesmanship as by the best philosophical and religious sentiment. Its whilom pomp and circumstance no longer dazzles or inspires. Those who uphold it as of divine institution are growing less and less in numbers. It is hoped by myriads and prophesied by many that this century will witness the end of wars, the end of bloody strife and selfish contention between nations.

Christian Scientists dare to hope for the bringing about of this desired consummation in much less time than a century. They read in the signs of the times many encouraging things. The rainbow of promise brightly spans the heavens of their hope. The star of Bethlehem is to them, not a declining but an ascending star, leading on and on toward the final consummation of "the glory to God in the highest, and on earth peace, good will toward men," which, by angelic song, ushered in the Christian era.

Aye, the outlook is hopeful. The world is moving on toward the glad day by "prophets long foretold," when there shall truly be "one shepherd and one fold."

Let Christian Scientists, during this year, hold high their banners, and through watchfulness untiring and prayer unceasing, do a glorious part toward bringing in the reign of universal peace. May they set a bright and shining example, by themselves exemplifying peace, unity, harmony, and true Christian fellowship in every department of their labors.

Beautiful and Christlike measures in the direction of church unity have recently been adopted, which received a warm benediction from our watchful and prayerful Mother in Israel. Let this good work continue throughout the new year, thus glorifying God, making glad our Leader's heart, hastening the upbuilding of our Cause, and blessing those who lend themselves to this Christly labor.

This new year has rich treasures for us in Truth's great storehouse if we but reach for them in God's own way. Let us so live as to receive, in abundant measure, of God's infinite bounty.

"Deal bountifully with thy servant, that I may live, and keep Thy word. Open Thou mine eyes, that I may behold wondrous things out of thy law" (Psalm 119).

Christmas Reflections.

THE first Christmas of the Twentieth Century was notable for its general observance throughout Christendom. Both religiously and secularly, all classes of people seem to have entered into a spirit of good fellowship which, in some measure at least, responded to that spirit announced by the angelic host who attended the birth of the Saviour at Bethlehem: "On earth peace, good will toward men."

One of the notable features of this Christmas was the gift by one of New York's wealthy men, of five thousand dollars in cash to each of his ten clerks. Many other em-

Digitized by Google

ployers made generous gifts to their employees. Some manufacturing establishments shared dividends with their laborers. Some mercantile houses divided with their clerks and other employees, the profits of their business for the week before Christmas.

Thus, what seems to be almost a new era of good-fellowship, and of nearer and better relations between capital and labor, or between employer and employee, has set in.

In this we foresee, thus early in the new century, the augury of more harmonious industrial and economic conditions, with an increasing hope of the coming in of the long-wished-for and long-prayed-for brotherhood of man.

Among Christian Scientists the general verdict is that Christmas Day was a time of quiet realization of Truth's nearness and immanence, a sweet sense of God's all-present care and protection, and a deep and settled conviction of the birth of the Christ in the individual consciousness; the new birth which leads on from belief to knowledge, from faith to understanding, from sense to Soul, from sickness to health, from death to Life.

Many were the exchanges of good cheer, of loving greetings and sweet remembrances. It is believed that these exchanges and tokens were freighted with a greater weight of love and fellowship than ever before. Thus may each succeeding year bring a higher and yet higher sense of brotherly love and Christly fellowship.

Tender expressions of love for, and gratitude to, their beloved Leader and Teacher have been heard from the lips of all, and thankful hearts are going out to God that one so pure and good has been vouchsafed this age by an ever-watchful and all-loving Father. In many thousands of homes throughout the world have grateful hearts gone out in blessing to the Rev. Mary Baker Eddy for spiritual benefits as well as physical healing received as the result of her great missionary and reformatory work. In many homes now reign peace and harmony where before were discord and sorrow. In many is health where before was sickness. In many is happiness where before was misery. In many where division and separation seemed inevitable, there is now permanent and happy union.

The Christ-child has been born into myriad hearts through the ministrations of Mrs. Eddy and those who are co-laboring in the great field of Truth, and these children of the new birth are sending forth their songs of joy over land and sea.

May the Christ-child in each heart grow and wax strong in spirit, filled with wisdom and the grace of God, until the full stature of manhood in Christ Jesus shall be attained.

The editors herewith desire to make their sincere acknowledgments of the many sweet and loving expressions of gratitude and friendship which have come to them. They assure all of their profound sense of reciprocal love and gratitude.

A Canard.

A STORY has gone the rounds of the newspapers to the effect that Mrs. Helen Wilmans Post of Jacksonville, Fla., who has recently been indicted by a grand jury of the United States Court for fraudulent use of the mails, has appealed to the Rev. Mary Baker G. Eddy for aid in fighting her case.

It seems needless to say that this is a canard. If such an appeal had been made it would have received no notice, for Mrs. Helen Wilmans Post is not a Christian Scientist and does not pretend to be. In public she has disclaimed it, and also through the press, notably in an interview published in the *New York Evening Post* of December 5, 1901. She never had any affiliation with Mrs. Eddy or the Christian Science Church or movement. There would, therefore, be no reason why Mrs. Post should appeal to Mrs. Eddy for aid, or why Mrs. Eddy should notice such an appeal. We may say, furthermore, that Mrs. Eddy and her adherents have no affiliation or sympathy with Mrs. Post's system, nor do they endorse, for a moment, her methods.

Church Items.

THE following items relating to the number of branch churches are published for the information of the Field. The total number of branch churches for the year ending December 31, 1900, was 443. The total number for the year ending December 31, 1901, was 496, giving an increase of 53 branch churches.

The total number of societies (not yet organized as churches) for the year ending December 31, 1900, was 139. The total number for the year ending December 31, 1901, was 167, giving an increase of 28 societies. The grand total of branch churches and societies at the close of 1901 was 663.

The Lectures.

At New York.

A large audience filled the edifice of First Church of Christ, Scientist, at 143 West 48th Street, on December 10, to hear a lecture on "Christian Science, Physician and Redeemer," by Hon. William G. Ewing of Chicago, member of the Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass.

We regret that the report of this interesting occasion failed to reach us in time for our last number.

Judge Ewing was introduced by Mr. W. D. McCrackan, who spoke as follows:—

Friends:—No well-informed person, watching the signs of the times, can any longer afford to disregard the wonderful and beneficent results of Christian Science. It has sent many men and women who were once embittered or indifferent, searching for God,—and many have found Him. They have found Him to be a Father-Mother God, whom they can understand, and in whom they know they live, and move, and have their being. Instead of a man-made god with human attributes, inspiring fear, they have found Him a God who is Love. They have also learned somewhat of the nature of man and the universe, and of evil as negation and nothingness. Christian Science is uniting men and women of various occupations and different education in one vast Brotherhood. It is reconciling nations and nationalities, and purifying their ambitions and desires. It is uniting Jew and Gentile through a new comprehension of their mutual love for the great Hebrew patriarchs and prophets, and for the greatest Hebrew of all, Jesus of Nazareth. Christian Science is solving the temperance question for multitudes, and is daily destroying the seeming power of drink. It is teaching moderation in eating and drinking, without adding any thought of sour-faced Puritanism, of self-righteousness, or of meddlesomeness, to this demonstration of the power of God. It is placing the problem of charity on a common-sense, Biblical basis, by teaching men to give, in order that they may receive, and thus be freed from the necessity of receiving alms. Christian Science is at work in the prisons, preparing those who are there to be truly free when their terms expire.

The fact that the Discoverer and Founder of Christian Science is a woman, and that women are placed on a footing of entire equality with men, within the Christian Science denomination, where they can fully develop their special spiritual gifts, tends to solve the so-called woman question without propaganda, pronunciamento, or platform.

Finally, Christian Science is calling to the rest of Christendom to obey all of Christ's commands including the one to "heal the sick." This call has arrested the attention of

Digitized by Google

the whole world. We are witnessing a revival of Christian healing,—and it is this special aspect of Christian Science to which the lecturer of the evening will call your attention. It gives me the sincerest pleasure to introduce to you the Hon. William G. Ewing.

The *Evening Telegram*, New York, published the full text of Judge Ewing's lecture.

At Atlanta, Ga.

Sunday afternoon (December 15, 1901) at three o'clock, at the Grand Opera House, Captain John F. Linscott of Washington, D. C., delivered a lecture on Christian Science. Notwithstanding the unusual cold weather, there was a splendid audience giving the speaker the best attention.

Captain Linscott was introduced by Mrs. Livingston Mims, who said:—

The theoretical mind is ever the same. Nineteen hundred years ago the Greeks for centuries had been speculating on the Logos-Reason, or Word of God as the active Principle of Being. The great Alexandrian schools of philosophy, science, metaphysics, and theology were rife with sublime theories and magnificent hypotheses. Socrates had declared the immortality of the spiritual, with a quiet scorn of the temporal and material. Plato reveled in Utopian dreams, Stoics nobly wrestled with the flesh, the Pharisees and Sadducees disputed on doctrines and creeds. In the midst of this tumultuous, heaving thought there appeared a simple, sublime figure, Jesus of Galilee, speaking as never man spoke, authoritatively, from the calm of deep, spiritual wisdom. He said simply, "The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils." He walked humbly with the multitude, proving the Truth of what he said, healing the sick, raising the dead, uplifting and spiritualizing humanity, teaching the power and demonstration of ever-present Love. It was as if he said, God is not a remote abstraction, a far-away ruler, and mighty king, but the divine Source of all good; an invisible but real divine substance or Mind, in which we live, and move, and have our being; an omnipresent and omnipotent force, Intelligence, Love, Principle, that heals and blesses, feeds, clothes, sustains, and redeems man from the burdens of materialistic law by the ever-operative spiritual law of Life and Truth here and now. He said that even the lilies and birds teach you of the ineffable tenderness and care of this heavenly Father-Mother God; the All-in-all of Spirit—this Immanuel, God, Good with us here and now. This sense of God forever casts out evil and heals the sick, raises the dead.

It is this sublime, practical Christianity of Christ Jesus that Christian Science is reiterating and trying to re-establish as the religion of the future. Materialism seemed to obscure for a while its whole splendor, but the Christ Idea in human history has brought the hour of which Jesus spoke when he said, "The Kingdom of heaven is like unto leaven, which a woman took, and hid in three measures of meal, till the whole was leavened." This leaven is now, in Christian Science, through the work of that consecrated woman, Mary Baker G. Eddy, transfiguring all human thoughts, and changing the false conceptions of the universe, and man. Christianity is seen to be a Science of Life and health, and Jesus its scientific demonstrator, annulling and transcending all material law by the actual spiritual law, which St. Paul declared hath made us free from the law of sin and death. It is seen transfiguring material medicine from its grosser superstitions to finer essences, as Christian Science reveals that the divine Mind, the Mind that was in Christ Jesus, is the only medicine and the only Physician. The same silent force that enables a lily bulb to rend a rock in its travail of expression, is breaking the proscriptive fetters of theology, and it is flowering out into a larger sense of the one Spirit and one body of which all are members. The altruistic spirit of Love is abroad, God is seen to tabernacle with men, and His kingdom to come on earth as in heaven, and the new heavens and the new earth wherein dwelleth righteousness, begin to dawn.

In this white light of Truth, Science is seen to be not the evolution of material law, but the revelation of the spiritual law, bringing to light (to our understanding) the life and immortality that always was the spiritual fact of Being, where, in Divine logic, man and the universe must be perfect, even as the Father is perfect, and because the Father, as eternal Cause, is perfect, perpetuating his own perfect effects. This Divine logic is the leaven of Truth through the woman; and her book, "Science and Health with Key to the Scriptures," unlocks for us this golden treasury of Life, and is inaugurating the greatest spiritual movement of the age.

I take pleasure in introducing to you the lecturer of the evening, a member of the Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass. He had the privilege of being a close friend and co-worker with that great and good woman, Frances Willard, for ten years in the temperance work as a lecturer. He is now consecrating his splendid talents and energies to advancing this great spiritual movement.

I present to you Captain John F. Linscott of Washington, D. C.—*The Constitution.*

Among the Churches.

Growth of the Church in Fort Worth, Tex.

I would like to write to the *Sentinel* in regard to the growth of our church, thinking it may help some other small, struggling church. It fills my heart with gratitude when I think of the progress and growth we have made.

A little over one year ago we were meeting in a hall down in the city. We were not satisfied with the surroundings and finally decided to move into a storeroom down-stairs, where it would be more convenient for strangers to attend. We did not have the large attendance we anticipated. We had just settled, when the building was sold, and we were compelled to move into a very unattractive and untidy hall, so much so that we did not like to take our visiting friends there.

After talking the matter over, we came to the conclusion that this would be an opportune time to build a church. Surely we were being driven by Love to find a place we could call home. To mortal sense for eighteen people to build a church seemed a foolish thing to do; but in constantly realizing that God was our supply, we had no fear of consequences, and in a very short time we were worshiping in our own church.

"Yea, the Almighty shall be thy defence, and thou shalt have plenty of silver."

The lot had already been supplied, and as I was treasurer, I had an opportunity of knowing how the silver poured into the treasury. It came from many unknown sources, and surely the above Scripture was fulfilled.

Our church is located in the resident portion of the city, and many thought it very unwise to build where we did. They said, "People will not go so far." We never have had so many strangers attend our services and visit our reading room as we have in the past year. Neither have we ever sold as much literature as since building our church.

The membership has increased from eighteen to seventy-five. The Sunday School is in a flourishing condition, having ninety members. We have had the pleasure of calling six of the lecturers, and to these able men and women credit is due for disabusing the minds of the public

Digitized by Google

of a great deal of prejudice and being the means of bringing many to the Truth and to our church.

CLAUD MCCABE.

Annual Meeting at Berlin, Ont.

The sixth annual meeting of First Church of Christ, Scientist, was held at their church on Water Street on Tuesday evening (November 26). The attendance was large and the services, outside of the various reports, impressive.

A simple digest of the fundamental principles upon which this church is based was given in connection with a hearty welcome to all present. The yearly reports show steady and satisfactory progress of the Berlin branch of this denomination, which is growing rapidly in the United States and Canada, also extending to many foreign countries. A conservative estimate of their following is placed at upwards of a million. There are now six hundred church organizations in various parts of the world, and many of their church buildings are costly and beautiful. The movement is reported to be steadily gaining adherents in England, where members of the nobility are engaged in the healing and teaching of Christian Science. The Earl and Countess of Dunmore and two of their daughters are devoted to this Cause.

Progress is also reported in Germany and other foreign countries.

According to the reports given by the officers of the Berlin church, at their annual meeting, it was organized seven years ago with twelve members. Their present handsome edifice in Berlin cost over nine thousand dollars, with a seating capacity of five hundred, a fair indication of their growth and prosperity. The æsthetical wants of the congregation have been amply provided for by the constant introduction into the church edifice of flowers of the rarest varieties.

The audience at this annual meeting were delighted by the vocal selections rendered by a quartette composed of Miss Ziegler and Miss B. Bean, Messrs. J. B. Weber and D. B. Musselman. No department of this church appears to be neglected, and especial attention is paid to the social requirements of its adherents.—*The Daily Telegraph.*

Reading Room at Lansing, Mich.

A reading room, under the auspices of First Church of Christ, Scientist, has been opened in the Hollister Building, Room 310, and is open daily (Sundays excepted) from 2 to 5 P.M. A cordial invitation is extended to the public, and all who are interested in Christian Science literature. All the works of Mary Baker G. Eddy, the Discoverer and Founder of Christian Science, are on sale and for perusal; also *The Christian Science Journal* and *Sentinel,* published at 95 Falmouth Street, Boston, Mass., the only Christian Science Publishing House in the world.

During the last three or four years some three hundred and sixty reading rooms have been established in this country and Europe. The room in the Hollister Building has been comfortably and attractively furnished. A pretty rug covers the floor. There are also a large library table, bookcase, writing-desk, easy-chairs, etc. The walls are tinted a pale buff, against which are hung appropriate pictures. An attendant is always in charge to receive visitors and to give any information required.—*The State Republican.*

Reading Room at Columbia, Mo.

The Christian Science reading room has been opened and is located in Room 10, Haden Building. The room is tastefully arranged and is a home-like place to spend a leisure hour. It is specially intended to be a place where one can be correctly informed about Christian Science, and where the literature can be read and obtained.

Love's Recompense.

BY MRS. JENNIE W. BRIGGS.

AMID the turmoil and the strife
Of all we deem this mortal life,
Take time to send a loving thought
To one whose hours with pain are fraught,
Whose days are full of weariness,
And nights of lonely restlessness,
And it will soothe the weary breast
And to the restless heart bring rest,
And it will grow, and travel on
To bless some other weary one,
And in thine hour of deep distress
It will return to cheer and bless,
So beautiful and tender grown
Thou'lt scarce recall it as thine own;
But think an angel visitant
From out the gracious heavens sent
To bear a healing balm to thee,
Such is Love's helpful ministry.

Amid a life of happiness,
When every hour's a dream of bliss,
Take time to speak a loving word
Where loving words are seldom heard;
And it will linger in the mind,
And gather others of its kind
'Till loving words will echo where
Erstwhile the heart was poor and bare;
And somewhere on thy heavenward track
Their music will come echoing back,
And flood thy soul with melody,
Such is Love's immortality.

'Mid daily cares so manifold
They seem more than one heart can hold,
Take time to lend a helping hand
Where loving deeds are nobly planned,
For those to whom such deeds are rare;
And it will ease thy load of care;
For Love doth every burden bear,
And when it rules the daily life
It lightens labor, stills all strife
And sheds a radiance divine,
A very healing oil and wine,
Upon the fallen and the weak,
The bowed in spirit, and the meek;
And then returns an hundredfold
To bless the giver, with the gold
Of peace and joy and happiness,
Such is Love's wondrous bounteousness.

Stephen's Experience.

BY E. P. T. HOUK.

THE "Lesson from the Life of Stephen" in the *Sentinel* of November 21 is so beautiful and practical, and one so much needed, that the desire to express gratitude for it will doubtless arise in many hearts.

The discouragements that come from long delayed demonstrations over obstinate claims, have turned many from the path that would have led to unspeakable blessings had there been only the desire to rise above the physical and to rejoice in that eternal harmony which alone is real.

Truly the lesson from Stephen's experience is a glorious one. In the hands of his enemies, to mortal sense surrounded by all the power of the "one evil," amid the clamors of the false witnesses against him, suborned to

Digitized by Google

accuse and convict him, "all that sat in the council, looking steadfastly on him, saw his face as it had been the face of an angel." The rage was at its height, but he was not only calm but radiant, reflecting in such full measure the joy which found so full expression in him, that it awed his persecutors into silence. The high priest's questioning proved the power that the vision of the light reflected from that face had upon the enemy.

The first words that fell from the lips of the God-illumined though sin-beleaguered seer full of faith and of power, were "The God of glory," which was visibly reflected even to the senses of the enemies around him. What must that glory have been to him, who beheld it with the undimmed spiritual vision?

The power that it gave him filled his mouth with that remarkable epitome of the whole history of Israel from the "call of Abraham" to that day when the Spirit spake with such overwhelming power and rebuke, that they "were cut to the heart," "gnashed on him with their teeth."

"But he, being full of the Holy Ghost," saw not the gathering storm around him. Looking up steadfastly into heaven he saw only "the glory of God, and Jesus standing on the right hand of God, and said, Behold I see the heavens opened, and the Son of man standing on the right hand of God."

In the light of that vision what were the raging claims of error around him? What boldness and courage it gave him to tell of the glory that he saw! Fear was as foreign to the heart that saw that glory as to the glory itself. Think of the holy, sublime height of the martyr in the very face of death itself, when he "cried with a loud voice, Lord, lay not this sin to their charge," and "fell asleep."

The testimonies of instantaneous cures are glorious, there cannot be too many of them. Those that yield more slowly are also helpful, but to those who struggle on for years with apparently no results, nothing can be more helpful than this beautiful lesson. Weighed in the scales with the peace and joy that even the most persistent claims of error cannot shut out from the grateful heart that has any true understanding of this joy-giving Science, these claims are truly nothing.

"Feed the Famished Affections."

BY HARRIET B. ALLEN.

WE find these words in the spiritual interpretation of the Lord's Prayer as given in our text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.

The spiritual sense of these words came to me a few days ago as never before. It seemed as if I had caught a glimpse of our Mother's thoughts when she gave them to the world. The more I dwell on them, the more I see their high import. They are the pivot on which the world must be brought into tune with the Infinite.

It is the spiritual bread that the whole world is famishing for: the bread of kindness, pity, compassion, and forgiveness. Perhaps this can best be illustrated by the child-thought which Jesus said was the true heavenly thought. How do we look upon a little child? With a patient, tender, loving, drawing, kindly feeling,—a forgetfulness of self, with no thought in our hearts of judging, condemning, accusing, or persecuting. Now these little ones are God's children, and are famishing for the tender care that only Love can give. Love alone can kindle the divine spark into a flame that will burn up the error of human sense,—of human will.

Are these little ones housed, fed, and clothed in our consciousness? Have they the best home that we can give them in our hearts, a welcome place, a place where Love is enthroned? Is the food the spiritual bread? Is it that which is brought forth through daily watchfulness and prayer,—the prayer of faith and trust that will encircle the globe?

And wherewithal are we clothing them? Are we weaving the garment of righteousness, the warp and woof made of the precious promises as found in the word and cut and fashioned according to the pattern on the mount?

If we are faithful in these visitations we shall be blessed, and Isaiah's words shall come to pass: "Violence shall no more be heard in thy land, wasting nor destruction within thy borders; but thou shalt call thy walls Salvation, and thy gates Praise."

We know that in the words of the Psalmist, "Except the Lord build the house, they labor in vain that build it: except the Lord keep the city, the watchman waketh but in vain."

"Thy Will be Done."

BY W. E. ARMSTRONG.

BEFORE taking up the study of Christian Science, it was my conviction that all sickness, affliction, sorrow, accidents, and, in brief, all the ills that flesh is heir to, were the direct will of God, and were sent by Him as a punishment for sins that sometimes one did not know had been committed. I was unable to reconcile such conditions with the thought of a kind, tender, loving God and Father, whom I thought of as away off above the clouds somewhere. During the past year I have learned in Christian Science that "Thy will be done" means that we shall be perfectly well and healthy; in perfect peace and happiness; free from all the ills of mortal mind; free from all fear that this, that, or the other thing is going to strike us, for God, our Father is here, and this is His kingdom of heaven where all is peace, holiness, harmony, and happiness, and we are *now* in His kingdom, going on from glory to glory as we throw off the unreal, material thought of life and take on the real, spiritual thought, doing His will by following in the footsteps of our blessed Master, who trod every step of the way for our sakes, manifesting love, goodness, meekness, brotherliness; comforting and healing the sick and suffering children of men, and giving to them the bread of Life.

The peace and blessing of God be upon our dear Mother, who revealed unto us the true meaning of "Thy will be done."

The Value of Good Thoughts.

THE following testimonial as to the value of good thoughts will be read with interest and profit:—

I have faith in the value of good thoughts, and in the utility of offering one whenever the occasion presents itself. If we throw but a pebble in the ocean, it starts the wavelets to flowing, and they go on and on in an ever-widening circle, until embraced in the vastness of the great deep. So it is with good thoughts spoken. They are thrown out on the ocean of life, and each one finds a responsive chord in some human heart to which it is adapted.

In the prefatory remarks in Science and Health, we find this truth: "The time for thinkers has come;" and in the beginning of the chapter on "Prayer," Mrs. Eddy states that "thoughts unspoken are not unknown to the divine Mind," and to me this has become a verity. But it is line upon line; precept upon precept; here a little, and there a little, by which the larger lessons of life are gained. And the beautiful teachings of Christian Science cannot be too often reiterated.

I find in the December, 1899, *Christian Science Journal*, a little poem by Emily Tupper-Bendit, so appropriate in its text and so comprehensive in its interpretation, as to be adapted to the need of almost every seeker after Truth. The theme is "Thoughts." Readers will find it profitable to turn to the above *Journal*, and renew their acquaintance with that author.—MYRA E. OLMSTEAD, Lincoln, Neb.

Testimonies.

"Free Indeed."

I imagine that our friends in Truth have but little conception of the extent of the work being done in this territory, as there is so little news being sent to our periodicals; but we are growing and radiating as best we can, and to one so young in the understanding of the teachings of Christian Science, our progress has seemed wonderful. For myself, I have been released from many forms of bondage and have begun to realize what it would mean to be "free indeed." The feeling is what I suspect the unjustly sentenced criminal feels, when the true culprit has been apprehended and he has been given his liberty.

During past years of suffering and anxiety, I have often rebelled, saying: "I never harmed any one; why should I be punished with these afflictions?" and I would pray earnestly to be released; but it seemed as if God were busy elsewhere and could not answer me. I know now that I prayed *not believing* that I would be heard.

My husband was the first to become interested in Christian Science, and was relieved of a severe eye trouble through reading Science and Health, and when he came home and insisted that *I* should read it too, I said I would, but took my time about commencing it. However, after making the effort, I fairly devoured the book and forgot entirely that I had begun to read for the physical help I might receive,

It is just a little over a year since I began to know the Truth which makes us free, and during that time, we have had many demonstrations of its power. Our two boys have been relieved of what mortal mind called diphtheria, besides many smaller claims of sickness and accident, without outside help or any material remedies whatever, and I have overcome many attacks of illness for others, as well as myself.

In two instances there seemed to be a need of outside help for myself, as there were hereditary claims of rheumatism and lung trouble to be met, and also neuralgia of the heart and a liver trouble of long standing, all of which were successfully met in a short time and without spending a day in bed in most instances.

At one of our Wednesday evening meetings, one of our members testified to having been cured of the worst case of dyspepsia that he had ever heard or read about, and his appearance bore witness to the fact, for he seemed to be made new.

I am sure we are all grateful for this wonderful power.

MRS. P. F. MEIGS, Oklahoma City, Okla. Ter.

Christian Science Heals.

On an evening not many weeks ago, when visiting my home, I found a sister suffering from nausea, pains in the eyes, and a swollen lip. She had been in this condition all the afternoon, having returned from the Emergency Hospital in Boston at noon where the doctors had given this verdict: "As there is no head to the swelling on your lip, you must have it lanced once a day for eight or nine consecutive days." Fearful as to results from the cutting of the lip and suffering from the above-mentioned troubles, she was glad to have Christian Science treatment.

I left the house shortly and she retired for the night. At seven o'clock an absent treatment was given. No suffering was felt after a few minutes, and she fell asleep, a very marked longing for complete rest having come over her. At half past eight she was awakened for a few moments by a sister who did not know of her condition. I made another call but left the house shortly and gave another absent treatment, the conditions away from the house being more favorable to Science work. At half past ten she awoke and prepared herself to go down-stairs to appease an appetite that had made itself felt. Her meal consisted of one ear of boiled sweet corn, a couple of small sweet potatoes, two or three slices of bread, and a cup of cocoa. This change from a condition of intense suffering and nausea to great hunger took place in three and one half hours. She retired immediately and slept soundly. She states that under other conditions she had never dared to retire after eating such a meal.

There was not the least sign of a head to the swelling either on the outer or inner side of the lip, the skin being as smooth and clear as on the rest of her cheek. The swelling had reached the nose and was well up under the eye when arrested by the first treatment.

Between eight and nine o'clock next morning a movement was felt in that lip which brought on a slight pain. On lifting the swollen lip as it hung low over the teeth, and giving it a slight push outward, it broke on the outside and a large green core worked out, after which the opening closed up and the swelling began to subside. In a few days there was no sign of there ever having been an opening in the lip.

Christian Science was given full credit for this wonderful cure. Though the doctors laid down the law that daily lancings should take place for a period of eight or nine days, the healing power of Truth and Love met and destroyed the troubles inside of *fourteen hours*.

GEO. HENRY CLARK, Cambridge, Mass.

Health Restored.

Truly can I say with the Psalmist, "He hath put a new song in my mouth, even praise unto our God." So many blessings have come to me since my interest was first awakened to the beautiful Christ-Truth, Christian Science, that I feel it a privilege as well as a duty to make this grateful acknowledgment, and I hope that my experience will help and encourage others.

Nearly four years have passed since Truth found me a willing listener to its still, small voice, and led me from darkness into Light, into the knowledge of God as Love and as an ever-present help. I had known of Christian Science for a number of years through the healing of a friend from what was considered an incurable disease. Another friend had endeavored to interest me in that which had brought healing and peace to her, but I turned a deaf ear. Only after years had passed, when broken in health, weary and worn, bearing many burdens, feeling almost hopeless, did I accept the healing power of Truth and Love.

My physical healing seemed wonderful to me, and I am very grateful indeed to the dear healer through whose pure thought and clear understanding I was healed of a disease from which I had long suffered. I had been under the care of five physicians in several of the larger cities. I employed two Boston physicians, one of them for months giving me the most careful treatment. I underwent an operation which was a failure. When I went to my healer, I was suffering almost constant pain. Relief came gradually, then entire cessation from pain. The same healer's help enabled me to lay aside glasses, which I had worn for several years. My heart overflows with love and gratitude to the giver of all Good and to our beloved Mother, Mary Baker G. Eddy, whose wonderful revelation has brought freedom and peace to suffering humanity. I owe much to the *Journal* and *Sentinel*. They have been more help to me than words can express. That *all* may come into an understanding of this glorious Truth, is the great desire of my heart.—S. W. C., Brookline, Mass.

Shielded from Moral Contagion.

The little band of Scientists at Wardner, Idaho, feel that we have so much to be thankful for this year that we wish to express ourselves, and think the best way to do so, is to

Digitized by Google

tell the dear ones who are working so faithfully for our Cause how much we appreciate their labors.

The *Journal, Sentinel,* and *Quarterly* come to us, away in our mountain home, far from others, and the organized churches. They always bring cheer and help and blessing, and we are truly thankful for them. Each Sunday's lesson-sermon seems especially helpful just at the time, and we feel like saying of each *Journal* and *Sentinel,* surely we never had another so full of love and admonition.

When we would speak of our thankfulness to God for Christian Science and its Discoverer and Founder, our dear Mother and Leader, words fail us, and we can only try to magnify the Lord in our lives. We desire to follow closer day by day the teaching so abundantly given us in our text-book, "Science and Health with Key to the Scriptures."

In following the teaching of that book this demonstration was made. A little girl, in going to school, seemed to be among very undesirable companions, and the mother, although she had been able to overcome the fear of the contagious diseases in the school, feared the wrong that might come to her thought from what she might see and hear. Soon error manifested itself in inflammation in one of the child's eyes, and spread to other parts of the face. Although faithful work was done, this manifestation was not destroyed until the mother learned, through understanding in Christian Science, that divine Love is a panoply that shields us from moral contagion as well as physical, that where it is right for her child to go, she can go unharmed in any way, that no evil can come nigh.—M. L. B.

Harmonious Business Relations.

For the past five years Christian Science has been my stay and comfort. It transformed me from an invalid to a healthy woman, again able to do any kind of work. Contentment, which had so long been foreign to me, has once more entered my being. I cannot begin to count the many spiritual blessings that have accrued from the practical use of this glorious Truth. "Whereas I was blind, now I see."

I desire to give one demonstration, as an illustration of what this Science, methodically applied, can do. Some few months ago, I entered business dealings with a family who were regarded by their neighbors as being exacting and unjust. One member of the family was insane and had been to an asylum several times.

It was said that for fifteen years people had tried to do business with them, and by the time one member of the family agreed the other would enter decided opposition. Every time obstacles seemingly arose to undo all my labor and patience with those people, I went to work so much the harder; that is, left off doing or saying anything, and met my claims silently. Finally Truth won the day, and justice is done to all concerned. The deal was closed to the satisfaction of all, and I give Christian Science the credit. It is needless to say that the parties in question have themselves gained higher inspirations, as even the insane man shows that he wants to work now, and has improved wonderfully. I did not admit for a moment that any of these claims of error were real.

My heartfelt desire is to see others accept this great Truth and thus be set free, just as I have been. I am not a slave to matter, but able to master its claims through the supremacy of Mind.

Mrs. Emma Evans, Aberdeen, Miss.

Fog.

In trying to define God and man more fully to my consciousness, I began comparing mortal mind to a fog, or mist. When looking through the mist, objects are seen through it more or less distinctly according to the density of the mist. So when mortal mind tries to blind us with error, or befog our understanding, the path of Truth appears obscured, and it seems hard to discern the perfect man. But when the mists (mortal mind) have been cleared away by demonstration of the Principle, then we do come out again into the sunlight of Truth, and see man as perfect. Often when looking out of my window on foggy mornings, I have said, "The fog is so heavy that I cannot even see the houses across the street," never for one moment thinking the houses were not there.

Oh, why cannot we just *know* and *feel* God's presence at all times and under all circumstances? At times a sense of discouragement comes to us, and it seems as though we were not advancing. It is then that I begin comparing my life before coming into Science to my life after taking up the study. Then I *know* that I *have* advanced, and my heart is filled with gratitude for what understanding I have. My daily prayer is to know more of God, Good, and less of self.—C. L. S., Tacoma, Wash.

Sin and Sickness Healed.

I was badly afflicted with chronic stomach trouble and palpitation of the heart. I had been troubled more or less with these diseases for several years. About three years ago I was taken with the grip. This left me in a still worse condition than before. I doctored for three years but received no benefit. In 1900 I heard of Christian Science. I went to New London to see a Scientist and took treatment. I was benefited at once and in five treatments I was healed. The Scientist then advised me to buy "Science and Health with Key to the Scriptures," which she knew would do me good. The Scientist knew that I was still clinging to a sin which at that time I was not willing to drop.

I continued in the old way for a time when I was stricken with paralysis. I again took Christian Science treatment and in two treatments was healed, not only of paralysis, but also of the sin which I was laboring under. That sin was the liquor habit. I was then ready to buy Science and Health. I thank Mrs. Eddy for giving us this book from which we may learn to help ourselves, and I also wish to say that I appreciate the patience shown me by the Scientists, for where there was once darkness now there is light.—Miron S. Greeley, Stephensville, Wis.

Healed Unconsciously.

About two and a half years ago I first heard of Christian Science. I was in a very weak condition. I had been in a training school for nurses, but the more I saw there, the less faith I had in material means of healing. Seven of our family had passed away with consumption, and my fear of it was getting a hold on me. Everything I knew of then, it seemed to me, had been tried for our family, but all failed. When I became interested in Christian Science I studied the Sunday lessons two and sometimes three times a day. I was interested in all the Christian Science literature, and the Bible became a new book to me. I never thought of having treatment. My healing came to me so unconsciously that it seems just to have awakened me.—Elizabeth Miller, Jacksonville, Fla.

In Princeton, Ind.

There have been so many cases of healing through Christian Science in our city and neighboring towns, that it would be impossible to relate them all. Cases where there was no hope of recovery but through Christian Science treatment, were brought out of these conditions into health and strength.

About six years ago I was healed of severe stomach trouble. It was the first case treated in our little city, and from this healing the results above mentioned followed.

We have organized a church, and are having many proofs of God being with us in our work and teaching us how to work in the Master's vineyard, that is, "Preach the gospel" and "Heal the sick."—E. D. B., Princeton, Ind.

Religious Items.

THE DATE OF GENESIS.—While not a few modern scholars are assigning a late date to the composition of the Book of Genesis, it is interesting to note an incidental proof of its origin in the era, if not from the hand of Moses. In his introduction to the "Temple Bible," Professor Sayce remarks that "It is clear that the writer of Genesis has drawn his materials, not from a Babylonian library, but from a library of Canaan, where the cuneiform literature of Western Asia was still stored in the days of Moses." The clay-books that had been brought from Babylonia here became, he continues, the basis of other historical works, in which the local coloring was modified in accordance with the environment. "The literature of Babylonia, in other words, was adapted to the new country and the new population to which it had been carried; it remained Babylonian in origin, but its setting was that of Canaan."

Professor Sayce then points out that there was one period only in the history of the Oriental world when this could have been the case. "It was the period when Canaan was for long centuries a province of Babylonia, and when the culture of Babylonia was transported to the West; and it was a period that lasted down to the Mosaic age. When Moses, or Messu, the adopted 'son' of the daughter of Pharaoh, was born, there was still intercourse between Canaan and the kingdoms of Assyria and Babylon. The Canaanitish libraries had not as yet been destroyed, and though Canaan had ceased to belong to Babylonia, and had become a province of Egypt, it was still so permeated with Babylonian influences that its official correspondence with its new masters was carried on in Babylonian script. But all this came to an end before the great Hebrew legislator was dead. By this time Egypt had been driven out of Asia. The Hittites were overrunning Canaan in the North, and the Israelites were threatening it with invasion and devastation in the south. Soon it ceased to be possible even for one who was trained in all 'the wisdom of the Egyptians, to collect the older records of western Asia; the libraries were destroyed in which they had been preserved, the meaning of the cuneiform characters was forgotten, and a new system of writing came into use. The ancient documents which form the background of the earlier chapters of Genesis must have been read and consulted before Kirjath-sepher, or 'Book City,' was sacked and Jerusalem transformed into a Jebusite stronghold."

The Examiner.

THE BAPTISTS AND EVERLASTING PUNISHMENT.—It would take a large section of our paper to republish all the evidence of change that is taken, and has taken, place in the theology of the modern Church. The change has not been limited to any one denomination. Though the Congregationalists are in advance of their evangelical neighbors, they are obliged to keep moving lest they be overtaken. The Baptists have, in some sections, been a little more stalwart than others in upholding the standards of Orthodoxy, but even they have had new light. The story will perhaps come best through *The Congregationalist*, for then there can be no charge of bias. That paper says:—

"The changes in the character of orthodox speculative theology were strikingly illustrated in the discussion in the recent Baptist Congress in New York on 'The Function of Penalty in the Christian Religion.' Twenty years ago no minister in a Baptist assembly would have questioned the fixed and eternal punishment of the sinner who died unrepentant. According to the reports in Baptist newspapers the impression is given that opinions for and against this position in the Congress were nearly evenly divided. One of the two papers read asserted that after centuries of discussion agreement had been reached that punishment is 'a bringing forth of the evil that resides in sin on the principle that sin, when it is finished, bringeth forth death.' One of the speakers insisted that punishment is admonitory, retributive, vindicatory, and that 'the idea of an external tribunal before which men must appear for judgment is universal.' Another held that punishment is the result and action of a natural law, that character determines destiny, which is eternal. But on the other hand, one speaker said that if penalty is simply a natural consequence it has no function in religion. God is the Father, sustaining loving relations with His children, and thus gives penalty a function in Christianity. Other speakers held that punishment springs from love, that its purpose will be fulfilled in love, that the doctrine of annihilation is a confession of failure, and that good will be the final lot of all. It does not seem strange that the assertion that this is not Universalism should have called forth a ripple of laughter, but we are sure that the discussion of this subject in former times would not have elicited, as the *Examiner* says a paper on this subject did, 'frequent laughter and applause.'"

The Universalist Leader.

THE PRINCIPLE OF BETTING AND GAMBLING.—Betting and gambling have lately received the commendation of an apologist coming to their defence from a new direction. This is no less a personage than a Bishop of England, who has publicly maintained that "a bet is neither more nor less than a price paid for a chance," and he concludes that as chances must be taken by every one in every walk of life, the purchasing of a chance in betting is no more a sin than the taking of other chances. The Bishop has been driven to defend his positions "at considerable length in one of the English reviews," in which he expresses the opinion that "the only sin of betting lies in the direction of extravagance, as when one devotes to it more time and more money than he can properly afford. Then, but then only, in the Bishop's opinion, does betting become sinful gambling." We are pleased that the *Churchman*, from which we get these facts, dissents entirely from the Bishop's teachings, and points out that covetousness is the sin of gambling.

But we think that even this is too mild. The essence of gambling is the hellish lust of getting something for nothing. It is a contrivance for taking money away from another, and appropriating it to yourself, without giving any equivalent for it. The fundamental basis of eternal life, the rock, indeed, upon which man's communal relation is founded, a relation which is the very essential of heavenly law, is the law of use. That each should contribute by his life's work to the uses of the neighbor, and that he should receive an equivalent from the neighbor, is the law of charity, by which is expressed the love of the Lord. The very existence of divine life in the soul of man is dependent upon his conforming to the law of use.

New-Church Messenger.

PROHIBITION PROSPECTS IN MANITOBA.—Prohibition prospects have greatly brightened in Canada by reason of the favorable decision of the Privy Council on the Manitoba liquor act. Some eighteen months ago this measure passed the provincial legislature, and was afterwards challenged in turn in the courts of the province, the Supreme Court of the Dominion, and the highest tribunal of Great Britain. After the long, weary waiting, it is the more gratifying to prohibitionists to have the act declared constitutional by a judicial body against which no appeal can be made. Some months, however, must yet go by before the efficiency of the measure can be tested, as the license year does not expire until the coming May. Then there will come into force this much-debated enactment, which aims at the closing of all places where liquor is sold, excepting drug stores, where it can be procured on the presentation of a doctor's certificate. The act also forbids the dispensing of free drinks and the importation of liquor except for individual use. Infringement of the law will mean a fine of from $200 to $1,000 for the first offence, and imprisonment with hard labor for the second. It is believed that the act will be generally effective because of the strong temperance sentiment which prevails throughout the province. The results will also extend beyond Manitoba. Now that the provincial power to prohibit is assured, all the other provinces, with the exception of Quebec, may be expected soon to follow in line.

The Congregationalist and Christian World.

Sheriff Pearson's rigid enforcement of the prohibitory law in Cumberland County, Me., already has far-reaching results. In his speech before the Twentieth Century Club in Boston he said that there were only six hundred men at the free Thanksgiving dinner this year given by the City Mission to over fifteen hundred a year ago. Some of the persons who hitherto have been recipients of the feast contributed cash this year to its maintenance. Thus does sobriety convert a parasite on society into a useful and productive citizen.

The Congregationalist and Christian World.

The present tendency on the part of Churches in Christendom to devote themselves to moral reform, has been frequently noted. The interest which once prevailed among the Churches in questions of doctrine has almost entirely disappeared, and but little trace of it is to be found in the pulpits even. The call is for "practical religion;" and in response to that call there is an unwonted interest and activity in all humanitarian and moral reform movements. The time was when a portion of the Church openly taught salvation by faith alone. To-day the tendency seems to be toward salvation by good works alone.

New-Church Messenger.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa*.

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each $3.18
Two to Twelve books to one address, each, prepaid . . 3.00
Twelve or more books to one address, each, prepaid . . 2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75
Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth) each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . . 2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half do. zn; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; 6 copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.

Entered at the Boston, Mass., Post Office as second-class mail matter.

Items of Interest.

National.

Regarding the statement of *El Tempo*, a Mexican newspaper, that John Barrett, delegate of the United States to the Pan-American Conference, had returned to Washington because the Latin countries did not show docility in accepting the leadership of the United States, Mr. Barrett, who has just arrived here from Mexico, said:—

"Such a report is too ridiculous to require specific denial. It is an example of the methods of the anti-American element of the Latin press to discredit the Conference, or it is one of those foolish stories about American politics that sometimes originate, nobody knows how, in foreign capitals.

"I have returned to the United States by express permission of Secretary Hay to attend to certain personal business matters requiring attention, and I can add that the Pan-American Conference, even if it does not accomplish all that could be desired, will undoubtedly have promoted the friendly relations existing between the United States and her sister republics."

The New Year's reception at the White house was attended by over eight thousand persons, the largest number ever in attendance at this annual event. The crowd began to gather as early as 9 A.M., two hours before the time set for the opening of the reception, and more than three hours before the general public were admitted,

The President and Mrs. Roosevelt extended a hearty greeting to all callers, and the White House was pervaded with a festive atmosphere from the time the reception opened until the last caller was received late in the afternoon.

The question of erecting a new city building in Concord, N. H., was settled at a meeting of the city government this evening by the adoption of a report from the special committee recommending a modification of the original plan and providing for a building of brick and stone to include a substantial City Hall capable of accommodating from sixteen hundred to two thousand people. It is expected that this can be done for less than $150,000, the sum originally appropriated.

Chicago is the most healthful city of approximately its size in the world, according to the report of the Bureau of Vital Statistics, which is now preparing to close up its work for the year 1901. Within the year just closed it can be asserted that the death rate for twelve months will be only a fraction over thirteen in a thousand. The lowest rate ever recorded before in a city of one million population or over was 14.17 per thousand in the year 1897.

The Navy Department has taken the initial step toward the adoption of wireless telegraphy as a means of signalling between warships at sea. To this end, Admiral Bradford of the Bureau of Equipment has asked that the armored cruisers of the Pennsylvania class have their masts and rigging so arranged that the wireless system can be introduced. This will necessitate the lengthening of the masts of the ships and the insulation of the metal rigging.

The Navy Department has decided to establish wireless telegraph plants at the Washington Navy Yard and at Annapolis. At each point a tall mast will be erected for the purpose of receiving and transmitting signals, and small buildings will be erected for the installation of instruments, etc.

Foreign.

The London *Spectator*, reviewing the relations between Chile and Argentina, remarks that both are acting as if they expected war, and Chile as if she wished and intended it. The paper continues: "But for one factor of unknown force we should say confidently that war between the two republics in the near future was almost inevitable. The incalculable factor, of course, is the Government at Washington."

The *Spectator* then discusses the reasons that might induce the United States to interfere, and says that if President Roosevelt does intervene with the decision that characterizes both himself and the United States, it is hard to see any course open to Chile except sullen submission, since in war she would be at the mercy of the United States. The Chileans, moreover, would find no powerful friend in Europe, for the German fleet is not ready. Great Britain, continues the *Spectator*, would approve of President Roosevelt's action, but the idea of British intervention, except to support President Roosevelt, is a mere dream. It is for the President to set the rule and the *Spectator* believes that his action will be in the direction of commanding peace. The establishment of a Pax Americana would be a justification of the Monroe Doctrine, which would weigh heavily with mankind in favor of that exceptional principle of diplomacy.

The Philippine Commission in its report expresses its high satisfaction with the condition of the insular treasury. In one year in spite of large drafts for road and harbor improvements, etc., the cash balance available for appropriation has risen from $3,023,834 gold value, at the ratio of $2 silver for $1 gold, to $5,106,518. There is no reason, the commission says, why the Government of the United States should ever be called upon to contribute toward the support of the insular government, and it believes that within comparatively few years after the complete restoration of good order the revenues of the island will be sufficient to pay all expenses incurred for troops, native or American, and insular police sufficient to maintain good order throughout the archipelago.

Tomas Estrada Palma was elected President of the Republic of Cuba at the election of December 31, 1901. He announced that the new Cuba would be one of work and of high endeavor; that it would be his aim to strengthen the friendly relations which exist between his country and the United States, and to bring about reciprocity.

It is learned on the best authority that the treaty between the United States and Denmark for the sale of the Danish West Indies will be signed. The question of a plebiscite will not be allowed to interfere in the matter.

Industrial and Commercial.

The construction department of the General Electric Company at Schenectady, N. Y., has just completed one of the largest machines ever turned out of any electrical shop, and the most powerful for its size in the world. The machine is one of six alternating current generators for use in developing the waterpower of Niagara Falls by the Cataract Company. The total weight of the generator is one hundred tons, considerably more than that of the heaviest locomotive. The machine is of five thousand horse-power, has an efficiency of 98 per cent, a voltage of twenty-two hundred, and a factor of safety of ten.

Contrary to the usual method of construction, the centre is a stationary armature 108 inches in diameter, while around it revolves a huge nickel-steel ring fifty inches wide, twelve feet in diameter, and twelve slots, the total of which makes a revolving weight of eighty thousand pounds, moving at two miles per minute. The new generators are to be placed in a pit at the bottom of the Falls and geared to powerful turbines which will be able to develop twenty-nine thousand horse-power.

The official statistics of Germany's foreign trade for the month of November show a decline in exports for the first time during the present year. This decline amounts to 60,130 tons. During the same month Germany's imports declined 465,535 tons. The totals for the month of November were: Imports, 3,642,042 tons, and exports, 2,909,855 tons.

The imports of wheat for the eleven months ending with November were 1,960,496 tons as against 1,206,065 tons for the same eleven months of 1900. During the first eleven months of this year, the wheat imported from the United States amounted to 1,143,375 tons. This total nearly equals the import of wheat into Germany from all countries in 1900.

The business of the savings banks of Boston for the last day of the old year and the first day of the new indicates good trade conditions, some of them reporting a considerably larger business than last year and all finding the transactions quite equal to those of a year ago.

There are an unusually large number of new depositors, and this speaks well for the future accumulations. The period is one of unusual activity in this line of banking with some of the institutions, especially with those about to close their accounts for another period.

A net increase of 692 National banks is shown by the statements prepared by the comptroller of the currency for the period between the enactment of the gold standard law on March 14, 1900, and the close of November last. The number of new charters granted in this period was 774, and this has been further increased by ten during the first half of December.

An increase of from four to twelve per cent in the wages of about forty-five thousand trainmen has been made by the Pennsylvania Railroad Company. The new scale of wages took effect January 1. The clerical force is not included in the plan, but may come in for consideration later.

General.

Mr. Marconi, who arrived at North Sydney, C. B., December 26, on the steamer Bruce, on his way to Montreal and Ottawa, announced that at the conclusion of his intended trip to the Canadian capital he will proceed to Montreal and thence to Europe. His next experiments of importance, he says, will be made early in February, on one of the steamships from Liverpool to New York. On the trip across the ocean he will endeavor to communicate with land on one side or the other during the entire voyage. The Cornwall and Cape Cod stations are those intended to be used. Mr. Marconi and the government representatives held a conference, and Mr. Marconi afterward said it was probable that a spot in Cape Breton will be selected for a permanent wireless station, and that the point chosen must be from one to two hundred feet above the sea line.

An effort is being made by the American Scenic and Historic Preservation Society to obtain the aid of New York City for a plan to save and preserve as a landmark Faunce's tavern at the corner of Broad and Pearl Streets, in whose long room Washington bade farewell to his brother officers in the American Revolution.

The First Steel Pens.

PENS were formerly made from quills, the great defect of which was their speedy injury from use, and the consequent trouble of frequent mending. Attempts were made to fit small metal, or even ruby, points to the nib of the quill pen, but the delicacy of fitting was so great that but little success was attained.

It is only a century ago that pens began to be made wholly of metal. They consisted of a barrel of very thin steel, and were cut and slit so as to resemble the quill pen as closely as possible. They were, however, very indifferent, and, being dear, they were not in common use. Their chief fault was their hardness, which produced a disagreeable scratching on the paper.

In 1820 Joseph Gillott perfected the form of steel pens, and began their manufacture at Birmingham, Eng. The first gross of steel pens ever sold at wholesale brought thirty-six dollars in 1820, at Birmingham. In 1830, the price had been reduced to two dollars; in 1832, to one dollar and a half, and in 1860, to twelve cents. The annual production of steel pens in Birmingham alone ranges from eight to fifteen million gross.

Large sums, amounting in one instance to £40, have been given for pens used by Charles Dickens, the Earl of Beaconsfield, and other literary lights, including Wordsworth, who, in 1806, began a letter to Lady Beaumont, which, he said, was the longest he ever wrote, a statement that was unlikely to be refuted, seeing that it was eighteen pages in length.

Eight and one half guineas were paid for a penholder comprising an ivory handle, a silver holder, and a quill pen in it that once belonged to Sir Walter Scott.

There are, perhaps, but few pens in existence that can vie in interest and importance with that with which the Treaty of Paris was signed in 1856, at the conclusion of the Crimean War. On this famous occasion the fourteen plenipotentiaries assembled to sign the famous document used the same pen at the special request of their hostess, the Empress Eugenie, who desired to possess a souvenir of so important an occasion.

When his Holiness the Pope signs an encyclical letter, or delivers a papal bull, the implement used is a white-feathered quill taken from the wing of a dove, which has now been in use, such is the care of it, for over four decades. It was perhaps this custom that suggested to the person designing the pen with which the Treaty of Paris was signed, a pen that was mounted in gold and jewelled with diamonds, that it would be in keeping with the emblems of several of the chief signatories if the quill were drawn from the wing of a golden eagle. At all events, the bird in question supplied the necessary nib.

At the signing of the treaty on the conclusion of the war between the United States and Spain in Paris in 1898, a rather amusing incident occurred. The hour was 8.30 P.M., and the day December 10. The commissioners of both Spain and America expressed the wish that the seals, out of compliment to France, which had shown them great courtesy, should be affixed by a tri-colored ribbon, and on search being instituted for the ribbon it was found that the Quai d'Orsai did not boast an inch of the desired three colors. Nor was it forthcoming until a brilliant inspiration occurred to the head of a department, and a messenger was forthwith dispatched with all haste to a certain confectioner in the Rue St. Honore, there to purchase a pound of chocolate and stipulate that it should be tied up with a tri-colored ribbon—which ribbon now affixes the private seal of each commissioner to the historic documents then signed in duplicate. The pens provided were ordinary quills and steel nibs, fixed in bamboo handles.

When signing the treaty with France in 1871 Bismarck used a golden pen made specially for the occasion, a present from some manufacturers of Pforzheim, a place in Baden famous for its jewelry work.

A golden pen of exquisite design, of which the chief feature is the figure of our Saviour surmounting a canopy at the end of the pen, in the niches of which canopy are several beautifully sculptured figures, was presented to the Pope recently by pilgrims of southern Italy. This instrument, which was designed by Sig. Ingaldi in the Italian gothic of the twelfth century, is ornamented with precious stones, and is probably the most beautiful penholder in existence.—*Boston Herald.*

How Briquettes are Made.

WIDESPREAD curiosity exists as to the appearance and burning qualities of the new coal briquettes being made at Stockton, Cal. Samples of the product show a black object, round in form, having nine inches of circumference, with convex ends, which, though it comes from the coal pit and the petroleum well, leaves no trace on the cleanest hands. The convenience of the briquettes is apparent at first view, and those who have tested its burning qualities are unqualified in their praise.

A visit to the briquette factory of the Tesla Coal Company was made by a party of business men recently. It was found located on the Stockton water front, adjacent to the bunkers of the Tesla company, to which the cars of the Almeda and San Joaquin Railroad, owned by the fuel corporation, convey the fuel from the mines, thirty-six miles distant. The process of converting coal, asphaltum, and other ingredients into briquettes was seen to be simple in its very perfection. It is conducted under a patent owned by the Tesla Coal Company. The main object sought is the increase in the combustible value of the coal by chemical process so as to utilize the volatile gases, which although containing the largest amount of heat units, are permitted to escape in the burning of crude coal. This is a fact recognized by several European governments, which have introduced briquettes for fuel in their navies, requiring that they shall contain a greater number of heat units than the ordinary coal. Knowledge of the superior heating qualities of briquettes has also been acted upon in the Eastern States, where factories for their manufacture are well established; but it may be remarked in passing that the best of these are far inferior to the Tesla Coal Company's plant, as perfected by John Treadwell, the discoverer and

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

developer of the Alaska gold and Tesla coal mines in economy of process and in satisfactory results.

Reduced to its simplest expression, the process of briquette manufacture consists in the pulverization of the coal, its mixture with the other ingredients, and their compression into compact shape adapted to easy handling and the securing of the best draught conditions. The reduction of the coal to powder form by means of crushers requires no description. It is then dried and heated to a high point, and only when this has been accomplished is the coal mixed with the other components of briquette fuel. Now comes the most interesting part of the process in the shape of the compression. This is obtained by passing the material by means of hoppers into the two great pressers. So nicely is the machinery adjusted that nothing is lost, whereas by the Eastern systems a large per cent of the material has to be returned to undergo again crushing, drying, heating, and mixture. By means of pistons working in opposite directions under the compulsion of large side wheels the fuel material is pressed into briquette form at a pressure of twenty-two thousand pounds. The briquettes are now perfect. They only require cooling, the throwing out of the few which do not come up to standard as to density or shape, and conveyance to the bunkers for shipment by car to market. This is done by machinery almost exclusively and does not call for description. The briquettes are facts when they leave the compressors. The daily capacity of these is five hundred tons, but undoubtedly their number will have to be increased as the public becomes acquainted with the advantages of the burning of briquettes. They are now in use in Stockon and Oakland, where it is found that a ton does the work of a ton and a quarter of the ordinary coast coals for domestic purposes, and increases the heat productions fifty per cent over steam coals.

New York Journal.

Highest Price for a Book.

J. Pierpont Morgan is credited with having paid for a Latin Psalter, during his last visit to Europe, the sum of nearly twenty-six thousand dollars, said to be the highest price ever paid for a single book. The book, which is the Psalimorum Codex, printed by Fust and Schaeffer in 1459, is now in this city, in Mr. Morgan's safety vault.

Among bibliophiles in this country and Europe Mr. Morgan's purchase has been a topic of conversation for several months. The Latin Psalter, of which there are only twelve copies in existence, is one of those treasured volumes whose fortunes are followed with interest by book lovers. In value and typographical magnificence it is considered superior even to the Gutenberg Bible, one copy of which is valued at nearly twenty-five thousand dollars.

According to the librarian at the Lenox Library, Mr. Morgan purchased the Psalimorum Codex from a son of the late M. Quaritch, a great London bookseller. Mr. Quaritch bought the volume at a sale in 1884, paying for it about $24,750. He never found a purchaser, and the price at which it was disposed of by his son made the transaction a losing one, taking into consideration the interest on the investment.

In Quaritch's catalogue the copy was valued at £5,250, or about $26,200. In the words of the great bookseller, "It is the grandest book ever produced by typography."

Only nine known copies of this volume, printed in 1457, are in existence, and only twelve copies bearing the date of 1459. The latter contain the Athanasian Creed exclusively. Bibliophiles say that only fourteen or fifteen copies of each of the editions were originally made.

The Mystery of Godliness.

BY V. B.

"AND without controversy great is the mystery of godliness: God was manifest in the flesh, justified in the Spirit, seen of angels, preached unto the Gentiles, believed on in the world, received up into glory."

It seems to me that this verse bears a two-fold meaning. Not only does it bring to our memories the events which happened in our Master's earthly career, but it also prophesies those steps which will be necessary for the development and final acceptance and demonstration of Christian Science.

Great indeed was the mystery of godliness, even when God was manifest in the flesh. We well know how God, or Truth, was manifested through the flesh to the flesh by Jesus of Nazareth. As "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, p. 228, says: "In the flesh he was appointed to speak God's word to human flesh, and appear to mortals in such a form of humanity as they could understand as well as perceive." He was the first who was pure enough, not only to become conscious of the Christ idea, but to be able to teach it to others, and to demonstrate its power in the healing of sickness and the overcoming of sin.

But was he justified? Did humanity accept and practise his teaching, following his example by destroying the false claims of evil? No, it is true they did so, in comparatively small numbers for two, or perhaps three, hundred years, but darkness once more came upon the face of the earth. Mortal man did not justify him, but he was "justified in Spirit," or, as we would say, by Spirit, Love, God; for does not the Scriptures say: "It is God that justifieth"? The Christ which Jesus manifested, was justified in Mind all the time, but it has taken over eighteen hundred years for mortal man to justify him. Through the understanding of Christian Science we are to-day seeing what Jesus *really* came to reveal, teach, and point out to us.

As the text says: "He was seen of angels." He was understood and the Christ Idea he manifested was seen by those whose consciousness had been pierced by the Light of Truth, and were ready to receive those angels, or high thoughts. "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, giving the lie to evil, sensuality, and mortality" (Science and Health, p. 572). May we be conscious of the presence of those angels, and have that inspiration of goodness and purity which will enable us to reflect and make manifest God's thoughts, and in the so doing follow the example of Jesus the Way-shower, which is the one and only way in which we can truly justify him.

The text goes on to say that the Truth was "preached unto the Gentiles." We know that this seemed to be fulfilled by Paul, but has it not had a far greater fulfilment when we remember that the meaning of the word "Gentiles" is given as "nations of the west"? Is it not indeed in the West that the Christ, Truth, has been preached?

It seems to me that the prophecy "believed on in the world" either has not been fulfilled, or else it did not mean the *whole* world, as the Jews do not yet believe in the divinity of Jesus. But on the other hand, we know that Jesus was received up into glory, when he lost all belief of that material selfhood, or, as we have been wont to call it, "ascended into heaven," which of course really means, he regained the consciousness of his Spiritual sonship and oneness with the Father, who is Life, Spirit, Mind, or as Science and Health, p. 229, says, "the human, the corporeal concept, or Jesus, disappeared; while his invisible self, or Christ, continued to exist in the eternal order of Divine Science."

Digitized by Google

I should now like to show how the chosen text seems to point out the steps which have to be taken in each individual consciousness before the entire realization and demonstration of Christian Science can be gained.

At first the understanding of what God is, and what is His relationship to man, is indeed a mystery to us, and even when Science and Health, which explicates that mystery, is first put into our hands, our eyes are so accustomed to the darkness, that we blink at the Light, and the "little book" seems full of hard sayings. But when the Truth once enters our consciousness, and divine Love has begun to dissolve that adamant of error and we dimly discern that Christ Idea and begin to know ourselves spiritually, then God is becoming manifest in the flesh. Sometimes this requires great self-abnegation and purification. We have to learn what humility is, and how to be humble. It may be that we meet with opposition from relatives and friends. We must then remember that all we have to do is to be faithful, and God will indeed justify us. How many times have we already proven it!

Through this same faithfulness we shall entertain and retain the angels and gain that inspiration, purity, and goodness which will enable us to overcome and destroy the false claims of evil.

Through these demonstrations of God's allness, we shall be letting our light so shine upon men, that they will glorify our Father. This will be in very deed preaching the gospel to the Gentiles. Through these signs, and the daily living and striving to manifest that love and peace and gentleness which passeth all understanding, the world will then believe that this Gospel of Christ healing is not of men but of God, and all will ultimately grasp and work out the vast problem which will lead and guide the children of men, "into the glorious liberty of the children of God."

Ocean Murmurings.

BY JAMES J. ROME.

WHO can express the strange thoughts that come to us when sitting alone by the side of the ocean. The broken outline of the shore stretches to right and left; here bold and rugged, contesting the right of the persevering waves; there sloping gently and smoothly in a sand beach, as if kindly inviting them to unfold upon its bosom. Looking further out upon the water the hue deepens and the surface seems less and less broken till the undulations are lost in one great expanse of blue. We are impressed with its fulness, abundance, extensiveness, might, grandeur; and we feel in the presence of a great protecting power that holds all in safety, for He "hath measured the waters in the hollow of his hand."

And yet the waves come rolling in, heaving restlessly, returning, one might suppose, from a great conflict where deeds of violence are being perpetrated, or else from where some wild festival is in progress and they have run out from the exciting revelry. They dash against the protruding headland and resisting rocks, but when they come to the sloping beach, they break more quietly upon its breast and the tumult and excitement die away in a subdued hush, ever murmuring hush! hush! hush! as they unfold upon the gentle beach.

Then we are reminded of the restless waves that come rolling, tumbling, and dashing in upon us from the great sea of mortal consciousness,—waves of avarice, envy, jealousy, accusation, condemnation, reproach, disdain, persecution, hate. How shall they be met? When the bold, self-assertive headlands and promontories of stubborn resistance, self-justification, self-will, self-love, ambition, pride, resentment meet these waves, there is a conflict, a dash and splash; but when they are met by the sloping beach of gentleness, forbearance, kindness, patience, charity, love, the waves gradually lessen till a soft murmuring *hush* is all that is heard, while the remnant of each wave quietly runs back to help quell the force of those still coming; their turbulent waters are in turn broken, and so we hear the constant song of *hush, hush, hush.* In the ocean's lullaby we hear the distant echo of the tones of him who spoke to the troubled waters of yore and said unto them, "Peace, be still."

Soon the tossing and turmoil and "rushing of many waters" grow fainter and more faint, and we are wafted on the wings of hope and faith to the Mount of Revelation, whence the faithful disciple saw "a new heaven and a new earth; for the first heaven and the first earth were passed away; and there was no more sea."

Blue rolling wave, that dashest so impatiently
Against the rock and jutting headland,
Unfold thyself upon the shining strand
With gentle murmurings. Reflect no more
Upon the howling and tempestuous wind
Which roused thy haughty ire, and lashed
The billows into foaming fury.
The wind-cloud's spent, and Nimbus dark
Hath folded back his sable pall,
And from the azure depths the silvery rays
Of Helios brightly gleam upon the felspar grains,
And zephyrs lightly fan with cooling breath
Thy restless bosom. Let not thine heart
With fevered, quick pulsations longer beat,
But gently kiss the golden sand,
And let spent fury lose itself in peace.

A Dream.

BY T. L. ROBERTS.

WHEN a young man in my teens I had a dream which at the time made a deep impression upon me. The memory of it gradually faded from my consciousness, and was virtually forgotten until I had gained some understanding of Christian Science, when it came up again from the archives of memory to be properly interpreted and duly accredited.

In the light of Christian Science this experience would be a conclusive argument against the reliability of material sense testimony, and was also a case of instantaneous healing. I will relate it as it came to me.

While strolling in an open country pasture containing many granite boulders and occasional lofty pines with long, bare trunks, I espied, two hundred yards or so away and acting rather suspiciously, an Indian with a gun. The instinct for self-preservation caused me quickly to seek shelter behind one of the trees near by, which grew beside a large boulder. Just as I neared this shelter I saw the smoke issue from the muzzle of the Indian's rifle, heard the sharp report, and simultaneously felt a stinging sensation in my heel. Looking downward I saw a hole through the back part of my shoe and saw and felt the blood as I moved my foot about. The horrible knowledge that I was shot through the heel and perhaps maimed for life, rushed into my mind with relentless energy. But it seemed to me I could not have it so. I tried to think that it was all a dream; but my senses at once proceeded to prove to me that it was not a dream. I put my hand upon the rock and, alas, too distinctly felt its hardness and coldness. I saw its grayish whiteness, and saw also about me the trees, grass, and other material objects, together with the cruel redness of the blood dripping from my shoe. I heard the low soughing of the wind through the trees; and I smelled the general fragrance of wood and field.

I had thus proven by four of the five senses that this was no dream but an actual occurrence. But oh, it seemed too cruel, too unjust. My heart filled with unutterable longing that somehow a merciful God might yet help me. And this longing, this prayer, was answered.

Digitized by Google

The rural scene gradually faded, like the dissolving view of the stereopticon, and I awoke to the joyful consciousness that I was in my bed at home, safe and sound. I had been instantaneously healed from a shot wound in my foot; or, in other words, a horrible mental picture had been changed to one expressing harmony and peace.

Though not so quickly manifested as the above, I have experienced healing quite as wonderful during my thirteen years in the blessed atmosphere of Christian Science. My physical restoration from hopelessly complicated functional and organic conditions to robust health, was, and is, occasion for deep and lasting gratitude to her who has discovered, and is so wisely and patiently,—aye, so lovingly,—unfolding to us this beautiful healing gospel. But when I add to this the "beauty and holiness" that has appeared to me, the spiritual and moral regeneration that has come through the study of "Science and Health with Key to the Scriptures" together with the other works of our beloved Leader, what words can be found to express the fulness of gratitude that wells up in my heart?

Divine Love is the Good Shepherd.

BY G. A. M.

WHAT a great blessing is ours, when we come to the realization that divine Love (God) is leading. To know that we can trust all to the divine Mind, to feel the blessed assurance that in Him (God) we live, and move, and have our being. He is ever with us, watching over us, and if we put our entire trust in Him we shall learn that His is the right and the true way, leading us into paths of glory hitherto unknown.

In proportion as one trusts in God, one loses the sense of error, and the false illusions of hate, pride, self-justification, and self-love begin to disappear before the sunlight of Truth; a light so brilliant that it permeates and purifies the whole being, standing forth a shining light of Truth before the world. Thus is fulfilled the Scriptural passage, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in Heaven." Let us, then, be soldiers in the army of God, reflecting that sublime love,—patient, kind, meek, long-suffering,—which brings joy and peace to mankind,—a love so sweet and gentle that it makes us, in its blessed humility, love all God's children, not only those who love us, but those who do not seem to love us. There is our work, truly to love those who would seem to be enemies, to see the true child of God, and then the work will be easy. This is what will lift up humanity and advance what we are working for.

It was through divine Mind (God) that Jesus performed such wonderful cures centuries ago. He declared, "My Father worketh hitherto, and I work." Constantly trusting in divine Love, Jesus was enabled to perform many wonders and finally to triumph over death.

Could we have a higher aim than "to strive, watch and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just and *pure*"? (Science and Health with Key to the Scriptures by Mary Baker G. Eddy, p. 493.)

That same Mind (Divine Love) is with us to-day just as truly as it was with Jesus when he was on earth. God never changes; He is "the same yesterday, and to-day, and forever."

Divine Love is the light shining in the darkness, but the darkness comprehendeth it not. Remember, divine Love is ever ready to help us, no matter how dark the way may seem, to give us the sweet and comforting assurance that behind the clouds (error) the sun still shines. "In all thy ways acknowledge Him, and He shall direct thy paths."

If we live praising God, giving Him all the glory, for all the blessing He has bestowed upon us, we shall advance in Truth, our eyes will be opened (spiritually) and so shall we be enabled to demonstrate God's wonderful power. He is the Good Shepherd who has in store for us infinite blessings. Let us become worthy of them and then shall we be partakers of them.

Give God the Praise.

BY MRS. IRENE FULLER DAWSON.

IN reviewing the past sixteen months I feel that I have been slowly but surely passing through a change: from darkness to light, as it were. Materially speaking, I had been my own doctor for years. I learned something about medicine from reading, and later had some experience as a nurse. There I learned that doctors prescribed patent medicine very often in their practice. Consequently, when my health failed I took charge of my own case, with an occasional consultation with a physician who tried to help me, but his remedies did not agree with me, so I applied such remedies as I thought my system would bear.

As a result of the grip the whole of my left side was almost paralyzed. I bought porous plasters by the dozen. They did not cure me, but I thought I could not live without them. I was plastered from head to foot, causing my daughters no little amusement.

It was at this point that a music teacher came to the village and introduced Christian Science. My daughter often urged me to try it. I was willing to try almost anything, but felt that I must know and investigate first. I was afraid of being experimented on. After some little time the music teacher kindly called and gave me the address of a practitioner and loaned me some reading matter. After looking it over carefully I came to the conclusion that it would not kill if it did not cure, so decided to try it at once.

There was an obstacle to begin with. The practitioner wrote me I would have to lay aside all material remedies. That was, in my opinion, asking more than I could do. I reasoned with myself many days and thought I could give up all but the plasters. After a while I turned to the reading again. The testimonials were very convincing and I finally gained confidence and called for treatment. When the plasters were removed, my strength seemed to go with them and I was limp but resolute.

The first relief was quite marked. I could sleep and my left arm felt natural again. It had previously felt like a log, and I could get no rest even if I placed it on a pillow. After that help came more slowly, and it often seemed as if I must give up. In looking over a *Sentinel* one day I read of a man who took Job for an example: "Though he slay me, yet will I trust in him." That seemed to give me a new impetus and again the struggle went on, not because I had any desire to come back into the world again, but that if it were God's will for me to live, that I should not be a burden to my daughter.

Again I became discouraged and gave up Christian Science for a time. I was able to be up and did what housework I was able to do, but overwork brought on old troubles and I was bedfast again. I had been free from those spells for a time and it seemed hard to give way to them, so I wrote for absent treatment again. I have nothing but praise for my healer, who gave me so much encouragement and help. In the *Sentinel* or *Journal* I read that "whatever we do, we must depend on God's strength, not our own." I thought of that a while, and made up my mind to try to get up. I did it, and by resting at short intervals I stayed up. Sometimes I would take three naps during the day, but I gained by it, and have never had to give up entirely since.

The Lord has fulfilled His promise in renewing my patience and strength from time to time and leading me on to look with hope to the future.

Burned by Acid Explosion.

THIS article appeared in the *San Francisco Chronicle* of October 24, 1901:—

Berkeley, Cal., October 23.—By the explosion of a flask of powerful acid Fred T. Berry, a junior in the University of California, was seriously burned in the chemical laboratory this afternoon. While it is believed that his sight will not be affected as a result of the accident, he may be disfigured for life. The mixture which exploded was monochloracetic acid, an organic compound and one of the most corrosive acids known to chemistry.

Berry was heating the acid in a flask when it exploded from some unknown cause. The burns were dressed and bandaged in the laboratory, and Berry was taken to his home at 209 Valencia Street in San Francisco.

The young man referred to is my son. He was accompanied from the University to his home by a brother student. His friends had done everything in their power to alleviate his sufferings. He was bandaged from his neck to the top of his head, leaving only his mouth and nostrils exposed. He arrived home at 4.45 P.M., October 23, and told his mother that he must have help at once. She immediately telephoned to a healer who took up the case absently and later in the evening came to see him.

When I arrived home from my office about 5.30 P.M. my wife met me near the door with the remark that there was a slight surprise in store for me, and as she held in her hand Science and Health and came from an adjoining bedroom I readily surmised that our son was suffering from discord of some sort. Upon entering the room I saw him on the bed so bandaged that his injuries could only be guessed at.

He asked me to cut the bandages and take them off, as his head had swollen and the tight bandages seemed to cause unnecessary pain. I did so, leaving his face and head uncovered and exposing to view a very badly burned face and neck. The eyes were swollen nearly level with the eyebrows.

He then told us the general belief regarding this acid (monochloracetic); viz., that as the paper states, it was one of the most corrosive acids known to chemistry when in its natural state, and if touched to human flesh it would do its deadly work in such a manner that the full effects could not be fully realized until about forty-eight hours afterwards. In addition to this, the acid that struck his face was heated to a temperature of 186 degrees centigrade.

His mother and I at once assured him that no such action would take place in this case, as he was in the hands of the Great Physician.

The healer came about 10 P.M., and within thirty minutes the young man was sleeping soundly. In the morning the blisters had disappeared and the flesh began to look solid, although somewhat discolored. The accident happened on Wednesday. On Friday he could open the right eye and the sight was unimpaired. On Saturday he could open the left eye sufficiently to announce to us that he could see with that eye also, and on Sunday afternoon he went to Golden Gate Park to listen to the band, although to appearance he was a rough looking individual, with a patch over one eye and his face still discolored.

During the next week the skin on his face and neck all came off, leaving his face as fresh and smooth as a child's, and without a mark or scar to show the effects of this so-called powerful acid. He returned to his duties at the University on Monday, November 4, just twelve days after the accident, and with his sight unimpaired,—a living example of the healing power of divine Love.

A friend asked me what remedy we used to heal the burns. I answered that we applied a plaster of Christian Science daily, nothing else, and the smile and look of disgust on his face was really amusing, but I console myself with the thought that I can afford to let them laugh for we have that which money cannot buy, a slight understanding of this wonderful Science.

FRED T. BERRY, SR., San Francisco, Cal.

Notices.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address . . .	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

It is almost as presumptuous to think you can do nothing as to think you can do everything.—PHILLIPS BROOKS.

CHRISTIAN SCIENCE SENTINEL.

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Relatively Marvelous.

THE following interesting article of Mr. Norman E. John, by way of reply to an editorial in the *Evening Journal* of Wilmington, Del., is herewith republished. The editor of the *Sentinel* also takes the privilege of adding a bit of comment touching the editorial replied to by Mr. John, as well as an editorial in the same paper appearing in the same issue with Mr. John's article. These editorials, while expressing great incredulity, yet raise legitimate queries, and Christian Scientists are always ready to meet, from their point of view, honest and well-meant inquiries.

The following is Mr. John's article:—

To the Editor of the *Evening Journal.*

Sir:—Your issue of Tuesday evening, 17th inst., contains a very interesting editorial discussion of Christian Science, prompted by the large attendance and interest at the Christian Science lecture recently given here. Permit me to thank you for the kind treatment of the new and vastly important subject from an inquirer's point of view, and especially the spirit of it as summed up in these words: "All the above must not be construed into an antagonism of the new doctrine *per se,* but these objections occur to the average mind, benighted though it may be, and require reason and example for their removal." The attitude of the writer is of such fairness as to invite a consideration of what he regards as objections to the new doctrine. But it will not do for our friend to seek refuge behind what he terms "our inalienable right of disbelief," simply because the surprising results of Christian Science are not obtained by the processes with which reason attempts to satisfy itself as accepted methods. It is recorded of the Master: "And he did not many mighty works there because of their unbelief." Not three quarters of a century has passed, since the trustees of a school in one of our Middle States refused to grant the students the use of the schoolhouse to discuss the feasibility of railroads and telegraphs, setting forth in the reply that if the Almighty intended His children to travel at the frightful speed of twenty miles an hour, He would have revealed it through the Holy Prophets. In the few years since, the human mind has conceived of far-reaching possibilities, and now wireless communication across the Atlantic and dirigible airships are the new-born achievements. Never since the previously accepted opinion that the earth was flat was shattered, has disbelief in the possibilities of man been so bereft of power to withhold his aspirations for freedom and expansion, as at this hour. Throughout the realm of human invention and discovery, no longer do we hear the cry "Impossible!" but on every hand the query: "What next?" Then why not some discovery that more closely concerns the health and happiness of man? The editorial thus portrays human existence: "Ever since the dawn of history, man has been engaged in a constant and discouraging battle with disease. He has suffered and died, and each generation repeats the tale. We have grown to regard it as a necessary accompaniment of human life, have accepted it as an incident of our earthly career."

Because disease has been regarded as a necessary accompaniment of human life, and that it has been accepted as an incident of our career, does it more logically follow that it is part of man's inheritance and existence, than the prevailing belief for centuries of the earth's flatness preventing civilization and commercial expansion, or the world's ignorance of steam and electricity, depriving it of the great forces now in use? And if disease is part of the reality of man, why attempt to destroy it? why perpetuate the various methods of *materia medica* now in use endeavoring to cope with it?

Again, if disease is to be mastered, what system or combination of systems are there that have been able to master it? And if no material means has been devised that is able to cope with it, is there not an opportunity for a more efficient method to be found for the rescue of suffering humanity? Our editorial friend has found the answer for us. He admits that Christ healed the sick, and surely a sincere and careful study of the four Gospels and the Acts is sufficient to attest the efficacy of the Christ to meet the needs of mankind. It is recorded that the Way-shower went about all Galilee teaching in their synagogues, preaching the Gospel of the kingdom, and healing all manner of disease among the people. John also states that the mission of the Son of God was to destroy the works of the devil, and that which he destroyed was sin, sickness, and death. To his followers also was given the command to heal the sick as well as preach the Gospel; and this commission was given to his followers for all time, as recorded in Mark, 16 : 17, 18: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick and they shall recover." And two of his disciples, Peter and John, in healing the man at the gate Beautiful, lame from his mother's womb, through his name, through the understanding of the Christ, gave an example in surgery worthy of following. (Acts, 3 : 1–8.)

Christian Scientists understand that "Christ is the same, yesterday, to-day, and forever," as the Scriptures declare, and that the healing work of the Christ is understood to-day through the discovery of Christian Science by the Rev. Mary Baker G. Eddy and given in her book, "Science and Health with Key to the Scriptures." That this discovery presents a strong contrast to the prevailing systems is true, and for that very reason commands the attention of thinkers. One of the startling propositions to the material thought is this proposition, that Mind alone is causation; that matter never is. It is the demonstration of this proposition that will cause the necessary complete transformation of the mental nature and the authorities upon which they have been taught to rely. Then will it be understood how Omnipotent Intelligence, the one God, is able to heal through the power of Spirit to-day as in all ages; that where erring human mind results in discord, unerring divine Mind or Intelligence can reveal its eternal harmony, even to the relief of suffering animals as well as mankind. But this proposition of Christian Science by no means classifies "pain, disease, and the material body" as concepts of the imagination. Mrs. Eddy says: "Sickness is neither imaginary nor unreal,—that is, to the false sense of the patient. It is more than fancy, for it is solid conviction. It is herefore to be dealt with through right apprehension of the Truth of Being" (Science and Health, p. 457).

But it has yet to be learned by mankind in general that sickness and disease, as well as sin, are not part of God's perfect creation,—that reality of existence wherein He saw everything that He had made, "and, behold, it was very good."

In "No and Yes," p. 12, Mrs. Eddy says: "Disease is more than *imagination;* it is a human error, a constituent part of what comprise the whole of mortal existence,—

Digitized by Google

namely, material sensation and mental delusion. But an erring sense of existence, or the error of belief, named disease, never made sickness a stubborn reality."

Children are not dying daily while under Christian Science treatment, and the newspaper reports to which the editorial refers, have been prone to classify under the heading of Christian Science all failures not directly under the care of a regular medical practitioner; whereas Christian Science treatment is in no respect akin to faith cure, mental science, hypnotism, or mesmerism, or any of the methods where the operation of one mind upon another is attempted, the distinction of which a careful study of Christian Science soon discloses.

Christian Science is proved to be the most efficient method of healing disease. In less than a quarter of a century more than a million people afflicted with every conceivable disease have been healed by it. And when it is realized that by far the majority of these cases were those considered beyond the reach of remedies and hopelessly incurable, it begins to dawn upon the investigator "what a boon to humanity" this new doctrine is. Weekly, through the *Christian Science Sentinel,* and monthly, through *The Christian Science Journal,* well-authenticated cases of healing of every known disease, including cancer, consumption, and heart disease, are presented to the readers, which may be verified by any inquirer.

In our own city, as well as every city, town, and village throughout the land, there are living witnesses to the healing power of Christian Science.—NORMAN E. JOHN.

In the last editorial in the *Evening Journal* above mentioned, the editor, in commenting upon Mr. John's article, says: "But we still have some hesitancy in believing that because Christ healed the sick, and in certain instances the power was shown by his disciples, that it has necessarily descended to us. It is, indeed, marvelous that the idea should have been buried for two thousand years, and only rediscovered by the genius of Mrs. Eddy."

In reference to these remarks we may say, the Christian Science position is that the power exercised by Jesus is a divine power which always did and always will exist. When understood this power can be exercised now as well as in Jesus' time, or in any other period of the world's history. The old Testament Scriptures bear abundant evidence of the fact that superhuman, or divine, healing was done long prior to the appearance of Jesus. How far the exercise of this power, humanly considered, antedates Jesus' time it is impossible for us to say. A divine, eternal power is not likely ever to lie wholly dormant, but its exercise is manifested according as the human race is more or less in harmony with the divine law.

Biblical, as well as secular, history plainly shows that there have been successive epochs in the world's life when divine healing has ascended the scale to great heights and then declined to depths bordering on non-existence. This being true of past history, is it so strange that there should, in this age, be a general reappearance of this manifestation of divine power? Is not such a manifestation rather in line with past history? and is not a system of healing the sicknesses and discords existent in the world, which rises above merely physical methods into the realm of the metaphysical, only in consonance with the wonderful steps of progress and advancement in the various other activities of the age?

As to the suggestion of our editorial friend that it is marvelous that the idea of such healing should have been buried for two thousand years and only rediscovered by the genius of Mrs. Eddy, we may well ask: Is this more marvelous, from the every-day point of view, than the fact that the possibilities of electricity should have been buried through all the world's history to be discovered by an Edison within the past few years?

Is it more marvelous than the fact that after the lapse of all the known ages a Marconi should have discovered how to transmit, not only ideas, but language, without the use of wire or any connecting physical appliance whatever?

Is it relatively more marvelous than the telephone, the electric cars, the electric and other automobiles, and numerous other wonders, all of which have only recently been resurrected from the (seemingly) dead past?

Is it more marvelous than the fact that scarcely a day passes in these remarkable times that does not discover some new and startling invention of a physical kind?

It is not sound reasoning or good philosophy to maintain that progress or revelation is confined to the physical or material, and that there is no progress or possibility of progress in the metaphysical or spiritual, realm.

It is not more marvelous that metaphysical or spiritual truth should be revealed through a person than that physical or material truth should be thus revealed.

It is not more marvelous that metaphysical or spiritual truth should have been revealed through Mrs. Eddy than that physical or material truth should have been revealed through Edison, Bell, Marconi, and others.

Religious and spiritual advancement and reform have come through persons, in all the ages, as well as secular and material advancement and reform.

And what is more fitting or consistent, or accordant with past religious history, than that a great healing and redemptive era should be ushered into this wondrous age through the higher spiritual mentality of pure and virtuous womanhood?

What better fulfilment of Biblical prophecy, what grander revealment of the fulness of the *manhood* of the human race, than that womanhood should make manifest the healing and saving unction of the Holy Spirit?

Our editorial friend's queries, or objections, are argumentative and speculative. What does he do with present *facts?* How does he account for the extra-physical healing which has been done for many years through the "genius of Mrs. Eddy," and which is now being done all about him, and all round the globe? Surely the burden of proof is on him and those who doubt as he does, to show that this healing is not done in accordance with the teaching and practice of Christian Science.

The Lewis Case.

IN the *Sentinel* of December 19, 1901, wherein we published a somewhat full account of the case of Rex *vs.* Lewis, tried in Toronto, Can., we said in our introductory remarks that in this case Christian Science had a hearing upon the question of healing, before a court and jury, such as it had not had in any court in Canada.

After the publication of this number our attention was kindly called, by a Scientist of Toronto, to a case tried in the same court and before the same judge some years since, wherein there was evidence introduced of Christian Science healing. In that case there was much interesting and valuable testimony for Science. As we remembered that case it did not impress us as being so elaborate and important in this respect as the Lewis case. On reading the account of it as published in *The Christian Science Journal* of February, 1896, however, we see that it was more so than our memory had led us to suppose, and we are glad to modify our statement in reference to the Lewis case, so far as seems necessary.

We herewith republish the greater part of the former case, believing it of sufficient present interest to warrant it.

The account of this case was contained in a letter from Mrs. Isabella M. Stewart to the Rev. Mary Baker Eddy, and was published in Vol. XIII. of the *Journal,* page 469. From this we quote:—

Dear Mother:—I thought perhaps it might be interesting

Digitized by Google

to hear just a little of the proceeding in the trial we have just been meeting in the case of the student who was indicted for manslaughter, because a little boy passed away while under her treatment. It was tried at the Assizes Wednesday, December 4, 1895. The mother of the boy was first witness for the prosecution, then the father. They told how they had been led to have Christian Science treatment for their family. The father had lain for six weeks with sciatica, under one of the best doctor's care. The doctor finally said he could do nothing more, and if there were any other help to be had, to seek it. He—Mr. Beck—then sent for Mr. Stewart, and after receiving the third treatment he came down stairs. With three more he went back to work in a cold shop. That is over seven years ago, and he has never had the slightest return of it, and has never had another treatment. For about three years this student had treated in the family the different members who had required help, always with good success. Some other members of the household then testified. Following these were the coroner and two medical doctors who had made the *post mortem* examination. They claimed in their evidence that had a medical doctor been called and given the usual treatment for diphtheria the child's life might have been prolonged. When cross-questioned, they admitted that they had lost many cases of diphtheria after having applied all the remedies they knew of in the medical practice.

When the Court adjourned for luncheon the judge would not allow the jury to go out, as he said it was an important case. He ordered lunch to be brought in for them.

After the doctors had given their evidence, the lawyer for the defence arose to urge on his Lordship that there was no case. And after much debate between the lawyers, quoting copiously from the law, the judge said, were it the case of an adult he would immediately withdraw it, but the deceased having been a child he thought he would have to let it go to the jury.

Our lawyer then said he had some witnesses for the defence. Five in turn were called, all this student's patients, none of them class students. And such ringing testimony as they gave of Christian Science healing! One had been healed of Bright's disease, another of chronic dyspepsia and severe affection of the bowels. Another said her two children had been healed of serious troubles, one of them who had to wear glasses for some eye trouble caused by typhoid fever, had been treated by one of the best oculists. The child laid aside the glasses after the first treatment by this student and has never needed them since; has had no pain in eyes since, but had severe pain before. Both had been healed of throat trouble. Another had been healed, and her child also, of bronchitis and catarrh. Another of fits and various other troubles of more than twenty years' duration. Her mother had also been healed of dropsy of ten years' duration; witness said she did not think there was a more healthy woman in the city now. Her father had also been healed, after having been ill for years and unable to work. He works now from five o'clock in the morning till midnight. (He has charge of a theatre, which accounts for his late hours.) One of our students was then called and questioned very closely by the crown prosecutor, who had Science and Health, and had been complaining because none were students so he could question them about Mrs. Eddy and the book. His questions were so ably met by this student, that the prosecutor, on hearing that he was not Mrs. Beer's patient, did not want to let him give further evidence. But it was evident the judge wanted to hear further, for he stated, "The jury have now heard his evidence, so I cannot see how it can affect your case to let him finish."

When he was through, our lawyer announced the evidence for the defence closed.

It was time for the court to adjourn. His Lordship turned to the jury and said, "I think from the appearance of the jury before me I can trust to let you go to-night, and not have you locked up. That you will not talk this subject to any one, or be talked to on it till you come to-morrow morning at ten o'clock."

When they resumed the following morning and the case was called, the judge said, "Gentlemen of the jury, I find that your services will not be required to pass upon the facts in this case." His Lordship then went into a definition of the distinction between manslaughter and homicide. Continuing he said:—

"The father and mother of the unfortunate child have employed Christian Science treatment for several years, with results as you have heard them stated. They had had medical attendance for years from a reputable doctor of whom they speak with the greatest respect. They are respectable people and well able to employ medical attendance; but on this occasion, the child being ill with sore throat, they thought they would seek the services of the defendant—Mrs. Beer—and she came. She was not expected to give any medical or surgical treatment. She did not make any examination of the body, throat, or sputa. These are elements of neglect which the Crown claims go to show that she was guilty of accelerating the death of the child.

"She was not called in to lay hands on the child. Her practice seemed to consist of sitting silently in the presence of the patient. She gave no direction regarding the treatment or diet of the deceased, excepting an egg for food and that he be kept comfortable. Homicide consists in the killing of any person either by an unlawful act or by an omission. The code further provides that any one who undertakes to administer surgical treatment is expected to have some knowledge of what they do, and they are criminally responsible for any omission.

"The prisoner had not undertaken to do any unlawful act, and any one can see that sitting beside a patient would not be wrong, and she did not do anything that would harm any life.

"She was not called to give medical treatment. She was called as a Christian Scientist, to give mental treatment, and it is proven she did so to the satisfaction of all concerned."

His Lordship quoted the law relative to those who are unable to look after themselves, showing that parents or guardians are responsible for the welfare of those under sixteen years under their care.

English law provides that the father was criminally liable for not having supplied medical aid, but under the circumstances he thought it would be doubtful in this case. "It is difficult to see how any one can abet any person in the commission of an offence where nothing has been done. I hold that it has been laid down as a general principle that there can be no accessory before the fact in manslaughter. Manslaughter generally implies the absence of malice or premeditation, although there may be exceptions."

The prisoner was then discharged and the verdict of not guilty assented to by the jury and registered.

It is but fair to state there were seven cases similar to this one in the Beck family, and the six were healed and all had Christian Science treatment.

His Lordship spoke at much greater length, but I just give you what appears to me the most essential.

The writer once heard a prominent railroad man say: "When I arrived at the age of fifty years I made an inventory of my life's troubles. I found that in my life I had experienced fifty thousand troubles, and that forty-nine thousand of them were wholly imaginary."

There is much truth in this. Most of the worries of this life are imaginary—most of the troubles borrowed.

The Lectures.

At Baltimore, Md.

The genuineness of their belief that pneumonia and bad colds, as well as other diseases, have no real existence was fully demonstrated by the Christian Scientists yesterday, when upward of five hundred of them braved the furious downpour and waded the rushing torrents in the streets to listen to a lecture at Chase's Theatre. The speaker was Captain John F. Linscott, C.S.D.

Captain Linscott is an ex-Union soldier. He became interested in Christian Science some fifteen years ago and was converted to its teachings. He was a pioneer in the Christian Science movement in the West. For ten years before his adoption of the faith he was a friend of and co-worker with the late Miss Frances Willard, the former President of the Woman's Christian Temperance Union, and was a lecturer in the temperance cause. At present he is First Reader in First Church of Christ, Scientist, in Washington, D. C. He is a scholarly and fluent speaker.

Mr. Edward H. Hammond, C.S.D., First Reader of First Church of Christ, Scientist, in Baltimore, introduced Captain Linscott and presided at the meeting.

The lecture was given under the joint auspices of the First and Second Churches of Christ, Scientist, of Baltimore.—*Baltimore* (Md.) *Sun.*

Mr. Hammond's introductory remarks were as follows:—

We have assembled this afternoon to listen to a lecture on Christian Science? Thrice before has the invitation been generously responded to. Now again, it gives us pleasure to invite you to listen to a presentation of our ideas by one of our accredited lecturers.

The Christian Scientist believes in the Scriptural injunction, "Let your light so shine before men." They seek not to appropriate to themselves the great good which they know they possess, but they seek in brotherly love to give out that good, that all mankind may receive its benefits and may rejoice with them and glorify the Creator and Father of us all.

Jesus the Christ, he who spake as never man spake before, gave us an infallible guide by which we might judge all things. "By their fruits," said he, "By their fruits ye shall know them." "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." By its fruits (good works) does Christian Science ask to be judged, and what have been its fruits since genuine Christian Science came to this community eight years ago? Its fruits, or good demonstrated, are seen in disease healed, health established, sin destroyed, happiness and peace bestowed upon many individuals. It has brought pure joy to many a household and diffused its glad presence among all its inmates. It has awakened many a one among us out of an aimless life and given them a purpose such as they never had before, clear and bright and happifying. It has taken many world-weary, sorrowing men and women, dissipated their gloomy darkness, and left them with a sense of heavenly light and peace which they well knew and felt came from God alone. It has awakened a keen interest in and love for that Holy Book, the Bible, so much misunderstood to-day, as to make that book an object of daily study and daily delight. It has dignified and exalted manhood and womanhood by revealing its inherent nobility and grandeur of character, its gentle sweetness, its strong purposes, heaven-born, its high resolves and capabilities, and brought out the sense, in some degree, of what it means to be a child of God.

If such are the present fruits of Christian Science, how great will be the harvest when it becomes more generally known and practised!

At Wilmington, Del.

Nearly a thousand of Wilmington's representative people and visiting Christian Scientists from Philadelphia, Baltimore, Chester, and West Chester, attended the lecture given in the Opera House yesterday afternoon (December 15) by Carol Norton, C.S.D., of New York City. The lecture was given under the auspices of the local Christian Science Church—First Church of Christ, Scientist, of Wilmington, worshiping at 917 Gilpin Avenue.

The stage was tastefully decorated with a large number of handsome palms and with a beautiful centre-piece, consisting of a large bunch of American Beauty roses, a thoughtful gift from the members of a sister church in Brooklyn, N. Y.

William H. Savery announced as the presiding officer of the afternoon, Norman E. John, C.S.B., formerly of Brooklyn, N. Y., but now First Reader of the Wilmington Church. Mr. John made the following introductory remarks:—

Dear Friends:—Although comparatively a new-comer in your city, I do not feel a stranger among you. Indeed, the tie of a universal friendship is already established when we analyze the common motive that has brought us together this afternoon, the seeking after Truth—the Truth which necessarily must be because of the unceasing yearning of the human heart for it, the truth about God and man, and man's relation to God and to his fellow-men that satisfies. It may be that some of you are satisfied, perfectly satisfied with yourselves, with your environments, with your ability to uplift humanity, to minister to the broken-hearted, to relieve the suffering and the distressed. But are not most of us more keenly associated with the woes and miseries on every hand and the seeming inability to meet them?

A long personal experience of such close association in our home: a mother for twelve years a helpless and bed-ridden sufferer as a result of sunstroke, sisters broken down with the care of the invalid mother, a father, patient, but aging under the burden of years, which our religion or the loving efforts of physicians failed to relieve, brought us to where we earnestly prayed for those benefits from Him who, in the words of the Psalmist, "forgiveth all thine iniquities, who healeth all thy diseases."

These blessings came through Christian Science, and in the ten years devoted to sincere study and practice of it, health and God's sunshine of happiness was restored, and an increasing ability to help our brother man has been attained.

The lecture this afternoon will treat of the rise and progress of Christian Science, which has lifted the burdens from thousands of earth's weary children. The lecturer needs no formal introduction to you. This large attendance betokens an appreciative interest in his appearance again, and the truth he so ably presents. We now have the pleasure of listening to Mr. Carol Norton, C.S.D., member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston.

Mr. Norton spoke at considerable length, concluding his remarks as follows:—

"If simplicity is the highest form of eloquence it is certainly the truest evidence of inspiration and truth. Intense loyalty to the spiritual significance of the Bible, firm adherence to the teachings and example of Jesus Christ, unchanging spiritual attachment to the idea of one God, one brotherhood of man, and the power of the spiritual over the material and physical, these character traits are conspicuous in the life and teachings of Mary Baker Eddy. These virtues of Christian womanhood account for her dignified success as a spiritual teacher, and give her rank as the foremost religious leader of Christian history among women."

The Morning News.

Among the Churches.

New Church at Cleveland, O.

Christian Scientists gathered yesterday (December 22) for the first time in Cleveland in a place of worship of their own, the beautiful First Church of Christ, Scientist, being occupied yesterday morning. The building is one of the most beautiful places of worship in Cleveland. It has been under construction for more than a year and a half, and is located at the corner of Cedar Avenue and Kennard Street.

There was no formal opening of the new edifice, the services being the ordinary services of the sect, with the exception of an address of welcome to the new building by the First Reader, E. A. Merritt, who, with the Second Reader, Mrs. Lida S. Stone, conducted the exercises both morning and afternoon. The address of welcome was delivered at the morning service at eleven o'clock. The services were opened with an organ voluntary by Miss Mason, organist of the church, followed by an anthem by the quartet choir. In his address of welcome, which followed, the First Reader said in part:—

"We have been at work on this building so long that it is natural we should be highly gratified that we have at last realized the object for which we labored, a place of worship that is our own and one that is fitted for our meetings. It is with feelings of joy that we know that now we have a building in which we can meet and worship in the midst of surroundings that are so appropriate and beautiful. In this building we shall more and more perfectly understand the relationship between man and his Maker through the teachings of Christian Science."

The congregation joined in singing the hymn, "Shepherd, show me how to go," of which Mary Baker G. Eddy of Concord, N. H., the Leader of the Christian Scientists, is the author. Reading from the Scriptures by the First Reader was followed by silent prayer, after which the Lord's Prayer was repeated by the congregation, the First Reader giving the spiritual interpretation from the text-book of the Christian Science faith, "Science and Health with Key to the Scriptures." After another anthem by the choir there followed the Lesson-Sermon, which consisted of readings from the Bible by the Second Reader and quotations from the Christian Science text-book, read by the First Reader. Mrs. Wadsworth, soprano of the choir, sang a solo and the First Reader repeated the Scientific Statement of Being from the text-book and the correlative Scripture from 1 John, 3, and pronounced the benediction. The service in the afternoon was similar to that of the morning.

Sunday School services were held in the main auditorium of the church immediately after the morning service, and the Christmas presents to the children were distributed. Several hundred children attended the Sunday School, and the church services were attended by between seven hundred and one thousand persons. At the Sunday School service both readers of the church made brief addresses, as did also the superintendent, Mrs. C. E. Carpenter. Subsequent Sunday School services will be in the basement floor of the church building.

Novelties abound in the new edifice of First Church of Christ, Scientist, at the corner of Cedar Avenue and Kennard Street, the interior of which has just been completed. The exterior will not be finished for some time, owing to the inability to do the ornamental stone work of the main front on Kennard Street in the severe winter weather. This is the first Christian Scientist house of worship ever built in Cleveland. Heretofore the Christian Scientists have worshiped in rented halls.

The new church building is of purely Corinthian architecture, and although not very large, the size being about sixty by ninety feet, it is a very imposing edifice, and the interior is beautiful.

The church has a membership of two hundred and twenty. Services are to be held morning and afternoon on Sundays, and Wednesday evenings are to be given to testimony meetings. Readers are elected each year.

The cost of the new church is estimated at between $50,000 and $75,000 complete.—*Cleveland* (O.) *Leader.*

Christian Science at Chillicothe, Ill.

First Church of Christ, Scientist, of Chillicothe, Ill., holds its regular services at 10.30 A.M. and 7.45 P.M. on Sunday, and on Wednesday evening a testimonial meeting at 7.45 to which all are cordially welcome.

Having received a great deal of help from attending these meetings and hearing these evidences, I wish to relate some of the testimonies given at one of their meetings.

An elderly gentleman got up and said: "It is not very easy for me to get up and speak before a crowd. It takes a great deal of moral courage for me to rise and give my testimony, but I wish to acknowledge that the religion through which you can prove and demonstrate that there is a God who heals and cures humanity's aches and pains is the religion for me, and this Christian Science has done and proven to me. Seven years ago." he stated, "I was taken suddenly ill with a disease that manifested itself in the lower extremities and left my feet ice cold. This sensation reached almost to my knees, which to a great extent prevented me from sleeping. I tried almost every material remedy and consulted the best physicians, but to no avail, and this fall I am glad to state that, through the study of Christian Science, I am perfectly free from this most miserable feeling." He also gave other testimonies as to the efficacy of Christian Science healing.

Another gentleman said that the week before he was suddenly taken with a severe attack of the grip. Everybody around him noticed his suffering condition and hoarseness. He called upon a Christian Science practitioner and one treatment enabled him to return to his work well, to the amazement of his employees. He also stated that at one time he was a victim of rheumatism, being perfectly helpless for a long period of time, and that he was entirely healed by Christian Science treatment; that he was also healed of the tobacco habit, having been addicted to it for years, and that it had not caused him the least inconvenience to give up this habit.

A lady testified that fifteen years ago she first heard of Christian Science through a lady who had been healed of very severe headaches. "I became interested at once, and I had a desire to know more about it. Some time after this, whilst attending a church wedding, my attention was arrested by the appearance of a lady in the audience whose face showed the most beautiful expression I had ever seen, although one could hardly say that her features were beautiful. Upon inquiry I was told that she was a Christian Scientist. My interest in Christian Science was awakened more than ever. On seeking an opportunity to converse with this lady, I was told that she had been a terrible mental sufferer, and at one time she was upon the point of being sent to an insane asylum. While her husband had gone away to make the necessary preparations for installing her in the institution, Christian Science was brought to her attention and the book, Science and Health, was given her to read. She became so interested in the perusal of its pages that for two days and nights she secluded herself in a room and did nothing but read. When she returned to her family they were amazed to find her sound in both mind and body."

Another lady said that through the study of Science and Health the Bible has become a most precious book to her and a very present help in time of trouble. M.

Christian Science in Holland.

I always had a desire to visit my relatives in Holland, and my aunt has been especially eager to see me of late years. There seemed no way in which I could go, but each time the desire came I tried to know that if it were right, divine Love would provide the way, and those words, "Divine Love always has met, and always will meet, every human need" (Science and Health with Key to the Scriptures by Mary Baker G. Eddy), would come to my thought.

In April I received a letter from my aunt, saying that in a most unexpected manner she had received a sum of money, and wrote immediately to present it to me for the purpose of visiting her for three months. She wrote: "Our Father in heaven, who knows our thoughts and leads us on our way, brings always help when we should hardly think it possible." I knew that the prayers had been answered. The question then came, would it be right to leave my duties here for so long? I soon saw it was a demonstration of divine Love, and only good could come of it.

Another way was opened for me to visit London, where I had the pleasure of attending Christian Science services on Communion Sunday. I then thought I would not have an opportunity to attend services again until I returned to the United States, but was mistaken.

I went to The Hague, and before long those who were interested in Christian Science found me through the *Journal*. There were seven women meeting together each week to study the Bible-Lessons. An American woman, who now lives in The Hague, first received benefit from Christian Science in Chicago, told of it, and thereupon two others sent for the text-book, Science and Health, and a *Quarterly*, and began the study of the lessons.

They were very eager to gain more understanding and willing to follow in the true way. All could understand and speak English, and in trying to help them I knew that there was only the pure language of Spirit. I soon learned sufficient German to bring out some thoughts more clearly to those not so familiar with English, proving how readily I could acquire new ideas through Mind. Soon several others joined us. Some were healed and many became interested. All were very grateful for any help given them.

I found although I was on a visit, there was work to do wherever I was, that "the field is the world," and that I have only to sow the good seed.

Since coming into Christian Science six years ago, I have never turned to anything else, and it has comforted me in sorrow and trouble as nothing else ever could.

I wish to express my gratitude and love to our Leader, Rev. Mary Baker G. Eddy, who so wisely and lovingly points the way and has given us our text-book, "Science and Health with Key to the Scriptures," and also my appreciation of the *Journal* and *Sentinel*.

Miss K. L. G., Keokuk, Ia.

Church Work at Austin, Tex.

First Church of Christ, Scientist, Austin, Texas, is rejoicing over the progress that has been made in the last few months. For a long while it seemed as if the local work could not get well under way, and this was largely due to the fact that there had been much false teaching here under the name of Christian Science, and much spurious literature had been distributed, both of which served to prejudice the people against the true Science.

The true concept of Christian Science is now dawning on the people to a greater extent than ever before, and some of the most prominent people of our city are reading "Science and Health with Key to the Scriptures," and receiving treatment as a result of convincing demonstrations that have recently been made here in Christian Science.

The beautiful harmony that prevails in the church is especially gratifying. It has been learned through experience that it is more necessary and desirable to have a Christian Science Church strong in loyalty and spiritual unity, than to have it strong merely in numbers. After this had been learned through trial and demonstration, the increase came spontaneously, so that at our last admission of candidates the number of loyal Christian Scientists received into the church exactly doubled the previous membership.

Robert L. Ziller.

At Fort Wayne, Ind.

Communion Sunday, December 8, 1901, marked a glorious epoch in the history of First Church of Christ, Scientist, in Fort Wayne, Indiana. Thirteen persons were received into full membership and the entire services were of such a deeply impressive character that visitors and members alike were loath to leave the feast which they had enjoyed so much. Our church has prospered and Christian Science has gained a foothold in this community such as to command the sincere respect of those who do not coincide in our belief. Our Wednesday evening meetings are very largely attended, testimonies are rapidly given, and the meetings are often prolonged in order to give all who wish an opportunity to testify to God's healing power. Our membership includes twenty-four students of Christian Science and eighteen members of the Mother Church.

John W. Vordermark, *Clerk*.

New Quarters at Binghamton, N. Y.

The Second Church of Christ, Scientist, which was holding services at 87 State Street, has moved to 39 Court Street, where services will be conducted every Sunday morning at 10.45 also every Wednesday evening at 7.45.

The room will be open every day from 2 to 4 P.M. as a public reading room, where any interested in Christian Science, or any desiring to investigate the subject, will be welcomed. All the publications of the Rev. Mary Baker G. Eddy, the Leader and Founder of this movement, and the publications of The Christian Science Publishing Society will be found here for the use of visitors, and for sale.

The Binghamton (N. Y.) *Leader*.

The Rockford Church.

The organization known as the Christian Science Church, has had a year that is pointed to with pride. The income has been more than sufficient to carry on the work of the centre and also to keep open a reading room where the literature of the society is displayed for all inquirers to consult.

The church year has been closed with a small balance on the right side of the ledger. The membership has increased one third in the year.

The free reading room has been moved from West State to North Main, where handsomer quarters were secured and more room available. Meetings are held each Sabbath and on Wednesday evenings. The attendance at the services has been on the increase, and the old members are encouraged at the interest they feel is being taken in their views.—*The Morning Star*, Rockford, Ill.

Oconomowoc, Wis.

First Church of Christ, Scientist, of Oconomowoc, Wis., was organized in June of this year with fifteen members. Articles of incorporation were filed with the Secretary of State, and a charter granted.

There has been a Christian Science Association here for some years, and it became evident that for Truth to be manifested in full, the law of obedience must be fulfilled: "If ye be willing and obedient, ye shall eat the good of the land."—Miss Mary E. Wallace, *Clerk*.

Testimonies.

Out in mid-ocean, on the Hawaiian Islands, a small band of Scientists meet regularly for the Sunday service and also the Wednesday evening meetings, at precisely the same hour by the clock that thousands of other Scientists in the world hold their meetings.

Our aim, object, and hope is to benefit the human race through Christ-Truth, to enlighten, to heal, and to save. Although our work is more than ordinarily slow, yet we are at times blessed and uplifted by some good healing.

Some eighteen copies of Science and Health have been disposed of and as many as five copies are kept continually in circulation. A small, well-kept library affords a continual supply of Christian Science literature. A complete set of Mary Baker G. Eddy's works is kept on hand for reference.

The attendance at our meetings is from six to seventeen. We are often made glad by visits from prominent people from all parts of the world. We are cheered by the thought that a mighty wave is sweeping the continent, and that, though small in membership, we are well beloved and never forgotten by our sister and brother Scientists. We pause often in our work to think of the builder who strove alone to lay the first stone of our mighty edifice, and though often beset by error we press onward and upward.

Among the cases of healing through Christian Science, in Honolulu are the following:—

A case of valvular heart disease was healed instantly and the person was lifted out of distressing financial conditions at the same time.

Another was a baby afflicted with eczema. After one treatment the humor dried up and the scales fell away, leaving the child clean.

A boy was healed of pneumonia in a short time. When treatment was given he was semi-conscious and breathed with great effort.

A mosquito netting draped over a bed caught fire from a lamp, and as there was no opportunity to put the lamp down for even a second, the right hand was used to strip the netting in order to quench the flames. Three times the hand grasped the burning net, at first with some fear, but the child sleeping beneath bade us inwardly not to fear. The hand though singed brown between the fingers, was free from blister or burn, although it was several days before the burnt odor disappeared.

A short time before the above occurrence, the writer had been asked by a friend if she was prepared to be tried by fire.

As our tithe to the mighty storehouse, we offer these lines, and also as an assurance to our multitude of friends that we are busy in our Father's vineyard, endeavoring to emulate the example of a faithful disciple who has pointed out the way; remembering that "speaking the Truth in love," we "may grow up into him in all things, which is the Head, even Christ."

MRS. MARY F. PAGE, Honolulu, Hawaii.

Shortly after I became interested in Christian Science, I was doing some work out on the road as a traveling salesman, and sometimes I would stop at a boarding-house for about two weeks. At one place where I stopped there was a lady who was unable to sit on the porch in the evening. Along in the middle of the summer the evenings were very delightful and the rest of us would be enjoying them very much; but she had a belief that if she got a draft of air, it would cause her great suffering, so she had been compelled for several years to sit inside. I was there only a few days when the subject of Christian Science came up and I talked with them a little about it. Within three days this lady was able to sit on the porch. She is now a loyal Christian Scientist and is entirely healed of that trouble along with several others. She had worn glasses quite a while, and was enabled to remove them.

Another lady suffered from severe throat trouble. She got the books and began to read them, and with what little I explained to her she was healed of the throat trouble.

A little girl was going into consumption. Another daughter in the family had passed away with it a few years before. This little girl was unable to go out and play as other children, she could only go to school now and then. Under Christian Science thought, she has become strong and hearty.

A gentleman at this same place, because of a little explanation of Christian Science, bought a copy of Science and Health, and within two weeks he was healed of the tobacco habit that had been with him for forty years. He had smoked at the rate of ten cents' worth of tobacco a day. He had no more desire for it. He was beginning to overcome various little troubles that came up.

So Christian Science is spreading in that way. It is mentioned by those who know of it, and others take it up, and the result is that they receive the benefit.

H., Cleveland, O.

I thought it might be of interest to the Field to quote from a letter which I received from a student in Bracebridge, Ont., where Mr. Norton lectured a short time ago. It is one more evidence of the manner in which the Truth is being received in the many fields where the work is being carried on by loyal students, and the public is hearing the audible sound through our Board of Lectureship.

The letter goes on to say, "I wish you could have seen the town people after the lecture, how pleased everybody was. One man said if he could hear such preaching as that he would be a Christian. Another said, if that were Christian Science, he had always been one, for that is just what he had always believed. The public listened for two hours to Mr. Norton's address, and they say they could have listened two hours longer. Oh, but they are hungry at last for the Truth! They say now they must have the lecturer back again if they have to pay for it themselves. I tell them to get the book (Science and Health), they will find it all there. We had the thinkers of our town at our lecture, and with one accord they say it was the best lecture ever given in town. The lecturer's kind manner won for him friends among the best. Although there are only a few of us, we had enough money to cover all expenses and a trifle over."

Reports like this are very gratifying, and students who have worked as loyally for the Truth as this little band must always meet with success, for it is written, "them that honor me I will honor."—MRS. I. M. STEWART.

When I was ten years old I had a heavy cold which left me with a very bad cough. I was attending school at that time, but it was not long before I had to remain at home altogether. Everything troubled me. I suffered with such headaches that I was not able to study my lessons. The doctor advised me to stay out of school. I took a great deal of medicine, one bottle after another. Then I went to another doctor, who told me I must be careful or I would get consumption. I got tired of taking medicine, for I coughed just the same, no matter what I took.

It was last April when I first heard of Christian Science and thought I would try it. My mother took me to a healer in Philadelphia, and in six weeks the cough, that had troubled me for nearly three years, had left me entirely. I am thirteen years old now, am attending school again, and am well and happy. I am very thankful to God and my kind healer who have done so much for me.

TERESA SCHULTZ, Trenton, N. Y.

Religious Items.

There is a man not far from any one of us who is making a success of life. Yet he has not wealth, social position, nor political preferment. He is a very commonplace, every-day sort of a man, yet he is the freest man in the community. He owns his home, though it is but a little one; he has two hundred and thirty-seven dollars in the bank to use in case of emergency; he has a position where he earns a dollar and seventy-five cents a day for nine hours' work,—a work he likes to do; he has his evenings for work in his little shop in his cellar, or for reading in his little library, or for attendance upon his social and political duties. This man laughs a great deal because he is contented and happy, and his especial joke is upon those who have more than he does because of their limitations. He says, "There is my friend in the big house over there; poor fellow, he can't go out until his coachman is ready for him. I can go at any time; he is such a bother at Christmas time. he has so much I do not know what to give him, whereas any little thing gives me pleasure. When I get a little bunch of violets my whole house is glorified, but it takes the product of a whole conservatory to make any impression on his house or him. Poor fellow he has a hundred dollars to my one, but I get as much fun out of my one as he does out of his hundred, and I don't have half the care and responsibility. My house is going to be just as full of Christmas joy as his even though it does not hold as much. I am going to wish him a merry Christmas, conscious of what a lot it costs him to be merry and thankful that he has enough to pay the bill. When he wishes me a merry Christmas, for he will, he is going to catch his breath and wonder if I have enough to be happy on!" And so on. There is a man in every community whose heart is the abiding place of contentment—or there should be.

The Universalist Leader.

With the Golden Rule any scheme will work; that is to say, any scheme will work which can be turned about, so that the parties affected will change places. The question raised by the Golden Rule concerning any plan of action is, Will it work both ways? is it as good for the people at one end of the line as it is for those at the other? The Golden Rule calls for the ordinary operations of common sense and the demands of fair play. He who says that governments cannot be managed under the Golden Rule, and that business cannot be transacted in that way, does not know men, and is not intelligent enough to do business and get the best rewards for doing it. Fair play, always in the long run, makes business easier and more profitable. The men who do not believe in the Golden Rule never tried it. It is a cheerful sign of the times that the rulers of the world are beginning to see, and some are beginning to say, like our own President and Secretary of State, that no nation can get any permanent advantage out of business relations which tend to enrich one nation by impoverishing others. Mutual trust, mutual benefit, and a wide community of interests are now recognized as necessary elements of any general prosperity stable enough to ensure the well-being of the family of nations and of each individual member of it.—*The Christian Register.*

HEART-KEEPING.—Heart-keeping is very much like housekeeping. There must be continual sweeping out of dirt and clearing out of rubbish—a daily washing of dishes, and a perpetual battle with all sorts of vermin. If heart-cleaning could be done up once for all, then the Christian might discharge all his graces, and have an easy time of it. And just because the assaults of subtle temptations are so constant, and the uprisings of sinful passions are so frequent, and the task of keeping the inward man what it ought to be is so difficult, many a one who begins a religious life gets discouraged and makes a wretched failure. The question with every Christian is: Shall these accursed Amalekites of temptation burn up all my spiritual possessions and overrun my soul? Shall outward assaults or inward weakness drive me to discouragement and disgrace me before my Master and before the world? Or shall they drive me to Jesus Christ, who will give me the victory?

THEODORE L. CUYLER, D.D.,
In *The Examiner.*

An essential difference between Christianity and the ethnic faiths is that every other religion says: "Do good, practise righteousness, in order that you may obtain the favor of God." Christianity says: "Do good, practise righteousness, because you have the favor of God." Christianity is primarily a revelation of the grace of God to sinful men, and only those who accept this grace can be responsive to the distinctively Christian motive. "Work out your own salvation with fear and trembling," writes the Apostle Paul, not that God may work in you, but because He is working in you. Again he writes: "Having therefore these promises, beloved, let us cleanse ourselves from all defilement of flesh and spirit, perfecting holiness in the fear of God." He does not say, let us cleanse ourselves in order that we may obtain the promises, but He makes the present possession of them the ground of appeal for a purity that corresponds to them.—*The Watchman.*

Most of all do we need constant fellowship with Jesus Christ. If some of you have been so prospered in life that you have never for a moment lost heart or hope, that you never have seen occasion to doubt or fear, let me tell you life will have for you, as for others, its valley of the shadow at last. But why was not Jesus one of the disappointed? If ever a man in the world had a right to be a pessimist, it was he. When he found that the world did not want him, that the rulers of the state had no place for him, that the Church of Judæa, that God had been training for fifteen hundred years for his coming, did not want him, why was he not in despair and hopeless? Nay. He said: "I am not alone, but the Father is with me." Church and State might be against him, all the powers of earth and hell might be against him, but the Father was with him.

The Standard.

THE STRENUOUS FAITH.—*I believe in the Fatherhood of God.*

I strive, then, to live with Him as the child of His love and in my every need I turn to Him in childlike faith and trust.

I believe in the Brotherhood of Man.

I strive, then, to walk with all men as brothers in the sight of God as our Father.

I believe in the Leadership of Jesus.

I strive, then, to follow him, and to make the spirit of his life my guide.

I believe in Salvation by Character.

I strive, then, to live a pure life, and to keep my mind and heart open to every appearance of truth or beauty or love to welcome it, that I may grow into the life divine.

I believe in the Progress of Mankind Onward and Upward Forever.

I strive, then, with all confidence; and, putting aside all fear or worry or evil thought, I expect new light, await the larger vision, and so would pass from joy to joy in the life everlasting.

OLIVER JAY FAIRFIELD.

The attempt to introduce so-called "business methods" into the work of procuring money for the support of churches may easily be pushed so far as to defeat itself. The man who seeks to raise money for a business enterprise appeals to a very different class of motives from one who is seeking to induce people to give for missions or church support. In some respects the more business-like you make the latter the less money you will get. Mary of Bethany, in anointing the Saviour's feet, represents the Christian spirit of beneficence. Judas took a thoroughly business-like view of the situation.—*The Watchman.*

Most of our energies in recent years have been given to trying to save the Church. Let us forget the Church for a while and try to save men. The Church that saves the lives of men will be saved by the men it saves. Church organizations are the unexpected results of their founders. Jesus did not try to found a Church. He came to set the captive free.—REV. L. M. POWERS.

Don't measure God's mind by your own. It would be a poor love that depended not on itself, but on the feelings of the person loved. A crying baby turns away from its mother's breast, but she does not put it away till it stops crying. She holds it closer.—GEORGE MACDONALD.

Take the trouble to spend only one single day according to God's commandments, and you will see yourself, you will feel by your own heart, how good it is to fulfil God's will (and God's will in relation to us is our life, our eternal blessedness).—FATHER JOHN.

A calm, restful temper grows as self is learning to lose itself in God. Such grace tells gradually on the daily life; even the minutest detail may be brought under the power of God, and carried out in union with Him.—T. T. CARTER.

God is wholly good, if good at all; and those who hope in Him will be wiser if they hope with all their hearts than if they hope with only half their hearts.

WILLIAM R. HUNTINGTON.

If God is really preparing us all to become that which is the very highest and best thing possible, there ought never to be a discouraged or uncheerful being in the world.—HORACE BUSHNELL.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa.*

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each $3.18
Two to Twelve books to one address, each, prepaid . . 3.00
Twelve or more books to one address, each, prepaid . . 2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75
Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . . 2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion: 132 pages. Price by mail, $1.06; $5.00 half dozen: $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen: $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen: $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers: 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15: 50 copies to one address, $2.25.

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass. U.S.A.

SEPTIMUS J. HANNA, C.S.D. Editor. CAMILLA HANNA, C.S.D. Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety-five cents.
Twenty-five copies or more to one address, one year, each copy, ninety cents.
Fifty copies or more to one address, one year, each copy, eighty cents.
For Foreign subscriptions add, for postage, fifty cents per copy to rates given.
Six months' subscriptions received at half the above rates.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.
Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., Post Office as second-class mail matter.

Items of Interest.

National.

The census bureau has issued a report announcing that the population of the entire United States, including all outlying possessions, was 84,233,069 in the census year 1900. This is itemized as follows:—Continental United States, or United States proper, 75,994,575 (heretofore announced); Philippines, 6,961,339, being the estimate of the statistician to the Philippine Commission; Porto Rico, 953,244; Hawaii, 154,001; Alaska, 63,592; Guam, 9,000; American Samoa, 6,100; persons in the military and naval service of the United States outside of the territory of the United States proper, 91,219. The report announces that the twelfth census only extended to Alaska and Hawaii outside of "continental United States," but that the figures for the rest of the United States domain are taken from the best available sources.

The total population of the United States at the close of the nineteenth century was about 84,250,000. As the population of the United States at the beginning of the century was about 5,333,333 the nation has grown nearly sixteen fold in one hundred years.

There are but three countries which now have a greater population than the United States, viz.: China, the British empire, and the Russian empire. France is the fifth country of the world in order of population, with about 83,666,666. Of these over 25,000,000 are in African dependencies, nearly 17,000,000 in Asia, and 2,000,000 in Madagascar. These five most populous countries, together include over two-thirds of the estimated population of the world, which is placed by the best authorities at between 1,500,000,000 and 1,600,000,000.

If the plans of the Navy Department are carried into execution, the United States will build a town at Olongapo, in the Philippines. Such action must be taken in order to provide labor for the naval station which is to be established at this point.

Plans for the town are now being prepared by Rear Admiral M. T. Endicott, chief of the Bureau of Yards and Docks, who pointed out to-day that many shipbuilding corporations have been compelled to build towns in the vicinity of their plants. They rent the houses at a nominal figure to their employes. The latter elect their mayor and other officers. In the Philippines, naval government will probably be exercised in the town to be located at Olongapo. The plans of the department also propose the construction of a railroad to connect Manila and Olongapo.

If Congress follows the recommendation of the War Department, commerce between the United States and the Philippine Islands, and among the islands themselves, will be thrown open to foreign bottoms for an indefinite time. Already there is pending in the House legislation looking to the exemption of traffic between the Philippines and the United States from the operation of the coastwise shipping laws, which require all trade between United States ports to be carried in American bottoms. At the instance of the War Department this measure will be amended so as to place the interland traffic on the same footing. Meanwhile, pending conclusive action by Congress, the treasury will continue the order suspending the application of the coastwise shipping laws to Philippine commerce.

Hon. Patrick A. Collins was duly inaugurated as Mayor of Boston, January 6, 1902, the oath of office having been administered by the Chief Justice of the Supreme Court, Oliver Wendell Holmes.

Foreign.

A despatch to the New York *Herald* from London says that many people arose early and went out of their way to make purchases of the new penny and half-penny stamps bearing the king's head, which were put on sale for the first time on New Year's Day. A number of ardent philatelists waited until midnight on Tuesday at the general postoffice, and began asking for the new stamps as soon as midnight struck. In many branch offices in London the scene early in the morning was unusual. Small, ragged urchins went up to the counters and asked for a penn'orth of the new stamps. Better dressed folks declined the old and insisted on the new issue. Frequently the supplies were exhausted.

The commissioners of the North lighthouse in Scotland have decided to adopt wireless telegraphy as a means of establishing communication between the mainland and certain of their lighthouses. The first installation will be made at once on the Flannan islands, about sixteen miles from the west coast, off Lewis, which are practically the first land sighted by vessels coming from America. The installation is being made in conjunction with Lloyds' shipping agency, and will be of the Marconi system.

The Porto Rican legislative assembly has passed a joint resolution ceding to the United States a naval station in Porto Rican waters. The policy of the insular government has heretofore been to claim lands, the titles of which were disputed by the federal and insular governments, hoping to sell them to the Navy Department. Porto Rico is now alarmed lest the naval station be located at St. Thomas, D. W. I.

Industrial and Commercial.

A private demonstration was made in Washington, D. C., January 1, 1902, of an invention which authorities on cotton and eminent chemists say is the greatest stride forward in the cotton industry since Eli Whitney invented the cotton gin. The inventions deal with cotton seed and cover all steps in its treatment from the time it leaves the gin until its conversion into refined oil. The process makes possible the abandonment of six separate operations requiring as many intricate machines, delinting and hulling the seed by a secret chemical process in twenty minutes as compared with hours under the old mechanical process; conversion of all the lint and hulls into paper stock worth about two cents a pound, and the production of refined oil in three steps occupying only eighty minutes, as compared with ten separate operations occupying many hours under the old method.

It is claimed that the new process not only minimizes the time required, but reduces the cost fifty per cent; also that the hulled seeds are rendered useful as a food product to be roasted as peanuts are roasted and placed on the market in the same manner, and to be ground into meal as a substitute for the cereals.

Secretary of Agriculture James Wilson believes that the day is not far distant when the United States from an agricultural point of view will be absolutely independent of every other nation on earth. He believes that developments in this line in the near future will prove that the soil of this country is adapted to the raising of every agricultural product which the United States is now forced to purchase abroad.

The total of German exports to the United States during the year 1901 amounted to $99,616,731, a decrease of $3,567,922 from those of 1900, due entirely to the reduction of sugar exported to the United States. In 1901 this product was exported to the value of $7,827,349, as against $16,332,552 in 1900. The increase in merchandise exported last year to the United States, other than sugar, amounts to $4,937,280.

With the greatly increased olive output, the prices of California olives and olive oil will be much lower than hitherto. Olives have retailed in Los Angeles at twenty-five to fifty cents per quart. Oil has cost $1 to $1.50 per bottle. In gallon tins California oil has sold at $3.50 to $5. This year the price of California oil and olives is likely to compete sharply with the imported product.

The Union Steel Company is to build two blast furnaces, a group of open hearth furnaces, and an immense amount of steel structural work, which will cost several millions of dollars, at Donora, twenty miles from Pittsburg. The capital invested is over $14,000,000. Thousands of men are to be given employment. The Mellons and H. C. Frick are heavily interested in the concern.

The Lake Shore & Michigan Southern Railroad Company has advanced the wages of its fifteen hundred yard conductors and yard switchmen between five and six per cent. This means about thirty thousand dollars per year. The company may next give an advance to engineers and firemen. Its trainmen received an advance several months ago.

General.

Professor George E. Hale lectured to the Society of Arts recently on "The New Star in Perseus." He gave probably the most complete exposition possible at this stage in the investigation of a mysterious body, the study of which has taxed the astronomers for nearly a year. Professor Hale showed a profusion of pictures on the screen, the fruit of work with the 40-inch telescope, and of the new 24-inch reflector, almost the only instruments of use in the study of the star.

The variations in its light were well shown, and particularly the marvelous changes in the position of what appears to be a nebulous satelite of the star. The data on which the announcement of its remarkable movement was made was the striking exhibit. The computed velocity of the movement indicated a minimum of fifty thousand miles a second, a rapidity in the translation of material matter beyond any available comparison, the most rapid estimate available thus far being the particles concerned in the radiations from the cathode of the X-ray apparatus, to which a movement of nineteen thousand miles is assigned.

There was some evidence, however, based on the spectroscopic data that indicated the velocity of light—186,000 miles an hour—for the movement, a velocity for ponderable matter well-nigh inconceivable even to an astronomer. The speaker also discussed the several theories advanced for the phenomena, none of which, however, have yet won acceptance among those qualified to judge.

Nathan Stubblefield, the local electrician, who claims to have invented the wireless telephone, gave a practical test of his system. Messages were successfully received at a distance of a mile. Stubblefield believes he can soon send and receive messages at any distance. The apparatus used is of his own make, save for the receivers.

William E. Curtis writes in the Chicago *Record-Herald* that Germany has the best educational system in the world.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

What Then?

A RECENT number of *The Outlook* (N. Y.) publishes the following interrogative poem by Herbert Newton Casson:—

When the mind is mapped as streets are—row on row;
When the heart is tamed from Love's unreasoning throe;
When the poet's winged fancy
Is an outgrown necromancy;
When the rain of inspiration turns to snow:
What then?

When all doubts and fears alike are backward cast;
When the dream of world-wide Brotherhood is past;
When the prophet's radiant vision
Is too futile for derision;
When the soul is but a formula at last:
What then?

When the fierce machine has conquered flesh and blood;
When the labor-power is belt and wheel and rod;
When the unfit nations wonder
At the gold we stagger under;
When the world is but an economic clod:
What then?

On another page of the same number appears the following editorial. Both of these productions are full of valuable suggestions and food for thought:—

WHAT THEN?

The striking lines with this title which appear in another column ask questions which often come to the most earnest men and women in hours of fatigue and discouragement, and are not easily answered. There are many questions which must be asked and to which no convincing answer is at hand. For life is, in large measure, a great interrogation; a sublime, insistent, and painful questioning. Immortal spirits cannot be prisoned in flesh and placed in a world accessible chiefly through the senses without the constant pressure of thoughts which cannot be uttered, aspirations which cannot find space and air, longings which cannot be satisfied, questionings which can neither be silenced nor answered. This is part of the education of the spirit which is being accomplished in the world-school of materials and forces. This deep unrest, this inability of the heart to find refuge in the things that perish, this reaching out of the soul for things which are for the moment beyond its reach, is at once the pain and the glory of this present life. If we could be content, we should perish in the living, as the tools we use perish in the using; if we could find answers to all our questions, we should find ourselves in a universe as small as our experience, living a life without spiritual significance or prophecy.

The very fact that our questions are not answered and our souls are not at rest in the world in which we are, gives final reply to the query, "What Then?" The time will never come when mystery will vanish from the mind, the splendid unthrift of love give place to cold calculation, inspiration cease to torment and uplift, the dream of brotherhood disappear, machine master men and materialism vanquish the spirit in decisive struggle. Men will sometimes sell their birthrights for pottage, but the bargain will never be final; they will sometimes sacrifice love for gain, but they will never be content with what they have gotten; they will sometimes abjure poetry, but they cannot kill the imagination; they will sometimes build machines so vast and powerful that men will seem pygmies beside them, but sooner or later they will break the iron fetters of mechanism in righteous rage at their own blindness; they will sometimes lose faith in God and themselves, but they will never feed long on the husks of infidelity. Strive as he may to bury himself in his little earth, man cannot get away from the vision of the stars; try as he may to sell himself into slavery, he cannot destroy the passion for freedom which is indestructible within him; blight his imagination and deny his heart as he will, dreams and prophecies and love will still haunt and pursue him. The image of God in his soul may be blurred, but it is ineffaceable.

Relied on Christian Science.

MR. W. H. KESSLER, a well-known carpenter and contractor residing at 1709 Houston Avenue, suffered a very painful accident yesterday morning by falling from a scaffold on Oak Street, between Winter and Summer. Mr. Kessler was at work on the building, and in stepping about on the scaffold he missed his footing and fell to the ground. The drop was only about ten feet, but when Mr. Kessler's fellow-workmen ran to his aid they found him unconscious. Mr. Kessler's son, Clerk Kessler of the police department, was notified, and he reached the scene in a few minutes and had his father conveyed home.

It was at first thought that the injured man was suffering from a broken back, but despite the entreaties of his family he refused to allow a physician to be called. Instead Mrs. Stonewall Bond, who is First Reader in a Scientist Church in this city, was sent for. She remained with the patient from eleven to one o'clock.

The result was rather startling to Clerk Kessler, who had a second interview at the latter hour with his father. When he first left him the patient was in bed groaning and evidently in much pain. At one o'clock he was out of bed and walking up and down the room. Mr. Kessler, Jr., was quite unprepared for such a startling change, and he gazed at his father in amazement.

"How do you feel?" was the first inquiry.

"Oh, I'm all right now, except a little pain in the back," answered Kessler, Sr.

"How did you come to get all right so quick?" asked the son.

Mr. Kessler, Sr., only smiled and said: "That don't matter very much. Tell the boys I'll be down to work in the morning."

"My father is a Christian Scientist," said Clerk Kessler last night, "and he has unlimited confidence in the teachings of that church."

Houston (Tex.) *Daily Post*, November 30, 1901.

We have been informed that Mr. Kessler has completely recovered from the effects of the accident.—EDITOR.

The Skilful Gardener.

The Heart is a very fertile plot of ground, and whatever seed is sown therein finds root quickly. There are some seeds that need all the loving care and staunch support that we are capable of bestowing with the understanding at command. These seeds are Patience, Pure Thoughts, Meekness, and Love, and when we are rewarded by the appearance of their tender shoots we must guard them carefully, and water them daily with spiritual dew.

We must "sow," "water," "plant," and "replant," until our loved plot is full and overflowing, and leave no space therein for the seeds of Envy, Malice, Jealousy, and Discontent to find lodgement, for they are of a prolific nature, and would overrun and despoil all our cherished plants.

We must be careful in our selection, and sow only the perfect seed that reflects its own sunlight. We cannot sow seeds of Hatred and expect to reap Love, or Dishonor and expect Purity. We ought to feel and know that our garden contains nothing but what is holy and acceptable unto God, or we shall find ourselves murmuring when the harvest time cometh, "O what will the harvest be?" We can deceive ourselves as to what we sow, but we cannot deceive God.

But the skilful gardener will, with the pruning knife of Truth and Love, keep his loved plot free and unsullied from all noxious weeds, that it may, in its perfection, give joy and gladness to the Prince of Gardeners, who laid down his life that we might, through him, have rest and peace, when we enter into the eternal garden above.

J. PAUL LOWELL.
In *The Progress.*

Nellie's Daily Bread.

"Mamma," said little Nellie one day at breakfast, suddenly, "every morning I pray to God to give me my daily bread, but really it is you that gives it to me—isn't it?"

"Let us think a moment about that, Nellie," replied her mother. "Where do I get the bread I give you?"

"From the baker, mamma."

"And he gets the flour out of which he makes it from the miller, and the miller gets the grain out of which he made the flour from the farmer, and the farmer gets the grain—where does the farmer get the grain, my little girl?"

"Why, out of the ground," said Nellie. "Don't you remember Uncle George was cutting wheat and oats when we were at the farm?"

"Well, now, suppose that Uncle George put grain in the ground, and God sent no sunshine, and no dew, and no rain, would Uncle George have any harvest?"

"Why, no," said little Nellie, looking sober.

"Then, you see, it is God, after all, who gives us each day our daily bread; and when we have fruitful seasons and plenty to eat, we ought to be very thankful to our Father in Heaven, who never forgets to give us what we need."—*The Universalist Leader.*

Serving.

The sweetest lives are those to duty wed,
Whose deeds, both great and small,
Are close-knit strands of unbroken thread,
Where love ennobles all.
The world may sound no trumpets, ring no bells;
The book of life the shining record tells.
Thy love shall chant its own beatitudes
After its own life working. A child's kiss
Set on thy sighing lips shall make thee glad.
A sick man helped by thee shall make thee strong.
Thou shalt be served thyself in every sense
Of service which thou renderest.

ELIZABETH BARRETT BROWNING.

From our Contributors.

Letter to a Teacher.

Idaho Springs, Col., October 30, 1901.

My Dear Teacher:—Regarding the beautiful demonstration of the power of God through Christian Science at Argentine Pass on October 18, last, the facts are as follows:

I own and am operating some mines and a large tunnel at Argentine, Col., eight and a half miles above Georgetown. On the day mentioned I had arranged with my men to come up and see how the work was progressing. I also arranged for Colonel Evans, a very prominent mining engineer, to go with me, and a young Mr. Randall, son of the editor of the *Georgetown Courier.*

On arriving at the mines I was surprised at not seeing the men, Simon Anderson and Carl Johnson, but after our horses were tied Simon came out and by his face I saw something was the matter. After the usual greetings, he told me a very serious accident had happened. Carl had fallen from the top of the tunnel on his neck and back (he had fallen backwards). The tunnel was over ten feet high and Carl was a very heavy man.

He said, "Carl is killed; his back is broken." This I of course vigorously denied. I went at once to Carl and treated him in Christian Science, with what success many grateful hearts to-day can tell.

The enclosed copy of a letter from Simon Anderson tells the story perhaps better than I can. I can only express my gratitude to Almighty God for His wonderful goodness, and to our dear Leader, Mrs. Eddy, that she has made it possible for us to demonstrate the power of Truth.

Very sincerely, your student,

REES C. VIDLER.

The letter enclosed was as follows:—

Idaho Springs, Col., October 26, 1901.

Dear Mr. Vidler:—In regard to Carl Johnson's accident at Argentine Pass and his wonderful recovery under Christian Science treatment, I wish to state that he fell from the top of the big tunnel over ten feet high, that he fell backwards on his neck and back, and I believe his back was broken. Carl was unconscious for over twenty minutes, and I dragged him (he being a very heavy man) into the house and put him on the bed, thinking that he could not live an hour. I felt that he was seriously injured and that he could not live. You came along with Colonel Evans and Mr. Randall in the midst of my prayers for help. I explained to you the accident, and you said that God could do all things, that you had come at just the right time. That you would go to Carl at once and treat him in Christian Science, and that he would recover.

I doubted if it were possible to help him under the serious circumstances.

You went at once to Carl and remained with him for about twenty minutes. Colonel Evans and Mr. Randall also went in to see him, but you remained and treated him in Christian Science. After a short time, I think about twenty minutes, you came out saying Carl was sleeping like a child. This was so, his pain and groaning ceased and he was sleeping.

We had our lunch and in about two hours he woke up again, and as it was about time for your party to ride back to Georgetown, you went in to Carl again, and after praying for him in Christian Science, you told him to get up and walk. He did so, and walked out from the bedroom and through into the kitchen, walking around several times and appealing to me to know if his back was broken. You said, "There is nothing that God could not or would not do when asked to do it in the right way."

Digitized by Google

We most fully believe this, and I believe that God has power to heal, and did heal Carl right there.

The gratitude I feel,—that both Carl and I feel,—at this beautiful and wonderful demonstration of Christian Science and the power of God to heal now, I cannot express as I would. My feelings were too deep then for words and they are too deep now, for I feel that without this help he could not possibly have recovered.

I write this in grateful acknowledgment for what was done for Carl and also for me on that day, the eighteenth of October, 1901, and beg to sign myself in love,

Yours most gratefully,

SIMON ANDERSON.

P. S. Carl walked down with me to Georgetown eight and one half miles to-day, and will be at your church there to-morrow to thank you again personally for your aid in Christian Science. I should also mention that he worked with me for the last week in getting out mining timbers, which you know is very heavy work.

Duty.

BY JOHN GRAY.

THE articles in the *Journal* and *Sentinel,* written by the different Scientists at various times, seem to be lights shining at different points along our way to help us over some rough or slippery place and encourage us to plant our feet more firmly in Science. Looking beyond these seeming obstacles, we see a little farther on another beacon light illumining our thought and making our duty more radiant with Love.

Each of us is striving for more light, a higher and clearer understanding of Divine Science. Mrs. Eddy has pointed out the way. She says in "Science and Health with Key to the Scriptures," p. 401: "You command the situation if you understand that mortal existence is a state of self-deception, and not the Truth of Being," and on page 248 we read, "In an age of sin and sensuality, hastening to a greater development of power, it is wise to consider whether it is the human mind or the divine Mind which is influencing you."

Amid the many conflicting evidences it is indeed no easy task to discern whether we are being guided by the right or the wrong thought. We can re-assure ourselves, when surrounded by the obstacles of doubt and fear, by steadfastly looking to the one Mind and holding on to the facts of Being—God and His all-ness.

In my own case, the promptings of Truth have often come, saying, "It is your duty to write something for our publications; some acknowledgment of the good things which Christian Science has brought you. A word of encouragement to some one who needs encouragement and a helping hand is due from you for the blessings you have received through this great Truth." Then error has suggested, "Then there are so many who can write well and who have larger experience, a greater fund to draw from; you could not say much any way, it is better to wait a while." I find that if we indulge these procrastinating thoughts we are disobeying the voice of Truth to "come up higher," and every day we are growing away from the thought of good and allowing the time to go by unimproved and our own opportunity wasted.

In the parable of the steward who wrapped his talent in a napkin instead of causing it to earn something for his master, we see our own unfaithful stewardship, and how can we expect to be trusted with greater responsibility if we will not put to faithful use the talents we already have. We cannot shirk our responsibilities and expect to grow. "Every plant, which my heavenly Father hath not planted, shall be rooted up," said our blessed Saviour. Then if we are not letting our Father plant in our hearts plants which will bear fruit, those fruitless plants of sense, indolence, and neglect of duty, must be rooted up and we shall have to begin all over again.

"Work! work! work!" is the word of our Leader, and we find we do better work and have greater reward if we are faithful and strong, than if we allow the pleasures of sense to occupy our working time. We have really no time of our own. God's time is all His, and our duty is to use it. If by relating our experiences, or writing an encouraging word for our *Journal* or *Sentinel,* we are thereby helping some brother on the way, are we not using our talent as the Master desired us to?

What thanks ought we not to express to our beloved Leader, Mrs. Eddy, for the blessed advantage of these publications! If the privilege now vouchsafed us monthly and weekly should be taken away, who of us would not feel the great loss? Let us, then, remember, that at least part of the work in this line belongs to us, and let us deem it a very great privilege to add our mite and be found working in the cause of Christian Science and obtaining the blessing.

Thanksgiving.

BY HENRY M. MASON.

MY heart is full of gratitude for the continual blessing that has filled my consciousness during the time dating back to Thanksgiving day, 1900. Since then I have devoted my entire time to the practice of Christian Science. The perplexities of mortal existence, in almost every degree of seriousness, have, through others, been presented to me. At times, on account of work, sleep has been neglected and there has often been a necessity for so-called exposure, but not a day during the year have I been in bondage to the false law creating disease. I wish to acknowledge, from the innermost depths of my heart, that this blessed experience was made possible to me through the study of "Science and Health with Key to the Scriptures," which interprets and unfolds God's revealed law, presented in the Bible.

I became interested in Christian Science in the fall of 1892. I was at that time, in such a diseased state physically, mentally, and morally, that there was not, seemingly, a ray of light left directing me to a true sense of life.

My diseased physical condition, wretched as it was, seems like a dream, and I would not again allow it to become outlined in my thought, were it not for the hope of helping others.

One eminent physician who examined me, found many symptoms of a certain disease, and told me that he felt the only permanent relief would come through a surgical operation. From that time, until the operation was performed, the symptoms he had mentioned and the disease he had named were, I believe, never out of my thought during conscious hours, and the disease developed rapidly. I do not question the man's honesty, but I am thankful that I am no longer subject to such methods. I had two other like experiences, both resulting in surgical operations.

One sympathizer told me that, possibly, trouble with my eyes contributed to my suffering. My head was filled with pain a great deal of the time, and y eyes seemed to give me trouble. I acted on the suggestion given me and, as I considered it a serious matter, I went to an oculist in Boston, whose reputation was unquestionable. Until a few days before that time, the thought of imperfect sight had never entered my mind. The oculist made a thorough examination and said that my sight was imperfect. I began to wear glasses at once.

The first benefits of Christian Science came to me through the physical healing. I was, however, at that time, a slave to the use of tobacco, smoking cigars constantly from morning until night. I also indulged, to some extent, in

Digitized by Google

intoxicating drinks. The depraved appetites and a life of irregularity, were destroyed through the application of Christian Science. A disposition to dominate, as well as a high-keyed irritability, were subdued under the same regimen.

For the transformation which followed the destruction of these diseased conditions, demoralizing appetites, etc., I am very thankful. The peace, happiness, and general harmony, the natural sequence of this transformation, fills my heart with gratitude, but a positive knowledge of the fact that I have a little understanding of this Truth which makes men free mentally, morally, and physically; and that, with it, I can help suffering humanity, is a blessedness that overrides all else, and it is this blessedness which to-day makes my thanksgiving boundless, and creates in me a yearning honestly to pursue the path of the just.

Nashville, Tenn.

Learning how to Learn.

BY J. B. WILLIS.

THE wheels had come a week before and the little girls had made many attempts, with mamma's help, to master the mount, but the things were so wobbly and trying that their efforts had scored little more than tumbles, and bruises, and a discouragement that was fast approaching heartache.

When, therefore, they spied their Uncle Jack—the very fellow to give them a lift—coming down the road, there was a glad cry and a grand scamper for his open arms.

After he had heard their twice-told tale and noted all the black and blue spots which decorated their poor little legs, and which they exhibited with no small show of competition, he called their attention to a passing swallow whose curves and careenings were made the text of a little talk about the freedom and pleasure in store for them also, as they followed, in the coming summer days, the delightful roads and by-ways in the vicinity of their home. He spoke of how easily the little birds learned to fly because it was God's gift to them, and because they tried their best and were not afraid; and how easily, too, their wheels would speed them, and that without fall or fear, since these have no place in our Father's plans.

Thus the thought of trouble and of task was made to give place to a gladdening sense of privilege and of power, until their happy expectancy strove with wholesome appetite to shorten their supper hour, after which they were to make the trial.

When the bicycles were brought out, the sun was flooding the west with a glorious light and the roadway, framed with pines and oaks, had become a royal avenue, fit for the feet of a princess, uncle said, as he led the children to the crest of a gentle decline for the start, and warned them that they must not go too far lest they tumble, wheels and all, into the depths of the sunset sea.

And now with a last caution to look up and far ahead, and to push bravely at the pedals, these sometime fearsome, but now confident, little girls launched forth gleefully, and in a moment both had safely and proudly passed the pine trees and overcome, with ease and pleasure, what for a week had seemed an insoluble difficulty.

Walking home in the moonlight the wayfaring uncle could but think of the larger problems for both little and larger folk, and how surely the same principle and mental pose would solve them, as well.

Fear and anxious haste beget many a hurt and failure for us all, because they multiply and magnify the difficulties in our way, and yet more because they rob us of that confidence and joyous fore-looking which opens the door to every rich and satisfying success.

How valuable and significant would prove the habit of always giving ourselves the benefit of the most favorable conditions possible for our mount; of always facing the sunniest spot in our sky, and of always looking up and ahead with happy and fearless anticipation of good, and good alone, as we lend our best efforts to the undertaking in hand.

He is a real friend and most helpful to his fellows who tactfully wins their thought away from the gruesome bogies of discouragement and fear, and brings to them a clearer sense of the simplicity, the ease, and the naturalness of all right doing. And as he leads the way, and practically demonstrates this fact in Science, he becomes a veritable benefactor. The sunshine and hope and good cheer which radiate from an understanding of the nearness and attainability of the good, and the nothingness of all our past occasions of anxiety and alarm,—who can tell how much they mean to the tired and trembling about us?

Proving Up.

BY JACOB HODGE.

IN Christian Science, each of us perhaps finds some phase or feature that specially commends itself; something that is especially available to us in our individual experience.

At an early period in my life, a pious mother taught me to read and study the Scriptures, with the intent, on her part, that thus there might be obtained and maintained a preponderating influence on my mind that should eventually lead me to enter the Christian ministry.

But the best laid plans "gang aft agley," and I did not enter the ministry because I could not preach such a concept of God as was entertained by the Orthodox people of that day. The difference between my concept of God as gained from the Bible and that taught by the theological schools was radical and irreconcilable; yet I was not able to discover just the reason for it then, nor was I able to do it until I found the reason in Christian Science some two years since.

Though I refused the ministry, I did enter one of the churches, and for a number of years endeavored to reconcile the creed to my conscience; but failed, and finally withdrew from membership.

However, my early reading and study of the Scriptures was not in vain; for in them I discovered numerous maxims and rules, some of which I adopted and have since endeavored to apply to my conduct of life.

One of these is this: "*Prove all* things; hold fast that which is good." Now, the first clause in this rule is available to us in Christian Science; and it is this feature in Science which commends itself to me.

For at *any time* we can "prove up," as the mathematician does, and can *know* just where we stand in working out our own salvation; what is the exact stage of our progress toward Godliness—Godlikeness.

In the old way this is not possible, as all who have tried well know. The consequence is that one must pass the major part of his days here more or less harassed by doubts and fears as to his status with God.

To the Orthodox Christian, this way of speaking of Christianity, of applying a scientific instead of an emotional rule in the testing our daily Christian life, will appear to be cold and calculating, and devoid of that depth of love of God which should characterize a true Christian, yet in my experience the reverse is true.

After "proving up," and ascertaining the fact that we are progressing in the Christian life and understanding, an exaltation follows which surpasses anything I ever experienced in the old way, which is born of the *knowledge* that warrants the gratulation, Nearer am I than before, my God, to Thee; and also the aspiration, Nearer, O may I be yet, nearer, my God, to Thee.

Helping One Another.

BY S. M. FRIEDLANDER.

"BEAR ye one another's burdens, and so fulfil the law of Christ."

In making the above declaration, Paul desired us to know that we are all of one spiritual household. So long as we adhere understandingly and scientifically to that declaration the claim of "me and mine" and "thee and thine" will not shackle us, but we shall know that all belongs to God.

An understanding of Love and harmony demonstrates its efficacy in all our thoughts and actions. We should help one another always, and not add to each other's burdens, thereby hindering our own progress in Science by making a reality of that which we know does not exist in Truth. We should see error as such, uncover it, and destroy it; so separating it entirely from God's idea as to give it neither place nor power.

We, as Christian Scientists, more than any others, should know what Love and harmony are, and knowing it, should live it. But we do not always do so. Some of us, while understanding the theory of God's allness, yet in practice hold ourselves in bondage to the world, and because of our supposed Christian Science understanding become blinded to the fact that we are walking in error.

Therefore let us "bear one another's burdens, and so fulfil the law of Christ." Let us work in harmony with each other and for one another, putting aside all thought of self-aggrandizement, for the promotion and promulgation of Love, harmony, and the glory of God Almighty, and upon the horizon of our hopes let there appear a vision of the future grandeur and the glory of the Church of Christ, ruled by the law of Spirit from which the "me and mine" and "thee and thine" will be forever dispelled. Let us strive to make this vision a reality. Let us "be strong, brave, and lean on the Rock of His word, knowing the substance thereof, and that it is our Life and Light."

"A Little Child shall Lead Them."

BY S. F. S.

A LITTLE child who had been healed by Christian Science treatment, went about singing softly to herself, "How good God is to everybody!" The Psalmist says, "Out of the mouth of babes and sucklings hast thou ordained strength."

What we all need is to be brought back to the simple faith of the little child, and to know and realize that "God is good to everybody." When we begin to know that God is Good, and is Truth, and begin to prove that we do see this, by refusing to accept whatever is not from God, then the evils which have seemed real to us for so long,—the sickness, sin, and suffering,—will begin to fade away and disappear, having no support, no truth in them.

Christian Science has brought to the world this Truth which had been forgotten. Though the Bible contains it all, it remained to be proclaimed again by unmistakable words and demonstrations of healing. These works of healing are now wrought by "them that believe," or understand, God's goodness to be *real*, and the claims of error to be *unreal*, or false claims to a power that God never made or gave.

Evil thoughts, malicious purposes, errors of all kinds, are powerless to reach, or affect us, because they have no truth, no life in them. They have no mind through which to express themselves, no tongue, no strength, no intelligence. These false states of consciousness cannot take up their abode with us unless we make room for them, for they are empty nothingness themselves, having, as Jesus said, "no truth in them." We must not reach out to them, nor bid them welcome; then we shall not fear evil, nor feel its effects.

It is the simplest thought which sometimes comes to us with a great light, and it seems difficult to give it to another. The thought that we can "refuse the evil and choose the good," and that we are free from harm as the little child when we have the child's faith in Good, has made the sense of responsibility for our condition clear.

Notices.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Difficulties of Medicine.

THE above is the title of a portion of a paper published in a recent number of the *Pharmaceutical Era*, a medical periodical. The original was prepared and read by James F. Goodhart, D.D., L.L.D., before the annual meeting (1901) of the British Medical Association.

Dr. Goodhart's paper is a remarkable one in the dignity of its attitude as well as in its admirable candor. It is well worthy of a place in the highest class of medical literature and should have a reading as wide and careful as its high and extraordinary character merits.

The difficulties with which the medical profession has always had to contend are strikingly and unflinchingly set forth. A more honest acknowledgment of those difficulties it has never been our pleasure to read. Thinking people everywhere who read such frank admissions will, we feel sure, enter into a hearty appreciation of the besetments of Dr. Goodhart and his confrères of the medical profession.

If there were but one "Mrs. Smith" and she were always found in the same mental mood in her sicknesses, the physician's problem would be greatly simplified; but when the same physician has on his list a number of Mrs. Smiths as well as Mr. Smiths, and divers members of the Jones, Brown, and scores of other families of American nativity, both adults and children, to say nothing of the large per centage of foreign-born patients with their almost infinite differences of temperamental peculiarities, the perplexities and uncertainties become sufficiently appalling to call forth essays of the kind under consideration.

With Doctor Goodhart's sentiment on Hope, Christian Scientists will heartily sympathize. "When hope flies out of the window death is lurking at the door" is indeed more than a sentiment. It is a truism. But when hope ripens into trust in the Supreme One as the great Physician, and when to trust is added the understanding of God's healing presence and power, then truly is death driven from its lurking-place at the door.

The fact that Dr. Goodhart's able lecture was delivered before so dignified and distinguished a body as the British Medical Association, gives it additional importance and significance.

Following is a lengthy extract from the lecture as published:—

It is clear, without my laboring the point, that a body so composite as ours, is so very delicate a machine that there must be many and many a case presented to us where we do not—many even where we cannot—know what is the matter, and taking even the most favorable view of the progress of scientific discovery, it is probable that this will be so till time shall be no longer. We cannot know, because the intricacy of the machine hinders one in getting at the real facts; we cannot know, because even when we have got at the facts we cannot be sure that the remedies used will get at the disease.

When we come out of the aloofness of the contemplation of growth, nutrition, degeneration, and death, to take part in the active grappling with these by stimulating this function and dulling that, in the attempt, in short, to arrest or stop disease, our difficulties become appalling; but this is quite unrecognized by most of those with whom we have to deal. There has been much interesting and perhaps interested talk of late about water-tube boilers, their intricacy of working and their excessive wear and tear, and the difficulty of their repair without stopping the ship. Now, supposing that such a machine as our modern warship could be worked automatically with hatches down, and that the only positive knowledge to be obtained of the condition of its entrails was by the observation and analysis of the smoke and the bilge water, by post-mortem examination at the breaking-up of old vessels and the recording where each had gone to pieces, would the progress of knowledge, think you, be very rapid in the evolution of the science and art of shipbuilding? Would the feeling of power to deal with the defects of the machinery as they arose be very robust in any engineer who had had much experience? Would not "I can" have to wait upon "I am not sure," and the result be some tangent from direct purpose? And, excepting the self-righting of the living organism, which, from my present point of view, does but make confusion worse by rendering still more uncertain the real relation between means and ends, our naval engineer is in the same position we are when we attempt to control or modify function, for it is impossible to get at the organ that is implicated, and function and excretion are, so to speak, waste products, or, as I like to call them, ash. Take the liver or the bones as concrete examples. Of the bones and the exchanges that go on between them and the other component parts of the body I think we may say we know nothing, and yet no doubt they extract material from the general store that the general store is better without, and they return to the common stock material which is better adapted by the abstraction for the purposes of other parts. Then the liver, the largest organ in the body; its imports and exports must be enormous, and from the familiar way in which it is spoken of there cannot be a man in the whole world who does not think he knows all about it. But what are the facts? We know something about the physiology of the liver, but this knowledge has been mostly obtained by experimentation on the lower animals, by observations that occasional cases of disease afford us, and by certain inferences that we draw—very much at second hand—from the changes produced by disease in the organ. But all these things, valuable as they are, and without which where we should be I don't know, yet are very far from giving us that real and intimate knowledge of the living organ that we require to enable us to treat its diseases.

For example, there is not a soul in this room to-night who, if I asked him how and why gall stones are formed, could give me any useful information on the subject. Yet the kerneled public flock to us for treatment, and expect to be cured. And when, alas, as often happens, drugs fail, they apply to surgery, which in that case is but a refuge for the destitute, for that is not the treatment of disease.

Then there is the question of hepatic stimulation of the liver by cholagogues—we still give our blue-pill and podophyllin, and so on, and speak with early innocence of "touching" the liver, and so still perpetuate the idea that certain remedies go for the liver and increase its various secretions. I don't say this is all wrong, or that the remedies are not valuable in the conditions for which they are given, but all the positive experimental evidence that we possess I think goes to show that these remedies are chiefly intestinal in their action. And I instance them particularly because they not only show up the difficulties that an intricate machine causes us in obtaining information, but also another point too often forgotten—which, nevertheless, is constantly interfering with our inferences on the treatment of disease—that we send a remedy forth on one mission which we suppose it to have performed, whereas in reality its virtue has been expended in quite a different direction. Take the matter of pain—a pain with a definite

Digitized by Google

cause, if only we can find it; but it is deep down in the recesses of our impenetrabilia, and it has absolutely no distinguishing feature—so that no human being can do more than say that it may be this or it may be that. A position this that would seem to claim for the doctor all the patient's sympathy—it usually, however, meets with a great deal of derision.

Take the next vital element and its bearing upon the handling of disease. Here again we are often foiled when we would be positive, because of the personal equation, as it is called, the individuality of the patient. When Mrs. Smith asked her doctor why it was that a particular pain possessed her, he is said to have replied with ready wit and no less truth, "Madam, it is because you are Mrs. Smith." And the lady no doubt thought her doctor a very amusing man, but she had not a glimmer of the great truth that had been administered in such an excellent coating. But, indeed, that "because you are Mrs. Smith" constitutes one of, if not the most insuperable of, the difficulties in framing any system of precise medicine, and over and over again fattens crass ignorance at the expense of real knowledge.

In the practice of medicine you cannot jump the fact that the inflections of your voice are not exactly like those of any one else; and as long as the world lasts this variability of the living force, this individuality, will prevent the attainment of the popular desire—a cut-and-dried remedy—not only for every disease—that is no use to Dick when the remedy touches only Tom's variety; no, we want a remedy for every disease, and for every variety of it, as met with in the young and in the old, in the otherwise healthy and the unhealthy, under the specious garb of mildness or the pronounced type of malignity; that is another of the cruxes of medicine that the world wots little of. And then as part of the animal energy of man, of the spirit of life, perhaps the chief human expression of it, comes that wonderful, indescribable something that we call hope. One hears talk of forlorn hopes, but hope is never forlorn; its spring is always light and buoyant, and it is as indomitable as life itself. Of all the unnatural conditions of which medicine takes count, perhaps none is so much so as life without hope. When hope flies out of the window death is lurking at the door, but in the good providence of God man cannot quench it, and I beseech you that you never try. And it is these attributes of hope, so indissolubly linked as it is to life, that constitute it indeed a thing to be reckoned with in our dealings with disease; for if not forlorn it has one characteristic—I will not call it a failing, for, after all, it brings more help than trouble in its train—it is generally blind in the matter of life to anything but the certainty of returning health. It is ever ready to ask three questions, and no more: What is the matter with me? What will cure me? And how long will it take? And to these it expects immediate and positive answers.

Drugs.

Now, why do we give drugs? To cure disease, you answer at once, and think the question unnecessary. But wait a minute; we give drugs for several other reasons, some of which are far less free from criticism. For example, drugs are often given, not because the disease demands one, but because the patient is not happy till he gets it; too often he is not happy even then. They are often given to hide our ignorance, I fear, or to mark time while we watch and wait; they are given sometimes as a gambler on the Stock Exchange speculates in "futures," an enhanced reputation being the windfall that it is hoped to secure; and then we often give drugs as an experiment in the hope that they may do good. I will deal with this last more especially, for it is a reason for giving drugs about which the public are peculiarly sensitive and ill-informed. It is often said as a matter of prejudice against the hospitals of our country—than which none could possibly be conducted more humanely and considerately—that the patients are made the subject of experiment. So they are, but this happens not only in the hospital. If it be true—and it is true—that you and I are unique in our way, and that it is this individualism of man that constitutes the great barrier of the evolution of any system of medication, it follows that each new patient who demands treatment is more or less a case of experiment, and it is by experiment of this qualified kind—upon the king as he sits upon his throne, as for the poorest being within his realm—not only that the value of drugs is established and new powers gained over disease, but by which an increase of knowledge of disease itself is gained. The cure of disease is always the fundamental object; but not far behind it should come the alert eye to watch the deviations from the hypothetic normal which the individual resistance or the drug in its action may show in the course of the case.

All treatment by drugs is more or less of an experiment, and it is, indeed, in this fact that the enormous number of new drugs daily poured upon us finds its justification. Many and many an ailment that afflicts mankind badly needs a remedy, but for which, as yet, no remedy is opportune; and who knows but in each new drug some human ill may find alleviation? A chemist's shop is indeed a source of wonder and dismay to me, and I could indeed wish we were less the prey of the manufacturing chemist, but I would not for a moment even seem to discountenance new remedies. What I would discountenance is the giving drugs by rule of thumb. Diseases run in fashions; I have mentioned one or two that seem to me in fashion now, and there are fashionable drugs which, while the sun shines upon them, become the darlings of society. Their popularity is enormous—far in excess of their merits; and by-and-by they sink into the cold shade of neglect. Who does not even now remember the boom of the antipyretics? A few of them have remained to us for other purposes; but as antipyretics, who gives them now? They are not by any means valueless when given appropriately, but they were rushed for more than they were worth, and they are now buried by later booms, such as animal extracts and antitoxins, and many of these will be buried, too. And then as to routine in the treatment of disease. I suppose there is not a single case of gout in the whole world that has not had sodium salicylate and other easily enumerated drugs, and had them freely; and why? Because they are supposed to eliminate the cause of the disease. I find that the British public knows far more about uric acid and how to deal with it than I do with all my pains; and what men think they know in this respect, I fear that we, in the first place, and vulgar advertisement in the second place, have taught them. Yet I cannot understand how any reflective mind, making a careful study of gout in its clinical aspect, can settle down and bury itself in the doctrine that gout is a mere question of intake and output, and, if not, think of the harm that is done by false doctrine of this kind upon the thousands who are engaged in the hopeless struggle of dispossessing themselves of their fetish.

Jefferson's Ten Rules.

Never put off until to-morrow what you can do to-day.
Never trouble another for what you can do yourself.
Never spend your money before you have earned it.
Never buy what you don't want because it is cheap.
Pride costs more than hunger, thirst, and cold.
We seldom repent of having eaten too little.
Nothing is troublesome that we do willingly.
How much pain the evils have cost us that have never happened.
Take things always by the smooth handle.
When angry, count ten before you speak; if very angry, count a hundred.

The Lectures.

At Niles, Mich.

It is with grateful hearts that we write a few words to the Field of our experience in giving to our city our first lecture on Christian Science, by Mr. Edward A. Kimball of Chicago, January 2, 1902.

Nearly a year ago we started our regular Sunday services at the home of the First Reader. We have sometimes had twenty-two in attendance, though often four constituted our number. We saved our collection for a lecture fund; we finally had about forty-five dollars in one of our banks when it closed its doors some months ago. Sixty cents on the dollar has since been paid us, which formed a nucleus for a new lecture fund. In the summer, we entered into correspondence with Mr. Kimball; but he could give us no date, though promising to let us know later. A gentleman from Chicago met with us five times last summer, and each Sunday we were five dollars richer by his coming. Finally a telegram came from Mr. Kimball saying he would come if we were ready. We had fifty-six dollars, and were not fully ready as we would have thought, in the old way, but we knew we should be. We rented our best opera house, furnished our own stage settings from our homes, had a quantity of palms from the greenhouse, did the necessary advertising, and we have fo nd our expenses, including everything, were eighty-five dollars, and this A.M.—January 3, 1902—we banked seventeen dollars toward another lecture, "some sweet day."

The Scientists from South Bend chartered a car and lent their presence as well as generous financial support to us. From Kalamazoo, Elkhart, Goshen, Dowagiac, and Buchanan they came, eager for this Truth that we know is *all* there is. Our townspeople were very respectful to us in every way, and while they may not now realize what we did for them, they will in time. Our every want was supplied; we absolutely knew no lack, proving anew to us that "He satisfieth the longing soul and filleth the hungry soul with goodness."

Words are inadequate to tell our happiness and gratitude to-day for it all. I have gone into detail for the benefit of those whose strength as to numbers may seem small like our own. For our Leader, Mary Baker Eddy, and the Christian Science publications, we have cnly love and thankfulness.

Mr. Kimball was introduced by Mr. N. H. Bacon, a rising young attorney, and though not a Scientist, he proves by his words his manly liberality. His introduction was as follows:—

Ladies and Gentlemen:—From the earliest time, man has yearned for that upon which the soul delighteth to feed.

In this age of achievement, advancement, good purpose, and discovery, man turns with satisfaction toward the things that please and instruct. We term various things "discoveries" which are the unfolding of truths and principles which have long since lain dormant through an unenlightened period of lethargy.

Christian Science is not new. The truths which it promulgates are as old as the hills, but their application through human instrumentality has received, in late years, the applause and attention of a listening world.

Christian Scientists are entitled to a place among the religious denominations of the world. They are not fanatics who go braying up and down the highways and who hold out the delusive phantoms of necromancy, the more effectually to ensnare their victims; their theories rest upon a foundation of stone that will withstand the arrows of relentless criticism, and not on a foundation of sand and shells that will crumble and fall as the sport of the derisive winds that blow.

Let us learn of this thing; let us know the whole truth at this time, and if mortal error has crept in and retarded or destroyed the original plan of One far wiser than we, we shall not tolerate it longer.

The speaker who will address us to-night is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston. His lecture is given under the auspices of the Society of Christian Scientists of Niles, and is their New Year's gift to their fellow-townsmen.

I take great pleasure, my friends, in introducing to you Mr. Edward A. Kimball of Chicago, who will now address you upon "The Cause and Cure of Diseases."

JESSICA W. PIERSON.

At Fremont, O.

The much-discussed teachings of Christian Science were treated of and explained in a lecture at the Fremont Opera House Sunday afternoon, by the Hon. William G. Ewing of Chicago, Ill. A good-sized crowd was present to hear this able and distinguished lecturer who lectured under the auspices of the Fremont Christian Science Church. A large number of Scientists came from the neighboring city of Toledo, showing their interest in the work and manifesting appreciation of the efforts of the local workers to present the theories of Christian Science to the people of this community. Judge Ewing spoke of both the religious and medical part of Christian Science. After hearing the lecture many people said, as did the prominent editor of Atchison, "If that is Christian Science, we must confess it is not what we thought it was." He showed that their faith is not, as many people think, a patent healing method that has never been patented, but is simply and purely a religion of Jesus Christ.

Fremont (O.) *Democratic Messenger.*

Judge Ewing was introduced by Hon. George H. Withey, who spoke as follows:—

Ladies and Gentlemen:—It is a pleasure to introduce the Hon. William G. Ewing of Chicago, who is to address you this afternoon. Like Paul of Tarsus, his good name has gone before. Mr. Ewing was United States Attorney under President Grover Cleveland, and formerly a judge of the Illinois Superior Court. He is a worthy advocate in an illustrious cause. I congratulate you on this opportunity to hear him.

It is not my good fortune to be a member of your society, nor to understand Christian Science, as a special teaching, and as understood and taught by the leading minds of the Christian Science Society. I entertain, however, the highest regard for all men who think for themselves, strive to understand, and then follow the dictates of conscience. Such men, in all times, have led the advance guard of civilization.

My pleasure is two-fold: first, my friend is a member of my fraternity; and second, it affords me an opportunity to hear the subject of Christianity discussed as a special Science by a man who merits a thoughtful hearing, who believes in his subject because he understands it.

We who are not familiar with the subject will learn that Christian Science is not a new religion, but perhaps a simpler, better, or clearer understanding of some of the old and sacred lessons taught by the Master and exemplified by his apostles. It cannot fail to interest every one who does his own thinking.

In the world's history, only those people are spoken of who have influenced the affairs of mankind. Christ was man's greatest benefactor, and his followers, in consequence of the good done the race, have taken great place in the story of the affairs of men.

The Roman empire was invaded by open and licensed violence, undermined by vices and moral decay in the name of Paganism. The pure and humble religion of this lowly Nazarene gently insinuated itself into the minds of men.

Digitized by Google

It grew up in silence and obscurity, and finally planted the triumphant banner of the cross on the ruins of the Capitol.

This great religion was not limited to the Roman empire. After a revolution of eighteen centuries, it is still professed by the most distinguished portion of humankind in arts and learning, as well as in arms. It has been widely diffused to the most distant lands of the known world.

Well may we ask by what means has this faith obtained such a remarkable victory over the established religions of the world? And we answer, it was owing to the convincing evidence of the doctrine itself, and the good which it has done to all mankind. It is a doctrine of love, equality, and comfort to man. It appealed to his reason. It taught right thinking which in its turn led to right living.

The religion of this same Christ is accepted in some form to-day by the scholars of every land, not only because its teacher did miracles and lived an upright life, but because the doctrine itself applies directly to the needs of man's mind and body, and under its influences, man has most nearly approached the image of his God.

I now have the pleasure of introducing the Hon. William G. Ewing, who will address you.

At Minneapolis, Minn.

Judge William G. Ewing of Chicago, under the auspices of First Church of Christ, Scientist, lectured before a large audience at the Lyceum Theatre last evening on "Christian Science, Physician and Redeemer." Judge Ewing was introduced by Clarence C. Eaton, Second Reader of the church, who said, among other things:—

Christian Science renews with special emphasis to this age, that memorable invitation and promise given by the Galilean prophet: "Come unto me, all ye that labor and are heavy laden, and I will give you rest." And it also proclaims anew glad tidings of great joy, for healing from sin and disease; and the gospel of peace and love on earth, good-will to all men. And the signs are following. Those of you who have a measure of the understanding of this Science know that for whatever else we may be here on earth, we certainly are here to glorify our God by learning and practising the Science of loving, the Science of living. And we all, with one accord, welcome such blessed opportunities as these, whereby we may learn from the lips of those who know full well whereof they speak, something of how to love and how to live. In the speaker, who is a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, many of this audience, by reason of years of acquaintanceship, see a true friend and brother; and I fully believe that all present will recognize in him one who earnestly longs to walk and talk with God, and one who, I am sure, in so far as is possible at this period, has given up all, that he may so do.

Minneapolis Journal.

At Kewanee, Ill.

Mr. Edward A. Kimball of Chicago, lectured in the Opera House, Sunday afternoon, December 29, under the auspices of First Church of Christ, Scientist, of Kewanee, Ill. He held the close attention of his audience for two hours.

Mrs. Bone, the First Reader, introduced him as follows:

Ladies and Gentlemen:—We of Kewanee who are working in Christian Science, trying to learn its Principle, have found that the people of Kewanee have a very vague idea of Christian Science.

In all ages and among all mankind there has been a desire to know the Truth,—to know more of God,—which makes man free.

Christian Science teaches us that God is ever-present, omnipotent, omnipresent, and omniscient.

We have one with us this afternoon who has demonstrated the Principle of this Science. One who no longer has to ask "Does God answer prayer?" because he has seen the sinner reformed and the sick healed through prayer; one who for years has studied this Science; one who is not trying to teach a new religion, but will bring to our thought the old, old religion of Christ.

We now have the pleasure of introducing to you Edward A. Kimball of Chicago, who is sent out by the Board of Lectureship, under the auspices of the Mother Church of Boston, Mass.

Report of Sales at Chicago, Ill.

At the annual meeting of the Central Christian Science Reading Room Association of Chicago, the following motion was carried:—

The secretary is hereby instructed to send to the Publishing Society of Boston, so much of its manager's report as relates to the copies of Science and Health, "Miscellaneous Writings," Journals, Sentinels, and Quarterlies, sold at the rooms of this association, during the year just ended.

In accordance with this motion the following report of sales is herewith enclosed.

Science and Health.

MRS. FANNIE B. HUNT, *Secretary.*

If I Can Live.

If I can live
To make some pale face brighter, and to give
  A second lustre to some tear-dimmed eye,
Or e'en impart
One throb of comfort to an aching heart,
  Or cheer some wayworn soul in passing by;

If I can lend
A strong hand to the fallen, or defend
  The right against a single envious strain,
My life, though bare
Perhaps of much that seemeth dear and fair
  To us on earth, will not have been in vain.

The purest joy,
Most near to heaven, far from earth's alloy,
  Is bidding clouds give way to sun and shine,
And 'twill be well
If on that day of days the angels tell
  Of me: "She did her best for one of Thine."

HELEN HUNT JACKSON.

Digitized by Google

Testimonies.

For a long time I have felt it was my duty to contribute something to the *Journal* or *Sentinel,* in the hope that it might be of benefit to some poor erring one like myself.

I first heard of Christian Science a number of years ago, but had no desire to investigate it, in fact, I felt a sense of contempt for any one who thought they could be cured by imagining they were well. I could not understand why, if God knew all,—and the churches, or rather church members, taught that He did,—that He should take from their midst the very ones who promised to become the most useful and good members of their flock. I was fast drifting toward agnosticism. But the time came two years ago when I felt that I needed some power higher than human power to lift me out of the depth of despair into which I had fallen.

I got out our old dusty Bible and tried to get some comfort, but to no purpose. My business was failing; I was fast becoming overwhelmed with debts; I was willing to work and did work day and night trying to overcome them; but the more I wriggled the deeper in I got. The severest blow to me was when *materia medica* told me I was about to lose my wife. I was willing to give up all, that she might be spared me. The physician told me she had heart failure and could live but a few months. I tried to be cheerful and to keep her so, but on account of my business worries and my worry over her trouble I was rapidly losing my own health and felt the time was fast approaching when I should be without business, without wife, without home.

It is with a feeling of deep gratitude that I remember the kind ministrations of the gentleman who first gave us the true understanding of Christian Science. He had been a frequent visitor to our little restaurant, and one Sunday evening at supper some one asked my wife if she were going to church, and she replied she did not feel able to go. Mr. M. then remarked that they went to their church to be healed. Oh, what news that was to me! We grasped at it as a drowning man would a life preserver. We asked him to stay and tell us about his faith. He did so, and kindly loaned us Science and Health to read. We soon felt it was the Truth but could not see how it was to help us.

During the next few weeks my wife became violently ill again on a Sabbath day, and Mr. M. happened in. He asked permission to read to her, which was granted. We did not know that he was giving her a Scientific treatment although we were perfectly willing that he should. He was with us for about an hour, when he bade us good night and remarked, "I hope to see you well to-morrow." In less than an hour afterward she pronounced herself well and she has not had a recurrence of the trouble since.

When he came for his Science and Health and said others needed light too, we were loath to part with it, but we did. That very night I sent my only five-dollar bill flying to Boston for one of our own. Words cannot tell what blessings have come to us since that time. I was suffering from partial blindness and had been for twelve years, each year growing worse. I used to go about my business with my eyes closed to accustom myself to the place when the final blow came. Thanks to Science and Health and its author, that time never came, and now I see better than I have for years.

This trouble has been met slowly and by degrees. But this is not all. Since that time we have overcome many physical ills and have gone about proclaiming the Truth and have led quite a number of friends to see the light of the true gospel.

One friend, during a conversation, said, "E., what have you done to yourself? you are a new man."

I feel that I cannot be too thankful for the spiritual uplifting that has come to us. Among other things, I have demonstrated a profitable business, a home that cost me a thousand dollars, and last, but not least, a happiness that I never dreamed of in the old way.

E. G. C., Put In Bay, O.

We hear a great deal about gratitude from Christian Scientists. Certainly their growing ranks express more, perhaps, of this sentiment than any other people on the face of the globe. And what is it that Christian Scientists are so deeply, so sincerely, grateful for? They are, of course, grateful for bodily healing, for rescue from poverty and from fear of discord and untoward conditions; but most of all are Christian Scientists grateful because they are really learning a little of what God is. We hear a great many people say they have no God, they do not believe in God; but this is impossible. They may not believe in the ordinary conception of God, but every individual has some law, force, or ideal which governs him and controls his action and governs his relation with others; and this is his God. The salvation of us all rests in finding the true idea of God,—what God really is.

Christian Science tells us to recall our thoughts from thinking of God as an unknown force a physical law or a personality, and to find Him omnipresent, divine Love, Mind; and to come to the point where the still, small voice of healing is found to be the voice of God. When we come to know that thoughts of good are reflections of God and are all-powerful, then we begin to know a little about God,—that God is in the midst of us, "in Him we live, and move, and have our being." We cease to be like the fish in the sea, asking, "Where is the ocean?" or like birds of the air, asking, "Where is the air?" God is everywhere and God is ever-present. "The tabernacle of God is with men, and He will dwell with them, and they shall be His people."

A patient was suffering from what the doctors had pronounced to be blood poisoning from a carbuncle on his arm. The patient had suffered very much, and it was said that the bone was affected and the arm would perhaps have to be amputated. Christian Science took hold of the case and the patient began to improve. There was quite a struggle to bring to the thought of the patient that divine Mind was governing the case and was healing her, and she suffered a great deal from the pain. The patient told the Christian Scientist that one night she met the pain when it tried to occupy her consciousness, with the thought that God was in and through all. From that time the patient began to improve, and was entirely healed.

D. S. M., Cambridge, Mass.

Many times my conscience has pricked me, and spoken thus to my inner consciousness: What gross ingratitude is this! your silence in regard to what Christian Science has bestowed upon you. What has not Christian Science given you? all the manifold blessings of heaven are yours,—health, harmony, and a calm and sure trust in God as omnipotent Love.

From birth I had been a weak, sickly child, having twice been dangerously ill with cerebro-spinal meningitis. After accepting Christian Science, this same error presented itself. To my great surprise, the trouble was overcome in less than twenty-four hours, and I was able to dress and attend to my school duties the following morning. At this time I was quite young in the thought of Christian Science, and this wonderful realization of the Truth proved beyond a doubt the omnipotence and omnipresence of infinite Mind.

How truly our beloved Leader, Mrs. Eddy, has spoken: "The time for the reappearing of this divine idea of healing is now; and whosoever lays his earthly all on the

Digitized by Google

altar of Christian Science, may to-day drink of Christ's cup and be baptized with his baptism" (Science and Health with Key to the Scriptures, p. 360).

Two weeks ago I was called to the bedside of a child who had an attack of paralysis. With cheering and strengthening words from our precious text-book, Science and Health, the mother's hope was kindled until she saw the Truth, and beheld her child, not held captive by any law of error, but living, moving, and having his being in God. It was then she knew the Truth could heal her boy. The case was treated one week, at the end of which time the boy was entirely healed,—perfectly well and strong.

This is only one of the glorious proofs of God's loving care,—of the all-inclusiveness of God, and the nonentity and unreality of error.

Words are inadequate to express my love and appreciation to our dear Mother for the Truth which has been given to this age through her. I feel that the only way of expressing my gratitude to God, is by following the commands of our blessed Master: "Go ye into all the world and preach the gospel to every creature;" "heal the sick."

MRS. MINNIE M. KEEVAN, Colwyn, Pa.

I wish to speak of the healing received on the two occasions, when I had the privilege of seeing Mrs. Eddy and hearing her speak.

The first of these was when she addressed the Mother Church at the annual meeting in Tremont Temple, June 6, 1899. I awoke on the morning of that day with a sense of suffering so severe that it was a great effort to get up. I could eat no breakfast, and after working an hour, was relieved, but by no means free. Ordinarily I should have thought it the part of wisdom to remain quiet, but so great was the desire to be present at the meeting and hear our Leader, that I arose, dressed, and went to the Temple, feeling that I should hear the needed word of healing and strength from her lips. Nor was I disappointed. While Mrs. Eddy was speaking, the pain lessened, and then I forgot it completely until later, during the services, I realized that all sense of discord had vanished. Not only this, but for many months afterwards I was better and stronger, did better healing work for my patients, and experienced an unusual degree of spiritual and mental freedom. The second time the healing was realized, was during our visit to Pleasant View last June. I was not in any physical discord at the time, and though the need seemed great along other lines, on the way to Concord, the sense of quiet joy, and gratitude that I was privileged to visit Pleasant View, was uppermost. While we were resting on the lawn, waiting for our Leader to speak to us, I experienced the most marvelous sense of love I have ever known—love that satisfies, nourishes, sustains, uplifts, and blesses; love that washes away all that is unlike itself; love that knows only its own purity. All fear for the future, all anxiety and care, dissolved as a dream, a weight of oppression was lifted, and I felt the most absolute assurance of God's guidance for the future, of His care and enduring, sustaining power and presence.

Our Mother's words turned me anew to her grand Message, and I have spent many hours with it since, always finding strength and help. When I left Pleasant View, I said in my heart, "Lord, it is good for me to have been here," and I pondered deeply the hallowing influences of that wonderful day, and the marvelous power for good in a single human life, directed and sustained by God. During the conflicts which followed when I "came down from the mount," I went literally on the strength of that meat forty days, winning victories for God and His Christ.

This is but a single tithe in return for all our Mother, Mrs. Eddy, has done for me, through her books, during the many hours I have spent alone with them, gathering never-failing healing and comfort from them, and from the inspiration of her human life-works.

MARY TROXELL, Washington, D. C.

Christian Science was first presented to me about fourteen years ago by a lady who talked with me and helped me out of a severe cold that was becoming chronic bronchial trouble, and which the doctors told me was affecting the lungs. I attended the meetings a few times, but was not able to grasp the first thing about it. I read Science and Health, but not with understanding. Being in material bondage obscured the spiritual, and I did not pay very much attention to it, in fact, I forgot that such a thing existed. About four years ago I was visiting a friend some few miles from my home, when Christian Science was again brought to my notice, and very forcibly too. An attack of heart trouble of many years' standing, seemingly growing worse, was instantly relieved by my friend. This led to many talks between us and my increasing interest and desire to know more of this Truth. At that time I did not suppose it would conflict with my religious views in the least.

I attended several Wednesday meetings, and then the Sunday service. I awakened to the consciousness of a something coming into my life.

Words fail to express how this thought grew upon me. I concluded that the love and peace shown to me through the teaching of Science and Health was indeed the peace that passeth all understanding. I am now a member of the Mother Church of Boston.

Since coming into Christian Science many errors have been overcome. Failing sight for which I had worn glasses to sew or read for nearly three years; female troubles of eighteen years' standing; weak lungs and throat; biliousness; chronic headaches which continued for weeks at a time. Life was a burden, but now I am out of bondage.

I am very thankful to the small band of faithful workers here, for the presentation of this Truth, and the spiritual illumination of the Bible that has come to me through Science and Health. In conclusion, I must speak a word of praise and thanks for the great help I receive from the *Sentinel*, *Journal*, and all the publications of our Leader, Mary Baker G. Eddy.

MRS. C. J. ANDREWS, Port Townsend, Wash.

What a sweet satisfaction it would be to me if I could impress the glories of Christian Science upon my fellowman, so bowed down and hampered, year in and year out, for lack of the understanding of divine Intelligence!

Last Wednesday evening at the church, I listened to blessed testimonies, which came welling up from true and sympathetic hearts, and some of them applied to me so keenly, that I almost wondered if the giver knew my thoughts and was voicing them for me. I deem it a great blessing to live where it is my privilege to attend the meetings in the Mother Church.

Within the past year I have traveled much. In many cities I have sought out churches and reading rooms, and found the same harmonious, God-loving people as at home. Many of them congratulate me upon my church privileges in Boston.

What a demonstration is the beautiful structure recently completed in New York City; to say nothing of those I saw elsewhere.

I have had in my own private, as well as in business life, many demonstrations, so beautiful in character that words are inadequate to describe them.

If there is a man on earth who knows what it means to deal with frightened people, it is a practitioner of dentistry. Does any one doubt this statement? I think not. Long experience has taught me that it is true; but, thank God, through Christian Science there is a way out of what to some seems impossible.

Digitized by Google

Find this way in the little book Science and Health by Mary Baker G. Eddy, and it will help you in all things.

I am young in the Cause, but am old enough to know that I have made no mistake, and that under the influence of Good, perplexities and pain fade away, for Good fills all space; and Life, Truth, and Love forever reign.

GEORGE A. STILES, Boston, Mass.

A few months ago I was in one of the upper rooms of my house, opening a window, when, as I undid the latch, the cord of the window broke, and the whole of the upper part of the window banged down with awful force, catching my middle finger between the upper and lower parts of the window. As soon as I possibly could, I repeated the Scientific Statement of Being, and called for help, but no one was near, and it must have been quite five or ten minutes before I was released.

I can honestly say I felt no pain, except when I knocked the finger against something, and no one looking at the finger could even see a bruise. I played tennis all that afternoon, and held my racquet quite firmly. A quarter of an hour after the occurrence, I was able to sew with my thimble on the finger that had been caught in the window.

Last March my little daughter had scarlet fever. She had no medicine, and no doctor attended her, except the medical officer of health, whom we called in at once to certify that it was scarlet fever. We treated her in Christian Science, and God surely manifested His omnipotence, and restored her to us, better in health than before.

We kept all our quarantine regulations most carefully, though they were very irksome; for, as Mrs. Eddy says, we Christian Scientists must be law-abiding citizens. My little girl was to all intents and purposes well in four or five days, but notwithstanding, she remained the legal six weeks in quarantine, for we must remember our Lord's command, "Render to Cæsar the things that are Cæsar's," and above all, although our fears of material things are over, we must be tender and pitiful to those who have not yet been brought into Christian Science.

MRS. M. DRURY, Weymouth, Eng.

One morning I awoke and began reading 1 John, 3. Then I turned to the word "Love" in the index of Science and Health and looked up a part of the references given there. I got up with a greater sense of Love than I had ever experienced before.

During the forenoon a member of the family who had been in childhood subject to spasms, was suddenly attacked with a violent spasm. I heard the sounds from an adjoining room, but felt no disturbance whatever, having no sense of anything unusual occurring, until my sister came to me and said: "They want you to come in there." I went in and found the mother overcome with fear, perfectly helpless, the father bending over the afflicted one, who was writhing in agony upon the bed.

He made way for me at once, and with a great compassion born of Love I placed my arms around her, and spoke to her frightened sense in the words of the Master: "'Be still!' you are all right, darling. Do not fear." She immediately began to grow quiet, and in five minutes I left her with the smile of reflected Love on her lips. In a few minutes more she was sleeping. Afterwards the thought of hate seemed to obtain in the mind of one present, but I realized only Love, and praise and thanksgiving rose high in my heart as I thought, though they may seem to hate us they cannot hinder us from loving them. Nothing can prevent us from loving. Whatever comes into our experience this blessed privilege is still ours, we can love. No wonder our dear Leader asks: "Do you Love?"

ELSIE KELSO, Yale, Ia.

Just four years ago I began the study of "Science and Health with Key to the Scriptures." If I were to try to find language to express the many benefits received therefrom I should be unable to do so. There have been many wonderful cases of healing in our family, but that which I prize the most is the destruction of sin in self, and the understanding it has given me of the Bible, which I had always read more from a sense of duty than because I had any understanding of it, or loved to read it. Since reading Science and Health, I love to study my Bible, and find that I can understand it better.

I wish to write of a demonstration of the power of Truth over error. We had been reading Science and Health only a few months when our little girl was taken with croup. When she was placed in my arms by the lady with whom she had been sleeping, I was told that if I did not do something quickly to relieve her, she would choke to death. I took her, and her father and I began to repeat the Scientific Statement of Being and the Lord's Prayer with its spiritual interpretation. The healing was instantaneous, and she has never had the croup since. She had had several attacks before.

I find the little understanding I have of Christian Science is of great help to me in every way. I am very thankful to Mrs. Eddy for the great Truth she has revealed to us.

MRS. FANNIE C. JOHNSTON, Boston, Mass.

I wish to express my gratitude for the spiritual and physical help I have received from the study and treatment of Christian Science. A little over a year ago my eyes were healed of compound astigmatism after I had worn glasses for about five years. I took my glasses off under what were the most trying circumstances, as I was at that time doing work considered very hard on the eyes. However, I was able to continue my work without suffering the least inconvenience or pain, and my eyes were healed perfectly in three treatments. I have also since been healed of catarrh of long standing, chronic throat trouble, weak lungs, inflammation of the stomach, and many other seemingly serious troubles.

The study of the Bible with the light of "Science and Health with Key to the Scriptures," gives us the most beautiful as well as the most practical religion I have ever known, and I thank Mrs. Eddy, not only for the physical, but for the spiritual healing I have received through one of her loyal students. Our happiest hours are spent in the study of this wonderful Truth. The *Journal* and *Sentinel* are welcome guests and are most helpful.

MRS. ALICE M. WHYTE, Ashland, Ore.

When I commenced to study music, my teacher drilled me in a certain method. After a few years I grew dissatisfied with my progress and went to another teacher. I was asked to play, and after a few moments he stopped me with the remark that my *method* was *wrong*, and showed me the *correct* way.

I went home discouraged, for I felt that a good deal of work would have to be undone; but I thought, "I will start again as though I were a little child and make the old way as though it never existed." I worked faithfully and I remember, my teacher expressed surprise and pleasure at my progress when I went for the next lesson.

Now it seems to me that this is a great deal like the way in Christian Science. We become dissatisfied with our way of living,—with sickness, sin, and sorrow,—and if we go to a true Christian Scientist for help, we find that our *method* was *wrong* and are shown the *correct* way; and if we will but start as a little child to understand and practise this way, the old method will be as though it never existed, and we shall rejoice in health, happiness, and love to all.—G. T. P., Forest Hills, Mass.

Religious Items.

THE DEVOTIONAL HOUR.—Everything that men fashion with their hands from the material which the natural world supplies expresses thought, will, purpose. Every sort of construction is the embodiment of an idea, or of several ideas, and conclusively witnesses to the fact that it is the product of intelligence. Looking upon the simplest and rudest creation thus brought forth, the observer instinctively and logically concludes that it did not shape itself, but assumed its particular form at the will of some person and for a special end. Men have produced many marvelous mechanisms, and as the years move on the number of these is constantly increasing. Turning from the ingenious contrivances of man to a consideration of the numberless objects of nature, their diversified forms and their manifold uses and adaptations, the mind quickly perceives that the latter are representatives of a power, intelligence, and skill infinitely superior to man's. On every hand the wonders of creation are displayed. From the smallest to the largest organisms on the earth there is exhibited an ingenuity and a wisdom which command the admiration and the wonder of even the greatest minds. And the further the survey is extended the more profoundly is the mind impressed by the marvels it contemplates. Then if the simplest as well as the most intricate creations of man testify to his work in them, his essential connection with them, do not the works that are greater than man's necessitate the conclusion that a being greater than man is their creator? No other rational deduction is warrantable. The earth and all it contains, man included, and the heavens with their numberless worlds and wondrous relations, we must believe are the works of Him whom we call God,—the good, the Father. It is our privilege to find Him with our minds and hearts, to commune with Him in His works and within our own souls; to love Him and be co-workers with Him in the higher advancement of ourselves and the world.—*The Universalist Leader.*

ALONE WITH GOD.—In the days of hurry and bustle we find ourselves face to face with a terrible danger, and it is this: no time to be alone with God. The world, in these last days, is running fast. We live in what is called the "age of progress," and, you know, we must keep pace with the times. So the world says. But this spirit of the world has not confined itself to the world. It is, alas! to be found among the saints of God. And what is the result? The result is, no time to be alone with God, and this is immediately followed by no inclination to be alone with God.

Let us turn to the pages of God's book. On scanning its precious pages we find that the men of God—God's mighty men—were those who had been in "the school of God," as it has been well said; and His school was simply this, "In the desert alone with Himself." It was there they got their teaching. Far removed from the din of the haunts of men—distant alike from human eye and ear—there they met alone with God; there they were equipped for the battle. And when the time came that they stood forth in public service for God, their faces were not ashamed,—nay, they had faces as lions; they were bold and fearless, yea, and victorious for God; for the battle had been won already in the desert with Him.

London Christian.

One of the first things essential to progress in temperance reform is to recognize as friends those who are too often treated as foes. Valuable helpers may be, yea, and are, many who are bitterly denounced by certain other temperance agitators. The demand of the hour is that we should come to a realization of the fact that our coadjutors may be found among those who do not bear our name, train in our ranks, nor agree with some of our notions. One of the chiefest sources of the weakness of the temperance cause is the division and factional strife, the bickerings, and belittlings among those who are in purpose and aim one. Our little advance is due in no small measure to disagreements among ourselves.

It is a pitiable and deplorable fact that antagonism should be found among those who are pressing toward the same goal, but who are taking different routes thereto. In the religious world it has not infrequently been found that greater antipathy existed between factions of the same denomination than between denominations themselves.

The Standard.

In a recent sermon at St. Paul's Cathedral, on a late Sunday afternoon, the Bishop of Stepney told a story of his recent vacation, which is reported in *The Interior*. He said that a month before he had been in the Highlands of Scotland, where his sympathies were drawn out toward the lonely life of the isolated people. He was especially interested in an intelligent and elderly deer-stalker, who lived fifteen miles from human intercourse through all the long winter months. The Bishop asked if he might send him some magazines with which to while away the tedious hours. What was his surprise to hear: "I hae no time for sich licht stuff as thot, sir; but gin you could send me a copy o' the sermons o' Jonathan Edwards, I'd tak' it kindly. He gi'es sich a gran' account o' the plan o' redemption."

The Watchman.

On Thanksgiving occasions when men's minds are turned to thoughts of their indebtedness to the Creator of all good, for His manifold blessings, it is meet and right that the spirit of gratitude should hold sway in their hearts. With that spirit, however, there should also be a spirit of self-examination and of inquiry as to the use we have made of God's blessings in their relation to other members of the family and household of God. Gratitude to God has its richest and most abundant fruitage in devotion to the holy cause of humanity, and to the practical exemplification of the principles laid down by the Son of God.

The Christian Advocate.

There is a wonderful power of recuperation and readjustment in the nature of things of which we are a part. When an evil grows until the hearts of men fail them for fear, some slight change takes place, and lo! the evil vanishes. Five years ago there were many fears that the overgrown cities would threaten, if not destroy, all wholesome social life. But, just as the city becomes unwieldy and is overcrowded, suddenly "the broomstick train" scatters the population, relieves the congestion, and removes the threatening evil.

The Christian Register.

Faith is the great stepping-stone. Human experience is incomplete. The defeat by sin is overwhelming. Death has snuffed out lights of promise. Faith will overcome all that is in the world. It lifts the load of care, it assures us of forgiveness, it is the incentive to hard work, it is conclusively the gospel of an ideal. David found it in God. Paul found it in Christ. Abiding with Him, we rise to immortality. What we aim to be we shall become. By faith at last we step into heaven.

The Congregationalist and Christian World.

In truth, the message of God's love and man's redemption, of conquest of life and of immortal life, is so glorious that he who believes it cannot but think of the message more than of himself, and to lose himself is joy. In the pleasure of what he tells his own pain is forgotten, and far beyond the trouble of men he sees the eternal rapture they shall have in likeness to God. Rejoicing himself, he makes others rejoice.

STOPFORD A. BROOKE,
In *The Universalist Leader.*

SIN.—Sin is that in man either of thought, motive, or act which is contrary to or out of harmony with the character of God, and when I do a deed or have a thought or am impelled by a motive not in line with the will of God, I am guilty of sin, and that is the thing, and the only thing, in all this universe which God hates.—REV. OLIVER JOHNSON, Presbyterian, Leslie, S. C.

WHAT HEAVEN IS.—We sing of going to heaven when we die as if it were a foreign realm—some distant port to which we sail when the journey of this life is over. All this is misconception. Heaven is simply the unfolding and enlargement of the life which we now have in Christ.—REV. DR. HAWTHORNE, Baptist, Richmond, Va.

To work fearlessly, to follow earnestly after truth, to rest with a childlike confidence in God's guidance, to leave one's lot willingly and heartily to Him,—this is my sermon to myself. If we could live more in sight of heaven, we should care less for the turmoil of earth.—JOHN RICHARD GREEN.

A true perception of the Gospel is the entire forgetfulness of self, utter absence of any pretension, and the complete and entire refusal to accept the world's praise or judgment.—GENERAL GORDON.

Let it be our happiness this day to add to the happiness of those around us, to comfort some sorrow, to relieve some want, to add some strength to our neighbor's virtue.—CHANNING.

The true democratic idea is, not that every man shall be on a level with every other man, but that every man shall be what God made him without let or hindrance.

H. W. BEECHER.

I do not know of any way so sure of making others happy as of being so one's self.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, 60 cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science: 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., Post Office as second-class mail matter.

ems of Interest.

National.

The debate in the House of Representatives on the pension appropriation bill took a wide range. Mr. Barney of Wisconsin, in charge of the bill, explained that it carried $139,846,480, as against $145,245,230 appropriated for the current year. The estimates for the payment of pensions decreased from $144,000,000 to $138,500,000.

Upon being asked by Mr. Richardson of Tennessee why the amount of pensions decreased five and one-half millions while the number of pensioners was said to be larger, Mr. Barney said that this was accounted for by the fact that the arrearages were decreasing and the number of large pensions (those from $50 to $75 a month) was also decreasing. He stated that the commissioner of pensions believed that the high tide of pension payments had been reached, and the amount required probably would remain stationary for some years.

Mr. Bell of Colorado made a speech denouncing the "pension sharks." He said many soldiers returning from the Philippines in a perfectly sound condition were being induced to apply for pensions by these attorneys.

President Schurman delivered the annual address in commemoration of Founders' Day at Ithaca, N. Y., January 11, 1902. His subject was the outlook in the Philippines. He reviewed briefly the work of the first Philippine Commission and then turned his attention to the recent report of the Taft Commission. His opinion as to the policy recommended therein concurred in general, but on several points he took issue. Mr. Schurman recommended free trade with the islands, and said there was no reason why they should have tariff burdens any more than Porto Rico. He advocated readjustment of suffrage qualifications. Knowledge of Spanish, he said, ought not to be a test, while the amount of the property qualification should be materially reduced.

Mr. Wu, the Chinese minister, has handed Secretary Hay the following edict, transmitted to him by Wei-Wu-Pu, at Pekin, in a cablegram dated January 11, 1902:—

"By order of her imperial majesty the Empress Dowager will issue the following edict: During the disturbances caused by the Boxers last year, the American commanding officers issued strict orders to their troops to use strenuous efforts to protect the buildings within the Forbidden City. This was an act of friendship worthy of imitation for which we feel extremely gratified and grateful. We, therefore, instruct Wu Ting Fang to convey our expression of thanks through the Secretary of State to His Excellency, the President of the United States. Respect this."

Admiral Walker, chairman of the Isthmian Canal Commission, says that its supplementary report on the Panama route will probably be completed within a month. Admiral Walker adds the statement that all the reports that the French Panama Canal Company would be unable to convey a clear title to the Panama concession with full rights and privileges were unwarranted. There is no doubt, he declared, that the Panama concession is as good as it ever was, and that there is nothing in the way of its valid transfer to this Government should Congress decide to accept the offer of the French company.

Governor Nash of Ohio, chairman of the state auxiliary of the McKinley National Memorial Association, has started a movement for the recognition of President McKinley's birthday, January 29, as a national holiday.

Of the $350,000 paid the workingmen at the Carnegie Steel Company's Homestead Works Saturday, January 11, ten thousand dollars was given toward the McKinley Memorial fund. A majority of the men gave half a day's pay.

President Roosevelt has selected Captain Charles E. Clark, commander of the Oregon, and now governor of the Naval Home at Philadelphia, General James H. Wilson, retired, of Wilmington, Del., and Hon. Whitelaw Reid for special ambassadors of the United States to the coronation of King Edward.

Foreign.

Four further edicts have been issued by the Chinese Court. The first orders the members of the Han-Lin Academy to study Western arts.

The second edict creates the office of Minister of Education, and appoints Chang Po Hsi, who is president of the Board of Punishment, as minister. He will have control of the existing schools. He is ordered to formulate a new scheme of education, which, the edict declares, is now the most important matter with which the State has to deal.

The third edict appoints Wang Wen Shao director of the Board of Railways and Mines.

The fourth appoints Viceroy Yuan Shih Kai director general of the Pekin-Shanhaikwan Railway. This will facilitate the transfers of the line by the British, who are operating it, and who refused to transfer it to Chung Yen Mou, who was formerly the director general. It is understood, however, that the road will not be handed over to the Chinese until Russia hands over the Shanhaikwan-Newchwang line.

Another reform newspaper has been suspended because of its hostility to Chen Pi, civil governor of Pekin, who is a reactionary.

The correspondent of the London *Times* at Shanghai says in a despatch that Prince Ching, president of the new Chinese Foreign Office, has recently informed the United States minister to China, Mr. Conger, that the Viceroy of Canton has been ordered to enter no undertakings with reference to railroads in Kwang Tung province of a nature affecting the rights of the American-China Development Company under the Hankow-Canton Line contract. The company has notified Sheng, the director general of railroads in China, says the correspondent, of their intention to proceed with the construction of this line, commencing at Canton.

A contract for the sewering and paving of Havana for $10,649,000 has been signed by Mr. McGivney for McGivney & Rokeby of Jersey City and Acting Mayor Latorre for the city of Havana. Mr. McGivney has deposited a bond of $500,000. The contract provides that the work be finished within four years and that it is to begin thirty days after the city notifies the contractors to commence.

The official announcement from Berlin that the German Emperor will not attend the Victorian Memorial service nor the king's coronation has caused general surprise. The Kaiser made himself popular in England a year ago and his decision emphasizes in a marked way the strained relations which at present exist between England and Germany.

Industrial and Commercial.

For the first year of the new century an excellent showing has been made in merchant shipbuilding operations in the Bath customs district. While the total gross tonnage amounts to 36,277, or about five thousand tons less than last year, there is little doubt that these figures would have been considerably enlarged had it not been for the fact that many builders were unable to secure lumber when most needed, and this delayed work to a considerable extent. However, all the leading shipyards are busy at present, and the prospect for 1902 is fully as good as it was a year ago for 1901.

The year 1900 was a banner year and was reckoned as one of the four most prosperous shipbuilding years of the last century. A good pace has been set for the twentieth century, and if vessel owners become convinced that the Frye subsidy bill will prove of such benefit to coasters as is claimed, then there is reason for believing that a far greater amount of tonnage will be launched during 1902.

The Sloss-Sheffield Company is mining ore at Russellville, Ala., in a heel that is a mile long and is estimated to contain from fifty million to one hundred million tons of ore, which will last the lifetime of the present generation at least. The company has the largest brown-ore mines in the world at Russellville, and during the month of October it mined 27,000 tons of ore. The ore in the Russellville district assays from forty-eight to fifty-three per cent of metallic iron as against thirty-six to forty-five per cent for the red ore of Alabama.

It has been given out in a semi-official way at Union Pacific headquarters that the proposed cut-off from Echo, Utah, to Salt Lake will be built during the year. It is also stated that the Southern Pacific, which now has its terminus at Ogden, will also build a short line to Salt Lake around the southern end of the lake, thus cutting off nearly one hundred miles of the distance to the Pacific coast.

General.

William Marconi, the inventor of wireless telegraphy, was the guest of honor at the annual dinner of the American Institute of Electrical Engineers at the Waldorf-Astoria Hotel.

Signor Marconi described what his system had accomplished up to the present time, and referring to the prevailing opinion that a message can be intercepted and read by any one having the apparatus, he said:—

"Messages can only be read when the receiver and transmitter are attuned. This attuned system, as perfected, is not at present in use on ships. Because of the possibility of aid being required in a case of danger, all ships are attuned so that one ship can call up any other ship."

Speaking of his hopes for the future Signor Marconi declared that shortly it would be possible to send many messages over the sea at the same time.

The Federation of American Zionists is to be incorporated. The object of this corporation is to purchase Palestine from the Turkish Government, and to settle there all Jews who may desire to locate there. Many prominent Hebrews are interested in the proposed corporation, which is to have unlimited capital.

M. Giacobini, the chief astronomer of the Nice Observatory, reports that at seven o'clock in the evening, January 13, after moonset, the brilliancy of Venus was so intense as to cast shadows on the walls. This is the first time this phenomenon has been observed.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Christian Science as a Religion.

BY CLARENCE A. BUSKIRK.

THE new always encounters opposition from the old. Habits of thinking, prejudices, business interests, seem to be interfered with. The rancor and persistency of the attacks upon Christian Science are a palpable proof that the Christian Science thought is manifesting a tremendous energy and influence. Its adherents feel that it is their duty to defend against these attacks, because, from the standpoint of their experience and investigation, the doctrine and practice of Christian Science are of the very highest good to humanity. Misrepresentations, revilings, sneers, falsehoods (in fact, "all manner of evil" things, as was foretold by Jesus and his followers), are used against them. But they victoriously point to the hundreds of thousands of instances where the sick have been restored to health, after drug medication had confessed its failure, and to the thousands upon thousands of instances where materialists and agnostics have found the knowledge of God and been led into better lives, through its teachings. They point to the fact that its growth is now more rapid and powerful than the growth of any other church in Christendom. They ask that the scriptural rule of evidence be applied to them: Let the tree be judged by its fruits.

The adherents of Christian Science understand that it is the new-old religion of Jesus Christ. Man-made creeds have sadly mutilated that religion. The command, "Preach the gospel," "Heal the sick," has been split in twain. The promise of Jesus, "He that believeth on me, the works that I do shall he do also," has been silently slurred and ignored as something mythical and apochryphal. Notwithstanding Jesus expressly declared that the works which he did were of the Father and not of himself, man-made theology has taught that Christ performed his works of healing by some special power in his own person because of kinship to God. Jesus declared that he came not to destroy the law, but to fulfil it; yet many churchmen make bold to teach that the miracles he performed were in contravention of God's laws in order to afford evidence of his mission. Christian Science teaches that God is Spirit; that God is Love; that His laws are eternal and unchanging; that Jesus performed his mighty works to prove that his teachings were true, but not to prove that God's laws were changeable, or that God ever could make laws and afterward find it convenient to have them violated. Christian Science teaches that Christ performed mightier works in healing than Elijah or any other before him, because he had a knowledge superior to theirs of the laws of his Father, which he was fulfilling, not destroying; and that he was our Wayshower, and that as we learn more and more, from his teachings, promises, commands, and example, how to apply the eternal and beneficent spiritual laws to ourselves and our fellow-men, as spiritual beings in the image and likeness of God, we can better follow his command to preach the gospel (good news) and heal the sick by spiritual methods, and better illustrate the grand scriptural statement, "The prayer of faith shall save the sick."

Jesus healed through God's spiritual laws acting upon us as spiritual beings, and thus dealt directly with the causes of all human discord, which are sin or disobedience to God's laws. When he cured the lame man, Jesus declared that it was the same thing to cure him of his sin as it was to tell him to take up his bed and walk. Sometimes men argue, even from pulpits, that Christ healed the blind man by anointing his eyes with clay moistened with spittle, and not by spiritual means. Why, then, did he heal other blind men, and not use such material? Why, then, do not those preachers who argue in that way get the doctors to make a clay-and-spittle ointment for blindness? It is puerile to say that the clay and spittle had any medicinal virtues, or that he used them on that single occasion otherwise than as we shake hands or bow to each other, in compliance with a habit and fashion of our day; unless, indeed, he spat on the clay in token of his contempt for material agencies for healing. The churchman who tries to argue that Jesus did not perform his works of healing through spiritual agencies alone, has to violate every rule of logic, and short-sightedly plays into the hands of materialists and atheists.

Christian Scientists often are asked how the prayer of faith can heal the sick. This question is not usually asked by Christians, because the traditions of Christianity, as well as its direct literature, teach them better, however much those teachings and traditions have passed into desuetude because of the exigencies and worldliness of ecclesiasticism. Read "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy (the authoritative text-book of Christian Science), and the light may dawn on your understanding. I could not hope to explain the how, or *modus operandi*, of the prayer of faith in the few hundred words of this article, any more than I could write in such limits a treatise on the *modus operandi*, or how, of electricity. But let me illustrate. An acorn lies in the cold ground for months; it lifts a tiny stem into the gracious sunshine and rain; through years and years it grows into the strong and sturdy oak. Occasionally, it is true, the acorn may fail to germinate, just as Jesus complained of the want of faith interfering occasionally with his works of healing, and just as it may be that occasionally patients are not restored to health through Christian Science. These exceptions do not disprove the rule, however. Now the fact that there are laws under which the acorn grows into the oak is accepted by every reasonable man, whether he can or cannot perceive the how of the action of those laws. The fact that he does not understand the *modus operandi* of the germination of the acorn and its growth into the tree, or does not understand the *modus operandi* by which the prayer of faith heals the sick, does not disprove the laws under which such phenomena occur. Rather they ought to stimulate us to strenuous endeavors to search out and apply those laws.

Christian Science is often confounded with hypnotism, magnetic healing, occultism, mental therapeutics by suggestion and will power, Dowieism, etc. This is only done through ignorance or through sinister motives. Christian Science is quite distinct and different from them all. Since Mrs. Eddy published her book there have sprung into existence various imitations and counterfeits of her teachings,

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

just as sorcerers and necromancers once attempted to do the works of the prophets and of Jesus and his followers. Christian Science not only differs from these modern imitations, but it sternly opposes them. Its opposition is based on the fact that they can be used for wrong ends. Crimes are committed through the agency of hypnotism; and every invasion of one mind by another is dangerous, because suggestion or use of will power may be wrongfully employed. On the other hand, Christian Science can be used for naught but good. The power departs from the understanding and prayer of the Christian Science practitioner if he seek any but a good and righteous result. No one can show that Christian Science has done aught but good. From its very reliance upon God and upon nothing else, its work is always good, and it can do no work otherwise.—*The Indianapolis Sentinel.*

Christian Science in the Schoolroom.

BY CAROLINE N. POOLE.

I AM grateful for the blessings that have come to me, to my family, and to many of my friends, through Christian Science; but my heart is never more full of gratitude to God and to her who has revealed to us this great Truth, than when I think of my schoolroom, and of all that it has done for me there.

John Ruskin said that every one should have a sense of happiness in his work when doing it in the best possible way. To an enthusiastic worker in any field I suppose there is nothing more disheartening than a constant feeling of dissatisfaction and disappointment, due to the consciousness that one is not working in the right direction, that he is not accomplishing what he would accomplish, that he is not producing the results which he knows must and can be produced.

During the six years that I had been teaching, previous to my introduction to Christian Science I had with me constantly this sense of discouragement and disappointment, for I knew that I was not doing my work in the best possible way. It was not only the failure to bring out the desired results that troubled me. I failed to find the help that I needed, and did not know where to look for light. I used the normal school methods conscientiously, and taught the different subjects as I had seen others teach them. My pupils went through the course of study laid out for them, and were promoted to higher grades. They gave me little trouble. No fault was found. Still I was not happy. "Was I helping my pupils to become manly boys? boys of intelligence, refinement, ability, and character? The inertia, idleness, carelessness, indifference, coarseness, irritability, and more serious evils which beset them,—what of these? were they really being overcome?" These were the questions that I could not answer to my own satisfaction.

I read books on pedagogy. I made a special study of the principles of teaching, and passed an examination on this subject, writing at length on the comparative merits of the analytical and synthetical methods, and other similar questions. I visited many schools, both in Boston and other cities, but although I saw much that was helpful, as time went on I felt convinced that the others were guided by no definite principle, that they too were groping as I was.

When Christian Science came to me about four years ago, and I learned through "Science and Health with Key to the Scriptures" that if we ask aright our prayers will be answered, these words, "Trust in the Lord with all thine heart: and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths," brought me unspeakable joy, for I knew that at last my prayer would be answered; my problem would be solved. I prayed daily, fervently, for wisdom and understanding, and little by little, slowly but surely, the light has come.

I strive now to teach my pupils how to become the "sons of God;" to teach them that they are made in the image and likeness of God; that their "birthright is dominion" (Science and Health), and that they can overcome all that would prevent them from becoming God's perfect children. It matters little now what *subjects* I teach, as each subject may become the means through which the pupils may acquire the habit of doing well whatever they undertake.

As they realize that they are gaining intelligence, and the power to do quickly and well whatever they have to do, whether it is to reason correctly, to judge fairly, to banish a wrong impulse or desire, to learn a lesson in geography, mathematics, or grammar, or to perform gracefully and easily a difficult exercise in gymnastics, they enter into the work with an energy and enthusiasm that dispels idleness, inertia, and carelessness.

My pupils are boys from eleven to fifteen years of age, and I usually have fifty or more in my class. Often when I have seen their earnest, eager faces turned to me in the morning, and have realized that I must guide and teach them all through the day, I have trembled. Now I can look into their eyes with confidence and love, and answer them with the silent assurance, Beloved, ye *shall* become the sons of God, for I know that Infinite Spirit is everywhere, and He will guide both them and me.

I am able now under the light of Christian Science to find help and encouragement in our educational magazines, and in the thoughts expressed by earnest, sincere educators, men and women whose books I read, or with whom I come in contact every day. The inspiration received from true and noble thoughts is intensified when the understanding is illuminated by Divine Science.

The thought of our highest educators seems to be changing from a material to a spiritual basis. They, too, unconsciously, are reaching out for this great Principle. John Dewey, professor of philosophy and pedagogy in the University of Chicago, speaking before the Harvard Teachers' Society, said, "What we want is some sort of unity of standard and opinion, some new interpretation of experience in philosophy, science, and in the ethical and social questions, growing out of the application of science and of ideas to life. Until we get these I do not see how the colleges are to spare themselves from the confusion and conflict which now prevail."

Professor John M. Tyler of Amherst, in an address before a convention of high school superintendents, said, "It used to be thought that the greatest thing you could do for a boy or girl was to pour knowledge into him. But to-day . . . your business is to stimulate the growth of everything there is good in the child, so that the child may develop into the best boy or girl you can possibly make out of the material."

The training of a manly boy or a womanly girl is a far more difficult task than the training of a scholar. This is God's work, and only as we draw nigh unto God, and are governed by no other mind than His, can we succeed in it.

My work has not reached perfection. It falls far short of it, but, compared with those of preceding years, the results are encouraging, and I can look with confidence and joy toward the future, for "Science and Health with Key to the Scriptures," p. 154, tells us that man is "the infinite idea, forever developing itself, broadening, and rising higher and higher from a boundless basis."

Here is one of the Rev. Louis Albert Banks' New Year resolutions:—

I will not talk about my personal ailments. If my shoulder is rheumatic or I have the gout in my big toe or my knee joint is stiff, it will be one of the subjects on which I am silent and not open to interview. Amen!

Boston Herald.

The Lectures.

At Chicago, Ill.

Second Church of Christ, Scientist, of Chicago, was filled to overflowing, December 31, 1901, with an audience unusually sympathetic and showing marked intelligence. The lecture on Christian Science was delivered by Mr. Edward A. Kimball, C.S.D., who was introduced by Mr. Bicknell Young, First Reader of Second Church of Christ, Scientist, of Chicago.

Mr. Young made the following introductory remarks:—

On the eve of a new year, we are involuntarily reminded of the conditions of human thought which ever repeat themselves in the history of the race.

The resolutions, the hopes, the prayers, the disappointments, the dreads of the future, the regrets of the past, all these crowd in upon the minds of mortals, especially at every recurring new year, as varied and conflicting emotions. What becomes of all the fervent prayers, the good resolutions, the hopes, the ambitions that are stirred into existence by the recollection of past failure or the desire for future success. Most of them seem to be as ephemeral as the breath of a passing song. What an ocean of sadness might be evolved from all the tears engendered by hopes deferred and promises broken.

Why are so many resolutions, good resolutions, proven valueless? Why do so many sincere prayers fail? Why should joy be a trembler and hope forever a cheat? Christian Science is able to answer these questions, and it offers a remedy, a scientific remedy, for the sad conditions which they suggest.

Therefore a lecture upon this subject is peculiarly appropriate at this time. Christian Science shows divine Love to be not merely a beautiful theory, but the actual fact of being, by means of which a man can heal his diseases, reform his character, and guide his life. Could a more appropriate and blessed message be given to you and me on this new year's eve?

The joy of Christian Scientists would not be complete if they might not share it with others. The members of this church welcome all friends here this evening with the most heartfelt cordiality. Should some be induced by this event to investigate Christian Science still further, our joy will be increased manyfold through our conviction of their increased happiness and the satisfaction that they will experience. Their first footprints in this path may be the footprints spoken of in the "Psalm of Life," "Footprints on the sands of time,"

> Footprints that perhaps another,
> Sailing o'er life's solemn main,
> A forlorn and shipwrecked brother,
> Seeing, shall take heart again.

We are glad that our first lecture in this, our new home, has fallen upon such an auspicious date.

We are grateful to have one who will speak from a grand experience in Christian Science work, and we thank him for coming to us to-night. May we be able to listen with our hearts in order that we may hear and heed the message he bears.

I have the pleasure and honor to introduce Mr. Edward A. Kimball of this city, a member of the Board of Lectureship of the Mother Church.

At Lincoln, Neb.

Edward A. Kimball of Chicago, member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, lectured at the Oliver Theatre last night (January 10, 1902) on the subject of Christian Science. The first floor of the building was filled, and the balcony contained quite a number of people, eager to hear what the noted lecturer had to say on the subject.—*Nebraska State Journal.*

Chancellor E. Benjamin Andrews of the State University introduced Mr. Kimball. He said:—

All persons familiar with history know that there have been many different apprehensions of Christianity. Christianity is not peculiar in this. The disciples of Socrates divided into many sects; the followers of Kant, the followers of Hegel, could not agree. The same is true in the case of all humanity's foremost teachers. Each one's doctrine is so vast that the average disciple is unable to seize more than a single aspect. Little else could be expected than that extreme differences of opinion should exist regarding the teachings of Jesus Christ. Such variety of view seems to us to be one proof of Christ's supernatural character. It evinces the immensity, not the poverty of his vision. We who call ourselves orthodox too easily think we have come to the final apprehension of Christianity. Is it wise to assume so much, however satisfied we may be that we are right? Others are approaching the problem in a different frame of mind. The Chancellor declared his belief in the teachings of Jesus Christ, but said he did not dare to assume he had fully or finally fathomed these teachings. He advised all who might be like himself sceptics to remember that while all new beliefs have been opposed, orthodoxy, in nearly all instances where it has set itself against alleged new insights, has been forced to make concessions. He asked that what the speaker of the evening had to say be received in a friendly frame of mind. He was glad that the Lincoln Scientists had brought to Lincoln one of the best accredited apostles of the new doctrine. Mr. Kimball was introduced to the audience and thanked the Chancellor heartily for what he had said.—*Correspondence.*

At Louisville, Ky.

The lecture of Judge Wm. G. Ewing of Chicago, at Macauley's Theatre, drew a large audience. In introducing the speaker Mr. B. S. Josselyn said:—

Ladies and Gentlemen:—The lecture you have been invited to attend, is given under the auspices of First Church of Christ, Scientist, of Louisville, and in its behalf I extend to you a cordial welcome,—a welcome with outstretched arms full of that love which is born of God. We all love the same God and Father, the same Jesus Christ, our Saviour and your Saviour, and we want to get closer together by being better understood. We love you as we do all God's children, and want you to love us. We are aware that Christian Science is ridiculed because not understood. It is for the purpose of telling you the Truth about it that this lecture is given.

For many years I was weary and heavy laden with sin, sickness, selfishness, and many other undesirable things, and found peace, health, and happiness, became a better husband and father, a better business man, and a better servant of God, by reading and absorbing without prejudice, what is contained in the Bible, through the light thrown thereon by "Science and Health with Key to the Scriptures," the Christian Science text-book, written by Mary Baker G. Eddy. This book makes the Bible more clear and consequently more dear, and enables us to obey the commands of Jesus in the healing of the sick and sinful, and has brought peace, health, and happiness into many homes, formerly filled with inharmony of every sort. In the words of St. John the Evangelist, "It is the Spirit that beareth witness, because the Spirit is Truth."

We have with us this afternoon, Hon. William G. Ewing, ex-Judge of the Superior Court of Chicago, and formerly United States District Attorney for Illinois. He is a member of the Board of Lectureship of the Mother Church at Boston, and will now address you, taking for his subject, "Christian Science: Physician and Redeemer." I now have pleasure in introducing to you Judge William G. Ewing of Chicago.

At Evanston, Ill.

It was with deep gratitude that First Church of Christ, Scientist, had the privilege of giving the people of Evanston another opportunity to hear a lecture on Christian Science.

The seating capacity of the church was filled Saturday evening January 4, and much interest was manifested by the audience in the logical and inspiring discourse given by Mr. Edward A. Kimball. Mr. Holmes Hoge the First Reader made the following introductory remarks:—

My Friends:—In the name of First Church of Christ, Scientist, Evanston, I extend to you a warm and sincere welcome.

Some years ago there was organized by The First Church of Christ, Scientist, Boston, what is known as the Board of Lectureship for the purpose of correcting erroneous impressions regarding the teachings of Christian Science that seemed to find lodgement in the minds of many and to disseminate a knowledge of what Christian Science is as far as it would be possible to do so in short discourses from the platform. As I look into your faces this evening I see many who have through the aid of Christian Science been lifted from low conditions into which they had fallen through sin and sickness, without hope, into their true heritage of happiness and health. Then they were cast down and depressed in mind and body, but now they are possessed of healthful bodies and minds, and are in the full vigor of manhood and womanhood. Where distress reigned in the homes of some now Love sits enthroned and its rich fruitage is everywhere apparent, and all this has come through aid given by Christian Science.

We are happy to have with us this evening one who is devoting his whole time and energy to Christian Science work. He needs no formal introduction to an Evanston audience, as it was his privilege, as it is now ours, to be a resident of our beautiful city. He will tell you, as far as he is able in the time allotted, what Christian Science is and what it is not.

I take pleasure in presenting Mr. Edward A. Kimball of Chicago, a member of the Board of Lectureship of the Mother Church in Boston.

At Des Moines, Ia.

Tuesday's *News* gave a brief synopsis of the lecture of Edward A. Kimball, C.S.D., of Chicago, on Monday evening (January 6, 1902) at Foster's Opera House, under the auspices of First Church of Christ, Scientist. Those who are curious to know the tenets of this sect will be interested in a fuller report of the address.

Mr. Kimball was introduced to the large audience by Miss Mary Stewart, who said:—

Friends:—In the name of First Church of Christ, Scientist, of this city, I bid you welcome.

We are happy that Des Moines has so heartily responded to our invitation to listen with us to a lecture on a subject which is so rapidly gaining the thoughtful attention of the world.

We have asked to address you this evening, not a theorist, but one who will speak from the basis of a broad and practical knowledge of the Principle of Christian Science, and of its benefits to mankind.

You will understand that he cannot give to you and to me in an evening's lecture what he perhaps has spent years in acquiring; nor is it possible fully to explain a science and its operation in an hour or two. Let us not, therefore, by an unreasonable expectation, deprive ourselves of what is for us.

You remember when we were children we were told a story with a moral about a dog with a piece of meat in his mouth, who, when he saw his reflection in a pool of water, relinquished what he had for that which he hoped to get.

Several years ago there was established by the Mother Church of this denomination a Board of Lectureship. The lecturer of this evening is a member of that board, and therefore speaks with authority. You may accept what he says as truly setting forth the fundamental teachings of Christian Science as to the cause and scientific cure of disease.

I now have the pleasure, ladies and gentlemen, of presenting to you Mr. Edward A. Kimball, C.S.D., of Chicago.

The Des Moines Daily News.

At LaGrange, Ill.

The lecture by Edward A. Kimball of Chicago, Sunday afternoon, January 5, attracted probably the largest and most appreciative audience that has assembled in LaGrange for some time. The fine auditorium of the town hall was comfortably filled, even the chairs in the gallery having occupants. The stage was decorated with palms and cut flowers, and Henry Werno, ex-president of the village board and First Reader of the LaGrange Church of Christ, Scientist, under whose auspices the lecture was given, presided and introduced the speaker. Mr. Werno said:—

Friends:—You have been invited here to listen to a lecture on Christian Science by a member of the official Board of Lectureship of The First Church of Christ, Scientist, in Boston, and on behalf of First Church of Christ, Scientist, of LaGrange, I bid you a cordial welcome. The representative of this board who is to address us this afternoon is not a stranger to LaGrange, as he delivered the first lecture on Christian Science given here, about three years ago. His practical experience in all the departments of this great movement enables him to speak with authority, and he will tell you the truth about Christian Science, what it is, and what it is doing for mankind through the discovery of the cause and the scientific cure of all the ailments to which mortal man is subject. If you will listen attentively to his words they will add to every healthful, uplifting, and loving thought that you may hold in your consciousness. In obedience to the command to love your neighbor as yourself, and in grateful acknowledgment of the privilege extended to us, we offer to you this lecture as a message of love and good-will. I now have the privilege of presenting to you Mr. Edward A. Kimball of Chicago.—*Suburban News,* LaGrange, Ill.

At Peoria, Ill.

The lecture delivered last Sunday (January 12, 1902) at the Grand Opera House by Hon. William G. Ewing of Chicago was a revelation to most of the large audience, numbering, as it did, many who had never before heard so clear an elucidation of this interesting subject. Judge Ewing is known as a man of high intellectuality, and his reputation on the bench, his ability as a lawyer, and his argumentative qualities naturally brought out a representative audience, which included many of our professional and business men. The house was filled with eager hearers of all denominations when this distinguished representative of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, made his appearance. Mayor William F. Bryan introduced the speaker, making some graceful allusions to the belief and being delighted at the cultured hearers he found present.

Judge Ewing had for his subject: "Christian Science: Physician and Redeemer," and his words were carefully followed. He spoke for an hour and a quarter, holding the rapt attention of his auditors and proving to be a convincing and logical reasoner.—*The Peoria Journal.*

At Beatrice, Neb.

The lecture last evening at First Church of Christ, Scientist, by Edward A. Kimball, was well attended, nearly all the available space in the audience room and on the platform being occupied.

The speaker was introduced by the Rev. Edmond Erb, who spoke of the progress of thought, and in reference to the subject of the evening, said he thought it would not be out of place to compare it to the discovery of the X-ray as applied to the spiritual world.

The subject of the lecture was "The Cause and Cure of Disease." The speaker proceeded to show, by well-chosen illustrations, that the cause of all disease is in mind, and the only real cure is in being governed by divine Mind, as shown and practised by Christ when he was on earth, and as taught in the Bible.

Mr. Kimball is a pleasant speaker and presented his subject in a clear, logical, and forceful manner, which seemed deeply to impress his listeners, who showed their interest by their close attention.—*Beatrice Evening Times.*

What is God?

THE following is an extract from an address on "Changes in the Conception of God," which was recently delivered by Dr. Felix Adler, at Carnegie Hall, New York City, before the Ethical Culture Society.

"Why is it that men believe in a God, a being whom they have not seen and whose existence they cannot verify? There are three motives which lead them to their belief. These three motives are the emotional, the intellectual, and the moral. The most important of these motives is the moral one.

"There is a great fight going on in the world. God and evil are pitted against each other. The fight has really just begun, and the struggle will be a long one. But it is in the nature of things that the moral idea will prevail. That is what gives us strength to carry on the fight.

"Then what do we believe as to God? First, that there is this higher power, and that our images of God are just signs, and that we need signs unless the thing itself is to escape us.

"Shall we use the old signs of the past, or are we to look for some new metaphor, some new token, some new sign, in which we modern men, facing the problems before us, are to conquer? Are we to continue the father, the man-like sign, or is there some other which we need?"

Portraits on Postage Stamps.

If President McKinley's portrait is put on one of the postage stamps of this country, as dispatches from Washington have said is likely to be done in case the Postoffice Department brings out a new issue, his portrait will be the ninth of a President to be used in that way, says the *New York Sun.*

As the regular series of stamps, excluding the Columbian, Trans-Mississippi, and Pan-American exposition issues, has now been in circulation with only slight changes in watermarks and the like since 1890, a change of some sort is expected soon by philatelists.

Ever since Uncle Sam's postoffice began making stamps in 1847 or thereabouts, the face of Washington has appeared on one of the stamps in every regular issue, and with a single exception on a stamp of low value and general use. Benjamin Franklin's face has always adorned postage stamps of low value, and has thus become familiar to people who have sent or received letters ever since 1847.

Presidents other than Washington whose faces have appeared on the stamps are Jefferson, Jackson, Lincoln, Garfield, Grant, Madison, and Taylor.

Of the stamps of higher values the eight-cent stamp now bears Sherman's picture, the ten-cent Webster's, the fifteen-cent Clay's, the thirty-cent, Jefferson's, the fifty-cent Jefferson's, the dollar stamp, Perry's, the two-dollar Madison's, and the five-dollar Marshall's.

Notices.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Divine Healing.

THE REV. DR. LORIMER, who recently left Tremont Temple, Boston, to accept a call to the Madison Avenue Baptist Church, New York City, preached a sermon on the subject of Divine Healing in the latter church Sunday, January 12, 1902. We have before us only newspaper extracts of the sermon, but if they correctly indicate Dr. Lorimer's remarks, they may truly be said to be remarkable and significant, coming as they do, from one who has been among the most conservative in reference to the teaching of Scripture upon the healing of physical or bodily diseases.

The following is what Dr. Lorimer is reported to have said:—

"On this theme, the Scriptures are definite and pronounced. The Almighty is over and over again presented as the source of strength and as the supreme cause of health. Not without reason is he termed 'Jehovah that healeth,' and various are the references to his healing mercies.

"When Jesus appeared as the Messiah he treated the broken-hearted, bound up wounds, and gave sight to the blind. The direct agency of the highest of all beings is brought out in the case of the woman who for twelve years had suffered and spent her living on physicians, and only found relief when she touched the border of Christ's garment. We have another instance in Abraham's prayer for Abimelech, which brought health to that ruler and his wife.

"God, the ultimate healer, will be more fully recognized as science attains to its maturity. There are two extant monuments which indicate that the latest thought yet cleaves to the earlier on this point—one the mausoleum of Hadrian, at Rome, and the other in Boston. It was reared to one of the discoverers of anæsthetics, and on the pedestal may be read this sacred text: 'This also cometh from the Lord of hosts, which is wonderful in counsel and excellent in working.'

"But it is worthy of note that in the Old Testament the priests are not regarded as exclusively the channels of the divine power of healing.

"While God was magnified as the source of recovery from illness, other than priestly instrumentality was employed in conveying the blessing. But it is impressive and instructive that from Abraham to Gregory, and from Gregory to Boston science, the real connection between Jehovah and Boston science has been recognized.

"I believe it would be well for Christians in their prayer-meetings to tell how God has helped their bodies as well as their souls. Were we to speak more in His praise we would encourage more to look to Him for restoration.

"Among curative agencies blessed of God a very high rank must be assigned to the moral and the spiritual. The ideal of a pure manhood is a long step as a help to healing. When the spiritual is supreme and Christians have little time to think of themselves or their cares, and when they are fully occupied with celestial visions, they usually keep well and are hearty.

"But in conclusion I am bound to remind you that when the ancient theological conceptions of disease and its cure prevailed, and where medical science was ignored, there the largest degree of suffering and mortality obtained."

That there should be such a frank recognition of the relation existing between God and the bodily ills of mankind by one occupying so eminent a place in the Evangelical pulpit, is surely among the signs of the times. We think it quite safe to say that such a sermon would not have been preached by any minister occupying the pulpit of the Madison Avenue Baptist Church, or any similar church, a few years since. We feel equally sure that but for the healing work which Christian Science has accomplished on the Scriptural basis, and which has directed public attention to the subject of Scriptural healing to such an extent that a discussion thereof, in some form, has become a public demand, we should not now have such sermons, or see them published. The time has manifestly come when the ministry must either affirm or deny that the Scriptures teach the healing of bodily illness; and they must either affirm or deny that such teaching is for the present as well as for the past. Some are affirming, some, we regret to say, are denying. Others have not yet touched the subject.

If we correctly understand Dr. Lorimer's position, however, his conception of Divine Healing is not that of healing without drugs or material remedies, but that these, properly applied, are among the divine means of healing. That is certainly implied in this statement: "God, the ultimate healer, will be more fully recognized as science attains to its maturity." This evidently refers to medical science, or material science. If so, there is no Scriptural authority for it. There is no system of medical science set forth in the Bible. But there is every warrant for the deduction that the "divine healing" of Scripture is through the direct power of God, independently of material remedies. In other words, prayer was the "divine healing" sought and practised by the characters of the Bible.—Moses, Elijah, and others of the Old Testament, and Jesus, the apostles, and disciples of the New. They neither used "anæsthetics" nor taught their use, any more than they used or taught the use of other drugs or medicines.

There will have to be a deeper insight into the spiritual meaning of the Scriptures in their relation to divine healing than that which deduces authority from the Bible for the use of drugs of any kind.

The concluding statement of Dr. Lorimer's sermon as reported, would almost seem to be a refutation of all the preceding admissions. It is difficult to reconcile these two propositions:—

1. "On this theme [Divine Healing] the Scriptures are definite and pronounced. The Almighty is over and over again presented as the source of strength and as the supreme cause of health. Not without reason, is he termed 'Jehovah that healeth,' and various are the references to his healing mercies."

2. "But in conclusion I am bound to remind you that when the ancient theological conceptions of disease and its cure prevailed, and where medical science was ignored, there the largest degree of suffering and mortality obtained."

The plain deduction here is that the healing of disease by the professors and practitioners of medical science of the present day is preferable to that of the "ancient theological conceptions of disease and its cure," and that the Biblical conceptions should give way to modern medical skill and progress. Therefore, after all, according to Dr. Lorimer, the Bible teachings and illustrations are now obsolete and valueless. Yet this conclusion, it seems to us, is in direct conflict with the Doctor's illustration of the woman who for twelve years had spent her living on physicians, and only found relief when she touched the hem of Christ's garment. The citation of this incident is unfortunate from the logical point of view.

Digitized by Google

In view of the final conclusion of the sermon we must confess our inability to discern its purpose. Nevertheless, we reiterate our opening statement that the admission by the occupant of this pulpit that the Bible recognizes the divine power to heal the body is a remarkable fact in present-day history. It is so contrary to the common run of pulpit admissions or utterances that those who have eyes to see can easily discern the trend of thought and opinion even among the most orthodox and conservative.

We feel constrained to say that we cannot agree with the statement that when the ancient theological conceptions prevailed and where medical science was ignored, there the largest degree of suffering and mortality obtained. We do not think a study of history will confirm this assumption. Nor are we able to see that this final conclusion of the Doctor's is in harmony with his affirmation of the effectiveness, as curative agencies, of the "moral and spiritual," or with his statement that "the ideal of a pure manhood is a long step as a help to healing." His suggestion that the churches conform their prayer-meetings more closely to the testimony meetings of the Christian Scientists is also significant. He does not say this in direct terms, but the inference is plain.

If Dr. Lorimer's views, that healing through anæsthetics and other drugs are divine means of healing, were to be accepted, they would play havoc with the charge so often made against Christian Scientists that they should not charge for their services because they claim to heal through the agency and power of God. If the medical profession adopt means that are approved of God, or in any way appertain to Him, according to the logic of the objectors referred to, the medical profession should likewise be inhibited from charging for their professional services.

Those who thus object must either deny all relation between medical healing and the divine power, or they must deny to the practitioners of medicine the right to charge for their services,—if they desire to be consistent.

The Most Popular Books.

The Critic, an illustrated monthly review of literature, published by G. P. Putnam's Sons, New York, in each number gives a list of the most popular books,—that is, the books most read,—at the circulating libraries, free and subscription, in the representative centres of the United States and Canada. They are prepared by the librarians of the libraries mentioned, or under their personal supervision. The record is intended to show what books other than fiction are being read, though the one most-called-for novel is admitted to the list.

In the October number we find thus listed the Christian Science text-book, "Science and Health with Key to the Scriptures," in Los Angeles, California, and Minneapolis, Minnesota. In the November number we find these two cities still thus noted, with Detroit, Michigan, added. We have not yet consulted the later numbers.

We are glad to be able to report so favorably upon our beloved text-book, and we know our friends everywhere will be glad to know of its favorable reception by the reading public. The more people come to know the real value of this book as a spiritual educator and healer of sin and sickness, the more it will be sought for.

Follow Love's Leading.

BY ALICE L. RANDOLPH.

Follow Love's leading, weary one,
Follow, though clouds obscure the sun,
Follow Love's leading day by day,
Follow closely all the way,
Darkness just precedes the dawn,
And Love is near you.
Follow on.

Among the Churches.

New Haven, Conn.

We always enjoy reading accounts of the progress of the work in other parts of the Field and think others may be interested in the report of our work in New Haven.

The following has been accomplished by the committee for distribution of Christian Science literature, of First Church of Christ, Scientist, New Haven, Conn., from October 12, 1900, to October 27, 1901:—

1,674 Sentinels, 261 Journals, 380 "Histories," 5 yearly subscriptions to the *Sentinel,* 3 yearly subscriptions to the *Journal,* 5 copies Science and Health, 1 "Miscellaneous Writings," 1 "Pulpit and Press," 1 "No and Yes," 77 Supplements, 1 *Quarterly,* 1 *Granite Monthly,* and 49 papers containing Mrs. Eddy's Reply to criticisms of the Brush Will Case.

These were placed in the Y. M. C. A., Young Men's Institute Library, Free Public Library, hotels, grocery stores, dry goods stores, shoe store, music store, county jail, and sent through the mail. We have utilized back numbers of the *Sentinel* and *Journal* which have been contributed by members of our congregation. The Sunday School has made liberal donations to this work.

Besides the above, we have been enabled, through the kindness of a professor in Yale Divinity School and the contributions of friends in the Cause, to present eighty dollars' worth of the books and pamphlets by Mary Baker G. Eddy to the three libraries of Yale College. These were accepted and letters of gratitude returned for them.

Thus we are striving to sow the seed, and we know that God's word will not return unto Him void.

MRS. CARRIE B. BOOTH, *Clerk.*

Annual Meeting, Bloomington, Ill.

The annual business meeting of First Church of Christ, Scientist, of Bloomington was held last night (January 9, 1902), at their church, corner of Monroe and Prairie Streets, for the election of officers and annual reports.

As shown by the official reports, the total receipts for the year 1901, were $2,302.39; total disbursements, $2,217.43. The church owns its own church property free of any incumbrance, and has a balance of cash on hand of $247.72 after all bills are paid. As is known, the church has established a Christian Science Reading Room in the Griesheim Building, which is for the public. The reading room report showed receipts for the year, $766.39; disbursements, $760.20; balance on hand, $6.19. Number of callers during the year 1,419. In addition to a large amount of literature distributed free the sales of books including the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, amounted to $350.33.

The local church has 102 members. It is in a flourishing condition, and, like all other churches of its denomination, maintains its own church as well as reading room without soliciting aid outside of its own members. Contributions are often received, however, from non-members who have received benefits through the scientific thought received at church service, or in reading Christian Science literature.

The Pantagraph.

Northampton, Mass.

Sunday, January 5, was a day to be remembered by the Christian Scientists of Northampton. The new hall on State Street was used for the first time for the services common to Christian Scientists throughout the world.

The hall and reading room in the new Herlihy Block make a very complete and neat establishment. The rooms occupied are in the south, or Main Street, side of the building, and consist of a small reading room in front, an audi-

Digitized by Google

torium, with a seating capacity of about one hundred, and a small retiring room in the rear.

The reading room is provided with book-case, tables, and a long window-seat. The walls are hung with a number of pictures of religious subjects.

The auditorium is reached by double doors from the reading room, and is provided with opera chairs. The aisles are carpeted with green Brussels, as is also the platform, which runs across the further end of the room.

The wainscoting, doors, ceiling, and casing are done in white, and the walls in a tint of green. A fine piano has a place in one corner, the platform is provided with two handsome, reading-desks, with electric light attachments, and all these additions and improvements are entirely paid for.

At the services yesterday the rooms were filled to overflowing. The morning service, in addition to the reading of selections from the Bible and Mary Baker Eddy's Science and Health, the Lord's Prayer, and appropriate hymns, consisted of an outline by Mrs. E. I. Mayfield of the work being done in the city; a solo, "The Holy City," by Miss Perkins of Troy, and an address by Mrs. E. K. Betts of Troy.—*Hampshire Gazette.*

Weatherford, Tex.

The cause of Christian Science is prospering in our little city. On the first Sunday in September, 1899, we began holding services at the home of one of our number, and continued in that way for eighteen months. During that time the interest in the meetings gradually increased, until the first Sunday in March, 1901, when the place of meeting was changed to the Odd Fellows Hall. Since our move, there has been increased interest, the congregation generally numbering from twelve to twenty-five. We also have an interesting Sunday School. Our services are held every morning at eleven o'clock.

The newspapers of our town kindly publish the notice of our services every week, and often strangers come in. More are becoming interested, and some good healing has been done.

We greatly appreciate the *Journal, Sentinel,* and *Quarterly,* and all other literature issued by The Christian Science Publishing Society, and also all the writings of our Leader, the Rev. Mary Baker G. Eddy. We thank God for Christian Science and its Leader, and the good we are able to do through the understanding of God as revealed in Christian Science.—A. C. R. MORGAN, Weatherford, Tex.

Church Property Transferred.

The Second Presbyterian Church property on Freemason Street, near the corner of Boush Street, has been transferred by the trustees of that church to the trustees of First Church of Christ, Scientist (Christian Science), the consideration named in the deed being $12,500. It had been arranged for the new owners to take possession of the property at the time of its transfer to them, but as it would have left the Second Presbyterian congregation without a church, the Christian Scientists have agreed to an arrangement by which they are to defer its occupancy till April, by which time the lecture room of the new Second Presbyterian Church, which is to be erected on Yarmouth Street, will be completed, and which the Presbyterians will occupy till their church proper is ready. The Christian Scientists will continue to occupy the room on the third floor of the Public Library Building, Granby Street and College Place, for the next three months.

The Public Ledger, Norfolk, Va.

First Church at Sandusky, O.

The members of First Church of Christ, Scientist, held their second annual meeting last evening (January 10, 1902). The reports of the treasurer and secretary were read and officers elected. The financial condition of the church is excellent, the treasurer's report showing that all the obligations of the society have been met, and that there is still a balance in the treasury. The First Church of Christ was incorporated November 7, 1901, with a membership of eleven. Since that time the congregation has more than doubled. Meetings are held on Wednesday evenings and on Sunday mornings.

Sandusky (O.) *Daily Star.*

Love's Anthem.

BY WILLIAM BRADFORD DICKSON.

SAY to thy soul, "Be still, be still;"
Then shalt thou hear,
In accents clear,
This anthem of Love,
From the kingdom above:
"Peace on the earth, good will, good will."

An Illustration.

BY M. F. G.

NOT long ago I had occasion to visit a room which was lined with mirrors and brilliantly lighted with electric lamps so placed and shaded as to produce the effect of great brightness without an unpleasant glare.

The room contained many articles of great value,—fine pictures, silver, and jewels; and as I wandered along looking at them I noticed a bronze statue standing at the far end of the room. I drew nearer to examine it and was suddenly confronted by long lines of bronze statues extending on either side of me into distant apartments. I was half startled for an instant and then I saw that there was really only one statue, and that all the others were reflections of this one in the mirrors on the opposite sides of the room. I tried to count them, but I could not; and as I looked there came to me, like a flash of light, this thought: "What a beautiful illustration there is here of what Christian Science means by the expression, "God, and man as His reflection." The numberless images I saw might be multiplied indefinitely and not one iota be taken from the original statue, but if the statue were taken away not one image would remain.

I looked again and saw that some of the reflections appeared to be far off and small. I knew this could only be a seeming, for the statue and the mirror remained stationary, so the distance could not be real; and when I examined to see why some images were smaller and less perfect than others, I saw that it was because they were reflecting each other instead of reflecting the original statue; but I also saw that this must be so, for from their position it was only through the reflections that the original could be seen at all, and I thought, "And can they ever know what the original is like when all the images they see are more or less imperfect?" For a moment the force of the illustration seemed lost until I saw that the salvation of all comes from knowing that the perfection of the original is the only reality, and that all imperfection, not being in the original, is nothing, and is not to be accounted of nor reflected again. Does this illustration seem to make God and man cold abstractions? not at all, when we realize that the Great Original is Divine Love, forever radiating the command, "Love one another, as I have loved you."

Glimpses.

BY HELEN ANDREWS NIXON.

THE perpetual demand of Spirit, "Let there be light," was present with me in early childhood. As I look back I can see the scientific thought repeatedly breaking through the clouds of belief. Had the effort then as now, been to separate the Truth from error rather than to reconcile them and account for their authorship in God, the way had been shortened. Of a loving heavenly Father I was conscious, and I distinctly remember in my childish heart the endeavor to apologize for what seemed to me mistakes. I whispered to myself, "I would not have made things so." That the glorious Truth "All is Mind" was urging its right to be heard is now evident. Matter as the *substance* of things seemed unworthy of God's power. I recollect standing when a very small child, under a starry sky, troubled by the thought that it was after all "all dirt," for so I had understood the teaching. How good it is that now as Christian Scientists we are learning to expect nothing from so-called matter, and all from Mind, God, in the way of instruction.

Years went by and the conviction deepened that the Bible and Jesus' teachings contained and embodied all wisdom. It grew plain likewise that we had not the true explanation, the key. Faith deepened, broadened, and laid hold of much. Experiences testified to Spirit's presence, help, and reality.

The following experience in 1884 occurred as related. After a long illness, and when apparently at death's door, I asked that certain young men might sing in an adjoining room. I called for the hymns beginning, "My hope is built on nothing less," and "God is Love. His mercy brightens." As the last line, "God is wisdom, God is Love," was sung, a complete transformation took place in my consciousness. The scene shifted into light. Instead of inhabiting a poor, sick body, my home was an atmosphere palpitating with love and purity. I looked upon the strange figure in the bed and wondered. I said to myself, "What has that to do with me? I am perfect and entire here in this beautiful place." I whispered to my mother, "Mother, God's everlasting arms are under us. He is Love. He is not on a throne." O the spiritual freedom and sweetness of that moment's realization! This glimpse healed the sick. When the physician came, he found to his amazement that my temperature had suddenly become normal. My recovery dated from this moment. Added proofs of Love's reality deepened the intense longing to know more of God.

The year immediately preceding the reading of Science and Health, the Christian Science text-book by Mary Baker G. Eddy, my thought had reached a point where the desire for light seemed to overshadow all other desires. Thus was the old giving place to the new. Science and Health was brought into the home and after three weeks of unceasing prayer and study of the book in connection with the Bible, the undimmed Science of Being as revealed through Christian Science burst upon my waiting sense. After days and nights of alternating struggle and peace, thought had grown calm and assured that God would answer and that right speedily.

It was a beautiful autumnal day and as I stood gazing into the blue sky, suddenly the vision of *Good* as the *all* appeared to me. Distinctly the words came, "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning." Then as a shadow appeared the belief in evil, of human origin, having beginning and ending, touching at no point the Good. No circumstance has since been able to cause a doubt as to the truth of this revelation. Since the priceless instruction in our Mother's class in 1899 I have fully understood that Truth alone could and would make free.

Then to Spirit only shall one turn in every hour of need; to Spirit, the tender, loving Father and Mother-God. Divine Love will teach us how to forsake darkness for light, how to learn through every experience, until every mortal thought with its inseparable penalty shall have given way to Truth.

Let.

BY MARY E. S. RICHARDSON.

IN reply to Jesus' question, "What will ye that I shall do unto you?" the two blind men said, "Lord, that our eyes may be opened." So we pray that we may have the spiritual understanding that will unfold to us the Truth. With this prayer in our hearts, we cannot but be grateful for the spiritual food which Christian Science brings to our hungry lives.

It is this gratitude which prompts me to write these words. In the Gospel of Matthew we read, "He that is able to receive it, *let* him receive it." That little word *let*, has followed me from the beginning of my study of Christian Science, eight months ago.

Science and Health came into my hands through no chance. I bought it to investigate its contents. Having been a student all my life I read thoughtfully, and with a sincere desire to comprehend its meaning. This willingness to *let* the Truth shine into my life and home, brought with it a most helpful willingness to *let* Truth unfold itself, and not to puzzle over seeming obstructions to clear understanding.

To those who are weary and heavy laden there is a sure rest. Divine Love and divine power are always ours to reflect, if we but let them be reflected. In so doing every burden is made light. The joy of knowing that for every need there is an abundant supply, and that supply is within our grasp if we let our anxious thought rest in the all-ness of divine Love. In the home, whether it be domestic problems, family trials, or social duties that claim our attention, let the knowledge that we are doing God's work be ever in our thoughts. Then what we have opportunity to do, is right, and what is left is not essential for our well-being.

The Key to Heaven.

BY ANNE DODGE.

"BELOVED, let us love one another." How simple, how sublime, how compact, and how complete a sentence! Yet it is the key to happiness, to harmony, to health, to holiness, yea, to the "mystery of Godliness" and the kingdom of heaven!

"Beloved, let us love one another!" Let us study these few words, ponder them, think on them, live them, and see what the result will be! We cannot love God unless we love one another, so these three words *"love one another"* fulfil the law and the gospel, cover man's duty to God and man's duty to man, and unlock the gates of heaven.

First let us ask ourselves, Are we doing this? And how? Are we putting out of our lives all rivalry, all envy, jealousy, evil speaking, and evil thinking? Are we seeking our brother's good, or are we elbowing him aside, pushing in this self that is each and every man's enemy, and striving to be thought greater than our brother?

To love one another means to humble this self and to serve others, to become the servant of all, even as our beloved Leader has done. Who is ready to follow her example, with no other incentive than pure love for humanity? No one can comprehend the word Christianity who is not the possessor of the broadest, widest, most comprehensive charity; and a love of humanity which sheds its heavenly dews on the unthankful and evil as well as the righteous and grateful, and sends us forth to "seek and

Digitized by Google

to save that which was lost." This is what it is to "love one another, "not love in word, neither in tongue," but, like our beloved Leader, "in deed and in Truth."

Demonstration in a Prison.

BY OLCOTT HASKELL.

IT has been my privilege to visit men interested in Christian Science who are inmates of our state prison at San Quentin, Cal. Work was begun here by a prisoner whose friends sent him Science and Health. Since then considerable Science literature has been in circulation, and it is bearing fruit.

During my last visit I talked with a prisoner who told me a recent demonstration. He was climbing a ladder with a heavy block and tackle, when the ladder broke and he fell thirty feet to the cement floor, striking his temple and wrist. While falling he remembered God's protection, and that he could not be hurt. Men ran to pick him up, and the foreman said, "Take that man to the hospital and see that he is cared for," but the man himself said, "No; I will finish my day's work." One standing near remarked, "That man is a Christian Scientist. You cannot hurt a Christian Scientist." The man completed his work, and though the fall left some marks these soon disappeared.

A year or two ago, when this man first heard of Christian Science, reading the book, "Science and Health with Key to the Scriptures," for one week cured him of all desire for tobacco which he had used habitually for years.

Forever Thine.

BY G. M. PRESCOTT.

FOREVER Thine, Oh God of Love!
This thought can always bring us light:
And, since we rest within Thy Love,
Our pathway must be always bright.

Forever Thine—and if we choose
To leave Thy path and go astray,
E'en then by Thee we are led back
To tread once more the narrow way.

Forever Thine—if this sweet thought
Is always present in our mind,
No thought of sin, disease, or death,
Within our consciousness we'll find.

Lift them Up.

Watching his opportunity, as the mad giant made a rush at him, Hercules caught him round the middle with both hands, lifted him nigh into the air, and held him aloft overhead. . . . The truth was, that, unless the giant touched Mother Earth as often as once in five minutes, not only his overgrown strength, but the very breath of his life, would depart from him. Hercules had guessed this secret; and it may be well for us all to remember it, in case we should ever have to fight a battle with a fellow like Antæus. For these earth-born creatures are only difficult to conquer on their own ground, but may easily be managed if we can contrive to lift them into a loftier and purer region.

NATHANIEL HAWTHORNE, in the "Tanglewood Tales."

The Bible is a storehouse of rich imagery and splendid words, of style both simple and ornate, and its literature alone, apart from its spiritual elevation, will repay the search of every student. Read the Bible and Shakespeare and you will find yourself able to converse well.

Ladies' Home Journal.

Testimonies.

Two years ago last August, in the beautiful old Mexican town of Santa Barbara, Cal., where the restless waves of the ocean made me think of my own restlessness, and ever haunted my thoughts with an overwhelming sense of the loneliness of widowhood, the light of Christian Science first dawned on me. I had known of it for two years and believed it was the Truth, but thought it involved too great sacrifices to investigate thoroughly and accept as my own life principle, although I wished it for my three little ones.

At Santa Barbara I was lifted out of the desire for a mortal-mind selfhood and shown the possibilities of a future in touch with divine Love. I can look back and see God's leading and bless the loving hand of the one He used to point out the way.

In a measure those possibilities are being realized; enough, at any rate, to encourage me to press on. Often I think of Paul's words, "Not as though I had already attained, either were already perfect: . . . but this one thing I do, forgetting those things which are behind, . . . I press toward the mark for the prize of the high calling."

A "high calling" indeed—the call to bring into practical, every-day experience "the fruits of the Spirit"—"love, joy, *peace,* long-suffering, gentleness, goodness, faith, meekness, temperance. Paul tells us that all material law is powerless against such mental atmosphere.

Of all these fruits I love the peace and gentleness, and have worked hard to possess them. Of an impetuous nature, it meant work for me, and I have realized, as never before, "Of mine own self I can do nothing!"

When I forgot Jesus' command to watch and, through going into contact with the environment which invited the old impetuosity, I allowed it to use me, there followed an unutterable weariness of mind and body, and I was glad to turn to divine wisdom again, "whose ways are ways of pleasantness, and all her paths are peace!"

"Blessed are the peacemakers," said Jesus in the Sermon on the Mount. If this ever meant anything to me, it was indefinite. Now I know we can only be peacemakers as we gain the peace to reflect. The whole world is hungry for peace; "That peace of God that passeth all [human] understanding."

How can the world misunderstand our position regarding *sin?* It almost seems as though they must wilfully close eyes and ears to our written word from the hand of our Leader and those who represent her cause. I say to my children, "Yes, children; error is nothing in itself, for God never made it, but if you are making it something by listening to the suggestion that it is something, and yield yourself or selves to it, it *is* something to *you*, and you will suffer!" They understand, why cannot the bigger children? Surely it is simple enough. Our responsibility is not lessened in the least, but our courage is strengthened a thousandfold.

If, as one critic avers, "Sin is a spiritual reality," that, of itself, were it true, would handicap us at the outset of life's battles. We would start, as many of us did before the Truth made us free, with the certainty of more failures than victories,—and ever asserting: "We cannot help this or that, it is born in us, it is our temperament." Now we know that "neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God," for He is ever-present and good, and He is All-in-all.

L. P. M., Pasadena, Cal.

I feel that I can no longer refrain from telling something of what Christian Science has done for me, and I desire

Digitized by Google

also to express the vast benefit and happiness I have obtained from reading the *Journal* and the *Sentinel;* also I wish to return my cordial thanks to those kind friends here and elsewhere who have helped me on different occasions and spoken the word in season.

Above all I wish to thank God that I have learned in a small degree through the teachings of Christian Science, something of the real, which dissolves our illusions and destroys fear. As I learn more of what is real I find there is nothing to fear, and we only fear as we live in the unreal world of the senses, where all is fleeting and nothing is permanent.

While never a physical sufferer to any extent, Christian Science nevertheless found me a prey to an abnormal physical condition which I had had as long as I could remember, and which I did not then know was unnatural. After the exercise of much patience and perseverance on the part of my healer and more or less on my own, the condition has been met after some years, and I am now absolutely exempt from physical ailments of any kind.

I mention the fact that it took years, in case some who read this may be tempted to be discouraged. Do not be discouraged. God or Good never ceases to work for us and surround us with good things, for that is all that can surround us if God is omnipresent.

The one great discovery for each one to make, and which Mrs. Eddy has made possible to all in this age, is what is Real. Most of us are beset by fears of one kind or another, vague or well-defined. Mine related to my business, and were so bad at times as almost to paralyze me physically, while the mental depression was continuous for years. Happiness, under the circumstances, I believed to be impossible, and I was always looking forward to, and living in the hope of, the time when I might somehow be delivered from the condition and the fears. Through Christian Science I have learned something of how to be happy here and now, instead of in the dim and distant future.

I have only learned this lesson after some very hard knocks; for, like Paul, I have been disposed to prove all things, and my earnest wish has long been that I might know the truth of Christian Science in no half-hearted way, but in the most positive manner and as certainly as I know that two and two are four. The slight understanding gained has been well worth the experience.

J. M. J., Toronto, Ont.

It is about ten months since I became interested in Christian Science. A short time before that my wife had had her attention called to the subject through a neighbor, and subsequently purchased a copy of "Science and Health with Key to the Scriptures." One evening, after returning from my work, she told me that she had a book she wished me to read to her. I complied with her request without asking the nature of the work she wished me to read. I think it impossible for any one to peruse Science and Health without its awakening some degree of interest in them. So it was in my case, and my interest deepened with each reading.

Shortly after I began to read the text-book, my wife desired me to attend a Sunday morning service with her. I refused the first time, but on the following Sunday went, with the result that I have not missed a Sunday service since. Gradually the new belief gained upon me, until I became thoroughly convinced of the truth of its teachings, and ready to adopt them.

For twenty-seven years before this time I had used tobacco almost constantly, and realizing that tobacco and Christian Science did not go together, I left tobacco strictly alone, and with comparative ease. Soon after I had a very severe cold, but applying the teaching of Christian Science, I found myself all right the next morning.

I wish I could tell all I know and feel about Christian Science, but I find it difficult to express myself as I could wish.

I have purchased two copies of Science and Health and sent them to friends and relatives. Among other things that Christian Science has done for me, I must not forget to state that I was cured of cramp of long standing and other claims which had troubled me for years are entirely gone. A wart on the inside of my finger was extremely troublesome and painful, but quickly yielded to treatment.

My conversion to Christian Science was only in part due to the desire for perfect health. I very soon discerned the inherent truth of its teachings, and praise God that my eyes are opened, and whereas I was blind, now I can see.

By occupation I am a carpenter, and previous to the time I became interested in Christian Science I thought when I came home at night that I was very tired after a particularly hard day's work. Now what a change! I am never tired, and frequently work several hours in the evening without feeling the least fatigue. My wife and I cannot thank Mrs. Eddy and Christian Science enough for what it has done for us.—EDWARD E. MOORE, Portland, Me.

It is just three years since I became interested in Christian Science, and when I look back and see the wonderful change,—what I was then and what I am now,—my heart overflows with gratitude to Mrs. Eddy for the understanding, not only for physical healing, but for the uplifting spiritually which I have found in the Bible through the study of "Science and Health with Key to the Scriptures."

For ten years I suffered constantly, never knowing what it was to have a quiet hour or restful sleep, never failing to have sleeping powders under my pillow. I could not read, sew, write, or do anything in all those years. All that a kind, loving husband and friends could do was done. I had no hope of ever getting well; I underwent an operation, but afterward was bound to material means more than ever.

In this despondent, hopeless feeling I went to Kansas City. I had not the least thought I would be benefited by going, but it seems now that God was preparing the way. I was asked to try Christian Science. I was offended to think any one should ask me to try anything so foolish, but I really knew nothing more about it than a few fun-making remarks. After a struggle I decided to give it a trial, for I felt something must be done quickly, and it seemed the last resort.

How I would like to tell all Christian Science did for me; my healing seemed slow, for I have proved every step of the way, but I knew from the first treatment I had found the Truth that would make me free. Never for one moment did I doubt. All my material helps that I so much depended on fell into oblivion, and I can truthfully say I was healed by Christian Science. I find myself planning my work by its teachings, for now I am doing my own housework, reading, writing, sewing, doing all my hands find to do. I am happy and contented, knowing a peace that passeth all understanding.

I love the *Sentinel* and have been helped many times by some one's testimony. I am a member of the branch church at Lancaster.—IDA MASON PAUL, Basil, O.

I look with so much anticipation and delight for our *Journal* and *Sentinel,* and enjoy them to such a degree, that I feel I ought to add a word of testimony as to what Christian Science has done for me.

The blessings are so manifold that have come through this glorious Truth to change my entire life spiritually, mentally, and physically, literally making a new heaven and a new earth in which old things are passed away, that words are inadequate to express my gratitude that my eyes were opened and my ears unstopped to see and hear.

After years of ill health and weakness I have found God to be my health and my strength. After reliance on ma-

Digitized by Google

terial riches I have found God my abundant source of supply. Instead of believing that life is in the body and that death can destroy it, I have proven to my consciousness that life is indestructible in *God*, and sin, sickness, or death have not control of it.

After twenty-five years of conscientious living by an orthodox religious creed, I found it wanting, and was stranded without hope and without God in the world. I cried in my desolation to the pitiless unknown God whom I was ignorantly worshiping. The true Father-Mother God whom I now adore in Christian Science, has proven Himself to be the God of love and mercy to the widow and the fatherless; has bound up the broken-hearted and set the captives free; has opened our understanding and taught us the wisdom of knowing God and man's relation to Him.

For all these unspeakable gifts we are indebted to Christian Science, and the revered and loving Mother in Israel, who, through years of self-sacrifice and struggle, has given to this age the old-new message wherewith we may come into "the liberty of the sons of God."

EMMA MACGREGOR, Chicago, Ill.

For five years I suffered constantly, never being free from pain. Although our family physician did all he could for me, I did not get any better. I became so discouraged that I was no comfort to myself or my family. It seemed to me as though there was no help for me, and that death would be the only relief. I had given up in despair, when a dear friend came to me and asked me to try Christian Science. She talked with my husband and he wanted me to try it, so for the sake of my family I consented. I began to read the *Sentinel* and *Journal* that my friend left me and received much benefit just from reading. I decided to go to Green Bay to see a healer. I went and stated my case to her and asked her if she could help me. She said she would try. She gave me a treatment and I came back home. After a week and a half absent treatment I was healed of my many ills. I began to study "Science and Health with Key to the Scriptures," and the Bible seemed like a new book to me, I understood it so much better than I ever had before, and now the Bible and Science and Health are my constant guide.

About one year after being in Science one of my old troubles (heart trouble) came back. I tried to overcome it but grew steadily worse. I asked my husband to go to New London to see a healer, which he did. Several of my friends came in and stayed with me while my husband was gone. At times I became unconscious and they thought I had passed away. When my husband came he brought the healer with him. There were five standing around, fanning and rubbing me, trying to bring me back to consciousness. When the healer came into the room she began to work for me and in less than an hour I was able to breathe naturally again and was able to sit up in bed. The next morning I got up and got breakfast and walked to the depot with the healer.

I am very grateful to our dear Leader, Mary Baker G. Eddy for "Science and Health with Key to the Scriptures."

MRS. NELLIE A. HENRY, Shiocton, Wis.

I wish to send my most grateful testimony to the Publishing Society for the great help I receive from the *Journal*, *Sentinel*, and *Quarterly*.

Situated as I am, thirty miles from the church to which I belong and no other Scientists here, the publications are indeed most welcome guests. Their good, wholesome thoughts are in my "mouth sweet as honey." I often find myself wondering if I have the right understanding, when my thought is confirmed by some contribution in *Journal* or *Sentinel*.

Science and Health is a most precious book to me, for it has revealed to me my Saviour and my God. It, with the Bible and *Quarterly*, is my daily companion.

It is four years since I first heard of Science and took up the study of it because I was told it would reveal the Bible to me. "Science and Health with Key to the Scriptures" has surely unlocked the treasures of Truth contained in the Bible and I love it and understand it as never before, though I read it and tried hard to comprehend.

I have had many good and undeniable demonstrations of harmony being restored in the moral and physical (so-called) realm, and I realize it was only possible through spiritual growth.

The study of Science and Health, together with the other writings of our dear Leader, Mary Baker G. Eddy, have been my only instructor with the exception of timely suggestions and thoughts expressed by a Christian Science friend. I realize "that all things work together for good to them that love God."

MARY C. BATES, West Newton, Pa.

Some two or three years ago a Christian Scientist was asked to take an absent case. The patient was a married lady who had been sick for twenty-five years. The husband had not been favorable to Science, but as she wanted it, he became more willing and consented. Upon receiving the letter stating that the Scientist would take the case, he wrote saying, "My wife is unable to write and I write for her. In three days the wife herself wrote saying, "I was going to die previous to this, but now I feel that I am going to live." She improved right along from that time until she was healed.

The husband became more and more interested in Science, and when the children needed help they asked for Christian Science treatment. There was a grandmother in the family who was terribly opposed to Christian Science treatment. The gentleman himself was taken sick. He had been reading Science and Health a good deal and thought he would handle the case himself. The grandmother was continually present, saying, "You will have to have the doctor, you will come to a doctor yet." The Scientist made a call on the patient, calmed his fear, and in two or three days he was ready to go to work again, showing that where he once had no faith, he had declared that it was the Truth and he would stand by it by all means.

F., Cleveland, O.

I should like to give an instance of the all-protecting power of divine Love in the case of an accident which occurred to me recently. When I was out driving, my ponies shied and fell into a ditch, dragging the cart with them. I was thrown into the ditch, and the cart fell on me. I saw it coming and yet had no fear, as I was trying to realize the Truth and declare that God is all and everywhere. I got out unhurt from under the cart and, assisted by a passer-by, unharnessed the ponies, which were lying literally one on the top of the other in the ditch. It took us some time to get them free.

After the cart was pulled out we put the ponies in again, and I continued my drive as if nothing had happened. There was not even a scratch on either the cart or the ponies. When I undressed that evening I was surprised to find that my left arm, upon which the cart had fallen, was very much inflamed and swollen, and had an enormous bruise. I had no pain whatever, and until I saw it I was quite unconscious of its presence. The bruise entirely disappeared in a few days and gave me no inconvenience. I will only add my deep gratitude to Christian Science for all that it has done for me, and for the peace, health, and happiness that it has brought into my life.

META HAWORTH BOOTH, Yorkshire, Eng.

Religious Items.

SCIENCE AND RELIGION.—There has been no signal achievement during the year in literature, invention, or art. If Signor Marconi verifies his alleged discovery of the application of Herz waves to wireless telegraphy, it will rank as the outstanding contribution to science and commerce. In the sphere of religion there are many tokens that the interests of the spiritual life have been temporarily submerged by the devotion to material concerns. There has been no general, widespread religious movement. The effort of English Christians to preach the Gospel to the whole nation at the beginning of the year largely exhausted itself in devising methods and machinery, though much good was done. None of the plans of the American churches looking toward a wide evangelization of our own people have been highly successful, and missionary treasuries have not shared in the prevailing prosperity. The great achievement has been the success of the Methodists in raising three-fourths of their proposed twenty million Twentieth Century Fund. All Methodist institutions will be put on a firmer basis. While religious work, on the whole, has been inadequately supported, the claims of educational enterprises have been generously recognized. Thus the dark and the bright intermingle in the religious outlook. There are multitudes who make religion their supreme interest, but material forces are of tremendous power, and devotion to them sets the tone of life.

The Watchman.

THE CLOSING YEAR.—Our review on another page of the movements of the first year of the twentieth century summarizes a history so wonderful that it surpasses the records of ancient miracles. The impulses of ages approach their fruition in it. It contains prophecies of such power of man over nature and through it as to make old-time miracles seem insignificant in comparison. It projects into the life of to-morrow single combinations of men and capital mightier to control the world than the greatest empires of the ancient or Middle Ages. It points to a realignment of nations which may change the map of the globe. It promises to penetrate the secrets of the stars, to which it already holds the keys. It presages new systems of thought based on new knowledge so wonderful that we hesitate to become familiar with it. To the Christian the most inspiring truth of this time is that the Author of all these things which the new century is unfolding before us waits our asking to reveal Himself through them more clearly than ever before. Shall we not in these last days of the year turn back toward it with a prayer of thanksgiving for the light it has brought to our souls? Shall we not turn toward the coming year with a prayer for more light in which to behold the Father of light, in confidence that the power of a holy life was never so great in the world as it is to-day.

The Congregationalist and Christian World.

The infinite and eternal Power that is manifested in every pulsation of the universe is none other than the living God. We may exhaust the resources of metaphysics in debating how far his nature may fitly be expressed in terms applicable to the physical nature of Man; such vain attempts will only serve to show how we are dealing with a theme that must ever transcend our finite powers of conception. But of some things we may feel sure. Humanity is not a mere local incident in an endless and aimless series of cosmical changes. The events of the universe are not the work of chance, neither are they the outcome of blind necessity. Practically there is a purpose in the world whereof it is our highest duty to learn the lesson, however well or ill we may fare in rendering a scientific account of it. When from the dawn of life we see things working together toward the evolution of the highest spiritual attributes of Man, we know, however the words may stumble in which we try to say it, that God is in the deepest sense a moral Being. The everlasting source of phenomena is none other than the infinite Power that makes for Righteousness. Thou canst not by searching find Him out.

The Christian Register.

The lessons of history are many. One of the most important and cheering of these is that of the progress of the human race. Especially gratifying and inspiring to every thoughtful and reverent mind is the record of man's moral and religious advancement. This upward movement is particularly noticeable among those peoples that have been blessed by the highest revelations of spiritual truth. The method of such revelations it is not necessary here to discuss. The fact of their existence and their superior influence remains. Patriarchs and prophets of old dispensation were sears, teachers, leaders, and inspirers. Jesus, the central personage of the new dispensation, brought a new motive force into the world—the motive of love, by which faith was accelerated, hearts were enkindled, and lives inspired and energized. Slowly has the Christian world apprehended his real message. But, in later centuries particularly, there has been a steady increase of light, of truth, and a corresponding influx and potency of spiritual life.

The Universalist Leader.

Our spirits may always be tuned to finer issues. There is a kindly influence above and around us that always awaits the receptive soul. It has been felt in all ages by the rarest spirits. The poets have felt it; artists have felt it; the good have always felt it and named it with some angelic name. The heroic have been turned toward it. It has been known and recognized and has been unknown and unrecognized. It has always been breaking in upon the best order of souls and noble leaders of men with a more open and rare sensibility. It has been an inspiration and help to countless souls as they have struggled with the vicissitudes and have felt the burden of this unintelligible world. What shall we call it? What more significant name than that of the Divine Spirit, moving on the hearts of men to bring them into ultimate harmony with God, and thus to realize the great ends of a final and universal redemption.

The Universalist Leader.

It is not a good sign of the times that several great nations are comparing notes, not to see who is getting on most rapidly in the peaceful ways of civilization, but in order to show that they are no worse than their neighbors. The Americans claim that they are not so cruel in their dealings with the Filipinos as the Spaniards were in Cuba. England is citing the example of Germany and America to show that her conduct of the war in South Africa is not more cruel than the treatment of the Filipinos and the Poles. It is not pleasant to have the great nations throwing charges at each other with the response, "You're another!" This state of affairs cannot continue long, because the common sense and good feeling of the world will demand that some mutual agreement shall be reached by which the wars now in progress shall be brought to an end.

The Universalist Leader.

The Christian Church can no longer be small. If it is to take its place as the guiding force among the great forces of the age, it must be big enough to guide. There must be unity of its forces, there must be the assertion of its importance, there must be the demand for recognition; there must be, more than all else, the fruits that justify its existence.

The year is the Lord's; the Church is the voice of the Lord; how can it be silent? How can it be apologetic?

The powers of man may catch in the meshes of a world-net the forces of nature and train them to their service, yet are they the Lord's. The passing years may crown man with glory on glory, yet are they the Lord's and must not be forgotten.

The Universalist Leader.

It is true that love cannot be forced, that it cannot be made to order, that we cannot love because we ought or even because we want. But we can bring ourselves into the presence of the lovable. We can enter into Friendship through the door of Discipleship. We can learn love through service.

HUGH BLACK.

The life which we are meant to lead under the dispensation of the Spirit, who has been given for our guidance into Truth, is one which does not take us out of the world, but keeps us from its evil, enabling us to live a heavenly existence on earth, and so to span over the chasm which divides us from heaven.—EDWARD THRING.

It is a great deal easier to do that which God gives us to do, no matter how hard it is, than to face the responsibility of not doing it. We have abundant assurance that we shall receive all the strength we need to perform any duty God allots to us.

J. K. MILLER.

Those who love God are encompassed with gladness on every side, because in every passing moment they see and feel a Father's love; and nothing of this world can take it away or lessen it.—H. L. SIDNEY LEAR.

If we aspire to walk in the power of the new life, we must cast away all hindrances; and it must cost something we really value.

CHARLES G. GORDON.

Still fight resolutely on, knowing that in this spiritual combat none is overcome but him who ceases to struggle and to trust in God.—LORENZO SCUPOLI.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa*.

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion: 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to on: address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.

Six months' subscriptions received at half the above rates.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.
Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., Post Office as second-class mail matter.

Items of Interest.

Secretary Hay received a dispatch recently from Mr. Buchanan, acting chairman of the American delegation of the Pan-American Congress, announcing the unanimous adoption by the Congress of The Hague scheme of arbitration. There was also presented to the Congress a compulsory plan of arbitration to which was appended the signatures of the delegates of Argentina, Peru, Bolivia, Paraguay, Uruguay, Ecuador, Venezuela, and Santo Domingo. There is no conflict between the two plans, and this enabled the advocates of compulsory arbitration to adhere to The Hague scheme. The State Department believes the conference was a decided success.

"It must certainly be counted a gain," said one official, "that all the nations of the world are signatory of a scheme for the peaceful settlement of all disputes. It is true that this scheme does not require the arbitration of controversies between nations. The United States is opposed to compulsory arbitration because it is mischievous. A nation ill disposed toward another might advance a preposterous claim, and upon its rejection would demand its arbitration. This consideration induced the United States to refuse to approve the compulsory arbitration plan which was presented to the Congress."

A situation of international interest is developing in Venezuela. The German government recently made a fresh demand upon the Venezuelan authorities at Caracas for the payment of a claim of $2,000,000 which Germany had brought against the South American republic. When Venezuela failed to pay the claim the German ambassador in Washington, Dr. Theodore von Holleben, approached the Secretary of State with a view to ascertaining the probable attitude of the United States, were Germany to attempt to enforce the payment of the German claim upon Venezuela by a naval demonstration off the coast of Venezuela or by the seizure and temporary occupation of a Venezuelan port. It is understood that the ambassador received from Mr. Hay the assurance that the United States would not object to the employment of force against Venezuela by Germany, providing always that Germany does not attempt to occupy Venezuelan territory permanently. It is said that Germany has recognized this assertion of the Monroe doctrine, and is preparing to act under the proviso imposed by it.

The Christian Register.

The civil government of the Philippine Islands is awarding contracts to shipbuilding concerns at Singapore, Hong Kong, Shanghai, Nagasaki, and other Oriental ports, for building twenty-one revenue cutters and steamers for Government use among the Philippine Islands. These steamers will all be built by Asiatic labor in the present year. Twenty of them are to be 160 feet long, and one, which will be known as the flagship, will be 200 feet in length. In November, Captain Marix visited China and Japan to lay specifications of the civil commission before ship-building concerns. The success of his work was shown in December when bids were opened. It was found that every prominent foreign and Oriental firm engaged in shipbuilding north of Singapore was represented. Some firms bid on the entire bunch of steamers. Many of them had representatives present at the opening of the bids.

One of the most important of American commercial enterprises in Europe has just culminated in London. It consists in the securing of all-water routes for American cargoes of grain and other commodities from inland ports in the United States to inland ports in Europe, and embraces the purchase by American capital of several British and other canals.

Frank W. Hawley, vice-president of the Erie Canal Traction Company, has been on this side several months quietly securing concessions for the operation of European canals by electricity. The Erie concern today secured control of about five thousand miles of canals in England and on the Continent. As a result cargoes will shortly be shipped on the same bill of lading from Duluth, Minn., to Brussels, Bruges, Ghent, and Cologne, and later to many points in the United Kingdom, France, Germany, and Italy.

The operators at the wireless telegraph station at Siasconset report that several times recently they have held direct communication with incoming steamships, the system working so successfully that messages were exchanged between the land station and the steamship when more than eighty miles apart. Usually messages are first sent to the South Shoal lightship, and from there forwarded to the Siasconset station, but the atmospheric conditions have been so favorable as to allow direct communication between the steamers and the land.

Mr. R. Pfund, who is in charge of the wireless station at Siasconset, stated that letters and signals were received by the instruments there last week which were not sent out from the lightship, and he is of the opinion that the instruments were affected by the experiments which were being conducted by Marconi at that time.

Information received from South Carolina cotton mill men shows that during the past year there was invested in South Carolina, in increasing the cotton manufacturing industry the sum of $2,695,000. These figures show that there was a large falling off, as compared with the preceding years.

In North Carolina there was also a decrease in the amount of money put into new cotton mills last year, though the exact official figures are not yet available. The decrease was not so large as in South Carolina, and the cotton manufacturing industry was largely augmented by the new mills built and the enlargement of old plants, and improvements thereto. The increase in new and enlarged knitting and hosiery mills was larger than in many years, with possibly one exception.

It is a far cry from Havre to New York—upward of three thousand miles by any course—but the passengers of the French line steamship Savoie, which arrived January 18, did not realize that the voyage was so long. Wireless messages flashed to and from the ship long after she had lost the shores of France, and long before reaching her haven here her wireless talk with shore was again resumed.

"Bon voyage, Savoie," came vibrating through the air as the vessel drew past the Lizard, though a full hundred miles distant, and six messages were sent back.

The wireless telegraph instrument remained quiet until Friday, when at two o'clock in the afternoon, it "got busy."

Enormous expenditures aggregating $200,000,000 will be made by the railroads of the United States during the current year, if the plans announced by the special companies are fulfilled. This colossal total does not include the millions usually charged up to operating expenses, but covers the cost of digging tunnels in New York City and elsewhere, improving roadbeds for thousands of miles with ballast, and a million tons of steel rails, new bridges, cars, locomotives, etc.

A gold nugget that weighed 82.18 ounces troy weight was recently melted at the United States assay office at Helena, Mont. It was the largest piece of virgin gold ever received at that assay office, and probably one of the largest nuggets ever found in the world. Experts at the assay office say its value was about $1,400. The nugget was found by Thomas Raymond, who said he had taken it out of the diggings in Adler gulch.

Count and Countess von Waldersee expect to visit the United States, starting in April, so the Countess told a newspaper man in Berlin. The exact time for their trip has not been arranged yet.

The countess is an American and her husband gained world-wide fame in the recent Chinese troubles by commanding the armies of the allied powers, and is one of the dozen or so field marshals in the German army.

Prince Henry of Prussia will pay a visit to Boston and Harvard University, probably between the 5th and 9th of March. The Prince has notified the German embassy that he desired to visit Boston and Harvard about the first week of March. Details of his visit to Boston will probably be arranged in a few days between the committee in charge of the arrangements and the officials of the German embassy.

A stampede is reported to the new gold fields on the Bonito River, in Lincoln County, New Mexico. One claim was sold for $10,000 on the day of the discovery. The rock is a network of wire gold as thick as sewing thread. Five hundred pounds of quartz from a new claim near Church Mountain, in the Nogal district, milled at the rate of $1,200 to the ton.

Chief Justice William E. Parmenter of the Boston Municipal Court sent his resignation to Governor Crane, and at the regular session of the council the Governor nominated Justice John F. Brown of Milton as chief justice, and James P. Parmenter, son of the chief justice, as justice, vice Brown.

More than $2,500,000,000 securities were made and sold on the stock exchange during 1901, according to an estimate of the *Chronicle*. The aggregates are more than double those of any previous year. There were $923,010,100 bonds and $1,642,013,715 stocks listed on the local exchange.

The United States is now at the head of the world's exporting nations. For the nine months ending September 30, 1901, our exports of domestic products amounted to $1,024,605,181. No other nation has ever touched this figure within five million dollars.

The census report on cotton seed manufacture in 1900 shows that there were 357 establishments, using 2,479,386 tons of cotton seed, costing $28,632,616. The value of the oil produced was $42,411,835. The estimated value of the lint cotton produced is $338,836,921.

The first anniversary of the death of Queen Victoria was marked by commemorative services throughout the United Kingdom and at the colonies and at the British embassies and legations abroad.

The Pan-American conference indorsed the St. Louis Louisiana Purchase Exposition, and gave its approval to the projected inter-ocean canal.

The President has nominated Dr. Presley M. Rixey to be surgeon general of the navy.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Christian Science: the Gospel of Love.

A Lecture.

BY WILLIAM P. McKENZIE.

At the turning point of the centuries there comes usually a questioning of heart, a deep dissatisfaction with traditional beliefs, and a thirsty hoping for satisfying truth, so that men cry out after God. There comes an answer to the prayer of man at such times, and the initiation of the century is usually accompanied by a revival of interest in religion. Since the world is progressive, we may expect the revival which will mark the opening years of the twentieth century, to excel in liberative force any revival of past times. This we may expect on general principles; but there is also special and exact ground for this high expectation; namely, this: that for thirty preparatory years, during the life of one generation of mankind, there has been a thought-movement operative, the laborers in which are re-establishing primitive Christianity, "God also bearing witness with them, both by signs and wonders, and by manifold powers, and by gifts of the Holy Spirit according to his will."

Ending of Prejudice.

It requires the long patience of years to overcome human prejudice, that peculiar faculty for making wrong or inadequate decisions, which has proved itself hostile to every good gift God sends to the race. Prejudice, by arousing fear through misrepresentation, and by persecuting earth's benefactors, has endeavored to deprive man of the unfolding good he was becoming ready to receive. But an end approaches for this period of active hostility to Christian Science which comes to man offering the only satisfactory solution for the problem of life, the solution whereby evil is eliminated, and the eternal Goodness is found to be all in all. So many cases of the healing of sickness and Christianizing of character at the same time, are on record, that almost every man knows of some case where a relative or friend has reason to rise up and call Christian Science blessed. So we find the audiences which assemble at our lectures come not so much as critics resolved to find fault, but rather as interested seekers after larger knowledge of a truth which has already proved its beneficence. It is knowledge of Truth which gives entrance into the kingdom of heaven. Those at present oppressed by unhealed sickness, fettered by evil habits and perverted modes of thought, or hypnotized by the attractions of sin, do not understand the Truth that would make them free; and the purpose of this lecture is to present it as given by Christian Science, and offer its illumination so that if any one who hears love the light, he may walk therein.

Benevolence Needs a Right Method.

There is a general desire in the hearts of men for better conditions. Men try to win the good for themselves individually, but it is not possible to make the good secure except as good is made universal. Distrust must be destroyed and a more genial condition of understanding be gained. It now happens often that when the employer seeks to ease conditions for his men he is rebuffed, and becomes hardened. Also it happens with the employee that his efforts to do kind acts, and his acceptance of unrequired tasks, are misunderstood, and he becomes discouraged. Now the world is full of kindness if the separate acts could be linked together and harmonized by a principle of action. We have seen how even thieves and murderers show sometimes a gleam of conscience, a spark of tenderness. But oftentimes our sympathy with them is crude and unregulated. Asylums set up their signboards over the world's woes, but if to a degree they alleviate, do they heal them? Ruskin speaks of our plastering over the sores of civilization while the gangrene eats deeper.

The method of Christianity is entirely different from the world's ways of indifference or easy-going sympathy. The rebukes of Jesus to the Pharisees represented true kindness; for if understood they would have awakened a true sense of life. His healing of the leper was a better blessing to the sufferer than the whole Levitical code and ceremony regarding leprosy. So the leader of this movement, Mary Baker Eddy, illustrating the way for others, brought blessing to the world when she showed the way of true beneficence by healing the sick; and after first proving its propositions, she has given a text-book so that others may do likewise. Upon its cover may be found a motto consisting of the instructions given by Jesus to his disciples.

"Heal the sick." Consider for one moment how heartbreaking is the poverty in the world caused by sickness; consider also the numbers who are withdrawn from useful toil because of various maladies; then think of the change in some debt-burdened home when, through the Christ Science, a new life springs up in the invalid, or the bread-winner again has strength for labor.

"Raise the dead." If we interpret this statement in the light of the quotation which says, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light;" and that other one which says of the man who reforms, "In his righteousness that he hath done he shall live," we see that there is a quality of existence which can be properly termed life. If righteousness and the reception of the light of Christ's truth constitute life, then those who dwell in opposite conditions may truly be said to be without life. To be without God in the world is to be dead to all that is immortal, and it is from such living death, as well as from the fear of physical death, that men have to be aroused. Christian Science, in bringing its revelation of the true God, reveals also the true and enduring life.

"Cleanse the lepers." In modern times this word suggests more than a single form of disease, and is used to refer to those hereditary taints of blood which seem to be incurable. Sometimes the word is used to refer to all those diseases as a whole which are the result of sins of impurity. Nothing could be more distressing than the way in which the innocent sometimes become tainted by a leprosy which is due to the sin of others. Little children sometimes exhibit conditions which are supposedly due to the law of heredity visiting upon them the sins of their ancestors. How good it is when the higher law of healing comes in to change these supposedly hopeless con-

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

ditions, and the love of God is heard by those who long for purity and ask for cleansing, speaking the word of power and saying, "Be thou clean."

"Cast out demons." We all know how it is that demoniac thoughts of lust, envy, hate, revenge and so on may control us at times. It may be possible to withhold the hand from the anger-prompted act, but the mental distress and tumult is not allayed. The Science of Being teaches us how to control thoughts, to cast out the evil and learn the good. Then as a consequence we "cease to do evil and learn to do well."

The Christ Method Demonstrates Truth.

The permanence of the truth which produces such results is something worthy of mark. Who that saw the magnificence of a Herod, or the legion-supported power of the Romans, would have supposed that the name of a fisherman of Galilee would be honored at the empire's capital; and yet in that head city of the Latin race the dome of St. Peter's celebrates the fame of the impulsive disciple of Jesus. Also in London town, the central city of Anglo-Saxon power, the name of St. Paul is commemorated in a magnificently domed cathedral. It was not because of personal greatness in these men that they are celebrated, but because they were connected with truth which is permanent. Jesus knew that he spoke the truth of God and that his words would abide. He knew that the heavens might pass, yet truth never could change. But the question, "What is truth?" must find its answer in the same way now as it did then. In the days of the apostles the proof of healing as heretofore discussed was given; that is, the question regarding truth was *answered by demonstration*. The presence of the permanent truth is revealed when it can be supported by proof rather than by argument.

The centuries past have proved the vanity of opinions set forth as truth. Men have gone to death rather than affirm the dogmas of those who had power to kill the body. Such power of sword or torturing fire, of rack or guillotine, has been impotent before one human being who refused to say that darkness was light, or evil, good. But whenever the true light has appeared with healing and saving power, then no compulsion has been needed, for men with joyful hearts have accepted the truth and glorified God. To-day with power irresistible as the light for seeing eyes, the Truth that both heals sickness and cures sin has come to human consciousness in Christian Science. If you want proof of this, look at the many churches in the land formed of those who have been healed. Apart from the proof of healing they would have no ground for existence, for their bond of government is slight, dogma is unknown, and creed wholly secondary to life. When healing introduces men and women into a new sense of God and Christ and true living, they find a natural relationship with each other. This joy of association is expressed by the forming of societies and Churches of Christ, Scientist, at the rate, just now, of two and sometimes three each week. Thus is being revealed what Mrs. Eddy defines as a church, "the chief corner-stone whereof is, that Christian Science, as taught and demonstrated by our Master, casts out error, heals the sick, and restores the lost Israel."

Suppose in a school where children are studying mathematics, that a problem be given out. It has only one answer, and that the correct one. Suppose the teacher to leave the room for a moment; then each loud-voiced, self-assertive scholar declares his way to be the right way. The timid waverers change from one side to another, and get down a list of disconnected figures. Perhaps only one quiet worker gets the answer, and proves thereby the right way. The correct result is the sign of the solved problem. Mrs. Prentiss writes:—

> **Life is the school; and the Master**
> **Is the man Jesus Christ;**
> **We are his charity scholars;**
> **His is the teaching inspired.**

In this school if we review history, we can see how many clamoring, self-willed scholars there have been, each claiming a following and denouncing those not followers of their thought. Think of the number of sects in Christendom, something like four hundred, and yet none of them able to give the sign of the solved problem, as designated by Jesus the Master, when he said, "These signs shall follow them that believe; in my name shall they cast out demons; they shall speak with new tongues; they shall take up serpents, and if they drink any deadly thing, it shall in nowise hurt them; they shall lay hands on the sick, and they shall recover." Of these first disciples it is written, "They went forth, and preached everywhere, the Lord working with them, and confirming the words by the signs that followed." It is evident from other passages as well that these signs were expected, because when Jesus sent out his disciples finally to "make disciples of all nations" he added the further instruction, "teaching them to observe all things whatsoever I commanded you." These instructions to his disciples were distinctly given, "Heal the sick, raise the dead, cleanse the lepers, cast out demons." Another record says, "He sent them forth to preach the Kingdom of God, and to heal."

Now if there were any manner of doubt as to what the instructions of Jesus specifically were, we have his final teaching to cover every doubtful point. He gave to his disciples a new commandment. Once before he had been asked by a lawyer who was tempting him, "Master, which is the great commandment in the law?" In reply he indicated that the great and first commandment of the Jewish law was to love God supremely; and the second, like unto it, was for man to love his neighbor as himself. It is sometimes said that this golden rule is a summary of Christianity; but while these two commandments sum up the whole of the law and the prophets, they do not yet reach to the deeper meanings of Christianity. Before he left his disciples Jesus gave to them who were ready to receive it what he called "a new commandment," which indicated a higher reach of love than the world had before known. He said, "A new commandment I give unto you, that ye love one another; even as I have loved you, that ye also love one another." Here was another sign which was to indicate discipleship, and an understanding of the Master's teaching for, "By this," he said, "shall all men know that ye are my disciples, if ye love one another." It goes without saying that healing was included in this love which Jesus had manifested, for no one thing is more prominently brought out in the records of his life than this. The love which the Christian should be able to manifest ought certainly to include healing the sick, and more. Another thing to note is the universality of these commands; they do not apply to a certain few set apart for special work, but indicate the attitude, the occupation, and the necessary ability of every follower.

The position of Mrs. Eddy has been that of the quiet worker in the midst of the clamor of many minds arguing for sectarian theories. She initiated Christian healing for this age, which is not even *imitated* by what is termed mental or hypnotic healing which fails to reveal God to man. Christian Science healing reveals to man the way of atonement with God, and the relinquishment of faith in disease is one step on the way. Recalling what was said before, that "the correct result is the sign of the solved problem," and remembering the designated "signs" which were to follow intelligent understanding of Christ's life and doctrine, we cannot help finding in the Christian Science movement satisfactory evidence that the problem of life has been solved.

TRUTH DEMONSTRATED REVERSES MISCONCEPTIONS.

Men are ready for a truer conception of God than any given by the theologies which have grown out from the minds of thinkers since Christ-like healing became a lost art. The Divine Being has been represented as an enormously powerful Ruler over all and Punisher of men, expressing the extreme of human justice, before whom mercy appears timid, pleading, and disregarded. But in Christian Science mercy, the divine quality, healing, comforting, regenerating, purifying, is found rejoicing over judgment; and before enthroned mercy justice appears as the obedient handmaid. The human pictures of God have presented a king great in power. The thunder was his voice, and the roar of the storm the sound of his chariot. It is therefore not an unexpected thing that the Old Testament writings as we have them should end up with a threat,—"lest I come and smite the earth with a curse." But how did Jesus begin his teaching? The people are gathered about him on the hillside, his disciples beside him, and the first word they hear is, "Blessed!"

The characteristic of Jesus' teaching was that he avoided mere argument, but dealt in proof and elucidation of truth. First came his works of healing, the proof of great love to mankind, and then his statement that they revealed the true character of God,—"the Father which is in me, He doeth the works." Of all men who have been known on earth, Christ Jesus was the kindest, and when he said, "He that hath seen me hath seen the Father," he recalled men to a purer conception of God than the teachers of his day knew. The God then believed in could hate, could originate disease and disaster, and maintain sin and suffering. Forgotten then was that vision of the Psalmist, who saw the true God, and to his own self said, "Bless the Lord, O my soul, and forget not all his benefits; who forgiveth all thine iniquities; who healeth all thy diseases." By his whole life's work Jesus proved how God heals and not hates men. Let healing be lost by Christians, and the old, crude views regarding God will re-appear in their theologies. The sick will turn to false gods for relief and men will dwell on earth in hopelessness and fear. But whenever truth is demonstrated, as was done by Jesus and his immediate followers, that proof brings to the recipient of the blessing absolute assurance that God is Love, and reverses his former misconceptions. The criticism is made that Christian Scientists are too steadfast in their views,—much too certain that God is wholly Good; but it is the nature of the proof which makes them certain. As the proof of healing through Mind reaches more widely it will come to pass that from the least to the greatest all shall rightly know God "whom to know is life and peace."

The understanding of God which Christ Jesus revealed enabled him to see how wrong were ordinary conceptions of life. Blessed is wealth, said the world; blessed is power. These beliefs were being acted out in both state and church. The Romans by force and the priests by scheming were trying to maintain dominion.

Filled with the spirit of Isaiah's teaching, inspired by the God of the prophets, Jesus began to reverse the world's theories. (*Vide*, Isaiah, 61 : 1–3.) He picked out the destitute and the mourner, and called them blessed. He referred to his own mission at a later date as that of the minister, or servant of others. The game of the world was by war, oppression, and enslavement,—through debt, if in no other way, to compel others to minister. The ideal of men was to be able to lord it over others; the ideal of Jesus was to serve the world; thus in principle, and practice, he reversed the world's belief.

Think of the hate aroused by the Roman oppression, and of the expectation of the people. How gladly and madly they would have welcomed a man who with the fiery eloquence of a Kossuth would have denounced their oppressors. But his first word was "Blessed." And all through the beatitudes the reversal of old beliefs goes on. "Them of old time," he referred to as authority for certain traditional beliefs that had been as law to the people; but these crude traditions he reversed by declarations of the gospel of love.

"The problem of the age is to negate the negative," is a saying attributed to Mr. Harris, the great educationalist. Paul speaks to Titus about "denying ungodliness." The error of the age is its belief that the negation of God is true. Evil, sin, sickness, hatred, falsity, death, are the supposed opposites of God as Life, Truth, and Love. The opposite of that which is real exists only as a lie does, by virtue of belief; but a lie has no eternal principle behind it,—it is darkness that the light of truth dispels. In Science we believe that the true conception of God as perfect, as Love, has dawned upon the consciousness of the race, and will grow brighter until it is perfect day.

LOVE IS UNIVERSAL IN ITS REACH.

Let us analyze the meaning of love as spoken about by Jesus. John is his best interpreter and he speaks of love being the opposite of fear. We all know that it is the opposite of hate as well. Fear may have a variety of results. It sometimes leads people to sacrifice to various false gods in the endeavor to placate them. The first command of the decalogue forbade this, because it means lack of trust in and love for the one true God. In the early writings it is plainly brought out that departure from God would bring diseases upon the people, and while that seemed arbitrary, we now know that fear is the prolific cause of disease. The second part of the decalogue, dealing with the duty of man to man, is infringed by any form of hatred, shown by envy, false witness, theft, impurity or murder; but love fulfils this law as well as the other. The elder law was specific and imperative, setting forth its negations, saying, "Thou shalt not." But in the newer revelation the statements of truth are positive, and a new motive force is made operative which "fulfils the law." Consequently love, when directed Godward, is the antithesis of fear, and so ends disease, anxiety, sorrow, distress; and when directed manwards being the antithesis of hate, it ends wars, strifes, contentions, cruelty, dishonesty, and all the antagonisms which bring suffering upon men. This love is "impersonal, impartial, pure, and free." We may have some glimpse of its quality and manifestation if we remember the Johannean revelation of God wherein he uses two terms, love and light. In our experience we know that in darkness nothing is visible. When we see one another in the brightness of daylight it is by virtue of reflection. The face of our friend reflects the light and we thereby know him. This reflection of light is a parable illustrating that reflection of love which the senses cannot appreciate. We know one another spiritually because of the reflection of love. It is easy to see how impersonal and impartial light is. When the candle is lighted and set upon its candlestick it gives light unto all that are in the room. It is impossible for light to make distinctions. In the same way it is not possible for love to lose its universally beneficent character and make distinctions of person or condition. Love that is manifested only in view of some return is not love at all but a form of selfishness. Jesus said, "If ye love them that love you what reward have ye? Do not even the publicans the same?" Love which is real must manifest itself like the light; and therefore the truly loving man, the Christian, by virtue of his God-derived nature, shows love even to his enemies, and to all mankind, even as light shines for all who are within the reach of its beams.

Jesus is ever our example in showing how love liberates man. Thou shalt love thy countryman and hate the Gentile, was the teaching of them of old time; illustrated by intense hatred of the Jews to the Romans, their political oppressors, and to the Samaritans, their religious rivals. Jesus proclaimed the true God to a Samaritan woman.

Digitized by Google

He taught the lesson of the all-reaching love by the parable of the good Samaritan. He blessed the Syro-Phœnician woman when his own disciples counted her a dog. He healed ten lepers, and when one of them turned back and glorified God, and fell down at the feet of his healer, giving him thanks, Jesus called attention to the fact that only the Samaritan, the stranger, had returned to give glory to God. Thus by his acts did he illustrate his teaching, which was "love your enemies." He showed that he had no enemies and recognized no caste. Even the servant of the centurion of Capernaum he was ready to heal; and he gave testimony to his master's faith, as he had done to the faith of the Syro-Phœnician woman. Roman or Samaritan, Greek or Jew, Jesus made no distinctions; learned scribe and illiterate fisherman, sanctimonious Pharisee and repentant harlot, honorable rich man or despised tax-gatherer were looked upon not corporeally, but with that insight of love which sees the real.

Hate not at all; why? Look at the teaching of Jesus metaphysically, as Christian Science teaches us to do. Viewing it mentally, if hate be in consciousness at all, we hate all to a degree. Whereas if we love our enemy, the one least easy to love, we have love to all. The philosophy of this is that only by so loving can we gain a sense of that quality of love, by means of which we are able to recognize that "God is Love."

Love Revealed in Character.

Love is the activity of perfect Intelligence, that is, the activity of Mind which is wholly Good. How in practical life may we learn to manifest and evidence such love as will be the reflection or manifestation of this divine activity? Here are some of the footsteps.

1. Humility. This quality of mind is an assured evidence of greatness as well as of unselfishness. The great man is humble because his view-point enables him to see how vast is the store of knowledge still unexplored by him. The unselfish man is humble because he sees how far away still from him is that ideal set by the one whom men have agreed to call the Master. Humility may be gained by learning truth from Christ who was "meek and lowly in heart." It appears in proportion as cruel pride and senseless vainglory disappear. It does not degrade a man but brings him in thought where God dwells—into the high and holy place where He dwells "with him also that is of a humble and contrite heart." It never fails of good and blessing; "blessed are the meek for they shall inherit the earth."

2. Kindness. The kind man acts to others as if they were his own kin. When caste is gone kinship is recognized, hence humility precedes true kindness. The ideal for character set forth in the prophets was "to do justly, to love mercy, and to walk humbly before God." Christian Science shows us that the end of justice is not punishment, nor the ideal of mercy, weakly sentiment; but that mercy, and justice which is the handmaid of mercy, together work out the results of divine good-will to men. Jesus said to his followers: "Become compassionate, even as your heavenly Father is compassionate." If we are thus kind to one another there will be no injustice, either from direct cruelty, or from favoritism, which may mean cruelty to the disfavored. There are many who have to be so situated that their hearts cry out for intelligent mercy from others, before they are willing to show mercy; for this proverb is true in human experience, "they shall have judgment without mercy who have shown no mercy." But far better than the empirical way of learning from experience that "sorrowful are the unmerciful" is the scientific way of working out life from the Christly standpoint, which is "blessed are the merciful: for they shall obtain mercy."

3. Fidelity. As kindness grows in a man's heart he finds that he gains more confidence in good. This is faith in God; let it become practical as fealty to Truth, and fidelity to Love, and the results in life show that this faith is justified. A man who is in this way "sure of God" may be by other men absolutely trusted. He will do faithful service whether as overseer or servant. Being a firm believer in Good, he will not be satisfied till Good is made manifest in work rightly or righteously done. He is a man of integrity for whom dishonesty is impossible; a man loyal to truth and uprightness who could not be treacherous or false. His longing is for conformity to the standard of right he knows and trusts; and "blessed are they which do hunger and thirst after righteousness: for they shall be filled."

4. Patience. Patience has been defined as "keeping kindliness of heart under vexatious conduct." It thus means the long-suffering which is one of "the fruits of the Spirit;" and it is more than forbearance, because while it "endureth all things" it nevertheless "hopeth all things." The patient man is composed and calm, steadily persevering, but uncomplaining if the end be delayed. His faith tells him why the Good must be realized, and his hope sustains him by foresight of the Good. Such an one is tolerant in dealing with the vagaries of men and their insults, and untiring in helping them because his faith and hope are in God.

5. Joy. The cordial acceptance of spiritual law and guidance yields a joy deeper than gladness and more intense than happiness. It is found where self-will and its irregular motions have yielded to "that good and acceptable and perfect will of God." The true man through Christian Science comes to the place where he can say, "I delight to do thy will, O God;" because he has become scientifically certain that God is good and never the author of evil. Jesus, who taught his disciples the truth about the divine will and came not to do his own will but the will of Love, assured them that they would not find their satisfaction transient. "Your joy no man taketh away from you," he said.

6. Peace. Peace is the stillness of heart when fear is gone. Technically it means the absence or cessation of war; but there is also the thought of reconciliation between foes suggested. Enmity and strife have given place to friendship and concord when peace is established.

When there is peace in the heart, "the peace of God which passeth all understanding," the man can no more be agitated by fear, disturbed by doubt, inflamed by passion, or aroused to anger. He is master of the disturbing elements. He is able to receive the word "be still, and know that I am God." More than that, he is actively engaged in establishing the concord of love. "The fruit of righteousness is sown in peace of them that make peace." It is indeed a royal privilege to be a peacemaker,—to work out reconciliations between men, to prove them to be at one with Love, and so establish the atonement between God and man. "Blessed are the peacemakers: for they shall be called the children of God."

7. Purity. The pure in heart are wholly governed by Good. Their understanding of the Allness of Spirit is unclouded. Here we reach the highest heights. At first the word was "Blessed are the meek: for they shall inherit the earth;" now, the word is: Blessed are the pure: for they inherit heaven,—what eye hath not seen, nor ear heard, nor the heart of man imagined,—"they shall see God." Belief, expectation, faith, hope, are needless now regarding divine Love. Knowledge has vanished away and love in its purity abides, for "love never faileth." Of such the revelator has said "they shall walk with him in white, for they are worthy."

All may Study.

In order that men everywhere may learn of God and of their privileges as the children of Love, there is a textbook for the study of Christian Science.

From the very first those who have studied "Science and Health with Key to the Scriptures," along with the

Digitized by Google

Bible, have found themselves able to heal the sick, and to cast evils out of themselves and others Any reasonable mind will see that if by study of a text-book they become able to heal the sick as the early disciples and followers of Jesus did, it is an understood Principle that is being proved; and that Christian Scientists are not merely following a person. This, however, but emphasizes their recognition of the self-sacrifice and wonderful love of humanity shown by Mary Baker Eddy in bearing all manner of persecution and misrepresentation in order to give to the world the revelation.

The singular purity and consecration of the Discoverer and Founder of Christian Science made the revelation of the omnipotence of Good come to her naturally. There was no catastrophe as in Paul's case. Since the meaning of her mission has dawned upon her she has labored with a devotion unceasing, and a zeal untiring for the good of humanity, in accord with Christian Science whereby the whole world is to be regenerated. The singleness of her purpose, the continuity of her sense of God's presence, the simplicity of her obedience to God's will follow the example of Christ Jesus, and furnish an illustration of the unity of good in character which is to bless all mankind.

Church By-law.

IT is the duty of the Board of Lectureship to include in each lecture a true and just reply to public topics condemning Christian Science, and bear true testimony to the facts pertaining to the life and character of our Pastor Emeritus. Each member shall mail prepaid to the clerk of this Church a full copy of the lecture he considers his best, and which he purposes most frequently to deliver, before delivering it. Failure to heed this By-law shall forfeit his office and the vacancy must be supplied immediately.

Adopted January 28, 1902.

Also Article XXXVIII., section 2, line four, has been amended so as to read as follows: (See Church Manual, page 81.)

"blunder, relating either to Christian Science, to the Pastor Emeritus, or to a prominent member of this denomination," etc.

Adopted January 28, 1902.

A Song for the Twentieth Century.

Just to be tender, just to be true;
Just to be glad the whole day through;
Just to be merciful, just to be mild;
Just to be trustful as a child;
Just to be gentle and kind and sweet;
Just to be helpful with willing feet;
Just to be cheery when things go wrong;
Just to drive sadness away with song;
Whether the hour is dark or bright,
Just to be loyal to God and right;
Just to believe that God knows best;
Just in His promises ever to rest;
Just to let love be our daily key—
This is God's will for you and me.

The Standard.

Economy no more means saving money than spending money. It means spending and saving, whether time or money, or anything else, to the best possible advantage.

JOHN RUSKIN.

NEW EDITION OF SCIENCE AND HEALTH.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution.

Notices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

To whom it may Concern.

LETTERS and despatches from individuals, with whom I have no acquaintance, and of whom I have no knowledge whatever, containing questions about secular affairs I do not answer. First, because I have not sufficient time to waste on them—and second, because I do not suppose myself capable of instructing people in what I know nothing about. All such questions are superinduced by wrong motives—or by "evil suggestions"—either of which I do not entertain. MARY BAKER G. EDDY.

Pleasant View, Concord, N. H., January 22, 1902.

The Greater Works.

OF late several clergymen have announced themselves as believers in the theory that greater healing works than those performed by Jesus are being accomplished through modern surgery and medicine. Among these is Bishop Lawrence of Massachusetts.

On Sabbath evening, January 19, last, the Bishop preached to Harvard students in Appleton Chapel upon the subject of Christ's prophecy that greater works than he had done should be accomplished. He is reported as having maintained that greater healing works are now being done through medical and surgical skill than Jesus ever did.

Following is a part of what he said:—

A real leader, a man of genius, said he, does not consider himself minimized by the greater things that will follow him. He sees them and rejoices. Christ's mission of healing was great, but he said that greater things were to follow. And they have followed. In every hospital of every city in Christendom more cures are effected than Christ made in his whole career. In some, more cures are effected in a day than all Christ did. To be sure, his were instantaneous and spiritual. But he did not emphasize the miraculous side. He came to cure.

One would like to live on and on, a hundred years, to see the wonderful benefits that science will bestow on mankind for the alleviation of pain.

As a reaction against a materialistic science and medicine, the so-called Christian Scientist and mental healing sects have arisen. They mix truth and error. They misuse the name of Christ by imitating the method when they lack the power.

One of their errors is their neglect of accumulated knowledge, of the fund of information stored up these nineteen centuries. That knowledge of science which is obtained by hard mental application is just as much God's gift as the knowledge which seems to come as direct revelation. In rejecting accumulated knowledge and professional skill, these sects are rejecting the gifts of God.

This is a more direct utterance than Dr. Lorimer's which was referred to in the last *Sentinel,* yet both are to the same general effect.

Bishop Lawrence's declarations are especially sweeping—startlingly so. The healing works done by Jesus are not only minimized, but practically set aside. He admits that Jesus' works were "instantaneous and spiritual," yet maintains that the non-instantaneous and material methods of modern surgery and medicine are greater than those of Jesus. This contention, coming as it does from an Episcopalian bishop, is so amazing that one can scarcely give the account of it credence. We shall not attempt a full discussion of it, but content ourselves with a very general review of what is involved in this kind of Scriptural interpretation.

First, let us see precisely what Jesus did say. In John, 5 : 20, 21, he said: "For the Father loveth the Son, and sheweth him all things that himself doeth: and he will shew him greater works than these, that ye may marvel. For as the Father raiseth up the dead, and quickeneth them; even so the Son quickeneth whom he will."

According to Bishop Lawrence's interpretation, modern surgeons and physicians are doing greater works than the Father and Son did in olden times, yet they raised up the dead and quickened them.

In John, 14 : 12, 13, Jesus said: "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father. And whatsoever ye shall ask in my name, that will I do, that the Father may be glorified in the Son."

The Gospels show that Jesus not only healed *all manner* of diseases, including that dread and, according to the physicians, incurable disease, leprosy, but he repeatedly raised the dead, notably, Lazarus, Jarius' daughter, the widow's son, etc. Where are the instances of greater works than these by physicians and surgeons in modern hospitals or out of them?

We wish to cast no reproach upon the profession of medicine and surgery. We believe ourselves to be as appreciative of their motives and achievements as any class of people can be, but we cannot in conscience admit the extraordinary claims that some of the clergy are making in their behalf. A percentage of the members of the profession are not even nominal Christians; they make no pretension to Christianity. Yet we are told by their clerical apologists that they, as a profession, are to-day doing greater works than did Jesus the Christ in his time, although, according to his own testimony, the Father and he did the healing.

The members of the medical profession themselves make no such extravagant claims. It always has been admitted by them that there are many kinds of diseases with which they cannot successfully cope. A large list of ailments are declared by them to be incurable. In the *Sentinel* of January 16 last we published an extract from a lecture of James F. Goodhart, M.D., L.L.D., on the "Difficulties of Medicine," delivered before the British Medical Association. Dr. Goodhart shows in plain terms how uncertain are the results of medicine, and as to surgery he makes a frank admission. Speaking of the affliction of gall stones he says: "There is not a soul in this room to-night who, if I asked him how and why gall stones are formed, could give me any useful information on the subject. Yet the kerneled public flock to us for treatment, and expect to be cured. And when, alas, as often happens, drugs fail, they apply to surgery, which in that case is but a refuge for the destitute, for that is not the treatment of disease."

From this able lecture the following brief extracts should be thoughtfully read by our clerical friends whose advocacy of the virtues and powers of the medical profession has of late taken such extreme form. Dr. Goodhart said:—

"It is clear, without my laboring the point, that a body so composite as ours, is so very delicate a machine that there must be many and many a case presented to us where we do not—many even where we cannot—know what is the matter, and taking even the most favorable view of the

Digitized by Google

progress of scientific discovery, it is probable that this will be so till time shall be no longer. We cannot know, because the intricacy of the machine hinders one in getting at the real facts; we cannot know, because even when we have got at the facts we cannot be sure that the remedies used will get at the disease.

"When we come out of the aloofness of the contemplation of growth, nutrition, degeneration, and death, to take part in the active grappling with these by stimulating this function and dulling that, in the attempt, in short, to arrest or stop disease, our difficulties become appalling; but this is quite unrecognized by most of those with whom we have to deal.

"Take the matter of pain—a pain with a definite cause, if only we can find it; but it is deep down in the recesses of our impenetrabilia, and it has absolutely no distinguishing feature—so that no human being can do more than say that it may be this or it may be that. A position this that would seem to claim for the doctor all the patient's sympathy—it usually, however, meets with a great deal of derision.

"Take the next vital element and its bearing upon the handling of disease. Here again we are often foiled when we would be positive, because of the personal equation, as it is called, the individuality of the patient. When Mrs. Smith asked her doctor why it was that a particular pain possessed her, he is said to have replied with ready wit and no less truth, 'Madam, it is because you are Mrs. Smith.' And the lady no doubt thought her doctor a very amusing man, but she had not a glimmer of the great truth that had been administered in such an excellent coating. But, indeed, that 'because you are Mrs. Smith' constitutes one of, if not the most insuperable of, the difficulties in framing any system of precise medicine, and over and over again fattens crass ignorance at the expense of real knowledge.

"In the practice of medicine you cannot jump the fact that the inflections of your voice are not exactly like those of any one else; and as long as the world lasts this variability of the living force, this individuality, will prevent the attainment of the popular desire—a cut-and-dried remedy—not only for every disease—that is no use to Dick when the remedy touches only Tom's variety; no, we want a remedy for every disease, and for every variety of it, as met with in the young and in the old, in the otherwise healthy and the unhealthy, under the specious garb of mildness or the pronounced type of malignity; that is another of the cruxes of medicine that the world wots little of."

As to drugs he said:—

"Now, why do we give drugs? To cure disease, you answer at once, and think the question unnecessary. But wait a minute; we give drugs for several other reasons, some of which are far less free from criticism. For example, drugs are often given, not because the disease demands one, but because the patient is not happy till he gets it; too often he is not happy even then. They are often given to hide our ignorance, I fear, or to mark time while we watch and wait; they are given sometimes as a gambler on the Stock Exchange speculates in 'futures,' an enhanced reputation being the windfall that it is hoped to secure; and then we often give drugs as an experiment in the hope that they may do good. I will deal with this last more especially, for it is a reason for giving drugs about which the public are peculiarly sensitive and ill-informed.

"All treatment by drugs is more or less of an experiment, and it is, indeed, in this fact that the enormous number of new drugs daily poured upon us finds its justification. Many and many an ailment that afflicts mankind badly needs a remedy, but for which, as yet, no remedy is opportune; and who knows but in each new drug some human ill may find alleviation? A chemist's shop is indeed a source of wonder and dismay to me, and I could indeed wish we were less the prey of the manufacturing chemist, but I would not for a moment even seem to discountenance new remedies. What I would discountenance is the giving drugs by rule of thumb. Diseases run in fashions; I have mentioned one or two that seem to me in fashion now, and there are fashionable drugs which, while the sun shines upon them, become the darlings of society. Their popularity is enormous—far in excess of their merits; and by-and-by they sink into the cold shade of neglect. Who does not even now remember the boom of the antipyretics? A few of them have remained to us for other purposes; but as antipyretics, who gives them now? They are not by any means valueless when given appropriately, but they were rushed for more than they were worth, and they are now buried by later booms, such as animal extracts and antitoxins, and many of these will be buried, too. And then as to routine in the treatment of disease. I suppose there is not a single case of gout in the whole world that has not had sodium salicylate and other easily enumerated drugs, and had them freely; and why? Because they are supposed to eliminate the cause of the disease. I find that the British public knows far more about uric acid and how to deal with it than I do with all my pains; and what men think they know in this respect, I fear that we, in the first place, and vulgar advertisement in the second place, have taught them. Yet I cannot understand how any reflective mind, making a careful study of gout in its clinical aspect, can settle down and bury itself in the doctrine that gout is a mere question of intake and output, and, if not, think of the harm that is done by false doctrine of this kind upon the thousands who are engaged in the hopeless struggle of dispossessing themselves of their fetish."

Dr. Goodhart by no means stands alone in his position. He but reiterates the expressed views of the better class of his profession. Indeed he does little more than repeat the admissions of the standard medical works. How shall we reconcile, then, the claims of the great profession itself with those of our clerical friends?

There is no record that Jesus made such confessions of his healing inefficiency as those mentioned. Distinctly does the record say that he healed "every sickness and every disease among the people" (Matthew, 9 : 35). We think it safe to say that had the Great Healer believed himself unable to cure all diseases he would have been as frank as the better class of medical doctors to-day, and have admitted his inability.

It should be borne in mind, moreover, that the practice of healing by drugs and various material preparations had been in vogue long before Jesus' time; yet he ignored them all. As a teacher of healing as well as a practitioner why, if he believed in the use of material methods, did he not both teach and practise them?

We turn with joy from such unwarranted Biblical exegesis to the true teaching of the Nazarene, and we rejoice to note that many of the clergy and many of the medical profession are turning away from material conceptions to the higher and more spiritual, as well in reference to healing as in other essential respects.

The Text-Book.

ALL Christian Scientists and friends of Christian Science will read with great pleasure the following in reference to the increasing circulation of our beloved text-book in the public libraries, as well as these multiplying manifestations of its widening influence:—

A little more than a year ago it was my privilege, through the generosity of a friend of Christian Science, to place a dozen copies of the later editions of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, in our Public Library. There were in the library at the time

Digitized by Google

these were added, ten copies of our text-book, some dating as far back as 1886, and all in circulation. Quite recently I learned that the demand was greater than the supply, the twenty-two copies proving insufficient. Upon inquiry I received the enclosed letter from the assistant librarian, and have arranged to place six more copies as a gift from the same generous donor.

This is one of the many instances of the signs of the times, proving that the study of Christian Science is fast destroying prejudice. I well remember the indifference with which some of the earlier copies were accepted, and they were often found on the shelves. Within the last four months three copies were added to the Mercantile Library, another of our large circulating libraries. These copies were also received in a very kindly manner, and prompt acknowledgment made by the librarian.

It is with deep thankfulness that we recognize that God's glory is becoming manifest through the untiring, loving effort of our dear Mother.—C. L. McA.

The following is the letter referred to.

PUBLIC LIBRARY.
CIRCULATION DEPARTMENT.
St. Louis, December 17, 1901.

Mrs. C. L. McA.

Dear Madam:—Your letter of December 10 has been received. We have enough copies of Mrs. Eddy's "Miscellaneous Writings" to supply the demand, but could make good use of six additional copies of Science and Health, and would gladly place them on our shelves.

Very respectfully,
J. F. LANGTON.

The following is also of interest:—

Second Church of Christ, Scientist.
Buffalo, N. Y., January 13, 1902.

The Christian Science Publishing Society, Boston, Mass.

Dear Brethren:—It being resolved by the trustees of this church to place a copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, in the library at the Buffalo State Hospital, the clerk was directed to communicate with the authorities, which resulted in the acceptance thereof as shown by the following letters and replies.

I enclose herewith copy of letters to the superintendent of hospital and his reply to each.

Very truly yours,
GEORGE A. TRIER, *Clerk.*

Second Church of Christ, Scientist.
Buffalo, N. Y., January 2, 1902.

Mr. Arthur W. Hurd, Supt., Buffalo State Hospital.

Dear Sir:—The Board of Trustees of this church desire to place at your disposal in the library at the State Hospital at Buffalo, one copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy—the text-book of Christian Science, for the benefit of those using the library. If you will kindly advise the undersigned, whether this may be done through this means, it will be greatly appreciated, and shall be glad to forward the same at once, which will, we trust, be of great benefit to those who may have the privilege of pondering its contents.

Awaiting your early reply and your pleasure.

I am yours truly,
GEORGE A. TRIER, *Clerk.*

STATE OF NEW YORK—BUFFALO STATE HOSPITAL.
Dr. Arthur W. Hurd, Superintendent.
Buffalo, N. Y., January 4, 1902.

Mr. George A. Trier, 135 Linwood Avenue., Buffalo, N. Y.

Dear Sir:—I am in receipt of your note of January 2. We will accept a copy of the book for our office library.

Yours very truly,
(Signed) A. W. HURD.

Second Church of Christ, Scientist.
Buffalo, N. Y., January 7, 1902.

Mr. Arthur W. Hurd, Supt., Buffalo State Hospital.

Dear Sir:—I am in receipt of your favor of 4th inst. accepting the proposition offered you in my letter of 2nd inst. to donate to the above-named hospital a copy of Science and Health. I thank you for your kind and prompt consideration in the matter, and hope that there may be much good derived from the careful perusal of this work.

Under separate cover, I sent you this day one copy of book named and trust it will reach you in good condition.

Kindly acknowledge receipt thereof.

Yours very truly,
GEORGE A. TRIER, *Clerk.*

STATE OF NEW YORK—BUFFALO STATE HOSPITAL.
Dr. Arthur W. Hurd, Superintendent.
Buffalo, N. Y., January 10, 1902.

Mr. George A. Trier, 135 Linwood Avenue, Buffalo, N. Y.

Dear Sir:—In accordance with your request of the 7th instant I hereby acknowledge receipt of the book which you so kindly sent us for the office library.

Yours very truly,
(Signed) ARTHUR W. HURD, *Superintendent.*

The Lectures.

At Macon, Ga.

Judge William G. Ewing of Chicago, a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass., gave a remarkably clear, able, and logical address on "Christian Science: Physician and Redeemer," last night (January 16, 1902) at the Academy of Music.

Judge Ewing spoke to a representative audience, who were greatly impressed by his engaging and earnest manner and by his able and logical presentation of his subject.

Harry Stillwell Edwards introduced Mrs. Livingston Mims, the wife of Mayor Mims of Atlanta, a pioneer among the Christian Science workers in the South and a member of the Christian Science Board of Lectureship.

Mrs. Mims in presenting Judge Ewing to the audience said in part:—

In the eighth chapter of Romans, Paul very eloquently tells us that the earnest expectation of the creature waiteth for the manifestation of the sons of God, that the creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God.

"The whole creation groaneth and travaileth in pain together until now." And "We ourselves groan within ourselves, waiting for the adoption, *to wit*, the redemption of our body." Redemption from what? St. Paul clearly tells in this same chapter that it is from the law of sin and death through the law of the spirit of life in Christ Jesus which makes us free. St. John calls sin lawlessness, and sin brings death, so we clearly see that this redemption consists in the application of the spiritual law annulling the lawless law of the human mind. All creation is waiting for this redemption.

Christianity means the redemption, through this law, of the human body and the universe. This is the one universal remedy, the one universal philanthropy, the work of Christianity.

Jesus' work in the three brief years of his ministry was filled with this redemptive work, and the disciples for centuries were required to give this proof of their understanding of his mission.

He said: If ye drink any deadly thing it shall not hurt you. You can handle serpents and they shall not

Digitized by Google

harm you. You will lay hands on the sick and they shall recover; that is, if you believe in me, if you understand the supremacy of the spiritual law which redeems man from the material law of sin and death.

He came to bring to light (to our apprehension) the life and immortality that is, and was, and ever must be, the fact of being as God's law. The understanding and demonstration of this law makes Christianity a Science, and Science Christianity.

In our human conception of the universe we see all things doomed to decay, from the maturity of the blushing rose to the splendid stars, to man himself, who in the plenitude of splendid physical and moral and intellectual power, faces this same material law of decay and corruption.

Is this God's law? Jesus raised the dead in contradiction to this law and destroyed death as the work of evil. The universality of this lawless law was forcibly brought to my thoughts a few weeks ago when I heard a fine illustrated lecture on the origin of worlds and their developments, through evolution, at the Lecture Association in Atlanta.

As I saw it all there rose to my consciousness an overwhelming sense of gratitude to that pure, holy woman, Mary Baker Eddy, for the revelation of the Science of Being through her book, "Science and Health with Key to the Scriptures."

This Science of Being makes practical the truths of the Bible, and the true history of creation in the first chapter of Genesis, forever annuls the nebular and material hypotheses of the human mind, destroying its law of decay, disease, and death. . . .

I have the pleasure of introducing Judge Ewing as a member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass.

The Macon (Ga.) *Telegraph.*

At Atchison, Kan.

Mr. Edward A. Kimball, C.S.D., of Chicago, lectured in the Opera House, Monday evening, January 13, to a good audience. One feature especially noticeable was that the assembly consisted almost entirely of intelligently interested people. Very few were attracted by curiosity. The comments heard by Scientists since have been, almost without exception, complimentary, not only to the lecturer for the clearness with which he presented his subject, but to Christian Scientists in general for the intelligent manner in which they go about informing the public.

The lecturer was introduced by Mrs. Henrietta E. Graybill, C.S.B., First Reader of First Church of this city, who said:—

In response to a general desire of the people to understand better the teachings of Christian Science, the Mother Church, The First Church of Christ, Scientist, of Boston, Mass., has established what is known as a Board of Lectureship.

The duties of the lecturers are to give the people authentic information concerning the teachings and practice of Christian Science mind-healing, and to correct any erroneous impressions concerning it.

The gentleman who will address you this evening, being not only a member of this board, but also the teacher of Christian Science in the Massachusetts Metaphysical College, in Boston, speaks authoritatively on his subject, "The Cause and Scientific Cure of Disease."

It has been my privilege to hear this lecture, and it is with confidence that I promise you an interesting and scientific discourse.

Ladies and gentlemen, I have the honor of introducing to you the lecturer of the evening, Mr. Edward A. Kimball, C.S.D., of Chicago.

As an indication of the interest awakened by this lecture it may be said that our meetings have increased very much since then, more especially in the attendance of strangers.

The lecture was not without its "signs following." A lady who had not partaken of a comfortable meal in several months, awoke the next morning with a normal appetite, and it has continued so since.

The *Atchison Globe,* of January 14, comments as follows:—

"Edward A. Kimball, who lectured on Christian Science at the theatre last night, said he never talked to a more polite audience. You hear this from all visitors: Atchison people are genteel. The theatre was comfortably filled, and Mr. Kimball talked nearly two hours, receiving close attention. The audience was made up of the most intelligent people in the city, who wanted to hear what this leader in Christian Science had to say. The audience was not quite so large as on Mr. Kimball's first visit to the city. The exercises throughout were conducted with the usual good taste which characterizes Christian Science meetings. Mr. Kimball did not exhort; he simply talked Christian Science. He did not call upon all who were Christian Scientists to stand up, nor did he coax any of the scoffers to the mourner's bench. He told no stories about how people would be sick forever unless they accepted Christian Science, and no collection was taken. People sat and listened, and when they went away, they had a right to agree with Mr. Kimball or not, as they saw fit. He went from Atchison to Grand Island, Nebraska."

At Topeka, Kan.

More than two thousand people gathered in the Crawford Opera House yesterday afternoon to hear Edward A. Kimball of Chicago lecture upon the doctrine of Christian Science. Many were unable to obtain admittance. Mr. Kimball is chairman of the Board of Lectureship of The First Church of Christ, Scientist, Boston.

Senator John Martin of this city presided at the meeting and introduced the speaker in the following language:—

Ladies and Gentlemen:—I would very much like to address this interesting and splendid audience upon the interesting subject of Christian Science, but I regret that my knowledge of that subject is so limited that I could scarcely hope to interest or benefit you. But this much I do know, that nearly twenty centuries ago a messenger appeared in Judæa, proclaiming a new, living and vital religious faith, founded upon the laws of love, peace, and good-will to mankind, and upon the theory of the Fatherhood of God, and the brotherhood of man. This new faith was called Christianity from Christ, its founder. This new religious faith has from the date of its establishment to the present time, been the controlling religion of all civilized and enlightened nations. It promised to every human being, who should follow its teachings, peace, comfort, and joy. It substituted love for hate, joy for sorrow, hope for despair, and smiles for tears. Its founder selected and sent forth disciples, called by St. Paul ambassadors of the Lord Jesus Christ, to teach this new faith to all the nations of the earth and to heal the sick everywhere. This I understand to be the faith and doctrine of Christian Science.

I now take pleasure in introducing to you one of its ablest and most eloquent ambassadors, Mr. Edward A. Kimball of Chicago. I am sure you will be pleasantly and profitably entertained by him.—*Topeka Daily Herald.*

At Grand Island, Neb.

The lecture by Edward A. Kimball, C.S.D., at the Bartenbach Opera House Tuesday evening, January 14, was well attended, nearly every seat in the large audience room being occupied.

The lecturer was introduced by Judge John R. Thompson in a few well-chosen remarks, which were as follows:—

Digitized by Google

Ladies and Gentlemen:—Many of us have met here in this Opera House in the past to listen to the discussion of different subjects. To-night we are to hear the subject of Christian Science presented by one who comes highly recommended by his own people. He is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass. The subject which should interest mankind above all others is a religion that makes better citizens, morally and physically, as well as prepares us for the hereafter, and what we want first is to learn the Truth. It has been said, "Ye shall know the truth, and the truth shall make you free." Therefore we owe it to ourselves to hear and consider well before we condemn. I only express my own serious convictions when I say that all religions and each denomination embody some truths, and the rules and creeds thereof are not infallible—they are continually changing. The best intellects have ever been searching for the truth and discarding the errors when found.

There are many good and intelligent people among the Christian Scientists of this and other communities, who are searchers for true knowledge. There are three things contained in the Christian Science teachings, which are, religion, science, and a system of healing; and the gentleman who will address you to-night is said to be fully capable of expounding this doctrine. I take pleasure in introducing to you Edward A. Kimball of Chicago, who will now speak to you. Let us hear from him.

Grand Island Daily Press.

At Philadelphia, Pa.

The seating capacity of Third Church of Christ, Scientist, northwest corner Broad and Spruce Streets, Philadelphia, Pa., was taxed to its utmost on Sunday afternoon, January 19, when a lecture on Christian Science was delivered by Mr. Carol Norton, C.S.D., of New York City.

The audience, which was a representative one, was also a remarkable one, inasmuch as more than one half of it were men, many of whom were professors and students from the various colleges and institutes of learning located in that city. There were also present a very large representation of the sister Churches of Christ, Scientist, in Philadelphia and vicinity.

The lecturer, who was introduced by the First Reader, Mrs. Henrietta E. Chanfrau, C.S.D., with brief and appropriate language, held the close attention of his hearers for nearly an hour and a half.—E. D. CUTHERT, *Clerk.*

At Salem, O.

Judge William G. Ewing of Chicago, spoke to a large audience in the High School auditorium Friday evening, November 29, 1901, on "Christian Science: Physician and Redeemer." Judge Ewing is a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, and spoke here under the auspices of the Christian Science Society of Salem.—*The Daily News,* Salem, O.

Lectures at Other Places.

Centerville, Iowa.—Edward A. Kimball, Friday, January 17, 1902.

Americus, Ga.—Judge William G. Ewing, Friday, January 17, 1902.

God has promised that the man who will give mercy shall receive it.

The man who can be trusted out of sight will do just work out of sight.

Whenever we are willing to do good, God will see that we have a chance.—*Selected.*

Among the Churches.

Church at Austin, Minn.

First Church of Christ, Scientist, Austin, Minn., held its regular annual meeting on the evening of January 7, 1902. They elected readers and officers, and listened to reports from the different officials.

The treasurer's report was most pleasing to all concerned. It showed business transacted to the amount of $671.79 for the past year, and a neat little balance with which to begin the year 1902.

The love-offerings which were given for the lecture which was held in the Opera House on October 14, 1901, are not included in this sum.

The books of the clerk show an increase of nine members in the year 1901.

This church opened its free reading rooms on February 11, 1901, and the record shows that from the date of opening to January 7, 1902, there were three hundred and thirty-three callers, not including resident Scientists. Aside from the literature which was taken from these rooms free of charge, there have been sold nineteen copies of the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and numerous other works on Christian Science.

The report from the secretary of the Sunday School was also read at this meeting. It showed a good average attendance, and this branch of the work is progressing in a very encouraging manner.

During the five years since the organization of this church in Austin, they have made provision for, and given, four free lectures, by duly qualified members of the official Board of Lectureship of the Mother Church in Boston. These lectures were given, not for the purpose of proselyting or gaining converts, but at the present time it seems to be the best way of correcting the prevalent misconceptions of the teachings of Christian Science.

Although the number of members of this little branch church seems small, they feel greatly encouraged to press on.—*The Austin Daily Register.*

First Church, Reading, Mass.

Four years ago, in accordance with the provisions of Chapter 115 of the Public Statutes of Massachusetts, seven Christian Science students met at a certain private residence, and formed themselves into a religious corporation, known as "First Church of Christ, Scientist," Reading.

This handful of adherents has increased gradually until the membership-roll has reached fifty-nine, with an audience every Sunday of from ninety to one hundred and twenty-five people. The attendance at the Wednesday evening testimony meetings has increased proportionately. In actual figures, from seventy-five to ninety-five people meet regularly in Odd Fellows' Lower Hall, Wednesday evenings at eight o'clock.

The annual church meeting was called to order by the chairman at 8 P.M. The reports from the several officers and committees were read and listened to with unusual attention. During the year over two thousand people have visited the reading room in Manning Block, where all the authorized publications treating on the subject of Christian Science can be found and read. The cash receipts from the sale of this literature amounted to over five hundred dollars in 1901. To this reading room, as well as to all the services connected with the church, the citizens of the town are respectfully and cordially invited, in order that they may investigate for themselves the utility and soundness of this doctrine.

After re-electing the entire board of officers for the ensuing year the meeting adjourned at ten o'clock.

H. LINWOOD CAMPBELL, *Clerk.*

The Reading Chronicle, Reading, Mass.

Digitized by Google

Grand Rapids, Mich.

The Christian Science Reading Rooms have been removed from the Houseman Block into the old Park Place Building between the Livingston Hotel and the Plaza. The new reading rooms are on the ground floor and cover a large area of floor space. The room, which extends the entire depth of the building, is attractively furnished with rugs, divans, easy-chairs, reading-tables, bookcases, and writing-desks, while draperies, bric-a-brac, potted ferns in jardinieres, and pictures add to the attractiveness.

The Christian Science Reading Rooms are open not to Christian Scientists alone, but are placed at the disposal of the public in general. All persons wishing a place in which to rest are cordially invited to the reading rooms; also persons from out of town who are waiting for trains are invited to spend the spare moments there. All persons will be welcomed. The rooms are well supplied with Christian Science literature and all Christian Science publications, which will be placed at the disposal of visitors.

The Christian Science Reading Room is open every day from ten o'clock in the morning until five in the afternoon.

The Sunday Herald, Grand Rapids, Mich.

First Church of Toronto, Ont.

The congregation of First Church of Christ, Scientist, held their annual meeting January 13, 1902, in the church edifice, corner Queen's Avenue and Caer Howell Street. The reports for the year showed every department to be in a flourishing condition. Mr. John O'Connor, clerk of the church, read the annual address touching on the various interesting features of church work during the year.

At the conclusion of the address the work of the Board of Directors was heartily endorsed by the church. Reports from the Sabbath School were then read, showing the total attendance of scholars 2,484, and collections $130. Before the meeting concluded it was unanimously resolved to send a telegram of loving greeting to Mrs. Eddy at her home in Concord, N. H. The message was forwarded today by Mr. and Mrs. Stewart.—*The Toronto Daily Star.*

Sioux City, Ia.

The annual report of First Church of Christ, Scientist, Sioux City, Iowa, for the year 1901, showed the average attendance at the church services for the year to be 225, while our membership is but 129, and several of our members do not reside in the city. Our Wednesday evening meetings are well attended, and the testimonies are many and promptly given.

There have been no deaths among our members during the year.

Many improvements have been made on our church and grounds, and in our reading rooms.

The sale of Christian Science literature has amounted to $621, and the total amount received and disbursed was something over $4,000.

The condition of our church, and the steady improvement in the condition of its members and attendants, is but another proof that "Divine love always has met, and always will meet, every human need" (Science and Health, p. 490).

Miss Jane E. Adams, *Clerk.*

From Oklahoma City, Okla.

The following comes to us from Oklahoma City, O. T.:—

In our Christian Science Society we have received fourteen new members the past year, and are contemplating a church organization in the very near future. We meet in our Christian Science Reading Room at present and have the pleasure of seeing it completely filled on Sundays and generally on Wednesday evenings.

In the Libraries.

Harvard Union.

Fitchburg, Mass., January 22, 1902.

Editors *Christian Science Journal* and *Christian Science Sentinel,* Boston.

Dear Sirs:—Following is copy of response to my recent offer of free subscription to *Journal* and *Sentinel* for the use of the members of Harvard Union Club, Quincy Square, Cambridge, Mass.

Very sincerely yours in Truth and Love,

John Warner Keyes.

Harvard Union.

John W. Keyes, Esq.

Dear Sir:—In reply to your very kind offer of December 19 to the Harvard Union Library, I would say that the Library Committee would be very glad to accept the monthly *Christian Science Journal* for the use of the library.

Your kindness and interest in the Union is much appreciated.

Very truly,

Williams Phillipps, *Secretary*
Library Committee of Harvard Union.

Cornell University.

We publish with pleasure the following acknowledgment from the librarian of Cornell University Library:—

Cornell University Library.
Ithaca, N. Y., January 18, 1902.

I beg to acknowledge with best thanks the receipt of your gift to the library,—*Christian Science Journal* for the year 1902, of which the issue for January, 1902, has just been received.

Very respectfully,

G. M. Harris, *Librarian.*

Forgive.

BY ISABEL WENTWORTH LEE.

Wouldst find the path to rest and peace?
Wouldst know the hour of pain's surcease?
Forgive!

Wouldst reach the heights where pure hearts sing?—
Where love endures and Right is King?
Forgive!

Hath fond appeal and tear-stained face
Brought no response—no dear embrace?
Forgive!

Doth anger wound, and hatred grieve?
Doth cruelty thy heart bereave?
Forgive!

Hath tempest wild thy barque o'erturned,
While loveless eye gazed unconcerned?
Forgive!

Doth unbelief thy footsteps scan,
Misjudging faith in God and man?
Forgive!

Forgive!—and flowers shall grow apace
Where thorns appeared to hopes efface.
Forgive!

O, sweetest prayer e'er heard on high—
Love's prayer when foes cry "Crucify!"
Forgive!

Testimonies.

I have so many times thought when enjoying the rich blessings the *Sentinel* brings to us each week, that I would write and say "Thank you," at least, but each time something has seemed to prevent; to-night I feel it is my duty to make the acknowledgment. In a testimony in a recent *Sentinel* we read, "We feel like saying of each *Journal* and *Sentinel*, 'Surely we never had another so full of love and admonition,'" and this has often been my experience. The thought of Science as the "new tongue" came to me in my reading this evening. There is such a unanimity of expression among Scientists everywhere. Here we have articles all over this broad land,—from Maine to California, from Canada to Texas, from England, Germany, France,—from titled personages and inmates of the prison cell,—and yet the same love and gratitude is expressed in all, and in much the same simple, earnest manner; and I thought of how it must rejoice our Mother's heart to know of the many who are, even now, learning what "freedom" means through this blessed teaching which she has labored so long and unselfishly to bring to a sin-sick and weary world. Then I recalled the poem, "Love's Recompense," and I thanked God that the "loving thought and word" must return to bless the giver, and that we have the assurance "*whatsoever* a man soweth, that shall he also reap."

I would like also to express my gratitude to the Bible Lesson Committee. It seems that our lessons grow more and more helpful, and I often find in studying the Scripture references, other passages that are just what I need for some patient's help or encouragement. I doubt if we fully appreciate these lessons, or our *Journal* and *Sentinel*, but if we stop and think what a vacuum it would leave in our lives to be deprived of them, it may increase our gratitude for these blessings, and we may be led to think of the watchfulness and care it must require at headquarters to furnish us such wonderful helps. We certainly need feel no hesitancy in recommending our friends to subscribe for our periodicals, since we know what a feast of good things is in store for all who read them. The first *Sentinel* for the New Year is full of helpful thoughts, the crowning piece being the gem from the pen of our Leader, "Christmas Gifts." I hope we may have the "honest, wise zeal" which will enable us to meet the requirements mentioned in the editorial, "The New Year."—O. F. H., Binghamton, N. Y.

It is with a deep feeling of gratitude that I write these few lines to the *Sentinel* just to add my word of thanks for all the benefits I receive so continually. For some time I have felt that I ought to write and acknowledge the good I have received from Christian Science, and the help I always get from the *Sentinel* and *Journal;* but error has kept on whispering, "But you have nothing definite to write about." I have had no startling demonstrations. All my life I have been strong and well except for bad headaches occasionally which have almost entirely disappeared. I did not come to Christian Science for physical healing, but simply because I felt convinced of its Truth. Although it is some years now since I first heard of it, I feel I am only just beginning to see the Light which all the time is getting brighter and brighter. After all, the little demonstrations are just as important as the big ones, for if we are faithful over the little things, we shall be made ruler over the big ones, and it is only by way of small things that we can attain unto greater. When my little boy was born I had Christian Science treatment and received much benefit, not feeling ill and getting up in three days. Just lately I have been able to overcome entirely the fear of lack of means, for I *know* that *God* is the source of all supply, and that "Divine Love always has met, and always will meet, every human need" (Science and Health with Key to the Scriptures). All the time it is a constant help and I wish publicly to express my love and gratitude to Mrs. Eddy for Christian Science, and to all those who so lovingly work to help others.—MAY L. HEARD, Hampshire, Eng.

I want to add my testimony to the many already given. I can say that Christian Science has helped me very much physically, morally, and spiritually. I was sceptical when I went to make inquiry regarding treatment; thought it was some new fad or craze, but having become pretty well discouraged by the poor results derived from the use of material remedies, so much so that I had about made up my mind that I would never use anything in the material line again, I decided to try Science. My healing, fortunately, has been slow; I say fortunately, because, had I been healed quickly (and that is what I was looking for when I sought treatment), it would have meant simply a return to the old life, and that old life was not a very good one, to put it mildly. I was looking for the physical wholly; never had an idea that I would ever become interested enough to recommend it to others. Had any one suggested a few years ago that I would ever become a member of the Christian Science Church, I think I should have called that one crazy! Truth has made a change.

I have been healed of what seemed to me a cart-load of ailments, I now feel better than I have felt for years, weigh about twenty pounds more than when I received my first treatment, and have been enjoying a peace of mind that, comparatively speaking, is remarkable.

It is about four years since I have discontinued the use of drugs or material remedies of any kind, having learned their uselessness. I find Science is something to be relied upon at all times.—WILLIAM BRANDT, Baltimore, Md.

I am grateful for one thing in Christian Science. Before becoming Christian Scientists we were taught that man was totally depraved, and that it was natural for him to go downward. Now the teaching is the opposite. It is natural and right for us to go upward, and although we may not always be able to prove this, yet we can begin. This leads us to a logical conclusion in regard to what we all did before becoming Scientists, that is, the tendency we had to emphasize this total depravity. Especially in our neighbors; if we saw them do something wrong, it seemed to be natural, instead of going to them, to go to our neighbors and tell them of it, thus emphasizing the total depravity. In Science it is the opposite. If we tell our neighbors what we hear of evil, we are making a reality of it, rolling it as a sweet morsel underneath the tongue. But if we go to him personally, that will help him. Christian Scientists also understand that if they talk of their neighbors in a wrong spirit they are offending God.

V., Cleveland, O.

I was led to seek Christian Science for my son who was seventeen years old and had had epileptic fits ever since he was eighteen months old, off and on, and at last had them every four or five weeks and would have two or three one after another. We had tried the best doctors and everything we could hear of, and when everything else failed we tried Christian Science, although we had but little faith in it. He was cured almost instantly. That was two years ago this month. He has been hearty and well ever since, and he has not taken a drop of medicine since he has been led to know the blessed Truth will make him free.

I would like to tell what blessings we have received in the last year, but I am afraid it would take up too much room. We have seven children, and we have all been wonderfully blessed in different ways almost as great as my son's being healed.—MRS. W. W. HILLS, Kalkaska, Mich.

Religious Items.

It was a teaching of some of the wise men of ancient time that in intellect and morals every person gives shape to his own character, becomes the architect of his own fortune. The wise men of all the ages have taught practically the same thing. The Scriptures of both Testaments have many precepts and exhortations to the young and to those at every stage of life to take heed to their ways, to ponder the course of their feet, to choose and walk in the pathway of virtue, of wisdom, of uprightness. Modern literature teems with this sort of counsel. From first to last it is assumed that man has the power of self-direction. This conclusion is reached by every one who consults his own capacities and who analyzes the causes which have led him along the lines which he has pursued.

The highest type of life, of manhood or womanhood, is that which is self-directed toward high ideals, and which consequently expresses the greatest measure of truth and goodness. The life of Jesus is the most conspicuous and perfect illustration of this truth. He saw the evil and the good, and he steadfastly chose the latter and faithfully adhered to it. To the extent that they have been worthy followers of the great Leader, every good man and woman has made the same choice. They have carefully examined themselves in the light of life's circumstances—its opportunities, its enticements to evil, its possible honors—and they have decided for the right, have determined to walk in wisdom's ways and to employ their gifts in such manner as would honorably advance themselves and helpfully minister to the world.—*The Universalist Leader.*

A certain amount of simplicity is desirable. In our church work we are apt to get formalized,—to fall into a worship of the logical. It is not improbable that we need an occasional break-up of method, as well as of creed,—an invasion of novelty. The Salvation Army at first shocked propriety. It never will please the more conservative and cultured; yet General Booth carefully avoided the unseemly and gross, while recognizing the needs of simpler minds that never can be guided by categories and demonstration. What is wanted, always wanted, and what must be brought home to all classes, is the sympathy of love and the beauty of righteousness. These great living facts are not brought home to us by excitement or by terror, but by quickening in us attention to the claims of right and truth as against the false and wrong. Human nature at the very worst is in alliance with God. While, then, we do not dare to stand out against simple, homely, even crude ways of preaching God's love and the gospel of Jesus, we dare not do otherwise than condemn the gross caricatures practised by peripatetic emotionalists. An element of hypnotism is in all such exercises. It is liable to create a social craze. It is possible to repeat the manias that overran Europe in the Middle Ages.

The Christian Register.

INNOCENT DECEPTION.—No one should practise what is called "innocent deception" in intercourse with children. It is difficult for the pure and straightforward mind of childhood to conceive of such a thing as innocence where they discover that there has been any deception whatever. Unswerving truth should be the guide of youth. It is not sufficient to speak the truth, but our whole conduct toward them should be sincere, upright and without artifice. Children easily discern between truth and deceit, and if once they detect the latter in those to whose charge they are committed, confidence is forever banished, and on the first opportunity the same baneful duplicity which they observed in others will be practised by them. Childhood catches and reflects everything around it, and an untruth told by one to whom it is accustomed to look with deference may act upon the young heart like a careless spray of water thrown on polished steel staining with rust which no after efforts can efface.—*New York Ledger.*

GOD NEAR.—St. Paul, better perhaps than some of the other great teachers saw that religion is a near matter. We do not have to ascend up on high for it, nor go into the depths to find it. The everlasting word is always near. This is true of all great expression. The word of faith, of hope, of love, is nigh thee, in thy mind, in thy heart. This seemed to be the condition of spiritual power, this nearness of real things. God *is*, the soul *is*, the soul's best life *is*. Study of Paul and of the Master before him shows that religion and religious life are quite independent of here and there. The time-measures are insufficient. We are in the region of the dateless, the eternal. The environment is spiritual. We lie, as it were, in the embrace of God.—*The Universalist Leader.*

PRAYER.—O Thou, who art the true sun of the world, evermore rising and never going down, who, by thy most wholesome and appearing sight, dost nourish and make joyful all things, as well that are in heaven as also that are on the earth,—we beseech Thee mercifully and favorably to shine into our hearts, that, the night and darkness of sin and the mists of error on every side being driven away, Thou brightly shining within our hearts, we may all our life long go without any stumbling or offence, and may walk as in the daytime, being pure and clean from the works of darkness, and abounding in all good works which Thou hast prepared for us to walk in! Amen.- ERASMUS.

In the early days of Illinois some men were traveling through the country with saddle-bags of specie which was required for settlement of land claims, stopping one night at the only available place, a log house, they felt it needful to keep up alternate watches during the night. But before going to bed the rough man whose cabin they were in took down his well-worn Bible and read and prayed; and one whispered to the other, "We can both go to bed; there will be no need of either of us watching tonight." The fact that the rough man who was their host was a praying man inspired a confidence that nothing else could.

DR. H. G. WESTON.

It is pleasant and helpful to have congenial associates and companions. In the home, in social and business circles, and in public service it conduces to one's happiness and success to have close and continuous relations with those whose characteristics harmonize with his own. The current of life flows smoothly under such circumstances, or at least it has fewer rough places to meet, than it would have in other and less agreeable surroundings. This being the case, it would be well if each one would charge himself to do his utmost to make himself as agreeable to others as he wishes them to be to him.

The Universalist Leader.

The heart can put on charms which no beauty of known things nor imagination of the unknown can aspire or emulate. Virtue shines in native colors, purer and brighter than pearl or diamond or prism can reflect. Arabian gardens in their bloom can exhale no such sweetness as charity diffuses. Benevolence is noble and he who does most good to his fellow-man is the master of masters and has learned the art of arts.

HORACE MANN.

Society may wear a new face; customs may vary; rules and standards, like human opinions, may change. But the soul and its life, man's religious aspirations and his religious activities,—these abide. These make the

"One holy Church of God
In every age and race;
Unwasted by the lapse of years,
Unchanged by changing place."

HENRY G. SPAULDING.

To be true, to hate every form of falsehood, to live a brave, true, real life,—that is to love God. God is infinite; and to love the boundless, reaching on from grace to grace, adding charity to faith, and rising upward ever to see the ideal still above us, and to die with it unattained, aiming insatiably to be perfect even as the Father is perfect,—that is to love God.—F. W. ROBERTSON.

Right habit is like the channel which dictates the course in which the river shall flow, and which grows deeper and deeper with each year. Right habit is like the thread on which we string precious pearls—the thread is perhaps of no great value, but if it be broken the pearls are lost.

Helpful Thoughts.

All which happens through the whole world happens through hope. No husbandman would sow a grain of corn if he did not hope it would spring up and bring forth the ear. How much more we are helped on by hope in the way of eternal life!

MARTIN LUTHER.

The Christian needs more than the veneer and gilt of polite society. He needs righteousness; he needs to get the whole life into harmony with the will of the Father, to make life attractive and forceful.

REV. ROBERT W. WALLACE.

Love is the fusing element of all life; the tremulous, softly defined horizon-line that at once separates and unites the spheres, terminating our human vision; the trysting-place where earth and heaven meet.

LUCY LARCOM.

The will of God be done; but, oh, the unspeakable loss for us if we have missed our opportunity of doing it!

BROOKS FOSS WESTCOTT.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science, the religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh, of Rochester, N. Y.

Christian Science: Its promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, 60 cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

SENSELESS JOKES.—The engagement of a number of young women to go to the Philippines to act as amanuenses and typewriters starts the usual senseless joke about the pretty typewriter. The standard subjects for those who are jocularly disposed, are lawyers, doctors, stepmothers, mothers-in-law, and typewriters. As an exchange says about these young women, if the jests have any truth in them they are not funny. If they are not founded on truth, they are cruel. Many modest, self-sacrificing, and self-respecting young women, earning their own living and contributing to the support of widowed mothers and young children, are grieved and humiliated by finding the class to which they belong made sport of at the expense of their reputation for ladylike conduct. The boast of the American citizen is that a woman can travel from Bangor to San Francisco, not only without danger of insult, but sure of protection in any emergency while on her way. Ir no country in the world has such liberty been given to women, and nowhere else have they shown that they richly deserve the trust that has been put in them—*Christian Register.*

The enormous increase in the productive capacity of American shoe manufactories, due to the revolution wrought by labor-saving machinery; the rapid development of the industry in the middle and Western States, and the large number of new factories, many of large size and fitted out with the best modern machinery, has made the supply of shoes in America far ahead of the demands of this country. With characteristic enterprise Americans have sought foreign markets for their surplus product, and this market has grown so rapidly that instead of American manufacturers having to imitate the styles of other countries in order to gain a foothold there, foreign manufacturers have been forced to imitate American styles.

Emperor William's gift to Harvard University will consist of casts and some bronzes illustrating every phase of the German plastic art, from the Romanesque period of the Renaissance. The casts number several thousand and their originals are to be found at Ratisbon, Nuremberg, and Cologne. Every city of the Empire possessing anything distinctive or beautiful is represented. The collection embraces casts of monuments and sculptures and architectural casts. The entire cost of the collection will be defrayed from the Emperor's private purse, and is estimated at about $125,000. Ambassador White has written to President Eliot of Harvard University that the collection requires a special building.

A gigantic ship trust, to control the foreign trade of the North Atlantic Ocean, is about to be organized by J. Pierpont Morgan. This mammoth enterprise contemplates the merging of the White Star, Red Star, Leyland, and Atlantic Transport companies into one interest, to be connected and operated with the vast railroad properties that Mr. Morgan controls. It will probably be extended to include the Cunard, Anchor, Allan, State, and Wilson lines; for once the scheme is put into operation the power of the combination already effected will force independent companies engaged in Anglo-American freight transportation into line or out of business.

Baled hay and iron boats or iron for boats are on the list of articles produced in the United States (in addition to wines, fruits, and flour, previously reported, to come into Nicaragua free of duty), mentioned in the protocol for a reciprocity treaty between Nicaragua and the United States, signed by the Nicaragua minister of foreign affairs, Dr. Sanchez, and forwarded to Mr. Kasson, the reciprocity commissioner at Washington. Nicaragua's sugar is to be admitted free into the United States. Labor is much too scarce and high in Nicaragua to produce sugar in competition with beet-sugar or cane-sugar produced in the United States.

The treaty of cession of the Danish West India Islands from Denmark to the United States was signed at the State Department, January 24, by Secretary Hay and Constantine Brun, the Danish Minister. The treaty must first be approved by the Senate and then it will be necessary to secure an appropriation of the purchase price from both the Senate and House. By the treaty absolute sovereignty over the islands of St. Thomas, St. John, and St. Croix, or St. Kitts, is transferred to the United States in consideration of the payment of a sum said to be about $4,000,000.

Apropos to the talk about the presents that Prince Henry of Prussia intends to make to President Roosevelt, Admiral Evans, and others in the service of the United States, is this section from the Constitution of the United States:—

"No title of nobility shall be granted by the United States, and no person holding any office of profit or trust under them shall, without consent of the Congress, accept any present, emolument, office, or title of any kind whatever, from any king, prince, or foreign state."

Mrs. Elizabeth Sharp of Denver, Col., one of the few women conversant with practical mining operations, has completed the installation of a steam plant on the south end of the Teutonic claim on Ironclad Hill, and has commenced the drainage of seepage water from the 120-foot shaft from which the block will be developed. This block adjoins the Midway, Londonderry, and Domon properties, and will be thoroughly prospected under the personal direction of Mrs. Sharp.

An advance in the wages of locomotive engineers throughout the entire system of the Lake Shore and Michigan Southern Railway was granted at a conference between a committee of the engineers and officials of the road, held in Chicago recently, affecting eight hundred men and increasing the pay roll of the company about $250,000. An advance in wages had previously been given to the yard conductors and yard switchmen and to the trainmen.

Rear Admiral Kimberly, U.S.N., retired, passed away January 28, 1902, at his home in West Newton, Mass. He had one of the best service records in the navy and is best remembered as commander of the flagship Hartford under Farragut at Mobile Bay and as flag officer in command of the Pacific squadron at the time of the memorable storm in the harbor of Apia, Samoa, when the Vandalia was lost and other ships wrecked.

The collection of paintings of the late P. C. Hanford of Chicago has been sold for a total sum of $124,135. Among the paintings were Rembrandt's "The Accountant," which brought twenty-three thousand dollars; Titian's "Portrait of Philip II." of Spain which brought fourteen thousand dollars; and Murillo's "Immaculate Conception," which brought eight thousand seven hundred dollars.

Emperor William in notifying the Mayor of Rome of his intention to send a bronze statue of Goethe to be erected in a public place as a memorial of his cordial reception in Rome, telegraphed the following message: "May the image of Goethe under the blue sky where blossoms the orange-tree of which he sang, be a lasting pledge of the sincere sympathy uniting Germany and myself to Italy."

Dr. George A. Barton, the head of the department of Biblical literature and Semitic languages at Bryn Mawr, has been granted a leave of absence in order that he may act as director of the American School of Oriental Research in Palestine. Its quarters are in Jerusalem and its support and management are in the hands of some twenty institutions in America.

By a decision handed down by Judges Buffington and Acheson in the United States District Court at Pittsburg, the American Bell Telephone Company has been deprived of the monopoly of the Carty patents, an important device in rural party line telephone service. The decision holds that the principles in the device are general and not patentable.

The French stockholders of the Panama Canal have offered to sell their whole outfit and all their rights to the United States for forty million dollars. In view of these favorable terms and the changed conditions, the expert commission which reported on the merits of the Panama and Nicaragua routes have submitted a supplementary report recommending the Panama route.

The D. O. Cunningham Glass Company of Pittsburg, Pa., one of the largest manufacturers of window glass outside of the American Window Glass Company, has increased the wages of its unskilled labor ten per cent. It is expected that the other independent companies will follow this lead, thus affecting about two thousand men.

Miss Alice Roosevelt, daughter of the President, has accepted the invitation extended to her by Mr. and Mrs. Whitelaw Reid, one of the special ambassadors to the coronation of Edward VII., to be present upon that occasion. She will be formally presented at the Court of St. James by the American Ambassador.

The Southern Pacific management proposes to build a railway bridge across the Great Salt Lake which will be twenty-three miles long, twelve miles of which will be in deep water, necessitating immense steel trestles; the rest in shallow water. The bridge saves forty-five miles in distance and a long, steep grade.

Admiral Schley has made an appeal to the President as the Chief Executive and Commander-in-Chief of the Army and Navy, and asks that the finding of the court be reviewed. Judge Advocate-General Lemley, in commenting on the appeal, denies him the honor of the command at Santiago.

The Navy Department announces that Rear Admirals William T. Sampson and B. J. Cromwell will be placed on the retired list February 9, on account of age. This will result in the promotion of Captains P. H. Cooper and George H. Wadleigh to be rear admirals.

By an agreement with the Russo-Chinese Bank, a private institution, Russia secures preferential railway, mining, industrial, and commercial privileges of great value which could not be obtained under treaty rights without great opposition from Great Britain.

The order of Knight Grand Cross of the Bath has been bestowed upon Marquis Ito, the Japanese statesman, by King Edward.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Christian Science Defended.

UNDER the above heading a recent issue of the *Minneapolis Journal* contains an article by Abbot Edes Smith, C.S.B., which we take pleasure in republishing:—

Editor of the *Minneapolis Tribune.*

For some time you have been weekly publishing articles written by Rev. Marion D. Shutter, D.D., concerning the relation of the human mind to the human body, and concerning the teachings of the Bible upon this subject. Although neither the word Christian Science nor the name Mrs. Eddy has appeared in these articles, yet all systems of mind-healing are therein classified and discussed, and as a matter of course the general public has interpreted much of the language used as being intended to apply to that particular system of Mind-healing which is an essential part of the religion known as Christian Science, and which alone has attained in this community such recognition and acceptance among all classes of citizens that it has again and again been talked against and preached against by leading clergymen of other denominations. Moreover, the writings of Mrs. Eddy have been quoted and criticised, thus showing that this same system of Mind-healing which has been weighing heavily upon the thought of some other clergymen was not by any means absent from Dr. Shutter's thought when he wrote these articles. In view of these facts, I am confident you will willingly give space and equal prominence in your columns to this defence of Christian Science, which, however, to avoid trespassing too much upon your courtesy, can merely touch upon a few only of the more important branches of the subject.

The first tenet of the Christian Science Church is found on page 493 of the Christian Science text-book, "Science and Health with Key to the Scriptures" and is as follows: "As adherents of Truth we take the inspired Word of the Bible for our guide to eternal Life." In the study of the Bible, we welcome all the light thrown upon it by modern scholarship and we accept the teachings of the Bible in their entirety, neither isolating texts nor distorting them to conform either to a creed to a preconceived theory of theology, of philosophy, or of medicine. We take the Bible to mean what it says, in its simple and natural meaning, always applying the rules of rational interpretation, which necessarily include a careful study of the context and of all correlative facts. Thus understood, the Bible teaches a philosophy and a religion the most logical and consistent that the world has ever known.

This being so, Christian Science is the religion of the Bible, as taught and explained by Jesus Christ. A criticism of Christian Science is, therefore, *ipso facto,* a criticism of the Bible and of our Saviour. Although at first this necessary consequence may not always be clearly apparent, yet Jesus has said, "There is nothing covered, that shall not be revealed; and hid, that shall not be known." In the present instance this has been made unusually clear; for I need only mention the article of December 8, to call attention to an estimate of the Bible and of our Saviour which would scarcely have been expected from the pen of a Christian minister. Of this I will later speak more at length.

The fundamental error of Dr. Shutter in his estimate of Christian Science is his failure to recognize the essential distinction between the human mind of mortal man and the infinite Mind which is God. To heal by the power of the human mind is to use hypnotism; to heal by the method of Christian Science, which is enlightened prayer to God, is to realize practically the truth of God's word spoken by the mouth of the prophet, "Ye shall seek me, and find me, when ye shall search for me with all your heart." The method of hypnotism is mental suggestion; it is one human mind taking control of another, either with or without that other's knowledge and consent, and it is successful in accomplishing its purpose, whether that purpose be for good or for evil, just in proportion as the control of the one mind by the other is absolute and complete. The human mind so controlled, by reason of such control ceases, to a greater or less extent, to be a free moral agent, being dominated by the other human mind, which thus assumes control. The control is more or less despotic, according to the greater or less strength of will of the dominant mind, and according to the greater or less susceptibility of the mind so dominated. As this practice is persisted in, the control of the one mind over the other becomes greater, until in some cases it results in complete mental slavery. It is claimed that susceptibility to the hypnotic influence is so great with some people that they can even in the first instance be hypnotized without their consent and against their will.

Hypnotism is avowedly practised by some physicians for the alleviation of pain or for the cure of disease; but by whomsoever it is practised, human nature being what it is, can we regard such control of one person by another as a wise or safe practice in any case? Does not the danger of misuse exceed the possibility of good results?

Not only is Christian Science antagonistic to hypnotism, but the practice of the one is inconsistent with the practice of the other. A person who is practising hypnotism is incapable of practising Christian Science, and a Christian Scientist who should attempt to practise hypnotism would of necessity lose his ability to practise Christian Science. The Apostle Paul says "the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be."

Christian Science treatment is, as before stated, enlightened prayer to God. It demands utter self-abnegation and implies absolute reliance upon God alone. Just in proportion as one relies upon the human will does he trust more in self and less in God. True prayer is communion with God; it is that unfaltering reaching out to God alone which is Christ's method of meeting every human need.

The prayer of Christian Science is not one of blind faith; it differs essentially from the "faith cure" alluded to by Dr. Shutter. In other words, it is not blind pleading with a God who has either sent, or permitted to be sent, evil upon His child, and who is thus besought to change His eternal purpose, and to take away at least a part of this evil for which, being all-powerful, He alone is responsible. No; it is the prayer of one who has learned that God is good; that God creates and permits only good, and that, God being the only Creator, whatever of evil appears to us is only our temporary mistake, which will disappear from our lives when, like Enoch, we learn to walk more closely with God.

The Bible tells us that God is of purer eyes than to behold evil. John says "God is light, and in Him is no darkness at all." As light destroys darkness, so God destroys all evil, not by special providence, but by His universal and unchanging law, the supremacy of good.

The prayer of Christian Science is that of a child to his heavenly Father of whom Jesus said, "Whatsoever ye shall ask the Father in my name, He will give it you. . . . Ask, and ye shall receive, that your joy may be full." In the first chapter of James is described the manner of prayer: "Let him ask in faith, nothing wavering. For he that wavereth is like a wave of the sea driven with the wind and tossed. For let not that man think that he shall receive any thing of the Lord." The faith, however, to which this apostle alluded was not blind faith, but that living faith which Paul describes as "the substance of things hoped for, the evidence of things not seen," which obeys the command of Paul to "Prove all things; hold fast that which is good." This living faith is thus really enlightened understanding of the true relation of God and man.

The prayer of Christian Science is, therefore, a joyful reaching out to God, who is known to be infinitely more willing to give than we are to receive, and in whose word we read: "Ask, and it shall be given you; seek, and ye shall find: knock, and it shall be opened unto you: for every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened. . . . If ye then, being evil, know how to give good gifts unto your children, how much more shall your Father which is in heaven give good things to them that ask Him?" Just in proportion as we doubt God's love and distrust His fatherly care, does our prayer become one of mere pleading, while the highest prayer is the prayer of certainty, and is a prayer, not so much of petition as of affirmation, of praise, and of thanksgiving. Such was Jesus' prayer at the raising to life of Lazarus, who had been dead four days. This was Jesus' prayer on that occasion: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always. . . . And when he thus had spoken, he cried with a loud voice, Lazarus, come forth. And he that was dead came forth."

I think I have made it clear that Christian Science follows closely in its healing both the letter and the spirit of the practice and the teachings of Jesus Christ and of his apostles, and, therefore, as I have already said, a criticism of Christian Science is, *ipso facto*, a criticism of the Bible and of our Saviour. Dr. Shutter's article, on December 8, entitled, "Miracles of Healing in the New Testament," is no exception to the general rule. I deeply regret that duty compels me to call attention to a few of the typical statements of that article.

Among other statements which he quotes from the Gospels is this: "And Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of sickness, and all manner of disease." He then adds: "These general statements are like all other attempts to put things in round numbers. They are exaggerated and sweeping. They belong to that class of expressions of which the writer of John's Gospel has left so conspicuous an example: 'And there are also many other things which Jesus did, the which, if they should be written every one, I suppose that even the world itself could not contain the books that should be written.' We certainly must accept this as an overstatement, unless we are willing to accept the interpretation of a good man who said that, perhaps, the writer referred to the world as it was known to the ancients, which was much smaller than the world as we now know it, and would not hold so many books."

In answer, let me say that the latter quotation from the Gospel of John could not deceive, and was not meant to deceive, anybody, but was simply intended to emphasize in the Oriental way the greatness of Jesus' work. The former quotation is of an entirely different character, and, unless the gospel writer testified to a falsehood (which I think few Christians will admit), proves, not that the evangelist kept an itemized list of cures, but that, to express an admitted fact in a general and comprehensive way, Jesus did heal all kinds of diseases and sicknesses. In case of doubt as to which of the two possible interpretations to accept, a candid critic should, in common justice, choose that interpretation of any passage in the Bible which is consistent with the honesty and intelligence of the writer.

Dr. Shutter then considers some of the specific cases of Jesus' healing, and assumes that some of the similar cases are really one and the same case, some of the narratives being thus grossly exaggerated. Thus, of certain cases of leprosy healed by Jesus, Dr. Shutter says: "The simplest account is that of Matthew. He says nothing of the severity of the disease. Luke emphasizes it and says that he was 'full of leprosy.' Matthew assumes that he obeyed the injunction not to speak of it. Mark and Luke tell us that, instead of that, he went out and began to publish it, so that multitudes came to be healed of their infirmities; and at last the story blossoms into ten lepers healed instead of one; and these ten healed at a distance, instead of by his touch. The same tendency to exaggeration is seen elsewhere." Continuing, Dr. Shutter gives other instances upon which he puts a similar interpretation, adding: "This is the tendency of religious enthusiasm. Stories grow as they are repeated. New features are constantly added, until at last it becomes difficult, if not impossible, to get at the original facts." In answer, let me appeal for justice in behalf of the Bible writers. In case of doubt, that interpretation or explanation of any given passage of the Bible should be rejected which is inconsistent with the intelligence and honesty of the writer of that passage.

Dr. Shutter says: "The New Testament theory of disease is that it is caused by devils, actual evil spirits, which took possession of the human body and produced the ailments that distress us. Was not exorcising devils the chief work of Jesus in healing? Is not this the theory that lies on every page of the New Testament? The only way to escape from this conclusion is to interpret the New Testament on some scheme that denies the plain historic sense. But such restorations were no proof of supernatural power; they testify to a commanding personality, to a deep insight into human nature, and to a wonderful skill in dealing with men. Indeed, it was the casting out of a demon that first gave Jesus his great reputation. Here was a man who had conquered hell itself. Of course the people would think that he had come from God and was clothed with divine power. All that I can understand. But why you and I should attach any unusual importance to such an incident from a remote and superstitious age, I cannot understand. After casting out, as the people believed, some demons, the report spread that he could heal the sick; the people believed that he could; the sick believed it, and consequently were healed. Their faith in him as a healer wrought with his own suggestion and produced a cure."

As to the theory of sickness being caused by devils, I would answer, what of it? I fail to see how an erroneous popular theory as to the cause of disease can lessen the credit due to the power which heals it. That Jesus and his apostles adopted the popular phraseology relative to disease does not prove that they believed the popular theory to be true. All through the Bible, language is used adapted to the comprehension of the people addressed. This was wise and right. That you cannot teach a person everything at once is no reason why you should antagonize him so that you can teach him nothing.

The important point for Jesus to impress upon the people was that God heals the sick, as well as the sinful. This

Digitized by Google

was the teaching of Jesus himself upon the subject of healing. He said, "I can of mine own self do nothing;" but he also said, "The Father doeth the works." In view of these facts, Dr. Shutter's intimation that Jesus healed by "mental suggestion" would make Jesus either a hypocrite or one who was himself deceived. Christendom does not agree with Dr. Shutter upon this point. Jesus certainly attributed the healing works of himself and of his followers to the power of God and not to the power of the human mind. Christendom does not believe Jesus to have been a hypnotist nor to have been self-deceived.

Speaking of the healing of the New Testament, Dr. Shutter says: "None of the diseases which have proved most fatal in modern times are on the list—such as cancer, smallpox, or Bright's disease. Paralysis, a stiff hand, some cases of blindness and dumbness, attributed in most cases to demons—these are the most notable. They are precisely the things that most easily yield to mental suggestion. The fact is, that all the cures of the Gospels put together do not furnish a single case of great moment or seriousness—nothing that the physicians of to-day [that day?] with their imperfect knowledge considered incurable; nothing that the physicians of to-day would find insuperable." Answering, I would say that the healing work of Jesus and of his apostles is not to be discredited merely by the fact that the people of his day did not know of the modern diseases of cancer, smallpox, and Bright's disease. Remember, too, that only a few of the many cures wrought by Jesus are described in detail. As to these other astonishing statements made by Dr. Shutter, I think they have surprised the public, as they have certainly surprised me.

Dr. Shutter says: "Jesus sometimes used external means. Even if Jesus did this but once, this single instance is enough to warrant the use of outward means, as well as of faith and suggestion—for those who need such authority." In answer, let me say that one who honestly wishes to follow Jesus' teachings will follow his general rules, not the isolated exceptions to those rules. But the case of clay or of clay and saliva being applied to the eyes of a blind man will not bear the interpretation thus given to it by Dr. Shutter. Much of the teaching of the Bible is symbolic; that is, by the use of symbols or of parables to impress important truths by object-lessons. This was in accordance with Oriental usages and was therefore perfectly easy to be understood by those for whom the lessons were given. It is absurd to speak of clay or of saliva or of both together as at any time generally supposed to be efficacious in the healing of blindness, certainly not in the instantaneous healing of blindness in the case of a man who was blind from his birth. As Jesus at no other time used or taught the use of material means for healing, we should, in this case where clay and saliva were used, at least seek such an explanation as is consistent with his usual teaching and practice. Such an explanation is easy to be found. Clay is naturally symbolic of matter or of material remedies. To spit upon a thing indicates utter contempt. When it had been applied to the eyes of the man who was blind from his birth Jesus immediately directed the blind man to wash away this symbol of a reliance upon aught besides God, and only when this had been done was sight restored.

Dr. Shutter alludes to the fact that Jesus rebuked as a "wicked and adulterous generation" those who asked him to give them a sign. I would answer that Jesus himself had once before met and mastered a similar temptation when he refused to cast himself down from a pinnacle of the temple, to show the public how God would protect him from harm. His reason in both cases was doubtless the same. He said: "It is written again, Thou shalt not tempt [*i.e.*, test] the Lord thy God." There was enough work for him to do in helping sinning and suffering humanity without wasting his time in giving useless exhibitions. To help those who were in need was his only motive in his healing work. Thus, as Luke tells us, "he went about doing good." When, however, the healing work had been done, he never hesitated to refer to it as the evidence of his mission from God. It is, in fact, the only evidence he offered to convince people that he was God's messenger, the Messiah. To the followers of John the Baptist, in proof of his Messiahship, he said: "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, . . . and blessed is he, whosoever shall not be offended in me." At another time, when the Jews tried to kill him, he said to them: "The works which the Father hath given me to finish, the same works that I do, bear witness of me, that the Father hath sent me." This must have referred to his healing works, which alone would be likely to convince those whom he addressed. To this passage it will not be replied that Jesus referred to his spiritual work of moral regeneration; for of this Dr. Shutter says: "In this work his success during his lifetime was comparatively small. After his death, in a little upper chamber only one hundred and twenty followers could be mustered. What a slight showing for his life work!"

The only test of fellowship which Jesus gave to show who are his worthy followers is found in Mark, 16 : 17, 18, and in John, 14 : 12. Dr. Shutter's theory concerning these two passages is not tenable.

In John, 14 : 12, Jesus said: "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." By the works alluded to in the first half of this sentence, Jesus must have meant those healing works to which he would naturally be understood to refer, and which, as I have shown, he had previously used to prove himself God's messenger. The "greater works" may perhaps, as Dr. Shutter suggests, refer to the spiritual work of moral regeneration, of turning men from their sins. In line with this thought Mrs. Eddy says in our text-book: "It is easier to cure the most malignant disease than it is to cure sin."

In Mark, 16 : 17, 18, Jesus said: "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." It was only sometimes that Jesus touched those whom he healed. Hence physical touch cannot be an essential part of the healing practised and taught by him. In this passage, therefore, to "lay hands on the sick" must have a symbolic meaning. Plainly, to "lay hands on" means to "extend the loving hand of helpfulness." Dr. Shutter attempts to discredit this whole passage by quoting the "marginal note that the revisers have put beside it," namely: "The two oldest manuscripts and some other authorities omit from verse 9 to the end. Some other authorities have a different ending to the Gospel." Answering, let me say: In the first place, this passage still stands and is recognized as entitled to a place in this Gospel. Secondly, the great majority of manuscripts which do contain this passage, although not so old as the two manuscripts which omit it, are, nevertheless, copies of many other and different manuscripts which are older than the two now omitting it. The agreement of this great majority of manuscripts, coming as they do from separate and distinct sources, all of these sources being older than the two manuscripts which now omit the passage, gives the great weight of authority in favor of the authenticity of the passage as it now stands in the Gospel. In line with this passage, remember that Jesus' command, "Preach the gospel," was always accompanied by his other command, "Heal the sick."

But our evidence in support of the efficacy of the healing of Jesus, of his apostles, and of Christian Science is not limited to quotations from the Bible. There is scarcely a village in this country where there are not in-

Digitized by Google

stances of healing by Christian Science. Any honest and earnest seeker for the facts cannot fail to find conclusive evidence of the truth of this statement. This is not all. Most of those who first turn to Christian Science for help are those who have tried all other methods, have failed to find relief, and have been by the so-called laws of matter condemned to hopeless suffering, or even to death. In spite of this, a large majority of these cases are healed through Christian Science and the percentage of failures is astonishingly small. In Christian Science the sinner is reformed, the infidel reclaimed, the helpless invalid is restored to health, the deaf hear, the lame walk, and sight is restored; and all this is done, not through the mental suggestions of hypnotism, not through the human will; not through the influence of the human mind, but through the infinite power of almighty God, "who," in the words of the psalmist, "forgiveth all thine iniquities; who healeth all thy diseases; who redeemeth thy life from destruction; who crowneth thee with loving kindness and tender mercies."

Here let me correct a misapprehension widely prevalent that Christian Science is only a theory or method of healing sickness. Perhaps the desire to be healed of sickness is what generally leads people to that which offers hope, where all else has failed; but after being physically healed, the patient finds himself a new man in many other respects. Instead of being irritable, selfish, dishonest, sensual, he has become cheerful, self-forgetful, honest, and pure. Instead of being profane, irreligious, infidel, or atheist, he has learned to know and respect the God of the Bible, who has proved himself beyond the shadow of a doubt to be and to be only good, and who inspires the deepest reverence and love. How can this man help being religious? Many a man who is in bondage to some form of sin which has wrecked his life, turns almost hopelessly to Christian Science and the captive is made free. How can this man help being religious? Almost without exception those who by God's power in Christian Science have been healed from the hopeless suffering of sickness, or of sin and its physical consequences, declare that their physical healing is not worthy to be compared with the great moral and spiritual revolution which has come to them. Yes, physical healing is, indeed, an essential part of our religion, but it is the smallest part. It is the gateway, as it were, through which a new world opens, a new life dawns.

The Apostle Paul says, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death." Above the so-called laws of matter and of mortal mind, God's law, wherein good is here, now, always, and everywhere the only real power, stands supreme. Every man, woman, and child throughout the universe has the right of appeal from these so-called laws of matter and of mortal mind to God's law. Whoever chooses to avail himself of this God-given right can prove himself with Paul to be "strong in the Lord, and in the power of his might;" like Paul he can say, "I can do all things through Christ which strengtheneth me;" and in the presence, power, and love of the "Father of lights, with whom is no variableness, neither shadow of turning," he hears with the Apostle John the voice of the angel proclaiming, "Now is come salvation, and strength, and the kingdom of our God, and the power of his Christ." "For the Lord God omnipotent reigneth." ABBOT EDES SMITH.

Minneapolis, December 27, 1901.

No one can tell the unending power for good which each of us may have in our homes, among our fellow-men, by faith in them,—how far we can strengthen their feeble desire for God and all good. Care, then, for the soul of people, and for the soul of what they do, as well as of what they are.—HENRY WILDER FOOTE.

Testimony Meetings.

At Second Church of Christ, Scientist, New York City.

The first speaker was a young man who had been healed of pulmonary trouble to which several members of his family had succumbed. He spoke of what love meant to him and how we gain such an idea of the compassionate love of the Master that we, too, are able to break fetters for ourselves and others. He had scarcely seated himself, when a woman arose and told how for fourteen years she had been in bondage to the same belief of consumption, and during this time she had one hundred and eighty-seven hemorrhages. She had been examined by physicians and by one of New York's best specialists, and had taken most powerful remedies, but gradually grew worse. Last spring she was attacked with appendicitis and went to one of our best hospitals and was informed that an operation was necessary. Very seriously objecting to the use of the knife, she said she would return later, if she felt she could. It was at this time that a friend handed her Science and Health, saying she had not read it, but she heard it healed people. This proved to be correct, for in ten days she was a thoroughly well woman from reading and assimilating the Truth in that book.

The next speaker was a woman who was asked why she confined her reading to Mrs. Eddy's books and put aside books on mental science which contained much that was beautiful and helpful. She told her questioner that she had tested all that mental science stood for, and although she had seemed to be physically benefited she was not healed, and how the text-book of Christian Science had brought out the healing on all lines and she *knew* it was the Truth.

The next to follow was a young Jewish woman who said she belonged to a most orthodox Jewish family, and for six months after she had been healed in Christian Science she feared to say anything about it, but later the way opened to her and now her entire family were in this thought. Her mother came here for class instruction, and last summer, when she returned to her home in Cincinnati, she healed a man in one treatment of a severe case of paralysis.

After this, a large, fine-looking man arose to tell his story of five years spent, by the advice of *materia medica*, in Colorado, as he, too, was under the claim of consumption, which his mother and other members of his family had passed away under. He lived in Boston at this time, and when he returned there, he soon found the winds too much for him, and then went South, but here again he was no better, and was soon as ill as before he went West. During this time his wife, who had been a healthy woman, was taken ill and was obliged to undergo an operation, but was no better. At this time Christian Science was brought to her and she was healed. When he came North and was so miserable that he could not hold himself up straight, she suggested that he be treated and see what could be done for him. He was completely healed and is now a very erect, large, heavy man.

Several other testimonies were given, and then our First Reader wound up the evening with a short talk upon the power of Love to break up the beliefs of disease.

S. GERTRUDE PALEN.

At Chillicothe, Ill.

The first testimony was given by a gentleman, who said that Christian Science had come to him in the darkest hour of his life. His ailments were not altogether of a physical nature, although he said that he was most wonderfully healed of a chronic difficulty that the doctors were unable to cope with, he having had specialists operating upon him for more than ten years. The greatest help he re-

Digitized by Google

cieved, he said, was the spiritual uplifting. Up to that time and at that hour, he had reached a stage of almost absolute atheism; not believing in a God, not admitting there could be a hereafter, and it was only through the evidence of the physical healing that he became convinced that the so-called miracles recorded in the New Testament, must be the truth. He said that it required this evidence of the senses to convince him that the God of the Bible was a God of Love, and not of hate. "Three years after this," he said, "I was taken with sudden deafness, which infirmity seemed hereditary in our family. Thinking at first that it was the result of catarrh or cold, I waited a couple of weeks to assure myself that in reality I had become a victim of this law of inheritance. Having lost the hearing entirely in my left ear, I called upon a Christian Science practitioner, and within a very short time my hearing was restored, and no manifestations of deafness ever returned. This happened four years ago. This, of course, proved to me, from then on, the efficiency of this healing power, and caused me to investigate, with most satisfactory results."

A lady said that agents called quite frequently at her house, and that she is almost always willing to give them a listening ear and finds quite a number who are willing to listen to some suggestion from her on Christian Science, and who seem receptive of the truth. The gentleman she mentioned was very glad to hear something on this subject. After a short conversation he told her of a case of which he was an eye-witness. At Elmira, N. Y., he stated that he knew a wealthy business man who had been entirely paralyzed on one side. This gentleman tried *materia medica* for a long time, as he could afford to employ the very best specialists. As he received no benefit, he became disheartened and only turned to Christian Science as a last resort. After ten days of Christian Science treatment he threw away his crutches and recovered his good health. This gentleman said: "I witnessed this myself and I am very anxious to know more about the Christ Truth."

Christian Science services are held Sunday in the church at 10.30 A.M., and 7.45 P.M. to which all are welcome.

The Chillicothe (Ill.) *Enquirer.*

Made Free.

For the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death.—*Romans*, 8: 2.

Freed from the bondage of sin, led by the Master's hand
Out of "The mind of the flesh," into the promised land.
Led by the spirit of God, out of death, into life and peace,
Where harmony reigns forevermore and discords cease.
Oh, it is most wonderful a child of God to be,
And beautiful the message—the spirit doth make free.
"Joint-heir with Christ!" to what a lofty height
Rises our thought made clear by heavenly light.
But this promised glory is not won with ease,
A mighty overcoming, known to Him who sees
Our every upward striving, will only win the crown
When every evil thing and lie has been cast down.

F. H. L.

Life's Aim.

To love and love and continue to love, exacting nothing in return; to love patiently, quietly, calmly, taking no thought for my own; to love on and on, never thinking whether or not the world sees or knows; to love my brother and sister, never considering whether or not my brother or sister loves me; but to love, simply for the sake of loving and the unspeakable and inexplicable joy which emanates from that love which alone prompts a man to "lay down his life for his friends." To possess this true, pure, spiritual sense of love shall be the endeavor of my life.—J. C. B.

NEW EDITION OF SCIENCE AND HEALTH.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution.

Notices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows: One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The New Edition of Science and Health.

THE announcement in last week's *Sentinel* of a new edition of the Christian Science text-book, "Science and Health with Key to the Scriptures," was doubtless news to most of our readers, although it has been generally expected that, sooner or later, such an event would occur. It has been foreshadowed by Mrs. Eddy for several years. The old type which has for many years done such faithful duty, had become so worn that new type became an absolute necessity. Further postponement was out of the question. This accounts for the appearance of the new book at this time.

As stated in the Publisher's notice, the book is now printed from new plates, with the lines numbered on the margin of each page, while many important verbal changes have been made. These changes consist of additions as well as eliminations, the evident purpose of which is the simplification of the text, especially in its definitional phases. The sense of the text, particularly in its Scientific or spiritual import, remains wholly unchanged. Yet the addition of a word or clause here, and an elimination there, will enable the student and investigator more readily to grasp the author's true meaning. To illustrate: The word "divine" has been placed before the word "Principle" in many places where the latter stood alone as a synonym for Deity; while the words Love, or Truth, or Life—one or all—as synonyms for God, are frequently substituted for Principle.

Throughout the entire book the verbal changes are so numerous as to indicate the vast amount of time and labor Mrs. Eddy has devoted to this revision. The time and labor thus bestowed is relatively as great as that of the committee who revised the Bible. The moments necessary for so great an achievement must have been almost snatched from the midst of her other multiplied and onerous labors. Thus we have additional evidence of the herculean efforts our beloved Leader has made and is constantly making for the promulgation of Truth and the furtherance of her divinely bestowed mission; and thus, too, should we be reminded of the renewed obligations resting upon all of us to aid her, in every possible way, in carrying out her regenerative, health-giving, and life-saving evangelism.

One of the important features of the new edition is the re-arrangement of the chapters. The following from the table of Contents indicates the order of the chapters:—

Prayer.
Atonement and Eucharist.
Marriage.
Christian Science and Spiritualism.
Animal Magnetism.
Science, Theology, Medicine.
Physiology.
Footsteps of Truth.
Creation.
Science of Being.
Some Objections Answered.
Christian Science Practice.
Teaching Christian Science.
Recapitulation.
KEY TO THE SCRIPTURES.
Genesis.
The Apocalypse.
Glossary.
Fruitage.

The side headings have been revised and now are descriptive of the text.

The first paragraph of the Preface serves to show somewhat of the verbal changes:—

"To those leaning on the sustaining Infinite, to-day is big with blessings. The wakeful shepherd beholds the first faint morning beams, ere cometh the full radiance of a risen day. So shone the pale star to the prophet-shepherds; yet it traversed the night, and came where, in cradled obscurity, lay the young child who should redeem mortals, and make plain to human understanding the way of salvation. Now across a night of error dawn the morning beams, and shines the guiding star of Truth. The Wisemen are led to behold and follow the daystar of divine Science, lighting the way to eternal harmony."

Such Scriptural references as in the old editions were only partially cited, or referred to sufficiently to give their spiritual import, have been literally quoted. The Index has been omitted, while the space it occupied, and considerably more, has been devoted to a chapter fitly entitled Fruitage, for it contains upwards of seventy testimonials of healing, through Christian Science, of various forms of sin and sickness, republished from *The Christian Science Journal* and *Sentinel*. The former include cases of redemption from immorality, the liquor appetite, the tobacco habit, etc.; while the latter include many organic and other diseases regarded as incurable by physicians. A large number of these cures were effected solely by the reading of the text-book and other writings of Mrs. Eddy. In all there are seven hundred pages of the new edition.

False Hydrophobia.

THE above is the caption of a story appearing in the newspapers which is but a repetition of many similar events.

It seems that at a hospital in Lynn, Mass., a young man named William F. Waters recently died as the result of what physicians, in late years, have come to call "false hydrophobia."

After his death the doctors diagnosed the case and pronounced it false hydrophobia. They said Waters imagined he had that disease and worried himself into the semblance of it. About a year before, he was bitten in the hand by a dog. Would-be jokers predicted that he would have hydrophobia and, as a result, he became melancholy.

The physicians, of course, found no connection whatever between the dog-bite and the appearance of the disease, except the mental state.

This unfortunate incident ought to set people seriously to thinking along the line of mental conditions in their relation to physical manifestations of disease. The morbid mental state that will bring on an hallucination of the kind we are considering, will produce similar effects as to other diseases. Such results are by no means confined to hydrophobia. The mind which dwells, in fear, upon any illness, is apt sooner or later to manifest that illness physically, unless the morbid mental condition is removed by the destruction of the fear.

It is fortunate for humanity that a system has at last been established which teaches that all sickness is but mental hallucination physically manifested, and still more fortunate that this same system also teaches how to destroy the fear which produces such hallucinations.

The incident should also teach the people who joke as did the friends (?) of Mr. Waters, the folly and danger of such joking. The instances are not few where fatal sicknesses, of various kinds, have been superinduced in just that thoughtless way.

When men display the same degree of earnestness and persistence in living the righteous life that they now show in following what they please to call the "strenuous life," trusts will no longer terrorize, strikes will cease to be, and labor will fraternize with capital. The righteous life alone can bring this about, and Christian Science means righteous living.

The Lectures.

At Brooklyn, N. Y.

On Sunday, January 19, a lecture was given in the Academy of Music, Brooklyn, by Arthur R. Vosburgh, C.S.B., under the auspices of First and Second Churches of Christ, Scientist, of Brooklyn, N. Y. The Academy of Music was well filled and the lecturer was heard in every part of the building. A committee appointed from each church had charge of the lecture, and it was a perfect demonstration of love and unity. The newspapers especially were cordial, and in each of the offices the committee were well received and thanked for a synopsis of the lecture. The lecturer was introduced by Rev. S. E. Simonsen, C.S.B., of Brooklyn, whose remarks were as follows:—

Ladies and Gentlemen:—A little more than a quarter of a century ago, Christian Science was not known.

To-day, it is engaging the attention of many of the best, and most intelligent minds of this country. It is winning its way to the minds and confidence of the thoughtful people, as no other system of religion and healing. And what is true in this country, is largely becoming true in Canada, England, Scotland, and Germany; and even France, Italy, and Scandinavia are reaching out for this Truth as taught by Christian Science.

More than fifteen years ago, while a Methodist minister in Wisconsin, I was healed through Christian Science, and that after a number of eminent physicians had pronounced my case a hopeless one, and kindly informed me that I could not possibly live more than a year, at the farthest. But I am grateful to God for sending to me the blessed Truth of Christian Science. It has done everything for me.

Since my healing, I have watched with deep interest the marvelous growth of Christian Science, and I have carefully studied its doctrine, practice, and demonstration in healing the sick and truly Christianizing the people. And I am free to confess to you, that Christian Science is fast proving to the world, beyond all dispute, that it is "leaven, which a woman took, and hid in three measures of meal, till the whole was leavened."

But as Jesus Christ was largely misunderstood, and his doctrine grossly misconstrued, so we find to-day, that the Discoverer and Founder of Christian Science, the Rev. Mary Baker G. Eddy, has also been misunderstood and her teachings falsely interpreted by many well-meaning people, which has done much to keep many a poor, suffering human being from coming to Christian Science, and seeking the healing and Christianizing power that is inherent in its doctrine. In order to help right this wrong, a Board of Lectureship was established by The First Church of Christ, Scientist, in Boston, Mass.

Intelligent men and women who understand the teachings of Christian Science, and who have demonstrated its power, have been placed on this board, and sent out through this country, Canada, and Europe, to give public lectures and thus publicly correct some, at least, of the many erroneous reports circulated among the people. This is, therefore, one of the reasons for inviting you here this afternoon: that you may hear for yourselves the true claims of Christian Science as presented by one who is authorized to speak upon this important question.

I am, indeed, grateful to see such a fine and intelligent and appreciative audience here this afternoon. I know you will all put aside what little prejudice you may have had against Christian Science, and listen to the speaker with that same spirit of love, and true, manly fairness that you would court, if you happened to be the speaker of the hour. I know you will gladly yield to this request, as it is only what our dear Master requested us to do, namely, do unto others, as you would have them do unto you.

I have now the honor to introduce the Rev. Arthur R. Vosburgh, C.S.B., member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., who will address you on the subject, "Christian Science is Scientific Christianity."

At Oskaloosa, Ia.

Edward A. Kimball, C.S.D., of Chicago, Ill., lectured Sunday, January 19, 1902, at 3 P.M., at the Masonic Opera House. There was a good attendance and much appreciation shown. The daily papers on Monday gave kind mention in regard to the lecture.

Major F. H. Loring of this city, introduced the lecturer in the following excellent remarks:—

I apprehend that there is no subject of Christian thought now prominent before the public which is so imperfectly understood and yet so greatly misunderstood as that upon which the speaker will address you this afternoon. Still, these people tell us that investigation is going on, and thousands are accepting the tenets of this system of faith and practice. They think that they have the Truth; they believe that they have discovered the pearl of great price, and they desire to have us all enjoy its benefits with them.

If they have the Truth, if their system is as true as their thought and action is pure and perfect, it is of vital importance to the world; it is of inestimable value, for it touches the interest of every human soul.

It is well that we have one with us who is competent to explain, and well qualified to instruct us, in the theories and benefits of their faith; and while I would say that we shall do well not to expect too much from one lecture, as a subject of such vast breadth and importance cannot be fully treated in one short hour, yet, by careful attention, and fair consideration, we may gather some of the main facts and principal features of the question.

I therefore take pleasure in introducing to you the speaker, Mr. Edward A. Kimball of Chicago, who will address you upon the subject of Christian Science.

At Albion, Mich.

Judge William G. Ewing of Chicago lectured in the Opera House in this city on the evening of December 19. Subject: "Christian Science: Physician and Redeemer."

A happier or more harmonious people never separated for their various homes at the close of a lecture than did this fine audience, composed of all classes of our citizens.

The whole audience listened intently during the entire address, and when Judge Ewing ceased talking, words of appreciation and praise were heard from physician, clergyman, and many of the orthodox laity.

The Scientists of this place feel that Judge Ewing's lecture carries the Truth in ever-widening circles in this city and vicinity.

Our reading room is open each afternoon in the week except Sunday, and on Tuesday evening.

PHEBE E. R. ANTHONY, *Clerk.*

At Hoosick Falls, N. Y.

A lecture on Christian Science by Judge William G. Ewing at Wood's Opera House, December 3, 1901, was given, under the auspices of the Christian Science Society of Hoosick Falls. The Judge was introduced in a few appropriate words by the Hon. L. E. Worden.

Those who had the pleasure of hearing the lecture were much pleased and felt well repaid for venturing out on so stormy a night. A number of Scientists from North Adams and Troy enjoyed the lecture with us.

FRED N. STEVENS, *Clerk.*

Retrospection.

He was better to me than all my hopes,
He was better than all my fears;
He made a road of my broken works,
And a rainbow of my tears.

Not a billow broke o'er my sea-girt path,
But carried my Lord on its crest;
When I think of the days of my wilderness march,
I can trust in my Lord for the rest.

He emptied my hands of my treasured store,
And his covenant love revealed;
There was not a wound in my aching heart,
But the balm of his breath has healed.

Oh, tender and true was the chastening sore,
In wisdom that taught and tried,
Till the soul that he sought was trusting in Him,
And in nothing on earth beside.

He led me by ways that I had not known,
By paths that I could not see;
The crooked was straight and the rough made plain
As I followed the Lord alone.

I thank Him still for the pleasant palms,
And the water springs by the way,
For the flaming pillar of fire by night,
And the sheltering cloud by day.

There is light for me in the trackless wild,
As the wonders of old I trace,
When the God of the whole earth went before,
To search me a resting place.

Has He changed for me? He changes not,
He will bring me by some new way,
Through fire and flood and each crafty foe,
As safely as yesterday.

And if in the warfare, He calls me forth,
He buckles my armor on;
He greets me with smiles and a word of cheer,
For battles his sword has won.

He wipes my brow when I droop and faint,
He strengthens my hand to toil;
Faithful is he as He washes my feet
From the trace of each earthly soil.

There is never a halt in the dreariest march,
But some promise of love endears;
I read from the past what my future shall be,
Far better than all my fears.

Like the golden pot of the wilderness bread,
Laid up with the blossoming rod,
All safe in the Ark with the law of the Lord,
Is the covenant care of my God.

ANNA SHIPTON.

Nature herself bore witness in men's hearts against the dogmas of a ruined race and an endless perdition. For there remained in them, indestructible, the power to laugh! Like a flag of cheer flying through all the bleak fogs of fear and phantasm, an unquenchable signal that the universe is God's after all.—G. S. MERRIAM.

The happiness of your life depends upon the character of your thoughts.—MARCUS AURELIUS.

From Our Contributors.

Freedom, an Ideal Realized.

BY LEWIS C. STRANG.

FROM the day that "there went up a mist from the earth," and Adam, falling into a deep sleep, dreamed himself into bondage, peaceless humankind, urged to it by irresistible impulse rarely in the least understood, has longed for, prayed for, fought for freedom. More than any other, freedom has been the ideal of the ages, miscomprehended, misinterpreted, misused, but always the ideal, steadfast because in its essence derived from unchanging Spirit. Every advance of the race recorded in human history has had its beginning in the restless search for freedom. Every war, waged since war began, has heard, where the fray was fiercest, the resounding battle-cry of freedom. Every reform,—political, sociological, religious,—has marshalled its forces under the inspiring banner of freedom.

The Hebrews of old left the land of Egypt and wandered forty years in the wilderness because they had faith in their ideal of freedom. Strengthened by freedom's righteous might, Leonidas and his three hundred Spartans barred the pass at Thermopylæ before Xerxes and his myriads, saving Greece and possibly all Europe from the enervating sway of the Persian. The American Revolution of a century and a quarter ago was pre-eminently freedom-born and freedom-won. Those stalwart pioneers conquered, not because they were physically the more powerful, but because they had arrayed on their side the full force of deep conviction and resolute sincerity. Martin Luther dared to defy haughty Rome because he contended for freedom. The Pilgrim Fathers sailed unknown seas without fear because their compass pointed unwaveringly toward freedom. John Wesley preached, and his sermon was heard because it was charged with the living, earnest thought of freedom.

Admirable and thrice admirable every one of these glorious instances of lofty purpose and faithful endeavor soaring momentarily above material circumstance and condition! But what was the ultimate product of the labor? Results afford the only standard by which actions may be scientifically measured. Did not the Hebrews, who fled from Egyptian bigotry and oppression, become themselves bigots and oppressors? When the word of truth was spoken, they would not listen, and they sought to destroy the man who lovingly brought it to them. The Pilgrim Fathers also, just escaped from persecution, themselves turned persecutors of the helpless minority. That Greece, which Leonidas strove so heroically to preserve from Persian effeteness, degenerated into a state of corruption unspeakably vile. The commoners of France cried aloud for "Liberty, Fraternity, Equality," and their cry culminated in the French Revolution, horror and ignominy worse confounded. Is theological thought, because Martin Luther boldly nailed his ninety-five theses to the church door at Wittenberg, or because John Wesley cared not a whit for the biting shafts of public ridicule, the readier to recognize its own errors or the quicker to welcome the new light that so splendidly brightens the dark places?

Can there, in fact, be a freedom whose seed is lawlessness and whose crop is anarchism and annihilation? Assuredly not. What, then, is this great freedom, this abiding ideal that the world has persisted in calling good, but which, pursued according to the world's behests, has inevitably led to lust, license, and tyranny? Has the world any freedom to offer? Is not that which the world would name freedom merely a mocking mask, an illusive sham, a wretched deception?

I know a man whose ideal of freedom is material wealth. His riches have become opulence; his power and his influence have grown into immensity. But is he free? One

Digitized by Google

look into his heart of hearts reveals the pitiful truth. Naught is there save barrenness. The affections, those wellsprings of peace and joy, are starved, poverty-stricken, and denuded by selfishness. The man is a slave. His money has shackled him with great fear. He is utterly weary of it. Yet he must pile it up and pile it up, for he comprehends no other way of living. I know a man whose ideal of freedom is knowledge. For years he has sought the wisdom that the world compiles in books. He has made of himself a stupendous storehouse of data regarding things that seem to be true. But is he free? What is in his heart of hearts? Confusion and blank despair, nothing else. He is without charity. He is cold, dismal, and forlorn. He knows not love. Instead of bringing him tenderness, contentment, and hope, his philosophy has reasoned him into a horrible prison-house of cynical pessimism. He is storm-swept and adrift, for he is "without God in the world."

Having attained it by the mightiest strifes and the greatest sacrifices, even while guarding it as the dearest of treasures and the most precious of possessions, mortal man has ever found that which he believed to be freedom tainted with the bitterness of disappointment. The reason is plain. Mortal man's view-point has been entirely wrong. Although continually seeking a means of escape from what at the moment appears to be a particularly galling form of material bondage, mortal man has always believed material bondage of some sort or other a necessity. Consequently, he has invariably evoked materiality to deliver him from materiality, a mode of procedure that on the face of it is without the vital element of progress. He has tried to right one wrong with another wrong, to fight error with error. To free himself from the master's cruel lash, the slave has murdered. To release themselves from despotic government, nations have stained their hands with blood, madly destroying the innocent with the guilty. Both the slave and the nation have a right to freedom from unbearable material conditions. Recognizing as patent facts that such conditions were essentially evil, that they circumscribed man, that they actually ruled him to whom God had given dominion over all things, these sufferers under material law felt that somehow and in some way they could be free. They dared physical violence to secure this freedom, but they did not dare decisive rebellion against mental slavery, the basal cause of all their trouble. They accepted unprotestingly error's perversion of Jesus' prayer, "Thy will be done," and they bowed meekly before evil as if it were power and reality. They believed that body was the captive, not knowing that they themselves were in the chains of mortal mind solely on account of their false belief.

There is no freedom other than that which comes with the full understanding of spiritual law, with the assured knowledge of God, with the true comprehension of what man really is, with the final recognition of the tender and unvarying relationship between man and his Maker. The order is exactly as Jesus declared it to be (John, 8 : 32): "And ye shall know the truth, and the truth shall make you free." This freedom the world is beginning positively to feel, the freedom which Jesus persistently taught, man in harmony with divine Principle, the life-giving truth that Paul preached with all the enthusiastic conviction of one whose triumphant declaration it was, "I am free born."

God's man is free born. Expressing only Deity's realities, governed absolutely by God's law, he can know nothing apart from Good and infinite perfection. God's man witnesses to the limitless unfolding of inexhaustible creation. Sinning mortal man, on the other hand, is a bondman always, for he is ruled and dominated by his own tyrannical beliefs. His fearful misconception of mind at the beck and call of matter has brought him entirely under the contrary and unprincipled laws of matter. He is fastened hand and foot with cords that he himself has made and which he himself has knotted.

It is part of Christian Science to sever these lacerating cords of mortal sense by expounding to the awakened spiritual understanding the deep significance of the first commandment of the Mosaic decalogue, "Thou shalt have no other gods before Me." Christian Science demonstrates the eternal verity of the one Mind, and that, God the Father. It reveals the perfect brotherhood of man, thereby establishing man's equality and individual liberty. Relieved of the fettering belief of dependence on his fellow, perceiving Life complete and Love infinitely satisfying, mortal man gains his birthright of immortality. He is free, for he is at one with Truth.

Chains Loosened.

BY LUCY B. HANNA.

NEARLY three years ago, weary and heart-sick, trying to attain the perfection which Scripture commands, "Be ye therefore perfect, even as your Father which is in heaven is perfect," getting no nearer the goal and realizing that the beliefs of theology which I had clung to since early childhood were sinking from beneath me because of lack of foundation and practical ability to meet the needs my heart craved, I turned to Christian Science, and in these few years have received more strength, help, and comfort than in all the preceding years of my life worshiping an unknown God. Soon after taking up the subject I found it necessary to call upon a practitioner and through her loving counsel I have been enabled to see the links of the chain that fettered me to fear, anger, envy, jealousy, selfishness, etc., loosen and gradually begin sinking from sight. For these signs I greatly rejoice and give thanks to God, for I am confident that the work of destruction and transformation thus begun will go on until the temple is complete and I shall finally awake in His likeness. The overcoming of fear has wrought for me a great sense of relief and freedom. I was afraid of all manner of things and never ventured outside of my home alone after night, or had any comfort in it. Now I go at any time anywhere, with a perfect sense of security and safety through the realization that God is all-power, all-good, and ever by my side.

In childhood I formed a horrible mental picture which I only recently lost, of the time when death should enter our home, never having lost any near relative. During the past month I was enabled to pass through this seeming trial upheld by the understanding of the all-sustaining presence and power of God as life, and those who came to comfort me who were not Scientists, remarked that they came to comfort me but went away comforted.

Truth's remedies have never failed where the thought of sickness has suggested itself to me. I was relieved of astigmatism and fatigue through reading Science and Health, our denominational text-book, and later nervousness, sick-headache, and chronic catarrh disappeared as naturally as the old leaves fall from the tree. I have had many beautiful demonstrations in my own home and others.

The spiritual interpretation of the Bible gained through the study of Science and Health and its application, so far as I understand it, has made it my dearest treasure and has proven to my entire satisfaction that hidden in its depths are treasures of holiness, life, health, peace, and happiness if one is willing to dig for them with the instruments of Christian Science that God has placed within easy reach of all.

The many helpful thoughts that gain entrance into our home through the columns of the *Journal* and *Sentinel* are greatly appreciated. They inspire me to strike more courageously and with more force and effect the citadel of sin in my own thought for which I am indeed thankful. My

Digitized by Google

earnest desire is to reflect good to all and realize that others can only see the light in the measure that my own windows are kept transparent.

Taking Thought.

BY ANNIE L. FISHER.

WHEN riding in the street cars, through the very busy sections of the city, have you ever looked from the windows and noted the crowds of teams and people which seem to be in the way along which you must pass? Have you not wondered how the car ever could pass safely through among so many obstacles? and have you noticed how carefully the motorman manages his part? He does not concern himself with how he shall get through the next crowded place, nor how he will manage when his car is out in the country, but he rings his bell and with great care moves on, taking advantage of every opportunity to go forward.

Now it seems to me that we can draw a very useful lesson from this common, every-day event. We are all moving forward day by day. It often seems that the way is so obstructed that it is well-nigh impossible for us to proceed; we often look into the future and it seems as if a great stone wall stood in our path. But this is not right. Our Master said, "Take therefore no thought for the morrow." This does not mean that we should neglect any opportunity to improve our condition, nor does it mean that we will be provided for in the future, no matter how we spend our time now. It means simply this,—that if we are doing the very best we can *now*, we need have no anxious thoughts about to-morrow. The lesson which is learned in the grammar school forms the foundation on which rests the college education, but the child in the grammar school has no cause to worry about what marks he will receive on his work in his college course. His business is to learn the lessons of to-day, and "the morrow shall take thought for the things of itself."

If our thought is filled with the cares that to-morrow may bring, we cannot give our whole attention to that which is before us in the present, and the task but poorly done, is not done at all, but simply set aside in order that we may give our thought to something that may never really concern us.

How often we all have found the things, which looked so formidable in the distance, to be simply creatures of our imagination when we saw them face to face. How often we have found that the great stone wall which looked so high and black at a distance that we were *sure* we could never climb over it, was provided with a gate, through which we passed with pleasure into the green pastures. Or perhaps when we reached the wall we found that our path lay beside it for a space, but the path had been made smooth by the love and care of our Father, so that the thorns hurt our feet much less than we had expected, and we heard the sweet voice saying, "This is the way, walk ye in it," and we were not afraid to do as we were told.

Perhaps we were afraid of some experience which we knew was coming, and we wondered how we should meet it, but we found that the lesson learned "in the day of small things" gave us just what we needed in the hour of examination, and instead of being overwhelmed, we were strengthened and helped onward.

These experiences of the past all help to encourage us and give us strength for the future; and the promise we have proven is more surely ours than it was before we proved it, because after it has been proven we have made it a part of our life's equipment and we are sure it will not fail us when we need it. So the lesson comes very clearly to us that, as our Master's way has always been best, and as his wisdom has been better than ours in all other things, so his way is best when he tells us to "take therefore no thought for the morrow." And we know that if we do the very best we can to-day, we will be prepared for our next duty, whatever it may be, and "the morrow shall take thought for the things of itself."

Healed through Reading Science and Health.

BY M. McI. G.

SINCE coming into Christian Science in 1893, it has been my thought that sometime I too would endeavor to express somewhat of the inestimable good which has blessed me every moment since I began to read "Science and Health with Key to the Scriptures."

Through no human suggestion was it brought to my notice; for it, its author, and the believers and demonstrators of Christian Science were quite unknown to me at that time; nor did I know Christian Scientists till long after the text-book healed and blessed me beyond words to tell. Very strong was the conviction that I had stumbled upon something sweetly true, bewilderingly so, and which I did not understand beyond a dim sense that my many prayers and earnest desire for the Truth were herein contained, and so, answered. That I did not comprehend the method of the wonder worked upon my thought, as well as body, did not diminish the deep consciousness that it was Good.

The price of my first copy of Science and Health seemed small in exchange for what I knew its covers held for me of delightful study and revelation. This precious book then and there superseded all others, after the Bible; proving my Bible a marvelous book of which I knew comparatively little, although an old and valued friend, until the enlightenment came through reading Science and Health, discovering to me its treasures of wisdom, making clearer the purposes of Truth, the great love of Love.

It matters not what the human environment may be; it matters not in what wilderness of human fallacies one may be wandering, God—Good—is everywhere, and the faintest cry for help, persisted in, reaches Him. The circumstances of my awakening to the still, small voice of Truth, exemplified to me the omnipresence and omnipotence of God, for in the wilderness of the Gila Valley of Arizona, many miles from railroad or civilization, the healing Truth came to me as it were literally the voice of one crying in the wilderness, "Prepare ye the way of the Lord, make his paths straight."

As the apprehension grows of that I have come into, it deepens the realization of the empty painfulness of past years, as compared to the blessed comfort and certainty of the present, with promises now understood, and the daily unfolding of the same to our consciousness. I can but gratefully and lovingly think of her, our Mother, who in our midst has demonstrated the way of good, and made the method of it so simple to all who will read Science and Health.

To the beneficent influence of the *Journal* and *Sentinel* I owe much, bringing to me each week and month, as they do, from far and near, through the earnest faithfulness of the editors and their staff, and the Publishing Society, the thoughts and works done in the Field, reaching human needs over this great round world.

Understanding.

BY ALICE VAN OSTRAND.

FIVE years ago Christian Science brought to my consciousness a beautiful and new light. Ill health with its innumerable fears and discouragements was cast out, and with health and a new understanding of life came a peace I had never known before. The continued study and application of the Science has not only resulted in great

Digitized by Google

mental and physical freedom, but a consciousness of greater power to do, to plan, and to execute. The opposition of friends seemed a cross, but Truth sustained and directed my feeble footsteps, bountifully supplied all my needs, destroyed fear of lack, and gave me a glimpse of *real* life.

Truth is unchangeable and everlasting. True success must be the result of the understanding and demonstration of Truth, which is power. "Give me understanding, and I shall keep thy law;" and Job says, "To depart from evil is understanding." "Let this mind be in you, which was also in Christ Jesus," and if the same mind surely the same results, and this is the only way out of this labyrinth of error. This one Mind, this secret place of the most High, this perfect protection and rest so beautifully pictured in the ninety-first Psalm, is the kingdom of heaven within us of which Christ spoke, and we may become conscious of this kingdom here and now. This is the price: To think no evil—to know only good. Christian Science uncovers error and lo! much which we have been taught to believe good and true we find to be evil and utterly false. Science and Health is the pickaxe with which we clear away this rubbish. Get it and go to work and you will find the kingdom of heaven within you.

Science and Health says, "There is nothing difficult or toilsome in this task, when the way is pointed out; but sincerity and persistence alone win the prize."

Bridgeport Public Library.

Dear Editor:—The children of our Sunday School have decided to use their money for placing Christian Science literature in our public institutions.

I enclose a copy of the letter written by one of the children to the librarian of our public library with the very cordial response of Mrs. Hills in accepting a copy of "Miscellaneous Writings."

The work with our Sunday School is very gratifying and encouraging. LOUISE B. WARNER.

My Dear Mrs. Hills:—We, the children of the Sunday School of First Church of Christ, Scientist, of Bridgeport, have sent to Boston for the "Miscellaneous Writings" by Mary Baker G. Eddy, which we should like to place in the public library. We hope you will accept it.

Sincerely yours,
ALEXINIA KENDRICK.

BRIDGEPORT PUBLIC LIBRARY.

Bridgeport, Conn., January 11, 1902.

Dear Miss Kendrick:—The book arrived here safely yesterday. Will you kindly thank the children of the Sunday School of the First Church of Christ, Scientist, of Bridgeport, for their interest in the Public Library, and assure them that their gift is accepted with much pleasure, and that it will be duly placed upon the shelves.

Very truly,
AGNES HILLS, *Librarian.*

From the German.

Sits the little human thing
On the shore of time's wide sea,
Gathers in his little hand,
Drops from out Eternity.

Sits the little human thing,
Gathers rumors full of mystery,
Writes them down into a book,
Names it "Universal History."

Westminster Gazette.

Testimonies.

In the spring of 1895 a few friends met at the home of one of their number one Sunday afternoon to read the Bible-Lessons as given in the *Christian Science Quarterly.* We continued meeting at the same place for a time, until seven of us decided to organize a Bible class and rent some place in which to study the lessons. We accordingly looked about and found the Grand Army Hall convenient and so rented that. Word coming to have the Bible and Science and Health our only preachers, we were obedient to the word and elected two Readers, one of whom is our First Reader at the present time.

In the spring of 1896 we organized as a church with eleven members and continued meeting in the Grand Army Hall, where we also from this date held our Wednesday evening meetings.

The next two years, our numbers increasing, we began to look about for a better hall and found pleasant quarters in the Hughes Block, where also our reading room was located.

In October, 1901, we purchased what was known as the Congregational Chapel, and moved into our own church building, feeling that after all our wanderings we had at last a home of our own. The reading room in the rear of the church is the only part of the building that we consider complete. This we have had newly furnished and decorated. A pretty green carpet covers the floor, and with oak furniture makes a cosy, attractive room. It is open to the public every afternoon. We have a copy of Science and Health in the public library, also in the jail, and the children of the Sunday School see to it that the *Sentinel* is kept in the jail also. We are very happy that we can begin the new year under such favorable auspices, and have indeed proven the loved motto to be true: "Divine Love always has met, and always will meet, every human need."

MRS. JENNIE FISHER, Marshall, Mich.

I have, thus far, hesitated to say anything in the *Journal* or *Sentinel*, being in doubt whether I should speak to edification. But perhaps my brief experience may help some one whose entrance into the path of Christian Science is even more recent than mine. For many years I had been a victim to the claim dyspepsia, and later, of nervous weakness and kindred diseases. Medicines galore I used for various claims, and when I began reading "Science and Health with Key to the Scriptures," in August last, I was carrying with me daily three or four of these.

After reading a few pages, I suddenly awoke to the consciousness that I was being healed. Gratitude for such an unexpected blessing led me to think of my many friends still in bondage as abject or even more so, than my own had been; and I felt that I must demonstrate out of my own experience if I would be helpful to others. Near the last of October, with some trepidation, I left all my medicines at home in the morning, and told the Lord that he was all I had to depend upon for that day. To my surprise, there came a sweet consciousness of his nearness. Then my eyes were opened to see that I had been leaning upon drugs, instead of trusting Him.

One after another my many claims are vanishing. The future has a brighter outlook, and I read the Scriptures in a new light. Christian Science is the religion of hope. Though I have but touched the hem of Truth's garment, my understanding longs to demonstrate more fully the great possibilities of this way of Life. My heart is filled with gratitude to God, and to our own dear Leader. The Sunday and Wednesday evening services at the Mother Church have been exceedingly helpful to me. That I may be the means of leading others into the liberty I so much enjoy is the most earnest wish of—J. Q. B.

New Haven, Conn.

I would like to offer my testimony in just acknowledgment of the many blessings which have come to me through the study of Christian Science.

It is a little over two years since I first became interested in Christian Science, and it was through my little girl's demonstration that I was persuaded that there was really something in it worth investigating. We were visiting my aunt, who was then just a beginner in Science. Previous to this time my little girl, had never known what it was to be able to eat what she wanted. The law had been made for her, that she was bilious, had the jaundice when three weeks old. When my aunt told her she was God's child she took right hold of that, and ever since has been eating everything she wants, without any bad effects.

I began the study of Science and Health with the *Quarterly,* and since then have had many demonstrations of the power of Truth over error in the healing of diphtheria, croup, grip, burns, toothache, flesh wounds, and carbolic acid poisoning. I myself have been healed permanently of a claim which would render me unconscious for hours, and helpless for days.

Four medical practitioners pronounced it fits, a result of concussion of the spine received in a fall. I have recently had the pleasure of class instruction, and have since been able to demonstrate this Truth better than ever, morally, physically, and financially, for which I am not able by mere words to express my gratitude to all the dear ones who weekly in the *Sentinel,* and monthly in the *Journal,* by their helpful articles, are helping us on our way, and to the Mother, Mrs. Eddy, who gave us the word in Science and Health.—Mrs. Ida M. Campbell, Pittsburg, Pa.

One day a lady came to my home and said, "You will be surprised when I tell you what I have come for." She said that her little boy had sprained his neck very badly four weeks ago. Since then he had been under two doctors' care and was not getting any better, and that yesterday the doctor told her he was very much afraid that the cords were paralyzed, and that was the reason why recovery was so slow. That frightened the lady and she said to the doctor, "Well, I have no faith in Christian Science, but I am broad-minded, and will take him to a Christian Science practitioner and have him treated." I then asked her if she knew anything about Christian Science. She said, "No, I do not; but you may treat him." I said, "You are not supposed to have faith in anything that you do not understand. I will show my faith by my works." She brought the boy that afternoon for treatment. The little fellow looked the picture of distress from suffering and from loss of sleep. The mother brought him again next day, and they both had a look of encouragement. She said he had the best night's rest the previous night that he had had since he was hurt, and he could now move his neck without turning his whole body. The third day the boy came alone, and was much better. The fourth day I met the mother on the street. She said the boy was all right, and would not have to come again, that the night before he was out with the other boys hallowe'ening, and had as good a time as any of them.

Mrs. Julia E. Watson, Aspen, Col.

I am a little girl and have often felt I should add my testimony to those of other children which we sometimes read in the *Journal* and *Sentinel.*

When I was four years old, while playing with some children, I fell and injured my spine. I was taken to all the best doctors at home, but none did me any good. I was then taken to New York to specialists there, and was in several hospitals. I was kept in plaster casts and steel braces, and was not allowed to move my head without support, and never knew what it was to play as other little children did.

The doctors had said they could do nothing more for me, and when I was about to pass away, my mother, as a last hope, consented to my being treated in Christian Science by my aunt, who had written begging her to try it. She telegraphed her to come on at once, as I seemed to be going very fast, and in three days after she got there I was healed. When I woke up the third morning, to my great joy I found I could raise my head, then sit up, and I felt so strong I got right out of bed and ran all around the house as fast as I could without my brace. It was a very joyful time for me, and I have not worn my brace or any support since.

I am now as strong and well as any child, and can stand anything. I suppose it would hardly be necessary to say that both mamma and myself are Scientists, and I now look to divine Love for my support.

Louise Cafferty, Binghamton, N. Y.

I was healed four years ago, after being sick three years. At that time I had lost all hope of ever being well. I was under the influence of opiates constantly. I could not lie down at night without choking and my eyes were too weak to read.

When my healer came to see me I did not have any faith in her at first; but I soon found I was being led out of darkness into light. After a few treatments I gave up my medicine and have not taken any since. I could soon lie down without choking, and rested well. It brought peace and comfort. It seemed like heaven on earth. I felt as though I were leaning on the everlasting arms. I am the only believer in Christian Science in our location. I have to work alone, yet I know I am not alone for God is my ever-present help. I have the Bible, Science and Health, and the *Sentinel.* My healing was slow, but my kind teacher was very patient with me. The physical healing is nothing compared to the holy uplifting, the spiritual help, it has been to me. I could never tell the blessings I have received.

Leanor J. Seeley, Weedsport, N. Y.

A short time ago I went out hunting China pheasants with a friend and he accidentally shot me. He was only sixteen feet from me. Thirty-six shot hit me in the hip and small of the back. People said that I would be laid up for six weeks or more.

But my mother wrote to a healer of Portland, and in four days I was sitting up, on the fifth I walked a quarter of a mile, and in two weeks I was every place, thanks to Christian Science.—E. Smith, Whiteson, Ore.

I have received so much encouragement and help from reading the many wonderful cures wrought through Christian Science, that I feel my own experience may, perhaps, be helpful to others.

At the time a Christian Scientist took my case I had been for several years suffering from paralysis of the bowels, and was entirely cured in one week's treatment.

Mrs. E. Black, Ashland, Ore.

Seasons of visible demonstrations are not our only periods of advancement. There are times when we grow in understanding, either by diligent study, or contact with uncovered error. Then there are times of silent demonstration over the numerous secret sinful thoughts, and, behold, we find the growth of yesterday has fitted us for the victory of to-day's battle.—V. B., Arkansas City, Kan.

Bergfriede, Ger., December 28, 1901.

Editor Christian Science *Journal* and *Sentinel.*

Dear Sir:—Having received much help from the above-named publications, I desire to express my sincere thanks to you and all contributors thereto.

Yours in Truth,

David Kruggel.

Religious Items.

REVIVALS VERSUS REGULAR WORK.—Those who disparage revivals of religion often express the greatest faith in what they call "the regular work of the Church." But the trouble with "the regular work of the Church" is that it is frequently on so low a plane that it would be unreasonable to expect much from it in the way of converting unbelievers or edifying those who have been converted. "The regular work of the Church" too often means the formal repetition of stereotyped services without much warmth or spiritual power.

But even were the ordinary activities of our Churches sustained at a much higher spiritual level than they are, we do not see how any one familiar with the New Testament teachings and with Christian history can doubt that revivals of religion, in which the interest of multitudes in spiritual things is simultaneously experienced, are greatly to be desired. Many of our older readers probably can remember such seasons. The people were hungry for the word of God, and there was no question of church attendance. Even those who had seldom crossed the threshold of a church were drawn by subtle influences to the sanctuary. There God's message found them and they responded to it. It was easy to speak with others about spiritual things. The very air seemed to be charged with gracious powers. In such revivals of religion our missionary societies, our theological seminaries, and our Christian colleges were born, and multitudes of souls entered upon the deathless career of sons of God.—*The Watchman.*

About the year 200, Tertullian uses this language: "But we, as we have received the tradition, on the one Lord's day of the Resurrection, ought to abstain . . . from all our ordinary cares and business employments, even putting off our business, lest we give place to the devil." This is the first hint in primitive Christian literature of any abstinence from work on the Lord's Day in the primitive Church. As such it is exceedingly valuable. It shows that, even in the days of persecution, devout men and women who had joined in "the breaking of the bread" and who had the great grace to be found like the writer of the Apocalypse, "in the Spirit on the Lord's Day," would be irresistibly withdrawn from their ordinary business on such occasions and would consequently desire on other subsequent Lord's Days to avoid their usual avocations. In the nature of things, however, this high state of spiritual exaltation must have been the rare and exceptional experience of a few persons of lofty Christian character and attainment. It was not expected of the average Christian, nor of any Christian at all times. The earliest code of canons in existence simply forbids fasting on the Lord's Day; and the Council of Gangra, which was held in the middle of the fourth century, decreed that if any one under pretext of asceticism should fast on the Lord's Day, he should be anathema; so strenuously did the primitive Church insist upon maintaining the joyous festival character of the day.

The Church Standard.

Mr. Hay tells us that the Monroe Doctrine needs a new interpretation; in fact, that it has been selfishly misinterpreted; that its primary intent was to be an application of the Golden Rule to the political affairs of the American continents. He evidently believes that Lord Canning had a good deal of ethical purpose when he suggested a reunion of the English and American people to resist despotism. Mr. Monroe, in his message, plainly assumed the position that we could not view "any interposition for the purpose of oppressing" the weaker governments on this continent "in any other light than as the manifestation of an unfriendly disposition toward the United States." As for any modern application of the Monroe Doctrine, it is not to be thought of any longer as a mere chip on the Yankee shoulder, but as a generous proclamation that we will see justice done to our neighbors. This is certainly a great stride ahead of that interpretation which enabled us to find excuse for robbing our neighbors of their territory because it seemed to be essential to the existence of our domestic institutions. We hope Mr. Hay will be able to keep the Monroe Doctrine where he has now placed it, and where it was originally intended to be placed as a great international principle, asserting arbitration, and the defence of the weaker by the stronger. As such it becomes the American Golden Rule.—*The Christian Register.*

Dr. Adolf Harnack, the German theologian who has recently written a book entitled "The Essence of Christianity," which has caused a lively discussion among German theologians, thus writes of "Jesus' attitude toward sickness:"—

"What the coming of the kingdom is we find hinted in the answer of Jesus to John's messenger, when he saw 'the blind receive their sight, the lame walk, the lepers cleansed, and the deaf hear, the dead raised up, and the poor have the Gospel preached to them. But in his contact with human suffering and misery Jesus is 'without a trace of weak sentimentality. He does not divide evil into classes and grades; he does not stop to ask whether the sick man deserves healing; he is far from sympathizing with pain or death in themselves. He never says that sickness is wholesome and evil salutary. No, he calls sickness sickness, and health health. All evil, all wretchedness, is for him something to be feared; it belongs to the great kingdom of Satan. But he feels within himself the power to heal and to save. He knows that progress is only possible when weakness is conquered and sickness healed.'"

This strange fact we discover not only with reference to our conduct, but also with reference to our thinking. Thus it has happened with some men that their thinking is of a much higher order than their living, while with other men their conduct in acts of charity, kindness, sympathy, and fraternal helpfulness stand beyond criticism, while their theological thought is flagrantly heterodox. Of this class may be named some of the prominent religious writers of our time—men who boldly assail the faith of the fathers and seemingly undermine the foundations of the Christian belief, but who yet are, apparently, men of sweet and lovable spirit and whose daily conduct in life among their fellows is above reproach. In them is an obvious contradiction of the accepted truth that, "as he thinketh in his heart, so is he." "While we recognize in ourselves this strange union, even at times antagonism, of forces, we ought to be better prepared, under the assurance of divine assistance, to keep our own thinking and living up to the standard which has been set for us in the example of the perfect man Christ Jesus.—*The Examiner.*

CLIMBING.—The Christian life is always an ascent. It is a daily climb out of the past, out of the worldly and the carnal in our hearts, out of sin and ignorance, weakness and littleness, up into the life and light and love of God. The true manhood comes both by the renunciation and the upward toil. Strength comes day by day, and courage increases and faith grows into patience and flowers into the assurance of hope. There are bright and happy things on the hills for patient soul-climbers. They are above the mists and clouds of unbelief, above the storms of earth, in the perpetual sunshine of the light of God's countenance. There is a wider view, a sweeter air, and then a rest that is everlasting.—*Central Presbyterian.*

LIVE IN THE OPEN.—It is both a daring and a dangerous thing to try to live secretly for Christ. It breaks off the sprouting tendrils of the new life, and so there can be neither bud, blossom, nor fruit. A light shut up tight in a lantern only soots and burns that which contains it. So it is with the soul. It is its nature to shine forth; but turned back upon itself it dims and dies. There are some in every congregation who are trying in a half-hearted sort of way "to be good." That is too indefinite. There are no sharp outlines to it. It does not mean anything that is humble or heroic. The result in almost every such case is disastrous.

E. P. INGERSOLL.

Rev. W. A. Stanton of Kurnool, South India, in an article written for the *Baptist Missionary Magazine* on the "Future of the Telugu Outcasts," who are the submerged tenth of India, being beyond the pale of Hindu society and having no social position, says of these people that within the last twenty-five years multitudes of them have been turned to Christianity. There is a church membership of seventy-five thousand, and a native Christian community of two hundred and fifty thousand.

The *Advance* has the following: We believe the Church is coming to herself and realizing that her work is not to be confined within church walls or limited to what are termed spiritual exercises. There is a revival of civic righteousness in which the Church is leading and must lead more and more.

We are generally too ready for the sake of peace to put a premium on ill temper, and to give the cross person the right of way. This is often cowardly and almost always a mistake. Ill temper should be gently resisted.—*Ladies' Home Journal.*

Don't try to hold God's hand; let Him hold yours. Let Him do the *holding* and you the *trusting*.—H. M. WEBB-PEPLOE.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa*.

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST. DEEP THINGS OF GOD. THE EGO. DEATH. SAVIOUR'S MISSION. SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER. SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents: $2.50 half dozen: $4.50 per dozen. Leather covers (pocket), $1.00 each: $5 00 half dozen: $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science: 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents: $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents: $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each: per dozen, $9: per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12: per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50: Six copies, $7.00: Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., Post Office as second-class mail matter.

Items of Interest.

A despatch was received from Sofia, Bulgaria, January 27, to the effect that the money for the release of Miss Ellen M. Stone and her companion, Mme. Tsilka, had been paid to the brigands and it was expected the captives would be speedily released.

September 3, 1901, a party of eighteen missionaries were captured by Bulgarian brigands while traveling in the mountainous country between Turkey and Bulgaria. Only Miss Stone, who first went out as a missionary of the American Board in 1878, and Mme. Tsilka, the wife of a minister, were held captives. Since that time the brigands have spent the time haggling over the ransom. They demanded more money than was raised. The first demand was $110,000, but they finally consented to take less.

Later reports are to the effect that the brigands had become frightened and fled with their captives. The ransom money has not been paid as was reported, and it is exected that negotiations with the brigands will be resumed in the near future. It is reported that Secretary Hay purposes to fix the responsibility for the failure of the negotiations to secure the release of the captives.

The Senate, without division, has passed a bill providing for a new cabinet officer to be known as Secretary of Commerce and Labor. The new secretary will receive a salary of eight thousand dollars and his standing will be the same as the other cabinet officers. There will also be an Assistant Secretary of Commerce and Labor with a salary of four thousand dollars.

If the bill becomes a law the President's cabinet will hereafter consist of nine members. Five of these were appointed by Washington, the Secretaries of State, of War, and of the Treasury, and the Postmaster-General, and Attorney General. The Navy Department was added in 1798, that of the Interior in 1849, and that of Agriculture in 1889.

The Senate has passed a bill increasing the salaries of Federal judges, by the terms of which they receive the following: Chief justice of the Supreme Court of the United States, $13,000; each associate justice, $12,500; circuit judges, $7,500; district judges, $6,250; chief justice of the Court of Claims, $6,125; each associate judge, $5,625; chief justice of the Court of Appeals, District of Columbia, $8,000; each associate justice, $7,500; chief justice of the Supreme Court of the District of Columbia, $6,750; each associate justice, $6,250.

A bill has also been introduced providing that the salaries of the Vice-President and Speaker of the House of Representatives be increased from $8,000 to $15,000, and of Senators and Representatives in Congress from $5,000 to $7,500.

Great Britain has announced her purpose to observe the policy determined upon by the United States with respect to the return to China, through the financial committee at Shanghai, to be disposed of as the Powers may decide, of any balance of its share of the indemnity in excess of adjusted claims. The amount of the indemnity agreed upon by the Powers was $337,000,000. The first monthly instalment of the indemnity amounting to $1,350,440 was paid individually to the commissioners of the Powers at Shanghai, February 1.

The Boston Museum of Fine Arts has placed on private view a superb collection of classical antiquities purchased in Europe by the Museum with the assistance of several of its friends. The collection comprises examples of marbles, bronzes, vases, gems, gold ornaments, glass, and terra cottas. Its collection of terra cottas is only outranked by the four great collections of Athens, Berlin, Paris, and London. As soon as possible the collection will be arranged for public exhibition.

The German imperial yacht Hohenzollern, with Prince Henry and his retinue on board, which left Kiel January 18 and touched at Gibraltar January 23, arrived at St. Thomas, Danish West Indies, February 6. From there she proceeded to Bermuda where, after coaling, she will run to New York. This roundabout course was taken in order that she might arrive in good order at New York, and was in accordance with the Emperor's wish.

Mr. Carnegie has presented to the Board of Trustees the deed of gift of ten million dollars for the new Carnegie Institute at Washington. The Board of Trustees have elected as president Daniel C. Gilman, late of Johns Hopkins University. The object of the institution is "to secure, if possible, for the United States of America leadership in the domain of discovery and the utilization of new forces for the benefit of man."

The Olympia, Admiral Dewey's flagship in the battle of Manila Bay, has just been placed in commission after undergoing extensive alterations covering a period of about two years and costing about half a million dollars. After receiving her official tests and compass adjustments she sailed for Lambert's Point to be in readiness to participate in the naval escort to Prince Henry's ship.

Governor Wood, Military Governor of Cuba, has sent a letter to each of the United States Senators, in which he states that the need for reducing the export duty on sugar at least one-third is imperative in order that the industry may be saved from ruin. It is reported that the Ways and Means Committee will submit a bill to the House offering some measure of relief.

The completed mural paintings of Edwin A. Abbey, depicting "The Quest of the Holy Grail," have been unveiled on the walls of the Boston Public Library. The work, comprising a series of fifteen canvases of great size and to which the artist devoted six years of his time, cost the city only $15,000, being practically a gift.

At the solicitation of Mrs. McKinley President Roosevelt has appointed George B. Frease postmaster of Canton, O. Mrs. McKinley wrote a personal letter to the President asking that the appointment be made. She felt sure that if her husband had lived he would have given the place to Mr. Frease.

The Venezuelan revolutionary steamer, Libertador (formerly the Ban Righ), erroneously reported to have been sunk at Porto, Colombia, by a Venezuelan government gun-boat, while undergoing repairs, has since put in at Cartagena, taken coal, and steamed away.

The House committee on census has reported a bill for the establishment of a permanent Census Bureau. The bill in its present form provides for the transferrence to the classified list of the entire census force. This is regarded by some as a blow at civil service reform.

The tenth annual meeting of the American Jewish Historical Society was held in New York City recently. Prominent Hebrews from all over the United States were in attendance and interesting papers on the doings of the ancient and modern race were read.

It is reported that the Chinese Court is considering the appointment of six eminent foreigners, expert specialists, as authorities respectively on international law and finance, and on military, naval, parliamentary, domestic, and governmental affairs.

The Senate has confirmed the nomination of Presley M. Rixey, U. S. N., family physician of the late President McKinley, to be chief of the Bureau of Medicine and Surgery in the navy, with the rank of Rear-Admiral.

The contract for the construction of the new Longueuil bridge which is to cross the St. Lawrence at Montreal, has been awarded to a New York construction company. The bridge is estimated to cost $6,000,000.

It is definitely announced that William Fife of Fairlee on the Clyde is to build Sir Thomas Lipton's next challenger for the America's cup. The Shamrock III. is to be ready early in the spring of 1903.

The Dowager Empress of China formally received the foreign ministers at the diplomatic reception January 28, 1902. Their credentials had been presented to the Court several days before.

The world's visible supply of cotton January 31, was 4,563,377 bales, against 3,361,700 bales last year at the same time. Of this amount the total of American cotton is 3,686,177 bales.

Resolutions which were adopted at a meeting held in the Isle of Pines urging the formal annexation of the island by this Government, have been presented to President Roosevelt.

A law passed by the Philippine Commission under the special direction of the Secretary of War gives that body the right to apply the Chinese exclusion act to the Philippine Islands.

The Postoffice Department has annulled the recent ruling requiring third class matter having on its cover the words "photo," "book," "printed matter," etc., to pay letter postage.

Leslie M. Shaw was sworn into office February 1 as Secretary of the Treasury to succeed Lyman J. Gage, resigned. This is the second change in President Roosevelt's cabinet.

By means of the newly invented Mergenthaler-Horton basket machine twelve thousand completed berry baskets are turned out a day or about twenty a minute.

President McKinley's birthday, January 29, was appropriately observed in many of the principal cities throughout the country.

Lord Kitchener reports the capture of General Dewet's last field gun, a considerable store of ammunition, and some prisoners.

The Pan-American Conference, which has for some time been in session in the City of Mexico, adjourned January 31.

The House has passed a bill increasing the pay of rural free delivery carriers from $500 to $600 per annum.

The Senate has passed a bill appropriating $2,500,000 for a post-office building in New York City.

Andrew Carnegie has been elected a member of the Reform Club of London.

Selected Articles.

Reply to a Review of Judge Ewing's Lecture.

Editor *The Macon News.*

In recent issues of *The Macon News* you published two replies by Rev. S. R. Maxwell to Judge Ewing's lecture on Christian Science which was given at the Academy of Music, January 16. The first reply, which appeared in the *News* January 17, was an effort at travesty; an effort to discredit through ridicule that which he could not answer through argument. The second reply, which appeared in the *News* January 20, was a more serious effort to discredit what Judge Ewing did say, which Mr. Maxwell virtually admits is unanswerable, by suggesting the things that he should have said.

The number and character of these replies can be partially explained on the ground that Mr. Maxwell had promised to review Judge Ewing's lecture before he knew what Judge Ewing was going to say; and it is only just to Mr. Maxwell, as well as fair to Judge Ewing and to the readers of the *News,* to state that Mr. Maxwell, on his own motion and responsibility, went so far as to have the advertising matter, announcing a reply to Judge Ewing, distributed in the lobby of the Academy of Music at the conclusion of the lecture.

Christian Scientists are pleased to note that Mr. Maxwell expressed himself in such friendly and complimentary terms in some of his references to Judge Ewing and the other Christian Scientists whom he had the opportunity of knowing, and they are especially happy to note that he finds no fault with anything Judge Ewing said; that he admits Christian Scientists heal the sick; that he concedes "their moral character is above reproach;" that he recognizes their loyalty and faithfulness to the teachings of their religion and to Truth as they understand it; and that he admires "their sweetness of disposition" as well as "their urbanity and general correctness of behavior." But every one who understands, loves, and demonstrates, even in a slight degree, Christian Science as it is, would protest against Mr. Maxwell's false conception of Christian Science. In fact, all genuine Christian Scientists recognize that if the fundamental doctrines of Christian Science were what Mr. Maxwell conceives and represents them to be, he would be justifiable in criticising them even more effectively than he does.

As John Stuart Mill has so truthfully observed: "Every question that has God in it passes through three stages: ridicule, discussion, adoption;" and it is a joy to recognize that Mr. Maxwell is beginning to pass from the first stage into the second. As Christian Scientists have little time and disposition to answer ridicule in terms of ridicule, and as only those who have reached the stage of earnest and honest investigation of Christian Science can be very much benefited by any discussion of the subject, I shall deal as briefly as possible with Mr. Maxwell's travesties and efforts at ridicule, and give my attention to the serious consideration of his misconceptions of Christian Science, and to the difficulties which he raises that seem to stand in the way of those who honestly desire to know what Christian Science is, and what it has done and can do to overcome the world, the flesh, and the devil.

However, I cannot allow Mr. Maxwell's travesty on Christian Science to go unrebuked, as nothing could be more manifestly unjust than to associate in any way the pure spirituality and lofty Christian ethics of Christian Science, with the doctrines and practices of Mormonism; and nothing could be more out of harmony with a decent regard for the purity, chastity, beauty, and elevation of Judge Ewing's lecture than to make a parody on it in terms of that which is so unlike it at almost every point.

While it is true that a certain measure of prosperity has followed the Mormon church, and while it is true that the Mormons claim the power to heal the sick, I am reliably informed that they do not try to exercise such a power in any marked way, and that they even abstain from the use of tobacco on the ground that it was meant to be used as a medicine. The distinctive feature of Christian Science is healing the sick and reforming the sinner through the understanding of the divine Mind or the Mind which was in Christ Jesus, while the distinctive feature of Mormonism is, according to the Supreme Court of the United States as well as the instinctive judgment and virtue of all Christian people, "a crime against the enlightened sense of mankind."

All Mr. Maxwell's references to Christian Science as a "system of commercial Christianity," are misleading; and every argument which he advances to prove that "the methods adopted by Christian Science demonstrators in healing are different from the methods of Christ and the Apostles," may be used with even more telling effect, to prove that an even greater difference exists between the methods adopted by modern preachers of the Gospel and those employed by Jesus and the Apostles. For example, Mr. Maxwell's leading argument in support of his contention, is that Christian Scientists charge a regular fee for healing, and that "Christ and the Apostles cured gratis," while there is no more evidence that Jesus and the apostles "cured gratis" than that they preached the Gospel gratis.

Now, if Christian Scientists, because they receive a small fee for healing and preaching the Gospel from those who are able and willing to pay it, and gladly give the same service to those who are not, are to be condemned for departing from the methods and instructions of Jesus, what is to be said of the Christian minister who receives a much larger compensation for preaching the Gospel, without even trying to carry out the equally imperative command of Jesus to heal the sick? And if Christian Scientists be required to heal as successfully and to do all the mighty works which Jesus did, before they are entitled to call their religion the religion of Jesus Christ, then should not the ministers of other denominations be required to preach as Jesus did before they are entitled to call their ministry his ministry?

Christian Scientists, however, recognize that it is perfectly legitimate for all Christian ministers and religious workers to receive a reasonable compensation for their services, and that it is absolutely necessary for them to receive enough to enable them to carry on their spiritual work. But that Christian Scientists are not actuated by mercenary considerations is proven by the fact that those who under-

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

stand and accept Christian Science are ready to make any financial sacrifice for the extension of this healing and redemptive Gospel; that a majority of the Christian Science practitioners work for a mere pittance compared to what their talents would command in other fields of activity; that they do much of their work gratis; and that they spend their modest incomes for the extension of the Kingdom of Good among men.

Mr. Maxwell misconceives and consequently misrepresents the Christian Science attitude toward the Bible at almost every point; and nearly all his references to "Science and Health with Key to the Scriptures" are misleading and unjust.

Christian Science is based upon the inspired Word of the Bible, which it interprets spiritually, and Christian Scientists claim for the Bible everything, and even more than other Christians; for it is their source of life, harmony, health, and salvation. Science and Health, instead of taking anything from the Bible or reading into it anything it does not already contain, is an interpretation of its original spiritual meaning, which unlocks and restores its health-giving, life-giving, and soul-saving power. The Bible also has a much larger and more significant place in a Christian Science sermon, than in the sermons of most Christian ministers; and Science and Health no more takes the place of the Bible among Christian Scientists, than commentaries and sermons do among other Protestant churches. Therefore, Mr. Maxwell's nine propositions being based upon his erroneous concept of the Christian Science attitude towards the Bible and Science and Health, no more prove his contention against Science and Health, than they prove that no more commentaries should be written to interpret the Bible and no more sermons preached to explain it.

Christian Science, instead of being a sect in the ordinary sense of the term, is the Christian faith of the Christian Churches, advanced to Christian Understanding or Science; and, instead of creating divisions, it reveals the only possible basis of Christian union; the basis of Truth, not error; Science, not opinion.

Because Christian Scientists find more life, health, joy, song, and salvation in the Bible through Mrs. Eddy's interpretation of it, than through the commentaries and sermons of other authors and ministers, they naturally love and honor the Leader of the Christian Science movement; but to the degree that they are loyal and true to Mrs. Eddy, they are just what their name indicates,—Christians who understand that the religion of Jesus Christ is universal, necessary, demonstrable, and Scientific Truth; and to refer to Science and Health as "the Bible of Eddyism" is as inappropriate as to refer to the writings of Alexander Campbell as the Bible of the Campbellites.

Mr. Maxwell also does Christian Science, as well as Mrs. Eddy, a grave but an unintentional injustice, by quoting a number of things as coming from Mrs. Eddy and other genuine Christian Scientists, that are among the most serious and misleading perversions of Christian Science. I refer to that part of Mr. Maxwell's sermon where he "challenges Christian Scientists to show the chapter and verse where such expressions as these are found." However, it is only just to Mr. Maxwell to state that he was betrayed into this error by quoting from an article on Christian Science in the International Encyclopedia, which attributes to Christian Science doctrines that are the very antipode of genuine Christian Science; and it is through the kindness of Mr. Maxwell that I am in possession of the information which exonerates him from any intentional injustice in the matter.

It is very significant, however, to find that the quotations that Mr. Maxwell enlarges upon, in order to ridicule and condemn, are the ones which misrepresent both the letter and the spirit of Christian Science. I refer most especially to all the quotations and explanations referring to mental healing and the Holy Spirit in terms of "nervous energy," as well as to some of the references to Christ.

Now, as to the quotations from Science and Health and to the other writings of Mrs. Eddy, I wish to say that these are excerpts out of their normal and explanatory setting, and they need their context in order to reveal their true meaning and import. It is also necessary in interpreting Mrs. Eddy as well as all other spiritual writers, to take into account their special use of terms. For example, the statement that Mr. Maxwell quotes from Mrs. Eddy, "Man cannot depart from holiness," and the seemingly contradictory statement from St. Paul, "Let him that thinketh he standeth take heed lest he fall," refer to different men; Mrs. Eddy's statement referring to the man who is born of God, while Paul referred to the man that is born of the flesh. And so Mrs. Eddy's statement that "Man cannot depart from holiness," means the same thing as the statement from 1 John, 3 : 9: "Whosoever is born of God doth not commit sin; for his seed remaineth in him: and he cannot sin, because he is born of God."

Another leading misconception of Mr. Maxwell's criticism of Christian Science is his failure to understand what Christian Science means by the real and the unreal, and in what sense Christian Science denies reality to the material universe, sin, sickness, Satan, and all his works.

According to Christian Science that only is real which is God-created, God-approved, and God-sustained; that which is like God and His spiritual creation, "good and very good;" and that which is the opposite of God—Satan, materiality, sin, sickness, and death—is not real in the sense that God and His creation are real. In fact, all the opposites of God are unreal, because they are not of Him; they are unreal because temporal and temporal because unreal. But they will become unreal to us as fast, and only as fast, as we have Christ, "God with us," as the Way from the unreal to the Real, from evil to Good, from Satan to God, from matter to Spirit, from human discord to divine Harmony, and from the sense of finite death to infinite Life.

Therefore, Christian Science does not deny Satan, the material universe, sickness, and death in the way that Mr. Maxwell says it does. It recognizes that they are much more than the product of the human imagination; that they are as real as anything can be to the carnal mind and to the physical senses. And Christian Science in no sense denies reality to the external universe, the body of man, or anything that God ever made. It simply denies in order to overcome the false, material, sensuous, and sinful way of looking at God and His creations; and in all its denials it looks to the passing away of the old material conceptions of the heaven and the earth, in order to bring to light "the new Heaven and the new Earth" of Isaiah and St. John: "wherein dwelleth righteousness," and where there is no more sea, no more sin, no more pain, and no more death. And the doctrine that all that really and eternally exists is Spirit and spiritual, Mind and mental, God and goodness, is the truth in which nearly all the great thinkers and best livers have finally rested; the truth of the Bible and the truth which Jesus completely demonstrated through his control over matter, and all its so-called laws, and in his victory over Satan and all his works.

As to the contention of Mr. Maxwell, that Mrs. Eddy has based Christian Science upon the deductions of Berkeley, and other philosophical idealists, I wish to say that while nearly every great philosophic thinker, from Plato to Emerson, has interpreted the material universe in terms of mind or spirit, the distinctive feature of Christian Science—its Divine or purely Spiritual Idealism as set over against human, pantheistic idealism—comes from the spiritual interpretation of the Bible and not from the philosophers. And the practical idealism of Christian Science—the application of the truths of the divine Mind, in the Christ-

Digitized by Google

way, for the overcoming and destruction of sin, disease, and death—is something human philosophy has never been able to understand or to demonstrate.

While Mrs. Eddy is a woman of superior culture, her life, temperament, work, and education connect her with the school of prophets and spiritually illuminated seers, rather than with the schools of human philosophy and of material science. As Mrs. Eddy said in her last annual "Message to the Mother Church," pp. 36, 37:—

"Christian Science is more than two hundred years old. It dates beyond Socrates, Leibnitz, Berkeley, Darwin, or Huxley. It is as old as God, although its earthly advent is called the Christian era.

"I had not read one line of Berkeley's writings when I published my work, 'Science and Health,' the Christian Science text-book.

"In contradistinction to his views, I found it necessary to follow Jesus' teachings, and none other, in order to demonstrate the Divine Science of Christianity—the metaphysics of Christ—healing all manner of diseases. Philosophy, *materia medica,* and scholastic theology were inadequate to prove the doctrine of Jesus, and I relinquished the form to attain the spirit or mystery of Godliness."

As to Mr. Maxwell's insistence that water baptism, as a symbol of spiritual baptism, which Jesus only "suffered to be so now," should continue forever, I wish to suggest that while John baptized with water, Christ baptized with the Holy Ghost, and that the true baptism which water baptism symbolizes, is "a purification from all error" (Science and Health, p. 340).

And as to the material symbols of communion, I wish to suggest that I can see no more reason why they were meant to be perpetual than the rite of foot washing; and as Mrs. Eddy says, "Our eucharist is spiritual communion with the one God. Our bread, 'which cometh down from heaven,' is Truth. Our cup is the cross, our wine the inspiration of Love,—the draught our Master drank, and commended to his followers" (Science and Health, p. 340).

As to Mr. Maxwell's contention that Christian Science heals "by rousing the resident forces of the mind through blind faith," we maintain that Christian Science healing is more than faith-healing because it is spiritual understanding or Science; and that the Christian Scientist brings to the mind of the sick and sinful the Allness of divine Life, Truth, Harmony, and Love, and teaches the patient how to turn from thoughts of sin, sickness, and self to behold, "as in a glass the glory of the Lord," and to be "changed into the same image" and likeness. And that which heals sickness in Christian Science practice, is wholly different from the systems of blind faith and mortal mind cure—it is the divine Mind or the Christ Mind as opposed to the mortal or the human mind, the spiritual Mind or "life and peace," as opposed to the carnal mind of sin and death; the Mind whose fruits are "love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance;" the Mind whose thoughts are of "whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report."

As to Mr. Maxwell's implied contention that Christian Scientists are much better than their Science, that, while the lives of Christian Scientists are pure, and relatively blameless, he purposes to wage a war upon that which produces such fruits in its followers, Christian Scientists refer Mr. Maxwell to the simple logic of Jesus, "Ye shall know them by their fruits;" and Christian Scientists are ready and willing to be known by this test. While they do not claim to have already attained to anything like perfection, and while they frankly and humbly acknowledge their failures and limitations, they are following to the best of their understanding, the commandment of Jesus to heal the sick as well as to preach the Gospel; and they are earnestly working and praying for more of the "fruit of the Spirit" and for "the Mind of Christ;" and those who would hinder their ministry of Christian healing, comfort, reformation, and regeneration, should at least ponder well the wise counsel that Gamaliel gave to those who "were filled with indignation" because the early Christians healed as well as preached in Christ's name (Acts, 5 : 38, 39); and let them also remember that there are things which are hid "from the wise and prudent" that are "revealed unto babes;" and that only those who do the healing and redemptive work of Christian Science are competent to expound its doctrines.

Reply to Professor Terry.

To the Editor.

Professor Terry's criticism of Mr. Kimball's lecture on Christian Science is alive with honesty and sincerity of purpose; therefore it is a matter of regret that he failed to recognize the premise from which the lecturer argued; viz., God is omnipotent, the only creator,—a premise which receives the assent of every Christian. With that premise admitted, it is logical to maintain that sin, sickness, and death are not real unless they are of God's creation, and a God who creates sin, sickness, and death cannot be wholly good unless sin, sickness, and death are good. If sin, sickness, and death are real and not God's creation, there must of necessity be another creator—a statement which denies the omnipotence of God and is abhorrent to every Christian when its full import is understood. Whoever believes that sin, sickness, and death are real, worship a base God, if he worships a God at all, or he denies the omnipotence of God. Has any one but a Christian Scientist since the time of Jesus and the early Christians believed that evil, sin, sickness, and death are unreal? Then why say that Mr. Kimball's statement that the world has been worshiping a bad God is untrue?

Professor Terry is right in saying that the great fundamental truths that God is Spirit, Love, Light, Truth, Wisdom, Power; that He is holy and just and good, are not original with Mrs. Eddy. She never claimed that they were original with her, neither have her followers made such claims. It may be noted in passing that none of these "fundamental commonplaces of Christianity" are consistent with the belief that evil, sin, sickness, and death are real, unless the omnipotence of God is denied.

The statement that Christian Science "often speaks in pantheistic mysticism," is a mistake. The following tenets of the denomination, copied from "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, have no taint of pantheism:—

1. As adherents of Truth we take the inspired Word of the Bible for our guide to eternal Life.

2. We acknowledge and adore one Supreme Infinite God. We acknowledge one Christ, namely, the Holy Ghost or divine Comforter; and the son, Christ Jesus,—man in the divine image and likeness.

3. We acknowledge God's forgiveness of sin in the destruction of sin, and the understanding that sin and sickness are neither real nor eternal.

4. We acknowledge atonement as the efficacy and evidence of divine Love, of man's unity with God, and the great merits of Christ Jesus, the Way-shower.

5. We acknowledge universal salvation as demonstrated by the Galilean prophet, in the power of Truth over all error, sin, sickness, and death; and his resurrection, whereby human faith and understanding are enabled to seize the great possibilities and living energies of divine life.

6. We solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and *pure.*

Wednesday Evening Meeting at Sioux City, Ia.

In the first testimony given, a mother told of the inestimable value of Christian Science in caring for her children, especially in destroying her fear of the power of food to make them sick. She had seen many claims of sickness destroyed for them with the denial of error and the affirmation of Truth.

Another lady said that in reading of the man who was "sick of the palsy" she was reminded of an experience when she had just been healed in Christian Science. Her heart was so full of gratitude and joy that she went to see a friend who had been bedridden for years. She told her that she, too, could be healed, and urged her to see a healer as soon as possible. But after she had gone, the woman rose, dressed herself, straightened her room, threw away her medicines, and, a few hours later, was found reading the copy of Science and Health which the speaker had left, and she was indeed "healed in that self-same hour."

A lady recalled her experience of several years ago when she was dependent on a little box of drugs that she kept always with her; but now she had replaced these gods with the one God, Truth, and every day increased her gratitude for the revelation of Christian Science, which shows God to be the only source of strength.

A little boy sweetly recited the poem at the close of our Leader's last "Message to the Mother Church."

A lady spoke of the great benefit that her children had derived from their instruction in Sunday School, and told how one little boy had broken up a quarrel at school with his understanding of Christian Science.

A gentleman said that he was glad of having done his duty in attending a business meeting of the church one night recently. It was necessary for him to return some distance and finish his day's work late, afterwards, but the sacrifice was cheerfully made and, while at the meeting, he received just the thought which enabled him to overcome quickly a sudden and severe attack of pain which appeared the next day.

A lady testified to the great comfort and strength she had received, when trials came, from reading in "Miscellaneous Writings" by Mary Baker G. Eddy, the article, "Heart to Heart," where she brings to our thought the spiritual meaning of "rock" and "feathers" in these words, "How blessed it is to think of you as 'beneath the shadow of a great rock in a weary land,' safe in His strength, building on His foundation, and covered from the devourer by Divine protection and affection."

And so we find the power of Christian Science being demonstrated in all ways, and we are beginning in a small degree to understand and follow our dear Leader where she says (Miscellaneous Writings, p. 207), "Drink with me the living water of the spirit of my life-purpose,—to impress humanity with the genuine recognition of practical, operative Christian Science."—Adah M. Jandt.

Testimonies at Dayton, O.

A recent number of the *Dayton Weekly Herald* contains the following account of testimonies given at a Wednesday evening meeting of the Christian Scientists there:—

A gentleman stated that his brother had recently returned from the West and spoke of a demonstration. The daughter of a mine superintendent had spinal trouble. The physicians where he lived being unable to relieve her, she was taken to California where a further medical trial was given. She was placed in a plaster-of-paris cast, but continued to grow worse. Finally Christian Science aid was sought and the child was restored to perfect health.

Another gentleman spoke of the healing that had occurred in his family through Christian Science. He had always been accustomed to keep a supply of whiskey in the house to use in case of a certain illness of his wife. She was not feeling well, and noticing that the whiskey bottle was almost empty, and in order to be prepared for what he thought would be a "time" with her that night, he started for more whiskey, but she told him not to go. He was not aware that she had commenced taking Christian Science treatment. Suffice it to say that she did not have the much-expected spell, and has enjoyed good health since then, five years ago.

Then he told of the healing of a daughter of consumption of the bowels; of the healing of a second daughter in the East, and still a third daughter in London who had failed to get relief in both America and England, until she found it in Christian Science.

A third gentleman said he desired to speak of three demonstrations: The first a man who was healed of the use of tobacco and intoxicating drinks by attending our public services; a second was that of a man having all the symptoms of typhoid fever. His condition was very alarming, but in a few days under Christian Science treatment he was able to be at his accustomed place of business.

A third demonstration was that of a young lady who had been a sufferer for fourteen years, and sought relief in many ways. She was under the care of seven different physicians, and took many patent medicines. The doctors advised a surgical operation as the only hope of restoration to health. To this she assented, and was left in a critical condition, being obliged to use crutches for eight months. Having spinal trouble it was even difficult to walk with crutches on her first visit to the reading room, that is, walk from the street into the room. The tenth day thereafter she walked without her crutches or any assistance. A complication of troubles has gradually disappeared under the Truth, and she is to-day well, a marvel to her parents and many friends; another beautiful testimony to the Christ-Truth.

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

Dreaming or Waking.

BY W. J. S.

DREAMING or waking I know not,
I heard or seemed to hear,
A sound like unseen singers,
Chanting an evening prayer.
The words are lost, forgotten
In that joyous and glad refrain,
Of "Glory to God in the highest,
And peace on earth toward men."
It flooded the earth with music,
The stars caught it up, and then,
A sound came out of the heavens,
Like a loud, responsive Amen.

Dreaming or waking I know not,
I saw in the east afar,
A shadow like a cross beneath
A bright and rising star;
Yet while I looked, that shadow,
It seemed to fade from view,
And in its place there seemed to hang
A crown of golden hue.
And then again those singers
Shouted their glad refrain.
That echoed to earth from Heaven,
I heard it again and again.
All nature seemed thrilling with music,
The stars together did sing,
Their voices seemed chanting Hosanna,
Hosanna to Christ the king.

Dreaming or waking I knew not,
Around me all was still;
Again I saw that shadowy cross,
Upon a lonely hill.
The darkness grew oppressive,
My soul was filled with fear,
And sounds like many weeping,
Fell on my listening ear.
I heard from out the darkness,
A voice that thrilled me through,
Praying, "Oh Father, forgive them,
They know not what they do."
And then I heard one speaking,
In accents low to me,
Be not afraid, oh mortal,
'Twas thus Christ prayed for thee.

There has been issued in Great Britain, "The New Testament in Braid Scots," being a version in the old, time-honored language of the Scots, still spoken in many districts. It is by Rev. William Wye Smith, of Toronto, the editor of Funk and Wagnalls' Standard Dictionary, and now eighty-six years old. A sample of its style may be found in its rendering of Matthew, 6 : 25, "Therefore I say unto you, Take no thought for your life, what ye shall eat, or what ye shall drink," etc. In the Broad Scotch version it reads thus:—

"Whar for say I t'ye, Be-na sair fashed with cark and care anent your life—what ye are to eat and what ye are to drink!" v. 31—"Sae be-na sair trauchilt i' your mind, saying, What sal we eat? or what sal we drink? or hoo sal we be cleedit?" v. 33—"Hae thou nae wearin' care anent the day to come: for the morn will hae care o' its ain. Eneuch for the day is its own ill."

Here are the opening verses of the fourteenth chapter of John's Gospel.

"Be ye no cuisten down in heart. Ye lippen on God, lippen on Me as weel. My Faither's hoose has many bowers; if no', I wad hae tell't ye. I gang to busk a place for ye, sae come I again, and take ye to Mysel'; that whaur I bide, ye may bide."

NEW EDITION OF SCIENCE AND HEALTH.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution.

Notices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Change of Price.

On and after January 10, 1902, the price of the Church Manual will be as follows; One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Christian Science and Universalism.

The Universalist Leader for February 1, publishes an able and interesting sermon by the Rev. A. H. Laing, D.D., from the text, "And the Word was made flesh, and dwelt among us" (John, 1 : 14), wherein the Doctor makes some comparisons between Christian Science and Universalism as represented by the Universalist Church. In his introductory remarks he states his definition of the "Word," part of which we quote:—

"The 'word' here spoken of represents the Christ spirit, the divine mind, the heavenly character; and it became an effective force for the world's moral uplifting when it was incarnated in the person of Jesus of Nazareth. Perhaps, in some inferior sense, it had found an embodiment in the prophets and saints of an earlier age; but it reached its full disclosure of strength and beauty only in him who is called 'The Prince of Peace.' In him all the high qualities of human nature—gentleness, sympathy, patience, and filial devotion—were merged into the heavenly and divine. He was so far free from the limitations of race, latitude, and tradition; a character so self-consistent and finished, and a personality so universal and inclusive, that the world has recognized him as the Son of man and the Son of God; an exponent of what man ought to be and of what God is."

Doctor Laing further says:—

"New ideas, however radical and revolutionary, are entitled to fair treatment; and justice, rather than charity, is the right of every one who is honestly walking in what he believes to be the way of life.

"With this rule in mind I purpose to discuss that new movement in the religious world which goes by the name of Christian Science, and to inquire into some of its relations to the thought of our own church. First let us consider the distinctively religious features of the subject. For any Universalist to object to any doctrine of the system which is not involved in the term 'science,' would be, to the last degree, captious and unreasonable.

"Christian Scientists are all Universalists in their denial of the eternity of evil, their belief in the unity and everlasting beneficence of the divine nature, and in the emphasis which they lay upon love as the saving force in the great work of human redemption. They repudiate the material or substitutional idea of the atonement, and teach that salvation consists in a life of truth and love. The trend of Mrs. Eddy's teaching is all in favor of Unitarianism as opposed to the Trinitarian idea; and in support of the paternal rather than the magisterial conception of the providence of God. She lays the emphasis where Jesus laid it,—on the divine Fatherhood and the eternal beneficence. And in simple candor it must be confessed that her disciples are a zealous and earnest body of believers who accept the Scriptures as their sole guide in matters of faith and practice, and as a class they are not irreverent or indifferent. They get the good out of their religion because they constantly cultivate a taste for it, and while zeal is not always an evidence of truth, yet truth without zeal must fight a losing battle. In its spirit, an' in its dealings with the spiritual nature of man, I have little fault to find with Christian Science. Some of its truths are immensely important, and as a reaction against the gross materialism of a few years ago, its rapid growth is very significant. It is something more than an illustration of the fact that one extreme follows another; for, in this instance at least, the later extreme is a great improvement upon the former. If either nature is to be exaggerated at the expense of the other, let it be the spiritual rather than the physical."

The following from the Christian Science text-book, "Science and Health with Key to the Scriptures," fairly expresses, in a few words, Mrs. Eddy's views upon Unitarianism and Trinitarianism:—

"Life, Truth, and Love constitute the triune Person called God.—that is, the triply divine Principle, Love. They represent a trinity in unity, three in one,—the same in essence, though multiform in office: God the Father; Christ the spiritual idea of Sonship; divine Science, or the Holy Comforter. These three express in divine Science the threefold, essential nature of the Infinite. They also indicate the Principle of scientific being, the relation of God to man and the universe" (Revised Edition, p. 331).

This, of course, does not mean a personal trinity in the sense that there are three persons embraced in one person, as the term person is humanly applied. Yet it defines at once the Trinity and Unity of the Godhead, but the idea of an anthropomorphic or physical personality is eliminated.

If our Universalist friends accept this definition of the trinity and unity of God, Christian Science and the Universalist Church are in agreement upon the doctrine of the Trinity.

It is true that Mrs. Eddy strongly lays the emphasis of the divine Fatherhood of God where Jesus laid it. She teaches the paternal rather than the magisterial conception of God. She teaches even more than this. The maternity of God is included in her teaching. The, at once, Fatherhood and Motherhood of Deity is basic in her teaching. This conception is deduced from Genesis, 1 : 27: "So God created man in his own image, in the image of God created he him; male and female created he them." The true image must reflect the Maker or Creator. This reflection, or image and *likeness* includes maleness and femaleness, in the true, spiritual sense. Hence the paternity and maternity of God. We are not aware that our Universalist friends take issue with this conception of God. The definition of "Father" given in the glossary of the Christian Science text-book is, "Eternal Life; the one Mind; the divine Principle, commonly called God." The definition of "Mother" is, "God; divine and eternal Principle, Life, Truth, and Love."

Here truly is a grand conception of the "eternal beneficence" of God—the Father-Mother, Life, Truth, Love; a full Godhead, a trinity in unity—the All-in-all of the Scriptural God.

Christian Scientists deeply appreciate Dr. Laing's kindly reference to their lives and religious zeal. Their zeal, however, is born of deep conviction. They cannot help being zealous. God has been revealed to them in such fashion that they feel a *oneness* with Him which they had deemed impossible this side the veil. They can sing with a greatly increased consciousness of its truth as a realized fact, rather than a hope that it may be so, "Nearer, my God, to Thee, nearer to Thee." This deep conviction and realization comes not only from a heightened spiritual sense, but from the practical, and often startling, evidence of God's nearness manifested in the healing of sin and sickness in themselves and others.

Dr. Laing, after some further commendatory remarks upon the Christianity of Christian Science, turns his attention to the "Science" side of the question. He says: "Her [Mrs. Eddy's] form of religious belief as distinguished

Digitized by Google

from science is simple and of easy application. But of the 'science' feature as much cannot be said."

His criticism is chiefly that her system is deductive instead of inductive, which, he says, is contrary to the scientific method, and is the reason why students of science have had so much difficulty in understanding Mrs. Eddy's writings. This criticism, though fair and kindly in its terms, involves so much that we cannot consider it now for want of time and space. We shall endeavor to make it the subject of another article. Meantime, we submit to our friend whether, after all, it is not truly Scientific to lay the premises in Creation and deduce the created therefrom; in Spirit and deduce the phenomena of matter therefrom; in God and deduce the universe and man therefrom, rather than the reverse. This is what Mrs. Eddy does, and herein, as the students of her system think, she has sounded the very key-note of the true method of Scientific reasoning. Surely it was the method of the Bible writers, and the Bible is *the* Scientific Book of the world. It was Jesus' method, and he was *the* Scientist of the world.

The Prayer of a Dyspeptic.

IN reply to inquiries we say that the supposed prayer of a dyspeptic which has been published in some medical and other publications as a Christian Science prayer, is not a Christian Science prayer at all, nor does it bear the slightest resemblance, in form or substance, to anything pertaining to Christian Science. If it is not wholly fictitious, it is copied from something which has no relation whatever to Christian Science.

If the editors of medical journals and other publications would take but a tithe of the pains to ascertain what Christian Science prayer is that they do to hunt out falsities which they think will answer their purpose in attempting to belie and ridicule Christian Science, they would place themselves in a much more favorable light before the general reading and thinking public, to say nothing of the many thousands of intelligent people who know at a glance that they are falsifying.

They can do this by casting their eye even hastily over the chapter on "Prayer" in the Christian Science text-book, "Science and Health with Key to the Scriptures,"—one of the grandest and most rationalistic explications of prayer extant.

The Lectures.

At Montgomery, Ala.

The Montgomery Theatre was filled Sunday afternoon, January 26, with those who were anxious to hear the "other side," on the question relating to Christian Science, and its teachings.

The lecture was given by First Church of Christ, Scientist, which hold services at 16½ South Perry Street, and they consider their efforts rewarded by the large and cultured audience and the close attention the lecturer, Hon. William G. Ewing, received from them.

Judge Ewing is a member of the Christian Science Board of Lectureship of the Mother Church of Boston; and had for his subject, "Christian Science: Physician and Redeemer." Ex-Governor Thomas G. Jones, who was recently appointed to a Federal judgeship—being President Roosevelt's first Democratic appointee—introduced the speaker in the following words:—

Ladies and Gentlemen:—One of the best tests of the civilization, to say nothing of the religion, of a people, is their attitude toward those who differ honestly from them as to any old or received creed of human conduct.

Disagreeing widely, as I and perhaps many others of the audience do, from the beliefs of the speaker of the evening, if we correctly understand them, there is yet a common bond which unites this audience—that of respect and esteem for those who with unselfish purposes consecrate themselves to beliefs and works which have for their motives the uplifting of mankind, however much their advocacy may assail cherished opinions and beliefs of our own.

Discussion is the mother of just conclusions. The moral courage of those who unfold and uphold the faith of Christian Science which, at times, brings upon its adherents so much of intolerance, sneers, and ridicule, and separates them so widely from the beliefs of the masses of the people among whom they live, has a value to the community which reaches out far beyond the occasion which calls it forth.

We have with us this evening a distinguished man, sprung from the loins of the South and allied to it by ties of birth and association. He is a worthy member of a great family which has often illustrated all that is good in American citizenship in peace and war and civic struggles, and who himself has adorned the jurisprudence of our common country. I have the pleasure of introducing to you Judge Ewing of Chicago.

The Montgomery (Ala.) *Advertiser.*

At Decatur, Ill.

One of the most intellectual-looking and best-appearing audiences that has assembled in the Opera House in a long time was there Sunday afternoon, January 26, when Edward A. Kimball of Chicago delivered a lecture on Christian Science. The parquet and a part of the dress circle and balcony were filled. There were in the house men and women from St. Louis, Mattoon, Sullivan, Terre Haute, and other cities, and their appearance showed that they were of the best people of their towns.

The lecture was interesting, for although it was an hour and twenty minutes long there was no sign of weariness, and many who were there expressed regret that it was not longer. The subject was "Cause and Scientific Cure of Disease."

Mr. George C. Kinsman, superintendent of telegraphs of the Wabash Railroad, presided, and introduced the lecturer, saying:—

Ladies and Gentlemen:—On behalf of First Church of Christ, Scientist, I extend to you a most cordial welcome. Your presence is in full accord with the spirit of the times. Thinking people everywhere are reaching out for the Truth. Nineteen hundred years ago one whose name is honored in Scripture left this message: "Ye shall know the truth, and the truth shall make you free."

To be free from sickness and pain, from sorrow and want, free from all that darkens the thought and hides the sunshine, is the universal wish to-day.

Christian Scientists believe in the Bible. They accept literally its statements that man was created in the image and likeness of God and given dominion over the earth. In other words, they believe in the reality of spiritual things. Paul said "the things which are seen are temporal; but the things which are not seen are eternal." The truth of this statement is by the logic of material events being forced upon our consciousness day by day with ever-increasing power.

Christian Scientists have a message of joy, a Principle which when applied in all its fulness and beauty makes for health and harmony, for business prosperity and for sunshine and love in the home.

Ladies and gentlemen, I take pleasure in introducing an official member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., Mr. Edward A. Kimball of Chicago.

The Decatur (Ill.) *Review.*

Digitized by Google

At Racine, Wis.

Guild Hall was comfortably filled Tuesday evening, January 28, 1902, with an eminently intelligent and well-dressed audience and the ladies and gentlemen were about equally divided in numbers. The occasion was an address on Christian Science by Edward A. Kimball, C.S.D. From start to finish the adherents of the faith given to the world by Mary Baker Eddy, as well as those not adherents, paid the very closest attention to the speaker.

Mr. William Van Arsdale, First Reader of First Church of Christ, Scientist, introduced the speaker. He said:—

Ladies and Gentlemen:—On behalf of First Church of Christ, Scientist, of our city, I am glad to express the great pleasure its members feel in giving to you to-night a Christian Science lecture. These lectures are given that some of the misunderstandings and misconceptions regarding Christian Science may be corrected.

This Science has brought into many of our homes health, happiness, and peace, and every beneficiary in this Truth feels a desire to give to his friends, neighbors, and fellow-citizens the glad tidings of health and love.

Christian Science is no longer looked upon in our city as a questionable fad or a dangerous theology, and the justice and tolerance which has characterized the press and people of our fair city is appreciated by those who claim simply the right to worship God as conscience dictates, and the privilege of putting into practice the teachings and examples of the Master.

We would extend our heartiest welcome to all present. However different may be our opinions on some subjects, we know we all have one common desire; that is, to know more of Truth.

We are fortunate to have with us one who has a knowledge born of experience in Christian Science work, who will speak to us upon the subject "The Cause and Cure of Disease."

Let me now present Mr. Edward A. Kimball, member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston.

The Racine (Wis.) *Journal.*

At Quincy, Ill.

The Christian Science cause received a decided impetus from the wise, judicious, impressive, and convincing presentation of their claims and beliefs given by Edward A. Kimball, the Chicago lecturer, Friday evening, January 24. Empire Theatre was well filled with a thoughtful, intelligent audience. They gave the closest attention for an hour and a half to the speaker, and went away with some substantial material for thought, regardless of the acceptance of the belief as expounded.

Mr. Kimball speaks without any gymnastics, either physical or mental. He enunciates distinctly and without apparent effort, and his sentences impress the listeners as forceful and emphatic. His language is simple, chaste, vigorous English. His thought is presented logically, connectedly, ably. He talks right on, hardly elevating or lowering his voice, but every sentence drops with an earnestness that is an evidence of his personal conviction of its truth, which cannot but bear weight.

His address last night was one of the best ever heard in Quincy, in so far as it appealed to the thoughtful and serious minded. There was just a trace of humor running through it, relieving at times the sombreness of the thought.

Mr. Kimball was introduced by Mrs. Martha I. Lambert, First Reader of First Church of Christ, Scientist.

The Quincy (Ill.) *Herald.*

At Braintree, Mass.

About five hundred people gathered in the Town Hall, Tuesday evening, January 28, to hear Rev. William P. McKenzie, C.S.B., of Cambridge, Mass., lecture upon "Christian Science: The Gospel of Love." The audience listened attentively to the able address of an hour and a half's duration. The two local papers devoted a column and a half to a synopsis of the same, with a kindly notice.

The lecturer was introduced by Mrs. Helen Andrews Nixon, C.S.B., First Reader of First Church of Christ, Scientist, Braintree, Mass., in a few well-chosen words, which were as follows:—

Friends:—It is my privilege this evening, to welcome you in behalf of First Church of Christ, Scientist, in Braintree, Mass. You have come to hear of the Gospel of our Master, Jesus Christ, as understood through the lens of Christian Science. That the public may gain the true idea of the spirit of Christian Science, the Mother Church, The First Church of Christ, Scientist, in Boston, has established a Board of Lectureship, the members whereof shall be qualified to present the subject justly.

We have with us this evening one of the members of this Board whom I introduce to you with great pleasure: Rev. William P. McKenzie of Cambridge, Mass., who will now address you.—*Correspondence.*

At Daytona, Fla.

The lecture delivered to a large audience by Judge William G. Ewing on Christian Science, at the Daytona Opera House Tuesday night, January 21, was a very interesting one.

His honor, Mayor Ludwig, introduced the speaker with a few appropriate words, at the close of which Judge Ewing held the close attention of the audience for two hours, no one leaving the room until he closed.

From the beginning his address, not written, was replete with eloquent sentences, full of reason and thought, and ably presented the cause of Christian Science.

No effort was made of a mere oratorical character, no appeals to transient emotional feelings, but always a clear and definite presentation of ideas and principles bearing on the question discussed, nor was there anything introduced to cause discord or contention, or of a dogmatic character.—*The Peninsula Breeze,* Seabreeze, Fla.

At Kansas City, Mo.

An auspicious event was that of a lecture given to Christian Scientists, delivered by Edward A. Kimball, C.S.D., of Chicago, Ill., in the church edifice of First Church of Christ, Scientist, of Kansas City, Mo., Saturday evening, January 11. Fully twelve hundred Christian Science students from Kansas City and surrounding towns were present.

In granting this favor Mr. Kimball filled a long-felt want. The rapt attention of this large body of hungering and thirsting seekers for heavenly knowledge was most impressive. The lecture of an hour and three quarters seemed but a few minutes in duration. He closed his remarks by setting forth the nature of Love and its law, as imperatively needed in human affairs. Each one present felt the lesson to be personal, and the great responsibility resting upon them as Christian Science students in the exemplification of it in their daily lives.

JOHN H. WHEELER.

At Rock Island, Ill.

The Illinois Theatre was filled with an audience made up of the intelligent people of the city Thursday evening, January 23, on the occasion of the second lecture here on Christian Science by Edward A. Kimball, C.S.D., of Chicago, a most earnest, interesting, and polished speaker, a gentleman whom it is a delight to listen to. Mr. Kimball was introduced by F. C. Denkmann.

Rock Island (Ill.) *Argus.*

Among the Churches.

New Church at Cleveland, O.

Opening services were held in Second Church of Christ, Scientist, on Euclid Avenue, near Morse, Sunday morning, January 26. The edifice is a white temple inside and out. The structure is of the Grecian style of architecture.

The seating capacity is five hundred, the chairs being of the opera style and of light mahogany. The color scheme used in the decorations is particularly attractive. Nothing is used except white, with amber and light green.

This is the second Christian Science Church in the city, and is intended to be only a temporary structure. The intention of the members, who number about one hundred, is to build a stone church in the near future.

The meetings held yesterday consisted of two services, one at 10.30 the other at 3.30. Both the meetings were largely attended, many of the members of First Church attending the afternoon services. The order of services consisted of the regulation form of that denomination,—reading from the Bible and from "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. The Readers are Mrs. L. W. Fitzpatrick, First Reader; and Herbert A. Baldwin, the Second Reader. Mrs. Fitzpatrick's address was in part as follows:—

"It is with joy and a great sense of gratitude to the Giver of all good things, that we welcom. you to our opening services in this new temporary building, which has been built from the breaking of the ground to its present finished condition in the short time of four months.

"Those who have been interested in this work have seen many proofs of God's care and kindness for His children and His work during this time, and while it has meant much careful work and activity on the part of the workers, yet it has been a labor of love.

"To this place of worship we would invite all who would have their thirst for something more refreshing than the teaching of life in matter (belief in good and evil) quenched, and would drink of the water of life (One power—Good). The rapid growth in numbers of those who are seeking enlightenment upon the subject of Christian Science is marvelous to the thought not familiar with its teachings, until it learns that that which is being sought is the science of divine Mind; the true Science, the one Jesus understood and practised, the Science of all things. Mortals, in their investigation of the so-called physical sciences, have overlooked the science of divine Mind, which heals the sick, the sinful, and the dying, now as in the time of Jesus, through the recognition of God as all.

"The truth of things is the only intelligence there is; Christian Science is teaching truth, which is the Principle of all things, and by this Principle we are learning the natural way of living, as it was intended we should live, in health, peace, harmony, good-will toward men. The signs which follow this Principle prove it to be divine Love, for only love can perform the perfect work of regeneration.

"This church will endeavor to assist those who desire to understand this true Science, through the lessons read on Sunday from the Bible and Science and Health, the testimonials given at the Wednesday evening meetings as a result of this Science, by dispensing literature, by the healing of the sick and sinful, and by endeavoring to express more and more, as growth in the understanding will permit, the brotherhood of man, and so be one with its sister churches through the land, joining the one army which is marching toward the kingdom of God, the reign of perpetual harmony.

"We welcome those who are with us to-day and those who may come to this place of worship which the Good has prepared, that we all may learn to be His children—one in the truth."—*Cleveland* (O.) *Plain Dealer.*

Annual Meeting at Toledo, O.

The annual meeting of First Church of Christ, Scientist, held recently at the church, corner of Monroe Street and Lawrence Avenue, was a very harmonious gathering, and the directors, trustees, and Readers were re-elected for the ensuing year.

The carefully prepared reports were listened to with interest and each one brought out very clearly the prosperous condition of this church. After every debt had been paid last year, there was still a substantial balance in the treasurer's hands. They rejoice over the dedication of their church free from debt, and there has also been a steady increase in the membership.

During the evening a resolution was passed stating the appreciation and gratitude of the members to Miss S. J. Clark, First Reader, for her unceasing work in the establishment of Christian Science in this city, ever since its inception, fifteen years ago.

There has been a large sale of Christian Science publications at the reading rooms during last year, and a quantity of literature has been distributed free.

The Toledo Times.

First Church of Christ, Scientist, Manhattan, Kan.

On Sunday, January 5, First Church of Christ, Scientist, of this city, held its first meeting in the German church. Outside of the regular service the following remarks were made by the First Reader: "It is with overflowing hearts that we give thanks to the bountiful Giver of all gifts for the privilege of having our church service within easy access of all. As every gift is enhanced as we share it with others, so not a little of our pleasure this morning lies in the fact that we can share this privilege with all earnest seekers for Truth. It is also but meet and fitting that we acknowledge our gratitude to our beloved Leader, the Discoverer and Founder of Christian Science, Mary Baker G. Eddy, whose patient, untiring, and loving work for all mankind has made this church a possibility, and also that we express our appreciation of the many acts of courtesy and kindness shown us by our friends, our fair and liberal-minded press, and our neighbors.

Students' Herald, Kansas State Agricultural College, Manhattan, Kan.

At Arkansas City, Kan

The Christian Science Church of this city is a model church in respect to its management. The membership is not very large, yet within the past few weeks the church has been repainted on the outside, two new pulpits have been built, gas lights have been put in, and walks arranged for, to be laid at once. These improvements, together with the running expenses of the church and other matters, have called for nearly three hundred dollars, every dollar of which has been raised (not merely promised) by the members of the church. The *X-Rays* accidentally learned the above facts, and records them as an example worthy of being followed.—*The Weekly X-Rays,* Arkansas City, Kan.

Organization at Rutland, Vt.

First Church of Christ, Scientist, of Rutland, Vt., was organized under the laws of the state, November 26, 1901, with twenty charter members. In December, 1898, we secured rooms for public services and the work has slowly but steadily progressed, until now we have an average attendance of about twenty. On the third of October a lecture was given by Judge Ewing, which was well attended, and cannot fail to bring forth much fruit. We all feel very grateful for the many blessings which have come to us through our understanding of Christian Science.

GRACE L. BOSWORTH, *Clerk.*

Love's Jewels.

BY W. SPAULDING.

DIAMONDS of purity rich and rare,—
Pearls of the deep, so white and fair,—
Rubies do not with Her compare,—
The Love which encircles all.

Diamonds of wisdom, brilliancy rare,—
Pearls of humility, charity, prayer,—
Rubies divinely beautiful,—share
In the Love that encircles all.

Diamonds of Truth, cleansing freely from sin,—
Pearls of sweet innocence, faithful within,—
Rubies of heavenly excellence win
The Love that encircles all.

Origin.

BY JOHN CARVETH.

MORTAL mind is ever trying to induce the Christian Scientist to explain or account for the origin of evil, or what seems to make a claim of evil. The error that would try to have us account for the origin of evil, will be found at some time and in some way suggesting to us a question as to the origin of good. Mortal mind being finite cannot conceive of Infinity, or of existence without beginning.

The moment we endeavor to explain the origin of evil we give it a beginning, and hence make it real to us. Believing in the reality of evil, we must believe that good is limited. If good as well as evil is limited, they must have had a beginning, and therefore there must have been a time when neither existed.

What began them? If they are indeed something, then before they began there was nothing. Therefore we are driven to the conclusion, that nothing is the producer of something, a proposition that reason rightly rejects. A little reflection will convince any one that two qualities, opposite in nature, cannot both be real, for the lower appears from the limitation of the higher, and the enlargement of the higher diminishes and ultimately extinguishes the lower. Whoever tries to account for the origin of God, gives Him a beginning, and thereby, to his own thought, limits Him. The thought that thus limits God, has no God. If evil is real, then God as Good is limited, hence no God. The slightest limitation of a mental quality, involves and includes a belief in its opposite, either as real or unreal. So then, to give any origin to evil is to make it real, and this would destroy God as Infinite Good. Mind cannot be conceived of as indivisible in quantity after the manner of matter. The only conceivable way to divide or reduce Mind or its individuality is to reduce or change its quality, and this destroys its standard and perfection. This must be apparent on every plane of human thought.

That which is natural, normal, reasonable, and right always did and always will exist. Because good possesses all these qualities, every element of its nature is ever constructive and preservative, while every so-called element of its opposite, evil, is destructive and non-preservative. Because every phase and condition of evil is the direct opposite of Good, if God always was, then the inevitable conclusion is, that evil never was, and hence never had origin.

The human mind takes on the nature of Good, only in the degree that it drops the belief in, and the nature of, evil. Hence as the understanding of God improves the mortal belief, it destroys it; but this understanding takes its place. Just as ignorance is improved by education, it is destroyed thereby, but education in the degree that ignorance is destroyed takes its place. John the Baptist had a correct perception of this, when, speaking of Jesus, John, 3 : 30, he said, "he [the highest human representative of Good only] must increase, but I [one of the highest representatives of the belief of both good and evil] must decrease."

What was it that John thought must increase and decrease? Certainly he was not prophesying his own destruction, for he recognized a Way-shower and Saviour for himself and all who followed the light. What was it, but his sense of, or belief in, evil that must decrease, until it ceased even to appear as a factor of Being; and what was it but Jesus' understanding of Good as the very all of Being, that must increase until the appearance of aught else was wholly lost. Jesus spoke of John as one of whom none born of women (the beliefs of the flesh) was greater, and yet he declared that even the least in the kingdom of heaven was greater than John. Here Jesus plainly declares that no fleshly or evil sense could enter the kingdom. Both, in the above passages, virtually declared that through the Christ light material sense must decrease and spiritual sense increase until it becomes the only sense; and that this would not destroy, but save man, for it brings immortality to light.

How clearly this thought is expressed in "Science and Health with Key to the Scriptures," p. 537: "The condemnation of mortals to till the ground means this,—that they should so improve material belief as to destroy it, by germs tending spiritually upward." Again, Good and Truth are one, and Truth must always have been the same. The slightest change of Truth would destroy it, for any change of Truth would make it error. Whenever, in human thought, truth diminishes, error must increase. In this thought the slightest change of either involves corresponding change of the other. All admit that error is ever changing its appearance, therefore the thought that holds error to be real cannot possibly have any truth, for its truth must change with its error, and changeable truth is no truth. From this logic there is no escape.

The thought that can hold that the multiplication table can at any time or place be changed in the slightest degree has no correct concept of it. Whoever holds that error can have any reality, quantity, or quality in the science of mathematics, does so because he does not understand this science and cannot demonstrate it.

So one who maintains that evil can co-exist as a reality with good, in the same individual or nature, cannot possibly understand good; and this misunderstanding exists because the thought untrained by Christian Science does not perceive that the limitation of any mental quality or individuality, not only changes but perverts that quality or individuality.

The impairment or improvement of the human mind changes the very nature of that mind. The impairment of the sight of a man changes to him both the quantity and the quality of what he before saw, and the same is true in relation to every other sense.

If it were possible to limit and diminish the world's present demonstrable understanding of the science of astronomy to the status or level of what it was five hundred years ago, the former beliefs about it would also return, and another Galileo would share the fate of the former one, and the universe would be perceived or understood to be as it is not. To the world's belief the earth would again be flat and stationary and the sun in motion. But the world's limited sense of the universe would not change the facts one iota. The limitation of the science of astronomy would reverse the facts about it, and the present sense of it. Thus we see that the limitation of a mental quality is reversal to the extent of the limitation, and every so-called material science is an emanation of mind, therefore as mental as its mind. It follows that to the question

Digitized by Google

as to the origin of Good or evil there can be given but one correct answer; viz., neither ever had a beginning for Good, God, always was and devil, evil, never was. Evil is illusion and its supposed origin is illusive. Nothing but illusion will ever try to explain either the origin of what never was, or of what always was. To give origin or beginning to either Good or evil, we see destroys the perfection of Good to us, and leaves us without a God, the very thing error or a limited sense of mind is ever trying to persuade us to do.

Forgiving.

BY G. C. M.

THOUGH I was healed by reading "Science and Health with Key to the Scriptures," I wish to say that the fact that this blessed book has proven a "Key to the Scriptures" to me is my most wonderful, illimitable blessing. I was told by my physicians that I could only be an invalid even if I submitted to severe operations and lived, "Every law of matter or the body, supposed to govern man, is rendered null and void by the law of God" (Science and Health, p. 379).

It was beautiful to understand my Bible more and more, and has been a great joy since I was healed over four years ago. I found so many sayings, first of Jesus, then of the apostles, which were simply unexplainable without this Light.

But if there is any one ray of this Light for which I am more thankful than others, it is the way which clearly explains the word Forgive. On page 234 of Science and Health, we see, "The destruction of sin is the divine method of pardon. Divine Life destroys death, Truth destroys error, and Love destroys hate. Being destroyed, sin needs no other form of forgiveness." Formerly, to forgive meant to me to overlook. I supposed all you had to do was to be sorry when you erred and ask God to forgive (overlook) it, and then to believe He would. However hard I tried, there were so many things I did before I could think. I got so I felt ashamed to ask God to forgive (overlook) the same kind of sin so many times, even if I did promise to try very hard not to commit it again. I sometimes even thought I would not blame Him if He should refuse me! I should have been more anxious, I think, to have had my sins forgiven if I had known they left an outward manifestation on body or circumstances equally repulsive.

Now to understand how to obtain of God the true forgiveness (destruction) of our sins as we do in Christian Science, removes a great stumbling-block from the path of life wherein to know God aright is the sole object. When we discover, acknowledge, and overcome our sins or errors by letting in the light of Love and Truth, we need not be amazed to find that some one or more obstinate physical ailments have vanished. It is inevitable that we shall be transformed by the renewing of our minds. The fruit of the Spirit is love, joy, peace, longsuffering [patience], gentleness, goodness, faith, meekness, temperance: *against such there is no law.* Let us examine ourselves. Do we manifest a lack of any of these qualities or seem to possess their opposites? Then let us claim the forgiveness—destruction—of these errors by knowing that the kingdom of heaven (or reign of harmony) is within us and no darkness is there, and nothing can enter that defileth or maketh a lie.

But in seeking this destruction of our sins, and consequently of our sicknesses, let us remember these words of Jesus the great Teacher to his students: "For if ye forgive men their trespasses, your heavenly Father will also forgive you: but if ye forgive not men their trespasses, neither will your Father forgive your trespasses." In applying the spiritual or real meaning of the word forgive here we are almost startled at the far-reaching significance of these words of Jesus and also of those a little before in the Lord's Prayer—"Forgive us our debts, *as* we forgive our debtors." How can we destroy others' sins so that our Father will destroy ours? The true Scientist knows. When he sees errors (trespasses) manifested in others he mentally denies their reality or truth, because they do not belong to the one creation, and are not the works of the one perfect Creator, because all that He made was good. This is walking by faith (Science) and not by sight (sense). It is also "casting down imaginations, and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ."—Truth.

To thus keep our minds free from error is not treating or addressing another's consciousness without consent. However, if some sins and sicknesses in others are thus destroyed it is only the "impersonal healing" or reflection of the Light which must of necessity penetrate some dark corners and bid the darkness flee. Thanks to Christian Science, we have learned how to "love our neighbor" by making the separation between this neighbor and the error of belief he may have encountered, and know it is no part of the real child of God. "Forgive us our debts, *as* we forgive our debtors."

Love, the Keynote of Harmony.

BY SOPHIA CAROLYN DUNNE.

ONE of the clearest recollections of my childhood is of sitting at the piano and arguing with my mother as to whether I could not strike the keys at random and produce music. I do not remember what she said, but I know she told me I could not; that in order to produce music, I must strike certain keys, and that I should know what keys to strike and how to strike them. But I persisted in wanting to know whether I could not happen to strike the right keys. She replied that things did not "happen;" that if I wanted to bring out music, I must take the necessary steps, practise the exercises, and learn the laws of music.

As I grew older, I found the same problem confronting me in life. I wished to express music (harmony) in my life, but did not know what to do except to strike the keys at random, with the inevitable result,—discord; nor did I know any one who could teach me any better method. I struck the keys of material ambition, intellect, human love; but they were all "like sweet bells jangled, out of tune and harsh."

But, as Browning says, "Why rushed the discords in, but that harmony should be prized?" When the conditions seemed most unbearable; when health and happiness seemed fading away, and the future so dark I could not bear to look forward, I found the keynote of harmony. I was told that there was a Science of life which, understood and practised, would enable me to attune my life to harmony with the great Principle of all harmony,—a Principle as effective now as when "the morning stars sang together and all the sons of God shouted for joy;" that it was fully set forth in a book called "Science and Health with Key to the Scriptures," a copy of which was sent me by the dear friend who told me of it.

To my great joy, I found that this good news was indeed true. By a faithful study of this blessed book, to the author of which I grow more grateful every day, and by a constant effort to put its rules into practice, I have been enabled to express a greater degree of harmony in my life than I had ever hoped for, although I have not attained to very much understanding. Through its teachings I learned what was the trouble. I found that the keynote of harmony is Love. In my ignorance, however, while I struck the different keys with one hand, with the other I always struck the chord of self. But,—

Love took up the harp of Life, and smote on all the chords with might;
Smote the chord of Self, that, trembling, passed in music out of sight.

Things to be Done.

UNDER the above heading the *Christian Register* enumerates things to be done for the advancement of the world during this century. We republish its excellent summary:

1. A ship canal somewhere between North and South America. All nations will use it, and will come into closer and more friendly relations because of it.

2. The great arid tract which lies between the Mississippi River and the Rocky Mountains to be irrigated, and homes provided for happy millions. With sufficient water the desert would blossom like the rose. Under government control the work can be carried out, so that the expense incurred will be returned, and no part of the country taxed for the benefit of another part.

3. The ownership and control by the governments of towns, cities, commonwealths, and nations, of all public utilities which can be advantageously managed by the government, and which concern the health, comfort, and progress of all citizens.

4. The organization of capital in such a way that it shall not oppress labor, shall not be destructive of free competition, and shall not work injustice to the community. Also labor organized in the same manner. Then labor and capital should have a mutual understanding, frank, open fellowship and co-operation.

5. Continuous railways from Winnipeg and Quebec through the Central American Republics to all the South American States.

6. Waterways connecting all points on the Atlantic coast with each other by inland routes, avoiding all dangerous headlands and stormy capes. Also to connect the great lakes with the Atlantic Ocean and the Gulf of Mexico.

7. Treaties which will promote commerce between the United States and all other American States and all foreign nations.

8. Measures and laws to make the relations between our government and all its foreign dependencies consistent with the justice and freedom which all American citizens expect and enjoy.

9. Education made free to all sons and daughters of the republic, so that to any extent one may study without charge, so long as devotion to study prevents the doing of business for bread-winning.

10. Some provision by which the best music, art, and literature will be brought within the range of all who can enjoy them.

11. Everything that promotes the religious life, that excites hope, that gives comfort, that stimulates the spiritual imagination, that ennobles the moral life, to be provided so freely and abundantly that all may partake.

12. All unnecessary expenses for sectarian propagandism cancelled, all artificial barriers between churches removed, and the greatest minds and the strongest organizations of the century engaged in the task of finding the great moral highways of truth and righteousness over which the people may pass in safety.

13. Mutual agreements among the nations to settle all controversies without recourse to war. When it is necessary, to prevent small and lawless tribes and nations engaging in war, an overlordship of allied, civilized nations to keep the peace of the world.

14. The Golden Rule accepted as the best method of doing private business and the business of the world.

By rooting out our selfish desires, even when they appear to touch no one but ourselves, we are preparing a chamber of the soul where the Divine Presence may dwell.

ELLEN WATSON.

Every right action and true thought sets the seal of its beauty on person and face.—RUSKIN.

Testimonies.

Feeling as I do I can no longer refrain from giving testimony of one of the most remarkable cases of healing through Christian Science that has come to my knowledge. For more than forty years I have been afflicted with eczema on my legs. Sometimes it would spread over parts of my body, and at one time attacked my face, breast, and arms. No tongue can express what I have endured. I have taken large amounts of medicine, have been examined by some of the best specialists of various schools, only to be disappointed. Finally the claim planted itself on my right leg between knee and ankle. The leg became ulcerous, was swollen to twice its normal size, and the itching was intolerable. I called on one of the most intelligent specialists within my reach, and after examination he told me he could do nothing for me. I went to my place of business somewhat discouraged, but not hopeless.

The next day a dear brother of the Second Church of Christ, Scientist, called on me, gave me some literature, and finally induced me to abandon material remedies, which I did with a rather good will, for I was tired of them. I at once took treatment and advice from the members of the Second Church. My condition grew worse, and at times I was terribly discouraged, but learning that this was common, and was "chemicalization" in Science parlance, I persevered. After two or three weeks a marked change took place, and gradually the claim disappeared, but it took about fifteen months of work and encouragement from the faithful ones, and steadfastness and faith on my part to get me so in touch with truth as to bring about this deliverance, and to-day I am entirely healed, my leg having resumed its normal size and the skin, which was much discolored and scarred, is clearing up. Oh, what can I say to express my gratitude to the dear ones who were so kind to me, and through whom I have been relieved from such suffering as I had endured during those long forty years? I have been a member of one of the leading churches for more than fifty years and am now past seventy-three. I have often asked ministers when the healing portion of the commission ceased, and was generally told, "When the last apostle passed away," but I could never find any Scripture to support that thought. May the good Lord bless the faithful Discoverer of Christian Science and all her loyal followers, is my prayer.—McJ. W., Joplin, Mo.

I was sunstruck sixteen years ago in Chicago and I suffered every year afterward from any heat, either from the sun or from the stove. For thirty years I suffered from the severest form of chronic constipation—never having a movement of the bowels without taking medicine. For three years I had heart trouble—a terrible rushing of blood all over the body about every ten minutes—leaving me weak with chills. I had also had severe trouble of twenty-six years standing brought on by hard work in a butter and cheese factory in Sweden. I had to leave the factory on account of this trouble, the doctor telling me never to try to do such work again.

I have been entirely healed of all these ills by only three weeks' treatment in Christian Science, and my eyes have been greatly improved.

God only knows how happy I am since I found this Truth. I always longed for something better than what I had, and now I have found it.

There are no Scientists at my home. My doctor told me I must leave my home and travel for my health, and I asked my husband where I should go. He answered, "Go to Florence," and there it was I found the Truth that heals all sin and sickness, and I think God led me there to be healed, for the Bible says, "He healeth all our diseases."—MRS. ANNIE LARSON, Leadville, Col.

Religious Items.

THE PENTECOSTAL GIFT.—The salient inference from the description of the outpouring of the Spirit, is that the Christian life belongs to a new dispensation.

Many of our ablest scientists who adopt the theory of evolution, at least as a working hypothesis, yet maintain that there are abysses between the inorganic and the organic; the organic and the sentient; and the sentient and the self-conscious which were bridged by the direct creative act of God. In other words, we cannot account for the self-conscious by forces originally resident in the inorganic; but all along life has been lifted to higher planes by the divine interposition. In spiritual things the "carnal man" does not become a "spiritual man" by the evolution of tendencies and forces resident in his nature. On the contrary, the spirit of God must endow him with new affinities and capacities in order that he may attain to the plane of spiritual life. Before Pentecost the disciples were men strong in the qualities of our common humanity. After the descent of the Spirit they entered a new realm of being. A Christian man is not simply one whose æsthetic and moral culture is well advanced; he is one whose soul has been touched by the life of God.

The Watchman.

The building of character is never a rapid work. And one year is but a small part of our lifetime. But each year counts for much, because it lays a foundation for further progress in the same direction. If you were in a large forest, and seeking to pass through it, in a due easterly direction, to your home, with compass in hand to show you the direction, you would need still to be very careful in each step, because a very small deviation in one step from the right line of travel, would put you in a new position, necessitating somewhat of a change in your next line of progress. And if you should deviate again very slightly, in your next step, and in your succeeding steps, you would finally come out far astray. And it is so in your walk toward your final home. You know the way, for your heavenly Father has pointed it out to you. And He has given you His holy Word, as an infallible compass, by which to direct your progress. But constant care is necessary, even in the use of a compass; for a small deviation from the right line of the Divine commandments, in each step, would bring you out very far astray in the end.

EDWARD C. MITCHELL.
In *New-Church Messenger.*

Goodness and happiness are inseparable. The happiness of the wicked is a momentary thrill which vanishes away and leaves a sting behind. The joy of the righteous is a holy stream which flows on forever. The sorrows of the righteous are on the surface of this life, while his joys are as deep as eternity.

That good men have sorrows is not to be denied. But they are not like the sorrows of the wicked. For one thing, the trials of the righteous do not overthrow them. "Blessed is he that endureth temptation," says the apostle. Trouble and sorrow do not move him. His house is built upon a rock. Moreover, the dark experiences of the righteous afford them an opportunity to let their light shine. Light shines better in darkness.

Has some one wronged you? He shall receive his punishment. He is not only to be blamed, but pitied also. Avenge not yourself. As for you, the occurrence has opened to you a grand opportunity to let the light of your patience, your forgiveness, your love shine out clear and bright. It is the life that has been broken by sorrow and disappointment that is the strong and noble life.

The Christian Advocate.

Life regarded as a stewardship is at once simpler and more rewarding than any purely selfish life can be. And when it is for God, the opportunities of time take on a dignity which lifts them high above all petty motives and disheartening fears. A year devoted to God's service may not bring us clear vision of results attained, but it will assure us the best use of time, freedom from weakening regret, and the peace of heart which is not the least of the conditions of efficiency.

In Christ's thought the order of devotion was of the highest importance, What comes first in life? His council is that the kingdom of God and His righteousness should have the right of way. He feared the influence of a primary absorption in the cares of life. He contrasts the love and service of winning goods for self with the love and service of God. No man can serve two masters. For either he will hate the one and love the other; or else he will hold to one and despise the other. Ye cannot serve God and Mammon.

The Congregationalist and Christian World.

Christian service springs from love. Faith without love becomes inactive and dead. The Holy Spirit indwelling in the believer manifests itself chiefly in service of others as an energy and power of which he is the source. Selfishness has no place in the kingdom. Unloving activity is also fruitless. The "Martha Spirit," cumbered with much serving, loses sight of the Christian ideals and lapses into worldliness. Love is vitalizing, and, that lost, the activity becomes mechanical and dead.

True worship is the devotion of the life, and there is no limit to the sphere of this devotion smaller than the world itself. The service of man is the worship of God. Pity and piety have the same root. Let us keep the ideals of life ever before us by frequent contemplation and strive for personal purity, sincerity, and holiness, and we may be confident that our lives will not be barren or unfruitful of effective service and rich blessing for many about us.

REV. LEIGHTON WILLIAMS.
In *The Observer.*

We are all seeking to find the fountain of youth in one way or another; and it is probable that even in this materialistic, unbelieving age there are those who still dream of discovering the elixir of life. Old age is a sad and sorry business for many,—indeed for most. The attitude of the world toward it reminds one of the bas-relief by Thorwaldsen, where a feeble old man is holding out impotent hands to try to catch the little mocking doves that are flying away from him.

Philosophy from the earliest times has striven to fill the gap between youth and age, and to substitute a sentiment, a hope, a temper and frame of mind, for the exuberance, high animal spirits, and vague aspirations of earlier years.

The Christian Register.

You need not break the glasses of a telescope, or coat them over with paint, in order to prevent you from seeing through them. Just breathe upon them, and the dew of your breath will shut out all the stars. So it does not require great crimes to hide the light of God's countenance. Little faults can do it just as well. Take a shield and cast a spear upon it, and it will leave in it one great dent. Prick it all over with a million little needle shafts and they will take the polish from it far more than the piercing of the spear. So it is not so much the great sins which take the freshness from our consciences, as the numberless petty faults which we are all the while committing.

HENRY WARD BEECHER.

No one can study the records of the early Christians without seeing that this conception of a new physical and spiritual force, brought into the world after the ascension, was primary and essential with them. For our part, we have never seen our way clear to deny that men to-day may be healed in the name of Jesus. We do not know when the Divine power may overleap all second causes. But even Christians who hold that the occasion of miracles has passed, believe that the power that wrought miracles is still present and active, moving in the spiritual realm, and accomplishing what no skill or energy of man can effect, the cure of souls.

The Watchman.

HOW TO MEET IT.—Mark Guy Pearse draws some interesting comparisons between this age and that of the ancient Greeks. He says: "We live to-day in a very revival of the Greek spirit. And there are the same characteristics in the people as in the Greeks of old—the restlessness, the intellectualism, the craving for excitement, the weariness and the scepticism. How are we going to meet it? There is but one thing needful—that those who are called Christians will set themselves for Christ's sake to live the Christlike life, striving to let men see in everything the truth and purity and courageous goodness of Jesus Christ."

The Detroit News-Tribune.

Audiences are often delighted with a frank revelation of the personality of the speaker and his interest in himself, but listeners grow cold when behind effusive oratory they detect an intention on the part of the speaker to glorify himself.

The Christian Register.

Whether you speak in metaphysical or metaphorical language, in the purest words of inspiration or the grossest images of materialism, the conceptions conveyed by the same word are essentially different, according to the soul which receives them.

F. W. ROBERTSON.

The evangelization of the world is the grandest concept ever conceived in the mind of God, and the noblest work ever undertaken by man.—HENRY B. WILLIAMS.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 675 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST. DEEP THINGS OF GOD. THE EGO. DEATH. SAVIOUR'S MISSION. SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages, illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass. U.S.A.

BAPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety-five cents.
Twenty-five copies or more to one address, one year, each copy, ninety cents.
Fifty copies or more to one address, one year, each copy, eighty cents.
For Foreign subscriptions add, for postage, fifty cents per copy to rates given.
Six months' subscriptions received at half the above rates.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.
Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., Post Office as second-class mail matter.

Items of Interest.

Last week a parliamentary paper was issued in London, giving the terms of a practical alliance between Great Britain and Japan for the preservation of peace in China and Korea. The agreement, which was signed in London, January 30, went into effect immediately and is to remain in force five years. In explanation of the matter Lord Lansdowne said that both Great Britain and Japan "desired that the integrity and independence of the Chinese Empire should be preserved, and that there should be no disturbance of the territorial status quo, either in China or the adjoining regions." The new alliance has excited widespread comment in the capitals of Europe. It is stated that the treaty is viewed with sympathy in Washington, as it is precisely in line with the aims of the State Department.

Great Britain, Japan, and the United States have entered a protest against the secret arrangement of China and Russia with the Russo-Chinese Bank by which Russia was granted concessions in Manchuria. This may cause delay on the part of China in signing the agreement. The new alliance of Japan and Great Britain, whose "policies and interests in the East were found to be identical," may operate still further to delay or even prevent the signing of the compact.

It is possible that the next biennial meeting of the World's Woman's Christian Temperance Union will be held in England, instead of in Ottawa, Can., as had been decided. The officers of the Union have concluded that on account of the large number of people who will be going to England for the coronation of King Edward, a larger attendance might be secured by holding the convention in England on a date near that of the coronation.

At a recent banquet of the Washington College of Law, Wu Ting Fang, the Chinese Minister, responded to the toast, "The American Woman." He entered a strong plea for the placing of women on the juries of the various law courts of the country. "When a woman is placed on trial," he said, "if the judge is not a woman the jury at least should be wholly composed of women." His idea is to let each sex try and convict the members of their own sex.

Lincoln's birthday, February 12, was fittingly observed in many of the principal cities. The day is now a legal holiday in nine States of the Union.

Among the prominent public men who delivered addresses, were Secretary Long, who spoke before the Middlesex Club of Boston; Senator Depew, who addressed the Republican Club of New York City; and Minister Wu, who was the principal guest at Grand Rapids, Mich.

The Army Post Board, which has been in session in Washington, D. C., since November, finished its labors and adjourned February 4. The board has formulated plans for the establishment of new military posts and the abandonment of some which are now worthless. It also located four great camps for the training of the soldiers of the regular army and their drill in co-operation with the militia.

Senator Hoar has presented a petition, signed by a number of well-known citizens of this country, among whom are thirty-six professors in the University of Chicago and other prominent educators, praying for the suspension of hostilities in the Philippines, and asking that an opportunity be given for a discussion of the situation between the Government and the Filipino leaders.

Governor Taft of the Philippines receives a salary of $20,000 and four of his assistants receive $15,000 each. There are twenty-six others who receive from $4,000 to $7,500. The civil employes number 4,606 and the salaries paid them amount to more than $3,000,000. Not quite half the employes are Americans, but they receive about two-thirds of the money paid for salaries.

The House committee on Inter-State and Foreign Commerce has declared in favor of Government construction of a Pacific cable. The committee has endorsed the Corliss bill, which provides for the construction of the cable at a cost not to exceed $10,000,000, and stipulates that the tariff shall not exceed twenty-five cents a word to Honolulu and fifty cents to Manila.

At a mass meeting recently held at Honolulu, resolutions were adopted commending President Roosevelt's message to Congress, and indorsing his recommendations relative to wage-earners, immigration, forest reserves, national control of water storage for irrigation purposes, a Pacific cable, and an inter-oceanic canal.

The North Atlantic squadron under Command of Rear Admiral Higginson has been ordered to Cienfuegos, whence it will sail for the Columbian coast, only a short distance from La Guayra, where a German squadron lies ready to enforce the demand of the Berlin government for the payment of German claims.

It is said that England may transfer her naval station at Wee Hai Wei to Germany with the understanding that she may establish a station at the mouth of the Yangtse River. England's interests in China are chiefly centred in the basin of this river with its population of seventy-five million.

Admiral Dewey has submitted to the Secretary of the Navy a report from the general board of which he is president, regarding the needs of the Newport Naval War College and its importance to the service. He recommends an appropriation of $62,000 for improvements at the college.

When a bill providing for an increase in the salaries of the United States judges was being considered in the Senate recently, an amendment was offered increasing the salaries of the members of Congress to $7,500 per year. The amendment was rejected by a vote of 44 to 15.

The warships expected to form the naval escort to Prince Henry are the Illinois, which will be the flagship of Rear Admiral Evans; the Olympia, Dewey's old flagship; the San Francisco and the Cincinnati; and probably the Hartford, Farragut's old flagship, and the Machias.

The Union Terminal Company of New York has been incorporated with a capital stock of one million dollars. The purpose of the company is to construct a standard gauge tunnel road from Brooklyn under the East and North Rivers, and under Manhattan Island.

President Roosevelt has issued an executive order to all employes of the United States, forbidding them, under penalty of dismissal from the Government service, to attempt, either directly or indirectly to influence legislation in their own behalf.

An unconditional gift of one hundred and seventy-six acres of land at Baltimore has been donated as a new site for the Johns Hopkins University. The transfer will probably be made February 22, the date of the jubilee celebration of the University.

The average of annual earnings is gradually increasing. In 1897 it was $650; in 1898, $678; in 1899, $747; in 1900, $716; and in 1901, $755. It is estimated, however, that the cost of living has increased in about the same ratio as the annual earnings.

The prices of opera tickets for the gala night of opera in honor of Prince Henry of Prussia, at the Metropolitan Opera House, New York City, range from five to thirty dollars. Boxes range from one hundred to two hundred and fifty dollars.

The Imperial Yacht Hohenzollern, which did not touch at the Bermudas, as she intended to do, arrived in New York, February 12, a day ahead of her anticipated arrival. Here she will await the arrival of Prince Henry.

The committee on Towns in the Massachusetts Legislature will report favorably on the resolution "that the calendar week beginning the third Sunday in July in each year shall be designated as Old Home Week."

It is rumored that the street railway interests of Chicago, New York, Philadelphia, Cleveland, and possibly Boston, may be merged into one gigantic combination by the Whitney-Elkins-Widener-Ryan syndicate.

A bill has been introduced in the New York Legislature making an appropriation for a tri-centennial exposition to be held on the banks of the Hudson River in 1909 to commemorate its discovery by Henry Hudson.

The steamship Philadelphia of the American line has been successful in transmitting messages by the Marconi wireless telegraph system a distance of one hundred and fifty miles. This breaks all previous records.

The special train which conveyed President Roosevelt from New York to Boston on his way to the bedside of his son at Groton, made the trip in four hours and seventeen minutes, a record trip.

A despatch from Christiana, Norway, says that during the year 1901 nearly three million kroner were sent by postal orders from persons in the United States to friends in Norway.

It has been officially announced that the British Government has courteously declined Holland's offer of mediation in the South African war.

The Navy Department is about to experiment with Texas oil to ascertain whether or not it can be used in the place of coal as fuel for the navy.

Owing to shortness of time in which to make preparations, it is feared that but few of the eastern countries will participate in the St. Louis Exposition.

Commander Booth-Tucker of the Salvation Army has taken the oath of allegiance and is now a citizen of the United States.

The Mikasa is the largest battleship afloat. It has a displacement of 15,200 tons and is owned by the Japanese Government.

Booker T. Washington has been elected as commencement day orator for the University of Nebraska next June.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Paper.

How the kind used for Money is Made.

THE manufacture of paper is always of great interest when we consider its importance to our daily needs, but to the average man the paper used by Uncle Sam to express his willingness to pay, outranks all other in value and attractiveness. It is this paper, used variously for money, bonds, checks, internal revenue stamps, etc., that Governor Crane of Massachusetts provides; and whatever may befall the consumption of his other mill products, it may be safely said that the popular demand for this peculiar variety can never be satisfied.

In the eyes of the government, it is the perfection of its manufacture that gives value to what is known as "money paper," and there is, contrary to the general impression, no secret in either the process or formula. Reliance against imitation is placed on the skill required, and on the fact that the machinery essential to production is costly, massive, and not easily capable of concealment. These, with the aids of the well-known silk fibres and the statutory provisions against its unauthorized manufacture and possession, offer the chief protection against counterfeiting; and it is acknowledged by the secret service that the Crane paper itself is a greater safeguard to the treasury than the intricacies of design and engraving.

The making of papers was undertaken by the Cranes at Dalton, Mass., in 1801. One of the mills of this plant is now known as the government mill, and while its operation is entirely in the hands of the Crane Company, it is at all times under the supervision and scrutiny of treasury officials. The representatives of the department on duty there are a superintendent; a register, who is responsible for the accuracy of the count, sheet by sheet; three expert counters, and five watchmen, whose shifts of duty cover both day and night.

Pure water is essential to the making of all high-grade linen papers, and for "money paper" the supply is drawn from the natural springs in the vicinity of Dalton. The popular superstition that old rags, gathered from household and gutter, eventually become paper, would find nothing to support it within the walls of the government mill, for "the stock" from which "money paper" is made consists of pure linen, and is obtained in large quantities from the linen manufacturers of Ireland.

It takes the form of factory cuttings and odds and ends of good cloth, and its conversion presents the queer spectacle of money being literally made from the scraps and leavings of an industry, the main object of which, of course, is to make money. These cuttings are first examined by young women. All foreign matter, including colored selvage threads, is removed with the utmost nicety and they are then reduced to small bits.

As an evidence of the reliance upon hand and eye yet to be found in an age of machinery, it may be noted that the pieces are cut to the required size by the primitive fashion of passing them, one by one, over blades resembling, if not actually like, those of mowing scythes, fastened to the sides of a long table. This affords a second examination for extraneous matter, and the rags, in their diminutive form, are thrown into a "fanning machine," that all trace of dust may be removed; after which they are blown helter-skelter through a magnetized pipe, the sides of which attract and hold stray particles of metal. Then comes what is known as "scrubbing," in reality a bleaching process. This is done by boiling the linen for hours, with a diluted chemical solution, in large revolving steel cylinders, and is made necessary by the lack of uniformity in original color as well as the desire for absolute cleanliness.

From this bath the selected rags are thrown into large tanks, known as "beating engines," fitted out with huge, revolving, merciless arms, the effect of which is to convert the material into one fibrous mass. The clear water of the Berkshire hills here lends its assistance, and so thoroughly is the loom's work disintegrated that the hand is unable to grasp and retain the wet, delicate threads. The mixture is drawn off into draining vats, taking on a snowy whiteness as the moisture leaves it, and is thus left until required from time to time as food for the huge "paper-making machine."

A formidable piece of mechanism is this machine, nearly two hundred feet long, slow of movement, but thunderous in sound as it stretches the many joints that make up its ponderous length. It begins with a "mixing box," in which the linen is churned with water, and from which it is allowed to ooze through a narrow slit. It spreads out upon an endless belt of wire gauze, which allows the water to pass through and holds the linen in a thickness regulated by the flow from the opening.

At this stage the short ends of many-hued silk threads are sprinkled from regularly spaced tubes, that they may become firmly embedded in the body of the sheet. As the gauze belt moves in its course it passes over a series of suction pumps, which withdraw more and more of the moisture, until, when the end of the circuit is reached, the paper has sufficient body to be lifted to a second endless belt of woolen stuff, and is thus brought to the first of numerous rollers, set in pairs and heated by steam.

The object of these rollers is, of course, to squeeze out all remaining moisture and to exert enough pressure to bring the mass down to somewhat the desired thinness. Among them, however, for papers to be used for checks and stamps, there is placed a roller familiarly styled a "dandy roll," which imparts the water mark. The "dandy" is a cylinder of wire gauze, with the water mark design attached to its surface in raised letters, and these pressing into the soft sheet make the paper thin at the points of contact, to be plainly seen in the finished product by the familiar trick of holding it between the eye and the light. The government water marks are the simple monograms, "U. S. T. D." for check papers, "U. S. P. D." for postage stamps, and "U. S. I. R." for internal revenue purposes. The colored silk threads take the place of this device in "money paper."

When the faintest trace of moisture has disappeared with the passage of the paper between the last pair of rollers, it is ready for the "sizing," which, in factory term, gives it "life," and renders it somewhat proof against the wear and tear of its after career, besides lending it a surface

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

suitable for printing. The government formula for "sizing" is a part of the contract, and refuse bits of raw or untanned skins of cattle form its basis. After a bath in this glue-like liquid, "money paper," after passing through the "cutting" machine, where it is automatically cut into sheets and counted, is "loft-dried," in distinction from the treatment accorded ordinary papers of being dried by means of "finishing rolls."

The government's anxiety begins with the "cutting" machine, which divides the paper into sheets four times the size of a government note, and registers their number as they fall into piles. The expert counters verify the record, the damp sheets are carried to the drying lofts and stretched over wooden rods, and steam heat is slowly applied. This method leaves the paper in a wrinkled condition, with very much the appearance of "rough-dried" clothing that has been starched, and the further process of ironing is again distinct from the usual mode. It is known as "plate finishing," and consists in placing the sheets, few at a time, between thin iron plates and passing them backward and forward under a pressure of many tons.

A minute examination then takes place and a searching quest is made for surface and textural defects or discolorations. The rejected sheets are to be again "beaten up" and properly accounted for on the records; the perfect ones are counted and recounted, tied in packages of one thousand, and deposited in locked boxes holding twenty thousand each. An armed guard then delivers these boxes to the express company responsible for their safe transportation to Washington. CONRAD MURAT STRONG.

In the *New York Evening Post.*

Legation Women see Dowager Empress.

THE reception of the ladies of the various legations by the empress dowager, the emperor and empress, and members of the court, February 1, was a striking ceremony. The party was limited strictly to the legation ladies and their children, and numbered twenty-one. There was one interpreter for each legation. Baron Czikann de Wahlborn, the dean of the diplomatic corps, conducted the women to the throne from the crowded ante-room.

Here Mrs. Conger, the wife of the American minister, who is the head of the women of the corps in point of service, stepped forward and, addressing the empress dowager, said:—

"The ladies of the diplomatic corps respond with pleasure to your invitation to an audience. They heartily congratulate you and all the members of the court that the unfortunate situation leading to the abandonment of your beautiful capital has happily passed away, and that you are now permitted to return in freedom and peace. Your safe return to an undestroyed home will furnish pages for future history which cannot be comprehended now. The events of the past two years were necessarily as painful to you as to the rest of the world, but the sting of your sad experiences it is possible to eliminate, we hope, by the establishment of more frank, more trustful, and more friendly relations with foreign peoples. The world is moving forward with a progress that it is impossible to stop, and it is to be hoped that China will join with the greater sisterhood of nations in the grand march. May the nations in unity manifest forbearance, respect, and good-will in the progress toward mutual good results. Recent edicts promise good for your people and your empire. Our prayer is that God may preserve you and the emperor, and guide this promise to fruition."

In reply to this the empress dowager said:—

"*Ladies:*—The presentation of this united address has given me deep pleasure. Dissensions in the palace last year resulted in a revolution and our flight, but I am glad that our return causes rejoicing both in China and abroad. I trust that Mr. Conger is well. Ladies, I am fortunate to be in your presence and hear good wishes for China's prosperity. As a proof of sincerity henceforth our friendliness shall grow more and more secure and we guarantee peace. We desire happiness to each one of you during your residence in China."

Among the American ladies present were Mrs. Conger, Mrs. Bainbridge, Mrs. Brewster and daughter; and among the English Mrs. Bower and Mrs. Mayers. After the presentation of the women and children to the empress dowager, the latter gave them presents of jewelry and trinkets. She removed her own coral necklace, pearl ring, and bracelets, which she presented to Mrs. Conger with apparent grief for the past troubles.

Li Lien Ying, the notorious eunuch master of ceremonies, displaced Baron Czikann at this point and escorted Mrs. Conger to the feast. There were two tables. Emperor Kwang-Su sat at the head of one and the empress dowager at the other. Chinese acted as interpreters for Baron Czikann. The interpreters of the legation were entertained elsewhere. The reception was characterized by enthusiastic hospitality on the part of the Chinese. This was the second time that foreign women were received by the court, and the political consequences, it is believed, will be of the greatest importance in influencing the world in favor of the empress dowager and showing the social significance, power, and importance of women in Western lands.

Mrs. Conger, who made the address to the empress dowager, was the only woman present who went through the siege. Her address was given with force and made a pronounced impression. The empress dowager wept over her hands in acknowledging the errors of the court.

The empress dowager has issued two edicts of great importance, one provides that Manchu young men from each of the eight banners, to which all Manchus belong, shall be educated abroad. Heretofore only Chinese received the benefit of foreign education. It is understood that Yung Lu has sent a memorial to the throne. It is believed that he recommended that all the princes should be sent abroad, the younger ones to be educated and the older ones to travel.—*Boston Transcript.*

The Seat of the Intellect.

A MAN in a hospital in New York last week had a portion of his brain taken out entirely and he has recovered consciousness and will get well. The surgeons of to-day have cut away the stomach and men live without them; they have cut away one kidney and men live without it, and now they have cut away the brain and men live without them. We begin to wonder what is really essential to man; that the brain is the seat of the intellect is the commonly accepted theory, but if parts of it be taken away and the mind remains perfect, we get apprehensive that we have misplaced the mind.

It may be possible, after all, that the mind is like the soul, without an exact seat in the body. It may be that it acts through the brain nerves and blood vessels, but it is not certain that we think with the brain any more than we think with the hand, or the foot, or the heart.

Many a well-rooted belief has been torn up by the discoveries of modern science, and the brain theories may have to be reformed. Certainly if a part of the brain can be amputated without impairing the intellect, there will have to be a new theory of brain uses.—*Birmingham Ledger.*

It is easy enough to make too much of the outward and visible side of religion. We may think so much of the visible portion of the church as to forget that larger invisible portion of it which is beyond the veil.—DR. LIDDON.

The Lectures.

At Syracuse, N. Y.

Carol Norton, C.S.D., of New York, spoke on "Christian Science as Applied Christianity" at the Alhambra, Sunday afternoon, February 2. In the face of the fiercest storm of the season there was present an audience of fully one thousand. Former Attorney-General Theodore E. Hancock introduced the lecturer in the following words:—

I am not an advocate of the doctrines or familiar with the teachings of Christian Science. I, however, recognize the fact that it has a million adherents and that their number is increasing. I have been requested to introduce to this audience one of the most eloquent and sincere of the followers of Christian Science. The words which have been selected as indicative of their belief suggest to me, perhaps, a different line of thought from that which will be followed by the gentleman who will address you. There was a time when many good people looked with fear and trembling upon scientific investigation as something which might tear down the bulwarks and undermine the foundation of their faith. They have since learned that no honest investigation will destroy what is worth having in any religion. Now that the sun has fairly risen above the horizon of the twentieth century, the clouds of dogmatism seem to be disappearing, and there is a more generous faith and a broader charity than ever before since the dawn of creation. The Jewish rabbi, the Catholic priest, and the Protestant clergyman have discovered that they can speak from the same platform without contamination or religious disintegration; and some of the members of the different schools of medicine have learned that they can consult with each other to their mutual benefit and advantage. The man who believes that only he and those who look through his spectacles are right, and that every one else is wrong is far behind the times.

Ever since men began to reason and think upon religious questions there has been too much violent and bitter controversy over technical and immaterial differences of opinion. If we are traveling the same road toward the celestial city and are striving to enter the same gate, it is not necessary that we should all ride in the same vehicle or throw stones at others who have adopted a different conveyance. The Ten Commandments and the Sermon on the Mount contain more spiritual food and moral tonic than all the theological works that ever were written. The Christian Scientists believe, as I understand, that their faith makes them better and happier. They have no quarrel with those who hold a different opinion. This is in precise accord with the theory of our republican institutions and democratic form of government, which provides that the free exercise and enjoyment of religious profession and worship, without discrimination or preference, shall be allowed to all mankind. I have the pleasure of presenting Carol Norton, who will now address you.

Syracuse (N. Y.) *Journal.*

At Cocoanut Grove, Fla.

It is with grateful hearts that we send to the Field a report of our first lecture on Christian Science by Judge William G. Ewing of Chicago, on Thursday evening, January 23, 1902, in this beautiful southland where so many tourists come every winter seeking health and happiness. Having had regular services for a number of years with an average attendance of twelve, we felt that we ought to demonstrate a lecture, and realizing that God was the source of supply we went to work with thirty-six dollars saved from our collections for a lecture fund.

Each one did what he could, and all worked together in perfect harmony. We know that much good will come from the effort we have made to let our townspeople know what Christian Science really is, and we rejoice that we could have our Cause so ably presented to them.

Owing to our remoteness (being three hundred and seventy miles south of Jacksonville) our expenses, including everything, were one hundred and six dollars. We were able to meet every need and have a few dollars left in our treasury.

MRS. JESSIE S. MOORE.

The Cocoanut Grove correspondent to the *Miami* (Fla.) *Metropolis* referred to the occasion as follows:—

"It was a great day, or rather night, for the Christian Scientists of the Grove on the evening of January 23. Judge Ewing of Chicago, had been advertised by the Society to give a lecture explaining what Christian Science really is, its belief, its source of inspiration, and its practical application. Long before the opening hour the Housekeepers' Club room commenced filling up. The room had been artistically decorated with evergreens, and chairs plentifully supplied and placed, and by the time the opening hour arrived the house was packed. The beauty, the chivalry, the brain, the brawn, the strength, and the muscle of our community were there, reinforced with a large number of tourists and a number of carriage loads down from Miami. We have three resident ministers in the Grove and vicinity, and we noticed they were all there with their families, interested and attentive listeners. Judge A. A. Boggs had been requested to introduce the speaker, and did so in a few well-turned sentences. Judge Ewing stepped before his audience, and from the very first it was easy to see he was no novice. His legal training as he proceeded was at once apparent—earnest, logical, and analytical. He rapidly laid down the ground-work of his lecture and then proceeded to draw his deductions. Without any attempt at oratory he held the attention of his audience from the start, and rarely has a speaker the compliment to so close and undivided attention as was given Judge Ewing."

At What Cheer, Ia.

A fair-sized audience greeted Mr. Edward A. Kimball of Chicago, at the Masonic Opera House last Monday evening, January 20. The lecture was given under the auspices of First Church of Christ, Scientist, of this city, and the subject was "The Cause and Cure of Disease." J. C. Beem, LL.B., introduced the speaker with the following remarks:—

That which is not open for discussion is not worthy of belief. The most important question which men try to solve is the relation of man to God. Whatever theories may be held as to the attributes of God, as to a future life, or as to religion in general, men have always sought the true solution of this problem and are seeking it to-day, the same as they have done ever since the infancy of history.

Said one: "Where the Spirit of the Lord is, there is liberty." This includes liberty to differ, liberty to discuss, liberty to analyze and compare. Pardon the conclusion from one who feels but poorly equipped to advise, but that conclusion is that anything short of the fullest, the freest, the fairest discussion is not the "liberty of the Lord." No discussion that seeks merely to convince is worthy of the name. If after due discussion and trial, Christian Science is found to be right, it will dominate the world; if after the same tests, it is found to be wrong, it will utterly fail. Its votaries invite the fullest discussion of its teachings, and this warrants the belief that its true status will soon be known. Until that time, let us say as we do in all other matters, the truth must prevail. Back of this movement stand thousands of the best and most thoughtful men and women of the world, and they invite inspection of a record of over one million cases of healing, many of which are

Digitized by Google

claimed to be of cases abandoned by those who use the ordinary means. They claim no apostolic succession, they formulate no creed, but they point to the words and works of Christ and his promise to them who should follow him. Bespeaking for the gentleman who will address you to-night the same impartiality, the same courtesy, and the same firmness of criticism that would be extended to the expounder of any other science, I have the honor to present to you Mr. Edward A. Kimball of Chicago, member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston.—*What Cheer* (Ia.) *Chronicle.*

At Chicago, Ill.

Mr. Edward A. Kimball lectured at First Church of Christ, Scientist, of Chicago, January 31, and in addition to the people occupying the fifteen hundred seats, nearly a thousand stood throughout the lecture, and several hundred, possibly a thousand, were turned away because of lack of room. Mr. John H. Cameron, First Reader of First Church, introduced Mr. Kimball as follows:—

Ladies and Gentlemen:—Two questions, transcending in importance all others, are to-day being presented to the human mind, and are quietly forcing themselves upon the attention of the thinking world. The first is, "What is Christian Science?" and upon it rests the second, "Is it true?" The answers to these queries are filled with deep significance for us, for our fellow-man, for humanity.

The claims made on behalf of Christian Science are familiar to you; and in common with all those who thoughtfully and seriously view any subject whose purpose is manifestly good, you have, no doubt, examined and weighed with some care such evidence upon this topic as may have come to your notice. Perhaps you have heard of the healing through this means of an invalid of your acquaintance and his restoration to a life of usefulness after years of sickness; or the reclaiming of a drunkard from a life of hopeless degradation. Some incident has arrested your attention, but you have rejected the hope it includes and exclaimed, "The day of miracles is past!" But the testimony accumulates; it comes nearer to you, and thought whispers, "Perhaps it is true; perhaps the promises of God scattered throughout the Scriptures, giving assurance of protection, care, and aid, and expressing tender solicitude for His people, are of living interest to me to-day; it may be that God *is* "a very present help in trouble!"

To answer this questioning spirit a Board of Lectureship was created by those in authority. The gentleman whom we shall now hear is a member of that Board, and is qualified to speak upon Christian Science by virtue of his having been healed through its agency, and having given some sixteen years to its study and practice.

It is now my great pleasure to introduce to you Mr. Edward A. Kimball.

At Jefferson City, Mo.

The lecture given by Judge William G. Ewing on Christian Science at Lohman's Opera House Friday night, January 10, was listened to by an audience of greater proportions than usually turns out in Jefferson City to hear discussions of economic, scientific, or religious subjects. The Opera House was comfortably filled. The speaker was given the closest attention throughout his discourse, and this lecture in Jefferson City will, no doubt, be instrumental in leading many to investigate the subject on their own account.

Hon. F. M. Brown introduced Judge Ewing in a short but well-worded talk. Mr. Brown said it gave him much pleasure to present to the citizens of Jefferson City a distinguished citizen of a neighboring state,—a lawyer and jurist of recognized ability and power, who had given the subject of Christian Science thorough investigation. "We may expect a rare treat, both entertaining and instructive. I have the pleasure of introducing to you Judge William G. Ewing of Chicago."—*Jefferson City* (Mo.) *Republican.*

At Clinton, Mass.

On Monday evening, January 27, an assembly of some four hundred, including friends from Worcester and elsewhere, gathered in Bigelow Hall to hear Rev. William P. McKenzie of Cambridge discuss Christian Science. The speaker is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, and spoke from a deep and personal experience.

The chairman of the meeting was Edwin A. Harris, a former Clinton resident but for thirty-three years a resident of Boston. For many years he was an active member and a deacon of Park Street Congregational Church of that city, but a practical test of the value of Christian Science, in its power to heal, induced him to enlist in its cause. Mr. Harris made brief personal and introductory remarks, vouching for the benefits which an adoption of the truths of the faith is competent to bring to the sorrowing in mind and the suffering in body—concluding by presenting to the audience the speaker.—*Clinton* (Mass.) *Item.*

At Janesville, Wis.

Dr. Silas J. Sawyer, C.S.D., of Milwaukee, delivered a lecture on Christian Science at Myer's Opera House, Tuesday evening, January 28. He was introduced by Attorney Marshall P. Richardson, who said in part that Dr. Sawyer was one of the oldest students of Mrs. Eddy in the West, and for many years First Reader of First Church of Christ, Scientist, Milwaukee; and also that he was a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., and thus could speak with authority.

Dr. Sawyer's subject was "The True Sonship of God," and the lecture was attentively listened to by the audience, many of whom were from out of town, Rockford, Beloit, and other nearby towns being well represented. The general opinion prevailed that it was a clear and able presentation of the subject.—LIZZIE E. COWLES.

Science is Knowledge of God.

DR. ALEXANDER MCKENZIE, a member of the Board of Overseers of Harvard University, recently conducted the Sunday services at the University of Pennsylvania. His address in the morning was based on this text from Jeremiah: "Let him that glorieth glory in this, that he understandeth and knoweth me, that I am the Lord which exercise lovingkindness, judgment, and righteousness, in the earth: for in these things I delight, saith the Lord." He said,—

"That life is very barren which has nothing in it to which the individual may look back and be proud of. There are things, I hope, in all our lives of which we are proud and glory in. But do we all glory in the knowledge of God? This knowledge is not acquired by the ordinary processes of learning. It is not found by study. Yet we have the same nature as God. We can hold communion with Him. We have the same tastes, motives, and desires so far as we keep to the original. A young man has no reason to be discouraged. Some maintain it is impossible to know God. That man is conceited and superstitious. Superstition never grew out of religion. They never dwelt in the same house. God wants to be known. He makes himself known. He has revealed Himself to us.

"Bacon says, 'Praise is the tribute of men, felicity the gift of God. God alone can make you divine. God is love, justice, and righteousness.'

Digitized by Google

"If we acquire this highest of all knowledge we shall be proud of it and exult in it. Without this knowledge our education is superficial. We study science. We glorify in it. Science is nothing but the knowledge of God's ways of doing things. Science is superficial unless it acknowledges the Maker. The man who knows the ways of God should know God himself. Science means to know. When a man knows nothing about a thing he is unscientific. To know the spiritual is a very high thing. You throw away everything else and use all your strength to accept Christ, who was God's last revelation. Religion is the grandest thing in the world. Make men know God and His will and the country will have honest, upright citizens."

Philadelphia Times.

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

Perpetual Youth.

'Tis yet high day, thy staff resume,
And fight fresh battles for the truth;
For what is age but youth's full bloom,
A riper, more transcendent youth?
A weight of gold
Is never old;
Streams broader grow as downward rolled.

At sixty-two life has begun;
At seventy-three begin once more:
Fly swifter as thou near'st the sun,
And brighter shine at eighty-four,
At ninety-five
Shouldst thou arrive,
Still wait on God, and work and thrive.

OLIVER WENDELL HOLMES.

No man can learn what he has not preparation for learning. . . . Our eyes are holden that we cannot see things that stare us in the face until the hour arrives when the mind is ripened.—EMERSON.

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should *not* be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Notice.

OUR Reading Room at the Christian Science Hall in Concord, N. H., is open as usual. All are cordially invited to visit it for the purpose for which it was established. This hall is our only place, at present, for Sunday services; and it is not used as an office except for local patients.

Some compilations in form of manuscript, purporting to be my old original copies, are in circulation and for sale. I hereby notify the public that said copies, which I have seen, are not in my handwriting, and they contain much that is borrowed from my copyrighted books. I credit Christian Scientists with sufficient wisdom not to purchase anything of the kind. MARY B. G. EDDY.

Pleasant View, Concord, N. H., February 14, 1902.

Christian Science and Universalism.

IN our article under the above heading in last week's *Sentinel* we referred to Dr. Laing's criticism on the "Science" side of Christian Science, and thus concluded our article:—

"His criticism is chiefly that her system is deductive instead of inductive, which, he says, is contrary to the scientific method and is the reason why students of science have had so much difficulty in understanding Mrs. Eddy's writings. This criticism, though fair and kindly in its terms, involves so much that we cannot consider it now for want of time and space. We shall endeavor to make it the subject of another article. Meantime, we submit to our friend whether, after all, it is not truly Scientific to lay the premises in Creation and deduce the created therefrom; in Spirit and deduce the phenomena of matter therefrom; in God and deduce the universe and man therefrom, rather than the reverse. This is what Mrs. Eddy does, and herein, as the students of her system think, she has sounded the very key-note of the true method of Scientific reasoning. Surely it was the method of the Bible writers, and the Bible is *the* Scientific Book of the world. It was Jesus' method, and he was *the* Scientist of the world."

We shall now briefly endeavor to meet some of the objections urged by Dr. Laing. We re-quote his remark that "Mrs. Eddy's form of religious belief, as distinguished from science, is simple and of easy application. But of the science feature as much cannot be said." Dr. Laing then proceeds:—

"If the scientific world is fully agreed upon any one thing it is the inductive method; a system of investigation by which the student begins with ascertained facts and works his way upward to the principles which invite and explain them. Christian Science is the only science, claiming the name, which does not employ this method. It is purely deductive, assuming its principle and explaining all facts so as to make them correspond with it. For this reason students of science have had great difficulty in understanding Mrs. Eddy and her arguments. Many of them maintain that her use of the word 'science' is misleading and unwarranted. It appears so to me. I have read her book, Science and Health, repeatedly, and have tried to sift out of it the author's meaning, but am not quite sure that I have succeeded. A few matters, however, are reasonably clear. She claims to have derived her theory, *i.e.*, the substance of her faith, wholly from the Scriptures.

"But her treatment of the Bible is certainly very unscientific. She handles it as if it were a single book—a perfect unity in authorship, composition, and contents—instead of a library of more than three score books bound together in a single volume. The student of science must be excused for doubting whether any rule of interpretation can be applied indiscriminately to all these books alike, prose and poetry, history and prophecy, biography and epistles. It would be passing strange if it were so, and in my humble judgment it involves a burden of credulity which the scientific mind will be slow to accept."

From the ordinary scientific method Mrs. Eddy, as we stated in our last article, does differ. God is her one premise. All else is conclusion deduced from that premise. In her writings she reasons from God downward in the line of His creation. She reasons from Spirit as premise to Spirit's emanations as conclusion. Her one great contention is that the emanations or creations of Spirit must be like unto Spirit; they cannot be Spirit's opposite; Spirit cannot reflect, give forth, nor create that which is apart from or unlike Spirit. We can conceive of no sounder or simpler logic than this. Spirit as God is All-powerful, All-present, All-wise. This our Universalist friends and all believers in God admit. What possible scientific objection therefore can there be to making any deduction possible to be made in connection with creation, from this one great premise? What method so sound as this? It seems to us a careful and correct analysis of the following text of the Christian Science text-book, "Science and Health with Key to the Scriptures," answers most conclusively the objection that Mrs. Eddy's method is not scientific from the standpoint of the true spiritual science. We do not claim that it is correct according to materialistic methods of science, and if this is the only ground of objection we have nothing to discuss with objectors. Following is the text referred to:—

"Spirit is infinite. There is but one Spirit, because there can be but one Infinite, and therefore but one God. There are neither spirits many, nor gods many. There is no evil in Spirit, because God is Spirit. The theory that Spirit is distinct from matter but must pass through it, or into it, to be individualized, would reduce God to dependency on matter, and establish a basis for pantheism.

"Spirit, God, has created all, in and of Himself, Spirit. God never created matter, for there is nothing in Spirit out of which matter could be made; for, as the Bible declares, without the Logos, the Wisdom or Word of God, 'was not anything made that was made.' Spirit is the only Substance, the invisible and indivisible God. Things spiritual and eternal are substantial. Things material and temporal are insubstantial" (pp. 334, 335, New Edition).

As to the objection that Mrs. Eddy's treatment of the Bible is unscientific because "she handles it as if it were a single book—a perfect unity in authorship, composition, and contents—instead of a library of more than three score books bound together in a single volume," we have to say that Christian Scientists see such continuity of thought in the Bible, spiritually interpreted, that to them it is truly a single volume. The great key-note of the Bible is the Mosaic Decalogue and the Sermon on the Mount. The spiritual understanding of this key-note gives a perfect tone of harmony to the entire Scripture. The Sermon on the Mount is but a reaffirmation or elaboration of the Mosaic Decalogue, and these two sound the spiritual depth of Scripture. The Psalms, Proverbs, the Gospels, Revelation, etc., all have their basis in the Mosaic Decalogue, and, spiritually considered, are but so much enlargement upon and illustration of the great divine law therein enun-

Digitized by Google

ciated. The Christian Science text-book, moreover, goes back to the first chapter of Genesis as the true spiritual account of creation, and this account, in its real essence, throws a flood of light upon the entire Scripture down to the last sentence of Revelation. While Christian Scientists accept the historical part of the Bible in the same way that other Bible students accept it, they do not much trouble themselves with the seeming discrepancies, for they become, from their point of view, non-essential. The spiritual meaning of the Bible is to them the all-controlling thing. Upon this point Mrs. Eddy says:—

"The divine Science taught in the original language of the Bible came through inspiration, and needs inspiration to be understood. Hence the misapprehension of its spiritual meaning, and the misinterpretation of the Word, in some instances, by uninspired writers, who were only writing down what an inspired teacher had said. A misplaced word changes the sense and misstates the Science of the Scriptures; as, for instance, to name Love as merely an attribute of God; but we can, by special and proper capitalization, speak of the love of Love, meaning thereby what the beloved disciple meant in one of his epistles, when he said, 'God is love.' Likewise we can speak of the truth of Truth, and the life of Life; for Christ plainly declared, 'I am the way, the truth, and the life'" (p. 319, New Ed.).

She adds: "The one important interpretation of Scripture is the spiritual." This text fairly indicates her attitude toward the Scriptures. Her interpretation of Scripture from this point of view enables her to make the practical demonstrations—and to teach her students how to make the same—in healing sin and sickness which have become an inherent part of the Christian Science movement. We submit to our friends whether or not the practical results which have been thus far accomplished through Mrs. Eddy's method of Scriptural interpretation do not justify the claim that her interpretation is correct. That understanding of Scripture which produces the most beneficial results and which goes furthest in removing the sorrows and discords of mankind may legitimately, to that extent at least, be said to be the best and highest understanding. If healing disease, overcoming sin and thereby uplifting the human race in the scale of being may not properly be termed scientific, from the Scriptural standpoint of Science, then we are at a loss where to look for that which is scientific. Mrs. Eddy refers to Jesus as a Christian Scientist. She expressly says of him that he "was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found their spiritual cause" (Science and Health, p. 313, New Ed.). Having found their spiritual cause, Jesus did all his work, both healing and teaching, from that standpoint. It is fair, therefore, to assume that all his reasoning was based on God as Spirit, and that his conclusions drawn from that source related to the spiritual.

This is a very general review of the teaching of Christian Science in its scientific aspect. It is hoped that it may aid our friends, who raise the objection we are considering, in their further search for the "science" of the Christian Science text-book.

Dr. Laing further remarks: "When we advance from the source of her science to the science itself, we find that Mrs. Eddy rests her claim largely on the power of the true religion to heal all manner of diseases, and deliver man from all worldly trouble and distress. She repudiates doctors and drugs; but does not believe in the prayer cure of Dowie and his followers, nor the mind cure of the mental scientists. Her idea is far more radical than theirs, for she denies the reality of a physical body, and hence, in her view, sickness is a delusion, a morbid condition of mind, a perversion of the spirit. In reality, people are never sick; they only think so: they do not suffer; they only imagine it."

Here Dr. Laing shows his mistaken conception of Mrs. Eddy's position. This is what she says of disease: "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. It is more than fancy, for it is solid conviction. It is therefore to be dealt with through right apprehension of the Truth of Being" (Science and Health, p. 460, New Ed.).

A careful perusal of the text-book in the light of this text will convince the investigator that on the human plane sickness is as real as it is claimed to be by any of our outside friends, but considered from the standpoint of God as Spirit and man as God's image and likeness, sickness is not real, because that which truly reflects God as perfect Spirit cannot become subject to such discords and inharmonies as come under the head of sickness and disease. Sickness pertains to mortals, or to man in his mortal estate, but it does not affect the real immortal man, who is the eternal idea of God or Spirit. It is this understanding of God and man that enables the Christian Scientist, through realization and prayer, to destroy sickness and sorrow. If he made sickness real from this point of view, he could not heal it nor destroy it.

In the light of this definition we think our friends will see that it is not a fair analysis of the teachings of the Christian Science text-book to say that people only think they are sick and only imagine that they suffer.

Dr. Laing's conclusion that "the unavoidable inference from her [Mrs. Eddy's] argument is that fire will not burn us, cold will not freeze us, water will not drown us and even illuminating gas will not smother us when we have ceased to be afraid of them" is not a correct interpretation of her teachings. What she teaches is that the real immortal man, who correctly represents the Science of Being, is not subject to the material laws referred to. If he were, it would destroy the very idea of man's immortality. It would lead to the only legitimate conclusion possible, that mortal man—the man of sickness, sin, and death—is the only man there is. We do not imagine that our Universalist friends or any other believers in immortality are willing to stand upon this ground. Such a conception, if true, would destroy immortality. The same divine law, fully understood, which saved the three Hebrew children from the fiery furnace would save men to-day. That is the extreme limit of Mrs. Eddy's claim, and who shall say that it is not a strictly Scriptural claim?

Dr. Laing is also mistaken in his claim that mind cure, faith cure, and Christian Science all work in the same way.

This is sufficient evidence to every student of Christian Science that however frequently Dr. Laing has read the Christian Science text-book, he has fallen far short of understanding its teachings. This being true, Christian Scientists cannot, of course, consistently recognize in him a competent critic. When he, and other like critics, reads Science and Health with such an understanding that he is able to prove its teachings in healing the sick and doing the other works which he admits that Christian Scientists do, he will then be in position to criticise intelligently and to speak authoritatively. Until then, we must say, in the most kindly spirit, that he should withhold judgment and criticism lest he mislead some whom he would desire to help, and thereby prevent them from receiving the benefits of Christian Science which we know, as a Christian, he would be glad to have them receive. We feel sure he would not for a moment wish to prevent a suffering invalid, who has been given over to death by the physicians, from being restored to health and happiness through the ministrations of Mrs. Eddy's teachings. We feel sure, moreover, that he would not stand in the way of sinners being saved and reclaimed from sin through her ministrations. Knowing and admitting, as he does, that such things have been accomplished through Christian Science, we are not quite able to see the consistency of Dr. Laing's criticisms of an adverse nature. His objection to the Sci-

Digitized by Google

ence of Christian Science, seems to us to be merely technical, from the standpoint of material philosophy.

Dr. Laing, as we have said, refers in a kindly spirit to Christian Science as a whole, and he also speaks of Mrs. Eddy in like spirit. This friendly attitude is deeply appreciated by all Christian Scientists.

Among the Churches.

Christian Science in Chillicothe, Ill.

"Where is the wise? where is the scribe? where is the disputer of this world? hath not God made foolish the wisdom of this world?"

This verse in Scripture seems daily more true when one sees what remarkable work there is done through Christian Science, or a true perception of the Bible, such as Christian Scientists gain by the study of their text-book, "Science and Health with Key to the Scriptures."

From all parts of the civilized world we get tidings wherever a few are gathered in his name, and are demonstrating this great Truth, the power of "God with us" in healing the sick, and reforming sinners.

At a testimonial meeting held at First Church of Christ, Scientist, in Chillicothe, Ill., one of our prominent business men spoke of his remarkable healing through Christian Science. This is what he said: "I have known about Christian Science for some fifteen years. For eight years I ridiculed it, made fun of it, or what I thought it was, until some seven years ago, I was obliged to go to a Christian Science practitioner for help, having exhausted the skill of the best oculists I could find. I soon learned that it was indeed a healing power, not to be ignored; that its work was indeed effectual, inasmuch as my eyes that had troubled me for more than ten years were completely healed. Since that time my eyesight has been perfect and I have no use for glasses, being able to read the finest print without difficulty, and using my eyes as much as I please without experiencing any fatigue."

This healing caused him to investigate this new dispensation and read its literature. He said he at once bought all the books on the subject he could find, and in perusing the text-book, Science and Health, he lost all appetite or desire for tobacco and intoxicants, to which he had been addicted for twenty years. He said he felt most thankful for all the physical benefits he had received, but the spiritual uplifting, the regeneration that took place, could not be expressed in words. He also spoke of the good he had experienced from reading an article in "Miscellaneous Writings" by Mrs. Eddy, entitled, "Love Your Enemies." He advised those who did not own a copy to procure one at the Christian Science Reading Rooms.

Another case was that of a lady who testified that before becoming acquainted with Christian Science she was troubled with very severe colds and more especially with coughs which would last for weeks, and which had caused such an exhausted physical condition that she had frequently been obliged to abandon her work, which was that of a teacher in one of the public schools. Her physicians could give her no encouragement; in fact, one said that the only alternative was to have it wear itself out. So in her extreme distress, she turned to Christian Science and she is pleased to state that she not only received relief in this case, but has also been cured of rheumatism and the fear of catching cold. She further added that by the help of this Truth she had laid aside her glasses, which she had worn constantly for ten years, her eyes being perfectly healed, and that her gratitude to Christian Science was inexpressible.

Another lady testified that previous to coming into Christian Science her little boy, then six years old, was sorely afflicted with chronic throat trouble and had suffered very much from this disease. She recalled the time which seemed most vivid to her memory, when she was compelled to call in a specialist on throat diseases three times in one day. Shortly after beginning the study of Science and Health, the Christian Science text-book, the child had a similar attack when he refused all nourishment, so severe was the manifestation. At that time she had not a understanding of Christian Science, and was somewhat in doubt as to its healing efficacy; she however took up the Christian Science text-book, thinking that he might possibly find relief for the child. Only a short time after reading in the book the child exclaimed, "I want my breakfast," and to assure herself that Christian Science had really proven a help in time of need, she made an examination of the child's throat, and was glad to acknowledge to herself the quick and responsive remedy found in this new-old Truth. This was more than five years ago and there has been no recurrence of this trouble or any form of sore throat. M.

The Chillicothe (Ill.) *Enquirer.*

Newburyport, Mass.

Our growth here has been slow, the work going on quietly, there having been no wonderful cases of healing which have attracted widespread attention, as is the case in some Fields. But now slowly and surely we are growing into a higher realization of the ever-presence of the Truth which is Love, and the Love which is Life. For several years there were two Christian Science Churches here, which to some of us always seemed a mistake. To others, equally conscientious, it seemed the better way of serving the Cause. The members of both churches were loyal to their highest understanding of Christian Science, to their highest sense of obedience, and finally, as the desire for unity became more universal, one church disorganized, relinquished its charter, and for the last two years we have worshiped together rejoicing over another proof of Divine protection.

January 2, 1901, we completed our work of reorganization under the laws of the state, with a charter membership of twenty-eight. Our Sunday School numbers nine. The receipts from the sale of literature in our reading room, though small are sufficient to encourage us to press on, in this, as in every department of our work, knowing that it is God who giveth the increase.—SARAH T. PRIME.

At New Haven, Conn.

An important relation has been established between First Church of Christ, Scientist, New Haven, Conn., and Rev. S. E. Simonsen, C.S.B., in this, that the church has invited him to be its First Reader and he has accepted the invitation, identifying himself in this capacity February 2, 1902.

In consideration of the fact that Rev. Mr. Simonsen was a clergyman of the Methodist Episcopal Church for more than twenty-five years, it seems fitting that he should bring his long and valuable experience into God's service in this position in Christian Science.—LEWIS T. PERRY.

It is doing, not dreaming, that makes one a man.
If the plan isn't followed, of what good is the plan?
You may think, till you seem, in your rapturous zeal,
To rise, as if borne upon pinions; to feel
The stars sink beneath you, and, fanning your face,
Elysian zephyrs surround you in space.
That will not advance you. No flame of desire
Has ever sufficed to lift any one higher.
But doing, and doing, and doing again,
Though but little each day, yet each day all one can,—
With courage and patience, to God ever true,
'Tis a wonder what wonders a person can do.

A Defence of Christian Science.

Editor of *Homœopathic Envoy.*

Sir:—It seems almost needless to offer to reply to your questions in the December issue concerning the text-book of Christian Science, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.

The fact that the demand for this book continues and increases proves that it is satisfying a want in human hearts which nothing else has satisfied.

The success of the Christian Science movement is surely a rebuke to the materialism of the age. Physicians and ministers are earnestly striving in various ways to alleviate the burdens of suffering humanity; yet the One who said: "Come unto me, all ye that labor and are heavy laden, and I will give you rest," used the same blessed gospel both to heal the sick and to save sinners. Is it any wonder, then, that the world grasps eagerly at a return to the simplicity of this early faith which always was and is now proven by "signs following."

Mary Baker Eddy has shown by her life and her works that she is pre-eminently worthy of the confidence and tender love her students bear her. Those unfamiliar with the teachings of this new-old truth set forth in Christian Science should first give the matter honest investigation before offering criticisms. The critic whose deductions concerning Mrs. Eddy's literary style you so generously accept, deliberately misquoted some of her lines in his attempt to ridicule her teachings, thus showing his own animus and his inability to make out a case by honest methods. Mrs. Eddy's works have been studied for years by scholarly men and women, who are high in their praise of the lucid and yet profound manner in which she sets forth great spiritual truths.

Mrs. Eddy practised homœopathy a number of years before her search for absolute demonstrable truth led to the discovery of Christian Science. Her conclusions concerning this practice are set forth on page 153 of Science and Health, as follows: "The highest attenuation of homœopathy, and the most potent, steps out of matter into Mind; and thus it should be seen that Mind, or metaphysics, is the healer, and that there is no efficacy in the drug. This discovery leads to more light." ALBERT E. MILLER.

Philadelphia, January 13, 1902.

Christian Science and the Churches.

Editor *The World.*

In your issue of yesterday you published a reference to a sermon by the Rev. Dr. S. L. Norris, in which you say that he spoke "on the way the church was threatened by Christian Science," and your headline read "Menace to the Church." As one who has investigated this subject most thoroughly I ask you kindly to allow me a few words in behalf of our denomination.

If there are any man-made creeds, dogmas, and doctrines that cannot stand the test of modern research, enlightenment, and revelation they will have to go down, just as they have done through all the centuries, before the march of progress. Truth can never be destroyed, actuality can never be annihilated, and if what Dr. Norris calls "the Christian Church" contains anything that is not absolute truth, then that which is false will some time be supplanted by that which is true or by that which more nearly approximates divine truth, as has been the case in religion as well as in astronomy and the various sciences.

Christian Science is the science of Christianity, the restoration of primitive Christianity, or the Christianity of the Gospels as taught and practised by Christ Jesus and his disciples, reduced to a working basis and made applicable to all the needs of modern times. It is healing the sick and dying, reforming the sinner, comforting the sorrowing, freeing the hopeless from the bonds of incurability and fatalism, and bringing all into newness of life in Christ Jesus through a greater love to God and man and a clearer scientific understanding of the underlying principle of life and existence.

Christian Scientists are proving their faith by their works, and it is the practicability of Christian Science, the rationality and common sense of its teaching, and the results attainable thereby in every walk of life that are the cause of its enormous growth and the reason why so many prominent business men, ministers, physicians, lawyers, educators, authors, and thinking men and women in all the departments of human activity have accepted or indorsed it.

The history of the world shows that all progress has been opposed, sometimes even more violently than was the introduction of horse-cars into this good city of Baltimore. If this new-old religion, with its practical Christianity "threatens the life of the Christian Church," as the doctor avers, it must be because there is something lacking in this church; for the life, which is the true living God, and the church founded upon the rock of Christ-Truth, cannot be threatened. Jesus said, "Ye shall know the truth, and the truth shall make you free."

January 21. HERMANN S. HERING.
In *The Baltimore World.*

Looking Unto God.

I look to thee in every need,
And never look in vain;
I feel thy touch, Eternal Love!
And all is well again.
The thought of thee is mightier far
Than sin and pain and sorrow are.

Discouraged in the work of life,,
Disheartened by its load,
Shamed by its failures or its fears,
I sink beside the road,—
But let me only think of thee,
And then new heart springs up in me.

Thy calmness bends serene above,
My restlessness to still;
Around me flows thy quickening life
To nerve my faltering will;
Thy presence fills my solitude,
Thy providence turns all to good.

Embosomed deep in thy dear love,
Held in thy law I stand;
Thy hand in all things I behold,
And all things in thy hand.
Thou leadest me by unsought ways,
And turn'st my mourning into praise.

SAMUEL LONGFELLOW.

Stiles McMullen, the aged man who walked here from some town in Vermont last summer, continues to appear, it seems, and startle people with his wonderful age record. Here is something from the *Gorham Mountaineer* in regard to the aged traveler:—

"Isaac Woodsum of this place, while stopping at the Line House, Hereford, P. Q., last week, met an old gentleman 105 years of age, Stiles McMullen, born at St. Albans Bay, Vt., July 10, 1796. Mr. Woodsum says the old gentleman is hale and hearty, and does not appear to be more than seventy-five. He is cutting his third set of teeth, and among other things told Mr. Woodsum that he shook hands with President Washington.

Fret Not.

BY L. L. BOYD.

THE Bible says, "Fret not thyself because of evildoers, neither be thou envious against the workers of iniquity, For they shall soon be cut down like the grass, and wither as the green herb. Trust in the Lord, and do good." Suppose your brother-man does not always act as you think is right, are you raising the standard of purity any by returning evil for evil? "The wrath of man worketh not the righteousness of God." Acts of violence accomplish very little good. A Christian's duty is to promote peace and harmony all the time. "Peace I leave with you, my peace I give unto you," are the words of our Master to his followers. There is power in peace, but it seems Christ's followers are a long time in learning the meaning of his words.

"Great peace have they that love thy law: and nothing shall offend them." If we love God's word and ponder Christ's teachings in our heart, we shall not be offended by the evil deeds of others. God's Truth is mighty and will finally prevail over every evil. If one continually thinks of the evil in the world it will undoubtedly become a mountain before him, mystery will mount upon mystery until he will be overcome with the burden of it all. But God's people are told to forsake evil and it will flee from you. Turn away from it, keep your gaze on good things, think more about goodness than evil, believe more in a good power than an evil power.

If all Christians remembered and practised the first commandment and acknowledged no other god but the one Good, God, sin would eventually become unknown. We would then also keep that other commandment, "Love thy neighbor as thyself." We would overcome evil with good. We would have no desire for wrong practice, and we would be so much happier that others, seeing our *good* deeds, would be influenced thereby.

"Love worketh no ill to his neighbor: therefore Love is the fulfilling of the law." Love is God for "God is Love," and there is no power but of God. Then Love is the only power that can successfully and permanently obliterate evil.

"Why dost thou judge thy brother? or why dost thou set at nought thy brother? for we shall all stand before the judgment seat of Christ. For it is written, As I live, saith the Lord, every knee shall bow to me, and every tongue shall confess to God. . So then every one of us shall give account of himself to God. Let us not therefore judge one another any more: but judge this rather, that no man put a stumbling-block or an occasion to fall in his brother's way."

When the Pharisees brought the sinful woman before the Master for condemnation he said, "He that is without sin among you, let him first cast a stone at her," and they were convicted by their own conscience, and went out one by one. "And Jesus said unto her, Neither do I condemn thee: go, and sin no more." The command is imperative —Go, and sin no more. To another whom he had healed of physical disease he said, "Sin no more, lest a worse thing come unto thee." Their own actions contain the condemnation. Then Christians should spend more time teaching the good things of God, and less in antagonizing wicked people. Fill them with the beautiful Truth of the Bible and the desire for evil will vanish.

"See that none render evil for evil unto any man; but ever follow that which is good, both among yourselves, and to all men;" for "Love suffereth long, and is kind; Love envieth not; Love vaunteth not itself, is not puffed up, doth not behave itself unseemly, seeketh not its own, is not provoked, taketh not account of evil."

Evil is its own destroyer and the poor, misguided, shipwrecked brother who thinks he finds pleasure in sin will some day find out to his sorrow that he was sowing seed to the wind and is reaping the whirlwind from which he cannot escape until he has paid the uttermost farthing. Then let us by the persuasion of gentleness and kindness lead those who are ready to be led into the kingdom of harmony, and leave all others in the care of an all-wise God. There is no one wholly wicked; no one but in whom we can find some good if we look for it; and let us hope that what good there is, be it ever so little, is the seed that will some day spring into life and keep on growing into the fulness of the stature of Christ. "Let us therefore follow after the things which make for peace, and things wherewith one may edify another," and "Thou wilt keep him in perfect peace, whose mind is stayed on Thee: because he trusteth in Thee."

Presumption or Fact?

BY ISABEL TESTUT.

THE Bible tells us that God made all that was made, and without Him was not anything made that was made. We have also Scriptural authority for believing that those who do the will of God never weary in well doing. "They shall run, and not be weary; and they shall walk, and not faint." Does it not seem strange, then, that our good Christian people, who go about visiting the sick and poor, preaching the Gospel, and living, to their sense of things, a pure and Christian life,—does it not seem strange that these people should weary in their well doing, that they should become tired as they grow older, and manifest that most deplorable condition—age and decay? Why do we not grow stronger and more beautiful each day? Is it presumption to believe that we should if we understood these passages of Scripture? If we believe the Scripture in this respect, and still do not bring out the conditions promised therein, does this not plainly point out to us that our understanding is deficient?

If we live to understand more of God each day, and God is Life eternal and man the image and likeness of his Maker, why do we live with the firm conviction that man shall live threescore years and ten,—growing more worn and weary with each year,—and then die? Some will say that man lives here on earth for seventy years or more and then goes to eternal life after death. But how can we believe this if we also believe that in Him "is no variableness, neither shadow of turning"? If God changeth not, how can His idea, man, live first in one state of existence, die, and change into an entirely different state? We are told that God finished His work. How then can we change if we are created in his likeness and His work is finished?

There is a common saying that we cannot depend on anything in this world but death and taxes. But when this man-made world of doubts and fears is changed to faith and understanding, we shall depend on nothing but Life—not death.

When it is remarked to us that Christian Scientists make some ridiculous statements, we can only say that if you want to know anything of Christian Science, study Christian Science, not Christian Scientists. If we do not demonstrate our religion and all it teaches, in any denomination, the fault is with us and not with our religion. If you intended to join the Episcopal Church and some friend of yours who belonged to that church did something that you believed to be improper, would you decide not to join that church? No; you would see the error in the man and still have the same regard for his church. Let us be charitable and deal with all men alike. Do not think that Christian Scientists can see no farther than the spot they stand on. If all denominations would regard Christian Science as Christian Science regards them, there would

Digitized by Google

be more brotherly love expressed and less contention. I can say from my own experience that every thought I have received in this Truth, all the teaching, every prayer, has been an earnest desire for a better condition in human consciousness, more love for my brother and a clearer understanding of God.

Divine Love.

BY W. A. SPENCER.

ONE of the things which impressed me most profoundly in the investigation of Christian Science was the high and exalted meaning given therein to the word Love. This of itself was indeed a revelation.

During the previous years of my mortal existence, this grandest of all words had been brought to my thought as something a little above and beyond the ordinary, and yet as something mortal and withal quite commonplace. It had only the environment of a material personality. I had read of love in books, magazines, newspapers, the Bible, and heard its glories eulogized from pulpit and platform, and yet none of these aroused my thought to the sublime possibilities of a Love redeemed from the bondage and thraldom of sensuous beliefs. This vitalizing, conscious realization of Love as Divine, was left to be revealed by Christian Science teaching, which demonstrates the spirituality of all things.

Our text-book, "Science and Health with Key to the Scriptures" by our revered Leader, tells us "The great miracle, to human sense, is divine Love;" and that "Love is the liberator" from sin, sorrow, sickness, and all sensuous fears and beliefs. That disciple whom Jesus loved declared, "God is love." What a sublime truth! What an inspiring thought! To realize this i to dwell "in the secret place of the Most High."

That God is Love, and that He is the all, and in all, is the key-note to Christian Science theology. Herein is the uplifting thought, and the understanding which gives us of the things of Spirit, and tells us something of the wonderful height, and of the breadth, and of the depth of the love of God; of a love unfettered by sensuous fears and beliefs.

When humanity awakens to the nobility, purity, and potency of divine Love, as understood, taught, and demonstrated in Christian Science, the millennium will dawn, and every Christian will be inspired with a new hope, and realize such an influx of Truth and Love, that every vestige of sin, sickness, and sorrow will be banished from earth, for then all shall know God from the least to the greatest.

The New Rest.

BY V. B.

SOME six years ago, when the discords of material existence were closing about me, at times almost strangling any desire I might have to live, a good friend advised me to buy Science and Health, which I did. Soon a new conception of life began forming in my thought and manifesting itself from day to day. I was extremely fond of dancing, but ere long, I found more happiness in reading Science and Health than attending balls; the theatre lost its attraction, and the taste for wine was destroyed. My old friends and my family were not in sympathy with me. I passed through a period of loneliness that was akin to disease, until I gained enough understanding to meet it, and to feel the presence of the Comforter. Many sins are left behind, many are still to overcome. As I journey onward, at times the clear glow of Truth lighting my pathway, at times the dark shadows of mortal thought falling upon me, I have this abiding faith: "When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee: when thou walkest through the fire, thou shalt not be burned; neither shall the flame kindle upon thee. For I am the Lord thy God, the Holy One of Israel, thy Saviour." Even when all seems dark, I can sing praises, because of the hope within me. In this thought I find a new rest.

Scripture Illumined.

BY HELEN E. TUTTLE.

IN coming into Christian Science the illumination of Scripture has been to me one of its most beautiful features. So many passages in the Bible which before seemed meaningless and to have so little spiritual food in them that I had almost given them up as containing nothing for my practical use, through the light and understanding of our Leader's interpretation of the Scriptures have been made plain and beautiful, and through their comprehension we are able not only to heal the seeming physical discords of mortals, but to reflect more of the Christ Love to our fellow-men.

I once had a picture hung on my wall in such a poor light that I had failed to see its beauty, and did not care especially for it, although the production of a fine artist. I chanced to hang it in a better light one day, where the light fell more directly upon it, and I discovered the hidden beauties which the artist had brought out. Just so has this better light given to us through Mary Baker G. Eddy, revealed the before hidden beauties and spiritual thoughts which the Scriptures always contained. Can we express too much gratitude to God, and love for our Leader for this revelation?

Intruding Thoughts.

BY M. J. T.

A THOUGHT came to me, while reading the editorial in our last *Journal*. I was interested, and read with understanding the first two pages, no outside thought interfering with what I was reading. So far, so good. Then, I found far-away thoughts intruding as I still kept reading the third page. I read a paragraph over and over to get its full meaning, before I recognized the trouble. These intruding material thoughts were trying to rule out the real good I was getting, by crowding in their self-assertion.

When I understood the illusion, or saw it *as* illusion, it was gone; and, peace restored, I could read and understand again. It taught me a lesson. We cannot entertain two opposite thoughts, at the same time, with good results.

We entertain visitors, many times, of conflicting thought, and often try to make harmony between them. With *Good* and evil we cannot do this.

With the One ever-present Good ever before us, ruling out all unreal thoughts, giving them no place in our consciousness, we get good results. My gratitude cannot be put in words, for the great love I have for dear Mrs. Eddy who has given us the book, "Science and Health with Key to the Scriptures," which has shown me the Way. The Bible is opening to my understanding more and more, and is a Light to my path.

Florence Nightingale said: "If I could give you information of my life, it would be to show how a woman of very ordinary ability has been led by God in strange and unaccustomed paths to do in His service what He has done in her. And if I could tell you all, you would see how God has done all, and I nothing. I have worked hard, very hard, that is all; and I *have never refused God anything.*"

Testimonies.

I have, for a long time, wished to tell of the gratitude I feel for what Christian Science has done for me, in bringing me out of a miserable state of darkness, and doubt, and fear of God, into peace, and happiness, and a feeling of safety which is beautiful, and which grows always more certain and satisfying.

I was brought up in the Orthodox Protestant Church, but was never satisfied, for it explained nothing, and seemed like a closed door,—closed by death,—and for some years before hearing of Christian Science, I had begun to doubt the truth of the Bible because I could not see that the promises were kept. This made me very unhappy.

I thought, at one time, that I understood the atonement according to the teaching of the church, and longed to die that I might get to heaven at once and be safe and happy forever in God's presence, it seemed so simple and beautiful. But, after many years of experience, I came to see that this did not agree with the teaching that we must work out our own salvation; also that every sin worked out its own punishment, so that it was certainly not forgiven in the way usually taught, and that to believe in that kind of forgiveness led to continuing in sin that grace might abound. It was very puzzling.

Again, if it was enough just to believe that Jesus died to pay the price for our sins, what was I to do all the useless years of waiting for death if I could never get to know or understand God in this life! I wished that there was something to work for, and that God would let us live until we became good enough to escape death, as Enoch and others had done in the old times. It had been done, and the promises of Jesus did seem to point to that possibility if we would keep his commands, but it seemed impossible now for any one to live according to the Sermon on the Mount, with all the world against him. for it was clear that the world was living in direct opposition to the teaching. It seemed a cruel and senseless arrangement that every one, and every thing must die before they could live; and if *life* died, how could it live again?

I wondered why the atonement had not done more for the world,—why did it seem a failure? The world was as full of sickness, and death, and misery, as ever. There was no help in troubles but to look to death to release us. In the mean time we must endure everything that came, no matter how dreadful. Death was the only Saviour, and we were exhorted always to prepare for it, yet St. John's Gospel, which I studied much, was full of promises of life, and Jesus came to abolish death; but that was supposed to mean spiritual death, which some only would escape. It seemed a very poor result from so great a work, and as if Jesus had come only to teach us how to die. Could such a great sacrifice, about which there was so much rejoicing in the Epistles, be only to save an uncertain few? I was beginning to feel that there was a great mistake somewhere, and that the things I had been taught did not agree with the Gospels.

I had always longed and prayed to be at peace with God, and to know how to do His will and to have an assurance of being saved, but there was none, no light, all was darkness and confusion, and I had a terrible fear that God had forsaken the world. There was no certainty of immortality, or that we might not, when we died, be turned away from the gate of heaven, like Ignorance, in Bunyan's "Pilgrims' Progress." I was, truly, "a weary searcher for a viewless home." I could not enjoy anything, my longing to find God was so intense, and to know why we, His children, were so unlike Him, and so displeasing to Him, and so full of fear. But, when I read "Science and Health with Key to the Scriptures" by Mrs. Eddy, and was able to catch somewhat of its meaning, I saw what the misunderstanding had been. My questionings were answered, and dark things made plain. I rejoiced that I had at last found the God I had been seeking, the perfect God, who is our Helper and Saviour and not our destroyer, and who had been hidden by wrong beliefs, and the evil of the world that had seemed overwhelming.

My faith in the Bible was restored, the atonement, and the works and words of Jesus became clear and comprehensible, and I saw, to my great joy, that Christian Science was a return to primitive Christianity, only with a fuller understanding; also that we need not die in order to find, or understand, God; for He is ever-present, and is Himself our Life. It is now five years since I came into Christian Science, and I feel I am a different being, living in a different world, where God (Good), and not evil, is supreme. It is a great rest to be able to separate between good and evil, after the hopeless effort, all my life, to reconcile contradictions, trying to believe that both good and evil came from a perfect God; in fact, trying to believe that evil was good.

"Christian Science . . . disentangles the interlaced ambiguities of being, and sets free the imprisoned thought" (Science and Health, p. 114). I am very thankful for this revelation of present and eternal salvation, which God has given us through Mrs. Eddy, and which shows us how to work out our own salvation now. I have proved the truth of it in physical healing from the first, and each day gives fresh proofs of the power of Truth to demonstrate harmony in all ways.

I am a member of the Mother Church in Boston, and take the *Journal*, *Sentinel*, and *Quarterly*, which are such helps that I am grateful to all who have any part in giving them to us.—F. A. H. HAMILTON, Rangoon, Burma.

It is over five years since I sought the aid of Christian Science for help from the effects of an accident. I had been under a physician's care for several months and to him I wish to give my meed of thanks. His fine Christian character helped me more than the medicine he gave me so sparingly, and when my husband told him I was going to try Science, he said, "Tell her to try it. I am sure it will do her good."

When our next little one was born I had Science instead of instruments, and was up and about the house the second day after the birth. Nor did I suffer from prostration as I had with my two older children.

One day in summer, two years ago, my oldest boy stood under a peach-tree heavily laden with large, ripe, luscious peaches. All the children on the farm had been given permission to take all they wished from this tree. Two other children were in the tree, when suddenly the large limb broke, striking the boy who stood directly under and felling him to the ground. I ran to him, dragging him out from beneath the limb and the other children, and realized that God was his life and that there were no accidents in divine Love. He seemed dazed for a moment, then looked up and smiled. "I am not hurt, mamma," he said, "I was just frightened a little." I held him on my lap and whispered the Scientific Statement of Being to him. There were many about us who were not Scientists. He nodded. "I know," he said, "and I am all right." In ten minutes he was playing with the other children with no trace of pallor on his cheek.

In the government of my children and in the relief from anxiety and fear, I find Science and Health an inestimable boon. I have always read and studied the Bible, but I feel now that heretofore its spiritual interpretation was lost to me.—E. E. C., Chicago, Ill.

Be loving, and you will never want for love; be humble, and you will never want for guiding.—D. M. CRAIK.

Religious Items.

THE MESSAGE OF THE BOOK.—It cannot have escaped those who have studied it that the Bible deals with universalities. Jesus had little, if anything, to say to classes. The New Testament is not a book of rules, but of principles. Principles apply alike to all. They become individualized only in the experiences of those whom they reach. If a minister, or lawyer, or doctor finds anything peculiarly fitted to him it is not because it was addressed to him alone, but because of the universal quality of the message. That is one of the most significant things about our Scriptures. The mother reads the Bible, and it seems to have been specially intended for her; the laborer reads it, and finds in it a definite message to him; the professional man opens its pages, and they seem to be a communication intended for no other; and yet the words are identically the same. They lend themselves to various conditions, and their inspiration goes to all alike. Professor Harnack, in his recent work entitled "What is Christianity?" says: "As a gospel it has only one aim—the finding of the living God, the finding of Him by every individual as his God, and as the source of strength and joy and peace." That gospel is to be realized by millions in many lands and various times. As the sun sends its ray to every quarter of the compass and yet the rays all proceed from a common source, so the gospel is one, while men in their conditions and limitations are many. The difference is due to individualities rather than to divers inspirations.

AMORY H. BRADFORD,
In *The Examiner*.

Not only is Christ to increase in the world's appreciation but in his influence also. It is said by some that this "Christ of to-day," as Dr. Gordon would say it, is not much of a Saviour. Perhaps not according to the old idea of salvation. He is a poor shield to place between us and the penalty of our sins. But suppose we say we do not need him for such a purpose, but rather to help in making us better. Then is he mighty to save. We talk about how much Christ has made the world better. Has it been the Christ of dogma who has made the world better, or the Christ of the Gospels who went about doing good? Is not this the fact? Not all the mass of opinions about Christ have ever completely hidden him. He has been a sun so bright that no cloud of superstition has ever entirely eclipsed him. And it has been this sun of righteousness, this Son of love, that has warmed and quickened the hearts of men into newness of life. And as Christ is divested more and more of men's opinions about him and stands out simply as a beautiful revelation of divine love and life, he will more and more inspire and help men.

REV. DR. J. M. PAYSON.

No ship drifts into harbor. The ocean of life has many a hidden current, many a sudden storm; and he who would win port at last must stand to his helm, while his ship drives on through opposing currents and against contrary wind. The sailor sails on a sea that is strewn with wrecks. In this sea nothing drifts except to the shores of destruction; and few ships come into port which have not battled long with angry head winds. Pleasant weather there may be in the voyage of life, but never weather so pleasant that the hand may leave the helm, or the eye the compass. Where there is least peril of storm, there may be most peril of being carried away from the right course by an unnoticed current. Keep, then, the eye upon the compass, the hand upon the rudder. That is the only sure way of arriving at a desired haven. To let go the helm and to allow the ship to drift before the wind and waves, may seem to be the easiest, the most natural, even the most enjoyable thing to do; but a voyage that is conducted on that mistaken principle is sure, sooner or later, to end on the cruel rocks, on the treacherous sand, or in the devouring sea.—*The Whittier* (Cal.) *Boy's and Girl's Magazine.*

A good man over eighty years of age, speaking of the forces which had contributed to prolong his life and strength, said the other day, "I have made religion the principal thing of my life." He had been a consistent Christian for more than sixty years. He knew where to place religion. With him prayer, spiritual life, Christian character were not used as a means to accomplish some worldly end. He was not religious merely that he might get to heaven. Religion was the chief thing. He prized it above all else. He sought it more diligently and clung to it more tenaciously than anything else.

He was right. Some men do not give religion any place in their lives. They think they can do without it. They have other aims which they consider higher. Others seek religion and hold it in esteem, but they do not make it the principal thing. They think more of something else. They give more time to something else. Religion has a place in their lives, as they suppose, but it is a low place, an obscure corner. It does not come to the front.—*The Christian Advocate.*

It is sin that closes the gates of heaven. The Lord is not pleased to have it so. He loves His people more than language can express. If spiritual dearth prevails it is all our fault. He stands ready to open the windows any day. Times of refreshing shall return so soon as we do what He has commanded.

We are always crying to God to pour us out a blessing, and if we should listen for a moment we should hear Him calling on us to receive His blessing. It is not His unwillingness, but our own, that hinders. It is not something He has neglected to do, but something we have neglected to do, that causes the delay. He is speaking of the closed windows when he says, "Prove me now." This is a challenge. It is as if He would say, "You have heard my promises. You complain that they are not fulfilled. But it is not my fault. I stand ready. Prove me by doing what I have commanded. and see if I will not open the windows of heaven and pour you out a blessing that there shall not be room enough to receive it."—*The Christian Advocate.*

Our country has taken the lead in giving, as in many other things; and sums of such vast proportions have been bestowed upon the public that we stand amazed before the magnitude of these benefactions. This is the age of giving on a scale never before realized, and at present the absolute competency and value of such gigantic largesses cannot be fully estimated. In many cases the sense of public responsibility has grown in proportion to the size and rapidity of the accumulation. In the rapid fluctuations and risks of business, some men believe that what is given away is saved. It has gone into a trust that can be depended upon, and has lost the illusory character of the ordinary fortune.—*The Christian Register.*

MAN AN ENIGMA.—Pascal affirmed that "man is miserable because he *is*, and great because he knows it." An inspired writer of old, awakened by the great problems of existence and conscious of the majesty of God, voiced the universal feeling of thoughtful souls when he exclaimed, "What is man, that thou art mindful of him!" Evidently man is a problem to himself, a mysterious union of forces of which he is more or less conscious, but which he is unable adequately to measure. The great apostle under the stress of contending desires asserted that when he would do good, evil was present with him, so that what he wished, that he did not do.—*The Standard.*

Every man is more completely himself and as God intended he should be, when religion inspires him and he is controlled and made spiritually vigorous through its ennobling agency. From the outlying realms of life there sweeps in upon him an atmosphere of health and vigor. It is the mission of religion thus to charge us with its own graces and powers, of which we are the natural receptacles. The higher intercourse enriches a man, while atheism animalizes him, sets him back instead of forward, and dries away the sweetest fountains of his being.—*The Universalist Leader.*

The present year has been marked by great activity in many fields of Biblical study rather than by epoch-making works. The aim of bringing critical results within the reach of intelligent persons who are not specialists is increasingly evident, and the quality of work in books with this purpose has improved very much. The anxious, apologetic tone seems to be disappearing, and the quiet fearlessness of love of truth is taking its place.
The Congregationalist and Christian World.

One day I found the world to be very dark. I groped into an alley and found my way into a basement where the tenant was shivering with physical cold and moral fear. Somehow my sun began to shine and I came back into God's world of beauty, and found that it was ingratitude that had dimmed the splendors of the midday glory.

REV. MARTHA A. BORTLE.

I have seen souls whose peace chamber within was ample, into which they retreated from the strife of tongues, from the pursuit of envy and jealousy, and from all great worldly strifes and ambitions; and there, by as much as around about them were night and storm and tempest, by so much they found tranquillity and security and blessed peace.—BEECHER.

He that finds God a sweet enveloping thought to him never counts his company. When I sit in that presence, who shall dare to come in?—EMERSON.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa*.

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion: 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science: 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

(THE CHRISTIAN SCIENCE WEEKLY.)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

At a meeting of the Marconi Wireless Telegraph Company held in London last week, Marconi stated that the next series of tests would include the transmission of words and messages across the Atlantic. He said that there was nothing to prevent the company from undertaking commercial communication with ships at sea. The system is in permanent use on board seventy ships and there are twenty-five land stations. Mr. Marconi stated that defects with reference to secrecy had been removed, and that his transmission of twenty-two words in a minute compared favorably with the work of the cables.

The inventor said that the obstructions which were thrown in his way on that side of the Atlantic were in marked contrast with the generous encouragement he received from the government and press in the United States and Canada.

At a cost of three million dollars the Central Coal and Coke Company of Kansas City, Mo., has purchased all the properties and business of the Kansas and Texas Coal Company of St. Louis. The capital stock of the new company is $7,000,000, and it is the largest concern of its kind west of Pennsylvania.

The company now owns forty-five coal mines, employing 10,000 men; twenty-three company stores doing an annual business of $2,000,000; 2,500 houses used as homes for its employees; 50,000 acres of coal lands, and lumber mills that produce 180,000,000 feet of lumber yearly. The company has offices and agencies in every large city in the United States.

President Roosevelt's reply to Rear Admiral Schley's appeal was made public February 19. He reviewed the case at length and said that he was satisfied substantial justice had been done by the Court of Inquiry. The question of command at Santiago, he said, was settled by President McKinley in favor of Admiral Sampson. The President heartily concurred with the recommendation of the members of the Court of Inquiry, that no further action be had in the matter, and closed his memorandum by saying, "There is no excuse whatever from either side for any further agitation of this unhappy controversy. To keep it alive would merely do damage to the navy and the country."

Wu Ting-fang, Chinese Minister at Washington, was one of the principal speakers at the sixteenth annual dinner of the American Newspaper Publishers' Association in New York City last week. He told of newspapers and newspaper men in his own country. He said that the Chinese newspapers did not publish as much news as the American papers or have such extended circulation. The Chinese papers, he said, had real literary merit, and were, in his estimation, as potent movers of public opinion as was the press of this country.

The number of labor unions in the State of New York has increased from 860 to 1,881 since 1894. During the same period the membership has increased from 157,197 to 276,141. The percentage of women members increased from 3.4 to 5.3.

The largest group of organized workingmen is that in the building trades. It constitutes thirty-one per cent of the entire membership. The organizations in Greater New York have upwards of 180,000 members, or about two-thirds the membership of the State.

President Roosevelt has sent a message to the Senate recommending the retirement of Naval Constructor Richmond P. Hobson. Owing to physical disabilities incurred in the line of duty, and especially on account of the gallant service rendered by Mr. Hobson in the sinking of the Merrimac in the harbor of Santiago during the war with Spain, the President asks for the enactment of a suitable measure for his relief. A bill was immediately introduced providing for Hobson's transfer to the retired list

It is twenty-five years since the telephone was invented, but in 1891 there were only 512,407 instruments in operation in this country. The magnitude of the business at the close of 1901 is shown by the following figures given by the *Electrical Review*. There were 1,080,000 Bell machines, 708,717 independent machines, and 490,000 identified with farmers' lines and other inter-communicating systems. These represent a capital of $470,000,000.

According to the official returns of the twelfth census, the value of the manufactured products of Massachusetts in the fiscal year 1901 was in round numbers $1,027,000,000. This is about one-thirteenth of the value of the production of the United States Statistics collected by the Census Bureau show that the gross value of the products of manufacture in the United States in 1900 was $13,003,127,682, an increase of 38.73 per cent since 1890.

The Commonwealth of Australia, now a year old, has selected their flag. The Government judges had thirty thousand designs from which to choose. Their choice was a flag having the British Union Jack in the upper left hand corner, with a six-pointed star beneath it. The other half of the flag contains the Southern Cross. The government and official color is blue and the merchant marine will fly a flag with a red ground.

President Gilman of the Carnegie Institute is quoted as saying: "We have no idea of acquiring real estate or erecting buildings. The yearly income from the ten million dollars donated by Mr. Carnegie will be devoted to original investigations wherever it is considered that investigation is necessary. Washington will be merely the headquarters of the institution, where the board of trustees and the officials hold their meetings."

There are now about three hundred real Daughters of the American Revolution living. Eighty-six of the number are in Massachusetts; 116 are between ninety and one hundred years old, and twenty-two are over one hundred years old.

Mrs. Laura Wentworth Fowler of Massachusetts has been working for years to get Congress to pension these surviving daughters.

At a meeting of fire insurance companies in New York a resolution was adopted advancing the rate in some cases twenty-five per cent on mercantile stocks and on all manufacturing risks in the important cities outside of New York. The reason given for this resolution is the losses by which during 1901 a remarkable number of fire insurance companies were forced to liquidate.

The first annual meeting of the United States Steel Corporation was held in Hoboken, N. J., February 17. The annual report showed that the earnings for the year were $197,000,000, and the net profits more than $85,000,000. The properties owned and operated by the several companies were valued at $1,437,494,362 and the total assets amount to $1,647,443,521.

A marble quarry in Colorado shows on its perpendicular face five distinct colorings. Pure white marble is in a vein two hundred feet thick. Below is a stratum of black marble seventy-five feet thick, then four hundred feet of clouded marble, and then seventy-five feet of serpentine or green stone. This marble is said to be of fine quality and very accessible.

Five hundred and six dollars was recently paid for the earliest known New York play bill at an auction sale in New York. The play bill was of the Nassau Street Theatre, dated November 12, 1753. The performance was "Richard III." and the play was interpreted by the original Hallam company, the first players to appear in this country.

John A. Stewart, the venerable president of the United States Trust Company, in New York City, has tendered his resignation and recommended that Lyman J. Gage, ex-Secretary of the Treasury, be chosen his successor. The position has been offered to Mr. Gage, and it is understood that he will accept it.

The eleventh annual session of the Tuskegee negro conference was held last week at Tuskegee, Ala. Booker T. Washington said in his address that the best thing for the negro at the present time was to secure a home, become a tax-payer, and the most successful man in his community.

Gifts and bequests for public uses made in the United States during the year 1901 amounted to $107,360,000. The highest previous record for any one year was $62,750,000. Andrew Carnegie's gifts to colleges last year were upwards of $17,000,000 and to libraries nearly $14,000,000.

Secretary Long, who has served six years at the head of the Navy Department, will retire to private life. No definite date for his retirement has been decided upon, but it is thought he will leave the cabinet about the time Congress adjourns.

The eleventh Continental Congress of the Daughters of the American Revolution was held in Washington last week. Since the last congress 3,680 new members were admitted, making the total membership of the society nearly forty thousand.

Messrs. Wolmarans and Wessels, two of the Boer delegates who have been in Holland for some time, have sailed for the United States. It is stated that the purpose of their visit is to tour the country in the interest of the Boers.

Nine of the wealthiest and most influential citizens of Chicago have sent a petition to the United States Senate through Senator Cullom, asking for uniform and more rigid divorce laws in all the states.

King Victor Emanuel opened Parliament at Rome, February 20. In his speech from the throne he spoke of Italy's work for peace and the harmonious relations they maintained with all the Powers.

On March 1 the Postal Telegraph Company and Commercial Cable Company will reduce the cable rates to India from $1.23 to 86 cents per word.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

The Master Clock.

THE great clock in the Naval Observatory at Washington, is called the Master clock. By means of the repeating apparatus the time is repeated over eighteen different circuits to the various parts of the country. New York City automatically repeats the time to all points east and north; Chicago and Cincinnati repeat to all points west and southwest; Richmond, Augusta, and Atlanta to all points south.

If you should happen to be in some large telegraph office at the moment the time signal is being sent out, it is likely you would see the operators at their keys take out their watches a few seconds before the time is due, open them, put a tiny piece of tissue paper twisted into a thread between the spokes of one of the little wheels in their watches, holding back the movement to the instant the signal is given, then releasing the wheel so that the watch shall fall into the exact beat of the Master clock in Washington.

Of course the same care must be taken whether the operators are to connect their instruments with a time-ball or a control-clock. The time-ball is an interesting feature of the service. It is a round ball large enough to be seen from the street where, supported by its appliances, it rests on the top of some building.

It is attached by wire to the circuit from Washington in such a manner that, at the instant the Master clock in Washington ticks the stroke of twelve, the delicately poised ball will fall, released by the same beat of the clock that announces the time to the rest of the country. Any one who watches one of these time-balls just before the stroke of twelve, timepiece in hand, may easily determine whether his watch is slow, or fast, or on time.

Throughout the east these time-balls are dropped every day at noon, save on Sundays, at New York City, Boston, Newport, R. I., Woods Hole, Mass., Philadelphia, Baltimore, Washington, Hampton Roads, Savannah, and Fortress Monroe. The tick of the Master clock that drops these time-balls also releases others, some of them many hundreds, indeed thousands, of miles away.

For instance, by cable arrangement, a time-ball is dropped every day in the city of Havana, and another in San Francisco, three thousand miles distant. So incomprehensibly swift is the speed of the electric current that, if the repeating instruments and the wires are in perfect condition, there is no appreciable difference in the time of the dropping of the ball in New York City and the dropping of the ball in San Francisco, each one released by the same tick of the Master clock in the Naval Observatory in Washington.

Great pains are taken to keep observatory clocks in time with the stars.

The clock was set the night before, by a star when it crossed the meridian; but, for one reason or another, it may have lost or gained the fraction of a second. The observer at the eyepiece of the telescope watches the oncoming star with the very closest attention. The instant it comes into his field of vision, just as it begins crawling across the wires, he gives a squeeze to the telegraphic key.

At the moment of this squeeze the fountain pen, attached to the key by the wire, gives a tiny jump and makes a slight bending in the line. As the star crosses each wire the observer presses the key, so that there are eleven indentations made as the star crosses the field and passes out of sight on its celestial way. It has not been stopped a fraction of an inch in its journey through space, but the observer has timed it in transit, and no matter how fast it may have been fleeing through the heavens, it has yet been closely watched by the man at the telescope until he could record its movements.

As the star passed the sixth wire the pressure for that line, its meridian line, registered the precise fraction of a second at which the star crossed the line. Then, as the clock has been marking its own time off on the cylinder, second by second, the observer compares the time the clock has been making with the indentation the instrument recorded as the star crossed the meridian.

Thus he can tell to the fractional part of a second the gain or loss in the time of the clock, and it is readjusted, or "set," as we say, to the unvarying time of the star.

You must set your watch by a star if you wish to be up with the times, these days. Out of the vast number of stars in the heavens visible to the eye at night, and out of the much greater multitude that celestial photography is bringing forth on its negatives, there are some six hundred that may be depended upon, stars that have so long been watched by the astronomers that they are known to be practically invariable.

Any one of these you may set your watch by, but it would be rather a difficult thing for you to pick out the star you wanted yourself, and even if you should select the right one, you would not be likely to know just how to go to work to regulate your time-piece.

For about two centuries most of these six hundred stars have been under the critical eyes of the astronomers, who have measured their exact places in the skies again and again. It has thus come to be known that these stars cross the meridian of any place at certain times every night.

The meridian of any place is the line the sun crosses there at noon—an imaginary line from pole to pole, directly overhead dividing east and west. The times when the stars so cross the meridian are predicted by the astronomers years in advance, and tables are made which are exact to a small fraction of a second.

After the astronomers, through long series of years of testing, found this out, it occurred to somebody that here was a perfect test for timepieces. Perhaps we owe it mainly to the great railway companies that the time of the country finally became regulated throughout the length and breadth of the land.

W. S. HARWOOD.

In January *St. Nicholas.*

A mania for absolutely correct pronunciation is fatal. The people who are afflicted with this painful ailment are as anxious about their utterance as dyspeptics about their diet. Their little airs of nicety, their starched cadences and frilled phrases, seem as if they had just been taken out of a literary bandbox. Reserve and precision are a great protection to overrated reputations; but they are death to talk.—HENRY VAN DYKE.

The Lectures.

At Melvin, Ill.

Mr. Edward A. Kimball, C.S.D., of Chicago, lectured at Melvin, Ill., Thursday, January 30. This is a small place but a large audience attended the lecture. Mr. Kimball was introduced by the Rev. I. A. Shanton, D.D., pastor of the First Congregational Church, in the following words:—

This is an age of expansion,—expansion in things and matters material, political, intellectual, moral, spiritual,—an era of universal evolution from things lower to things higher, of things smaller to things larger, of things human into things divine. We do not occupy the vantage ground of our fathers, even though they were a noble and illustrious ancestry.

Politically, we have circumnavigated the globe, and touched the antipodes with a vital and lustrous civilization and life. Rome no longer holds the sceptre of monarchial authority, nor wears the mitre of universal culture. Greece is no longer the one only creator of art, nor the only educator in things æsthetic. Persia is no longer the banking house of the world, nor the only financier and dictator of the world's commerce. Athens is no longer the sole arbiter of human thought, or the expounder of systems and philosophies, nor yet the only teacher of things ethical. The splendor and glory of these ancient empires and civilizations have faded out, and a more gorgeous halo crowns the brow of to-day.

The occultism and sophistry of India and China have been lost in the philosophy and reality taught upon and enunciated from Judæan hills and vales.

Zoroaster and Plato are being quite forgotten in the study and inspiration of Jesus, the humble rabbi-carpenter of Galilee.

The ethics of Epictetus and Marcus Aurelius did much, indeed, for heathen peoples, but the doctrines and ethics of this Galilean are the dynamics of the world.

The sword of his spirit, wielded by consecrated men and women, is destined to subjugate the empires of men.

Human thought has been unchained ever since Luther broke the seal of the monastery Bible and proclaimed a liberty of conscience for Germany, and this blessed message has been heralded abroad as a pæan and hallelujah of universal freedom, granting to all men the inalienable right to worship God according to individual conscience. Truly, the message of the Nazarene is the epic of the ages.

Christian Science claims the heroic and Divine spirit of the Master, and lays particular claim to the primitive doctrines and tenets and promises of Jesus, as one greater than any philosopher or reformer. It lays all systems under eternal tribute to what he vouchsafed to men: viz., healing power of both soul and body, a faculty and function not to be thought incredible, since all promises were made on the veracity and immutability of God himself. Christian Science does not presume to go back of nor away from Jesus, but refers all its acts and claims to him and his promises.

While Christian Science may be a new system, if indeed it aspires to the dignity and force of a system, it vouchsafes to the world the revival and revitalization of Apostolic commission and power.

Though some of its claims may sound wild and fanciful and farcical, yet so confident is it of being in the right, that it begs to stand at the bar of human judgment and have its acts and life passed upon by sages and seers.

There swings in each life a golden censer, and Christian Science seeks to fill this with the choicest aroma and incense of divine Truth, eternally divorced from all speculative philosophy and dogmatic theology. Human prejudices it seeks to unmask, human ailments to heal, and boldly challenges opposing doctrines, beliefs, and methods, all in the name of Jesus the Christ. It does not claim anything new or untried or empiric, but deftly employs the old truths of Moses and Abraham, of Elijah and Jesus, of Peter and Paul. With the balm of Gilead it seeks to disabuse the mind of errant and erring concepts, and implant vital and life-giving Truth, declaring it capable of doing all things.

The uninitiated can no more understand or appreciate its claims and ministry than can a Rajah of India comprehend the vast dimensions of Westminster Abbey, or appreciate the gorgeous decorations of St. Paul's. It claims a sweet and enchanting and ennobling song, unheard by those remote and alien from its benign life and influence. This anthem is no more vital to the obdurate and belligerent thought than the chimes of cathedral bells, to move the distant traveler to ecstasies and devotions. Human prejudices and antagonisms have ever been formidable as a phalanx of Xerxes' army, and sometimes is as devastating as Huns. But toleration and indulgence is the democratic and placable attitude. We have no right to denounce a thing or a thought before we have given it trial or experiment. By this tolerant experimentation Ptolemaic astrology grew to be Copernican astronomy, and Socratic theory came to be Baconian philosophy. Because a thing is new and incomprehensible and illogical to us, is no cause to deny its veracity. Spain denied the claims of Columbus, but this did not destroy the route and continent which Columbus claimed. I doubt not but Christian Science, in common with all new movements of thought and life, is greatly misunderstood and misinterpreted. But this is not to be wondered at, nor does it intimidate or discourage its devotees. As in the words of Emerson: "Pythagoras was misunderstood, as were Socrates and Copernicus and Newton and Luther and Jesus." Indeed, it seems a law that to be great and good is to be misunderstood. The genius and spirit of a great movement or effort is not to be known or seen by its mere externals.

To the end that we may be better informed, and thus judge aright, The First Church of Christ, Scientist, Boston, Mass., has constituted a Board of Lectureship, employing some thirteen lecturers, schooled in their science and skilled in their art, to elucidate and enunciate its claims, doctrines, and methods. But we must not presume that in one short hour, even by the most cultured and capable, there can be fully and satisfactorily expounded a system and doctrine which required decades to compile and elaborate and demonstrate and prove. We cannot hope for more than mere hints at meaning, method, and motive, at doctrine and tenets. Hence, we must not be hasty or uncharitable in rendering our judgments and passing our sentence, but weigh the propositions honestly, as in the sight of Providence.

We have with us to-night, one who will speak out of the depths of his own experiences, and no one has a right to challenge another's experience, even though it be strange and out of the ordinary channels. Being a living and tangible witness of the efficacy and sufficiency of Christian Science, having been by it snatched from the jaws of death, the speaker may well speak with confidence and pride and emphasis.

Out of the magnanimity of mind, the largeness of heart, and the liberality of purse, the local organization of Christian Scientists of Melvin, have provided this splendidly instructive lecture to which it is our honor and privilege to listen. Without solicitation at all, even among themselves, the money to meet this expense has poured into the treasury just as for the building of Solomon's Temple of old, until the committee on finance had almost resolved to stay the tide. This is but indicative of the entire work of this little body. They have never appealed to the public for help, offering anything in lieu for patronage. The fly-leaf of their ledger records the fact, patent to all, that

Digitized by Google

they have borne their own financial burdens, and liquidated their own financial obligations, and yet have cash in their treasury.

To the end that we may be liberal partakers of this wholesome and vital nourishment, the Lecture Bureau has sent here, in answer to the invitation of the local organization, Mr. Edward A. Kimball of Chicago, whom I now have the pleasure of introducing to you.—*Correspondence.*

At El Paso, Tex.

The lecture by Hon. William G. Ewing of Chicago, was given Tuesday evening, November 5, to a large and appreciative audience, the big hall in Masonic Temple being filled to the doors. This is the first Christian Science lecture ever given in El Paso, in fact the only one ever given between Fort Worth, Tex., and Los Angeles, Cal. Many people came to hear about Christian Science from the surrounding towns, also from New Mexico, old Mexico, and Fort Worth, Tex. The Second Reader of the society in Mexico City, Mexico, came over twelve hundred miles.

Captain T. J. Beall, a prominent lawyer of El Paso, introduced the speaker of the evening as follows:—

Ladies and Gentlemen:—I have been requested by the kind ladies having in charge this meeting to introduce the distinguished speaker of the evening. It is not without distrust of my fitness to discharge this pleasing duty, because I am not a Christian Scientist, nor familiar with the tenets of the church; but I should prove recreant to the most tender and sacred obligations if I failed to feel a grateful appreciation for the kind ministrations of a Christian healer, to one who for thirty-two years and more has brightened my home with her smiles and jeweled my life with joy and love.

No one, I apprehend, in this age of advanced civilization would assume before an intelligent audience, that all truth was bound up in the creed of any one of the theological institutions of the country, or any one of what is termed the Orthodox churches; in other words, that there was no truth in any one of the many theological institutions or of the many different churches in this land save one.

This would be a degree of bigotry and intolerance that would shock the intelligence of any community. We assume, therefore, that there is truth, some germ of truth, in every Christian denomination, and that in this age of advanced civilization, there are developments and unfoldings of truth, though not new, that when reduced to practice will tend to the uplifting, the ennobling, the strengthening of mankind. I understand that Christian Scientists do not claim that they bring into the world any new truth, but that they are old truths found in the Bible, or drawn from the interpretation placed by the Scientist upon the teachings of Christ.

Their mission is, I understand, laden with Love. It is the theme upon which they dwell. It is the fruit of the practice of Love that produces all the good and all the healing which they claim. We know that the old century just passed, has laid aside with it many things that were supposed to be true, but that applied science has demonstrated to be error. To illustrate: until the days of Copernicus, it was supposed that the world was flat, and that the sun arose in the east. He met persecution and obloquy, in order to vindicate the truth of his discovery. In very recent times it was the popular concept of all men who studied philosophy and were at all familiar with its teachings, that all material objects possessed certain qualities, that they were opaque or transparent. This was the teaching of the schools. Yet we know that in the development of the X-ray, an advanced step taken by applied science, objects in themselves only exist as they appear to be. I refer to this fact, to show that we have yet much to learn, and I have the pleasure to-night to announce to this audience that we have a gentleman who will address you, who perhaps will be able to tell you things of which you know not, and to explain things to you which you do not now understand. He comes to you from a distance of thousands of miles—a gentleman learned in the law, who in his own state of Illinois, in the city of Chicago, through many years of service, distinguished himself as an advocate at the bar and achieved honors as a judge on the bench, and with all that, a legal mind trained to analysis, and to convey information.

Consecrated as his effort will be, by the fact of personal demonstration, in his own person having been healed through the ministrations of a Christian Scientist, believing sincerely in its truth, I ask for him that you hear him patiently for the cause, and that you be silent that you may hear. "No heart, generous in ways of sympathy, is vainly turned aside. No soul so dead that may not be awakened and strengthened when something good is said." I take pleasure, ladies and gentlemen, in introducing to you the Hon. William G. Ewing, who will address you to-night upon the subject of Christian Science.—*Correspondence.*

At Troy, N. Y.

"What is Christian Science?" was the question answered at Music Hall last evening (February 13), before a large audience, the speaker being Carol Norton, C.S.D., of New York City, member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass. The lecture was under the auspices of First Church of Christ, Scientist, of this city, and was listened to with the closest attention throughout. Mr. Norton is an able speaker and his explanation of the belief of the Christian Scientists was clear and forceful. The question which the speaker answered has been asked so frequently by people in general that the idea of the Troy church was to give all who so desired an opportunity to learn just what Christian Science really is, that any opinion formed may be based upon a proper understanding of facts.

Mr. Norton was introduced by Edgar K. Betts, who said in part:—

Ladies and Gentlemen:—First Church of Christ, Scientist, of Troy welcomes you here to-night to listen to a man who knows why Christian Science is both Christian and scientific.

One of the first lessons it teaches us is not to borrow trouble. We are convinced that we are grasping truths that make life better and brighter, that teach us to overcome mental, moral, and physical difficulties. This system lends itself for use every day in the week.

A Christian Scientist advocates personal liberty for every one, and knows that we make or mar our own lives. He does not put the blame of his miseries on an inscrutable Providence when he is proving from daily experience that they result from his own foolishness or ignorance.

Christian Science insists upon absolute honesty, an honesty that means far more than paying one's debts in cash. It demands honest thinking, including that hardest lesson of integrity, to be honest with oneself. As Shakespeare aptly says:—

> to thine own self be true,
> And it must follow, as the night the day,
> Thou canst not then be false to any man.

It does not threaten Christian faith, but would clear away the accumulated dust and cobwebs of fifteen hundred years and return to the simple teaching of the Holy Man of Galilee.

Its creed—the Sermon on the Mount.

Its motto—the Golden Rule.

Its ultimate—peace on earth, good-will to man.

Our Puritan ancestors, stern of face, hard and relentless in their faith, and narrow in their creed, nevertheless served their purpose well and paved the way for us whose lives have fallen in pleasanter places and more liberal times.

Digitized by Google

To be sure it is a long way from the teachings of Jonathan Edwards to Christian Science, but the steps have been progressive. Possibly the doctrine of hell-fire was not so terrifying to the half-frozen Pilgrims, shivering in the cold winds of a bleak New England winter, as it is to their more comfortable descendants. It has been wittily said of them that they came to worship God as they saw fit, and to see that every one else did the same.

When the Pilgrim saw an Indian out in the cold he covered him—with a shot-gun. The Christian Scientist should cover everybody with the broad mantle of charity, and would like also to have a corner of the blanket extended to himself.

In this spirit we cheerfully offer our system for your earnest consideration.

Our own city has always had a warm and hearty greeting for every messenger of progress, and this large audience is a witness that modern Troy, like ancient Athens, is always "ready to tell and to hear some new thing."

Therefore I bespeak for my friend your kind attention. It is my pleasure to introduce to you Carol Norton, C S.D., of New York City.—*Troy* (N. Y.) *Record.*

At Galion, O.

Mr. Edward A. Kimball, C.S.D., of Chicago, lectured in the City Opera House, Thursday evening, February 6, to a fair-sized audience. One feature noticeable was that the audience consisted almost entirely of intelligent and interested people, very few attracted by curiosity. The comments heard by Scientists since have been complimentary. The lecturer was introduced by Mr. W. J. Geer, attorney at law, who said:—

Ladies and Gentlemen:—The many new discoveries and inventions, the rapid advancements and changes in the manufacturing and commercial world, the inauguration of new methods, modes, and practices in all the professions, lead me to conclude that the people of this age are a rapid thinking and acting people.

The various theories and creeds, call them religious ones if you choose, presented are taken up, carefully considered, and those that will not stand the test are cast aside; only the substantial ones remain.

This is particularly true as to our religious views. People do not all see, think, or act alike, and hence a constant sorting or weeding out is going on.

We, as a people, thirst after true knowledge, and I believe the world is getting better because of the desire and inclination to deal in a practical, business-like manner with the problems that are presented, especially those that have for their aim and object the improvement and elevation of mankind.

The Christian religion is one in which we all believe. The Christ is and has been the high ideal of all civilized nations for the past centuries.

The doctrine of the Christ, his precept and example, changed the whole course of the world's history. It changed Rome from a place of riot and debauchery to one of religion and devotion, and what it did for Rome it has never ceased to do for the whole world.

The doctrines promulgated by Christ and his followers have stood the test of all opposition for two thousand years; it has conclusively proved and established all that was ever claimed for it. And to-day the precept and example of the lowly Nazarene is presented to us as well rooted and grounded, and as fresh as when delivered in the Sermon on the Mount. There is no condition of human life that it does not reach, and none but what can find in the Christian religion a solace, a comfort, and a healing balm.

I am not a pupil of Christian Science in the general acceptation of the term, but I believe in a scientific, practical Christian theology,—one that teaches us to minister to the wants of those in distress, to aid those in need, comfort the afflicted, and relieve distress whenever and wherever we find it.

Christian Science is no new or vague theory, and those who have devoted the best part of their lives to the scientific study thereof are anxious that mankind should share in the great and glorious good there is in store for them.

We have with us this evening a Christian Scientist who is here to talk to us upon this all-important subject.

It is, therefore, my pleasure, ladies and gentlemen, to introduce to you the speaker of this occasion, Mr. Edward A. Kimball of Chicago, a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., who will now address you upon Christian Science.—*Correspondence.*

At Keokuk, Ia.

Edward A. Kimball, C.S.D., of Chicago, delivered an address on Christian Science at the Keokuk Opera House Sunday afternoon (February 9), under the auspices of First Church of Christ, Scientist, of Keokuk. The theatre was crowded, and the address was an interesting one and well worth hearing, even to the uninitiated. Mr. Kimball is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., and stands high in the ranks of Christian Scientists. He is a man of much force and is an attractive speaker. His address was closely followed by the audience, which included many of the most thoughtful people of the city.

The Gate City, Keokuk, Ia.

Mr. Kimball was introduced by Mr. A. Hollingsworth of Keokuk with the following remarks:—

It is the boast of the present civilization, especially in this country, that there is toleration for all forms of religion and all systems of philosophy. It should be, and to some extent is, a fact that there is at this day a considerable number of people who are not only willing, but regard it as the duty of every one not foresworn to ignorance, to examine carefully, fairly, and without prejudice, new beliefs and systems of religion and philosophy. I am one of those who believe this to be their duty, and that it is the duty of every one who would aspire to being really enlightened, and I assume that most of you who are present to-day agree with me in this, and have come here that a fair and impartial hearing might be had of the religion called Christian Science. It is to be hoped that those of us who have not understood it will hold our judgment in abeyance until we may have further knowledge, that we neither too hastily commend nor too hastily condemn. Let our minds be in a state of honest inquiry, willing to accept the truth whatever it may be.

We are fortunate to-day in having this opportunity to listen to one who comes speaking with authority as a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass. His utterances we may take as a correct statement of the doctrines of the Christian Scientists as he comes as an accredited exponent of those doctrines. It is my pleasure to now introduce to you Mr. Edward A. Kimball of Chicago, who will address us upon Christian Science.

Correspondence.

At Bloomington, Ill.

Nearly every seat was occupied at the Grand Opera House last evening (February 10), during the lecture upon Christian Science by Edward A. Kimball of Chicago. Mr. Kimball was introduced by Mr. F. P. Casey and the lecture was under the auspices of First Church of Christ, Scientist. Mr. Casey in making the introduction said:—

Ladies and Gentlemen:—We have assembled here to-night in response to an invitation from First Church of

Digitized by Google

Christ, Scientist, of this city, to listen to a Christian Science lecture. Public interest in the subject of Christian Science is widespread. The many wonderful healings resulting from the application of the principle of Christian Science have enlisted the attention and consideration of our best thinkers. Quoting from Science and Health, "The time for thinkers has come." There never was a time when mortals were more earnestly searching for truth, and demanding proofs in support of the claims of any new doctrine. In the words of Mary Baker Eddy in the Christian Science text-book, "Ignorance of God is no longer the stepping-stone to faith." Jesus said, "Ye shall know the truth, and the truth shall make you free." We do not know this truth, and we have not this freedom in so far as we are yet in the bondage of sin and disease.

Christian Science teaches that the understanding of this truth and its accompanying freedom may be gained here and now; even as the Scripture saith: "Now is the day of salvation." We have with us to-night one who is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston. He is not a stranger in Bloomington, having lectured in this house some three years ago, and having previously spoken at a Bloomington Chautauqua. He will address us to-night on "The Cause and Scientific Cure of Disease." I have great pleasure in presenting Edward A. Kimball, C.S.D., of Chicago.

Mr. Kimball spoke for nearly two hours. He is an entertaining talker and handled his subject in a manner which evinced his familiarity with it. He held the undivided attention of his audience from beginning to end. This was due as much to his earnestness as to the topic which he presented.—*The Bloomington* (Ill.) *Bulletin.*

At Newburyport, Mass.

Rev. William P. McKenzie of Cambridge, member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, was greeted by a good-sized audience at City Hall, last evening (February 13). Mr. Louis N. Bennett, a prominent young attorney of Boston, was presented to the audience by Mr. George C. Morrill of the local Christian Science Church, who, after a brief address, introduced the lecturer of the evening.

Mr. McKenzie talked for about an hour and a half, and his address was helpful and instructive, clearly outlining important points of this faith. His subject was "Christian Science, the Gospel of Love."

Newburyport (Mass) *Herald.*

At Marinette, Wis.

Edward A. Kimball of Chicago, addressed an audience of over a thousand people Friday evening (February 14), in the Scott Theatre, and held them interested in his hour and a half's talk on the claims, aims, and purposes of Christian Science. Mr. Kimball is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., and is particularly well qualified to explain the teaching of Christian Science. The lecturer was introduced by Mr. A. L. Black.

A large number of those present came from Green Bay and surrounding cities to hear Mr. Kimball, returning home on the late train.—*The Eagle,* Marinette, Wis.

The world is wide
In time and tide,
And—God is guide;
  Then do not hurry.
The man is blest
Who does his best
And—leaves the rest;
  Then do not worry.

Anon.

Notices.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same heavy paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Love for Mankind.

THESE words of our Leader in "Science and Health with Key to the Scriptures" page 25 (New Ed.), express a truth which it were well for every Christian to make the rule of his life-conduct: "The divinity of the Christ was made manifest in the humanity of Jesus."

It is easy to say that we love God, but to talk of love in the abstract and prove that we love God in our living, are different things. To talk of love and not demonstrate it in our acts is idle; nay, worse than idle; it leads to hypocrisy. The things we do, not the things we say, prove our sincerity and our discipleship. The great fact in Jesus' life was that he proved his words by his acts. His preaching was quickly followed by his practical demonstrations. These acts were acts of love in that they healed sickness and destroyed sin. He thus reflected divine Love by his human acts. Those who follow him indeed must do likewise. He distinctly taught this. He repeated over and over again the Old Testament commandment requiring a full and complete following of God by loving, that is, obeying, Him with all the heart, mind, and soul; and he declared that love of God and love of man were identical; that the one was not merely the complement of the other, but that they were one. True love of God, therefore, is manifested in the love of humanity,—the neighbor. When the one is expressed so also is the other.

If we pattern our lives after Jesus' life, then, what shall we do? First as to sin. Did he pass it lightly by as nothing, or did he rebuke it that it might be uncovered and destroyed? In rebuking sin he did not scorn the sinner. He mercilessly rebuked the self-righteous and unrepentant sinner, the worldly-wise sinner, but how compassionate was he toward the sinner who showed the least evidence of humility and repentance! With tenderest love and kindliest patience he pointed the way for this sinner. His attitude toward the suffering and repentant sinner was that of a burden-lifter, not of a burden-maker. He added not one feather's weight to the burden of any. He called upon the burdened and heavy-laden to take upon them his yoke, that their burdens might be lightened, and pitifully told them that his yoke was easy and his burden light. He proved to them that sin was not their rightful burden; he proved with equal certainty that sickness belonged not to their true heritage. He comforted the sorrowing; he "healed each bleeding wound" so far as he was permitted so to do.

The more deeply we study the life of this Son of God and Son of man, the more we become convinced that there is but one way to prove our love for God, and that way is by manifesting the same divine love for man that Jesus manifested; that is, by having the same Mind in us which was in the Christ. How plainly is this brought out in the writings of our beloved Leader! How faithfully is she proving her words of love in her life! How truly is she proving her discipleship! How closely is she exemplifying Jesus in all her ways!

Christian Scientists, are we living Love as much as we are talking it? Are we proving our words by our deeds as we should? Are we showing forth that Love which brings in harmony and drives out discord? Are we healing the sick and reclaiming sinners as we should? Are we forgetting self, and yielding all for Christ-Truth? Are we following, indeed, the Wayshower? If not we are not true Christian Scientists, for this is the demand made upon us; this is what we are professing before the world. Are we true to our profession? To the extent that we are not, let us mend our ways and turn our faces truly toward the Light and walk therein. The one great appeal to us from out the pages of our text-book is to keep the commandments, follow the Christ, prove our acceptance of Truth by demonstrating Love, and thus rising above materiality into spirituality.

Christian Science in Germany.

MUCH has recently been said in the newspapers concerning opposition to the spread of Christian Science in Germany. The dispatches are to the effect that the Emperor of Germany has intervened to prevent its further inroads into Court circles. It has also, it would seem, been discussed in the Reichstag. The nature of the discussion is not reported at length, nor do we know how correctly it has been reported at all. Neither can we determine, from the meagre dispatches, what the Emperor has done in the premises, if, indeed, he has done anything.

If, as is reported, a member of the Reichstag stated that Christian Science should be suppressed in Germany as it had been in the United States, we can only say that, as Christian Science has not been suppressed in the United States, but is spreading here with a rapidity that is astonishing its own adherents as well as the outside world, the argument in the Reichstag, if made, was not a happy nor a strong one; not more so, in fact, than was the coupling together of Christian Science and Spiritualism by another member. There is no more correctness of fact in the assertion that Christian Science and Spiritualism have the same psychological source than in the declaration that the former has been suppressed in the United States. Both statements show how little the subject under discussion was understood.

We shall patiently await the outcome in Germany, well knowing that when the Emperor and his subjects shall come to understand that Christian Science is none other than the true religion of the Gospels, is based wholly on the Word of God, and is but carrying out, in an especial way, the teaching and life-work of the Founder of Christianity, opposition to its establishment in Germany, as elsewhere, will cease.

We deeply trust that the Germans who are now opposing Christian Science will give its claims a fair and sincere investigation; that they will satisfy themselves of its wonderful healing and sin-destroying works; having done this, in an understanding way, Christian Scientists will be content to abide the issue.

Referring again to the discussion of Christian Science in the Reichstag, we quote the closing sentence of an editorial in a leading daily newspaper of the United States:

"The subject was wisely dropped after one of the ministers suggested that it was worse than useless for the State to use force against such things."

Judge Ewing.

IN reply to inquiries we will say that the newspaper accounts in reference to Judge Ewing at New Orleans were greatly exaggerated. Of this we have direct and authentic information.

Judge Ewing is fulfilling his lecture engagements as usual, and has been ever since the newspaper reports went out.

He is enjoying his usual good health, and is preaching the Gospel of Love and Health as effectually as ever.

Among the Churches.

At Colorado Springs, Col.

The work at Colorado Springs has been steadily growing during the past year, and in looking back we can see that our efforts have been crowned with marvelous success.

Our membership now numbers one hundred and sixty, making an increase of forty per cent during the year, and the attendance at our Sunday morning service is about three hundred, an increase of one hundred per cent in the past eighteen months.

On January 9, we held our regular annual business meeting, and the unity of thought was so beautifully manifested that the First and Second Readers, and both Boards, consisting of five members each, were elected on the first of their respective ballots, giving us ample proof that the One Mind is ever-present and governs all.

Last November, Mr. Kimball lectured for us, and his lecture proved to be a veritable love feast for the Scientists and was productive of much good outside our own ranks, two cases of healing having been reported. The soil had been well prepared and the fruitage was abundant. Surely the memory of that happy event will long live in the minds of all lovers of Truth in Colorado Springs.

Last fall we secured a church site which is centrally located and on one of the most beautiful avenues of the city, and it is our intention to begin the building of a church as soon as we complete the payment on our lot.

We are striving to bring out in each individual consciousness, the spiritual church whose "foundation is Christ Jesus" whose "walls are Salvation" whose "gates are Praise" and whose "Builder and Maker is God."

Our dear Mother has taught us what the *real* Church is, and it is our earnest desire to prove our gratitude to her, by being willing and obedient servants, and by doing all "to the glory of God."

This city is a famous health-resort, and invalids come here by the hundreds hoping to profit by the sunshine which they fancy will better their condition. It is to these poor, hungering hearts that our thoughts instinctively turn, hoping that we may be able to teach them the *true* way to health, harmony, and holiness.

May God continue to bless us in our efforts to uplift humanity, and in helping to establish His kingdom here on earth, for through our understanding of Him we are enabled to open wide our windows and cry out to those who are weary and afflicted, "Come unto me, all ye that labor and are heavy-laden, and I will give you rest."

LELIA YATES RIDER, *Clerk.*

Union at Buffalo, N. Y.

Believing that blessings increase as they are shared with others, we would have our brethren throughout the Field share our joy over a great work of Love which has recently been wrought for us,—a work which the following letters can but faintly outline.

Buffalo, N. Y., January 17, 1902.

To the Members of Second Church of Christ, Scientist, Buffalo, N. Y.

Believing the great demand of the hour to be unity, trusting fully in the words of our blessed Master, "That they may be one," in obedience to the teachings of our Leader and Mother, and in the desire for the advancement of our beloved Cause in this city, we, the members of Third Church of Christ, Scientist, lovingly ask to be admitted, as a body, into full membership with Second Church of Christ, Scientist, that we may work together in the bonds of Christ.

Yours in Christ, Truth,
Church Committee, Third Church of Christ, Scientist.
H. E. MANCHESTER, *Clerk.*

Buffalo, N. Y., January 20, 1902.

To Third Church of Christ, Scientist.

Dear Brethren:—Your earnest desire for "unity of the faith," meets a joyful response in our hearts. With deep-felt gratitude to the "Giver of all Good" for this manifest leading of Truth, we bid you loving welcome to full membership in our church, and may we, together, learn more perfectly the great lesson of Love which is the one bond of union.

Yours in Truth and Love,
Second Church of Christ, Scientist.
GEORGE A. TRIER, *Clerk.*

The members of the two churches met together as one on Sunday, January 26. The Lesson-Sermon on "Love" seemed especially prepared for this joyful occasion.

Church Committee of Second Church.

Annual Meeting at New Orleans.

Second Church of Christ, Scientist, New Orleans, La., held its third regular annual meeting on the evening of January 7, 1902.

Reports made by the several officers were indeed encouraging. Particular mention should be made of the treasurer's report: notwithstanding the many obligations incurred, they were all met, and a small cash balance remained to begin the year 1902.

Our church is located in the most beautiful residence section of the city, and the attendance during the year 1901 was very good.

One significant fact which deserves especial mention is that the increased attendance at our Sunday School necessitated an additional room. Therefore, when re-leasing our present building for a future period of two years, we were granted the privilege of building an annex to the church for this particular purpose. This has been accomplished and all obligations met.

Our reading room has been removed from the church to 419 Hennen Building, the most prominent and centrally located building in the city. The room is supplied with all Mrs. Eddy's works, as well as all literature from The Christian Science Publishing Society.

In gratitude for the many blessings our little church has received, this report is submitted.

MRS. A. WALKER, *Clerk.*

Annual Meeting at Kingston, Ont.

The fifth annual meeting of First Church of Christ, Scientist, Kingston, Ont., was held on Monday evening, February 3, 1902, with a representative attendance. The reports were all of an encouraging nature,—satisfaction with the work of all the officers was expressed, and hearty int rest shown in the appointments for the ensuing year. The clerk's report, on behalf of the Board of Trustees, called attention to certain marks of progress made during the year; the re-union of the two churches as an indication of the growth of spiritual harmony; the healing influence manifested in the church services; the opening of class instruction in Kingston; the securing of a first floor flat—hall, reading room, and offices—for Christian Science; the gradual increase in membership; and all evidences of the operation of the spirit of Love. The treasurer's report, which was careful and painstaking, showed a gratifying, steady increase in the finances. The directors' report showed commendable activity, especially in connection with the reading room. Appreciation of the work of the Sunday School, and of all who help the children, was expressed, special mention being made of the children's choir for the Sunday services. Election to the Boards of the church, and the specifying of salaries was by ballot, the amounts being voted on averages. The tone of the meeting was one of harmony, hope, and aspiration. G. R. LOWE, *Clerk.*

Digitized by Google

At Littleton, N. H.

The Society in Littleton consists of fifteen members, organized one year ago. We have an interesting Sunday School. Our meetings are held in quarters that are pleasant and central. Christian Science literature has been placed in the public library, the Y. M. C. A. room, and the railroad station. The average Sunday attendance is twenty-five and the mid-week service is well attended. One lecture has been given and another is contemplated in the near future. Individually and collectively we desire to express thanksgiving and praise to God for the priceless gift of Christian Science to this and every age through our Leader and Mother, Rev. Mary Baker G. Eddy. To the publishers of the *Sentinel* and *Journal* we owe our thanks. To the Lesson Committee, who labor so efficiently and effectively for us, we are grateful; and for every one with whom we are "one in the larger thought of God" we have a warm place in our hearts.—Miss Emma Morse.

Unity at Bradford, Pa.

Bradford, nestled among the snow-clad hills of Pennsylvania, sends greetings to all sister churches, and asks that they may rejoice with us, in that the sunlight of Truth is dispelling the darkness that seemed to exist in our midst. The claim of separation has been met and overcome.

Our hearts are filled with gratitude for all that infinite Love has done for us. We start the new year in larger rooms, newly furnished, and centrally located, and our outlook is more encouraging than it has ever been.

We wish to express our appreciation to The Christian Science Publishing Society for their faithful labor and for the many helpful messages from the Field which help to brighten our way. Our desire is that we may be faithful workers in our Master's vineyard.

Mary A. Gregg, *Clerk.*

At Hoopeston, Ill.

At a business meeting of the members of First Church of Christ, Scientist, called to consider the building of a house of worship, it was resolved by a unanimous vote that the thanks of the members be extended to the people of Hoopeston, for the generous and kindly expression of good will displayed by them in subscriptions to our building fund.—Josiah Rusk, *Clerk.*

The *Danville Commercial* says: "The first Christian Science church to be built in this county, or for that matter in this part of Illinois, will be erected at Hoopeston this summer. The Hoopeston Christian Scientists are raising money to erect a church and have almost enough promised to pay for the structure, which will be a handsome one. The new church will be located on the corner of Third and Washington Streets, where the Friends' chapel now stands."—*The Hoopeston* (Ill.) *News.*

Annual Meeting at Fort Wayne, Ind.

Second Church of Christ, Scientist, held its first annual meeting last evening in the church edifice, 96 Harrison Street, and listened to a review of the work of the past year. The report showed that there are forty members, eleven of whom have come into the church since its organization, who had never been members of a Christian Science Church previously. There are twenty-three Sunday School scholars enrolled. The work accomplished by church and Sunday School, both spiritually and financially, has been most gratifying. The total receipts for the year were $1,001.43 and all obligations of the church have been met, leaving a balance in the treasury. A public reading room is open daily at 24 East Washington Street. One lecture on Christian Science was given under the auspices of the church by Mrs. Annie M. Knott, C.S.D., of Detroit, Mich.—*Fort Wayne* (Ind.) *Sentinel.*

Selected Articles.

Christian Science Satisfies.

To the Editor of the *Herald.*

Christian Science is without doubt one of the most popular subjects of the day. This is probably due to the revolutionary ideas of philosophy taught in this Science and its healing effects upon mankind. So extensive have been the results of this faith upon its adherents that it has attracted universal attention. As is the case with most things that are new, some are likely to look upon it with more or less incredulity. Its radical departure from materialism would naturally meet with disapproval on the part of those who are deeply rooted in materialistic philosophies, until they have had opportunity to test the new ideas.

Its complete abandonment of medicine in the treatment of the sick is looked upon by those who have only a superficial knowledge of this science as neglect rather than a help. But all these difficulties are removed by experience. Every well established theory, contrivance, or institution has been obliged to run the gauntlet of scepticism and perhaps persecution, and even those who advocate new things have been more or less maligned, being hated because they were responsible for the new things and because the new cast a reflection upon the old.

Whether Christian Science is or is not correct in its theory, it is certain that its adherents are an earnest, honest body of Christian people who will average with mankind in general intelligence and refinement. It cannot be denied that much good has been accomplished through this school of science, and as the fruit is good, it must be true that the tree is good.

The marvelous growth of this denomination is not strange when we take into consideration the efficacy of Christian Science. Such only indicates that the people know a good thing when they see it. While it is true that even at this late date there are many who recklessly venture into humbuggery, yet the people are not likely to follow to any great extent a thing which promises but never pays. That the faithfulness to their religion is unabating on the part of Christian Scientists proves that their faith satisfies.

This Science offers relief from the general lines of human woes abstractly named sin and disease. The increased immunity from the ills of the flesh, the clarification of the mental condition of its adherents, makes it a place of refuge for the distressed.

The nearness of God made conscious through the teaching of this science fulfils the Scriptural declaration, "Thou wilt keep him in perfect peace, whose mind is stayed on thee." Christian Scientists have no desire to meddle with the various schools of religion and medicine, but cheerfully accord to all mankind the privilege which they claim for themselves; their own choice of religion and medicine.

Alfred Farlow.

In the *Newburyport* (Mass.) *Herald.*

A Prophecy for the Twentieth Century.

New centuries call for new ideals. The imagination is stimulated at the commencement of a cycle; the impulse of life takes a fresh start. It is a point of vantage in the unceasing march of time, from which we look backwards and forwards, seeking light from the past and inspiration for the future. To prophesy events is to deal in the black arts, but to prophesy tendencies is to express a hope which may be realized—a faith which may be as the grain of mustard seed. It is by faith that the world advances. We assert our faith and then strive to make it vital in our lives.

The nineteenth century was an age of science. Its achievements were the most splendid in the annals of the human race. It was an age of discovery, of exploration,

Digitized by Google

of colonization. Its close marked the decline of the Latin races and the ascendency of the Anglo-Saxon. Its most illuminating thought may be summed up in the word "evolution."

In the century closed materialism triumphed. The new century shall be an age of spiritualism. Upon the practical shall be builded the ideal. Men have been studying how to gain money. Now they will vie with one another in its wise distribution. They have sought for mastery over the elements of the earth and air, and have triumphed in an age of steel and electricity. Now they are to strive for mastery in the realms of the spirit. Religious faiths have crumbled before the scrutiny of science. Like the growth which springs from the mould of a ruined forest shall be the new religion of the new century, with its roots deep down in the basic truth of science, and its branches towering in the pure heaven of love.

Art, the handmaid of religion, shall come to her heritage in this new century. She, too, shall be nurtured by the glory of science, but shall rise in her own kingdom of the beautiful, the serene, and the pure. Her benign influence will spread like a benediction over the works of man.

Westward the march of progress tends, and the world's centre of thought and action will shift from the Atlantic to the Pacific. May it be a progress from war to peace! May it be indeed what so many epochs have been vainly called—a Christian era! May it witness the change from a statecraft which held its own by might to that millennium in which right, truth, and justice control the policies of men!

CHARLES KEELER.

In "Impressions."

Nuggets.

How many to-day are really and truly thankful for the great blessings they daily receive from the always present and loving One who watches over all.

How many in the inner sanctuary of the heart, do sincerely and reverently acknowledge each and every blessing whether of food or raiment, for are they not from God? His love and tender care is ever discernible to the spiritually inclined.

Spiritual nuggets are lying at our feet daily. Do we grasp them? If we but made half the effort to obtain and thoroughly understand and apply them to our daily life that we do to obtain the glittering and material nuggets, the earth would soon be girdled with the glad song of the brotherhood of man.

J. PAUL LOWELL.

Sow thy Seed.

BY M. E. S. W.

Sow the seeds of Truth and Wisdom
On the parched and arid ground,
Even though the thorns and thistles
Rise about you all around.
Pluck them gently and remove them,
And some tiny seed may spring,
Nourished by the rain and sunshine,
Rich and perfect fruit may bring.

Sow the seeds of Love and Kindness,
Scatter them where'er you go;
Oft the broad and rolling rivers
From the little streamlets flow;
From the seeds which erst have fallen
Scattered by the summer breeze,
Come the strong protecting branches
Of the stately sheltering trees.

Cast thy bread upon the waters,
Though it seem to float away,
'Twill return to bless and cheer thee,
Bring thee joy some future day.
Send some little ray of sunlight,
That may reach the darkened breast;
That may cheer the soul benighted,
Give the weary spirit rest.

Knock and it Shall be Opened.

BY B. S. JOSSELYN.

IN reading to-day in "Science and Health with Key to the Scriptures," I commenced with the last paragraph on page 193 and read to bottom of page 195, and it seemed a much clearer message to suffering humanity than ever before.

The claims of material sense hold us in bondage only while we permit it, or in other words, until we destroy their supposed power by a steadfast declaration of the Truth as taught in Christian Science. We must have absolute confidence in the ability of God to do all that is good. We shall then give up the idea that drugs, climate, or any other material condition or thing can influence, help, or hurt us in any way, and that God does not require material means to work out His problems, or to bring their Truth to our consciousness so that we can work them out. We shall then understand that there is really only one power, which means only one God to worship and obey; and when we get that idea firmly and clearly into our thought and hold on to it, we shall then fully recognize the fact that God is the only power, and that its opposite, or supposed power, evil, which also means sin, sickness, old age, and other kindred ideas, are simply the counterfeit of Good, and should not be believed, but cast out of our thoughts; treated as we would counterfeit money, even though a large number of people might say it was good money. So we must stop believing false statements, for until we do, we shall be in bondage to those so-called laws.

Our principal fault is in believing that there are gods many, which means a violation of the first commandment of the decalogue.

We must seek the kingdom of God within us, by casting out that which is not good; such as hate, envy, strife, and all other things that we know and are taught are wrong. We must be honest with ourselves before we can be honest with others, and we must love our neighbor as ourself before we can love God. We must stop thinking wrong

Digitized by Google

and destroy every temptation to think or do wrong, make a business of it every minute, every hour, then we shall be left alone with God and His goodness, have dominion over all things as He intended; then we have demonstrated harmony, or heaven, upon earth.

Many suffer and are not guilty of intentional wrong-doing, which also means wrong thinking; in such cases there is some lurking sin and it must be found out and destroyed. The sin may be so small to our sense, that we do not consider it a sin at all; but it is often these seemingly insignificant sins that cause us the most trouble, for they are subtle, work in the dark as it were, and strike us in the back when we are not looking, like the thief at night.

We should seek, seek, seek, until we find Him. Knock, watch, and wait, and His goodness will surely be revealed unto us. I believe this, and have found a portion of the Good that God has promised us, and thank our beloved Leader, Mary Baker G. Eddy, for having made that possible, by giving to the world what is contained in her book entitled, "Science and Health with Key to the Scriptures."

Experience.

BY MABEL S. MANCHESTER.

THE one thing needful for the full fruitage of our growth in Christian Science is experience. We "rise by the things we put under our feet." In the Apocryphal New Testament, one writer says, "It is the part of a brave combatant to be wounded and yet to overcome." How do we really know the *nothingness* of error until we have proven it for ourselves? As we journey are we not made stronger by wrestling with and defeating every temptation that presents itself? and does not this fit us better to comprehend our brother's need, and so cheer and encourage him, than one who has not yet learned the value of experience?

Jesus said to Peter, "Satan hath desired to have you, that he may sift you as wheat: but I have prayed for thee, that thy faith fail not." He did not pray for Peter to be delivered from the temptation or saved that sifting process. He simply prayed that his faith would not fail him during the hour of trial, well knowing that through this experience Peter would learn valuable lessons, and thus be enabled to do more understandingly his Master's work, for he immediately adds, "And when thou art converted, strengthen thy brethren." We are often tempted to shrink from experience, but do we understand that every experience is a step heavenward, because it helps us to wipe out some of the mists of material sense? Science and Health says, p. 331, "Jesus spares us not one individual experience." Then they are needful to us, or we would not have them. Through experience we learn to have more love and compassion for our brother, to be more charitable in our work together, knowing we "all are tempted." Then we see more clearly our brother's need, and shoulder to shoulder we march on, each a help to the other, until we awake satisfied.

Lead Gently.

BY ELIZABETH KATZ.

I THINK many of us often make the mistake, especially when we first taste of a healing power and spiritual illumination which comes from the reading of our blessed text-book, "Science and Heath with Key to the Scriptures" by our dear Leader, of wanting to bring every one about us, namely, our relatives, into the great joy and understanding of the Truth. Of course, the desire is right, but we cannot drag them. Each person has to see the Truth for himself, and has to come to the point that he longs for spiritual things, either consciously or unconsciously. A little word of Truth spoken awakes him; he commences to grasp the spiritual, and little by little to cast off the old man and his deeds for the real man, created in God's image and likeness.

In this connection the thought came that after a long winter's sleep the earth is not completely aroused by one day's shining of the sun, but day by day, through its patient shining, the ice is melted and broken up, and the sweet flowers and tender grass spring forth to gladden our hearts.

We need to know when and what to speak, wisely, and above all to have the Christ Truth so engrafted in our thought that we shall illumine all those within our radius with the practical force of living the life that approaches the highest Good.

Communion with God.

Sometimes a man makes a conscious and serious effort to receive and enlarge this communion. He looks over his daily life; his eye runs back to childhood, and takes in all the main facts of his outward and inward history. He sees much to mend, something also to approve. Here he erred through passion, there sinned by ambition; the desire from within, leagued with opportunity from without, making temptation too strong for him. He is penitent for the sin that was voluntary, or for the heedlessness whereby he went astray,—sorrowful at his defeat. But he remembers the manly part of him and with new resolution braces himself for new trials. He thinks of the powers that lie unused in his own nature; he looks out at the examples of lofty men; his soul is stirred to its deeper depths. A new image of beauty rises living from that troubled sea, and the ideal of human loveliness is folded in his arms. "This fair ideal," says he, "shall be mine. I also will be as whole and beautiful. Ah, me! how can I ever get such lovely life?" Then he thinks of the eternal Wisdom, the eternal Justice, the eternal Love, the eternal Holiness, which surrounds him, and now fills up his consciousness, waiting to bless. He reaches out his arms towards that infinite Motherliness which created him at first and has preserved him ever since; which surpassed when he fell short, furnishing the great plan of his life and the world's life, and is of all things perfect Cause and Providence. Then, deeply roused in every part, he communicates with the infinite Mind and Conscience, Heart and Soul. He is made calmer by the thought of the immense tranquillity which enfolds the nervous world in its all-embracing, silent arms. He is comforted by the motherly aspect of that infinite Eye, which never slumbers in its watch over the suffering of each great and every little thing, converting it all to good. He is elevated to confidence in himself, when he feels so strong in the never-ending Love which makes, sustains, and guides the world of beasts, and men; makes from perfect motives, sustains with perfect providence, and guides by perfect love to never-ending bliss. Yea, the tranquillity, pity, love, of the infinite Mother enters into his soul, and he is tranquil, soothed, and strong once more. He has held communion with his God, and the Divine has given of the Deity's own kind.

THEODORE PARKER.

When he had spent himself in the service of the poor and oppressed and lay peacefully awaiting his end, he was overheard to say to himself that he had "come to the river and there was no river."—*London Spectator, of Frank Crossley.*

There is no escaping the mill that grinds slowly and grinds small; and those who refuse to be living stones in the living temple, must be ground into mortar for it.

MACDONALD.

Testimonies.

About six years ago I was crushed to the earth, as it were, by an accident; my husband and his employer being the victims. There was a gloom cast over the whole community where we lived on account of the terrible casualty. There were many friends and ministers of different denominations that came to offer sympathy and words of comfort, telling me that I must be submissive to God's will; but I must confess I was somewhat rebellious, for I could not understand why God had sent this affliction upon me, and could find no comfort, everything seemed dark and mysterious. I thought I had tried to live a Christian, had read a portion of my Bible every day and prayed that God would take care of my loved ones; then I thought it was no use to pray, God did not hear prayer, and no need to read the Bible, there was no comfort in it. I did not open my Bible for several weeks, for I had almost lost confidence in God.

After a while one day I was so wretched that I felt I could not bear my burden alone, and could not live without God's help; I picked up my Bible and opened it, and my eyes fell on these words, "Behold, the Lord's hand is not shortened, that it cannot save; neither his ear heavy, that it cannot hear," and these words comforted me in a measure, but yet I could not see why I was thus afflicted. This was in 1896.

In 1898 a young friend came to our town and loaned me Science and Health. Up to this time I had never heard of Christian Science, and I eagerly devoured it, I was so hungry for Truth. It was near Christmas when I received the book, and on Christmas day I read the entire day. I did not stop to cook any dinner, my daughters being away from home, and I had such a feast as I never had before, and was greatly lifted up, for I was thankful to know that God had not sent these afflictions upon me. I could see it was indeed a Key to the Scriptures. I soon had a copy of my own, also "Miscellaneous Writings," and many others of Mrs. Eddy's writings.

I will here state that while reading Science and Health I was healed of a nervous stomach trouble of long standing, for which I had taken much medicine. Now I do not take any medicine, and have overcome many other claims that mortal mind has presented to me. If this is worthy of a place in the *Sentinel* I shall be glad, for I wish to thank our dear Mother and other dear ones for what good I have received through their efforts. When I look over this it does not satisfy me at all, for it does not express the half I wish to say, but I will content myself with the hope that some one will read and understand my feeble attempts to show my gratitude, for we know that no words can express God's Love.—Mrs. C. Bray, Elizabeth City, N. C.

The following demonstration, has been of such help to me through the lesson it has taught, that I feel it may be of equal help to some one else, so I send it out to the Field.

When eighteen years of age, I had the measles, and in due time recovered from them, with apparently no bad effects. About a year later, I became conscious of the fact that I was perfectly deaf in one ear, and immediately attributed it to the measles, as I had been told that they usually left an unpleasant after effect, especially in the case of adults. I did not try to do anything for the trouble through *materia medica*, for I supposed it was incurable, and my other ear being very good, it was not a great inconvenience. In a few years, however, I began to be troubled with my good ear whenever I bathed. At first the deafness would only last about fifteen minutes, but gradually the time increased, until I took up the study of Christian Science, when it grew much worse.

I treated myself earnestly and faithfully, but apparently to no purpose. Right here let me say that I always did the treating after I had bathed and when the deafness was present. This went on for a number of months, and the trouble had reached the point where the deafness would last until ten and eleven o'clock the following day, causing me much fear, inconvenience, and mortification.

Finally, one evening just before bathing, this passage came to me from "Science and Health with Key to the Scriptures," p. 392: "When the condition is present which you say induces disease, whether it be air, exercise, heredity, contagion, or accident, then perform your office, as porter, shutting out these unhealthy thoughts and fears. Exclude from mortal mind the offending errors, then the body cannot suffer therefrom."

I saw at once where I had been in error. I had been barring my door after I had allowed the enemy to enter. I sat down, right then and there, and locked and secured the door of my thought against the lying belief that matter could affect matter, or that man's senses were material. I realized that God, Spirit, created man, that like produces like; hence, since man was spiritual and his senses must be spiritual too, they therefore could not be interfered with. In the strength of this thought I bathed, and awoke the following morning, not only free in what I called the good ear, but in the deaf one also, and I have had no trouble since, some seven or eight years.

The lesson is clear and is forcibly expressed in the familiar saying, "An ounce of prevention is worth a pound of cure."

Jesus said, "What I say unto you I say unto all, Watch."

Herbert W. Eustace, San Jose, Cal.

When we begin to understand even a little of Christian Science, our old way of thinking begins to disappear. One by one we put away the old beliefs and realize the true way of thinking; then we begin to see the power of this right way of thinking, for, as our old beliefs brought out conditions corresponding to our thoughts, just so do the better, truer thoughts we entertain, bring out more harmonious conditions. Christian Science is constantly changing every thought, reversing it often, and this change for the better is applied successfully in every phase of existence. The confusion and worry which fear induces, begins to disappear, and here again we feel the power of Christian Science in a sense of freedom, because we get an understanding of the ever-presence and power of God, which quickly supplants the faithless sense of fear.

Before understanding anything of Christian Science, I secretly entertained the idea that I would not live long, because of physical ailments which I could not get rid of, including malaria. After learning a little of this great Truth of Being, I began to change my way of thinking, having less fear and more faith in the ever-presence of God. I gradually rid myself of the conditions which my wrong thoughts produced, and I found that instead of physical healing, I needed mental healing. It was restful to grasp and understand the right way of thinking, and it was not long before I realized that I could adjust my wearing apparel in the morning as soon as I arose, instead of waiting for a couple of hours until the body assumed a less swollen appearance.

Another instance of healing revealed to us the absolute fact, that the absence of fear, and the faith and trust in the Great Physician's ever-presence and omnipotence had overcome in less than a day, the claim of measles, that was manifested all over the body, including the eyes. The child was perfectly healed.

It is needless to say that we are grateful to our Leader for this awakening to the true sense of life and its attributes, "health" and "harmony."—for we must prove our gratitude by our works.—E. M. Hector, New York, N. Y.

When all faith in earthly aid had ceased, then Christian Science, which is indeed the revelation of the ever-presence and all-power of divine Love, found me and healed me of the belief of acute or quick consumption.

After a year and a half of ceaseless agony, rest at last came, and how unspeakably sweet that rest was to the exhausted thought and body. This recovery was not immediate, neither was it slow, for with the ninth treatment came freedom from pain and soreness, and the conviction that I was healed.

Here let me say, that the patient, tender love of my healer gave me such courage in hours of suffering, that I was impelled to aid her in her God-given work, by unquestioning obedience.

There have been many other resurrections for my thought between that time and to-day, but I will mention one more which occurred some weeks since. An old belief of heart disease, in what is considered its most fatal form, asserted itself, and for several hours the shadows looked very black. Then came a time, when life seemed swiftly passing, and with this also came the realization, steadfast and unshakable, that there is no death.

During three years of Christian Science study, it has been my sacred privilege to have many beautiful demonstrations of Truth's power,—several cases of mental surgery, besides various diseases; but to me the most wonderful work of divine Love is the resurrection from the manifold forms of sin.

Let me cite only three cases of instantaneous healing. One of more than seven years' standing, another of how many years I do not know, and one of over twenty-five years' tenacity. This last named case was believed to be an hereditary curse, sent by God, and held the thought in such bondage that all hope of freedom had utterly died until Christian Science was presented to the thought. These sins cannot be named here, but they are among those that make outcasts of men and women, ultimately.

And the only way we can show our love and unbounded gratitude to God for this Truth that is healing and purifying the sin-sick world, is to follow in patient obedience the way our beloved Mother is showing us day by day, in the way she is walking step by step after the Master, up to the great heart of Love.

So when storms seem to rage around us, let us look through the clouds for the rainbow,—the promise of Love that never, never fails,—and we shall find freedom.

KATE ROMAINE SMITH, Columbus, O.

The *Sentinel* and *Journal* are welcome visitors, and I have often thought that I ought to send a few words showing my appreciation of them and gratitude for what Science has done for me; but error has always suggested that I wait until I was fully healed, that I might have something definite to write; but if a demonstration which we are seeking to make seems to be delayed, and for any reason we are unwilling to write anything for our publications, may that not be the very error which is holding us back? Mrs. Eddy says, "A just acknowledgment of Truth, and what it has done for us, is an effectual help" (Science and Health, p. 372). The promise is, "If ye be willing and obedient, ye shall eat the good of the land," and our Leader in "Miscellaneous Writings" gives one definition of obedience as being "never unready to work for God." We cannot expect the blessing unless we fulfil the condition. If we allow ourselves to feel discouraged and are tempted to think the demonstration will never be made, we are taking "thought for the morrow," and not realizing that we are promised strength only for to-day.

I used to read in the *Sentinel* the testimonies of physical healing first, but since I have learned so well the wonders (to mortal sense) of which Science is capable, I am more interested in accounts of spiritual healing and the articles "From our Contributors," and I always feel a sense of loss when those articles have to be omitted.

There was an especially helpful editorial in a June number on "The Less Startling Demonstrations." While I have no remarkable cure to relate, I am more grateful than words can express for the help which I receive daily; and the peace and joy which are mine only those can understand who have experienced the same

FLORENCE A. COLBATH, Farmington, N. H.

If I may judge from my own experience, I would say that Christian Science is a great blessing, a boon to those who consider themselves "declining in years." Before it was brought to my notice, I supposed that I had arrived at the age when I should look for all the ills my parents had had to be manifested in me, and that I must begin to learn how to die. But Christian Science teaches me that my true inheritance is Life, Truth, Love, Harmony, Health, and happiness; and that I can learn *how to live* rather than how to die.

I have proven to my consciousness that through the application of the teachings of Science and Health and the Bible harmony can be reached.

I can testify to the healing of severe headaches, from which I suffered many years, an unsightly growth on my hand, bunions, innumerable painful corns, which have completely disappeared, and an instantaneous healing of a frozen toe joint which the surgeon had said must be operated upon and lameness would be the result.

Better than all this, however, is that Christian Science teaches us how to turn the lens on ourselves and *know* ourselves, enabling us to overcome self, which is the *first* and best work.

Such peace and happiness, contentment and rest, I never knew until it was found therein. My heart fills with thanksgiving to Mrs. Eddy for this great blessing to all mankind.

MRS. LOUISE BROWN, Denver, Col.

Allow me through your columns to thank our dear Mother, the Publishing Committee, and the contributors *one and all* for their helpful articles. I often wonder if the dear ones realize what their messages of Truth and Love are doing for the whole world.

Away from America, my own loved land, on a far-away island of the sea, the *Quarterly*, and the other publications come, like "white winged doves," bearing messages that the storm of mortal mind *is over*, and that we, if obedient, can *know* it and anchor our "ark," and land on the rock, Christ-Truth.

All our loving, obedient followers who attend services held in a beautiful, cool, well-furnished room, have been helped by articles read from these publications at our Wednesday evening meetings, and inasmuch as they have been so much to us I feel I want one and all to know how grateful we are.

To our dear Mother, we would say that words fail us to express our gratitude to her for all she has done for us, but we know it will gladden her heart to know that she has children far from her who are daily striving to overcome self and sin, that they may be worthy to call her Mother.

C., Nassau, N. P.

The corner-stone of character, that on which the whole edifice is to rest, must be truth. Be truthful in word and deed and act, faithful to your conception of right, and you can no more help building a noble character than the earth can help moving in its orbit. A boy who has the courage to tell the truth under all circumstances, even when it may appear to be to his own disadvantage, will never do a mean, unmanly, or dishonest thing. He will not stoop to do anything questionable, no matter what material gain it may promise.—February *Success*.

Religious Items.

The New Testament teaches, and the life of Christ illustrates the teaching, that as man conforms to Divine instructions, complies with the promptings of his better nature as thus enlightened, he enters upon a new and higher order of life, and as he progresses therein his experience becomes of a heavenly character because it is one of peace, joy, and satisfaction; of conscious union with the Father in its ruling thoughts, feelings, purposes, and deeds. This is the kind of life, that of exalted experience, that Jesus referred to as a possibility, and as an end to be earnestly sought, when he said, "The kingdom of heaven is within you." What is this kingdom which may be established within the soul? Surely it consists of pure desires, motives, affections, aspirations, and actions, which produce a character, a life, in which truth, righteousness, justice, love, sympathy and helpfulness, hope and faith are the ruling principles. Jesus brought *that* kingdom of heaven to earth in the sense of revealing and exemplifying the constituents of a heavenly life,—that which creates heaven for the soul in whatsoever part of the wide universe it may be. While on earth Jesus was in the *kingdom* of heaven because that kingdom was so fully enthroned within him.—*The Universalist Leader.*

Every year the *Allgemeine Zeitung* of Munich, publishes a carefully prepared estimate of the religious statistics of the world. According to the estimate for the present year, there are in Europe 384,500,000 Christians, 6,600,000 Mohammedans, 6,500,000 Jews. In all America there are 126,400,000 Christians; the Jews and heathen are not given. In Asia there are 12,600,000 Christians, 109,500,000 Mohammedans, 200,000 Jews, and 667,800,000 pagans. In Africa are 4,400,000 Christians, 36,000,000 Moslems, 400,000 Jews, and 91,000,000 heathen. And in Oceania are 9,700,000 Christians, 24,700,000 Moslems, and 4,400,000 heathen. In the whole world there are 240,000,000 Catholics, 163,300,000 Protestants, and 98,300,000 Greeks, or a total of 501,600,000 Christians in a population of 1,544,509,000. It is a striking fact that Protestants are increasing in numbers faster than Catholics. In English-speaking lands, Ireland alone has a majority of Catholics. The wealthiest Catholic Church is that of France.—*Missionary Review of the World.*

With the accession of the three West India Islands from Denmark will come accessions to the religious forces in the United States. About sixteen thousand of the thirty thousand population of St. Thomas, St. Croix, and St. John Islands are actively identified with the churches. There are Moravian, Dutch Reformed, Methodist, Roman Catholic, and Church of England bodies. Excellent religious edifices are to be found in Charlotte Amalie, the largest place on the island of St. Thomas. Ministers of churches on these islands are white or black without regard to the color of those who attend their churches, there being no color line. Church schools abound to the number of five, and education in the public schools is compulsory. The dominating church influence is Protestant, and general intelligence is high, quite unlike the neighboring Porto Rico.
Independent Statesman, Concord, N. H.

We are persuaded that in all our Churches there are many good people who are seeking their own spiritual welfare and the prosperity of the cause of religion by false, or at least secondary, methods. They are waiting for some minister to bring them what they should win for themselves. They trust almost superstitiously in the magic of meetings. These things are all well enough, but they are not primary. The supreme need is our own views of truth, our own convictions, our own conscious fellowship with Christ, and while sermons and meetings may aid to this, they are bread of which we do not partake until the truth in them is made of the very substance of the soul by loving meditation and prayer and Christian action.
The Watchman.

The Christian life is continual warfare, but in it all, "the peace of God which passeth understanding" may "garrison our hearts and minds in Christ Jesus." In the keep of the castle, while the storm of war is breaking on the walls, there will be a quiet chamber where no shafts of the assailants can penetrate, and "the noise of them that strive for the mastery" is never heard. Dwelling in the "secret place of the Most High," we can keep our souls in peace, while we fight the good fight of faith. We are God's warriors; let us make sure that on every battlefield we rear an altar and call it "The Lord is peace."
ALEXANDER MACLAREN, D.D.
In *The Examiner.*

Some one has said that Christ alone is the Saviour of the world, but that Christ alone cannot save the world. His life must be re-lived by you and me if it is to touch and purify other human hearts. And as Christ suffered in living the life of holy love among sinful men, so will his followers not be exempt from walking in the steps of their Lord. Whatever comes as the result of trying to carry the good news to the ends of the earth, or of living the Christ-life among men, is, in the thought of Paul, a part of the means whereby the redemption of man is effected. HENRY T. COLESTOCK.
In *The Standard.*

It takes time to be holy. For holiness is not a momentary pause in an endless process of worldly self-seeking, a mere catching of the breath between excited calls after pleasure, an occasional dropping on the knees for a hundred-words-a-minute prayer, much less an instantaneous ejaculation of some pious phrase. Holiness is not a hiatus, but a habit; not a pause in life, but a power for life. It is not a thing that can be had or done in the infinitesimal fraction of a life, for it is an interest that must control the whole of life.—*Zion's Herald.*

"The story of the 'Search for the Holy Grail' is well known to every one through Tennyson and Lowell," said the Rev. William T. McElveen in speaking of this story on canvas by Abbey in the Boston Public Library. "This Holy Grail is supposed to be the cup with which was instituted that first Lord's supper, and the romance of it is so beautifully portrayed as to offer suggestion and thought for every lover of the beautiful. It is the struggle of the human soul to obtain peace, purity, power, and perfection."—*Boston Transcript.*

It is a striking fact, when we think of it, that the whole Christian Church is professedly following an Unseen Leader. No living man has ever seen Jesus in his bodily form; no one has ever heard him with lips of flesh speak one word. Yet we know that millions upon millions to-day professedly follow Jesus as their trusted spiritual Leader.
The Universalist Leader.

This life of the Lord on earth is but misused if we only study it to argue or dispute; it is for the nourishment and sustenance of the feeble, flickering flame of spiritual life within our souls; it is the way to the supreme reality. "Ye that have known me, have known my Father," saith our Lord in his divine humanity." E. F. M.
In *New-Church Messenger.*

A man's religion, if it is worth anything, is after all but a synonym for his life. Religion is life and life is religion. All that is deepest, finest, and strongest in human life is rooted in the religious nature of man, the nature that instinctively trusts and reverences God; that, with a wide generosity, loves mankind.—*The Universalist Leader.*

Hale and hearty, despite his fourscore years, Rev. Dr. Theodore L. Cuyler, the oldest Brooklyn pastor, preached one of his vigorous old-time sermons in the Lafayette Avenue Presbyterian Church, New York, Sunday morning. Dr. Cuyler's text was "A Message at Fourscore."

The *Independent* believes that "one serious danger of a conservative theology is that it will give the impression to the world that religion is afraid of investigation; that it has a sneaking fear that its claims will not bear investigation."

Little self-denials, little honesties, little passing words of sympathy, little nameless acts of kindness, little silent victories over favorite temptation—these are the silent threads of gold which, when woven together, gleam out so brightly in the pattern of life that God approves.—CANON FARRAR.

The lovely valleys in which we meet our friends and business associates ought to be just as verdant and well watered as those Sabbath elevations on which we "see no man save Jesus only."—DR. T. L. CUYLER.

You cannot dream yourself into character; you must hammer and forge yourself into one.—J. A. FROUDE.

People seldom improve when they have no model but themselves to copy after.
GOLDSMITH.

We more readily confess to errors, mistakes, and shortcomings in our conduct than in our thought.—GOETHE.

Religion presents few difficulties to the humble man, many to the proud, insuperable ones to the vain.—HARE.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion: 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

A recent editorial in the *Boston Herald* gives the following interesting statistics regarding the growth of the United States during a period of forty years: In 1860 the population was 31,443,321, and in 1900 76,303,387. In 1860 the estimated wealth of the country was $16,159,616,000 or $513.93 per capita, while in 1900 it was $94,300,000,000 or $1,235.86 per capita. The public debt in 1860 was $64,842,288. The interest payment was $3,144,121, and the debt per capita, less cash in the treasury, was but $1.91. In 1890 the public debt was $2,136,961,092. The interest on this amount was $40,160,333 and the debt, less cash in the treasury, was $14.52 per capita. In 1860 the deposits in savings banks amounted to $149,277,504 and was divided among 693,870 depositors. In 1890 there were 6,107,083 depositors and the total deposits amounted to $2,449,547,885.

The Senate has voted in favor of an amendment to the Constitution offered by Senator Hoar, changing the day for the inauguration of the President of the United States from March 4 to the last Thursday in April.

The resolution provides that the change shall take place in 1905 and extends the term of President Roosevelt from March 4 to that date.

It is also provided that hereafter the terms of Senators and members of the House of Representatives shall begin on the last Thursday of April instead of March 4 as at present.

After the amendment has been adopted by Congress it will have to be ratified by the Legislatures of three-fourths of the States.

The Philippine tariff bill passed the Senate, February 24, by a vote of 46 to 26, a strictly party vote. The bill provides that articles imported into the Philippine Archipelago from the United States shall be required to pay the duties levied against them by the Philippine Commission and paid upon like articles imported into the archipelago from foreign countries. Articles imported into the United States from the Philippines shall pay seventy-five per cent of the rate fixed by the Dingley law, less any export taxes paid upon the articles sent from the Philippine Archipelago, as required by the Philippine Commission.

Memorial services in honor of President McKinley were held in the House of Representatives at Washington, February 21. The Hon. John Hay, Secretary of State, delivered an eloquent eulogy before a large and distinguished audience, including Prince Henry of Prussia, brother of the German Emperor.

It was a strange coincidence that the last public memorial services in honor of President McKinley should be held on the twentieth anniversary of the day on which James G. Blaine in the same hall delivered his eulogy on President Garfield.

The twenty-first annual report of the United States geological survey shows that there are thirty-seven forest reserves in the United States containing 70,647 square miles. These reserves are in Washington, Oregon, California, Montana, Wyoming, Utah, Colorado, New Mexico, Arizona, Idaho, and South Dakota.

The total area of the pine forests in Minnesota is 32,192 square miles, of which 12,654 square miles have been cut over. The estimated amount of forest material left in the pine region is 16,009,000,000 board measure, of white and Norway pine.

Owing to the intervention of the Colombian Government negotiations for the cession of the Panama Canal property to the United States have been stopped, at least at the present. The Colombian Government telegraphed the shareholders at Paris that the company could not transfer its rights to a foreign nation without having previously modified, by agreement with Colombia, certain articles of the original contract. At Washington, however, it is not felt that this move on the part of the Colombian Government will prove a serious obstacle.

The United States Government has proposed to the Powers concerned in the Chinese treaty that they consent to a pro rata reduction of claims so as to maintain the total within 450,000,000 taels which the Powers agreed to accept from China as full indemnity for the Boxer outrages. Germany wishes to increase her claim 10,000,000 taels, but the United States is firmly opposed to this, as other powers might claim the same right, which would result in an effort to extort from China more than the amount agreed upon.

The United States Supreme Court has decided that it is without jurisdiction in the case of the State of Minnesota *vs.* The Northern Securities Company. The object of the State was to secure from the Supreme Court an injunction to prevent the merging of the Northern Pacific and Great Northern Railroad Companies. Governor Van Sant said: "The State will proceed in some manner at once and exhaust every means in its power to enforce its laws and protect its rights."

An effort is being made in New York to secure legislation for the purpose of taxing posters in the State. The idea is not to prohibit but to regulate the business by collecting a tax of one cent for each two square feet of surface displayed. One-third of the revenue is to go to the State and two-thirds to the county in which the poster is displayed. It is said that posters are taxed in every country of Europe and that the tax has a restraining influence in various directions.

Great Britain has the largest number of first-class battleships of any nation in the world. Her navy contains thirty-seven battleships ready for sea duty, seven that have just been launched, and eight that are being built. The United States have ten battleships ready for sea duty, eight coast defence ships which have the weight and many of the qualities of battleships, and eight battleships are being built.

The thirty-fourth annual convention of the National Woman's Suffrage Association met at Washington, D. C., on Wednesday, February 12. Associated with the convention was the first International Woman's Suffrage Conference. The object of the conference was the organization of an International Woman's Suffrage Association. Many prominent women from foreign countries were in attendance as delegates.

The Census Bureau states that there are 843 silk manufacturing establishments in the United States. They have a capital of upwards of eighty-one million dollars and give employment to more than sixty-five thousand persons. Last year they consumed 9,760,770 pounds of raw silk which cost $40,721,875. The total value of the manufactured products was $107,256,258.

It has been practically decided that the final ceremonies of taking possession of the Danish West Indies shall be performed by the army. It is probable that a detachment of troops from Porto Rico will be sent to the islands soon after the exchange of ratifications of the treaty, to raise the flag and formally take possession of the new territory.

Leslie M. Shaw, lately appointed Secretary of the Treasury, delivered an address at Chicago last week on the "Commerce and Industries of the West." The occasion was the annual banquet of the National Business League. This was Mr. Shaw's first public address since he became a member of President Roosevelt's Cabinet.

Many amendments have been made to the Chinese exclusion bill now pending before the House Committee on Foreign Affairs and the Senate Committee on immigration, all tending to make the bill more liberal in its provisions and to meet the criticisms that have been made on the original text.

Prince Henry's visit to this country and his gifts to the President recall the gift of Frederick the Great to George Washington. The gift was a beautiful sword, bearing the inscription, "From the Oldest Soldier to the Greatest Soldier." The sword is now in the State library at Albany, N. Y.

In reply to a question addressed him by the American Chamber of Commerce, Acting Civil Governor Wright said that the United States Philippine Commission were unanimously in favor of a modification of the present order prohibiting Chinese from entering the Philippines.

Emperor William's yacht, the Meteor, was successfully launched at Shooter's Island, N. Y., on the morning of February 26. The yacht was christened by Miss Alice Roosevelt, the President's eldest daughter.

Thomas Estrada Palma was formally elected the first president of the Cuban Republic by the electoral college, on February 24. Senor Estevez was elected vice-president.

The battleship Illinois will be the flagship of the European squadron. She will sail from New York March 25 and convey Rear Admiral Crowninshield to his new assignment.

The January sales of the Pressed Steel Car Company were the largest in the history of the company. There was an increase of $1,269,584 over January, 1901.

Prince Henry visited Mount Vernon, February 27, and placed two wreaths on the tomb of Washington. He also planted a Linden tree near the tomb.

The Chicago City Council has voted that in the future railway franchise ordinances must be ratified by a popular vote before they can become law.

Emperor William's gift to Miss Roosevelt was a gold bracelet containing a picture of himself.

The Sixth National Congress of Mothers began its sessions at Washington February 25.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

The Danish West Indies.

IT may be asked: "Why does the United States need any more islands in the West Indies?" A complete answer to this question involves the consideration of the great underlying principles of our foreign policy, outlined in Washington's Farewell Address, developed in our famous Monroe Doctrine, and applied in our various treaties and in the diplomatic action of successive secretaries of state for the past seventy-five years. Moreover, our acquisition of the Danish West Indies—St. Thomas, Santa Cruz, and St. John—may be rightly considered, strategically, as an incident of our Isthmian Canal policy, because the strategic position of those islands makes them necessary to the United States as a naval base, commanding the main ocean route from Europe to the Isthmus, and dominating the line of supplies and retreat of any naval or military attack upon the Atlantic end of any Isthmus canal, whether at Darien, Panama, or Nicaragua.

The consideration of these two propositions will lead to the further question, not necessary for present action, though probable in the near future, of the political future of all the West Indian Islands and the supremacy of the seas between North and South America—consequences of such far-reaching importance as a momentous question of world policy as will make its consideration and decision an epoch in the world's history.

These three principles—no European control of the political destiny of any American nation, no future European colonies to be established in America, no transfer whatever of existing European colonies in America between European Powers—are co-ordinate and inseparable parts of the Monroe doctrine.

The Monroe Doctrine has not the obligation of international law, nor has it the obligatory force of a covenant on the part of the United States. It is simply a declaration of public policy, the application of which rests exclusively with the United States, and at its pleasure, in view of its own public interests from time to time, it has exercised a permanent influence upon the political history of America and of all islands adjacent thereto.

Thus we find the political status of the European colonies in the West Indies, by the Monroe Doctrine, to be non-transferable from their present suzerains to any other European Power. It is not an altruistic policy on our part—it has not any quixotic character; it is a policy of manifest prudence, of wise foresight, to avoid the transfer of islands dominating our coast and commercial ocean routes from present friendly Powers to possible aggressive rivals, the alternative being to await their establishment as independent nations or their voluntary transfer to some American nation. It is, moreover, an incidental act of comity, under the circumstances above stated, that when such dependencies become a financial burden to their European owner, the United States should either consent to their transfer to other European Powers or be willing to pay a reasonable price for such dependencies.

We find as a matter of fact that not one of the West Indian dependencies of Europe is self-supporting at the present time; that every year the revenue of every one of these colonies falls below its expenditures, and that their European suzerain is obliged to pay the deficit from the national treasury.

With wealthy nations like Great Britain, France, and the Netherlands, these annual expenditures to keep their West Indian colonies from accumulated deficits are of less urgent consideration than with a small and relatively poor country like Denmark, which has had to struggle to meet her public expenditures, even reducing her large gold reserve fund for national defence from 116,000,000 crowns in 1867 to 17,000,000 crowns in 1890. Under such circumstances it is manifestly wise to dispose of her West Indian Islands, which are far from being self-supporting, and give no signs of recovering prosperity so long as they are a Danish colony.

The reason for the decline of the prosperity of the West Indies is that its principal and almost exclusive industry has always been the production of cane-sugar; and because the West Indian Islands practically had the monopoly of the world's sugar market, they were very prosperous and were of great value to the European countries which owned them. For this reason the great naval battles of the eighteenth century were fought in the West Indies for the supremacy of those seas and for the possession of West Indian colonies. Even as late as 1857 the world's sugar production was only 1,180,000 tons of cane-sugar, of which the West Indies produced fifty-seven per cent; as then the world's production of beet-sugar was only 200,000 tons, the West Indies produced about one half (forty-nine per cent) of all the sugar of commerce. But to-day it is quite different. The world's production of beet-sugar in 1900 was 5,607,944 tons, and of cane-sugar 2,839,000, a total of 8,447,944 tons, of which the West Indies produced only eight per cent. Though the amount of West Indian sugar production was the same (670,000 tons) in 1900 as in 1857, the competition of beet-sugar has practically closed the Continental markets of Europe to cane-sugar and seriously handicapped cane-sugar in other markets, unless at prices ruinous to the West Indian sugar producers. For this reason, the West Indian Islands are to-day of small importance to their European owners commercially, and a burthen to their national treasury because not self-supporting.

The natural market of the West Indies is the United States, but owing to our tariff system they do not derive any benefit from their propinquity to the United States; nor can they, unless we should make reciprocity treaties with them by special reduction of duty on their sugar. Yet if they become dependencies of the United States, much more if territories, their sugar industry would be re-established on a permanent basis of prosperity, far beyond anything ever known in their past experience.

For these reasons, we may look forward to the eventual voluntary withdrawal of European Powers from their West Indian colonies, both in the interest of their colonies and for the relief of their own national treasuries. And it is, therefore, a matter of far-reaching importance to the future of the West Indies whether those islands are to come into closer political relations with the United States. Porto Rico has become a political dependency of ours, and it is

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

safe to predict a degree of prosperity for Porto Rico in the near future, in so marked a contrast to the present decayed condition of the other West Indian Islands, that they will be more than anxious to share Porto Rico's good fortune. The Danish islands are now in a fair way to join Porto Rico, and it becomes a matter of deep concern for this country to consider whether and under what conditions the present policy of "accretion," as John C. Calhoun called our system of territorial expansion, should be carried on.

This is not the first time that our government has negotiated with Denmark for the cession of her three West Indian Islands—Santa Cruz, St. Thomas, and St. John—to the United States.

After offering $7,500,000 for the three islands, free of all conditions, Secretary Seward finally agreed to pay $7,500,000 for St. Thomas and St. John, subject to a plebiscite. The terms were embodied in a treaty, concluded October 25, 1867, which was not ratified by the Senate and thus the measure was dropped.

The present treaty, negotiated by Secretary Hay, is understood to cover the unconditional cession of all three islands on considerably lower terms ($5,000,000 is said to be the sum fixed) than in the Seward treaty of 1867.

But it should be observed that the conditions since 1867 have greatly changed. In 1867 St. Thomas was the great steamer centre of the West Indies; now it is rarely visited even by tramp steamers. Its trade has decayed, so that Denmark cannot find compensation by commercial intercourse for the drain upon her national treasury to cover the excess of expenditures over the revenue receipts of the colony. The principal industry of the islands is sugar, which, as has been stated, is unprofitable.

Having now presented for consideration the reasons why the acquisition of the Danish West Indian Islands is, from a political standpoint, the logical application of our Monroe Doctrine, let us pass to the other proposition that, strategically considered, such acquisition is an incident and a consequence of our isthmian canal policy.

Though St. Thomas, one of the best harbors of the West Indies, is twelve hundred miles from the Isthmus of Panama, and fourteen hundred miles from Nicaragua, it commands the main ocean route from Europe to the American isthmus, by which a European fleet blockading or attacking the Atlantic end of the proposed isthmian canal could most conveniently maintain its line of communications with Europe. It therefore seems timely to note the peculiar situation of St. Thomas in this respect.

The seas between North and South America are shut off from the Atlantic by a nearly continuous chain of islands extending on a curved line from Cuba to Trinidad at the mouth of the Orinoco. They are known as the Greater Antilles and the Lesser Antilles, or Windward Islands, these two groups being separated by the great Anegada Channel. St. Thomas is at the eastern end of the Greater Antilles, fourteen hundred miles from the eastern end of Cuba. This Anegada Channel is a thousand fathoms deep, —an extension of the Atlantic into the great basin of the Caribbean Sea, which makes it not only the most direct but the safest ocean route from Europe to the American isthmus.

The importance of St. Thomas as a maritime rendezvous can be estimated from the fact that the average annual arrivals, from 1820 to 1850, were twenty-five hundred ships, and that the imports of St. Thomas half a century ago averaged $5,000,000 a year.

In a word, St. Thomas would hold a position at the entrance to the Caribbean Sea similar strategically to that of Malta, which may be considered as the British advance post covering the Suez Canal.

Hence the proposition that the acquisition of the Danish West Indies, strategically considered, is an incident and consequence of our isthmian canal policy.

COL. HORACE N. FISHER.
In the *Boston Transcript.*

The Lectures.

At San Francisco, Cal.

Judge William G. Ewing of Chicago, of the Christian Science Board of Lectureship of the Mother Church, Boston, lectured on Sunday afternoon, February 16, before an audience that filled Metropolitan Hall. He was introduced by the Hon. Frank H. Gould, former Speaker of the Assembly of California and now a prominent lawyer in this city, in the following words:—

Ladies and Gentlemen:—I have been requested to introduce to you to-day some one with whom you are doubtless far more familiar, most of you, than I am myself. While I cannot say that I am a disbeliever in the doctrine that he teaches, I think that the feeling I have comes nearer, probably, to non-belief than anything else—neither a believer nor a disbeliever, but one who is willing to learn.

The human race is fortunately so constituted that its course from the earliest recorded times has been one of continual progress. Sometimes, of course, the waves would go higher and then recede, but as a whole the growth of the human race has been continually upward, and there has been a continual development of mankind. From time to time great principles and great truths that had not been dreamed of have been discovered. And it is fortunate that such is the case; for if the whole magnitude of God's providence, as displayed in the material world, had been unfolded to mankind with the first flash of intelligence in man, it is somewhat doubtful whether or not those things might not have been a curse rather than a benefit to man. And so, as history is made, these great discoveries one after another come along as the mind of man is fitted to receive and utilize them.

Two thousand years ago or so, somebody in rubbing a piece of amber noticed that a little piece of tissue paper near it fluttered without any visible reason, and he rubbed again and he noticed that the paper was attracted to that piece of amber. A mild curiosity doubtless was created in his mind. There was the foundation of a great discovery. The same influence that caused that little paper to flutter is to-day generated by the mighty waterfall away up in the lofty Sierras and is transmitted here over metallic circuits; and in your cities this influence carried along wires pulsing with power drives the cars, actuates your thundering rolling mills, speaks darkness into light, and writes a message on the very clouds themselves. But it is the same influence that caused that little tissue paper to flutter. The same lightnings that gleamed about Mount Sinai flashed when Franklin caught the spark upon his knuckle; and the same truths that exist to-day existed when time first had its birth and God spoke earth into existence.

But it is the power of the thought of man that brings these things to the knowledge of other men. The ordinary method of the human being to think is to think along the lines of least resistance. The ordinary man thinks what somebody else has thought, and he thinks he is doing well if he can succeed in understanding even the thoughts of others. But there are those who, striking out from the pathways that have been blazed out by others, go into the trackless forests and into the morasses and hew out pathways for themselves. These men are the pioneers of the progress of the world. These are the men who, casting aside the logic of the past, build up a new logic of their own; build up a new faith of their own. Sometimes these explorations through trackless forests are successful; more often, alas, they result in disaster.

Digitized by Google

Marconi brushed aside a theory that has been held for nearly sixty years,—that telegraphic messages could be transmitted only through metallic circuits. He harnessed his messages to the matchless coursers of the trackless air. His was the power of thought that departed from the old and beaten lines and assumed a new dominion. But the same subtle influence which his wireless telegraphy employs, stirred in the heavens when the "stars first sang together."

I remember hearing once of the legend of a mining town that was built at the foot of a great mountain; and at the top of that mountain for centuries there had looked down upon the place where the village was built a great ledge of white quartz that was visible to the whole country for miles and miles around; but these villages said that that was simply barren quartz, that there was nothing in that quartz. Some man with an idea thought that perhaps these people had not given that quartz the investigation they should. He climbed the hill and with his pick delved into the base of it, and into the core of it, and there discovered a mine of fabulous richness. He was an independent investigator. But the gold was in the rock when God placed it there.

We have looked upon many of the statements made in the Bible of what Christ did, and of what Christ's Apostles did, simply as great white monuments to the marvelous works that people inspired by God had done in the past. But as I understand my friends they believe that these are not alone monuments of what has been done in the past, but that they are great guide-posts directing us in the pathway which we may pursue if we will.

I know not how further to illustrate the idea which I have heretofore used, but there is one here who is preeminently able so to do; a gentleman whose talents, whose character, whose ability, have placed him in the past in one of the high places of the nation; a gentleman who stands before the people of our country as a man of great integrity, of great ability and research. To him you can listen with much profit; for he has tidings to bring to you; and I therefore take great pleasure in introducing to you the Hon. William G. Ewing of Chicago, Illinois.

Correspondence.

At Milwaukee, Wis.

Edward A. Kimball, C.S.D., of Chicago, delivered a lecture at the Pabst Theatre on Thursday evening (February 13), on Christian Science and its teachings. Mr. Kimball was introduced by Col. Charles H. Clarke, First Reader of Second Church of Christ, Scientist, who said:—

"As a man thinketh in his heart, so is he." This is Bible truth. We are coming in these days, as never before, to estimate the value and to realize the power of right thought. No good thought is ever lost. Thousands of people have been brought to the realization that, were there no sick thoughts there would be no sick bodies. It may be taken for granted that every fair-minded person is, or ought to be, a seeker after truth, and when truth is self-evident, or when it proves itself to us, we should be found holding it fast as that which is good.

Ladies and gentlemen, should you have come here tonight expecting to hear all that Christian Science is, and what it does for mankind, your expectation may not be realized, for the theme is vast; but that you may be able to apprehend this as a great truth, there should be no doubt. This lecture is given under the auspices of Second Church of Christ, Scientist, of this city. It has been made my pleasant duty to preside at this meeting, and on behalf of this church and the cause in this city to welcome this large and representative Milwaukee audience, who have come to hear what the distinguished lecturer of the evening has to say on "The Cause and Cure of Disease," which is his subject. He is a clear, logical exponent of Christian Science, and out of his own personal experience he will relate how, when all human aid had entirely failed him, he was restored to life, health, and strength. He is a member of the Christian Science Board of Lectureship, commissioned by The First Church of Christ, Scientist, of Boston, Mass., known as the Mother Church. We take great pleasure in presenting to this audience, Edward A. Kimball, C.S.D., of Chicago, who will now address you, and I bespeak for him your kind attention.—*Evening Wisconsin*, Milwaukee, Wis.

At Stockton, Cal.

The Christian Science lecture by Hon. William G. Ewing attracted to the Yosemite Theatre last evening (February 18), an audience estimated at nearly one thousand.

Judge Ewing was introduced by J. A. Plummer, who said:—

Friends:—It is well for us all that we are here; for he who comes to address us this evening bears a kindly message. He comes to tell us of the re-discovery of that divinely natural law by which the Master wrought his wondrous works of healing. He comes to tell us of the certainty of the demonstrations of power which now attract the attention and command the thoughts of all classes of people.

Truth is speaking again the same words it uttered nineteen hundred years ago. The voice of the Eternal is once more heard in the language of Love; and, as it speaks, the flush of health returns to the pallid cheeks, hope takes the place of despair, and sin and disease are overcome by the fulness of life.

Judge Ewing knows the story well. To many of us it is a sealed book; but, if we listen, we shall learn something of what all the world is wanting.

Of Judge Ewing I shall say but little. He needs no encomiums from me. Before he left the law for the wider field of the platform he had already gained distinction as a jurist, and for many years occupied a position as judge in the Superior Court of Chicago.

It is my pleasure to introduce Judge William G. Ewing, of the Christian Science Board of Lectureship of the Mother Church, Boston, who will talk to us this evening on the subject: "Christian Science,—Redeemer and Preserver."

Daily Record, Stockton, Cal.

At St. Joseph, Mo.

St. Joseph Scientists had the pleasure of a two days' visit from Mr. E. A. Kimball during the month of January. Mr. Kimball attended the Wednesday evening meeting which was held in the Second Church, and was attended by the congregations of both the First and Second Churches.

The following evening, January 16, Mr. Kimball addressed an immense audience at the Tootle Theatre, his lecture causing a renewed interest in Science, not only with members of the Science churches, but with outsiders. Mr. Kimball was introduced to his audience by Mr. S. S. Brown, as follows:—

Ladies and Gentlemen:—It has always seemed to me that when we are born, the principle of life is born with us. That the human body is produced by the human mind, and is absolutely subject to its control, so the healthy thoughts produce healthy physical conditions. I believe that right thinking makes right living, and that right living fulfils all the conditions of our being.

As I understand it, it is upon some such principles as these that Christian Science is founded. If so it vitally affects our well-being, and the more we learn of it and the more thoroughly we understand it, the better it will be for us. I am glad that this evening we have an opportunity to hear it expounded by one of its masters. It gives me pleasure to introduce to you Mr. Edward A. Kimball, who will speak to you on that subject.—*Correspondence.*

At Wausau, Wis.

Edward A. Kimball of Chicago, lectured on Christian Science at the Opera House, Monday night (February 17), and had an audience that numbered about five hundred. Attorney M. B. Rosenberry at the request of the local Christian Scientists introduced the speaker in the following neat speech:—

Ladies and Gentlemen:—It seems to me that, along with the great discoveries made by modern science, and the great advance in all departments of human knowledge, there has come another, and in some respects a greater than either of these,—a spirit of brotherly love, of fairness, and of toleration. This large and intelligent audience here assembled is a testimonial of the highest character to the truth of this assertion. In this city, where there are not more than fifty adherents of Christian Science, there are yet hundreds who are willing to give it a fair, considerate hearing, and they testify to that fact by their presence here this evening. Let us receive the message in the same spirit of candor and fairness in which it is sent.

I have the honor, as well as the pleasure, of presenting one who will from his standpoint address you upon the topic, "The Cause and Cure of Disease," Mr. Edward A. Kimball.—*The Wausau* (Wis.) *Herald.*

At Pomona, Cal.

Pomona is the only place in Southern California outside of Los Angeles where Judge William G. Ewing of Chicago lectures on Christian Science on his present tour of the Pacific Coast; therefore, his appearance at Armory Opera House last evening (February 13), was an event of unusual importance, not only for local Scientists but for followers of Mrs. Eddy all over this region. The lecture was under the auspices of the societies of Pomona, Ontario, and Chino, and was largely attended from the three places and from even farther away,—a number of the prominent Los Angeles Scientists coming from that city. Judge Ewing wasted no time in indirect talk, but from the outset tried to give his hearers in plain and forceful language a conception of what Christian Science really is, and what it is not. He antagonized no other religion; he only set forth the claims of his own.—*The Progress,* Pomona, Cal.

Among the Churches.

First Church of Christ, Scientist, Hartford, Conn.

A custom of our church, First Church of Christ, Scientist, since 1897, has been to send a yearly offering to the Mother Church, The First Church of Christ, Scientist, Boston, Mass. An article of its Constitution contains this section: "It shall be the duty of this Church to contribute toward the support of the Mother Church."

This contribution has increased from year to year, and the blessings to the Cause in our city, reaped therefrom, have been rich.

At a recent testimonial service here, the subject of the evening was "The Mother Church, and its advantages to us, as branch churches."

The points brought out were the benefits derived from the Bible Lessons, the Manual, Hymnal, the "History of the Mother Church," and Tenets, all of which, though only partially treated, proved most profitable.

This Field is not unmindful of the immense labor on the part of the committee on the Bible Lessons in working them out, and the much we get from them for the little we expend,—three months of daily healing for fifteen cents!

The communion season that the Mother Church furnishes, is one more factor for good to be further realized and appreciated. We thank God, and our Leader, Mother in Israel, for it all.

Our prayer shall be that, in this our relation to the Mother Church, that of the branch to the vine, we may be found to walk more and more worthy of the vocation wherewith we are called.—MYRON G. MARSH, *Clerk.*

Reading Room at Pueblo, Col.

In accordance with the custom of the sect throughout the country, the Christian Scientists of this city have established a reading room at 301 Central Block, where all the works of the Rev. Mary Baker G. Eddy, the Discoverer and Founder of Christian Science, and also the publications of The Christian Science Publishing Society of Boston, Mass., are kept on sale and for free perusal. The purpose of the Christian Scientists in opening this room is to give all an opportunity to investigate and familiarize themselves with the teachings of Christian Science, and thereby to correct the many false impressions and misconceptions that are now held.

They have provided a handsomely furnished and comfortable room, which all who are interested in the study of Christian Science, or who wish to investigate its teachings, are cordially invited to use.

Among the noticeable things upon entering this room is a beautiful German carbon print, entitled, "A Little Child shall lead them," and a widespreading Boston fern, which occupies a jardiniere between the windows at the front. It is evident from the appearance of this room that it has been the aim of the Christian Scientists to make it both attractive and cheerful.—*Pueblo* (Col.) *Chieftain.*

Annual Meeting at St. John, N. B.

The Christian Scientists of this city recently held their annual church meeting at their rooms, Odd Fellows Building, Union Street, when a very satisfactory report of the progress of the church was read by the treasurer, whose statement of the different funds showed that there was a steady and marked increase in receipts and expenditures with a substantial balance on hand. There is no indebtedness, which is a marked feature in all Christian Science churches. The report of the treasurer of the Sunday School also showed that branch of the church's work to be in a very promising condition. The clerk's report was a cheering résumé of the work done, and showed a steady increase of members.—*St. John* (N. B.) *Sun.*

Site Purchased at Junction City, Kan.

James Mullis has sold his house and the two large lots on the corner of Fifth and Jefferson Streets, just southwest of the city park, to the Christian Scientists.

The location is one of the best corners in the city and upon this most favorable site First Church of Christ, Scientist, will, in the near future, erect a stone edifice that will be a credit to the cause of Christian Science, and of which the city may well be proud.

The house that now stands on this corner will be converted into a chapel for present use.—*Junction City* (Kan.) *Union.*

A New Year Wish, 1902.

BY WILLIAM LEANDER POST.

IT is not wealth I'd wish for thee, dear friend,
Nor fame, nor power thy destinies to bend
To suit thy will; nor love, nor peace, nor joy,
Nor health, nor e'en content without alloy.
But this my wish, which doth all these embrace,
And the false concept of all else efface:
An understanding heart to know thy God,
A willingness to follow where He leads,
A perfect trust that all things work for good,
And that He ever will supply thy needs.

Raising Values.

The January *Success* contains an interesting article showing what may be produced from a number of bars of iron, one each being placed in the hands of various mechanics. The writer says, in part:—

The man who takes the first bar may be a rough blacksmith, who has only partly learned his trade, and has no ambition to rise above his anvil. He thinks that the best possible thing he can do with his bar is to make it into horseshoes, and congratulates himself upon his success. He reasons that the rough lump of iron is worth only two or three cents a pound, and that it is not worth while to spend much time or labor on it. His enormous muscles and small skill have raised the value of the iron from one dollar, perhaps, to ten dollars.

Along comes a cutler, with a little better education, a little more ambition, a little finer perception, and says to the blacksmith: "Is this all you can see in that iron? Give me a bar, and I will show you what brains and skill and hard work can make of it."

When his work is done, he shows the astonished blacksmith two thousand dollars' worth of knife-blades where the latter only saw ten dollars' worth of crude horseshoes. The value has been greatly raised by the refining process.

Still another workman, whose processes are so almost infinitely delicate, whose product is so little known by even the average educated man, that his trade is unmentioned by the makers of dictionaries and encyclopedias, takes but a fragment of one of the bars of steel, and develops its higher possibilities with such marvelous accuracy, such ethereal fineness of touch, that even mainsprings and hairsprings are looked back upon as coarse, crude, and cheap. When his work is done, he shows you a few of the minutely barbed instruments used by dentists to draw out the finest branches of the dental nerves. While a pound of gold, roughly speaking, is worth about two hundred and fifty dollars, a pound of these slender, barbed filaments of steel, if a pound could be collected, might be worth hundreds of times as much.

Just as each artisan sees in the crude iron some finished, refined product, so must we see in our lives glorious possibilities, if we would but realize them. If we see only horseshoes or knife-blades, all our efforts and struggles will never produce hairsprings. We must realize our own adaptability to great ends; we must resolve to struggle, to endure trials and tests, to pay the necessary price, confident that the result will pay us for our suffering, our trials, and our efforts.

O. S. MARDEN.

Thy Will be Done.

BY ISABEL WENTWORTH LEE.

THY will be done,
O Spirit tender,
To Thee, to Thee,
My life I render.
No fault so dear
I strive to hold,
No loss I fear,
Thine arms enfold.

No more the Cup
I grasp in blindness,
Its draught is sweet,
Thy lovingkindness.
No thorns I dread
Of joy they speak
The Cross I'll bear
Its way I seek.

Notices.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the authors, is now ready for distribution. There is no change in prices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL.

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Christian Science Scored.

THE above words headline an account in one of our Boston daily newspapers of a sermon preached by the Rev. J. H. Berkey of Monroe, Wis., against Christian Science, the subject of which was "The Hidden Hand of Christian Science." The newspaper account of Mr. Berkey's remarks is very brief, and it may be that from it we cannot fairly understand his position. As indicated by the account we have read, however, Mr. Berkey condemns Christian Science because it does not do all the things he thinks it should do. He is reported as having said that "Mrs. Eddy does not claim to raise the dead, to cure a person born blind, or to cure a withered arm."

In reference to this, an intelligent reading of Mrs. Eddy's writings will show that she claims the possibility of doing all these things because Jesus taught and proved them to be possible. To prove them possible, however, it is necessary to possess that "same Mind which was also in Christ Jesus." If one teaches only such possibilities as the Bible teaches, is he to be condemned therefor? But if Mr. Berkey will inform himself, he will find that Mrs. Eddy and her students have cured persons blind from birth, and have restored withered hands, arms, and legs; nay, even persons on the verge of death, and so pronounced by physicians, have been restored to health through their ministrations. If Mr. Berkey denies this, his denial does not change the facts. If he will devote a part of the time he gives to preparing and preaching sermons and delivering lectures against Christian Science, in ignorance of what it is and what it does, to an honest study of its teachings and a fair investigation of what it is doing, he will be better prepared to say what it is or is not, what it does or does not, accomplish.

Mr. Berkey is reported as having continued his statement thus: "Even if we should admit that she does all she claims to do, and even cures consumption, rheumatism, lame back, and other diseases, she does no more than is claimed by our physicians and patent medicine men. Christ did more than this. Christ raised the dead. And until Mrs. Eddy steps over the dead-line I shall condemn her as a fraud."

It is only necessary to say in reference to this that the investigation above suggested will show Mr. Berkey the error of his assumption that Christian Science is doing no more than physicians do. There is a record of thousands of cases given up and pronounced incurable by physicians which Christian Science has healed; this record extends over thirty-five years. It is late in the day for a minister to stand before a public audience and deny well-known facts of such long standing. It shows a sad lack of familiarity with current and commonplace events. But what shall we say of our friend's logic? He solemnly declares that "until Mrs. Eddy steps over the dead line I shall condemn her as a fraud." This was glibly enough said. It is easy to say things glibly when one is utterly ignorant of what he is talking about. Those whose only purpose is to say things they think will tend to add to their own reputation and throw discredit upon that which they assail, can speak with the greatest glibness. But suppose we were to become glib for the nonce, and turn our friend's logic back upon himself.

You, sir, are assuming to preach the gospel of Christ. Until you preach the same gospel that he preached, we shall condemn you as a fraud.

Until you preach as good sermons as he preached, we shall condemn you as a fraud.

His greatest sermon was the Sermon on the Mount. Until you preach as good a sermon as that, and in the same spirit of love and compassion, we shall condemn you as a fraud.

He commanded those who were to do his work to heal the sick as well as preach the gospel. Until you heal as he did—just as well—and also preach as well as he did, we shall condemn you as a fraud.

This only by way of illustration. We do not condemn this clergyman. It is not our business to condemn people.

The *Milwaukee Sentinel* of February 9, announced Mr. Berkey's coming to Boston to preach against Christian Science. It is hinted that he was sent on expressly to "beard the lion in his den," as it were.

Notwithstanding this loud fanfare from the broad and beautiful prairies of Wisconsin, and notwithstanding its even louder re-echoings on the storied shores of the Atlantic, by the distinguished fanfaron, Christian Science still lives in Boston, and its adherents are disposed to continue the even tenor of their way. They believe it to be the only way, and we trust our friend will not again come to Boston for the purpose of turning them all aside. It is time wasted.

Whither?

IT is fortunate that there is in this day a Church of Christ—a body of people—whose belief in the teachings of the Christ is so implicit that they stand as his stanch defenders against modern assaults upon his teachings. If there were not such a church and such a people, we should fear for the future of Christianity.

When the divinity of the works of Jesus, in healing the ills and discords of humanity, is lowered to the plane of modern materialistic methods, believers in the divinity of the Christ may well query: What is Christianity? What is the distinction between a spiritual and a material interpretation of the Bible? To whom shall the people look for a true explanation of the Scriptures? Whither is the age drifting?

Thank God, the people are more and more becoming earnest students of the Bible, as President Harper of the University of Chicago has recently so well said. (*Vide Christian Science Journal* for February, 1902, p. 726.)

Anthropomorphism.

THIS word, although large, has become a very common one. It is much used in theological circles. Some theologians criticise the Christian Science text-book, "Science and Health with Key to the Scriptures," because it does not define or recognize God as anthropomorphic, and claim therefrom that Christian Science denies God's personality.

In view of this it is interesting to look into the standard and authoritative dictionaries for information upon this subject. The following is from "The American Encyclopedic Dictionary:"—

"The attributing of a human form to God. When this is really done it is a gross degradation of the divinity, and is condemned in Scripture. But when the only anthropomorphism is the use of metaphorical phrases, such as the arm of the Lord (Psalm 77 : 15), or His eyes (Psalm 11 : 4), or His ears (Psalm 34 : 15), to make abstract ideas more readily conceivable, the practice has the countenance of Scripture itself. There are thus in this sense a legitimate and an illegitimate anthropomorphism."

Selected Articles.

Answers Dr. W. J. Holtzclaw.

SEVERAL days ago Dr. W. J. Holtzclaw, pastor of the Jones Avenue Baptist Church, in a sermon which attracted wide attention, challenged the genuineness of the miracles alleged to have been wrought by Christian Science, and the sermon has called forth the following retort from E. H. Carman, of this city:—

"Have any miracles ever been performed since the close of the apostolic age? If so, there is no reliable proof of it. There is much nonsense and fanaticism propagated by those styling themselves divine healers, apostles of so-called Christian Science.

"They have been asked repeatedly to show proofs of their claims and have utterly failed in their false-faced productions."

As a basis for these and kindred assertions, the Rev. Dr. W. J. Holtzclaw, of the Jones Avenue Baptist Church, took as a text Matthew, 17 : 14–20. These verses contain a statement of one of the many remarkable demonstrations of Jesus' power over the physical manifestations of evil. In the sixteenth verse, the father of the lunatic healed says, "I brought him to thy disciples, and they could not cure him." Jesus sternly rebuked them, telling them that they had failed because of their unbelief and lack of faith—because they did not have a clear understanding of God's power that had been explained to them. In the twenty-first verse, which the doctor did not include in his text, Jesus plainly states the reason of their failure: "This kind goeth not out by prayer and fasting,"—the spiritual sense of God and man lived and practised daily and hourly.

To say that "no miracles have been performed since the apostolic age," is to make a statement that cannot be proven, and expresses a perverted sense of the Scriptures, for which there is not the slightest warrant. The doctor is not personally responsible for this unwarranted perversion, but the theological teaching under which he has been educated teaches this belief. The New Testament does not contain a single sentence that will warrant this assumption, and the early church Fathers are very positive on this point, showing that, for over three hundred years after Jesus, the healing through divine power was practised by the Christians.

What is a miracle? Christian Science teaches that it is the spiritual law annuling and destroying a material belief.

A. A. Hodge's "Outlines of Theology," says, "(1) A miracle is an event occurring in the physical world, capable of being discerned and discriminated by the bodily sense of human witnesses; (2) of such a character that it can be rationally referred to no other cause than the volition of God; (3) accompanying a religious teacher, and designated to authenticate his divine commission and the truth of his message."

Dr. Holtzclaw never preached a sermon in which he urged human beings to accept the salvation taught by Jesus that he did not ask those whom he wished saved to accept this definition of a miracle.

Jesus taught and demonstrated that the spiritual laws could and did annul all material laws, and he taught that divine Love not only saved from sin, but from bodily suffering; to him they were one and the same, as is proven by the following, when he said to the sick man brought to him, "Son, be of good cheer; thy sins be forgiven thee." At this the Pharisees said, "This man blasphemeth." Jesus, knowing their thoughts, said, "Wherefore think ye evil in your hearts? For whether is it easier, to say, Thy sins be forgiven thee; or to say, Arise, and walk?" Nothing could be more conclusive than this, that Jesus regarded sin and disease as one and the same, and that he destroyed sin and healed disease both by the same spiritual law.

The doctor says that Paul had a thorn in the flesh, and because his prayers were not answered when he prayed that it be removed, we should not expect God to heal the sick through prayer. Paul did have "a thorn in the flesh," but the thorn in the flesh did not hinder him from performing miracles; for he healed the sick and raised the dead, through the understanding that "the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death," and that "to be carnally minded" (or to see after the flesh), is death, but "to be spiritually minded" (or have that mind which was in Christ Jesus), is the law of health and harmony, life and peace; and his entire writings are full of admonitions and precepts how Christians should apply the law of Spirit to change their vile body into a spiritual body; how the "mortal must put on immortality," not after death, but here and now.

We have shown that Jesus and Paul taught that divine healing was to be a perpetual power. We will quote from the early church Fathers briefly.

"Second Apology of Justin," Vol. I., chap. 6, p. 190: "For numberless demoniacs throughout the whole world, and in your city, many of our Christian men exorcising them in the name of Jesus Christ, have healed and do heal, rendering helpless, and driving the possessing devils out of the men, though they could not be cured by all the other exorcists and those who used incantations and drugs."

"Irenæus Against Heresies," Vol. I., chap. 31, p. 407, after telling of the many works of the Christians of his time, says: "Others still heal the sick, and they are made whole; yea, moreover, as I have said, the dead even have been raised up, and remained among us for many years."

Tertullian, Clement of Alexandria, and others, tell us of the healing power of God practised by the early Christians for over three hundred years.

Nor are the Christian Scientists alone in their "nonsensical beliefs." We quote from a recent sermon preached January 12, 1902, by Dr. Lorimer, of the Baptist Church, called from Tremont Temple, Boston, to Madison Avenue Baptist Church, New York City, one educated in the same school of theology as Dr. Holtzclaw, but whose views are undergoing a change on this subject: "On this theme [divine healing] the Scriptures are definite and pronounced. The Almighty is over and over again presented as the source of strength and as the supreme cause of health. God, the ultimate healer, will be more fully recognized as Science attains to its maturity. I believe it would be well for Christians in their prayer-meetings to tell how God has helped their bodies, as well as their souls. Were we to speak more in His praise, we would encourage more to look to Him for restoration."

After Jesus' resurrection, just before leaving his disciples, he said: "All power is given unto me in heaven and in earth." This passage the doctor quotes. Jesus further said: "Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost: teaching them to observe all things whatsoever I have commanded you: and, lo, I am with you alway, even unto the end of the world."

This command the doctor accepts in part; for he is preaching and baptizing; and, therefore, fulfilling the command thus far; but the clause which says, "Teaching them to observe all things whatsoever I have commanded you," he rejects. In Mark, 16 : 15–17, is recorded another version of this command: "These signs shall follow them that believe [or accept the office of disciple]; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing it shall not hurt them; they shall lay hands on the sick, and they shall recover."

This delegated power from the Master is not limited to any period, any time, or any place; but stands as a perpetual command to all ages; and all who believe or understand are to preach by healing and heal by preaching. It does not read "you disciples," but "them that believe." If the

Digitized by Google

doctor wishes to teach "a whole truth instead of a half truth," why does he not heal as well as preach and baptize? The three are included in one,—the healing; for when one is healed by the law of spirit, he is made better physically, morally, and spiritually and is saved not only from sin, but bodily disease and suffering.

Do Christian Scientists refuse to produce proofs of their power to heal? They do not to those who seek the proofs of God's power to heal through Christian Science understood. Jesus said of the unbelieving Jews, that they had ears to hear, but heard not; eyes to see, but saw not. This might truly be said of Dr. Holtzclaw and those who refuse to seek evidence from the right source. The local Christian Science Church is open every day in the week, where can be found intelligent people, whose lives outwardly and inwardly do bear witness to the truth they teach. Every Wednesday evening at half past seven a testimony service is held, to which the public is cordially invited. At these services the doctor can hear reliable witnesses testify that God does heal their diseases, and that the days of miracles are not past. Seven hundred churches and associations all over this country, invite investigation and attention to facts that contradict all the declarations made against this revealed and established Christianity healing soul and body.

EDWARD H. CARMAN.

The Constitution, Atlanta, Ga.

Christian Science.

Rochester, N. Y., February 6, 1902.

Editor *Union and Advertiser.*

Your issue of February 3, contained a criticism of Christian Science whose opening statement Christian Scientists will heartily endorse, viz.: "The statement that there is nothing new under the sun has a striking application to modern Christian Science." The followers of Christian Science have accepted its teaching because they are fully persuaded that it is not a new thing, but that its teachings lead us again into the demonstrable teachings of the Master, "the faith which was once delivered unto the saints."

I suppose that every Christian Scientist has at some time felt very keenly the intellectual difficulties raised by our critics. We have seen these difficulties vanish as we have gotten the spiritual point of view, and have seen what Paul means when he says that "the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned." It is not by intellectual analysis, but by direct spiritual intuition that we gain any vision of spiritual realities, and this may be found in the open-minded thought of the child while it is utterly absent from the intellectual reasoner. Jesus once said: "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes."

Our critic takes exception to the Christian Science position that because God is Spirit His creation must be essentially spiritual. For the Christian Scientist does not affirm that God creates spirit, but that what He creates must be in reality spiritual, if God is Spirit. Our reason for holding this ground is that we cannot conceive of anything being in the effect which is not in the cause, and our critic refers to God as the first cause. And this reasoning has the endorsement of Scripture,—that a good tree cannot bring forth evil fruit; that the effect must be like the cause.

No one will question that in the highest use of the terms, spirit and mind are synonyms. To say that God is the one infinite spirit is the same as saying He is the one infinite Mind. Now, we are told that "through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear." Now a word is only an expression of thought, and our only inference from this text is that the universe is God's thought expressed, and that the things that are seen are not made of what appears to the senses. John says all that is in the world, the lust of the flesh, the lust of the eyes, and the pride of life—the whole round of the experience and motives of the senses—"is not of the Father, but is of the world. And the world passeth away, and the lust thereof." The whole trend of the teaching of the Bible is that what we call the material universe is a vanishing phenomenon, without permanent substance or reality. As Paul says: "The things which are seen are temporal; but the things which are not seen are eternal."

In prophetic vision John saw the heavens and earth pass away, and in their place a new heaven and earth wherein was no sickness, nor sorrow, nor death. What was this but a spiritual vision of God's creation as it eternally is, and as it must finally appear?

What interpretation did Jesus put on the elements with which he had to deal? Can his career be explained on the basis of physical law? Is there any ground on which his career is explainable or even credible except that Jesus was an idealist who proved his idealism? It was foretold of him that he should not "judge after the sight of his eyes, neither reprove after the hearing of his ears." His own admonition is to "judge not according to the appearance, but judge righteous judgment." His own statement is that "it is the spirit that quickeneth; the flesh profiteth nothing."

The real test as to whether Christian Science is scientific or Christian is that of the Master, "By their fruits ye shall know them." If Christian Science furnishes the understanding of a divine principle that can be verified by us to the extent of our understanding, then it is scientific; if it works out in character and life the fruits of the spirit, then it is Christian. There are thousands of Christian Scientists to-day, many of them men and women of position and prominence, who once were earnest and open opponents of Christian Science. Many of these in becoming Christian Scientists have taken their position at a sacrifice financially and socially, and at the cost of the disapproval of friends and the sundering of old ties of interest and association. What has brought these people to this decision? Nothing but facts. The positive proof that Christian Science has brought in healing sickness that the best medical skill had judged hopeless, its still higher witness in the divine harmony and illumination that have come where it has been received,—these are the practical works that have enabled it to win its way, until now its witnesses are found around the world, and a daily increasing number of followers are rising up to call it blessed.

Christian Science can bring its blessings to any who open their thought to its truth. But Christian Scientists do not interfere with those who are under the care of other lines of treatment, nor intrude on any one's mentality unasked. Its work cannot flourish in an environment of scepticism or opposition, even as we are told that in one locality even Jesus "could there do no mighty work, save that he laid his hands upon a few sick folk, and healed them."

If Christian Science were a delusion, then many of those who have been following this way for years would surely be undeceived. The accessions to its ranks are many: the deserters are almost nil. Why? Because it daily proves itself to the earnest follower that it is both Christian and Scientific.

Inconsistency Hinted.

To the Editor of *The Herald.*

It was scarcely necessary that the Rev. J. H. Berkey of Monroe, Wis., should come all the way to Boston to remind the good people of this city that Christ raised the dead and that Christians are not up to his standard until they are able to do the same, for this fact is quite well known to Bostonians. By the way, is it not a little inconsistent with his contention that Mr. Berkey made no apology for his own inability to raise the dead? Does he demand more of Christian Scientists than he is able to do himself? When he ridicules the teaching of Christian Scientists because they accept the literal teachings of our Lord, "Preach the gospel," "Heal the sick, cleanse the lepers, raise the dead," he should bear in mind that he is expressing scepticism in respect to Biblical teaching. If Jesus demanded an impossibility of his followers when he said, "Raise the dead," our friend must not hold Christian Scientists responsible.

The teaching of our Master demands more than some are able to accomplish in their peculiar ways, and, rather than admit that they are wrong in their interpretation of proper methods, they yield to the temptation to explain away God's word and try to make it appear that he meant something else. Indeed, the practice of belittling Jesus' teaching and good works as a matter of apologizing for one's inability to comply with his exalted demands has become quite common of late.

I am not able to speak for other Christians, but as for myself I recognize that the promise to Christians far exceeds my present ability to verify; but that is not because God demands of me an impossibility or anything unreasonable, but because I am not at this time spiritually minded enough to do what the fulness of Christianity makes possible; and so I strive on to attain greater goodness, and after that to demonstrate more of the power of God.

A man of good judgment would not condemn mathematics because a pupil or teacher was not able to solve a given difficult problem. Then why should we condemn Christianity because its adherents are deficient in their understanding and ability to apply it? It is not Christianity which is faulty, but the pupil's ability to use it. Before Mr. Berkey ridicules other Christians for inability to raise the dead, he had better make sure that he can do this himself. People who live in glass houses should not throw stones.

He declares: "I would not attack Christian Science as a religion if it were presented so that all could understand it." Our western friend expresses no small amount of egotism in assuming that he, perhaps having never healed a patient according to the Christian Science method to prove even to himself that he understands it, is, nevertheless, better capable of making it plain to the public than a practical Christian Scientist. He claims that it is his "duty to expose the hidden hand" of Christian Science. This statement is likely to be misleading to the public, for there is no "hidden hand" in this Science. There is nothing in its teaching which is not included in "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. Its basic lesson is the Scriptural teaching, "God is love," and I challenge our critic to find a single statement in the Christian Science text-book which is not a consistent deduction from this premise.

Christian Science and Spiritualism.

To the Editor of the *Schenectady Star.*

Dear Sir:—A recent report cabled from Germany to your paper makes the curious mistake of confounding Christian Science with Spiritualism. There is no manner of kinship between the two. In fact, a whole chapter in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, is devoted to explaining the fundamental distinction between the two. On page 71 (Rev. Ed.) of this work are to be found the following words:—

"The basis and structure of Spiritualism are alike material and physical. Its spirits are so many corporealities, limited and finite in character and quality. Spiritualism therefore presupposes Spirit, which is ever infinite, to be capable of dwelling in finite forms,—a theory contrary to Christian Science."

In view of recent reports on the growth of Christian Science in Germany the following official information will be of interest.

First Church of Christ, Scientist (Erste Kirche Christi des Scientisten), in Berlin, was organized some time ago with the customary permission of the authorities, and the notices of services are published every week in the Berlin newspapers. There is also a Christian Science reading room which is announced at all the services, and a Berlin Christian Science Institute.

What is true of Berlin is also true of other cities of the German Empire, such as Hannover, Dresden, Heidelberg, Cannstatt, etc., namely, Christian Scientists have been entirely free to worship God as they saw fit.

When the subject of Christian Science came up in the German Reichstag the other day, a word of deep wisdom was spoken by the Imperial Secretary of State when he said: "I earnestly warn against using the power of the State against such things." It is certain that whoever understands Christian Science cannot but hope to see its benefits extended to all mankind.

Thanking you for your courtesy in printing this article, I remain, Yours truly,

W. D. MCCRACKAN.

Removing Prejudice.

BY J. E. FELLERS.

To remove a prejudice from the human mind, is as truly casting out evil as curing a belief in sickness. The following experience has made me realize that very small things are being used by error to hold well-meaning people from investigating Christian Science.

Some time ago when in conversation with two business men who were not Scientists, one of them remarked, "There is one thing I have noticed among Christian Scientists that seems to annoy me. It is the frequent reference they make to Mrs. Eddy in the Sunday and mid-week services, and in their conversations about Christian Science. I do not understand why she should be brought into such prominence. Can you explain that?" I had been asked that question before, but seemingly could never answer it to the satisfaction of inquirers. For several days prior to meeting these gentlemen, I had been struggling with a stubborn claim, and was suffering keenly at the time this objection was made. A deep sense of restfulness came over me as I made the following answer:—

"Many years ago a man with an inferior fleet sailed out of a little port in Spain, and turned his ships toward the West. The expedition was a perilous one, fraught with danger and storm, but the voyage gave the Western Hemisphere to humanity. That brave old sailor achieved greatly, and I have never heard any one on any occasion talk very long about the discovery of America who did not mention the name of Christopher Columbus. During the latter part of the eighteenth century a great struggle was made by our forefathers for independence. The conflict was a desperate one, but the colonists were victorious. The records point to one great man as the foremost figure in that long battle for freedom, and I have never heard any one on any occasion talk very long about the Revolutionary War who did not mention the name of George Washington. In 1620 the principle of human liberty landed on Plymouth Rock, and exactly the same year the opposite principle (human slavery) landed at Jamestown, Va. Side by side these two conflicting ideas began their march across the Continent. In 1861 they opposed each other in deadly combat, and brought a great man into international prominence. He, too, achieved greatly, and I have never heard any one on any occasion talk very long about the Civil War who did not mention the name of Abraham Lincoln.

"In 1866, just after the assassin's bullet had silenced the voice of the great President, Mrs. Eddy made the discovery which is known as Christian Science. An understanding of this subject has already restored to health and happiness over a million people who for years had been in greater bondage than African slavery, and it is believed that her discovery will eventually reform mankind. For thirty years this marvelous woman has been severely criticised by people who did not understand her teachings, but she is devotedly loved by those who do understand them. She stands out in religious history to-day as one of the greatest reformers the world has ever known. Her discovery cuts through the materialism of the age and heals the sufferer as the sunlight cuts through glass and revives the withering plant. Now you do not think it strange that people name Christopher Columbus as the central figure in the discovery of America; George Washington in the Revolutionary War, and Abraham Lincoln in the great Civil War. Why, then, do you think it strange that we, who through an understanding of her discovery have been made to walk after being so long lame, and to see after being so long blind, should mention the name of Mrs. Eddy in talking of her great work and its ministrations to suffering humanity?" He then replied: "I think your answer satisfies that objection, but why was Mrs. Eddy the particular person chosen to voice Christian Science to this age?" My answer was as follows:—

"I do not know; neither do I know why John Bunyan instead of James the Second wrote the 'Pilgrim's Progress;' why Napoleon Bonaparte instead of some one else commanded the French soldiery at Waterloo, or why Isaac Newton instead of Shakespeare discovered the law of gravitation. I do know that on one occasion the call of Truth fell upon the ears of Saul of Tarsus, and he responded with a life devoted to God; it fell upon the ears of our forefathers and they responded with the Declaration of Independence; it fell upon the ears of Mr. Lincoln and he responded with the Emancipation Proclamation, and it fell upon the ears of Mrs. Eddy and she responded with Science and Health, in which is set forth the whole philosophy and practice of Christian Science." After answering this last question he replied, "I think I would like to investigate this matter, and if you will tell me where I can procure a copy of Science and Health I will buy one at once and make an honest effort to learn more of Christian Science." The other gentleman who was present remarked that he would do so too.

Some people have sickness to overcome; some have fears; some have doubts; some one thing and some another. In the case of these two men, they were hedged about by a groundless prejudice, the absurdity of which became apparent even to their own thought when made to stand out in the light of understanding and reason. While I have never since met either of these gentlemen, I can but feel that my defence, though made at a time when the discussion was forced upon me, will bear good fruit.

A Helpful Thought.

BY CHARLES W. J. TENNANT.

A THOUGHT came to me recently which has helped me greatly to understand that every honest Christian Science treatment has its effect in destroying some part of our false sense of things which is keeping us from realizing the true.

It occurred to me while looking out of a window and seeing an ugly dead tree obstructing a very fine view beyond. To get the full benefit of this beautiful view I must cut down this tree. I get a hatchet and begin. Now if the tree is a slender one, perhaps one, two, or three strokes will fell it. On the other hand, if the tree is very thick, it may take thirty, sixty, or one hundred strokes before it is brought down. In the latter case it will be seen that if the first, second, and all the intermediate strokes had not been given, up to the one hundredth, the tree would still have remained standing; but each stroke was necessary to arrive at the one which brought the whole tree down with a crash. I hope this little illustration will help others as it has helped me to see that the tree represents that amount of the false sense of things, or carnal mind, which stands, as it were, between us and our realization of Truth.

In some cases it is slight, and may be destroyed in one, two, or three treatments. Again in another case it may be very dense and thick, which will require a great many treatments, but every one has its effect and is necessary, as is the case of the thick tree.

To work fearlessly, to follow earnestly after truth, to rest with a childlike confidence in God's guidance, to leave one's lot willingly and heartily to him,—this is my sermon to myself. If we could live more in sight of heaven, we should care less for the turmoil of earth.

From the Letters of John Richard Green.

Testimonies of Healing.

I thought I would add my mite to the already full measure of proofs of what Christian Science has done and can do for suffering humanity. A little over seven years ago Christian Science healing was brought to the notice of my wife and myself by the healing of a friend of ours, and we decided that the Truth that healed her, was good enough for us.

We borrowed a copy of the text-book, read it through, and found that the Truth was plainly to be seen; and in the course of a month or so found there were a dozen or more who were also interested, and we began to meet Sunday afternoons and hold services. Then my wife's sister was healed of a claim which the doctors had pronounced incurable, which still further attracted us. So we got up a class of fourteen and had a teacher from Chicago come out and give us class instruction. Then we established First Church of Christian Scientist, of What Cheer, Ia. Although we have not grown in number very rapidly, we are still sowing the seed and the harvest is sure to come.

I must tell of one demonstration my wife and I had. I was a railroad switchman at the time, and I was squeezed between two cars until I could hear the bones crack and the life seemed almost crushed out of me. When I was released from the cars a gentleman took hold of me to help me stand, but knowing that God was my strength, I told him that I could stand alone, and I walked about thirty feet all by myself and sat down on the depot platform, all the time declaring the Truth. The yard master came to me and asked me if I were hurt. I said no, but I thought I would go home, and immediately got up and walked home, a little over two blocks.

My wife met me at the door and I said to her, "Be not afraid," and then told her what had happened. She at once went to work. She wrote to our teacher for help, and in a little while I was all right without a sign of a mark of any kind upon my body. And we are thankful for the understanding of Christian Science we had at that time, and to our dear Leader, Mrs. Eddy, and "Science and Health with Key to the Scriptures," from which we gained our understanding.

When we took up the study of Christian Science my wife weighed one hundred and eight pounds, and I one hundred and forty-three. Now she weighs one hundred and sixty-two pounds and I one hundred and ninety-eight. We have perfect health in every particular.

We have demonstrations every day of greater or lesser degree. I was a slave to the drink habit and to the tobacco habit, and to all the vices that go with the drink habit, and now they are overcome, and the victory came through the divine healing of Christian Science, for which I give God the glory and the praise.

On January 20 we had Edward A. Kimball, C.S.D., lecture here, and we think that it was a good thing for the community. Every one almost who heard him was pleased with the lecture, and it has waked people up and set them to thinking.

We have only ten actual church members. This is the second lecture we have had at a cost of over seventy-five dollars each, and although none of our members are wealthy, we raised the money without the slightest effort, and without going outside of the church to do it.

F. P. H., What Cheer, Ia.

For some time I have been prompted to write of our Wednesday evening meetings. The organization here is small, but the members are earnest and active, and we have very helpful testimony meetings proving that lack of numbers cannot withhold the good from us where the desire for Good prevails. Most of our members are students of Science and Health, and by their splendid demonstrations prove what a power for good Science and Health is in imparting the true understanding of God and man.

At a recent meeting the following testimonies were given:

The first speaker said she had overcome an attack of hiccough very quickly by declaring "Where Good is, there cannot be any room for evil, and good is everywhere;" formerly the trouble would last for hours, but this time it disappeared almost at once. She also read an article from the *Sentinel* entitled, "Appreciation."

An elderly gentleman told how he had been kept well during the past year. There were three in his family, but the little troubles such as colds, rheumatism, lumbago, and headache, he said, soon vanished before the light of Christian Science, and all the family were able to attend to their respective duties.

The following speaker related an experience that had occurred in her home just a few days previously: A young man visiting there had been taken suddenly ill with pneumonia. For three days he grew worse and some members of the family, fearing the worst, sent for a doctor, but he was not at home; by clinging steadfastly to the Good, the suffering was overcome by Christian Science. The patient was at the meeting, and when adding his testimony said he fully believed he would have died but for Christian Science, and that the desire for tobacco and other sins left him at the same time. He concluded by saying he thanked God for this, and hoped through studying Christian Science to make more progress.

A young lady who had had a great deal of sickness before accepting Christian Science now rejoiced in being kept well; for she said of late she rarely had any sickness, and if any little disease tried to claim power it was so soon overcome that she seemed not to have known anything about it. The next speaker told how she had overcome asthma of long standing. She had been healed two years ago by reading Science and Health. Since then, on two different occasions, she had been enabled to prove that God is an ever-present help.

The organist said that on going home home from the office after six o'clock that night she felt too ill to go out again, but remembering that she had been helped at the services before, determined to come. She was well repaid, for, before finishing the first verse of "Gracious Spirit, dwell with me," the load lifted and she was free. Once before while playing "Saw ye my Saviour? . . . Felt ye the power of the Word?" it seemed that she had felt "the power of the Word;" for it overcame instantly a severe headache. She said she had never made an effort to attend the meetings or to give her testimony but she had received a great deal of good. A number of others have testified to having been healed at the services.

In closing, the First Reader dwelt at some length on the thought of our knowing what was right, and the great need of doing it.—K., Brantford, Ont.

The following incident was told me some time ago by a Christian Science Sunday School teacher. One Sunday one of the pupils brought a little girl who knew nothing of Science to visit the class. The subject of the lesson that Sunday was "Love." The teacher took the little visitor upon her lap and talked to her about love, telling her that God is Love, that she was Love's little girl, and the only reason people got sick was because they forgot God is Love. The next day the child was taken seriously ill with a high fever, and her mother, who is not a Scientist, sent for a doctor. While waiting for the physician to arrive the mother took her child in her arms saying, "Mamma's poor little girl is so sick and mamma is so sorry." The little girl straightened up and putting her hand on her mother's breast pushed herself down saying, "God is Love and I am Love's little girl," and with the realization of the Truth of what it meant to be a child of

Digitized by Google

God the little one was instantly healed of the sickness. When the doctor arrived he examined the child and found nothing the matter with her, and inquired why he was called. The mother explained that the child had a high fever when she sent for him, and she was quite alarmed about the child's condition.

After the doctor left, the mother went to see a friend who is a Scientist, and told her about the child's illness and what the little one said, and of her immediate recovery, and added that she wanted to know if that was Christian Science; if it was, she wanted to understand its teachings. The friend replied that it certainly was Christian Science, and now that mother knows that she also is Love's child.

This experience has emphasized to me the necessity of proving our faith by our works, by so living Love that we shall draw all mankind unto us. What a privilege to live so as to help others see the Truth and what blessings it brings to all. Jesus said, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven," not praise you, but praise God. And if "We . . . strive, watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and *pure*" (Science and Health, p. 497), we shall realize the richness of the blessings which come from unselfishly living for others. We know that all things come from God; and, when we are living to our best understanding each day, we will keep our windows clean, so God's pure, perfect, loving light may shine through, and our brother will see the light and learn to know and love God—Good.

VIRGINIA A. HUBBELL, Chicago, Ill.

For a long time it has seemed to me that I ought to write something of my experience with Christian Science; for the testimonies found in the *Sentinel* have often been very helpful to me.

Just a year ago this month, I was a very much discouraged girl, having been told by an oculist, after taking his treatment, that my eyes could not be healed; that it would be necessary always to wear glasses unless I gave up reading altogether; also finding that other troubles were fast making an invalid of me. It has always been my intense desire to study and teach, and life seemed worthless with that privilege taken from me.

After much urging, I was persuaded to ask for Christian Science treatment.

My healing was not accomplished rapidly, but the strength and understanding gained in spending much time studying Christian Science literature while under treatment is of immense value to me; and now the time spent each day in that study is very precious, and perhaps more valued than it would have been, had I been healed in a shorter time.

Although filled with thanksgiving for the physical benefit obtained, I feel very strongly that, as Mrs. Eddy says, physical healing is only the small part. How I wish that every teacher might experience the wonderful increase in judgment and confidence that the study of Christian Science gives.

One day a boy did something that caused me to think, "Although that is not so very dreadful, I must deal with him severely; for if I do not, some one else is apt to go farther and so my authority will be weakened." A stern rebuke and the statement of a punishment were almost uttered when these words from Science and Health (p. 192) came vividly to my mind, "The good you do and embody gives you the only power obtainable." My plans changed, I spoke to him kindly, trying to make him feel that I was sorry he had not controlled himself. He seemed touched and has been much more easily governed since, and my authority in the room was, of course, not weakened.

EDITH L. MOSSMAN, Normal, Ill.

My little girl, age ten years, was suddenly taken ill one afternoon, after school, vomiting and in considerable distress. This was on Monday; Tuesday she did not go to school, Wednesday afternoon she returned to school, very much better, but to sense weak and pale. I visited the school next day to inquire how she was progressing with her work. The teacher said the child was not at all well and perhaps I had better take her out of school for a few days, she was so very nervous; she talked at length as to her condition. I did not take her from school, but went to work with the assurance that God would help us. This occurred shortly after the lecture. Mr. Kimball's talk in the evening helped me to make this demonstration. The thought that God, Mind, was the only architect, which I had read some time previously in the *Sentinel*, enabled me to meet the teacher's thought, voiced to me, that she was growing too fast. My daughter has improved wonderfully in her studies under the thought that Mind is her only source of intelligence and in Him we are complete. It is needless to say I am more than thankful to Mrs. Eddy for her sacrifice of self to give us this wonderful little book, Science and Health, which contains so much love for all. This book has given us our *Journal*, *Sentinel*, and *Quarterly*, for which I give thanks.—C. W. C., Oskaloosa, Ia.

"Wherefore come out from among them, and be ye separate, saith the Lord, and touch not the unclean thing; and I will receive you, and will be a Father unto you, and ye shall be my sons and daughters, saith the Lord Almighty" (2 Corinthians, 6 : 17, 18). Does this mean the comparatively easy task, to an earnest seeker for Truth, of avoiding those whose views, aims, and pursuits are different from our own? Or does it signify that in our daily contact with neighbor, friend, relative, or in business relations we are so to live and show forth the "fruits of the spirit" that all will realize that we are a "separate people"? It is in seclusion that we obtain the grace and strength that will enable us to be a separate people, but it is in contact with our fellow-man that we prove we have demonstrated patience, long-suffering, meekness, gentleness, and love.

I wish to add a few words of appreciation for the help and pleasure I have had from our publications. Until within the last few months, I have lived where there were no other Christian Scientists, and the *Journal* and *Sentinel* have been my Christian Science friends. I try to appreciate the "labor of love" that has given them to me.

LILLIAN M. GREENE, Wellington, Kan.

Christian Science cured me of consumption of the bowels of several years' standing, after all other remedies had failed. I had suffered from bronchitis from childhood, and was seldom free from a sore throat and a terrible cough. *Materia medica* had done its best to cure me, but I grew weaker each day. It is a question whether I would be here to-day if Christian Science had not rescued me from death. It is unnecessary to go into details about the sufferings I passed through; but I would say that I can be among people now who cough and cough without coughing myself. My throat is completely healed and also my bowels. My friends say I have greatly changed; my face, which always looked so sad, has a happy expression now. They are watching me to see if I shall keep well. It is now two years that I have made Christian Science a study, and found not only health but a spiritual, uplifting, Life, Truth, and Love religion. Oh, how many years I have longed for such a religion and prayed for it! God has granted beyond asking and understanding. My heart goes out to our Leader who has dared to stand before the world and make this great healing Principle known.—E. H., Cleveland, O.

Religious Items.

If this is the whole of the religious life,—to know God as our friend and the friend of all men, and to enter into that mutual friendship with which He evermore seeks to bless us,—then other things will surely follow. We cannot be friends with Him who is the friend of all, unless we are friends with all. "To come into friendship with God," says Professor King, "is really to share His life; but the very life of God is love, self-giving, pouring himself out into the life of His creatures. To share His life, therefore, is necessarily to enter into like loving relations with all men. The second commandment thus inevitably grows out of the first. A deepening friendship with God, therefore, includes right relations with men: the religious life is ethical in its very nature and from the start. And thus once more it is seen to be impossible to come into right personal relation to God, and not at the same time to come into right relation to all moral beings."

PROF. WASHINGTON GLADDEN, D.D.
In *The Christian Register.*

The Independent, having pointed out what it conceives to be the dangers of liberal and of conservative theology, prints in its last number an article on the way of escape from these dangers. The concern and anxiety, it says, seem chiefly to attend the coming in of liberal theology, and yet it regards the coming of such theology as certain. . . .

The escape from the dangers of theology, according to *The Independent*, is to be found in making the intellectual in religion subordinate to the spiritual, a very simple, sensible sort of means of safety, provided it does not mean, as we trust it does not, that a man is not to follow his reason and his thought for fear that something dreadful may happen to him, and consent to be stupid that he may be pious. An enlightened, thoughtful, reasonable kind of piety seems to us, especially under the present conditions of religious progress, a very desirable and a very beautiful thing.

The Universalist Leader.

It is proposed to hold the next World's Sunday-school Convention at Jerusalem in 1904. The tenth convention will be at Denver in June of the present year. At a recent meeting of the committee of arrangements for the Denver meeting held in Chicago, at which prominent Sunday-school workers were present, Mr. W. H. Hartshorn suggested that the committee think over the possibility of holding the next convention in Jerusalem. The very novelty and audacity of the thing excited interest, and the workers discussed it with animation. At Denver the matter will be brought up with definite information as to the practicability of such a plan and estimate of cost. The foreign members of the executive committee will be consulted, and if no serious obstacles arise it is entirely possible that the plan may be carried out, though as yet it is only a dream.

The Church Standard.

It is quite easy for us, looking back to the first century in Jerusalem, to condemn unsparingly the course of the Jewish authorities, but the tragedy of Stephen is constantly repeated in the inner realm of human lives. Perhaps, though we call ourselves Christians, we can recall times when we have resisted unpleasant convictions, and in the heart there has been the same dominance of prejudice and passion, the same lawless mob, the same frantic hurling of stones against what was best and noblest in our souls.

Simple unwillingness to listen to the facts of a case, to weigh the evidence, to reach a conclusion averse to our interest or to the party cries of the hour, is about the most formidable obstacle in the way of spiritual progress in the life of communities or in the individual heart.—*The Watchman.*

Yet through all the uncertainties of Christian theology and all the conflicts of Christian ecclesiasticisms, there has disclosed itself to the world an influence proceeding from him which turns out to be that which the world most desires,—the influence of a person viewing life from above, judging it from within and directing it to its spiritual end. It is one of the most extraordinary signs of the times that, while the doctrines which centre about Christ have to great multitudes almost lost their meaning, his personality has acquired fresh loyalty and homage. People who are absorbed in the ways of modern life feel a fresh accession of spiritual loyalty to one who, in the midst of these tangled interests, proves to be a wise and trustworthy guide.

PROF. F. G. PEABODY.

The soul that is not continually turning to God for communion and guidance and blessing will soon find itself bereft of spiritual power. In close relation with worship is the constant following of Christ. By following Christ is meant, not merely the verbal confession of him, but the living of his life after him. Confession, the calling of him "Lord, Lord," will avail nothing unless the life is in harmony with the confession of the lip. Jesus spent his life going about doing good. His was a career of holy and helpful service for humanity, and such a life must be ours if we would be his disciples. That is to say, the spirit of self-sacrifice, or unreserved consecration to the service of Christ, must be ours.—*The Examiner.*

If Lent could only mean for the Christian church a time when good ploughing and harrowing over old fields of theology had taken place and another trial at sowing good seed, to await a reaping, where more general results are welcomed for the unifying of all Christians, it would be a season with a splendid purpose in view. To be sowing into every generation the respective teachings of sectarian theology makes a narrow religious world. The comparatively few who are making efforts in the direction of a more conservative policy are often discouraged to find religious bodies planting seeds of theology which are seeds of disunion.

Boston Transcript.

The very reason for liberal theology is that the old theology is too small for the larger and deeper thoughts of God that men are forced to have to-day. Conservative religion is not spiritual enough for multitudes of earnest men and women, and they will either have to be liberals or follow some religion of their own devising. God is a bigger and a better God than men have made Him seem to be. . . Just because men have made the Bible something they should not have made it, something it really is not, it does not follow that religion is to suffer because we have at last got back to the truth.—*The Universalist Leader.*

Spiritual discernment of the signs of the times, not psychical research into the fads and foibles of men, will show that the sure prophecy of final and universal good is in process of fulfilment through the divine principle of Christian psychology and metaphysics. The perfect operation of the law of love in the destruction of sin and the healing of disease, and the substitution of the golden rule for the rule of gold in the marts of trade are the salient features of this world-transforming work.

HENRY A. MANNING.
In *The Universalist Leader.*

REPENTANCE.—When repentance becomes obsolete, either Christianity will have perished from the earth, or been fulfilled in the perfection of humanity. Christ began his mission by calling men to repent. He puts the word into the mouths of his disciples as they go to prepare a way for him. It is the message of his witnesses to-day. Without repentance he can promise no forgiveness. For only in sorrowing and turning from his sin does man put himself in the place where God can save and guide.

The Congregationalist and Christian World.

Mrs. Bishop, the renowned traveler, recently said in an address given by her at Queen's College, London, in connection with the Oxford Mission to Calcutta, that England can offer to the races of India nothing that will bless and change their lives and affect for lasting good, except an historical Christ, a reigning Christ; an object not only of worship, but an object of love.

Boston Transcript.

Our character should ripen in life's weather, whatever the weather may be. "Tribulation worketh patience." The object of life is to learn to live. . . . Wherever we go we should try to leave a blessing, something which will sweeten another life or start a new song or an impulse of cheer or helpfulness in another heart.

REV. J. W. MILLER.
In *The Examiner.*

American marines captured $376,000 of Chinese money at the Tientsin arsenal in June, 1900. When the Manchu government returned to Peking the money was transferred by Secretary Hay to Minister Wu at Washington. Soldiers of other nations got part of the same funds, but thus far no nation has followed our example.

The Watchman.

Spiritual power is to be had to-day, just as it was had by the disciples of old. There are no new roads to its attainment. The results of Pentecostal and apostolic days were not accidental. Plain, Scriptural principles were obeyed and the results came as naturally as the sun dispels the darkness.

The Baptist Standard.

Dr. Barton says that the old civilizations of India have continually degenerated under Hindu instruction until the educated Hindus themselves are organizing various reform bodies, based in a large measure upon the teachings of Christianity.

Boston Transcript.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterles, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards and Church notices should be sent directly to The Christian Science Publishing Society.

All orders for the Publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa.*

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each $3.18
Two to Twelve books to one address, each, prepaid . . 3.00
Twelve or more books to one address, each, prepaid . . 2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75
Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . . 2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatheretie covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15; 50 copies to one address, $2.25.

Christian Science Sentinel

(THE CHRISTIAN SCIENCE WEEKLY.)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

The Metropolitan Street Railway of New York City has established a pension system for its superannuated employes. It is said that this is the first pension system ever established for street railway employes in this country. The system is for the relief of those superannuated employes whose annual maximum wages have not exceeded $1,200.

Employes benefited by the system will be of two classes. First—All who have attained the age of seventy and have been in the service of the company twenty-five years will be retired by age limit. Second—All employes between sixty-five and seventy years of age, who have served the company twenty-five years, will be retired if in the opinion of the trustees they are physically disqualified for service.

The pension allowance to the retired employes will be upon the following basis. Those who have been continuously in the service of the company for thirty-five years or more will receive forty per cent of the average annual wages for the ten previous years. Those who have been employed thirty years will receive thirty per cent, and those who have been employed twenty-five years will receive twenty-five per cent of the average annual wages for the ten previous years.

The pensions will be paid by the company and the employes will not be required to contribute to it.

Letters dated from Franz Josef Land August 17, have been received at Copenhagen from the Danes who accompanied the Baldwin-Ziegler arctic expedition, which left Fromsoe, Norway, July 16, last year, on the steamers America and Belgica. The vessels reached Franz Josef Land after trying experiences. The America intended to winter there and then proceed northward until stopped by the ice, when the party on board her was to start toward the North Pole. Mr. Baldwin hoped the America would reach 83 degrees north. He expected to adopt an entirely new route in his effort to reach the Pole.

No expedition for the north was ever so completely equipped for its mission as was this one. Funds were supplied by William Ziegler, the New York millionaire. Mr. Ziegler announced that he would spend a million dollars if necessary.

A report received at the State Department from Henry B. Miller, the American consul at New-Chwang, shows the value of the open door in Manchuria which the United States is making every effort to preserve. The imports from the United States were less than one million dollars annually previous to 1895. They gradually increased until in 1899 they amounted to $6,500,000. An important item in the American trade at New-Chwang of late years was railway material, which at times amounted to $2,000,000 a year. American oil has been another important item.

Carl Redlich, consulting engineer of the Imperial Cabinet of Austria, is making a tour of the United States inspecting machinery, railroads, street railways and municipal improvements with a view to adopting many American ideas in Austria. The imperial government has decided to spend $150,000,000 in the work. Railroads will be constructed and canals and tunnels built. As a result of this work American machinery and other American industries will be benefited greatly.

It now appears that the protocol negotiated last spring with Nicaragua and Costa Rica, whereby these countries outlined the terms on which they were prepared to enter into permanent treaties with the United States, conveying the necessary rights for canal construction are no longer in effect. For this reason it will be necessary to draw up new protocols not only for the Panama Canal with Colombia, but for the Nicaragua Canal with Costa Rica and Nicaragua.

The Society of German Mechanical Engineers, of Berlin, Germany, has offered first, second, and third prizes of 5,000, 3,000 and 2,000 marks respectively, for the best design for a steam locomotive to run seventy-five miles an hour on a straight and level track, with a single car carrying one hundred passengers with their baggage. The intention is to develop a system of frequent service between large German cities at a much higher rate of speed than that now used.

Signor Marconi, who recently reached New York on board the Philadelphia, received wireless messages from Cornwall when fifteen hundred miles out on the Atlantic and signals when 2,099 miles out. The apparatus was so attuned that similar instruments differently attuned on the Campania, which followed in the wake of the Philadelphia, caught none of the messages, proving the claim of privacy.

The Spanish Treaty Claims Commission has handed down a decision against the claimants for death and injuries received by officers and seamen in the destruction of the battleship Maine in Havana harbor. The amount of claims filed with the commission so far amount to about $2,500,000, which would probably be increased to $5,000,000 had the decision been favorable to the claimants.

Dr. Concha, the new Colombian minister to the United States, has requested his government, in view of the present state of negotiations between Colombia, Nicaragua, and Costa Rica, and the United States with regard to an isthmian canal, to make an official announcement of its views and purposes in the matter. The same request has been submitted to the Panama Canal Company at Paris.

The Uganda railway, extending from Nombasa on the Indian Ocean, to Victoria Nyanza, has been completed. A little less than four and one-half years were occupied in building the 582 miles of rail. This opens up an immense territory of seven hundred thousand square miles. The lake itself is equal in size to Ireland.

Sunday, March 2, 1902, was the ninety-second birthday of Pope Leo XIII. The day following was the twenty-fourth anniversary of his coronation as sovereign pontiff. The event was celebrated with extraordinary pomp at Rome. Fully fifty thousand persons witnessed the ceremony in the basilica of St. Peter's.

Messrs. Wolmarans and Wessels, the Boer representatives, were received by President Roosevelt, March 5. They called as private citizens and not in an official capacity. The President listened attentively to what they had to say and informed them that this Government cannot and will not interfere in the struggle.

It has recently been demonstrated that telephones can be connected with telegraph wires and used at the same time telegraphic messages are being sent. Trainmen have communicated on the Illinois Central Railroad a distance of four hundred miles over telegraph wires by the new system.

Andrew Carnegie offered a diamond medal for the best all-round telegrapher who attended the American telegraphers' tournament at Atlanta, Ga., last week. The medal was won by F. M. McClintic, Dallas, Tex., who sent five hundred and seventeen words in ten minutes.

The commission which was appointed in accordance with the act of April 12, 1900 to revise and compile the laws of Porto Rico, has submitted its report to the Attorney General. The committee has taken a long step toward local self-government in the island.

The New York State Legislature met in the Assembly Chamber on the evening of March 4, in memory of the late President McKinley. Governor Odell presided and Charles Emory Smith, formerly Postmaster General, was the speaker of the evening.

Miss Alice Roosevelt, the President's daughter, will spend several weeks in Cuba. While in Havana she will be the guest of General and Mrs. Leonard Wood. She will visit Santiago and will climb to the summit of San Juan Hill.

The United States has received fresh pledges from Russia and Germany that these countries will not attempt to exclude the citizens of other nations from any advantages to be enjoyed in China by them.

An attempt will be made to curtail the ceremonies at Westminster Abbey when the coronation takes place. If the ecclesiastical authorities were allowed to have their way the service would occupy five or six hours.

As evidence of the cordial relations existing between Austria-Hungary and the United States, the Austro-Hungarian mission at Washington will be raised to an embassy in 1903.

The battle at Santiago cost in ammunition expended $84,864. Admiral Dewey's vessels used at the battle of Manila a little more than $50,000 worth of ammunition.

The coinage of the United States mints during the month of February was, gold, $6,643,850; silver, $2,489,000, and minor coins, $128,490.

The Maryland State Senate has passed a bill authorizing the admission of women as practising lawyers in the State courts.

Rear Admiral J. A. Howell will be retired on March 16. Next to Admiral Dewey he is the ranking officer of the navy.

The Government receipts last month were $41,159,739 and expenditures $39,099,290, leaving a surplus of $2,060,449.

The Philippine tariff bill passed the House March 4, and has now gone to the President.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Sequoyah.

Inventor of the Cherokee Alphabet.

Seven wealthy towns contend for Homer dead,
Through which the living Homer begged his bread.

THE Cherokee language is a peculiar one. No other Indian language resembles it. White missionaries who have lived among the Cherokees a lifetime have never succeeded in learning it, and have always had interpreters by their side in preaching. The very few whites in the Nation that speak it fluently have been brought up among them from childhood. Even a Cherokee who does not learn his language when a child never learns it. Thousands of those who call themselves Cherokees cannot speak it. It is fast dying out in the Nation, and the English language is taking its place.

The invention of the Cherokee alphabet was remarkable, when we consider that it was for a language which had been spoken for centuries and yet unwritten. It was invented by a man who knew nothing about any alphabet in use, without any education, and who could speak only the Cherokee language. This man was Sequoyah, or George Gist. He was born in Wills Valley, near the foot of Lookout Mountain, Ga., and as near as could be ascertained, in the year 1763. He is known to have died in 1843 at a Cherokee village about thirty miles from San Fernando de Taos, on the Rio Grande (known as such on the old maps, and now called San Fernando by the Mexicans and Taos by the Americans), which would make his age eighty.

The writer of this sketch knew him and his family well. When they lived on Skin Bayou, in Sequoyah District, Cherokee Nation, for a period of three or four years, from 1839 to 1843, I often enjoyed the hospitality of their cabin home in my rides in the vicinity, and traded with them in my store in Fort Smith for their products, such as honey, butter, eggs, chickens, deer, and coon skins, which they exchanged for family supplies; but they never bought any whiskey, and I think they were strictly temperate.

George would have been taken for a full-blood. He was quiet and morose in manner and would not talk English, but he understood it, and in this respect he was like many other Indians at the time, who would speak to you in their language and understand your answer in English.

His wife, Polly, was different. She was affable, pleasant, talkative, and spoke the English language fluently, and it was from her that I learned much of George's history. Polly was a good housekeeper; she was always dressed in homespun wear, and had a loom. In fact, at that time many of the Cherokees were expert in spinning, weaving, and coloring, and seldom bought any clothing but *ontnowo yunago* (white domestic) for underwear.

George never knew his father. He learned from his mother that he was a white man who spoke the English language, and we can safely infer the fact that Gist was an itinerant peddler, who abandoned his Cherokee wife and child. Under his mother's care George grew up to manhood, and was popular among the young men of his tribe. He was with the allied army of Cherokees, Creeks, and Shawnees that defeated General St. Clair in Indiana in 1791, where they captured many prisoners and found letters in their pockets, and the young warriors saw for the first time the "talking leaf" of the white man, and learned that he could send his talks abroad.

It was this incident that aroused the curiosity of George, led to his investigations and studies for several years, and terminated in the invention of his "syllabic;" for it is not an alphabet like ours for word spelling, but a system of signs or hieroglyphics denoting syllables in the words.

George had many discussions with his Indian friends on the subject of the "talking leaf." Most of them contended that it was a special gift of the Great Spirit to the white man, but George contended that it was a discovery of the white man. His opponents used an old legend among the tribe to dissuade him:—

"In the beginning the Great Spirit created the white man, the Indian, and the negro. He laid before them a book, a bow and arrow, and a hoe to choose from, and told the white man to choose first. The white man took the book. The Indian was glad when he was called and took the bow and arrow; for he had set his heart on that. As there was nothing left but the hoe, the negro got that."

This legend had no influence on George. He got colors and a paint brush and tried to paint the language on paper. When he thought he had distinguished all the sounds, he tried to use pictorial sounds and images of birds and beasts to convey these sounds.

There are two dialects among the Cherokees: one is the valley, or low land, in which the L is used; and a full-blood speaking this dialect cannot pronounce any word with an R in it. The other dialect is called the mountain, or, as the Cherokees say, "overhill." Those speaking this dialect come mostly from the mountains of North Carolina. To give the reader some idea of the difference, we will take the origin of the word "Cherokee." The lowland people pronounce it Tsa-la-gee; the mountain people pronounce it Tsa-ra-gee. The translation of the Scriptures is printed in the dialect in which the L is used, but the others read the printing easily. In the language there are no labials, and a Cherokee can talk all day without closing his lips.

The Cherokee language is written with eighty-four syllabic characters. One is a consonant, like s, to aid in hissing sounds. These characters have no consonant termination; they are similar to our ba, be, bi, etc. I have been prolix in my mention of the Cherokee language—a soft, flowing, musical dialect, destitute of labials—in order to show the difficulty that George overcame in mastering the sounds.

From the time that George saw the "talking leaf" of the white man he was satisfied in his mind that the Indian could write. He was wounded in the knee, which prevented him from hunting or field work, and confined him to his house for several months. During this time his thoughts on the subject were intensified. He resolved on going to work on this matter of inventing a "written talk" for his people. This was in 1822. He had previously worked his little farm; but now he built a small cabin near his house

for a study, where he lay for hours, having nothing but an old Webster spelling-book, not knowing the name of a letter in it, and no companion but his little daughter. Here he stayed for months, neglecting his family and having no intercourse with his neighbors. His family and friends thought he was bewitched or crazy. His wife would abuse him for neglect of his family. His fields were overgrown with weeds and grass. This continued for two years. He would go out in the morning to catch the sound of birds; but no sound could he catch to suit, and he wrestled for two years with the English alphabet, until he was told by a missionary that he could not understand the spelling-book until he learned the English language.

He would make a picture of a gun, a hatchet, a cup, or a bucket, show it to his little girl, and she would go and bring the article to him. He was encouraged and persevered in his efforts. Finally he hit upon the idea of delineating each syllable by a sign or a character. This was the key to his success and he worked on it until it was completed.

He used many letters from Webster's spelling-book for signs, other signs he supplied from his own imagination. In order to complete his dictionary of Cherokee, he would listen to speeches and conversations until he had all the words of the language, and had placed a character for each syllable.

In teaching he did not commence with letters, but started with the syllables, as, ba, be, bi, bo. It was easily learned. A Cherokee will read as soon as he learns this syllabic alphabet, and old men and women will read Cherokee, who do not know the names of a letter in the English language. He soon taught his little daughter to read and write; but his neighbors would not listen to him, nor would they try to learn. They looked on him as a crazy man or bewitched; for Cherokees in that day believed in witches and conjuration. Some said he was in league with evil spirits, looked on him with fear, and avoided his house and company. He was disheartened and alarmed at the obstinacy and superstition of his neighbors, and left his home and came to a settlement of Cherokees who lived near the river in Johnson County, Arkansas. After his arrival here among his old friends, he made known to them his invention and showed them his alphabet; they took hold and soon learned it, and at his request wrote letters to their friends in the eastern nation. These letters he took and returned home after an absence of several months.

When he arrived home, these letters were delivered and he read them. There were many things in them which they knew must be true. His daughter also read them. At his request several smart Cherokee boys were taught by him, and after many tests satisfied the Cherokee unbelievers that George had a real *bona fide* "talking leaf."

George was happy. He had proved that the Indian was the equal of the white man in letters. The news spread rapidly, and in a few months hundreds of full-blood Cherokees were spelling, reading, and writing. He regained his lost prestige among his people, and a grand feast was given, at which he was the guest of honor. The good missionaries were delighted; for if they could not talk to the Cherokees, they could reach them through the press. The American Board of Foreign Missions furnished them a font of type in Cherokee, and the New Testament was printed in the language.

In 1831 a newspaper was started in the town of New Echota. It was called *The Cherokee Phœnix*. The Rev. S. A. Worcester was editor and the elder Elias Boudinot was the interpreter; while the late Judge John F. Wheeler, of this city, then a young man, was the printer and publisher. It was published in English and Cherokee. There is an old copy of this paper now lying before the writer. It is browned by time, and mutilated. The title line is gone, the advertisement reads:—

PUBLISHED WEEKLY BY
JNO. F. WHEELER.

At $3.50 per annum.

Subscribers who can read only the Cherokee language, $2.50.

This was the first printing office in the Cherokee Nation, East. An almanac and many other pamphlets were printed subsequently; and, after the Cherokees were moved west, *The Cherokee Advocate* was started at Tahlequah in 1844, with fresh Cherokee type, and this paper is now published in English and Cherokee and is much sought for as a curiosity.

George came west with the tribes and made his home in the Skin Bayou settlement about fifteen miles from Fort Smith. Among his neighbors were the Gunters, Saunders, Baldridges, and George Lowry. He was getting old. His wife, Polly, was a prudent helpmate and their little farm afforded them but a frugal living. The Cherokees were proud of him; but, though treated with great respect, they never gave him any substantial tokens of regard or gratitude. Governor Pierce Butler, United States Agent at the time, made a report to Congress that there was an old Cherokee who had invented letters and taught his tribe to read and write in their own language. However, nothing came of this. It was not until several years after his death, when Polly, in her old age, was in very straitened circumstances, that the Cherokee council gave her a pension of three hundred dollars per year; and, when they organized the Nation, they named the district in which he lived "Sequoyah," in his honor.

In company with a delegation of his tribe George went to Washington City in 1828, where he was interviewed by several scientists, through an interpreter, and pronounced a man of strong mental power and genius, and received a handsome silver medal.

He is known in Europe as the American Indian Cadmus. The United States government named the grand and beautiful Yosemite Valley "Sequoyah Park;" our scientists named the big tree of California *Sequoyah Gigantea*. His countrymen—the Cherokees—were the last to acknowledge his fame. In after years, it is said, they sent a committee in search of his grave, but did not succeed in finding it; and up to this date there is no monument or tablet to his memory by the people to whom he gave a "Talking Leaf."

In the *Fort Smith* (Ark.) *Elevator*.

Frederick Harrison, the English Positivist, says in a recent issue of *The Nineteenth Century:* "I need hardly tell you to read another and greater book. The book which begot English prose still remains its supreme type. The English Bible is the true school of English literature. It possesses every quality of our language in its highest form, except for scientific precision, practical affairs, and philosophic analysis. It would be ridiculous to write an essay on metaphysics, a political article, or a novel, in the language of the Bible. Indeed, it would be ridiculous to write anything at all in the language of the Bible. But if you care to know the best that our literature can give in simple, noble prose, read, mark, learn, and inwardly digest the holy Scriptures in the English tongue."

Yield thy poor best, and mind not how nor why,
Lest one day, seeing all about thee spread
A mighty crowd, and marvelously fed,
Thy heart break out into a bitter cry,
"I might have furnished, I, yea, even I,
The two small fishes and the barley bread."

FREDERICK LANGBRIDGE.

The Lectures.

At Los Angeles, Cal.

Simpson Auditorium was crowded to the limit of its capacity, while hundreds were unable to gain admission to hear the lecture by Judge William G. Ewing of Chicago on "Christian Science: Physician and Redeemer."

The lecturer was introduced by Judge John M. Miller of this city, who spoke as follows:—

A highly appreciated honor came to me when Second Church of Christ, Scientist, through its Lecture Committee, invited me to be present at this meeting, and introduce to you the speaker of the evening; and, fearing I may forget to do so later, I now beg to thank that body for the privilege accorded me.

All will admit that we live in a wonderful age; that the century just closed was the most remarkable on record, and that it was big with promise for great good in the new century upon which we have just entered. We have the "ocean greyhounds" coursing their way across the trackless wastes of waters; the limited trains gliding from snow to sunshine, from frost to flowers,—many hundreds of miles, almost in the twinkling of an eye; the land and sea electrical conductors over which the lightning flashes the world's history as it is written from hour to hour; the phonograph, in which we may bury the mighty melodies of the masters of music, or the voices of loved ones, to be resurrected and reproduced by future generations; with the aid of the X-ray our vision penetrates flesh and wood; man-made ships vie with nature's winged creation in aerial flights; and with the dying century we behold Marconi leaning from the northeastern banks of the American continent listening in rapt attention to messages of cheer and congratulation vibrating from the mother country, without a conducting wire or cable,—all wonderful and grand, and all indicating the up-stepping of the race to higher planes of thought and action.

But having in mind the darker history of our race, with its manacles on free thought and throttling of free speech, especially in religious matters, we turn to the spectacle here presented to-night, and say it is the more wonderfully grand and beautiful,—such an assemblage of intelligent men and women, drawn together to discuss dispassionately and calmly consider a radical innovation in the line of religious thought and experience, and to welcome the herald of what is claimed to be the revival of a long-lost faith in, and understanding of, God.

Instead of waiting with fire and fagot to silence the tongue of Truth's apostles, we are ready to welcome any word which will rend the veil of mysticism which so completely surrounds our lives; any thought that will lift humanity out of and above the shackles which have so long bound it, even though it be at the expense of preconceived notions of Deity, time-honored though they may be.

I cannot say that I am a Christian Scientist, much as I may regret the fact; but that is not the fault of Christian Science. I have heard from most reliable sources, of its wonderful redemptive work along physical, moral, and spiritual lines; I have read and studied the writings of its noble Founder, and have scrutinized the works and lives of many of its followers, sufficiently to satisfy me that as a religion, it is the Christ-idea, as I gather that idea from a careful study of the history of its ministrations nineteen hundred years ago.

Though we are engaged seriously in the search for truth, we often differ as to what is the truth; and advanced thought on religious lines has always been attacked and ridiculed until it was demonstrated as truth.

Has the religion of the centuries satisfied either the cravings of the better heart of man, or his more intelligent understanding? Does it silence humanity's cry of anguish? Does it give present fruition to man's hope for freedom from sin and sickness?

Our lips repeat, God is Love; God is everywhere; God is all-power and all-knowledge, and yet all about us is suffering, sin, sickness, and death. Our church spires pierce the clouds, casting their shadows on innumerable dens of vice; the music of church bell chimes mingles with misery's wail; even our prayers are weighted to earth by the lurking suspicion that God is not our Father; and the great majority of thoughtful men and women, in and out of the established churches, are praying for a light that shall lead them beyond a faith that halts and often fails, up to an actuality in the knowledge of God, and our relations to Him.

If Christian Science claims to take a step above or beyond the older religions of the day; if it demands higher duties from man to God, and from man to his fellow-man; and if it promises a greater realization of God's infinite love,—these are no reasons for condemning it, but are all reasons for investigation, and weighing the evidence it offers of its genuineness.

If it claims that God's ability and willingness, through Christ's spirit, to heal the sick as well as the sinful, was not for a select few and was not for only the first three centuries of the Christian era, but was for all times and for all peoples; and that its Founder and Leader, under Divine inspiration, has revived, in its full force and effect, the Christ religion of redemptive love, why not bring it to the always crucial test of results?

See if its influence takes the drunkard from his cups, the miser from his gold, and the thief from his spoils; see if under its ministrations the lame begin to walk, the blind begin to see, and that all forms of sickness are healed; see if through its whisperings the gloom of despair is chased away by the sunshine of a God-reaching hope.

The object of the lecture to-night is not to proselyte one soul, but to explain some of the principles of Christian Science and to correct some misapprehensions concerning it.

The gentleman who is to address you, at the zenith of a most successful professional career, laid aside the well-worn but unstained robes of honorable and lucrative office, to aid in revivifying this old gospel, and I know you will accord him a patient and unprejudiced hearing; and now, thanking you for your attention to these introductory remarks, I am pleased to present the Hon. William G. Ewing of Chicago, formerly judge of the Superior Court in that city, but now member of the Christian Science Board of Lectureship, of the Mother Church, Boston.

Los Angeles (Cal.) *Times.*

At Toronto, Ont.

Mr. Carol Norton, C.S.D., delivered a lecture in First Church of Christ, Scientist, Toronto, Ont., Thursday evening, February 20, to a very large and appreciative audience.

In addition to the regular seating of the church, several hundred chairs were rented for the occasion, which were all occupied; and besides, people stood in every available space, and even sat on the steps leading up to the auditorium. Altogether it was a most pleasing and profitable event.

Mr. John H. Stewart, C.S.B., Second Reader of the Church, presided, and upon opening the meeting said:—

Ladies and Gentlemen:—On behalf of the church I bid you all a very cordial welcome. You seem to be a very congenial body of people, and I am sure you will overlook the rather crowded condition of our church. It recalls a scene which I witnessed some ten or twelve years ago. We had a lecture given then, and felt quite elated when we found we had an audience of about one hundred and twenty. When Mr. Norton lectured for us the last time, it was admitted that at a conservative estimate there were about three thousand people present.

Digitized by Google

When we take into consideration the fact that Christian Science, being a comparatively new subject, calls forth the body of people assembled here to-night, it shows that there is some power outside the human that draws us together, whether you are conscious of it or not. Judge Ewing lectured in this church in May; the evening was very warm, but after the Judge commenced his lecture, all present became so interested that they forgot all about the heat,—having been reminded of the Scriptural admonition about man: "As he thinketh in his heart, so is he."

It is our pleasure to have another member of the Board of Lectureship with us to-night, Mrs. Knott of Detroit, Mich., who has kindly consented to introduce the lecturer. I take great pleasure in calling upon Mrs. Knott.

Mrs. Knott responded as follows:—

Ladies and Gentlemen and Christian Science Friends:—It gives me a great deal of pleasure to be here with you to-night to share the pleasure of listening to a lecture on the subject of Christian Science, which is so dear to me.

When the Emperor of Germany visited Palestine a few years ago he entered the city of Jerusalem by an ancient gate over which was written the inscription: "Blessed be he that cometh in the name of the Lord." In the 118th Psalm, David, in the exaltation of his joy, exclaimed, "Blessed be he that cometh in the name of the Lord."

After long centuries had rolled on, the world's great healer was in that great city of Jerusalem, bringing hope to the sorrowing, health to the sick, and life to the dead.

But how was his message and ministration received? We all know the story. We are told in the Gospels that one day he climbed up on to a hill overlooking the city; and, looking down upon it, he said most sorrowfully, "O Jerusalem, Jerusalem, thou that killest the prophets, and stonest them which are sent unto thee, how often would I have gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not! Behold, your house is left unto you desolate. For I say unto you, Ye shall not see me henceforth, till ye shall say, Blessed is he that cometh in the name of the Lord."

This same healing power has come to the world to-day through Christian Science, and there are thousands who say from the depths of their hearts, "Blessed be this Truth which cometh in the name of the Lord Jesus Christ, the ever-present hope and salvation of humanity," for this is the message of Christian Science.

Our beloved Whittier has said,—

> The healing of the seamless dress
> Is by our beds of pain;
> We touch him in life's throng and press,
> And we are whole again.

We have learned in Christian Science that this is something more than a poet's dream; it is a practical, living reality for all to lay hold upon and to be blessed, and I trust that every heart here will go out with this message of joy and gladness and say, "Blessed is he that cometh in the name of the Lord."

The messenger who is with us to-night has spent many years in proving the practicability of Christian Science. He has laid upon the altar youth, talents, and enthusiasm, and I have great pleasure, my friends, in introducing to you Mr. Carol Norton of New York City, a member of the Board of Lectureship of the Mother Church of Christian Science.—*Correspondence.*

At Portland, Ore.

Under the auspices of the two Christian Science Churches of this city the Hon. William G. Ewing of Chicago lectured for over an hour yesterday afternoon (February 23) to an audience of twelve hundred people at the Marquam Grand Theatre. The subject of Judge Ewing's address was "Christian Science: Physician and Redeemer."

Judge Ewing proved himself a deliberate and graceful speaker, and the earnestness of his words carried conviction to his hearers that he was thoroughly imbued with the truth of the doctrine he advocates. The speaker was introduced by Judge Arthur L. Frazer, of the Circuit Court.

The Oregonian, Portland, Ore.

The introductory remarks of Judge Frazer were as follows:—

Ladies and Gentlemen:—We have assembled here this afternoon to listen to a lecture on the subject of Christian Science.

Exactly what Christian Science is, I do not know; for never before have I had opportunity to listen to one qualified to expound its doctrine or describe the beliefs and practices of its adherents. I esteem it a privilege to be one of the audience on this occasion, not only because of my need of information on this interesting subject, but also because of the eminence of the lecturer whose reputation for learning and eloquence has preceded him.

It may be that the tenets of Christian Science are not all true; it may be that some of its doctrines will not stand the test of time, I do not know. But this I do know, that it is believed, advocated, and practised by a large number of our most intelligent people. Christian Scientists are a reading, thinking, and God-fearing people. Their hearts seem to be filled with love for their fellow-men. Their minds and souls seem to be possessed with peaceful happiness and tranquillity. A system of religion which attracts such a class of people and which affects its adherents in such a manner, cannot be altogether wrong.

It is easy to take one idea from any system of religion or philosophy, and by distortion and exaggeration make it appear ridiculous; and this unfair method, I fear, has been used by most of the opponents of Christian Science who have written for the press.

In answer to these opponents, Christian Scientists have a right to demand that a respectful hearing be given to one authorized to speak in their behalf, and that such hearing may be had is, I understand, one of the purposes of this meeting.

Christian Science has had a wonderfully rapid growth. The text-book which is used by its followers in connection with the Bible as an authority, was not published until 1875, but to-day I am told, Christian Scientists have over five hundred church organizations and perhaps hundreds of thousands of adherents. We shall probably on this occasion learn something of what causes this wonderful growth.

The gentleman who is to address us is a distinguished citizen of the State of Illinois. He is a learned and eminent lawyer. Twice he has served the people of his state as Judge of the Superior Court in Chicago. He refused a third nomination for the same position in order to become a member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass., and it is as a member of that Board that he appears here to-day.

Ladies and Gentlemen, I now have the honor of presenting to you the Hon. William G. Ewing of Chicago.

Correspondence.

At Batavia, N. Y.

An audience of considerable proportions including many prominent citizens, assembled at the Opera House yesterday afternoon (February 23) to hear Carol Norton of New York, of the Board of Lectureship of The First Church of Christ, Scientist, Boston, lecture upon the subject of Christian Science. Mr. Norton is a polished speaker and entertained his audience for nearly an hour. He was introduced by Miss Bertha Sumner.

Thirty-three Buffalo people came to Batavia with Mr. Holcombe for the purpose of hearing Mr. Norton speak.

Spirit of the Times, Batavia, N. Y.

Digitized by Google

Mr. Holcombe who was to have introduced the lecturer was delayed by railroad detention, and at the close of the lecture gave in part his words of welcome and introduction, as follows:—

The foundation of our country, of its institutions, and of the controlling influence in the leadership of the great and good men, through whose instrumentality our beloved land is now enjoying the fruit of duty well performed, has been faith in an all-wise, supreme Being. Washington in his address to Congress in 1789 offered his fervent supplication to that almighty Being whose providential aid can supply every human defect.

Forty-one years ago in the City of Buffalo, Abraham Lincoln said, regarding the solution of difficulties then confronting our country, that without the assistance of that Supreme Being he should surely fail; with it he could not fail. Christian Scientists say, without that assistance we can do nothing, but with God all things are possible,—simply adding that through the birth of Christian Science there has come an understanding of our relation to that supreme Being which teaches us why we cannot fail, when governed absolutely by that teaching.

In his recent message President Roosevelt said that the best way to help a man is to teach him how to help himself. Shall we not gladly welcome a religion which not only awakens man to his God-given and inalienable rights, to health and holiness, and enables him to secure them, but also teaches him how to retain those rights after attaining them? The gentleman who has addressed you, speaking from a long and wide experience, confirms this statement. In my own case, ten years of proof, personally and with those near and dear to me, leaves nothing to doubt, and from the depth of my heart I pray that you will give this subject your earnest consideration and ask God to open your eyes to the beauty and sweet helpfulness of this blessed Christ-Truth.—*Correspondence.*

At Camden, Me.

A large audience gathered in the Opera House, Tuesday evening (February 25), to hear the lecture on Christian Science by the Rev. William P. McKenzie of Cambridge, Mass. The lecture was an interesting one, the audience giving the speaker close attention throughout.

Mr. McKenzie was introduced by the Hon. Reuel Robinson in a graceful and appropriate manner. Mr. Robinson spoke of how with the great advance in civilization the persecution and intolerance of the past centuries had given way to broader-minded views, and now people believing in special creeds or sects were given a fair hearing. Ignorance and intolerance had given place to a spirit of fair play. He spoke of the fact that many of the audience, as well as himself, had come to this meeting, though not full believers in the principles of Christian Science, yet glad to hear and learn more about their beliefs and principles from one of their distinguished men. He then introduced the speaker in a complimentary manner.—*The Camden* (Me.) *Herald.*

At Bakersfield, Cal.

Judge William G. Ewing, formerly on the Superior Bench of Cook County, Illinois, a member of the Christian Science Board of Lectureship, of the Mother Church, Boston, delivered a lecture last evening (February 14) at the Armory, and over five hundred people were in attendance.

The distinguished jurist was introduced to the audience by Senator Smith. For over an hour and a half the lecturer held the attention of the audience while he expounded interestingly the principles of Christian Science. He discussed the religious phase of Christian Science and showed its relation to the curative side.

The judge is an entertaining talker, and the audience gave the closest attention to the discourse. The audience was greatly pleased with what they heard.

The Echo, Bakersfield, Cal.

Notices.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid $1.25
Six copies to one address 6.50
Twelve copies to one address . . 12.00

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Amendments to Church By-laws.

Section 1 of Article XXXI. of the By-laws of the Church Manual has been amended so as to read as follows: "There shall be a Board of Education, under the auspices of the Massachusetts Metaphysical College, consisting of three members, a president, a vice-president, and a teacher of Christian Science. Obstetrics is not Science, and will not be taught."

Article XXXIV. of said Church Manual has been repealed.

Section 2 of Article XXXVIII. has been amended so that it now reads as follows: "It shall be the duty of the member constituting the Publication Committee to correct in a Christian manner a lapse, injustice, or blunder, relating either to Christian Science, to Mrs. Eddy, or a prominent member of this denomination, in the periodicals issued in the city wherein he resides. This committee shall also be responsible for correcting, as above named, abusive newspaper articles published in his city and state, that have not been replied to by other Scientists, and have been forwarded to him for said purpose; also for reading the last proof sheet of the article he has prepared on this subject, having it published according to copy; and for having the papers containing these articles circulated in large quantities, and a copy sent to the Clerk of this Church. It shall also be his duty to have published in a Boston newspaper, each year, the letter sent by this Church from their annual meeting to the Pastor Emeritus."

The Massachusetts Metaphysical College.

THE annual term of the Massachusetts Metaphysical College will open, with the Board of Education, on the first Monday of June, 1902 (June 2), at 10 A.M. Unless otherwise arranged, the sessions will be held in the Mother Church edifice, and will continue not less than two weeks.

Blank applications will be sent upon request. They should be filled out and signed so as to be returned to the Board not later than May 1, 1902.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Prince Henry's Visit.

THE visit of Prince Henry of Prussia, brother of the Emperor of Germany, to this country is an event of much more than ordinary importance. Whether entirely social in its purpose, or partly social and partly diplomatic, its significance is not less great. It is an evidence of cordiality and good-will on the part of the German government toward our country which is not only warmly reciprocated by our people, but will tend strongly to perpetuate friendly relations between the two great countries.

In view of the large numbers who have transferred their citizenship from the Fatherland to our shores, and the ties of kinship which have resulted therefrom, it is especially gratifying that such an open act of friendship should have had its initiative with the Emperor of Germany. The effect cannot be other than mutually satisfactory and permanently helpful to each. The fact that Prince Henry is a grandson of the late Queen Victoria, of revered memory, adds much to the pleasure as well as the significance of the event.

The Prince's reception wherever he has gone has been most gratifyingly warm and hospitable. In New York, the great metropolis of this country, in Chicago, the great metropolis of the middle west, in Milwaukee, Wisconsin's metropolis, in some of the most important Southern cities, as well as in many other cities, the evidences of good feeling and welcome were as sincere as they were spontaneous; while at the capital of our country the reception extended to the distinguished visitor could not have been excelled had he been the Emperor himself, or any other of the earth's chief magnates.

Boston was not behind the other cities in the cordiality and lavishness of her hospitality. All the attentions and marks of respect and good-fellowship possible to be crowded into his few hours' stay, were extended. He was made the guest of both the State of Massachusetts and the city of Boston, their most prominent officials and most representative citizens responding, as if by common impulse, to the honor shown their state and city by the Prince's visit.

Perhaps the most interesting feature of the Prince's visit to Boston was his entertainment at Harvard University, and the most significant event of his visit there, the conferring upon him of the honorary degree of Doctor of Laws. President Eliot's able address conferring this degree shows clearly that it was not by any means a meaningless ceremony or an empty honor. It was rather a just and well-deserved recognition of the contributions, by the great universities of Germany, to the culture of this country.

We publish President Eliot's remarks, which were as follows:—

"This occasion is unique. Twice in the history of the university has a special academic session been held to do honor to the President of the United States, making a progress through the country; but never before has this democratic university been called together on purpose to do honor to a foreign prince. Weighty reasons must have determined such unprecedented action on the part of this society of scholars.

"These are the reasons:—

"Our students of history know the Teutonic sources, in the dim past, of many institutions and public customs which have been transmitted through England to this New England.

"The Puritan origin of the university makes us hold in grateful remembrance the heroes of Protestantism—Luther, Melanchthon, Erasmus, and their kindred spirits—and the German princes who upheld that precious cause through long years of confused alarms and cruel warfare. The Puritan government of Massachusetts followed anxiously the vicissitudes of the Thirty Years' War, and was in the habit of ordering public thanksgiving to God for 'good news from Germany.'

"In watching the social and ethnological phenomena of our own times we have seen that the largest contribution which a European people made in the nineteenth century to the population of the United States came from Germany, and that the German quota was not only the most numerous, but the best educated.

"As university men we feel the immense weight of obligation under which America rests to the technical schools and universities of the German Fatherland. From them thousands of eager American students have drawn instruction and inspiration, and taken example. At this moment hundreds of American teachers who call some German university their foster-mother are at work in schools, colleges, and universities all the way from this icy seacoast to the hot Philippines.

"Our men of letters and science know well the unpar-

Digitized by Google

alleled contributions Germany has made since the middle of the nineteenth century to pure knowledge, and also to science applied in the new arts and industries which within fifty years have so marvelously changed the relations of man to nature.

"Our whole people have the profoundest sympathy with the unification of Germany. We all believe in a great union of federated states, bound together by a common language, by unrestricted mutual trade, by common currency, mails, means of communication, courts of justice, and institutions of credit and finance, and inspired by a passionate patriotism. Such is the venerable American Union; such the young German empire.

"We gladly welcome here to-day a worthy representative of German greatness, worthy in station, profession, and character. We see in him, however, something more than the representative of a superb nationality and an imperial ruler. Universities have long memories. Forty years ago the American Union was in deadly peril, and thousands of its young men were bleeding and dying for it. It is credibly reported that at a very critical moment the Queen of England said to her prime minister: 'My lord, you must understand that I shall sign no paper which means war with the United States.' The grandson of that illustrious woman is sitting with us here.

"Now, therefore, in exercise of authority given me by the President and Fellows and the Board of Overseers, and in the favoring presence of the friends here assembled, I create honorary doctor of laws Albert William Henry, Prince of Prussia, and vice-admiral, and in the name of this society of scholars, I declare that he is entitled to the rights and privileges pertaining to this degree, and that his name is to be forever borne on its roll of honorary members."

Unusual Testimonies.

At a recent Wednesday evening meeting at First Church of Christ, Scientist, in Chicago, there were given two testimonies of an unusually interesting character. One was given by Mr. John Lloyd of Chicago, an employee of the Western Union Telegraph Company, and was substantially as follows:—

"My principal contention against the churches in general while in the old thought was that Christianity was not practical. I often made the statement that when I found a religion that was practical for every day as well as Sunday, I would adopt that religion. So bitter was my contention against the churches that even after I had turned to Christian Science for physical help, when the name 'Church' was mentioned by some of the ladies at the reading rooms when I was there for treatment, I said to myself, 'If these people have any church business connected with this work, the first thing they know I will quit them.' A little later, however, and after my nature had somewhat softened under the benign influence of Infinite Love, I got into conversation with one of the ladies at the reading rooms and she told me something about the Mother Church, and how the Treasurer had sent out notices to the subscribers at the time the church was built notifying them that they must stop sending in money, as sufficient funds were at hand to complete the work. 'What!' said I, 'do you mean to tell me that some church acknowledged that it had enough money?' She said, 'Yes, that is the way we do in Christian Science.' My reply was, 'That is the greatest miracle of the nineteenth century.'

"After taking up the study of Christian Science it began to become clear to me what 'Church' really meant, and that I had at last found a church that was practical and that it was a church for Sunday, Monday, and every day, every hour, and every minute, if you please.

"I have had many demonstrations in business to prove this. For example: Not long ago, at Davenport, one of the men employed by our company made a request of the company. The request was made through me. It was refused, and when I handed him the letter stating the reasons why it was refused, he seemed to grow very angry, directing his anger towards me. I went up-stairs and the thought came to me, 'I guess I had better not go down-stairs again until this thing blows over.' Then came the thought, 'Until what thing blows over? There is not anything in this house, neither up-stairs nor down-stairs, but Infinite Love; and I am going just where I have a right to go in Infinite Love.' I went down-stairs and there wasn't any anger there. I met a real good-natured man, and everything was all right.

"Again, while doing some complicated work in a private house in Cedar Rapids, in which were nine small children who climbed over me, scattered my tools, and pulled my wires, the thought came to me, after having worked there several days, 'Am I working right? and if so, where is the evidence of my reward?' About this time, the lady of the house said to me, 'Don't you ever get mad?' Well, in the old thought, had I been doing that work under the same circumstances, that woman would have known that I was mad, and would have known also that I did not care to be bothered by children scattering my tools and pulling my wires. As it is, Christian Science often enables one to preach a sermon without words.

"What a change this Science works in character! In the old thought I was engaged in the labor movement, and finally got into the Anarchist movement. I had often made incendiary speeches to the unemployed, and even some of my most radical friends said that I was going too far and would finally get into trouble. The *Chicago Tribune*, at about this period, advocated that I be suppressed. The Chief of Police of this city, who was a friend of mine, sent me warning and requested that I keep quiet, or I would get into trouble. My chief points of attack were the church, the clergy, and the Bible. Expecting a revolution, I had often said, 'Boys, don't forget the Bible; they should all be burned!' What now is my attitude toward the clergy? Why, I love them. How much do I love them? In proportion to my understanding of Christian Science; and as I grow in the understanding of this Science, I learn to love them more. And as for the Bible, it, in company with Science and Health, is my daily companion. I never fail to take them on the road, and they can always be found in my room.

"In the light of Christian Science I learn to love and understand it. I thank God that I have come to an understanding of this Science, and thank Him for giving us our beloved Leader, Mrs. Eddy. And I am also grateful to the faithful ones who have rallied around her in all the storms of opposition and oppression."

The other testimony was by Mr. Roy Goodwin who said in substance:—

"About one year ago, I came into this church one of the most unhappy men in the City of Chicago.

"Some eight or ten years previous to my coming into Science I wore a truss to support a very serious rupture, one that was so severe I could not cross the room without pain if the truss were removed. A short time after accepting Christian Science I removed the truss and have not had occasion to use it since; but, great as the physical healing seems to be, it is nothing as compared to the revolution that has taken place in my thought. For a number of years I was employed as a railroad man and was known as a labor agitator. I was engaged in several railroad strikes and was put in jail several times for the same. This finally culminated in 1894 with a sentence, by the United States Circuit Court, of three months in Woodstock Jail, with Mr. Debs and others. The jail sentence did me no good; from the jail I joined the Socialists' and Anarchists' groups of Chicago, and became more desperate in my efforts to strike back at those whom I supposed were responsible for

Digitized by Google

the oppression of myself and other working men. So intense was our hatred that at one time I remember gathering together some twenty of the most desperate men in the city for the express purpose of burning the city to the ground; but, led by our hatred as we were, we were unable to perfect our plans. Our chaos was so great that we could not even elect a chairman of the meeting.

"From this state I descended still lower until I began to associate with the worst criminal class in Chicago; and this was my state of mind when I turned to God through reading Science and Health. I was like a hunted animal at bay, with not a cent in my pocket or a place to sleep except the street. My constant preaching and thinking of poverty had produced this result, until through a kind friend who had tasted of the blessings found in Christian Science, I was led to Science and Health. I commenced by reading from 10 A.M. until 11 P.M. with the result that my condition has steadily improved, and I can truthfully state tonight that there is not a man, woman, or child on God's footstool that I do not love. I have completely overcome poverty and all that goes with it.

I can truly rejoice, with thousands of others, for the many blessings that have come to us through Christian Science, and I thank God for the message given to suffering humanity through Mrs. Eddy and Science and Health."

These experiences are convincing proof of the transforming power of Christianity, when Christianity is understood. These men were battling against their own false views of what Christianity is. Many thousands, nay millions, of good people are opposed to Christianity, or the teaching of Christ Jesus, because of their misapprehension of what it is. Jesus of Nazareth was not only the teacher of the true brotherhood of man, but he was the demonstrator thereof. When men come intelligently to read and understand the true intent of Jesus' life and teaching, their prejudice against Christianity is at once removed. It was manifestly reserved for Christian Science to bring out the brighter and fuller conception of the Nazarene's life and teaching. This fact is strikingly illustrated by the testimonies of the two gentlemen above referred to. Their experience, while novel in some of its aspects, is in its essence, the experience of many, many thousands who have been awakened to a higher and better sense of Christianity. These thousands, in common with the two whom we have quoted, are rejoicing in this fact. Daily, nay, hourly, this multitude is augmenting in numbers.

The only truly effective "strike" is to strike for a higher and better conception of the Christ. This conception will eventually settle all differences between capital and labor, as well as all other discords of humanity. The entire philosophy of altruism is embraced in that one great precept of the Nazarene: "Therefore, whatsoever ye would that men should do unto you, do ye even so to them."

Selected Articles.

Christian Science.

Englewood, N. J.

Editor *Passaic Daily Herald.*

The writer's attention is called to your editorial of December 17, beginning: "The Fallacies and Fraud of 'Christian Science,' were so thoroughly exposed by Dr. James Rosedale at the Y. M. C. A. men's meeting on Sunday, and some of its articles of faith so ridiculed that we do not think that any attempt will be made by the Scientists to reply to him."

In the synopsis, a column long, of the address in question, found in your valued issue of the day before, it appears that this minister of the gospel, a resident of Jerusalem, had for the basis of his expose and ridicule of Christian Science, information which he obtained a few days before by accosting on the street a stranger who told him that Mrs. Eddy and her followers alter the Lord's Prayer and as thus altered it begins, "Our Father and Mother which art in Heaven;" that, "they cut out entirely from the Bible what they do not want," and "they care for the spiritual needs and allow the material to take care of themselves."

Now the facts are that Mrs. Eddy and her followers neither alter, cut from, nor add to, the Bible a single word, but accept and use it just as it is and in its entirety, and they do not "allow the material needs to take care of themselves."

Even a cursory examination of their text-book, "Science and Health with Key to the Scriptures," clearly shows this, and the first article of the tenets of the Christian Science Churches is therein found to be: "As adherents of Truth we take the inspired word of the Bible for our guide to eternal Life."

Touching their use of the Bible and the result of their understanding—which Dr. Rosedale declares is a misunderstanding—of its teachings, an eminent Baptist divine, writing on Christian Science, says "the sale of Bibles at all their book stores is enormous; every convert must immediately possess a Bible and study it for the rest of his life . . . Christian Science has recalled many from agnosticism into a living faith in God. The majority of believers do not come from the churches . . . many of them have come out of atheism into radiant religious faith. . . . The average Christian Scientist does have a victory over fear and care and sin that is not achieved by the average orthodox Christian. To the average church member, Christianity is the acceptance of a series of doctrines and historical facts, and the acceptance of a forensic transaction of eighteen hundred years ago, in consequence of which he hopes for heaven beyond. But he is a worried and fretted and fearful man; afraid of himself and his propensities, afraid of colds and fevers, afraid of treading on serpents and drinking deadly things, as the apostles of Christ were not. The average Christian Scientist has put all anxiety and fretting under his feet. Christ is to him no distant historic figure, but the incarnation of the Divine Idea. God is no mere first cause, but a very present help."

This clergyman, who is no less a personage than Dr. Faunce, president of Brown University, formerly pastor of Fifth Avenue Baptist Church, New York City, states furthermore:—

"It is absolutely certain that hundreds of men and women in this country have received in the healing of their diseases a demonstration that there is a fundamental truth in Christian Science. Beholding the men who are healed, we must beware how we declare ourselves against it.

"Even though many have died while h ping to be healed, even though many have forsaken the faith they once held, a marvelous number of cures are being daily performed. It is easy to pronounce this Satan's work; but Satan's work is to bind men and not to loose them."

And there are, Mr. Editor, many eminent clergymen and physicians and lawyers and editors and scholars who think with Dr. Faunce, and who do not agree with you and Dr. Rosedale that Christian Science is a fallacy and a big farce and a fraud; hence it is not true, as you assert, "all are agreed it ought to be checked."

You say the rise of the cult has been one of the wonders of the religious history of the last decade and has made thousands of converts chiefly among the intelligent classes.

Now if a large body of intelligent people after much study and much testing, pronounce a teaching and the teacher good, and another large body of intelligent people with little or no study and no testing whatever, pronounce the teacher and teaching bad, is there any possible explanation of this conflict of opinion other than that of "misunderstanding" on the part of the last mentioned body due to insufficient investigation?

Do not many intelligent people get their information,

Digitized by Google

like Dr. Rosedale, from a stranger on the street or from some equally good source?

Because thousands of Christian Scientists, intelligent people, believe and know that Mrs. Eddy has brought to them the greatest good they have ever received, and express the deepest gratitude to her for it, are you justified in saying they practically deify her? She teaches that to deify her or any mortal being is to dishonor God, and you say they accept her teaching as gospel truth. Your two statements are therefore in opposition.

Nor has Christian Science "enriched its foundress," as that expression is commonly understood; nor has it been "to the leaders, merely, of course, a comfortable source of income;" on the contrary, it has been to most of them a very meagre source of income, although to all a most abundant source of all other kinds of good.

Jesus commanded all that believe in him to preach the gospel and heal the sick, and he explicitly said they should charge for their labor.

Dr. Rosedale charges for preaching only, and finds fault with those who charge for both preaching and healing. Would he have them beg or steal?

He tells us his prayers offered daily at the bedside of his dying boy were unavailing, and in the same address scoffs at Christian Scientists by whose prayers "a marvelous number of cures are being daily performed"! He has one understanding of the Scriptures, Mrs. Eddy has another. The latter's interpretations heal "all manner of sickness and all manner of disease among the people;" the former makes no such claim. "By their fruits ye shall know them." Is it any wonder that thousands of intelligent people regard Christian Science as a sublime truth?

WILLIAM A. CHILDS.

Christian Science is not Hypnotism.

New York, January 25, 1902.

To the Editor of the *Republican.*

I have read with interest the lecture of Dr. White on "Hypnotism," as reported in your valued paper of January 21. I believe your readers will be interested to know that the practice of Christian Science is totally unlike that of hypnotism, or of suggestion, as explained by Dr. White, and that its effects are likewise entirely different. I mention this because Dr. White is reported as saying: "Suggestion will cure these cases, and this accounts for what success there has been among Christian Scientists." In explanation of my statement, let me quote Dr. White himself.

In answer to the question "What is hypnotism?" he is reported as saying: "Briefly, hypnotism is the practice of inducing a certain mental state in which the subject or patient is wholly guided by the suggestion of the operator or physician."

This describes the exercise of will power. The words "inducing" "subject," and "operator," clearly point to the taking of personal control by one person over another. This practice is totally opposed to Christian Science methods.

The physical healing done by Christian Science is in each case the after-effect of a spiritual regeneration. No one can be healed in Christian Science without receiving a wonderful spiritual baptism. It is an uplifting, transforming process, which is not the result of any human will power or personal control, such as is exercised by the hypnotist, Mrs. Eddy says on this point, in "Science and Health with Key to the Scriptures," page 490: "Will-power is but a product of belief, and this belief commits depredations on harmony. Human will is an animal propensity, not a faculty of Soul. Hence it cannot govern man aright. Christian Science reveals Truth and Love as the motive-powers of man."

The healing done by Christian Science is due to prayer, carried beyond mere petitions for favors into a realm of realization where the eternal Truth dwells alone. No one has ever claimed such results for hypnotism, for while the latter system may possibly produce temporary exaltation, it is incapable of reclaiming and transforming the sinner and of teaching him to "know God."

Hypnotism acts in the mental realm as morphine does in the physical and the last end of the subject is apt to be worse than the first.

It is one of the many merits of Mrs. Eddy's work that she pointed out, more than thirty years ago, the baneful, and therefore unscientific, nature of mesmerism and its outcroppings in modern hypnotism. At that time serious investigators despised the mesmerist and his work, but to-day an attempt is being made to use this seeming force, and to formulate upon it a system of suggestive therapeutics. At the same time its dangers are being forced more and more to the front, and the same investigators are fortunately the first to warn the public against them. But Christian Science blesses him who gives and him who receives. It is a benign influence, for it appeals directly to God (Good), and at once relegates evil to the place where it belongs,—outside of true consciousness.

Dr. White is likewise reported as saying: "Hypnosis is of use only in cases of purely functional troubles, where there is some mental state to be reached."

Christian Science healing has never been confined to the special classes of disease which are reported to be healed through suggestive therapeutics by those who practise that system. In fact, it would be difficult to find any known disease which has not been overcome through Christian Science, and it is noteworthy that in the majority of cases the patients only resort to Christian Science after all other remedies have failed.

The statement of Dr. White: "But organic diseases, such as diphtheria, locomotor ataxia, and hundreds of others cannot be benefited in that way," may be true so far as hypnotic suggestion is concerned, but his statement does not apply to Christian Science, for the very diseases which he mentions have been repeatedly healed by Christian Science treatment. The proof, then, that "the success there has been among Christian Scientists" is not due to hypnotism or to its allied beliefs, is furnished by the fact that the practice of Christian Science, as well as its results, are quite different from the practice and the results of the former.

I know that Dr. White, as well as your readers, will be interested to have a distinction made which has sometimes been overlooked.

W. D. MCCRACKAN.

Live for Something.

Live for something, have a purpose,
And that purpose keep in view.
Drifting like a helpless vessel,
Thou canst ne'er to life be true.
Half the wrecks that strew life's ocean,
If some star had been their guide,
Might have long been riding safely,
But they drifted with the tide.

ROBERT WHITAKER.

The reason why we speak of so many of life's experiences as "losses," is because we fail to take account of the gains of which these so-called losses were the price, and which we never should have obtained without them.

The (Baptist) *Standard.*

The love of Christ is too large for any heart to hold it. It will overflow into others' hearts; it will give itself out, give itself away, for the enriching of other lives.—*Anon.*

From our Contributors.

"Work, Work, Work."

BY WILLIAM R. KNOX.

ONE of the greatest privileges of Christian Science is to see the way of progress unfold through the persistent effort of one's own individual work, to see the confusion of various conditions gradually disappear, and the harmony and order of Truth manifest itself; to see all things come about naturally. It is then that we get a "sweet foretaste" of fidelity's reward, "Thou hast been faithful over a few things, I will make thee ruler over many."

In "Miscellaneous Writings," page 340, we read, "Only by persistent, unremitting, straightforward toil; by turning neither to the right nor to the left, seeking no other pursuit or pleasure than that which cometh from God, can you win and wear the crown of the faithful." So as we rise, through the fidelity of our own work, to the understanding and demonstration of the one governing, divine Principle, we shall gain a clearer realization of that *natural* progress; that progress which is neither fast nor slow, but simply divinely natural.

There should be no anxiety or worry, nothing strained, overworked, or forced in our progress in Science. We should constantly strive to realize harmony; to be calm and natural under all circumstances; and to gain that poise on the firm foundation of Truth, and there to stand.

One of the most imperative passages of Scripture at the present is the admonition of Paul to the Philippians, to "work out your own salvation." Surely no man can appreciate the value of a dollar so much as the one who has earned it. So it is in Science; we never can be truly grateful for the blessings of Truth until we have seen the fruits of our own labor, however small those fruits may be, whether in ourselves or in another. How clearly Paul saw this when he said, "Let every man prove his own work, and then shall he have rejoicing in himself alone, and not in another."

In reading Mrs. Eddy's writings, we see how clearly she brings out this point of individual work, for she says, on page 285 of Science and Health, "As mortals reach, through knowledge of Christian Science, a higher platform, they will seek to learn, not from matter, but from divine Principle, how to demonstrate the Christ, Truth, as the healing and saving power of God." So we see that what we need is the understanding of divine Principle,—even God, Mind, Spirit, Life, Truth, Love.

Now in Christian Science, we are abundantly supplied, in the works of its Discoverer and Founder and in the literature of its Publishing Society, with the light wherewith we may seek and gain the understanding of this Principle, by which we may solve all our problems and thus bring the kingdom of heaven to our consciousness. And we know, that if we are honest and faithful in our own work will "all things work together for good."

A Grateful Word.

BY ELINOR F. EDWARDS.

A LITTLE experience, which was as refreshing as water from a cool spring on a sultry summer day, will cause me to remember with gratitude that short article entitled, "Let," in the *Sentinel* for January 23. A friend having spoken of the help she had received from this article, I was led to re-read it, and just after doing so happened to open Science and Health, when my eyes fell at once on these words at the foot of page 248: "Let harmony, health, unselfishness, goodness, mercy, and justice form the mind-pictures, and sin, sickness, and death will diminish until they finally disappear." As I continued to read, I found that the same little word occurs no less than five times in the next ten lines, and in connection with the most inspiring statements of Truth. Thus through that one little word, so significant in the light of Science, the Scriptural command was again fulfilled to multiply (the ideas of Truth) and replenish the earth.

Sonnet.

BY GERRY HOYT BARNES.

"THINE is the kingdom." Though o'er earth's fair fields,
Warriors have marched by mad ambition led,
And fear and ruin in their path have spread,
Such have but striven for a goal that yields
But vanity at last; for he who wields
An earthly sceptre rules but in a dream.
"Thine is the kingdom." Though it oft may seem
That selfishness, and avarice, and pride,
Dwell in the hearts of men, and there hold sway,
Yet he who sees with vision clarified,
Precious, above the mist, the eternal day;
Beholds, illumined with a light divine,
God's universe; and hears glad voices say
"Thine is the kingdom, and the glory thine."

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

President Roosevelt is not the only young ruler in the world. In fact, he is older than at least nineteen rulers of the great nations of to-day. William of Germany is three months younger; Nicholas of Russia is only thirty-nine years of age, and the Emperor of China is ten years younger still. Possibly he might not be counted as a ruler by some people, but still his name is recognized, no matter who pulls the strings in the Chinese court. Victor Emmanuel of Italy is twenty-eight and Wilhelmina of Holland only twenty-one. Alphonso of Spain is probably the youngest ruler of all, as he is not yet sixteen. Charles I. of Portugal is under forty, and Ferdinand of Bulgaria is not yet forty-one. Abbas II., Khedive of Egypt, is not more than twenty-seven, Alexander of Servia but twenty-five, Thank-Tai, King of Siam, twenty-two, and Prince George of Greece, Governor of Crete, thirty-two.

The (Baptist) *Standard.*

Testimonies of Healing.

It is nearly two years since I came into Christian Science. I came not from choice, but as a last resort. I was facing a problem that I could not solve, and while I tried to face it manfully, my resources for help seemed exhausted. The fear of the surgeon's knife, the hope of postponing for a time at least, what seemed inevitable, caused me to suggest to my wife that she try Christian Science. I wished at first I had not done so, for it came as a crushing blow to her. She is the daughter of a physician, and she felt that I did not fully realize how much she suffered if I thought she could be helped by Christian Science. Nevertheless, I finally persuaded her to give Science a trial.

We had, in January, 1900, withdrawn from our work in church and Sunday School with the thought of making a fight for her life. We had consulted five of the leading specialists in Chicago and her case had been discussed at their meetings. Two of these specialists had said that the enlargement on the back of her neck was a tumor. One of them shook his head, looked grave, examined both spine and lungs and said, "Come again." Still another said, "I do not know," and recommended us to see the fifth whom he said was the leading spine specialist of Chicago and was well known, not only in this country but also in Europe. We consulted him and he spent two or three days in studying the case and pronounced it tuberculosis of the spine. He said she must be placed in a steel frame and strapped to the bed for a number of weeks while the spine healed. All agreed that she had appendicitis and said the sooner the operation the better, as another attack might prove fatal. The day for the operation was fixed. I shudder even now as I recall those dark days.

Weary and heavy laden, my wife sought a healer with the thought of pleasing me. The bright things of life seemed slipping away. She loved her God, her church, her people. She had asked her pastor and one or two devout members of the church to pray for her. I have no doubt they prayed, but no relief had come. To seek for help elsewhere seemed contrary to reason, and yet she went. She went, to find the healer away from home, and rejoiced that she was gone. However, Truth seemed leading her. From the home of the healer she went to a friend of her childhood,—a woman who makes no pretence of being religious, and who, during the call, astonished my wife by saying, "Why don't you try Christian Science?" "Why," she added, "my cook is a Scientist, and while your religion does not appeal to me, hers does." Demonstrations were mentioned while there that could not help but appeal to one who was catching at the last straw, and the result was that the following day my wife again went to the healer. This time she was at home. She found a woman in whose face the light of Truth was shining and to her she told her story. She prefaced it by saying she was a Methodist, that she was prejudiced against Christian Science, and that she came with no thought of giving up her church or her religion. The healer quietly answered, "Methodists have been healed, and those who are prejudiced have been healed." Thus the good work began. The first treatment relieved the intense pain along the spinal column. Each day the fetters which had held her captive yielded, and finally the spinal trouble and the suffering from the appendix disappeared, and various other ailments went with them.

She became interested in Science and Health and asked me to buy a copy. This I resented, and told her I wanted healing, not books. I thank God, however, that when I saw I was discouraging her I had the manliness to get it. Not only that, I decided to test Science myself. A chronic dyspeptic, a constant sufferer from colds and grip, I thought myself a good subject for a healer to practise upon. If it did me no good, it could do me no harm. What was the result? Healing, health, and happiness for both. We came out of a world of darkness and suffering into the beautiful sunlight of Truth. Freed from the shackles of disease we entered a realm of thought hitherto unknown to us.

I might tell more. It is sufficient, however, to add that we are Christian Scientists, students of the Word, and constant seekers after Truth as found in "Science and Health with Key to the Scriptures."—W. A. B., Chicago, Ill.

When Christian Science first came to us, the members of our family were in the following condition. My wife in bed absolutely helpless with chronic rheumatism together with numerous other ills unnecessary to state here. Our daughter suffering with weak lungs, she having been afflicted seven different times with what *materia medica* calls pneumonia and congestion of the lungs. Two of our boys were suffering from hereditary dyspepsia and the third boy was afflicted with eczema, while I seemed to be very much handicapped with a severe case of chronic dyspepsia or indigestion, to the extent that I frequently was taken home in a carriage through having fainted while at work in my office.

Of course under these conditions was the necessity of having a small apothecary shop at home which, together with the daily consumption of drugs, took about one third of my income to keep up. Add to this the expense of providing for an appetite for smoking and chewing tobacco and a social habit of imbibing intoxicating beverages to an unsafe degree, and it will be seen what it cost me to support unqualified error, aside from the necessaries of life.

It is about eight years since the glad tidings reached our home, and during that time there has been no medicine used by any member of our family except by the writer. I did not take to the Science for a number of years, but I did read the books occasionally and of course the inevitable occurred. It has been four years since I have smoked or chewed tobacco or drank any kind of intoxicating liquor, and the same length of time since I have resorted to any other than Christian Science treatment for claims of disease. When I first took up the study of Science I weighed one hundred and ten pounds, and I now weigh one hundred and forty-two pounds. I am better physically, morally, and in every other way. The tobacco and liquor habit has been so thoroughly destroyed that I not only have no desire for them, but have a sense of pity for any one whom I see using them.

There is no question in the minds of our family as to the power of divine Mind to heal the sick and sinful or meet every human need.

There is not a day passes but we see some manifestation of God's love. My wife, my daughter, and myself are members of the Mother Church at Boston; the daughter is a member of the Second Church of Christ, Scientist, of Chicago; and my wife, the two boys, and myself are members of the Church of Christ, Scientist, of Salt Lake City, Utah. Before closing I wish, joined by my family, to express our love for our loving Mother, Mary Baker G. Eddy, who through her beautiful life has been able to demonstrate to us the power of divine Mind, and has enabled each and every one of us to see to some extent the peace and harmony in the living of the life of a true Christian Scientist.

T. J. MACKINTOSH, Idaho Falls, Idaho.

The last *Sentinel* has just passed from my hands to the table, and I can only think of it as a dear messenger of Truth. How eagerly I scan its pages and treasure every thought of Truth and Love found therein, no one but a Scientist can tell. But especially in this last number have I found many suggestions in different articles that are helpful and encouraging, and give much food for thought. There is one short selected article entitled, "The Skilful

Digitized by Google

Gardener," which brings to mind a garden which I worked in when in former years I lived at the old loved home; and with what pride I faithfully worked to uproot every weed, that the vegetables growing there might stand out free and clear; for I could see that if they grew surrounded and shaded by weeds they were spindling and weakly, and if the weeds were uprooted while in that state, the hot sun would destroy the plants, and they would perhaps not grow at all. I have not for some years been working in the old garden at home, but am still working and weeding a garden, and mind is my field of labor. I can see that if thoughts of hatred were not put out, the seeds of love I would sow could not take root, and grow, and expand into the power which has "healing in his wings." I am trying now to weed out thoughts of malice, hatred, envy, jealousy, self, and others of like nature, and let thoughts of good take their place. I know that good thoughts will take root and grow to full fruitage if the weeds of evil are kept out to give room for the good.

I was healed in Science eight years ago, after having given up all hope of receiving help from medicine, of a chronic stomach trouble of over twenty years' standing. In the past eight years I have been able to demonstrate the Science to some extent, but have also labored under many discouragements because error seemed to creep in unawares; but I am now trying to be more watchful, and evil thoughts are fast fleeing before the radiant light of omnipresent Good. I find myself oftener asking the question found on page 469 of Science and Health, by Mary Baker G. Eddy: "Am I living the life that approaches the supreme Good? Am I demonstrating the healing power of Truth and Love?" The better understanding I get of Christian Science and its divine Principle,—Love,—the more gratitude I feel to its Discoverer and Founder, Mary Baker Eddy, and my heart o'erflows with gratitude for the benefits received from its teachings.—K. T., Cortland, O.

Christian Science has done much for us in the last four years, since we have tried to follow its teachings.

Having in our home three children, we have often seen the power of Truth and Love. When we first came into Christian Science, our first desire was to have treatment for our little girl who was then two and a half years old but could not walk and never even made any attempt to do so. People often would say, "I wonder what is the matter with her, her spine must be affected." We soon saw that it was our problem to work out. Some time after we had class instruction the demonstration was made.

The next problem took a little longer. The child could not speak, but our teacher gave us a little help, and that demonstration is also made.

During the year 1901 our oldest boy had an old claim of croup come on him one night. We seemed to feel that he was in danger of some kind, even before we awoke. We declared the Truth for him for an hour, sometimes audibly but mostly silently. Although he seemed to be choking, we kept right on realizing God's allness, until finally his breath came more gently, and at the end of an hour it was perfectly natural. Oh, how near God seemed to us! the consciousness of His presence remained with me for a long time. The child has never had a return of the claim since, although he had been troubled since he was a year and a half old, and he is now eight.

Every day brings new blessings. The spiritual help, however, is the greatest. It has given us the peace that Jesus gave to his disciples, "Peace I leave with you, my peace I give unto you: not as the world giveth, give I unto you."

Words are too feeble to express our gratitude for all these blessings,—to God for His goodness, and to Mrs. Eddy for her unceasing labor to bring this all about; and for our Lesson-Sermons,—each week they seem more beautiful as thought unfolds. The beauty of these sermons is, that we can study them at home each day, having rich spiritual food.—Mrs. Tabitha Marx, Detroit, Mich.

Oftentimes we find the spoken word given out to the enquirer sufficient to dispel a physical claim.

One Sunday evening after service a man spoke to me of a claim with his head that had troubled him for twenty years, and for which he found no relief from physicians. He said it had grown so severe that he would be obliged to give up his business unless Christian Science could help him. He wanted present treatment but could not find time for it before Thursday. I spent about ten minutes talking with him of Science and making the application to his case.

On Wednesday evening he reported with a beaming face that he needed no treatment, as he was entirely well.

Monday evening of the same week a young man came for help for a serious chronic ailment of long standing, and after twenty minutes' talk he felt so much encouraged and helped that he decided to apply himself to the study of Science and Health—he had very recently purchased a copy—and try to help himself. On Wednesday evening he too reported that he had been perfectly healed during our talk.

Such cases indicate a breaking up of the old conditions of thought, a more receptive state of mind with every year's work, showing how the leaven is working in human consciousness.

We are very grateful for the many helps with which divine Love supplies our need, through our Leader, the Lesson Committee, and the Publishing Society.

The new Science and Health is "a thing of beauty and a joy forever." Our hearts are touched by this last evidence of the unselfish love and constant labor of its author for the good of humanity.—P. W., Colorado Springs, Col.

At Missoula, Mont.

Five years ago, a few loyal Scientists met and held services in a private room, moving into larger quarters from time to time, as the work demanded. October 16, 1901, First Church of Christ, Scientist, filed Articles of Incorporation, organizing with seventeen charter members. A new room was secured in the McHaffie Block, and very prettily and attractively furnished for church and reading room. We have an average attendance at Sunday service of forty, which is steadily increasing. Lectures have been delivered here by Dr. Sulcer and Judge Ewing, which were very helpful and greatly appreciated. Two copies of Science and Health, one "Miscellaneous Writings," and the *Journal* and *Sentinel*, have been placed in the public library. Science and Health and "Miscellaneous Writings" were also presented to The State University of Montana (the latter by the children of the Sunday School). It is but meet to say that these dear little children, though few in number, are helping the older ones, not only in contributing liberally to the furnishing of the new room, but by their regular attendance and loyalty.

Flora B. Carnahan, *Clerk.*

Without and Within.

BY ELIZABETH EARL JONES.

Not that which goeth into the mouth defileth a man, . . . but those things which proceed out of the mouth come forth from the heart; and they defile the man. — *Matthew*, 15: 11, 18.

Within is the thought, without is the deed;
Wrong thought is the sinner, its offspring the sin;
But storms from without neither wreck nor mislead,
If the Kingdom of Heaven abideth within.

Religious Items.

The first overwhelming impulse of the really conscientious man is to acknowledge and welcome new forms of truth as soon as they manifest themselves to his intelligence. But I suppose that few of us have ever considered deeply what takes place in the mind when the knowledge of some new truth first enters the thoughts of a conscientious man. Vastly more happens than is generally supposed. A real warfare ensues, and warfare invariably implies both victory and defeat. The real militant nature of truth as it enters the understanding of a conscientious man may be clearly seen if we consider the individual mind as in a sense a large household. Many persons of various opinions and qualities of life compose this household. Some are good and some are evil, but all live in comparative peace and friendliness. The evil ones hide their qualities by hypocrisy. The master of the house is the predominating love—and in this instance the predominating love is qualified with conscientiousness. The knowledge of some new truth always comes as one asking admission as a new member of the household. He applies to the householder or the predominating love. The new applicant is without hesitation welcomed as the angels were welcomed by Lot when they came in disguise to Sodom before it was destroyed. But this angel of truth is no sooner welcomed by the householder as a new member of the family than some satan member recognizes in the newcomer his mortal enemy and the one who will lay bare his hypocrisy. With the skill and terror of one compelled to fight for life this old member of the household rebels against admitting the newcomer. The master of the house is obliged to resist with resolution this opposition and to look with mingled pity and humiliation and horror upon the unmasked wretch that he had heretofore considered worthy of his love and protection; and with bleeding heart he rejects the satan to welcome the angel. This is a period of temptation wherein evil is overcome and a definite step taken in the development of character.

New-Church Messenger.

The spiritual import and significance of the Master's life and teaching was not wholly apprehended. It was just this failure on the part of the disciples to understand their Lord, that made his death and withdrawal the needed condition of his coming in that secondary and superior sense to which he alluded when he spoke those apparently paradoxical words, "I go away and come again," meaning that he should come to them and to the world in spirit and not in the form; revealing himself as the spirit of truth, the real comforter, the sanctifier, the vast source of grace, the open avenue to the divine realm, whence come all cheering and inspiring influences upon souls, for their spiritual blessing and uplifting.

Now this return of Jesus in this larger and more spiritual sense, to move on the heart in sensible spiritual power, is in part what is meant by the Holy Spirit. It is the influence of the divine upon the human. . . . Christ was now a divine and gracious presence, shedding upon them the inspirations of a spiritual universe. The "Father" was no more a limited and pleasing idea merely, but the all present Love and Law, the Friend and Governor in all time and in all space, and their lives took on a marvelous enlargement and refinement. It was the influence of the Holy Spirit, communicated through the ascended Christ, and bringing them into alliance with the divine. It remains to uplift and bless all who desire its coming and open their hearts for its transforming and healing power.

The Universalist Leader.

THE MAKING OF A MAN.—It is not wealth, nor power, nor fame, nor learning that makes a man. These may aid when properly used. But with them all one would be weak and comparatively worthless without righteousness. Does not the Bible say, "There is none righteous"? The verdict that human nature is bad is almost unanimous among thinkers. . . . We are not so much concerned to know how men became bad as we are to find out how they may become good. Nearly all men wish to be pure and right and good in word, thought, and deed. But something within as well as something without hinders. There is something in the will, in the desires, in the affections, in the conscience, that rises up in opposition to every noble and pure impulse and purpose. . . . It is the glory of Christianity that it is able to make bad men good. . . . A bad man may be made good. An evil heart may be made pure. A wicked sinner may become righteous. . . . Out of the heart are the issues of life. So long as its affections are fixed in the marshy and stagnant pools of worldly pleasure and sin, currents of sin and death will flow out through every avenue of our being. The thoughts, the affections, the words, the life, will be evil. But when the heart is given to God, His love His truth, His peace, His righteousness will flow into our souls and through us into the life we lead.—*The Christian Advocate.*

You will not get men to love their enemies merely by repeating Christ's command. You will get it only as you have in your midst men who have made Israel's passion for righteousness their own passion, who hear in the valiant words of old only the splendid utterance of what God is rehearsing straight to them, and who call to their fellow-men not, "Hear what the Lord said to Israel!" but "Hear what the Lord saith to you and me!" You will have the Gospel a living power to-day not by any parrot repetition of the exact words of Christ, backed by his external authority, but by having in your midst men who in a measure have come to share Christ's faith and purpose, and who make his words seem but the command of your own best conscience and love, which to every man, when he hears it, is the very voice of the Living God.

The Universalist Leader.

Every soul should have a lofty, secluded place in life's mansion where it may see into the heart of things and receive the transfiguring influences of the Divine Spirit. To make the new year truly and gloriously new nothing will help us so much as this. Newness consists not in change of place or of outward surroundings or even of the years, but in the coming into the soul of new motives, fresh aspirations and inspirations, and stronger faith, loftier courage, more jubilant hope. These, begotten by the divine redemptive life ever in the world, come from habitual communion with high thoughts and with the living Christ.

The Examiner.

Shrinkage in the number of theological students seems to be general. It is seen in this country in all the better-known Protestant sects. It is seen in Scotland among the Presbyterians, and recent statistics from Germany show a striking falling off in the number of Lutheran students of divinity, there being twenty per cent less now than five years ago. Of seventeen Protestant theological faculties, only three show an increase of students—Tübingen, Königsberg, and Bonn. Berlin, where Harnack teaches, which in 1897 had 376 students, now has only 287.

The Congregationalist and Christian World.

God will not be hurried. The building of a Christlike character is not work for a day. Experience cannot be acquired without experiment. It is not innocence God has in view for us, but growth by overcoming. Patience must have her perfect work. Triumph now would be premature and petty; but the way of faith and patience is the way that leads to victory which shall be part and parcel of the final glorious triumph of the Son of Man.

ISAAC O. RANKIN.

Until you have learned to control your thoughts you will never be able to live a godly and righteous life. As a man thinketh in his heart, so is he; and it is because the thoughts that we entertain in the hostelry of the soul are such worthless and vain ones that our words and acts often bring so heavy a disgrace on the name we love.

F. B. MEYER.

There is no hope for the world but in a divine Saviour, proclaimed divine by men and women whose lives reflect the beauty, charity, and helpfulness of Him whose they are and whom they serve. All that Christianity needs for the rapid and permanent conquest of the world is a real likeness to Christ in the person of every Christian.

The Christian Advocate.

The idea that many have that they can slip along in any way, and that things will come out well for them; that by some lucky chance they are to gain heaven and a crown, finds no analogy in nature or in any other department of human activity.

REV. V. E. TOMLINSON.

A man cannot be morally victorious who has to be propped up from the outside. The victory must come from the inside; and nobody can put the power there but God himself.—*The Standard.*

God has so arranged the chronometry of our spirits that there shall be thousands of silent moments between the striking hours.

MARTINEAU.

The northernmost church on this continent is the church at Nome, Alaska, on the edge of the Arctic Circle, built and paid for by the people of that mining town.

When I want to speak let me think first, Is it true? Is it necessary? If not, let it be left unsaid.—MALTBIE D. BABCOCK.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each, twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL: 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Christian Science Sentinel

(THE CHRISTIAN SCIENCE WEEKLY.)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

General Delarey, the Boer commander, has, within the past few weeks, achieved two notable victories over the British forces. His first victory was the capture of Von Donop's convoy, when the British loss in killed, wounded, and prisoners amounted to 632. On March 8 he surprised General Lord Methuen who, it was supposed, was marching to avenge the capture of the Von Donop convoy. General Methuen was wounded and taken prisoner. The total loss in killed, wounded, and prisoners was 320, besides guns, ammunition, wagons, etc. The war secretary, Mr. Brodrick, stated that Lord Kitchener would be given all the assistance he asked for. Six thousand yeomanry would be immediately embarked with large drafts of cavalry and infantry.

Prince Henry of Prussia sailed for Germany on the Deutschland March 11. Prior to his departure farewell telegrams were exchanged between the Prince and President Roosevelt. Cablegrams have also been exchanged between President Roosevelt and Emperor William relative to Prince Henry's visit.

Immediately upon his return from the United States Prince Henry will assume command of the largest naval squadron ever formed under the German flag. In a short time he will depart for Cadiz to represent the German Emperor at the coronation of King Alfonso. He will then proceed to England for the coronation of King Edward VII.

Prince Konoye, president of the Japanese House of Peers, says that Japan will never consent to a Russian Manchuria. She favors the construction of the Trans-Manchurian railway and would not object to Russia's guarding the railway with troops to prevent attacks by the natives, but Russia's great territorial army on Chinese soil must be removed at once. The province of Manchuria, he says, must be kept entirely under Chinese control, not only because of its mineral and other wealth, but also because it is the birthplace of the present Chinese Dynasty. He believes that Chinese possession is necessary to the maintenance and continuance of the present Chinese Government.

A writer in the *New York Observer* says: The vastness of Texas overwhelms one. I trust my note-book does not mislead in the following statement taken down during a speech by a well-known Texas minister at one of the popular meetings: "Divide Texas into square mile strips. Lay these squares out in a straight line. Put a man on a broncho at one end. Let him ride seven days a week, seven hours a day, averaging twenty-seven miles a day. It will take him thirty-two years of steady riding to get to the other end of Texas."

The Chinese Government has presented to Mr. Conger, the United States minister at Pekin, a strong memorial against the re-enactment of the Chinese exclusion law by the United States. Special objection is made to the exclusion of Chinese from the Philippine and Hawaiian Islands, as the Chinese have acquired extensive commercial interests there, and are closely connected with the islands by family ties. For this reason the repression of free intercourse would result in peculiar hardships.

The American legation at Constantinople has presented to the Porte the second note referring to the capture of Miss Ellen M. Stone. The note points out that, as Miss Stone was captured, the ransom paid, and the prisoners delivered in Turkey, the brigands must be within the Turkish frontier and should therefore be captured. The first note demanded the punishment of the guilty parties. The Porte in replying repudiated responsibility and denied all liability.

C. F. Sayor, the special agent in charge of the beet-sugar investigations of the Department of Agriculture, says in his annual report that the total production of beet-sugar in the United States last year amounted to 185,000 tons. The production for the preceding year was 77,000 tons. There were thirty-one factories in operation in 1900 and eleven more were started in 1901. Other companies have been organized with a total capitalization of $49,000,000.

The iron workers' strike at San Francisco, which has kept more than three thousand workmen idle since last May, has been declared off by a vote of most of the unions involved. The strike was for eight hours instead of nine, and an increase of wages. It is said that the men go back to work on an understanding that the National Arbitration Committee will arrange a practical working system for all men in the iron trades.

General Wood has been called to Washington to consult with the President and Secretary of War in regard to the necessary steps to be taken for winding up the affairs of the military government in Cuba and the establishment of the Cuban Government. It is believed the transfer of government can be effected by May 1.

A party of Japanese financiers have sailed from Yokohama for Seattle. They will visit the principal cities of the United States and Europe. The party is headed by Count Masayoshi Matsukata, who planned and put into operation the present financial system of Japan. It was largely through his efforts that the country adopted the gold standard.

At a cost of nearly one million dollars the Canadian Pacific will endeavor to reduce the running time from ocean to ocean by at least twenty-four hours. The new limited will be tri-weekly and will have a seventy-two hour schedule between Montreal and Vancouver. The average running time will be 40.3 miles per hour.

The long delayed statue of General William T. Sherman has at last reached New York City. The statue, which is an equestrian figure, was ordered eleven years ago. Fifty-three thousand dollars was raised to meet the expense. The city has not as yet provided a location for it.

John D. Long, Secretary of the Navy, has sent a letter to President Roosevelt resigning his portfolio, the resignation to take effect May 1. The President has asked Congressman William H. Moody of Haverhill, Mass., to accept the position, and he has done so.

One hundred Free Masons, now in Jerusalem, and representing every grand lodge in North America, will hold a Masonic meeting at King Solomon's quarries under the auspices of the Royal Solomon Mother Lodge of Jerusalem.

It is stated that numerous railroads are to be constructed in Asiatic Turkey, one of which will run through the Euphrates valley from end to end. The new roads will follow the old caravan routes and will touch all the principal cities and towns of Bibleland.

King Edward's coronation robe will be of cloth of gold. The material, which will be specially woven, will contain a smaller portion of alloy than gold coinage. It has been said that it will be "as bright as a golden cloud."

Beaumont, Texas, has been known as an oil town but little more than a year. Within that time one hundred and thirty-six wells have been developed. The actual output of oil for the year is estimated at 5,086,000 barrels.

The diplomatic and consular appropriation bill, as presented by the House Committee on Foreign Affairs, carries about $1,900,000. Included in this amount is an appropriation of $60,000 for a new legation building at Pekin.

An imperial Chinese edict has been issued which prohibits the binding of feet in the entire Chinese kingdom. The order has been made so sweeping as to include the thousands of Chinese in Honolulu.

The war in South Africa cost the British Government $305,350,000 the past year. The present expenses are about $22,500,000 per month. January 1 there were 237,800 British troops in South Africa.

Attorney-General Douglas of Minnesota has appealed to Congress in the Northern Securities case. He hopes to secure action whereby the State can reach the Northern Securities Company.

The Czar has authorized the city of St. Petersburg to raise thirty million roubles on a loan for various municipal improvements, including the extension of the telephone system.

The important Spanish newspapers are discussing the possibility of prolonging the regency, owing to the incapacity of King Alfonso to exercise the functions of a sovereign.

The Union Pacific Railroad will build a three story club house at Cheyenne, Wyo., for its employes. The building will cost between sixty and one hundred thousand dollars.

General Booth, the leader of the Salvation Army, has inaugurated a special temperance campaign as a feature of the work of the Salvation Army during the present year.

For the fourth time the House has passed a resolution favoring an amendment to the Constitution providing for the election of United States Senators by popular vote.

Portuguese Government troops recently attacked the slave traders near Pemba Bay, Portuguese East Africa, and after a hard fight liberated seven hundred slaves.

A despatch from Rome states that the American colony there will present statues of Longfellow and Hawthorne to the city.

Since March 14, 1900, 878 national banks have been organized. Last month there was an average of one bank organized daily.

President Roosevelt has signed the bill creating a permanent Census Bureau.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

The Lectures.

At St. Louis, Mo.

A large audience listened last night (February 28) to the lecture of Edward A. Kimball of Chicago, on "The Cause and Scientific Cure of Disease." Every seat in the lower part of the house was taken and the balcony was more than half filled. Mr. Kimball was given close attention throughout, many in the audience hearing for the first time of the nature of Christian Science. He was introduced by James A. Logwood of First Church of Christ, Scientist, in this city.—*St. Louis Globe-Democrat.*

The introductory remarks of Mr. Logwood were as follows:—

Ladies and Gentlemen:—I have been accorded the pleasure of introducing the lecturer this evening, and in behalf of First Church of Christ, Scientist, in St. Louis, under whose auspices the lecture is given, I extend to you, one and all, a most loving and hearty greeting.

The subject which has brought together this large and intelligent audience is one of vital interest to every man, woman, and child; for it concerns the health, the morals, the peace, the life, the eternal destiny of man.

About seven hundred years before the Christian era the Prophet Isaiah said, "Unto us a child is born, unto us a son is given: and the government shall be upon his shoulder. . . . Of the increase of his government and peace there shall be no end." This prophecy was fulfilled in the flesh in the man Christ Jesus, who in recognition of its eternality and truth said, "Before Abraham was, I am," and "lo, I am with you alway, even unto the end of the world."

Jesus' mission was explained, to some extent, in his answer to John's inquiry, "Art thou he that should come, or do we look for another?" He answered, "Go and show John again those things which ye do hear and see: The blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them." He also said, "He that believeth on me, the works that I do shall he do also," and in explanation of how this should be done he said, "ye shall know the truth, and the truth shall make you free."

Finally, he said: "It is expedient for you that I go away: for if I go not away, the Comforter will not come unto you." "But the Comforter, which is the Holy Ghost, whom the Father will send in my name, he shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you." We believe that Christian Science has revealed to us this Comforter, this Truth, which, when understood, makes men free, not only from sin, but from all its evil consequences.

Our beloved Leader, Mrs. Eddy, in one of her writings, admonishes the followers of Christian Science in these words: "O Christian Scientist, thou of the church of the new-born; awake to a higher and holier love for God and man; put on the whole armor of Truth; rejoice in hope; be patient in tribulation,—that ye may go to the bed of anguish, and look upon this dream of life in matter, girt with a higher sense of Omnipotence; and behold once again the power of divine Life and Love to heal and reinstate man in God's own image and likeness, having 'one Lord, one faith, one baptism'" (People's Idea of God).

Friends, I trust you will not expect to learn all there is to be known about Christian Science in one evening's lecture, for the subject is infinite. The purpose of these lectures is to destroy some of the erroneous beliefs concerning the teachings of Christian Science, and to touch somewhat upon its more practical features.

Ladies and gentlemen, I now have the pleasure of introducing to you Edward A. Kimball, C.S.D., of Chicago, member of the official Board of Lectureship of The First Church of Christ, Scientist, in Boston, who will speak to you on the subject "The Cause and Scientific Cure of Disease."—*Correspondence.*

At St. Paul, Minn.

Sunday afternoon, February 23, Edward A. Kimball, C.S.D., of Chicago, lectured to a full house (two thousand people) at the Grand Opera House, St. Paul, Minn., under the auspices of First Church of Christ, Scientist, this being their fourth lecture since the establishment of the Christian Science Board of Lectureship. He was introduced by the Rev. Henry B. Taylor, of St. Paul's Universalist Church, in the following very appropriate remarks.

Ladies and Gentlemen:—It will, perhaps, surprise some of you that I, who am not a Christian Scientist, should introduce the speaker of the afternoon. There is a courtesy deeper than that which comes out of our agreements. Time was when Theodore Parker, the great preacher of Unitarianism, was chief heretic of Boston. Dr. Channing greatly disagreed with some of his views, yet he invited Parker to use his pulpit. When fearful members of Dr. Channing's congregation protested that the heresies of Parker were dangerous, Channing stood by his belief in the freedom of speech and said, "Let the full heart speak." So, whatever our view of the doctrines to be discussed may be, let us say, "Let the full heart speak." So often have the doctrines of my own church suffered in the misrepresentations of honest but misinformed combatants; so often have other doctrines thus suffered, that it has become a rule with me to represent the theology of others in the very words of their advocates. Is not this the fairest way? It is a privilege to hear one who speaks with authority of what Christian Science means. I trust he will speak to open and candid minds who will weigh rationally what the lecturer shall say. If we are to accept wholly what the lecturer brings, let it be with due regard to the laws of reason and evidence. If we cannot accept all that he claims as his faith, may we not hope to take away some good? For my own part, Sunday is a holy day not to be used for mere curiosity, and I shall hope to get some good by coming to this place.

If we can accept none of the speaker's conclusions, we may at least take away a better understanding of what Christian Science is. If in "words easy to be understood" he shall do even this service, we shall thank him.

It is my pleasure to introduce Mr. Edward A. Kimball, who will now address us.—*Correspondence.*

At Sheboygan, Wis.

A large number of people of all walks in life heard Edward A. Kimball lecture on Christian Science in this city yesterday (February 16) afternoon and evening. Mr. Kimball was introduced by Mayor F. A. Dennett in the afternoon and by T. M. Bowler in the evening. He talked to crowded houses at both lectures,—at First Church of Christ, Scientist, in the afternoon, and at Concordia Hall in the evening.—*The Sheboygan* (Wis.) *Telegram.*

Mr. Kimball was introduced in the afternoon by Mayor Dennett as follows:—

Ever since those days of established and dense error, amid which Christianity had its birth, it has struggled onward and westward, assuming aspects so varied and recording contradictions and inconsistencies so remarkable, that the wonder is that the church of to-day is in accord even upon the simplest precepts of Christ.

Fear, indolence, greed, and ignorance have for centuries stifled investigation and put their check upon freedom of thought and expression; but all through the history of Christianity, from the days of the great Apostle Paul down to our own time, God has continually raised up men of divine attributes, who have held above the heads of the blind mass, the true banner of Christ. Many of these have fallen in violence and the blood of the martyrs has continued to be the seed of the church.

While we still observe here and there intolerance apparently deep rooted, the doctrine of free thought and investigation is the spirit of the age. We are no longer chained to the wheels of superstition and fear, and as we emerge into the light, we demand more light,—light to understand better, in the name of Christ, the good of mankind.

It is with this intent that we welcome students and teachers of Christian Philosophy and give to them a conscientious hearing. We are not always convinced; but, eager for the truth, we are always glad to come upon that which appeals to our reason and our conscience. It is a most fortuitous circumstance that has brought to us upon this occasion, a gentleman of wide and favorable reputation as a lecturer upon a most vital topic; and I take great pleasure in introducing to my fellow-citizens—to my friends and neighbors—Mr. Edward A. Kimball of Chicago, who will address you upon the subject "The Promises of Science and their Fulfilment."

The introduction of the evening by Attorney T. M. Bowler follows:—

Ladies and Gentlemen:—I wish to state at the outset that I am not a believer in Christian Science, but the remarkable progress Christian Science has made in the world during the past ten years indicates to us who are unbelievers, that there must be something in it worthy the consideration of every thinking man and woman. With Christianity in the abstract we have most of us been familiar since our childhood days; but with Christianity as a Science, and as it will be defined to you this evening by this distinguished lecturer, I venture to think that many of you here are in utter ignorance.

The truth about any doctrine is always more or less of an interesting subject; but the truth of the great Scientific proposition which even now at the beginning of the twentieth century is receiving so much public attention, cannot fail to interest many here present.

Free investigation into the working of any doctrine or religious organization is always a matter of right, and is a right recognized by every man and woman in this country, as no one can be expected to believe in a thing until that thing has been fully explained to him by one who understands it.

For the purpose of having Christian Science fully explained, I have the pleasure of being called upon this evening to introduce to you a speaker who is a man of national reputation, and one of the foremost in the ranks of Science workers. He is a member of the Christian Science Board of Lectureship, a teacher in the Massachusetts Metaphysical College at Boston, Mass., and an authorized lecturer of the church.

I take great pleasure in introducing to you Mr. Edward A. Kimball of Chicago.

At Toledo, O.

A vast audience crowded the auditorium of First Church of Christ, Scientist, last evening (March 6), to listen to the address on Christian Science by Edward A. Kimball, C.S.D., of Chicago. The audience was not confined alone to followers of the faith, and the many complimentary remarks which were heard of Mr. Kimball is sufficient evidence of the excellence of his address. He handled his subject in an intelligent and masterly manner, and held the interest of his listeners throughout.

Mrs. Annie M. Knott, C.S.D., of Detroit, was also present and, in very sincere and appropriate words, introduced this distinguished lecturer, although he is now no stranger to Toledo audiences, this being his fourth lecture in this city.—*Toledo* (O.) *Times.*

Mrs. Knott's introduction was as follows:—

When requested by your First Reader, Miss Sarah J. Clark, to introduce to you Mr. Kimball,—a gentleman better known to you than I am,—it seemed that the task was superfluous; but because of the great pleasure and help which I expected to receive from the lecture, I gladly consented. No urging is ever needed to call forward a Christian Scientist to the hearty support of a Cause so dear to every one who has felt the healing power of Truth. We realize that the time has come when the world at large should know what splendid contributions are being made both to Science and religion by Christian Science.

What is known as natural Science has done much in the century just closed in teaching the necessity for order and continuity throughout the entire universe. Christian Science goes further. It reveals the mind which is expressed in perfect law and order and it prepares men for the proper study of Science by teaching them first of all the Science of their own being.

After seventeen years of work in Christian Science I begin to appreciate in a larger measure the majesty of this revelation,—the unparalleled task of the heroic woman who gave to a needy world our text-book, "Science and Health with Key to the Scriptures," and who, regardless of either the fear or favor of the world, has kept it "on the height and in the light." Those who have gone down into the depths of its teachings and climbed its heights, are led to say with Browning:—

I spoke as I saw.
I report as a man may of God's work: All's love, yet all's law.—
Now I lay down the judgeship he lent me. Each faculty tasked
To perceive Him has gained an abyss, where a dewdrop was asked.

I have the pleasure of introducing to you Mr. Edward A. Kimball of Chicago, member of the Christian Science Board of Lectureship, of the Mother Church, The First Church of Christ, Scientist, of Boston, Mass.

Correspondence.

At Ashland, Ore.

Christian Science had a hearing before the Ashland public, Friday evening, (February 21), at Chautauqua Tabernacle, when its believers kindly favored a good audience with an opportunity of hearing one of their authorized lecturers,—Judge William G. Ewing of Chicago. The speaker was introduced by Ex-District Attorney C. B. Watson.

Judge Ewing is a very scholarly man, and his remarks were made in chaste and pleasing language. No one left

Digitized by Google

the audience, and the Judge had the undivided attention of his listeners.—*Valley Record*, Ashland, Ore.

The introductory remarks of Mr. Watson were in part as follows:—

One of the strongest proofs of evolutionary progress in the intellectual as well as in the material world is the tendency of man toward psychological investigation. In his effort to understand himself, he is naturally attracted by his own consciousness; his ability to speculate on the mystery of his being; his desire to know the whence and the whither, the why and the wherefore of himself. An intelligent prosecution of such a study produces startling results, each successive effort opening a new vista to him, and each vista the gateway to still another, opening and broadening the view at each successive step, and strengthening the ability to see and examine new fields and make further investigations.

No one man can make extended investigations in all directions, hence we find specialists, and in every-day life we have use for them. If we seek information in a special line, our best source for such information is with the learned specialist in that direction.

Departures, in whatever direction, will find interest in the eyes of somebody. We are enjoying the age of easy divorce from dogma and intolerance. Any school, sect, denomination, or effort that ruptures the lines of error and ignorance will sow some good seed, the enjoyment of which will come in the harvest-time.

Self-respect, as well as courtesy and charity, demand tolerance of the opinions of others and a kindly ear for the doctrines of him who comes armed and equipped with honorable mention and a respectable following.

I have the pleasure of introducing to you the Hon. William G. Ewing of Chicago, who comes as a leader of Christian Science and a learned expounder of its doctrines. Whether we agree with or differ from him, we may learn by listening to him.—*Correspondence.*

At Tacoma, Wash.

Judge William G. Ewing of Chicago addressed a large audience at the Lyceum Theatre last night (February 27), taking as his subject, "Christian Science: Physician and Redeemer."

The distinguished speaker was introduced by Clarence C. Eaton, C.S.B., recently of Minneapolis, First Reader of the local Christian Science Church. Mr. Eaton said in part:—

Christian Science renews with special emphasis to this age that memorable invitation and promise of the great Scientist and teacher of Nazareth, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." It proclaims anew and with signs following, the healing gospel of Love and "on earth peace, good-will toward men." I am fully aware, and I know many of you are also aware, that it will not be possible in the hour or so in which our esteemed guest may speak to us, to give more than a brief epitome of the teaching and practice of so vast a subject as is Christian Science, but whatever he may be prompted to say to us, will be not only out of the depth of his own rich experience, but as an authorized member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., and I bespeak for him your thoughtful consideration and earnest attention.—*Tacoma* (Wash.) *News.*

At Oakland, Cal.

First Church of Christ, Scientist, in this city, was crowded to the limit of its capacity last evening (February 18), while many were unable to gain admission, to hear Judge William G. Ewing of Chicago, lecture on Christian Science.

The lecturer was introduced by Dr. F. J. Fluno, First Reader of the local Church, who spoke as follows:—

Christian Science is in our midst. It is a subject of much discussion among thinking people everywhere. Some think it one thing and some another. Some think it good, and some evil. Some are disposed to say there is some good in it—others that there is no good at all. Some are disposed to look upon it favorably and kindly, and others very unfavorably and very unkindly. Some think it is of God possibly; others that it is the work of the devil.

These are but differing phases of belief and opinion concerning it, but to those who are making it a study and have gained somewhat of the understanding and are able to demonstrate it in a small way—to those it is the power of God, unto salvation.

It brings on its pinions nothing but love and good-will to man,—the same old story the angels told to the listening shepherds in the valleys of Palestine nineteen hundred years ago.—*Oakland* (Cal.) *Times.*

At Columbus, O.

An audience of one thousand or more listened attentively to the lecture by Edward A. Kimball, C.S.D., of Chicago, at the Board of Trade, March 2. Mr. William O. Henderson, of the law firm of Harrison, Olds, Henderson, and Harrison, introduced the lecturer as follows:—

The lecture to-day is another of the series of free public lectures given under the auspices of First Church of Christ, Scientist, Columbus, with the object of spreading, in this community, a wider and better knowledge of the doctrines of Christian Science. To most, and perhaps all of you, the lecturer scarcely needs an introduction. His prominence on the Christian Science Board of Lectureship, his large educational and practical experience in every department of Christian Science, and his established position as a platform orator enable him to speak authoritatively and entertainingly on the subject on which he will now address you. It is my pleasure to introduce to you Mr. Edward A. Kimball of Chicago, who will speak on "The Cause and Scientific Cure of Disease."—*Correspondence.*

Among the Churches.

At Nebraska City, Neb.

Having always greatly enjoyed the reports of progress in different localities sent in by the churches, we have long felt that this church should contribute its share in return, realizing that with giving goes a double blessing, blessing both those who give and those who receive, and that our own measure of good is doubled thereby.

While our growth in numbers has not been large, we wish gratefully to acknowledge that we have much to be thankful for, that as individuals and as a church we are growing in the understanding of the ever-presence of the mind of Christ and learning to look to this as our guide and support. Christian Science was first introduced to Nebraska City about sixteen years ago, when, as the result of some good healing done by a Christian Scientist from a neighboring town, a little band of some five or six of our citizens were led to investigate this Truth and soon had class teaching. They immediately began holding meetings, and with patient courage have continued them ever since, first meeting at the homes of the different members, afterward going to a public hall.

In 1898, Christian Science was planted in a permanently organized church known as First Church of Christ, Scientist, with a charter membership of seventeen. There

Digitized by Google

have since been added fifteen members. A number of these having moved away, our present membership is nineteen.

We have a Sunday School of eight boys and girls. This was started less than a year ago. The children are in earnest and desirous of helping in every way they can. Through the hands of a committee on distribution of literature a large number of our publications find their way to others. The members contributing their Journals and Sentinels for this purpose, keep the depot, hotels, and jail supplied. Two copies of Science and Health, one of "Miscellaneous Writings," The *Journal* and *Sentinel* are in our public library. We are now arranging for our second lecture to be given by Judge Ewing.

ANNIE JESSEN, *Clerk.*

At Cotuit, Mass.

The work in Cotuit, Mass., was begun, as is often the case, by two students going through the lessons in a private residence. It gradually gained in numbers until the parlor was too small to accommodate the attendants. A society was formed in 1897, and a small building known as Central Hall was engaged for services.

In May, 1899, First Church of Christ, Scientist, Cotuit, was incorporated by seven students. In June, 1900, a lecture was given by Rev. Irving C. Tomlinson in Freedom Hall, which was the means of correcting many misconceptions relative to Christian Science. The church opened a reading room soon after the order was given.

This church has placed in our public library two copies of "Science and Health with Key to the Scriptures," "Miscellaneous Writings," and other works of Mary Baker G. Eddy, besides subscribing yearly for the *Journal* and *Sentinel* for the same. Our text-book has also been placed in the almshouse of the town of Barnstable, of which Cotuit is a part, and in the county jail with the *Sentinel* for the present year. The church and its members (seventeen in number) are continually distributing the literature. The report of our treasurer at the annual meeting held January 5, 1902, showed all bills paid for the year 1901 with a surplus, thus making it possible for us to send our third contribution to the Mother Church.

Last year on the Sunday preceding Memorial Day the Methodist and Congregational Churches made arrangements for a union service, and our Church received a cordial invitation to join them, which we gladly accepted. It was requested that the First Reader take part in the service, which she did by reading 1 Corinthians, 13.

One year ago we had a building fund of about one hundred and fifty dollars. Since then a building lot has been presented to us by a Christian Scientist (not a member of our church), and subscriptions have been received sufficient to warrant our starting work on the building which will be the home of First Church of Christ, Scientist, Cotuit.

CARRIE A. PARKER, Osterville, Mass.

At Firth, Neb.

As a band of Christian Scientists we wish to add our mite to the long list of those who have been healed physically and spiritually through the understanding of Scientific Christianity as revealed in Christian Science. Five years ago two women began the study of Science and Health and the *Quarterly*. Then our number increased to seven. In June, 1900, we met, with a charter membership of fourteen. Four days later we raised $256 toward a fund for a building. Ten days later we had stone for the foundation on a lot fifty by seventy feet, which had been deeded to us as a gift. We employed a mason and on the eighteenth of November, five months later, we were worshiping God under our own "vine and fig-tree." Our building is twenty-four feet by thirty. We expect to be able to dedicate our home in the near future. Our Wednesday evening attendance is from twenty to twenty-five. Many beautiful demonstrations are told which increase our faith in Truth and Love. Our pathway has been rugged and oftentimes discouragements have beset us; but "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494, Rev. Ed.).

A. V. LOSEE, Firth, Neb.

Annual Meeting at Utica, N. Y.

The seventh annual meeting of First Church of Christ, Scientist, was held in the Auditorium last evening (March 4). There was a large attendance of members of the church and congregation. The reports of the various officers showed the affairs of the church to be in a prosperous condition, both spiritually and financially. The treasurer reported all expenses met and a nice balance on hand. A substantial growth in the church building fund was also reported. Seventeen persons have united with the church during the year. The number of people attending the Sunday services and Wednesday evening experience meetings is steadily increasing and nearly fills the main floor of the Auditorium. The progress made in the Sunday School is quite marked, a number of additional classes having been formed since the last report. A prominent branch of the church work is that of the reading room, which is open to the public every day excepting Sunday. Here all Christian Science publications may be found.

Utica (N. Y.) *Press.*

At Greenville, Mich.

In January, 1901, we organized as First Church of Christ, Scientist, with ten charter members, and at our last communion three names were added. Our church has prospered during the past year, and we have been able to meet all the expenses.

Our attendance has been small, but divine Love has met all our needs. We have started a lecture fund and trust that a lecture will disarm much of the prejudice held against Christian Science. Thus we are striving to sow the seed and we know that the power of Love will be manifested through righteousness and self-denial.

ROBERT DOLLEY, *Clerk.*

To-day.

BY F. W. B.

IT is always to-day;
We fear lest the coming to-morrow
Will bring us some burden of sorrow;
But it comes not to-day.

It is always to-day;
At the yesterday's blunders we fret,
And forget that 'tis idle regret,
For they touch not to-day.

It is always to-day;
We have strength for it always; and fear
And regret have no place with us here
In God's blessed to-day.

Dr. John Henry Barrows, president of Oberlin College, in his lecture on "The Universal Recognition of the Divine," says: "Prehistoric men had their idols and their beliefs in the life beyond. Religion is something that springs up within him. Man may call God by a hundred names, but they cannot get permanently away from the Infinite Spirit."

No true work since the world began was ever wasted; no true life since the world began has ever failed.

SAMUEL SMITH HARRIS.

Our Companions.

No man is ever absolutely alone. In the deserts every man is accompanied by his own past. So long as memory, which makes a man contemporary with his past and makes the past a part of the present, and imagination, which projects the past into the future with all manner of new combinations, exist, no man can be in absolute solitude. Temptation comes to a man as searchingly, and sometimes even more overpoweringly, in solitude than in a crowd. Solitary as every man sometimes feels himself to be, detached and lonely, lost in a crowd of other personalities like his own, no real solitude is possible; so long as men stand in relations to the world, to one another, and to God they must always be in company.

In the sight of the Infinite it is always present; there is no past or future, and they who have gone before in the long generations of the dead, and they who are to come after, with the men and women of to-day, constitute one innumerable, unbroken company. This sublime fact, the glorious incarnation of the idea of immortality, is rarely realized by men, but it exists as a fact in their lives, if not in their consciousness. Sir Philip Sidney, the image of all nobleness, said, "They are never alone that are accompanied with noble thoughts." This is the beautiful and impressive side of the picture; there is another and darker side; he might have added, "They are never alone who are accompanied by evil thoughts." But, to put it more accurately, no man is ever alone so long as thoughts, good or evil, noble or debasing, accompany him. He is not solitary; and since every man must think, and to every man, however isolated, thoughts come and go in countless troops and in unbroken succession, no man is ever without company.

The real question is, "What kind of company shall he keep?" That depends upon what he selects; for, in a very true sense, every man creates his own world. Every man is born into a vast workshop full of materials and tools. His business in life is to select the material upon which and the tools with which he shall work; and then, out of his own imagination, he fashions his world, and, as the product of what he thinks and does and feels, that world passes out of the realm of the imagination into reality, and becomes his world. So every man creates his companionship according to his thought. If his thought is fine and generous and high, he is in the best company and the most inspiring; if it is mean and low and vile, no matter what deserts surround him, he is in base and vile and ignoble fellowship; it is a matter of character. Companionship does not depend upon accident, but upon selection. Every man makes his own friends; and it is this fact which gives the profounder truth to the old proverb, "A man is known by the company he keeps."—*The Outlook.*

Truth's Piercing Light.

BY LOUISE LITZSINGER.

FORTH from the Sun of Righteousness,
One bright, celestial ray
Pierced through the clouds of darkest night,
And found me where I lay
Sad and dismay'd,—yea, in the tomb
Of coldness and despair.
It warmed my heart to life and hope,
It breathed in sacred air,
Sweet gospel melodies that told
Of Heaven nigh at hand,
And now, as one by one the clouds
Disperse at Love's command,
The radiance of the Life divine
Lights up mine onward way;
And Christ is gently leading on
"Unto the perfect day.."

Notices.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church, including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Lesson Sermons.

WE have received requests for the republication of the editorial contained in *The Christian Science Journal* for May, 1899, explaining the scope and construction of the Lesson-Sermons as they are prepared by the Lesson Committee and published in the *Christian Science Quarterly*. One of these requests gives as a reason for making the same, that many persons have become interested in and affiliated with Christian Science since the publication of this article in the *Journal* and *Sentinel*, and that such explanation having proved helpful to the students at the time of its publication, will prove equally helpful to the more recent students.

In compliance with these requests, therefore, we take pleasure in republishing the article.

THE LESSON SERMONS.

Although published as editorial matter, the articles which appeared in recent issues of the *Christian Science Sentinel* under the head of "The Christian Science Sermon," were written by a member of the Bible Lesson Committee. They were written, therefore, from an intelligent standpoint. The writer spoke with a knowledge born of experience in the preparation of the lessons, a careful study of their purpose, their method, their construction, and their spirit. The members of this committee, next to our Leader, are better able than others to point out these elements of the lessons, and we are glad to have had the privilege of presenting this series of helps to the Field. All must have profited by their perusal. If any have thus far failed to do so, they would do well to lose no further time. This is especially true of the Readers. Having familiarized themselves with the plan and order of arrangement of the lessons, they are better fitted to perform their function as instruments for voicing the healing Truth contained therein.

There is no more effective way of teaching the Word than by means of these sermons. They bring in review the spiritual import of Scripture in its entirety. Its content from Genesis to Revelation, is expounded. These sermons supply a Scriptural exegesis which the world needs, and for which the world has long been looking.

No attentive, sincere student, or earnest listener, whether Scientist or non-Scientist, can hear or read the alternate passages from the Bible and "Science and Health with Key to the Scriptures," without seeing the unity of the two. Their inter-relation is unmistakable. Even their letter, though differing in phraseology, is the same in meaning; and in their spirit their oneness is plainly discernible. The unbiased student of these compilations will, soon or late, admit that if the Bible, in its spiritual essence, is an inspired book, the Christian Science text-book, in its interpretation thereof, is inspired also.

The inspiration, or otherwise, of sermons may fairly be judged of by the good they do.

The Christian Science ground is that salvation includes good health as well as good morals; that there must be a saving from sickness as well as sin; that there must be a redemption from all dis-ease and discord, not through the portals of the grave, but through the "triumphal arch of immortality" (Science and Health)—that is, through Life.

Any sermons that fail thus to teach, fall short of the sermonizing taught and practised by Jesus. On this ground, Christian Scientists sincerely invite comparison of their sermons and the results thereof with those of other systems.

The Truth contained in the Christian Science sermons, *fully assimilated,* will destroy alike sin, sickness, and death.

These sermons further illustrate that the Christian Science text-book is truly textual. It is not a book which can be read as a story-book or continuous tale. Each paragraph, often each sentence, is a study in itself, for it states an infinite truth, an eternal fact, that has in it the very essence of Life.

Let us, then, with renewed energy and increased assurance, continue our God-inspired work, regardless of opposition, or ridicule. Let us *prove* the efficacy of Life and the power of Love.

I.

THE MAKERS OF THE SERMON.

The Christian Science pulpits are now teaching of God in God's way. The sermons from Sunday to Sunday in these pulpits are "undivorced from Truth, uncontaminated and unfettered by human hypotheses, and *authorized* by Christ," as the introductory note truly affirms. The word spoken by God through Paul for his day, is God's word for this day. "Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ." That the Christian Science sermons are after Christ is plain, since "The Bible and the Christian Science text-book are our only preachers."

The Maker of the Christian Science sermons is God, for He "made all that was made." Humanly speaking, God's agents do His work. As Christ Jesus said, "My Father worketh hitherto and I work." The subjects for these sermons, as is quite well known, were furnished by our Leader. These subjects cover the essentials of Christianity. As has been observed, they follow the order she was wont to employ in teaching her classes. These subjects are taken by the Bible Lesson committee, who at their regular meetings carefully prepare the sermons. As these discourses are made up wholly of passages from the Bible and the Christian Science text-book, they contain nothing of human opinion; they are devoid of man-made theories. They have no guesses at the future, no conjectures regarding the past, and no rudimentary exhortations about the present. They are free from sensationalism, and they make no effort to please the fancy or foster the pride of mortals.

Paul wrote to the Church at Galatia that to which it were well the Church of Christendom should give earnest heed, "Do I seek to please men? for if I yet pleased men, I should not be the servant of Christ. But I certify you, brethren, that the gospel which was preached of me is not after man. For I neither received it of man, neither was I taught it, but by the revelation of Jesus Christ." Adapted to the present situation, this message reads, Christian Science sermons seek not to please men: for a preacher who seeks to please men is not the servant of Christ. The gospel preached from our pulpits is not after man, neither was it taught of man, but by the revelation of Jesus Christ.

These sermons contain the word of God unmixed with human error. They voice the eternal fact concerning the everlasting Truth. They set forth the realities of being, they inform, instruct, and enlighten concerning the verities of God and man. How do we prove these affirmations? By the test of Jesus: "Wherefore by their fruits ye shall know them." A sermon without fruits, without healing, is a barren fig-tree. Mere human opinion has no healing. It is the word of God which heals, for it is written, "He sent His word and healed them." These sermons in more than four hundred Christian Science congregations have healed

Digitized by Google

and are healing their thousands. As James says of faith, to the Church of his day, so God says to the Church of this day, "If it hath not works, is dead, being alone. Yea, a man may say, Thou hast faith, and I have works; shew me thy faith without thy works, and I will shew thee my faith by my works."

II.

THE MAKE-UP OF THE SERMON.

By the make-up of the sermon is meant the manner and the method of its construction or composition. As Truth is infinite, and as our subjects are of the Truth, it is readily seen that each subject may be treated an indefinite number of times and each time be practically a new sermon. By this, it is not meant that no sentence contained in a former sermon will be repeated, but because of its use in an entirely different connection, it will possess new meaning and throw new light upon a never-ending theme.

While the makers of the sermon seek to avoid the oft repetition of favorite texts from the Bible and passages from Science and Health, a student could make no greater mistake than to object to the use of such Scripture because contained in some previous sermon. Illuminated by its new surroundings, it has become a new gem, even as precious stones under changing lights become transformed.

The character of each sermon is largely determined by the purpose in view. The end which is to be accomplished will guide the selection of the proper passages. In the first sermon on God, the purpose was to show the true thought of God as revealed by the Scriptures. In the second sermon, the purpose was to show how the Heavenly Father is to be understood. A third sermon might show what is meant by God as Principle, and thus new light would be continually coming to the same grand theme.

So much for the sermon as a whole. Each sermon also has its parts or sections, I., II., III., etc. As all have observed, each of these parts deals with some one special phase of the subject under consideration, and each part helps to make the whole understood; even as head, trunk, and limbs, as parts of the whole body, have their special functions, and minister in their special ways to the whole, so do the various parts of the sermon have their special uses, perform their special functions, and minister in their special ways to the whole subject. In the first sermon on God, it will be remembered that the sections brought out the thought of God, first as Creator, second as Principle, etc.; each section unfolding more of the divine nature, and each part ministering to the whole subject.

The use of the Bible texts is threefold. First.—It may give an exact definition of the subject. As in the sermon on God, in Section VIII., which treats of God as Love, the Bible text affirms that God is Love. Second.—The Bible text may contain a statement which Science and Health unfolds. In the sermon on Soul, one of the Psalms is quoted as saying, "Bless the Lord, O my Soul." The correlative passages from our text-book show that the Bible uses the word Soul in two meanings: first, it is applied to Deity; next, where it refers to the Spiritual sense; third, the Bible text may be figurative or symbolic, which the parallel passages from its Key will make plain. An excellent illustration of this is to be found in the sermon on Man, for February 26, 1899. Section III. treats of the false testimony of the five material senses regarding man. The Bible text is from Ezekiel, 14 : 1–6, and at first glance there might appear to be no connection between this text and the explanatory passages from Science and Health. Study, however, reveals that the "idols," which the prophet describes as stumbling-blocks, are the false evidences, the lying testimony, of material sense. Thus does the energizing spirit of Christ-Truth cause the dry bones to live.

It may be asked, why the sections are not named, so that the student may readily tell what the sections contain. First, because each student should do his own work, the requisite study to discern the contents of the section is part of the preparation for understanding and for reading that section; again, the proper naming of the sections is at best a matter of human opinion, and human opinion begets discussion, and sometimes controversy; finally, the introductory note affirms that the Christian Science sermon is "uncontaminated and unfettered by human hypotheses." Composed as it is at present wholly of the Bible and "Science and Health with Key to the Scriptures," this assertion is absolutely true. On the whole, then, it seems wise that the naming of the sections should not be a part of the sermon, but should be the work of each individual.

Study reveals progress in each lesson; there is introduction, body, and conclusion. The first section may affirm the scientific fact regarding the subject, and the following sections in an orderly way explain this fact; or the introduction may hint the reality, and that which follows unfold this hint in Scriptural order, "first the blade, then the ear, then the full corn in the ear." It is seen, also, that each lesson denies the error and affirms the truth regarding the subject. The false teaching is suggested and the true teaching plainly set forth which destroys the false. Through the entire sermon there is the single theme or subject, even as in a grand anthem there is one theme which each note, chord, and harmony unfolds, develops, and strengthens. So each verse and sentence of our sermon echoes and re-echoes the divine Truth which, when heard, gives melody and harmony, and brings the eager listener into tune with the infinite Principle of all harmony.

While it is not to be understood that the Golden Text and Responsive Reading form a part of the sermon, nor that in any sense they form the text of the sermon, as in the former International Lessons, yet they do fulfil their mission. The Golden Text may be said to contain the fundamental thought with which the sermon deals. It is a general statement of Truth which the sermon elaborates. The responsive reading, while entirely separate from the sermon, deals with the same subject. While no part of the temple (sermon), it may be called the stairway which leads to the temple, warning the worshiper that he is drawing nigh unto the holy place.

The Christian Science sermon, then, is a complete whole of various divisions. It is a God-given structure, with foundation, walls, and arching roof. It is a flower of many parts unfolding its divine order, even as the petals of a rose open to the genial greeting of the summer's sun.

III.

THE INTERPRETATION OF THE SERMON.

It is not too much to say that the work of the Readers of the Christian Science sermon is an exalted task. As the sermon contains the truth of God, it will, if rightly interpreted, fulfil the work of Truth of which Christ Jesus spoke, saying, "Ye shall know the Truth, and the Truth shall make you free." The sermons of Christ Jesus healed the sick and the sinful. So would every Christian Science sermon, rightly interpreted and understood. The Reader then voices the word which heals, of which it is written, "He sent His word and healed them." The Reader is an ambassador of the King, nothing in himself, everything in the message which he brings; a message which sets the captive free and restores to the outcast his rightful heritage. How sacred the task! How noble the mission!

In the work of the Reader there are several things to be considered. The Reader should be correct in his English, and the words correctly pronounced. The Readers should be so familiar with the sermon that the reading from commencement to close will be continuous and smooth. He should know that each scriptural passage has a two-fold meaning. It has the outward form and the inward spirit. It has its plain statement of fact and its spiritual interpretation. It has its body of Truth and its heart of Love. His first duty is to become acquainted with the outward. The

Digitized by Google

Readers should familiarize themselves with the whole lesson, the Bible references and those from "Science and Health with Key to the Scriptures," each studying the passages to be read by the other. In the case of the Bible texts, then, the Reader should study the context, and if an historical incident be referred to, he should learn the whole history of the event named. In this study he may be helped by Smith's Bible Dictionary, the Revised Version of the Bible, Rotherham, or other equally high authorities. Having a clear understanding of the outward facts concerning the Bible passages, he should study them in connection with their correlative passages from Science and Health to learn their scientific meaning. Then with prayer and meditation he will behold their deep inward meaning, and grasp their profound spiritual import.

While this study has been going on he has most likely seen the truth which each section of the sermon is intended to set forth. And he sees the intimate bearing which each part has toward the subject as a whole. If not, further study will reveal it. Often the first sentence from the first Science and Health reference will reveal the import of the section. Often every Bible reference in the section will deal with the phase of the subject to be presented. Again, the study of all the passages may be needful to unfold the teaching of that division of the subject. As every architect, to rightly build a house, first sees its framework, so every interpreter of the Christian Science sermon should know its framework. Understanding this, his interpretation will have strength and character.

As all understand, an important item in the preparation to rightly interpret the sermon, is the unity of thought and unity of spirit between the two Readers.

Having done all rightly to interpret the message of the sermon, the true interpreters will give earnest heed to the words of Paul: "Not that we are sufficient of ourselves to think any thing as of ourselves: but our sufficiency is of God; who also hath made us able ministers of the new testament; not of the letter, but of the spirit: for the letter killeth, but the spirit giveth life." Truly the Reader is sufficient for his task only because he knows that the work is God's. His highest preparation is that of the Spirit which giveth life. "More than regal is the majesty of meekness," our Leader has declared. And nowhere is meekness more regal in its majesty than in the Reader who does not think anything of himself, but of the Royal message which he bears from the King of kings, to the waiting hearts, eager for the glad tidings of peace and good will.

IV.

PRACTICAL ILLUSTRATIONS.

What has already been said regarding the composition and character of the Christian Science sermon will be further elucidated by a few specific illustrations. The first subject treated was that of God, on July 3, 1898. As God may be said to include the all of Christian Science, it was quite natural that the first sermon upon this subject should cover a wide field of thought. When this lesson is studied its structure or outline as contained in the various sections is seen to be as follows:—

I. God is the Creator. II. God is Principle. III. God is triune, Life, Truth, Love. IV. God is Good. V. God is omnipotent, omnipresent, omniscient. VI. God is Father. VII. God is Mother. VIII. God is Love.

This same subject again formed the sermon for January 1, 1899. Though on the same subject it is quite a different sermon from the former. The first lesson having unfolded in a broad way the thought of the Infinite One, this lesson helps us to know how He may be understood. The method of this lesson may be thus stated:—

I. God is not corporeal but eternal Love. II. God is unknown by material sense. III. God is known by Spiritual Sense. IV. God as revealed by the Scriptures. V. God the only Cause and Creator. VI. God the Father and Mother.

Some earnest seeker may say: Why should we not have a sermon that would tell us more about God as Principle? This question does not imply that there is any fault to be found in the former lessons, but it does voice an eagerness to know more of an infinite theme. Those careful students of the Bible and our text-book will readily see from the above point of view that the sermon might come out this way: I. God is Principle. II. God as Principle is Good. III. God as Principle is Love. IV. God as Principle is the Saviour. V. God as Principle was manifested by Christ Jesus. VI. God as Principle is reflected by man. It is quite possible that just such a lesson may some time be found in the *Quarterly*.

The subject for February 26, 1899, was Man. The method of treatment here is quite as logical as the sermons above quoted, but is perhaps not as readily detected. This sermon on Man may be described as follows: I. The Immortal Man. II. The Mortal Man. III. The false testimony of the senses regarding Man. IV. The Old Man (the mortal Man, that of material sense) to be put off, and the New Man (the Immortal Man, that of Spiritual Sense) to be put on. V. Christ Jesus the perfect example of the Immortal Man. VI. The Unity between God and Man to be worked out by practice. In other words the method is this. I. God's man. II. The human man. III. The counterfeit man accounted for. IV. The counterfeit disappearing and the genuine appearing. V. Christ Jesus the genuine Man. VI. Faith and works needed for man's transforming process realized through Christian Science.

Another might describe these sermons differently and better. Some one else might find a sermon which seemed devoid of any apparent structure. Let it be remembered that these illustrations are not intended to point out a rigid or fixed rule. They are hints which others may improve. Of this we all are certain, the Christian Science Sermons are given by Love, constructed by Love, and made up of Love. They are the offspring of divine Intelligence, the Light from the Sun of Righteousness for the healing of the Nations.

The Massachusetts Metaphysical College.

THE annual term of the Massachusetts Metaphysical College will open, with the Board of Education, on the first Monday of June, 1902 (June 2), at 10 A.M. Unless otherwise arranged, the sessions will be held in the Mother Church edifice, and will continue not less than two weeks.

Blank applications will be sent upon request. They should be filled out and signed so as to be returned to the Board not late than May 1, 1902.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Board of Education.

THE member of the Board of Education in Boston, cannot, for want of time, make appointments for personal interviews relative to the forthcoming class. If any special reasons exist why application is made, or any explanations are to be made, let them, in brief form, accompany the applications.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

A Correction.

IN the article entitled, "Answers Dr. W. J. Holtzclaw," which appeared on page 429 of the *Sentinel* for March 6, 1902, an error occurred in the Scriptural quotation in the fourth paragraph by the omission of the word "but." It will be seen at a glance that the passage should have read: "This kind goeth not out *but* by prayer and fasting."

From Our Contributors.

Tributes to the New Edition of Science and Health.

A few weeks ago, it would not have seemed credible that the Science and Health, so dear to me, could possibly attain higher perfection; but now, upon taking my revised edition daily and putting it side by side with one of the older books, comparing each sentence with the corresponding one, a sense of the wisdom that our Leader has displayed in making the changes, is overwhelming.

Then comes the inclination to reflect upon all the time, thought, and prayerful study that has been required to make the alterations, which will enable us, as students, to grasp more readily that spiritual understanding which we are trying to obtain.

It seems beyond my range of expression to tell of my gratitude to Mrs. Eddy, not only for the old and the new Science and Health, but for my share of the general blessings which she has presented to the world.

Dear Mother, "No weapon that is formed against thee shall prosper; and every tongue that shall rise against thee in judgment thou shalt condemn. This is the heritage of the servants of the Lord, and their righteousness is of me, saith the Lord."—LUCIA BEATRICE GERE.

Thanks to our Mother, Mary Baker Eddy. I have a copy of the new revised Science and Health. How every change, addition, and elimination expresses the love that never tires. It is indeed a feast of good things prepared for her students and every searcher for Truth. My prayer is to be able to show my gratitude by daily rising to a higher life and bringing forth the "fruits of the Spirit."

M. F. McC., San Jose, Cal.

My heart is overflowing with gratitude to our dear Mother for her wonderful labor of love in giving us the new edition of Science and Health. I feel that already it has given a new impetus to Christian Science, and additional strength and understanding to the Field.

Let us pray God that we may be found worthy of the name of Christian Scientist, and strive most watchfully to keep the Science of Christianity with men in this age, and attest its power by "signs following."

E. L. F., Chicago, Ill.

May I join in the glad "God bless our dear Mother,"—Rev. Mary Baker Eddy,—for her sweet and powerful work for humanity in the last revision of our text-book, "Science and Health with Key to the Scriptures"?

The changes are significant and clear. They give impulse to study,—a desire to know and do good as she is teaching, and practising what she teaches.

With gratitude and love to her and all associated with her in the great work.—NETTIE T. WATKINS, Oskaloosa, Ia.

I wish to thank Mrs. Eddy for the new edition of Science and Health. Words cannot express my gratitude. My sincere desire is that I may walk day by day, so as to be able to demonstrate this spiritual advancement in some degree. Once more, I thank our dear Mother for her untiring, ceaseless love for all.

MRS. CELIA L. ROBERTSON, Evanston, Ill.

I wish that I could express the gratitude which I feel toward God and our dear Leader for the new edition of Science and Health. No Christian Scientist can afford to be without it.—N. P. LIBBY, Bangor, Me.

Extract from a private letter.

God bless our dear Mother for the new book. How like her it is, to keep on working for us, never stopping. I want to say, I think there is not a day when my heart does not send her a message of love and gratitude spontaneously. Only as we grow can we appreciate her and her labor of love for us all.

Ambition.

BY W. E. B.

PERHAPS no other quality of the human mind is responsible for so much misery and discord as ambition. This word in its primary sense meant "to seek the approval of others." In our day it covers a much broader ground and stands for an all-absorbing desire to gain some goal the individual believes desirable. Once in the firm grasp of ambition the individual does not hesitate to sacrifice everything which stands in his way, including family, friends, honor.

Now what is it that creates determination to win at any cost? Is it not that the ambitious one believes that the prize will bring him happiness and satisfaction? Wealth, fame, place, or power seem to mortal thought to be very desirable and seem to promise happiness and satisfaction; but experience shows that when these are gained they do not bring happiness and contentment, but just the reverse; *i.e.*, responsibility, worriment, fear, and unrest. It is very evident to the thinker that the baubles of ambition are not really desired in and of themselves, but the hope that they will give the possessor what the entire race is looking and longing for,—satisfaction and peace. It is at this point that Christian Science rescues mortals and shows clearly that satisfaction and peace are not to be found in any material condition, and when the individual is convinced of this he stops chasing the phantoms of mortality and begins to turn in the right direction and to cultivate the true ambition which does not seek the approval of others but does seek the approval of God. This attitude convinces the seeker that he is now working in the right direction for peace and happiness, and in his struggle to gain the divine sonship he no longer finds it necessary to sacrifice family, friends, and honor; but on the contrary, his new-born attitude diffuses a helpful atmosphere to all who come in contact with him, and he is convinced that his own growth depends on his ability to help others.

"Love is the fulfilling of the law." How grateful we should feel to our Leader for showing us the only way of gaining all and more than we ever dreamed of possessing. How thankful we should be that there is a sure, direct way to gain happiness, peace, and satisfaction as indicated in Jesus' saying: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you."

How comparatively easy it makes the problem of life seem when we see that "the peace of God, which passeth all understanding" is not acquired by money, position, place, or environment, that we are free to concentrate thought on acquiring a greater understanding of God, and that we can rest securely in the promise that "All things work together for good to them that love God." A strong point in this connection is that we can begin at once the effort which will finally bring us into the liberty of the sons of God. Science and Health tells us on page 326, "The purpose and motive to live aright can be gained to-day," and this line of action carried on in accord with other instructions given in our text-book will bring us into the realization of peace, and we shall be satisfied. It matters not who we are or what place we are filling; we do not have to consider what this or that one thinks of us. The question is not, "How do I stand with men?" but "How do I stand with God?" and if we are sure that we are striving daily to assimilate and reflect His nature, we may rest assured that everything worth having will come to us and we shall begin to apprehend some of the things which God hath prepared for them that love Him.

The Testimonies.

BY ALICE DAYTON.

The unique feature of our periodicals,—one which distinguishes them from all other literature, and essentially contributes to the spread of Christian Science,—is the "Testimonies."

Although thousands have already borne witness to the healing work through Science, yet the half has not been told, and it might be said of this as of Jesus' work that the world itself could not contain all that might be written. To "gather up the fragments that remain, that nothing be lost," is wise economy. By this means alone, a vast amount of spiritual power is conserved and utilized in gaining attention for Truth. And here all may recognize an opportunity of God's appointing. The woman who touched the hem of Christ's garment, and was made whole, was called by the Master to confess publicly what Truth had done. The same Christ to-day demands open acknowledgment of those who receive benefits.

Because I am grateful to God every day for a sense of health and strength, and of His guidance, which were never mine while ignorant of Christian Science, I gladly add my mite.

The advantages of a Christian home and early religious training did much to develop faith in good, but this was insufficient to explain the sense of vanity in all material things which tormented my childhood. The seeming absence of something tangible made health uncertain, and the lack of a worthy life-motive left existence scarcely tolerable and death the only open door to a knowledge of God. Often I wept, unconscious why, because of this failure to find reality. And I sought in many books and human philosophies, and in benevolent work, but in vain, to gain satisfaction. In spite of sincere efforts to be a Christian, hypocrisy stared me in the face; and pride, self-will, and ignorance of Good governed, till I found myself an invalid and more unhappy than ever. The thing I greatly feared had come upon me. With little faith in human agencies to cure, where could one turn for healing? Here "man's extremity" as usual proved "God's opportunity." Some faintly spiritual desires were pointing to help from above and outside material sense. As a child I always listened with interest when any one was said to be restored through prayer or faith; glad to believe it possible for God to make and keep us well, yet knew not how to approach Him with my great need.

Another question frequently presented itself in reading the Gospels: Would I have been among those who rejected Christ? and my prayer rose that should Christ re-appear in this age, however and wherever, I might know and follow him. Little did I think that even then the spirit of Christian Science was abroad in the land, preparing the hearts of men to receive a fuller teaching of Truth than had yet reached this earth.

It was on this wise that I first consciously touched the new revelation of God. A copy of Science and Health was loaned me for a day to look over. The one who gave it was ignorant of its worth, nor did I dream that it had a recognized healing mission. Out of this brief opportunity and some conversation I gained two ideas which abode with me. One was that from Mrs. Eddy came the original work of Christian Science,—the other, that God was all-powerful, therefore sickness was not, being formed only by the human mind. Strange as was this statement, the more I pondered, the more reasonable it sounded. Unconsciously I had drunk of Life-giving waters, and was being transformed by the renewing of the mind. The thought that Christian Science healed sickness as well as sin impressed me as Scriptural, and I dared not refuse what, if true, it would be a joy to accept. I chose rather to test its promise.

An occasion, simple in itself, served to arouse all my convictions that this was the Truth, and throw the balance of power on the side of God. I said within myself, "I must go forward, acting as if God is all, and nothing else is here." Then Truth did its perfect work. The "Light that never was, on sea or land," illumined my thought so as to reveal clearly the false mental processes which had entangled me physically, and by the same Light was seen the freedom of a child of God. These thoughts were as distinct as are material objects to optical sense; and to my astonishment, the former phantom of pain and inability fled from sight never to reappear in the old forms. Fifteen years of freedom have proved my recovery genuine and permanent. A noticeable consequence was that the fear of sickness and impending evil which had shadowed all my days and nights was lifted, and I rejoiced in hope.

Later, in my own copy of Science and Health, I read of the effect which would follow becoming "conscious for a single moment" of spiritual Life. I saw it was no chance that had wrought the change; but it was the fruit of a great and noble purpose to establish the kingdom of harmony on earth.

Afterwards, when I sought to know more of this teaching and prayed God that I might learn of the One who *knew* His way, the same divine Love which had touched me with physical healing drew me away from ignorant misconceptions of Science and planted my feet in the true path. A fresh obligation was added with the priceless privilege of class instruction by our beloved Leader just before the close of the Massachusetts Metaphysical College in 1889. My joy was unbounded that I had at last found a Cause with which I could honestly and heartily identify my efforts; and a church which was founded on Christ's teaching and practice. With every advance step, it is more plain that God has opened a door which no man can shut. His way is an open way, which mortals must find and traverse.

The Impersonal Teacher—the wisdom and Love far above material conception which is shed abroad afresh in our hearts in the new edition of "Science and Health with Key to the Scriptures," is certainly fulfilling the promise of the prophets and of Jesus, "They shall be all taught of God." It is proving itself a divinely appointed way of salvation for man to find himself in the image and likeness of God.

Selected Articles.

Defence of Christian Science.

To the Editor of *The Post*.

Sir:—Your issue of the 23d inst. reported some extracts from an article by Rev. Dr. Dixon of Boston, denouncing Christian Science at considerable length. I hope your readers have not drawn the inference that this man understands Christian Science and is qualified to treat the subject fairly. It may be that he treated it as fairly as he was able, and if so, his opposition proves his lack of understanding.

To any one who has studied Christian Science with the purpose, not merely of criticising and picking flaws in its method of statement, but with the sincere desire to know the truth concerning it, and with the hope of finding it practical to overcome sin and disease, Dr. Dixon's statements are misleading. He lays claim to the knowledge that Christian Science "really heals by simple and well-known mental processes," while he says it professes to heal in some different way. How many cases of severe sickness has he been instrumental in healing through what he believes is the process by which thousands have been healed in Christian Science? Can he produce one such case and show that his method was on the lines which, according to his own statement, are those taught in the Christian Science text-book? If not, is the position he assumes as a critic of Christian Science more

Digitized by Google

warrantable than that of a lecturer on mathematics who has not demonstrated that he is master of that science, and yet who would insist that two parallel lines meet when extended so far that human vision cannot discern them to be separate lines and still parallel? Now Christian Science shows that we cannot experience godliness without practising cleanliness, while Mr. Dixon's interpretation of this religion is stated to be that "dirt and devotion go together." Does he as an orthodox Baptist believe that his converts gain more purity from the immersion of the material body than from the spiritual cleansing that comes through adherence to the teachings and life of Christ?

Is Christian Science "a system of infidelity which contradicts the Scriptures or wrests their meaning to suit its purposes"? I understand the purpose of this Science to be the elucidation of the most practical methods of applying the Scriptures to the healing of sin and disease. The Rev. Dr. Lorimer, who recently left Tremont Temple, Boston, to accept a call to the Madison Avenue Baptist Church, New York City, in a recent sermon on divine healing, is reported to have said that "on this theme the Scriptures are definite and pronounced. The Almighty is over and over again presented as the source of strength and as the supreme cause of health. Among curative agencies blessed of God a very high rank must be assigned to the moral and the spiritual. The ideal of a pure manhood is a long step as a help to healing. When the spiritual is supreme and Christians have little time to think of themselves or their cares, and when they are fully occupied with celestial visions, they usually keep well and are hearty." The Hon. William G. Ewing, in a recent lecture in New York City, stated that "within twenty-five years in the United States alone quite one million people, including both sexes and all ages, in every variety and condition of climate, have been treated by Christian Science methods and cured of all manner of diseases, named and unnamed, substantially covering the whole range of mortal afflictions."

A Hindoo philosopher is the highest authority quoted by the Rev. Dr. Dixon for his assertion that Christian Science is not Christian but pagan. If Hindooism had, in proportion to its hoary years and countless millions of devotees, accomplished the works due to Christian Science as above referred to, and had done them according to the principle of Christian Science, the whole world would, centuries ago, have been converted to the religion of Jesus Christ.

Dr. Dixon objects to the teachings of Christian Science as showing the delusive and insubstantial character of sin and disease, and consequently man's divine right to secure freedom from their tyranny and to prove their powerlessness, through understanding the omnipotence of God. If the teaching that evil is not to be feared but destroyed is a mark of "hypocrisy," then every mother who teaches her child that ghosts cannot harm because in reality such beings have no existence,—would also be a hypocrite. Jesus' way was to show to the world the folly of believing in the pleasures of sin, and the scientific truth of his teachings is expressed in Scripture in the declaration that he "knew no sin" (2 Corinthians, 5 : 21). Surely our critics would not desire to be classed with those who laughed Jesus to scorn because he said of the maid, "She is not dead" (Luke, 8 : 52)?

The assertions as to the teachings of Christian Science concerning marriage, and that Christian Scientists of the present day compare their experience to that of the Virgin Mary, are absolutely false. It is mere gossip, and no enlightened person believes it. "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, contains all that is taught on this subject by Christian Scientists. A perusal of her chapter on "Marriage" will convince the reader that there is no truth in the charge made by Dr. Dixon in this respect. In fact, the whole of his indictment as reported, is against nothing more than a man of straw which he names humbug. In other words, it is his own erroneous conception as to the true nature, teachings, and great practical value of Christian Science. The man of straw may be demolished, but Christian Science is built upon the rock which abideth forever.

Yours truly,
WESLEY SPAULDING.

Toronto, January 27, 1902.

About Christian Science.

To the Editor of the *Brooklyn Eagle*.

In your issue of the 12th inst. appears an article from Joseph B. Barry, which needs reply; and I request the privilege of your columns for that purpose. The writer has been a student of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and Mr. Barry a reader merely. As readers we frequently form wrong opinions as to what is meant by the author of any work dealing with the sciences. It is only when we become close students of such subjects that we are able to grasp the meaning of the context and then, possibly, our explanation is not lucid to one who has not followed in a degree the same course of instruction that we have. While the writer is familiar with the philosophical writings of Berkeley and Kant, he would hardly feel justified in attempting to act as a teacher of philosophy, using the works of these authors as text-books, until he had spent ample time to master them completely. From this same standpoint would it not appeal to Mr. Barry that he is less competent than the writer "to grasp the meaning of the language embodied in the quotations referred to" from Science and Health? There are neither "incoherencies" nor "inconsistencies" in Science and Health or the other writings of Mrs. Eddy when they are read with the understanding that the truth referred to in these writings can only be discerned spiritually. God's Word has never appealed to the reason of mankind, because reason is supposed to be the basis for wisdom and the Bible tells us that the "wisdom of this world is foolishness with God," and again, "Jesus answered and said, I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes." If Mr. Barry, or any one else who is desirous of knowing of the healing work that Christian Science has done in cases which cannot be classed as "imaginary," will call at the Christian Science reading rooms, in Temple Bar Building, they will be cheerfully furnished with the names and addresses of those who have been born blind and now see; who have been deaf and now hear; and who have used glasses for years and now see without them. The writer was born with valvular heart disease and had the services of the best physicians that could be obtained, but was afforded no relief until, under Christian Science treatment, he was perfectly healed; and, since the fall of 1884, he has been a well man, believing Christian Science competent to care for him in all cases.

The writer does not himself know of the truth of the reports in the daily press as to charges being made for Christian Science treatment in Berlin; but he does know that the Bible says: "The laborer is worthy of his hire," and that Jesus did not refuse to permit the alabaster box of precious ointment to be used in gratitude for what he had done, nor did he object to the widow's mite. They were both symbolic of gratitude, and as such were praised and recorded. Christian Science practitioners give gratuitous treatment just as readily and willingly where it is needed as they do the treatment that is paid for, and the majority of practitioners have patients of the former as well as of the latter class. FRANK H. LEONARD, C.S.B.

Brooklyn, February 13, 1902.

Testimonies of Healing.

I am happy to say that I am a Christian Scientist. Nine years ago I embraced this blessed truth. At that time I was a member of the Presbyterian Church, but I always felt that the church did not fulfil the Scripture; for Christ's command was to go out in the world, preach the gospel to the poor, heal the sick, cast out devils, and he promised that we should do the works that he did, and even greater. When Christian Science was explained to me I began to read and investigate it, and found that it was All-in-all. I began to study and soon began to demonstrate for myself and for my children, who have never tasted medicine in these nine years. When claims come to them and myself, my remedy is always at hand. I have had many beautiful demonstrations, with one of which I am particularly well pleased.

A friend of mine has a little girl who is now thirteen years old who had been sick from birth. She never walked until she was three years old. She has had every disease that a child could have, has had seven operations, had pieces of bone removed from her limb, and suffered untold agony. For two years she had not walked a step, had to be lifted and carried like a baby, and wheeled about in a go-cart wherever she went. Last Fourth of July she was at my house. Her mother and I talked about her condition. The child (who is unusually bright) listened very attentively to the conversation. A few days after she said, "Mamma, I believe Mrs. W. is treating me, I feel so well and have not had to take my medicine; you go over and ask her." Her mother came and said, "The child thinks you are treating her, for she feels so well." I said, "No; I have not been treating her. It is ask, and ye shall receive, and you did not ask, but good thoughts never hurt any one." Then she said, "I will ask you to treat her.

The treatment began on July 7. The next day she commenced to walk around the room, holding on to a chair. The next day, which was July 9, she came walking with her crutches over to see me, which is a block and a half away. She now walks up town, over snow and ice, without even a crutch. She is growing straight, and is happy at the thought of getting well and can run around and play with her little sister, who is six years old and about the same size. Every one who sees her walking about the streets looks at her in amazement and wonders why it is so when she tells that it is Christian Science.

MRS. JULIA WATSON, Aspen, Col.

On November 23, 1901, about 4 P.M., I received a telephone message saying our little three-year-old daughter had fallen out of the second story window, and knowing the distance to be about twenty-two feet I was greatly alarmed. I immediately telephoned our teacher for help, and started for home, arriving there in about twenty minutes. I found she had fallen face downwards and was terribly bruised, and it was thought she could not possibly live half an hour.

My wife not being at home at the time, several of the neighboring women were called in by the house girl, and all insisted on having a doctor. I called one in, more to quiet their fear than anything else. The doctor examined the little one, and said there were no bones broken, but she had concussion of the brain. I dismissed him, saying if we needed his services again we would let him know. I then telephoned our teacher the condition, and returned to the house to find the child much better. She soon went to sleep; when I laid her in the bed I noticed she adjusted herself, and was breathing naturally. She slept for about an hour and a half. When she woke up she seemed to be in distress. In a short time she threw up a quantity of blood. She immediately began to get better. By half past seven o'clock she asked for her doll and some candy. It being Wednesday evening I went to church. When I returned I found her in good spirits, playing with her dolls, etc., and before retiring she ate some candy. Next morning, when her mother stood her on the floor to dress her, we discovered that her right ankle had been badly sprained, and was very much swollen. We treated her for the claim, and by the next day the soreness had nearly all disappeared. Saturday she was running around as usual. In seven days all the scabs had fallen off, and only a few little marks remained. In a very short time all signs of the bruises and cuts were gone.

W. J. CORD, D.D.S., St. Louis, Mo.

Early in the year 1900, our fourteen-year-old son became very sick. By his own choice he took medicines from a first class doctor. (We had had previous knowledge of Christian Science healing.) Weeks went by, and he grew worse day by day until it seemed that the end was not far off, and in desperation we called a second physician, who pronounced it a serious case of diabetes, putting him on a diet that no child could endure. While he was not in bed all of any day, he became so dropsical from head to foot that he was swelled all out of shape, stammering of speech, mind perverse, sores appearing on his face and hands, and heart thumping at night so that it could be heard twelve feet away.

Mother love grew desperate, so that almost miraculously I got him off to Indianapolis where I knew there was a reading room and that I could find a healer. To her I gave his case; he was rebellious, vowing that Christian Science should not cure him, still carrying his bottle of medicine.

She soon got possession of the bottle and brought him to his right mind. One week, that very day, I took him home a well boy, sweet in disposition, all appearances of dropsy, sores, etc., gone. After returning home we continued one week of absent treatment and he has never been sick a day since. He acknowledges the healer to be his best friend and we are very grateful for God's goodness in sparing our son, who is now in an academic boarding school under military discipline, making a good record.

We owe it all to Christian Science, and I thought this bright day of the New Year I must start anew, doing good by spreading the good news that others may take hope.

HELEN SHERFEY, Brazil, Ind.

For a long time I have felt it my duty to speak a few words for Christian Science through the *Sentinel*. It has done so much for me I hardly know how to express it. I was a great sufferer from an abscess in my hip caused by a fall. After about six months it began to discharge and continued to do so for twenty-three years in seven different places. I have pieces of bone in my house that came from it. I employed fourteen different doctors during that time, but all failed to cure me. I went to the hospital to have my hip cut open and the bone scraped, but the doctors said my time was too short and refused to do it. I returned home with death staring me in the face; but, thanks to Christian Science, I am now a well man.

I was healed in about thirty days, and have remained so ever since. That was seven years ago. I have also been healed of stomach and heart trouble and liver complaint. I am very thankful for my physical healing, but I am much more thankful for the spiritual understanding of the Bible that has come to me through Science and Health. My wife and I have both had the pleasure of class instruction from one of Mrs. Eddy's loyal students.

I wish to speak a word of thanks for the benefits we have received through the publications of our Mother.

THOMAS P. BROWN, Caro, Mich.

Religious Items.

Christianity does not authorize us to promise an external heaven to any soul as the reward of virtuous experience here. It does not sanction any manipulation of its claims on the love and service of mankind which involves this idea of a reward for that service outside of what it brings itself to the soul. It would deepen in a man a love of righteousness not by any gift or promise outside itself, but by the inestimable benefits it confers on every sincere follower. The penalty which accompanies it, in like manner, is not suffering in a hell of external torment hereafter, but in the darkened condition and moral suffering of a soul that refuses its highest good. These are the motives and inspirations which hold chief sway in the Gospel, and on which must be based the appeal for personal righteousness to prove of the highest avail in the conversion of sinners—not "the hope of heaven and the threat of hell." Until these obtain recognition as principles of the Gospel and are taught as such, and the religious appeal based upon them accordingly, one of the important elements in true religious progress will be necessarily absent.

The Universalist. Leader.

Moral triumphs result mainly from obscure battles fought in silence and in the dark,—the great battles of discipline, patience, love, and self-suppression and control, by which the pit is finally avoided, or at least filled up. They are held in the closed arena of the soul, where we struggle not with dragons or giants, but with worse foes, —the primal tendencies and instincts of our own nature. No one conquest, however great, will lay the old enemy within us. Again and again we may leave him for dead on the battlefield; and presently there he is alive and alert, watching to trip us in his lair.

No wonder simple people of a primitive time, who knew little about the processes of their own minds conceived of this old enemy objectively, and made him a picturesque devil with appropriate hoofs and tail.

It was pleasant and easy to lay the responsibility for sin upon the prince of the powers of the air, but now we have no such excuse. We are masters of our fate. We cannot plead ignorance, for we know too well where sin lies.—*The Christian Register.*

It becomes us to consider our faith with regard to its influence upon the believer himself and to ask ourselves the questions: How, and how much are our lives affected by it? Wherein does our character differ from the character we sustained while ignorant of the message which we now accept as the truth indeed? How much more righteously do we conduct ourselves than we did before we believed this Gospel? What greater measure of kindness, good-will, good thought, good feeling, and good speaking have we for one another and for everybody everywhere? How much more delight have we in doing good, how much more good do we accomplish than we might if we knew nothing of this faith—if this Gospel of Love were to us unknown, . . . and with all this how much more of real peace and joy in life do we now experience?

If we can see no betterment in ourselves—no more devotion to the highest and purest things of being, no more good for the world in our lives, then arise these questions: Is our faith a real faith? . . . Is our faith in this evangel a faith that is faith?

THE REV. JACOB MERRIFIELD.

No blindness has been so wayward and debasing as blindness of the soul; and no interest of man has so much needed the dawn of reason to superintend it as religion. This is the realm that is the most removed from observation and the data of science and that calls for the calmest survey of reason, and yet just here the passions and the fears have held the freest revel, and the worst of creeds and rites still survive in many quarters, awaiting the sweeping in of the great day of intelligence to set them aside.

The Universalist Leader.

The true fast is more than merely going hungry. It is the absolute subjection of the lower worldly nature to one's spiritual nobilities and citizenship. This was Christ's own struggle. He who deliberately and unostentatiously bids the besetting material world stand back that the soul may have room and sway to realize its highest callings, keeps the spirit of the true fast. Many a man could guard his spiritual nature easily if he could accomplish this defence merely by fasting from food; fasting from mammon, pleasure, and selfishness is harder.

The Congregationalist and Christian World.

If it be granted that the life of the Christian is the life of the Christ communicated by the Holy Spirit, and that its sustenance is Christ apprehended by the same Spirit, it follows that its expression will be Christ. One of the profoundest statements of the New Testament concerning the Christian is that made by the Apostle John, when he says. "As he is, even so are we in this world." If "to live is Christ," then life will express itself as it did in him. The expression of Christian life is the manifestation of the Christ-life. The attitude toward God and men and evil will be identical with his.

The Congregationalist and Christian World.

Biblia, for February, reports the discovery of the banqueting hall at Babylon where Belshazzar saw the handwriting on the wall and where Alexander the Great held his last orgie. It is a hall 120 by 60 feet, with walls once richly decorated with painted stucco, as Ezekiel describes it. The pavement of the broad road leading to the palace bears the "marks of the chariots that jostled in the street."

God has many ways of showing a man the way of duty. Every opportunity is a voice of God calling for performance there and then. In its ordinary aspects life is not such a hard problem. God's voice is always saying, Do the duty that lies nearest thee; the doing of that will show thee what next to do.—*The Christian Advocate.*

If we cannot find God in your house and mine, upon the roadside or the margin of the sea, in the bursting seed or opening flower, in the day duty and the night musing, I do not think we should discern Him any more on the grass of Eden or beneath the moonlight of Gethsemane.

JAMES MARTINEAU.

A truthful character is of value beyond computation. Its transparency is beautiful. No darkening stains discolor the medium through which the soul goes forth in words, in looks, in actions. It is the only medium through which we can know God.

REV. W. A. NICHOLS.

Take time to be holy! Holiness is worth while. It is an interest that pre-empts Time, and that never exhausts itself even in eternity. There is nothing else that is so worth while. Now is the time to be about this sacred business. Let holiness become life's ruling passion.—*Zion's Herald.*

One's unconscious influence is the severest and surest test of the validity of his Christianity, as the clear sharpness or wavering outline of a shadow means the light near or remote.—G. E. MARTIN, D.D.

Dr. Herbert Lankester, in connection with the decrease in the number of candidates for ordination points out that the entries in the English medical schools have also declined. In the present year there are 757 as compared with 926 in the year 1899.

Canadian Church Record.

Set yourself earnestly to see what you were made to do, and then set yourself earnestly to do it: and the loftier your purpose is, the more sure you will be to make the world richer with every enrichment of yourself.—PHILLIPS BROOKS.

Yes, we must be watchful, especially in the beginning of the temptation, for the enemy is then more easily overcome if he be not suffered to enter the door of our hearts, but be resisted at the very gate on his first knocking.—THOMAS A KEMPIS.

All virtue and all goodness are workmen upon that invisible temple which every man is. . . . It shall be a temple built in the darkness to reveal light, built in sorrow to produce joy which shall never die.

H. W. BEECHER.

The missionary sent out to preach the Gospel is more critically and constantly studied than the Gospel he preaches.

BISHOP GALLOWAY.

Places and forms of worship are not the essential things in the worship of God. The attitude of our spirit is the important matter and not the attitude of our body.

REV. R. A. TORREY.

What must he be, the great Master Workman, seeing that all the unselfishness, compassion, and love that are continually shining in our humanity are but faint reflections of Him!—KATE W. HAMILTON.

The late Henry Ward Beecher's father used to say to Henry, 'Be a hard Master to yourself, but lenient to everybody else."

Advent Review.

To live with a high ideal is a successful life. It is not what one does, but what one tries to do, that makes the soul strong and fit for a noble career.—TENNEY.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa*.

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, marbled edges, Oxford India paper, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatheretie covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

National.

Judge Cox of the United States Supreme Court has handed down a decision to the effect that an American citizen does not forfeit his citizenship by residing abroad. This overrules the decision of the Secretary of the Treasury that after an American citizen had lived abroad five years his abode could no longer be termed a temporary residence.

Plans for the new union depot at Washington have been received at the Capitol. The station is to be one of the finest in the world. It will be built of white marble, will have a frontage of over seven hundred feet, and will cost $5,000,000. Part of the cost of construction is to be borne by the United States.

The assistant treasurer of the United States at San Francisco has about 32,000,000 standard silver dollars in the vaults of the sub-treasury. He is no longer able to exchange silver certificates for silver dollars because he has no room to store the coin.

By a vote of seven to four the House Committee on Naval Affairs adopted a resolution concurring in the conclusions of President Roosevelt regarding the Schley controversy. All bills and resolutions on the subject were indefinitely postponed.

The United States Supreme Court has decided that the Illinois anti-trust statute is unconstitutional because it provides that agricultural products and live stock shall be exempt from the operations of the law.

Point Barrow, Alaska, is the northernmost postoffice of the United States. It is about on the 70th parallel and 420 miles north of Nome. It is visited once a year by a revenue cutter.

W. H. Moody, who will succeed John D. Long as a member of President Roosevelt's cabinet, will be the seventh Secretary of the Navy who was a resident of Massachusetts.

Foreign.

The Navy Department of Germany has decided to establish a chain of wireless telegraph stations along the entire German coast. It is probable that the Slaby-Arco system will be used. Thirty-two German warships have already been equipped with this system and eight more are having it installed. By this system messages have been transmitted one hundred and twenty-five miles.

During the past fifty years England has expended upwards of one hundred million dollars in acquiring, by purchase and construction, cable communications with her vast possessions. She has constructed a Pacific cable from Vancouver to Australia at a cost of nearly nine million dollars, and has fixed a rate of fifty cents a word for cable messages from Vancouver to New Zealand.

Alfred Moseley of Liverpool has come to the United States to arrange for the visit, this coming autumn, of a commission representing workmen's organizations in five-sixths of the great British industries. The delegates will come at Mr. Moseley's expense and will be accompanied by newspaper and literary men.

Work on the British trans-Pacific cable has begun. The route chosen is from a point on the Chinese coast via Yokohama and the Aleutian Islands to Barclay Sound, the terminus on this side. For several weeks a cable ship has been engaged in laying the cable from the Chinese coast terminus.

Colonel P. P. Tchernigovsky of the Russian Navy, who has been superintending the construction of two Russian warships at the Cramps' yard in Philadelphia, says that the United States is far ahead of any of the European countries in the building of battleships.

The report of the royal commission at Ottawa, Canada, says that Japanese immigration to British Columbia is just as objectionable as Chinese.

King Edward has set aside $150,000 with which to provide a feast for half a million of his more unfortunate subjects in celebration of his coronation.

Ten years ago British shipping carried eighty per cent of the world's cargo, but now it carries only sixty-nine per cent.

An American syndicate has obtained a concession to build a metropolitan railway in St. Petersburg.

Admiral Prince Henry has taken command of the German squadron in Kiel waters.

Industrial and Commercial.

Prosperity at home and depression abroad are cited as two of the principal causes of the decrease in exports of iron and steel manufactures. The exports for seven months ending with January amounted to $57,310,128. For the corresponding months of last year the amount was $73,616,467.

There has also been a decrease in the exportations of corn. For the eight months ending with February the amount exported was 29,912,875 bushels valued at $13,683,200. For the corresponding months of the preceding year the exports were 132,624,859 bushels valued at $60,621,569.

The Missouri River Power Company at Helena, Mont., has completed a line for transmitting power to Butte. The line is sixty-five miles long and crosses the Rocky Mountains at a height of 7,200 feet. At present the line conveys twelve hundred horsepower, but it is intended to double the power by the construction of another dam.

E. H. R. Green, president of the Texas Midland Railroad, has been awarded a patent on a wireless telegraph system of his own invention. President Green has stated that he will, as soon as possible, instal his wireless system on the Midland, which will be the first railroad in the world to use it.

The city of Detroit has granted a franchise to the Co-operative Telephone Company. The ordinance contains a provision that the company must sell its plant to the city when the city obtains the right to operate a municipal telephone exchange.

The New York Insurance Exchange has declared an increase of twenty-five per cent on "special hazards," factories, and hotels, to take effect April 1. Last year the companies forming the exchange lost $9,000,000 in the State of New York alone.

The Marconi wireless telegraph system will be tested on the lakes, and if the tests are satisfactory all the boats running on the lakes will be equipped with sending and receiving stations before the summer navigation season is well under way.

The area of the Mississippi valley coal fields approximates 66,000 square miles. The output in 1900 was 13,200,000 tons. The coal of these fields is chiefly consumed locally.

The Mexican Central Railroad has purchased the Monterey and Mexican Gulf Railway for $4,000,000. The Central gains 387 miles by the consolidation.

General.

C. E. Borchgrevink, the Norwegian Antarctic explorer, has entered upon a lecture tour in the United States. Mr. Borchgrevink was the first man to set foot on the Antarctic continent. He made his first voyage to those regions in 1894, but accomplished little. In 1898 he started on another voyage accompanied by six scientists. This time he succeeded in reaching a point five hundred miles farther south than had been reached by any other explorer. They discovered the south magnetic pole at 73 degrees 20 minutes south longitude and 146 degrees east longitude. Mr. Borchgrevink hopes by means of his lectures to raise sufficient funds to fit out another expedition.

Thirty-six American sculptors have entered the competition for the proposed memorial statue of General Grant, to be placed south of the State Department in Washington. All models must be submitted by April 1. These will be placed on public exhibition for two weeks at the Corcoran Gallery. The commission in charge will then select six designs. The sculptor of each will receive one thousand dollars, and from these six the final choice will be made.

David P. Barrows, chief of the Bureau of Non Christian Tribes of the Philippine Islands, says there is a cultivated class in all cities. It is quite small, not more than a dozen families in every town of a population of ten thousand. This upper class, however, possesses an influence over the lower class that the United States authorities have been slow to appreciate. The lower class is sending the children to school, and there is a strong desire for social betterment.

March 17, South Boston celebrated the one hundred and twenty-sixth anniversary of the evacuation of Boston by the British. The most important event of the day was the unveiling of a handsome marble shaft on Dorchester Heights, erected by the Commonwealth of Massachusetts in honor of the loyal soldiers who fought in the Revolution. Rear Admiral Schley was among the important guests.

Andrew Carnegie has presented five thousand dollars to the town of Peterborough, N. H. Through this town New Hampshire gained its title as "The Mother of the Free Public Library System." The local library was established April 9, 1833, and was the first free public library ever established among English speaking people.

The Supreme Court of Texas has decided that saloon keepers who sell liquor to students of educational institutions are liable for damages. This applies to those students who are not minors as well as to those who are.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

A Medical Consultation.

THE following interesting article from the pen of C. S. Carr, M.D., first appeared in the December, 1899, number of *Medical Talk* and was republished in a recent issue of the *Weekly Herald* of Dayton, O. Coming as it does from the pen of a physician, it is not only suggestive but interesting and instructive to all people who read it with care. The doctor's explanation of the Christian Science method of healing is not correct, but this is wholly excusable in a physician not claiming to be a Christian Scientist or a student thereof.

Following is the article:—

Let us suppose we have a sick person before us; no matter what the disease is, one malady will serve our purpose about as well as another. Now, let us suppose there are four doctors by the patient's bedside. One is an allopathic doctor, another is an eclectic doctor, another is a homœopathic doctor, and the other one is a Christian Scientist. Each one believes he can cure the patient; each one has a suspicion that the other three cannot. Each one believes he is right and the other three are wrong.

Now, let us listen as they talk. The allopathic doctor says: "This patient needs some medicine." To this the eclectic doctor will agree, and so will the homœopath. The Christian Scientist will not agree to this. He will reply: "If this man's mind were right he would recover without any medicine."

Now the other three doctors will admit that some sick people do recover without medicine; that many sick people recover without medicine. They will also agree that if the mind is right a great deal is accomplished in the cure of the disease, but they will insist that some risk is taken to allow the patients to go without any medicine. How much risk they will not exactly agree. Perhaps the allopath will say that he is running one chance in ten to die if he does not take medicine. The eclectic might say one chance in twenty. The homœopath might be inclined to be more liberal still, and perhaps he might say one chance in fifty; but, at any rate, they will all agree that the patient stands far greater chances to get well without medicine, than he does to die. This is equivalent to saying that if the Christian Scientist should treat him, get his mind easy, inspire his faith, stimulate his ambition, dissipate his fears, that he stands a great deal better chance of getting well than he does of dying. They will all agree to this; but now then, as to those who want to give medicine; let us hear them talk.

The allopath will say: "I am going to give such and such a medicine in such and such doses." What will the other three say? The eclectic will say: "No; that is wrong. You had better, far better, give him nothing." The homœopath will say: "Every dose you give of such medicine is a crime and only injures your patient." The Christian Scientist, of course, will object to any and all medicine. So we have it, three to one, not to give the medicine which the allopath would like to give.

Next, our eclectic doctor says: "I am about to give such and such a medicine in such and such doses. What do the rest of you think of that?" The allopath will promptly reply: "Such medicine is all bosh. Your theory of curing disease is entirely wrong; you will get no results except to do the patient harm." The homœopath will no less promptly reply: "Your poisons can only weaken the patient and destroy his resistance to disease. They should not be given under any circumstances." The Christian Scientist will reply: "Please give no medicine at all; leave him with Nature's powers to restore."

Now the homœopath speaks up and says: "I am going to give such and such a medicine in such and such doses." The allopath will reply: "Nonsense, your medicine amounts to nothing whatever. What's the use of giving moonshine and sweetened wind? You might just as well give him cold water as to give him such stuff." The eclectic will not be so harsh in his use of words toward what the homœopath proposes, but he will practically agree with the allopath that the homœopath's medicine is simply no medicine at all. What will the Christian Scientist say? He will say: "I object to your treatment simply because you pretend to be giving medicine. This pretence of yours attracts the patient's mind in the wrong direction for cure. I had much rather you would treat the patient than the other two; yet you can only do harm, since you are conveying a falsehood to the patient's mind."

Now this is exactly what would occur if these four kinds of doctors could be brought to the bedside of any one patient, provided they are true to the teachings of their respective schools.

Now if you were the sick one, which doctor would you rather have treat you after hearing this conversation? They all agree that if the Christian Scientist should treat the case that the chances are greatly in favor of the patient's spontaneous recovery. They stand three to one that if the allopath treats the case nothing but injury will be done, and thus the man's chances for spontaneous recovery will be lessened. They stand three to one that if the eclectic treats the case that he will do harm and thus lessen the chances of recovery. They stand three to one that if the homœopath treats the case he will do nothing except to bamboozle the patient into the belief that he is taking medicine, when in reality he is taking nothing. If you were the patient, which doctor would you prefer to treat you?

Now let us suppose that the allopathic physician takes the case and treats it. In due time the patient recovers. If this physician were asked for his candid explanation of the recovery of the patient, he would say something like this: "I am not quite sure that my medicine cured the patient. I only know that I did the best I could for him. It may be that the powers of Nature really performed the cure. I can never know about this. I am sure that my medicines were given according to my best knowledge of the action of drugs, and I have treated the patient exactly as I would wish to be treated if I were sick. Perhaps he would have recovered without any medicine." Now this is what the doctor who treated the case would say, if he were disposed to be frank and confidential about the matter.

What would the other three doctors say if the patient

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

recovered? They would all agree that the allopathic doctor's medicine did nothing but harm; that the patient recovered in spite of the treatment, not by aid of it. Not only did the powers of Nature restore the patient, but they did so with the useless obstruction of having the doctor's medicines to overcome also. Of course, good breeding and culture would prevent doctors from actually saying these words that we are putting into their mouths, but this is what they would think. This is what they would be obliged to say, if they said anything about it.

Now, let us suppose the eclectic physician should treat the case and the patient recovered. What would the other three doctors say of his recovery? They would say in substance exactly what they said of the allopathic doctor's treatment: That the patient recovered in spite of the disease and medicines combined; that both the drugs and the malady were opposed to the patient's recovery, but the powers of Nature were sufficient to overcome both.

But if the homœopathic doctor had treated the case, and the patient recovered, what would the other three doctors have said (provided, of course, they were willing to speak their mind in the matter)? They would all agree that the patient had recovered without any assistance except his faith in the doctor, and the supposition that he was taking patent remedies. They would attribute the cure to good nursing and faith in the doctor. At least they would admit that they had done no harm. If he had committed any sin at all, it was the sin of omission and not of commission. That he had neglected to do what he might have done they will all agree, for neither of them would admit that his medicines contained any potency whatever (supposing, of course, that he is really using homœopathic remedies).

Finally, let us suppose that the Christian Scientist had treated the case, and the patient had recovered. What would the other three physicians have said? They would have said that it was a case of spontaneous recovery. They would admit, of course, that the good nursing was all right, and putting the patient's mind to rest concerning the outcome of his disease was good so far as it went. They would agree that he had omitted to do anything of any real value. The only harm he had done was the harm of not doing what they would have done. None of them are quite sure that the patient would have recovered had either of themselves treated him, and the only thing they will quite agree about is that the Christian Scientist has not done as they would have done. The fact that the patient has recovered would not have a feather's weight with either of them; that the case had not been properly treated, no matter how often such recoveries would occur. Their hostility to the Christian Scientist would remain unchanged.

The allopathic doctor would have preferred that the harmful medicine of the eclectic doctor had been given, rather than to trust the case to the Christian Scientist. The eclectic had much rather the harmful medicine of the allopath should have been given, than to have the case trusted to the Christian Scientist. Even the homœopath would have preferred that the case had been treated by a regular graduate physician, even though he did not agree with a single item of their treatment.

Now let us begin all over again, and suppose that the allopath undertook the case, and in spite of the treatment the patient had died, what would the other three physicians then say? They would say that since the medicines given the patient only did harm, it could not be otherwise than that the physician assisted in the fatal termination. Surely a harmful drug is difficult enough for a well person to bear. At a time when the powers of Nature are taxed to their utmost to combat disease, it is almost a crime to compel the patient to squander any of his powers in combating the mischievous effects of toxic drugs; in short, the physician helped to kill the patient.

If the eclectic doctor had treated the patient, and the patient had died, the other three physicians, if candid, would be obliged to say exactly the same thing.

If the homœopathic physician had treated the case, and it had ended fatally, the other three physicians would admit that perhaps no harm had been done, but that Nature, unassisted, was unable to cope with the disease. This is the very worst thing that they could have said of the homœopathic physicians. Of course, well-behaved and polite physicians would not say these things, but this is precisely what they would think.

Once more let us suppose that the Christian Scientist had treated the case and the patient had died. What would the other three say? Would they say the Christian Scientist had done any harm, any positive harm? No, they would say simply that he had neglected to do anything; that he had claimed that sickness was a delusion. He had wasted valuable time in trying to persuade the patient he was not sick, or made a useless attempt to rally the powers of nature by operating upon the mind of the patient. The homœopath and the eclectic would have no such serious charge to bring against the Christian Scientist that they would have had against the allopath, for of the allopath they both said he did harm; neither would the homœopath and the allopath have to say of the Christian Scientist the same terrible things which they said of the eclectic. All they would have to say is that he neglected the patient, not that he did any real harm.

But after these three physicians had decided that the Christian Scientist had simply neglected to give one or the other of the treatments which they would have given, would they be inclined to stop here? No; they would want the Christian Scientist arrested and tried for murder, or at least manslaughter. Why? Because he had done harm? No; because he had done nothing, they claimed. Why did not the other three physicians have the allopathic physician arrested when they believed that he not only did nothing to help the patient, but actually did something to harm the patient? If the reader knows any reason why, the writer of this article will be greatly enlightened if he will kindly give it.

The allopathic physician, or the homœopathic, or the eclectic, can lose patient after patient with no fear of being charged with manslaughter. Why? Because these gentlemen are supposed to be educated; had pursued a course of study which makes it entirely respectable for them to lose patients. Now, this would all be very well and proper if these three men agreed about anything, but their education, instead of confirming each other's knowledge, and thus rendering each other moral support in cases that prove fatal, each man's education challenges every item of treatment which the other two would adopt. If what the homœopathic physician says is true, then the Christian Scientist has simply omitted to help his patient get well, while the other two physicians have actually assisted in killing him. Why is it, then, that the homœopathic physician is willing to have the Christian Scientist arrested for manslaughter, and unwilling to have these other two arrested, also? If the reader knows any reason why, we sincerely hope he will enlighten us.

Why is it that the eclectic physician consents to the arrest of the Christian Scientist, who has simply not done what he would have done, when the other two have not done so either, and in addition to this have actually done something which he believes to be harmful? Why is it that the allopathic physician looks on with approval and applauds the arrest of the Christian Scientist for manslaughter, when if either of the other two physicians had treated the case, they would not only have failed utterly to have done a single thing that he would have done, but would have added to that failure the poisonous drugs of the eclectic, or else the foolish mummery of the homœopath? If the reader knows any reason why, will he not take pity on the writer of this article and inform him? We confess that our mind

Digitized by Google

is in a muddle on this subject. Won't somebody kindly enlighten us?

In referring to the treatment of either of these four doctors in such terms as "harmful treatment," "rubbish," "bosh," etc., no disrespect is intended by the writer. These words were used merely to indicate the supposed sentiments of these different doctors towards each other, and were not intended to convey the feelings of the writer at all.

These remarks have been confined to four kinds of physicians in order to illustrate the idea. All the time we are saying these things, the thought keeps coming up that there are a great many other schools of physicians who stand ready to dispute everything that the four doctors above referred to have said. The osteopath has entirely another theory and cure. The hydropath, the electropath, the faith doctor, and so on, each one of these schools comes forward with great confidence that it is right in every particular, and that all the other schools are wrong in every important particular; that is to say, in the treatment of the case we have been considering they would refuse to do anything that the other doctors would recommend. The only thing in which they would all agree is, that the Christian Scientist ought to be arrested and punished for manslaughter.

Where so many men of divergent views on other questions come into exact agreement on some one question like this, there is a strong suspicion that they must be right about the matter; but how this can be right; by what train of reasoning it can be justified; by what code of ethics it can be sustained; the writer of this article has not the slightest suspicion. Will not some humane person dispel his ignorance?

A Conservative Reply.

To the Editor of *The Citizen.*

Sir:—Christian Scientists cannot conscientiously permit the critic who writes about Christian Science in your columns to interpret Christian Science to the readers of your esteemed paper. He "is obliged to confess that after weeks of diligent study he has not been able to comprehend" it. Christian Science is a religion of doing, not merely of saying. It is performing daily and hourly cures, here and abroad. No well-informed person, keeping abreast of the times, can any longer afford to overlook its beneficent results, but unless the critic can demonstrate that he can heal the sick and reform the sinner by Christian Science methods, his views upon the subject cannot be taken seriously. In the mean time all sincere investigators are referred to original sources.

The question of the payments received by Christian Scientists for their services is criticised by the critic, and yet, unless the whole educational and ecclesiastical organization of modern society is based on an absolutely wrong principle, Christian Scientists ought to receive some compensation for their services.

Furthermore, no service can be said to be a strictly complete action until it has produced a corresponding sense of gratitude; and this sense will naturally express itself in material things among men, who are still subject to material beliefs. As a matter of practical experience, giving without receiving tends to pauperize the recipient, as all those who have any experience in charity work have long since discovered. No one, therefore, need cavil at the small remuneration given to Christian Scientists for their work. Patients are often helped who pay nothing at all, or only a mere trifle. But, when all is said and done, no adequate money return can ever be made for the glorious spiritual awakening, and the freedom from fleshly ills which mark the true healing in Christian Science. Such blessings are beyond price, and this is the tenor of the testimonies of all those who have been thus healed.

Jesus and his apostles did not charge a fee, it is true, for that was not in accordance with the custom of the time and country in which they lived. They accepted hospitality, they were provided with board and lodging, and Jesus said expressly that "the laborer is worthy of his hire," and enjoined the apostles not to carry purse or scrip, implying that they were to live from the grateful gifts of those whom they healed physically and mentally. It is not so long since the country schoolmasters of our pioneer states taught without money payments, but received their "keep" in the families of the pupils.

The fact that Mrs. Eddy's works are copyrighted is a source of sincere satisfaction to all Christian Scientists. It is safe to say that if Mrs. Eddy had not copyrighted her works when they appeared, Christian Scientists would now be urging her to take this necessary step, in order to keep her teachings from being perverted. It is an error on the part of your critic to write that Mrs. Eddy has "photographs and souvenir spoons for sale." This particular false report has been frequently corrected in the press, but in case your readers have not seen the correction, I beg to state that at the special request of a citizen of Concord the head of Mrs. Eddy, who is probably the most prominent person in that city at the present time, was engraved upon a souvenir spoon. This was done entirely for the benefit of this citizen. Mrs. Eddy has never received a cent from the sale of these spoons. The same is true of the photographs, and it is a pity that your critic should rely upon petty gossip, which could easily be corrected by applying to Christian Scientists themselves.

Far from looking "complacently over the heads of the poor," Christian Scientists are to be found wherever their help is requested, in prisons and various charitable institutions, preparing the inmates to be truly free. They are solving the charity question upon a common-sense, Biblical basis, by teaching men and women how to dispense with charity altogether. Because the congregations in Christian Science churches may appear well dressed to your critic, he should not jump to the conclusion that there are no poor among them. Experience proves that when people are in a harmonious mental attitude, such as Christian Science produces, they are able to work with better results, and this is the experience of countless persons who are finding success, as well as health and happiness, in Christian Science. It is open to the critic to try Christian Science for himself, since it is for all richly to enjoy.

Christian Scientists know that he is criticising what he imagines Christian Science to be, and they look forward to the time when the understanding of what it really is shall come to him and bring him the same blessings which it has brought them.

Thanking you sincerely for your courtesy in publishing this letter, I have the honor of signing myself, yours very truly,

W. D. McCRACKAN.

In the *Brooklyn Citizen.*

Much Ado about an "S."

The printing of the Bible is the most strictly guarded work in existence—a fact which appears strange until we reflect on the mischief an inaccurate Bible might bring about. The King's printers and the two universities of Oxford and Cambridge give to the world all the Bibles printed in the United Kingdom except some printed by special license. A few years ago the question arose whether the word "spirit" in Matthew, 4 : 1, and Mark, 1 : 12, should have a capital "S," it having been previously printed with a small one, and, although the word was obviously wrongly printed, it was not until after the ruling powers at the universities and the King's printers had met in solemn counsel that leave was given to use the capital letter.

Nothing sanctioned by authority in 1611 may be changed without creating something akin to revolution in the places where Bibles are printed.—*Liverpool Daily Post.*

The Lectures.

At Walla Walla, Wash.

On March 10, First Church of Christ, Scientist, of Walla Walla, had the pleasure of inviting their friends to a lecture at the Opera House, to be delivered by Judge William G. Ewing of Chicago. Attorney Cain introduced the lecturer. The house was well filled and the audience very attentive. Scientists from Waitsburg, Wash., and Athena, Weston, and Milton, Ore., were in attendance.

This is the fourth lecture given here and the second time we have had the pleasure of having Judge Ewing with us. Each lecture has given a fresh impetus to the work and we feel that this will not be an exception.

The introductory remarks of Attorney Cain follow:—

There was a time when men and women who professed religion supposed themselves in the possession of all truth, and that whosoever advanced any doctrine in conflict with the established belief was an impostor or a misguided heretic. Time and the ever-softening and refining influences of true Christianity have, however, eliminated much of the dogmatism from religious beliefs, until now men and women of various beliefs lend a willing ear to whoever seeks to give a new interpretation to, or throw new light upon, the teachings of Christ.

So great has been the change that the man or woman who to-day is considered an exemplary Christian and whose life is considered worthy of emulation by every one, would a few years ago have been considered something worse than an infidel.

The men whose teachings have been responsible for this change have not escaped a certain amount of persecution, but the time has come—and we should be devoutly thankful that we are permitted to live in such a time—when the man who conceives some new idea or advocates some new doctrine, is no longer considered a public enemy.

Christian Scientists, I am told, do not claim that they have discovered any new truth but that their doctrines are drawn from the Bible. However this may be, and however familiar their teachings may have been to the people of ancient times, they come as somewhat of a revelation to the people of the present day.

We have assembled here to-night to listen to a discussion of those doctrines. We have with us, as the speaker of the evening, a man whom I have known for a number of years and whose reputation as a lawyer and public speaker had made him known to me long before I had the pleasure of his acquaintance. Ladies and gentlemen, I take great pleasure in introducing to you the Hon. William G. Ewing of Chicago.—*Correspondence.*

At Cleveland, O.

On Tuesday evening, March 4, Mr. Edward A. Kimball, C.S.D., of Chicago, Ill., delivered a lecture in the new church edifice of First Church of Christ, Scientist, of Cleveland, O. The lecture was given under the auspices of First and Second Churches of Christ, Scientist.

The people began to assemble at the church edifice more than an hour before the time for the lecture to begin, and long before the appointed hour every seat in the large auditorium was occupied and hundreds filled the aisles and passage-ways, and even stood on the stairs and in the foyer below, getting as near the opening into the auditorium as possible in order to catch some part of the lecture, and many were turned away that could not find even standing-room.

It was a representative audience, composed of many of the most intelligent and cultured people of the city. Mr. Kimball spoke for an hour and a half, and the growing interest on the subject of Christian Science was manifested by all in the intense and almost unbroken attention which they accorded the lecture. Many persons expressed their approval and acceptance of the premises and conclusions which were set forth, thereby showing that the subject was handled in a very comprehensive manner. The value of such an address in educating the people and creating a just estimate of Christian Science, and our work and our Leader, can hardly be estimated.—*Correspondence.*

At Vancouver, B. C.

The Theatre Royal was well filled last night (March 4), when Hon. William G. Ewing of Chicago delivered a lecture on the origin and aims of Christian Science.

The chair was occupied by the United States Consul, Colonel L. Edwin Dudley, who in introducing the lecturer as a distinguished countryman, said he did so from the standpoint of one willing to learn more of the theories of the Christian Scientists' belief, with the general teachings of which he was only slightly conversant. The stage of the theatre was handsomely decorated with large British and American flags and Judge Ewing, who spoke for considerably over an hour in a quiet but impressive way, was listened to most attentively by the large audience, who at times heartily applauded his utterances.

The eloquence and evident sincerity with which the speaker advocated the cause of his church made a strong impression on many of his hearers, and at the conclusion of his address he was tendered a hearty and unanimous vote of thanks.—*The Province*, Vancouver, B. C.

At Whatcom, Wash.

When coming into the hall, which holds about six hundred, we said to Judge Ewing, "Judge, this seems a small crowd; the room is only about half full." The judge looked at us with a broad smile and said, "This is a pretty big room." It was the 6th of March, there was a drizzling rain, the roads and streets were muddy, and the evening was in the "dark" of the moon. In the audience we did not see a priest, a preacher, or a doctor, and only one lawyer; but there was a sprinkling of people from most of the churches, who listened with deep interest. We consider the lecture, nevertheless, a grand success and well appreciated by all who were there.

The press treated us very fairly. *The Fairhaven Daily Herald* said, "The lecture of Judge Ewing at Lighthouse Hall was a forcible and entertaining presentation of the doctrine and claims of Christian Science. He is an eloquent and persuasive speaker and held the closest attention of his hearers. Judge Ewing was introduced by Professor Wilson, of the normal school of Whatcom.—H. M. B.

Lectures at Other Places.

Marion, O.—Edward A. Kimball, March 3.

Truth's Easter Dawn.

BY N. W.

O HAPPY, joyous Easter, we welcome thee once more!
Through Christ, our risen Saviour, the night of death is o'er.
The sun of truth is beaming in rays of glory bright;
The world is full of gladness! Our's is a God of *might*.

In every flower that bloometh, in every bird that sings,
We trace Love's tenderest message. Within our hearts there springs
The joy of Life eternal; the joy that is of Thee,
O Christ, thou risen Saviour, our immortality!

O glad and glorious Easter! We lift our hearts in praise
To God, the heavenly Father, for all His wondrous ways.
May we, in Truth abiding, each day an Easter prove,
And so, all error losing, we gain Eternal Love.

Meridian of Greenwich.

Greenwich, as an English town, is nothing very remarkable, but as the headquarters of Father Time it is the most important spot on the earth. Its time is in every longitude of the globe; and every land, excepting Spain, Portugal, and Russia, measures the hours from its meridian. No navigator on duty is without Greenwich time in sight, and every town and geographical point is known by its distance east or west from the Greenwich observatory.

Ask the time, and the answer is always in even hours ahead or behind Greenwich or else the exact Greenwich time. In Great Britain, Belgium, and Holland you get the Greenwich time. One hour before Greenwich time rules in Germany, Austria-Hungary, Denmark, Italy, Sweden, Norway, and Switzerland. Two hours ahead of Greenwich is adopted in Bulgaria, Roumania, and Turkey in Europe; eight hours ahead of Greenwich applies in the Philippines; nine hours before the Greenwich time is used in Australia; ten hours ahead of Greenwich is official in Victoria, Queensland, and Tasmania. The United States, Canada, and Mexico have adopted the fifth, seventh, and eighth hours after.

So it is around the earth—every tick of every clock regulated by Greenwich time.—*New York Herald.*

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid $1.25
Six copies to one address 6.50
Twelve copies to one address . . 12.00

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the clerk's work.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

[Republished by permission.]

Easter Morn.

BY MARY BAKER G. EDDY.

GENTLY thou beckonest from the giant hills,
And new-born beauty in the emerald sky,
And wakening murmurs from the drowsy rills,
O gladsome dayspring! reft of mortal sigh—
To glorify all time—eternity—
With thy still fathomless Christ-majesty.

Brightly thou gildest gladdened joy, dear God!
Give risen power to prayer; fan Thou the flame
Of might with right; and, midst the rod,
And stern, dark shadows cast on Thy blest name,
Lift Thou a patient love above earth's ire,
Piercing the clouds with its triumphal spire.

With sacred song and loudest breath of praise,
Echoing amidst the hymning spheres of light—
And Heaven's lyres and angels' loving lays—
Send to the loyal struggler for the right
Joy, not of time and not by nature sown,
But the celestial seed dropped from Love's throne.

Prolong the strain "Christ risen!" Sad sense, annoy
No more the peace of Soul's sweet solitude!
Deep loneness, tear-filled tones of distant joy,
Depart! Glad Easter glows with gratitude—
Love's verdure veins the leaflet's wonderous birth—
Rich rays, rare footprints on the dust of earth.

Not life the vassal of the changeful hour,
Nor burdened bliss, but Truth and Love attest
The solemn splendor of immortal power—
The ever Christ, and glorified behest,
Poured on the sense that deems no suffering vain
Which wipes away the sting of death—sin, pain.

Pleasant View, Concord, N. H., April 18, 1900.

Notice.

Mr. Carol Norton, C.S.D., member of the Board of Lectureship in Boston, is hereby given from this date, the circuit of the United States and Canada wherein to lecture.

Any Church of Christ, Scientist, within this circuit can apply to said member for a lecture.

M. B. G. EDDY.

Pleasant View, Concord, N. H., March 24, 1902.

Fair Play.

ENTITLED as above there comes to us, with permission to publish it if we desire, an article so friendly, fair, and candid, that we have more than ordinary pleasure in publishing it. The author is Mr. Martin Sindall of Berlin, N. Y., a minister in the Seventh Day Baptist Church. Mr. Sindall, in his letter transmitting the article, says: "I am reading Science and Health, and also the *Sentinel*, which is sent to the Berlin reading room. . . . I am anxious to know the difference between Christian Science and Divine Science. . . . About a month ago I wrote an article on 'Fair Play' to our denominational paper, in reply to an article [criticism] which appeared from the pen of a man in Florida. He spoke of Christian Scientists, their methods, etc., at Sea Breeze, Fla. Are they Christian Scientists, or so-called Divine Scientists? I enclose the article. If you think it good enough, you may publish it over my name with reasons for its appearance as written above."

Mr. Sindall makes request for the answering, editorially, of some queries he submits, which will be duly considered, and we may conclude to answer them. As to this we are not yet fully prepared to say.

Answering Mr. Sindall's question as to the difference between Christian Science and Divine Science, we will say that in "Science and Health with Key to the Scriptures," Mrs. Eddy uses these terms interchangeably. Christian Science is Divine Science in the highest sense of the term, for it is based on the divinity of God, the divinity of Christ, and the Scriptures as the divine Word. This is not only the keynote of the text-book, but of the tenets of the Mother Church, which are as follows:—

1. As adherents of Truth we take the inspired Word of the Bible for our guide to eternal Life.
2. We acknowledge and adore one Supreme Infinite God. We acknowledge one Christ, namely, the Holy Ghost or Divine Comforter; and the son Christ Jesus,—man in the divine image and likeness.
3. We acknowledge God's forgiveness of sin in the destruction of sin, and the understanding that sin and sickness are neither real nor eternal.
4. We acknowledge atonement as the efficacy and evidence of divine Love, of man's unity with God, and the great merits of Christ Jesus, the Way-shower.
5. We acknowledge universal salvation as demonstrated by the Galilean prophet, in the power of Truth over all error, sin, sickness, and death; and his resurrection, whereby human faith and understanding are enabled to seize the great possibilities and living energies of divine life.
6. We solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and *pure*.

It is clearly seen from both the text-book and the Church Tenets that God is held, in Christian Science, to be not only supreme, but that He is all and in all; that is, that God as infinite Mind and His infinite reflections—man and the universe—constitute the all and in all of Being. In the first plank, or subdivision, of what is most aptly termed the "platform," we thus read: "God is infinite, the only Life, Substance, Spirit, or Soul, the only Intelligence of the universe, including man" (Science and Health, p. 330 New Ed.). Again, on p. 587, the Glossary defines God as "The great I AM; the all-knowing, all-seeing, all-acting, all-wise, all-loving," etc., while on p. 480 we read: "Man is not God, and God is not man."

No stronger terms could be employed to express God's supremacy and allness.

We cannot speak for all who have assumed the name of Divine Scientists, as we cannot claim to know fully what distinction they undertake to make betw en Christian Science, and what they are pleased to call Divine Science; but we are sufficiently familiar with the claims of a large

Digitized by Google

per centage of those bearing this name to be able to say, that the teaching of Christian Science is reversed by them. God's supremacy is set aside, and man is elevated to the place of God. In other words, they teach a divine *man* instead of a divine *God*. In some of their literature this teaching is more or less obscure; but some come out plainly, assigning to man the identical qualities or attributes Christian Science assigns to God, as above set forth.

Our correspondent, and all others, will see, therefore, at a glance the basic and irreconcilable distinction between the tenets and teaching of Christian Science and those who classify themselves as Divine Scientists.

As to the query about the teaching or claims of those at Sea Breeze, Fla., they do not, as we understand, call themselves either Divine Scientists or Christian Scientists; nor do they claim for their belief anything in the nature of a religion or Christianity. We have recently read this in their official literature.

Following is Mr. Sindall's article, which was prepared for publication in the *Sabbath Recorder*, a denominational paper of the sect in which Mr. Sindall is a minister:—

If there is one thing above another which the child of God should possess, it is that grace or principle called charity. . . .

Love is a divine principle, while charity is love in action; especially in the sense of a kindly deed, or the enlargement of good traits of character in a person's life, rather than the evil ones. With this idea in mind we may look upon charity and fair play as first cousins: they are closely related. He who lives in the Golden Rule atmosphere will be charitable, and will be able to say, "Another person has just as good a right to think, speak, and act as I have, if he manifests an interest in the welfare of humanity. Any one person is not to believe that he is the sole possessor of all truth. It is unsafe to live within a certain number of iron-clad rules, believing there are no others yet beyond our vision. A true life grows. Rules may be good, but they should not be iron bands. 'Rules are fetters only to men of no genius.'"

We learn by studying. We grow by imbibing. It may be that some new-fangled idea or fad will even possess something of merit, of truth, and by studying it, or coming in contact with it, we may imbibe something which will aid in our spiritual development. At least, let us be charitable towards those in modern religious life, even though some may denominate their claims fads, new-fangled ideas, and modern inventions. Give them fair play. If they are of God they will prosper; if not, they will come to naught. The ideas thus far, and those which are to follow are inspired by an article under "Florida" in last week's *Recorder*. A book often sells in greater numbers because of severe criticism. Christian Science seems to thrive in the midst of its critics. The writer of this article has more than ordinary respect for the brother who wrote the article, but would like to ask, Would it not be wise to know as much as possible about a certain religious sect before we criticise its methods and devotees too freely? A person cannot present a good criticism upon a book unless he has first read or studied that book. This holds true of all religious beliefs. Do not take somebody's say-so.

The writer is not a Christian Scientist, but has read a large amount of literature, not only from Mrs. Eddy's pen, but from many others who are one with her in belief. A few quotations from their writings will answer the Florida brother better than any words of mine. In their *Journal* for December, 1901, page 534, we read:—

"The Founder of Christianity declared, 'The works that I do shall he do also, and greater works than these shall he do.' His disciples healed the sick, and the church for the first three hundred years of its history was obedient to the entire command of the Master, to preach, and heal.

"According to the teachings of the New Testament, you can no more divorce practical works from the religion of Jesus than you can take the blue from the sky, or love from a mother's heart. Said one apostle, 'Faith without works is dead;' and the beloved disciple declared, 'He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?'

"It is sometimes said that healing ended with the life of the Master, and it is also declared that it is not a part of religion to heal the sick. It has been stated that Jesus healed the sick because of the power which he possessed and which none others had. The words of Jesus and the practice of the early church do not bear out that statement. He declared, 'These signs shall follow them that believe; . . . They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover.' The works which Jesus accomplished, his disciples did likewise. If we are without these practical works, then are we without that feature which made the religion of Jesus unique.

"Christian Science would have it distinctly understood that its healing is not accomplished through will-power or animal magnetism. The false healer declares, 'I can of mine own self do everything.' Jesus said, 'I can of mine own self do nothing;' it is 'the Father that dwelleth in me, He doeth the works.' Again he said, 'Not my will, but thine, be done.' So in Christian Science, God is the Healer. The less there is of self, the more there will be of the Father. The Christian Scientist seeks not to exalt self, but to exalt God. In himself he is nothing. With God, he becomes a power for righteousness.

"The teaching of Christian Science is that God made all that was made, and behold, it was very good. It declares that all that is true, and beautiful, and good, is permanent. It takes from man only what he does not want, and leaves him the good, the beautiful, and the true. It agrees with the apostle who said, 'The things which are seen are temporal, but the things which are not seen are eternal.'

"Again, this system is questioned because of its supposed teaching as to the unreality of sickness. To the sick, there is nothing that seems so real and genuine as pain. This healing gospel does not dispute that, to their sense of things, suffering is real. Just as the mistakes in mathematics are no real part of the science of mathematics, so it is held that sickness is not a part of the Kingdom of God, that it is a false condition which will give way to the truth. This religion holds that life and health are positive, that sickness is negative and not the real part of man. Had Jesus regarded sickness as a part of God's kingdom and something real and eternal, he would not, and he could not, have healed it, for what is of God endures. To him sickness was not of God, and therefore he could and did destroy it."

In regard to Mrs. Eddy, the Founder of Christian Science, a former resident of Boston says:—

"It was my privilege to live in the home city of the Founder and Discoverer of Christian Science. From the people there, and from others whom I have met, I have learned her history. She was born of pious and godly parents. So pure and true was her early childhood that a sainted clergyman said of her that she was sanctified before she had birth. She was always a great student of the Bible, and at her mother's knee was taught that prayer to God would heal the sick and sinful. In childhood even, she banished sickness by an appeal to her heavenly Father. As she grew to womanhood her thoughts were upon God and the ministry of helpfulness. I met one who knew her in her early married life, and she told me that it was a joy and comfort to visit Mrs. Eddy in those early days and be blessed by her gracious presence. I have met another who later knew her before she discovered Christian Science, but when her thoughts were upon helping others, and she banished pain and brought relief to this suffering one through the love she bore to God and man. In 1866, having met with

Digitized by Google

an accident which the physicians declared was incurable, she turned from earth to heaven, and opening her Bible to the healing work of Jesus, the Christ power which through him made whole the diseased, blessed her, and she arose from her bed of pain healed and well. She saw that the same power which healed her would heal others, and she gave three years of devoted study of the Bible that she might make known this law of Love to others. She sought not to keep the secret to herself, but her whole desire was to make clear to others that religion of Christ which banished sickness and sorrow and gave joy and health. She is now the Leader of the mighty movement, and the same loving trust in God which marked her early days is with her now, the same tender sympathy for the afflicted adds a beauty and a grace to the charm of years. All her waking hours are given to benefit humanity. She has been misunderstood, but she has not faltered in her love to God or her fidelity to man.

"To those who have studied the religion of Jesus in the light of Christian Science, it is indeed the royal law of Love. It has banished pain and suffering, it has healed the sick and sinful, and made white the stained robes of the fallen. It has put before man a star of hope and cheered him with the eternal presence of the living Christ."

Do you believe in the brotherhood of man? Do you believe in charity? Do you believe in fair play? If so

> Then, brother man, fold to thy heart thy brother,
> For where love dwells, the peace of God is there;
> To worship rightly is to love each other,
> Each smile a hymn, each kindly deed a prayer.

MARTIN SINDALL.

We deeply appreciate the Christianly spirit which moved Mr. Sindall to attempt to correct unjust criticism in his own denominational organ. He had read the Christian Science text-book and the official periodicals sufficiently to see the injustice of the adverse criticism and the misapprehension upon which it was based, and with commendable brotherly love, he sought to correct it.

Would those who are so ready to criticise Christian Science, and its consecrated head, the Rev. Mary Baker Eddy, do themselves, as well as Christian Science and Mrs. Eddy, the justice to read of it and of her life and character in the same intelligent and fair spirit, they would withhold their criticism, for they would see no cause therefor.

Massachusetts Metaphysical College.

THE annual term of the Massachusetts Metaphysical College will open, with the Board of Education, on the first Monday of June, 1902 (June 2), at 10 A.M. Unless otherwise arranged, the sessions will be held in the Mother Church edifice, and will continue not less than two weeks.

Blank applications will be sent upon request. They should be filled out and signed so as to be returned to the Board not later than May 1, 1902.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Board of Education.

THE member of the Board of Education in Boston, cannot, for want of time, make appointments for personal interviews relative to the forthcoming class. If any special reasons exist why application is made, or any explanations are to be made, let them, in brief form, accompany the applications.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Notice.

IN reply to inquiries we will say that the By-law which was repealed, as announced in the *Sentinel* of March 13, 1902, did not relate to the Board of Lectureship or the Board of Missionaries.

Among the Churches.

The Work at Asheville, N. C.

The members of First Church of Christ, Scientist, of Asheville, N. C., are desirous that our dear Mother may know of our deep appreciation and heartfelt gratitude to her for her latest gift to her children all over the world, in the recent revision of "Science and Health with Key to the Scriptures." The pages of our text-book seem doubly illumined, and we pray, that as we study its pages we may understand and practise ever more its precious contents. We see in this vast work of revision, an added proof of Mrs. Eddy's tireless and selfless labors of love for the redemption of the race, and we thank God for our Leader.

For some time past the members of our little church have longed to share with the Field, the great happiness that is ours in seeing our blessed Cause growing surely, although slowly, in this beautifully significant "Land of the Sky."

As the vast majority of people who visit Asheville, come health-seeking, we are striving to realize more and more of the spiritual and harmonious atmosphere of Soul, which is indeed the health of Israel. So pure and holy is the true mental attitude of man, as revealed in Christian Science, that here no germs of evil can brood, no microbes of fear and despair exist, but God is understood to be the centre and circumference of Being, the only cause, the only effect.

The attendance at our Sunday and Wednesday evening services is steadily increasing. The increase in the roll of visitors at the reading room and the sale of literature is also very encouraging. From many of the testimonies given at the Wednesday evening meetings, we appreciate more and more fully the fact that the God-Principle of Christian Science is to-day the same in might and majesty as it was nineteen hundred years ago when taught and demonstrated by Jesus of Nazareth, healing all manner of diseases and reforming and uplifting the sinning race of Adam. Our desire is that the thoughts of this church may be in unity with all loyal branches; that we may blend with theirs our song of praise and thanks to God for the revelation of a practical Christianity, adapted to every need of mortals, and to our beloved Mother. Our constant, earnest prayer is, that we may be found worthy to help bear aloft the banner of Christian Science upon the highways of progress and enlightenment, and among the hedges of mortal beliefs; to share in the grand work of spreading the glad tidings of the Gospel; to cheer and bless and heal our fellow-men; and to follow meekly, patiently, and obediently in our Leader's loving footsteps.

We rejoice in the assurance that divine Love is brooding over the Mother Church and all her Branches with outstretched wings of righteousness, binding us together in one strong body; healing, uplifting, regenerating. And we try often to recall the words of the Master: "And I, if I be lifted up from the earth, will draw all men unto me."—ELIZABETH EARL JONES, Asheville, N. C.

Progress at Ashland, Ore.

In the spring of 1892, a gentleman sent to Quincy, Ill., for a healer to come to his wife, who had been seriously ill for several weeks. The healer, a loyal student of Mrs. Eddy, gave class instruction to a small number before returning to her home. The seven students met for some time and studied the lessons together, but some of them leaving the city the lessons were discontinued until June, 1895, when four interested ones began reading the lessons at the home of one of the number. In 1896 we organized a society, electing Readers and officers. In May, 1898, we rented Masonic Hall, and although we did not in-

Digitized by Google

crease in number, we did grow in thought and demonstration. In October, 1900, some new members coming in, we reorganized with seven members, meeting Sunday morning and Wednesday afternoon in Masonic Hall.

In June, 1901, a loyal student came to us from the East, who at once took up the work of healing, which awakened such an interest that in six months our membership had increased to sixteen. At our annual election in January, 1902, this student was unanimously elected First Reader and leader of the work here, perfect harmony being demonstrated in our society. A room was rented from the principal hotel of the city for a reading room, and there our Wednesday evening meetings are held. Our Sunday service has an attendance of thirty.

On the evening of February 21, our first Christian Science lecture was given by the Hon. William G. Ewing, which was well attended, and we believe will do much toward changing the thought of many about Christian Science as a religion; and so, after many years of struggling against opposition, we know that the work is established in Ashland. "By their fruits ye shall know them," for *here* and *now* the lame do walk, and the blind do see.

MRS. M. S. MATTHEWS.

The First Christian Science Service in Manila.

The first regular Christian Science service in the city of Manila was held January 26, 1902. We had been having our lesson at the home of one of the students out at Malabon, five miles from the city, but we decided that it was time to have a church in Manila.

Through the courtesy of the commander of the port we have been given the use of the chapel where the army services are held. It is a large, airy, well-lighted room, furnished with chairs, organ, etc.

It was a bright, beautiful, summer day. There were twenty-one persons in attendance. We were glad to have even that number to start with, but we know that this will be increased and more than doubled soon for a great many persons are being healed and becoming interested in the work.

The subject of the lesson was "Love," and we were all glad to have this for our first lesson,—the foundation of our church.

There are six instructed students in Manila and quite a number of people who are reading and becoming interested through healing. Some very good work has been done here. We expect to start a building fund immediately.

Some days the United States seems very far away, but we know that God is in Manila, and even "If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me."

We are at work over on this side of the world and you may expect to hear more from us.—ANNA M. CAMPBELL.

A Word from Riley, Kan.

The members of our church in Riley, Kan., wish to acknowledge their gratitude for the great blessings bestowed on them by Christian Science in the overcoming of a great variety of discords, ranging from the petty cares and slight ills of life to typhoid fevers, broken bones, the grip, ulcerated throat, and consumption. In business matter, divine Love has been able to move everything to one harmonious end. We have learned that divine Principle eliminates every seeming discord.

When erecting our church building we were surprised at the ease with which every want was supplied, even after the two years' failure of the corn crop and the consequent seeming hard times. Even the community around us wondered at our phenomenal success.

A. SOUTHWICK, Riley, Kan.

From our Contributors.

Resurgam.

BY ALICE SINCLAIR.

Dost seek thy Saviour in the gloom,
Within the rock-bound, vaulted room?
Not there is he;
The Christ ne'er gave himself to death,
The Saviour from its chilling breath
Was ever free.

Dost think that aught could harm or kill
Eternal Life? frustrate the will
Of Him above?
Dost deem that human hate could reach
Almighty Love, Heaven-sent to teach
The Way of Love?

Ah no! the Christ ne'er bore the cross,
Of heavenly joy ne'er knew the loss—
The Perfect One.
The human semblance, on the hill
Of Calvary they sought to kill—
The virgin's son.

O joyful, joyful Easter day!
Thy Saviour lives, has lived alway,
A light to shine
Adown the gloom, that thou may'st see
Thy gift of immortality,
Priceless, divine.

Retrospection.

BY A. F. BLUNDELL.

LOOKING backward over the past six years and realizing how much Christian Science has done for me during that time, I wonder why I have not before sent in my testimony as a small tribute of gratitude for the many blessings received.

About as far back as the time above mentioned, my attention was called to Mrs. Eddy's beautiful teachings. I had for fifteen years suffered with catarrh, which I had tried in vain to get rid of, consulting physicians of all schools and trying all kinds of systems of cures which seemed to give any promise of relief. At the same time I had a chronic stomach trouble, which caused me much suffering and made it necessary for me to take medicine every day, in order to maintain such conditions of existence as would allow me to get about and attend to my necessary business affairs. This latter trouble had also had the attention of either one physician or another for a period of at least twelve years, the only result being a gradual increase of unfavorable symptoms, which left only one conclusion; viz., that the end could not long be delayed.

To relieve the catarrh and enable me to secure rest at night, I had become a slave to cocaine, and gradually increasing doses of this drug became necessary to get the desired results. To add to my misery, I was fast becoming a nervous wreck, scarcely able to maintain ordinary civil or courteous relations of intercourse with those with whom I came in contact. During some severe winter weather I contracted the grip, which brought with it a bad cough and aggravated the other troubles. It was in this condition that I was finally induced to try Christian Science, almost under protest and having not the slightest thought of being helped, but it seemed the only remaining hope. A short time after the Scientist had talked with me, I found that I was listening to something about the Bible and Christ that had never occurred to me before. It gradually dawned on

Digitized by Google

me that these people had something that I had been looking for all my life and a great understanding of the Truth seemed to be revealed to me then and there. I took treatment and left the room, going to a restaurant and indulging in a meal that under previous conditions would have produced serious troubles.

I had agreed to continue treatment and purchased a copy of Science and Health. Before I reached home all unfavorable symptoms of the chronic troubles had disappeared, and the thought of them never entered my mind until I happened to see the medicine bottles which had for so long a time been associated with my daily life. These were at once destroyed, and from that day to this I have never had occasion to make use of any drug or other material remedy. I was healed at once with the exception of a slight cough which lasted two or three days, but I continued treatment two or three weeks, and at the end of that time felt like a new man, both physically and mentally.

I read Science and Health and the Truth contained in its pages was a beautiful revelation, but I have found that each successive reading of it is a continued and greater revelation than the last. I found it indeed the Key to the Scriptures. I had found at last what I had more or less diligently sought for through the different Christian denominations and other religious beliefs. I had been in turn a member of the Methodist and Episcopal Churches, an earnest attendant at the Presbyterian, Congregational, and Universalist Churches, had fraternized often with the Roman Catholic priests and Jesuits, had investigated Spiritualism, and last had become a disciple of theosophy, failing to find, however, a religion that was practical for every-day life, or that had to my understanding a really consistent basis. This is what Christian Science has proved itself to be to me, and it has been my blessed privilege gradually to realize more clearly each day, that it is indeed in God I live, and move, and have my being; that God is really, in absolute fact, Omnipotent, Omnipresent, and Omniscient.

During the time that has elapsed since this beautiful Truth was first brought into my life, I have had a number of other ills to meet, but divine Love has always proved more than sufficient for all my needs, and I have been able to demonstrate that as my day, my strength shall be.

As all Scientists know, the physical healing is not the greatest blessing received. It is the wonderful spiritual uplifting which follows the application of the Truth that makes us anew and relieves us of all old doubts and fears as to the final outcome of all contests with any manifestation of discord in anything connected with our daily experience or environment. Words can but feebly express the sense of gratitude which I feel to our beloved Leader, Mrs. Mary Baker G. Eddy, and to those who have patiently and kindly helped me to keep in the right path. I hope to prove that "it is in deeds we serve the Master," and as we serve him we cannot help but add to the crown of rejoicing of our Mother in Israel.

A Question Answered.

BY AMELIA SCHULER KORFHAGE.

"WHY do you say disease is unreal, and then do all you can to prove that you heal it?"

The above question is one that is often asked of a student of Christian Science. We have authority for saying disease is unreal; for Jesus proved it unreal, and yet he healed all those who came to him for healing.

In the Bible we read that God made everything, and He saw that it was all good.

Now Jesus said, "Think not that I am come to destroy the law . . . but to fulfil." And again we read, "For this purpose the Son of God was manifested, that he might destroy the works of the devil."

What was it Jesus destroyed? Sin, disease, and death. Then we know that sin, disease, and death are not "the law of God" but must be "the works of the devil." What is the devil? Jesus said, "he is a liar, and the father of it." Now what is a liar? One who makes lies, and a lie is that which is the opposite of the truth; now when we believe in sin, disease, and death we are believing lies, we are believing in "the works of the devil," we are believing in unreality.

"Ye shall know the truth, and the truth shall make you free." If we would know the truth that makes free, we must study and believe only in "the law of God," we must know that in "the law of God" there can be good only; that it is eternal harmony,—"yesterday, to-day, and forever."

Then the questions are asked: "But where does the devil come from? who made him? what is he?" Why don't you ask where darkness comes from? who made it? and what is it? Because long ago it was discovered that darkness is nothing, that light would instantly destroy it, so now no one thinks of studying darkness (nothing), but as soon as it appears we bring in the light, and it instantly disappears; our scientific men of to-day are continuing to study light, consequently we are getting more light and less darkness.

What if our old composers of music had spent their lives in studying discord, would we have the grand and beautiful music we now have, and so greatly enjoy? Suppose our teachers of music taught their pupils discord instead of harmony, would these pupils learn music? No, certainly not; we do not believe in, nor study discord about anything excepting man. Sin, disease, and death is discord, the lie about man; now the way to destroy a lie is to learn the truth about that which the lie is about.

A cashier of a bank was once asked what he knew about counterfeit money. He answered, "I don't know a thing about it, but I know real or good money so well that as soon as counterfeit comes to me I detect it immediately and reject it." Good money comes from only one source, and if one studies it, one soon becomes familiar with it; but counterfeit comes from so many different sources that if one spent their time studying it when would one learn the real or good money? So it is with man. If God is good, and created everything, everything must be good. If God is Spirit, then all His creation must be spiritual; if God is All-in-all, then there can be no room for anything but good. If God is Life, then there can be no death; if God created man in His image and likeness, then man can only be like God, Good, and subject to no other law than the law of God, which is and must be a law of eternal harmony.

Then why not study that which must be the truth about man? "But of the tree of the knowledge of good and evil, thou shalt not eat of it: for in the day that thou eatest thereof thou shalt surely die." From the very beginning the knowledge of evil has brought death; but the knowing of good only, is Life eternal.

The statement is often made by clergymen and others that Jesus did not mean we should heal the sick as he did, he only did it to prove his divinity or his Christianity. There is no authority for such a statement; it is only an opinion, but there is authority for believing he meant for us to heal the sick as he did, for he said, "Go ye into all the world, and preach the gospel to every creature. . . . And these signs shall follow them that believe; In my name shall they cast out devils they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover. . . . And they went forth, and preached everywhere, the Lord working with them, and confirming the word with signs following."

The student of Christian Science, which means a student of "Science and Health with Key to the Scriptures," believes Jesus meant all he said, therefore strives to understand the Word so he may have the signs following. "Wherefore by their fruits ye shall know them."

Fear Destroyed.

BY H. L. B.

"THERE is no fear in love; but perfect love casteth out fear." In proportion as we understand God as Love, do we cast out all fear, and bring about harmonious conditions in ourselves and others. It has been this realization of the perfect Love that enabled me to overcome a chronic trouble of ten years' standing.

I became a member of the Baptist Church when quite a boy and attended regularly, but could not become interested in the Bible, for I could not understand it. Since taking up the study of the Bible in the light which "Science and Health with Key to the Scriptures" throws upon it, I find a new book which is very dear to me and is my daily companion, and I know that in the measure that I live the great Truths found therein, I am striving to have the Mind in me which was also in Christ Jesus, and am able to prove that the "Lord He is God; there is none else." This Love which we are taught in the study of Christian Science enables us to love our neighbor, no matter what he seems to express toward us; for we are all of one big family, "And there shall be one fold, and one shepherd."

We are able to overcome a discouraged sense by the knowledge of its unreality. "For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind." I know that "Christian Science, understood, coincides with the Scriptures" (Science and Health, p. 358). Our gratitude goes out to our Leader, Mrs. Eddy, for what she has done in showing us the way to harmony, and for the wisdom with which she leads us now.

As Dawn Begins.

BY IDA HODNETT.

As dawn begins to dart its rose,
To see the tomb sad Mary goes,
Wherein lies one who, from a tomb,
Erstwhile called Lazarus out of gloom.
As dawn begins, she goes.

Now quakes the earth; and Life's pure tone
Swift comes to roll away the stone;
The voice of Life destroys earth's woe
With thoughts and words as white as snow.
Life rolls away the stone.

Go, Mary, go; spread fast the news,
Speed, speed thy foot o'er morning dews;
Life is divine, and not of earth!
O hills and vales! sing out your mirth!
She speeds o'er morning dews.

An Easter Song.

BY LAVILLA E. ALLEN.

O, joy that fills the world with song,
O, Resurrection Day.
When angels came a shining throng,
And rolled the stone away.

And Death is vanquished, for Christ rose,
And from that radiant tomb,
Gleam rays of Life, and Truth, and Love,
Which banish fear and gloom.

Fair Easter lilies, bend your heads
In adoration sweet,
And lay your perfumed chalices,
With joy at his dear feet.

Testimonies of Healing.

Ever since I can remember my mother had been a victim to sea-sickness and car-sickness. Many occasions brought about the same result; she would turn sick looking at moving water when standing on a wharf, or when riding backwards in a sleigh. She would not ride in street cars or elevators. She suffered mortal agonies when traveling on land or sea. After we had been studying Christian Science about four years and had been able to overcome a great many claims, we wished to make a journey east. Our first stopping place was to be Iowa. Our tickets were purchased and baggage checked for that point. We reached Seattle and changed from boat to car. All seemed to be going well until about two hours out from Seattle, on the train, when my mother began to feel ill. She reached the point where she could do nothing for herself, and I could do nothing for her, it seemed. I was up all night with her as she grew worse and worse; she suffered more this time than I had ever seen her before. That night was a long one to us both. About morning she said she could not endure the suffering, she would have to get off the train. I immediately hunted up the conductor, who was most kind. He said he would put us off at Spokane and also our baggage.

As soon as we were safely settled on solid ground mother felt easier and grew better all day. We concluded that as soon as she felt able to take the journey back to our home, Port Townsend, we would return, giving up our trip forever.

We did not wish to go through another experience of the kind, and in the afternoon sought a healer. The following morning mother awoke saying to me, "We will not return, but go on, it would be giving up to error to go back now." In four days we resumed our journey, under treatment. That was not the end, however; it was a fight to a finish. About ten hours after leaving Spokane mother was as bad as ever; she grew worse and worse, alarmingly so. At Havre, Montana, I left the train as it made a stop of twenty minutes, to telegraph back to the healer that "Mother is very ill. Please treat at once." To the surprise of every one in the car, and almost to ourselves, the healing was instantaneous. In less than an hour after the message was sent mother sat up, laughed and talked, and was ready for something to eat. The fellow-passengers came to inquire what remedy she had used, as one man said he had never seen any one recover so suddenly.

She gladly told them of her physician and remedy.

We journeyed to the Atlantic coast, to New York and Boston, making short journeys after we left Iowa, as we wished to stop at many places.

We made a long stay on the Hudson. I had not wholly overcome my fears, for I dreaded the long journey back to the Pacific coast, which was almost continuous.

I went to a healer in Troy, N. Y., stating my fears, and asked for treatment for us both for the return journey. She gladly gave it and we had a most delightful trip home, without the slightest suggestion of the old trouble. Mother walked about, the whole length of the train, enjoyed looking out of the windows, riding backward or forward. When we reached home she said it did not seem as though she had been on the cars, it had been such a pleasant trip. This occurred two years ago.

GRACE PITCHER, Seattle, Wash.

I have been reading "Science and Health with Key to the Scriptures," for about nine years. I was healed two years before of effects of an accident in the timber near Custer City, S. Dak. While felling a tree, some lodged timber fell, one tree falling on me and crushing me down until my forehead was pressed on the ground by the side of my right foot, my left limb being doubled under me.

Digitized by Google

This is the position I was told I was in; as the doctor put it, shut up like a jack-knife.

I knew nothing of the accident until the next day. I suffered much for more than two years from internal injuries, my whole right side being affected, the right side of my neck and head being partially paralyzed all that time, and my left knee was in bad shape. All this time I was seeing and hearing of the wonderful works of Christian Science healing. I finally took treatment. I reported every evening—no change—until the fourth day, when the pain shifted to my left side; the Scientist said, "I am glad to see something move. To-morrow it may be nowhere; for it is nothing at most." The fifth day I realized that I was healed. Two weeks later a team ran away with me and used me up badly. A surgeon was called. I was next moved on a bed to other quarters to a friend's room where he and his mother and sisters kindly waited upon me. The next evening I called for the Scientist to come to my room. He came knowing the opposition all about me. He said, "If you think you want a doctor, call a doctor." I answered, "No; I want you to treat me." I was suffering terribly from bruises, and my spine was so sprained that I could not turn or lift my head. He treated me and I went to sleep, I think for the first time since I was hurt. When he closed the door in leaving I awoke. I was free from pain. I raised to a sitting position, laid down, raised again, turned over, and went to sleep. Next morning I was suffering as before.

The suggestion came to me that the Scientist was alarmed and feared he could not heal me, and for that reason he had mentioned the doctor. I called for the doctor and sent the Scientist word.

The doctor was unable to relieve me. I was anxious to get home fifteen miles in the country. I again called for treatment of the Scientist. In three days I was out, and in a short time was able to do light work again. I afterwards called for treatment, every time with the same results. A year or more passed, when a Bible class was started four miles from my home. I attended and soon procured a copy of Science and Health, and the benefits have been so numerous and constant ever since that I would have to write a book to tell them. I have never written a word before for the *Journal* or *Sentinel*. I have attempted several times to write briefly of this first experience, but made the same failure that I have made this time, and thought the *Sentinel* would not have space for so much, so did not send it. I might add here that all is not smooth sailing, and while I was healed of the results of the accidents, I was partially healed of catarrh contracted twelve years before, and lameness from scarlet fever when one year old. I realize great help from the little understanding I have. I had not had my Science and Health more than three months before a disease disappeared which had given me much trouble for fifteen years.—W. D. ARNER, Delta, Col.

I have often thought what a great thing it would be to come into Christian Science as a little child, but such was not my privilege. I write my experience for the benefit of those who may become discouraged at their slow growth and tardy demonstrations.

I came to Christian Science because it seemed to hold out a promise of higher spiritual understanding, and that was what I was longing for. My constant prayer was, "If this is the Truth I want it;" at the same time I antagonized almost every statement made to me. Thus working, doubting, praying, several years passed by, until, little by little, the Truth began to dawn in my consciousness, and slowly but surely antagonism vanished, until now it is my greatest desire to be obedient in *all things*.

Mrs. Eddy has become to me the tender, loving Mother in Israel, working for all mankind. Her book, Science and Health, did not displace the Bible as mortal thought suggested, but added light thereto.

The price of all Christian Science literature and class instruction seems small when compared with the help and understanding it brings. And so I might recount each step of the unfolding, but will only add that I am grateful now for every demonstration, and thank God for Christian Science, our beloved Leader, Mary Baker G. Eddy, our text-book, Science and Health, our periodicals, my teacher, and all faithful workers in the Field.

FLORENCE E. MOORES, Salem, Ore.

I did not come into Christian Science for its physical healing, but during the five years since I accepted its teachings I have seen cases of tumor, diphtheria, measles, mumps, the grip, chills and fever, and accidents overcome so quickly that it was no wonder outsiders doubted if the cases could have been as bad as at first represented.

We all can by faithful study of the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures," and by applying the rules there laid down, gain such an understanding of the only true and living God that we really know who our helper is and can fully trust Him. When we come to the stage that we know and when perfect Love has cast out all fear, our demonstration is made, no matter what the manifestation has seemed to be.

Is it any wonder we feel thankful to the one who has opened this way for us? My heart has been thanking Mary Baker G. Eddy for the past five years, but now I openly thank her and all the dear ones who are working for the same cause, and whose words of experience and admonition are so helpful and encouraging.

The foregoing but faintly expresses my love and thanks for all that Christian Science has been and still is to me.

JEWEL R. BRADFORD, Jackson, Miss.

Rising with Christ.

BY J. W. H. B.

BORN to a higher sense of Life,
Out of the turmoil, din, and strife,
Into a harmony, sweet and grand;
Led by the Father's unerring hand,
Rising with Christ to victory.

Out of the darkness of self and sin,
Into the higher life with Him;
Leaving the pleasures of sense for soul,
Reaching at last the heavenly goal,
Rising with Christ to victory.

Knowing no law, but the "Law of Love,"
Fixing our mind upon things above;
Rearing a mansion grand and fair,
Of beautiful thoughts like jewels rare;
Rising with Christ to victory.

Leaving all envy, hatred, and strife,
Gaining the full and radiant life,
Where sickness and pain, no entrance can find,
Dwelling serene, in the realm of mind;
Rising with Christ to victory.

From the door of our tomb is the stone rolled away,
By the "Angel of Truth" this glad Easter day;
Dominion is given, o'er death and the grave,
He is risen, the Christ, who is mighty to save,
With him let us rise to victory.

Religious Items.

Reason and faith are in the minds of most people much at variance. They will either "love the one and hate the other, or else they will hold to the one and despise the other." There generally is no room in the same mind for the activity of both faith and reason: the one will exclude the other. Sometimes one or the other will either be weak by nature, atrophied from want of use, or asleep in indifference; and such mind will be at ease. In others, as in the celebrated Faraday, the deep-going difference between faith and reason is fully recognized, and harmony is established by strictly separating their respective spheres of activity. We find this state of mind especially among men who, after a careful and thorough religious training in their youth, have given all their thought and energy to either study, research, business, or art. They recognize the gulf fixed between faith and reason, but they have neither the time nor the inclination to bridge the same. Yes, they even despair of its possibility by other minds. They sit, therefore, quietly on that side of the great chasm to which nature or education inclines them most. But this is a peace of mind dearly bought; it is indeed only a make-believe peace. Such men are spiritually divided in themselves. True peace will never exist in a soul until reason and faith have become reconciled, have joined hands across the chasm.—*The Christian Register.*

Living in the past and worshiping the dead and departed are not exclusively Chinese characteristics, according to the Rev. Johnson Henderson of Armour Mission. Prejudice against the new, he asserted, is often one of the greatest barriers to progress.

"The onward march of civilization," continued the pastor, "is everywhere marked by the struggle between the old and the new. Science advanced only as it was able to overthrow those theories that the people had accepted implicitly for centuries. Mechanical science is a continuous story of the sacrifice of the old for the new, and so deeply seated is the prejudice against such innovations that many men are still foolish enough to contend against the introduction of improved machinery.

"Religious progress always has been impeded by a superstitious veneration for the old that finds no place for the new. Many men cling to the false and resist the truth on no higher grounds than that their fathers worshiped on the same mountain where they offer their devotions. Much of the contention and strife in the religious world today are due to the unwillingness of men to give up traditional opinions and customs even in the interest of truth."

Chicago Tribune.

Is it not true of many Christian workers that in their haste to achieve results they neglect to seek by prayer, by thorough study of the Scriptures, and by strict obedience to the will of God, the indwelling presence of Christ? Does not their zeal often prove fruitless? . . .

It is large fruitage which glorifies our heavenly Father. Pentecost honored Him. It testified to His wondrous power as well as to His boundless mercy. By the addition of thousands to the Church, Jesus Christ was exalted. Had we faith, were we obedient, might we not have like days in modern times? Such ingatherings would blazon our Saviour's matchless worth. A saved soul testifies his love. A holy life manifests his might. The ability to turn men from darkness to light is of divine origin. Christ is the supreme influence. Unless he works through us our efforts are useless.

The Christian Advocate.

We are taught to believe in a future heaven where all that is bad shall be eliminated and all that is good shall survive. Why not begin here and now to eliminate injustice, tyranny, oppression, greed, and power; and as the kingdom of heaven is righteousness, peace, and joy, let these survive? The kingdom Christ came to establish was not a future kingdom. "The kingdom of heaven is within you." The Law of Love was not for a future world, but for this. . . . Let us live and work, and pray, . . . until competition shall cease and cooperation shall be a fact; until men shall cease to hate and all men learn to love; until righteousness, peace, and joy, because the fittest, shall survive in the coming age.

REV. FRANK D. BENTLEY.
In the *Arena.*

Professor Edmund J. Wolf, D.D., LL.D., says in *The Homiletic Review:* "It devolves, no doubt, upon every preacher not only to preach Christ and to preach what he preached, but also to preach as he preached, to imitate the Master in form and spirit, in manner and method. Every preacher is bound by virtue of his office and his oath to cultivate each grace of the Master, to have for his ideals all the attractions of him who spake as man never spake. For any to neglect or to ignore these graces as unattainable is to flout the terms of their commission, which reads, 'As my Father has sent me, even so I send you.' And to this commission correlates the promise, 'He that believeth on me, the works that I do shall he do also; and greater works than these shall he do.'"

Personal acquaintance with Christ is the supreme qualification for spiritual leadership, and to introduce others to such acquaintanceship is its supreme purpose. To receive Christ's baptism and to drink his cup is to enter into inner communion with him. Physical sufferings are in themselves of no advantage. There is no merit in fastings, or penances, or flagellations, or crucifixions. Many men have suffered vastly greater physical torture than did Christ, but they knew nothing of his anguish of spirit, and nothing of the joy of his fellowship with God. Spiritual leadership must be born, not from torment of body, but of travail of soul, of a vision of sin, its demerit, its forgiveness, and the blessedness of restoration to the peace that passeth understanding.—*The Examiner.*

Every Christian owes it to his inner life to drink for himself at the living fountain of divine inspiration and communion, and not to depend for the living water upon the fidelity or spiritual vision of any man, even though he be the wisest and most spiritually minded of pastors. It is the very genius of Christianity that it opens in the heart of the believer "a fountain springing up into everlasting life," and no draughts from the fountains in the souls of other men can quench the soul's thirst like the water drawn from the spring that Christ unseals in the heart of the man who loves him.

The Watchman.

But this is the light in which God is set before us in the current theology. On one side of a given line—one moment before death—He is the sinner's friend and none that come to Him are rejected; on the other, one moment after death—He has turned their enemy. Here God gives the sinner a chance; there He remembers no more His mercy and closes the open way; here He delights in the returning prodigal and welcomes him home; there He turns His face and favor away, forever away, and even the "seeking sinner" is forever lost.

The Universalist Leader.

No man can live for himself alone. It is in the power of each one to inspire or to depress those about him. He may give new thoughts or no thoughts at all. He may carry an atmosphere of mental life or mental disease. He may make the well sick or the sick well by the mood he takes with him. This atmosphere which a man carries about him is always influencing others, no matter what may be a man's purpose.—L. S. MCCOLLESTER, D.D.

More missionaries are needed in all parts of Asia in order to take advantage of the rising spiritual tide. . . . While the work of missionaries is far from being accomplished, Christianity is so securely planted in Japan, China, Ceylon, India, and some of the other nations of Asia that were the missionaries obliged to withdraw, it would live on and spread as a self-propagating force.

The Congregationalist and Christian World.

Bishop Brent says: "There is not a single church to-day large enough or sufficiently qualified and equipped to gather all the other churches into its fold. There are certain defects in the churches of the different denominations that could be erased by contact with the others."

The Advance says few realize how great is the service of archæology in lifting the veil from the civilizations of the past and authenticating Old Testament history. Recent discoveries in Bible lands show that we need have no fears for the Old Testament; it can take care of itself.

Be it ever remembered as a supreme rule that truth once found is safe; that nothing else is safe. And be it further remembered that to attempt to suppress or discourage the search for truth is like attempting to screw a top on a volcano.

The Independent.

The Outlook has the following: "Religion is no longer a means of placating the wrath of angry gods; it is humane, philanthropic, practical; it is less a preparation for an unknown future life than an inspiration to and an elevation of life upon the earth."

Zion's Herald says: "There has never been a time when the ministry has stood in greater need of close sympathy between different schools of thinking and different ages of temperaments than it stands to-day."

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfillment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid, one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, marbled edges, Oxford India paper, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion: 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science: 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The conditions of the United States treasury near the close of the third quarter of the fiscal year indicates that the surplus for the twelve months will reach $100,000,000. Notwithstanding the repeal of war taxes and large expenditures in nearly every department, the treasury surplus of receipts over expenditures has steadily grown. The surplus last year was $77,000,000. For the six consecutive years immediately prior to 1900 there was a deficit ranging from $18,000,000 to $89,000,000.

Major-General Otis was sixty-four years old March 25, and retired from active service in accordance with War Department regulations. He will receive a pension of $5,625 per year. The affairs of his office were turned over to Major-General MacArthur. General Otis is the third ranking general of the United States Army, and was the first military governor of the Philippines.

The State Department has received notice of the eleventh international peace congress to be held in Monaco, France, from April 2 to 7 next. An invitation is extended to the United States to participate in the congress and send official delegates. The tenth congress was held in Paris in 1900.

President Roosevelt has tendered to H. Clay Evans the position of minister of the United States to Cuba. Mr. Evans has resigned his position as Commissioner of Pensions, and it is generally believed he will accept the position offered by the President.

The transfer of authority from American military government to the Cuban Republic will begin May 1. The Cuban Congress will meet May 10 and the final act of transfer and inauguration of President-elect Palma will take place May 20.

President Roosevelt has sent to Congress a special message on Cuba, recommending the legislation necessary for the future relations between the island and the United States, and incidentally advocating reciprocity with Cuba.

President Roosevelt has accepted the invitation of the Department of the Potomac, G.A.R., to deliver an address at the Arlington National Cemetery on Memorial Day.

March 12, 1902, there was $112,464,876 on deposit in gold coin and bullion, at the United States sub-treasury and mint at San Francisco.

Foreign.

The wireless telephone invention of Armstrong & Orling is being seriously adopted in England. The experiments recently conducted in Manchester have so impressed the municipal authorities that they are applying for parliamentary powers to establish a service in competition with the National Telephone Company.

A municipal competition service has already been established at Glasgow, and the corporation has placed its exchange at the disposal of the inventors in order that the possibilities of the system may be thoroughly tested.

The Southern Railway of South America has plans for extending its lines through the southern passes of the Andes to the Santiago-Victoria line in Chile, thus connecting the Atlantic and the Pacific Oceans by rail over the Andes. Repeated efforts have been made to construct a railway over the Andes, but none have been successful.

Arrangements are being made to celebrate next June the three hundredth anniversary of the separatist movement which began at Gainsborough in 1602, and which subsequently led to the sailing of the Pilgrims for Plymouth, Mass.

It is stated that the Emperor of Germany is greatly interested in reports of our industrial methods, and is eagerly engaged in studying the reasons for the industrial predominance of the United States.

It is said that the Pope has contributed an article to the *Osservatore Romano*, the semi-official organ of the Vatican, calling upon Christians to pray for the conclusion of peace between the British and the Boers.

Cecil Rhodes, the famous South African promoter, and one of the world's greatest financiers, passed away at Cape Town on the afternoon of March 26.

Prince Henry is quoted as saying that, judging from what he saw at West Point, he thought the American cavalry is probably the best in the world.

Twenty-five hundred colonial troops will be in London for the coronation. Practically every British colony will be represented.

Last month King Edward VII. laid the corner stone of the new Royal Naval College for cadets at Dartmouth.

The Italian Government has appropriated £36,000 for the purchase of an embassy at Washington.

The British first-class battleship Queen, was christened by Queen Alexandra, March 8.

Industrial and Commercial.

There is a very strong feeling in North Carolina against the manufacture and sale of liquor in the State. A decided majority of the white men have steadily cast ballots for the suppression of the liquor traffic. The constitutional amendment which goes into effect the first of next July will eliminate two-thirds, if not three-fourths, of the negro vote, and it is believed that after that date the prohibition people will be able to carry nearly every city and town in the State.

Commercial relations between the United States and Spain have been resumed with greater activity than ever before and with apparently greater cordiality. During the year 1901 our imports from Spain amounted to $7,040,758, and our exports to Spain were $16,785,711. With a single exception the imports and exports were greater than in any preceding year.

The National Carbon-Peat Company has been organized to utilize the supply of peat in the Fair Haven meadows, northeast of New Haven, Conn. "Peat Fuel" will be manufactured on a large scale. It is claimed that there is an eighty years' supply of the peat already in sight in the meadows, even if it is consumed at the rate of eighty tons per day.

At the semi-annual distribution of prizes by the National Cash Register Company of Dayton, O., for the best suggestions for improving factory methods and shop work, seven hundred dollars in gold, with engraved diplomas, were presented to fifty prize winners.

The Illinois Central Railroad has increased the pay of all its engineers and firemen. About eight thousand employes will be benefited and the pay-roll will be increased upwards of $300,000 annually.

Mayor Low of New York has signed the bill authorizing the Pennsylvania Railroad to construct a tunnel under the North River and to build two railroad stations in the borough of Manhattan.

The deposits in the savings banks of the United States have now reached a total of $2,640,000,000, an increase of about $700,000,000 in five years, or at the rate of $140,000,000 per year.

A compulsory industrial arbitration court, composed of representatives of employers and employes, has been established at Sydney, N. S. W.

General.

Michigan experts are perfecting machinery which will enable them to manufacture peat fuel at considerably less than the price of hard coal. One pound of dry peat gives the same amount of heat as three-quarters of a pound of coal. There are millions of acres of peat bogs in this country and the invention may prove very valuable. The peat is dried and pressed into solid blocks of the density of bituminous coal.

Mason and Dixon's line is being resurveyed and re-marked. The work is being done under the direction of the Legislatures of Pennsylvania and Maryland. The old stone posts, erected by Charles Mason and Jeremiah Dixon in 1763, are reset in solid cement bases, and iron posts are put in places where the old markers have disappeared.

Hon. Seth Low, who was a delegate from the United States to the Peace Conference at The Hague, has presented a window to the Anglican church at The Hague as an American memorial of the work accomplished by the conference. The window was unveiled, March 9, by Stanford Newell, United States minister to the Netherlands.

President Roosevelt will visit the Exposition at Charleston April 9. On that date he will present a handsome sword to Major Micah Jenkins, who distinguished himself by his services during the Spanish war. The sword will cost upwards of $500 and was purchased by voluntary contributions from every part of South Carolina.

It is stated that an American publishing firm will bring out an edition de luxe of Dickens's works, consisting of one hundred and thirty volumes, each to cost $200, or $26,000 for the entire set.

The Yellowstone National Park comprises an area of 2,288,000 acres. Five hundred and four different kinds of flowers grow wild within its limits.

The New York Legislature has passed a bill appropriating $100,000 for the erection of a monument to the late President McKinley at Buffalo.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Among the Churches.

Opening Services at Burlington, Ia.

THE most unique and interesting opening services in local history were those held yesterday (Sunday, March 16), opening to the public the new chapel of First Church of Christ, Scientist, in this city. There were three separate services, the second and third being repetitions of the first, held thus to enable all to attend who wished to be present at the church opening. There were three distinctive features that struck the observer as notable,—the quiet, tasteful elegance of the interior of the little church, the simple beauty of the services, and the fact that no collection of money was taken up, and there was no request in any form made for funds from those who attended.

The church and all appurtenances thereto were paid for by voluntary contributions by the members.

The handsome little church on North Third Street was filled at all three of the services.. The auditorium has about two hundred and fifty seats, and in addition to these there were fifty folding chairs used at the 10.30 A.M. service.

Besides the general invitation given in Burlington, a number of invitations had been sent to outside churches of the Christian Scientist faith, and there were from fifty to seventy-five visitors in the city from Chicago, Cedar Rapids, Monmouth, Ottumwa, Mt. Pleasant, Fairfield, Washington, Aurora, and other places.

The interior of the church was decorated very beautifully with palms, ferns, trailing vines, Easter lilies, azaleas, and the mantel in the reception room was decked with greens and a magnificent bunch of white carnations.

Members of the church began arriving at half past nine o'clock, and spent half an hour inspecting and admiring the work of their esteemed board of trustees, who had been given full discretion in all matters, from selection of plan to completion of every detail. Many were the expressions of pleasure and surprise at the beautiful result obtained with the sum of about seven thousand dollars which had been contributed by the little band of fifty members of Burlington's Christian Scientist denomination in the short space of but little more than a year since the church building fund was started.

The happiness they felt over the success of their worthy enterprise was evident in the faces of all.

The church rooms in the Klein Building have been vacated and all services will from this date be held in the new chapel, where a reading room will be kept open from two to four o'clock every afternoon for members and for any one interested or desiring to investigate.

Burlington (Ia.) *Journal.*

The address of the First Reader, Mrs. Emma N. Minton, was as follows:—

To all the dear friends who are present to rejoice with us, we extend a cordial and hearty welcome. The opening of our chapel, which is to be consecrated to the worship of the "ever-living and true God." is an important event to those who have worked, watched, and prayed for its achievement, and we feel unspeakably grateful to the one infinite God, the Presence and Power which has sustained and guided us in the work which has been accomplished.

We are deeply grateful for this building, which so completely meets our needs. It means much to us, to have a place of our own. For some time it has been the desire of Christian Scientists to have a church home, as well as to manifest a visible expression of gratitude and love to God, and to the Cause which has done so much for them.

Great credit is due to our building committee whose untiring, self-sacrificing labors have secured for us a building so complete in every detail. That they have been wisely guided is shown by the result. To each and all who have labored and contributed, our hearts go out in deepest gratitude and love.

Christian Science comes to us to-day revealing the Principle and rule by which man obtains harmony, mentally and physically. It teaches that all may be saved, here and now, from sickness, sin, and all evil, in proportion as they understand and live according to its teaching.

It reveals the ever-presence, the all-power, of Good. Through it we learn that infinite Love is not the author of sin, sickness, or death; and that the false beliefs of mortals, not Truth nor an angry Father, hold mankind in bondage; that the way of salvation therefrom is through intelligently knowing God as Life, as Truth, as Love, as supreme infinite Good; never mingling with error. It is to become so conscious of His allness that evil, sin, sickness, and death find no place in thought.

Jesus said, "This is life eternal, that they might know Thee the only true God, and Jesus Christ, whom thou hast sent." Thus we find the whole of life is to know God, the only Creator, and to understand His creation.

In Genesis, 1 : 27, we read, "So God created man in His own image, in the image of God created He him." Where do we find this image? Not in sick, sorrowing humanity; for the image must be like the original, a perfect reflection. Jesus Christ is the perfect type of manhood, our exemplar. He came to show us the way. This way is through knowing the Truth,—the Science of Being. This knowledge is of God. It is the new birth. It reveals a perfect God as the Creator, and perfect man as His creation.

Through Christian Science doubts and mysteries give place to the true idea, and there comes an earnest desire to live according to God's Word, as found in the Scriptures, and in "Science and Health with Key to the Scriptures." These do satisfy the hungry heart, and bring the true idea of life, and love for God and man.

Our church is founded on the Christ, the healing power of Truth and Love. It has again been revealed to the world, so in need of its saving power. It has come through one whose faithful, selfless love, has been able to perceive and demonstrate it. It is the re-appearing of "Emmanuel" or "God with us," to be again manifested through healing the sick, destroying all error, and bringing to man his heritage,—perfect, harmonious, indestructible being.

Jesus' life proved the truth of his teaching. If he taught a Principle which he and his disciples proved, does not that same Truth hold good to-day for all who understand and

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

practise that Principle? It is being proven, for whenever truly applied there is ample proof of its power.

This Principle was discovered by one whose life from childhood has been one of earnest faith in God. A faith which never wavered. When under sentence of death, through reading of the healing works of Jesus, she was immediately raised to health, and her life is given to the service of humanity and to the cause which brings freedom from the bondage of sin and sorrow.

Because this teaching is in advance of the thought of mortals it has met with opposition and unbelief. Mrs. Eddy stood alone with God, with Truth, battling against the opinions of the whole world; but to-day more than a million people are rejoicing in the fruit of her labors.

One who has felt the unspeakable peace and practical benefits which come from even a slight understanding of Christian Science cannot but feel grateful for the Truth which has so blessed mankind.

Many Christian Scientists have known sorrow. They have known what it was to be without hope. They have been and are being healed mentally, physically, and morally, and are being raised from despairing conditions to health and happiness and have a peace which cannot be taken away. For this, they have a deep gratitude and love for Mrs. Eddy, and the pure love which has shown them the way to a better life.

Christian Scientists need to watch and pray that they may bring forth the fruits of love,—love for God and man,—practise the Sermon on the Mount, and keep the Ten Commandments. Let humility, brotherly love, harmony, purity, goodness, and Truth, impel the thoughts and acts of the members of this church. Let us ever watch and pray for the Mind of Christ to be manifested in us,—the Mind which heals the sick, comforts the sorrowing, and reveals the kingdom of heaven. In proportion as this is done will the world recognize the fact, that the way of Life is again made plain through Christian Science.

Mortimer J. Higley the Second Reader, spoke as follows:

Christian Science was first introduced in Burlington in the year 1889. A few students met for the study of the Bible-Lesson in the different homes until 1893, when the number had grown to such an extent, that a room for their meetings was rented in the Masonic Temple. Soon the growth was such as to necessitate the renting of the adjoining room. February 24, 1894, the little band organized as a church under the laws of the state, with a charter membership of thirty-five. Two months later a lease was made for larger quarters, and a tasteful auditorium was fitted up in the same building. The growth and interest increasing, it became necessary in 1899 to have new quarters, and arrangements were made for the pleasant auditorium we have just left in the Klein Building. Shortly after taking possession of this auditorium a reading room adjoining was furnished, although for several years a reading room had been maintained in the Masonic Temple.

A desire to have a home of our own found expression in the starting of a building fund in 1899. Several lots were offered us for a building site, and at a meeting held January 1, 1901, it was unanimously decided to purchase the lot on Columbia Street adjoining the public library. September 24, 1901, this lot was sold, and the lot whereon this chapel stands was purchased the sixteenth of the following month, and the Board of Trustees were given full authority to secure plans and erect a chapel. A building committee of three was appointed by the Board of Trustees to carry out the wishes of the church. The contract for the foundation was signed November 1, and the contract for the superstructure was signed December 2. With but a slight delay, on account of extreme weather in December, the work has progressed rapidly.

Many have been the problems to meet, but with unflinching trust in the power of our God and His allness, we pressed on in our labors, feeling confident of the results. And now that our efforts are crowned with success, the doors of our beautiful home are thrown open to welcome you all, and in the spirit of divine Love we would take you each by the hand and tell you of the pleasure it gives us to have you with us on this occasion. To those of us who have labored for the consummation of this event, its full meaning is deep and significant.

The pathway that has led to this hour has not been one of flowers, but has called into active use the teachings of Christian Science. Opposition, discouragement, and failure, have lifted their voices and stood out against the onward march of Truth's servants; but undaunted, clad in the panoply of God's allness, every foe has been vanquished, and to-day we are privileged to enjoy the reward of our persistent toil. Standing as we do in the presence of our glorious achievement, and recognizing the hand of God in this work as we most humbly do, it is a source of wonderment when we contemplate the victories won. Truly God's promises are veritable; and we have but to recognize our sonship, to be the inheritors of His vast storehouse.

In the completion of this chapel is an example of the practicability of Christian Science. From a worldly standpoint, it would be thought foolish and impossible for a little band of people (about fifty in number) to attempt the building of an edifice at the cost of about seven thousand dollars, and at a time when building is usually suspended. This is particularly so when the fact is known that the contributors are mainly from the ordinary walks of life. But with firm trust in the supporting hand of God, and recognizing that "Except the Lord build the house, they labor in vain that build it," we pressed on, and in the brief time of four months, are rejoicing in the completion of our labors.

The successful completion of this work would lead to the question, What is it that enables a small band such as this to accomplish so much? Did you but know the grateful hearts for healing from sickness and sin whose privilege it was to contribute of their material means, small though they may be, you would not wonder. It is the unwritten history of lives made joyous and happy, through their clearer relationship with our heavenly Father that is the cord which binds the members of this little band into a union that is indissoluble.

To the little ones in the Sunday School has been the joy of furnishing every dollar for the beautiful gas fixtures, and the fervor with which they entered into and completed the work has been an inspiration. Their ardor in the work resulted in their accumulating more than was needed for the gas fixtures, and the beautiful picture, "Daniel's Answer to the King," which hangs over the mantel in the reading room is a gift from these little ones. This is a fitting gift from them and beautifully typifies their trust.

From loving members and friends have come many useful gifts, such as a new sidewalk for the front of the lot, the beautiful desk we are now using, the handsome pedestals, the electric wiring and fixtures, the grill above us, and many useful furnishings for the reading room and reception room,—desks, chairs, portieres, and pictures. Also a handsome large Bible bound in Levant. These gifts each express in a degree the joy of the giver.

May this visible sign of the power of Truth stand as a reminder that the Fatherhood of God and the brotherhood of man are made manifest, and within its walls may be found the Love that is rest to the weary, consolation to the sorrowful, and healing to the sick. May this Love so mould and fashion us anew that our lives may grow "unto the measure of the stature of the fulness of Christ."

It is impossible for that man to despair who remembers that his helper is omnipotent.—JEREMY TAYLOR.

Do Christian Scientists Heal by the Power of Divine Mind or through Human Will?

It is quite generally conceded that Christian Science does really cure. Some, however, are not willing to admit that the results produced by the practitioners of this faith are really effected by divine power. This is, doubtless, due to the smallness of faith extant in the world to-day.

Speaking from my own experience, I am led to say that previous to my having studied Christian Science I had faith in God, but I am not sure that I had faith in my prayers. This is not strange when I consider how little result I saw from them. Yet I must confess that my prayers, crude as as they may have been, were a stay to me from childhood, since they perpetuated a love of the pure and good, and have been in a large measure a preventive of sin. Through Christian Science I have learned more of God, something of His nature and essence, and how to approach Him in a manner to bring out better results.

The exercising of faith in divine Providence is a very simple thing when scientifically understood, and with the dawn of new knowledge on this subject we are made to exclaim, as we usually do upon the solution of a difficult problem, Why did I not see it before? Indeed, truth is always simple when understood, though it may seem very complex while not understood. It is not strange that those who have not a correct understanding of this science, and who have not applied it themselves in curing the sick, should attribute the healings of its practitioners to something which is tangible to human sense.

One who believes strongly in medicine is likely to say of the patient of a Christian Scientist, "He is being healed because the medicine he has taken heretofore is just now taking effect." The one who does not believe strongly in medicine, or who has lost faith therein, may say, "It is because he quit taking medicine. I have for a long time thought he was taking too much." The one who believes in Spiritualism naturally declares that the healer is a medium and the patient is being cured by Spiritualism, while the hypnotist, not reckoning God into the practice of mental healing, and understanding little or nothing in this line beyond hypnotic suggestion, is apt to believe that the results which he witnesses from the practice of a Christian Scientist are being accomplished through hypnotic suggestion.

Each particular individual interprets the phenomena before him according to his own peculiar sense of that which is needed to bring about such manifestations. The Christian Scientist, exercising his positive knowledge that God, the Infinite Spirit, the divine Mind, is the only real power and influence, is certain that whatever is accomplished through his efforts is by reason of the divine power.

Who knows how the healings of Christian Science are accomplished except the Christian Scientist himself who has brought out the result under consideration? Who is able to explain what has been done to produce a given effect but the practitioner who has been the instrument through which the result appears? Jesus said, "If any man will do his [God's] will, he shall know of the doctrine, whether it be of God, or whether I speak of myself." If an individual will practise the simple and clear understanding of the divine power as it is taught in this school of religion and science, he will learn whether the healing is done through the will of self or by means of the divine Mind. We say without hesitancy that no one can possibly understand this science without practising its teachings, and no one is capable of giving an intelligent exposition of the methods of Christian Science practice without being a practical Christian Scientist. Could one give a correct explanation of mathematics who is not a practical mathematician and not able to solve problems and demonstrate propositions according to its rules? Christian Science is indeed a science, and must be so treated in order to be understood. The sceptic is doubtful about its truth as well as the results of its practice, because he refuses to test it by learning and applying its teaching, while the Christian Scientist is immovable in his understanding of the present utility of divine power in healing sin and sickness, because he has applied his knowledge of this science with convincing results.

Some say the period of divine healing has passed. Would one declare that the day of artists has passed when our walls are covered with beautiful pictures fresh from the artist's brush? Shall we say the day of miracles or marvelous manifestations through divine power has passed when scarcely an individual can be found who has not some friend or relative who has been healed through the power of God as understood in this science?

Reply to Rev. Dr. Waterman.

Editor Gazette:—Your issue of February 18, gives a column and a half of space to an abstract of a sermon preached last Sunday evening in your city by Dr. W. A. Waterman, in the course of which he is reported to have made an attack upon Christian Science on the ground that it is pantheistic. If I shall be able to show herein that such a charge is a misconception on the part of Dr. Waterman, and that it entirely misrepresents the Christian Science doctrine, I take it for granted that, as a Christian gentleman, he will welcome the correction of his unjust censure and that you will not decline to place such correction, suitably and decorously made, before your readers.

Your abstract of his sermon quotes Dr. Waterman as follows:—

"Mrs. Eddy's system is but little more, philosophically speaking, than a hazy, confused rehash of the religion of India,—pantheism in a crude, illogical form."

Waiving the harshness of epithets used by Dr. Waterman in speaking of the religious tenets of a class of his fellow-citizens now numbering more than a million adherents in this country alone, I pass to a consideration of the grounds upon which he bases so virulent an attack. The authoritative text-book of Christian Science is "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. There are now two hundred and thirty-two thousand copies of this book in the hands of readers throughout Christendom. There are many copies in Terre Haute. Strange to say, Dr. Waterman does not quote from this authoritative source to justify his attack; but relates a conversation which he says he once held with a Christian Scientist (whose name he does not give) in California, about "A measley dog," and in which he attributes to his interlocutor certain absurd views which are not conformable to Christian Science tenets. Without raising any question as to the possible inaccuracy of his apprehension of the meaning of his interlocutor, I rest content with quoting, as the best evidence on this point, from Mrs. Eddy's book above named, at page 204 (Rev. Ed.):—

"The belief that God lives in matter is pantheistic. The error which saith Soul is in body, Mind is in matter, and Good is in evil, must unsay it, and cease from such utterances; else God will continue to be hidden from humanity, and mortals will sin without knowing that they are sinning, will lean on matter instead of Spirit, continuing to stumble with lameness, droop with dyspepsia, consume with disease,—all because of their blindness,—their false sense concerning God and man."

The above is conclusive as to the point in question. For similar evidence that Dr. Waterman is wholly ignorant of the teachings of Christian Science in respect to pantheism,

Digitized by Google

I refer him and the readers of your paper to pages 129, 27, 279, 139, 110, 293, 306, 307, and 257 of Mrs. Eddy's said book (Rev. Ed.).

Pantheism is the view that God and the universe are identical. It is believed to have been taught by various Greek philosophers, such as Miletus and Pythagoras. Spinoza and Schelling have been erroneously charged with pantheistic teachings. It is an error in philosophy arising from a misconception of the nature of God and what is called the material universe, and which has been more or less prevalent in all countries and times. It is not chiefly confined to India, as Dr. Waterman's sermon would seem to teach, although it is true that it belongs to the Vedantic system of philosophy of India.

Any scholar who will study Christian Science in its own literature (and no scholar will pretend that any other source of study is defensible), will speedily discover that Christian Science, instead of being pantheistic, is the antipode of pantheism.

Ridicule, "measley dog" anecdotes, and the like, when used against the religious beliefs of a minority, are matters of choice and of Christian charitableness; but they are wholly foreign to logic and scholarship. They can teach nothing useful or uplifting. Let it be weighed whether they do not savor too much of that intolerance which has brought so much merited odium in the past, not upon Christianity, but upon churchcraft.

The adherents of Christian Science are now to be found all over Christendom in large and rapidly increasing numbers. They point to the "works" which follow their teachings as proving them to be the teachings of Christ, "By their fruits ye shall know them." They may interfere with established forms of religion; but so did Christ. They may be ridiculed and reviled; but so was our great Wayshower. They quote to those who revile them, from Matthew, 15 : 13: "But he answered and said, Every plant which my heavenly Father hath not planted, shall be rooted up." They believe that "into whatsoever city or town ye shall enter," it is your duty to remember and follow the command of our Saviour, "heal the sick that are therein, and say unto them, The kingdom of God is come nigh unto you."

They believe that obedience to this command of Jesus is as much the duty of men now as it was when the command was given; that the command was not limited to any age or people; and that such obedience will be as useful to poor humanity now as in any former age. Christian Scientists implicitly trust the promise of Christ that he will abide with us always; not, of course, in the flesh, but in truth; and they also implicitly trust Christ's pronouncement, "He that believeth on me, the works that I do shall he do also." They understand that this promise and pronouncement are in perfect accord with the immutable principles and laws which govern the relations of God and men.

Respectfully,

CLARENCE A. BUSKIRK.

Should They Receive Pay?

Editor *The Times.*

A short time ago there appeared in your columns a query concerning the right of Christian Scientists to charge for their services.

It seems odd that any one should question the right of another to receive just pay for the time given in any service, be that service what it may. The minister of the gospel receives a stipulated sum for his services, and no one can accuse him of charging for the gospel he preaches or the prayers he makes. What is given him is an honest return for his labors that he may live comfortably and not become a public charge. This example was given by our Master who told his disciples to abide in any house where they were received, and if not hospitably received to shake the dust of such place off their feet. The same principle obtains in these later days, although the customs of the times are very different; and it would be thought strange on the part of any one who desired to labor and pray for another, to insist on taking up his abode with him.

Christian Scientists do not look upon the power to heal as a "gift" in the ordinary sense of the term. To them it is proven that the power to heal the sick and cast out evil of all sorts comes in proportion to one's understanding of God. It is very evident that Jesus did not intend his command "heal the sick" to apply only to his immediate followers, for did he not say in sending forth his disciples, "these signs shall follow them that believe"? He did not say, shall follow "you" but "them." Again the Scriptures say, "Jesus Christ, the same yesterday, to-day, and forever." Surely there is apparently as great need to-day that his followers "destroy the works of the devil" as in the early days, and why should we believe that there is less of God's grace present now than then? We have his own promise, "Lo, I am with you alway, even unto the end of the world."

An impartial investigation of the teachings of Christian Science and the multitude of good works resulting from the practice thereof, should prove to any one that righteousness is its only aim. Perhaps a million people have found health and happiness in Christian Science, and surely that which has brought such blessing to so many of our fellowbeings deserves respect rather than criticism, and a warm welcome in our midst. The world needs all the effort we can put forth to prove that our Master's teachings are as potent to-day as when first uttered.

The Attitude of the Jews toward Christianity.

WE copy from the *Dayton* (O.) *Herald* the following article by the Rev. David Lefkowitz, Rabbi of the Jewish synagogue.

There was a time, not many years ago, when scholars were intent upon discovering and pointing out the differences between peoples and the disagreements amongst religions and sects. The scholarly research in this direction affected the thoughts and actions of the masses, and especially was the latter end of last century marked by a rise of the national instinct, which did much to change the map of Europe; while the revival of Anti-Semitism is directly traceable to Renan's studies in this field. This emphasis upon the differences and the disagreements has arrayed nation against nation and creed against creed, until, in the twilight of the nineteenth century and at the dawn of the twentieth, there arose the ideal of a broader, all-embracing culture based upon and inspired by a better understanding on the part of Christendom of the peaceable doctrines of Him whom it worships and whose life it strives to follow. Signs of this change of emphasis are patent on all sides; amongst nations, in the Pan-American Congress recently held; amongst religions, in the Congresses of Religions that are made the feature of our great Expositions. In these conferences the agreements are sought out and underlined; and the links which our common humanity throws out are welded together into a chain of better understanding, of freedom from prejudice, and of catholicity of sympathies.

It is with a view to make that chain stronger that this article on the attitude of the Jew towards Christianity is written. No one is eager to hold out the hand of friendship to one supposed to hide a murderous dagger in his sleeve. And many Christians, I have no doubt, hesitate to manifest this new spirit toward the Jew, because they are uncertain as to his attitude of friendliness. They were prejudiced enough in the year 1348 to believe that the

Digitized by Google

Black Death, which took off a fourth part of all humanity, was due to the poisoning of the wells by the Jews. And even now many cannot be induced, in spite of unanswerable arguments, to give up the belief that a special law bids the Jew to love his co-religionist and hate the Christian; that Shylock's grasping spirit and revengeful nature is a truthful picture of the Jew, in spite of the well-known fact that the "Gesta Romanorum," from which Shakespeare took the story which he worked up into his "Merchant of Venice," shows the Shylock of the tale to have been a Christian.

Is the Jew bidden to hate the Christian? Do we not read in the Mosaic law, "Thou shalt love the Ger [him of another faith]: for ye were Gerim in the land of Egypt" (Deuteronomy, 10 : 19). "One law shall be to the Israelite and to the Ger." (Exodus, 12 : 49; Leviticus, 24 : 22; Numbers, 9 : 14; 15 : 15.) "Thou shalt love thy neighbor as thyself" (Leviticus, 19 : 18)? Hillel said: "Do not unto others what thou wouldst not have done unto thee. This is the principal commandment; all others are the development of that one;" and again, "Be of the disciples of Aaron, love peace, seek peace, love mankind, and thus lead them to Law." Look through the pages of history and see what Israel has suffered at the hands of the Church and its ardent supporters. It is a story written in blood. If revenge were Jewish, what justification there would be for it! For these scars and wounds of the centuries the Jew's only revenge is to love; that is, to continue at his mission, which he believes to be for the good of man.

Is the Jew so far removed from the Christian point of view? As to dogma he certainly differs on the divinity of Jesus, upon vicarious atonement, and upon the original sinfulness of man. But, leaving theology aside and considering only those things which affect man's actions toward his fellow-man, the disagreements between the Jew and Christian are trifling; while the agreements are numerous enough to form a most comfortable platform upon which both may stand together. In the work of charity, in the effort to raise man out of his selfishness and materialism, in the endeavor to promote commercial integrity and civic uprightness, the Jew and Christian can join their forces. In fact, the Jew is ready to give due honor to Christianity for popularizing the Jewish Bible, for introducing the Jewish Prophets into Europe, for singing the Jewish Psalms in its churches, and bringing the God whom Abraham first adored to people who, but for its energy, would perhaps still be performing their weird and sacred rites before images of wood and stone.

These are the appreciations and this the attitude of the Jew to Christianity,—no venom, no hatred, nothing but recognition of our many points of agreement, appreciation for the civilizing and spiritualizing work of Christianity in the past, and sympathy with all that is best in its present endeavors. There is no hope of uniting on a theological ground; but, upon humanitarian questions, upon all that tends to the uplifting of man, Jew and Christian are at one. Such, at least, is the attitude of the Jew.

Notices.

Christian Science Lecture.

The semi-annual lecture on Christian Science under the auspices of The First Church of Christ, Scientist, in Boston, Mass., will be given by Rev. William P. McKenzie, C.S.B., in Symphony Hall, corner Massachusetts and Huntington Avenues, Thursday, April 10, at eight o'clock P.M. All are welcome. Seats free.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Church Manual.

The twenty-fourth edition of the Church Manual, containing the names of all the members of the Mother Church including those admitted November 5, 1901, is now on sale. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials.

One copy prepaid	$1.25
Six copies to one address	6.50
Twelve copies to one address . .	12.00

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Digitized by Google

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

As to Giving Advice.

WE shall once more have to remind our co-workers in the Field that the First Reader of the Mother Church cannot be adviser-in-general to the students. He has neither the time nor the authority to do so.

Those who construe section 7 of Article IV., later editions of the Manual, as conferring such authority, misunderstand it. It does not relate to every member of the Mother Church. Were the First Reader of the Mother Church under obligation to "enforce the discipline and by-laws of the church" as to every member of the Mother Church who might possibly need it, a moment's thought will convince any one that he would have an impossible task.

As to the by-law which reads: "None but the First Reader, or the Directors, shall give advice on church matters outside of the meetings"—this relates to church matters of the Mother Church, not to individual matters affecting church members, nor to branch churches. A thoughtful reading of the last clause of this section indicates plainly the spirit and purpose thereof: "Any member who disobeys this By-Law shall be dropped from the roll of Church membership." It was clearly to put a stop to promiscuous and unauthorized advice about the affairs of the Mother Church that this section was enacted.

The other provisions relative to discipline are very plain. They point out what must be done if the by-laws are to be enforced. Those who carefully read them will see that the First Reader can only act jointly with the Board of Directors, upon full and proper compliance with all preliminary as well as final requirements. The First Reader cannot act alone. The by-laws must be read and construed as a whole, instead of singling out a particular one to the exclusion of all others. We, therefore, earnestly request that the students cease sending to the First Reader their various questions concerning private individual conduct, personal differences, differing interpretations of the text-book and the Manual, questions as between teacher and students, etc. These questions come to him as if he had sole and absolute power to settle everything. He has repeatedly heretofore shown that he does not possess such power, and he surely has not the wisdom.

If, with his human hand, he could aid you at all, it would only be temporary, and would not do the work for you which, under divine guidance, you must do for yourselves. He does not occupy the relation of teacher to you, nor can he stand sponsor for individual action.

Let us look to the many helps which God, through our beloved Leader, has provided for us. Here we shall find abundant help for our every real need.

A more careful study of the Church Manual and a more alert keeping pace with its changes and additions, is becoming a greater and greater necessity.

All requests which properly call for official action should be addressed to the Clerk of the Mother Church, who is the authorized correspondent thereof. A request to the Clerk for instructions relative to such matters will be complied with by sending the same to the applicant.

"Lord, Save Me."

THUS cried Peter when he was overcome by fear and doubt. Until so overcome he could walk alone, even on the water. So says the record. (Matthew, 14 : 28–31.) So long as he kept down fear and doubt, relying on God as the divine Principle by virtue of whose power he could walk uprightly, he needed no personal help, not even the helping hand of Jesus who was near by. Herein is a wonderful lesson. It will be observed that Peter's fear and doubt began when "he saw the wind boisterous." The still wind and placid water caused him no alarm, no fear or doubt.

Peter typifies the experience of mortals in their growth from material into spiritual conditions. When the wind and waves are quiet all goes smoothly; but with the appearance of rough winds and waves, fear and doubt take possession, and the disciple who is yet in the belief of personal, human power rather than in the understanding of the divine All-power, cries out to personality for salvation, instead of trusting to his understanding of divine Principle —God. Principle obeyed, saves; personality obeyed, at its best, may temporarily relieve, but it cannot save. Jesus quieted Peter's fear by giving him a helping, fleshly hand; but Jesus did not, by that kindly and sympathetic act, teach Peter the Principle whereby he could save himself. Peter had to learn of this saving Principle for himself, taking Jesus as his guide and teacher thereof. Jesus' human help destroyed Peter's fear for that *once*, but it was temporary, not permanent help. Peter had yet to work out his own salvation. So must it be with all.

The Lesson Sermons.

SOME time previous to the appearance in the columns of the *Sentinel* for March 20, 1902, of the article on "The Lesson-Sermons," Mrs. Eddy said to its author:—

"The questions for our Sermons cannot be exhausted in all eternity."

At the time of the conversation in which this remark was made, our Leader had not read the article, and this strongly confirmatory statement from her of what was therein written is an interesting coincidence.

We have not heretofore given the name of the author of that part of the article which treats of the Lesson-Sermons. We know of no reason why we may not say, that it was the Rev. Irving C. Tomlinson of Concord, N. H.

Unity in Baltimore.

ALL Christian Scientists will rejoice to read the following letters from the Baltimore branches. We have all read with great joy the reports of unification in other places which were recently published; and this additional evidence that all are coming together in the one Mind is indeed gratifying.

Following are the letters:—

The St. Paul, Baltimore, Md., March 26, 1902.
First Church of Christ, Scientist, Baltimore, Md.
Mrs. Ella Leib Darby, Clerk.

Dear Sister in Truth:—Upon the advice of the First Reader, Miss Ellen E. Cross, and the unanimous approval of the Trustees, the members of Second Church of Christ, Scientist, at a special meeting held Tuesday evening, March 25, voted that the following resolution be adopted:—

> *Resolved:* that Second Church of Christ, Scientist, signify to First Church of Christ, Scientist, their desire to unite with them as one church body as soon as Second Church may have so arranged its financial affairs as to make such union legally possible.

And further, that we manifest this union in heart

Digitized by Google

and spirit by attending at the earliest possible moment, the services of First Church, until our obligations are discharged and we are free to become members.

In the midst of prosperity, with our financial condition steadily and rapidly improving, and with a full attendance at our services, the call has come to leave all and go back to the church from which we came out just five years ago.

The divine leading which came to our First Reader from the Bible and Science and Health, was so direct as to be unmistakable, and the good fight has been fought and the error of separation cast out.

We are humbly and deeply grateful that divine Love has mercifully uncovered and destroyed the error that divided us, so that we may be more truly obedient to our dear Mother in Israel, who is so patiently and earnestly striving to have us demonstrate the unity of Good; for to be truly loyal to her we must lay aside all personal considerations and differences, and devote our whole energy to working for the Cause so dear to us all. We come to you with willing hands and loving hearts, and desire to take our places side by side with your members, as brethren dwelling together in unity, and hope the time is not far distant when we may unite with you in full membership.

Coming as this demonstration has at this glorious resurrection season, these words of our beloved Leader (Science and Health, page 45, Rev. Ed.) ring in thought like Easter bells:—

> Glory be to God, and peace to the struggling hearts! Christ hath rolled away the stone from the door of human hope and faith, and elevated them to possible at-one-ment with the spiritual idea of man, and his divine Principle, Love, through the revelation and demonstration of life in God!

Your sister in Truth,
MARIAN W. HERING, *Clerk.*

2305 St. Paul St., Baltimore, Md., March 26, 1902.
Second Church of Christ, Scientist, Baltimore, Md.
Mrs. Marian W. Hering, Clerk.

Dear Sister in Truth:—Your letter of March 26th addressed to First Church of Christ, Scientist, expressing the desire on your part to unite with us as a church body, as soon as it may be possible, has been received and read by us with profound thankfulness and joy.

To your request we would reply that nothing could give us greater happiness than to extend to you a most cordial greeting. We recognize God's hand in this demonstration, and reverently bow before His love and care in grateful joy.

Our love goes out to our Mother for showing us how to work for the good of our beloved Cause, and following her precepts there could be no other result than the re-union of the Scientists in this city. The thought of unity brought out in your letter is one in which we most heartily co-operate in every way.

May you speedily be with us in full membership.

I remain.
Your sister in Love,
(Signed) ELLA LEIB DARBY, *Clerk.*

Tribute to the New Edition.

17 North State Street, Concord, N. H., March 22, 1902.

Dear, Precious Mother-Heart:—Every time I have taken up the new Science and Health, I have sent you countless greetings of love which have been borne to you on angel's wings, I know. Now you have taken us on to another mount of revelation through this revised edition, and I cannot tell you what it means to me.

Lately, whenever I have thought of the mighty demonstration necessary for the reversal of every problem in the human consciousness, the magnitude of the work necessary has overwhelmed me, but this revised edition has lifted this sense, and I feel a great tranquillity and peace, for it has brought such an assurance that God is working with us. Dear Mother-Heart, the truthfulness that you manifest in every detail of every problem is wonderful and grand; it is teaching us "what obedience is and *how* to *obey*."

You know I love you! With a thankful heart now and always, VILLA WHITNEY WHITE.

The Lectures.

At Seattle, Wash.

On Sunday, March 2, a large and appreciative audience of nearly three thousand people greeted Judge William G. Ewing at the Grand Opera House. In the balcony and on the main floor all the standing-room was occupied. Several hundred were turned away for lack of room. The lecturer was introduced to the audience by the Rev. W. D. Simonds, pastor of the flourishing Unitarian Church, as follows:—

My Friends:—More than thirty-five years ago a New England lady, who had endured her full share of human suffering, first published to the world what is now known as Christian Science. Gathering about her a few pupils, she founded a school of that faith. This new faith met first with ridicule. It became the object of every nimble paragrapher's sarcasm. As it grew in numbers it became the object of opposition and, in not a few instances, of persecution. It would be a gratuitous insult, and perfectly futile, to suggest that the Christian Science denomination has not its full share of intelligent and thoughtful men and women.

Whether you accept this philosophy or whether you reject it, whether you believe it true in part or erroneous in part, you will all, to the last man of you, and woman too, agree with me in this,—that Christian Science has earned its right to be heard; it has earned its right to the candid and earnest attention of all sincere men. It is not possible for a rational man to dismiss this philosophy with a scornful wave of the hand, with a toss of the head, or a curl of the lip; for a faith that in a little more than a quarter of a century has won thousands of adherents in this materialistic age,—and among those, men of eminence and women of attainments,—I say, deserves the candid attention of every sincere man.

We have with us to-day a man of eminence in his chosen profession, one who, in the full maturity of his thoughtful years, was converted to this belief. He speaks to us to-day upon the subject: "Christian Science: Physician and Redeemer," and I know, from my knowledge of Seattle, that I can pledge to Judge William G. Ewing of Chicago, whom I now present to you, a most candid and earnest hearing.—*Correspondence.*

At Chanute, Kan.

Mr. Edward A. Kimball, C.S.D., of Chicago, delivered a lecture in the Opera House, Monday evening, March 10, under the auspices of First Church of Christ, Scientist, of Chanute, to a large and appreciative audience. His subject was "The Cause and Scientific Cure of Disease."

Mr. Kimball was introduced by Mr. A. H. Turner, of this place, as follows:—

Ladies and Gentlemen:—I am glad to see so large an audience here to-night to listen to a lecture on Christian Science. The gentleman with us is an able exponent of the doctrine, and will talk to us along the line of "The Cause and Scientific Cure of Disease." I do not know much about Christian Science, and I presume most of this

Digitized by Google

audience is similarly situated. I have a great deal of respect, however, for any doctrine or organization that has for its object the betterment of humanity. We have seen in our own midst men and women made better by the teachings and practice of Christian Science and, therefore, consider it worthy of our most careful consideration.

I now have the pleasure, ladies and gentlemen, of introducing to you the speaker of the evening, Mr. Edward A. Kimball.—*Correspondence.*

At Snohomish, Wash.

The Alcazar Theatre was comfortably filled last Saturday night (March 1), by an attentive audience of Snohomish people, anxious to hear Judge William G. Ewing expound the principles of the Christian Science religion. The speaker was introduced by C. L. Clemans, by request, in a few well-chosen and appropriate remarks. The lecturer occupied an hour and a half, during which time he held the closest attention of his large audience. He did not present the subject from the argumentative standpoint, nor did he attempt in any manner to explain the means or manner of healing, other than to refer the interested to the study of Mrs. Eddy's book, Science and Health. His main purpose was a comparison of the Christian Science belief with that of other churches, and its conformity to the true teachings of Christ. The lecture was given under the auspices of First Church of Christ, Scientist, and was well received by all who heard it.

Snohomish County (Wash.) *Tribune.*

At Winfield, Kan.

Edward A. Kimball, C.S.D., of Chicago, delivered an address on Christian Science at the Christian Church, Saturday evening, March 15. The church was filled with a representative and appreciative audience. Mr. Kimball held the attention of the people for an hour and a half with untiring interest, while he presented some of the claims, aims, and purposes of Christian Science. The lecturer was introduced by Miss Mamie Maxwell, First Reader of the Winfield Church, who said:—

Ladies and Gentlemen:—We have with us this evening a member of the Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass., who will lecture to us on the subject of Christian Science—one who has tested its efficacy to heal the sick and reform the sinner, and who is devoting his life to the cause of Christian Science.

I now have the pleasure of introducing to you, Mr. Edward A. Kimball of Chicago.—*Winfield* (Kan.) *Courier.*

At Duluth, Minn.

A large and attentive audience greeted Mr. Edward A. Kimball, C.S.D., of Chicago, at the Lyceum Theatre, Friday evening, February 21. The lecturer held his audience for nearly two hours with very evident interest. The force and conviction back of the speaker's words has awakened a general interest in Christian Science, and several cases of healing have been reported. Mr. Burrell, First Reader of First Church of Christ, Scientist, introduced Mr. Kimball.

The lecture was printed in both daily papers.

Correspondence.

At Everett, Wash.

The Hon. William G. Ewing of Chicago, was greeted by a large and representative audience at the Everett Theatre last evening (March 7), and his explanation of Christian Science commanded close attention. His sincerity is evidenced in dispassionate discussion and in the fact that he stands as a man who has submitted the doctrine to the tests of a judicial mind.—*Everett* (Wash.) *Herald.*

Wednesday Evening Meeting at Brooklyn, N. Y.

The testimonial meeting of the Second Church of Christ, Scientist, Brooklyn, N. Y., held on Wednesday evening, February 12, at their church edifice, Park Place, near Nostrand Avenue, was a joyous demonstration of grateful hearts, testifying to manifold blessings realized through Christian Science. The testimonies covered a wide range of experiences, and conclusively proved that God was "a very present help in trouble."

A gentleman testified to having been cured of a well-developed case of diabetes. He had been led to suppose, after treating with many physicians, that his case was hopeless, but after reading Science and Health, in connection with Christian Science treatment, all manifestations of that much dreaded disease disappeared and he is now in the enjoyment of good health. He has also been enabled to lay aside his glasses.

Another gentleman testified that prior to the time when Christian Science was presented to him, both he and his wife, after having explored and investigated many fields of religious thought, had concluded to take their chances with the agnostics. His wife had been an invalid for some years, but after the light of Christian Science had dawned upon their consciousness, she was physically healed, and they both received such a spiritual uplift, that they never tire of telling the great benefits which have come to them, through the understanding of the blessed Truth.

One gentleman, who had been a member of an Orthodox Church for many years, told his experience, and among other things stated that although striving in the old thought to live a consistently Christian life, he found it extremely difficult. His wife, who had been a great sufferer from nervous dyspepsia for many years, had been healed while attending one of the Science lectures, given in Brooklyn, and he also had been healed of both the liquor and tobacco habits. Both he and his wife have received innumerable blessings, since coming into Christian Science, for all of which they are deeply grateful.

Space will not admit the continuation of further testimonies, but suffice it to say, that this band of faithful workers in the line of Truth, is doing effective work, and their hearts overflow with gratitude to their beloved Leader, Mrs. Eddy, who through the purity and consecration of her life, has given to the world the blessed truth of Christian Science for the amelioration of suffering humanity, and for the spiritual enlightenment of those groping blindly in the darkness of material beliefs.—H. M. F.

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly.* When the change is made in the *Quarterly,* references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

Peace, Be Still!

BY ALICE A. RUSSELL.

AND as they sailed across the lake,
Dark grew the midnight sky!
A mighty storm tossed the frail boat,
The waves rolled mountain high.
And watching through this weary night,
Each heart was filled with fear;
As peering through the dashing spray,
They sought for rescue near.

Amid the clash of wind and wave,
Asleep the Master lay;
Without a fear he slumbered on,
As if 'twere peaceful day.
More loudly still the gale roars on,
Higher the billows rise,
In trembling fright the watchers call;
The Saviour's voice replies.

And through the noise, his gentle word
Rebukes the wind's wild will;
And to storm-swept Genessaret,
He speaks his, "Peace, be still!"
And on the bosom of the lake,
The little boat now rests,
The calm of peace upon the waves,
Peace in the sailors' breasts.

"Have ye no faith," the Master says,
"That ye so fearful be?"
While filled with awe, these simple men
Gaze on that placid sea,
And dare not speak aloud the thought,
But to each other say,
"What sort of man can this man be,
Whom wind and sea obey?"

As on this far Lake Galilee,
When storm-clouds worked their will,
The Saviour's voice brought calm 'mid strife,
When heard his "Peace, be still!"
So in our night of error's storm,
When fear obscures our sight,
When clouds of sense and erring thought,
Seem to shut out all light,

Softly there comes to those who list,
Driving away the pain,
A voice that speaks of Love divine,
The Christ-Truth come again,
Bringing the rest that knows no fear,
The calm that follows strife;
An abiding sense of Christ's dear love,
The consciousness of Life.

Letter to a Mother.

My Dear Friend:—Your exceedingly thoughtful letter received, and read with deep and earnest interest. It is evidence of your sincere and true love for the welfare and good of your boy. I can assure you that I have a great interest in his progress. We know that progress means a higher, more exalted condition, for progress is the sure reward for obeying the commands of the Master.

Your letter brings out clearly the true mother love, of which any son can well be proud. There is no love known to mankind, from the human standpoint, so true as mother-love, but we shall all soon know there is but one Father-Mother, and that is God. We are all His children, and are brothers and sisters. Jesus commanded us to call no one Father upon earth, for one is our Father in heaven,—harmony. This clearly establishes the relationship on the whole, and on a more everlasting, eternal plane, and when we understand our true relationship to God, we then, as recorded in the first chapter of Genesis, shall have dominion. Now, to have dominion means to be subject to only one Father. If we are running away from every little condition that confronts us in this world, *these* conditions have dominion, not *we*, which is contrary to the teachings of the Holy Scriptures. We are told that we must rise to the full stature of Christ Jesus, and know the Truth, and the Truth shall make us free. We know, as the Bible records, that God is a lamp unto our feet and a light unto our path, and we shall hear a voice behind us saying, "This is the way; walk ye in it." Our duty is to listen earnestly and prayerfully, and in meekness, for this voice, and when we walk in accordance with it, we find at the very threshold of our existence, light, health, progress, happiness, comfort, and everything that goes to make up the continuity of life. When we understand that the Principle of life is God, and we know there can be no impossibilities with God, we know this Principle is the same to-day, yesterday, and forever, it is applicable to us here and now; we can work out our own salvation by following the leading of this Principle.

It is just as applicable to our health and happiness as the mathematical problem is to mathematics. No one hesitates to say that the principle is capable of being worked in any altitude, latitude, or longitude, in any country, and that nothing interferes with it,—height nor depth, heat nor cold, and it resolves this into the fact that it is the same everywhere; and we all know that in proportion as one understands the principle of mathematics, he works the example with mathematical certainty and only in proportion that he *does* know the principle can he work out the problem

Now, the Bible tells us that God is too pure to behold iniquity. This becomes clear to us from an illustration of mathematics. We know the principle of mathematics could never stoop to behold a mistake in numbers. For instance, two and two are four, and this is mathematically harmonious with the principle. That two and two are five is not true, and is no part of mathematics, and cannot be recognized by the principle.

We cannot be successful while thinking about failure. We cannot draw a picture of a locomotive thinking about a steamboat. We must have the outline in our mind that it may be communicated through the pencil to the paper.

We cannot gain health, or draw a picture of health, thinking of and talking of sickness. We are learning that we must talk and think only of that which we wish to have made manifest, and which we all wish to enjoy and have others enjoy. We shall learn that it is just as easy to pick flowers as it is to pick weeds, and I feel that you need have no more concern about the boy. He, I am sure, was greatly benefited by my reading your letter to him, and I feel that he is receptive of the good and true, and the result will be the establishment of his health.

He is now in our office, and I am sure will make a valuable lieutenant, and as fast as he is able to receive, he will get. All things depend upon ourselves. It is an undeniable fact that as we sow, so shall we reap. This is an invariable law of God and cannot be changed or reversed. It is the sowing we must watch, for the reaping will be in direct proportion to the sowing. If we sow thoughts of health and happiness and love and sympathy for our fellow-man we shall reap the fruit of such thoughts, which are peace, contentment, health, and happiness. It is a simple clear case of common sense, and we are relieved of all superstition and worries of the so-called laws of man. We *know* there is only one law, and that is God's perfect

Digitized by Google

law which annuls the other so-called laws. Your earnestness to help your son can best be expressed by what *you* are willing to do to investigate the subject that offers absolute and sure relief and establishes him in perfect health. It is not a question of experiment, but it is an absolute fact that the only physician is God's omnipotent love. We may have thought of prayer as spoken words, but we learn in "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, that prayer is a sincere desire and "habitual struggle to be always good," to do well and serve God. When we know that prayer is desire, then we see how practical it is for us to obey Paul's direction to pray without ceasing. In a little book called "No and Yes" (one of Mrs. Eddy's writings) page 49, we read: "Prayer is the utilization of the Love wherewith He loves us." Now if we utilize in our daily life, home life, social life, in fact, every walk of life, that love toward our fellowmen that God bears toward us, we shall not have to worry about material conditions; for it is said: "Seek ye first the kingdom of God and His righteousness, and all these things shall be added unto you," and you will find this literally true.

I hope for your son's sake you will investigate Christian Science. Do not take anything that I say or that anybody says, for God is no respecter of persons and will reveal Himself and His kingdom to you as clearly as to any one, and in direct proportion to your willingness to become as a little child, receptive and ready to obey the commands of Christ Jesus, as recorded in the Sermon on the Mount and the four Gospels. I also feel that if you will read the 91st and the 23d Psalms they will give you great help and strength and protection to you and yours.

You know that I am a busy man, and on the go from early in the morning until late at night, but I never forget what Jesus said at twelve years of age, when his father and mother found him in the Temple talking to the learned men. When they remonstrated with him he simply stated that he was about his Father's business. In later years when he found certain men fishing, he called them to him as disciples and said he would make them fishers of men. So if through our daily life we can bring the light and truth to one of our brethren and see him restored to health and happiness,—when we are able to do this we must be receptive of God and His love. This in turn brings us success and all that is good and true.

Should you ever come to visit your son, we extend you a cordial invitation to come and see us, and if there is anything further we could do or say, we should be delighted to be called upon. I am giving your son a golden opportunity, and in proportion as he realizes the opportunity and walks in accordance with the light shown, he will gain strength, health, success, and progress. We know God always does His duty. Then if I do my duty in giving the boy an opportunity and endeavor to show him the way, then it comes to him to do his part.

Yours sincerely,

H.

The Command to Preach.

BY ROBERT J. McLAUGHLIN.

"AFTER these things the Lord appointed other seventy also. . . . And heal the sick that are therein, and say unto them, The kingdom of God is come nigh unto you" (Luke, 10 : 1, 9).

This command to preach the Gospel and heal the sick was given not only to the Apostles and to the "other seventy," but also to all mankind who believe on him. "And these signs shall follow them that believe; In my name shall they cast out devils" (Mark, 16 : 17).

This must be the basis of all true religious belief, and obeying this command is an obligation we must fulfil, not in part but in its entirety. To preach the Gospel without healing the sick is not obeying the divine command. This healing of the sick is the outward manifestation the unenlightened can have of the authoritative preaching of the Gospel, and gives the stamp of the genuine follower of Jesus the same as it did nineteen hundred years ago.

The Scriptures all the way through give conclusive evidence that the only badge of authority for preaching the correct Gospel is the healing of the sick, and the command to preach the Gospel was always coupled with the command to heal the sick.

Many different sects have for centuries vied with each other, even to the point of persecution and bloodshed, in support of some particular form of worship, and religious wars and cruelties have been perpetrated to force an acknowledgment that some particular form or other of the gospel was the correct one, and yet all agreed that the solution of this great problem would come only with death; but had any of them been able to heal the sick purely upon the basis of their religion, the proof would have been at hand.

Christian Scientists are proving daily by thousands of well-authenticated cases, that the healing of sickness without material aid, is an established fact to-day as much as it was during the time of the Saviour and for three centuries thereafter; and it is a matter of positive and absolute proof that in the majority of instances where Christian Science is taken up for physical healing, the patient has exhausted all material means and only turns to Christian Science as a last resort. These are the people who become well through the knowledge that God is not the author of their seeming troubles.

It is no wonder that mankind hesitates to accept a form of religion which has no absolute proof in support of its theories, and whose basis for logical reasoning has no foundation in fact, but shelters itself behind a veil of mysteries and blind faith. Christian Science shows these proofs at hand, not as mysteries, but as divinely natural; and every one who follows the teachings of the Saviour can accomplish the same works he and his disciples and many others did during the first three centuries and which Christian Scientists are doing to-day.

My Garden of Thought.

BY A. E. J.

I HAD a garden beautiful
  Filled with the fairest flowers,
But ugly weeds had grown there,
  In thoughtless, idle hours.
So tall and very thick they grew,
  The flowers were quite concealed,
And I was forced to push them by
  To have my flowers revealed,
But in my utter carelessness
  I seldom looked within,
Nor cared to stop and think what once
  My garden must have been,
But one day a sweet soul passed by,
  And sorrowing at the sight,
Taught me just how to clear away,
  My garden's loathsome blight.
So day by day I pluck some weed:—
  Envy, remorse, despair,—
Now selfishness is weeded out,
  Now fear, now hate, now care,
My task is slow, but I rejoice
  To see the flowers thrive.
Fearlessness and happiness and peace
  Are once more alive.
So joyfully I labor in my garden every day,
  And patiently I work and strive,
To clear the weeds away.

Testimonies of Healing.

After about seven years of health and benefits received from Christian Science, I feel it my duty to offer for publication an acknowledgment of the great good that has come to me through Christian Science.

For all these years I have felt that I owed this just acknowledgment to Truth. I was under bondage to numerous ills, chief of which was dyspepsia with its concomitants, such as bad liver, diseased kidneys, heart trouble, etc. I had tried all usual methods from material standpoints. After *materia medica* came massage, electropoise, mineral springs, sea voyage, etc. After becoming almost totally discouraged and disheartened, I commenced to investigate several of the different religious faiths, thinking I ought to prepare to die. I did not find anything there that appealed to me.

One dark, dismal day (to my thought) my wife asked me why I did not try Christian Science. It seemed to me that she had struck the right note, and I said I believed I would. My wife was not a Scientist, but we had had a lady living with us who was, and she unknowingly directed me to those who were not Christian Scientists. After a few days of treatment and talk with a believer in that faith, and receiving no help, in a conversation she denied Mrs. Eddy's being the Founder of Christian Science. I found I had gotten on the wrong track. The same day or the next I went to see a loyal student of our dear Mother. I commenced treatment with this loving disciple. I think I was about as discordant and discouraged a person as could possibly exist in this belief. There did not seem to be one ray of light, all looked dark and gloomy and my friends thought I had not long to stay with them. I cannot forget how patiently and lovingly my healer led me out of that dense darkness and fear. Little by little I gained courage, until in about three weeks I seemed to have gotten out into the great sunshine of God's dear Love.

As I recall it now, I do not think I expected physical healing, but I thought if I could only get peace; and I said to the healer, "If there is that peace which passeth understanding, I want it, and am willing to do anything to get it." It did not occur to me at that time that I could not have peace and dyspepsia at the same time, one had to go, and I thank God that it was the dyspepsia that went, and such peace as I never dreamed could come to me came to make my heart glad.

My testimony would not be complete without relating what to me was the most wonderful of all the healing. I had from my earliest recollection a humor on both my elbows, said to be salt rheum. The intense itching was very annoying, and I never expected to be rid of it, as medical science called it incurable. I don't know when it went, but a few weeks after I had discontinued treatment I found the flesh to be soft and completely healed. It has never returned, and I have never since had any itching sensation from it.

I lived to be nearly fifty years old before I heard those glad true words: "Life is God and God is omnipotent." I had to wait for Science and Health to bring me that glad message. Those healing words came to me like a blessed benediction and did more for me than all the sermons I ever heard, and they were not a few.

Could I do less than be grateful to our loving Mother for showing us the better way? My great desire is to live as she has taught us, and so show my gratitude and love for her and in a small degree my appreciation of the patience, humility, and love, that she has so largely expressed.

I want to say a word for the *Journal* and *Sentinel*, and think perhaps I need only say I love them.

C. A. I., East Oakland, Cal.

For fifteen years I had been a great sufferer physically and mentally. Eminent physicians treated me for hereditary consumption, indigestion, nasal catarrh, torpid liver, impure blood, lack of circulation, malaria, and other diseases. I sought relief at famous springs, the ozone of Florida, and the pure air of Colorado, but in vain. My life was one ceaseless torture.

During all this time, however, I was an earnest seeker after Truth. I examined every religious sect with a calm and unprejudiced attention. From an orthodox Protestant I became a sceptic, and a follower of Voltaire, Tom Paine, and Ingersoll; yet all the while I retained faith in a supreme intelligent Being who made all. Sick, weary, doubting, and despairing, I accidentally went into First Church of Christ, Scientist, in New York City, on a Wednesday evening, not knowing what kind of a place it was. Seeing a large number of people going into the building I followed, supposing that a marriage ceremony had attracted the crowd. Being informed it was their regular Wednesday evening service, I inquired as to the denomination. I concluded that it was another new fad, like Spiritualism, which I had investigated and found unworthy of consideration; but subsequently I procured a copy of "Science and Health with Key to the Scriptures," promising I would read it carefully. I began reading the book on Tuesday and finished on Friday of the same week. I was still in the dark. I laid the book down, involuntarily closed my eyes, and silently prayed to God.

I remained in that attitude for a few moments when I felt like the mariner who had been tossed for days upon a boisterous sea, the clouds bending low, the billows rolling high, all nature wrapped in darkness; in his despair he kneels and commits his soul to God, when he suddenly beholds the North Star breaking through the clouds, enabling him to guide his ship to the shores of safety. Many things were made plain to me. I saw that there is one Fatherhood of God and one brotherhood of man; that though "once I was blind, now I see;" that there was no more pain, nor aches, no fears, nor indigestion. I slept that night like a babe and awoke next morning feeling refreshed.

Though this occurred weeks ago, and I have been exposed to the severest weather I have experienced in a decade, yet I have not had a single cold nor felt that awfully chilly sensation which tortured me in every climate. There are no traces whatever of my former complaint and I feel like a new being.

I make this statement unsolicited, without knowing Mrs. Eddy or any healer of Christian Science, and as a matter of justice to her and her marvelous book, "Science and Health with Key to the Scriptures."

L. Pierce Barnes, New York, N. Y.

Eight years ago when I left my native town of Berlin, Ont., Christian Science there was like a young plant just putting forth its first tender leaves.

Its sturdy growth since then, with flower and fruitage, is seen in their beautiful church building, seating between four and five hundred, which was opened in August, 1900.

Its rugged masonry of field-stone speaks of the foundation on the Rock, Christ. Its walls might well be called Salvation and its gates Praise, for they tell of the healing of the sick and sorrowful, of many cases of moral healing, and such transformation of character as causes frequent comment by the townspeople.

This growth of Christian Science in my old home is evidence that where even one is faithful and obedient, God giveth the increase, and that the branch of His planting becomes a fruitful vine.

I well remember my first meeting with a Scientist in Berlin, and how the love that was reflected in her consciousness made me long to know more of this beautiful Truth. This light shining through the purified human thought is

Digitized by Google

like the ray of light seen by the little child who, after long wandering through the city streets in the dark and cold of a Christmas night, saw at last a lighted candle in the window of a humble home where love reigned. To him it looked like a beautiful star. Though there were only a few coals in the grate, he felt the warmth of love that opened the door to a stranger, and the lowly home was to him more beautiful than the palaces of the rich where there was no light of love.

So we need to keep the light of the Christ Love ever shining through the window of our consciousness; even though it seems to us but a candle-light, it may be like a star to guide some earth-weary child into the way of Truth and Life.—M. A. T., Niagara Falls, N. Y.

When healing is done gradually through recognizing the power of Christ,—Truth,—it impresses one as wonderful; but when this same power heals a severe malady instantaneously, it seems like the so-called miracles of old.

A few weeks ago a cold asserted itself, with severe pain and inflammation. After some hours of work endeavoring to meet the trouble myself, without success, a practitioner was sent for, who came, and saw at once the necessity for immediate help. After a few moments' recognition of the healing power of Truth, the work was done, instantaneously. The demonstration was so quick that it held me in reverential silence for a moment, wondering. My first words were, "Now we *do know* that Christian Science is the Christ-Truth that heals!" The beauty of this demonstration was the sweet assurance and peace that followed.

During the eight years of my assiduous study in Christian Science, many errors have been overcome gradually. But this first experience in instantaneous healing seems to impel the writing of this testimony. It is only one experience among hundreds that have come to others through recognizing the power of Truth to heal, and which ought to prove the work of Christ's presence, "with signs following" in this century.

How can we refrain from being grateful to our beloved Leader, Mary Baker Eddy, and loving her for her fortitude and unselfish labors in showing us the way to health, harmony, and happiness through Christian Science?

K. G., Philadelphia, Pa.

The article on "Duty" in the January *Sentinel* prompted me to write again, expressing my gratitude for what Truth has done for me.

It will be seven years in June since I became interested in Christian Science, and during this time many and varied experiences have shown me how helpful it is. It has proven a speedy relief in many cases of illness. My own healing of rheumatism and nervous prostration was accomplished simply by reading "Science and Health with Key to the Scriptures." The healing brought such a sense of joy and relief that I began earnestly to investigate Christian Science. As some of the beautiful truths were unfolded my joy increased.

By faithfully applying what I understand, our family have been greatly helped and blessed.

There has been one claim in self that has failed to yield during all these years, but this very seeming failure has spurred me on to renewed efforts, and I know that by persistently holding to the Truth it must give way. Truth never fails. It is only as we rise higher in our own consciousness of God,—Good,—that our demonstrations will be quicker.

I can show my gratitude to our dear Leader for all she has done and is still doing for us only by faithfully striving to follow all her teachings, and thus reflecting more love. I also deeply appreciate the helpful and encouraging articles that appear in our *Journal* and *Sentinel*.

N. C. B., Peoria, Ill.

When Christian Science came to me I was in dense darkness, mentally and physically. I was down with typhoid fever with a doctor attending me. After he had said that I was very ill, and also left the impression that probably I never would recover, my two children who were with me, sent a telegram to their brother in South Dakota, telling him of my condition. We did not know at the time that he was a Christian Scientist. He came at once to me. The doctor's visits were discontinued and the medicine thrown away.

I was up and around in a very few days. I have never taken a dose of medicine since. God has been my only healer and help at all times and under all circumstances.

I have had many beautiful demonstrations; two, of which I would like to speak, were childbirth, with scarcely any inconvenience.

I feel that I have been lifted slowly but surely out of darkness into the light; that my feet are planted on the rock, Christ. I want to express my gratitude and love to our dear Leader, Mrs. Eddy, for this Truth she has given to the world.

Christian Science has made the Bible a new book to me. Before coming into Science I had laid my Bible away and scarcely ever looked at it, because I could not understand it; but now the Bible and Science and Health are my daily companions. I am very thankful for the help I receive from the *Journal* and *Sentinel*.

The *Sentinel* is a welcome visitor at our home every week.—ANNIE E. WHITE, Ottawa, Kan.

I am the little daughter of Mrs. Alice M. Whyte whose testimony was in the *Sentinel* of January 16. I have been in Science almost two years. I was born paralyzed on my left side and hundreds of dollars had been paid to doctors and for braces. When Science found me I was walking very badly, but now the lameness has almost entirely disappeared. When we first came into Science we lived in Ohio. Last summer we decided to come to Oregon. Before this time, I had never been able to ride on the train sitting backwards without being very sick, but this time I rode backwards almost all the way.

Before we came into Science I was out of school from sickness sometimes thirteen weeks at a time, but now I never miss a day.

I thank Mrs. Eddy for giving us this Science. I am also very grateful to my healer for her patience and loving care. But above all I am thankful for the blessed Truth which has changed my disposition.

GEORGIE WHYTE, Ashland, Ore.

I would like to give thanks for what Christian Science has done for me. I have overcome the liquor and tobacco habits by the study of "Science and Health with Key to the Scriptures." I am sixty-one years old. When I came into Christian Science four years ago I was old and broken down. I could not do a day's work without being laid up for a week or ten days. Now I can run, jump, climb, and do any kind of hard work without feeling weary or faint. I feel twenty-five years younger than I did four years ago.

I am very thankful to all at Christian Science headquarters for the work they are doing. Our Leader, Mary Baker G. Eddy, Discoverer and Founder of Christian Science, has, with God's help, done more for suffering humanity than any other human being since Jesus walked on the shores of the Galilean sea. She has given to the world a complete explanation of Jesus' healing methods.

J. S. WAMPLER, Portland, Ore.

The New York *Witness* says: "Some time should be spent on meditation, but more in good works. Thinking and working is a good combination, and those who are not acquainted with it will miss much in this world."

Religious Items.

Professor J. H. Moulton writes in the *Biblical World* of the remarkable change which has taken place within ten years in the lexicography and grammar of the New Testament Greek. This change is due to the discovery in Egypt of a large amount of scraps of Greek papyri dating from the early Christian centuries. These papyri include not only formal documents, but letters, receipts, memoranda, and informal papers of many sorts, in which the actual colloquial Greek of Pagan Egypt at and shortly after the New Testament period may be studied. The surprising result of such studies, as carried on by Deissmann and other scholars in Germany and England, is that we shall no longer hear of a New Testament or Hebraistic dialect of Greek. So many of the New Testament phrases regarded as peculiarly dependent on the Aramaic mother-tongue of the writers have been found in the writings of Greek-speaking people who could not possibly have been so influenced that the old distinction between "sacred" and "profane" Greek is no longer tenable. Apparently the Greek of Palestine was practically the Greek of the whole Roman Empire. . . . Incidentally we find ourselves moved to this question: If the contents of a few rubbish heaps in Egypt can overturn the whole body of inductions and deductions on which New Testament critics have based their confident analysis of the literary style of an author, a century, a country, what is the bearing of this fact on the much more complicated problem of analyzing a collection of Hebrew prophecies on the basis of style when we have scarcely any contemporary "pagan" relics of the Hebrew language by which to check our results? Much current criticism ignores the extreme scarcity of the literary materials and the correspondingly large probability of a wrong induction.—*The Standard.*

The dictionaries do not give us the New Testament definition of repentance. They tell us that the word means contrition, sorrow, grief, regret, penitence, and so on. These are terms of emotion, and they show us how widely and deeply the popular preaching has degenerated into appeals to the emotions, and how it has been robbed of intellectual and spiritual strength. There is a place for emotion in true Christian experience and in a strong Christian life, but it is far from being the first place.

Repentance, in the New Testament, is a change in man's thought, in his way of looking at supreme things, in his inmost convictions and purposes, and especially in his way of thinking about God. It is an appeal to the intellect, the will, the faculties of reason and choice, the "heart" in that large, fine Biblical meaning of the great word which includes all the powers of our moral and mental nature. . . .

The trouble with men to-day, in our cities and churches, is that they are all wrong in their thoughts about God. This is now, as heretofore, the root sin. Emerson was not an interpreter of evangelical truth, but he often showed wonderful insight. He said: "The key to man is his thought; change this and you have changed the man." Even so. This is regeneration, conversion, "repentance toward God and faith toward our Lord Jesus Christ."—*The Examiner.*

Everything which interferes with the effort of man to perfect himself and to perfect the society to which he belongs must give way. We cannot be permanently satisfied with any conception of religion which does not ally itself with all the forward-looking movements of the world. It must be nothing less than "the unmeasured thirst for good."

A body of people satisfied with themselves, who come together to criticise others, is a travesty on the idea of a Church. But it is a very different thing when, filled with a great ideal, it refuses to set bounds to it or to acknowledge the bounds set even by the best of men. Its gospel must have free course. Its criticism is in reality self-criticism. A truly liberal Church is composed of people who, first of all, belong to the church universal. They identify themselves with its spirit, they rejoice in its measure of success. They believe in organization but they recognize its dangers. The Church as it exists to-day is full of the promise of good things to come, but it is full of imperfection and error. The one fatal error is to treat the imperfect as if it were the perfect, to treat good men as if they did not need to be made better. The only safety is in perfect freedom.

REV. S. M. CROTHERS.
In *The Christian Register.*

Whether these reasons are sound or unsound, the indisputable historical fact is that, for hundreds of years after the last of the Apostles was taken to his rest, the Christian Church, though always using some part of the Lord's Day for common worship, required no man to observe the day as a Sabbath of obligatory abstinence from labor. To quote the monumental work of Dr. Hessey, St. Justin "asserts that the Fathers before Abraham, and Abraham himself, and his sons up to the days of Moses, pleased God without keeping Sabbath; that, as before Abraham's days, there was no need of circumcision, so before those of Moses there was no need of *sabbatismos* and feasts and offerings. When he speaks of Christians keeping the *Sabbath*, it is in a purely symbolical sense; the Christian life, he declares, is all a Sabbath, and he condemns the Jews who make so much of being idle on one day." Thus, to quote a much more recent writer, St. Justin "treats the Sabbath in much the same way as the English Church explains the fourth Commandment: 'Serve Him truly all the days of my life.'" And that primitive view remained undisturbed and undisputed for many centuries.

The Church Standard.

Lent may be called the spring-time of religious seasons. It is the period of earnest thinking and hoping. It is not limited to forty days in March and April; it may be any time and as often as a man becomes aware of his needs and duties in respect to higher thinking and acting. If I may carry the figure of spring a little further, I would say man needs these awakening moments at frequent intervals. His religious powers sometimes become inactive, sluggish. He needs to give thought to his religious development. His awakening may be partial at first and he may start on a comparatively low level. His purpose may be largely selfish, just a dull sense of a new need in his life. There may come times when something within him is touched with a consciousness of incompleteness. Spring does not last all the time; neither are we to seek the new in religion at all periods. He who has changed his faith or gained a new ideal of God or immortality or of life needs to take time to enjoy his thought, to let it exert its influence upon his life and character and become a habit of his nature.

L. D. MCCOLLESTER, D.D.
In *The Universalist Leader.*

D. S. Gregory, LL.D., D.D., says in *The Homiletic Review:* "Abstract ideas and doctrines concerning Christianity have little impelling power; it is only as they become practical, *i.e.*, connected with the vital interests, human and divine, that they become compelling. Yet so long as man remains rational the mighty motive forces must be the outcome of the mighty practical doctrines.

"The views of Christendom must be toned up to Christ's standard, if the churches are even to start on their mission for the lost world; and then these views must be made practical and urgent, according to teachings of the Word of God, if they are ever to fulfil their mission. A heartless and luke-warm Christianity has in it nothing but doom either for itself or for mankind. Manifestly there must be a mighty revolution in the heart of Christendom before its accomplishments can measure up to the requirements of Christ."

Bishop Warren says in *The Christian Advocate:* "So the Bible has ultimate meanings that the critic, historian, linguist, student of history may miss, while they are revealed by the Father unto babes. We can be nourished with mother milk without knowing the chemical process. Happy is he who knows Bible history, poetic interpretations of nature and theology. But truly blessed is he who, by the present aid of the Holy Ghost, penetrates into the ultimate meaning of it all!"

John P. Peters, Ph.D., Sc.D., D.D., says: "In interpreting the Bible many texts as they are used, referring to Christ, must be relegated to the attic, but a great many more texts, according to a better interpretation, will take the place of these. The whole Old Testament will become a prophecy of Christ, rather than individual texts."

The presentation of Christianity that is most effective in producing regenerated manhood is prima facie truest. The test of practical results measures the truth of doctrines. A type of religious teaching that makes men real Christians is self vindicated.

The Watchman.

You can no more filter your mind into purity than you can compress it into calmness; you must keep it pure if you would have it pure; and throw no stones into it if you would have it quiet.—JOHN RUSKIN.

He that is afraid of solemn things has probably solemn reason to be afraid of them.

SPURGEON.

It is only when prayers are crystallized into deeds that they become true prayers.

R. T. WATSON.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa.*

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax: this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, marbled edges, Oxford India paper, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid.	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages, illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15; 50 copies to one address, $2.25.

SUPPLEMENT

To the CHRISTIAN SCIENCE SENTINEL

Die Christliche Wissenschaft, Das Christenthum Christi.

—— Ein Vortrag von dem Geistlichen **Irving C. Tomlinson,** ——

Gehalten in Malden, Mass., am 23. April 1901.

Wer kann wohl den Werth der Wissenschaft Christi beurtheilen?

Der Gründer derselben war der edelste Charakter in der ganzen biblischen Geschichte. Die Namen der Großen und Guten im ganzen Zeitalter sind auf deren Urkunden eingetragen.

Welch' unschätzbare Opfer sind auf den Altären derselben dargebracht! Welche Liebesdienste sind deswegen vollbracht! Das Christenthum Christi! „Es ist das wahrhaftige Licht, welches alle Menschen erleuchtet, die in diese Welt kommen." Es ist die „Perle von unschätzbarem Werthe," die zu besitzen der Mensch gerne sein ganzes Besitzthum opfern würde.

Die Christliche Wissenschaft hat für alle Menschen eine frohe Botschaft. Zu denjenigen, welche unzufrieden sind, kommt sie mit dem Evangelium der Liebe. Sie verkündet uns, daß das Christenthum Christi das Eigenthum eines jeden sein sollte, und derjenige, dem es mangelt, entbehrt das Nothwendigste.

Die Christliche Wissenschaft kommt zu denjenigen, die entmuthigt sind und niedergeschlagen, und verkündet ihnen, daß es noch Hoffnung giebt. Sie kommt zu denen, die an Geist und an Körper krank sind, mit der frohen Botschaft, daß es für sie noch Gesundheit und Leben giebt.

Die Christliche Wissenschaft ist wie eine große Orgel, deren süße Harmonie nur zum Ausdruck gebracht wird für die, welche Verständniß dafür haben. Ich kann nur den Schlüssel zu diesem edlen Instrument in Ihre Hände legen. Um diese göttliche Harmonie hervorzubringen, muß der Schlüssel gebraucht werden, die Wissenschaft studiert und das Gelernte zur Anwendung gebracht werden. Das Christenthum Christi kann wohl schwerlich besser erklärt werden, als in den Worten Jesu: „Du sollst Gott deinen Herrn lieben von ganzem Herzen, von ganzer Seele, von ganzem Gemüthe und von allen deinen Kräften," und „Du sollst deinen Nächsten lieben als dich selbst." Der Begründer der Christlichen Religion hatte einen sehr praktischen Begriff von dem, was er thun sollte und wozu er geschickt wurde. Er predigte nichts von einer großen Hierarchie, er schrieb keine Formeln vor; er sagte, „denn ich suche nicht meinen Willen, sondern des Vaters Willen, der mich gesandt hat;" und er erklärte auch, daß er „zu suchen und zu retten käme." Ein anderes Mal behauptete er: „Ich bin gekommen, daß sie das Leben und volle Genüge haben sollen." Und der Apostel Jacobus faßte seine ganze Religion in den folgenden Worten zusammen als er sagte: „So ihr dem königlichen Gesetz gehorchet nach der Schrift ‚Liebe deinen Nächsten als dich selbst,' so thut ihr wohl."

Die Werke, welche Jesus vollbrachte um den Werth seiner Religion zu beweisen, waren dem unmittelbaren Bedürfniß derjenigen, die um ihn waren, angepaßt. Er öffnete dem Blinden die Augen, dem Tauben die Ohren, reinigte den Aussätzigen, heilte den Ausgestoßenen und den verlorenen Sohn. Hierin war er in vollem Einverständniß mit der Religion seiner Väter. Das Alte Testament richtig verstanden, ist ein Handbuch zum praktischen Leben. Im ersten Buch Mose lesen wir den ersten Krankheitsfall darin verzeichnet. Abimelech, der Freund Abrahams, war erkrankt und wir lesen, „Abraham aber betete zu Gott: da heilete Gott Abimelech."

In den Psalmen wird Gott beschrieben als der Eine, „der dir alle deine Sünde vergiebt, und heilet alle deine Gebrechen." Im letzten Kapitel des Alten Testaments ist es erklärt, „die Sonne der Gerechtigkeit soll aufgehen; und Heilung unter desselbigen Flügeln;" und die Prophezeiung wurde erfüllt in Jesus Christus, denn es heißt, daß er alle Krankheiten heilte. Es ist nirgends angegeben, daß diese praktische Religion nur zu den Bibelzeiten angewandt werden sollte. Der Begründer des Christenthums verkündete, „Wer an mich glaubet, der wird die Werke auch thun, die ich thue, und wird größere denn diese thun." Seine Jünger heilten die Kranken und die Kirche gehorchte in den ersten drei Jahrhunderten ihrer Geschichte dem ganzen Befehl des Meisters „zu predigen und zu heilen."

Um im Einklang mit den Lehren des Neuen Testaments zu sein, kann man die praktischen Werke von der Religion Jesu so wenig trennen, wie man das Blaue vom Himmel oder die Liebe aus dem Mutterherzen entfernen kann. Ein Apostel sagte, „daß der Glaube ohne Werke todt sei;" und der geliebte Jünger erklärte, „denn wer seinen Bruder nicht liebet, den er siehet; wie kann er Gott lieben, den er nicht siehet?" Wir können also das Christenthum Christi nicht besser erklären, als wenn wir sagen, es ist das ganze Verständniß und die vollkommene Anwendung des Königlichen Gesetzes der Liebe.

Die Christliche Wissenschaft kann geschildert werden als eine Wiederherstellung dieser frühzeitigen Christenheit. Dieselbe versucht dem ganzen Befehl des Meisters zu gehorchen. Die erste Kirche der Christlichen Wissenschaft wurde gegründet im Jahre 1879 auf dem Fundament der Christlichen Heilung. Von dieser einen Kirche sprossen fast sechshundert andere; deren Gemeinden befinden sich in den Vereinigten Staaten, Mexico, auf den Inseln des Meeres, in England, Deutschland und Frankreich. Das Textbuch dieser Kirchengemeinschaft ist: „Science and Health with Key to the Scriptures," by Rev. Mary Baker G. Eddy; auf Deutsch: „Wissenschaft und Gesundheit mit dem Schlüssel zu der Heiligen Schrift," geschrieben von der Ehrwürd. Mary Baker G. Eddy, und es wurde zuerst veröffentlicht im Jahre 1875. Durch das Lesen dieses Buches und durch diejenigen welche darin unterrichtet worden sind, wurden schon über eine Million Menschen von Krankheit und Sünde geheilt. In diesen sechsundzwanzig Jahren sind zweihundert und zweiundzwanzig Ausgaben, deren jede ein Tausend Exemplare enthält, veröffentlicht und verkauft. Hat nicht dieses heilende Evangelium das Recht zu dem Namen des Christenthums Christi, da es ausdrücklich dem Befehle des Meisters Gehorsam leistet? Der Meister sagt: „Machet die Kranken gesund, reiniget die Aussätzigen, wecket die Todten auf."

Es wird manchmal gesagt, daß die Heilkraft mit dem Leben des Meisters endete und es wird auch behauptet, daß das Heilen der Kranken kein Theil der Religion sei. Die Behauptung ist gemacht worden, daß Jesus die Kranken heilte, weil er die Macht besaß, die sonst niemand besaß. Die Worte Jesu und die Praxis der frühzeitigen Kirche unterstützen solche Behauptung nicht. Jesus sagte: „Die Zeichen aber, die da folgen werden denen, die da glauben, sind die: In meinem Namen werden sie Teufel austreiben, mit neuen Zungen reden, Schlangen vertreiben, und so sie etwas Tödtliches trinken, wird es ihnen nicht schaden; auf die Kranken werden

Digitized by Google

sie die Hände legen, so wird es besser mit ihnen werden." Die Werke, welche Jesus vollbrachte, wurden auch von seinen Jüngern vollbracht. Ohne diese praktischen Werke fehlt uns auch der Grundzug, welcher die Religion Jesu als einzig in ihrer Art darstellt.

In der Christlichen Wissenschaft muß es deutlich verstanden werden, daß die Heilung weder durch Willenskraft noch durch thierischen Magnetismus vollbracht wird. Der ungesetzlich Heilende behauptet: „Ich selber kann alles vollbringen." Jesus sagte: „Ich kann nichts von mir selbst thun; der Vater aber, der in mir wohnet, derselbige thut die Werke." Und wiederum sagte er: „Doch nicht mein, sondern Dein Wille geschehe." Und so ist es in der Christlichen Wissenschaft, Gott ist der Heilende. Je weniger Selbstgefühl vorhanden ist, desto mehr ist von dem Vater vorhanden. Der Praktikant der Christlichen Wissenschaft versucht nicht sich selbst zu erheben, sondern Gott zu verherrlichen. Aus sich selber ist er nichts. Mit Gott, wird er eine Macht für Rechtschaffenheit. Wenn die Praxis dieser Kirche redlich untersucht und deutlich verstanden wird, glauben wir beweisen zu können, daß dieselbe identisch ist mit der Praxis Jesu und der frühzeitigen Kirche.

Denjenigen, die so lange an den Gebrauch der Arzneien gewöhnt waren, scheint es vernunftwidrig und unmöglich, daß man ohne dieselben geheilt werden kann. Materielle Hilfsmittel fahren zu lassen, scheint ihnen als ob sie versuchten, dadurch geheilt zu werden, daß sie nichts thun oder alles unterlassen. Die Christliche Wissenschaft erkennt diesen Geisteszustand und versucht es nicht, denen ihre Religion aufzudrängen, die unvorbereitet sind. Die Praktikanten der Christlichen Wissenschaft haben niemals versucht, durch Gesetzgebung andere zu zwingen, ihre Heilmethode zu gebrauchen, obgleich sie selber fest daran glauben. Sie bieten ihre Dienste nur denjenigen an, die dieselben suchen und wünschen. Ihnen erscheint es nicht vernunftwidrig zu glauben, daß es eine andere Heilmethode giebt, als die durch den Gebrauch der Arzneien. Es wird oft gesagt, daß es recht sein muß, Arzneien zu gebrauchen, sonst würde Gott sie nicht gemacht haben. Wenn Gott wirklich die Kräuter des Feldes gemacht hat um zu Arzneien verwendet zu werden, dann ist es nur natürlich zu vermuthen, daß er für jede Krankheit ein bestimmtes heilendes Kraut erschaffen haben würde. Es ist Thatsache, daß es kein einziges bekanntes Kraut giebt, wodurch eine unfehlbare Kur einer einzigen Krankheit herbeigeführt werden kann. Es ist die allgemein bekannte Wahrheit, daß es keine unveränderliche Vorschrift für die Wirkung der Arzneien giebt, und daher können sie nicht das Erzeugniß des Göttlichen Geistes sein; denn alles, was Er erschaffen hat, ist unveränderlich und immer gut.

Die Praxis Jesu zeigt nicht an, daß Arzneien die einzige Heilmethode seien. Es heißt, daß er alle Krankheiten heilte, und doch gebrauchte er keine einzige Arznei. Wenn es Gottes Wille wäre die Kranken durch materielle Heilmittel zu heilen, würde Jesus diese Methode dann nicht angewandt haben? Er vertraute nur auf Gott und lehrte seine Jünger Ihm auch so zu vertrauen, und er erklärte bestimmt, daß andere dieselben Werke vollbringen sollten, die er vollbrachte.

Die Christliche Wissenschaft hat für die ganze Welt die Botschaft, daß das Christenthum Christi so verstanden und angewandt werden kann, daß Krankheit verbannt wird, und Leben und Gesundheit das Besitzthum aller sei. Daß einige dieses brauchbare Evangelium verwerfen, kommt daher, daß ihnen das Verständniß mangelt die Lehren zu verstehen. Man vermuthet, daß diese Religion nicht an die Existenz des Weltalls glaubt. Diese irrenden Menschen glauben zu verstehen daß die Lehren dieses Systems lehren, daß alles, was dem Auge sichtbar ist, keine Existenz habe, und daher finden sie keinen Sinn in diesem System. Die Christliche Wissenschaft lehrt uns, daß Gott alles machte, und siehe da, es war sehr gut. Sie lehrt uns, daß alles was wahr und schön und gut ist, auch dauerhaft ist. Sie nimmt von dem Menschen nur das, was er nicht braucht, und läßt ihm das Gute, das Schöne und das Wahre. Sie stimmt überein mit dem Apostel, der sagte: „denn was sichtbar ist, das ist zeitlich; was aber unsichtbar ist, das ist ewig."

Und dann wird die Lehre auch als fraglich hingestellt, weil einige Leute vermuthen, daß sie die Unwirklichkeit der Krankheit lehrt. Den Kranken scheint nichts so wirklich und wahr als die Schmerzen. Dieses heilende Evangelium bestreitet nicht, daß ihrem Empfindungsvermögen nach, das Leiden wirklich ist. Gerade wie die Fehler in der Mathematik wirklich nicht ein Theil der Wissenschaft der Mathematik sind, so wird es verstanden, daß die Krankheit nicht ein Theil des Königreichs Gottes ist, sondern daß es ein irriger Zustand ist, welcher der lieben Wahrheit weichen wird. Diese Religion behauptet, daß das Leben und die Gesundheit zuverlässig und wahr sind und daß Krankheit negativ ist und nicht der wirkliche, wahre Theil eines Menschen. Hätte Jesus die Krankheit berücksichtigt als wäre sie ein Theil des Königreichs Gottes und als sei sie etwas Wirkliches und Ewiges, so würde er und könnte er sie nicht geheilt haben; denn was Gott erschaffen, ist dauernd. Für ihn kam Krankheit nicht von Gott, und daher konnte er und hat er sie vernichtet. Der verschrumpfte Arm schien wirklich zu existieren; Jesus bewies, daß das Leben wahr ist, als er dem Manne befahl, den Arm auszustrecken; und er wurde gesund wie der andere. Weil Jesus sah, daß Krankheit und Sünde falsch und unwahr sind, verschrieb er das wahre Heilmittel, indem er sagte: „Und ihr werdet die Wahrheit erkennen, und die Wahrheit wird euch frei machen."

Und wiederum wird die Christliche Wissenschaft als fraglich hingestellt von andern, da sie den Umsturz des physischen Gesetzes lehrt; sie betrachten den Menschen als sei er in der Gewalt des Gesetzes und sie bestehen darauf, daß diese Gesetze mit Zuverlässigkeit wirken. Sie verwerfen die Christliche Wissenschaft, weil sie nicht sehen, daß diese Gesetze umgestoßen werden können. Diese Religion bringt das natürliche Gesetz in Berechnung; aber sie behauptet, daß das Gesetz Gottes in Wahrheit das einzige Gesetz ist und es ist Allmächtig über alles.

Wie wir gesehen haben, nannte der Apostel die Liebe „das Königliche Gesetz." Für Jesus war die Liebe das Gesetz. Wie das Gesetz der Schwerkraft das materielle Weltall beherrscht und regiert, so verstand Jesus, daß das Gesetz der Liebe den Menschen beherrscht und regiert. In der Bibel wird es erklärt, daß wir in dieser Liebe „in Ihm leben, weben und sind." Der Praktikant der Christlichen Wissenschaft sagt nicht, daß es unserem Empfindungsvermögen gemäß kein menschliches Gesetz giebt, aber er behauptet, daß das Gesetz der fleischlichen Natur nicht der Gebieter des Menschen ist. Der Regen, welcher am Stammende der stattlichen Ulme niederfällt, wird von dem Gesetz der Schwerkraft gelenkt, und wenn jemand sagen würde, daß Wasser den Hügel hinaufläuft, so würde es heißen, daß er den Verstand verloren habe; und doch wenn das Wasser die Wurzeln des Baumes erreicht, so tritt ein anderes Gesetz in Kraft, und als Saft erreicht es den höchsten Gipfel des Baumes. Das Gesetz des Baumes hat das Gesetz der Schwerkraft null und nichtig gemacht. So macht das Gesetz der Liebe — dieses Gesetz des Heiligen Geistes — das Gesetz des Fleisches zu nichte und vernichtet Krankheit und Sünde und bringt uns statt deren Gesundheit und Harmonie. Im Einklang mit dieser Erklärung sagte der Apostel Paulus: „denn das Gesetz des Geistes, der da lebendig macht in Christo Jesu, hat mich frei gemacht von dem Gesetz der Sünde und des Todes." Dies ist sehr einfach, wenn wir in die Fußtapfen Jesu treten. Als er in das Haus Petri trat, fand er, daß dessen Schwiegermutter krank am Fieber darniederlag. Dem menschlichen Gesetz gemäß wüthet das Fieber eine gewisse Anzahl Tage; aber Jesus verstand das Gesetz Gottes, er sprach das Wort, das Gesetz des Fleisches wurde zu nichte gemacht und die geheilte Frau nahm ihren Platz im Familienkreis ein. Ein Aussätziger kam zu ihm und sagte: „Herr, so Du willst, kannst Du mich wohl reinigen." Unzählige Gesetze waren bei dem Aussätzigen angewandt worden, und es hieß, daß er unheilbar sei; aber Jesus sprach das Wort des Lebens und die Gesundheit des Mannes war wiederhergestellt. Dies war das Verständniß Christi von der Liebe Gottes. Er wußte, daß das Gute nur Gutes erschafft, und nur Gutes hervorbringen kann. Diese heilige Liebe war der

Digitized by Google

Geist und dieser einzige Geist, wenn richtig verstanden, erschuf Gesundheit und Harmonie. Diese Liebe war das Gesetz und jenes Gesetz richtig verstanden, vernichtet alle Formen der Krankheit und Sünde, und schafft sogar den Tod ab. Und die Christliche Wissenschaft behauptet, daß das, was Jesus in Palästina vollbrachte, jetzt und hier vollbracht werden kann. Ebenso wie in früheren Tagen, ist Gott jetzt die Liebe und diese Liebe ist Gesetz. Der Mensch steht nicht allein in seiner Arbeit gegen die materiellen Gesetze des Weltalls, sondern die Allmacht ist bei ihm und diese Allmächtige Weisheit ist sein Wohlthäter. Der liebe Gott ist nicht in der Ferne; Er ist hier, näher als die Luft die wir athmen, und wenn wir uns Ihm nur hingeben, gehört Er uns, und Er rüstet uns vollständig aus mit Seiner Kraft und Seinem ewigen Leben.

Die folgende Frage ist von allerhöchster Bedeutung: „Wie kann der Mensch die Vorzüge dieses Gesetzes der Liebe genießen?" Der Begründer des Christenthums hat uns die Antwort gegeben. Jesus sagte: „Das ist aber das ewige Leben, daß sie Dich, daß Du allein wahrer Gott bist, und, den Du gesandt hast, Jesum Christum, erkennen." Nach den Aussprüchen des Meisters verfassen die Kenntniß Gottes und Seines Sohnes das Leben. Wenn jemand Mathematiker werden will, so ist das Verständniß der Mathematik zuerst nothwendig; wer in der Wissenschaft der musikalischen Harmonie geübt werden will, der muß die Wissenschaft studieren; und wer hier in dem Leben Jesu gründlich bewandert werden und ein göttliches Leben erreichen will, der muß Verständniß von diesem Leben haben. Als der große König Salomon seine Laufbahn betrat, betete er zu Gott und sein himmlischer Vater sagte: „Bitte, was Ich dir geben soll." Der jugendliche König bat nicht um Reichthum oder Ehre, sondern er bat: „So wollest Du Deinem Knechte geben ein gehorsam Herz," und wir lesen, daß Gott ihm nicht nur ein verständiges Herz, sondern auch Reichthum und Ehre gab. Wer Weisheit hat, besitzt auch sonst alles. Daher sagte Jesus: „Dies ist das ewige Leben, Gott und Seinen Sohn zu kennen."

Jesus verstand, daß Gott gut ist. Als jemand zu ihm kam und sagte: „Guter Meister," erwiderte er: „Was heißest du mich gut? Niemand ist gut, denn der einige Gott." Er kannte Gott nur als die Heilige Liebe und der zärtliche Name, den er dieser ewigen Liebe gab, ist „Unser Vater der Du bist im Himmel." Im ersten Buch Mose steht geschrieben: „Gott sahe an Alles, was er gemacht hatte; und siehe da, es war sehr gut." Da nun Krankheit und Sünde nicht sehr gut sind, so hat Gott sie nicht gemacht. Keine leiblichen Eltern würden ihr Kind mit Sünde oder Krankheit behaften, und ist unser Himmlischer Vater weniger liebevoll als der leibliche? Krankheit hat keinen Bestandtheil in Gottes Schöpfung; Gesundheit ist positiv; Krankheit bedeutet Abwesenheit der Gesundheit — eine Verneinung; und gerade so wie die Liebe den Haß vernichtet, so vernichtet die Güte Gottes wenn richtig verstanden, Krankheit und Sünde. Ich hörte von einer erwachsenen Person, wenn sie in ihrer Kindheit sich verletzte, daß sie ihre Mutter aufsuchte und daß der Mutterkuß die Schmerzen zu vernichten schien. Wenn die menschliche Mutterliebe das schmerzstillende Mittel bringt, was wird uns dann wohl die Liebe der Himmlischen Eltern bringen, wenn wir sie nur so vertrauensvoll suchen wie das Kind den Schooß der Mutter.

> Die Allgewaltigen Arme der Liebe
> Unter uns, über uns, rings umher;
> Gott die Liebe stützet uns,
> Seine Allmacht führt uns an.

Und Jesus kannte nicht nur seinen himmlischen Vater als gut, sondern er kannte ihn auch als Heiligen Geist. Es stehet geschrieben: „Wie kostbar sind deine Gedanken für mich, mein Gott"; und wiederum heißt es: „Denn wie sein Herz, so ist er." Wer hat nicht den Einfluß des Geistes gesehen? Wie eines Menschen Geist ist, so wird der Mensch werden. Führen seine Schritte ihn nach der Heimath und der Kirche? Auf seinem Antlitz spiegelt sich der Ausdruck ab. Sind seine Schritte dem Laster und der Ehrlosigkeit zugewendet? Dieselben werden in der Geschichte verzeichnet, welche von Menschen gelesen wird. Schlechte Gedanken erzeugen Krankheit. Ein kranker Geist erzeugt einen kranken Körper. Wenn also ein irriges Gemüth der Vorbote der Krankheit ist, weshalb sollte dann nicht der Wahre Geist die Krankheit heilen? Und der Apostel hat es so erklärt: „Und stellt euch nicht dieser Welt gleich, sondern verändert euch durch Verneuerung eures Sinnes."

Dieses Verständniß des Königlichen Gesetzes der Liebe erhebt den Menschen zu seinem wahren Stand. Das Christenthum Christi macht den Menschen zum Kinde des Himmlischen Königs, zum Prinzen im Königreich des Himmels. Der Mensch ist nicht länger ein Wurm des Staubes; er hat seinen wahren Stand gefunden. Nur zu oft ist ein Mensch gemein, weil er sich für gemein hält. In der Heiligen Schrift heißt es, daß der Mensch zum Ebenbilde Gottes erschaffen wurde und es heißt, daß Gott dem Menschen Macht über alles auf Erden gab. Wie das Licht gemacht wurde um über die Dunkelheit zu herrschen, so wurde der Mensch erschaffen, um Herrschaft über alles Gethier, über alle Elemente, über alles zu haben, was ungleich Gott ist.

Der Mensch ohne wahre Kenntniß von sich selber und Gott, ist wie ein schiffbrüchiger Seeman auf dem tobenden Meer. Der Mensch, der von sich selber und von Gott Verständniß besitzt, ist mit Seekarte und Kompaß versehen, und diese lenken ihn von den stürmenden Wogen in den Hafen des Friedens.

Jesus gab den Menschen das Gebet als Mittel, um Gutes zu vollbringen. Er war in Harmonie mit der Religion seiner Väter. Sie glaubten, daß Gott dem Menschen Beistand leistet durch Gebet. Jesus sagte: „Und alles, was ihr bittet im Gebet, so ihr glaubet, so werdet ihr es empfangen." Entweder hat Jesus wirklich gemeint, was er sagte, oder Gebet ist werthlos. Weshalb sind denn unsere Gebete wohl nicht erhört? Die Bibel giebt uns die wahre Antwort. Es heißt: „Ihr bittet und krieget nicht, darum, daß ihr übel bittet." Das Christenthum Christi bittet und erhält, weil es richtig bittet. Als der verlorene Sohn sich von dem Futter der Säue nährte und den Segen des Vaterhauses entbehren mußte, da war es sein einziges Gebet, daß er sich erhebe und zu seinem Vater gehe. Er reichte keine lange Bittschrift ein; er bat nicht um dringenden Begehr; er wußte, daß sein Vater ihn liebte und ihn willkommen heißen werde. Als unser Meister vor Lazarus' Gruft stand, sandte er keine lange Bittschrift zu Gott, den Mann vom Tode zu erwecken. Er sagte: „Doch ich weiß, daß Du mich allezeit höreſt." Aber er hat es verstanden, daß Gott gut war, daß Gott weder Krankheit noch Tod geschickt hatte; er hat es verstanden, daß der Geist Allmächtig war, und daß die Liebe das einzige Gesetz ist; und diese Kenntniß zerriß die Fesseln des Todes und erweckte den Lazarus zum Leben. Das wahre Gebet ist ein Gebet der Ueberzeugung und solches Gebet ist nicht vergebens ausgesandt. Ein Mathematiker, der sein Problem ausarbeitet, versteht das Prinzip, welches es enthält, und dieses Verständniß vertilgt die Fehler und enthüllt die Wahrheit. Wenn ein Musiker Harmonie hervorbringen will, so muß er das Prinzip der Musik verstehen und dieses Verständniß giebt die Melodie. So ist Gebet das wahre Verständniß des Menschen und seines Prinzips, des Gottes, der die Liebe ist, der alles regiert, und dieses Gebet des Verständnisses verbannt die Zwietracht der Krankheit, der Sünde, und bringt die Harmonie der Gesundheit, der Glückseligkeit hervor.

Aber, fragen Sie, wie kann dies gelernt werden? Als die Entdeckerin und Begründerin der Christlichen Wissenschaft sich geheilt hatte durch das Verständniß des Königlichen Gesetzes der Liebe, und als sie dann andere geheilt hatte, lehrte sie sie dieses Gesetz der Liebe zu verstehen. Dann verschloß sie diese Entdeckung nicht in sich, sondern sie machte diese Kenntniß klar und deutlich für alle, indem sie der ganzen Welt das Textbuch dieser Kirchen-Gemeinschaft gab: "Science and Health with Key to the Scriptures"; auf Deutsch: „Wissenschaft und Gesundheit mit dem Schlüssel zu der Heiligen Schrift." Dieses Buch befindet sich in vielen öffentlichen Bibliotheken des Landes, und jedes Mitglied dieser Kirche wird gerne denjenigen sein Buch leihen, die das Verständniß wirklich suchen.

Es ist mein Privilegium, in der jetzigen

Digitized by Google

Heimath der Begründerin und Entdeckerin der Christlichen Wissenschaft zu wohnen. Von den dortigen Leuten und von andern, welche ich traf, erfuhr ich ihre Lebensgeschichte. Sie wurde von frommen und gläubigen Eltern geboren. Ihre Kindheit war so fromm und rein, daß ein frommer Prediger sagte, daß sie geweiht sei, ehe sie geboren wurde. Sie war immer eine eifrige Forscherin der Bibel und auf der Mutter Schooß wurde es sie gelehrt, daß Gebet zu Gott die Kranken und Sündigen heilt. Schon in ihrer Kindheit vertrieb sie Krankheit dadurch, daß sie ihren Himmlischen Vater anrief. Als sie aufwuchs, waren ihre Gedanken von Gott und dem Dienste der Barmherzigkeit erfüllt. Ich lernte jemand kennen, die sie in den ersten Jahren ihrer Ehe kannte, und sie sagte mir, daß es Freude und Trost bringe, Frau Eddy in jenen Tagen zu besuchen und durch ihre liebreiche Gegenwart gesegnet zu werden. Ich traf noch jemand, der sie später kannte, ehe sie die Christliche Wissenschaft entdeckte; aber ihre Gedanken waren immer darauf gerichtet andern zu helfen, und sie vernichtete den Schmerz und brachte diesen Leidenden Linderung durch ihre Liebe, die sie für Gott und Menschen hegte. Im Jahre 1866, als sie von einem Unfall betroffen wurde und von den Aerzten für unheilbar erklärt, wandte sie sich von der Erde zum Himmel. Sie öffnete ihre Bibel wo die Heilungen verzeichnet sind, und die Christusmacht, welche die Kranken heilte, segnete auch sie, und sie erhob sich von ihrem Schmerzenslager geheilt und wohl. Sie sah, daß dieselbe Macht, welche sie geheilt hatte, auch andere heilen würde, und sie widmete sich drei Jahre ausschließlich dem Studium der Bibel, daß sie auch andere mit diesem Gesetz der Liebe bekannt machen könne. Sie versuchte nicht, das Geheimniß für sich selbst zu behalten, sondern es war ihr einziger Wunsch, auch andern diese Religion Christi deutlich zu erklären, diese Religion, die Krankheit und Sorge zu nichte macht und Freude und Gesundheit bringt. Sie ist die Führerin dieser mächtigen Bewegung, und dasselbe liebevolle Vertrauen auf Gott, welches sie in früheren Jahren auszeichnete, begleitet sie noch; dasselbe zarte Mitgefühl für die Leidenden fügt eine Schönheit und Huld zu ihren Jahren. Ihre ganze Tageszeit ist dem Heile der Menschheit gewidmet. Sie ist mißverstanden worden, aber sie hat nicht gezögert in ihrer Liebe zu Gott und in ihrer Treue gegen die Menschen.

Für diejenigen, welche die Religion Jesu in der Beleuchtung der Christlichen Wissenschaft studiert haben, ist dieselbe wahrlich das Königliche Gesetz der Liebe. Sie hat Schmerzen und Leiden verscheucht, sie hat die Kranken und die Sünder geheilt, und hat die beschmutzte Kleidung der Gefallenen weißgewaschen. Sie hat dem Menschen einen Stern der Hoffnung vorgelegt und ihn mit der ewigen Gegenwart des lebendigen Christus ermuntert.

Dann Bruder, schließe an dein Herz den Bruder;
Denn wo die Liebe wohnt — der Friede Gottes weilt.
Um Gott recht zu verehren, muß man einander lieben;
Jedes Lächeln ist eine Hymne; jede milde That ein Gebet.

PERIODICALS

PUBLISHED BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY,
95 Falmouth Street, Boston, Mass., U. S. A.

A WEEKLY NEWSPAPER

Christian Science Sentinel

PUBLISHED EVERY THURSDAY

Contains a brief summary of the most important news and articles selected from various sources, gives the Voice of the Press and timely editorials in connection with the movement, and presents interesting contributed articles and testimonials.

Subscription Price: One Dollar a Year. Foreign subscriptions, $1.50. On sale at three cents a copy, postpaid.

A MONTHLY MAGAZINE

The Christian Science Journal

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Is the Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

It contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science, dissertations, and lectures.

Subscription Price: Two Dollars per annum; One Dollar for six months; Foreign Subscriptions, $2.40 per annum; $1.20 for six months; Single Copies, 20 cents, postpaid.

BIBLE LESSONS

The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Contains the Lesson Sermons which are read at the Sunday Services throughout the year, in all the Christian Science Churches.

Subscription Price: One copy one year, postpaid, 50 cents.

Foreign subscriptions, one copy, one year, 60 cents. On sale at 15 cents a copy.

Catalogue of prices for Oxford Bibles, Hymnals, Books, Pamphlets, etc., sent on application.

Direct orders, and make remittances payable to

Works on Christian Science, By Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Revised and Enlarged 1902. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING. Price (cloth) each $3.18
Leather, stiff beveled boards, gilt edges, each, prepaid 4.00
Full Sheep, stiff covers, marbled edges, Oxford India paper, each, prepaid 4.00
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid 5.00
Levant, divinity circuit, leather lined to edge, round corners, gold edges, silk sewed, Oxford India paper, each, prepaid 6.00

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions. Price (cloth) each, prepaid $2.25
Morocco, limp, round corners, gilt edges, convenient for pocket, narrow margins, each, prepaid 4.00
Levant, divinity circuit, leather lined to edge, round corners, gold edges, silk sewed, each, prepaid 5.00

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRIST AND CHRISTMAS. An illustrated poem. Single book, prepaid, $3.00; $30.00 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The message of the Pastor Emeritus, the Rev. Mary Baker G. Eddy, delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; $2.50 per dozen, prepaid.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckle-edged. Price, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckle-edged. Price, prepaid, 50 cents; per dozen, $4.50.

Direct all orders for above works, and make remittances payable to

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The final results of the twelfth census give the total population of the United States on June 1, 1900, as 84,233,069. The Chinese, British, and Russian empires are the only countries which have a greater number of inhabitants under their flags. They also have a greater area. The total area of the United States, including all insular and other possessions, is now 3,690,822 square miles, about one-fourteenth of the entire land surface of the earth.

A definite protocol between the United States and Colombia, embodying the terms under which the latter government will grant the rights necessary for the construction of a Panama canal has been delivered to Secretary Hay by the Colombian minister. Compensation for the canal rights is desired to be in the shape of an annual rental of $750,000.

The army board, of which General Miles is president, is favorably disposed toward a service uniform which can be used in all climates. It will be of khaki color, of light weight for tropical wear and of heavier material for colder climates. The intention is to limit the use of the present blue uniform, but not to do away with it entirely.

The ship subsidy bill as passed by the Senate, has met with such opposition in the House, especially among western representatives, that it is now impossible to get the bill up for consideration during the present session of Congress.

James R. Garfield, a son of the late President Garfield, has recently been appointed a civil service commissioner by President Roosevelt. He was the author of what was known as the Garfield election law of Ohio.

During the present fiscal year the amount paid for pensions amounts to $104,113,307, which is two million dollars less than for the corresponding period of last year.

The public debt, less cash in the treasury, on April 1, amounted to $997,732,332, a decrease of nearly $7,000,000 during the month of March.

A portrait of President Roosevelt, recently made by the Russian artist, Rudfskowscl, has been hung in the White House.

A national convention of all reformers who favor action independent of old parties was held in Louisville, Ky., April 2.

Foreign.

It has been generally expected that there would be a grand assemblage of warships in British waters at the time of the coronation of King Edward, next June. But instead of vast fleets of foreign powers the force will be comparatively limited. The United States has received, through its ambassador at London, an invitation to be represented during the naval review, but the display is limited to one vessel. The invitation has been accepted and the battleship Illinois, in command of Rear Admiral A. S. Crowninshield, will represent the United States Navy on that occasion.

Other nations have received similar invitations to that sent to the United States. The British Government has assigned no reason for curtailing the representation.

A despatch from Pretoria states that Caspar Kruger, oldest son of former President Kruger, and twenty-four other relatives of Mr. Kruger have taken the oath of allegiance to Great Britain. The total strength of the Boer commandoes is estimated at between eight and nine thousand men. The talked-of peace negotiations have been delayed, but it is expected they will be resumed in the near future.

President Roosevelt has forwarded to the United States consul-general at Cape Town, a certified check for $5,000 to be distributed among the Boer women and children sufferers in the concentration camps of South Africa. The money was raised by a committee appointed last December by Governor Yates of Illinois.

The spring session of the Mexican Congress opened April 1. President Diaz said, in his message, that the general condition of the country is prosperous. The effects of the Pan-American Congress, recently held in the City of Mexico, were favorable to promoting good relations with all participating republics.

It is stated in London that the Wireless Telegraph Company had sold its American rights and patents to an American company with a capital of $6,150,000.

The British cable from Canada to Australia will have a mid-Pacific station at Fanning Island, a little coral reef 1,080 miles south of Hawaii.

Emperor William of Germany will be represented at King Edward's coronation by Prince Henry of Prussia.

Industrial and Commercial.

An interesting statement regarding the commerce of the Philippine Islands with gold and silver countries has been submitted to the Senate Committee on the Philippines. The reports give the exports and imports for the eight months ending August 31, 1901.

The imports from the principal gold standard countries was $13,884,686 and the exports to those countries $14,087,165. The imports from the principal silver standard countries amounted to $5,572,156 and the exports to those countries $2,723,214.

The Chicago and Northwestern, the Union Pacific, and the Southern Pacific railroads will place telephones on their overland trains from Chicago to San Francisco. Special wire connections between the trains and stations will permit the use of the telephone to within thirty seconds of the leaving time of the train.

Cleveland is about to try a street railway experiment which will be watched with interest by all parts of the country. Franchises have been granted to a new company which proposes to operate under a three-cent fare. Financial experts claim there can be no profit under such conditions.

An English company with a capital of ten million dollars has been incorporated at Newark, N. J. The company is formed for the purpose of purchasing and developing coal lands in this country. It has already contracted for lands in the southern and southwestern States.

The Court of Appeals of New York has decided that members of labor unions have a right to decline to work with non-union men, and to order a strike to have such right respected.

Nearly 300,000,000 feet of logs were cut on the Penobscott River the present season. This was by far the largest harvest ever known and nearly one-half of it is for the pulp mills.

A dressmakers' union, comprising about three hundred thousand modistes of the United States, has been formed at Chicago.

During the first nine months of the present fiscal year there were built in the United States 949 vessels of 245,068 gross tons.

Lyman J. Gage, former Secretary of the Treasury, has been elected president of the United States Trust Company.

The United States Steel Corporation earned $111,067,195 net during the first year of its existence.

General.

Professor Slaby who, with Count Arco, created the Slaby-Arco wireless telegraph system, is advocating an international agreement to regulate the wireless transmission of messages. He believes that otherwise the greatest good cannot be obtained from wireless telegraphy. He states there is reason to believe that, with his backing of British capital, William Marconi may obtain a monopoly for aerial transmission, as has already been done in the case of ocean telegraphy.

Dr. Edward Everett Hale celebrated his eightieth birthday April 3. In the evening a reception was held in Symphony Hall which was attended by 2,800 men and women, among whom were many distinguished persons. Senator Hoar delivered an address and Doctor Hale responded. Letters and telegrams were read from President Roosevelt, Senator Lodge, W. D. Howells, Edwin Markham, and from various religious organizations.

The annual meeting of the New Hampshire Old Home Week Association will be held at Concord April 10. Arrangements will be made for a general observance of Old Home Week, August 16–22.

The Supreme Court of Wisconsin has decided that the law passed by the last Legislature imposing a tax of ten cents a ton on all ice shipped out of the State is unconstitutional.

The German Emperor's schooner yacht Meteor sailed for Southampton, Eng., April 1. She carried a crew of twenty-eight sailors and is expected to make the trip in sixteen days.

The city council of Chicago has passed an ordinance which requires the raising of 88.53 miles of track of six railroads. The estimated cost of the work is $2,000,000.

The first national gathering of Spanish war veterans was held last week at Springfield, Ill. Ten States were represented.

The seventh international conference of the Red Cross Society will be held at St. Petersburg May 16 to 29.

The transport Sheridan sailed from San Francisco for the Philippines, April 2, with 1,250 soldiers on board.

Miss Ellen M. Stone, the American missionary, sailed from Liverpool for New York, Friday, April 4.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

The Hall of Faith.

If you are sick to death of the commonplace, if the debit and credit of life's "daily pit-a-pat" wearies you past endurance, if the modern world with its hard, matter-of-fact ways has "got on" your nerves, steer your course for the Marble Arch any Wednesday evening a few minutes before eight. Turn into Edgware Road, and take the first, the very first turning on your right. You will find yourself in Bryanston Street. Why? you will ask: a commonplace street enough, surely! Yes, but do you see there on the right a patch of light which streams in welcoming fashion out into the darkened street from a large doorway like that of a church? There is your haven!—make for it.

As you approach, carriages and cabs are rattling up, depositing their occupants in the patch of light, and disappearing as quickly into the shadow to make room for other vehicles. A gray-haired janitor, who has been eying you sympathetically, approaches and inquires whether you wish to attend the service. You confess that is your ambition, and he directs you to go up-stairs.

The janitor preceding, you enter a large room, packed to its furthest corners with plain brown kitchen chairs. The room is square, the ceiling supported by rows of columns, the walls are distempered biscuit color, and through the ranks of chairs run three aisles. At the eastern end of the apartment is a daïs, upon which is a reading-desk over which is fixed an electric light, two other lecterns of carved wood, and a large chair somewhat resembling the Speaker's chair without its canopy, and another smaller seat, and close by the daïs is a piano. Behind the daïs the wall has been painted a pale sky blue, forming a rounded background of color which gives the idea of an altar, though there is no altar there. The whole adornment of the place is severely chaste. That is the first impression you receive after your astonishment at the scores of people present, for the place is crowded almost to the degree of discomfort. Row upon row of men and women, old and young, rich and poor, fashionable and dowdy, sit there with quiet, earnest faces, waiting for the service to commence. For this is the London centre of Christian Science, and you are about to assist at the weekly service for testimony.

As the hour of eight strikes, a white-haired man, dressed in a conventional frock coat and dark trousers, takes his place at the reading-desk, and gives out a hymn. He reads the two verses slowly and sonorously, then the piano strikes up, and the congregation, which must certainly exceed three hundred, rise and sing. The hymn over, the chairman says he will read a passage from the Gospels. He chooses the part of St. Matthew's which details the miracles of the feeding of the five thousand, the walking of Christ on the waves, and the miraculous draught of fishes. He reads it quietly, and without any comment. Then, closing the Bible, he takes up another volume, and announces his intention of reading from Science and Health by Mary Baker G. Eddy. As you listen you are irresistibly reminded of the couplet written at the expense of dear old Bishop Berkeley:—

> When Bishop Berkeley said there was no matter,
> It really did not matter what he said.

But this is obviously not the view of those around you, for they hear the reading to the last word, many of them faithfully following it in their own copies of Science and Health, which they bring with them like prayer-books.

The reading at an end, the Reader begs the congregation to join him in silent prayer, and instantly all have bent in attitudes of reverence in a silence so deep, so complete, that it almost seemed audible. Two minutes it must have been; the scores around you scarcely seemed alive; never have you witnessed in an Anglican church such decorous and perfect unanimity of reverence. And then, just as it seems as if the almost terrible silence was never to be broken, you hear the Reader's voice. "Our Father," he begins, and with one accord the hundreds of voices follow him through the sentences of the Lord's Prayer with a heartiness of tone which must strike the least observant. A second hymn is now announced, and when its two verses are sung the chairman gives a short address. He takes as his text the words of our Lord, "He who believeth in me, the works I do he shall do also." In a few really admirably chosen words he drives home the point he wishes to make, namely, that bed-rock of alleged truth upon which Mrs. Eddy has built up the astounding sect of Christian Scientists, that faith, and faith alone is required to enable the most commonplace of mortals to perform such miracles as Christ himself performed. "If ye have faith as a grain of mustard seed;" if we will but believe, the ills of the flesh, misfortune, ruin, death: all the evils which surround us, will appear, as the Christian Scientists assert they are, mere illusions of our diseased minds.

The little talk has been distinctly interesting, but when, on its conclusion, the preacher asks any one in the meeting who likes to come forward and give public testimony of his experience of Christian Science, your position resembles that of the juryman who has drowsed through the addresses of counsel, but wakes up with a fierce eagerness for note-taking now that the evidence is to be called. For some minutes there is silence and hesitation. Then, close to me, a young girl, neatly dressed. stands up. In a gentle, lady-like voice she tells us a marvelous story. Two years ago she was dying of consumption. The family doctor said so; a specialist said so; her brother-in-law, also a doctor, said so. One lung was quite gone; the other was so far diseased that they gave her only three weeks of life. Then she heard of Christian Science—she didn't know anything about it; had no friends interested in it; had never studied theological questions of any sort, and could not have understood the scientific theories advanced by its advocates. She tried it as a *dernier ressort,* beginning sceptical and indifferent; she was so much better in a fortnight that she was out of bed and enthusiastic. In a month she was out of doors, and in two months she was cured, and has never since had a day's illness. The quiet voice ceases. Up jumps an elderly woman, who testifies that she was for years crippled hand and foot with rheumatism. She adopted Sci-

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

ence, gave up doctors, liniments, and medicated baths, and there she stands before us, strong, and able to walk ten miles. Enthusiasm is infectious; when she sits down there are quite a baker's dozen of would-be testifiers, who amiably strive with each other to be first to confide in us the marvelous story of their "cures."

There is another hymn, and as the echoes of it die away the congregation, solemn and decorous to the last, file out, loitering in the aisles to exchange notes of the service, which seems from all you can gather to have been a thoroughly satisfactory one to the enthusiasts.

The Morning Leader, London, Eng.

What is the Matter with the Church?

THE following editorial in a recent number of the *Brooklyn Daily Eagle* is full of interesting food for thought and inquiry:—

Within a radius of ten blocks of the *Eagle* office there are twelve abandoned churches. In some instances the buildings are still standing, but are given over to other purposes. In one case, what was a "sacred edifice" is an auction store; in another, a bicycle rink; in another, a stable; in another, a tenement house, and so on. In half a dozen cases the buildings are standing idle, dilapidated, forlorn, neglected, with signs of "For Sale" upon them. The population in the same area is greater than it has been at any time in the history of the city. These facts are not set forth in any spirit of criticism. In so far as the abandoning of these points may indicate any decay of the power and influence of the church, they are to be deplored. It is but fair and candid to say that, in some cases, they do not indicate decay. In some localities there have been for years far too many churches—that is to say, far more than were ever needed to supply the religious needs of the population. In a few other instances, their abandonment has been due to changes of local condition for which the church is in no way responsible, and which rendered their removal a necessity.

When all allowance has been made, there still remains the fact that the churches are not as well attended or as well supported to-day as they have been in the past. This is admitted and regretted by clergy and laymen alike. The condition in the area instanced is not peculiar. It exists from Maine to Mexico, from Moscow to Marseilles. The church is rapidly coming face to face with a condition of things which has not confronted it for fifteen centuries. Looking broadly over the world the thing which impresses the observer is that the church seems to have in some strange way lost its motive power. Its organization is admirable, its membership is exemplary, its zeal is ardent, its devotion measured by its gifts of labor and money is boundless; but all the same it has well-nigh come to a standstill. No nation or people has been converted for a thousand years. When one contrasts this with the church's marvelous triumphs during its first six centuries it becomes all the more significant.

During that period it swept in its progress from Judæa to Scotland with all the rush and energy of a prairie fire, burning fragments being carried ahead by every wind and lighting up new conflagrations in advance. But to-day, after centuries have passed away, the peoples of the Orient, among whom were its first triumphs, have subsided into a hard and barren orthodoxy which, so far as one can learn, is entirely impotent to uplift or even control the moral life of its members. In Western Europe, where its organization and machinery is most complete, it finds itself antagonized bitterly by some peoples, neglected by others, distrusted by more. In America, where at the beginning, it more completely and intimately dominated the life of the people than anywhere else in history, it is coming to be more and more disregarded. It is not receiving either the service of the poor or the gifts of the rich. The workingman is more devoted to his labor union and the capitalist gives his benefactions to the library, the university, and the laboratory. One striking feature of this phenomenon is altogether new. There have been in the past times of falling off as well, but they have been marked by a concomitant decay of morals and a decline of the religious spirit. That is not the case to-day.

Morality was never upon the whole so manifest, and never was the real spirit of the Founder of Christianity so well comprehended or so generally diffused. But the churches as organizations confess and lament that they are becoming less and less heeded and valued. He is optimistic who regards this as anything but a sinister omen for the future. For whatever one may say about the faults and follies of the church as an organization, it is a plain fact of history that it has been the shell within which the kernel of Christian living has been transmitted from generation to generation. However harsh and repulsive it may have shown itself at times on the outside, it has carried within it the seed which has sprung up continually in righteousness. Nor do we believe that what is sometimes called "the spirit of Christianity" can exist for any great length of time without an organized body to serve as a special organ for its expression. It goes without saying, therefore, that the problem is one which ought to engage the attention of all who wish well to society. The task is to ascertain what really is the cause or causes which produce the present phenomena, and to cure them. Of course, the churches themselves are most immediately concerned, and the public must wait for them to set their own house in order. But it does not wait in an attitude of indifference.

Many of the causes alleged and discussed thus far appear to be both shallow and inconsistent. One says the falling away is due to the loosening and lowering the standard of doctrine, that it is evolution and the higher criticism which are doing the mischief. Another insists that the loss of progress is due to the too great rigidity and obscurantism of a church which refuses to acknowledge that the world does move and to adjust itself to the world's progress. None of these explanations go deep enough. If the world fails to hear the church it can only be because the church has either lost or misstated its message. Human nature is the same as it was in the first century or the sixth. The apostolic message is the same in essence now that it was then. If the church will clear its own mind as to what it has to say and will say it so that every man may hear in his own tongue wherein he was born, it will find that the world was never better disposed to hear and to heed than just here and now.

Christian Science not a Fad.

To the Editor of *The Morning News.*

Sir:—In your issue of March 22, in the summary report of the conference just held at Crisfield, Md., Bishop Joyce, in addressing the class entering the ministry, is reported to have said:—

"If I had the money I would like to endow a new chair in the theological colleges—the chair of common sense. We have a lot of fads, such as Christian Science, faith cure, and other nonsensical things which we would not have had if men had remained true to Methodism."

It hardly seems possible at this late day, when Christian Science has been so widely recognized as a helpful factor in the advancement of mankind, when ministers, physicians, judges, lawyers, and business men have accepted its teachings and have identified themselves with the Christian Science movement; when this movement has become naturally a religious organization with upward of five hundred and fifty organized church societies and a following far greater than other religious denominations thirty years after their inception—it seems hardly possible that a bishop of a Chris-

Digitized by Google

tian denomination would classify Christian Science as a fad and nonsensical. We prefer to think that our Christian brother has been misquoted. The occasion, however, is offered to show that Christian Science is supplying the need of humanity which true religion, wherever found, is called upon to do, and is therefore not a fad, but a blessing that has come to stay.

No doubt if men adhered more closely to the spiritual earnestness of the Wesleys, Calvin, Luther, and Fox, the tendency toward materialistic philosophy and worship would be greatly lessened, and the problems of the church vastly mitigated. It is the crying need of purely spiritual teaching that causes Christian Science to be genuinely appreciated by those who have investigated it. Furthermore, an understanding of Christian Science demonstrates the power of God in healing the sick, and certainly this is consistent religion. True religion meets the needs of humanity as demonstrated by the Master. "And Jesus went about all the cities and villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing every sickness and every disease among the people."

When the aforesaid chair of common sense is endowed in our theological schools, the following are some of the truths that burdened humanity may have the right to demand from its teaching:—

The religion that is divinely practical, meeting the ever-present needs of mankind and offering present physical and spiritual, as well as future, salvation.

The recognition of one infinite Mind, the Father of all, thus establishing the impartial brotherhood of man.

The recognition that God is no more the author of sickness than of sin.

Christian sermons, so imbued with the grace of God as to heal the sick as well as reform the sinner.

NORMAN E. JOHN.
In *The Morning News.*

Back from Richmond.

We clip the following from the *Public Ledger* of Norfolk, Va.:—

A party of Christian Scientists from this city and section returned this morning from Richmond, where they had been to protest against the passage by the Legislature of a bill that had been introduced in the Senate, having for its purpose the prohibition of the practice of healing by all persons who have not passed an examination before the State Medical Board.

This bill would have excluded the osteopaths and Christian Scientists from practice in Virginia, and both of these schools of healing were ably represented before the Senate Committee on General Laws in Richmond when this matter came up yesterday. The Christian Scientists present from this section were Miss Mary Way, the leading Scientist here; Mrs. Anna L. Morris, Mr. J. C. Batts, Mr. George H. Barrett (of Portsmouth), and Mr. William F. Crall (of Virginia Place). Mrs. Bernard, the leading Christian Scientist in Richmond, and several others of that faith were also present, as was Miss Langhorne of Lynchburg. The Christian Scientists had with them as counsel Mr. Joseph T. Lawless, of the firm of Jeffries & Lawless of this city, and Captain Tazewell Taylor, Police Justice of Norfolk. The Christian Scientists' defence would have been that, as their treatment for disease is purely spiritual, and is prayer, such a law as that proposed would have proscribed their religious liberty, and would, therefore, have been unconstitutional. They did not have occasion, however, to present their side of the case, as the proposed bill was overwhelmingly defeated by the presentation of the side of the osteopaths, who were represented by ex-Governor O'Ferrall as counsel.

The Lectures.

At Oklahoma City, Okla.

A lecture by Edward A Kimball of Chicago, under the auspices of the local Christian Science Society, was given in the Opera House on Thursday evening, March 20, before an audience of six hundred. Mr. Kimball was introduced by C. B. Ames of this city in a few appropriate and well-chosen remarks. He then delivered his lecture on "The Cause and Scientific Cure of Disease," to a remarkably attentive audience. Mr. Kimball's words were direct and forceful, and his appearance bore witness to the healing efficacy of the cause he advocates.

The Times-Journal, Oklahoma City, Okla.

The introduction by Mr. Ames was as follows: —

Ladies and Gentlemen:—Mr. Kimball is one of a dozen authorized and representative lecturers on the subject of Christian Science. This organization has no central power or controlling body such as a Methodist Conference or Presbyterian Assembly; it applies the Congregational principle and each society is independent of every other. The First Church of Christ, Scientist, of Boston, is, however, the Mother Church and, to a certain extent, superintends or guards the welfare of the entire organization. In order that the principles of Christian Science may be authoritatively presented to the people of the United States, this Mother Church, acting for the entire organization, has commissioned a few men who know the facts to go before the people and elucidate these principles. The local society and the people of Oklahoma City are to be congratulated upon securing one thus authorized to speak for that organization.

Personally, I never regret the organization of a new religious society or denomination. I regard them all as contributors to the ultimate triumph of truth. The truth has nothing to fear because of investigation or discussion. I believe it was Mr. Depew who said, "Doubt and debate are the corner-stones of progress," and I believe this is true in intellectual and spiritual realms as well as in material. Many denominations are a blessing to mankind, and the world's greatest progress has been achieved in those countries where there has been the largest and most unrestricted religious liberty and freedom of thought, speech, and discussion. I therefore welcome the earnest investigation made by Christian Scientists, and believe that it will contribute to a clearer comprehension of the truth.

I take great pleasure in introducing one who is able to present the views of Christian Science in an able, entertaining, and instructive manner, Mr. Edward A. Kimball of Chicago.—*Correspondence.*

At Cheyenne, Wyo.

Judge William G. Ewing of Chicago delivered a lecture on Thursday evening, March 20, before on audience that filled the hall. He was introduced by the Hon. Charles N. Potter, Chief Justice of the State of Wyoming, in the following words:—

Ladies and Gentlemen:—We are gathered this evening to listen to a discussion upon one of the comparatively recent movements in the religious and, I may say, scientific world.

I am not associated in any way with Christian Science, and have not, perhaps unfortunately, embraced that faith. Yet I realize that there must be something of fundamental truth behind the movement, which has had such a marvelous growth, and numbers among its adherents so many intelligent and thoughtful people. The century out of which we have so recently made our exit has been distinguished for many reasons, none more important than the search for truth. That spirit, perhaps, is respon-

Digitized by Google

sible for many discoveries, and for the development of many ideas that have been for the advantage of mankind. During that period, as we all know, the present movement, which we are to hear about to-night, had its inception.

It is characteristic of the American people to give respectful and sympathetic attention to any subject which arrests public thought more or less. I am sure that all of us, whatever may be our faith, are prepared to listen with interest and profit to the lecture by the distinguished gentleman whom it is now my pleasure to introduce to you,—the Hon. William G. Ewing of Chicago.—*Correspondence.*

At Fort Worth, Tex.

Edward A. Kimball, C.S.D., of Chicago, lectured in the Opera House last Sunday (March 23), on the cause and cure of disease from the view of a Christian Scientist. Mr. Kimball is a member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston. In spite of the forbidding weather there was a good attendance of interested listeners, who followed the lecture closely.

Mr. Kimball was introduced by Judge F. E. Albright, who said in part:—

"We have met here this afternoon to discuss a subject, or hear it discussed, that is of greater importance than all other subjects combined,—we are here for the purpose of hearing discussed the subject of religion. All nations have a mode of worship, and there are few of them that do not recognize the divine healing of God. Now, there are some of you here who know as little as I do about Christian Science, but there are none that I see before me who are not free enough from prejudice to listen to the eminent lecturer we have before us."

The Fort Worth (Tex.) *Register.*

At Wichita, Kan.

Edward A. Kimball, C.S.D., of Chicago, delivered an address on Christian Science at the Auditorium last evening (March 17), under the auspices of First Church of Christ, Scientist, of Wichita. The attendance was large and the address was an interesting one and well worth hearing. Mr. Kimball is a member of the Christian Science Board of Lectureship, of the Mother Church, Boston. His address last evening received marked attention throughout. It was interesting, instructive, and to the point.

Mr. Kimball gave a clear explanation of the postulates of the faith. Christian Science, he stated, was an actual, demonstrable science, and one that had withstood every test during its comparatively brief history. He declared that every known disease had been cured in hundreds of instances by the aid of Christian Science; on the other hand, *materia medica* admitted there were many incurable diseases.

Wichita (Kan.) *Beacon.*

At Fresno, Cal.

On the fifteenth of February, Hon. William G. Ewing delivered an address in Fresno, Cal., and was greeted by a large and appreciative audience, composed not only of residents of the city but of many from neighboring towns and the surrounding country. Judge Ewing was very felicitously introduced by the Hon. David A. Ewing, of the Fresno bar.

The address was clear, logical, and, in both matter and manner, was eminently adapted to achieve the evident object of the speaker; viz., to allay prejudice in the minds of his hearers and lead them to see in Christian Science, as judged by its fruits, the gospel of Jesus Christ.

The good effects of this discourse are already manifest in an increase of interest, in this city, on the subject of Christian Science and a decrease of open opposition; thus demonstrating the wisdom which devised the plan of reaching the public through a Board of Lectureship.

Correspondence.

At Burlington, Kan.

Edward A. Kimball of Chicago lectured on Christian Science at the Hamilton Opera House, March 11, at the request of the local Christian Scientists. E. N. Connal, a prominent attorney of the city, introduced the speaker. Mr. Kimball held the close attention of the audience for nearly two hours. Owing to a steady downpour of rain, the audience was not so large as it otherwise would have been; but the house was well filled and included some of the best people of the city. His lecture has done much good, and the local Scientists are more than pleased with it, as it has cleared the atmosphere of many false and erroneous opinions heretofore held regarding Christian Science.—*Correspondence.*

At Chicago, Ill.

Mr. Edward A. Kimball lectured in the Fourth Church of Christ, Scientist, Chicago, January 29, 1902.

An audience numbering about twelve hundred persons attended. Mr. Kimball was introduced by Mr. Orville T. Bright, County Superintendent of Schools, Cook County. The Sunday and Wednesday evening services have shown a marked increase in attendance and interest since this lecture.—*Correspondence.*

At Wellington, Kan.

Edward A. Kimball of Chicago lectured yesterday afternoon (March 16), at the Auditorium. Probably five hundred people heard the lecture and were instructed, entertained, and uplifted mentally and spiritually by what they heard.—*The Daily Mail,* Wellington, Kan.

Lectures at Other Places.

Osage, Ia.—Edward A. Kimball, February 24, 1902.

Governor Jordan's Fast Day Proclamation.

GOVERNOR CHESTER B. JORDAN of New Hampshire has issued the following Fast Day proclamation:—

The ceaseless roll of years into eternity has again brought us nigh unto the period usually set apart for the observance of our customary Fast.

Annually our merchants and other prudent men at the head of large corporations and great enterprises deem it necessary to take an account of stock; to halt in the hurry and rush for gain long enough to take their financial bearings and ascertain their true standing. It is equally important that all the people of our good state pause at least once a year and take a retrospect of the ways through which they have come to their glorious heritage, consider the best plans of life thought and activity for the present, and make wise forecast as to the future.

To this end I do, with the advice and consent of the Council, appoint Thursday, the seventeenth day of April, current, a day of fasting, meditation, and prayer, and express the hope that the day will be observed in accordance with the high and noble purposes of those first instituting it; that all our people on that day, in their homes, in their churches, and wherever they may be, will, through all proper channels, seek to strengthen the faith, the hope, and the charity, which made our fathers strong, our mothers noble; that we may by indissoluble bands be held to the principles of right living before God and men; that we

Digitized by Google

may be loyal and true to Church and State; that our young men in the rugged grandeur of their character may stand out like our everlasting hills and overtowering mountains; that our young women may rival in their many graces and virtues the surpassing beauty and loveliness of our lakes, meads, and plains, and that New Hampshire may still continue to be the abode of a sturdy race, whose God is the Lord.

Given at the Council Chamber in Concord, this fourth day of March, in the year of our Lord one thousand nine hundred and two, and of the Independence of the United States of America the one hundred and twenty-sixth.

CHESTER B. JORDAN, *Governor.*

By his excellency the governor, with advice of the council,

EDWARD N. PEARSON, *Secretary of State.*

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

May 4, 1902.—*Subject:* ADAM AND FALLEN MAN.

I.—289—8, 9; 345—21; 529—30, 31; 580—21; 532—9; 259—15 to 19.
II.—292—18 to 30; 556—18; 530—26.
III.—183—14 to 21; 184—1; 244—14, 15; 183—4; 177—15; 184—17 to 23; 208—5 to 12.
IV.—252—8; 322—3 to 7; 230—6; 296—9 to 18; 171—4; 99—14.
V.—322—32; 16—1 to 4; 325—20; 324—16; 20—27.
VI.—485—19 to 24; 21—1 to 4; 403—14 to 20; 223—25 to 32.

May 11, 1902.—*Subject:* MORTALS AND IMMORTALS.

II.—538—24 to 2 next page; 539—16 to 19; 553—29; 476—14.
III.—428—22; 213—7; 76—22.
IV.—250—6, 7, 14 to 32.
V.—303—29; 301—9 to 19; 302—17; 471—17.
VI.—409—23; 265—5; 292—27; 543—8; 191—4.

In the *Quarterly* lesson for May 11, in Section V., the third reference from Science and Health is not clearly printed; it is 198—15.

We must judge ourselves in the blaze of the fact that every day is lost, according to the heavenly notation, that has not been ennobled and spiritualized by the exercise of some moral and celestial quality, either in restraining passion, or doing something, or giving something, or cherishing some devout sentiment,—so that a truth, a principle, has become a more ready guest through us in this world of conflict and sin.—STARR KING.

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Change of Address.

The address of Mr. Carol Norton, C.S.D., member of the Christian Science Board of Lectureship, has been changed to 7 East 42nd Street, New York City.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form* of *invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Easter Message.

WE clip the following from *The Daily Patriot* regarding the Easter service at First Church of Christ, Scientist, Concord, N. H.

The Easter service at Christian Science Hall was largely attended. The sermon as usual consisted of readings from the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and was conducted by the First and Second Readers, Irving C. Tomlinson and Mary E. Tomlinson.

The following selections were rendered by Villa Whitney White of Boston: Easter Carol, J. T. Field; Angels Ever Bright and Fair, Handel; Angels Roll the Rock Away, C. B. Hawley.

The floral decorations, which were sent from Pleasant View, were beautiful. They consisted of palms, Easter lilies, hyacinths, and roses. Conspicuous among them was a cluster-rose tree which had been trained to form a cross.

The church was made glad by the following beautiful letter from Mrs. Eddy, which was read during the service:

To the First Church of Christ, Scientist, Concord, N. H.

Beloved Brethren:—Allow me to thank you for lending to me your good Church-leader, Rev. I. C. Tomlinson, a few days in the week, and on the seventh day cheering him with your earnest attention.

May this glad Easter morn find the members of this dear church having a pure peace, a fresh joy, a clear vision of heaven here, heaven within us—and an awakened sense of the risen Christ. May long lines of light span the horizon of their hope, and brighten their faith with a dawn that knows no twilight, and no night. May those who discourse music to-day, sing, as the angels, Heaven's symphonies that come to earth.

May the dear Sunday School children always be gathering Easter lilies of love, with happy hearts, and ripening goodness. To-day, may they find some sweet scents, and beautiful blossoms in Mother's love, that she sends to them this glad morn in the flowers and the cross from Pleasant View, smiling on them. Tenderly, truly,

MARY BAKER EDDY.

Pleasant View, Concord, N. H., March 30, 1902.

Letters Pro and Con.

WE have received the following letter, which per the writer's request, we publish:—

Monroe, Wis., March 18, 1902.

Editor *Christian Science Sentinel*, Boston, Mass.

Dear Sir:—My attention has been called to a copy of the *Christian Science Sentinel* bearing date of March 6, 1902, in which considerable space has been devoted to criticism of a recent lecture delivered by myself in your city on "The Hidden Hand of Christian Science Revealed."

Fair, honest criticism is legitimate, and I concede this right to any one for the public good. However, the editorial in your paper places you in an awkward position in the eyes of those who heard my lecture, and to those who did not hear the lecture it conveys a wrong impression.

I shall take it for granted that you are a gentleman, and as such I appeal to your sense of honor and the ethics of common courtesy in this matter, and ask you to kindly publish this brief letter.

In your editorial you have charged me with misrepresenting the teachings of Christian Science.

I realize that I have made some serious charges against Christian Science which, if they be not true, an outrage and unwarranted slander has been committed by myself. The public is entitled to the truth. I claim to know what Christian Science teaches.

Christian Science has on the platform to-day such eminent men as Judge William G. Ewing and Mr. Edward A. Kimball of Chicago, who are engaged in promoting the interest of its cause in the United States.

Now, in behalf of the truth, I invite either of the gentlemen referred to or any other accredited representative of Christian Science to meet me in a public discussion of the teachings of Christian Science; Mrs. Eddy's book, entitled, "Science and Health with Key to the Scriptures," to be the only authority on the teaching.

The discussion or discussions may take place in Boston, New York, Chicago, or any other places which may be mutually agreed upon.

I make this offer, not in a spirit of bravado, but stand ready as a gentleman and a Christian to comply with my part of the proposition to the best of my ability.

In this way the public will be afforded an opportunity to pass on the merits of the case. Best wishes,

Thine for Righteousness,

J. H. BERKEY.

Monroe, Wis., August 25, 1900.

We, the undersigned, residents of Monroe, Wis., having known Hon. J. H. Berkey from boyhood, can cheerfully testify to his sterling integrity and nobility of character. For a number of years he has been a resident of Monroe, and commands the confidence and esteem of all our citizens.

In his chosen field of labor, as a lecturer on social reform topics, his zeal, culture, and ability as an orator is not only recognized in this community but throughout our state.

Any courtesies extended to Mr. Berkey will be worthily bestowed and regarded with personal appreciation by each of us.

A. S. DOUGLAS, Mayor of Monroe.
HENRY LUDLOW, Pres. First National Bank, Monroe, Wis.
CHAS. A. BOOTH, Editor *Monroe Sentinel* and Postmaster.

For no personal reasons relating to the author of the above letter, but because he stands for a phase of human thought which, at present, believes itself to be opposed to Christian Science, we publish a reply thereto. This thought will sometime learn—soon we hope—that it is not opposing Christian Science at all, but that in true Quixotic fashion it is valiantly battling with the windmills of its own erroneous conceptions of Christian Science.

Our friend will please accept the following as our only reply to his letter:—

Boston, March 29, 1902.

To the Rev. J. H. Berkey, Monroe, Wis.

Dear Sir:—If you really understood the teaching of "Science and Health with Key to the Scriptures" you would not oppose it either in public debate or in any other way.

You say you are an advocate of social reform and a Christian gentleman. As a social reformer and a Christian gentleman you do not wish to oppose one of the greatest social reforms of this or any other age. Christian Science is based upon and advocates the Mosaic Decalogue and the Sermon on the Mount. As a Christian gentleman you will agree that the principles of these lie at the base of all social reform. There can be no true social reform apart from them.

Digitized by Google

Christian Scientists are taught to observe the Golden Rule, of which Jesus was the formulator and earth's greatest demonstrator: "Therefore whatsoever ye would that men should do unto you, do ye even so to them."

As a social reformer and a Christian gentleman, you do not wish to antagonize a large body of people who are sincerely endeavoring to live and enforce the Golden Rule, nor to say or do aught that will tend to prevent their doing this.

Christian Scientists are daily relieving thousands of their fellow-citizens of pain and suffering.

As a social reformer and a Christian gentleman you do not wish to prevent them from thus aiding their brothers and sisters and your brothers and sisters.

Christian Scientists are daily healing people of all manner of diseases, some of which, nay, many of which, have been pronounced incurable by all other healing systems.

As a social reformer and a Christian gentleman, you do not wish, by word or deed, to prevent them from thus aiding their fellow-men and your fellow-men.

Christian Scientists are daily reclaiming drunkards by destroying for them the dreadful appetite for liquor.

As a social reformer and a Christian gentleman, you do not wish to prevent them from saving all the poor unfortunate drunkards they can. You wish to do God's will, and surely God's will is that drunkards shall be saved.

Christian Science is daily reclaiming men and women from the worst forms of social vice, from licentiousness and libertinism.

As a social reformer and a Christian gentleman you do not wish to prevent Christian Scientists from furthering, in every way they can, this greatest of all social reformatory work.

Christian Scientists have taught many thousands of their fellow-beings and your fellow-beings how to overcome, not only the forms of sorrow, sin, and distress above referred to, but many other forms of sorrow, sin, and distress, such as social dissipation, worldly-mindedness, envy, malice, hatred, falsifying, jealousy, undue ambition, pride, and a legion of other evils which infest the minds and hearts of mortals.

As a social reformer and a Christian gentleman you do not wish, for one moment, to interfere with their Christly work in this behalf.

Mrs. Eddy, the Discoverer and Founder of Christian Science and the author of its text-book, has taken Jesus Christ as her great exemplar throughout her whole life. She has spent all her best years in an earnest, zealous, unselfish, and effective effort to have others do likewise. She admonishes her students to follow Christ by leading lives of purity, of unselfishness, of honor and rectitude. She devotes every moment of her life to this high, lofty, and godly purpose.

As a social reformer and a Christian gentleman you do not wish in the least to thwart her Christly purpose or interfere with her consecrated labors.

Please, in a kindly and Christianly spirit, read the following tenets of the Church founded by Mrs. Eddy,—the great Mother Church in Boston,—which tenets were formulated by Mrs. Eddy:—

1. As adherents of Truth we take the inspired Word of the Bible for our guide to eternal Life.

2. We acknowledge and adore one Supreme Infinite God. We acknowledge one Christ, namely, the Holy Ghost or divine Comforter; and the son Christ Jesus,—man in the divine image and likeness.

3. We acknowledge God's forgiveness of sin in the destruction of sin, and the understanding that sin and sickness are neither real nor eternal.

4. We acknowledge atonement as the efficacy and evidence of divine Love, of man's unity with God, and the great merits of Christ Jesus, the Way-shower.

5. We acknowledge universal salvation as demonstrated by the Galilean prophet, in the power of Truth over all error, sin, sickness, and death; and his resurrection, whereby human faith and understanding are enabled to seize the great possibilities and living energies of divine life.

6. We solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and *pure*.

Take these tenets as a whole and no social reformer or Christian gentleman can find any conceivable fault with them, unless it be, possibly, some narrow sectarian quibble.

Take the sixth and last tenet and, as a social reformer and a Christian gentleman, you do not surely wish to oppose it on the platform, in public debate, in the pulpit, or anywhere in private. You will agree that the man who lives up to this admonition would be the highest order of a social reformer and a Christian gentleman. One cannot conceive of a better social reformer or a higher type of a Christian gentleman than he who solemnly strives, watches, and prays to have in him that same Mind which was in Christ Jesus. It was Paul who gave this great admonition, and surely Paul may be accounted to have been, in his day, a great social reformer and a Christian gentleman—after his conversion.

Read also the following Church Rule which was prepared by Mrs. Eddy and which by her direction is read once a month in the Mother Church and in each branch church:—

"Neither animosity, nor mere personal attachment, should impel the motives or acts of the members of the Mother Church. In Science, divine Love alone governs man; and a Christian Scientist reflects the sweet amenities of Love, in rebuking sin, in true brotherliness, charitableness, and forgiveness. The members of this Church should daily watch and pray to be delivered from all evil, from prophesying, judging, condemning, counseling, influencing or being influenced, erroneously."

This rule was prepared by Mrs. Eddy, and thus directed by her to be read, with the deep and sincere purpose of having every member of the Mother Church and the branches obey it. You will agree that obedience to this rule would make exemplary Christian men and women of these church members.

As a social reformer and a Christian gentleman you do not wish to prevent this Christian woman from enforcing such a Christly rule, nor do you wish to prevent the members of the church she established from obeying it and thereby making of themselves exemplary Christian men and women.

The Church Manual containing this rule teems with other rules and admonitions equally as Christly. Every member of this church *knows* that Mrs. Eddy, in her life, lives up to these rules and admonitions, and that it is her deep, earnest, and prayerful desire that every member of the Church shall do likewise.

As a social reformer and a Christian gentleman you do not wish to hinder, in the remotest degree, this godly woman from thus living and giving her life to the work of causing others to do so.

You do not wish to assail this Christian woman and great social and religious reformer, either in public or in private; for you, as a social reformer and a Christian gentleman, cannot afford to assail one who is thus effectively devoting her life to the very purpose to which you say you are endeavoring to devote yours.

We are glad you are frank enough to say that if what you have said against Christian Science is not true an outrage and unwarranted slander has been committed by you. You will easily see, from what has been said above, how all Christian Scientists regard this question. They know that much of what you said was not true, but was based either on misinformation or misapprehension. They do not wish, in any un-Christian way, to censure you, but they naturally feel that before you seek further opportunity to

Digitized by Google

voice your misinformation or misapprehension, you should inform yourself by making a thorough study of Christian Science; and when you have informed yourself so that you can prove your understanding by healing sickness and destroying sin,—as thousands of others have done,—you will then have reached a point where, instead of wishing to debate against Christian Science, you will rejoice to speak for it on all proper occasions.

In the spirit of brotherly love,

Very sincerely yours,

EDITOR *Christian Science Sentinel.*

Among the Churches.

One Church at New London, Conn.

We are in receipt of the following letters from New London, Conn., giving an account of the union of the churches in that city.

New London, Conn., March 25, 1902.

First Church of Christ, Scientist, New London, Conn.

Dear Brethren:—The members of Second Church of Christ, Scientist, New London, Conn., at a meeting held March 12, 1902, passed a resolution, by a unanimous vote, by ballot, to dissolve their organization and to unite their interests with those of First Church of Christ, Scientist, for the upbuilding of the cause of Christian Science in New London, Conn., through Christly unity and love.

Through the "purification of sense and self" (Science and Health), we believe that we have demonstrated a purer love for the Cause and for our brethren. Therefore in humility and love we dissolve our organization, provided First Church of Christ, Scientist, desires to receive us into its fold. Yours in Truth,

GRACE LATIMER, *Clerk.*

Second Church of Christ, Scientist.

New London, Conn., March 25, 1902.

Second Church of Christ, Scientist, New London, Conn.

Dear Brethren:—We greatly rejoice at this step taken in the right direction toward a higher understanding of Christ-unity, not unity in numbers, but unity with Good.

We most cordially welcome you, and believing this should be individual demonstration, each one signing the church roll will recognize himself a member with us.

Yours in Christ, Truth,

CHURCH COMMITTEE, First Church of Christ, Scientist.

ANNA T. MCCABE, *Clerk.*

Organization at Wilmington, Del.

The members of First Church of Christ, Scientist, of Wilmington, met at their reading room in the Ford Building last evening (March 21) to perfect their organization under the charter obtained from the state, which has been filed in the recorder's office in the Court House. The officers named were:—

President, Norman E. John; vice-president, Louise D. Radzinski; secretary, William H. Savery; treasurer, David M. Masters. Norman E. John and Louise D. Radzinski were elected First and Second Readers of the church, and Mrs. Norman E. John superintendent of the Sunday School.

The object of the organization, as set forth in the certificate of incorporation, is "Worshiping of God in obedience to the command of His Son Jesus Christ, as given to his followers; Matthew, 10 : 8—'Heal the sick, cleanse the lepers, raise the dead, cast out devils,' made possible and practical to-day in Christian Science through its text-book, 'Science and Health with Key to the Scriptures' as written by the Discoverer and Founder of Christian Science, Reverend Mary Baker G. Eddy."

This body, now worshiping at No. 917 Gilpin Avenue, is one of the five hundred and more of the organized branch churches of The First Church of Christ, Scientist, in Boston, Mass. It had its beginning, like most of the Christian Science churches, in the two or three that gathered together in his name, to study God's word anew in the light of Christian Science.

These early meetings were held some five years ago in the house of one of the present members, whose wife, some years before, had been healed in Christian Science when all the usual modes of treatment had failed, and whose gratitude for life preserved and health restored urged her to extend these blessings to others. As the Principle of Christian Science was demonstrated a larger and more public place of meeting became necessary, and the building on Gilpin Avenue was leased for church and Sunday School purposes.

Lately a reading room and practitioners' office were established in Ford Building, Market Street, corner of Tenth, where, it is announced, all authorized Christian Science literature is on hand for the use of visitors, and members of the church are in attendance to answer inquiries.

Unlike other churches, Christian Scientists have no preaching, the Sunday service being read by two Readers, one of whom reads the Scriptural citations and the other those from the text-book of Christian Science, "Science and Health, with Key to the Scriptures." The Wednesday evening meeting is devoted to testimonies of healing in Christian Science.—*The Morning News.*

Organization at Plainfield, Ill.

The little band of Scientists in this vicinity were invited to assemble at the residence of one of their number October 14, 1900, for the study of the Lesson-Sermon. Five responded to the call on that day. The numbers increased from week to week with added interest. As the permanence of regular meetings became evident, Hymnals were procured and the full Sunday services were inaugurated.

May 29, 1901, we organized as Christian Science Society of Plainfield, Ill., with fifteen members. It was then thought best to seek a more public place of worship. The First Universalist Church building was unoccupied, and we obtained it upon reasonable terms and held our first service there June 30. This church is commodious, comfortable, and centrally located, and easily accessible as a reading room. Besides the Sunday services, we regularly hold our Wednesday evening testimonial meeting, and the church is open once a week from 2 to 5 P.M. as a reading room to which all are invited and made welcome. All the works of Mrs. Mary Baker G. Eddy and the publications of the Publishing Society are to be found there for purchase or perusal.

On October 16, 1901, we re-organized as a church, becoming incorporated under the state laws of Illinois, with Mr. Henry Fry as First Reader and Miss Elizabeth Keen as Second Reader.

We are a small band but united in love, ever striving to demonstrate Truth, sowing the seed and steadfastly trusting Him who alone giveth the increase. We gratefully acknowledge His loving care and guidance, also that of the dear Mother who has so faithfully made known to us the way of Life.—J. E. G.

What has been done at Rockford, Ill.

My heart is so full of loving gratitude to our Leader, Rev. Mary Baker G. Eddy for instituting the impersonal preacher and teacher—the Bible and "Science and Health with Key to the Scriptures," that I would like to tell the Field a little of what it has done in this city.

Less than five years ago there were none here following Christian Science as taught by Mrs. Eddy in her writings. At that time a student located here and began demonstrating

Digitized by Google

Christian Science by healing the sick. In a few months the patients healed wished for church services. Through the wisdom and foresight of our Leader in establishing the impersonal pastor, that wish was made possible and the Lesson-Sermon was read by the student each Sunday to the few then interested. From that small beginning has grown an earnest, thriving church society of nearly forty members, and with more than double the number in attendance at its services. Meetings are now held in one of the pleasantest halls in the city. There is also a bright little Sunday School with thirty members enrolled and four teachers.

We have opened to the public a nicely furnished reading room, which has proven of much benefit. Last year the calls of the reading room averaged one hundred and sixty-four a month, and over four hundred and forty dollars was expended in literature for sale and distribution.

Few of our number have had the privilege of class instruction; but through the impersonal teacher, Science and Health, all have learned to make demonstrations for themselves, and some are doing good work for others. The dear little children give beautiful demonstrations over error, and they express much of the spiritual understanding.

The Truth has been demonstrated, and its effects are seen in many nearby towns, where the *Quarterly* is being studied by people in homes too distant to permit their attendance at service here; for the impersonal teaching is possible to all.—L. V. W.

Second Church of Christ, Scientist, Dayton, O.

The Second Church of Christ, Scientist, of Dayton, O., is now located in their new and cozy quarters, Room 20, Patterson Block, where they have also opened a reading room. The children of the Sunday School donated $22.50 for literature, from the liberal distribution of which, nothing but good results can follow, and the truth is once again shown forth that a little child shall lead them. How grateful we should be to our Leader for showing us the way to teach little children that they can accomplish so much.—JOE KRAMER, *Clerk.*

Church Edifice at Hoopeston, Ill.

The plans and specifications of the new church for the people of First Church of Christ, Scientist, which were recently completed by Architect J. F. McCoy of Danville, show that the new building, when completed, will be one of the prettiest and most conveniently arranged small churches in this part of the country.

The Hoopeston Herald.

Site Purchased at Leavenworth, Kan.

First Church of Christ, Scientist, of Leavenworth will construct a church on the southeast corner of Seventh and Osage Streets. Mrs. Emma Spratley has sold the Christian Scientists three lots on that corner for fifteen hundred dollars. The Christian Scientists have been meeting in the Academy of Music for several years.

The Leavenworth Times.

Property Purchased at Dayton, O.

First Church of Christ, Scientist, has purchased the property on the Boulevard owned by the Congregational Church. The Scientists have been occupying the church for some time, and the sale was effected on Monday (March 17). Some improvements are to be made in the way of redecoration.—*Dayton Daily News.*

From our Contributors.

The Power of Truth.

BY LILIAN CARROLL.

OVER the desert land afar,
Three wise men followed a glittering star
Till it stood overhead where a young child lay
With eyes just open to earthly day;
Offering their gifts of frankincense
And gold and myrrh they departed hence:
And thus was all wisdom's homage laid
At the feet of a humble little babe.
All through the years since that glad day
The world hears wisdom's lips still say,
"Except as a little child ye be,
Ye never the Kingdom of Heaven can see."
And though the babe grew in stature fair,
The soul of the child was always there,
Reflecting the light of purity,
Illumined by Love's humility.
No wonder he taught dumb lips to sing,
The blind to see, lame feet to spring
In newness of life along the way,
While hardened sinners learned to pray.
"I am the Way, the Truth, the Life."
On Calvary's hill he conquered the strife
Of mortal hatred and proved the tomb
Could not hide Truth within its gloom.
O wondrous hope! that again to-day
He is revealing himself the Way.

Attaining Joy.

BY EMMA HARRIS JAMISON.

THE other night I lifted the curtain for a moment and looked back over some of the past scenes in my life, which were indeed very dark, for I seemed in those past days (long before I knew what Christian Science was) to be called upon to pass through many deep waters until at length I cried out in my anguish:—

I am aweary, aweary,
I would that I were dead.

Then Science came into my life with one great burst of Light, and things changed, and in thinking of the change, the thought came to me, Had I been able in those days to lift the curtain and get even a glimpse of the happiness that was in store for me, could I have seen the outward manifestation of the peace and quietness of this happiness in my home and life, and have also known that I would some day be the happy possessor of the Pearl of Great Price (the Truth) and what an uplifting and holy influence it would have, not only on me as an individual, but on the home itself, would not mine eyes have beamed with *joy,* even amidst the sorrow of those days? should not I have been encouraged to press on, and how eagerly and gladly would I have waded through those stormy years,—my one desire being to reach the period and place of that quietness and peace that I knew was awaiting me?

And now whilst we bid the senses be still, let us lift the curtain for one brief moment, and peer into the distant future, and as we gaze we remember those sweet words of him who said, "Blessed are the eyes which see the things that ye see," and as we listen eagerly we hear again a voice speak, "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love Him;" and then comes our Mother's words, "The perfect man—governed by God, his perfect Principle—has immortality, sinlessness, and everlasting bliss" (Science and Health, p. 304), and feeling convinced of the surety of these promises, with what a sense of joy should we all tread the path as it lies before us.

Digitized by Google

To those who have just come into the understanding of this beautiful Truth as taught in "Science and Health with Key to the Scriptures," I would say, Do not be discouraged, even though the path for the time being is very steep, and the way dark, and many errors rise up at the beginning of your career to be destroyed and wiped out of consciousness, but get down to the work joyously, for we all know that just as soon as we overcome one form of error, another rises up to be destroyed, and this will continue until every phase of error is totally wiped out of our consciousness. The Psalmist said: "In thy Light shall we see Light," and Jesus later shows us how to destroy this darkness, when he teaches, "I am the Light of the world: he that followeth me shall not walk in darkness, but shall have the Light of Life."

I remember that when I first came into this Truth, for months and months, I worked on without even a ray of light as to the joy that was promised us until I almost began to despair of ever reaching the heights where I could stand and drink in and taste the joy of this Truth, for it seemed to me it was nothing but struggling, struggling all the time, and I used to wonder at Paul, and think, how could he ever advise us to "glory in tribulation," for that was really more than I could understand. But things have changed somewhat since those days of groaning and travailing in pain, and, thanks be to God, I have received a taste of this promised joy, and know that if we do our work well, and are in earnest, we too, like Paul, shall yet joy in tribulation, for in these very trials that confront us, we learn to straighten ourselves up, get out our sword of Truth, put on the breastplate of Righteousness, and get down to hard fighting; and if we are in earnest the error will be wiped out of our consciousness. But we must not lose sight of the fact that we must fight. We cannot give a blow here and a blow there, but we too, must make "deadly thrusts" at our enemy, the errors of mortal mind, and destroy them, and then and only then, at this destruction, do we gain the sense of joy. And what an added sense of joy have we in the consciousness that we have fought a good fight and gained the victory.

I cannot close this article without availing myself of the opportunity of publicly acknowledging my love to our dear Mother who has taught us this blessed Truth, and my earnest desire is that I may be found worthy to be included in her large family of children.

"Thou hast been Faithful."

BY EDITH MESSICK.

THE abiding consciousness of ever-present Good, in the working out of each problem, should, it seems to me, be the so-called larger demonstrations, or the continuous routine of daily duties. It enables the "Thou hast been faithful, . . . I will make thee ruler,"—the rainbow of promise,—to be continually manifest to our illumined vision.

Not one truly Christianly Scientific effort is ever put forth without this result, for every battle fought and won for Truth and Love against flesh and evil, enables one to be "more than conqueror" in the next warfare. And thus it will ever be, until in the continually and always "Thou hast been faithful," we shall be enabled to realize a complete victory, and heaven and harmony will be found forever established among men. Then man will no longer be the helpless victim of chance, but will find his true inheritance, as the image and after the likeness of God, having dominion and not subjected to the evils of materiality. "Science and Health with Key to the Scriptures" says, page 569, "The Scripture, 'Thou hast been faithful over a few things, I will make thee ruler over many," is literally fulfilled, when we are conscious of the supremacy of Truth, whereby the nothingness of error is seen, and we know that its nothingness is in proportion to its wickedness."

My gratitude and love for our Leader, Mary Baker Eddy, who has illumined the darkness of the world by giving us Science and Health, I cannot express in words. To-day, more than ever before, do I send out thanksgiving and renewed thankfulness for this added blessing which has been brought to us by our dear Mother's untiring labor for us, in the latest edition of "Science and Health with Key to the Scriptures," leading us gently another footstep heavenward.

Born into this world into the home of one whose life-work was expounding the Scriptures as a minister of the gospel, whose love and devotion did all, so far as his understanding went, to give consolation and promise, growing into young womanhood, I found myself gradually approximating a condition where earth had no light and there was no heaven to send any forth. The Scriptures were prayerfully searched in the hope of finding an abiding truth, but these seemed to be contradictory in statement, and there seemed no direction in which to turn. Ten years ago Christian Science came into my own home, bringing healing and comfort, for it brought with it the understanding of the living God.

The ability to know God, omnipresent Good, as all, through every seeming cloud, and to "Hold thought steadfastly to the enduring, the good, and the true" (Science and Health, p. 261), enables mortals to behold the unfolding of divine Principle, and the way grows clearer to human vision until the eternal light appears in its fulness and completeness.

"Jubilee" at Johns Hopkins University.

BY E. E. C.

THE Associated Press has doubtless made every one acquainted with the recent occurrence in connection with the Johns Hopkins University in Baltimore, Maryland. This "Jubilee," which celebrated the twenty-fifth anniversary of the existence of the University, was a notable event, a veritable "red letter day" in its annals, and also in those of the city.

The spirit of the occasion was manifestly that of good-will and love from all, to all. The pardonable pride and loving interest in the University, expressed by its older and younger sister-universities, goes to prove that it is possible for those interested in and pursuing kindred tastes and objects to work together in the bond of unity, each glorying in the progress and higher achievements of the other, seeing in this their own possible advancement. The spirit of brotherly love and interest, devotion to higher ideals from their standpoint, evidence of *hard-earned* honors, the joy, zeal, and youthful spirits of its retiring and in-coming presidents, were wholesome object-lessons for even Christian Scientists.

It may interest the readers of our dear *Sentinel* to know that there was a sprinkling of Christian Scientists among them. Three Christian Scientists, wearing the cap and gown of the University, had their places in the long procession of men distinguished for their good work among the leading educators of to-day, and occupied chairs on the platform.

One of these for eight years "Associate in Electrical Engineering" in the University, resigned his position there in 1899 and since then has devoted his time and energies to the cause of Christian Science. Another has served the University for eleven years as "Associate Professor of Greek," and the third for the same length of time as "Associate in Chemistry." A fourth, also a graduate of this University, is at the present time a well-known and highly respected member of the Baltimore Bar.

Two of these gentlemen are members of the Mother

Digitized by Google

Church in Boston, and all four are regular attendants upon Christian Science services.

The motto of the Johns Hopkins University, *"Veritas vos liberabit"* (The truth shall make you free), together with the colossal statue of Thorwaldsen's "Christ, the Divine Healer," standing in the vestibule of the Johns Hopkins Hospital, will do their work as educators, by lifting the thought of humanity, until both become real to the human consciousness, and the Christ-Truth makes man *free indeed.*

Demonstration.

BY CHARLES D. WOODS.

THE practicability of Christian Science lies in demonstration. We are not taught, as some of our critics imagine, to call evil unreal and simply overlook it. We are taught to prove or demonstrate that evil is unreal, in accordance with the teachings of the Bible, as for example, "Overcome evil with good."

We are taught that the Bible contains an absolute, demonstrable Principle, and this Principle is revealed in our text-book, "Science and Health with Key to the Scriptures." Again we are taught that Truth is not understood until demonstrated, in accordance with the Master's saying, "These signs shall follow them that believe."

Let us see if the Bible lays stress on the necessity of demonstration or proof. St. Paul says, "And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the spirit and of power." "Make full proof of thy ministry." "Prove all things." St. James says, "But wilt thou know, O vain man, that faith without works is dead."

Quoting from St. Clement of Alexandria, let us see what one of the early fathers of Christianity had to say. "They that are ready to spend their time in the best things, will not give over seeking for Truth until they have found the demonstration from the Scriptures." "Wax old in the Scriptures and thence seek for demonstration."

Now we come to our text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, which says that the revelation of Christian Science is "The proof, by present demonstration, that the so-called miracles of Jesus did not specially belong to a dispensation now ended, but that they illustrate an ever-operative divine Principle" (p. 123). "With this one Principle came spiritual rules and their demonstration" (p. 112). "We must recollect Truth is demonstrable when understood, and that it is not understood until demonstrated" (p. 323).

Now sum it all up with the sayings of our Master: "These signs shall follow them that believe; . . . they shall take up serpents; and if they drink any deadly thing it shall not hurt them; they shall lay hands on the sick, and they shall recover." We might well note that the verb used is "shall." It has been truly said that,—

> The world sits at the feet of Christ,
> Unknowing, blind, and unconsoled.
> It yet shall touch his garment's fold,
> And feel the heavenly alchemist
> Transform its very dust to gold.

Consider the Lilies.

BY FLORA I. DEWOLFE.

CLOUDS have closed o'er a sombre sky
Times full many I trow,
And the darker the cloud the richer the store
Of rains that have fallen below;
But I never knew the smallest tree
Or the humblest flower complain,
While the buds all silently, strangely grew,
Waiting, no hour in vain:
Till the sun shone out some blessed morn,
And then were the wonderful blossoms born.

Testimonies of Healing.

I feel compelled to write my testimony and hope that I may be accepted as one more witness to the Truth as contained in "Science and Health with Key to the Scriptures."

In the year 1883 I first heard of Christian Science. I was sitting in a saloon in Leadville, Col., reading a daily paper of that place. My eyes lighted upon an article which spoke of some peculiar people in Boston who claimed to have discovered how to heal as Jesus healed. I do not remember much of the article, but those words stayed with me. I said within myself, "If they only heal as Jesus did, they have me converted right away." From that moment a change seemed to come over my life. I had more control over myself and I commenced to shake off some of the bad habits into which I had fallen.

I had drifted out to Colorado from New York City (my home), where I had been under the treatment of many leading physicians. The last one, who was too honest to take my money knowing that he could not cure me, advised me to keep away from doctors and quit taking medicine, as nothing but death could cure me. My trouble was pronounced by some to be Bright's disease, by others gravel on the kidneys with very acute inflammation of the bladder and prostate gland. I was a constant sufferer; I did not know what freedom from pain meant. I had lost all hope or faith in God, in fact I had become an infidel. I surely was without hope and without God in the world, when that ray of light came to me.

In the spring of 1888 my wife and myself were spending the evening at the house of a gentleman whose wife had been healed in the East by Christian Science. The gentleman took a book from his bookcase saying, "Here is a work on Christian Science." It proved to be Science and Health. I knew as soon as I had read the title-page that this was the very book we wanted. We immediately sent for the book, and when it arrived we obeyed the angel and feasted on it. I was very much prejudiced against the Bible, and my first demonstration over self was to consent to read the four Gospels. My wife bought me a New Testament and I began to read it. What a change came over me! All my prejudice was gone in an instant! When I read the Master's words I caught his meaning and the lesson he tried to convey. It was not difficult for me to accept the whole Bible, for I could not help myself, I was just captured. The disease with which I had been troubled for years tormented me worse than ever for about six months, as if trying to turn me aside; but I lost all fear of it.

I kept up my study of Science and Health and the disease disappeared. I can honestly say that Science and Health was my only healer, and it has been my only teacher.

We have had many trials during the fourteen years of our Science life: but, thanks be to God, by sticking to our text-book we, like David, have come out victorious in every battle.

I cannot find words to express my love and gratitude to our patient, tender, loving Mother, and for "Science and Health with Key to the Scriptures," which is the world's healer, teacher, and educator.

RICHARD A. COOKE, Los Angeles, Cal.

We do not realize how much our small demonstrations count, nor how much good they may do others who have experienced similar ones. I was reading in the *Journal* for March, 1901, about a mother who overcame the earache for her little boy. About a month ago my little boy, five years old, awoke with a piercing cry, such as children give when suffering with pain in the ear. In the course of two hours the whole trouble was over and no drugs used. In the morning his pillow was wet with discharge from his ear.

Digitized by Google

I am also the mother of five children, as was the one before referred to, and I know I do not half realize what I have been freed from in being able to overcome fear when beliefs of sickness attack the children. Christian Science has made this possible.

During my stay in Washington, D. C., two years ago, while my husband was in the Philippines, my oldest girl, then twelve years old, in jumping over a rope which was tied quite a distance above the ground, one end to a fence and the other to the side railing of the back steps. fell, turning completely over, and landing on a stone pavement, flat on her stomach.

I succeeded in getting her into the house and upstairs, but she was groaning with pain. There was evidence of a broken blood-vessel, and this evidence of internal injury would in years past have been enough to have brought doctors into the house for an examination. This time I was not thinking of doctors, but the responsibility of the case resting upon me, my husband being away, troubled me, until I finally suggested that I go for a Christian Scientist. I have always tried to do what I considered it my duty to do for the children since coming into Christian Science, and I was much strengthened and calmed by my daughter's answering that she preferred me to continue to treat her.

It was five o'clock in the afternoon when this happened, and past midnight when she finally rested on her back and went to sleep, having been all that time turning over and over, vainly seeking a comfortable position. The rest of the night she did not move an inch, for I went in to look at her every half hour. I had to fight the thought of her not being able to move when she awoke. The next morning her first words were, "Mamma, I can turn over." That was the unspoken thought I had been denying ever since she fell asleep the night before.

She arose that morning and ate breakfast and every other meal, and in five days was able to go to school. She is now perfectly well and strong. She has felt a weakness in that spot once or twice since on going in bathing, but she quickly and fearlessly denied it and now never speaks of it.

We hear nothing of Christian Science here at the Fort, but I have my reading, and hope, when I am worthy, to be able to do something for the cause of Christian Science. We would all do more if we knew how to go to work.

MRS. EMMA L. COOK, Fort Logan, Col.

That good seed sown is never lost has been proven to me of late. Some time ago a most simple and beautiful testimonial was given in the Mother Church. The speaker said that the Lord's Prayer included all, and was indeed a prayer to live by. This impressed me very deeply, and much more so than I realized at the time, as I have found myself many, many times since studying this prayer, and always with the spiritual interpretation, as given in our text-book. My reward for diligence has been very great indeed, not only in being healed and relieved from pain, but far greater is the knowledge gained. This certainly is the most beautiful and sweetest thing that has come into my life, and is it strange that I am anxious to try to give something, at least, to Christian Science?

After suffering for weeks from rheumatism in my leg, and feeling somewhat discouraged because I did not meet it, the thought came to me that there was an error in myself somewhere, in my consciousness, which must be some belief opposed to God. I worked hard and at last found hidden away, a belief in heredity, of many years' standing. My mother and mother's sister had passed away as the result of rheumatism, and strange to say, the pain seemed to be in the left leg, as theirs had been. I had talked about this with friends, and always with the fear of suffering in the same way. The words of our Leader came to me with renewed force and perfect clearness: "Our Father-Mother God, all harmonious," then I realized as never before, that God is both Father and Mother, the Creator of my being, from whom cometh only perfect harmony. The pain left immediately.

What can I say? To think that I am learning to know God through the teachings of this blessed book, Science and Health, makes me feel that I am powerless to express in words my gratitude to her who has been pure enough to receive this great Truth. I feel sure that faithful study and living the teachings of this wonderful, yet simple Truth of Christian Science will lead us each and every one into perfect freedom and harmony, and prove that God is ever near in greatest trials.

MARION E. HALL, Boston, Mass.

In November, 1899, in the city of Saginaw, Mich., my husband, Thomas Locke, met with a terrible accident which I believe would have cost his life, had it not been for Christian Science. The circumstances of the case were as follows: About six o'clock Saturday, while riding on his wheel on South Washington Avenue., he was run down by a team and hose-cart on their way to a fire. The hose-cart, weighing thirty-six hundred pounds, ran over his body, his face and head were bruised, his arm fractured and clothes almost torn off his body, and he was rendered helpless. He was removed to St. Mary's Hospital, though one physician thought it doubtful if he lived to get there. His fractured arm was set. At ten o'clock that evening, being prostrated from the shock, I called a Christian Science healer by telephone to assist me. The next morning my husband, knowing what Science had done for me, called for treatment, as he knew that there was no other help for him. At his request I called the healer, who gave him absent treatment and on Monday morning visited his bedside with me at the hospital and treated him. I saw the death pallor leave his face, and the flush of life re-appear. He vomited what looked black as ink, and soon said he felt much better.

The next morning the two physicians visited him and the healer was also there with me. The physicians looked at each other in surprise,—they had predicted that the third day would reveal inflammation from internal injuries. They took his temperature, and said: "Mr. Locke, you are going to live." No medicines had been administered. Within one week he was removed to our home, and he is well and attends to his business every day.

MRS. ELIZABETH LOCKE, Saginaw, Mich.

Nearly three years ago symptoms of erysipelas began to develop on my face, and being unable to overcome the trouble myself, I went to a Scientist for help. Under the treatment the disease was checked, but in the house where I was boarding were a number of people who were antagonistic to Science, and as I seemed unable to meet this thought, I finally became confined to bed most of the time and seemed quite ill. A very dear lady friend (not a Scientist) was very much alarmed and one afternoon came unexpectedly to my room, bringing a doctor, who proceeded to take my temperature, feel my pulse, etc. I knew it was almost time for the Scientist to arrive, so thought best not to object to this, thinking that as soon as they left I would get away and go to her house, which was just across the street. When the doctor left he went to a drug-store and soon the remedies arrived,—iodine, etc. At this point the healer arrived and I asked her to take me home a day or two with her. This she agreed to, and in a few hours the erysipelas was entirely destroyed, and in two days I went to work again, perfectly well. I feel very grateful to Mrs. Eddy and to all the publications which come regularly and help me very much.

KATE VAN DYKE, San Francisco, Cal.

Religious Items.

In a recent article on "Back Bay Churches," Boston, George Willis Cooke says in the *Boston Transcript:* "The tendency in this denomination [Unitarian], as in most others is just now decidedly away from a vigorous intellectual consideration of problems that search the minds of inquiring men. Theological preaching has been discarded and seems to be wholly banished from the pulpit, except here and there on the part of some one bolder than his brethren. The old kind of theology is in fact outgrown, but I query if a new sort is not very much needed. Text-quoting, metaphysics, and dogma may be profitably dispensed with, but my opinion is that there never was a time when men were asking so many serious and deep-probing questions as now. I believe they are getting no real answers to their questions at the present time in the Boston pulpits. The tendency is in the direction of 'practical preaching,' much of which is simple, direct, spiritual, and helpful. It is also to a large degree superficial, lacking in philosophic clearness, and calls to men in anything but trumpet tones. It is my conviction that any man who will face the modern world in a studious fashion, speak out without hesitation what philosophy and science have to say that is affirmative and constructive, and with the prophet's insight into the larger meanings of human experience, will have a following beyond that secured by any man to-day in Boston; and that he will have the strongest men and women listening to him, without any regard to his denominational connection. Thinking men are not asking whether a man is Episcopalian, Baptist, or Unitarian, but whether he has anything to say that illuminates the deeper mysteries of existence."

We have almost daily evidence in our correspondence that most of the religious controversies of the time, which are happily abating, would disappear altogether if there were on either side any real knowledge of the inner life and thought of those who represent the opposition. Protestant and Catholic, Orthodox and Unitarian, Ritualist and Quaker, often form mental images of each other which are grotesque even to the point of being libellous, if published. The misunderstanding is largely the result of unwillingness to admit that there can be any good thing said or done by the people who hold such foreign opinions. Patience, willingness to learn how the other man really feels, and a decent respect for our common nature will go a long way toward abating strife, bringing out the truth, and providing a better highway on which all right-thinking and God-fearing men and women may travel together.—*The Christian Register.*

God has provided that no good action shall go unrewarded. He has ordained a grand system of exchanges, and right bestowment brings enrichment—not that the thing given and the thing gained are the same—but that the thing gained shall be equivalent in worth; nay, of a higher type and value as spiritual treasure. And so the benevolent and kindly heart, fulfilling its function through the various operations of a true benevolence, expands as an element in the life and issues in what we call "greatheartedness." Works of charity fulfilled daily, benevolence in all our association with our race, kindliness on all occasions in ways small as well as large, perfects us in that grace which Jesus named as the soul of his religion, which the apostle puts above faith and hope, and which the poet says "becomes the monarch better than his crown."—*The Universalist Leader.*

C. R. Havighorst, D.D., in *The Christian Advocate,* says: "What erroneous views of prayer many of us have. We pray sometimes as if we were going to conquer God's reluctance; just as if God were stubbornly unwilling to give, and we were going to make Him. We have need of prayer, not to make God willing to give, but rather to make ourselves willing to receive. Prayer clears away the barriers, removes the obstructions for the incoming of God's power. Prayer opens the door to let the divine Spirit in. And the reason why so many of us have to pray so earnestly and struggle so mightily is because the door is so tightly locked and bolted. Fashion bars the door. Pride bars the door. Self-will bars the door. Sin bars the door. And sometimes we have to struggle in prayer to break down these bolts and bars."

There are many who expect church attendance of itself, or private prayer, to work a benefit in some semi-magical way. They expect God to play on their souls and raise them to the ecstasies of religious experience, no matter what their attitude, much as a master musician might play on a great stringed instrument, first tuning it to proper pitch, and then bringing out the rich chords and sweet harmony at will.

Then, because they leave the church or rise from prayer unmoved, they wonder that they have failed to receive all that they expected. But is it any wonder? God's promises are conditioned on our doing our part, and spiritual gifts demand spiritual receptivity and sympathy.

The Lutheran Observer.

Testimony reaches us that many of our pastors and churches are suffering from great spiritual barrenness. . . . There can be no doubt as to the seriousness and multiplicity of the complaints.

The impressiveness of this evidence of lack of spirituality and of paralysis through worldliness is largely in the almost unconscious tone of helplessness, approaching to despair, as if nobody were to blame and nobody could offer any relief; as if it should be said that the case is well-nigh hopeless, because no particular person or thing can be singled out for censure. It is, so to speak, in the atmosphere, or in the unchangeable and remediless condition of things.

The Examiner.

The secular is no less truly sacred than the sacred itself. There is no difference in quality between them; when you come down from the summit you do not come away from God. The great lesson, the great blessing that needs pressing into men's souls, seems to me to lie in the truth, that none of all the notes of life can sound truly except when it is sounded in the atmosphere of God. The mountain tops will glow more richly as the valleys are all filled with light and send up a reflection of the highest glory. The temple will be not less, but more sacred when the sacredness of the shop and of the field and the home are cordially and thankfully acknowledged.

PHILLIPS BROOKS.

J. H. W. Stuckenberg, D.D., LL.D., in *The Homiletic Review,* says: "Those who speak of the decay of religion might as well speak of the decay of human nature in man. Changes occur in religious views, forms, and organizations; but in this process religion itself is only purified, exalted, and made more effective. France has tested irreligion and atheism; recent investigations, however, show that there new interest has been awakened in spiritual problems. Young men in particular are anxious to learn the nature and value of religion and finds a firm basis for faith. When the religious feeling is thought to have been suppressed it breaks forth with fresh fervor and demands satisfaction."

OUR BEST.

Clasp Me with heart and mind! so shalt thou dwell
Surely with Me on high. But if thy thought
Droops from such height; if thou be'st weak to set
Body and soul upon Me constantly,
Despair not! give Me lower service! seek
To read Me, worshiping with steadfast will;
And, if thou canst not worship steadfastly,
Work for Me, toil in works pleasing to Me!
For he that laboreth right for love of Me
Shall finally attain! But if in this
Thy faint heart fails, bring Me thy failure!

From "The Song Celestial," translated by Edwin Arnold, M.A.

L. S. McCollester, D.D., in *The Universalist Leader,* says: "Service is one of God's best providences. One's desires become subordinate to what is good for others, and this doing good for others has the effect of drawing forth what is deepest in the soul of him who, for love's sake, tries to help others. Experience has shown Jesus' teachings true, that a man finds his soul by losing it."

The Christian Register has the following: Out of all the diversities and controversies concerning religion in our time, an issue is slowly emerging which will make all other questions seem unimportant. Is any religion given by divine revelation and supernatural authority? If so, which religion has been so given, what are its credentials, and what is its authority?

Sooner or later every soul comes to this consciousness of standing face to face with the everlasting Judge and Father of mankind. His presence is the one reality. We meet Him at every turning of our way. The true mission of our Lord was to reveal Him in the loving holiness of His character.

The Congregationalist and Christian World.

While the word is yet unspoken you are master of it; when once it is spoken it is master of you.—*Proverbs from the Arabic.*

When your kindness is only intended for coals of fire it will certainly burn your own fingers.—*Ram's Horn.*

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each, twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Practical Demonstration. Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15: 50 copies to one address, $2.25.

SUPPLEMENT

To the CHRISTIAN SCIENCE SENTINEL

Die Christliche Wissenschaft, Das Christenthum Christi.

—— Ein Vortrag von dem Geistlichen **Irving C. Tomlinson,** ——

Gehalten in Malden, Mass., am 23. April 1901.

Wer kann wohl den Werth der Wissenschaft Christi beurtheilen?

Der Gründer derselben war der edelste Charakter in der ganzen biblischen Geschichte. Die Namen der Großen und Guten im ganzen Zeitalter sind auf deren Urkunden eingetragen.

Welch' unschätzbare Opfer sind auf den Altären derselben dargebracht! Welche Liebesdienste sind deswegen vollbracht! Das Christenthum Christi! „Es ist das wahrhaftige Licht, welches alle Menschen erleuchtet, die in diese Welt kommen." Es ist die „Perle von unschätzbarem Werthe," die zu besitzen der Mensch gerne sein ganzes Besitzthum opfern würde.

Die Christliche Wissenschaft hat für alle Menschen eine frohe Botschaft. Zu denjenigen, welche unzufrieden sind, kommt sie mit dem Evangelium der Liebe. Sie verkündet uns, daß das Christenthum Christi das Eigenthum eines jeden sein sollte, und derjenige, dem es mangelt, entbehrt das Nothwendigste.

Die Christliche Wissenschaft kommt zu denjenigen, die entmuthigt sind und niedergeschlagen, und verkündet ihnen, daß es noch Hoffnung giebt. Sie kommt zu denen, die an Geist und an Körper krank sind, mit der frohen Botschaft, daß es für sie noch Gesundheit und Leben giebt.

Die Christliche Wissenschaft ist wie eine große Orgel, deren süße Harmonie nur zum Ausdruck gebracht wird für die, welche Verständniß dafür haben. Ich kann nur den Schlüssel zu diesem edlen Instrument in Ihre Hände legen. Um diese göttliche Harmonie hervorzubringen, muß der Schlüssel gebraucht werden, die Wissenschaft studiert und das Gelernte zur Anwendung gebracht werden. Das Christenthum Christi kann wohl schwerlich besser erklärt werden, als in den Worten Jesu: „Du sollst Gott deinen Herrn lieben von ganzem Herzen, von ganzer Seele, von ganzem Gemüthe und von allen deinen Kräften," und „Du sollst deinen Nächsten lieben als dich selbst." Der Begründer der Christlichen Religion hatte einen sehr praktischen Begriff von dem, was er thun sollte und wozu er geschickt wurde. Er predigte nichts von einer großen Hierarchie, er schrieb keine Formeln vor; er sagte, „denn ich suche nicht meinen Willen, sondern des Vaters Willen, der mich gesandt hat;" und er erklärte auch, daß er „zu suchen und zu retten käme." Ein anderes Mal behauptete er: „Ich bin gekommen, daß sie das Leben und volle Genüge haben sollen." Und der Apostel Jacobus faßte seine ganze Religion in den folgenden Worten zusammen als er sagte: „So ihr dem königlichen Gesetz gehorchet nach der Schrift ‚Liebe deinen Nächsten als dich selbst,' so thut ihr wohl."

Die Werke, welche Jesus vollbrachte um den Werth seiner Religion zu beweisen, waren dem unmittelbaren Bedürfniß derjenigen, die um ihn waren, angepaßt. Er öffnete dem Blinden die Augen, dem Tauben die Ohren, reinigte den Aussätzigen, heilte den Ausgestoßenen und den verlorenen Sohn. Hierin war er in vollem Einverständniß mit der Religion seiner Väter. Das Alte Testament richtig verstanden, ist ein Handbuch zum praktischen Leben. Im ersten Buch Mose lesen wir den ersten Krankheitsfall darin verzeichnet. Abimelech, der Freund Abrahams, war erkrankt und wir lesen, „Abraham aber betete zu Gott: da heilete Gott Abimelech."

In den Psalmen wird Gott beschrieben als der Eine, „der dir alle deine Sünde vergiebt, und heilet alle deine Gebrechen." Im letzten Kapitel des Alten Testaments ist es erklärt, „die Sonne der Gerechtigkeit soll aufgehen; und Heilung unter desselbigen Flügeln;" und die Prophezeiung wurde erfüllt in Jesus Christus, denn es heißt, daß er alle Krankheiten heilte. Es ist nirgends angegeben, daß diese praktische Religion nur zu den Bibelzeiten angewandt werden sollte. Der Begründer des Christenthums verkündete, „Wer an mich glaubet, der wird die Werke auch thun, die ich thue, und wird größere denn diese thun." Seine Jünger heilten die Kranken und die Kirche gehorchte in den ersten drei Jahrhunderten ihrer Geschichte dem ganzen Befehl des Meisters „zu predigen und zu heilen."

Um im Einklang mit den Lehren des Neuen Testaments zu sein, kann man die praktischen Werke von der Religion Jesu so wenig trennen, wie man das Blaue vom Himmel oder die Liebe aus dem Mutterherzen entfernen kann. Ein Apostel sagte, „daß der Glaube ohne Werke todt sei;" und der geliebte Jünger erklärte, „denn wer seinen Bruder nicht liebet, den er siehet; wie kann er Gott lieben, den er nicht siehet?" Wir können also das Christenthum Christi nicht besser erklären, als wenn wir sagen, es ist das ganze Verständniß und die vollkommene Anwendung des Königlichen Gesetzes der Liebe.

Die Christliche Wissenschaft kann geschildert werden als eine Wiederherstellung dieser frühzeitigen Christenheit. Dieselbe versucht dem ganzen Befehl des Meisters zu gehorchen. Die erste Kirche der Christlichen Wissenschaft wurde gegründet im Jahre 1879 auf dem Fundament der Christlichen Heilung. Von dieser einen Kirche sprossen fast sechshundert andere; deren Gemeinden befinden sich in den Vereinigten Staaten, Mexico, auf den Inseln des Meeres, in England, Deutschland und Frankreich. Das Textbuch dieser Kirchengemeinschaft ist „Science and Health with Key to the Scriptures," by Rev. Mary Baker G. Eddy; auf Deutsch: „Wissenschaft und Gesundheit mit dem Schlüssel zu der Heiligen Schrift," geschrieben von der Ehrwürd. Mary Baker G. Eddy, und es wurde zuerst veröffentlicht im Jahre 1875. Durch das Lesen dieses Buches und durch diejenigen welche darin unterrichtet worden sind, wurden schon über eine Million Menschen von Krankheit und Sünde geheilt. In diesen sechsundzwanzig Jahren sind zweihundert und zweiundzwanzig Ausgaben, deren jede ein Tausend Exemplare enthält, veröffentlicht und verkauft. Hat nicht dieses heilende Evangelium das Recht zu dem Namen des Christenthums Christi, da es ausdrücklich dem Befehle des Meisters Gehorsam leistet? Der Meister sagt: „Machet die Kranken gesund, reiniget die Aussätzigen, wecket die Todten auf."

Es wird manchmal gesagt, daß die Heilkraft mit dem Leben des Meisters endete und es wird auch behauptet, daß das Heilen der Kranken kein Theil der Religion sei. Die Behauptung ist gemacht worden, daß Jesus die Kranken heilte, weil er die Macht besaß, die sonst niemand besaß. Die Worte Jesu und die Praxis der frühzeitigen Kirche unterstützen solche Behauptung nicht. Jesus sagte: „Die Zeichen aber, die da folgen werden denen, die da glauben, sind die: In meinem Namen werden sie Teufel austreiben, mit neuen Zungen reden, Schlangen vertreiben, und so sie etwas Tödtliches trinken, wird es ihnen nicht schaden; auf die Kranken werden

Digitized by Google

sie die Hände legen, so wird es besser mit ihnen werden." Die Werke, welche Jesus vollbrachte, wurden auch von seinen Jüngern vollbracht. Ohne diese praktischen Werke fehlt uns auch der Grundzug, welcher die Religion Jesu als einzig in ihrer Art darstellt.

In der Christlichen Wissenschaft muß es deutlich verstanden werden, daß die Heilung weder durch Willenskraft noch durch thierischen Magnetismus vollbracht wird. Der ungesetzlich Heilende behauptet: „Ich selber kann alles vollbringen." Jesus sagte: „Ich kann nichts von mir selbst thun; der Vater aber, der in mir wohnet, derselbige thut die Werke." Und wiederum sagte er: „Doch nicht mein, sondern Dein Wille geschehe." Und so ist es in der Christlichen Wissenschaft, Gott ist der Heilende. Je weniger Selbstgefühl vorhanden ist, desto mehr ist von dem Vater vorhanden. Der Praktikant der Christlichen Wissenschaft versucht nicht sich selbst zu erheben, sondern Gott zu verherrlichen. Aus sich selber ist er nichts. Mit Gott, wird er eine Macht für Rechtschaffenheit. Wenn die Praxis dieser Kirche redlich untersucht und deutlich verstanden wird, glauben wir beweisen zu können, daß dieselbe identisch ist mit der Praxis Jesu und der frühzeitigen Kirche.

Denjenigen, die so lange an den Gebrauch der Arzneien gewöhnt waren, scheint es vernunftwidrig und unmöglich, daß man ohne dieselben geheilt werden kann. Materielle Hilfsmittel fahren zu lassen, scheint ihnen als ob sie versuchten, dadurch geheilt zu werden, daß sie nichts thun oder alles unterlassen. Die Christliche Wissenschaft erkennt diesen Geisteszustand und versucht es nicht, denen ihre Religion aufzudrängen, die unvorbereitet sind. Die Praktikanten der Christlichen Wissenschaft haben niemals versucht, durch Gesetzgebung andere zu zwingen, ihre Heilmethode zu gebrauchen, obgleich sie selber fest daran glauben. Sie bieten ihre Dienste nur denjenigen an, die dieselben suchen und wünschen. Ihnen erscheint es nicht vernunftwidrig zu glauben, daß es eine andere Heilmethode giebt, als die durch den Gebrauch der Arzneien. Es wird oft gesagt, daß es recht sein muß, Arzneien zu gebrauchen, sonst würde Gott sie nicht gemacht haben. Wenn Gott wirklich die Kräuter des Feldes gemacht hat um zu Arzneien verwendet zu werden, dann ist es nur natürlich zu vermuthen, daß er für jede Krankheit ein bestimmtes heilendes Kraut erschaffen haben würde. Es ist Thatsache, daß es kein einziges bekanntes Kraut giebt, wodurch eine unfehlbare Kur einer einzigen Krankheit herbeigeführt werden kann. Es ist die allgemein bekannte Wahrheit, daß es keine unveränderliche Vorschrift für die Wirkung der Arzneien giebt, und daher können sie nicht das Erzeugniß des Göttlichen Geistes sein; denn alles, was Er erschaffen hat, ist unveränderlich und immer gut.

Die Praxis Jesu zeigt nicht an, daß Arzneien die einzige Heilmethode seien. Es heißt, daß er alle Krankheiten heilte, und doch gebrauchte er keine einzige Arznei. Wenn es Gottes Wille wäre die Kranken durch materielle Heilmittel zu heilen, würde Jesus diese Methode dann nicht angewandt haben? Er vertraute nur auf Gott und lehrte seine Jünger Ihm auch so zu vertrauen, und er erklärte bestimmt, daß andere dieselben Werke vollbringen sollten, die er vollbrachte.

Die Christliche Wissenschaft hat für die ganze Welt die Botschaft, daß das Christenthum Christi so verstanden und angewandt werden kann, daß Krankheit verbannt wird, und Leben und Gesundheit das Besitzthum aller sei. Daß einige dieses brauchbare Evangelium verwerfen, kommt daher, daß ihnen das Verständniß mangelt die Lehren zu verstehen. Man vermuthet, daß diese Religion nicht an die Existenz des Weltalls glaubt. Diese irrenden Menschen glauben zu verstehen daß die Lehren dieses Systems lehren, daß alles, was dem Auge sichtbar ist, keine Existenz habe, und daher finden sie keinen Sinn in diesem System. Die Christliche Wissenschaft lehrt uns, daß Gott alles machte, und siehe da, es war sehr gut. Sie lehrt uns, daß alles was wahr und schön und gut ist, auch dauerhaft ist. Sie nimmt von dem Menschen nur das, was er nicht braucht, und läßt ihm das Gute, das Schöne und das Wahre. Sie stimmt überein mit dem Apostel, der sagte: „denn was sichtbar ist, das ist zeitlich; was aber unsichtbar ist, das ist ewig."

Und dann wird die Lehre auch als fraglich hingestellt, weil einige Leute vermuthen, daß sie die Unwirklichkeit der Krankheit lehrt. Den Kranken scheint nichts so wirklich und wahr als die Schmerzen. Dieses heilende Evangelium bestreitet nicht, daß ihrem Empfindungsvermögen nach, das Leiden wirklich ist. Gerade wie die Fehler in der Mathematik wirklich nicht ein Theil der Wissenschaft der Mathematik sind, so wird es verstanden, daß die Krankheit nicht ein Theil des Königreichs Gottes ist, sondern daß es ein irriger Zustand ist, welcher der lieben Wahrheit weichen wird. Diese Religion behauptet, daß das Leben und die Gesundheit zuverlässig und wahr sind und daß Krankheit negativ ist und nicht der wirkliche, wahre Theil eines Menschen. Hätte Jesus die Krankheit berücksichtigt als wäre sie ein Theil des Königreichs Gottes und als sei sie etwas Wirkliches und Ewiges, so würde er und könnte er sie nicht geheilt haben; denn was Gott erschaffen, ist dauernd. Für ihn kam Krankheit nicht von Gott, und daher konnte er und hat er sie vernichtet. Der verschrumpfte Arm schien wirklich zu existieren; Jesus bewies, daß das Leben wahr ist, als er dem Manne befahl, den Arm auszustrecken; und er wurde gesund wie der andere. Weil Jesus sah, daß Krankheit und Sünde falsch und unwahr sind, verschrieb er das wahre Heilmittel, indem er sagte: „Und ihr werdet die Wahrheit erkennen, und die Wahrheit wird euch frei machen."

Und wiederum wird die Christliche Wissenschaft als fraglich hingestellt von andern, da sie den Umsturz des physischen Gesetzes lehrt; sie betrachten den Menschen als sei er in der Gewalt des Gesetzes und sie bestehen darauf, daß diese Gesetze mit Zuverlässigkeit wirken. Sie verwerfen die Christliche Wissenschaft, weil sie nicht sehen, daß diese Gesetze umgestoßen werden können. Diese Religion bringt das natürliche Gesetz in Verachtung; aber sie behauptet, daß das Gesetz Gottes in Wahrheit das einzige Gesetz ist und es ist Allmächtig über alles.

Wie wir gesehen haben, nannte der Apostel die Liebe „das Königliche Gesetz." Für Jesus war die Liebe das Gesetz. Wie das Gesetz der Schwerkraft das materielle Weltall beherrscht und regiert, so verstand Jesus, daß das Gesetz der Liebe den Menschen beherrscht und regiert. In der Bibel wird es erklärt, daß wir in dieser Liebe „in Ihm leben, weben und sind." Der Praktikant der Christlichen Wissenschaft sagt nicht, daß es unserem Empfindungsvermögen gemäß kein menschliches Gesetz giebt, aber er behauptet, daß das Gesetz der fleischlichen Natur nicht der Gebieter des Menschen ist. Der Regen, welcher am Stammende der stattlichen Ulme niederfällt, wird von dem Gesetz der Schwerkraft gelenkt, und wenn jemand sagen würde, daß Wasser den Hügel hinaufläuft, so würde es heißen, daß er den Verstand verloren habe; und doch wenn das Wasser die Wurzeln des Baumes erreicht, so tritt ein anderes Gesetz in Kraft, und als Saft erreicht es den höchsten Gipfel des Baumes. Das Gesetz des Baumes hat das Gesetz der Schwerkraft null und nichtig gemacht. So macht das Gesetz der Liebe — dieses Gesetz des Heiligen Geistes — das Gesetz des Fleisches zu nichte und vernichtet Krankheit und Sünde und bringt uns statt deren Gesundheit und Harmonie. Im Einklang mit dieser Erklärung sagte der Apostel Paulus: „denn das Gesetz des Geistes, der da lebendig macht in Christo Jesu, hat mich frei gemacht von dem Gesetz der Sünde und des Todes." Dies ist sehr einfach, wenn wir in die Fußtapfen Jesu treten. Als er in das Haus Petri trat, fand er, daß dessen Schwiegermutter krank am Fieber darniederlag. Dem menschlichen Gesetz gemäß wüthet das Fieber eine gewisse Anzahl Tage; aber Jesus verstand das Gesetz Gottes, er sprach das Wort, das Gesetz des Fleisches wurde zu nichte gemacht und die geheilte Frau nahm ihren Platz im Familienkreis ein. Ein Aussätziger kam zu ihm und sagte: „Herr, so Du willst, kannst Du mich wohl reinigen." Unzählige Gesetze waren bei dem Aussätzigen angewandt worden, und es hieß, daß er unheilbar sei; aber Jesus sprach das Wort des Lebens und die Gesundheit des Mannes war wiederhergestellt. Dies war das Verständniß Christi von der Liebe Gottes. Er wußte, daß das Gute nur Gutes erschafft, und nur Gutes hervorbringen kann. Diese heilige Liebe war der

Digitized by Google

Geist und dieser einzige Geist, wenn richtig verstanden, erschuf Gesundheit und Harmonie. Diese Liebe war das Gesetz und jenes Gesetz richtig verstanden, vernichtet alle Formen der Krankheit und Sünde, und schafft sogar den Tod ab. Und die Christliche Wissenschaft behauptet, daß das, was Jesus in Palästina vollbrachte, jetzt und hier vollbracht werden kann. Ebenso wie in früheren Tagen, ist Gott jetzt die Liebe und diese Liebe ist Gesetz. Der Mensch steht nicht allein in seiner Arbeit gegen die materiellen Gesetze des Weltalls, sondern die Allmacht ist bei ihm und diese Allmächtige Weisheit ist sein Wohlthäter. Der liebe Gott ist nicht in der Ferne; Er ist hier, näher als die Luft die wir athmen, und wenn wir uns Ihm nur hingeben, gehört Er uns, und Er rüstet uns vollständig aus mit Seiner Kraft und Seinem ewigen Leben.

Die folgende Frage ist von allerhöchster Bedeutung: „Wie kann der Mensch die Vorzüge dieses Gesetzes der Liebe genießen?" Der Begründer des Christenthums hat uns die Antwort gegeben. Jesus sagte: „Das ist aber das ewige Leben, daß sie Dich, daß Du allein wahrer Gott bist, und, den Du gesandt hast, Jesum Christum, erkennen." Nach den Aussprüchen des Meisters verfassen die Kenntniß Gottes und Seines Sohnes das Leben. Wenn jemand Mathematiker werden will, so ist das Verständniß der Mathematik zuerst nothwendig; wer in der Wissenschaft der musikalischen Harmonie geübt werden will, der muß die Wissenschaft studieren; und wer hier in dem Leben Jesu gründlich bewandert werden und ein göttliches Leben erreichen will, der muß Verständniß von diesem Leben haben. Als der große König Salomon seine Laufbahn betrat, betete er zu Gott und sein himmlischer Vater sagte: „Bitte, was Ich dir geben soll." Der jugendliche König bat nicht um Reichthum oder Ehre, sondern er bat: „So wolleſt Du Deinem Knechte geben ein gehorsam Herz," und wir lesen, daß Gott ihm nicht nur ein verständiges Herz, sondern auch Reichthum und Ehre gab. Wer Weisheit hat, besitzt auch sonst alles. Daher sagte Jesus: „Dies ist das ewige Leben, Gott und Seinen Sohn zu kennen."

Jesus verstand, daß Gott gut ist. Als jemand zu ihm kam und sagte: „Guter Meister," erwiderte er: „Was heißest du mich gut? Niemand ist gut, denn der einige Gott." Er kannte Gott nur als die Heilige Liebe und der zärtliche Name, den er dieser ewigen Liebe gab, ist „Unser Vater der Du bist im Himmel." Im ersten Buch Mose steht geschrieben: „Gott sahe an Alles, was er gemacht hatte; und siehe da, es war sehr gut." Da nun Krankheit und Sünde nicht sehr gut sind, so hat Gott sie nicht gemacht. Keine leiblichen Eltern würden ihr Kind mit Sünde oder Krankheit behaften, und ist unser Himmlischer Vater weniger liebevoll als der leibliche? Krankheit hat keinen Bestandtheil in Gottes Schöpfung; Gesundheit ist positiv; Krankheit bedeutet Abwesenheit der Gesundheit — eine Verneinung; und gerade so wie die Liebe den Haß vernichtet, so vernichtet die Güte Gottes wenn richtig verstanden, Krankheit und Sünde. Ich hörte von einer erwachsenen Person, wenn sie in ihrer Kindheit sich verletzte, daß sie ihre Mutter aufsuchte und daß der Mutterkuß die Schmerzen zu vernichten schien. Wenn die menschliche Mutterliebe das schmerzstillende Mittel bringt, was wird uns dann wohl die Liebe der Himmlischen Eltern bringen, wenn wir sie nur so vertrauensvoll suchen wie das Kind den Schooß der Mutter.

> Die Allgewaltigen Arme der Liebe
> Unter uns, über uns, rings umher;
> Gott die Liebe stützet uns,
> Seine Allmacht führt uns an.

Und Jesus kannte nicht nur seinen himmlischen Vater als gut, sondern er kannte ihn auch als Heiligen Geist. Es stehet geschrieben: „Wie kostbar sind deine Gedanken für mich, mein Gott"; und wiederum heißt es: „Denn wie sein Herz, so ist er." Wer hat nicht den Einfluß des Geistes gesehen? Wie eines Menschen Geist ist, so wird der Mensch werden. Führen seine Schritte ihn nach der Heimath und der Kirche? Auf seinem Antlitz spiegelt sich der Ausdruck ab. Sind seine Schritte dem Laster und der Ehrlosigkeit zugewendet? Dieselben werden in der Geschichte verzeichnet, welche von Menschen gelesen wird. Schlechte Gedanken erzeugen Krankheit. Ein kranker Geist erzeugt einen kranken Körper. Wenn also ein irriges Gemüth der Vorbote der Krankheit ist, weshalb sollte dann nicht der Wahre Geist die Krankheit heilen? Und der Apostel hat es so erklärt: „Und stellt euch nicht dieser Welt gleich, sondern verändert euch durch Verneuerung eures Sinnes."

Dieses Verständniß des Königlichen Gesetzes der Liebe erhebt den Menschen zu seinem wahren Stand. Das Christenthum Christi macht den Menschen zum Kinde des Himmlischen Königs, zum Prinzen im Königreich des Himmels. Der Mensch ist nicht länger ein Wurm des Staubes; er hat seinen wahren Stand gefunden. Nur zu oft ist ein Mensch gemein, weil er sich für gemein hält. In der Heiligen Schrift heißt es, daß der Mensch zum Ebenbilde Gottes erschaffen wurde und es heißt, daß Gott dem Menschen Macht über alles auf Erden gab. Wie das Licht gemacht wurde um über die Dunkelheit zu herrschen, so wurde der Mensch erschaffen, um Herrschaft über alles Gethier, über alle Elemente, über alles zu haben, was ungleich Gott ist.

Der Mensch ohne wahre Kenntniß von sich selber und Gott, ist wie ein schiffbrüchiger Seeman auf dem tobenden Meer. Der Mensch, der von sich selber und von Gott Verständniß besitzt, ist mit Seekarte und Kompaß versehen, und diese lenken ihn von den stürmenden Wogen in den Hafen des Friedens.

Jesus gab den Menschen das Gebet als Mittel, um Gutes zu vollbringen. Er war in Harmonie mit der Religion seiner Väter. Sie glaubten, daß Gott dem Menschen Beistand leistet durch Gebet. Jesus sagte: „Und alles, was ihr bittet im Gebet, so ihr glaubet, so werdet ihr es empfangen." Entweder hat Jesus wirklich gemeint, was er sagte, oder Gebet ist werthlos. Weshalb sind denn unsere Gebete wohl nicht erhört? Die Bibel giebt uns die wahre Antwort. Es heißt: „Ihr bittet und krieget nicht, darum, daß ihr übel bittet." Das Christenthum Christi bittet und erhält, weil es richtig bittet. Als der verlorene Sohn sich von dem Futter der Säue nährte und den Segen des Vaterhauses entbehren mußte, da war es sein einziges Gebet, daß er sich erhebe und zu seinem Vater gehe. Er reichte keine lange Bittschrift ein; er bat nicht um dringenden Begehr; er wußte, daß sein Vater ihn liebte und ihn willkommen heißen werde. Als unser Meister vor Lazarus' Gruft stand, sandte er keine lange Bittschrift zu Gott, den Mann vom Tode zu erwecken. Er sagte: „Doch ich weiß, daß Du mich allezeit höreſt." Aber er hat es verstanden, daß Gott gut war, daß Gott weder Krankheit noch Tod geschickt hatte; er hat es verstanden, daß der Geist Allmächtig war, und daß die Liebe das einzige Gesetz ist; und diese Kenntniß zerriß die Fesseln des Todes und erweckte den Lazarus zum Leben. Das wahre Gebet ist ein Gebet der Uebergebung und solches Gebet ist nicht vergebens ausgesandt. Ein Mathematiker, der sein Problem ausarbeitet, versteht das Prinzip, welches es enthält, und dieses Verständniß vertilgt die Fehler und enthüllt die Wahrheit. Wenn ein Musiker Harmonie hervorbringen will, so muß er das Prinzip der Musik verstehen und dieses Verständniß giebt die Melodie. So ist Gebet das wahre Verständniß des Menschen und seines Prinzips, des Gottes, der die Liebe ist, der alles regiert, und dieses Gebet des Verständnisses verbannt die Zwietracht der Krankheit, der Sünde, und bringt die Harmonie der Gesundheit, der Glückseligkeit hervor.

Aber, fragen Sie, wie kann dies gelernt werden? Als die Entdeckerin und Begründerin der Christlichen Wissenschaft sich geheilt hatte durch das Verständniß des Königlichen Gesetzes der Liebe, und als sie dann andere geheilt hatte, lehrte sie sie dieses Gesetz der Liebe zu verstehen. Dann verschloß sie diese Entdeckung nicht in sich, sondern sie machte diese Kenntniß klar und deutlich für alle, indem sie der ganzen Welt das Textbuch dieser Kirchen-Gemeinschaft gab: "Science and Health with Key to the Scriptures"; auf Deutsch: „Wissenschaft und Gesundheit mit dem Schlüssel zu der Heiligen Schrift." Dieses Buch befindet sich in vielen öffentlichen Bibliotheken des Landes, und jedes Mitglied dieser Kirche wird gerne denjenigen sein Buch leihen, die das Verständniß wirklich suchen.

Es ist mein Privilegium, in der jetzigen

Digitized by Google

Heimath der Begründerin und Entdeckerin der Christlichen Wissenschaft zu wohnen. Von den dortigen Leuten und von andern, welche ich traf, erfuhr ich ihre Lebensgeschichte. Sie wurde von frommen und gläubigen Eltern geboren. Ihre Kindheit war so fromm und rein, daß ein frommer Prediger sagte, daß sie geweiht sei, ehe sie geboren wurde. Sie war immer eine eifrige Forscherin der Bibel und auf der Mutter Schooß wurde es sie gelehrt, daß Gebet zu Gott die Kranken und Sündigen heilt. Schon in ihrer Kindheit vertrieb sie Krankheit dadurch, daß sie ihren Himmlischen Vater anrief. Als sie aufwuchs, waren ihre Gedanken von Gott und dem Dienste der Barmherzigkeit erfüllt. Ich lernte jemand kennen, die sie in den ersten Jahren ihrer Ehe kannte, und sie sagte mir, daß es Freude und Trost bringe, Frau Eddy in jenen Tagen zu besuchen und durch ihre liebreiche Gegenwart gesegnet zu werden. Ich traf noch jemand, der sie später kannte, ehe sie die Christliche Wissenschaft entdeckte; aber ihre Gedanken waren immer darauf gerichtet andern zu helfen, und sie vernichtete den Schmerz und brachte diesen Leidenden Linderung durch ihre Liebe, die sie für Gott und Menschen hegte. Im Jahre 1866, als sie von einem Unfall betroffen wurde und von den Aerzten für unheilbar erklärt, wandte sie sich von der Erde zum Himmel. Sie öffnete ihre Bibel wo die Heilungsart [illegible] und die Christusmacht, welche die Kranken heilte, segnete auch sie, und sie erhob sich von ihrem Schmerzenslager geheilt und wohl. Sie sah, daß dieselbe Macht, welche sie geheilt hatte, auch andere heilen würde, und sie widmete sich drei Jahre ausschließlich dem Studium der Bibel, daß sie auch andere mit diesem Gesetz der Liebe bekannt machen könne. Sie versuchte nicht, das Geheimniß für sich selbst zu behalten, sondern es war ihr einziger Wunsch, auch andern diese Religion Christi deutlich zu erklären, diese Religion, die Krankheit und Sorge zu nichte macht und Freude und Gesundheit bringt. Sie ist die Führerin dieser mächtigen Bewegung, und dasselbe liebevolle Vertrauen auf Gott, welches sie in früheren Jahren auszeichnete, begleitet sie noch; dasselbe zarte Mitgefühl für die Leidenden fügt eine Schönheit und Huld zu ihren Jahren. Ihre ganze Tageszeit ist dem Heile der Menschheit gewidmet. Sie ist mißverstanden worden, aber sie hat nicht gezögert in ihrer Liebe zu Gott und in ihrer Treue gegen die Menschen.

Für diejenigen, welche die Religion Jesu in der Beleuchtung der Christlichen Wissenschaft studiert haben, ist dieselbe wahrlich das Königliche Gesetz der Liebe. Sie hat Schmerzen und Leiden verscheucht, sie hat die Kranken und die Sünder geheilt, und hat die beschmutzte Kleidung der Gefallenen weißgewaschen. Sie hat dem Menschen einen Stern der Hoffnung vorgelegt und ihn mit der ewigen Gegenwart des lebendigen Christus ermuntert.

Dann Bruder, schließe an dein Herz den Bruder;
Denn wo die Liebe wohnt — der Friede Gottes weilt.
Um Gott recht zu verehren, muß man einander lieben;
Jedes Lächeln ist eine Hymne; jede milde That ein Gebet.

PERIODICALS

PUBLISHED BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY,
95 Falmouth Street, Boston, Mass., U. S. A.

A WEEKLY NEWSPAPER

Christian Science Sentinel

PUBLISHED EVERY THURSDAY

Contains a brief summary of the most important news and articles selected from various sources, gives the Voice of the Press and timely editorials in connection with the movement, and presents interesting contributed articles and testimonials.

Subscription Price: One Dollar a Year. Foreign subscriptions, $1.50. On sale at three cents a copy, postpaid.

A MONTHLY MAGAZINE

The Christian Science Journal

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Is the Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

It contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science, dissertations, and lectures.

Subscription Price: Two Dollars per annum; One Dollar for six months. Foreign Subscriptions, $2.40 per annum; $1.20 for six months; Single Copies, 20 cents, postpaid.

BIBLE LESSONS

The Christian Science Quarterly

PUBLISHED JANUARY, APRIL, JULY, AND OCTOBER

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year, in all the Christian Science Churches.

Subscription Price: One copy one year, postpaid, 60 cents.

Foreign subscriptions, one copy, one year, 60 cents.

On sale at 15 cents a copy.

Catalogue of prices for Oxford Bibles, Hymnals, Books, Pamphlets, etc., sent on application.

Works on Christian Science, By Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Revised and Enlarged 1902. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING. Price (cloth) each $3.18
Leather, stiff beveled boards, gilt edges, each, prepaid 4.00
Full Sheep, stiff covers, marbled edges, Oxford India paper, each, prepaid 4.00
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid 5.00
Levant, divinity circuit, leather lined to edge, round corners, gold edges, silk sewed, Oxford India paper, each, prepaid 6.00

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions. Price (cloth) each, prepaid $2.25
Morocco, limp, round corners, gilt edges, convenient for pocket, narrow margins, each, prepaid 4.00
Levant, divinity circuit, leather lined to edge, round corners, gold edges, silk sewed, each, prepaid 5.00

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRIST AND CHRISTMAS. An illustrated poem. Single book, prepaid, $3.00; $30.00 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The message of the Pastor Emeritus, the Rev. Mary Baker G. Eddy, delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; $2.50 per dozen, prepaid.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckle-edged. Price, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckle-edged. Price, prepaid, 50 cents; per dozen, $4.50.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The United States Government will spend $6,600,000 on the St. Louis Exposition. The first appropriation made by Congress was $5,000,000, which is to be returned out of the receipts of the exposition company before any dividends are paid to the stockholders. Four hundred and fifty thousand dollars was appropriated for the erection of a Government building, and the cost of installing and maintaining the exhibits will be upwards of one million dollars.

A bill has been introduced in the Senate which appropriates $250,000 for the erection in Paris of a building to be known as the American National Institute. Senator Depew says there is need of such a building in Paris where American prize students could carry on their studies under the supervision of our Government. This would facilitate their studies and at the same time keep them loyal to their native land.

President Roosevelt has selected Eugene F. Ware, a prominent lawyer and writer of Topeka, Kan., as the successor of Commissioner of Pensions Evans. It is understood that it is the President's desire to appoint Mr. Evans minister to Spain if Bellamy Storer, the present minister, resigns, but if Mr. Storer does not resign some other place of equal character will be offered to Commissioner Evans.

President Roosevelt and party visited the Charleston Exposition, Wednesday, April 9. The President's address at the auditorium was received with great enthusiasm. After his address the President presented a sword to Major Micah Jenkins of the Rough Riders—South Carolina's only representative in the famous regiment.

The Civil Service Commission will shortly institute a test system of annual examination of its employes, which may be extended to all branches of the Government service. Employes will be reduced in grade and pay if they fail to score 70 per cent in the examinations.

The Post Office Department is considering the question of placing on one of the postage stamps of the new issue, the head of some woman who is connected with the history of the country. Martha Washington will probably be the woman so honored.

Last week the post office appropriation bill passed the Senate in just fifty-eight minutes. The amount of the appropriation was $138,500,000, an increase of $14,000,000 over last year.

Congress has passed the bill granting an annual pension of five thousand dollars to Mrs. McKinley.

Foreign.

The Scandinavian Government has instituted a scheme for international co-operative study of the high seas. A central bureau will be established at Copenhagen or Christiana. Nansen, the explorer, says that oceanography is the latest science, and that civilized nations must undertake the exploration of the seas in the interest of their growing populations.

The Norwegian Parliament has decided that women may act as members of both petit and grand juries. Many concessions in the direction of suffrage and political office have been won by Norwegian women in the past six months. A year ago a bill was passed allowing municipal suffrage to all women who pay taxes on certain amount of property.

It is stated that the list of honors to be conferred by King Edward on the occasion of his coronation will fill four or five newspaper columns. The list will include a dukedom for Lord Salisbury.

The exhibition of the Vienna Academy of Art, which was opened last week, is the largest held in twenty years. Forty pictures by sixteen Americans are included in the works of foreign artists.

The son of Prince Ching will be the imperial envoy of China to the coronation of King Edward. He will return by way of the United States and will visit the principal cities in this country.

It is rumored in London that Lord Rosebery is going to South Africa to study the situation there, with a view of submitting his impressions to King Edward.

The Havre Chamber of Commerce has adopted resolutions in favor of a permanent treaty of arbitration between France and Great Britain.

King Christian of Norway celebrated his eighty-fourth birthday April 8. Sixty members of the Royal families were present.

Industrial and Commercial.

The cable, which the Commercial Cable Company will lay from the Pacific coast to Honolulu, is being manufactured at the rate of six hundred miles a month. It is expected the cable will be finished by August 1 and laid by November 1, according to contract. It has not been decided whether the cable will land at San Francisco or Monterey. The Navy Department recommends Monterey, but the company prefers San Francisco, as it is the metropolis of the coast.

Australian and New Zealand capitalists have subscribed $1,250,000 for the purpose of erecting large woolen mills at Seattle, Wash. The wool growers of Australia are anxious to find a market in the northern part of the United States for their raw product. Seattle will be made the distributing point, and a regular line of steamships will be started between the two colonies and that port.

The indications are that this year's wheat crop will be as large if not larger, than last year's. Last fall American farmers seeded 32,000,000 acres of winter wheat which was four million more than the preceding year. The increase in acreage will offset the damage done to the wheat crop by the long drought of the fall and winter.

The City Railway Company of Des Moines, Iowa, has voluntarily proposed to sell eight tickets for twenty-five cents, to be accepted as fares between 6 and 7 A.M. and 6 and 7 P.M. The fare will be restored to five cents if a franchise is granted to any other street railway company.

According to the last statement issued by the Treasury Bureau of Statistics the manufacturers of this country are now importing more than $1,000,000 worth of material for their shops every day in the year, and are exporting more than a million dollars' worth of their finished products each day.

General.

Two years ago there was but one daily paper in America printed in the Chinese tongue. Now there are four dailies in San Francisco alone. Instead of twenty-six letters, as in the English alphabet, the Chinese typesetter must make his selection from eleven thousand different characters. So extensive is the space occupied by the cases holding the characters that ten hours is required to set up three thousand words, and the typesetter would walk about four miles among the cases.

The world's conference of the Young Men's Christian Association, which meets every four years, will be held this year in Christiana, Norway, from August 20 to 24. The Storthing, or parliament of Norway, has made a government appropriation for this conference. The international committee of the Y. M. C. A. has secured special rates for those who may attend the conference and wish to make long or short summer tours in Europe.

Rev. William H. Heard of Atlanta, Ga., former United States minister to Liberia, Africa, and president of the Colored National Emigration Association, is interested in the work of establishing a steamship company among negroes to ply between the United States and Liberia, Africa. Rev. Heard strongly favors negro emigration to Liberia.

Cornelius Van Ness, the octogenarian millionaire of Port Jervis, N. Y., has recently been baptized in the River Jordan. Together with his wife and a ministerial friend he took a trip to the Orient in order to gratify the desire he had had for years to be baptized in the Jordan.

The Maryland Legislature has passed a bill admitting women to the bar. The bill was introduced in the interest of Miss Etta Maddox, who was graduated from a Baltimore law school last year, but was debarred by decision of the courts from practising in the State.

Rear Admiral Schley has been invited to deliver the Memorial Day address in Bangor, Maine. It is expected he will be accompanied by General Miles.

Miss Ellen M. Stone, the American missionary, who was held in captivity for nearly six months by Bulgarian brigands, arrived in Boston April 10.

Rev. T. Dewitt Talmage, the eminent divine and pulpit orator, passed away at his home in Washington, D. C., Saturday, April 12, 1902.

Secretary of the Navy John D. Long says that personally he favors the christening of the new cruiser Denver with water instead of wine.

Arthur Snedley Green of Greenwich, Conn., has started a movement for the purchase of the Holy Land by Christian people.

The New York Chamber of Commerce has extended an invitation to the Prince of Wales to visit the United States.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Is Christian Science Humane?

STRANGE as it may seem, there has always been opposition to Christian healing, whereas people would naturally think it would be a welcome visitor, an angel guest. Jesus was constantly persecuted, and finally nailed to the cross. A great insurrection arose at Ephesus, because of Paul's preaching, accompanied by Christian healing; John was put in the boiling oil, many were torn to pieces by wild beasts, and others burned at the stake, and this was because they advocated a religion that not only reformed the sinner but healed the sick.

In our "land of the free," one would declare this could not be, yet on the contrary, within the past few years we find bills have been introduced in the different legislatures which, if enacted and enforced, would prevent the sick from being healed except by the licensed physicians, thus ruling out Christ's method and substituting man's.

To be humane is to be kind. The teachings of Jesus are the most humane ever given to the world, and if practised will bring the greatest blessings to mankind. This is the rock upon which Christian Science is founded. It stands for good government and sound morals; it is opposed to everything that would "torture, torment, cruelly or unlawfully punish" individuals, or deprive them of "necessary food, clothing, or shelter." Its medicine is the divine Mind, or spiritual means, such as Jesus practised and taught his followers, and it has proved in thousands of instances superior to material remedies. Hear what parents have to say, and then judge for yourself whether it can justly be called "inhumane." These parents are willing to make affidavit to the testimonies appended, and their names can be secured at any time.

A father and mother make the following statement of the healing of their daughter: "Our daughter, thirteen years of age, was confined to her bed with what our physician called hip-joint disease. At times her pain was intense. After being five months in this condition, the physician who attended the case told me he could do no more, that his medicine failed to act, and he feared the result. We then sought aid from Christian Science. The second day she sat up without much pain, the third day stayed up all day free from pain, and she is now well, without medicine, and in our opinion this state is wholly due to Christian Science."

A father said: "My eldest daughter, eight years ago, fell and dislocated her hip, being then only five years old. The doctor treated her for some time until finally there appeared an abscess, then two more. The child suffered pain constantly, so we sent for other doctors, and while under their care she became no better. For three years she had to walk with crutches, having no use of her limb. We heard of Christian Science, and placed her under treatment. She soon discarded her crutches, the abscesses healed, and she is now in perfect health. She puts her weight on her limb, which was impossible while under the physician's care.

"My little boy, then a baby, after having the measles was taken with brain and spinal fever. He was given up by the physician, who said he could do nothing more for him, or if by chance he should get better, he would be an idiot. I placed him under Christian Science treatment. He soon recovered, and is as bright a boy as any. He was a year and a half old when this happened. I give Christian Science credit for all."

A mother said: "Three years ago our little daughter was taken very sick. We called in a doctor, who had the reputation of being one of the best in this city. He examined her, and told me he was very sorry to say that one of her lungs was gone, and the other affected. He also said she had softening of the spine, and this would cause her to be a cripple. He told me that even if he could overcome the lung trouble, the condition of her spine was such it would be necessary for her to wear a plaster-of-paris jacket. My heart was almost broken when he told me this, as I had a niece who wore three such jackets and there was no end to her torture and suffering until she passed away. The doctor remarked that he could not tell much about her until the third day, and when this day came her feet and limbs were badly swollen, so much so that I thought they would burst. If we walked across the room she would scream with pain. When the doctor came I asked him what he thought of her, and his reply was that he had very little hope. Then the thought came to me, God is her Life, and why not try Christian Science. This we did. I saw a change after the first treatment; after the second treatment the swelling left her feet, and she had no more pain; after the third treatment she got up and took dinner with us, and was as well and hearty as if nothing had ever ailed her. I thank God for Christian Science, for to-day she is in perfect health, strong and straight as an arrow."

With joy, a father and mother state: "We cannot find words to express our gratitude for what Christian Science has done for our little girl, Grace, six years old. She was taken with what the doctors called bone scrofula. For about a year she was under the best medical treatment, but grew worse all the time. Her suffering was intense, and she was unable to walk, owing to the pain, the enlargement of the knee-joint, and the drawn condition of the limb. The physicians and surgeons whom we consulted, thought the limb would have to be amputated above the knee. We could not think of submitting to such an operation, and as a last resort concluded to try Christian Science. After the first treatment, the pain and fever left, and in a very short time the enlargement of the knee began to go down, and the limb straightened. To-day she is perfectly well, all these conditions are gone, she enjoys the best of health, and runs everywhere. We cannot say too much in praise of Christian Science, which has saved our child from suffering, surgery, and being a cripple for life."

A mother said: "Our little boy was a great sufferer from what the doctors called a carious and ulcerated condition of the jaw-bone. There were twenty open sores on the neck. The doctors thought it would be necessary to remove a portion of the bone and insert a silver plate. In this

Digitized by Google

hopeless condition we turned to Christian Science for help. In a few weeks he was again in school, the jaw-bone restored to perfect health, and the ulcers healed."

These are only a few of thousands of instances of healing occurring daily under Christian Science treatment; and its fruits, not only of physical healing but of moral reformation, prove that it is "humane," and Christian.

Dayton (O.) *Herald.*

Influence of Mind upon the Body.

To the Editor of *The Mail and Express.*

Sir:—In the issue of *The Mail and Express* for last Saturday there appeared an article dealing with the interesting experiments of Dr. William G. Anderson, of Yale University, which prove the remarkable influence of mind upon the body. The writer of this article states of the deduction drawn from these experiments:—

"It is the same idea which Mrs. Eddy reduces to absurdity in Science and Health, when she says the blacksmith's biceps are not produced by his wielding of the hammer, but by his belief in the muscular effect of the blows."

If the actual words which Mrs. Eddy uses in this connection are examined, and her terms properly understood, it will be found that she throws new light on this subject, instead of committing any "absurdity."

"Because the muscles of the blacksmith's arm are strongly developed, it does not follow that exercise has produced this result, or that a less-used arm must be weak. If matter were the cause of action, and muscles, without the co-operation of mortal mind, could lift the hammer and strike the anvil, it might be thought true that hammering would enlarge the muscles. The trip-hammer is not increased in size by exercise. Why not, since muscles are as material as wood and iron? Because nobody believes that mind is producing that result on the hammer.

"Muscles are not self-acting. If mortal mind moves them not, they are motionless. Hence the fact that this so-called mind enlarges and strengthens them through its mandate,—through its own demand for and supply of power. Not because of muscular exercise, but by reason of the blacksmith's faith in muscle, his arm becomes stronger" (Science and Health with Key to the Scriptures, pp. 198, 199, Rev. Ed.).

It is important to understand the meaning of the term "mortal mind," as it is used in Mrs. Eddy's writings. According to my understanding, it does not mean any individual or human mind, but the general human consciousness of all mankind. Used in this sense, it will be found that "the blacksmith's faith" is an expression of the general human consciousness, and that it follows the beliefs of that consciousness. As a matter of fact, the further the experiments of the natural scientists are carried into the analysis of matter, the more certainly they lead into a realm which can only be described as that of mind.

Thanking you for your courtesy, I remain,

W. D. McCRACKAN.

In *The Mail and Express,* New York, N. Y.

Why do I dare love all mankind?
'T is not because each face, each form,
Is comely, for it is not so:
Nor is it that each soul is warm
With any God-like glow.
Yet there's no one to whom's not given
Some little lineament of heaven,
Some partial symbol, at the least, in sign
Of what should be, if it is not, within,
Reminding of the death of sin
And life of the Divine.

HENRY SEPTIMUS SUTTON.

The Lectures.

At Howard, Kan.

First Church of Christ, Scientist, of Howard, Kan., is glad to report through the *Sentinel* their pleasure in giving to the people of this vicinity an opportunity to hear a lecture on Christian Science by Mr. Edward A. Kimball of Chicago. The *Howard Citizen* referred to the lecture as follows:—

The lecture at the Opera House Thursday evening, March 13, by Edward A. Kimball of Chicago, was a very able one. The gentleman is a very pleasant speaker and presented the doctrine of Christian Science in a plain, honest, and able manner. It is safe to say that Mr. Kimball left upon his audience a higher opinion of the doctrine he advocates than they had before hearing him. A large number of people from out of town were present.

Mr. Kimball was introduced by Mr. S. C. Hanna in the following words:—

Ladies and Gentlemen:—Christian Science, as an accepted faith, is a religion of comparatively recent origin. It was first brought to the attention of the world in 1866 by Mrs. Mary Baker Eddy. Founded on the Bible and the teachings of Christ, it is, nevertheless, a radical departure from the old traditional beliefs. Like every advance in religious thought, Christian Science has to contend with ridicule and prejudice, and the religious intolerance that is born of creeds and dogmas. But in so far as it appeals to the reason and intelligence of humanity, it will reach, and is reaching, thousands that cannot accept the old beliefs.

Personally, I am thoroughly impressed with the idea that the religious instinct in human nature is an inborn principle of the human soul, and that its highest development is but the outgrowth of our spiritual natures, and is in no manner dependent on confessions of faith or human creeds.

Paul condensed the Golden Rule and the practical essence of all religion into the one word "Charity." And I would remind some of our orthodox Christian friends that charity is the virtue that "never faileth." I would remind them that though they may have the gift of prophecy, and though they may understand all mysteries and all knowledge, and though they may have the faith that can remove mountains, if they have not charity they are nothing.

Although I may have no proper understanding of Christian Science, and may be sceptical as to its power to cure diseases, I cannot ignore the fact that many thousands of sincere and intelligent people have testified to its healing and saving power. Unable to understand it, or to explain it on scientific or spiritual grounds, I do not doubt that the faith of the Christian Scientist carries with it a healing virtue. I do not doubt that through its wonderful power human suffering has been alleviated, human despair has been displaced by faith and hope, and human souls have been awakened to a new realization of their spiritual natures.

I therefore bespeak for the lecturer to-night a candid hearing, and that charitable tolerance of opinion so essential to the practice of that noble virtue which, greater than faith or hope, is the essence of all true religion, and I take pleasure in introducing the lecturer, Mr. Edward A. Kimball of Chicago, who will now address you.

Correspondence.

At Houston, Tex.

An audience that filled Bryan Hall to its capacity gathered last evening (March 28) and listened to an interesting discourse on the subject of Christian Science, delivered by Edward A. Kimball, C.S.D., a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass. The lecturer was introduced by Hon. John H. Kirby as follows:—

Digitized by Google

More than one hundred years ago, when our forefathers established the most perfect civil government ever instituted among men, they laid deep and broad the foundation of religious liberty. The Constitution itself, the magna charta of American liberties, guarantees to every man freedom of speech and the liberty to worship God according to the dictates of his own conscience. The immeasurable comprehensiveness of the religion of Jesus Christ, its infinite wealth of truth and love, its incomprehensible glory and perfection, have led to the division of Christians into many sects and organizations, each claiming to hold the true faith and to have the correct interpretation of the wondrous wisdom of the Scriptures.

Christian Scientists are earnest and sincere in their faith, but they have no quarrel with any other church. They are pleased to have their religion examined and are much gratified at your presence to-night, believing that your investigation of the tenets of Christian Science will lead you to a better understanding of God.

I shall not undertake to tell you what that faith is. I am not one of them myself, but I attend their services and have been much encouraged and strengthened by the aids and wholesome benefits which association with this band of happy-hearted and beaming Christians has brought me.

There are those who deride their faith and belittle their claims to Christian practices, but they are not angered or discouraged. With a charity Christ-like in its patience and love, they pursue their steady course of peace and contentment, ignoring the assaults and jibes of their brethren of other churches.

Why should we fight them? If their faith is the truth it will prevail. If not the truth it will die the death that comes to all pretence and falsehood.

Christian Science is a religion of works and not of words only. One must not only watch and pray, but he must think and act. To the Scientist all causation is mental; sin and disease are healed through a correct understanding of God and obedience to His law. Whether this be true or not, we find among us here a happy, healthful, harmonious congregation, who love God and their neighbor and who are daily giving living examples in themselves of the beauty of perfect health, the charm and contagion of happy hearts, the unselfishness of Christian love, and the purity, peace, and piety of unbounded faith in God.

The speaker of the evening is an earnest and devout Christian. He voluntarily retired from the activities of commercial life to take up what he regarded as the nobler work of spreading the gospel of Christian Science. The Mother Church, The First Church of Christ, Scientist, of Boston, Mass., to the end that other churches throughout the land, may have the faith expounded by those who are capable, has constituted a Board of Lectureship composed of those who are learned in this Science, and on the application of First Church of Christ, Scientist, of this city, this Board has sent here the lecturer of the evening.

Ladies and gentlemen, it is my pleasure to present to you Mr. Edward A. Kimball of Chicago.

The Houston (Tex.) *Chronicle.*

At Stillwater, Okla.

Mr. Edward A. Kimball, C.S.D., of Chicago, delivered a lecture on Christian Science at the Grand Opera House on Friday evening, March 21, to a large audience, all the seats on the lower floor being taken and a number in the gallery. The lecturer was introduced by President A. C. Scott, of the Agricultural and Mechanical College, who said in part:—

Ladies and Gentlemen:—When the committee having charge of this lecture did me the honor—and I esteem it an honor—to ask me to introduce the speaker of the evening, I said to them,—and I think it only fair to myself to say so here,—that I would do so on one condition, to which they promptly agreed; viz., that I am not to be considered a supporter of the principles or the practices of Christian Science, as I understand them. Nevertheless, I trust I shall never grow so narrow as to shut my ears against the sincere and reputable advocacy of any creed or propaganda that is not on its face repugnant to good morals and good sense. A scientific age is a tolerant age; a scientific spirit is a liberal spirit. We are living in a scientific age; let us try to catch the scientific spirit,—the spirit that commands us always to keep our eyes open to the truth and our ears attuned to it, from whatsoever source it may come or however surprising or revolutionary it may be. The speaker of the evening comes with such abundant vouching from other committees, from Christian Science societies, and from great institutions of learning before which he has spoken, that I feel well assured that, whether in the end our opinions shall be changed or unchanged, we shall at least have listened to a courteous and able exposition of the subject under consideration. I have pleasure in introducing to you Mr. Edward A. Kimball of Chicago.

Correspondence.

At Nebraska City, Neb.

March 25 will long be remembered by the little band of Christian Scientists in Nebraska City. On that date Judge William G. Ewing of Chicago lectured here on Christian Science, and our hearts have since been full of gratitude and thanksgiving for the many blessings we received.

Judge Ewing was introduced to the audience by Mr. John W. Steinhart, cashier of the Otoe County National Bank, who spoke as follows:—

Ladies and Gentlemen:—The present world but faintly realizes that we are from day to day makers of history; it is only in the retrospect, and when the strong points, as brought out in our daily lives, are outlined as mountain peaks and are the historical facts of record, that we are brought to a realization of this fact.

From time immemorial people have had presented to them new facts, new truths, new religions; as a matter of history we can see the past effects, the feeble beginnings, the efforts, and the results. We, however, are apt to overlook the tiny shoots, as they present themselves along our daily pathway; the fact must be presented strongly to gain our recognition.

We have heard much of late of Christian Science; we are anxious to hear more. To furnish the information, to carry it from place to place, to reach out into the wilderness, as it were, requires sturdy character, strong resolves, and determination. A pioneer was never made of weak material. The Christian Scientists of to-day are the pioneers of their history, they are blazing a pathway for others to follow in, and it is with great pleasure that I have the honor to present this evening Judge Ewing of Chicago, one of their ablest exponents.—*Correspondence.*

The Daily Tribune published the lecture in full and editorially referred to it in the following kindly manner:—

"We invite the careful attention of our readers to Judge Ewing's statement of the principles of Christian Science, found on another page. This will be a good thing to lay aside to read to-morrow. All of us who are inclined at first sight to make light of Christian Science will admit that we don't know much about it. What seems certain is that it cannot be an absolute absurdity, or so many of the best and wisest would not have dropped everything else for it. Anything reasonable in the way of a new religion, or an improvement or further explanation of the old ones, deserves a respectful hearing.

"There are many religiously-minded men and women who do not find satisfaction in the accepted teachings, and this new system seems to have brought mental rest and comfort to a very great number."

Digitized by Google

At Austin, Tex.

The lecture given last evening (March 24) on Christian Science at the Board of Trade Hall by Mr. Edward A. Kimball of Chicago, under the auspices of First Church of Christ, Scientist, was largely attended, and will long be remembered by those who availed themselves of the opportunity of being present. The speaker was introduced to the audience by Colonel A. P. Wooldridge in a short but very appropriate address. Colonel Wooldridge said:—

I take great pleasure in introducing to this audience the speaker of the evening. I had an interview with him this morning, and I believe him to be an able man and teacher. As to the teaching of Christian Science, I know nothing at all, but I hope I am susceptible to the truth. Christian Science may not be all it claims, but it is approachable, and makes a man better, intellectually, morally, and physically. Allow me to introduce to you Mr. Edward A. Kimball.—*Austin* (Tex.) *Statesman.*

At Phoenix, Ariz.

Dr. F. J. Fluno of Oakland, Cal., lectured Friday night (March 28) on the subject of Christian Science, in Dorris Theatre. The lecturer was introduced by Miss Lulu B. Hall, the First Reader of the local Christian Science Church who said in substance:—

In behalf of First Church of Christ, Scientist, of this city, I bid you welcome. Many of you no doubt have formed your opinion of what Christian Science is, and possibly some of your views are far from being correct. To give you a better understanding of Christian Science, we have invited a member of the Christian Science Board of Lectureship of the Mother Church, Boston, to address you. It is with pleasure that I introduce to you Dr. F. J. Fluno of Oakland, Cal., whose subject is, "Christian Science *versus* Finite Sense."

The Arizona Republican, Phœnix, Ariz.

At Lewiston, Idaho.

Judge Ewing of Chicago delivered a lecture on Christian Science at the Court House last night (March 13), and was greeted by a large audience. The speaker was introduced by Judge Edgar C. Steele of the Superior Court of Idaho. Judge Steele stated that he himself knew nothing whatever about the principles of Christian Science, and was not present for the purpose of either instructing or entertaining the magnificent audience; that he hoped and believed Judge Ewing would receive an unprejudiced hearing, and that whatever he stated would be given proper consideration.

Judge Ewing found a very intelligent and appreciative audience and his discourse was received with marked attention, his graceful presentation of the subject being especially forceful.—*Lewiston* (Idaho) *Tribune.*

At Parsons, Kan.

The lecture of Mr. Edward A. Kimball of Chicago at the Opera House, yesterday afternoon (March 9), drew a very interested audience, and they were given an address worthy of their attention and thoughtful consideration. The speaker was pleasantly introduced by Mr. I. N. Sedgwick, General Attorney of the Missouri, Kansas, and Texas Railroad.

Mr. Kimball in his portrayal of the virtues of Christian Science made many friends for his cause, and the little church here cannot help but be benefited by his visit. He left a most pleasing impression upon his audience, and his visit here will be a topic of conversation for some time to come among those who had the pleasure of listening to him.

Parsons (Kan.) *Herald.*

Wednesday Night Meeting at Ottawa, Ill.

ONE of the most pleasant and satisfactory meetings we have enjoyed during the winter was that of February 12. Among the testimonials offered was that of a gentleman who said:—

"There is a prevailing opinion among business men that Christian Science may be good enough for women and children, and for various types of imaginary troubles, but that it is of no value to the every-day business man or for the so-called real physical troubles. I am pleased to testify that Christian Science *is* of great value to the business man and for so-called physical ills. There is no business transaction or enterprise into which a man may enter, but that he can be greatly benefited by the principles of Christian Science, and he is consequently a better man in every respect, as a business man, physically, mentally, and morally."

Another gentleman spoke of his gratitude for a demonstration that occurred in his family a week ago that night. His daughter was lifting from the stove a jug of boiling water; the confined steam forced the cork out and the water struck her full in the face, burning her quite severely. The pain was destroyed promptly through Science. She rested comfortably through the night and had not suffered with it since. She was present at the meeting with no apparent effects but the redness of the new skin.

A lady testified that through Christian Science she was able to overcome a disposition to take cold. Previous to this year she had had five or six bad colds each winter. Through the understanding of Science as taught by Mrs. Eddy in Science and Health she was able to overcome it and is now entirely free from such troubles, for which she is very thankful. The same lady read extracts from a letter received from a neighboring city stating that a lady who had been afflicted with a severe chronic trouble had been entirely cured by simply reading Science and Health.

Another lady said: "At this time of the year (February), when the weather is considered conducive to lung troubles, it is such a comfort to feel that we have something that disarms us of fear and teaches us that the lungs are no more a vital part of man than his hands or his feet. I know of one case this week where a man had a severe cold, and it was feared he would have pneumonia. One afternoon he was attacked with severe pains in his chest and was unable to sit up without coughing; he asked for help in Science. The next morning he was down town and at noon took the train for a neighboring town to resume his work as carpenter."

Another lady spoke of her gratitude for being led into Christian Science, for through it she had been healed of stomach troubles of long standing, as well as liver and nervous troubles. She was a slave to drugs, and the doctors told her she would always have to take medicine. When Christian Science proved to her that God is the healing power, drugs never afterwards tempted her. She said she was also thankful to Christian Science for a religion as she had never found that which satisfied a hungering desire for the whole of Truth until she read Science and Health, and found the religion the Master taught.

Another lady said: "Two years ago this winter I was healed of pleuro-pneumonia in one treatment through Christian Science. The third day I was out calling and walked twenty blocks. Three years previous to this attack, I had the same disease and employed a physician, and was sick two weeks or more. Since coming into Science I have been entirely free from such troubles, and I am grateful for the physical healing, but the one thing I am most grateful for in Christian Science is that it shows me a *way* out of all difficulties, whether physical, moral, or financial. I used to be melancholy, discouraged, and hopeless; in fact, I felt as though I were in the midst of a shoreless ocean, tempest-

Digitized by Google

tossed, driven hither and thither, perfectly helpless. Now I have found a haven of rest, a hope in the good that is substantial, a God that is everywhere present and all powerful."—ARTHUR W. MOULTON.

You are always as Young as you Feel.

People grow old by thinking themselves old. When they reach the age of forty, fifty, or sixty, they imagine that they look like others of the same age, and that they soon will be useless, unfit for work, and unable to perform their wonted duties. As surely as they think this, it will come true, for thought is creative. How many of us can say, with Job, "The thing which I greatly feared is come upon me."

The time will come when children will not be allowed to celebrate their birthdays; when they will know that, by thinking themselves young, they will remain young, and that they will cease to grow old when they cease to believe in old age. The body is built up of beliefs, and our convictions are stamped upon every fibre of our beings. What we believe, what we think, that we are; so people who remain young in spirit never grow old.

Not one of a hundred students, of whom the writer was one, under Oliver Wendell Holmes, at Harvard, ever thought of him as an old man, although he had then passed his eightieth birthday. His spirit was so young, and he was so buoyant, so fresh and full of life, that we always thought of him as one of ourselves. His vivacity and joyousness were contagious. You could not be in his presence five minutes without feeling brighter and better for it. The genial doctor never practised medicine, yet he did more to relieve human suffering than many practising physicians. His presence was a tonic; it was a perpetual delight to be near him.—*Success.*

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

German Supplement to the Sentinel.

The lecture on "Christian Science, the Christianity of Christ" by Rev. Irving C. Tomlinson, which was issued as a supplement to our last issue, may be purchased in any quantity desired. The supplement is printed in German and meets the long-felt need of authorized Christian Science literature in the German language.

The price is the same as for other supplements to the *Sentinel.* Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist, in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Baltimore Branches.

WE recently published an account of the movement for a unification of the two branch churches in Baltimore, Md. The movement has happily been consummated as the following from the *Baltimore News* shows:—

"At a joint business meeting of the members of First and Second Churches of Christ, Scientist, of Baltimore, held at the chapel, on Mount Royal Plaza, last night (April 3), the final legal steps were taken in the union of the two churches and an amendment to the charter was adopted.

"Immediately thereafter the election of officers was held and the reports of the work for the past year were read. The officers elected were as follows:—

"First Reader, Mr. Edward H. Hammond, C.S.D.; Second Reader, Miss Ellen E. Cross, C.S.D.; Trustees, Mr. Edward H. Hammond, Miss Ellen E. Cross, Mr. Hermann S. Hering, Mrs. Marian W. Hering, Mr. Otto C. Nordhoff, Miss Katharine E. West, Mr. John A. Carroll, Miss Mary G. Gover, and Mrs. Ella Leib Darby."

Through Mr. Tomlinson our Leader thus heartily expresses her approval of this act of brotherly love and Christian fellowship on the part of the Baltimore Scientists:—

Pleasant View, Concord, N. H.

To the Christian Scientists of Baltimore, Md.

Dearly Beloved Brethren:—Our Mother in Israel asks me to reply to your glad letters containing the joyful news of the spirit of Unity manifest in her Baltimore children. When your Easter anthems reached her she called us to her to hear the good news. And as she read to us your Christian correspondence, which so rejoiced her mother heart, tears of gladness glistened in her eyes.

These signs of the risen Christ, betoken the coming fulfilment of our great Master's prayer, "That they all may be one; as thou, Father, art in me, and I in thee, that they also may be one in us; that the world may believe that thou hast sent me."

Our revered Mother wishes those beloved students to know that their obedience has brought her much joy.

Your brother in divine Love,

IRVING C. TOMLINSON.

April 7, 1902.

Photographs of Mrs. Eddy's Birthplace.

WE are reliably informed that spurious pictures of our revered Leader's birthplace are in circulation. In at least one instance the photograph of a barn has been sent out as the place of her birth. It is generally known that the only authentic and authorized reproduction of the Baker homestead, as it appeared in Mrs. Eddy's girlhood, is that from an original drawing by Rufus H. Baker, Esq., Concord, N. H., reproduced by the aid of Mrs. Eddy's information. No other pictures of our Leader's birthplace are approved or genuine.

We have recently noted the commendable action by the citizens of Lynn, Mass., in buying and setting apart as a memorial of her, Mrs. Eddy's former residence, in which she finished writing "Science and Health with Key to the Scriptures."

Through the kindness of Mrs. Eddy, photographs of this estate, as it appeared when she was the owner of the property, are now to be had of Concord's well-known photographer, W. G. C. Kimball. Pictures of the birthplace can be obtained either of Mr. Baker or Mr. Kimball.

It is apparent that all history in any way related to the Discoverer and Founder of Christian Science should be absolutely *correct*, and such only as is unquestionable.

Mr. McKenzie's Lecture.

THE semi-annual lecture under the auspices of the Mother Church, which was given by the Rev. William P. McKenzie, C.S.B., in Symphony Hall, Thursday, April 10, was an able, well-considered, and thoughtful presentation of the phases of Christian Science to which the lecturer addressed himself. His subject was, "Christian Science and the Freedom of Man." The capacious and beautiful hall was well filled, though not entirely so, there being a number of empty seats in the rear. The platform was occupied by Christian Scientists, amongst whom were Judge Ewing and Mr. Carol Norton, who were fortunately present to hear their brother of the Lecture Board. The presence of these two faithful and effective lecturers at large added greatly to the interest of the occasion.

Mr. McKenzie was introduced by the First Reader of the Mother Church as follows:—

"*Ladies and Gentlemen:*—Every Christian believes that the religion of Christ is the supreme need of the world. All sincere Christian effort lends itself to that idea. Even outside the ranks of technical Christianity there is an ever-increasing trend toward the religion of Christ, for in principle and in essence, this religion embraces all religions. The world is looking more than ever for a practical unification of nations and of individuals. Such unity can be found only in the religion of Christ. This religion is knowledge of God. The whole mission of Jesus was to teach men of God. He proved his unity with the Father in his life, his death, and his resurrection. His one purpose was to show man's unity with God. Unity with God is the only true freedom. Of this freedom our brother who is to address you will tell you. A Christian unity implies a Scientific unity. The Science of Christianity is one because the God of Christianity is One. Therefore there are not Christian sciences, but there is a Christian Science. Jesus was *the* Christian Scientist of the ages, because he was the founder of a Scientific religion. So, in effect, says she who presented Christian Science to this age. Mrs. Eddy distinctly says that Christian Science is as ancient as the Ancient of Days. And so it must be, for its essence is divine Love, and divine Love has always existed.

"Christian Science is not new any more than astronomy was new when it was discovered, or than any other discovery of an old fact is new. We may well say that a discovery of an old fact is a revelation. Those to whom the revelation came were either inherently fit for the reception of the revelation, or they made themselves fit by study and devotion to an idea, a purpose. As with this kind of revelation, so with spiritual revelation. By some means there was a fitness for it or the revelation had not come. The fact that a revelation has come through a given person, carries with it the connate fact of a fitness therefor.

"If Christian Science, then, is a spiritual revelation, it follows that its revelator was the fit instrument thereof: otherwise it had not come through her. The wonderful works thus far accomplished by Christian Science are sufficient evidence to all who are familiar with them that it is a spiritual revelation. To those who are not thus familiar, the revelation is yet to come.

"Those who look upon Christian Science as the invention

Digitized by Google

of a person merely, unwittingly, no doubt, exalt Mrs. Eddy's personality far above any claim she makes for herself. She declares herself to be but an instrument in God's hands for the work which has been accomplished by her. She modestly and meekly says she still sits a willing disciple at the feet of Christ.

"Meantime we who have taken the name of Christian Science, while recognizing in due measure all personal achievement, join with Mrs. Eddy in giving the final glory to the omnipotent and omnipresent God, for to Him it belongs.

"To you who are Christian Scientists the brother who is to address you needs no introduction. To those who are not I will say that he is a member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., under whose auspices he lectures. His subject is 'Christian Science and the Freedom of Man.' It is now my pleasure to introduce the Rev. William P. McKenzie, C.S.B."

We republish from *The Boston Herald* the following extract of the lecture:—

"Men are held as slaves by tradition, custom, and the fear of man, because of the answer of their own hearts given by superstition, vanity, and cowardice. Hence, it is with the character of men that we must work if liberty is to be achieved. The Puritan tried to develop righteousness without joy, and the Cavalier sought for pleasure without righteousness. 'The glorious liberty of the children of God' implies relief from all that hinders normal development in both righteousness and happiness; and to gain it there is not required the strenuous life of contest and warfare whereby hitherto the world has been deluged with blood, but rather that patient labor of self-purification whereby healing may be given to the world.

"Christian Science reveals the way to liberty, in self-government under law. Anarchy means government by selfishness, but the way of law and Science leads to the ultimate fact that for man the only true freedom is in goodness—in release from evil and its modes of deception; whereas license is unhindered action in evil. Apply anarchic doctrines to a class in mathematics and then each indolent scholar could claim for his wrong solution the place and reward to which only right solutions are entitled. But liberty through anarchy is impossible; for the scholar can gain it only as he understands and obeys the science of numbers. Liberty for him is freedom from errors, and fellowship with those who are emancipated through knowledge. In this light we can understand the words of Jesus, 'Ye shall know the truth, and the truth shall make you free.' Men of his day believed that they were controlled by an external force and will which they could not comprehend. But he came to make the truth about God known. By his works of healing he revealed the character of God to be love, and by his teaching he made it clear that God was not incomprehensible force, but Intelligence, or Mind, to be comprehended and loved as the heavenly Father of man. Christian Science brings to us the known God once more, offering proof and teaching that we may gain the freedom which truth always establishes. It liberates men on every plane, and shows its results through every manifestation of life, physical, mental, and moral.

"By healing them, Christian Science ransoms men from the tyranny of superstition and the anarchic misrule of fear. The history of the sufferings to which the sick have been subjected in all lands has some grewsome chapters. The list of compositions, nauseating and unclean, which have been used for medicine, is long indeed. Consider the fears which invade like a conquering army the mind of a sufferer as his advisers give utterance to their forebodings and outline the pictures of disease; yet when they give up hope he knows no way to struggle against the unjust sentence whereby he is condemned to death. A large percentage of the avowed Christian Scientists come from those once sentenced to die, who have been redeemed from anticipation of the fear and darkness of death and given back to usefulness and new life. A gospel which does not include healing is not good news enough, seeing that the need for relief from sickness is so great. How can the term Christian be applied to a doctrine if it fails to include the proof whereupon Jesus builded his teachings and established his ministry as from God?

"By reforming them, Christian Science redeems men from the anarchy of passions and appetites. Men who consciously choose sin are gnawed by the worm of remorse until their love of sin is destroyed. But it is possible, by coming to a right sense of God, to lose the tendency to sin, and this good way is the scientific way. Thousands of slaves to evil habits and low desires have been healed through treatment, or through reading the Christian Science text-book by Mrs. Eddy, 'Science and Health with Key to the Scriptures.' They have been redeemed from the misrule of appetite and brought to understand the government and beneficent action of divine law, which manifests God as Love, healing and saving man.

"By renewing the mind men are redeemed from the anarchy of false logic and baseless tradition. It was a saying of Frederick the Great that, from the time of Constantine to the date of the Reformation, the whole world seemed to have been insane. There were ten million victims of religious persecution. Something of the insanity of the Middle Ages remains in the terror-inspiring doctrines whereby men even yet are held in fear of God, and in the belief that cruelty is legitimate in dealing with men. Release from the fear of eternal punishment through the true witness concerning God that is borne by Christian Science has frequently brought immediate release from suffering of body and has restored the insane. When thought was transformed by the truth, the healing came, even as when Christ Jesus bore witness to his and our God and Father, and the sick responded to the truth and became well.

"The sorrowful tradition from the past, when men were governed by imagination, fear, and superstition, rather than by Science, is the theory of God as the infinite image and likeness of human personality, and, therefore, changeable, vindictive, merciless to enemies, and capable of jealousy and favoritism. When the mind is renewed it is seen that, as 'God is light, and in Him is no darkness at all,' so God is Love and in Him is nothing loveless or unlovely at all. Christian Science sets forth man's right to be in harmony with the true beauty of reason, and so redeems him from credulity, frees his mind from that which is illogical, and his heart from any fear of an unloving God or an unjust heavenly Father.

"Christianity should reveal life to man—the potency of ever-abiding good and the joy of love upspringing like a never-failing fountain of water. The church of Christ is the body in which the mind of Christ acts, governing all the members, as intelligence controls the body and produces unified effort. From the true church of Christ should emanate love that saves men from error, and satisfies their deep longing for good. It should be a living force in the world, fulfilling the beneficent offices which men seek to fulfil by their thousands of benevolent societies. But how shall this be until men are individually free by knowing the truth and obeying its present impulse. The doctors and teachers of Jesus' day were letter-wise in regard to the traditions of the past, but with him was the present light and wisdom of the Spirit. They could shut the sick out from human intercourse, and condemn, injure, and punish the sinful; but Jesus could make the sick well and release the sinful from motives for sin, and so from sin and its consequences; and this healing and redemption is the life-force of Christianity which may have its resurrection in every heart, through Christian Science to-day.

"It may legitimately be asked, How may healing, reforma-

Digitized by Google

tion and renewing of the mind be wrought out? The solution to the problem of life is found when freedom is gained through self-government by divine Principle, manifest in health, righteousness, and kindness.

"Obedience to the convention of time, the science of numbers, the principle of beauty, serves to illustrate how obedience can be rendered to that universal Principle for the present life of man, 'that same Mind which was also in Christ Jesus.' He distinctly indicated what the power was whereby his work of redeeming was done when he said, 'The Father that dwelleth in me, He doeth the works.' He evidently meant that his healing work revealed a divine Principle, and did not infer personal causation. A teacher correcting a mathematical error does not claim to be the potency, but only to reveal the truth which is the potency. So Jesus Christ continually declared that he was revealing the Father, and bearing testimony to that power which sent him; and to this power Christian Science is to-day bearing witness, by proving the healing efficacy of divine Love.

"Common theological teaching represents man as governed from without; Christian Science teaches how he is to be governed by divine Principle within. A visiting prince from Germany wondered at the good behavior of crowds in this land, and noticed that they were self-controlled. In many lands external control by the military is necessary; but such control is needless when men are self-governed by a law of right. Self-government in Science requires recognition of one God, one Principle or divine Mind, and is that control by divine Mind which establishes good in character and unselfish love in conduct.

"When half a century is gone, and men look back to this time, it will be deemed a thing incredible that the Discoverer of Christian Science, Mary Baker Eddy, the Founder of an emancipation movement not merely for a nation, but for all minds in the world—that this benefactor of man should ever have met with misrepresentation. Like other prophets of liberty to man, she had to struggle alone with the perplexities of the untried way. Loving retirement, she had to face publicity. A modest and gentle woman, she had to face the rudeness of ungoverned and ignorant men. But by gentleness she has conquered ill will; by blessing enemies she has changed them to friends, and by praying for those who would like to despitefully use and persecute her, she has preserved her sense of God's nearness and love. This sense of the abiding presence of divine Principle, and her achieved self-government by God, make her a wise friend to the race and revelator of the way of peace for man through Science. Indeed, if to be servant of all is to be greatest of all, this greatness of loving service is hers, for the ministry is not as the transient usefulness of a political chief, not as the momentary benefit of a partial reform, not like an invention superseded in a day, but it is the ministry of Truth to abide with men forever."

Among the Churches.

The Work in Cripple Creek, Col.

I am reminded by one of our church members who lives in Nova Scotia, that it has been a long time since she has seen any word in the *Sentinel* from Cripple Creek. It seems strange that we are unready to give when we are so thankful for the receiving, for we do appreciate those faithful workers at headquarters who are ceaselessly laboring to send us such helpful words through those ever-welcome friends the *Journal, Sentinel,* and *Quarterly*. And just at this time when our ever-faithful, loving, tireless Leader has given us this new revision of "Science and Health with Key to the Scriptures" to make clearer and brighter this heavenward way, we are filled with earnest longings to express our loving appreciation; and how better can we do it, than to be more earnest in our endeavors, more wide-awake, obedient, according to "Miscellaneous Writings," p. 117: "Never absent from your post, never off guard, never ill-humored, never unready to work for God,"—being "faithful over a few things,"—the few things given *us* to do?

The coming and going of the ordinary mining camp makes us feel at times that our growth numerically is slow; but this teaches us to look to God more, and certainly this is a helpful lesson. Our membership at organization in July, 1896, was 14; admitted to membership, 52; dismissed, 15; making our present membership, 51.

The first money given for our building fund was in February, 1899. We purchased a most desirable lot, and completed the reading room, or front of the church proper, and have been holding our services there since October, 1900. We have completed the stone foundation for the auditorium at a total expense of over five thousand dollars, all paid, and we hope to enclose the whole this year.

If mortal mind had been listened to we should never have attempted any church building; but truly, if God be for us, who or what can be against us? Our church completed will cost over ten thousand dollars. We feel that we have proven that God can "furnish a table in the wilderness," and in Cripple Creek. Our expenses are quite large each month, but are promptly met. We have a very happy Sabbath School of about forty members in six classes. They contributed one hundred dollars to the building fund. We have many good workers.

At our Wednesday evening meeting, March 5, the following testimonies were given. One lady had overcome her intense fear of burns. On coming into Science she threw away all medicines except one for burns. One day her little girl scalded her arm very badly; she made the demonstration, destroyed the fear, then threw away the medicine, and was free.

A healer had been called to a patient suffering intense pain. She had been told by the doctors that there was no help for her without an operation. The first treatment stopped the pain, and the next day she walked to the healer's house, and in a few days was entirely well.

Another lady told of a case of healing after the third stroke of paralysis.

A gentleman said he had the grip five years before, and was left an invalid. He was under different doctors' care all the time for five years, with no relief. Becoming tired of this he decided to try Christian Science. After reading Science and Health through once, he forgot to swear, also forgot to call for his beer. Although many said one could not be healed by reading the book, he knew to the contrary by experience. He was a traveling man, and had seen happy results from little seed sown as he went about. He had several men under him, and the change in their lives had been marvelous; not one drank, only two or three smoked, and not one used profane language.

Another gentleman had been thrown from a horse, there was no one near, and he was unconscious for an hour. He finally became semi-conscious; could form no idea where he was or what had happened; but he did have a clear conception of his relation to God, and was soon restored and able to go on his way.

A case of heart trouble was healed in one treatment. The patient said he felt as though his old heart had been taken out and a new one put in.

Another told of the transformation of a neighbor who had, through Christian Science, given up his belief in a literal hell; and of one who had never known God until she came into Christian Science. Another was very thankful for the spiritual light Christian Science had thrown upon the Bible.

The healing of two cases of chronic sick headache was related.

Digitized by Google

A lady had been told by the doctors that she could never walk. Science had dispelled that illusion, and brought love into her heart, where hatred once reigned.

One told of a case of extreme deafness which was cured in one treatment.

We know that as a church we are learning daily more of this Love lesson, and that our one desire is to be more loving, obedient, and whole-souled in this blessed work.

JOSEPHINE T. MOORE, Cripple Creek, Col.

Progress at Joplin, Mo.

In August, 1899, First Church of Christ, Scientist, of Joplin, Mo., numbered seventeen members with an average attendance of about twelve. In February of the present year, we began holding services in our new audience room, with a membership of eighty, and an average attendance of about one hundred and ten; and it is with fervent thankfulness we can say that we have been blessed in all ways.

The need of a larger audience room was pressing, when the lease of the present one was offered, and to be secured must be accepted at once. In this quite an outlay was involved, as the room would have to be remodeled and furnished. Our disbursements having been large during the past year, we had no funds on hand; but we have a source of supply that never yet has failed us, and we accepted the lease. Again the supply sufficed, we were able to make all needed improvements in the room and buy the desired furniture. Our church is in arrears for nothing whatever, and an encouraging balance remains in the treasury. Thankful as we are for these signs of strength and growth, we are more grateful still for the spiritual power and unity which our church evinces.

It is with deepest love and thankfulness that we send this little message to our sister churches. Our hearts are full of gratitude to the Publishing Committee and the lecturers in the Field, who, by their earnest endeavor have made so much possible to us. To the dear Mother in Israel, through whose self-immolation and pure desires this great peace and rest has come to earth's tired children, we feel a thankfulness beyond the power of words.

EDITH C. O'NEILL, *Clerk pro tem.*

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

I am displeased with the company of friends
To whom my bad qualities appear to be good;
They fancy my faults are virtues and perfection;
My thorns they believe to be rose and jessamine.
Say! where is the bold and quick enemy
To make me aware of my defects?

SAADI, A.D., 1190–1291.

From Our Contributors.

No Little Things.

BY MARY BARLING STREET.

THERE are no little things; the slightest word,
Unkind and thoughtless, whispered, scarcely heard,
Has in its way a mighty current stirred,
And as it passes loud and louder rings.
Oh friends! believe, there are no little things.

There are no useless things; what seems most weak
Perhaps the stronger voice will have to speak,
And what is humble-hearted, pure, and meek
Sometimes most helpfulness and comfort brings—
Proves to the world there are no little things.

In Bethlehem's manger lay a little one
Whose baby brow was crowned as with the sun;
Follow his steps, and do as he has done,
And you will find what life, what joy it brings.
His Love is full of great and glorious things.

The Knowledge of God.

BY A. S.

ONE of the great destructions, of the many made by Science and Health, is the destruction of the lean and hungry doubt that hung about my footsteps on my way to knowledge of the reality and immanence of God. In the old intellectual or rational thought (if one may so call it) a knowledge of God was based by most writers on evidence; inferences from nature in general, from the ethical nature of man, etc., which led up to a high probability at best. There was always the lurking doubt "perhaps," "perhaps;" and if a man would not face the "perhaps," then it was blind belief covered over with the hoary sophistries of the Egyptian priestcraft about "belief on authority." With Science and Health properly understood, however, God witnesses Himself to the consciousness by His immediate presence, more real, more definite, and more unmistakable than the presence of your dearest friend. How natural and simple this is.

If you desired your friend to know that you were near him you would not send dumb messengers who could only make signs to describe your appearance, your clothes, etc., so that your friend might infer that you were somewhere near, but you would go to him and talk with him and he would see you and no longer be left to inference, in which there was doubt, would now know you *in propria persona*. Yet the world all along has been giving God credit for less wisdom than the ordinary man in the street. And the certainty of this Divine Reality is from no mere disordered imagination, hazy and difficult to perceive, as some of the visions of the mystics, following fasting and agony, but natural and clear like the sunlight which streams into your window as the morning breaks through the night.

To deny personal sense therefore, to reject all sense of limitation to the power of the Divine to manifest himself to all, in any manner, and under all so-called material impossibilities, is to me the basic message of Science and Health; for once properly understood, God is the destruction of all disease, poverty, and unhappiness; and better than all, He is the destruction of that old miserable material consciousness that even when to material sense all was normal, perfect bodily health, all material wants supplied, friends in abundance and ambitions realized, still, in spite of all, held misery as its dearest friend. And why? We now know why. It was because it was itself misery; for belief in matter, howsoever glossed over, is the heir of misery and the Father of despair. This was a hard lesson to learn

Digitized by Google

because there came the insidious ignorance of the mortal mind to say, "Well, matter is not all bad, it is simply its misuse that is wrong, and it can be an instrument for good and happiness if properly regarded." I tried to adapt this to the teaching of Science and Health. It seems to be the natural outlet of the folly of the passing mortal mind to try to add to the Truth. Of course I received a fool's wages for, matter adopted, discord immediately followed, then the mists and cloudiness of mind and the unending contradictions and absurdities of human metaphysics and physical science, and I felt "Chaos is come again." A little further reading of Science and Health, a radical stand on the Truth "that matter is a false concept of mortal mind," and that to-day is the Truth perfect without the aid of matter as through all eternity, and immediately the clouds and mists vanished, the discords were no more, and the reality of the only real enfolded my life.

I found also that the only way was to rely in all ways and at all times for everything and every thought on the knowledge gained through Science and Health, and that there was no need to look for a "lodge in some vast wilderness" wherein to meditate on this sweet Truth; but that the very best thing that could happen was to be pinned down to material limitations until in sheer despair one turned like a cornered fugitive and gave them battle, with the understanding of the reality of the good and unreality and triviality of the evil. Then the foes would go from day to day, destroyed, not feared and fled from, until in a short time, instead of having a lodge in the wilderness, one would have a house in the City of God.

We rejoice in the knowledge of the ever-living God who is all-powerful for good and answers every cry, not leaving men hollow-eyed from watching and unanswered prayers, but "Closer is He than breathing; nearer than hands and feet," as Tennyson saw, always answering the demands of the good even before they are expressed by us. The Truth revealed in Science and Health needs no commentary, no foot notes, no impossible emendations of erudite ignorance, but rather the child-like following, the cry to "attain ever attain" until "material beliefs," in the language of that practical book, "are seen to be a bald imposition."

Climbing the Mountain.

BY CAROLINE E. MILLER.

In the summer of 1900 I was one of a party to make the ascent of Mt. Hood. There was much in that experience to remind me of our work in gaining an understanding of Christian Science.

First of all it was necessary for us to have a guide, one in whom we had confidence. We did not try to go in a path of our own finding, but knew that if we would reach the top of the mountain, we must follow in the path of our guide. In that path was safety, but if we wandered and tried to climb our own way, we were in danger of being lost.

We were required to keep in line, and the poorest climbers were told that the closer they kept to the guide, the more easily they would make the ascent.

Each carried an alpenstock, the staff for the journey, also a cup from which to drink, and a little bag containing food for the day.

When we reached the most difficult places we could take only one step at a time, as the guide prepared the way. In these places, we were joined together by each holding to a strong rope, so that if one should slip the others could save him. Here also we were required to climb in absolute silence, that the vibrations of sound from our voices might not dislodge the loose masses of rock and snow, hanging on the face of the cliff around which we were journeying.

Some of the party seemed strong for the climb, were bright, cheery, and helpful. Others seemed to require help much of the time, but all, by yielding perfect obedience to the guide, reached the top of the mountain.

In our work as Christian Scientists, we rejoice that in our Leader, Mary Baker G. Eddy, we have a guide in whom we can place perfect confidence, and we know that if we would gain an understanding of Christian Science, it must be in the way which she is pointing out for us, not wandering away and trying to find another course.

As the staff for our journey, and food and drink along the way, we have the Bible, with all its precious promises, and "Science and Health with Key to the Scriptures" which throws new light on the Scriptures, and shows us that these promises are for us here and now.

We come to the difficult places, too, where we can take only one step at a time—do the duty of the hour—and wait in patience for the way to be prepared for the next one.

As the rope which bound us together was a protection to each, so the organizations in Christian Science are a safeguard to every Christian Scientist within them.

There are times when, as Scientists, we are required to work along in silence, always trusting the guide and knowing that while some seem strong and others seem to require much help, that all, by keeping in line and being obedient, will surely attain the height which we are striving to reach.

"A Little Child."

BY LILIAN C. FALES.

Such a sweet lesson came to me a few days ago, that I send it, hoping it may help some one as I was helped.

A littie child, hardly more than a baby, had strayed into our street, and though many people endeavored to ascertain his name, and some neighbors tried to take him in, he would not come; but stood soberly with both little feet firmly planted in the muddy water. One of our family had been among those who tried to befriend him; so my first thought on hearing of it was, I am sorry, but we have done our part.

Soon, however, came the thought, "Nothing is lost, surely not one of God's little ones; and Love must be able to make this child come to us."

A second attempt was made, with the result that we soon had a rather sober and frightened baby, who could not or would not tell his name or speak to us. I am sure we both had a very loving thought for him, and after what seemed quite a while he suddenly looked up with sweet eyes, and laughed, with some baby remark that had nothing to do with lost boys.

After that he might have been our own, and though he did not tell his name, things came about in such a way that in little more than two hours his father came for him.

Thinking it over, and being very glad for my second thought, these thoughts came to me:—

There was only Love here, and yet what a sober, frightened baby for so long.

Is not that the way we come to our Father's house, almost expecting evil, frightened, and lost, believing in sin, sickness, and death, and thinking that God cannot or will not heal our peculiar trouble; yet all the time, in that very hour, Love is there, and in Love we are safe?

Is not there a lesson, too, in the way that dear baby was perfectly contented when he felt the love around him, even though without his friends, or in the least knowing how or why these things were so?

Is not God to be trusted in just this way when we seem lost? Is not one day or one hour enough to see that God is with us?

It was a very simple lesson, but all who have seen a little frightened face changed to a happy one will know what it meant.

Digitized by Google

A few days ago I heard the lecture, "Christian Science: the Gospel of Love." It seemed fairly radiant with Truth and Love; and I feel that I must express a little of my gratitude to God; that, though very young in Science, through it I can see so much of good, and may prove that "all things work together for good to them that love God."

I wish also to thank our dear Leader for her love and patience, and all who in any way are working for our precious Cause.

A Word from a Truth-seeker.

BY M. B. SMILEY.

PERHAPS a few thoughts from a Truth-seeker may find a welcome and a place in the *Sentinel*. A kind neighbor furnished me with a few copies of *The Christian Science Journal* and *Sentinel*, which I have been reading; and though not wholly converted to the Christian Science faith, I am free to admit that I find many very beautiful ideas in the writings which I can heartily accept, and nothing which could possibly make the believer or the world worse.

As well as my mind can grasp the Christian Science idea of God,—Good,—it is beautiful beyond comparison. It is Life, Truth, Love, and as time and eternity are passing, may we all be drawing nearer and getting a better understanding of what God is, and growing more like the great pattern which we are to imitate.

I have been reading Mrs. Kate Bangs' article in the *Sentinel* of January 2, and am surprised that members of any of the Christian churches should object to any of your articles of faith except that where all sin and sorrow shall be done away (God's purpose and Jesus' mission fulfilled). This is not orthodoxy, but to me it is a very beautiful thought; we are saved, not in our sins but from them. As I understand Mrs. Eddy's teaching, all God's children —sometime, somewhere—will be pure and happy, and if I can judge from what I see around me, I think the true Christian Scientist has made very good progress in the path that will end in the realm of purity and its resultant happy condition. If the tree is known by its fruit, I think Christian Science will have a very prominent place in the Master's vineyard.

I am an old man and not a member of any church, but I do observe carefully the effect of the different religious ideas on the dealings, daily walk, and lives of their votaries; and I know that the Christian Scientists will not suffer by comparison with any. I see them living pure, honest lives with hearts open to do good, trying to live above sin and sickness, and more than this, they live up to their profession in sickness as well as in health. They trust God to heal their diseases and feel that He is all the help needed, able and willing to care for them.

What do we Obey?

BY KATRINE KRUDOP.

IT is not so much a question of disobedience—as to *what are we obedient*. Every moment of our life we are obedient to some thought and impulse. And to whatever we yield our allegiance—*obedience*—from that source will our wages come, according to the coin of that realm. If fear, anger, duplicity, sin, the wages are after its kind, —sickness, dulness, stupidity, death. Obedience to Truth pays in courage, insight, hope, faith, understanding, that shows us but one realm and that *real*, the seeking of whose coin adds all other things unto us "for your heavenly Father knoweth that ye have need of all these things."

If you would advance in true holiness, you must aim steadily at perfection in little things.—ABBE GUILLORE.

Testimonies of Healing.

When Christian Science was presented to me two years ago it found me a frail old man, whose locks showed the frosts of seventy-six winters.

I was full of infirmities, such as deafness and very poor sight, so much so that I was obliged to give up my occupation as a builder. I had a rupture of forty years' standing, and a confirmed tobacco habit of forty years, also many other infirmities such as old persons are subject to. I was a complete wreck on the rocks of mortal mind and a confirmed infidel.

In this condition I commenced reading Science and Health by Mary B. G. Eddy. I had read but a few pages before I found the difference between the mortal and the immortal mind. Next I found what and where God was. What and where heaven (harmony) was, and what I was myself, and also my relation to my Creator.

At this time I found that many of my lesser infirmities began to disappear. This taught me that I had begun to perceive spiritually and I resolved to see more. I continued reading the book, and by the time I had finished it the second time all my infirmities had disappeared except my deafness; my hearing, though improved, is not so good as I could wish; but I have full faith that I will yet be completely healed, because Love and Truth always do a perfect work. I am to-day as elastic and vigorous as I was when the silver threads first appeared among my locks.

Previous to my healing, I was unable to read except coarse print, with the aid of very strong glasses and a perfect light. I now read with ease and comfort hour after hour, without glasses.

Though very thankful for these blessings, above and beyond them all is the joy that has come to me through the spiritual uplifting that the knowledge of Christian Science teachings has produced in my thought and daily walk.

I have lived more in the last two years than I did in the whole seventy-six years in the old thought, for I have found God and heaven (harmony) right here and now. "Behold, now is the day of salvation."

Like the prodigal son I returned to my Father's house. I have found how life, love, truth, and happiness can be attained this side of the gates of the so-called death of the mortal body.

The demonstrations to which I have referred were all made before I had ever attended any Christian Science service, my only guides being the Bible and Science and Health.

W. J. MCCAUSEY, Grand Rapids, Mich.

In July, 1898, I met with a very painful accident. It was said that I would be crippled for life, as the muscles had been torn from the knee. I recovered sufficiently to be able to push myself about the house in a chair, and nearly five months later Christian Science found me in that crippled condition, mentally rebellious and doubting.

A friend said to me, "I know two Christian Science women in town, and they say you can be cured. They will come to see you if you wish them to." The word Christian and the promise to cure me appealed to me, and I told her I would like to see them. I had proved the fruitlessness of material remedies.

The healer came first on Friday evening, and that night I had a very strange dream. I was walking a very pleasant road with friends who were dear, the sunshine all about me; then the road began to wind in and out among the trees, and they cast shadows around me. I crossed several streams, and at last was climbing a rough, dark mountain side—alone. Then I was brought to a sudden stop. In front of me, closing down on me, was the earth; back of me was darkness, and no discernible way, ahead,—not room enough to go on. I could see the light through a

Digitized by Google

little opening in the ground, and just outside, a woman. I said to her, "Help me out." She replied, "I can't; but will give you a shovel and you can dig out." Then I heard the earth and rocks falling, just as I awoke.

My waking thought was, that the dream was strange, because I had thought there was nothing for me to do, only trust my case with the healer. That afternoon a neighbor brought me a copy of "Science and Health with Key to the Scriptures." I took the book gladly, little thinking I had the shovel in my hand with which to clear my way (remove error), nor did I know or have any thought of how deeply I was buried in error.

My healing was gradual, for which I am thankful now, though then I felt very impatient. I had been taking treatment about two weeks before I was conscious of a marked difference. The pain had been met and mastered, and in mastering it I knew I had found the Truth and that I must help clear my own way. In a month's time I was walking without the aid of crutches and was rejoicing in the knowledge that I had found God an ever-present help and very near. The Bible became a new book and a very dear one to me.

My little girl had weak lungs and hereditary stomach trouble, and was very delicate until these troubles were overcome in Science. Now she is strong and hearty, and has faith in God to supply her every need.

I feel that I have a great deal to be thankful for. First, for our beloved Leader and Teacher's efforts for the good of all. Second, for the many earnest, consecrated lives of those devoted to the healing, teaching, and lecturing. Third, for those in front, those walking by us, and the ones behind, all trying to live this Truth themselves and willing to help others.

I am daily using my shovel, and am conscious of the rock and earth (error, old beliefs, and wrong teachings) falling away from me. Knowing that Christian Science is the Truth, and that it can heal and save, I am trying to live it in Spirit and Truth.

ROSE BRANUM WILSON, Joplin, Mo.

I wish to express my heartfelt gratitude for the great help and encouragement afforded me by the *Journal* and *Sentinel*. I have read the *Journal* for several years and the *Sentinel* since it first appeared, and I feel I should try to say something that may be a help to others in return.

Christian Science has been no joke to me, and in struggling to leave the old way for the new, self has been crucified. Now, after four or five years of pegging on, studying, and demonstrating all I can (often seeming to fail), I think I am getting to the place where I can say I am glad of the past suffering, which to me was inevitable in order to reach a more wholesome mental state.

I am truly grateful to my kind healer who labored for me during weeks, seeming to meet with small return, also to help received after a severe bicycle accident, all traces of which disappeared within the week.

In my struggles with error, when it seems long in yielding to Truth, I remind myself that Mrs. Eddy says, "Love is impartial and universal in its adaptation and bestowals" (Science and Health with Key to the Scriptures, p. 13), and that what Love has done before for mortals Love will and can do again, provided I do my work honestly.

A case of neuralgia yielded instantaneously the other day while riding through the scrub. We had a long day in the hot sun at a rapid pace over bad ground, but instant denial of the power of mortal mind law and the blessed knowledge of the One Law and action saved the sufferer, who was able to continue the ride in perfect comfort, though for a week or more she had suffered from neuralgia over the eyes at a certain hour daily, and was dreading the re-appearance of it at a moment when nerve and skill were required to steer safely and rapidly over the rough places.

A case of severe mental depression has also yielded to perfect contentment and happiness though the circumstances are not altered, showing the truth of the statement that "happiness is spiritual, born of Truth and Love" (Science and Health, p. 57). I am grateful to Mrs. Eddy and all true Scientists.—C. B. P., Buenos Ayres, S. A.

I have received much help, comfort, and encouragement from reading the many good testimonials given in our *Sentinel*, and perhaps my contribution may meet the need of some one who is looking for physical and other benefits through Christian Science.

In the winter of 1899–1900, I was attacked by an old claim of grip, and as I had been investigating Science previous to this attack, I thought it would be a good opportunity to prove what it would do in my case.

I went to the office of a practitioner in a collapsed condition, and after one present treatment I arose from a lounge on which I had been reclining, feeling like a new man. Several weeks after that, the error seemed to assert itself again, but this time it was handled by absent treatment and dispelled.

In the summer of 1900, one evening, after a very arduous day's work, I was very hungry and ate plentifully of most of what was on the dinner-table, including some cucumbers, and also drank some ice-cold milk. The belief was that I had a weak stomach, and that these things produced cholera morbus. The fear seized me and that night I was almost bent double with cramps, also had cold perspiration, although the thermometer stood about eighty-five. I tried to meet the trouble myself, but in the morning I concluded I had better have help. With one absent treatment I was restored and attended the Wednesday evening meeting that night and gave my testimonial.

For these and many other physical benefits received through Christian Science, I am grateful indeed, but more so for the great moral and spiritual enlightenment which I have received. I am also grateful for the privilege of class instruction from one of Mrs. Eddy's loyal students and that I am enabled to be a helper in spreading the gospel of this great Truth that heals.—G. A. D., Baltimore, Md.

I was raised from what was supposed to be my death-bed ten years ago, after all medical aid had failed. When a Christian Scientist was called to my bedside I told her I wished to be left alone to die. She said, "With God there is no death." What these words meant to me, only eternity can tell, and the only way for me to show my gratitude is to prove it in my life's practice in overcoming everything that does not belong to God.

I asked my healer why it was that my own prayers were not heard. She said, "You asked and had not, because you asked amiss." I said, "Oh, how could that be possible when I prayed so earnestly and sometimes all night?" She replied, "You asked God to serve you. In Christian Science we learn how to serve Him." I knew at once that this was the Truth, and it awakened in me a desire to know how to pray. I have learned since that it is indeed the righteous prayer that heals the sick, and causes us to be as little children willing to be led, and with a constant desire of the heart asking daily for God to show us the way.

I thank God daily for the wonderful Truth that is unfolding to us through that blessed book, "Science and Health with Key to the Scriptures." God bless our dear Mother, and all her dear, loyal students who are working so faithfully to make the way clearer for all those following.—MRS. AMANDA E. LAY, Burlington, Ia.

God is all to thee: if thou be hungry, He is bread; if thirsty, He is water; if in darkness, He is light; if naked, He is a robe of immortality.—SAINT AUGUSTINE.

Digitized by Google

Religious Items.

Frank Sprague in *The Standard* says:—

"Two things we must admit as necessary to the Christian life, these are grace and knowledge. The first constitutes that favor of God which is essential to the new life, and includes also our exercise of that grace which is Christlike. The second indicates such an acquaintance with the purpose and will of God as saves from blindness and ignorance. Grace and knowledge, however, are something more than simple acquisitions to be secured, labeled, and laid away in our life upon some professional shelf for reference as trophies we have won. They are in the realm of the spiritual what they are in the relations of social and intellectual life. Grace and knowledge become valuable as they become the means for increase in grace and knowledge. One can no more have grace without its growing than he can have knowledge by ceasing to learn. Growth in the spiritual is as essential to the spiritual as growth in the physical is essential to a full-grown life.

"The grace of God and a knowledge of God, when first acquired, are germinal, and require the law of growth to perfect them. If you ask how growth is to be secured, we answer, the same here as in nature; conditions must be favorable. To grow in knowledge, one must live in the atmosphere of truth. To grow in grace, we must breathe in the pure, sweet air of heavenly grace. There must also be adequate rootage in sincerity and love, grounded in desire, in order to secure desirable fruitage."

The doing of good in the service of others is not only the fulfilment of the Christian's duty, but also a means of grace to the one thus employed. It is a well-known law that increase is by use, and it holds good in the upbuilding of Christian character. If the saintly life comes by saintly nurture and prayer, it comes not less by the saintly practice. When one of the anxious Evangelicals asked the great and good Wilberforce, "how it was with his soul," and the latter replied that he had been so busy that day in his work for the slave that he had forgotten he had a soul, he was on a not less sure path to the heavenly life than was the inquisitor who was so anxious as to the salvation of the philanthropist and statesman. It will do even to forget our souls for a little if we forget them in their high offices. The practice of the virtues is the pathway to the exalted life and character. It is the presence of noble ideas in the mind and soul, and their daily bearing and practice, that keeps the fair principles of Christianity conspicuous and makes them impressive. These are the appointed paths by which heaven moves into our earth, and lives become sweet and noble.—*The Universalist Leader.*

One cannot juggle with the name of Jesus. Do we not often call upon this holy name with idle mind and careless heart? Do we not sometimes preach, pray, and work in the name of Jesus without any good result? The blind do not see. The deaf do not hear. The dumb do not sing. Unclean spirits are not cast out. The dead sleep on. Why is it so? It is not because the name of Jesus has lost its power, but because the life of Jesus is not in those who preach and pray. It is a great sin to make promises and raise expectations in the name of Jesus which are not to be fulfilled. When we go out to fight against the evils of this world with the name of Jesus inscribed on our banners, and return from the fight defeated, with our banners trailing in the dust, we are verily guilty of a great sin. Take the name of Jesus with you, but take it in your heart and not in your mouth alone.

The Christian Advocate.

If religion is revised, if Christianity ever marches at the head of human aspiration again, if the Gospel of Jesus is to dominate the spiritual life of humanity, it will not be under the leadership of those who join churches from "convenience," or stay in them for comfort, or are loyal to them as "machines." Nor will it be under the leadership of those churches or institutions which encourage this kind of hypocrisy. The fate of the Gospel on earth, the future of its influence, rests with those, however few in numbers they may be, who have found a form of worship and a system of religious thought into which they may pour without reservation and without fear of consequences, the free, full, enthusiastic expression of their genuine convictions and their honest thoughts. Without such union and identity of one's private and one's public opinions and acts, there can be no power and no leadership in the Christian life.

The Universalist Leader.

The Church Standard, edited by Rev. Dr. John Fulton, as able a canonist and journalist as the Protestant Episcopal Church has, in a discussion of the historic episcopate, now says, after alluding to the new light from the Didache of the Twelve Apostles and the investigations of Hatch and Harnack: "No one now maintains the unfounded theory that our Lord himself, during the great forty days, gave minute instructions to the eleven apostles concerning the order and organization which he desired them to adopt for the government of the church. No one now pretends that the apostles themselves, designedly or even consciously, devised a ministerial constitution for the government of a universal church throughout all ages."

The Congregationalist and Christian World.

There is a kind of Bible study which causes more doubt than it cures. Some men bring to the study of the Bible an intellectual pride and self-sufficiency which effectually closes the door against spiritual impressions. If we are to come to a knowledge of God we must do so through the heart. The channel of the intellect does not reach God. Science cannot reveal God. Who by searching can find out the Almighty to perfection?

The Greek and Hebrew lexicon and grammar are good for those who know how to use them. But they will not give much help in the effort to find out God. They will not open the spiritual element in the word of God. This Gospel is a great fruit-bearing tree. Taste the fruit and see whether it be good.—*The Christian Advocate.*

Rev. John Clarence Lee, D.D., says in *The Universalist Leader:* "There can be no question that the busy world needs the benefit that comes from religious meditation. Spiritual truth requires spiritual discernment. It comes to view after long and patient thinking. Much of the obscurity that clouds many minds in regard to religious questions would pass away if time were taken for thought, under the guidance of the Holy Spirit. The inner light is revealed to those who seek it. Out of the deep well of thought come clear convictions of truth, to sustain and refresh the soul. The world is passing through a great transition in its religious ideas. It is peculiarly a time for earnest thinking, in order that the continuity of true faith may abide unbroken."

Hammers and fossils and scalpels and retorts and microscopes and telescopes—all these may yield a rich harvest of result when applied to material things, but there is no reason to conclude that they will necessarily lead to the discovery of an Infinite mind and heart. Just here is the stumbling-point of modern science as regards religious truth. With coarse, dull, heavy physical instruments it is trying to find a spiritual and inscrutable God. Science, if it is ignorant of God, is so, not because He does not exist, not because it is impossible for man to know Him, but because its methods and instruments are not adapted to discover an infinite, spiritual being.

DR. J. R. THOMPSON.

Socrates charged the Athenians with "doing business with the gods." "You give them," said he, "sacrifices; and then by your prayers you demand recompense. You expect to get an equivalent for what you give. Trading with Jove is not piety." But there is a stage lower than that taken by the Grecians. It is when a Christian gives nothing to God, but asks for everything,—assuming the position of a professional beggar. This subject of teasing God needs much more careful analysis and study. We doubt if prayer be not often an expression of selfishness; and we are confident that we have heard such prayers offered in Christian churches.—*The Christian Register.*

Bishop Lawrence has said: "We are told that it is conditions that tell in the career of a man. Let all the inhabitants of Boston abandon the city and it would crumble to ruins. Let the buildings of the city be destroyed by fire, and they would soon be rebuilt. Spiritual power overcomes conditions, and a true man may be superior to his surroundings. If life is to be lived, let it be lived handsomely. There are many whose religion is dull, dry, and conventional. It seems to me that the one power needed to unconventionalize men is religion. The age needs strength, grace, and romance, and the church is necessary for all these things."

Dr. Herrick Johnson says in *The Ram's Horn:* "Christianity is nothing if not a spirit. The Kingdom of God is nowhere to us, if not within us. We shall enter on no heaven that is not already begun in our hearts. We shall find no hell that does not have its prophecy in the experiences and possibilities of our inner life. The mind is its own place, and can itself be hell. The most awful depths of anguish are the agonies of a wrathful conscience. Where is nothing; what is everything. Form is nothing; life is everything. Place is nothing; character is everything."

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," "Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa.*

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly and only on one side of the paper.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair, brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The executive council of the American Federation of Labor had a conference with President Roosevelt last week in which the President stated that he was in sympathy with the demands of labor as to an eight hour bill and a prison labor bill. The President said there had been a great deal of misunderstanding as to the order issued by him relating to Government employes taking part in efforts to secure an increase of pay. The order, he explained, did not refer to the effort of organizations as bodies.

Secretary Long requests the committee on naval affairs to provide for the construction of three battleships, two armoured cruisers, and several smaller ships. He disapproves of building warships in Government yards, and gives as his reason that the cost would be about twenty-five per cent greater, and that it would have a tendency to build up political organizations at the navy yards.

The Senate passed the Chinese exclusion bill last week. Senator Hoar of Massachusetts, who is opposed to Chinese exclusion, except by express treaty arrangement between the United States and China, and is personally opposed to any exclusion on the ground of race or color, was the only Senator who voted against the bill.

The Senate has agreed upon an amendment to the post-office appropriation bill which provides for the appropriation of $500,000 for the transmission of mail by pneumatic tubes and other similar devices. The tubes will be set in operation July 1, in New York, Brooklyn, Boston, and Philadelphia.

Secretary Root is in Cuba arranging for the transfer of the islands to the Cuban Government. The secretary is inclined to favor complete evacuation by the army if it is practicable. President Roosevelt is anxious that this shall be accomplished.

Arguments in the case of the State of Washington *v.* the Northern Securities Company and the Northern Pacific and Great Northern Railroads, involving the merger of the two roads, were heard last week by the United States Supreme Court.

The House of Representatives passed the Cuban reciprocity bill last week. The bill provides for a twenty per cent reduction in the duty on all imports from Cuba.

Thomas Estrada Palma, president-elect of Cuba, sailed from New York for Cuba, April 16.

Foreign.

The Vanderbilt-Webb syndicate has made application for power to construct, maintain, and operate a subway under the St. Lawrence between the South Shore and Montreal. According to the plans the subway will be the largest in the world. It will have two tubes, each twenty-seven feet wide and twenty-one feet high. That for cars, passengers and freight will be double tracked. The second will be for teams and pedestrians, having drives and footways. The cost is estimated at from $4,000,000 to $6,000,000.

A bill recently introduced for the same interests for permission to construct a bridge over the St. Lawrence did not get through, and this has caused a change of plans to the subway scheme.

Count René de Rochambeau and Count Gaston Sahune de Lafayette have accepted invitations to be present at the inauguration of the Rochambeau monument at Washington, May 24. The monument was a gift to the United States from France.

Great Britain has accepted Germany's proposition for an international conference to regulate the use of wireless telegraphy. The United States has not responded, but the officials at Berlin confidently expect a favorable answer.

Owing to the scarcity of provisions on the Atlantic coast of Nicaragua, President Zelaya has issued a decree providing for the admission, free of duty, in that section of the country, of flour, wheat, beans, rice, and lard.

April 15 a matinee performance was given in Paris in aid of the fund for a memorial to President McKinley at Canton, O. The affair was a grand artistic and financial success. The fund now exceeds $10,000.

President Loubet has signed the decree providing for the participation of France at the St. Louis Exposition. M. Michel Lagrave has been appointed commissioner-general of the French section.

By a vote of 84 to 64, the Chamber of Representatives rejected the proposal to revise the Belgian constitution so as to provide for universal suffrage.

It is said that Spain will be among the first of the foreign governments to recognize and enter into diplomatic relations with the new Cuban government.

Industrial and Commercial.

The executive council of the American Federation of Labor which met in Washington last week, adopted an address to all the wage workers of America, from which the following is an extract:—

"We recommend to all organized workers that at their public celebrations on May 1, July 4, and September 1, 1902, they concentrate their attention to a discussion of the abolition of the injunctions in labor disputes, and the passage of resolutions, demanding at the hands of Congress and the Legislatures of their respective States, the enactment of laws conforming to that purpose."

J. Pierpont Morgan has succeeded in bringing together in close working agreement seven of the biggest British and American trans-atlantic lines, while two of the great German lines have agreed to co-operate. The lines in the new combination are the White Star, Dominion, Leyland, Atlantic Transport, American (International and Navigation Company), Cunard Steamship Company, and Red Star. The German lines are the Hamburg-American and the North German Lloyd.

"The World's Sugar Production and Consumption, 1800–1900," is the title of a monograph just issued by the Treasury Bureau of Statistics. The world's sugar production has grown from 1,150,000 tons in 1840 to 8,800,000 tons in 1900. The consumption of sugar in the United States was twenty-two pounds per capita in 1850 and sixty-eight pounds per capita in 1901. In 1840 the per cent of sugar manufactured from beets was 4.35 per cent, and in 1900 it was 67.71 per cent.

The United States Steel corporation will build a steel tube plant at Lorain, O. It will cost ten million dollars and employ eight thousand men.

General.

A great movement to the gold camps at Cape Nome is expected during the spring and early summer. Twenty steamships and sailing vessels have been announced for service in Nome trade during the season. These vessels have an aggregate freight carrying capacity of forty thousand tons, and will furnish accommodations for seven thousand passengers. Shipping men are confident that every available passage will be taken long before steamers commence to sail.

The Southern Negro Conference will meet in Galveston July 1–5. The first session of the conference was held about a year ago at Jackson, Miss. About six hundred delegates will be present, among them some of the most prominent negroes of the Southern States. The object of the organization is to create a better feeling between the races and to foster any move for the uplifting of the race.

Dr. Nicholas Murray Butler was installed as president of Columbia University, Saturday, April 19. Many prominent educators and other notables were present, among whom were President Roosevelt, Governor Odell of New York, and Hon. Seth M. Low, mayor of Greater New York, former president of Columbia College. Addresses were made by President Eliot of Harvard and President Hadley of Yale.

Miss Ellen M. Stone, the ransomed missionary, made her first public address, Tuesday evening, April 15, in her old Church, the First Congregational Church, Chelsea, Mass. She talked to her hearers in a simple manner, speaking as easily as to a roomful of friends.

Chester B. Jordan, Governor of New Hampshire, has issued a proclamation appointing Saturday, April 26, 1902, Arbor Day. The State Grange has offered prizes to the subordinate granges setting out the most trees on that day.

Dr. William R. Brooks, director of Smith Observatory and professor of astronomy at Hobart College, has discovered a new comet in the constellation Pegasus. This is the twenty-third comet Dr. Brooks has discovered.

After a stormy voyage the German imperial yacht Meteor III. arrived at Southampton April 17. She left New York April 1 and was expected to make the trip in sixteen days.

An Indiana glass manufacturer claims to have discovered the method of making malleable glass, which has long been considered one of the lost arts.

A new divorce law in Rhode Island requires a residence of two years in the State before application for divorce can lawfully be made.

The first book on short-hand writing was published by John Willis in 1602.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

A Communication.

To the Editor of *The Standard.*

Sir:—My attention has just been called to a question in your issue of February 22, which was asked by F. W. Higgins, after listening to an address on Christian Science, recently delivered in your city. Inasmuch as the question and its answer are calculated to bring out the essential difference between Christian Science and various beliefs which are sometimes confounded with it, I beg leave to add some words to the excellent editorial reply which appeared in your paper.

The question was, in substance, whether any one using mental means for healing would lose the power to heal, if he were given a medical education. In this connection the phrase was used "with unbounded faith in his own powers." This phrase cannot be applied to Christian Scientists, for they know that they themselves do not heal, but that the healing comes from the realization of God's omnipotence over all evil, whether appearing as sin or sickness.

So, too, the following sentence from your reply does not exactly describe the attitude of Christian Scientists: "Natural and peculiar qualifications enable some persons to accomplish results in this direction—often in ignorance of what the power is which they exert."

Christian Scientists do not profess to have any peculiar qualifications for the healing work which are not equally accessible to all sincere searchers. It is one of the blessed results of Christian Science that it reveals the glorious possibilities in all men, and thus breaks down any Pharisaism, or artificial sense of better-than-thou, which tries to separate them. The Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, says on this point:—

"Having one God, one Mind, establishes the brotherhood of man, and fulfils the divine laws: 'Thou shalt have no other gods before Me,' and 'Love thy neighbor as thyself.' When these divine commands are understood they unfold the principle of brotherhood, wherein one mind is not at war with another, but all have one Mind, one Soul, one God, one intelligent Source, in accordance with the Scriptural command: 'Let this Mind be in you, which was also in Christ Jesus.' Man and his Maker are correlated in divine Science, and consciousness is cognizant only of the things of God" (Rev. Ed. p. 276).

Moreover, Christian Scientists are very certain of the power which works through them, and they know that it is benign and blessed, bearing healing on its wings, for St. John tells us that "God is Love."

If I may be permitted, then, to answer the questioner in a general way, I should say that so far as Christian Scientists are concerned, they do not practise medicine for themselves or for others, but they are careful not to interfere with those who desire to acquire a medical education, or to receive medical assistance. As far as I am acquainted with Christian Scientists, they have not found a knowledge of medicine any help in realizing that God is omnipotent. Mrs. Eddy once replied, when asked:—

"Do you sometimes find it advisable to use medicine to assist in producing a cure, when it is difficult to start the patient's recovery?"

"You only weaken your power to heal through Mind, by any compromise with matter; which is virtually acknowledging that under difficulties the former is not equal to the latter. He that resorts to physics, seeks what is below instead of above the standard of metaphysics; showing his ignorance of the meaning of the term and of Christian Science" (Miscellaneous Writings, p. 53).

I hope that this brief explanation will be of service to those who are trying, like the questioner in your issue of February 22, to reach a satisfactory understanding of the subject of mental healing.

Yours truly,
W. D. McCRACKAN.
In the *Cortland* (N. Y.) *Standard.*

Christian Science Discussion.

Editor of *The Union and Advertiser.*

Little good comes from a discussion of any question unless it is carried on in the spirit of a fair search for truth, rather than a controversial desire to carry a point. As this latter seemed to be the tone of a criticism signed "John Henry," published in your columns a couple of weeks since, it seemed wise to make no reply. A number of requests that have come from different sources, however, indicate the need of a further word.

Christian Science is attracting, or rather compelling, the world's attention to-day, not by what it is saying, but by what it is doing. The critic who assumes that this movement is simply the progress of a theory, and that this theory is founded on an argument or on some special interpretation of Scripture only, has taken a position that renders him manifestly incompetent to contribute anything having any real bearing on the question. Christian Science is presenting these phenomena to-day: the sick are healed, the sinner is reformed and regenerated, the sorrowing are comforted. These works stand as irrefutable witnesses. They are facts that cannot be brushed aside by mere assertion.

Let some of our critics, speaking from the point of view of outsiders and disbelievers, bear testimony. In an article published in *Everybody's Magazine* recently, Prof. T. J. Hudson, the psychologist, says that Christian Scientists "have healed the sick by hundreds of thousands" and "have poured the balm of religious consolation into many a stricken heart."

Prof. T. G. Ladd of Yale University, in a published article, asks: "Do they not perform cures?" and then answers himself: "Undoubtedly they do."

The Rev. W. H. P. Faunce, D.D., now president of Brown University, a noted Baptist divine, in March, 1898, made this public statement: "It is absolutely certain that hundreds of men and women in this country have received in the healing of their diseases a demonstration that there is a fundamental truth in Christian Science."

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

Speaking before the Episcopal congress in Providence in November, 1900, the Rev. E. Winchester Donald, successor to Phillips Brooks as rector of Trinity Church in Boston, said: "Is Christian Science leading men out of the darkness of unbelief into the light of God? Yes, it is, it is; there can be no doubt about that. You and I know too many Christian Scientists whose lives are blameless, to doubt that."

Some three years since in an article in the *Christian Inquirer*, a Baptist organ, the well-known Baptist clergyman, the Rev. Edwin T. Hiscock, D.D., of Brooklyn, said:—

"Circumstances have made it convenient for me to examine their teaching with some care, and I have also compared it with the lives of the few personally known to me. As a result of this examination I do not hesitate to say, that if they are fair specimens of the whole body, the modern church would be elevated to a much higher plane of Christian living than it now occupies if it were to follow them.

"Now I am unable to believe all that they profess to believe, but I cannot say they have no religion, that they are not Christians, that they have only a system of stupid blundering, because I am profoundly convinced that the great need of all our churches is more of the religion I have seen in the lives of the Christian Scientists whom I know."

Such testimony from equally prominent sources, from those who are not Christian Scientists might be given *ad libitum*. Such testimony can be gathered from hundreds of humbler people right here in Rochester.

Now if Christian Science is accomplishing such a work, the question will press itself, How is the work done? And the answer is this: that God is understood to be the only Cause. Now Christian Science denies the reality of matter because it does not appear how anything of matter or evil can be in the effect if it is not in the cause, and it is conceded that if the conditions of matter or evil exist in God, He is not infinite. Hence the Christian Scientist's position, as stated by Mrs. Eddy in Science and Health, "All is infinite Mind and its infinite manifestation, for God is All in all." This statement does not stand or fall by argument. It is the central truth involved in all the work of Christian Science. It is a thought that can be so explained as to be grasped by any one, and by any one can be demonstrated in positive results.

It is evident that such an understanding of spiritual things must be spiritual in its nature. To think to attain this understanding through processes of reasoning along ordinary lines, would be as absurd as to think to understand music by the cold process of intellectual analysis. A real knowledge of music can come only as musical feeling and perception is awakened and is guided into a true expression. So an understanding of spiritual things must be dependent on an awakening of the spiritual sense, and the unfolding and expression of this spiritual sense in the lines of spiritual law. This spiritual sense is the very heart of all Christian experience, of which Christian Scientists have and claim no monopoly. Christian Science has brought a broader vision of the resources that are open to us in this world of spiritual resources, and an understanding of the law by which they can be demonstrated. What Christian Science does for its followers is to lead the awakened consciousness beyond faith in our spiritual resources into an understanding of those resources. This awakened spiritual sense is an insight, an intuition of spiritual good. It is neither vague nor mysterious, and can only seem so to the thought that insists on explaining all things according to the physical senses. These are the things which Paul says can be known only as they are "spiritually discerned." These are the things which Jesus saw might be "hidden from the wise and prudent" and "revealed unto babes." These are the things that stand revealed in a system that is to-day a demonstrable science, and is manifested in a movement that is entirely the outcome of a practical experience of its blessings; and that cannot be swept away by either argument or invective.

Yours truly,

ARTHUR R. VOSBURGH.

In *The Union and Advertiser*, Rochester, N. Y.

A Word in Favor of Christian Science.

WE clip the following testimony for Christian Science from the editorial columns of *The Evening Wisconsin*.

Plunkett Greene, the baritone engaged for the second Pfister recital, is said to be a warm advocate of Christian Science. A story is told relating to his last visit to Milwaukee and his sympathy for the cause of the Science. It was at a supper given in his honor following his last concert here, at which a number of leading German gentlemen and their wives were present. Some one mentioned the absence of the wife of a prominent guest, upon which the latter said she had gone to a Christian Science meeting and expressed much wonder that the madam should have sacrificed a delightful evening so foolishly. The remarks of the guest created considerable merriment, when suddenly Mr. Greene said, with much warmth: "I never hear Christian Science mentioned that I do not feel called upon to speak in its defence. I was cured of a bad throat trouble through the treatment of Christian Science alone, and I want to say that my sympathies are entirely with the lady who is absent this evening—she did well to go to the meeting." The husband of the absent lady was completely squelched. "I never felt smaller than at that moment," he said afterward, "and I have never made fun of my wife's faith in the Science since. I liked Mr. Greene for his loyalty, and felt ashamed that I had dared to speak lightly of that which I did not at all understand."

Notes from a Busy Man's Desk.

WHEN we find ourselves wishing for more money for "the good we could do with it," it is well to ask ourselves if we are doing all the good we can with what we have.

A sick business needs the same mental regimen as a sick body. Neither can permanently manifest harmony, if fear, greed, envy, or deceit is allowed to control.

To avoid disappointment there is one recipe that never fails. It is to make God's way our way in whatever we do or think, and to learn to say "Thy will be done" before the fact as well as afterwards.

There is no more virtue in poverty, than there is sin in plenty. The danger we must guard against lies in giving undue power to either condition. It is not money, but the love of it that is "the root of all evil."

A few minutes of silent talk with God in the whirl of a busy hour is like a mountain breeze on a stifling day. It invigorates physically and elevates mentally. It corrects wrong motives, clears our vision, and turns our thoughts into right channels.

Every honest transaction of business, no matter how simple or complex it may be, can be made to work for the glory of God if the desire for personal gain or advancement is subordinated to the willingness to "Trust in the Lord with all thine heart; and lean not unto thine own understanding."

To submit promptly and cheerfully to God's laws is the scientist's privilege as well as duty, and brings freedom and blessings untold. Submission that is reluctant or rebellious brings bondage and misery. It is like the imprisoned bird that beats its breast against the bars of its cage when the open door is just behind it.

Testimonies from Leavenworth, Kan.

AT a Wednesday evening meeting of recent date, in Leavenworth, Kan., the following testimonies were related:

The first speaker was a gentleman who told how winter cholera, which had been so prevalent in his locality, had been overcome.

A lady testified to being healed of rheumatism, from which she had been a great sufferer. She was also enabled to lay aside her glasses, and is able to do the finest needle-work, often working at night.

A gentleman told of a visit to an aged aunt, eighty-four years old. In former years, he had known her as an invalid, and was much surprised to find her in the best of health. In relating to him the cause of her cure, she said, "Christian Science has done it all."

The leader of the meeting, then told of a case of healing of typhoid fever, where the patient had been given up by the physician. The wife decided to have Christian Science treatment for her husband. There were no Scientists there, and they lived nine miles from a telegraph office; but she had her father take a message, and before he returned, the patient began to improve and in a few days was entirely well.

A lady told of going to a neighbor's for a basket of peaches. She said that all the morning she had a marked realization of Love, and as she entered the neighbor's yard she noticed a large dog lying by the walk, but thought nothing of it. As she approached him, he manifested anger and she stood still. He then jumped and caught the basket. Without moving, she realized God's ever-presence. Again the dog jumped and tore the basket. Still without fear, she continued to know the Truth, when, all at once the dog walked quietly off and lay down without doing her any harm. She said that never for one moment did she doubt the protecting power of Love.

A lady told of a man being healed by reading Science and Health. Having tried all the remedies he knew, his wife went to a Scientist, asked for some literature, and made inquiries as to what Christian Science was. The Scientist loaned her a copy of Science and Health, and told her to have her husband read it. He seemed to improve at once. In a short time he was able to be at his work, and in such an improved condition that the men at the office spoke of the change.

A gentleman said that a few days previous he was suffering, and although he worked as best he could in his office, he did not get relief, and had decided to go to a Scientist for help as soon as he left the desk. In a few minutes, one of the men came to him, and asked for a remedy for some ailment. The gentleman began telling him of Christian Science, and ended his talk by saying that he knew of no medicine but divine Mind. When he ceased talking, he realized his pain was all gone, and he was perfectly well and harmonious.

An engineer said that for several years he had been troubled with a fear of breakdowns on his engine. He said he would do all he could to make his trips safely and on time, yet every little while he would meet with some breakage which would cause delay and send him before the officials for investigation. These conditions were extremely annoying to him and he was under a constant dread. One day having an accident, and knowing he must appear before his superior with an explanation, and having a great fear of his displeasure and the sharp reprimand which usually followed one of these visits, he asked for treatment that this fear might be destroyed. The result was he went to the office perfectly calm, was pleasantly received by the official, and his explanation was kindly listened to and received without reprimand. Since then (four years ago) he has had no more trouble with his engine.

These testimonies were readily given and the meeting was a very interesting and profitable one to all present.—J. K. G.

Carpets.

A PAPER carpet, the first of its kind on record, was invented in 1806 by Francis Guy. It quickly proved a financial failure, and was intended for "summer use," to quote one of the inventor's advertisements which appeared at the time. Francis Guy was quite well known in his day as the proprietor of two large hotels, one in Philadelphia and the other in Baltimore.

The natives of Brazil long ago adorned their homes with feather mats, which they hung on the walls of their dwellings and occasionally placed before the doors of their houses, though they invariably placed a common mat by the side of the handsome one for use. These mats and hangings were made from the plumage of tropical birds, and the brilliant natural hues produced a handsome effect. The birds were caught in nets and slaughtered by the hundred, after which the feathers were dried in the sun.

A retired ship's captain is the proud possessor of a curious rug, made of seven ostrich skins, with the feathers entire, sewed together with catcut strings. The owner procured this valuable article on one of his voyages to Patagonia. The color effect is quite unique, and the ignorant native who put the skins together must have been a natural artist. It would be next to impossible to place a valuation on this rug, which is probably the only one of its kind in existence.

In 1888 a company was formed in New York for the purpose of manufacturing matting from rushes which grow wild in Georgetown County, S. C.

During the past year there have been several attempts to produce floor coverings from unusual materials. Late in the summer of 1900 an inventor by the name of Rosewig obtained the right to cut all the cat-tail plants in several counties of the State of New Jersey, where they grow in immense quantities. It was Mr. Rosewig's plan to weave the stems of the plants into a sort of matting.

One of the most curious fibres that has been used for weaving carpets is peat. A man bearing the euphonious title of Zschorner, of Vienna, after much experimenting, succeeded in producing some novel results. At the exhibition in Vienna one of the buildings was completely furnished from top to bottom with the products of peat. The carpets on the floors, the curtains at the windows, and the coverings on the walls were all made of this peculiar substance. Mr. Zschorner's experiments tend to prove that, while the properties of weeds and grasses that constitute peat are somewhat altered by decomposition, the fibre still remains intact, and possesses great toughness and durability. Peat is also, to a certain extent, elastic, non-combustible, and a non-conductor of heat.

Peat has also been made use of in Ireland in very much the same manner as described above, and with some degree of success.

A new process of producing floor coverings from wood was employed first in 1885. The first step was to reduce the wood to a flour, then to the consistence of pulp, and then to press it between rollers which forced out all moisture and removed all lumps from it. This was then mixed with oil and rolled into sheets, which were then ornamented by printing designs upon the surface. A coat of shellac or varnish was added to give a smooth surface, impervious to water.

In 1887 there was a firm that made mats 30x24 inches in size from fine wooden strips or shavings woven together with a stout warp. These mats were finished in a bright-colored border and presented quite an attractive appearance. They were shown at some of the stores and a number of them were sold, but the idea was soon abandoned as impractical.

In the fall of 1884 a novelty was introduced in brussels and extra super ingrain carpeting by weaving gold and silver tinsel into the fabric. This gave the carpet a bright

Digitized by Google

and rich appearance, but the tinsel was soon found to wear off. For the time being, however, these glistening carpets sold for about ten cents a yard more than the ordinary patterns.

A gentleman who makes a practice of dreaming queer things to print in the papers had a particularly joyful nightmare one balmy evening last summer. He wrote an article on how to make "beautiful, novel, artistic, and inexpensive rugs" out of lampwicks.

About eight years ago there appeared on the scene, or rather on the floors of some of the large buildings of New York and Philadelphia, a new kind of mat made from leather pieces from shoe factories. These very unique mats consisted of little disks of old leather cut into various shapes and fastened together with long wire staples.

Waste cork from the big factories that turn out the various products of this material is utilized in the making of linoleum.

An innovation in the construction of floors was invented by one Otto Kraner of Chemnitz, Germany, in 1896. It was a special preparation of paper pulp, which the inventor called papyrolith. It was prepared as a dry powder, which was to be mixed with water. When this mixture was spread on a foundation of stone, cement, or wood, it dried in a short time, after which it was planed and polished down to a smooth surface.

Six or seven years ago a party of men in Lowell, Mass., conducted some experiments with a process for making metallic yarns for use in weaving carpets. The aim of this invention was to increase the durability of the fabric, not ornamentation, as the tinsel effect already mentioned. The yarn was coated with metallic solution of aluminum, borax, alum, litharge, and wax, mixed with white lead. These produced a metallic coating that was fairly flexible and soft, while its appearance much resembled pure aluminum.

Undoubtedly the star innovation in carpet floor covering was that made by a manufacturer who was originally a maker of straw goods in Boston, when he tried to introduce in 1892 a fabric which he termed "Oriental carpetings." This fabric was woven to all intents and purposes after the manner of ordinary carpeting, but instead of the warp being of wool or jute fibre it was made of twisted tissue paper. The opposition which this fabric met in the beginning was exceedingly strong and persistent, but after years of laborious and expensive experimenting the inventor was able to produce a fibre from which he has since successfully made rugs and carpetings which were durable, sanitary, and very sightly.

Twines, mats, rugs, carpet-lining and other products are made from the wild grasses that grow so abundantly on the marshes of that state. This grass is treated by patent process and is utilized now in making many articles of furniture. Mats and matting made of grass twine are becoming more and more popular as summer furnishings, as they are light, cool, and durable, and have a pleasant "woody" odor. Furniture made from this material is much used on piazzas. At the Paris fair the American building was decorated with the grass-twine products.

Besides the uses already mentioned, this substance is used as a wall covering, and it would be quite possible to furnish an entire room with the articles now manufactured from grass fibre.

At one time, a little over ten years ago, it was proposed to use cow's hair in making carpets. The process was described by its enthusiastic promoters as a cheap one, and the product as better than the ordinary woolen carpets. It was claimed that the new industry would prove a great benefit to cattle raisers by providing a new market for the hair.

Woven rugs in imitation of the natural sheepskin mats have been made. A suitable, partly spun yarn was woven into a backing in such a manner as to leave loops which when cut gave the desired length and appearance. After the wool used in these rugs had been dyed, it was curled a little in order to impart to it the wavy appearance of the natural fleece.

In 1883 a California woman produced a carpeting from rags and wool shreds that was said to possess a resemblance to the Axminster fabric. It was never woven commercially.

A few years ago there was some discussion as to whether it were possible to make a carpet from the pith of the cornstalk. It never went any further than discussion, however.

Years ago in the southern states there was quite a trade done in paper oilcloth. This material very nearly corresponded to the samples which the big oilcloth manufacturers get out yearly, and was printed on a very heavy quality of tough paper from the same blocks that the genuine cloth was printed from. The principal demand for paper oilcloth was naturally from the poorest element, as the price was much lower than the genuine article.

American Carpet and Upholstery Journal.

Electric Generators for Canadian Power Co.

THE Canadian Niagara Power Company, it is announced by the *Electrical World and Engineer*, has just awarded to the General Electric Company contracts for three immense units of ten thousand horse-power each. This contract marks the beginning of the development of plans for the utilization of the immense power on the Canadian side of Niagara. The new machines will be the largest electric generators ever built. These gigantic generators are but the first units in a plant which will probably reach an aggregate of two hundred thousand horse-power or more within a very few years. The power-house is to be situated on the flat land adjacent to the Dufferin Islands near the river, less than a quarter of a mile above the Horseshoe Falls. A wheel-pit is being excavated in the rock, which will be connected by a tunnel tail-race to the gorge below the falls. The dynamos will be placed at the surface level as before, being connected to the turbines by long, vertical shafts, which extend to the bottom of the pit, where the turbines will be situated.

The machines are also remarkable on account of the high speed at which they will operate,—two hundred and fifty revolutions per minute, the same as that now used with the smaller five thousand horse-power generators on the American side. A design has been provided which affords the best electrical conditions and a very compact form. The external diameter of these machines will be not quite eighteen feet, and the total weight of each about four hundred thousand pounds. They will return ninety-eight per cent of the shaft horse-power in the form of current, and the inherent regulation will be such that the voltage variations will not exceed eight per cent, with maximum possible changes of load. Two very important elements, are that the machines will have internal revolving fields, while the older smaller machines have external fields; and that they will not depend on transformers for raising the pressure of the current from twenty-two hundred to about five times that figure for the line, but will generate themselves current at the tremendous potential of twelve thousand volts, thus dispensing entirely with expensive transforming apparatus.

The adoption of these enormous units in place of the large five thousand horse-power generators previously the standard at Niagara Falls, is the result of recommendations made by the General Electric Company's engineers, and effects an immense saving in the cost of this power development. It reduces the wheel-pit in excavation and the size of the power-house to about one half, causes a very large reduction in the cost of electrical apparatus per horse-power, and sacrifices absolutely nothing in reliability or efficiency.

This is the third large contract for generators at Niagara Falls which has been awarded to the General Electric Com-

Digitized by Google

pany during the past twelve months, including six of the earlier type of five thousand horse-power machines for the second American power-house; five of five thousand horse-power of a new type for the same plant, and now these huge ten thousand horse-power generators for the Canadian side. — *Boston Transcript.*

Don't Talk Hard Times.

I never knew a man to be successful who was always talking about business being bad. Never allow yourself to dwell on the dark side of anything. You should refuse to talk about depressed markets or hard times. Learn to talk up, not down. Many business men become chronic grumblers and fault-finders. Times are always hard with them. Other men get into a pessimistic rut, and never see brightness or success in anything. It is impossible for such people to prosper. Success is a delicate plant, and requires encouragement and sunshine.

Regard yourself as superior to the evils which surround you. Learn to dominate your environment, to rise above depressing influences. Look for the bright side of things, not the dark and gloomy side.

The world likes sunny, hopeful, buoyant characters; it shuns lugubrious prophets, who see only failure and disaster everywhere. The hopeful, cheerful men and women, who see success and longevity in their callings, are the ones who are sought after. It is as natural to try to avoid disagreeable, unpleasant people, as it is to try to escape from the clouds and shadows into the sunlight.—*Success.*

The famous battles of this world
Resound in loudest tone,
But hardest battles to be fought
Each man must fight alone.

RICHARD T. HOBSON.

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

Applications for membership with the Mother Church It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

The German Supplement.

The lecture on "Christian Science: the Christianity of Christ," by Rev. Irving C. Tomlinson, which was recently issued as a supplement to the *Sentinel,* is printed in German *only.* The object of its publication was to meet, in part at least, the long-felt need of authorized Christian Science literature in the German language. There have been many calls for such literature and doubtless most of our readers know of some German friend to whom the supplement would be very acceptable.

When ordering literature it will be well to bear in mind that this is the only German supplement, and is not printed in English. For list and price of supplements see page 551.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist, in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50 six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Notice.

THE churches of the Christian Science denomination will hold religious services, on days set apart by our government for religious worship,—such as Thanksgiving, and Fast. MARY BAKER G. EDDY.

Pleasant View, Concord, N. H., April 16, 1902.

Spead v. Tomlinson.

IN the *Sentinel* of October 24, 1901, we published a somewhat lengthy account of the case of Jennie A. Spead *v.* Irving C. Tomlinson, which was tried at the October term of the Superior Court at Concord, N. H., the trial resulting in a disagreement of the jury.

The plaintiff pushed the case to trial again, and it was reached and the trial entered upon Monday, April 14, before Judge Peaslee and a jury.

Briefly stated, the suit was brought by Mrs. Spead to recover damages for alleged malpractice in the treatment of a case of appendicitis. Following was the plea and statement of Mr. Tomlinson, the defendant:—

Merrimack ss. Superior Court.
October Term, 1901.

Jennie A. Spead *v.* Irving C. Tomlinson.
Defendant's plea and brief statement.

The defendant says that he is not guilty as the plaintiff has alleged and of this he puts himself on trial.

By his attorneys, STREETER & HOLLIS.

And the plaintiff doth the like.

The defendant makes the following brief statement of defense under the above issue:—

(1) The defendant has never held himself out to the plaintiff or to the public as a physician or surgeon, or advertised as such, or used the title of M.D. or Dr., or any title which has shown or tended to show that he is a practitioner of any of the branches of medicine, and with reference to the treatment of sickness and disease the defendant says that he teaches and practises according to the faith of the Christian religion as revealed in the Holy Scriptures, as exemplified and practised by Christ Jesus.

(2) That as a Christian Scientist, the defendant, in the treatment of sickness and disease, relies solely upon the power of God, sought by prayer, to effect relief; that in seeking to obtain relief from sickness or disease for those who may desire his help, he uses spiritual means alone and makes no use of drugs, instruments or material means of any kind whatsoever; that he has never represented or claimed to the plaintiff or the public that he has any knowledge of the science or methods of medicine or surgery as those terms are generally used and understood, or that he has ever attempted to make use of those methods in seeking to bring relief to those in sickness or disease.

(3) That the defendant since January, 1899, has been and now is First Reader or pastor of First Church of Christ, Scientist, in Concord, N. H.; and that the foregoing method of treating sickness and disease by the power of God alone, through prayer, is a part of the religious belief and practice of the defendant and other Christian Scientists, and is the only method taught at the religious services of said church or elsewhere as used by the defendant or other members of the denomination; and that the plaintiff for some months prior to November 15, 1899, was a regular attendant upon such religious services, and was fully informed as to the foregoing religious teachings and practice of the defendant in the treatment of sickness and disease as a part of his religious faith.

(4) That the plaintiff, with full knowledge of all the foregoing facts, voluntarily sought the aid of the defendant, and the defendant thereupon, at her request, treated her solely in accordance with the foregoing method taught by the religion of Christian Science and practised by the defendant as a follower of that religion.

(5) That upon the foregoing statement the plaintiff has no legal cause of action against the defendant.

By his attorneys,
STREETER & HOLLIS.

The trial continued all day Monday and part of Tuesday. At the conclusion of the plaintiff's evidence, Mr. Streeter, of counsel for the defendant, moved that the court direct a verdict for the defendant Tomlinson. After argument the court sustained Mr. Streeter's motion, the case was taken from the jury, and the jury discharged.

Thus this case ended in a victory for Mr. Tomlinson and the cause he represented; a just and righteous judgment.

In connection with this case we feel constrained to republish the Hon. Frank S. Streeter's able and convincing argument upon the subject of healing through prayer delivered to the jury at the former trial of the case. The following is in part what Mr. Streeter is reported to have said:—

"I understand that there are but two questions which are to claim the attention of the jury. First, whether this defendant was negligent; and second, whether he made any false representations knowingly.

"Why was this suit brought? Was it brought for damages, or for making an attack on a religion which to-day has one million followers?

"The attack is an attack upon the theory that disease may be cured by prayer.

"From the time of Mrs. Spead's first attack until Mr. Tomlinson's services were first requested, she was under the general care of Dr. McMurphy. This term of treatment amounts to six hundred and sixty days.

"Mr. Tomlinson treated her four days. She paid him one dollar, and now wants this jury to award her damages in the sum of six thousand dollars, because a Christian minister for four days sent up his prayers to Almighty God on her behalf.

"I ask you with all candor where did she get her hurt during the four days that Mr. Tomlinson was treating her? She tells you she was so sick on one night that she could not reach a glass of water that was near her bedside, and yet that her mother left her alone that night. Do you believe, gentlemen, that a mother would leave a daughter that way?

"If Mrs. Spead was in that deplorable condition, why is it that her mother and sister have not been here to testify to that fact? Why are they silent here, and why were nearly twenty-four hours allowed to elapse between the discharge of Mr. Tomlinson and the call for Dr. Walker?

"The fundamental thing which Mr. Tomlinson taught her was that he relied solely on the power of God, sought by prayer, to effect relief; and that in trying to help those who seek his services he uses spiritual means alone. She was fully informed that he made no pretensions to the knowledge and skill of the ordinary medical practitioner.

"Was this man sincere in his belief? He has stood here, in the face of this court, jury, and public, and endeavored

Digitized by Google

to state his belief. This woman has not dropped a single suggestion that his character as a Christian gentleman is not above reproach. So far as any evidence that has been offered she stands to day a believer in the absolute sincerity of these people.

"In my belief this woman is no more a factor in this litigation than is the gilded dome of the state house a factor in making our laws. This is an assault on the Christian religion. Mr. Tomlinson may be wrong. I don't know. Do you?

"You will be asked to say that prayer is fraud.

"Didn't she know exactly what kind of thing she was going to get? Was there the slightest delusion on her part or deceit on his?

"Take the proposition which these two counsel say is a lie. Mr. Tomlinson's proposition is that the power of God can cure sickness through prayer. I don't envy the condition of mind of men who stand up and say it is a lie. That the power of God can't heal. I don't envy these gentlemen the honor of standing before the courts of New Hampshire and a jury and charging that when a Christian man says the power of God can be invoked to cure disease, he is not right; that such a man is a fraud, a humbug, a cheat, a charlatan, and a quack, just because he claims that prayers will cure. They are welcome to the glory they might get out of the establishment of such a statement. We might as well meet the issue now as any time, and the people who support these churches might as well have the case decided as to whether a man who believes in prayer is a hypocrite; who believes that prayer will heal is a fool.

"Before guilt can be placed on this man you must find that he knew he was fathering false teachings. What evidence is there of this? Not a syllable, gesture, or inference. Is this man a cheat because he believes that prayer will cure the sick? Then you have got to declare against the Christian ministers who stand in the pulpits in these United States.

"But they say Mr. Tomlinson took money. Do they want to sneer at payment for Christian service? Then they sneer at the Supreme and Superior Courts who engage clergymen to open their sessions with prayer. When President McKinley was stricken down, almost every head in the broad land was bowed in prayer, and are you prepared to say that those who prayed are humbugs?

"I tell you, gentlemen, there is something in me that rebels against an assault of this exercise which I cannot help regarding as sacred. Within recent years we have had our state advertised as a place of abandoned farms; then later we were pictured as decaying fast religiously, our rural religion being held up as most deplorable.

"But one more thing need be added, and that would be to have a jury of New Hampshire citizens say that the man who believes in prayer to God is a cheat, and that the corner-stone of the Christian religion is a fraud."

In connection with the above we publish the following congratulatory message to Mrs. Eddy:—

CONGRATULATORY MESSAGE.

The following message was sent to the Reverend Mary Baker Eddy by the visiting Christian Scientists who were present at the recent unsuccessful attack in the New Hampshire courts upon this Christian denomination:—

Christian Science Hall, Concord, N. H., April 15, 1902.
To the Reverend Mary Baker Eddy.

Our Beloved Mother and Teacher:—Your loving children and students assembled rejoice with you that the distinguished court, through the time-honored laws of your native state, has conceded the constitutional rights of individuals, and maintained the acknowledged dignity of Christian Science by thwarting the unjust attack of its opponents.

We congratulate you that our Cause has, in your esteemed friend, General Frank S. Streeter, the honored president of the New Hampshire Bar Association, so able and conscientious a defender and counselor.

It is our hope and prayer that we may ever be ready to defend, protect, and honor the Cause which your loving sacrifice has established; and we earnestly desire to emulate your excellent example, to be worthy of the divine favor which you have gained, and thus to be found your consistent disciples.

With tenderest sympathy and love, your children and students,

WILLIAM B. JOHNSON, C.S.B.,
ALFRED FARLOW, C.S.D.,
JAMES A. NEAL, C.S.D.,
Committee.
The Daily Patriot.

Among the Churches.

Literature for Malden, Mass., Library.

A copy of "Science and Health with Key to the Scriptures" has been in constant use in the Malden Public Library for two or three years. Soon after the revised edition was issued the following letter was addressed to the librarian:—

Malden, Mass., March 8, 1902.
Librarian Malden Public Library.

Dear Madam:—A revised edition of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, has just been published, with important changes from the edition which is now in use in the Public Library.

If you will place it upon your shelves for the use of patrons of the library, First Church of Christ, Scientist, in Malden, will be glad to donate a copy of this new edition, together with a copy of "Miscellaneous Writings," by the same author.

FIRST CHURCH OF CHRIST, SCIENTIST, IN MALDEN.

The librarian replied that they would be pleased to receive the books and would place them on the shelves properly marked and catalogued, and would do whatever else was necessary to bring them to the attention of the readers. The books were sent and the president returned a grateful acknowledgment for the same.

CHARLES H. GLIDDEN, *Clerk.*

hurch to be Erected at Salem, Ore.

The Second Church of Christ, Scientist, of this city, has taken the initial steps for the erection of a church in Salem. They have for some time been setting aside their regular collections of the first Sunday of each month for a church fund, which has netted them a neat sum. Recently it was decided to purchase the vacant lot just west of the city hall on Chemeketa Street, that being considered the most desirable of several locations offered. The price was eight hundred dollars, and on the following Sunday an announcement was made that at the Wednesday evening meeting an opportunity would be given to make an offering for this purpose. After the usual service on that evening sums were offered by all who were so disposed, and the total amount, with what has since been handed in, covers the amount needed.

It seems to be an unwritten law of Christian Scientists not to go outside their congregations for financial aid, and, never to go in debt for church property, which is certainly commendable. This church has been organized about three years, and has a membership of about forty. They hold regular services Sunday mornings and evenings and on Wednesday evenings, besides maintaining an open reading room every afternoon in the week, all at No. 299 Liberty

Digitized by Google

Street. These services are in accordance with the universal custom of Christian Scientists. A prominent Scientist was interviewed on the subject of their new church, and he said:

"It is not the expectation to build a church right away, but our society had the feeling that a start should be made towards that end, and this purchase of a lot is the result. Again our collections of the first Sunday in the month will be set aside for a church fund, and when the need is fully felt the funds will be forthcoming, and a church will be built. Christian Scientist churches are all independent in their government, and receive no financial aid from the mother organization. They pay as they go, and do not resort to any other methods of raising funds than the voluntary contributions of their congregations. They hold no entertainments, fairs or bazaars, dinners, sociables or suppers for that purpose. Scientists everywhere are building the most artistic churches of the day, and, while it is not expected that Salem will have anything elaborate in this line, it will be ample to meet our needs, and will be a credit to the Capital City."—*The Daily Journal,* Salem, Ore.

Location for Church at Sharon, Pa.

The congregation of First Church of Christ, Scientist, of this place, has purchased a lot on the corner of A Street and South Irvine Avenue, from William McIntyre & Sons for three thousand dollars, on which they expect to erect a church edifice in the near future. No definite plans, however, are under consideration at present.

The Scientists may consider themselves fortunate in securing this property, which is excellently located for the purpose desired, being convenient of access, on the street-car line and close to several of the other churches.

Sharon Daily Telegraph.

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly.* When the change is made in the *Quarterly,* references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

Religion is the best armor in the world, but the worst cloak.—BUNYAN.

The Lectures.

At Guthrie, Okla.

Having learned, a few weeks ago, that Mr. Kimball was to pass through Guthrie on his lecture tour through the south and west, our church unanimously voted to ask him to give us a date. The following Sunday, after service, blank slips of paper were passed through the audience, with the request that each one write the amount he or she desired to give toward the lecture fund. Eighty-two dollars and sixty-five cents was subscribed on that day. Later, other subscriptions were received, making an amount sufficient to defray all expenses and leave about nine dollars in the treasury. All subscriptions and money were given without solicitation.

As a result of this demonstration an intelligent and appreciative audience had the opportunity to hear Mr. Kimball on the evening of April 3 in First Church of Christ, Scientist. Visiting Scientists were present from Stillwater, El Reno, Oklahoma City, Hennessey, Perry, Mulhall, Perkins, Ripley, and Cushing.

The speaker was ably introduced by Hon. A. H. Huston of Guthrie, in part as follows:—

Ladies and Gentlemen:—In all ages, and in all climes, among all sorts and conditions of men, the people of the world have manifested a consciousness that all of life is not contained in the brief span of years which reaches but from the cradle to the grave. And while there have been individual advocates of bare materialism, yet among the masses of the people, be they educated or uneducated, civilized or uncivilized, there has been a general feeling that the great universe of God is not made up of material things alone, but that all around us are unseen worlds which may be discerned only by eyes spiritual. And so our old men dream dreams and our young men see visions—glimpses merely of those worlds which are beyond our human ken. And what of these things with which heaven and earth are teeming? Through all the cycles of the centuries the human mind has been reaching out, searching for knowledge and striving to pierce through the horizon of this material finite world into the boundless realms of the infinite.

Religions have grown up and flourished, as widely different as the poles in their teachings and beliefs, yet all based upon and nurtured by that natural hungering of the human heart for a taste of something of the divine. These teachings, varied as they are, have grown into fixed beliefs among a great many, and naturally teachers of new doctrines and truths in the past have not generally been very well received. In this age and day of the world new discoveries and the application of new principles have crowded upon one another so fast, and have so revolutionized and changed the old order of things, and have all so tended toward the development and the progress and the betterment of mankind in general, that the prejudice against new things has largely given way, and the old spirit of intolerance has been succeeded by a disposition and a desire to see the light and to know the truth.

Of late years, in this our own day and generation, a new doctrine has been promulgated; some have taken to it kindly, some have denounced it severely, and many regard it with indifference. Personally I have neither condemned nor approved it. I do not know enough about it to do either. However, I am willing, and glad of the opportunity, to hear this new doctrine discussed by one of its ablest advocates. We have with us to-night Mr. Edward A. Kimball of Chicago, who is a member of the Christian Science Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, of Boston, and, as a Christian Scientist, he speaks as one with authority. He comes to us with a reputation for sincerity and

direct speaking, and I bespeak for him your good-will and earnest attention.

Ladies and gentlemen, I have the pleasure of introducing Mr. Kimball, who will now address you upon the subject of "The Cause and Scientific Cure of Disease."

Correspondence.

At Spokane, Wash.

On Sunday afternoon, March 16, Hon. William G. Ewing of Chicago, delivered a lecture on "Christian Science: Physician and Redeemer" at the Auditorium Theatre. Long before the appointed hour, the house was filled with a large and representative audience which listened to the lecturer with rapt attention over two hours.

The speaker was introduced by Judge G. W. Kellom, who spoke as follows:—

Ladies and Gentlemen:—I think it would be safe to assume that not even a majority of this audience are avowed believers in, or even students of, Christian Science. It is probably true that the most of us do not even know what Christian Science is or what it claims to be. But the very presence of this large audience of intelligent men and women, under such conditions, is at least an indication that we are willing to listen and to learn, if we can, something which we do not now know.

This world has been gradually learning—and very rapidly during the last fifty years—that it will no longer do for any man, no matter what may be his station or his profession, or his learning or his intelligence, to object without investigation, or to ridicule without argument any statement of fact, or any theory of science, simply because he himself has not yet apprehended such fact or comprehended such theory; that it will no longer do for any of us to refuse to open wide our eyes and if possible enlarge the horizon of our vision beyond our present thought or knowledge, lest we may discover something that might disturb the foundations of what we are now satisfied to think and believe.

This is emphatically an age of investigation, an age of positive, aggressive, and fearless thought and research. There are no longer any fields in any territory, either of physics or metaphysics, of things material or things spiritual, that are closed or ought to be closed against the honest explorer after fact and truth.

And so in this spirit of fair and honest investigation; in the spirit of a willingness to listen and to learn if you can, we welcome the distinguished speaker who is to address us this afternoon.

Of Judge Ewing, personally, I could say little more than you all know. His acknowledged learning as a scholar, his reputation as an able lawyer, and his eminent and protracted service as a judge, entitle him to an attentive and thoughtful hearing of what he has to say upon a subject which must be intrinsically interesting to us all, and to which he has given many years of earnest and careful study.

The widespread reputation of Judge Ewing renders entirely unnecessary any formal words of introduction in presenting him to any American audience. Judge Ewing of Chicago will now address you.—*Correspondence.*

At Manitowoc, Wis.

The North Side Opera House was filled to its capacity last evening (April 4), to listen to the lecture on Christian Science by Judge William G. Ewing of Chicago. The audience was composed of people of all sects and nationalities. They were interested, and the judge held their close attention for two hours. After the hall was filled a delegation of one hundred came in from Sheboygan, but they were cared for. Prominent members were also present from Chilton and Ironwood.

Judge Emil Bænsch introduced the speaker of the evening in the following address:—

Ladies and Gentlemen:—It appears to be a custom among Christian Scientists, in whose ranks we find so many of our friends and neighbors, when their doctrines are expounded from the public rostrum, to have their authorized lecturer introduced by an unbeliever. This custom is a pleasant index to the distinctive American trait of fair play.

To worship God according to the dictates of his own conscience is the guaranteed right of every person. It is written in the constitution. But better still, it is engraved upon the hearts of our people and is so firmly rooted in their character as to have earned the greater credit of making this "the land of the free."

We are fortunate that in our day and civilization we live in an atmosphere of fraternity and liberality such as never before settled upon the world. When the legations were beleaguered in Pekin by the riotous and rebellious Boxers of China, an allied army was sent to the rescue. It was kaleidoscopic in appearance, yet united in action. The natty cap of the French, the Pickelhaube of the German, the tchako of the Italian, the fur-trimmed turban of the Russian, the scarlet of the British, and the blue of the American, became but the insignia of different divisions of the same army. Varying in step, differing in discipline, under separate flags, they marched in unison, for they faced in the same direction. All won the gratitude of the world, for under each uniform there beat the heart of a true and loyal Christian soldier.

It is so in the realm of thought, where activities are ever progressively broadening. Sincerely and gladly do we greet those of every creed and belief, no matter what uniform they wear. If they bring truth, it will be like the rocks, firm and abiding. If there be error, it will be like the foam on the crest of the wave, evanescent and fleeting. Whatever makes for purer, nobler life, whatever tends to happiness and contentment, entitles the believer to a place in the ranks of that grand army whose banner is emblazoned with the inscription: The fatherhood of God, the brotherhood of man.

Highly privileged are we to-night to have with us a sage and seer of one of the constituent divisions of that army. Compeer and compatriot of Lincoln, rounding out an eminent career at the bar with a seat upon the bench, then entering upon a labor of love, traveling the wide world over speaking for the betterment and uplifting of mankind, he justly deserves these reverend titles. I now have the honor of introducing to you the speaker of the evening, Judge William G. Ewing of Chicago.

The Manitowoc (Wis.) *News.*

At Pueblo, Col.

The Grand Opera House was comfortably filled last night (April 7), to hear Edward A. Kimball, C.S.D., of Chicago, in his lecture on Christian Science. Mr. Kimball is a very pleasing and forceful speaker, and appealed to the Bible, reason, logic, and demonstrated facts to prove his statements.

His tribute to Mrs. Eddy was beautiful and touching, and bespoke the high esteem in which she is held by the Scientists all over the world.

The lecture was well received, and for two hours the speaker was listened to with unabated interest. Many invalids were present and hung upon the speaker's words of promise as a new road to health.

The local church, under whose auspices the lecture was given, has a large membership, many of whom are numbered among Pueblo's best citizens.

Pueblo (Col.) *Chieftain.*

The lecturer was introduced by Mrs. Mary F. Woodruff, First Reader of the local Christian Science Church, in the following words:—

Friends:—On behalf of First Church of Christ, Scientist, of Pueblo, I extend to you a cordial and hearty welcome.

We are here to-night for the purpose of listening to a discourse upon a subject no longer new. The fruits of Christian Science have become an established fact. Through this new, yet old, religion, mankind is being made better morally, physically, and spiritually, and I feel that we are all desirous of learning a better way to help ourselves, and lend a helping hand to the heavy laden.

The Scripture says: "For I was an hungered, and ye gave me meat: I was thirsty, and ye gave me drink: I was a stranger, and ye took me in: naked, and ye clothed me: I was sick, and ye visited me: I was in prison, and ye came unto me."

Through the untiring efforts of our beloved Leader, Mary Baker Eddy, Christian Science is giving food to the hungry, drink to the thirsty, and clothing man with an understanding which enables him to obey the commands of the Master, "Go ye into all the world and preach the Gospel to every creature," and "heal the sick."

I have the pleasure of introducing to you the lecturer of the evening, Mr. Edward A. Kimball of Chicago, a member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, of Boston, Mass., and I bespeak for him your earnest attention.—*Correspondence.*

At Exira, Ia.

The lecture given by Judge William G. Ewing, March 28, at the Knights of Pythias Hall, was listened to by a fair audience, who, almost without exception, expressed themselves as well pleased. E. C. Whitaker, pastor of the Christian Church, very pleasantly introduced the speaker.

The following from an editorial in the *Audubon County Journal* of this place, expresses very fairly the impression made by the lecture:—

Those who listened to the discourse of Judge Ewing of Chicago, last Friday evening, on the subject of Christian Science, and who expected to hear him open fire upon those who did not agree with the teachings of that church, came away agreeably disappointed. The Judge handles his subject in a clear, concise manner, yet not offending those who do not agree with him on the subject treated. The Scientists here who secured him for the lecture, may feel proud of obtaining such a man to expound their tenets publicly and for the edification of the public. A lecturer may change the belief of his hearers by fair argument, but never by vituperation, abuse, and ridicule; and we are happy to state that the speaker used none of the latter methods in his discourse before the people of Exira.—*Correspondence.*

At Denver, Col.

Hon. William G. Ewing of Chicago spoke to a large audience at the Broadway Theatre yesterday (March 23) on "Christian Science: Physician and Redeemer." Judge Ewing is a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston.

Mrs. Frances Mack Mann, the First Reader of the Denver church, introduced the speaker as follows:—

"There has come to this age, through great tribulation, a message divine. To-day it encircles the earth with its glory, and is cleansing the heart of mankind from envy, malice, and hatred, from strifes, divisions, and wrongs, until now, here, in the present, we feel that God's kingdom on earth has begun. To speak of this glorious truth, we have with us to-day one well versed in the beauty and logic of Christian Science. I have the pleasure of introducing to you Hon. William G. Ewing, who will now address you."
