I hold not with the pessimist that all things are ill, nor with the optimist that all things are well. All things are not ill, and all things are not well, but all things shall be well, because this is God's world.—ROBERT BROWNING.

The True Creation.

BY CARRIE J. BELL.

WHILE reading the article in the November *Journal* on "Man's True Relation to the Universe," I was deeply impressed with this sentence: "In individual consciousness the work of creation is constantly going on." I questioned where I was in consciousness in regard to this work of creation. I reflected on my lifelong yearning to know God; to be at rest from the perplexing questions that, in spite of a constant, earnest endeavor to be satisfied with the teachings of creeds and dogmas, would not be quieted. Then I realized that, in the midst of this chaos and night of mortal mind, divine Love had answered my prayers for Truth, conscious and unconscious, saying, "Let there be light." Musing still, I remembered that when this heavenly vision came to me, it brought with it such joy, such inspiration, such wholeness of body,—for I had from my earliest childhood been a sufferer from an inherited disease,—as caused me to see all things good.

Then came the descent from Pisgah's height, as I began to see that before I could enter into this glorious Sabbath that remaineth to the children of God, there must be a great work of destruction,—the casting out of false beliefs; the overcoming of error in its myriad manifestations. The night following that wonderful day of revelation was very dark, yet through the gloom there shone the star of understanding, faintly, it is true. Still I followed the gleam, as it guided my faltering footsteps, until from out the conflicting evidence of the senses and the struggles of captive thought, the dawn of a new day appeared. Like the seventy who returned to Jesus, declaring with astonishment that even devils were subject to them, I was gradually, with surprise, learning that I could speak to error with authority and prove its nothingness.

As this "day" progressed I saw the waters of error recede, "Demons and shadows," calling themselves epileptic fits, rheumatism, sick headaches, catarrh, and curvature of the spine, fled before the Word. The firmament appeared. I knew that I stood on the Rock—Christ. Years ago, amid contradictions apparent on every side, while contemplating the mystery of godliness and the seeming and, at that time, unexplained power of evil, I decided to rest as patiently as possible on the promise, "I shall be satisfied, when I awake, with thy likeness," supposing this awakening would come after death. What then was my joy to learn through the study of "Science and Health with Key to the Scriptures" that now are we the image and likeness of God. Thus Love led me step by step to where I can truly say, I am satisfied to await the successive unfolding of the days and nights of God's creation. This I know: however dark the night, Truth is "a lamp unto my feet, and a light unto my path."

Purity.

BY S. E. C.

PEARLS—so significant of purity in their whiteness and modesty—stand, as we are told, as the gates of the New Jerusalem, or the Paradise of God. Only through purity can we enter into this celestial city or Heavenly consciousness wherein we find eternal life, for nothing enters this city "that defileth . . . or maketh a lie," and yet we learn that the gates are never closed.

The way of purity is always open and ready for us to enter in when we will, "and whosoever will" may come.

Impurity would naturally block the way to purity,—"Error excludes itself from harmony" (Science and Health, p. 537).

As the sharp and cutting pebble causes the formation of the pearl, so the sharp and bitter experiences resulting from

Digitized by Google

the belief of life in matter finally cause us to form the pearls of character. The whiteness of the pearl is significant of purity, in that white reflects all color and absorbs none, and as we become pure and white, so are we good reflectors of God, reflecting the God qualities in their completeness.

Webster defines the word pure thus: "Free from mixture, absolute, clear, simple, real, genuine, clean, chaste." We call that pure, which contains nothing unlike itself. Then to be pure-minded we must know that Mind is not in matter. If we believe Mind to be in matter, and that matter is intelligent, we are not pure minded, for this would be a mixture of mind and matter, good and evil, rendering mind impure.

That life is pure which knows no life in matter, no life apart from God. Then to be pure we must have no other gods before Spirit, Mind, Life, and Love divine. Proceeding from the divine Mind are the pure thoughts of God, constantly flowing into man's consciousness. "Clear as crystal," is the thought that comes from the great "throne of God and of the Lamb."

"And on either side of the river, was there the tree of life, . . . and the leaves of the tree were for the healing of the nations." The current of clear thought that has but one God, that knows but one Life, and has but one Mind, waters the very roots of the tree of life and sustains its eternal growth. For the pure in heart shall see God, and to know God is eternal life.

A Thought on the Church.

BY G. M.

WHAT is the church that I should love it and be faithful and loyal to it? It certainly is not the structure of wood, brick, or stone to which we commonly apply the name. Is it the bands of people who organize themselves together in the name of Good—God—for the destruction of evil and the upbuilding of good? Yes, in one sense; but why is such an organization necessary?

The church is the expression of the unity of Mind. It is the visible symbol and token of the acknowledgment of this fact. Because the unity of Mind is not universally acknowledged, those who have recognized it naturally find themselves with one accord in one place; and these bands are like oases in the great desert of mortal mind. But the time will come when the desert itself shall blossom as the rose, when all shall acknowledge God, from the least even unto the greatest.

Will it not be then that the prophecy of our dear Mother in Israel shall be fulfilled: "But the time cometh when the religious element, or Church of Christ, shall exist alone in the affections, and need no organization to express it" (Miscellaneous Writings, p. 145). But for the present hour we must heed well the next sentence in the paragraph: "Till then, this form of godliness seems as requisite to manifest its spirit, as individuality to express Soul and Substance."

If I Could.

BY AGNES FLORIDA CHALMERS.

IF I could call my thoughts to me,
And read them over with the prayer,
That I might justly judge and see
If all these thoughts were true and fair;
If I could call my thoughts, and then,
Could read each slowly, one by one,
I wonder if I once again
Would send them out as I have done.
I wonder if there would not be
An added kindness, here and there,
When these thoughts went again from me,
If I could send them with a prayer.

Testimonies of Healing.

After the lapse of a year and a half, during which I have thoughtfully and conscientiously applied myself to the study of Christian Science, I am now prepared to affirm with all the truth of my being that I believe this message of Mrs. Eddy to be the "Light which shineth in darkness,"—the Gospel of Jesus Christ.

"By their works ye shall know them" was the promise of the Galilean prophet, and the works which have been wrought in me through this healing Truth are such that scepticism and infidelity must forever be silent before them.

When I left Cleveland two years ago last November to seek health in Colorado, I left with the understanding that I was never to return, the death sentence of *materia medica* had been pronounced upon me, and I must pass the remainder of my days an exile from home and friends. This was the decision of two of the most eminent lung specialists in Cleveland, who pronounced my case pulmonary tuberculosis.

I arrived in Colorado in November, 1899, and after stopping in Denver two weeks, I started for Florence. I spent the whole of that winter in Florence, but as the winter wore away my cherished hopes went with it. My condition was becoming more aggravated and I was growing worse.

All that winter I suffered from the ravages of a periodic fever, which I had known from boyhood. Not a month passed but it returned, and sometimes it left me completely prostrated. This fever had baffled every physician who treated me. One said it was lung fever, another said it was malarial poisoning, and another said it was malarial fever, but not one of them could do anything to avert it.

Things became more and more complicated. I was obliged to wear glasses. I tried every remedy and medicine the doctors thought would help me; but all to no avail. At last my courage failed, life was not worth living, and I wrote home that I had given up all hope and was coming back to Cleveland to wait for the end.

It was at this juncture that I was advised to try Christian Science. I resented it as nonsense at first, but having observed that the Scientists with whom I had become acquainted were exceptionally kind and unselfish in their lives, I finally consented, out of sheer desperation, to try it.

So long as I am able to express gratitude, I shall not forget the complete change which those four weeks of treatment wrought in me. At the end of the fifth day the fever was pronounced cured. This seemed incredible to me at the time, but this was not all. In less than two weeks I had laid aside my glasses, and in six weeks from the time I began treatment I was on my return trip to Cleveland, a new man in body and mind.

I was improved both physically and mentally and have been improving ever since. The ravages of disease and the clouds of despair have given place to the health and harmony of divine Science. The consciousness which before seemed framed for suffering and bitterness, now manifests some of that peace and joy which follows the understanding of Truth.

I have been at home a year and a half, and though it cost me many a bitter pang to take my stand for Christian Science in Cleveland, still I do not regret it. To give up all that one holds dear, to be turned out of the synagogues, to be accounted as an outcast and apostate for "His name's sake," are not pleasant experiences, as many Christian Scientists know too well. But these are only transitional periods, and no matter how great the struggle may seem, if we will just look to the evidences we have in body and mind, if we will reflect on the complete regeneration which has taken place in our whole being, our faith will be sufficient to sustain us, and no *seeming* power of earth can make us falter.—THOMAS F. MCDERMOTT, Cleveland, O.

The numerous railroad accidents I have heard of lately, remind me of the experience I had a year ago last June.

I was on the Santa Fé train going from Kansas City to El Paso, when suddenly we felt a jar and heard a smashing of glass, etc. I was reading my *Journal* and immediately realized that Good was ever-present, whatever the manifestations of discord might be. Peace settled on me at once, and I thought I should be able to protect our carfull.

As I looked around I saw no one injured, but a lady made an outcry and I went to her at once, and put my arm around her, and asked her what was the matter. She said she had cut her head and wished me to feel the place. I answered her that her head was all right, and that we all had our heads knocked against the seats and ought to be thankful that we were not seriously hurt. I recognized the claim of hysteria, but the manifestation soon ceased.

Being satisfied that all in our car were safe, I started out to view the wreck, but was met by a physician, who said that I had better not just yet, as they had not taken the people from the wreck. "There is no one hurt?" I said. "I am afraid there is," he replied. "I hope not," I said, and went back to hear of the marvelous escape of a child who was riding on the back platform at the time of the collision. It seems we ran into a freight train that had been side-tracked for us to pass, and the switch left open. We ran into it at great speed, as we were making up time.

Our locomotive was turned over, the express, mail, and baggage cars smashed, and I do not know how many on the freight.

When I viewed the wreck, I saw a man sitting by the track as if exhausted, and asked him if he were hurt. A man by him spoke up and said, "It is the greatest miracle that he was not, for he has just crawled out from under that engine."

A mail clerk was the only one hurt on either train, and the surgeons said that no bones were broken, but he was badly shaken up.

When the relief train pulled in from Las Vegas and the doctors came out, the train men called out, "There is nothing for you fellows to do this time," as if it were an unusual occurrence.

People who saw the collision from outside, as well as those on the train after viewing the wreck, thought and said it was a miracle, and were very thankful to have escaped.

Mortal mind has since said that it just happened, and, I am ashamed to say, has prevented me from giving this demonstration, when I know that one person demonstrating the Truth may save many.

FANNY D. AUSTIN, Angus, New Mex.

In "Miscellaneous Writings" by Mrs. Eddy, she says, on page 219: "It is admitted that mortals think wickedly and act wickedly: it is beginning to be seen by thinkers, that mortals think also after a sickly fashion."

About six weeks ago I had the privilege of putting this logic to the test. I am now living in Seattle, my people are at Port Townsend, about four hours' journey, or a distance of thirty-nine miles. During the holidays I made a visit home. The weather had been quite stormy, but this particular morning the wind was blowing a gale and the sea was very rough. The boat rocked as it lay at the wharf. As the passengers came on board, they would say, especially the ladies, "Oh, I know I shall be seasick!" and begin to relate previous experiences of that nature, thus thinking after a sickly fashion. I found I had all I could do to correct in my own thought their assertions, and prevent their taking lodgement with me; for I, too, had always suffered from seasickness when on rough water.

This was the first time I had traveled when the water was very rough since studying Christian Science more than six years ago.

As we started the boat began to roll and pitch. The chair I sat in slid the width of the cabin. The dishes in the dining room crashed on the floor. The ladies had ceased to talk, some had sought the deck, but finally were conducted to staterooms. One other remained in the cabin, but was lying on the seats. I was able to sit through it all, not suffering in the least, and for the first time I actually enjoyed being tossed by the waves. It showed me the value of doing our work before the test or trial comes.

I was very thankful I had been able to keep my thoughts on Good,—God,—for it proved to me conclusively that what we are taught in "Science and Health with Key to the Scriptures," is a demonstrable truth.

GRACE PITCHER, Seattle, Wash.

Seven years ago I was healed in Christian Science, after having been given by the doctors but a few weeks to live. I had suffered many things of many physicians only to have my case pronounced incurable. I had been through a terrible operation in the hospital with the promise of being healed, but came out much worse in many respects than when I went in.

The trouble was a cancerous growth which had become so fastened to the internal organs as to make it impossible of removal, but in four weeks' treatment in Christian Science, with no faith whatever in it when I began treatment, I was healed. This seemed wonderful to me, and with a determination to know what it was that had performed this miracle, I began to study "Science and Health with Key to the Scriptures." A year or two after, I went through the class of one of the loyal teachers and have been enabled thereby to help many back to their rightful heritage—health.

I have seen insanity, curvature of the spine, consumption, asthma, gall-stones, and many other ills disappear.

Christian Science has not only restored me to health, but has, among many other blessings, brought me such a sense of love for my fellow-man as I never experienced before, and has taught me that God is Love and not a God of anger. I am every day realizing more and more what heaven is, that I need not die to reach heaven (harmony), but I can realize it here on earth just as fast as I overcome evil beliefs through the denial of error and the affirmation of God's allness. I am trying to prove by my works my appreciation of and gratitude to our beloved Leader for this beautiful revelation of the Truth which she has given to the world.—H. G. C., La Grange, Ill.

I have been a smoker for thirty-five years, and in that time I made several attempts to leave it off only to commence again because it made me nervous and I had nothing better to do. It made me nervous to smoke and it made me nervous not to smoke.

When I came to Christian Science I came seeking the Truth honestly and openly. I had read but a little in "Science and Health with Key to the Scriptures" when I came to these words in the preface: "but to reach the heights of Christian Science, man must live in obedience to its divine Principle." Then I felt that tobacco and I would have to part company. Within ten days after commencing to read Science and Health smoking left me. I did not leave smoking, smoking left me and took with it the desire. Now I account for this by being on a higher plane, in a clearer atmosphere, where tobacco cannot live or mingle. There is no room even for the desire. If you have not opened yourself sufficiently to receive this Truth, try it, and you will soon demonstrate how quickly you will rise to a thought so pure that the use of tobacco in any form will be repulsive to you.—S. A. BLASLAND, Boston, Mass.

Religious Items.

In the wretched divisions of Christendom it is humiliating to think how pitiably and shamefully charity has been outraged and truth forgotten. Truth, full grown into its divinest form of charity, "thinketh no evil;" but what evil is there under the sun that Christian people of one church, sect, or denomination have not been ready to believe of another and openly to allege against it? In many an unchristian controversy the champions on either side have seemed to think that they would most surely prove the goodness of their own cause by charging all manner of evil against their adversaries. It is a good sign of the present epoch in the history of Christendom that this malicious and malignant disposition has become *disreputable*. A better spirit has appeared, a spirit of charity and candor, even in controversy, which can have been inspired by no other than the Spirit of Truth. We are a long way yet from healing the divisions of Christendom, or even the least and latest of them all. But hope is always a duty; and surely now, when Christian people of all names are learning, in spite of all divisions, to appreciate and recognize each other *as Christian people*, we may hope that Churches sects, and denominations may yet abandon the unwisdom of "measuring themselves by themselves and comparing themselves among themselves," until the universal Church, which, in spite of all contentions and disruptions, consists of *the whole body of baptized members of Christ*, shall be so filled "with the spirit of truth, unity, and concord," that they may at length be brought to dwell together in unity and godly love.—*The Church Standard.*

There is a sense in which every man should live in the present. It is the eventful hour, and the only period in which a man can live; but, on the other hand, no man can live well to-day who is not looking toward that which is before him. The prospect of a bright to-morrow makes to-day strong and beautiful. Hell is a man without a future. A bright future dwarfs an imperfect past and illumines an otherwise dreary present. So it was that Paul, with consummate wisdom forgetting the things that were behind, reached forth to the things that were before.

Every true man, then, must live not only in the present, but in the future as well. He must feel that his grandest day is not behind, but before him. There are unreached heights which he may gain. This feeling is the indispensable condition of all progress. The self-satisfied man is a failure. The happy, contented, dreamy, aspirationless brutes remain the same from age to age. It is the man full of dissatisfaction and unrest who knows that he has not already attained, nor is already perfect, who becomes the colonizer, the civilizer, and the saint. Only that man grows in grace who realizes his imperfections. We all need to feel that we are capable of unlimited approach to the divine. There is an enormous amount of undeveloped goodness and greatness in men. You can set no limit to the possibilities of progress in any human soul.

GEO. B. VOSBURGH, D.D.

It is not enough to give ourselves to Christ, to receive the pardon of our sins, to be numbered with the children of God through faith in the name of Jesus. These things mark our entrance upon the divine life; they are not the life itself. That life is a progress, an upward growth, a continual and progressive approximation to the likeness of Christ. Unless our religious life shows such a forward and upward tendency, we may very well question the genuineness of our conversion.

To grow in the grace of Christ is to be conformed more closely to his holy image, to partake more largely of his spirit, and to develop in us the qualities that made him, "holy, harmless, and undefiled." To grow in the knowledge of Christ is to learn more perfectly his will, to understand more clearly the truths he came to reveal, and to realize more completely what he was while on the earth, and what he is to-day, exalted to the right hand of God.

The acquisition of such grace and knowledge demands of us the humility and teachableness of the little child, and complete submission to the guidance of the Holy Spirit. It is a great attainment, worthy of the lifelong desire and effort alike of the wisest and the most unlearned of mankind.

The Examiner.

William L. Watkinson, D.D., LL.D., has this in *The Homiletic Review:*—

"If you are the light of the world, show it; show it in your character, 'living epistles,' known and read of all men.' You know there are men who cannot read literature, but they can read you. They have no time for reading, but they have time to read you. They are always taking stock of you, and finding that the assets are not always desirable. It is astonishing. A good many people have no taste for reading this Book; they have a taste for you, marvelous; you are of perennial interest to them. If you give some people a book they put it on the shelf; but they cannot put you on the shelf. You are never in the library, you are not; you are in circulation seven days a week. Mind that you are written over with the right characters, living epistles. Show forth the praises of Him who has called you out of darkness into His marvelous light.

"And not only let your character be so and your works be so; this world really judges by services to a vast extent. Mind you let them see in your character and in your works the divinity of your creed. You need not be troubled about logical definitions of Christianity if you have only got living apologies for it."

We need a return to the simple, earnest, and intense faith of the early disciples. The crucifixion and the resurrection were ever uppermost in their minds—the living and glorious realities to which they surrendered their hope and life with undying confidence. These fundamental facts are just as important to us, have the same significance for us as for them! but instead of beginning at the faith and the doctrine and resting in holy confidence in the fact and in the power of the truth, we begin at speculation, doubt, criticism, unbelief, and worldliness, and these dull the edge of truth and weaken our spiritual preception and obscure the light, until we fail to catch the inspiration or to receive the revelation of blessing they involve. To believe the resurrection fully without wavering or doubting, it is necessary to have an experimental knowledge of the truth.—*The Methodist Protestant.*

Professor Stuckenburg, D.D., LL.D., says in *The Homiletic Review:* "Christian Union occupies a prominent place on the programme for the achievements of the twentieth century. It is a reproach to Protestantism that its hosts occupy different camps and war among themselves, instead of fighting unitedly their common foes. The division is not only a source of weakness, but is even looked upon as a proof of failure. It certainly brings into greater prominence the unity, compactness, and solidarity of Catholicism. To the heathen world and to the unchristian public in Christian lands, the divisions of Protestants are an evidence that there must be something radically wrong in a system that inscribes Love on its banner and then promotes antagonism and dissension."

"Never before within a life-time past," says *The New York Evangelist*, "have the people been so occupied as now with the most pertinent and practical religious thinking." It may be added that never before have the people been so occupied in discussing religious questions heretofore regarded as beyond the domain of the understanding. It is now generally confessed that to set reason aside in any province, is to fall into that perilous plight spoken of in the Bible as the blind leading the blind. Every form of religion is at length invoking reason as its patron.—*The Universalist Leader.*

A growing Christian is a happy Christian. He is distinctly conscious of improvement. He is not satisfied with himself, nor with his attainments. He sees heights above to which he has not yet attained. But he also sees ground below which he has left behind. He is not what he wishes to be. He is not what he expects to be. But he is not what he once was. His strength is greater, his hope is brighter, his peace more constant, his love deeper, his doubts fewer, the fruits of his labors are more abundant.

The Christian Advocate.

At a recent session of the New York conference of the Methodist Episcopal Church the examination committee reported that Emmet Shaw, a candidate for full orders, had failed to pass his examination in psychology. "Oh, that's too bad," said the Rev. Dr. A. G. Palmer of Newberg. "It's really too bad he did not pass in psychology, indeed. I know in practice he has his psychology down fine. He took hold of our little church at Belledale and simply turned it upside down. I move that he be passed." The candidate was passed.

The Congregationalist and Christian World says: "Those who go through life looking only for the commonplace in their fellow-men appraise humanity as of little worth. Those who look for selfish motives and evil purposes live in a world where they see evidences of corruption everywhere. Those who believe in their fellow-men and expect the best from them are always making discoveries that delight them."

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 oc half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15; 50 copies to one address, $2.25.

National.

Oscar Fish of Valdez, Alaska, is the best-paid mail carrier in the world. He has just been awarded the contract of carrying the United States mails from Valzez to Eagle for another four years. He receives $35,000 a year. The distance between the two places is about 413 miles and he makes two trips a month. The mail is limited to three hundred pounds, and consists generally of letters only.

There is a disposition in the Senate to delay consideration of the canal question. It is possible that President Roosevelt will send a special message to Congress again inviting attention to the desirability of constructing an isthmian canal. The message will announce the negotiations which have been made with Colombia, Nicaragua, and Costa Rica by Secretary Hay.

Attorney General Philander C. Knox, has announced that injunction proceedings against the beef trust would be begun immediately in the United States courts at Chicago. President Roosevelt told the Attorney General he was gratified that the department had been so prompt, and had been so fortunate in collecting evidence.

Secretary Hay and Minister Concha signed a treaty regarding the Panama Canal, April 23. The treaty provides for a perpetual lease of a strip of land six miles wide for the purposes of a canal route, the lease to run by hundred year periods, and to be renewable at the option of the United States.

The Department of Justice has been asked whether or not the Morgan steamship merger is a combination or trust in violation of the United States laws. Persons who are interested take the ground that the Sherman anti-trust law can be made to reach the Morgan combination.

The State of Washington won a preliminary victory, April 21, when the United States Supreme Court granted leave to file an original bill for an injunction against the Great Northern Railroad Company and the Northern Securities Company.

President Roosevelt has named Rear Admiral Watson for special naval representative at the coronation of King Edward. Captain Charles E. Clarke, who was first named, declined the appointment.

The naval board on awards is considering the question of bestowing a medal on every officer and man who served in the West Indian naval campaign of the Spanish-American war.

The postal authorities have discovered counterfeit postal cards in the mails from almost all parts of the United States.

The Weather Bureau has developed a system of wireless telegraphy which is said to be superior to any now in use.

Foreign.

A despatch from Copenhagen dated April 23, says that the Landsthing (upper house) by a vote of thirty-four to thirty endorsed the treaty providing for the sale of the Danish West Indies to the United States. The treaty now goes back to the Folkesthing (lower house). Four hundred planters and merchants of the Danish West India islands sent telegrams urging the immediate ratification of the treaty.

According to reports, a new Boer republic has been established in the Langenburg country, between German Southwest Africa and Portuguese West Africa. Some Boers went there as early as 1885 and many Transvaal Boers have followed during the present war. This is the fifth trek taken by the Boers to escape British dominion.

A resolution has been introduced in the House of Commons at Ottawa, Ont., stating that while British supremacy should be maintained in South Africa "it is expedient to offer universal amnesty, as a condition of peace and submission to British control, to all persons in arms against British authority in South Africa."

Sir Charles Dilke, one of the best-informed members of the House of Commons, confidently expects to see peace established in South Africa before the coronation.

Portugal has adopted the Slaby-Arco system of wireless telegraphy and is erecting a station at the mouth of the River Tagus and another at Lisbon.

Industrial and Commercial.

The Department of Agriculture has issued a statement of the foreign trade of the United States in agricultural products. During the fiscal year 1901, foreign countries purchased American farm products to the amount of $952,000,000. This was the largest agricultural export in our history and was $100,000,000 more than in 1900. Our agricultural imports were $392,000,000, which was $28,000,000 less than in 1900.

A Treasury Department statistician says that the consumption of flour in the United States is about one barrel a year to every man, woman, and child in the country. Minnesota has 307 mills and can turn out about 120,000 barrels a day. The big mills of the city of Minneapolis produce over one-sixth of the flour consumed by our entire population.

The First National Bank and the Metropolitan National Bank, both of Chicago, will be consolidated May 31. The First National absorbs the Metropolitan, and will have a total of $8,000,000 capital stock, about $6,000,000 surplus and undivided profits, and about $100,000,000 in deposits.

The directors of the National City Bank of New York have voted to increase the capital stock from $10,000,000 to $25,000,000. The bank's capital and surplus will be larger than those of any other National bank in the country.

It is understood that the Canadian Pacific Railroad will at a very early date begin work on their vast irrigation project in the Northwest Territories.

General.

The Supreme Court of Nebraska has handed down a decision as to the taxation of corporations, which may be as far-reaching as that in the famous schoolteachers' case in Chicago. The section of the general revenue law under which corporations heretofore have deducted the amount of their bonded indebtedness from the value of their property for taxation, is declared unconstitutional. They must pay taxes in proportion to the value of the entire property.

Miss Ellen M. Stone, the noted American missionary, will deliver a series of one hundred lectures under the management of Major J. B. Pond. The first of the series was delivered in Tremont Temple, Boston, to an interested and enthusiastic audience which filled the Temple. In a simple and unaffected manner Miss Stone told the story of her capture by brigands in Macedonia and her long captivity in that mountainous region.

The Twelfth annual reunion of Confederate Veterans was held in Dallas, Tex., beginning April 22. It is probable that June 3, the anniversary of the birth of Jefferson Davis, will be selected as Confederate Day and Memorial Day for all the Southern States. There has been no Memorial Day that is generally observed throughout the South. Various days from April 6 to May 10, have been celebrated.

William G. Van Horn, an attorney of Salt Lake City, has been appointed judge of the Court of First Instance at Cairo, Egypt. The position is a life one. The Court of First Instance is an international body, maintained by the various maritime governments, and passes upon questions arising out of the Suez Canal traffic and kindred matters.

Work on the Marconi wireless telegraph station at Table Head, C. B., is progressing satisfactorily. There will be four towers, each two hundred feet high. Signor Marconi says the station will be completed before Coronation Day, and that the first message will be one of congratulation which he will send to King Edward on that day.

John D. Rockefeller gave $1,000,000 to the executive committee of the Southern Educational Conference which met at Athens, Ga., April 23. The money was not an endowment, of which the income only is to be spent, but is to be used outright as the general educational board sees fit.

Co-education is to be practically abandoned by the University of Chicago. A new women's college is to be erected on the University grounds. Pledges for $1,500,000 have been secured by President Harper for this work. It is said that Miss Helen Gould is one of the donors.

On April 21, 1852, George S. Boutwell, then Governor of Massachusetts, signed the charter of Tufts College. On the fiftieth anniversary of that date the college paid a beautiful tribute to the venerable scholar by conferring upon him the degree of LL.D.

Three hundred and fifty members of the various women's clubs in New England left Boston, April 23, to attend the sixth biennial of the general federation of women's clubs in Los Angeles, Cal.

Bradstreet says that two-thirds of all the letters which pass through the post-offices of the world are written by and sent to English speaking people.

Nearly fifteen hundred kindergarten teachers attended the ninth annual meeting of their international union which met in Boston last week.

April 23 was New York day at the Charleston Exposition. Governor Odell and staff were present.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Christian Science and its Doctrines Explained.

ALFRED FARLOW of Boston, the authorized press agent of the Christian Scientists, has prepared an answer to the paper read before the Methodist Episcopal Ministerial Association of Pittsburg on March 17 on Christian Science, by the Rev. Dr. E. M. Wood, in which that doctrine was criticised. Mr. Farlow's reply, written for *The Pittsburg Sunday Press,* is as follows:—

Boston, Mass., March 20, 1902.

Editor of *The Pittsburg Press.*

In your issue of the 17th inst. you reported a discourse on Christian Science by the Rev. Dr. E. M. Wood, who declares that he has read every book published on this subject. After thirteen years' experience I desire to say that I have never yet seen an adverse criticism on the subject of Christian Science which contained a correct statement of it. This is because it is impossible to understand much of this Science without using it. Our good clergymen forget that this is indeed a science and must be so treated in order to be understood. What would be thought of one who attempted to expose mathematics with no qualification therefor except that he had read it and did not believe in it?

Even the students of this Science, as a rule, are not considered capable of entering the field as teachers until they have practised the healing art for at least three years to make sure that they understand it sufficiently. Yet here is one, posing as an expounder, who perhaps has never attempted to heal a patient through the teaching of this Science to prove even to himself that he understands it. We insist that no one who is not a practical Christian Scientist can express an intelligent opinion of its teaching.

Mr. Wood declares that Christian Science "is atheism and a fraud." I am sure he did not read it thus in the Christian Science text-book nor by reason of comparing the teaching of said book with the Holy Scriptures. This he has probably inferred from the numerous criticisms from which he has gathered his information.

He claims that Christian Scientists do not believe in a personal God. In "Science and Health with Key to the Scriptures," p. 331, Mrs. Eddy declares, "God is individual, incorporeal, the infinite Person, the Universal Cause, the only Creator, and there is no other causation." It may be that our critic has a sense of person differing from that of Mrs. Eddy. If so, he will do us a great kindness to define what he means by person as applied to God. Does he mean a corporeal body of flesh, a limited outlined being? Christian Scientists believe that God is individual, but that the individuality of God is infinite and is withal a rational, intelligent, all-knowing Being. Will our critic kindly show wherein Mrs. Eddy's definition of God differs from that of the fundamental lesson in Christianity which Jesus gave when he said, "God is Spirit"?

We would add here that this is likewise the fundamental lesson of Christian Science, and we challenge Mr. Wood to find a single statement in the Christian Science text-book which is not a consistent deduction from said premise. I have oftentimes heard clergymen find fault with the Christian Scientist's definition of a personal God, and though I have repeatedly asked them to define just what they mean by a personal God, I have never yet obtained such a definition from a critic.

Some remind me of the Irishman who contended against a proposed legislation before he knew the conditions of the bill. When his friend tried to explain to him that it was really in harmony with his own beliefs, he stoutly declared, "I don't care, I am agin it." Some people seem to have set themselves against Christian Science, and they are determined not to understand it as it is, lest they be converted.

Our critic declares, "The doctrines of the sect are waning and now draw most of their converts from invalids." It is no argument against the goodness of this Science that its converts come from that class who feel its need. Those who are already satisfied are not seeking something new and are perhaps not yet ready to give much heed to this Science.

As to the claim that this Science is waning and that the numbers of people who are interested in this subject are being exaggerated, I would say that two hundred and thirty-five thousand copies of Science and Health have been sold. Grant that each copy is being studied by the average family of five, we would have 1,105,000 people reading Science and Health. Divide this by two, to make sure we are not exaggerating, and we have over five hundred thousand people who are students of this Science. That nine thousand copies of the revised edition of Science and Health have been sold in a little over two months would indicate that the interest on this subject is not abating.

Even our clergymen cannot refrain from discussing it. Even to them this Science seems to be the most important subject of the age. By the way, is it not a little strange and inconsistent that after alleging that this Science is already waning and fading out, and that it is a "ludicrous teaching," our critic should feel that it needed any help from him in order that it might die a natural death?

He is correct in saying that Mrs. Eddy is a strong woman. She has withstood the storms of wrath which have been heaped upon her by ill-informed clergymen as well as other opposition, and has accomplished during a period of twenty-five years what no other religious teacher has ever been able to do. Like some other clergymen, who themselves receive a salary, Mr. Wood seems to be troubled because Mrs. Eddy has been somewhat compensated for her service. I oftentimes wonder if the readers of the press in general, as well as the Christian Scientists, are not sometimes led to ask the question, whose business is it what the Christian Scientists do with their own money?

If both parties to the contract by which Mrs. Eddy is remunerated for her inestimable service to her beneficiaries are satisfied, a third party could be nothing more nor less than a meddler. We regret to say that Mrs. Eddy is not "one of the wealthiest women in the country." If she had her just dues, she would be worth millions, but as it is she has so studiously thrust aside the legitimate opportunities of becoming rich that she has only saved a moderate fortune

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

from the enormous sale of her books and the unparalleled demand for her inestimable service as a teacher.

Besides, she has already given away a very large portion of it and gives regularly one third of her income to charities. When she received patients she healed all manner of disease and refused to accept pay in every case except in one instance where justice demanded that she should do otherwise. While her church was poor she preached without a salary. In its more thrifty days, when her followers declined to accept her service in this line without compensating her, she accepted a small salary, she herself contributing one half of this amount. At present she gives two thirds of her time to her church and is the only unpaid officer in it. She closed her college at that period when Christian Science had become popular and when hundreds of applicants were clamoring for admission thereto and she could readily hear the coming of thousands who would be glad to pay the price of tuition. During her college work she accepted many worthy students who had nothing to pay. Husband and wife were always received for one tuition. She rejected many who were willing to pay the full price of tuition because she did not consider them prepared for the exalted position of students in her college.

Our critic refers to Mrs. Eddy's recovery from an accident through divine power previous to her formulation of Christian Science. A Lynn newspaper referred to this matter in the following words: "Mrs. Mary M. Patterson of Swampscott, fell upon the ice near the corner of Market and Oxford Streets, on Thursday evening, and was severely injured. She was taken up in an insensible condition and carried to the residence of S. M. Bubier, near by, where she was kindly cared for during the night. Dr. Cushing, who was called, found her injuries to be internal, and of a very serious nature, inducing spasms and intense suffering. She was removed to her home in Swampscott yesterday afternoon, though in a very critical condition."

On February 24, 1900, I published in a Boston paper, the following: "The above named Dr. Cushing, a homœopathic physician, was called on Thursday night to attend her. He left some powders to be taken, but she declined to take them, and three days thereafter, on Sunday, through the divine Power, she rose from her bed in health. When the doctor called again on Monday he found her well, and congratulated himself on having healed her. She then turned to her table, opened the drawer, and said: 'Look, doctor! All your medicine is here; I never swallowed it.' He arose, stood by her side, and looked as if dazed, at the powders; took up one of them and opened it, then laid it back in the drawer, and made many inquiries as to how she was healed. Afterward he called on her once; at that interview his sole conversation and apparent purpose was to learn what he could about this event, which had stirred the good people in Swampscott and Lynn."

Our critic declares, "Who could expect much that would be valuable from a person who had wandered from Presbyterianism to Faith Cure, to homœopathy, to Water Cure, to Mesmerism, to Christian Science?" Is it to be criticised that one should go from one remedy to another in search of health? The world to-day contains millions who have tried various things in the search for health, and thousands of these, after having exhausted all hope in other means, have found relief through this Science. Experimentation is an absolute necessity to "prove all things" and eventually "hold fast that which is good."

Mr. Wood declares that "Reduced to its last analysis it has two fundamentals: first, there is no such thing as matter—it is an illusion, nothingness; second, there is nothing but mind." He might also have added that the great founder of Christianity taught "It is the Spirit that quickeneth, the flesh profiteth nothing." Will our critic kindly inform us what must be the constituency of that which is altogether unprofitable? How much is nothing? Is there anything in that which profits nothing?

Is not this statement of the Master as radical as any contained in the Christian Science text-book? We would add that the abstract statement, "There is no matter," needs the extensive explanations given in the Christian Science text-book in order to be properly understood. This Science does not teach that the creation of God is an illusion, but that all things exist, from the least to the greatest, and are real in their true nature, but are not what they seem to the uneducated human mind. It is not the creation itself which is denied in this Science, but the false human concept thereof. The strong contention on this point on the part of non-believers is as a rule due to misapprehension.

Our critic is in error, however, when he declares that the fundamental premise of this Scripture is its declaration concerning matter, for this is a conclusion rather than a premise. The premise of this Science is, as we have above stated, the Scriptural teaching: "God is spirit." If our critic will indorse this statement and stick to his text, we will guarantee to convince him of all this Science teaches on the subject of matter, that is, provided he believes that Spirit is infinite, unchangeable, eternal, and absolutely good.

It is said that Christian Science teaches that Christ did not truly die, consequently he was not resurrected. Here again, our critic manifests his misapprehension. While they may differ in their interpretation of the "enemy" which is called death, yet the adherents of this faith recognize that sickness, sin, and death exist in human experience and must be grappled with and overcome through the application of divine power. We would here call attention to the fact that Jesus also differed from the usual definition of death. He declared, "Our friend Lazarus sleepeth," and repeated this; but when the disciples failed to comprehend his meaning, "Then told he them plainly, Lazarus is dead," as much as to say, if you cannot understand when I speak according to my understanding of death, I will use your term. He said, "The damsel is not dead but sleepeth," thus denying their sense of death and declaring it to be simply a dormant mental condition from which the damsel could be awakened.

If Jesus was dead in the ordinary sense, by what means was he resuscitated? for it is said that he came forth from the grave after three days. Christian Scientists believe that his death and resurrection were absolute essentials to Christianity because they illustrate his understanding of life as well as his unbounded love. Jesus said, in respect to the bread and wine, "This do ye, as oft as ye drink it, in remembrance of me, till I come." We believe that Christ has come again, not in the flesh, but as he said in the text, "If I go away the Comforter will come to you." We believe the first coming of Christ was in the form of the personal Jesus, who, understanding all truth, demonstrated it in the presence of mortals.

We believe the second coming is the coming to human consciousness of the spiritual Christ, the understanding which Jesus possessed and which governed his life and enabled him to overcome the world, the flesh, and the devil. Jesus foresaw that the going away of his person would usher into human consciousness an understanding of his spiritual individuality and reveal to the world the true relationship between the Father and Son, thus enabling all mankind to rise superior to sin, sickness, and death, even as the Master, our great exemplar, had done.

In allowing himself to be baptized by John, Jesus acknowledged the necessity of John's peculiar mission as leading up to the baptism which Jesus had come to offer; and yet it is understood that "Jesus himself baptized no man." His baptism was wholly spiritual. John the Baptist, said, "He will baptize with the Holy Ghost and with fire." His means of purification was to bring the fire of divine truth to bear upon human error to its utter destruction; that is, to bring it about that mortals should be gov-

Digitized by Google

erned by truth and righteousness to such an extent that all sin and evil should cease in their lives. It must be conceded that one whose life conforms to the righteousness of God and to the fulfilment of the Master's injunction, "Be ye therefore perfect, even as your Father which is in heaven is perfect," rises superior to the necessity of any forms or ceremonies. Material ordinances are poor substitutes for a consecrated life.

It is said, "Christian Science does not believe in vocal or audible prayer except an occasional repetition of the Lord's Prayer, and this, in the interpretation of Mrs. Eddy, is a perversion." Have not Christian Scientists the privilege which is granted to all other Christians, that of interpreting the word of God for themselves? Christian Scientists believe in unceasing prayer. They use the Lord's Prayer in all their public services and a by-law of this church requires its members to pray daily. The following I quote from the Christian Science Church Manual: "It shall be the duty of every member of this church to pray each day: 'Thy Kingdom come.' Let the reign of Truth and Love be established in me, rule me, and rule out of me all sin." It is a great injustice to this denomination to say that they do not believe in prayer.

While referring to the fact that Christian Scientists pray in secret with the exception of their use of the Lord's Prayer, our critic should also have added that such practice is in exact harmony with the teachings of the Master, for he said: "But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly." Can it be possible that one who claims to be a faithful advocate of God's word and a follower of Jesus the Christ, is found condemning a denomination who have taken the Master at his word and therefore pray in secret? Why should men hear our prayers? Are we praying to men or to God? Does God hear better when we speak aloud?

Our critic makes the reckless statement, "Christian Science teaches there is no such thing as forgiveness of sin." We quote the following from Mrs. Eddy's chapter on prayer: "What we most need is the prayer of fervent desire for growth in grace, expressed in patience, meekness, love, and good deeds." Again, "Sin is forgiven, only as it is destroyed by Christ—Truth and Love."

It is said, "Christian Science does not recognize preaching as a function of Christianity. She used to have preachers, but after she closed her college she went into seclusion, and she is now called pastor emeritus. She instructs her teachers that when they teach they must say this is taken from a certain section of Mrs. Eddy's work." Wherein is the objection to this practice? When a speaker quotes from the Bible, he usually gives the name of the book, with the verse and chapter. When he quotes from an author, if honest, he credits what he says to that author. Why should not the Christian Scientist, when he gives out quotations from Mrs. Eddy's works, attribute the same to her? To do this is not only honest, but is due to the hearers, since it enables them to know whose thought is being given forth.

If our critic will attend a Christian Science Sunday morning service he will find preachers in the pulpits of this denomination and a sermon delivered from the rostrum. It may not be the work of the one who delivers it, but it will be most heartily endorsed by him, and will be found a very truthful, helpful, and entertaining sermon. The Christian Scientists are proud of their preacher and would not exchange the Word of God, illuminated by the Christian Science text-book, for the opinions of the most brilliant orator in the world. Whatever our critic may say, we call this preaching the Gospel.

Our critic's allegation that "Christian Science comes dangerously close to free love," needs the strongest possible rebuke from the adherents of this faith, and is only worthy of contempt from the public. Even the Leader of this movement married after she had discovered and founded this Science. She refers to her union with Dr. Asa G. Eddy as most spiritual and happy. Marriages are common among Christian Scientists. Mrs. Eddy's instructions lead to legal public marriages, though she leaves students to the consummation of their own views on this point. Her chapter on "Marriage," in Science and Health, is universally admired for its chastity, its sound ethics, and practical value. It makes public this entire question. She declares: "Until time matures human growth, marriage and progeny will continue unprohibited in Christian Science." The Master declared: "The children of this world marry: . . . but they which shall be accounted worthy to obtain that world, and the resurrection from the dead, neither marry, nor are given in marriage." Should Mrs. Eddy be criticised for believing and teaching this same, in substance —that spiritual life without marriage is a more desirable condition than human existence with it? She leaves each individual to choose for himself as to how much of the spiritual life he is able to demonstrate, and how much of mortal practice he can indulge with profit to himself and to mankind in general. The members of this denomination, like those of all other Christian sects, are left to choose for themselves in respect to such matters. They are neither taught to marry nor not to marry.

Our critic quotes from Science and Health: "Divide the word Adam into two syllables and you have A Dam," leaving his hearers to infer that this she offers as a definition of the word Adam. Mrs. Eddy merely calls attention to the suggestiveness of the word Adam when divided into two syllables. She does not say that the literal meaning of the word is "a dam," but that when the word is divided into two parts it is suggestive of its purpose as a dam or obstruction.

Our critic also declares: "Failures in healing are never reported, while one supposed success is blazoned everywhere." The exact opposite is true. There has scarcely been a failure on the part of Christian Scientist practitioners which has not been heralded abroad, while almost nothing has been said specifically of the many cures which have been accomplished through this faith. Christian Scientists are not anxious to have their successes "blazoned abroad." They only ask to be treated fairly and justly, to have the same rights and privileges which are given to other schools of religion and medicine.

Pittsburg (Pa.) *Press.*

Christian Science as a Religion.

To the Editor of *The Evening Post.*

Sir:—A writer in your issue of March 8, reviewing the "Actes du Premier Congrès International d'Historie des Religions," professes to be surprised to find the name of Mary Baker G. Eddy enrolled among the members of that Congress. In the interests of historical accuracy, I beg to remind him that one of the most largely attended Congresses of the World's Parliament of Religions in Chicago was devoted to Christian Science.

Addressing this Congress, on September 20, 1894, the Hon. C. C. Bonney, referred to by your reviewer as the writer of "An Historical Sketch of the Chicago Congress of Religions," in the "Actes" under consideration, said to the great audience, filling the hall of Washington:—

"No more striking manifestation of the interposition of divine Providence in human affairs has come in recent years, than that shown in the raising up of the body of people which you represent, known as the Christian Scientists.

"We had come to the state of the world in which science was called infidel, although true science could never look otherwise than through nature up to Nature's God.

"The Christian Scientists were therefore called to declare and emphasize the real harmony between religion and sci-

Digitized by Google

ence; and to restore the waning faith of many in the verities of the sacred Scriptures.

"To restore a living faith in the efficacy of the prayer—the fervent and effectual prayer of the righteous man which availeth much—to teach everywhere the supremacy of spiritual forces; to teach and emphasize the fact that in the presence of these spiritual forces all other forces are weak and inefficient—that I understand to be your mission."

Since the Paris Congress was, as your reviewer states, "in a sense an indirect result of the Chicago Parliament of Religions," it was only natural that Mrs. Eddy, the Discoverer and Founder of Christian Science and the author of its text-book, "Science and Health with Key to the Scriptures," should have been enrolled among the names of that Congress also.

Moreover, it would not be possible now to draw up a list of teachers representing modern religious thought without including Mrs. Eddy, whose teachings have gathered together a vast body of earnest men and women, united in a Christian denomination represented, on January 1, by 663 churches and societies, here and abroad, and showing a gain of eighty-one churches during the past year.

W. D. McCRACKAN.

In *The New York Evening Post.*

Among the Churches.

A Good Report from Roxbury, Mass.

When the call came to establish First Church of Christ, Scientist, Roxbury, Mass., there came also a recognition of the fact that through our dear Leader's self-sacrificing labors, a great and blessed privilege had come to us to work with renewed energy, and in a more general way for the Cause. We were to unite in bringing out more of the Love which has no sense of fear, and that "seeketh not her own," thus to establish in each heart the true foundation of Church. ("Our Church is built on the divine Principle, Love."—Science and Health, p. 35.)

We organized January 28, 1899, with one hundred members, all of whom were members of the Mother Church. Since that time others have been added, and to-day our total membership is two hundred and thirteen. Our first Sunday service was held February 12, 1899, in Fauntleroy Hall, Wenonah Street, Roxbury. Our seating capacity at that time was about two hundred and fifty. Our growth has been steady, and to meet the need of more room, the hall was enlarged a year ago, and will now hold between five and six hundred. This enlargement was made possible through the demonstration of the members of the church and the Sunday School scholars, in a few weeks, at a cost of about four thousand dollars.

Our Sunday School was started with a membership of seventeen pupils and four teachers. At the present time we have an interesting and flourishing school numbering ninety-five pupils, thirteen regular teachers, and six substitutes.

Our Wednesday evening meetings are well attended, and have resulted in bringing out many fruits of the Spirit.

On February 16, 1900, a reading room under the auspices of this church, was opened to the public at 54 Warren Street. This room is open daily (except Sunday), from 10 A.M. to 5 P.M., and on Tuesday and Friday until nine o'clock. During a period covering eight months, eighteen hundred and twenty-four calls from visitors were registered. The receipts from sale of literature at the church and reading room, from November 1, 1900, to December 1, 1901, was $1,886.43.

We desire to express our profound gratitude to God, and to our beloved Leader, Rev. Mary Baker G. Eddy, for all the many blessings and privileges which have come to us, through the unspeakable gift of Christian Science.

DORA W. STEPHENS, *Clerk.*

Corner-stone Laid at Denver, Col.

The corner-stone of the new Christian Science Church was laid yesterday afternoon [April 10] with simple ceremonies. The church will be built on the lots at the corner of Logan and Fourteenth Avenues. In order to give the business men and those employed in the daytime an opportunity to be present during the ceremony, the time for laying the stone was set at five o'clock in the afternoon.

The masons employed on the stone work of the building were entrusted with the job of placing the stone in position. During this work the church members stood with bared heads. William Griffith read five verses from the 90th Psalm and the whole of 145th Psalm. Mrs. Frances Mack Mann read a selection from the work of Mrs. Mary Baker Eddy, closing with a repetition of the Lord's Prayer in which the spectators joined. The choir sang "A Firm Foundation," and the services closed with a recital in concert of the Scientific Statement of Being, as contained in the Christian Science text-book.

Within the stone were placed a complete set of the works of Mrs. Mary Baker Eddy, a Bible, and the names of all the members of the Christian Science Church and of all members of the Sunday School. The corner-stone is a beautiful piece of Gunnison granite, although the structure is to be of lava from the Kerr quarries near Salida. The building was designed by Varian & Sterner. It will face on Logan Avenue, the front having six large white columns. The main auditorium is to seat sixteen hundred people and the smaller is to seat about three hundred.

The services yesterday were under the charge of the building committee, consisting of Mrs. Frances Mack Mann, Mrs. Jennie Griffith, Mrs. Nellie Kimball, M. J. Burns, William Griffith, O. W. McFarlane, Mrs. Thomas Kail, Lewis Kimball, George B. Wickersham, W. W. Booth, Mrs. Marrs, Robert Clark, Mrs. Sweet, Mr. Cameron, and Jacob Kail.—*Denver Republican.*

Christian Science Sunday School at Victor, Col.

As a member of the Christian Science Sunday School at Victor, Col., I should like to give to the Field some idea of the work Truth is doing in a Rocky Mountain mining camp.

There has been a society in Victor for some time. Last September they organized as a church with twelve charter members, and reorganized the Sunday School. There are five classes and an average attendance of twenty-six pupils.

In September, 1901, the school voted to give the amount in their treasury, some eighteen dollars, to the Cripple Creek church building fund. Our superintendent was so pleased with the demonstration over selfishness that he promised us fifty dollars for our treasury when we should have collected the same amount. Sunday, March 9, we had the amount and received the promised fifty dollars.

The Sunday School immediately gave the one hundred dollars to the church to make payment on a lot whereon to build First Church of Christ, Scientist, Victor, Col.

We left the Mother Church and our home in Boston and came to Colorado to live, fourteen months ago. I was a member of the Sunday School there and joined the church two years ago, I was then twelve years of age.

SARAH JOSPHINE BERRY.

From Mitchell, So. Dak.

In February, 1900, two persons who had been marvelously healed by Christian Science began reading the Lesson-Sermons each Sunday morning at the regular hour for service. A few others soon became interested and in December of the same year we organized as First Christian Science Society of Mitchell, S. D., with eight members. We continued holding service in our homes until March, 1901, when we rented the G. A. R. Hall, where we still meet with an attendance of from twelve to twenty or more.

Digitized by Google

We had a lecture by Judge Ewing last July, which was well attended and we believe accomplished much good, especially in removing prejudice.

We now have over one hundred dollars subscribed for the purchase of a lot on which to erect a church, trusting that at the proper time we shall have a building of our own in which to hold public worship and open a reading room.

Though few in numbers we are gaining in understanding of the Truth, and believe that to be the growth we most need, and are encouraged to labor on, knowing the "yoke is easy" and the reward sure.

Working together harmoniously and unselfishly, only good results can follow every honest effort to reflect the blessed Truth, which all have so great need to see and hear.

Each one of our society has received wonderful benefits from Christian Science, and are proving to be faithful, loyal students of our precious text-book, Science and Health, for which God be praised. May infinite Love graciously sustain and protect its dear author from the darts of unjust criticism, and hasten the day when all will understand her mission and vast labor of love to this age.

We are doing the best we know in our endeavors to disseminate the doctrine of absolute Christian Science in this place.—MRS. ANNA G. FERGUSON.

Notices.

Communion Service and Annual Meeting.

The annual Communion Service of the Mother Church will be held Sunday, June 15. All are cordially invited.

The annual church meeting of the Mother Church will be held the following Wednesday, June 18. All the members are invited.

To afford room for all, both of these meetings will take place in Mechanics Hall, in the Merchants and Mechanics Building on Huntington Avenue.

Application for reduced railroad rates on account of these meetings has been made to the railroad companies, and notice will be given as soon as arrangements are completed.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901, Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist, in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50; six copies to one address, $7,00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Important Information.

READERS of the *Sentinel* will find important information under the head of "Notices" on page 559, relating to admission of members to the Mother Church in June. Those who purpose to unite with the Mother Church at that time will see the importance of sending their applications to the Clerk at once.

Principle.

WE have received repeated requests to republish the number of the Christian Science Series containing the article entitled, "Principle." This was republished, with some changes, in *The Christian Science Journal* for July, 1893. In compliance with these requests we herewith republish the article with some additional changes.

Do Christian Scientists believe in God? This question is often asked us, and the reason for asking it is said to be that the inquirer has been told we do not believe in God. A Christian Scientist being once asked this question replied, "Why, I believe in nothing else!" This answer correctly reflects the belief of every one who can be said to believe in Christian Science, or who has the slightest right to claim the name. The fundamental truth of Christian Science is that God is *all*. That is, that He is omniscience, omnipotence, and omnipresence in the fullest and broadest possible conception of these words. Christian Science recognizes no other power, no other life, no other intelligence, than God, no other existence than God and His ideas. Its adherents take the Scriptural definition and conception of God, and labor to make them the practical and vital fact of their lives. No grander or more comprehensive conception of God can be put in the form of words than that set forth in "Science and Health with Key to the Scriptures," the text-book of Christian Science. Among numerous other definitions running all through said text-book, we extract the following from page 587:—

"GOD. The great I AM; the all-knowing, all-seeing, all-acting, all-wise, all-loving, and eternal; Principle; Mind; Soul; Spirit; Life; Truth; Love; Substance; Intelligence."

And again on page 465, He is further defined as "supreme incorporeal Being." It is again sometimes objected that these definitions imply an impersonal God, and we are charged with denying God's personality. This depends altogether upon what is meant by personality. If a personality of flesh, blood, and bones, is understood to constitute personality, we should have to plead guilty to the charge of not believing in a personal God. We distinguish between personality and corporeality. According to our conception corporeality implies fleshly embodiment, but personality does not so imply.

In the true, full sense of personality, we are the most uncompromising believers in a personal God. Let us briefly analyze the definition given in our text-book and see if from it we are not warranted in claiming to be such believers:—

1st. *Great I am.*—What greater I am can there be than the "great I AM"? This implies the greatest I AM, the highest possible personality,—in the sense that I constitutes personality.

2nd. *All-knowing.*—Can we conceive of a greater personality than one who possesses all knowledge, who knows everything which can or should be known? Can the finite mind conceive of a grander, better, or more satisfactory person than one who embraces Omniscience,—nay, who is Omniscience?

3d. *All-seeing.*—Can there be a better definition of a person, than one who can see all things, everything,—from the infinitesimal to the Infinite? All-seeing implies, as well, all-knowing, all-understanding.

4th. *All-acting.*—Think of the mighty depth of meaning implied in that term! What so grand, so powerful, so comprehensive and absolute, as that which is all-acting? Where shall we find a greater person than he who does all things, performs all acts?

5th. *All-loving.*—Again let us think, so far as we can think, of the overwhelming import of this term. Mr. Drummond in his analysis of Love, which he entitles, "The Greatest Thing in the World," gives this the chief and highest place. He estimates it above all other things; gives it more power, more activity, more wisdom, and more grandeur than anything or all things else. So does Paul: "Faith, hope, love; these three; but the greatest of these is love."

6th. *All-wise.*—There is, and can be, no greater wisdom than that which is *all* wisdom. Can there then be a greater person than He who possesses all wisdom?

7th. *Eternal.*—How shall we conceive of a greater or more glorious person than He who is Eternal, without beginning and without ending; one perfect, complete, everlasting entity? He who is eternal can be nothing less than perfect; and he who is perfect, can be nothing less than harmonious and glorious.

8th. (*a*) *Supreme, Incorporeal Being.*—Can there be a grander, nobler idea of personality than this language conveys? What an infinity of personality is here implied! That which is supreme, is higher and better than all else. No human form of expression can lift our thoughts above that which is supreme. The dictionary thus defines it: "Highest in authority; holding the highest place; highest, greatest, or most excellent, as supreme love, supreme glory, supreme degree."

(b) *Incorporeal.*—What does this word mean? Hear the lexicographer: "Not corporeal; not having a material body or form; not consisting of matter; immaterial; spiritual."

Compare the common definition of the word person with this definition of the word incorporeal, and see which suffers by the comparison. *Person:* From the Latin prefix *per* (through) and *sonare* (sound). Hence to sound through; a mask; the outward appearance, expression, etc.; especially a living human being; an individual of the human race, etc.

Which is the clearer or more satisfactory verbal declaration of the idea of God? God is distinctly and infinitely incorporeal; hence, in that sense, He is distinctly and infinitely personal.

(*c*) *Being.*—What does this word imply? It comprehends all of personality that is susceptible of comprehension. Again, hear Webster (we are now endeavoring to probe this question of personality to at least a sensible and rationalistic basis, and hence call the lexicographer to our aid at every turn): "Being.—Existing in a certain state; existence; a particular state or condition; existence as opposed to non-existence; state or sphere of existence; living existence as distinguished from a thing without life; spiritual being," etc. "Being" comprehends Life, Intelligence, Mind, Power,—in fact all the terms which go to make up the descriptive and definitional sum of Deity. Is it not a most expressive term to apply to true personality?

Take, then, the united signification of the three words, "Supreme, Incorporeal Being" (Science and Health), and where shall we find a more complete, powerful, or profound

Digitized by Google

definition of God as personality? In this sense, Christian Science has no quarrel to make with believers in a personal God; and if the latter will but stop to consider what personality in its best and real sense means and is, they will have no quarrel to make with the Christian Science concept of God.

In an article entitled, "Conceptions of a Future Life" by the venerable Archdeacon Farrar, published in the March, 1893, number of the *North American Review,* is the following in relation to God's personality:—

"Since the days of Tertullian, or, at any rate, since those ignorant hermits of Thebaid, who thought that God had a body, heats, and passions,' no one has believed in a corporeal Deity. Even Voltaire held, as did Locke, that the existence of God is demonstrable by the cosmological and teleological arguments, and yet that God is a circle whose circumference is everywhere, its centre nowhere."

This declaration of the impersonality of God as coming from so eminent an ecclesiastic as Archdeacon Farrar, must be somewhat startling to those who still conceive of God as a corporeal personality. It is evident that Mr. Farrar makes a distinction between personality and corporeality. Herein he differs from many persons who conceive of God from the personal standpoint. When you speak to them of a personal God, you convey to their minds the conception of a corporeal being, or a being having an embodiment. Nay more, we should not go far amiss if we asserted that they have an indefinite sense of a God having an embodiment of flesh, blood, and bones.

We have never heard the distinction which Mr. Farrar here makes announced from any orthodox pulpit from which it has been our privilege to hear the Gospel preached. If the conception of those professors of theology to whom we have listened was in accord with that of Mr. Farrar, they failed to make themselves so understood. We think it a fair inference that there is no such distinction in the mind of the average layman who believes in God as a person, however it may be with the theologians. It may be that some theologians have such a distinction in mind, and this may account for a remark once made to the writer by one of his clerical friends: that "theology had a conception of God's personality which it was not deemed wise to give out from the pulpit, as the people were not ready for it."

It is nevertheless true that the majority of orthodox clergymen are preaching of God from the standpoint of personality in the sense of corporeality, and that too in the face of creedal definitions distinctly defining him as incorporeal. The Articles of Faith of the Methodist Episcopal Church thus define him:—

"There is but one living and true God, everlasting, *without body* or *parts,* of infinite goodness, the maker and preserver of all things visible and invisible."

The Westminster Confession of Faith thus defines him:—

"There is but one living and true God, who is infinite in being and perfection, a most pure spirit, invisible, *without body, parts,* or *passions,* immutable, immense, eternal, incomprehensible, almighty, most wise, most holy, most free, most absolute," etc.

We shall not stop to analyze this language in detail, but a glance at it will show any intelligent, impartial observer, that it describes and defines an incorporeal God as fully as does the Christian Science definition. It warrants precisely the distinction which Mr. Farrar makes, and is in full accord with all who believe in God as an incorporeal person.

We are at a loss, then, to see why Christian Scientists should be charged with being a godless people. They are not, except by persons who utterly misapprehend Christian Science teaching or who do not wish fairly to consider its claims.

The use of the word Principle as applied to Deity is also objected to by some persons. If the ground above taken is at all tenable, this also is a most apt and comprehensive term by which to convey a true conception of God. If the favorite name of the Master—Father—is understood to mean divine Principle instead of the limited personality of human conception, it will clear up the relations existing between Jesus and the "Father" as well as those existing between all the children of that Father, as no possible interpretation of God as ordinary personality can do.

Again let us turn to Webster for a definition of the word Principle:—

"Beginning; commencement; source or origin; that from which anything proceeds; fundamental substance or energy; primordial substance or indecomposable element."

Surely so far as there is a beginning, God is beginning. Being the First Cause or the Creator, He is the source of all, and is therefore Fundamental Substance or Energy. A very casual glance at the definitions of God as set forth in the Articles of Faith of the Orthodox churches referred to, will show that God is most clearly defined therein as Divine Principle. To object to the use of the most comprehensive terms known to language in attempts to convey to the human mind a true understanding of God, is irrational, and partakes of that spirit of the Middle Ages which would fence Deity within the walls of a particular church, or compass Infinity about with denominational predilection.

The more we can conceive of God as universal Principle rather than as circumscribed personality, the more we shall be able to adore and understand Him. It is easier to understand Principle than it is to understand human personality. What is there about mere personality that we should love it with all our heart, and with all our mind, and with all our strength? How can we thus love personality? If we could, what would it be but idolatry? All through the Scriptures we are warned against idolatry. Yet personal worship is of the very essence of idolatry. John tells us that God is Love, and that no man hath seen Him at any time. Why not? Because He is Love, and Love being divine Principle, it is impossible for mortal man, or the man of the flesh to see Him. It is elsewhere said that no man can see Him and live,—that is, live in the flesh or the material senses. If God is a person, as men are persons, why should man not see Him in the flesh?

If He is such a person and as such is our creator, we are each one of us but the decaying, temporal personality of the flesh instead of the immortality of the spiritual. If God and ourselves are personal in this sense, we shall never see Him, and are to be forever debarred His presence.

That conception of God as personality which would limit Him to a fixed habitation or place, would therefore defeat the longing hope and desire of every earnest Christian to see and know Him. It would annul the Scriptures, for the whole burden of their teaching is a knowledge of God. Jesus' whole earthly mission was to bring a knowledge of the "Father" down to human understanding.

We should, then, conceive of God as the all-pervading power and presence of infinite Love and supreme Wisdom.

Charge to Candidates.

THE charge given to the candidate for consecration to the office of bishop in the Methodist Episcopal Church contains, among others, the following admonitions: "Be to the flock of Christ a shepherd, not a wolf; feed them, deveour them not. Hold up the weak, *heal the sick,* bind up the broken, bring again the outcast, seek the lost." This charge was originally, as we understand, incorporated by Wesley into the formulary of consecration. It has been retained in it ever since. The revised book of Doctrines and Discipline of 1892 contains it. In view of this, is it improper for us to ask why that part of the charge which commands the healing of the sick has been, and still is, a dead letter? We are quite sure that Wesley was a firm believer in the power of God to heal the sick by direct means. Why then do not his followers so believe, and believing, exercise the

Digitized by Google

power? Why, especially, do so many of them scout the possibility of divine healing now?

Even if the admonition in question means healing by indirect or material means, it none the less has been ignored. There seems to be no conception that the office of bishop and physician, or of priest and healer, is one and the same.

The Lectures.

At Florence, Col.

The Opera House was filled Sunday afternoon, April 6, with an audience of representative people to hear Mr. Edward A. Kimball, C.S.D., of Chicago, lecture on Christian Science. Mr. Kimball held the close attention of his hearers for nearly two hours and in a lucid and logical address presented some of the basic principles of his religion in a way that appealed to all who heard him. No attempt was made by the speaker to persuade or influence any to accept the teachings of Christian Science, but there were few who heard him who were not better for it. It was shown that Christian Science is in entire accord with the Scriptures, upon which it is based, and that the healing which follows the efforts of its adherents is of divine and not human origin. The wide gulf that separates Christian Science from hypnotism, mind cure, and similar mental phenomena was clearly defined. Mr. Kimball can be assured of a warm welcome in Florence, should he return at any time, although this is his second lecture here and the fourth that the Scientists have given to the public of Florence.

After the lecture a number of the Scientists went to their new church building on Second Street, the foundation of which is completed, and without formality or ceremony of any kind, witnessed the placing of the corner-stone.

The Citizen, Florence, Col.

Mr. Kimball was introduced by Mr. W. R. Rathvon, First Reader, who said in part:—

Every great religion the world has known has had as its founder and exemplar, one whose life has been the ideal of its followers. For centuries past, Christians have turned to the record of the works and words of Jesus the Christ, for light and inspiration; they have woven the ethics of his teachings into their lives generation after generation; they have in its defence been prompted to noble deeds of self-sacrifice and heroism; they have faced the dungeon, the rack, and the scaffold in their devotion to their religion and their church; they have preserved inviolate the integrity of the accepted record of Jesus' life, the Bible of our Fathers, and they have been abundantly blessed therefor; the Christian Church from the day of its birth has rightfully insisted upon its members accepting, not only a part, but all of Jesus' words and works and teachings and admonitions for their standard of living, and to-day it vigorously disciplines any within its enrolment who would repudiate the authenticity of any of the gospel narrative—and yet, for more than sixteen hundred years this same Church has wholly ignored in practice the one feature of Jesus' mission on earth which appeals, and has ever appealed most strongly, to suffering humanity,—his work of healing the sick.

By pulpit and pew we are told with inexplicable inconsistency that through the power of God, Spirit, alone can sin be overcome, and yet for sickness we are to turn to man-prescribed drugs. This was not the Master's way. Note how much of his time was given to the benign ministration of liberating his fellow-men from the twin evils—sickness and sin; note, too, how emphatically he enjoined upon his disciples, those with him and those to come after him, to "heal the sick" as well as the sinful. By what course of reasoning, then, can a professed Christian justify his turning to God to be healed of sin and to man to be healed of sickness?

It is to the contemplation of these things that Christian Science invites your thought. As you will learn from what will be told you this afternoon, it yields to no other denomination of religious belief first place in loyalty to all the teachings of Jesus. With extended hands it comes to all mankind, Christian and pagan, Jew and Gentile, rich and poor alike, offering the cure for both sin and sickness.

Correspondence.

At Cambridge, Mass.

Judge William G. Ewing of Chicago, spoke to a large audience at Union Hall, Tuesday night [April 15], on "Christian Science: Physician and Redeemer." Judge Ewing is a member of the Board of Lectureship of the Mother Church of Christian Science in Boston, and spoke here under the auspices of First Church of Christ, Scientist, of this city. The hall was crowded, and the audience held attentive for an hour and a quarter.

In introducing the speaker, Hon. A. S. Apsey said:—

Ladies and Gentlemen:—Time was, and is not so very far distant, when any man who advocated either in public or in private any doctrine in the arts, in the sciences, or even in religion, which differed from those generally accepted by people was classed as a charlatan and as a doer of evil works.

We fondly believe that to-day, in the dawn of this twentieth century, we have come to a new and a higher understanding of what is right and just and honorable and what is proper for reasoning and thinking human beings to believe in. Not much more than two centuries ago we, here in Massachusetts even, beheld the spectacle of judges in our courts condemning innocent and defenceless human beings to be hung because they were charged with witchery. We believe that that era in the development of the human race is past and gone forever. We believe that we can now give a fair hearing to any man who honestly advocates what he believes to be the truth either in science or art or religion.

I take it that we are met here to-night to listen to one who will in good faith present for our consideration doctrines which he believes, and which many of us believe, to contain the truth. Here in Cambridge—in this city of Cambridge, which for more than a century has been the abiding place of the greatest university of America, which has had upon its shield the one word "Truth,"—we should listen with peculiar attention to such a man who has to present to us what he believes to be at least a part of the truth.

It is my pleasure to present to you to-night a man whom most of you probably know by reputation at least, a man who for many years has been engaged in the same profession in which I myself am engaged, a man who is an official lecturer of The First Church of Christ, Scientist, of Boston, the Hon. William G. Ewing of Chicago.

The Cambridge (Mass.) *Chronicle.*

At Chicago, Ill.

A lecture on Christian Science was given by Judge William G. Ewing at Second Church of Christ, Scientist, Monday evening, April 7. The church was crowded and the audience was most attentive and appreciative. The introductory remarks of Judge Chetlain, who introduced the speaker, were in part as follows:—

Ladies and Gentlemen:—I have been accorded the somewhat unusual honor of introducing to you to-night a gentleman who needs no introduction to a Chicago audience. His charming personality, his ability as a jurist, and his eloquence on the platform are known to you all. Indeed, an introduction might seem useless formality were it not for the character of the man, the gravity of the theme.

Digitized by Google

I take it for granted that in these days beginning the century we should all be earnest seekers for the truth, and be willing to give fair and patient hearing to every new cause, and welcome the discovery of new truths. As I look out upon the vast sea of faces beaming with intelligence, radiant with hope and faith and spiritual life, I cannot but feel that for you Christian Science is an inspiration. What it is I know not, but it seems to touch the heart and bring man into harmony with his better self and the universe. The realms of science in the *natural* world are being explored and discovery follows discovery in quick succession; everywhere in the broad domain of science we find progress and discovery. Is it unreasonable to believe that in the spiritual world new truths may dawn upon us to lift mankind into a higher and better life and develop attributes akin to the divine?

I am glad to be with you to-night. I look forward to the address of the evening with pleasurable anticipation, well knowing that the exposition of the subject by our able lecturer will be characterized by the depth of feeling, the sincerity of purpose, the mental grasp, and clear perception that distinguished his work upon the bench.

Ladies and gentlemen, I have the great pleasure of introducing to you the Hon. William G. Ewing of Chicago.

Correspondence.

At Colfax, Wash.

First Church of Christ, Scientist, of Colfax, Wash., is glad to report to the Field their pleasure in giving to the people of this vicinity an opportunity to hear a lecture on Christian Science. At the Court House, on Tuesday evening, March 11, Hon. William G. Ewing lectured to a large and interested audience. The room was filled, and close attention given to the entire lecture. Many students from other congregations were present.

Judge Ewing was introduced by Attorney R. L. McCroskey of this place in the following words:—

Ladies and Gentlemen:—In the year 1866, Mrs. Eddy promulgated a religious doctrine, founded, as she believed, upon the true principles transmitted by Christ to his apostles and followers as an eternal heritage. She called it Christian Science. To-day its thousands of followers, scattered over the whole civilized world, worship God in hundreds of temples, dedicated to Him in whose image man was made.

Among its followers are found those in high and lowly stations of life. And every day, in the crowded city, in the quiet country, the rich, the poor,—all who claim kinship with the Mother Church,—find consolation in their devotions to Him who called man his Son. Whether it is a doctrine that should be embraced, must be decided by each for himself. Certainly, the unobtrusive, unselfish Christian lives of those who worship at its shrine, its amelioration of the mental and physical ills of thousands of wretched human beings, its motto, "God is Love," should commend it to the most thoughtful consideration of all who believe in God, in His goodness and omnipotence.

It is with the greatest pleasure I am permitted to present to you this evening, one who, as lawyer, eminent jurist, and scholar, has made a profound study, not only of the great problems of life, but of Christian Science. He has made a practical test of its teachings. Ladies and gentlemen, I present Judge William G. Ewing.

Correspondence.

At Utica, N. Y.

In the Majestic Theatre yesterday afternoon [April 13], Hon. William G. Ewing of Chicago, spoke upon the subject of "Christian Science: Physician and Redeemer," under the auspices of First Church of Christ, Scientist, of this city. The attendance was large. All the seats on the lower floor were occupied and a number stood at the rail. In the balcony nearly all the seats were occupied. The audience was made up of fully as many men as women—a remarkable thing in a religious gathering. Throughout the address, which lasted over an hour, the most careful attention was given. Judge Ewing has a very quiet, pleasant, easy manner of delivery, and it was plain from the start that he is decidedly in earnest in his belief.

Judge Ewing was introduced by Professor Timothy L. Roberts, the supervisor of vocal music in the Utica schools, who, by way of preface, said:—

Eight years ago was organized in this city First Church of Christ, Scientist. The meetings of this church were then held in the parlors of the house 11 Rutger Street, and the congregation numbered twenty-five to thirty. Without dwelling upon the different stages of growth of this organization, which to the philosophical observer have been very interesting, let me come to my point at once and state that our congregations Wednesday evenings as well as Sundays come not far from filling the floor of the New Century Auditorium. What per cent of increase is this? One thousand to twelve hundred.

Christian Scientists know full well the cause of this wonderful growth, for they have received of its untold blessings. And that others may know of these blessings and learn how to secure them, these lectures are gladly provided.—*The Utica* (N. Y.) *Observer.*

At Dallas, Tex.

Edward A. Kimball, C.S.D., a member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston, delivered an address on Christian Science at First Church of Christ, Scientist, in Dallas yesterday afternoon [March 30]. It was heard by many, who gave the speaker close attention. In introducing the speaker, Judge Gray said:—

Nearly a hundred years ago one of the foremost thinkers of this country, as the crowning act of his great life, established one of our foremost institutions of learning, nonsectarian and liberal, and over its portal caused to be inscribed these words from the gospel of St. John: "And ye shall know the truth, and the truth shall make you free." Upon this book and this sentiment has been built the faith of the ages. In all the magnificent triumphs of literature since then nothing yet produced has equaled the literary beauty or the dominant forcefulness of this book. Shakespeare's incredible genius will not, and the Institutes of Justinian, Bacon's Abridgement, and the Code Napoleon, though the works of masters, are distanced in comparison. I am, happily, I think, not a doctrinaire, and hence have the complete tolerance and liberality of Jefferson and yield to every man his heaven-born privilege of seeking truth and his freedom from a spiritual standpoint in whatsoever manner he may choose. If in his effort, be it new or radical, he lightens the burdens of life or brightens the way in front without violating the fixed sciences or the laws of his country, I freely bid him God-speed. I have the honor, ladies and gentlemen, and it is my distinguished pleasure, to introduce to you one of the leading advocates of Christian Science, Mr. Edward A. Kimball.

The Dallas (Tex.) *News.*

At Denison, Ia.

At the request of the local Christian Scientists on March 27, 1902, Mr. Carl F. Kuehule, a prominent attorney, introduced the lecturer, Hon. William G. Ewing of Chicago, member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, Boston. The Christian Scientists are very much encouraged, by the results of the lecture. Scientists from neighboring towns were well represented and all expressed themselves richly repaid. The *Denison Bulletin* said in part: "The Christian

Judgment for Defendants.

At the time a libel suit was brought by Mrs. Woodbury against Mrs. Eddy, the Founder of Christian Science, suits were also brought against J. Armstrong, manager of The Christian Science Publishing Society; John W. Reeder; the trustees of the publishing society, W. P. McKenzie, Thomas Hatten, and Joseph Clark; the directors of The First Church of Christ, Scientist, Ira O. Knapp, Stephen A. Chase, J. Armstrong, and William B. Johnson; Judge Hanna, editor of *The Christian Science Journal*, and also against The First Church of Christ, Scientist. All of these cases have been finally disposed of, judgment having been entered in favor of the defendants.

The charge against Mrs. Eddy was dismissed nearly one year ago, the plaintiff having failed to establish a case.

Boston Herald.

The Unregretful Deeds.

So live to-day that, when to-morrow comes,
Thou shalt not cloud the sun with vain regret;
But let thy hand and heart commit those deeds
That love for man and faith in God beget.

OSGOOD ELLIOTT.

I understand that no man is living a Christian life who is not a Christian in the world, in the family, in the church, in his mind, in his soul, in the emotions and appetites of his nature, in his hand, in his foot, in his head—who is not a Christian everywhere and in everything in him. To take every faculty or power God has given you and bring it under divine influence and make it act right—that is being a Christian.—BEECHER.

From Our Contributors.

Reply to Mr. Plummer.

To the Editor of the *Sentinel.*

In answer to Rev. M. W. Plummer's attack upon Christian Science last Sunday evening as quoted in Monday's *Record,* I wish to say that Christian Science attacks no one, but, in all honesty, should defend itself when traducers assault its fortifications. It has pleased Mr. Plummer to use cheap sarcasm as argument (as quoted), a source never resorted to by any professional man unless he is without logical facts or substantial reasoning. Now as to a few recognized facts: Christian Science is not a fad, its members were not converted to its doctrines by oratory or excitement, but most of them were lifted from beds of pain and the depths of despair through the great principles of Christian Science as taught by Mrs. Eddy, and that after hearing their physician's verdict: "Past all human aid." I say to Mr. Plummer, Go ask some of the many thousands who have retraced their footsteps from the grave if Christian Science "is the most arrant and arrogant nonsense ever penned." It is plainly evident to any Christian Scientist that Mr. Plummer is totally blind and deaf to the great truths between the covers of "Science and Health with Key to the Scriptures." He may have eaten the words but he failed to assimilate their nutriment, and so fed upon husks. A man would have been called a crank or a fool but a few short months ago if he had prophesied that people would soon be talking hundreds of miles without any wires, yet it has come to pass. When John sent to Jesus to know if he were the Christ, the answer was, "Go tell John the blind see, the lame walk, and lepers are cleansed." That is the answer which Christian Science makes to the world with a record of over a million cases as I understand. Jesus did not use wordy argument to convince John that he was the one sent; he performed deeds before the gaze of a carping, jealous world. When he said preach the gospel, he also said heal the sick, and this was done for some three hundred years after his crucifixion. If he intended it only for his disciples or students, it would have disappeared with them instead of continuing for three centuries. Is it consistent for any one, especially a professor of Christianity, to tell God in prayer that He is All-powerful, All-love, and All-good, and reach out to the medicine tumbler for help in the same minute, thus admitting that they do not believe God to be as powerful as the doctor's prescription?

A strong man receives a telegram containing bad news; in a second of time he is weak and helpless as a baby. His muscles did not read the words but we see the effect produced by mind upon his body. Lip service has become a more fashionable way to worship the Creator than the performance of deeds in some cases, but is it the proper way? By their deeds ye shall know them. Words are meaningless when brought into the glare of the light of noble deeds. I have the highest respect for any one who is sincere in his politics or his religion. Each man must work out his own salvation; no one can possibly do it for him, and if one sick prefers to trust his case to the guidance of his Creator rather than to physicians, who has the right to say nay? One thing is certain, Christian Scientists practise what they preach, at least genuine ones; they take their own medicine, that is, none at all. Its members include as good brain, blood, and brawn as we have. They come from all walks of life. And they come because generally they are driven into the ranks from hopeless despair of help elsewhere. Our physicians as a whole are a noble class of men and doing God's work as they understand it, but the best of them admit that the practice of medicine is guesswork. Is it not possible that Jesus meant it to be truth when he said, "These signs shall follow them that believe; they shall lay hands on the sick and they shall

Digitized by Google

recover." If teaching that God is Good, Love, All-powerful, omnipresent, reclaiming drunkards, reforming criminals, banishing pain and distress and despair, commanding "Love thy neighbor as thyself," putting purity in the place of vice, and deeds rather than words, installing joy where misery reigned, is "the most arrant and arrogant nonsense ever penned," then I say give us more of it, the world is badly in need of it.

Mr. Plummer, with others is furnishing the cup which Christian Scientists are drinking, and yet it is possible, as he must admit, that Christian Science is right and he wrong. If such be the case, what position is he occupying to-day, denouncing a religion that commands its followers to preach the gospel, heal the sick, and love their brother as themselves? Christian Science will go on down through the ages bringing joy and gladness to hearts in gloom even if it is not accepted by ministers and doctors. It is a tidal wave fast gathering magnitude and force, and must overflow the civilized portions of the globe. No weapon will ever be fashioned that will wound it more than slightly; its march will not be impeded; its banner is Truth, its ranks are welded by Love, and its commanders go forward under unchanging orders, never looking backward.

GEORGE A. BAKER.

West Dennis, Mass, April 21, 1902.

Law and Order.

BY IDA L. BAKER.

THE Christian Scientist knows that his God is a God of law and order.

One day, after I had returned from my school work, this question came up before me: What should be my standard of order, should there be any little irregularities in standing or sitting, in marching, or in the daily recitations?

My Bible lay on the table before me. I opened it, and turning to the twenty-fourth chapter of Numbers, I read Balaam's prophecy, and with the help of a few notes in explanation, I understand why Balaam could not pronounce a curse upon the Israelites.

Balaam saw that the Israelites were a highly organized people, that their tents were arranged in regular rows; he also saw, in comparison, the disordered array of tents in the camping ground of the Moabites; then turning to Israel, he breaks forth in these words, "How goodly are thy tents, O Jacob, and thy tabernacles, O Israel!" Balaam had caught a glimpse of the divine Principle of order, and that Principle to him was greater than all the hosts of Balak. This illustration from the Bible gave me a clearer view of the perfect government under the one Mind. I saw, as never before, that there are not minds many but only one Mind.

The next day I returned to my school work with a higher standard, a higher idea of order, and this was attained through the light which Christian Science has shed for me on the Bible, making it a practical book, a guide-book full of wisdom and instruction.

Step by Step.

BY NELLY RUTH CRAMER.

STEP by step God's love will lead me,
In the way I am to go;
Step by step, His Truth beside me,
Change and chance I cannot know.

Step by step, each day more certain,
Till I falter not, nor fear
Error can reclaim dominion;
God is all and God is near.

Testimonies of Healing.

As I look back to my first experience in Christian Science, I wonder why I have been so slow to take advantage of its benefits. When I first heard of Christian Science, some ten years ago, we were boarding in the same house with one of Mrs. Eddy's loyal students. At that time my wife was an invalid suffering from rheumatism to such an extent that she had to be carried up and down stairs, and even on the level floor could not walk without assistance. She suffered night and day, and when she moved her knee joints one could hear a creaking sound across the room. Two of the best physicians in this part of the country, said she could not live in Chicago, and that we must move to California or some warmer climate, if we expected any relief. We then turned to Christian Science without any expectation of lasting results. I enquired about the manner of treatment, and felt that it would do no harm. After the first treatment my wife was able to go up and down stairs with a little assistance, and after the fifth treatment my wife and I went to a dancing party at the Ashland Club and she danced six or seven dances. From that day to this, she has had no indication of rheumatism, having been perfectly healed in five treatments.

One would suppose that this demonstration of the healing power of Christian Science was enough to start me in the investigation of the subject. We did buy "Science and Health with Key to the Scriptures," and read it through, but could not understand it. I felt, however, that I had found something which was better than medicine, and I felt that I could call in a healer whenever occasion required. I did not realize until five years later that Christian Science was something I required every hour of the day and something to be used practically in my business and home life.

I am grateful to Christian Science for the many blessings it has brought to my household, and I now see how much I might have had, had I accepted it when it was first brought to my attention by my wife's wonderful case of healing.—F. H. KILBOURN, Chicago, Ill.

I have long thought I ought to write something for the *Sentinel* and tell the great blessing Christian Science has been to me in making me contented. When it was first brought to my notice I was of all mortals most miserable in body and mind.

Without going into details, I will say that for thirty years I was a confirmed invalid. We had spent hundreds of dollars for help from material sources, employed physicians of various schools, and also tried many patent medicines recommended as a "sure cure," as it was said to help others, but all of no avail in my case. I would seem a little better for a time, only to become worse than ever. It was strange to me, that what seemed to help others did me no permanent good; and still stranger, that doctors did not agree as to what ailed me. Some told me I had heart disease, others said my heart was all right.

Some of the ills were dyspepsia, nervous prostration, kidney disease, and female trouble. Dizziness seemed my greatest foe, as the sensation of dizziness came on very suddenly, and left me quite weak and fearful. In fact, I was full of fear, even afraid of myself, afraid that I might lose my mind and do myself some injury if I were left alone. I was actually afraid to be alone, afraid to live, and afraid to die.

At last a time came when I thought I had to die. Paralysis caused my left arm to become helpless, and as my mother and grandmother had both died from that dread disease, I had great fears that it would be my inheritance, and like Job, the thing which I greatly feared had come upon me. The doctors then said they could do no more for me, as I had no constitution to build upon.

At this stage Christian Science was brought to my atten-

Digitized by Google

tion by a dear friend who gave me some Christian Science Journals to read, and also loaned me "Science and Health with Key to the Scriptures." My only regret is, that I did not know of this precious book years ago. It would have saved me much suffering. It did not take me long to decide what to do. I had lost all faith in doctors and medicine, and I said, "Send for a Christian Science healer at once."

The healer came, and the first thing she said was, "God never made you sick." That was a new idea to me, and gave me hope. Thanks to the eternal builder and architect, I did have something to build upon,—the foundation of Truth whose builder and maker is God.

I now have better health than for years. I had often wondered why God punished me by causing me to suffer as I did, just when my children needed a mother's care. Now I know it was not God's will, but my own erroneous belief and ignorance of what God is to us.

Words cannot express my thankfulness for the understanding of this blessed Truth, and I am more than thankful to Mrs. Eddy for her helpful books. I was very slow in gaining an understanding of Science and Health. It was so foreign to anything I had ever read.

Let me add, that my healing was slow, and I have yet many things to overcome, but with God's help, I will strive, watch, and pray, to attain the end of all things; namely, perfection, and be satisfied.

My husband and myself are members of First Church of Christ, Scientist, Chicago, also members of the Mother Church, Boston. We have all of Mrs. Eddy's books also the *Journal* and *Sentinel*, and we are greatly helped by reading them.—Mrs. E. Fryant, Sault Ste. Marie, Can.

I have been wanting for a long time to write my demonstration to the *Sentinel*, to help fill the list of the proofs of God's power over error. This demonstration I am going to speak of was made last summer. My sister and I were out in the country, and we were going to get a drink at a wind-pump. The handle was unbolted, and in connecting the handle while the windmill was running, one of my fingers was caught under the handle and the joint was mashed. In a short time it was swollen twice its natural size. For a moment I thought of pain, and just as quick as I thought of Truth my finger stopped paining. My sister asked me if my finger hurt me; I said, "No, there is no pain in Truth." I then repeated the prayer in the Manual. When I got home error said there was sensation in matter, and I realized that God was an ever-present help in trouble. I forgot to say my finger was curved like a hook and was black and blue on both sides. I read Science and Health, and the swelling went down, but yet my finger was curved. This happened on Sunday, and on Wednesday Truth had done its work, for my finger was as straight as the other and there was not even a mark left. That proved to me that if we rely on God He will be an ever-present help in trouble.

I would like to speak of the children's Sunday School, which numbers about thirty earnest little workers for this Truth that makes us all free. My sister and brother and I have not missed our places in this little band for two years. We go a distance of two miles, and some of the children come six and ten miles. I give this, for I am always glad to hear from the children.

Lama Watkins, Lincoln, Neb.

My whole life had been a gloomy one, regularly despondent spells would come, making myself and all about me very unhappy. After years of poor health, nervous prostration came on, which caused great suffering for about three years. It is nearly four years since the Truth came into our home, that had been so filled with trouble and sickness; debts had accumulated, my husband and myself perfectly hopeless. Physicians said I could never be well. Now, I am a well woman; my housework and sewing taken up again; my three children kept well and happy. With them many cases of sickness have been quickly met, croup and measles among them. Other members of the family are receiving the benefits of this Truth.

We know that God is all, and we have only to acknowledge Him in all our ways to receive the blessing. We have our work to do that He has given us, "the strength is all His own." When ready to unite with the Christian Science Church, I asked dismissal from the Episcopal Church of Escanaba, Mich., of which I was a member and received a kindly letter in reply.

I truly desire to express my gratitude to our Leader, also to the Scientists here who have helped me up out of bondage "into the glorious liberty of the children of God."

Mrs. S. Corey, Green Bay, Wis.

Having read the *Sentinel* for many months, and having received so much help and encouragement from its pages, I feel it a pleasure to add a little to its columns by giving one or two demonstrations of the many benefits received from this blessed Truth, that grows dearer to me every day.

I had weak eyes. I had worn glasses at different times and for the last two years had worn them constantly. I consulted physicians and specialists, but received only temporary relief. Finally my eyes became so painful that I could scarcely endure it. I was advised to try Christian Science. I did not know anything about it, and only knew one person (my grandmother) who did. I went to see a healer and after the first treatment, I took off my glasses, and it was never necessary to wear them again. I was treated some time before being fully healed.

Another demonstration was that of spinal trouble. Two physicians told me that I would have to have an operation, and would probably be an invalid all my life. I was treated by the same faithful Scientist and was healed. I cannot express my gratitude to God .and to our Leader, Mrs. Eddy, who has shown me the way to Life, Truth, and Love.

Many other troubles have been met and each day makes its demands upon us.—Mrs. R. G. F., Bucyrus, O.

Two years ago, when I was carrying a heavy load, I slipped and strained myself, and was in great pain. I sent for the doctor, who came and said I would soon be well. After treating me for nine months, he said he could do no more, and ordered me to the hospital, where I stayed for a month. Finding they could do no more, I came home again, with the only thought to die. I lay for three months on a bed, sometimes better and sometimes worse.

One day I was looking from my window, and saw a lady visiting a sick woman. I sent and asked the lady if she would be so good as to come and see me. She came and read Science and Health to me, and brought me some Sentinels. After I had been treated two or three times I got well.

I am pleased to tell what true Christian Science has done for me. I thank God to think He gave me power to learn, and thank the dear lady and Christian Science.

Edith Palmer, Yates, Gloucestershire, Eng.

Two years ago the thought was given me that our supply is from on high. More than once since, the thought has proven to me the nothingness of seeming lack. I have never felt a lack in our supply of Christian Science literature, but during the past few weeks I have felt such a richness of material with which to work that the thought has come to mean far more than it has ever meant before. Our supply *is* from on high.

Meta Burdick, St. Louis, Mo.

Religious Items.

Arthur Bumstead, Ph.D., says in the *Universalist Leader*:—

"A period of strenuous commercialism and materialism must be followed sooner or later by a period of reaction. Such a reactionary movement is already in evidence both within and without the Church. . . . A religious system will ultimately gain ground or else lose its hold upon the hearts of the masses according as it supplies to them the spiritual food which they crave. It cannot be denied that the Church has oftentimes in the past been found wanting in this matter—that it has failed in instances where other systems have succeeded. . . .

"This reaction from materialism goes hand in hand with the Church's return to the teachings of Jesus in their simplicity, and the movement is bound to find expression not only in the higher type of spiritual thought and doctrine, but also in a deepening and broadening of the altruistic impulse, destined ultimately to revolutionize the condition and life of great masses of the world's population. . . .

"A broader tolerance, a more spontaneous acknowledgment of the good in other systems, is yet to be accorded its proper place in the catalogue of Christian virtues. Not only are denominational barriers to be broken down before a growing spirit of union and brotherhood, that the aggressive forces of Christianity may be mobilized for economical and united operation, but more than this, the powers that work for righteousness outside the pale of so-called orthodoxy must receive the recognition that is their due, for they also are the fruits of the Spirit. The prerogative of Israel has indeed passed to the Gentiles; those who do the will of the Father, whatever their creed or method or station, are acceptable in his sight; and the temple of the Spirit is the throbbing heart of humanity, whether Christian or pagan."

Prof. Francis G. Peabody says in part, in *The Congregationalist and Christian World*, in answer to the question, "Why am I an optimist?"—

"The world looks better the more closely it is seen. Social service renews social hope. He that wills to do the will comes to know the doctrine. He that loses his life for others' sakes comes to find his own life worth the living. The renaissance of philanthropy which our time is witnessing is the forerunner of a renaissance of faith. The way out of one's social discouragement is to contribute social courage. The secret of the worth and significance of life is hidden from many who are wise and prudent and disclosed to those who 'lend a hand.'"

And Philip S. Moxom of Springfield, replying to the same question, gives as his third reason,—

"Because life rises to higher levels and does not go back. The world is better to-day than it has ever been in the past. Both commerce and war grow more humane. The increasing sociality of the nations makes clearer the essential solidarity of the race. Brotherhood, long a sentiment, emerges in the consciousness of mankind as divine fact. Love and law, working toward one end, are disclosing their essential unity and drawing all life under their sway."

Bishop Andrews made a remarkable address to a class of candidates for religious orders in the Baltimore Methodist conference recently. He said that great religious thinkers were endeavoring to reconcile the doctrine of evolution with that of orthodox religion. He argued that the theory of evolution was, after all, very possible, supplementing the statement with his belief that God might have adopted this method of divine unfoldment, adding here and there a great stroke, a mighty miracle. He said further:—

"We do not think now as we did half a century ago. We see God and Christ and the Holy Ghost in a different light. I must confess that I see God differently from what I did in my younger years. I thought of Him as a personal being in some distant part of the universe. Now I think of Him as a power within us, and I am impressed beyond measure with the all-pervading beauty and glory of love as a means of transforming humanity. We see that it is love that accomplishes God's work in man."

We have great need in our day of what the apostles call sound men, fullgrown men, mature men, who can feed on meat, solid food, and have an appetite for it and a digestion for it, and who are not confined to a milk diet. Milk is good, but it is intended chiefly for infants. Christ said that when the Holy Spirit should come he would lead us into all the truth, and not simply into some narrow portion of it. We are in need of Christian teachers who can see the whole New Testament, and not some select part of it which is emphasized and over-emphasized until it becomes positive error and the source of serious danger. A half truth is often a whole lie. We need to know how to divide rightly the word of truth and reject none of it. In malice be infants, but in understanding be men—whole men, sane men, wholesome men.—*The Examiner.*

The world is languishing for a renewal of the life and power of Jesus Christ. Think of the risks he took, the daring he showed, the frank reliance he placed on God, his Father, and man, his brother, and truth his weapon, and love his motto. He ventured all on his confidence that men loved truth enough to take what he had to give; that they appreciated love enough to answer it with their own; that they recognized what is highest and best so heartily that they would not abandon or ignore it altogether. This is the very ground of his success. He has won his way with our souls because he believed in us. He has gained much because he ventured much. We, too, if we are to be his disciples, must follow hard after him.

REV. DR. JOHN COLEMAN ADAMS.

The wayside ministry is far more effectual than the ministry of the pulpit. Most preaching is done to those who need it least, and reaches the really needy only as it is distilled through the first hearers into lives which others see. If the people would only realize that at best the preacher can only place in their hands his sublime message; they must carry it out into the world; they must so interpret it by the beauty and sincerity and cheerfulness and kindliness of word and act that he who runs may read. A really Christian man going about his daily life as a constant ministry, reaches every week a larger congregation than the most popular preacher.

The Universalist Leader.

Whatever our past life may have been, at whatever point of life and progress we may be standing, if we would not destroy what we have still left of spiritual apprehension, if we have any desire to grow in spiritual growth, the first thing to be done is to face conscience—to be entirely honest with ourselves, to cease from excusing ourselves to ourselves, to cease from subterfuges and self-deceptions, and bring ourselves, our desires, our past lives, our aims, our characters into the light of conscience and of God, and there desire to have them searched, sifted, cleansed.—J. C. SHAIRP.

Fredk. S. Jewell has this in *The Church Standard*: "Between the neglect of the Bible, the misconstruction of the Bible, and the abuse of the Bible, Bible truth has often small chance for preserving its integrity or extending its influence. Of the three wrongs just mentioned, the first and the last may be regarded as the worst—both so essentially bad that each might almost be said to be worse than the other. But, if not one of the worst, the second must be pronounced the strangest, for it is the work of those supposed to be versed in the Bible."

The Independent states that the Biblical scholarship of Europe is now for the first time reaping some good results from the friendship which exists between the Sultan and the Kaiser. A special irade of the former recently published directs that the whole Christian literary contents which have recently been found in the famous Kubbeh-el-Chasme, or treasury of Constantinople, are to be sent to Berlin as a gift of the Sultan.

Wayland Hoyt, D.D., says in *The Homiletic Review*: "One, telling how the critical and deciding thing in the battle of Waterloo was the Château Hugomont, says: 'Similarly in every human being there is one element about which the battle of life is fought. It is the will. If good secures that will, good conquers; if evil secures that will, evil conquers. The whole contest of good and evil over our humanity is as to the control of the will.

In studying the Scriptures, we should not ask, "What have we usually been taught on this subject?" but, "What is the truth?" With this attitude toward the Bible, we may expect new revealings of truth to be made constantly; and if what we have learned in the past is the truth, these new revealings will be the old truths in a fuller and more glorious unfolding.

Advent Review and Herald.

Sainthood is a well-rounded character; it is meeting one's destiny grandly; it is health of soul; it is charitableness in action and thought; it is benevolence; it is a readiness to help the weak and fallen; it is innocent and frank geniality; it is the possession of the instinct of a fine courtesy; it is living in spiritual companionship with the manliest Man that ever lived.

GEORGE FRANCIS GREENE.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By. Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4 00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

H. Clay Evans, Commissioner of Pensions, will succeed William McKinley Osborne as consul-general to London. General Osborne passed away April 29. Mr. Evans will assume charge of his new duties about the first of June.

The office of consul-general to London carries a salary of $5,000, and in addition to this there are fees which add from $15,000 to $20,000 to the income. It is the most important and most lucrative post in the consular service, and is more sought after than any of the diplomatic posts except the ambassadorships.

Eugene F. Ware, of Topeka, Kan., will succeed Mr. Evans as Commissioner of Pensions.

The new Chinese exclusion law went into effect Monday, May 5, when the former law expired by limitation. The new law is without limitation as to date. The provisions of the law are to be extended to the Philippines and all the other insular possessions of the United States. The register of all the Chinese now in the islands is provided for, and they are prohibited from coming to the main land.

The Government receipts during the month of April were $45,215,390.29. The expenditures were $40,799,263.05, leaving a surplus revenue for the month of $4,416,127.24. So far in the current fiscal year there has been a surplus of $65,593,270.02. The present indications are that the surplus for the year will not reach the $100,000,000 mark as estimated by Secretary Gage.

The State and Treasury Departments have definitely settled the ambiguous points in the Chinese protocol with respect to the indemnity. There is no further obstacle to the beginning of business at the fiscal agency of the United States, which the International Banking Company will establish at Shanghai.

The battleship Illinois sailed from New York, April 30. She was commanded by Real Admiral A. S. Crowninshield, and will represent the United States navy at the coronation of King Edward. She has 37 officers and 698 men, the largest complement ever carried by a vessel in the United States navy.

After five years' service Secretary John D. Long closed his official career as head of the Navy Department, April 30. He was succeeded by Representative William H. Moody of Massachusetts. Secretary Long will resume the practice of law in Boston.

The news that President Roosevelt has expressed his endorsement of Governor Dole's administration has been received at Honolulu with general satisfaction by the business interests. It is hoped that political quiet will ensue.

The omnibus public building bill, which was introduced in the House last week, authorizes an expenditure of $15,000,000, and provides public buildings for every State in the Union except Delaware and Idaho.

Secretary Root has returned from Cuba. He has practically completed arrangements with Governor-General Wood and representatives of Cuba, whereby Cuba will be turned over to its inhabitants May 20.

George B. Cortelyou, secretary to the President, will become a member of the cabinet if the proposed Department of Commerce is established.

Secretary Hay has sent a letter to the Senate stating the necessity for postponing the Louisiana Purchase Exposition from 1903 to 1904.

Foreign.

The city of Santo Domingo, capital of the republic, has capitulated to the Revolutionists. With the exception of Puerto Plata, the insurgents have obtained possession of the entire republic. Vice-President Horacio Vasquez, leader of the revolutionists, has entered Santo Domingo at the head of the troops and President Juan I. Jiminez, whose government has been overthrown, has sought refuge in the French consulate.

The United States cruiser Cincinnati has started for Santo Domingo, and American interests will be fully protected whatever may be the nature of the government.

A party of Russian capitalists attended the meeting of the Interstate Cotton Seed Crushers Association which met at Dallas, Texas, last week. These capitalists are studying American methods of handling cotton and cotton seed products. They contemplate establishing a cotton seed crushing plant in Russia, and if it proves profitable will extend it to meet the demands of the trade in that region.

May 1 a great industrial and art exposition was opened at Dusseldorf, Germany, which is of more than local importance. The grounds cover an area of one hundred and fifty acres and contain one hundred and sixty structures representing a value of $2,500,000.

An organist who died in Sweden recently had held the position of choirmaster and organist in one church for seventy-two years without missing a service. He and his ancestors had played the organ in the same church for two hundred years.

A general meeting of the Boer leaders will take place at Verseniging, Transvaal, May 15. It is expected a final decision on the subject of the peace negotiations will be reached.

Severo, a Brazilian aeronaut, has constructed an airship having a capacity of 2,344 metres, four times as great as the airship of Santos-Dumont.

China has paid the fourth instalment of the indemnity to be paid on account of the Boxer troubles. The amount was $1,350,440.

Industrial and Commercial.

The Marconi Wireless Telegraph Company has purchased the inventions of Prof. Michael L. Pupin of Columbia University covering the attuning of transmitters and receivers, to protect the secrecy of messages sent by the wireless system. The contract has been let for the last of the equipment of the stations at Cape Cod and Cape Breton, and it is expected the company will be prepared to handle commercial business by August 1.

The Metropolitan National Bank of Chicago which will shortly be merged with the First National Bank, recently divided seventy-five thousand dollars among its employes. The gifts ranged from fifteen thousand dollars to the cashier down to fifty dollars to the messenger boys.

A. E. Stillwell, promoter and president of the new Salt Lake, Orient, and Mexican Railroad, has purchased about $2,500,000 worth of steel rails in England and Canada with which to lay the Mexican division of the road.

Practically one-half of the importations of the United States are now manufacturers' materials. The value this year will be about $425,000,000, the largest in the history of the country.

Railroad building is proceeding with remarkable activity in Texas this year. Eight great systems in the State will build about three thousand miles of track during the present year.

Beginning May 1, certain employes of the American Smelting and Refining Company will have a share in the profits of the company.

General.

An interesting feature of the religious exhibit at the World's Fair in St. Louis, will be the world-famous models of the Tempie of the Jews, which were prepared by Dr. Schick, a German archæologist, and perfected by his son-in-law, Dr. L. Schoenecke of Jerusalem. Dr. Schick went to Jerusalem some thirty years ago and made the Temple area his life-study. The fruits of his life-work are to be seen in the fine models made of thousands of pieces of wood and showing the various temples as this learned scholar believed them to be. Efforts have been made to secure these models for use at other expositions, but so far without success.

A committee of Buffalo citizens have obtained subscriptions and decided upon a plan whereby the famous electric tower and some of the main features of the Pan-American Exposition may be retained in Buffalo's park system. The tower may be placed on the lake front.

The Southern Pacific Railroad is building a trestle bridge across the great Salt Lake. The bridge will be about twenty-five miles long and will save forty-one and a half miles of the distance.

The annual congress of the Sons of the American Revolution was held at Washington last week. Massachusetts has 1,424 members, the largest enrolment of any State.

The Supreme Court of Indiana rules that four cents is the legal street car fare in the State, and that the three-cent fare law is invalid.

Excluding navies, the estimated value of the shipping of the world is $294,000,000, with all but $67,000,000 of this value owned and controlled by the nations of Europe.

Paderewski cleared $125,000 during his recent American season of ten weeks. This was his fifth season.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

A Correct View of Christian Science.

New York, April 15, 1902.

Editor of *The Commercial Advertiser.*

Sir:—May I be allowed to call attention in your esteemed columns to the purely fantastical picture of Christian Science teaching and practice drawn by a member of the bar before the Society of Medical Jurisprudence last night? Judging by the report in your issue of April 15, a little study of original sources and some familiarity with the actual results of Christian Science would have saved him from such curious errors. He states of Christian Science: "It is not my purpose to go into the question whether the Scriptures afford any basis for its theories." But this question is of supreme importance, and unless the member of the bar can explain how Jesus, his disciples, and the apostles of the early Christians healed the sick, he must not attempt to pass judgment upon the Christian Scientists who are trying to follow Christ's command to "heal the sick" as well as save the sinner.

The mental, moral, and physical regeneration accomplished by Christian Science is a fact, established by the personal experience of a great multitude of earnest and intelligent people. It is being demonstrated daily and hourly, here and abroad. Would it be right for those who have some understanding of Christian Science to withhold their help, when it is requested? I do not think the member of the bar would care to take such a responsibility upon himself, in view of the sorrow and misery, sin and sickness which we see on every hand. Would he advise Christian Scientists to give their services gratis, instead of accepting the small remuneration which is offered them? Then, indeed, the members of the medical profession might justly consider that they had a real grievance.

As a matter of fact, every well-informed person knows that Christian Scientists do not practise medicine, but refer all those who want medical treatment to regular physicians, who have spent years in acquiring the necessary knowledge. Christian Scientists try to practise what all true religion teaches; namely, a complete reliance upon God as the Principle governing the universe, including man.

The member of the bar should talk with some of the persons who have been saved from the grave after all material remedies had failed, then he would not find it in his heart to speak disparagingly of Mrs. Eddy. If he associated with Christian Scientists he would discover that there were no "preachers" among them, but that the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, are their only preachers. He would learn that Christian Science churches are incorporated in the ordinary way, with responsible boards of trustees and treasurers in charge of the church funds, and that these funds are collected and disbursed as in the churches of other denominations with which I am familiar. It is ridiculous to suppose that the Readers of Christian Science churches are more susceptible to mercenary motives than the pastors or clergymen of other Christian denominations.

The member of the bar is quite correct in stating that "the mind is a delicate instrument . . . subject to malign influences," and it is this very influence, which he describes in the first part of his address as "hypnotic suggestion," against which Christian Science battles, with such success. He should be glad to know that a method has been discovered of coping with the latent evils which are now coming to the surface, and which cloak themselves under the terms of mesmerism and hypnotism, personal magnetism, etc.

These phenomena are produced by the exercise of will-power, but Christian Science deprecates and deplores the exercise of such methods. The Christian Science text-book on page 144 (Rev. Ed.), contains the following conclusive statement:—

"Will-power is not Science. It belongs to the senses, and its use is to be condemned. Willing the sick to recover is not the metaphysical practice of Christian Science, but is sheer animal magnetism. Will-power may infringe the rights of man. It produces evil continually, and is not a factor in the Science of Being. Truth, and not corporeal will, is the divine power which says to disease, 'Peace, be still.'"

Hypnotism may be used, consciously or unconsciously, from evil motives or for evil purposes. Christian Science can only be used for good. The physical healing accomplished by Christian Science is, in every case, the after effect of a spiritual uplifting and a general mental and moral betterment.

The member of the bar should also know that Christian Science does not teach that sickness is "the mere wind of imagination." Mrs. Eddy writes, in one of her works: "Disease is more than imagination; it is a human error, a constituent part of what comprise the whole of mortal existence,—namely, material sensation and mental delusion" (No and Yes, p. 12). In another work Mrs. Eddy writes: "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. It is more than fancy, for it is solid conviction" (Science and Health, Rev. Ed., p. 460).

The beneficent results of Christian Science are not published in the public prints, but there are probably few of the readers of your esteemed paper who do not know of cases of healing, either in their own families or among their friends. A vast body of witnesses know the truth of Christian Science from personal experience and are grateful.

Yours truly,
W. D. McCRACKAN.
In *The Commercial Advertiser.*

In Reply to Rev. Palmer.

Editor *Tribune.*

Dear Sir:—On March 24 you published a synopsis of a sermon by Rev. Ray Palmer of Sunday, March 23, in which he makes many incorrect statements concerning the teachings of Christian Science, some of which are: It is against the Bible, it is un-Christian, it is heathen in origin, it denies the atonement of Jesus Christ, etc.

Jesus Christ explained his earthly mission in his answer to John's inquiry, "Art thou he that should come, or do we

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

look for another?" He answered, "Go and shew John again the things which ye do hear and see: the blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them. And blessed is he whosoever shall not be offended in me." Thus he defined the Christ mission. Again, he said to his disciples "Verily, verily, I say unto you, he that believeth on me, the works that I do shall he do also." Again, "Go ye into all the world, and preach the gospel to every creature. He that believeth and is baptized shall be saved; and he that believeth not shall be damned. And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing it shall not hurt them; they shall lay hands on the sick and they shall recover. . . . And they went forth, and preached everywhere, the Lord working with them, and confirming the work with signs following."

The refutation of the belief and oft-repeated statement that Christian healing belonged solely to Jesus and his immediate disciples is established by the wonderful conversion and subsequent practice of spiritual healing by St. Paul, who was not an immediate disciple of Jesus.

Profane history shows that this healing work continued for about three hundred years after the ascension, or until the temporal power gained ascendency in the Church, thus superseding the purely spiritual power exercised by Jesus and his apostles, and which is again becoming practical through the teachings of Christian Science, and in accordance with Jesus' statement, "Lo, I am with you alway, even unto the end of the world." Christian Science has its basis solely in the spiritual import of the Bible, and especially in the teachings and practice of Jesus Christ and the apostles, and, therefore, could not consistently be "against the Bible."

The stereotyped statement made by theologians that Christian Science is neither Christian nor Science has been fully answered so many times that the expression is becoming an absurdity. Every Christian should know that the science or knowledge of Christianity shows how to pray the "effectual fervent prayer" that "availeth much." It is this kind of prayer that heals the sick, and the fact that there are those who call themselves Christians, and who do not understand the teachings of Jesus Christ sufficiently to heal the sick, is no argument against those who are striving to live higher and holier lives, and who are again learning how to preach the gospel with signs following. It would seem that a work of this character should be far removed from jealous slander, even though the Master said "The time cometh, that whosoever killeth you will think that he doeth God service."

The writer can state with authority that Christian Science does heal the sick. There are thousands of well-authenticated cases of healing from all forms of disease, as well as from the worst forms of vice and sin, and if the Rev. Palmer still feels in his heart that he has any doubt about this, I shall be glad to furnish him with names and addresses of a number of people to whom he may write, or on whom he may call personally. The mystery is that these people who have the most to say concerning Christian Science seem to be totally blind and ignorant as to what is going on around them.

As to the reality of matter, only a gross materialist would argue for the substantiality of the material world. The Christian preacher or ethical teacher understands that the Saviour of mankind, as foreshadowed by seer and prophet of the Old Testament, would necessarily be one who would establish a spiritual rule, setting at nought the temporal and corruptible; and the Saviour of the New Testament, Jesus Christ, laid down the conditions of this spiritual rule in the Sermon on the Mount, and practised his rule in his works of mercy, never depending for his results upon any belief in matter.

The article quotes Rev. Palmer as saying that Christian Science is un-Christian, and denies the existence of sin, sickness, and death. Christ overcame sin, sickness, and death, thereby proving their unsubstantiality, and consequent unreality. He said he came not to destroy but to fulfil; he therefore established the permanency of good, health, and life. If evil is real, then Church and ethical institutions are presuming to annul what God made. If sin, sickness and death are real, they must be good, and God must have made them so, since it is said, "He made all that was made, and all that He made was good." Then *materia medica* blasphemes in relieving suffering and prolonging human life.

Objection is also found to the statement in Christian Science that "Heaven is not a locality." This we believe to be in accordance with the teachings of Jesus Christ. We cannot conceive of heaven being where God and His kingdom are not. Jesus Christ described the Kingdom of Heaven and the Kingdom of God in figurative language, showing it to be spiritual growth, as in the parable of the mustard seed, and the parable of the leaven hidden in the meal, and located it within the possibility of every individual consciousness here and now. When he was demanded of the Pharisees "when the Kingdom of God should come, he answered them and said, The Kingdom of God cometh not with observation: Neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you."

Christian Science spurs us on to search the Scriptures, that we may understand God better and demonstrate this understanding. Paul said "For the kingdom of God is not in word, but in power," "And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power."

Reply to Article by J. L. H.

Editor *Elk County Citizen*.

Your issue of March 26 is before me in which I find an article from J. L. H., commenting on Mr. Kimball's lecture, wherein he attempts to point out the "Fallacies" of Christian Science, and also promises the public further education along this line.

Our critic says: "There can be no science in Christianity," and "It is impossible to know God." Is it not just as proper, and of much more value, for us to learn the great truths of Christianity as taught by Jesus, that we can practise them daily in our lives, as to learn material sciences?

Many persons seem to think that it is wrong to attempt to know anything more of the Scriptures than our fathers knew; that what was good enough for them is good enough for us; but we do not seem to take that view of our progress in the material things about us, and hail with delight all the inventions for the good of mankind. Why should we not be as much interested in knowing spiritual things—the things of God?

Assuming that our critic accepts the Bible as the word of God, let us see what it has to say about knowing God. See in 1 Chronicles, 28 : 9, David's charge to Solomon. Also Psalm 46 : 10 and Hosea, 2 : 20 about knowing God. Then in the New Testament read, John, 10 : 14, Hebrews, 8 : 11, Matthew, 5 : 48, and John, 17 : 3, where the Master says, "And this is life eternal, that they might know thee the only true God, and Jesus Christ whom thou hast sent."

When are we to begin to know God? Most assuredly now; and only as we gain that practical understanding of God as ever-present Good that enables us to "Judge not, that ye be not judged," and to love our neighbor as ourself; that teaches us that God never had a favored people, but

Digitized by Google

loves, cares for, and protects His children to-day as He ever did, are we beginning to know God. This knowledge gives us happiness, health, and harmony now.

Our critic says Christian Science cannot be demonstrated. It can be and is demonstrated every day, in healing the sick, in reforming the sinner, and revealing God to the infidel. Because there may be failures, is no evidence that Christian Science cannot be demonstrated or that it is a "false science," any more than the failure on the part of some to demonstrate mathematics proves it to be undemonstrable.

Our critic, no doubt, is sincere in his belief that no one has been healed by Christian Science aside from "suggestion," but those who have been given health and happiness by Christian Science, when all material means had failed, know that it was nothing but the healing power of God, which is vouchsafed to all God's children, when they are ready to trust Him above all else.

If J. L. H. will carefully read Matthew, 17 : 14–21, he will see he is mistaken in the statement that the apostles healed "instantly." They sometimes failed, though they had Jesus with them as a teacher. But he told them why they failed: "Howbeit this kind goeth not out but by prayer and fasting." Christian Scientists are learning that it is by the prayer of faith—not a blind faith, but an understanding faith that God is all—and fasting, that is, by abstaining from dependence upon material things for our sustenance, our health, happiness, and harmony—that salvation from sin, sickness, and all error is accomplished; knowing that if we seek first the kingdom of God and His righteousness all these things shall be added. So we are not discouraged but labor on, trusting God as our deliverer.

It is true Mr. Kimball is not an educated physician, but Christian Science *has* healed cancer and many other diseases pronounced incurable.

Jesus worked only among the people who wanted his healing; and in his own country it is said, "And he did not many mighty works there because of their unbelief." Neither are Christian Scientists inclined to impose their methods of healing upon those who do not believe, but are more than glad to bring God's healing power to the consciousness of any who desire it. If the people "who do not think" are the ones who accept Christian Science, there will soon be a vast army of unthinking people, for it is growing rapidly in numbers. But this statement is a mistake, for it is those who, like our critic, first take exceptions, then think and study till they see by the changed lives of their friends that there is something in practical Christianity, and are ready to join with the Psalmist in singing praises to God, "Who forgiveth all thine iniquities; who healeth all thy diseases." EDWARD H. KEACH.

In the *Elk County* (Kan.) *Citizen.*

Gladness.

If living is a joy to you,
Because your soul is sound,
And life seems good and sweet and true
That you have haply found,
Then sing no false and hopeless strain
Of doubting and despair,
But lift your voice all clear and plain
And sing that life is fair!

Sing of its beauty and its worth,
Its bright and sunny skies.
Sing all the loveliness of earth
As seen by happy eyes;
For then the souls despondent born
Shall find them brave and strong,
Their way less gloomy and forlorn
Because of your glad song.

RIPLEY D. SAUNDERS, in *St. Louis Republic.*

The Lectures.

At Salt Lake City, Utah.

A crowd which filled every seat in the Salt Lake Theatre assembled last night [April 13] to hear the doctrines of Christian Science presented by Edward A. Kimball of Chicago, a lecturer sent out by the Mother Church, The First Church of Christ, Scientist, of Boston. Prominent members of the local church were seated on the stage. The keenest attention was manifest throughout the address, which was a clear and convincing presentation of the beliefs advanced by Mrs. Eddy and her followers.

Salt Lake (Utah) *Tribune.*

Mr. Frank B. Stephens, a prominent lawyer and former city attorney, introduced the lecturer as follows:—

Ladies and Gentlemen:—I deeply appreciate the honor conferred upon me when I was requested to introduce the speaker of the evening. It is a double honor; first, because of the high character and well-known ability of the distinguished gentleman who will address you, and still more because of the lofty purpose he represents.

Physicians of all schools have the same object, clergymen of all denominations work for the same end, and all fair-minded persons are willing to listen to the other side.

The world is hungry for relief from the tyranny of sickness and sin. Humanity has always been struggling to escape from bondage. The greatest literary and forensic efforts in every age have been devoted to the cause of personal, political, and religious liberty. For this cause the man of Galilee died. His cross is the central figure in history; and while ambition, avarice, injustice, and oppression seem to have run riot as well since as before the time of our Saviour, yet from that central figure the pure, calm rays of divine love have shone down through the centuries, gradually melting away the stormy passions of the human heart. Conspicuous in every age have been noble men and women, who have proclaimed the eternal verity of divine love and truth; their paths have not been strewn with flowers. Socrates was compelled to drink the hemlock cup; Jesus was crucified; Savonarola was burned; Martin Luther was imprisoned, and Abraham Lincoln was indeed our martyred President.

There was a time when it was not safe to proclaim a scientific truth in the material world; once it was not safe to say "the world is round." But now we live in an age of progress. Now the man or woman who sincerely claims to be able to present a new and valuable thought in any department of investigation is sure of intelligent and attentive listeners. For many years Mrs. Eddy and her students endured the shafts of ridicule, and the attacks of minister, layman, and legislator; now the most intelligent citizens, the most prominent educators accord her representatives a respectful hearing.

The gentleman who will address you this evening recently spoke at Lincoln, under the auspicious patronage of E. Benjamin Andrews, Chancellor of the State University, and former president of Brown University. The Hon. Jacob Schurman, President of Cornell University, who was, as you know, on account of his great ability and unimpeachable integrity, chosen by President McKinley to be chairman of the Philippine Commission, recently invited Mr. Carol Norton to deliver a lecture upon Christian Science to the students of Cornell University.

The last half century has been wonderfully rich in benefits to humanity, and noble women have been especially conspicuous in their efforts for the uplifting of mankind; often what they have accomplished has been in the face of obstacles laid in their way by the hand of man. We are accustomed to think that men freed the slave, but we should not forget that while statesmen were debating the Missouri Compromise, while ministers of the gospel were disputing

Digitized by Google

among themselves whether or not slavery was a divine institution, Harriet Beecher Stowe was touching with inspired pen, responsive chords of justice, mercy, and love in the great American heart, and creating thereby the national sentiment in favor of freedom which actually accomplished the result. While men are spending millions in the construction of ingenious devices for destroying their fellowmen, Clara Barton, under the sign of the Red Cross, is carrying a message to humanity, which will do more towards preventing war than all the engines of warfare combined. I need not speak of the work of Frances Willard in the cause of temperance, nor that of Mary A. Livermore and Julia Ward Howe in the uplifting of their sex. It was Sarah Flower Adams who wrote that grand and helpful hymn, "Nearer, my God, to Thee." The poems of Alice and Phœbe Carey have brought comfort to many an aching heart. These women are among those who have kept bright the rays of truth and love shining from the cross of Christ.

Many years before Mrs. Eddy was known to the world, that purest and best of American poets, Henry W. Longfellow, with prophetic vision, said:—

A lady with a lamp shall stand
In the great history of our land,
A noble type of good,
Heroic womanhood.

Such a lady bearing the lamp of truth, those who learn from Mary Baker Eddy believe her to be. Her message, if true, brings to the world, combined in one, all the uplifting efforts of the noble women I have mentioned. Concerning her and her teachings the speaker of the evening will address you. I esteem it an honor, and I take pleasure in presenting to you Mr. Edward A. Kimball, a member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston.—*Correspondence.*

At Pittsburg, Pa.

Carol Norton of New York, a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, delivered a free lecture at the Pittsburg Carnegie Music Hall last night [April 25] on Christian Science. There were few vacant seats in the hall, the audience being an unusually large and fashionable one. The lecture lasted over an hour, and Mr. Norton was listened to with the closest attention throughout.

The lecture was held under the auspices of First Church of Christ, Scientist, of Pittsburg. Mr. Norton was introduced in a very happy fashion by Col. Samuel Harden Church.—*Pittsburg* (Pa.) *Gazette.*

The remarks of Colonel Church were in part as follows:—

My information concerning Christian Science has been gathered, in part, from its critics, Mark Twain, Mr. Dooley, and some of graver speech, and in part from some whom I believe you will permit me to say, in all candor, are its over-zealous devotees.

On the one hand we have heard extravagant denunciation, and on the other hand, what seemed like exaggerated claims. Some extreme things in relation to medicine and surgery have been reported in the name of Christian Science, which have bothered me somewhat in my desire to know the truth about it, and these considerations, which must have entered into the minds of many others of my fellow-citizens will, I am sure, make us welcome an opportunity to turn away from both critics and zealots and listen attentively to the authoritative voice of Christian Science through its official mouth-piece. Surely a system which has so many faithful and intelligent followers must have a large measure of divine truth as its basis. What that truth is we shall shortly hear. Faith comes by hearing. And in this material age, when the ambition of many is for wealth and luxury, it is a blessed thing to know that there are good men and good women striving after the development of a higher spiritual life and a larger Christian faith.

The divine light has pierced the human heart and impelled it to action in many ways since the time when it moved one of its first children, Father Abraham, and the day has long passed when men may scoff at any just form of its manifestation. Every man ought to follow it to its ultimate end and his footsteps cannot go very far astray.

In all kindliness, then, and sympathy, and with open minds, whether we be for it or against it, we shall listen to the speaker to-night, who is well grounded in that faith which has been a healing solace to thousands of the best men and women in this world. The subject is, "Applied Christianity is Christian Science." It is a noble caption; it is a bold claim, and I hope he will be able to prove his thesis true.

I have pleasure, therefore, in presenting to you the lecturer of the evening, Mr. Carol Norton of New York.

Correspondence.

At Ogden, Utah.

The lecture on Christian Science delivered by Edward A. Kimball of Chicago, at Dignan's Hall last night [April 22], was a revelation to many people. The management of the hall, not expecting so great an attendance, had not provided sufficient chairs to seat the people. The Scientists provided a wagon load of chairs from the church after the chairs in the hall were all occupied, and many went away rather than stand, and some stood through the entire lecture, which lasted nearly two hours, the audience giving almost breathless attention.

Judge Rolapp of the District Court was to have introduced the speaker, but missing the evening train from Salt Lake, did not get home in time. The speaker was introduced by Mr. M. H. Lincicome, First Reader of the local Christian Science Church.—*The Standard,* Ogden, Utah.

At Butte, Mont.

The Auditorium was well filled last evening [April 20] and the large audience was much edified with the lecture by Edward A. Kimball of Chicago, a member of the Board of Lectureship of the Mother Church, in Boston. The lecturer was introduced by Rev. W. C. Shippen, who bespoke for the speaker that kind consideration of all thoughtful and intelligent persons, no matter how much they might differ with him as to the peculiar beliefs of the Christian Scientists.

The subject of the evening was, "The Cause and Scientific Cure of Disease." There was no admission charge and no collection was taken up. The audience was held in rapt attention for nearly two hours, the lecture being most interesting and instructive throughout.

The Butte (Mont.) *Miner.*

At San Antonio, Tex.

San Antonio's citizens were afforded the privilege of a lecture on Christian Science by Mr. Edward A. Kimball of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, on the evening of March 27. Turner Hall was well filled with an appreciative audience. Mr. Kimball was introduced in a few well-chosen and appropriate remarks by the Rev. Homer T. Wilson, pastor of the Christian Church.—*Correspondence.*

At Great Falls, Mont.

A fair-sized audience was at the Grand Opera House last evening [April 19] to hear the lecture by Edward A. Kimball, C.S.D., of Chicago, on Christian Science. The speaker was introduced by the local First Reader, Mrs. W. G. Ingram, who bespoke for him close attention,—and that he received for more than an hour, his lecture being very interesting.—*Great Falls* (Mont.) *Tribune.*

Digitized by Google

At Canon City, Col.

A large audience greeted Mr. Edward A. Kimball of Chicago, at the Opera House, Tuesday evening [April 8] in his lecture on Christian Science. The speaker was introduced by Judge M. S. Bailey, who in his usual happy manner paid a tribute of regard to the people of this belief among us. He had watched them, he said, for many years, and could testify to the earnestness, happiness, and liberality of these people, who are among the best citizens we have. The address was listened to with interest to the close, and there were many expressions of appreciation, even from those who do not accept the doctrine as a whole.

Canon City (Col.) *Times.*

At Billings, Mont.

The lecture given by Mr. Edward A. Kimball of Chicago, a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, at the Opera House, Tuesday night [April 15] was largely attended and those present had the pleasure of listening to a logical and beneficial address. The subject was ably handled, and from the close attention paid, it would indicate that many were deeply impressed.—*The Billings* (Mont.) *Times.*

Lectures at Other Places.

At North Yakima, Wash.—William G. Ewing, March 9.
Jennings, La.—Silas J. Sawyer, March 23.
Fairfield, Ia.—Edward A. Kimball, January 19.
Superior, Wis.—Edward A. Kimball, February 22.

Notices.

Board of Education.

Those who are selected for examination in the June class will be duly notified. Those not selected will understand they are not called to the class.

It is probable that a meeting of the graduates of the normal classes which have been held under direction of the Board of Education, will take place during the third week in June, 1902, in Boston, Mass.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901, Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist, in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Christian Science before a Society of Medical Jurisprudence.

The New York Times recently published a synopsis of a paper read by Charles M. Demond, Esq., of the New York Bar, before a meeting of the Society of Medical Jurisprudence of New York City. The paper was entitled, "Legal Prohibition of Unprofessional Mental Healing."

"Mr. Demond," the report says, "described Christian Science as a species of charlatanism dangerous to the community when it jeopardized life or health by teaching that medicines were useless, and that even surgery was often unavailing and could be replaced by praying."

Had we kept aloof from Christian Science, neglecting or refusing to look into it, it may be that we would have held views similar to those of this gentleman; but when we were compelled to admit from observation and indisputable personal experience that Christian Science prayer healed where both medicine and surgery had wholly failed, our point of view changed, and *nolens volens* we became a believer in the healing efficacy of prayer.

We feel absolutely certain that had Mr. Demond's experience been like ours his point of view would have been the same as our own. We are unable to see how it could be otherwise.

Mr. Demond makes a square issue between medicine and surgery, and prayer. Lawyerlike he does not circumlocute or evade. He boldly urges his issue upon his hearers and advocates legislation in support of his contention. According to the newspaper account, his hearers, the Medical Association, were with him. A committee was unanimously appointed to draw up a bill for presentation at the next session of the legislature embodying the views of the members of the society, which views appear to be, as stated by the president, Theodore Sutro, the prevention of "the further spread of dangerous Christian Science doctrines."

We might say much about this proposed action, but we shall refer to it, for the present, only briefly. Mr. Demond's recommendations were unanimously adopted by the Medical Association. Therefore the Medical Association unanimously adopted the issue that prayer for the healing of the sick must be stopped by legislation. This carries with it the connate proposition that the Medical Association is the censor of and for the people in their choice of healing methods, as well as the implied proposition that the Association and the curative system for which it stands constitute the only healing method having a right to recognition or existence. This is a remarkable proposition to urge upon the public, through legislative bodies, in the twentieth century. This same proposition was so repeatedly repudiated by the sober, just, and intelligent legislative thought during the closing years of the nineteenth century that its attempted revival in the twentieth sounds much like a wail from the dark ages.

The issue this Medical Association and its legal representative make, plainly put, is this: Shall the people of this free country pray for the sick as well as the sinful, or shall they not? Have the people of this country the right to obey and practically adopt into their lives the precepts of Holy Writ and the tenets of the religion of Jesus Christ, or have they not?

Christian Science has many times successfully met this issue in the past; it has no fear of the future.

Over against the proposition of Mr. Demond we feel almost compelled to put a few pungent words of the Hon. Frank S. Streeter of Concord, N. H.,—a worthy compeer of the former, we feel sure. In the course of an able argument in a suit in one of the courts of Concord, wherein an attempt was made to collect damages for alleged malpractice because a Christian Science minister during a short time offered prayers for the recovery of a sick person, Mr. Streeter laconically said:—

"Why was this suit brought? Was it brought for damages, or for making an attack on a religion which to-day has one million followers?

"The attack is an attack upon the theory that disease may be cured by prayer.

"From the time of Mrs. Spead's first attack until Mr. Tomlinson's services were first requested, she was under the general care of Dr. McMurphy. This term of treatment amounts to six hundred and sixty days.

"Mr. Tomlinson treated her four days. She paid him one dollar, and now wants this jury to award her damages in the sum of six thousand dollars, because a Christian minister for four days sent up his prayers to Almighty God on her behalf.

"I ask you with all candor where did she get her hurt during the four days that Mr. Tomlinson was treating her?

"The fundamental thing which Mr. Tomlinson taught her was that he relied solely on the power of God, sought by prayer, to effect relief; and that in trying to help those who seek his services he uses spiritual means alone. She was fully informed that he made no pretensions to the knowledge and skill of the ordinary medical practitioner. This is an assault on the Christian religion.

"You will be asked to say that prayer is fraud.

"Take the proposition which these two counsel say is a lie. Mr. Tomlinson's proposition is that the power of God can cure sickness through prayer. I don't envy the condition of mind of men who stand up and say it is a lie. That the power of God can't heal. I don't envy these gentlemen the honor of standing before the courts of New Hampshire and a jury and charging that when a Christian man says the power of God can be invoked to cure disease, he is not right; that such a man is a fraud, a humbug, a cheat, a charlatan, and a quack, just because he claims that prayers will cure. They are welcome to the glory they might get out of the establishment of such a statement. We might as well meet the issue now as any time, and the people who support these churches might as well have the case decided as to whether a man who believes in prayer is a hypocrite; who believes that prayer will heal is a fool.

"When President McKinley was stricken down, almost every head in the broad land was bowed in prayer, and are you prepared to say that those who prayed are humbugs?

"I tell you, gentlemen, there is something in me that rebels against an assault on this exercise which I cannot help regarding as sacred. Within recent years we have had our state advertised as a place of abandoned farms; then later we were pictured as decaying fast religiously, our rural religion being held up as most deplorable.

"But one more thing need be added, and that would be to have a jury of New Hampshire citizens say that the man who believes in prayer to God is a cheat, and that the corner-stone of the Christian religion is a fraud."

Mr. Demond in his remarks before the Association quoted some facetious references to Christian Science by the supposititious Mr. Dooley. He omitted, however, Mr. Dooley's much more facetious references to the practice of medicine and surgery. It seems not out of place, under the circumstances, for us to supply the ommission at least in part.

Digitized by Google

We do not do this so much because of the wit displayed, as for the reason that, running through Mr. Dooley's supposed animadversions, there is a vein of deep and sober philosophy which furnishes food to thinking people.

The imaginary Mr. Dooley is made to discourse with his imaginary friend Mr. Hennessy about Christian Science. After listening with much interest Mr. Hennessy interjects the remark: "Sure 'tis all foolishness." To which Mr. Dooley sagely replies:—

"Well, sir, who can tell? If it wasn't f'r medical pro-gress, I'd be sure th' Christyan Scientists was wrong. But th' doctor who attinded me whin I was young'd be thought as loonatical if he was alive to-day as th' mos' Christyan Scientist that iver rajooced a swellin' over a long-distance tillyphone. He inthrajooced near th' whole parish into this life iv sin an' sorrow, he give us calomel with a shovel, bled us like a polis captain, and niver thought anny medicine was good if it didn't choke ye goin' down. I can see him now, as he come up dhrivin' an ol' gray an' yellow horse in a buggy. He had whiskers that he cud tie in a knot round his waist, an' him an' th' priest was th' on'y two men in th' neighborhood that carried a goold watch. He used to say 'twas th' healthiest parish in th' wurruld, barrin' hangin's an' thransportations, an' thim come in Father Hickey's province. Ivrybody thought he was a gr-reat man, but they wudden't lave him threat a spavin' in these days. He was catch-as-catch-can, an' he'd tackle annything fr'm pneumony iv th' lungs to premachure baldness. He'd niver heerd iv mickrobes, an' nayther did I till a few years ago, whin I was tol' they was a kind iv animals or bugs that crawled around in ye like spiders. I see pitchers iv thim in th' pa-apers with eyes like pooched eggs till I dhreamed wan night I was a hayloft full iv bats. Thin th' dock down th' sthreet set me r-right. He says th' mickrobes is a vigitable, an' ivry man is like a conservatory full iv millyons iv these potted plants. Some ar-re good f'r ye an' some ar-re bad. Whin th' chube roses an' geranyums is flourishin' an' liftin' their dainty petals to th' sun, ye're healthy, but whin th' other flower gets th' best iv these nosegays, 'tis time to call in a doctor. Th' doctor is a kind iv gardner f'r ye. 'Tis his business f'r to encourage th' good mickrobes, makin' two pansies grow where wan grew befure, an' to hoe out th' Canajeen thistle an' th' milkweed.

"Well, that sounds all r-right, an' I sind f'r a doctor. 'Dock,' says I, 'me vilets ar-re thinnin' out, an' I feel as though I was full iv sage brush,' I say. Th' dock puts a glass chube in me mouth an' says, 'Don't bite it.' 'D'ye think I'm a glass eater?' says I, talkin' through me teeth like a Kerry lawyer. 'What's it f'r?' I says. 'To take ye'er timprachoor,' says he. While I have th' chube in me mouth he jabs me thumb with a needle an' laves th' room. He comes back about th' time I'm r-ready to sthrangle, an' removes th' chube. 'How high does she spout?' says I. 'Ninety-nine,' says he. 'Good hiven,' says I. 'Don't come near me, dock, or ye'll be sunsthruck,' I says. 'I've just examined ye'er blood,' he says. 'Ye're full iv weeds,' he says. Be that time I'm scared to death, an' I say a few prayers, whin he fixes a hose to me chest an' begins listenin'. 'Annything goin' on inside?' says I. ''Tis ye'er heart,' he says. 'Glory be' says I, 'what's the matter with that ol' ingine?' says I. 'I cud tell ye,' he says, 'but I'll have to call in Dock Vinthricle, th' specyalist,' he says. 'I oughtn't be lookin' at ye'er heart at all,' he says. 'I niver larned below th' chin, an' I'd be fired be th' Union if they knew I was wurrukin' on th' heart,' he says. So he sinds f'r Dock Vinthricle, an' th' dock climbs me chest an' listens, an' thin he says: 'They'se something th' matther with his lungs, too,' he says. 'At times they're full iv air, an' again,' he says 'they ain't,' he says. 'Sind f'r Bellows,' he says. Bellows comes an' pounds me as though I was a roof he was shinglin', an' sinds f'r Dock Laporatteny. Th' dock sticks his finger into me side. 'What's that f'r?' says I. 'That's O'Hannigan's point,' he says. 'I don't see it,' says I. 'O'Hannigan must have had a fine sinse iv humor.' 'Did it hurt?' says he. 'Not,' says I, 'as much as though ye'd used an awl,' says I, 'or a chisel,' I says, 'but,' I says, 'it didn't tickle,' I says.

"He shakes his head an' goes out iv th' room with th' others, an' they talk it over at tin dollars a minyit, while I'm layin' there at two dollars a day—docked. Whin they come back, wan iv thim says: 'This here is a mos' inthrestin' case, an' we must have th' whole class take a look into it,' he says. It means me, Hinnissy. 'Dock,' he says, 'ye will remove its brain. Vinthricle, ye will have its heart, an' Bellows, ye will take its lungs. As f'r me,' he says, 'I will add wan more vermiform appendix to me belt,' he says. ''Tis sthrange how our foolish pre-decessors,' says he, 'niver got on to th' dangers iv th' vermiform appendix,' he says. 'I have no doubt that that's what kilt Methusalem,' he says. So they mark out their wurruk on me with a piece of red chalk, an' if I get well, I look like a rag carpet. Sometimes they lave things in ye, Hinnissy. I knowed a man wanst, Moriarty was his name, Tim Moriarty, an' he had to be hemstitched hurriedly because they was goin' to be a ball game that day an' they locked up in him two sponges, a saw, an icepick, a goold watch an' a pair iv curlin' irons belongin' to wan iv th' nurses. He tol' me he didn't feel well, but he didn't think annything iv it till he noticed that he jingled whin he walked.

"That's what they do with ye nowadays, Hinnissy. Ivry time I go into Dock Cassidy's office, he gives me a look that makes me wisht I'd wore a suit iv chain armor. His eyes seem to say, 'Can I come in?' Between th' Christyan Scientists an' him 'tis a question iv whether ye want to be threated like a loonytic or like a can iv presarved vigitables. Father Kelly says th' styles iv medicine changes like th' styles iv hats. Whin he was a boy, they give ye quinine f'r whativer ailed ye, an' now they give ye sthrychnine an' nex' year they'll be givin' ye proosic acid, maybe. He says they're findin' new things th' matther with ye ivry day, an' ol' things that have to be taken out, ontil th' time is comin' whin not more thin half iv us'll be rale an' th' rest'll be rubber. He says they ought to enforce th' law iv assault with a deadly weepin again th' doctors. He says that if they knew less about pizen an more about gruel, an' opened fewer patients an' more windows, they'd not be so manny Christyan Scientists. He says th' diff'rence between Christyan Scientists an' doctors is that Christyan Scientists thinks they'se no such thing as disease, an' doctors thinks there ain't anything else. An' there ye ar-re."

It is a source of regret that Mr. Demond, before concluding his paper, should have seen fit to make a personal attack upon Mrs. Eddy,—a Christian woman loved and revered by all who know her as well as by numerous thousands who do not know her personally, but who do know of what she has accomplished and is accomplishing for the alleviation of human suffering and human woe. These thousands, of their own experience, know the good they have received from her method of healing both sin and sickness through prayer, and it ill became any one claiming the distinction of a gentleman and belonging to an honorable profession to have belittled himself, his profession, and the society he addressed, by odiously comparing Mrs. Eddy to an anarchist.

We leave it to the utterer of this slander to justify, if he can, this conduct before a just, self-respecting, and fair-minded public.

A Word to our Co-workers.

On page 583 of this issue of the *Sentinel* will be found matter of interest and importance to all our readers. The familiar headings "Literature for Distribution" and "Rules to be Observed" have appeared in our columns for several months, but our readers should not conclude that it is un-

Digitized by Google

necessary for them to read this part of the *Sentinel*. Important additions and changes are constantly being made which it is very desirable that all our readers should know. We are frequently called upon to answer letters of inquiry concerning matters which are clearly set forth in these columns. A little forethought on the part of the writer would have saved him the trouble of writing his letter and the delay in waiting for a reply.

On the page next preceding the editorial page there appear each week under the head of "Notices," special announcements which are of interest and importance, and should not escape the attention of the reader. Because the page presents a familiar appearance to the eye the reader should not conclude that there is nothing new to be found thereon. The principal reason for locating the notices in the same place in each number of the *Sentinel* is that they may be the more readily found and read.

Perhaps it may not be amiss to say a word in this connection concerning the "Literature for Distribution." The supplements to the *Sentinel* are lectures on Christian Science which have been carefully prepared by different members of the Board of Lectureship of the Mother Church. One of these supplements is printed in German. The supplements can easily be sent to those who might not have an opportunity to hear a public lecture on Christian Science, and they are read with interest and profit by those who have heard the lectures delivered.

There are eight pamphlets which treat of different phases of Christian Science, including the healing work, Scriptural reference in its support, the various legal aspects of the case, and the progress of the movement.

There are also tracts and reprints from the *Journal* and *Sentinel*. The latter are carefully selected articles which are especially adapted to general and promiscuous circulation. They are four page leaflets which can be easily enclosed in a letter to a friend or to one who is making inquiry concerning the teachings of Christian Science.

The nominal cost at which the above literature is issued makes it possible for all to do an important work in sowing the seed of Truth. We have referred briefly to this subject that we might "stir up your pure minds by way of remembrance" of the opportunity that is afforded our readers to circulate genuine Christian Science literature with but little labor and expense.

Christian Science teaches us that law and order should prevail in every department of our work. That our coworkers throughout the Field may be able to render to those at headquarters the assistance they would gladly and readily give, we have a few simple "rules to be observed" which give specific directions as to whom orders for books and periodicals should be sent and to whom remittances should be made payable. There are also instructions as to what letters should be addressed to the Clerk of the Mother Church, William B. Johnson, and what to the Treasurer, Stephen A. Chase.

Contributions for publication in our periodicals, whether in the nature of articles or testimonies of healing, are always welcome. We request contributors to write plainly and only on one side of the paper. Leave wide margins and do not crowd lines too close together. *Never* write with a pencil. Be sure that *all* quotations are exact, even to the punctuation, and state where they can be found. Quotations given at random are apt to be incorrect and oftentimes it is difficult to locate them.

Contributions should be, in every sense of the word, the best the writer has to offer. The consciousness of work well done always brings its own reward and makes it possible to do better work in the future. Articles should be carefully revised and corrected before they are sent to the Editorial Department. We frequently receive requests that changes be made,—additions, alterations, or corrections,—sometimes even after the original article is in type. These changes require more work than the writer is aware of. If our contributors will retain their articles until they have done their work in the best possible manner, they will greatly aid the Editorial Department and render material assistance in maintaining the high order of our publications.

Unity in Memphis.

WE rejoice that we can publish the additional evidence of the spirit of Christian fellowship and unity embraced in the following letters which recently passed between the two branches in Memphis, Tenn. A letter accompanies these communications, saying that the two churches worshiped as one on Wednesday evening, April 9, in the hall of First Church in Randolph Building. This letter thus fittingly concludes:—

"God is bountifully blessing us all in this union, and our beloved Cause will move forward with greater progress until all will know that Christian Science is the Truth.

"Yours in Love,

"C. T. KILPATRICK, *Clerk.*"

Following are the letters:—

Woman's Building, Memphis, Tenn., April 15, 1902.
First Church of Christ, Scientist,
Randolph Building, Memphis, Tenn.
Mrs. Rosa Martin, Clerk.

Dear Sister in Truth:—Through a higher and more perfect realization of divine Love, and in obedience to the divine leading which came to our First Reader, Mrs. Frances J. King, a call has come to Second Church of Christ, Scientist, to "rise into newness of life," and at a special meeting of the church, held in our reading rooms, Monday evening, April 14, 1902, our Board of Trustees and members unanimously approved and adopted the following resolution:—

Resolved: that Second Church of Christ, Scientist, make known to First Church of Christ, Scientist, their earnest desire to unite with them as one church body, or individually, as may best meet the demands of their church, at as early a date as they can arrange to receive us in the bonds of unity.

Our church is in a most prosperous condition, our financial affairs so arranged as to be readily adjusted, our congregation large and increasing with every service, but Truth's call to our First Reader for unity, is joyfully and lovingly obeyed.

In the language of our dear sister, Marian W. Hering, "We are humbly and deeply grateful that divine Love has mercifully uncovered and destroyed the error that divided us, so that we may be more truly obedient to our dear Mother in Israel, who is so patiently and earnestly striving to have us demonstrate the unity of Good; for to be truly loyal to her we must lay aside all personal considerations and differences, and devote our whole energy to working for the Cause so dear to us all. We come to you with willing hands and loving hearts, and desire to take our places side by side with your members, as brethren dwelling together in unity, and hope the time is not far distant when we may unite with you in full membership."

Yours in Truth and Love,

C. T. KILPATRICK, *Clerk.*

Room 80 Randolph Building,
Memphis, Tenn., April 23, 1902.
Second Church of Christ, Scientist,
Woman's Building, Memphis.
Mr. C. T. Kilpatrick, Clerk.

Dear Brother in Truth:—Replying to yours of the 15th inst., expressing the desire of Second Church of Christ, Scientist, to unite with First Church of Christ, Scientist, Memphis, Tenn., I will state that a meeting was held by First Church, April 22d, confer on this matter.

First Church expresses its desire for unity with us,

Digitized by Google

and rejoices in the prospect of welcoming into its fold our brethren of the Second Church, and now extends to all adherents of Truth a loving invitation to "come with us." "Behold, how good and how pleasant it is for brethren to dwell together in unity."

It was unanimously decided that this church could not receive Second Church as an organized body, but that each individual desiring membership must make application as church rules direct—by profession of faith.

As to the manner of disbanding your organization and closing your business affairs we make no suggestions.

We inform you that First Church has no indebtedness, and no financial obligation is incurred in uniting with us.

We cordially invite you to attend services and worship with First Church while you are perfecting your arrangements.

We add the heartfelt prayer of each member of this church that a harmonious solution of the question will be reached, speedily uniting us into "that Spirit that was in Christ Jesus, the Lord."

Fraternally yours,
ROSA A. MARTIN, *Clerk.*

Among the Churches.

Church Organization at Terre Haute, Ind.

In October, 1898, a little band of students who love Christian Science, having outgrown informal meetings, which had been held several years prior to this date, formed themselves into a Society for the purpose of furthering the cause of Truth in Terre Haute.

A room on the main street was secured for the Sunday and Wednesday meetings. One year later a larger room was occupied.

In May, 1901, a public reading room was opened at the latter place, and in January of this year, the Society took possession of two attractive rooms in the handsome new Swope Block. One of these is used for the services, the other as a reading room.

All things seemed now ready for one more step upward. The members of the Society, at the suggestion of one earnest student, voted unanimously to organize a church.

Articles of incorporation were drawn up by an able lawyer, and on March 23, 1902, there was organized, under the laws of our state, "First Church of Christ, Scientist, of Terre Haute, Ind.," with sixteen charter members. The articles of incorporation were duly filed with the Clerk of the Court of Vigo County, and notices of the organization, with important extracts from the charter, appeared in the daily papers of our city.

Interest in the subject of Christian Science is increasing in this place; as is shown by the new faces at our services, and in the greater demand for our text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.—JESSIE C. BUTTS, *Clerk.*

Annual Meeting at Fort Wayne, Ind.

The annual meeting of the congregation of First Church of Christ, Scientist, was held in the library annex in Harmony Hall last evening (April 4), the attendance being very large. The reports of the various officers and committees gave evidences of a remarkably prosperous condition of affairs. The financial report was very satisfactory, showing the church to be free from debt with a goodly residue remaining in the treasuries of both church and Sunday School, and a snug building fund available at any time.

The reports of attendance showed a steady gain in both church and Sunday School, the congregation having more than doubled in numbers in the past six months. Over one hundred dollars worth of Christian Science literature has been sold during the last quarter alone. Mr. and Mrs. William Bradford Dickson were unanimously chosen First and Second Readers of the church. The Board of Trustees elected for the coming year consists of the following: L. J. Sievert, O. L. Perry, W. H. Kindig, J. Geiss, S. S. Scoville. The following Directors were chosen: Miss Emma Rosenthal, Miss Ora B. Shaver, Mrs. Marian F. Creighton, Mrs. Lou C. Vordermark, Mrs. Lillian M. Hench.—*Fort Wayne Evening Sentinel.*

Science and Health in New Painesville Library.

I was prompted by the thought of love to see if the public library at Painesville, O., had a Science and Health. I went, January 2, 1902, to Painesville and inquired, discovering that they did not have one. Before talking with the head librarian I found that a meeting of the board was to be held the Saturday following, and they would decide if it would be received. With the permission of the librarian I placed about thirty-five tracts on the public reading table, and her gratitude was strongly shown. The enclosed letter is the answer to my request.

H. H. R. B., Cleveland, O.

PUBLIC LIBRARY, PAINESVILLE, O.

February 1, 1902.

My Dear Mrs. B.:—At the meeting of the book committee yesterday, the members expressed their appreciation of your kindly offer, and their willingness to accept the book written by Mrs. Eddy which you mentioned. Thanking you for your interest in our library.

Sincerely,
MRS. JULIA G. ERWIN, *Librarian.*

New Quarters at Elyria, O.

The Christian Science Church at the corner of Second Street and East Avenue was opened Sunday (April 6) in the presence of a crowd of members who filled the building to overflowing. About fifty believers were present from Cleveland. The address was delivered by Mrs. Lida Fitzpatrick, First Reader of the Second Church of Christ, Scientist, in Cleveland. She traced the growth of their Cause and told of the sacrifices which Mrs. Eddy has made to bring Christian Science before the people. The services commenced at half past two in the afternoon.

The new headquarters of the Elyria Christian Scientists consists of a roomy dwelling house which has been remodeled to suit their temporary needs. The audience room on the first floor accommodates one hundred people and is handsomely frescoed and furnished. There are also two offices on the first floor and a reading room, where books and periodicals relating to the faith, will be kept on file.

The Elyria Republican.

Christian Science Literature at Fort Riley, Kan.

The Christian Science Journal and *Sentinel* have been placed in the Post Library at Fort Riley, Kan. A letter had been sent, but as no reply was received a personal call was made on Chaplain Griffies and he said in substance, "My first thought upon receiving your letter was that I did not want the Christian Science literature for the library, but I said to myself, Now this will not do. If the boys [soldiers] read their literature it will not harm them, it is better they read that than to read no religious papers at all."

As chaplain of a United States Military Post he certainly accorded our Christian Science literature its rightful place, for it is willing to be judged by its merits. Truth is preparing the hearts of men for the kingdom of heaven—harmony—on earth.—BERTHA SALCHOW, Junction City, Kan.

From our Contributors.

Tributes to the New Edition of Science and Health.

It is my humble and most sincere desire to offer deep expressions of gratitude for the multitudinous blessings given us by our Leader and Mother, Mary Baker Eddy, in the revised edition of our text-book. I am greatly helped as I feast on its pages, and the thought comes of the wondrous love, patience, meekness, and endurance, of her whose work is unceasing for the redemption of humanity from every form of bondage imposed by material sense.

I was most deeply touched yesterday in reading the following paragraph on page 367, "The infinite Truth of the Christ-cure has come to this age through a 'still, small voice,' through silent utterances, and Divine anointing which quicken and increase the beneficial effects of Christianity. I long to see the consummation of my hope, namely, higher attainments in this line of light."

What an appeal to the students of Christian Science! Oh, may we not, in the spirit of the Christ, as loyal, loving students, watch with her one hour, that she may realize in our demonstration of Love the fulfilment of that hope so longingly expressed.

I thank God for the manifold blessings Christian Science has brought to me and mine—physically, mentally, and spiritually.—IDA GIBSON WHITNEY, New York, N. Y.

I long to tell our Leader through our beloved *Sentinel* something of the comfort and helpfulness received from her poem, "Satisfied." It seems to me the all of Christian Science, for I have seen the most stubborn beliefs of disease disappear while realizing the Truth contained therein bringing strength and peace.

I have learned nearly all her poems, and they are truly "Songs in the Night,"—Light dispelling the darkness of material sense that ever-present Truth and Love may shine in our hearts.

The new revision of Science and Health is a joyful surprise, so wonderfully clear and concise, and I want to express, if possible, my gratitude for all her love and unceasing labors to bless mankind.

LUCY P. LINCOLN, Fort Dodge, Ia.

As soon as I learned we were to have a new edition of Science and Health, my heart sent forth a glad amen. All loyal students are even now reaping the blessings from this grand revision of our text-book.

One for whom I ordered the two hundred and thirty-fifth edition, said to me a few days ago, "It seems to me, I never loved any other edition as I do this." I rejoice and give thanks to our Mother for this last demonstration of love for her children.

As N. P. Libby said in our *Sentinel* of March 26, "No Christian Scientist can afford to be without it."

ALICE S. FOSTER, Ashland, Ore.

There are times when we feel that love and gratitude must find expression. I feel that I cannot worthily continue to read and enjoy the revised edition of "Science and Health with Key to the Scriptures" without stopping to thank our dear Mother for the time, care, and labor it must have cost her to revise it.

Never before have I felt so much like a child, being led by a wise mother, as since beginning to read this edition of Science and Health. May we, through renewed consecration to its teaching, grow to a larger apprehension of the Christ Mind, and be clothed with the raiment of Spirit.

MARY TRAMMELL SCOTT, Atlanta, Ga.

From the depths of my heart I sing with joy over the new edition of Science and Health. I have read word for word comparing the revised with the old, and my gratitude cannot be expressed, for words are inadequate to express the depth of my joy.

What a wonderful Leader is ours, that could and did give to all this great blessing! This marvelous revision will give a new impetus onward and upward. God bless our dear Mother. Surely His hand hath led her to do this.

CLARA CRAIG DUER, Arkansas City, Kan.

What a priceless gift is this last of our dear Mother's to her ever-multiplying family of children.

For weeks I have been feasting on a copy of the new revision of Science and Health, and studying it in connection with earlier editions one finds many verbal changes, some of the lesser ones being of great significance, and showing care to produce by painstaking scrutiny a model for future ages.

May Mother's brightest and best gift to her children be fully appreciated.—JOHN WARNER KEYES, Fitchburg, Mass.

My heart has been full of thanksgiving to God, for our Leader, since I have received the new edition of Science and Health.

I appreciate more than ever before our dear Mother's labor of love, not only for us who have already learned to love her, but for the dear ones that have not yet understood her or the message she has given to us.

MRS. CHRISTINA A. MACIVER, Waterford, Vt.

Just a word of appreciation for the new edition of Science and Health. The spiritual animus which seems to pervade it anew leads one to exclaim often in reading it—wonderful! wonderful!

The evident care, labor, and time expended by our dear Leader must serve as a rebuke to all humble followers in the "strait and narrow way."—N. I. ZINN, Hastings, Neb.

The Lesson Sermons.

BY M. E. W.

I HAVE just read the *Sentinel* with such a feeling of gratitude that it must find expression in a word of thanks.

For a long time the daily study of the Lesson Sermons has been such a present help in time of trouble, that I have been prompted to acknowledge the help I have received from this source. By the study of these lessons I have been able to meet many errors. I have often arisen in the middle of the night and demonstrated for myself and others the Truth revealed in these sermons. I have read good sermons before coming into Christian Science, but never read one that healed me of any trouble.

Not long ago we had a lesson on "Matter," and Monday morning as I took up my books to study, I thought, as I read it over, we have had such good subjects lately and so opposite of matter, and as I am trying to overcome matter, I believe I will just read it over this once and not take it up every day. Tuesday morning the thought came, If there had not been a need of this lesson it would not have been given. So I began to study, and the Truth soon began to lift the clouds of sense, and I saw the material creation as coming not from above, from God, but from dust and to dust it must return. As I realized the real creation the claims around me began to be destroyed. Was that not a proof we had found the right way of worship?

I shall never forget the sense of rest and peace which came to me when I first heard one of these Sermons. It was in First Church of Christ, Scientist, in Chicago, on a lovely September morning. I went with a doubting sense of the wisdom of such services, but when I left the church I said to my friend, "I see now the

Digitized by Google

wisdom Mrs. Eddy had in ordaining such a service, for when you leave this church you do not carry away with you the thought of a personality, but you do get a lesson in Christian Science." I have learned a great deal since then and have had many demonstrations of the power of these Lesson Sermons. I know this healing, saving power and see that the daily study fits us to preach with the Readers as they read with understanding. I am grateful for the help received to-day from the *Sentinel,* and in reading the lesson over I have discovered the subject for each section of the lesson which I found helpful for the needs of to-day. We receive great help from the *Journal, Sentinel,* and *Quarterly.* They are a light shining in darkness. I have no doubt there arises from thousands of hearts, as from mine, God bless Mrs. Eddy.

Gratitude and Forgiveness.

BY W. T.

IN quiet gratitude for the modest blessings close at hand; in silent thanksgiving for the common little bits of good which come daily into our lives, and which generally are disregarded, because of the habitual fashion of looking at them in a careless, matter-of-fact way, we can make ready our lives for the blessings in God's store for us.

Let us add to this a willingness, when we reject a wrong, to help the doer of the wrong, when we can do so, in a firm yet kindly manner, to see his error. Let us, in a spirit of compassion and encouragement, seek to restore such an one; in meekness remembering our own frailties, lest we, too, in pride at our standing, compass a fall. Through the door-way of a grateful and forgiving heart, the Spirit finds an ingress. The love of Christ must needs abound where such an entrance is.

"With *thanksgiving* let your requests be made known unto God. And the peace of God, which passeth all understanding, shall keep your hearts and minds through Christ Jesus." And Paul in recourse to the rich experiences of his "inward man" knew well, indeed, whereof he spoke. We find him in his letter to the Colossians, exhorting them, likewise, to "continue in prayer, and watch in the same with *thanksgiving.*"

Let us have done, then, with ingratitude and vain repining for even in the darkest hour may we silently recall the grateful feeling for some blessing in the past, and in its sweet and saving grace speed us the light again.

A little thing it is for which to strive each day some other heart to thank in loving gratitude for service rendered in kindly word or deed. In gratitude and kindness to each other, we hold forth a living, constant prayer to God, and fitly praise Him.

In ways like these, may we hope to do as we are bidden, and attain unto the prayer which is "without ceasing" and find that rest which comes alone with the secret of abiding in the Love which liveth, and the Life which loveth ever?

Praise.

BY MARY TRAMMELL SCOTT.

A LITTLE secret I have found,
Listen, I give it thee,
My life with good cannot abound
Without a gift from me.

This little gift from me is *praise,*
And though it's but a song,
It goeth forth and ne'er delays
The good for which I long.

If we believe we have all good,
As Jesus says we must,
The song will come before we see,
We *praise* e'en while we trust.

Testimonies of Healing.

A testimony in a recent issue of the *Sentinel* has led me to see more plainly than ever that I have been making the same mistake that the writer did; namely, thinking it was no use for me to write a testimony as I had not yet overcome the error which led me, five years ago, to enquire into Christian Science. The trouble is blindness. My sight is still defective, though since studying Christian Science, having occasional treatment, and trying to put into practice what I understand, it has improved to the degree that whereas, when first hearing of Christian Science my sight was so bad I was only barely conscious of light, now I can see all things near to me, though as in a thick mist. I can distinguish colors and shapes of objects when I am fairly near them, and for this I am deeply grateful.

But what I now wish to express my gratitude for is something far higher which I have gained from Christian Science; *i.e.,* an understanding of God and of life in Him which has gladdened and brightened that life to such an extent that for all the physical sight that could be given to me I would not give up my belief in, and my even small understanding of, the great truths of Christian Science. Through this understanding I have been able to overcome fear in many ways, and have learned to trust my Father-Mother God in a way I never did before.

The health of my five children has vastly improved, and we have had many small but good demonstrations of how Truth heals. I have now no doctors' or drug-store bills, but spend that money on Christian Science literature, and on what gives pleasure, not pain and discomfort.

During this long, sad war in South Africa I have indeed felt what Christian Science can do for all anxious ones, as my husband has been there nearly all the time. The right understanding of God as our life has kept me from anxiety on his account; it has guided me into right decisions as to my children's bringing up and education during his absence and without his help, which I had been used to all my married life; it has enabled me to meet and overcome the fear which comes with limited means, and, in fact, been my strength and support during all this trying time. I am grateful and blame myself that I have not sooner publicly expressed my gratitude.

I am daily learning to have a truer, better sense of sight than that which is merely physical, namely the sight which is in Mind, and can never deceive, and I know when I have fully learned this the mortal belief of sight will also be perfect, for Love knows no imperfection, and as Science and Health says, "cannot be deprived of its manifestation."

My love and gratitude to our Leader, Mrs. Eddy, is unbounded. I am trying to learn to know her through her writings and humbly to follow, as she has showed us how, in the blessed footsteps of our Lord and Master, Jesus Christ.

I hope this testimony may be of some help to others, as I have been much helped by those I have read in the *Journal* and *Sentinel.*—KATHLEEN LINDSELL, St. Heliers, Eng.

Reading the chapter on "Fruitage" in the new edition of Science and Health has awakened a sense of responsibility to give to others, who have not had a like experience, an account of our new birth in Christian Science.

In the early part of 1892 I returned from the last of a series of voyages from Liverpool to the West Coast of Africa, in a condition of health that was most discouraging, having contracted several chronic disorders, such as dyspepsia, liver complaint, nervous debility, etc. The future seemed dark and uninviting and life hardly worth living. At this time I was introduced to a Christian Scientist who told me of Mrs. Eddy and her great discovery. She gave me a copy of Science and Health which I began to read at once, with the greatest interest. The healing

Digitized by Google

did not impress me at first so much as the wonderful logic and practical common sense that characterized Mrs. Eddy's interpretation of the Bible, and the clear explanations of the hitherto unanswered theological problems which had bothered me so long.

This intelligent religion, free from creed and superstition, which could be practised and proved daily, and which offered an assurance of a constantly brightening future, with renewed opportunities for doing good, so appealed to my sense of reason, that I accepted Christian Science as a whole, without reservation, feeling instinctively that it was a gift of God to a spiritually starved world.

Within three weeks from the time that I heard of Christian Science, I was perfectly healed of all my physical difficulties. I attribute this effect to the change in my thought brought about through reading Science and Health.

With this practical proof of the teachings of Christian Science my highest ambition was to go to America and study with Mrs. Eddy, or a competent teacher, feeling that I had found the pearl of great price and was willing to give up all in exchange for it. With this in view I obtained a position as engineer on a steamship sailing from London to New York, which enabled me to attend two services in New York City every four weeks. At the expiration of about a year and a half the way opened for me to remain in New York City and to go through a class, which took place immediately after the close of the World's Parliament of Religions in Chicago in 1893.

The class gave me just what I needed. Shortly after its close on returning to my room one evening, a lady living in the house met me at the door and told me of the great trial she was having with her son, who was a victim of the liquor habit. He was then having an attack of delirium tremens that had lasted more than two days, and she was tired out with being up with him day and night. I told her that I had been studying Christian Science and would gladly try to help him with my understanding of it. To this she consented, saying that at least it could do him no harm.

In less than fifteen minutes from the time the treatment was given, he had changed from wild delirium to calm and quiet attention to the truths of Christian Science. He asked if he might not dress and go down stairs to dinner, and was told he could. A little later he was sitting at the table, clothed and in his right mind. No one present, however, was more surprised and grateful than myself.

Since that time I have seen countless demonstrations of healing of all kinds through Christian Science,—physical, mental, mechanical, financial, and in fact, in every department of daily life. I feel that nothing but a complete sacrifice of every human thought and motive can express the gratitude we owe to our beloved Mother and Leader who has given to the world this greatest of all gifts,—the Key to the Scriptures,—which unlocks the gates of heaven and reveals eternal Life.—R. P. V., New York, N. Y.

Several times during the past four months I have felt that I ought to write of the many benefits I have received through Christian Science. In November, 1900, I saw a friend reading Science and Health, and having heard that there was a religion called Christian Science, but knowing nothing at all of it except that it was considered ridiculous by many persons, I said to my friend that I should like to look over the book. To my surprise she told me I could keep it if I found it interesting, as my husband had bought it the year before while visiting America, and thinking I would not care to have it in the house, had left it with her.

I took the book, and began to read that evening. The next day I continued to read, and knew then that I had at last found the Truth I had been long wanting, and no words of mine can tell the joy and peace which came to me.

Several years before I had lost all belief in the religion I had been taught from childhood, for I could not believe in a God who sent sickness, and took from us the dear ones who seemed to be so needed here.

As soon as I began to read Science and Health I knew that it was the Truth, and before I finished the book I had several demonstrations of its healing power for myself and children.

Being the daughter of a physician and also the sister of one I had always thought highly of drugs and went to them as soon as the slightest need appeared. Now I have a far better remedy, and many times have seen the wonderful power of Truth over fever, bronchitis, neuralgia, and other errors in my home.

To our dear Mother I cannot be grateful enough for giving Science and Health to us, for words cannot tell what it has done for me.

From the *Journal, Sentinel,* and *Quarterly,* I have also received great help, and always look eagerly forward to their arrival.—E. L. CURRY, Nassau, N. P., Bahamas.

A few years ago my husband had had a severe case of diphtheria, followed by what the doctors called diphtherial paralysis, making him helpless even to dress himself. We tried physicians until they told him they could do nothing more for him but advised him to try treatment at the sanatarium. After having two treatments every day for three weeks he was no better and quite discouraged.

About this time we met a lady who told us of Christian Science, and how her daughter had been cured of a serious trouble. She urged us to try Science. We had no faith in it, but were willing to try anything that suggested a chance of my husband being well again, so we sent for the Christian Science healer of whom she told us. He came to see us, we became interested and asked him to take the case.

My husband gained each day. He was able to dress himself after the first treatment and was entirely cured by seven treatments. Christian Science not only saved his life but restored him to perfect health.

We have had several demonstrations in our little family since then, and feel that we could not get along without the book Science and Health which has its place with the Bible in our home.

MRS. W. J. KIRKPATRICK, Battle Creek, Mich.

Long have I wished to render my thanks, not only for the kind, helpful thoughts of the *Journal* and *Sentinel,* but for "Science and Health with Key to the Scriptures." For this understanding of God and the Bible I cannot find words to express my gratitude.

For forty-three years, I was troubled with headache and a scrofulous discharge from both ears all the time. When twelve years old I could only hear words spoken in the loudest tone of voice, and I was doctoring all the time. *Materia medica* could heal only the right ear. I was entirely deaf in the left ear and it still discharged continually. Shortly after coming into Science I was taken with severe pain in both ears and my head. After three days absent treatment all pain ceased. Six years have elapsed since the treatment, and my ear has remained perfectly healed. The secretions of the ear are natural, and I can hear loud noises quite distinctly.

Although healing comes slowly, I am gaining in spiritual understanding and am able to make better demonstrations. I am encouraged to persevere, knowing that God healeth all our diseases and we can trust Him in all things.

MRS. C. A. ULRICK, Sanborn, Ia.

To have power with God is to have power over all the evils that threaten us.—F. B. MEYER.

Religious Items.

F. W. Farrar, D.D., D.C.L., says in *The Homiletic Review:* "Let us remember that the sins which forfeit and quench the Holy Spirit of God within us are never the mere sins of surprise and of a moment. They may often seem to be so. Sometimes, indeed, it does seem as if, after years of apparent respectability, men plunge in one moment into the abyss of wickedness; but it is never really so. We are not worst at once. The source of evil begins slowly and from slight cause. The infant's hand might stem the breach; but let the stream grow wider, and philosophy, aye, and religion, too, may strive in vain to stem the headstrong current. The serpent that with one swift, dark dart drives its fangs into a man's life has long been reared in that man's bosom, or has been suffered to creep noiselessly about his feet; the temptation which bounds out upon him as from a thicket, terrible and with a tiger's leap, with such a glare in its eyes and such carnivorous passion in its throat, would have been powerless had it not been suffered eagerly to prowl about the purviews of that man's soul. The sin which overthrows a man often seems indeed to be sudden, but in reality it has been long a secretly besetting sin."

In this modern spring-time one feels as if nature were alive, communicative, bursting with secrets to be revealed to all who are lovers of nature and patient seekers after the truth. Life and beauty are revealing themselves in unmistakable terms. They offer gifts to man, they draw out his love and reverence, and even lay upon him duties and responsibilities. In more ways than the wisest can tell, revelations of truth are made to waiting souls. They are even thrust upon the reluctant and the disobedient. But there is no compulsion. . . .

In the highest ranges of thought there is and can be no compulsion. Truth unveils itself to the waiting mind, and through his myriad experiences man learns the nature of the world in which he lives, the spiritual forces that play in him, around him, and upon him, and his relations to them. There are as many modes of revelation as there are flowers on the earth or stars in heaven or human souls with their passions, sentiments, affections, hopes, fears, and ideals. Truth is infinite, and revelation is as varied as human nature and opportunity.

The Christian Register.

The truth that startled Peter, that "God is no respecter of persons," is to-day the commonplace of religious thought. With us the difficulty would be to believe that the distinctions of class or privilege that prevail among men are influential with God.

The declaration of the next verse, however,—"in every nation he that feareth Him, and worketh righteousness is accepted with Him,"—is broader than many modern Christians would prefer. The question arises what does "accepted with Him" mean? Is it equivalent to salvation? It seems to us that there is no reasonable doubt but that it is. But what are we to make of the omission of the name of Christ? Can men be saved who are ignorant of him? The answer to that question will be found in the consideration of the truth that faith consists in the disposition of soul, an attitude of spirit, and a man who fears God and works righteousness has the spirit that would certainly lead him to fellowship with Christ, if Christ were made known to him.

The Watchman.

The kingdom of heaven is not yet here, but the world is rising towards it. The world is seeking those things which are above because it is rising with Christ.

No Christian can be a pessimist; no infidel an optimist. Christians get impatient with the slow progress; all want to be in at the harvest festival, few want to sow the seed, still less to cultivate the ground. We want to see the Lord coming in glory with his angels while we are living. He is ready to come at any time, but he must wait for us; we are not ready.

But we are getting ready. Through all the long centuries mankind has been climbing; rising higher and higher. Sometimes the path has led through dark shadows; across deep valleys, but always to the greater heights beyond. From those heights, the attainment of generations of toil and suffering, turn and look back and down across a thousand years, and the resurrection shall be seen.—*The Universalist Leader.*

We are told that when Pharaoh let the Hebrews go God "led them not through the way of the land of the Philistines, although that was near; . . . but through the way of the wilderness of the Red Sea." Indeed, more often than we like at the time, "The longest way round is the shortest way home." Few of us live long who do not thank God every day for the divine hindrances in our lives. We did not face the way of the wilderness with pleasure, but we found God as we went, and He ever after proved our invincible battalion. Short way or long way, let it be His way.

The Congregationalist and Christian World.

And now because you are His child live as a child of God; be redeemed from the life of evil, which is false to your nature, into the life of goodness, which is the truth of your being. Scorn all that is mean; hate all that is false; struggle with all that is impure. Live the simple, lofty life which befits an heir of immortality.—F. W. Robertson.

Rev. J. Henry Holden has this in *The Universalist Leader:* "If we have caught the Christ-spirit, and understand his message, we know that consecration means that our every thought and our every act, whether beneath the glare of publicity or within the secret chambers of seclusion, be in harmony with truth."

The real Easter is the power of Christ's resurrection that raises our spirits to heavenly places, and fills our lives on earth with the joy and peace, the victory and love, of the spirit of the risen Christ.

Maltbie D. Babcock, D.D.

Zion's Herald has the following: "Truth is immortal. Men have slain and buried her, as they thought, but she stood by them, unseen, and smiled as they chanted her requiem. She belongs to no age but is a child of eternity."

The true Christian is signified by a life lived in the Spirit and showing the fruits of the Spirit. That was the test applied to Cornelius by Peter; it is the only test which reveals the truth.—*The Christian Advocate.*

Temptation is an opportunity to overcome, to grow stronger. But if we fail to use the opportunity we sin.

Rev. J. R. Miller, D.D.

There is no duty we so much underrate as the duty of being happy.

R. L. Stevenson.

Bishop Potter says that a prime need for realizing the brotherhood of man is simpler living.

LITERATURE FOR DISTRIBUTION.

Supplements to the Sentinel.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only.*

Price:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Pamphlets.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

Price:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

Tracts.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

Price:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

Reprints from the Journal and Sentinel.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

Price:—Ten copies, five cents, prepaid; one hundred copies fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

RULES TO BE OBSERVED.

We request our co-workers throughout the Field carefully to observe the following rules in sending in their orders to the Publishing House:—

All orders for Journals, Sentinels, Quarterlies, Hymnals, Manuals, Bibles, "The Mother Church," Communion Hymn," "Mother's Evening Prayer," tracts, pamphlets, personal cards, and Church notices, should be sent directly to The Christian Science Publishing Society.

All orders for the publications of our Leader, Rev. Mary Baker G. Eddy, should be sent directly to Mr. Joseph Armstrong, Publisher, 95 Falmouth Street.

Remittances for goods ordered from The Christian Science Publishing Society should be made payable to The Christian Science Publishing Society. Remittances for the publications of our Leader should be made payable to Joseph Armstrong. Remittances should always accompany orders, and should not be made payable in any case to the Editor or the Editorial Department.

Do not mix orders belonging to The Christian Science Publishing Society with those for the publications of our Leader, or *vice versa.*

Articles for publication and communications relating thereto, belong to the Editorial Department, and should be addressed to that department.

Full name and address should be given in each communication. Matter intended for publication cannot be used unless name and address are given.

We especially request our contributors to write plainly, and only on one side of the paper. *Never* write with a pencil.

The Christian Science Publishing Society does not receive money for Church dues or per capita tax; this should, in all cases, be sent directly to the Treasurer, Mr. Stephen A. Chase, Box 56, Fall River, Mass.

The Clerk of the Mother Church, William B. Johnson, C.S.B., receives many letters of inquiry, etc., relative to matters not within his knowledge or line of duty. It is obvious that, with his onerous duties, he should be relieved of this. We bespeak for him but fair brotherly consideration, when we request the Field to write to him only upon matters pertaining to his duties as Clerk of the Church.

We again ask that no money remittances whatever be made to the Editor or Editorial Department.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 oc half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

Christian Science Sentinel

(THE CHRISTIAN SCIENCE WEEKLY.)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D. Editor. CAMILLA HANNA, C.S.D. Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

If Senator Lodge succeeds in reorganizing the consular service and putting it on a permanent life-tenure basis, as he is now endeavoring to do, there will be about three hundred ideal positions for ambitious young Americans which will be well worth studying for.

He proposes to divide our various consular officers into ten uniform grades, ranging from a consul-general of the first class, with a salary of ten thousand dollars a year to a consul of the sixth class with a salary of $1,800. Applicants must be between the ages of twenty-one and fifty-five, and must pass an examination in either French, German, or Spanish; also in various commercial subjects. We now have forty consulates-general in various places.

Secretary Root has assumed full responsibility for the policy of retaliation and reconcentration pursued by American troops in the Philippines. The Secretary states that the orders given were in accordance with general order 100, published in 1863 by direction of President Lincoln, and have proven to be the most humane and most effective which could have been followed.

Minister Leishman at Constantinople has sent to Secretary Hay a detailed report of the abduction of Miss Ellen M. Stone. The report throws the blame of the abduction on Bulgaria and absolves Turkey from any connection or responsibility for the affair. It is thought that the State Department will now take some definite action regarding the matter.

Senator Hoar has introduced a new isthmian canal bill which leaves the selection of the route to the President. Authority is also given to the President to determine the terms upon which foreign countries may use the canal. The aggregate cost of the canal is fixed at $180,000,000, and $10,000,000 is appropriated for the beginning of the work.

H. Clay Evans has been confirmed as consul-general to London. Mr. Evans expects to leave the pension bureau by May 15. The nomination of Eugene F. Ware, of Topeka, Kan., to be Commissioner of Pensions has also been approved. Mr. Ware will assume the duties of his office about June 1.

The Senate has passed a bill appropriating thirty thousand dollars for a temporary building on the White House grounds for the President's office purposes. Ten thousand dollars was appropriated for furnishing the building.

Secretary Moody has authorized Captain Dayton of the Chicago to convene a court of inquiry to examine into the matters connected with the arrest and imprisonment of officers of the Chicago at Venice.

United States District Attorney Bethea filed on May 10, in the United States Circuit Court for the northern district of Illinois, the Government's bill in equity, asking for the dissolution of the beef trust.

Sixty-two banks in different sections of the country have been recognized as Government depositories. Secretary Shaw distributed nearly three and a half million dollars among these banks last week.

John H. Deveaux (colored) has been confirmed by the Senate as collector of customs for the district of Savannah, Ga.

Rear Admiral William T. Sampson passed away at his home in Washington on the afternoon of May 6.

President Roosevelt signed the oleomargarine bill May 9.

Foreign.

Some Chinese Christians have been expelled from the new European school established by Yuan Shi Kai, Governor of Chili province, for refusing to worship according to Confucian tablets.

United States Minister Conger has protested to Prince Ching, president to the Foreign Office, and calls attention to the fact that the treaty promises that no discrimination shall be made against Christians, and said that such a policy would lead foreigners to question the good faith of China in carrying out this obligation.

The Japanese Board of Education controls the entire system of education in Japan. This board sends out about thirty students annually to receive instruction in foreign countries. About 120 men are engaged all the time in foreign study. On returning home these students are required to work for the Government for a period equal to twice the number of years spent in study abroad. They are then at liberty to take up any branch of work they choose.

Andrew Carnegie has been invited to give the commencement address of the American College for Girls in Constantinople, on June 18. In view of Mr. Carnegie's deep personal interest in education, and the strong impetus which he has given to education throughout the world, it is believed his presence in the college will supply a stimulus to education in Turkey which no other influence could give.

A Canadian assay office will be established at Dawson. Orders have been received there from Ottawa that the royalty on gold will be abolished and an export tax imposed instead. This means that the gold dust now in circulation in the Yukon territory and that resulting from the present cleanup will be retained.

Influential Cubans are urging President Roosevelt to grant a general amnesty to all Americans imprisoned in Cuba before the independent government is installed. When the Spanish control of the island was withdrawn, the governor-general declared a similar amnesty of all Spanish subjects.

Industrial and Commercial.

At a meeting of the Liverpool Ship Owners' Association in London last week, it was stated that during the last ten years 2,095 British steamships, aggregating 1,836,509 tons, had passed into foreign hands. The chairman of the meeting stated that unless the government gave the British lines more assistance, more sales would follow.

Four or five New York Houses carried on a business of at least $500,000 annually with St. Pierre, Martinique, which was destroyed last week by a volcanic eruption. One of these houses had $100,000 invested in and about the city. The estimated losses of the flour trade alone are $75,000, and the provision trade as much more.

General.

The central conference of Jewish rabbis, which met at New Orleans last week, discussed at length the observance of the Jewish Sabbath. The prevailing sentiment was that the observance of the Jewish Sabbath had almost ceased among the male Jews. It was suggested that the conference either attempt to restore the Jewish Sabbath to its former place or, finding this impossible, abandon it altogether and accept Sunday as a day of rest on the economic principle that man needs rest and recreation one day a week. No action was taken on the matter, and it is probable that the rabbis will lay the matter before the synagogues to determine whether the Sabbath can be preserved in this country. Some of the rabbis object that the recognition of Sunday may carry with it acknowledgment of the resurrection.

At the seventy-seventh annual meeting of the American Tract Society, held May 8, President Roosevelt was elected an honorary vice-president to fill the place made vacant by the death of President McKinley.

The total number of volumes issued by the society during the last seventy-seven years is 32,511,394, of tracts 448,351,292, and of periodicals 261,188,668, making a grand total of 742,051,354 copies of publications printed.

Twenty-nine new publications have been issued at various foreign mission stations. The foreign cash appropriation for the past year is $5,000. The grand total of foreign cash appropriations since the foundation of the society is $742,212.43.

On the morning of May 8 the eruption of Mt. Pelee, which had long been believed to be extinct, completely destroyed St. Pierre, the largest city of the island of Martinique, the biggest of the French West Indies. St. Pierre had a population of about 25,000 and it is reported there were only about thirty survivors. The loss of life in neighboring towns will increase the number of deaths to about 40,000. Thomas T. Prentis, United States consul at St. Pierre, and his family, are believed to be among the victims. Eighteen vessels were burned and sunk with all on board. Among them were four American vessels.

The new building for the Naval Branch of the Young Men's Christian Association in Brooklyn, given by Miss Helen Miller Gould, will be opened May 15. The dedicatory services will be conducted by Rev. Dr. Newell Dwight Hillis and Rev. Theodore L. Cuyler. Addresses will also be made by W. H. Moody, Secretary of the Navy, Admirals Higginson and Barker, and other naval officers.

This is the first building that has been erected for naval branch work, but it is probable that buildings will soon be erected in Norfolk and San Francisco.

Every day the gardeners at the White House gather a cluster of the choicest blossoms from the flower beds or the conservatory, and send them to Mrs. McKinley at her home in Canton. This daily act of kindness is due to Mrs. Roosevelt's thoughtfulness.

The National Federation of Women's Clubs, which met at Los Angeles, Cal., rejected the proposal for the admission of colored women's clubs for which Massachusetts clubwomen have been contending for two years.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Extracts from the Primitive Fathers.

THE following extracts from the primitive Christians, found in the Ante-Nicene Christian library, will be read with interest, especially by Christian Scientists:—

From Origen, about A.D. 125.—I am of the opinion that the expression by which God is said to be "All in All," means that he is "All" in each individual person. Now he will be all in each individual in this way: When all rational understanding, cleansed from the dregs of every sort of vice, and with every cloud of wickedness swept away; and when all that can either feel or understand or think, will be wholly God; and when it will no longer behold or retain anything else than God; but when God will be the measure and standard of all its movements, and thus God will be "All," for there will no longer be any distinction of good and evil. Seeing evil nowhere exists, for God is all things, and to him no evil is near, nor would there be any longer a desire to eat from the tree of knowledge of good and evil, on the part of him who is always in possession of good, and to whom God is all, the last enemy moreover who is called Death, is said on this account to be destroyed, that there may not be anything left of a mournful kind when Death does not exist, nor anything adverse, when there is no enemy.

FRAGMENTS.

Baptism is an escape from matter. "The Lord leading us out of disorder, illuminates us by bringing us into light, which is shadowless and is material no longer."

Copy of Isaiah, 58 : 6, as found quoted by a writer in the second century, showing how the text has been altered since then: "Loosen every knot of iniquity; release oppressions of contracts which have no power. Let the troubled go in peace and break every unjust engagement."

Melito to Antonius Cæsar, about A.D. 150: It is not easy speedily to bring into the right way the man who has a long time previously been held fast by error. It may, however, be effected, for when a man turns away ever so little from error the mention of the truth is acceptable to him. For just as when the cloud breaks ever so little there comes fair weather, even so when a man turns toward God the thick cloud of error which deprived him of vision is quickly withdrawn from before him. For error, like disease and sleep, long holds fast those who come under its influence; but truth uses the word as a goad and smites the slumberers and awakens them, and when they are awake they look at the truth and also understand it; they hear and distinguish that which is from that which is not.

For those men which call iniquity righteousness: Now the sin of which I speak is this, when a man abandons that which really exists and serves that which does not really exist, there is that which really exists, and it is called God. He, I say, really exists, and by his power does everything subsist. This being is in no sense made, nor did he ever come into being; but he has existed from eternity and will exist forever and ever. He changeth not, while everything else changes. No eye can see him, nor thought apprehend him, nor language describe him, and those who love him speak of him thus: Father and God of Truth, but thou a person of liberal mind and familiar with the truth, if thou wilt properly consider these matters, commune with thine own self, and though they should clothe thee in the garb of a woman, remember that thou art a man. Believe in him who is in reality God, and to him lay open thy mind and to him commit thy soul, and he is able to give thee immortal life forever; for everything is possible to him, and let all other things be esteemed by thee just as they are—images as images, and sculptures as sculptures; and let not that which is only made be put in by thee in the place of him who is not made, but let him, the ever-living God, be constantly present to thy mind, for thy mind itself is his likeness; for it, too, is invisible and impalpable, and not to be represented by any form, yet by its will is the whole bodily frame moved.

Know, therefore, that if thou constantly serve him who is immovable, even he who exists forever, this endows with life and knowledge. But why this world was made, and why it passes away, and why the body exists, and why it falls to decay, and why it continues, thou canst not know until thou hast raised thy head from this sleep in which thou hast sunk, and hast opened thine eyes and seen that God is one, the Lord of all, and hast come to serve him with all thy heart, then will he grant thee to know his will, for every one that is severed from the knowledge of the living God is dead and buried (even while in this body). Therefore (it is that) thou dost wallow on the ground before demons and shadows, and askest vain petitions from that which has not anything to give.

From Gregory Thaumaturges, A.D. 250:—Wherefore he says: "Be of good cheer, I have overcome the world," and this he said not as holding before us any contest proper only to a God, but as showing our own flesh in its capacity to overcome suffering and death and corruption, in order that as sin entered into the world by flesh and death came to reign by sin over men. That sin in the flesh might also be condemned through the self-same flesh in the likeness thereof, and that the overseer of sin, the tempter, might be overcome and death cast down from its sovereignty, and the corruption in the burying of the body be done away, and the first fruits of the resurrection be shown, and the principle of righteousness begin the course in the world through faith, and the Kingdom of Heaven be preached to men, and fellowship be established between God and men.

From Dionysius, A.D. 240. Extracts from a fragment of one of his books. Only a few of his writings were saved, in a mutilated form.—There certainly was not a time when God was not the Father. Neither, indeed, as though he had not brought forth these things did God afterward beget the Son, but because the Son has existence not from himself, but from the Father. Being the brightness from the eternal light, he himself is also absolutely eternal. For since light is always in existence, it is manifest that its brightness also exists. Because light is perceived to exist from the fact that it shines, and it is impossible that light should not shine. Now, this word "I am" expresses the eternal substance, for if he is the reflection of the eternal light he must also be eternal him-

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

self, for if the light subsists forever it is evident that the reflection subsists forever, and that this light subsists is known only by its shining. Neither can there be light that does not give light. We come back, therefore, to our illustrations. If there is day there is light; and if there is no such thing the sun certainly can not be present. If, therefore, the sun had been eternal there would also have been endless day. Now, however, as it is not so, the day begins when the sun rises and it ends when the sun sets. But God is eternal light, having neither beginning nor end, and along with him there is the reflection, also without beginning and everlasting. The Father, then, being eternal, the Son also is eternal, being light of light; and if God is the light Christ is the reflection.

Cyprian on "Jealousy and Envy," A.D. 250.—To be jealous of what you see to be good, and to be envious of those that are better than yourself, beloved brethren, seems in the eyes of some people to be a slight and petty wrong, and being thought trifling and of small account it is not feared. Not being feared it is contemned (neglected); being contemned it is not easily shunned and it thus becomes a dark, hidden mischief, which as it is not perceived so as to be guarded against by the prudent, secretly distresses incautious minds. But, moreover, the Lord bade us be prudent, and charged us to watch with careful solicitude, lest the adversary, who is always on the watch and always lying in wait, should creep stealthily into our breast and blow up a flame from the sparks, magnifying small things into the greatest, and so while soothing the unguarded and careless with a milder air and softer breeze, should stir up storms and whirlwinds and bring about the destruction of faith, the shipwreck of salvation and of life.

He goeth about every one of us and even as an enemy besieging those that are shut up in a city, he examines the walls and tries whether there is any part of the walls less firm and less trustworthy, by entrance through which he may penetrate to the inside. He presents to the eyes seductive forms and easy pleasures, that he may destroy chastity by the sight. He provokes the tongue to reproaches, he instigates the hand, by exasperating wrongs, to the recklessness of murder; to make the cheat he presents dishonest gains to take captive the soul by money; he heaps together mischief hoards; he promises earthly honors that he may deprive of heavenly ones; he makes a show of false things that he may steal away the true. Therefore, beloved brethren, against all the devil's deceiving snares or open threatenings the mind ought to stand arrayed and armed, ever as ready to repel as the foe is ever ready to attack. And hence those darts of his which creep on us in concealment are more frequent and his more hidden and secret hurling of them is the more severely and frequently effectual to our wounding in proportion as it is less perceived. Let us also be watchful to understand and repel these among which is the evil of envy and jealousy. If any one will closely look into this he will find that nothing should be more carefully guarded against by the Christian; nothing more carefully watched than being taken captive by envy and malice.

But through envy of the devil death entered into the world, therefore they who are on his side imitate him. Hence in fine began the primal hatred; the unrighteous Cain is jealous of the righteous Abel, in that the wicked persecutes the good with envy and jealousy. He was unrighteously stricken who had been the first to show righteousness. He endured hatred who had not known how to hate. Did not the Jews perish for this reason, that they chose rather to envy Christ than to believe him? Disparaging those great works which he did they were deceived by blinding jealousy and could not open the eyes of their heart to the knowledge of divine things.

Considering which things, beloved brethren, let us with vigilance and courage fortify our hearts dedicated to God against such a destructiveness of evil. Moreover, there is no ground for any one to suppose that evil of that kind is confined to one form or is restrained within brief limits in a narrow boundary; the mischief of jealousy manifold and fruitful extends widely. It is the root of all evils, the fountain of disasters, the nursery of crimes, the material of transgressions; thence arise hatreds, thence proceed animosities.

The mischief is much more trifling, the danger less, the cure easy, where the wound is manifest. But the wounds of jealousy are hidden and secret, nor do they admit of the remedy of a healing cure, since they have shut themselves in blind suffering within the lurking places of the conscience. Whoever you are that are envious or malignant, observe how crafty, mischievous, and hateful you are to those you hate. Yet you are the enemy of no one's well being more than your own; whoever he is whom you persecute with jealousy can evade and escape you. You cannot escape from yourself; wherever you may be your adversary is with you; your enemy is always within your own breast. Your mischief is shut up within you. You are captive under the tyranny of jealousy.

Christian Science not Reversible.

Editor *The Bulls-Eye*.

In the March issue of your paper an article was republished from *London Truth* under the heading "Reversible Christian Science. Since it can cure Disease it can cause it—If Not, Why Not?" As Christian Science is not "reversible," I ask the courtesy of your columns to show "why not."

The "medical acquaintance" who argues that "if it is possible to cure disease by the 'power of mind,' *a fortiori* it must be possible to create disease by the same process," makes the mistake of supposing that Christian Science healing is done by the so-called power of the human mind or will; whereas Christian Science teaches distinctly and emphatically that the only real healing power is God, the infinite divine Mind. Since God is supreme Good, His power can only bless mankind, and cannot be used to induce disease, as that would be contrary to His nature. God is divine Life, Truth, and Love, as the Scriptures declare, and He sustains the real man, His spiritual image and likeness, in health and harmony. This Truth heals disease, but cannot cause it; and any opposite thought or argument that would tend to make a reality of disease is not Christian Science, but is hypnotism or malpractice.

It has not been left to this "medical acquaintance" to point out this "novel and alarming danger," which does not arise from the teachings of Christian Science, but from a perverted mental system, which does not recognize or depend upon the power of God. Many years ago Mrs. Eddy exposed this false practice, and in her book, "Science and Health with Key to the Scriptures," page 451, says: "Every Christian Scientist, every conscientious teacher of the Science of Mind-healing, knows that hypnotism is not Christian Science, and he must recognize this in order to defend himself from its influence. He feels morally obligated to open the eyes of his students that they may perceive the nature and methods of error of every sort, especially this highest degree of evil, deceived and deceiving. All mental malpractice arises from ignorance or malice aforethought. It is the action of one mortal mind taking control of another, without the other's knowledge or consent, and is practised from mistaken or wicked motives." Our Master said, "Ye shall know the truth, and the truth shall make you free," and the Truth as revealed in Christian Science will make man free from hypnotic influence as well as from sickness and sin.

The editor of *London Truth* shows how little he knows about Christian Science and its practice, when, in commenting on the assertion that its practice "appears to be

Digitized by Google

exclusively in the hands of females," he says: "Indeed, up to this moment I have not even heard of such a phenomenon as a male Christian Science healer." If the editor had looked at the practitioners' cards in *The Christian Science Journal,* from a copy of which he quoted a case of healing in concluding his article, he would have found the names of six gentlemen who are practising Christian Science in London, among them being the Earl of Dunmore. While it is true that there are more women than men in the ranks of the Christian Scientists, that is also true of every religious denomination; but it is safe to say that the Christian Science Church includes a larger percentage of men in its membership than does any other church organization. The reason that women are more numerous than men in religious work is because they are, as a rule, more spiritually-minded; while the larger proportion of men in the Christian Science Church is due to the fact that Christian Science appeals to them as a reasonable and practical religion, which can be demonstrated in their daily experience.

The mental, moral, and physical healing which is being accomplished throughout the world through Christian Science is proving that the power of Christianity to heal was not limited to the days of the apostles, but is like Christ, "the same yesterday, and to-day, and forever." When those who have been sick for years, having tried material remedies without avail, turn to God, as revealed in Christian Science, and are healed, they realize that "God is our refuge and strength, a very present help in trouble." When Christ Jesus sent out his disciples "he sent them to preach the kingdom of God, and to heal the sick." He also said: "He that believeth on me, the works that I do shall he do also;" and this is being verified to-day through Christian Science.

FRANK W. GALE.

In *The Bulls-Eye,* San Francisco, Cal.

Hypnotism.

THERE comes to our table this morning from a New York house a pamphlet of ninety-six pages, with various pictorial illustrations on the above subject, and a request that we forward five dollars and obtain a course of instruction which will enable us to hypnotize everybody and make them do exactly what we want. The pamphlet states that ten thousand persons are now taking this five-dollar course of instruction. How many of these ten thousand are scoundrels no mention is made, but most probably among them will be found gamblers, thieves, and worse criminals, all of whom will be constantly trying their power on men, women, and children; and the result is quite likely to be seductions, robberies, kidnappings, murders, and perhaps premature burials of persons not dead.

In the early history of New England this dangerous art would doubtless have been considered to be the work of the devil, and those who practised it would have been promptly hung.

We do not go so far as that, but do think that all who read our paper and all who read the other twenty thousand newspapers and magazines which receive our paper every month, should be warned against this danger; that scientific men should tell everybody how to best avoid it, and that laws should be enacted in every state to punish those who use it for criminal purposes by life sentences to our state prisons.

GEORGE T. ANGELL.

In *Our Dumb Animals.*

Brooding over the evil that you have done will never correct that evil. Rather will it make possible a repetition of the thing dwelt on. Set your mind the other way. Think honest, pure, kind, courageous thoughts all the time, and your mind will have no time for their opposites.

Success.

The Lectures.

At Jamestown, N. Y.

In Samuels' Opera House, Sunday afternoon [May 4], before a goodly audience which, aside from the members of First Church of Christ, Scientist, of Jamestown, under whose auspices the lecture was given, and those of the general public who were interested to attend, included numbers from Bradford, Warren, Corry, Salamanca, and other nearby towns, Carol Norton, C.S.D., of New York spoke on the subject: "Christian Science as Applied Christianity." He was introduced by Attorney Frank H. Mott of this city, who said:—

Ladies and Gentlemen:—At the Congress of Religions in Chicago in 1893, the design was, I think, that those of different faiths might come to a better understanding of the faith of each, that they might therefore be more sure of the reality of their own. That movement brought together representatives of all the great religious faiths throughout the world, that they might discuss rationally and intelligently the fundamentals of their beliefs.

In a way these addresses under the auspices of the local Christian Scientists represent the same idea. They bring together people of various faiths to listen to a discussion of a particular faith in a rational and intelligent manner. It is in that spirit that I have been asked to preside this afternoon, and so I appear neither as an exponent nor an opponent of the doctrines which will be expounded by the lecturer, but rather as one willing to listen to what any one may have to say upon the various lines of religious thought. And it is creditable to this community, as to any community, that it is willing to study these problems, which concern the temporal and spiritual welfare of mankind, in an effort to arrive at that which is true.

Despite points of difference, I am profoundly interested in any movement, whether it be secular, religious, political, or industrial, one of whose prime purposes is to aid in bringing about that consummation devoutly to be wished—the brotherhood of man—which would hasten the coming of the time when "they helped every one his neighbor; and every one said to his brother, Be of good courage." And it is in that spirit and from that view-point that I have great pleasure this afternoon in presenting the talented and scholarly gentleman who has on two previous occasions discussed the subject before a Jamestown audience, Carol Norton of New York, who will now address you on "Christian Science as Applied Christianity."

Mr. Norton spoke for more than an hour, holding the close attention of his audience throughout.

The Journal, Jamestown, N. Y.

At Helena, Mont.

An audience of generous proportions greeted Edward A. Kimball of Chicago, at the Helena Theatre last evening [April 18] when he lectured on "The Cause and Scientific Cure of Disease." The introductory speech was by Rev. Leslie Willis Sprague, pastor of the Unitarian Church. So eloquently was it delivered that the lecturer of the evening was moved to speak in words of appreciation of " the beautiful introduction." "Montana is to be congratulated," he went on, "upon the fact that she has within her borders a minister who is broad enough, catholic enough to give utterance to sentiments such as these."

The Helena (Mont.) *Independent.*

The introductory remarks were in part as follows:—

The genius of our Anglo-Saxon race is that of freedom,—freedom of thought, of speech, and of act. Above all, this freedom pertains to religion; and the Constitution of the United States, in guaranteeing the right of every man to worship God according to the dictates of his conscience, is the legal embodiment of the purpose of our race.

Digitized by Google

Among us there should be not only no persecution, but more, there should be no suspicion, no ostracism. Religion is larger than all interpretations of it. Christianity is vaster and more true than all its sects. Religion is one, however diverse may be the theories men hold concerning it, and it is that which is of the spirit that should unite.

It is my privilege to be here to-night, to represent as I may the citizens of Helena, in extending a welcome to our distinguished visitor. Whatever may be our personal views we may accord a thoughtful and considerate hearing to this representative of a new-old interpretation of a world-old experience.

It is certain that many people all over this land have found new life through the rendering of religion which Christian Science offers. Interested in humanity far more than in churchly sect, I can but rejoice in all the good that has there been accomplished.

As others have been benefited so we may be, and, therefore, I bespeak for the lecturer of the evening an attentive, considerate, and sympathetic hearing, as he testifies to that faith in which thousands have found peace and joy. It is, therefore, my privilege to present to this audience our distinguished guest, one of the noted lecturers on Christian Science, Mr. Edward A. Kimball, who will now address you.—*Correspondence.*

At Beloit, Wis.

Christian Science, its truths and its doctrines were expounded before a small audience at the Opera House Friday night [April 25], by Dr. Silas J. Sawyer, C.S.D., of Milwaukee. The rain kept at home many who had intended to go. The speaker was introduced by Pres. George L. Collie of Beloit College, who said:—

In a representative American audience like this many shades of belief are found; most of us have what we believe is a reasonable foundation for our several views; nothing short of a mental or moral revolution would dislodge us from it; but, in spite of the ingrained nature of our beliefs, it is characteristic of us as a people that we love fair play and that we are willing not only to accord to others the right to believe as they choose, but are willing to give respectful attention to the claims of other beliefs, we desire to know what there is of value in them.

We have met here to-night to hear about Christian Science, a belief that has had a phenomenal growth. It numbers among its adherents men and women of culture, refinement, and Christian purpose. It is said in some quarters that Christian Science is a fad, an unphilosophical belief, a delusion. In view of its remarkable growth, in view of the high character of its adherents, such statements are far-fetched. There must be something in a belief that wins such support and devotion. We ought to know what that something is; I am glad that we have one to address us to-night who is qualified to tell us the truth about Christian Science. I therefore take great pleasure in presenting Dr. S. J. Sawyer, C.S.D., of Milwaukee, a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, Boston, Mass., who will speak on the general topic of Christian Science.

The Beloit (Wis.) *News.*

At Baltimore, Md.

Carol Norton, the well-known Christian Science lecturer, delivered a remarkable address yesterday afternoon [April 27] at Chase's Lyceum Theatre to an audience which entirely filled the body of the house and part of the first balcony. Mr. Norton is a most impressive speaker, and held his hearers in rapt attention as he explained what Christian Science really is and answered many of the recent criticisms of that doctrine.

Mr. Norton was introduced by Hermann S. Hering of First Church of Christ, Scientist, of the city, who said, in part:—

Friends:—The committee in charge of this lecture has asked me, as a member of the Baltimore Church, to preside on this occasion and to introduce to you the lecturer of the evening.

It gives me great pleasure to do this, first, because Christian Science is the subject which is dearest to my heart, for it has wrought in me a wonderful change of health and has revealed to me the great demonstrable truth about God, man, and the universe, the understanding of which has already enabled me to solve many problems of existence; and, secondly, because the lecturer is one of my closest friends in the denomination.

While a young and successful business man he suffered from a long siege of sickness which the best physicians failed to raise. His attention was directed to Christian Science, and after having treatment he soon became well and strong. He subsequently investigated and studied its teachings and found in it a most satisfying faith.

Before presenting the lecturer to you, I will say that, owing to the many popular misconceptions concerning Christian Science, the Rev. Mary Baker Eddy, the Founder and Leader of the denomination, found it best to establish as a part of the educational system of the movement a Board of Lectureship, entitled the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., composed of thoroughly competent persons, who can speak correctly and with authority on the subject.

I now have the pleasure of presenting the lecturer of the evening, Mr. Carol Norton.—*Baltimore* (Md.) *Herald.*

At Blue Springs, Neb.

Edward A Kimball of Chicago, delivered a lecture in the Opera House Monday evening [April 28] upon Christian Science. The lecture was one of the best and most interesting as well as one of the most eloquent and able ever heard in the city.

The lecturer was introduced by Ezra M. Buswell, C.S.D., of Beatrice who said in part:—

Friends:—In behalf of Nebraska First Church of Christ, Scientist, of Blue Springs, we welcome you here to-night. You have heard a good deal about Christian Science in the last fourteen years. You have seen a little of it in your midst. I have no doubt but that many of you have heard much more about Christian Science on the streets than you have from us or from the text-book written by Mary Baker G. Eddy. Now it is because so much is said on the subject (and not always wisely said) that the Mother Church of Boston has established a Board of Lectureship, whose members speak with authority as to what Christian Science is and teaches.

Christian Scientists believe that God is the present helper, ready to help us in all things when we ask Him aright; they rely altogether on prayer, made practical in their lives.

Now, friends, I have the pleasure of introducing to you a member of the Christian Science Board of Lectureship, Mr. Edward A. Kimball of Chicago.

The Sentinel, Blue Springs, Neb.

At Pembroke, Ont.

On Friday evening, April 18, Mr. Carol Norton, C.S.D., of New York, delivered a lecture on Christian Science in the Town Hall. The hall was well filled with an attentive audience, which listened carefully for about an hour and a half.

The speaker was introduced by Police Magistrate S. E. Mitchell, who said, in part:—

Ladies and Gentlemen:—At the request of friends, I accepted the position of chairman to-night, not because I

Digitized by Google

am in sympathy with Christian Science, but as a town official. I frankly avow I know little of this new belief (what I have heard has been largely that which would prejudice), but I believe in that Christian charity and tolerance which we are taught to have for one another. I bespeak for the speaker your unprejudiced and best attention. I now have the pleasure of introducing to you Mr. Carol Norton, C.S.D., of New York, who will address you.

Correspondence.

Lectures at Other Places.

Missoula, Mont.—Edward A. Kimball, April 17.
Santa Monica, Cal.—F. J. Fluno, March 25.

Notices.

Change of Address.

The address of Mr. Carol Norton, C.S.D., member of the Christian Science Board of Lectureship, has been changed to 7 East 42nd Street, New York City.

Reports from Branch Churches.

Reports from Branch Churches to be made at the Annual Meeting of the Mother Church, to be held June 18, 1902, must be typewritten and be sent to the Clerk of the Mother Church in time to reach him on or before June 14, 1902.

No report should occupy more than three minutes in reading.

Board of Education.

Those who are selected for examination in the June class will be duly notified. Those not notified will understand they are not called to the class.

It is probable that a meeting of the graduates of the normal classes which have been held under direction of the Board of Education, will take place during the third week in June, 1902, in Boston, Mass.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist, in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL.

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Expression of Gratitude.

FIRST CHURCH OF CHRIST, SCIENTIST, of Oakland, California, expresses gratitude and appreciation to our dear Mother for the great work done in the new revision of our text-book, "Science and Health with Key to the Scriptures."

With love and obedience,

BOARD OF DIRECTORS, and F. J. and ELLA V. FLUNO,
April 1, 1902. First and Second Readers.

Pleasant View, Concord, N. H., April 17, 1902.

First Church of Christ, Oakland, Cal.,

Mr. and Mrs. Fluno and Board of Directors.

Beloved Brethren:—I thank you for the words of cheer and love in your letter. The taper unseen in sunlight, cheers the darkness. My work is reflected light; and a drop from His ocean of love—the underived glory, the divine Esse. From the dear tone of your letter, you must be bringing your sheaves into the storehouse.

Press on, the way is narrow at first but it expands as we walk in it. "Herein is my Father glorified, that ye bear much fruit."

God bless this vine of His planting.

With love, Mother,

MARY B. G. EDDY.

Some Fragments of History.

THERE is yet an occasional attempt made by some who oppose Christian Science to show that the Rev. Mary Baker Eddy, as a patient or pupil of Dr. P. P. Quimby, gathered from him the ideas which form the groundwork of the Christian Science text-book, "Science and Health with Key to the Scriptures." Only recently this was re-asserted from a pulpit, with the added charge that the claim put forth by Dr. Quimby's friends had never been refuted by Mrs. Eddy or any one for her. This is so contrary to the fact that one at all familiar with the history of the matter is unable to comprehend how a fairly well informed person, and especially a minister of the Gospel, could be led to make in public so grave a mistake. Public instructors should take, at the very least, ordinary pains to inform themselves before broadcasting statements which are altogether erroneous. In view of the situation we feel it our duty again to publish some facts in connection with this matter, our purpose being to do what we can toward removing all cause for lack of information and all reasonable excuse for misstating facts. We had hoped that the pamphlet entitled "Christian Science History," which contained a full account of all the essential facts, and which was generally and gratuitously circulated, would have reached and have been read by ministers of the Gospel and publicists who might feel called upon to oppose Christian Science or criticise it in either an unfriendly or a friendly spirit.

One of the peculiarities or foibles of our human nature is that, too often, it prefers its own predilections or prejudices rather than a careful, just, and impartial view. This is as unfair as it is dangerous, and one of its inevitable results is, sooner or later, a reaction, as the real facts become known.

In "Christian Science History"—written by the writer of this article—the author, by way of preliminary, said:—

"I have had the privilege of reading well authenticated copies of Dr. Quimby's MSS., and also extracts from his original pennings as published, purporting to be authentic; and I can truthfully say, that no intelligent, unbiased person, having any understanding or ability to understand the teaching of 'Science and Health with Key to the Scriptures,' could for a single moment be made to believe that there is the slightest resemblance between the two. That the author of the mighty spiritual truths which form the web and woof of the Christian Science text-book could have borrowed the smallest ray of light from Dr. Quimby's fragmentary jottings, however meritorious in themselves, is too preposterous for a moment's serious consideration.

"It is quite manifest from Dr. Quimby's MSS., that his conceptions and those of the author of 'Science and Health with Key to the Scriptures,' are, as has been well stated by another, 'at polar opposites.' "

We here repeat what we then said, and add that, by way of preliminary to the writing of this editorial, we again perused the MSS.—still in our possession—and that perusal but confirmed our view that no intelligent person can compare Dr. Q.'s writings with those of Mrs. Eddy and fail to see their utter unlikeness. They are dissimilar and irreconcilable.

In "Christian Science History" we republished from the *Boston Post*—the original having been published upwards of fifteen years since—a letter by Eugene H. Greene, C.S.D., of Providence, R. I., in which he thus describes Dr. Q.'s method of treating his patients:—

"Dr. Quimby's method of treating the sick was manipulation; after immersing his hands in water he rubbed the head, etc. He never called his practice a mental method of treating disease, to our knowledge; and we knew him and his history. He was very successful in many cases of lameness."

Also the following letter from Mrs. Eddy in the *Boston Traveler* of May 21, 1887:—

"TO WHOM IT MAY CONCERN.

"Mr. George A. Quimby, son of the late Phineas P. Quimby, over his own signature and before witness, stated in 1883, that he had in his possession at that time all the manuscripts that had been written by his father. And I hereby declare that, to expose the falsehood of parties publicly intimating that I have appropriated matter belonging to the aforesaid Quimby, I will pay the cost of printing and publishing the first edition of those manuscripts with the author's name:—

"Provided, that I am allowed first to examine said manuscripts, and do find that they were his own compositions, and not mine, that were left with him many years ago, or that they have not since his death, in 1866, been stolen from my published works. Also that I am given the right to bring out this one edition under the copyright of the owner of said manuscripts, and all the money accuring from the sales of said book shall be paid to said owner. Some of his purported writings, quoted by Mr. D——, were my own words, as near as I can recollect them.

"There is a great demand for my work 'Science and Health with Key to the Scriptures,' hence Mr. D——'s excuse for the delay to publish Quimby's manuscripts: namely, that this period is not sufficiently enlightened to be benefited by them (?), is lost, for if I have copied from Quimby, and my book is accepted, it has created a demand for his. MARY BAKER G. EDDY.

"Boston Traveler, May 21, 1887."

We also republished from Christian Science Journals of many years since other letters showing Dr. Q.'s method of treating disease as well as a full account of a lawsuit wherein

Digitized by Google

the question of the authorship of the Christian Science text-book was made an issue in the pleadings, which issue demanded proof to sustain it, but the counsel opposed to Mrs. Eddy said they had no such proof. We shall defer publication of these, however, to another time.

Relative to the above letters we will say that there is nothing in Mrs. Eddy's writings authorizing manipulation or rubbing patients, but all her teaching is the opposite of this. None of her loyal students practise such methods in any form. Prayer is the basis of her healing system.

It is unnecessary to say that the challenge contained in Mrs. Eddy's letter was never accepted.

An Appreciation of Christian Science.

THE REV. JESSE J. KOLMOS, pastor of Bethel Congregational Church of Chicago, sends us the following friendly and appreciative article covering his views of Christian Science, with his kindly permission to publish the same. We gladly avail ourselves of this privilege, and assure our brother in Christ of our deep appreciation of his Christianly attitude.

Mr. Kolmos writes thus:—

In the last few years Christian Science has received much attention from some men who have "a pen of a ready writer," and no small degree of eloquence. It is also a marked fact that most of those who have written and spoken on the philosophical and practical value of Christian Science, who have not been in sympathy with it, have done so in the spirit of Pharisaism and prejudice. Denunciation and ridicule have been common enough. Why not words of approbation and appreciation too? For he who is open in mind and heart to receive the true and the beautiful and the good from whatever avenues God may see proper to send them, cannot help but observe elements in this new movement that are wholesome, inspiring, and stimulating to the spiritual life of man.

The race may be divided into two classes, in its relation to truths, old and new. There are those who are always looking for imperfections and error in systems that appear, as the centuries pass. They call themselves the "Defenders of the faith." They are the heresy hunters of the ages. They have often lit the fagot, turned the thumb-screw, and closed the prison doors on apostles and seers of new truths. They believe what has been, ought to be. They are quite unsympathetic towards the world of truth outside of their own circle. Their intellectual horizon is frequently limited to a small bit of God's blue sky full of love and light and power.

The second class is composed of those who are sympathetic towards the whole universe of truth. They desire to find and to see the true and the beautiful and the good in all life. And they soon experience that these divine qualities are being imbedded in their own characters. They are looking for life and love. They find these in every star that shines, in every flower that blooms, in every lark that sings, and in every rippling brook that winds its way patiently to the great ocean. For the great heart of nature beats in unison with the great heart of God and of humanity, for the purification and perfection of the soul. A healthy, optimistic, hopeful spirit is a divine messenger that each who claims to be a follower of Christ should carry with him in his very gait, the expression of his countenance, in his whole thought and life, and in the revelation of his affections in conduct.

Whenever I read the writings of Mrs. Mary Baker G. Eddy I am certainly impressed with a number of truths that appeal to me as beautiful and very helpful.

The first of these great truths is the *Omnipotence of God*. "In Him we live, and move, and have our being." It is not a new truth to the religious world, but a truth that has been placed in the front of the soul's life. It was a demand of the human spirit in this materialistic age. For when this truth is fathomed by the soul, it will quicken the intellect, strengthen the will, illumine the conscience, purify the imagination, and stimulate the affections. For when the soul recognizes God as all and in all, that it is from Him and part of Him, illness, worry, and distrust in life will soon disappear.

The second thought that is always helpful and inspiring to me is that also expressed by the great seer Paul: "All things are yours." I am aware this is not a strange thought to the Christian faith, but it is a truth that has been neglected by the church; and Mrs. Eddy is to be appreciated for putting it to the front, where it belongs. The soul needs to feel that the riches of earth and sky belong to it. Man is a child of God, and he should recognize his birthright. Why go through life morbid in mind and diseased in body, when God asks us to take of His own rich, effulgent, divine life. The soul's territory is large and beautiful. Every noble thought expressed by seer or saint in past and present is ours. Every loving impulse from the hearts of men and women that has beaten for the redemption of the race in the past and present, is ours. Yes; life and death, things present and things to come, are all the soul's. With such a faith as this how can the soul live a lean, sickly, hopeless, despairing life. The breath of God should fill man with beautiful physical, moral, and spiritual health.

A third appreciation is the practical application of these grand ideals to the needs of the body and soul of man as recognized from personal observation. I have friends and acquaintances who are Christian Scientists. They are men and women in whom I have the utmost confidence. They live in the atmosphere of the divine. It is coloring their characters into lives of beauty and strength. They are men and women who have been in different denominations. They found no great help until they saw the emphasis in the great truths already mentioned. Their minds are fixed in the eternal Mind of the universe. It has changed their whole attitude towards life. Many homes that were at one time apothecary shops have been beautified by God's free health and sunshine. The largely attended Christian Scientist's prayer meeting with its noble witnesses to health and purity of body and soul as coming to those whose minds are stayed on Him, certainly helps me to express my appreciation of the good in Christian Science.

Let those who will, rail at the ills of life. I desire to recognize the good in everything and in everybody. Invite truth to the mind, and error will depart forever. Let love fill the soul and hate will become homeless. If goodness crowns the life, evil has been dethroned. What is needed in this age is to have the mind centred in God, in love, in truth, in goodness, in the Infinite.

JESSE J. KOLMOS.

Among the Churches.

Annual Meeting at Montreal, Can.

The annual meeting of First Church of Christ, Scientist, Montreal, Can., was held Monday evening, March 31. Reports were read by the Clerk and Treasurer, showing the progress of this church during the past year. These reports show that there has been a steady gain in the attendance, and that the roll of membership has increased. The Treasurer's report was very encouraging. All current expenses had been met, and there was a balance on the right side.

The Sunday School report shows that the children take a deep interest in this church and the cause of Christian Science, and are proving their understanding by demonstration,—turning to God for help to overcome their physical and other troubles. The children's choir, organized two

Digitized by Google

years ago, has been a great help in the musical portion of the services.

The Sunday and Wednesday evening meetings have been continued throughout the entire year, and the attendance has steadily increased. There have been evidences of great spiritual blessings received from these services. Many testimonies of physical healing at the Wednesday evening meetings have been given, and also of people being healed at the Sunday services through the powerful and spiritual Lesson-Sermons.

An important branch of this year's work has been that of the Publication Committee for the Province of Quebec. This work has brought about a more friendly feeling and a marked change for the better in the attitude of the press and public towards Christian Science and its Discoverer and Founder, the Rev. Mary Baker Eddy.

The report of the clerk concludes as follows: "The members of this church would express their united and heartfelt thanks to God, divine Love, who, as our text-book says, 'Always has met, and always will meet, every human need,' for another year of prosperity, spiritual growth, and steadfast interest in the work of this church and the cause of Christian Science.

"Jesus said, 'If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you,' and on the opening page of her latest labor of love, the revised Science and Health, our revered Leader says: 'To those leaning on the sustaining Infinite, to-day is big with blessings.' These inspiring words may be fittingly applied to our church to-day; leaning as it has done, on God,—divine Principle,—it certainly has been blessed, its needs have been supplied, and, continuing to abide in Him, the future is bright.

"Two years ago we entered this beautiful edifice, holding our first services on Easter Sunday, a fitting time and occasion to thank God that we were privileged to worship Him in this our own church, the pioneer church of this denomination in the Province of Quebec.

"One year ago on Easter Sunday we had the great pleasure of hearing our sweet-toned organ for the first time, accompanying the musical portion of our services. This, with the choir of youthful children's voices, has assisted in making our services more uplifting and enjoyable.

"The different officers of your church have performed their respective duties efficiently, and we trust with satisfaction to all the members.

"If the future has much in store, each year should have its share, but these blessings will be obtained only by faithfulness and obedience to Truth and Love, by constant watching, working, and prayer, by being ever loyal and obedient to our Leader, the Rev. Mary Baker Eddy, and by united, devoted labor for the welfare and growth of this church.

"In closing, your board would suggest that a message of love be sent to our beloved Leader, expressing our appreciation of her loving care and watchfulness over the Cause and the church at large, and to thank her for her latest tribute of wisdom and love, in giving us such a priceless treasure, the revised 'Science and Health with Key to the Scriptures,' and that we recognize her zeal in seeking for the redemption and salvation of the world.

"Submitted on behalf of our church

"W. ROACH, *Clerk*.

"First Church of Christ, Scientist, Montreal, Can."

Progress at Clinton, Ia.

When Mrs. Eddy requested each church to have a reading room we hastened to obey, even though in a very small way. Then we could only obtain a small room in a private residence; this we occupied, until we obtained a larger room, which was also in a better location.

We then felt that a progressive step had been taken. Here much good was accomplished by distributing Christian Science literature, but it became evident that still another move would be requisite to obtain more room. We secured two large front rooms in the heart of the city, desirable in every particular for our use; being well lighted and with folding doors between, they afford us ample room. Money was freely offered without solicitation, and the rooms, newly furnished, present an attractive and homelike, as well as convenient place for the use of the public.

Upon our table are to be found all of Mrs. Eddy's books; and all who so desire, may learn what Christian Science is, and what it does for man.

In November last, we had our third lecture. The first was by Mr. Kimball, second by Judge Ewing, and third by Mr. Kimball. These lectures have been the means of destroying much prejudice against Christian Science, especially the last. That fruit will appear in due season is apparent.

Our church has taken many steps during the last few months, advancing and seeking to advance each day, in the understanding of Truth.

Our *Quarterly* lesson leads us each week, and we know that we are climbing, even if slowly, the upward path. Our Sunday service is well-attended and listened to with an earnestness that shows the interest that is felt in the subject. The Wednesday evening meeting shows progress; and our hearts are full of praise and thanksgiving to God for all our blessings.—MYRTLE FRITZ, *Clerk*.

Christian Science Rooms at St. Johnsbury, Vt.

The quarters of First Church of Christ, Scientist, have been greatly improved this spring, and the society now has some exceedingly pleasant rooms. The church room has been made nine feet longer by the removal of a partition, and two smaller rooms have been added to the suite, so the society now occupies the entire second floor front of Odd Fellows Block. The vestibule, or reception room, has been set off from the main corridor by a partition; hardwood floors have been laid in all the rooms, and they have been repainted and papered throughout. The new rooms will be used as a reading room and cloak room. The enlargement of quarters was made necessary by the increase in the church and congregations. Starting four years ago with a membership of six, the church now has twenty-two members and several more will be added in June. The congregations average from thirty-five to forty.

The St. Johnsbury Caledonian.

Good Work in Erie, Pa.

Last year we sold sixteen copies of "Science and Health with Key to the Scriptures," and other Christian Science literature to the amount of $113.95. This year we have sold thirteen copies of Science and Health, and other literature amounting to $85.95, $41.38 of this was sold since February 1.

Last April our membership was twenty-six, now it is forty and there are several more ready to join the church in June. The attendance has increased even more rapidly.

W. S. DAY.

My Symphony.

To live content with small means; to seek elegance rather than luxury, and refinement rather than fashion; to be worthy, not respectable, and wealthy, not rich; to study hard, think quietly, talk gently, act frankly; to listen to stars and birds, to babes and sages, with open heart; to bear all cheerfully, do all bravely, await occasions, hurry never —in a word, to let the spiritual, unbidden and unconscious, grow up through the common. This is to be my symphony.

WM. HENRY CHANNING.

Display of Tulips at Pleasant View.

THE magnificent display of tulips on the grounds at Pleasant View, the residence of the Rev. Mary Baker Eddy on Pleasant Street, is attracting a great deal of attention, and the vicinity is daily visited in large numbers by lovers of the beautiful in the flower kingdom.

The flowers are now at their best, and the combinations of color are wonderful in their effect as viewed from the sidewalk. The beds are located on the east side of the grounds, and around the fountain, and each is of different design which has been worked out by the gardener with mathematical precision and nicety.

The bed nearest the sidewalk is in the form of a five-pointed star and the color of the blossoms is yellow. To the right of the fountain is a cross worked out in flowers of white and to the left is a design worked out in red shading from the bright to the more delicate hues.

South of the fountain are two large beds in which are grouped tulips of every color—white, red, purple, yellow, yellow and red—which form a most pleasing combination, and one which in every instance draws the eye and holds it in pleasure.

West of the main avenue leading up to the residence is a smaller bed, but the glory of the display is made around the fountain; and against the bright green of the closely cropped lawn the flowers make a picture good to look upon, and one that should continue to attract visitors until the beauty fades.—*The Daily Patriot.*

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th, or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly*. When the change is made in the *Quarterly*, references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

June 15, 1902.—*Subject:* GOD THE PRESERVER OF MAN.

German Supplement Appreciated.

WITH heartfelt gratitude and joy our little band of seekers for the Truth have received the excellent lecture of Rev. Irving C. Tomlinson printed in the German language.

Cedarburg, Wis., is a small town of nearly two thousand inhabitants. The majority are German and some are not able to speak English. I have often heard the remark, "If your books were printed in German we might understand." That need has been met by the publication of this lecture.

Our little band are all Germans and few of them have had the opportunity to learn English, even to speak it. A year ago one woman, who was not able to read or speak a word of English, wanted the Truth contained in Science and Health. To-day she is able to read the book understandingly and rejoices in the revelation it brings to mortals.

MRS. CATHERINE BOCK, Cedarburg, Wis.

From Our Contributors.

Reflections.

BY HARRIET GERTRUDE RING.

IN discontented mood I sought the hills
At sunset, and looked down on busy mills
Belching vile smoke, which in the valley laid
An inky blot on a fair scene displayed.

There stood one with me who was pleased to claim
Nothing lacked beauty. This idea to shame
I said, "Work me a miracle to show
The good in that black blanket spread below."

"There are no miracles!" he said. With slow, strong lifts,
As flooding tide a bed of seaweed shifts,
It moved, then rose, and lo! the deed was wrought.
An opalescent cloud the last light caught.

No beauty in the landscape half so fair
As that, transformed, illumined, floating there.
So pure it seemed, it might have been the way
Along which fled the angel of the day.

Spellbound I could not turn away; but stayed.
And as the glory faded, humbly prayed,
"Let me be raised, eternal Good, above
The shadows, till I too reflect Thy love!"

Principle, not Personality.

BY MARY H. HATCH.

IN "Science and Health with Key to the Scriptures," p. 213, Rev. Ed.), Mrs. Eddy says, "Every step towards goodness is a departure from materiality, and is a tendency towards God, Spirit." Many of us are not willing to take one step at a time. We think because we are not able to make great progress, that it is not worth while to take the little steps, make the small advancements daily, weekly, using the little light that is shown us and thereby receiving more. Standing still and waiting for some great opportunity or experience is not progression. It is stagnation. Water that has neither inlet nor outlet stagnates, and is not only useless but becomes absolutely objectionable. Just so surely do we as Christian Scientists stagnate and become not only useless but absolutely objectionable if we do not force an outlet or outflow of error and darkness by opening our consciousness to an influx of light. We know that the absence of darkness follows as a natural sequence the presence of light. In fact, that all darkness —all error—is simply an absence of light and truth.

Is not the main reason we do not take more steps towards goodness that we dislike going alone? When it is borne in upon our consciousness that a certain step is the one for us to take, we immediately begin to look around for company. We want some one else to go with us, understand us, sympathize with us, and approve of us,—in other words, we look to personality instead of Principle, and the moment we do that we cease to grow.

Principle is Life, Truth, and Love, "with whom is no variableness, neither shadow of turning," and so long as we look to Principle and reflect Principle we can reflect only Life, Truth, and Love. When we are filled with fear and anxiety we are not reflecting Principle, because Principle is all harmonious.

If our motives are right our thoughts will soar. They will be ennobling, uplifting, reassuring. Our speech will flow, and our actions will be as open as the day. Fear and anxiety will flee from us, because we have the assurance that we shall be guarded and protected by the divine Power so long as we are in His service.

Digitized by Google

If we desire to go very far in the strait and narrow way we must be willing to go alone. "All heights are lonely." We cannot take all our friends and relatives with us, just when we are ready to go. We must be willing to let them come in their own time and in their own way, but we must make no concessions or delay so far as we are concerned.

Jesus said, "And I, if I be lifted up from the earth, will draw all men unto me." He did not say, "My disciples and followers are not quite ready for this advanced thought, so I will modify and qualify my speech and actions to meet their understanding; I will remain on their plane of thought so they may understand and appreciate me." No; he said, "And I, if I be lifted up from the earth, will draw all men unto me."

When Jesus was but twelve years of age he remained in Jerusalem teaching in the synagogue, and when his anxious parents finally found him and reproved him for what seemed to them lack of filial obedience, he simply answered, "Wist ye not that I must be about my Father's business?" He did not try to apologize or explain; he knew they could not understand him. He knew they were not ready to go with him, and so he went alone and attended to his Father's business.

We could cite many Scriptural passages where Jesus, our Way-shower, stood alone, went alone, misunderstood and unsupported, clung to Principle instead of personality, and in the language of the Scripture he "grew, and waxed strong in spirit, filled with wisdom: and the grace of God was upon him." This final demonstration was made because he had accomplished the preceding work. He had taken his steps towards goodness in their proper order.

Now, if Jesus is our Way-shower and we are to imitate him, how are we to do it? Mrs. Eddy says in Science and Health (p. 25, Rev. Ed.), "Implicit faith in the Teacher, and all the emotional love we can bestow on him, will never make us imitators of him. We must go and do likewise, else we are not improving the great blessings which our blessed Master worked and suffered to bestow upon us." Again she says, p. 483, "One must fulfil one's mission without timidity or dissimulation, for, to be well done, the work must be done unselfishly."

We must take our steps towards goodness, little as they may be, insignificant as they may seem to us. Let us take them fearlessly, hopefully, joyfully. There is nothing depressing about being good. It is joyous. "Behold, God is my salvation; I will trust, and not be afraid: for the Lord JEHOVAH is my strength and my song; he also is become my salvation. Therefore with joy shall ye draw water out of the wells of salvation."

Impressions Received in a Christian Science Service.

BY PROF. G. B. GARDNER.

THERE is nothing new under the sun! The old is ever new again after certain periods of time have passed and when mankind has, to some extent at least, forgotten the existence of the thing that presently challenges its attention in some other shape.

Forgotten arts are reinvented,—rediscovered,—and in this wonderful age of advancement, where the telegraph, telephone, and electrical science generally has revolutionized the age of steel and steam,—making easily possible the seemingly impossible,—when thoughts of love or business are printed in an imperishable form almost before they have emanated from the busy brain that conceived them and transmitted across oceans and around the globe in an instant of time, what is there new or exceptionally strange for the human mind to contemplate?

Profoundly does the scholar bow to the click of almost thought-endowed machinery that transfers his burning thoughts to paper and into book form while yet the theme is but partly developed in his inspired mind and burning soul.

So with that which was once well understood; which once,—perchance thousands of years ago,—was an every-day matter, easily grasped by the average mind and contributed to the every-days wants of the then living people of the world. But the other day a patrolman, one of the members of a life-saving crew of a station on Lake Superior, in traveling his beat along the sands of that glorious inland sea, after a heavy gale, found washed upon the shore two copper axes that were hardened so as to ring like the very best of our modern steel edge-tools. What a wonder to science to-day! No one on this wide earth now knows the, of old no doubt simple, process by which this useful transformation in copper may be achieved. Truly it may be said that to him who would now rediscover this process a fortune would readily accrue.

But what of all this? And why adduced?

A Sunday or two ago it was the privilege of the writer to attend divine worship in the beautiful church of the Christian Science people on Drexel Boulevard in the city of Chicago. We, that is my friends and I, walked in with a throng of people, who, although it was a forbidding, drizzly day, seemed bent upon an errand pleasing, imperative, but sacred,—the worship of God in His holy temple.

The temple is severely chaste in construction, and in lighting and acoustic qualities simply perfect. The seating arrangement for two thousand people could not well be improved upon, being upon the gradually rising plan and semi-circular, by which every worshiper saw the Readers and heard every word of the lesson as well as though they were all within a few feet of the chief actors. The music was congregational singing of simple hymns, accompanied by a splendidly managed organ, and led,—yes, led,—by a glorious contralto voice; a voice that would command notice in any musical centre in this country or Europe.

The attention was rapt, and to say that there was here as much of the religious feeling inspired by the beautiful religion of the lowly Master as anywhere in any temple, society, or church community, would be stating the case very mildly indeed; this more especially when one is forced to remember the many empty pews and tenantless galleries that so sadly characterize our modern churches throughout our own and other lands.

Just here, involuntarily, the thought or question arises within one's breast: Is this new-born system of the simple old faith, taught by the lowly Redeemer to reawaken the torpid old religious feeling and perchance to revolutionize the Christian world? Indeed, He has hidden it from the wise and the prudent and revealed it unto babes. So God-speed to this newly clothed, old religion of the dear Master,—this fast-growing instrumentality that seems to be destined to sweep over the border lines of rusty schisms and isms in theology, and anew proclaim the half-forgotten, glorious theme of the universal brotherhood of man,—to verify and prove conclusively at last that he really came to seek and to save that which was lost.

Gratitude for Lesson Sermons.

I WISH to express my gratitude for the wonderful help received from the republication of the articles on "The Lesson Sermons" in a recent *Sentinel*, and what it has been to me, though I read them several times when first published. I have been a student of the Christian Science Lesson Sermons for a number of years. I carefully study them over a number of times each week and am conscious of the gain, but not until the present week, when I again read them as explained, did the scales drop from my eyes, and I now see much clearer.

I wish to thank you all for the message of love explained, though I cannot frame words into sentences so as to express my gratitude to Mrs. Eddy for all the wonderful good that has come to me through the Light of Christian Science.

JOHN DIERKS.

Testimonies of Healing.

When I read the testimonies of my old friends, John Lloyd and Roy Goodwin, it brought back to me the memories that I had associated with their friendship and love. I was delighted and surprised at the wonderful revelations of their healing, because I knew them both as no other man knew them; having associated with Roy Goodwin in a business way and socially also for a good many years; knowing that his life had been spent in trying to do good for suffering humanity; feeling his heart-throbs for those who suffer and cannot complain; knowing his connection with the anarchist movement in Chicago with myself, and to think of the wonderful transformation from the state of mind we all were in, to one of tenderness and acquaintance with God. I was reminded how I made fun of him last spring when he told me he had taken up Christian Science, and then I thought how, in a few short months, I had been made acquainted with the same beautiful thought; with the same divine Principle, whence all power comes. I was reminded how I was transformed from a man believing in no God and despising the Bible, to one who firmly believes that God is All-in-all. Having seen wealth accumulating in the hands of the few and the poor growing poorer; having seen the suffering of the masses; knowing that poverty and crime were increasing on every hand, my natural desire was and is to change this condition. I have had a great desire to do something for my brother man for many years and have gone through all the phases of organizations, believing at one time that the only way to change this condition was to remove the cause, and that was, the rich. I believed that force was the only way to eradicate the wrong.

When I came to Fort Wayne, Ind., on the 6th of January, 1902, I was suffering from a skin cancer on my face; I had been treated by three of the leading surgeons of the country for nine months with no results, and had been told that the cancer would kill me as soon as it got to the jugular vein. I reached the point where I was much worried. The picture of death had been painted in my mind. I could not eat or sleep. In fact, I was in a frightful condition. I stopped at the home of Mrs. B., at the Rich Hotel. The next morning after I arrived the lady noticed my condition, and asked me if I would like to be cured. Of course, I said yes. She told me that I could be. She told me of her own demonstration, and invited me to the Christian Science meeting on the following Wednesday evening, and I attended.

After hearing the testimonies of several people who told of their wonderful cures, I commenced to ask myself the question: "I wonder if there is something in this? I wonder if it is possible that there is any power unseen that can cure me?" and so I went to the hotel and made up my mind to try Christian Science. I disposed of all my medicines by throwing them out of the window. The next day I went to a healer, talked the matter over with him, told him all of my past life, my religious, or irreligious views; told him of my connection with the labor movement; told him how I had tried to do good. I finally made up my mind that morning while there to get all the truth there was in Christian Science, and then I went to studying "Science and Health with Key to the Scriptures." I took treatment for about three weeks. In four days the pain in the cancer had abated. I commenced to sleep soundly every night. I experienced a feeling of happiness which I have no language to explain. I read Science and Health almost incessantly for two weeks; became fully imbued with the understanding that there was but one mind, the divine Mind. I became acquainted with the fact that there is but one Truth, and that this Truth will make men free.

In about four weeks from the time I commenced to study, my face had healed entirely, except as to the color. And at this writing, three months after going into Science, it can scarcely be noticed at all. I will also say for the benefit of those who may be seeking the Truth that I have had many wonderful demonstrations of healing other people. Astigmatism of the eyes has entirely disappeared, and the desire for tobacco in any form left me after I had been in Science but four days. I can truthfully say that I have never had an ache or a pain in any form; have been the most happy of men since coming into the understanding of this old, new thought. I have taken nearly fifty people into Science since I first saw the light.

To me one of the greatest benefactors of all the human race since Christ's time, is the Discoverer of Christian Science, Mary Baker G. Eddy.

I pray that the great mass of men and women who do the world's work, and make civilization possible, may be brought to an understanding of the Truth. I pray that this great Truth may not be impeded on its way; that it may come to the heart and understanding of every living creature and make this life what it really should be, a Paradise; bring men to an understanding that heaven is here; that Truth, Love, and harmony will dispel all the ills of mind and body and all error will fade, as a June frost, before this wonderful Truth. I am thankful for the thousands of blessings that it has brought me, and I am thankful that I am getting rid of the "old man" and putting on the new, the real, man.

L. J. RICHARDSON, Indianapolis, Ind.

A few months ago, I wrote a little article for the *Sentinel*. At the time I forwarded it to the Publishing Society, it seemed very small; and yet with it went the thought of love. About two weeks after the article was published I received a letter from a prisoner in Sugar-House Station, Utah. To me this seemed glorious, that with these few words of Truth, the heart of one who had been indifferent to all previous reformers, should be touched.

Following is a copy of the letter, which, I think, will probably be interesting to some.

"I feel sure you will forgive me the liberty I take in writing to you, when I say I do so to thank you for the ray of hope you have sent to a fallen brother, who has read these lines of your own. I have had many Christians talk to me, but they were unable to help me. Your few words read in a prison cell have dispelled much of the darkness.

"I am one of the black sheep, who are styled ex-convicts, for this is my second sentence to a penitentiary, although I am only twenty years of age. But what can be expected of one who has no friends to stretch out a hand to him, and who has no money; besides being hounded by the police from city to city. I do not consider myself wholly to blame in doing as I have done. I have not dated this, for I have no stamp and I do not know when I may be able to get one. I will close, remaining very respectfully,

"_____

"Sugar House Station, Salt Lake Co., Utah."

Our dear Mother, Mrs. Eddy, has surely given the Truth to this age in unmistakable language, and in a light which elucidates all the seeming mysteries with the omnipotence of infinite Wisdom.

I should like to give a demonstration made by a dear little niece of mine. Her parents have not yet accepted Christian Science, but since the time she has been able to comprehend what we said, she has been taught Christian Science by those of us who have an understanding of the Truth. She has imbibed what she heard, and has put it into practice. She is now a little over three years old.

Her infant sister, six months old, had, by accident, overturned a vessel of boiling oatmeal on her bare feet. She was very badly burned, but the little sister was ready with her argument for Truth, and against the seeming evidence

Digitized by Google

of the senses. Her sister stopped screaming, had no ill effects, and suffered no pain whatever. It was the pure, trusting child-thought which had done the work.

I have had many beautiful demonstrations of healing; among them a case of diphtheria entirely vanished in five days. A case of blood-poisoning was healed in two weeks treatment. A case of pneumonia was healed in two days. A case of catarrh of the stomach, for which the patient had tried every known remedy, was mastered in four weeks.

I could go on indefinitely telling of the wonders I have seen in Christian Science, and yet the healing is the slightest part when compared with the spiritual uplifting which comes with an understanding of this grand Truth. What a precious thought it is to know that through the little understanding we have of Christian Science, we can help others onward in the march from sin to holiness.

MINNIE M. KEEVAN, Colwyn, Pa.

It is the overflowing of a grateful heart that prompts this letter to the *Sentinel*,—a heart that once knew not how to be grateful or how to love its neighbors, although it acknowledged it ought to do so. Now I count among my greatest blessings, the genuine gratitude I feel, and the love I have for others.

I united with the Baptist Church at the age of fourteen years, and for fourteen years remained an active member in all church work and a teacher in the Sunday School. I am grateful to the dear friends I there found who contributed so largely to my religious education, my love for the Scriptures, and my hungering and thirsting after righteousness. But my heart was not at peace. Thought was tempest-tossed through the warfare of good and evil, flesh and Spirit. The thing that I longed most to know was, "How can I abide in Christ? What is it to abide in Christ?"

Nine years ago, through the healing of a friend, I was led to investigate Christian Science. "Science and Health with Key to the Scriptures" was put into my hand. As I read it I knew I had found what it was to abide in Christ and how to do it.

Thought was so uplifted by reading Science and Health that I seemed to be on the mountain top and to see through the author's spiritual sense the new heaven and new earth. I knew that what I saw was reality. I then supposed that I had attained to that elevation and should remain there. But not so. I had to come down to my own human plane of living and work out my own salvation. That view from the mountain top has made the way seem less wearisome and encouraged me on.

Now after nine years of toil, struggle, defeat, and triumph I seem again upon the mount and behold again the heaven and earth which God—Good—has created. Peace, that the world never gave and can never take away fills my thought, and Love broods over all. I look back over the way I have come and I see the Red Sea, the desert, and the wilderness; foes within and without.

I can truly say I had need of these experiences. Not once did God forsake me. Though self-will, self-justification, and self-love be as adamant, Love can and does dissolve it. This is the process that has been going on in my consciousness. My prayer has been continually, "Purge me with hyssop, and I shall be clean: wash me, and I shall be whiter than snow. . . . Create in me a clean heart, O God; and renew a right spirit within me."

During the time I have been applying this Science of God, I have seen how wonderful are His works, how the sick are healed and the sinful reformed and regenerated. Again and again I have been led to exclaim, "What hath God wrought!"

And now I want to thank her who has made plain to human understanding this Science of Life. God bless our dear Mother for her wonderful labor of love! How has she exemplified in her own life the true mother-love! I pray for grace, mercy, and love that I may follow more closely her example of loving kindness, compassion, and *patience* in all her dealings with others.

ROSE F. WALKER, Barre, Vt.

When Christian Science was first presented to me, I studied it as a doctrine, and thought it a very beautiful theory, but not at all practicable. However, I was interested and continued studying and then gradually the glorious Truth dawned upon me, that God is Love, that He is divine Principle. Every day am I becoming more and more grateful for having this Principle for a guide, for having a rule by which to live. More and more every day am I being shown how practical this wonderful gospel is, and how practical we *have* to make it.

In my profession of public school teacher, I find Science invaluable. Four o'clock used to find me tired out and often discouraged. Now those conditions are almost unknown. By realizing every day that divine Mind governs all, that those children are not to obey me but to obey Divine law, the great question of discipline is being solved. Many cases of obstinacy and self-will have been overcome through the power of Truth. It is very beautiful to see how some days, everything will fall into line and one duty after another be performed easily and joyously. Besides we laugh a great deal more than we did formerly.

Several demonstrations have been made in cases of colds, sore throats, toothache, and other complaints, but I wish to speak of one in particular, which shows the silent, beautiful work of impersonal healing. When I received my present class last September, one boy was noticeable owing to the scurf which had robbed him of most of his hair. Whenever I chanced to look at him I denied the error. One day just before the Christmas vacation, I noticed that the child's head did not appear quite so disagreeable; but it was during the vacation that the perfect healing came about, a beautiful growth of hair covering his head. It seemed very wonderful to have him return to school so perfectly healed. I asked him what had caused his hair to grow. He said he did not know, that his parents had done nothing.

I am very grateful to know that I can show in my life, a little of the Love which heals.—C. F. M., Berlin, Ont.

About two years ago my little daughter was accidentally scalded on her hip. When she put her hand on it, which she did immediately, the skin came off. The burn was as large as a tea saucer. It pained her dreadfully for a few minutes, then she asked me to telephone to a Christian Scientist to treat her. I did so, and she was relieved instantly. She went to school right along. It happened on Saturday, and by the next Thursday she could romp and play like the rest of the children. A thick scab formed, and in twelve days that all came off, leaving the hip covered with a soft pink skin like a baby's and without the least sign of a scar.

This, to my sense, was a wonderful demonstration, for which I as well as the child feel very grateful. Nearly all kinds of diseases have been healed in my family through the power of Christian Science. It all brings to my mind so clearly the truth of the Master's saying: "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father. . . . If ye shall ask any thing in my name I will do it."

MRS. EDITH A. CONNICK, Eureka, Cal.

Let it be our happiness this day to add to the happiness of those around us, to comfort some sorrow, to relieve some want, to add some strength to our neighbor's virtue.

CHANNING.

Religious Items.

Beyond this is the truth that men come into the kingdom of God not by the way of any old established man-made system, or even by the way of superseded methods of divine origin, but in the way that fits their need and their circumstances—the way of faith, of immediate relation to God, in whatever form the communication may come. There are people to-day who doubt whether a man is a Christian if he has not had the particular kind of religious experience which they had, or which was regarded as essential fifty years ago. Even though the man speaks the language of faith and lives the life of faith and of love they look askance at him and whisper behind his back because they think there is some doubt whether he came into the kingdom in just the conventional way. Such critics are less tolerant than the conservative party in Jerusalem in Peter's day; and that is saying a good deal.—*The Standard.*

There are other considerations that emphasize the claim of even the sinful to that uniform kindness and fraternal solicitude which our religion enjoins upon all. While we are amazed and shocked at the revelations of guilt and shame seen around us, we should remember that every human record has more good than evil in it. We are apt to survey character in the worst lights and will only see its defective side. Not even the vilest are totally depraved. There is a degree of health, morally speaking, in every life, and of light in every career, and possibly more health than disease and more light than darkness. Our estimates make short work of the sinful, but let our own short and harsh estimates be supplemented from the records the angels keep, and they will be more just and generous. Let us see with the divine eye and we shall find something good in all.—*The Universalist Leader.*

Teachings which are calculated to explain away the witness of the Spirit, to destroy the cardinal significance of conversion, and to abolish the distinction between lost sinners and saved saints in this world are making their appearance in Methodist literature. Men and women are no longer to be born of the Spirit into the kingdom of God, according to these new doctrines, but they are to be developed into Christian character by a slow process. Conversion is not a sudden change of character which one may know at the time for himself, but a gradual process of evolution. This is the scientific theory of salvation. The foundation on which Mr. Wesley builded Methodism is to be relegated to the lumber room where all outgrown notions rest after having served their generation.

The Christian Advocate.

The Rev. L. M. Powers says in *The Universalist Leader:* "Now any account of man which fails to see the outreaching of the human heart for justice, mercy, and love, the eternal struggle and gradual advance of man toward the things that are good and ever better, may call itself faith if it please, but its proper name is doubt. Man is not a rebel against God. Often he does not know the way, but all the time he means well, and by the unrest with which we are troubled when we choose ill, by the secret satisfactions which are ours in every right and noble thing we do, we are being educated in wisdom and led at length to peace. The saints we admire, the sinners we pity are all on the same road, and the most advanced are but a little way ahead of those farthest behind."

There is a real power in the simple beauty of the Gospel of Christ. It is not in the word but in the life behind it. Do not spend your time telling people that you are members of the church, but fill your life with Christlike qualities and people will soon learn to respect your church and its gospel. When the world learns that the Christian people are really in earnest it will take the church and its claim seriously. Until then let us look within and ask ourselves a few questions, and we may discover where the fault lies. "A little sleep, a little slumber, a little folding of the hands to sleep," so shall thy soul poverty come upon you.

REV. S. G. DUNHAM.

Let no man or woman be flattered with the hope that any good can be done by those who reach down to those beneath them, with a conscious shrinking from anything like neighborly contact. There is no hatred in society more virulent to-day than that which is the reaction from the well-meant endeavors of aristocratic philosophers with cold hearts, who undertake to administer charity in any form, whether scientific or otherwise. . . . The men and women who reach the people needing help are those who contrive to share the feeling which induces neighbors to help each other when help is needed, and to share with each other because they recognize the bonds of neighborly fellowship.—*The Christian Register.*

F. S. Jewell in the "Open Court" of *The Church Standard* says: "We hear it asked, 'Has Christianity lost its power?' One may answer, true Christianity, or the Christianity of the New Testament, has not; but modern Christianity, which is quite a different thing, certainly has. Or, perhaps more correctly, no; for it never had any of its own to lose. By this I mean the power which it seeks and on which it relies is lodged in extraneous and often wholly alien means and instruments, and not in its original and inherent virtue. It has turned aside from the faithful manifestation of a Divine quality to the mustering and manipulating of humane sentimentalities."

We are too prone to think that prayer consists entirely of speaking to God. Often the most important part of it is simply waiting, with ear attent, to hear what God may say to us. If the windows of the soul are open toward Him, and we wait in reverent silence, it may be that He will breathe into our hearts a message that we shall recognize, by spiritual intuition, as from Him. We shall not be heard for our "much speaking;" but perhaps we shall be heard—and, what is yet more needful and desirable, shall hear—for our silent waiting.

The Examiner.

The Presbyterian Creed Revision Committee has completed its labors and adjourned. The committee agreed unanimously upon a report to be made to the General Assembly, which meets in New York, May 15. As finally determined upon this brief statement is to contain sixteen articles as follows:—

God; Revelation; Divine Purpose; The Creation; The Sin of Man; The Grace of God; Election; Our Lord Jesus Christ; Faith and Repentance; Holy Spirit; The New Birth and the New Life; The Resurrection and the Life to Come; The Law of God; The Church and Sacraments; The Last Judgment; Christian Service and the Final Triumph.

"Perchance if one were to seek God with coarse, blunt, dull instruments might he not miss God? If we were to seek God with the intellectual powers only might we not miss God? And if we were to seek Him with the moral powers only might we not miss Him? But if God determined that He was cognizable and realizable by the supremacy of man's spiritual and moral faculties, then, when man uses those faculties and no others, God will enter by His Spirit."—DR. J. R. THOMPSON.

THE DUTY OF TOLERANCE.—Intolerance carries with it a lack of belief in the sincerity of others, and a lack of respect for the opinions of others. The chances are that the man who differs from us in some question of belief has thought it over as carefully as we have and is as sincere in his conclusions as we are. Tolerance is an obligation upon us because it shows respect for the seriousness and the sincerity of others.

The Congregationalist and Christian World.

There are two ways of looking at a moral action. You may mark that it is still so low, and lament; or you may note that it is already so high, and rejoice. And if only the direction is upward, the latter is the only true way of judging. The only really sad thing is when the direction of development is downward, and the action or word or smile or glance indicate decay.—*The Watchman.*

No transition throes in any passing from less to greater knowledge can justify cynical suspense; because God requires growth of man, and that law of growth reveals the glory of the destiny which God opens to man, and every glimpse of that purpose must deepen love and quicken obedience.

BISHOP SESSUMS.

Dr. Watson declares that "men have lost interest largely in theology, but interest in the Sermon on the Mount is keener than it has ever been;" and that men are "less interested in arguments about Christ's person, but they are intensely interested in what Christ said they should do to their fellowmen."

Has not the Christian world been compelled over and over again to alter and modify its theology and customs? May it not be that the time is at hand when a greater transformation must come?

REV. FRANK L. PHALEN.

The man who has begun to live more seriously within begins to live more simply without.—PHILLIPS BROOKS.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science. Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God.

PRICE:—Ten copies, five cents, prepaid, one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

National.

President Roosevelt did not wait for special authority from Congress before he sent relief to the sufferers of Martinique and St. Vincent. He instructed the Secretaries of War, Navy, and Treasury to "go to the furthest limits of executive discretion in the work of relief and rescue." The President requested Congress to appropriate $500,000 for the relief of the sufferers. Congress promptly responded by appropriating $200,000 for that purpose with the understanding that the other $300,000 would be given later if it seemed necessary.

It is probable that the first minister of the United States to Cuba will be H. G. Squiers, now secretary of the United States legation at Pekin. Mr. Squiers was in Pekin during the siege and gave valuable assistance in the settlement of the delicate diplomatic questions arising from the Boxer troubles in China. The President has recommended to Congress that the salary of the minister to Cuba be $12,000 annually.

In the presence of a large audience President Roosevelt on May 14, laid the corner-stone of the McKinley Memorial Ohio College of Government of the American University. The building will be devoted to such studies as diplomacy, municipal government, arbitration, civics, and international law. Addresses were made by Senators Dolliver and Hanna, President Roosevelt and others.

Discussion as to the merits of the Panama and Nicaraguan canal routes has been revived by the recent disaster at Martinique. Senator Hanna is preparing some interesting data now coming to hand concerning the volcanic conditions on the two routes. It is acknowledged that the dangers of this sort are much less at Panama, and the shorter distance greatly diminishes the risk.

May 13, President Roosevelt appointed a committee to receive funds for the relief of the sufferers from the recent catastrophes in Martinique and St. Vincent. He also directed all postmasters throughout the country and requested presidents of all National banks to receive contributions and forward the same to Hon. Cornelius N. Bliss at New York City.

Dr. Jabez L. M. Curry, special representative of the United States to the coronation of King Alfonso of Spain, was placed on practically the same footing as foreign princes of the blood, and was treated with greater honor than the other extraordinary envoys, with the exception of the envoy of France.

A few years ago we had our first "billion-dollar Congress," which included two sessions. Unless an early adjournment of Congress is reached the appropriations of this session will amount to nearly one billion dollars.

William W. Thomas, the United States minister to Norway and Sweden, is home for a short vacation. Mr. Thomas has been in the diplomatic service forty years, and has filled his present office three terms.

The House of Representatives passed the bill admitting as states the territories Arizona, New Mexico, and Oklahoma. It is quite generally conceded that the bill will not pass the Senate.

Eugene F. Ware, the new Commissioner of Pensions, assumed charge of the Pension Office May 13.

Foreign.

The official ceremonies in honor of the majority of King Alfonso of Spain opened at Madrid, May 15, 1902. Free dinners were given to three thousand poor persons and the charity will be repeated daily until May 24. Money was distributed to the poor, and small sums were deposited in savings banks in the names of all children born May 17, the day on which the king took the oath. Altogether gifts amounting to about forty thousand dollars were distributed.

President Roosevelt sent the following letter to the King:—

"Great and Good Friend: In the name of, and in behalf of, the government and the people of the United States, I desire to present their sincere felicitations on the occasion of your majesty's majority, and to assure you of their friendship and good wishes for the welfare of your majesty and your majesty's people. I trust your life will be long and happy, and that your reign will live in the affections of your people and bless them with peace, prosperity, and happiness, and I pray God to have you in His safe and holy keeping. Your good friend,

(Signed) "ROOSEVELT."

In view of the fact that American firms are preparing to make heavy shipments to South Africa immediately after peace has been declared, Mr. Chamberlain has authorized the dispatch of a commission of experts in engineering, textiles, etc., to traverse the entire country and report immediately on the requirements and openings for British trade.

Emperor William of Germany has offered to present a bronze statue of Frederick the Great to the United States to commemorate the recent visit of Prince Henry. It is probable the statue will be erected near the new war college to be established in Washington on the arsenal grounds.

The president of the Canadian Pacific Railway has stated that when the proper time arrives the road is prepared to start a transatlantic fast line, with three twenty-two knot steamers costing $10,000,000, to fight the Morgan combination.

President Loubet of France has sent, by the Count and Countess de Rochambeau, the table centre-piece of Sevres porcelain which won the prize at the Exposition in 1900, to Mrs. Roosevelt, and a Sevres tea service to Miss Roosevelt.

The Chinese minister at Washington, Wu Ting Fang, will probably soon be recalled to China, as he has been appointed a Sheng Chia Pong to prepare a code of Chinese laws on modern lines.

Ten members of the House of Commons promise to form a pool of $5,000,000 as the nucleus of a fund to start a line of Atlantic greyhounds in opposition to the Morgan combine.

It is reported that the French government is considering the question of bestowing the decoration of the Legion of Honor on Admiral Dewey and General Miles.

Denmark has delayed action regarding the ceding of the West Indies to the United States until after the September elections.

It is stated that King Edward will distribute forty-thousand medals during the coronation exercises.

Industrial and Commercial.

An exact duplicate of the great plant to be built at Economy, Pa., by the American Bridge Company, will be erected at Chicago at a cost of nearly three million dollars. The Chicago works will be built by the United States Steel Corporation. About five thousand men will be employed and the annual output will be from 150,000 to 200,000 tons.

The South Bend Watch Company with a capital of $1,000,000 has been organized to fight the alleged combine between the Elgin National and the Waltham companies. The factory will be opened in six months in South Bend, Ind., and the watch will be called the "Studebaker," after the heaviest stockholders in the corporation.

Under the guidance of Col. William F. Cody (Buffalo Bill), five hundred Swedes are to be colonized in the Big Horn Valley in Wyoming. Some of the prospective settlers are in the United States, but the majority are still in Sweden. Colonel Cody says there is no farming safer or more profitable than irrigation farming.

The total amount of paper money in circulation in the United States, March 1, 1902, was $1,467,694,361. Of this amount $305,755,699 was in gold certificates; $443,797,296 in silver certificates; $35,168,390 in treasury notes of 1890; $335,402,730 in United States notes, and $347,570,246 in National bank notes.

About 145,000 coal miners throughout the entire anthracite coal regions of Pennsylvania went on a strike May 12, for increased wages and shorter hours. Not one of the 357 colleries was in operation. Never in the history of hard coal mining has there been such a complete tie-up.

General.

Judge Buchanan of the State Circuit Court of South Carolina has decided that a negro who was a slave could not contract a legal marriage, nor make any kind of a contract before the constitutional amendments were adopted in 1867.

He also decided that a marriage between a white and a negro person in a State where such unions were legal becomes null and void when the parties to it move to South Carolina, and that the widow of such a union has no right accordingly to a homestead in her husband's property.

The three islands, St. John, St. Croix, and St. Thomas, which compose the Danish West Indies, have an area of only one hundred and eighteen square miles, and their population, consisting mostly of free negroes, is about 40,000. At the price of $5,000,000, which the United States has promised to pay for them, the sovereignty of those islands costs about sixty dollars an acre.

In Quincy, Mass., with no saloon, in twenty years the population has more than doubled, the valuation has increased nearly threefold, the deposits in the savings banks nearly fivefold, and new houses more than fivefold. While the population increased one hundred and twenty per cent, the amount expended for the poor department decreased twelve per cent.

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Christian Science vs. Will Power and Hypnotism.

Editor of *Macon News.*

In the issue of your paper of April 12 you quote from the *Chicago Tribune* to the effect that Dr. Emil G. Hirsch, the eminent and scholarly Rabbi of Chicago, recently said, among other things:—

"I believe Christ cured. I believe Dowie cures. I believe Christian Science cures. But I don't think they are miracles. There is a great power called hypnotism. It is able to make people sick, and a thing that is able to make people sick should be able to cure them also.

"I have made myself sick by thinking I had disease. Young medical students, in the fervor of their study, frequently get the symptoms of the diseases they are studying. You can be hypnotized by any one of stronger will than yourself."

You also quote from the *Tribune* to the effect that hypnotism was the suggestion given by Dr. Hirsch for the miraculous cures accomplished by Jesus.

The answer to Dr. Hirsch's suggestion, that Jesus healed through the power of hypnotism, is that Jesus himself never took this view, but always declared, "The Father that dwelleth in me, he doeth the works." Moreover, the whole character of the miracles of Jesus differs not only from everything done by hypnotism, mesmerism, or human will power, but also from everything ever claimed to be done. And the very fact that hypnotism claims to have power to do evil, to make sick, and to enslave, ought to be conclusive proof that it was never employed by Jesus, as his Father or Principle of Being enabled him to do good, but not evil, to heal but not to make sick, to free but never to enslave.

In reply to Dr. Hirsch's contention that Christian Science also heals through the power of hypnotism, I quote the following from Mr. Alfred Farlow which originally appeared in the *Boston Times* and which was afterwards published in the *Christian Science Sentinel*:—

"It is not strange that those who have not a correct understanding of this Science, and who have not applied it themselves in curing the sick, should attribute the healings of its practitioners to something which is tangible to human sense.

"One who believes strongly in medicine is likely to say of the patient of a Christian Scientist, 'He is being healed because the medicine he has taken heretofore is just now taking effect.' The one who does not believe strongly in medicine, or who has lost faith therein, may say, 'It is because he quit taking medicine. I have for a long time thought he was taking too much.' The one who believes in Spiritualism naturally declares that the healer is a medium and the patient is being cured by Spiritualism, while the hypnotist, not reckoning God into the practice of mental healing, and understanding little or nothing in this line beyond hypnotic suggestion, is apt to believe that the results which he witnesses from the practice of a Christian Scientist are being accomplished through hypnotic suggestion.

"Each particular individual interprets the phenomena before him according to his own peculiar sense of that which is needed to bring about such manifestations. The Christian Scientist, exercising his positive knowledge that God, the Infinite Spirit, the divine Mind, is the only real power and influence, is certain that whatever is accomplished through his efforts is by reason of the divine power.

"Who knows how the healings of Christian Science are accomplished except the Christian Scientist himself who has brought out the result under consideration? Who is able to explain what has been done to produce a given effect but the practitioner who has been the instrument through which the result appears? Jesus said, 'If any man will do his [God's] will, he shall know of the doctrine, whether it be of God, or whether I speak of myself.' If an individual will practise the simple and clear understanding of the divine power as it is taught in this school of religion and science, he will learn whether the healing is done through the will of self or by means of the divine Mind. We say without hesitancy that no one can possibly understand this science without practising its teachings, and no one is capable of giving an intelligent exposition of the methods of Christian Science practice without being a practical Christian Scientist. Could one give a correct explanation of mathematics who is not a practical mathematician and is not able to solve problems and demonstrate propositions according to its rules? Christian Science is indeed a science, and must be so treated in order to be understood."

The fact that the healing in Christian Science practice is in most instances the after-effect of a spiritual regeneration and a Christianization of character, and that "no one can be healed in Christian Science without receiving a wonderful spiritual baptism," is the strongest possible evidence that both its nature and results are wholly different from hypnotism; for "while hypnotism may produce temporary exaltation, it is incapable of reclaiming and transforming the sinner and teaching him to know God." The whole tendency of hypnotism is to enslave one will to the control of another, while Christian Science is the revelation of Truth which makes free from the tyranny of the human will as well as from the slavery of sin, disease, and death. In fact, Christian Science recognizes that only error hypnotizes, while Truth always makes free; and that there is but one way to overcome the errors and evils of existence, and that is the Christ-way. And the Christ-way, according to Christian Science, is the natural supremacy of Good over evil, Love over hate, Truth over error, the divine will over the human, perfection over imperfection, harmony over discord, and life over death.

While Christian Scientists have nothing but charity and good-will for all who are trying, as best they know, to heal the sick and to reform the sinner, it is a mistake to identify Christian Science with Dowieism or any "ism," as Christian Science claims to be nothing more nor less than practical, demonstrable, Scientific Christianity. Christian Science differs from blind faith in a far-off corporal God in that it is understanding faith in the ever-present, all-wise, and all-loving heavenly Father "in whom we live, and move, and have our being;" "who forgiveth all thine iniquities; who healeth all thy diseases."

Christian Scientists are in substantial accord with the

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

contention of Dr. Hirsch that their cures are not miracles in the popularly accepted sense of the term. They also recognize that the mighty healing and saving works of Jesus, while miraculous to others, were to him the natural phenomena of divine law and the "signs" which should always "follow them that believe." J. R. MOSELEY.

Christian Scientists much Pleased.

GREAT satisfaction is felt among Christian Scientists all over New York State over the attitude shown toward them by the Buffalo Health Department. In *The Courier* of April 8, Health Commissioner W. D. Greene declared his position in regard to the enforcement of law and the Christian Scientist faith. Dr. Greene's statement in reference to his investigation into the subject has aroused W. D. McCrackan of the Christian Science Publication Committee of New York to write a letter of commendation to *The Courier*. The letter follows:—

Christian Scientists everywhere read with pleasure the just and kindly words of Dr. Greene of the Buffalo Department of Health, reported in your issue of April 8. I am sure that he is entirely correct in saying: "We are confident that ourselves and the Christian Scientists will never have differences of opinion as to the enforcement of the law." His action in going directly to Christian Scientists themselves, instead of accepting rumors and tales of gossip as facts, made it possible for him to declare: "I found in them a ready desire to comply with every feature of the law."

Buffalo is to be congratulated upon the sensible and straightforward action of its Health Commissioner. Christian Scientists are desirous of fulfilling the law and obeying local ordinances.

In the past many beliefs have been confounded with Christian Science which have no connection whatever with it. There has never been any hostility towards the local authorities anywhere among Christian Scientists, but, on the contrary, the latter have been ready to co-operate with such authorities, whenever allowed to do so.

I may be allowed to add, in closing this word of appreciation, that the term "Eddy Sect," used in the heading of your excellent article, is not strictly correct. There is no official or authoritative excuse for that name. Mrs. Eddy is the author of the text-book and Pastor Emeritus of The First Church of Christ, Scientist, but the body of teaching which she has given to the world has never borne her name, but was called by her, from the start, Christian Science.

Buffalo Courier.

Regarding Christian Science.

To the Editor of *The Globe*.

In reply to the article in your esteemed paper for March 17 under the heading "Concerning Us All," I will say that there is not only a great deal in Christian Science, but when we understand its teachings and are willing to live the high and pure life that Christian Science demands, we can find everything in it.

It is a religion that you can apply with positive success to every phase of life, I care not how difficult the problem is. It is a religion which reveals God and man in their true light, and teaches us how to realize our oneness with God. When Christian Scientists refrain from talking and discussing sickness every time they meet their friends, as is the general custom of the people of our day, it is not because they have not a true, genuine, and loving interest in their fellow-man, but it is because they have been taught in Christian Science that they serve both God and their neighbors best by seeing only the Allness of God and the unreality of all that is not of Him. They are also taught to look back of the seeming discord in man and see only the true image and likeness of God. They know that this man can reflect only the perfect, also that the perfect cannot reflect that which is imperfect.

If God is all-in-all, and the Bible says He is, then it must follow that He is all Life, Substance, Intelligence, action, and power. If this is true, why should we yield in humble submission to every false claim to power that comes along be it in the form of sin or sickness?

Some seem to find fault with Mrs. Eddy because she is an unusually successful author and capable business woman. But is this a crime? Is it a crime to write a book whose contents people from every quarter of the globe are eager to understand—a book that is truly transforming and purifying the minds, characters, and lives of all who faithfully follow its teachings?

I think every fair-minded person will be willing to grant to all the fruits of their labor, then why not concede this to Mrs. Eddy, who has done and is doing untold good to mankind? Especially ought this to be done when the author has no other source of remuneration, and in addition to it all, has given away one half of her entire income, as she has done in the last three years. She steadfastly refuses to accept any salary for her incessant labors for the church she has so successfully founded. Day and night, she watches over it in tenderest love as she guides it with the wisdom from above.

It has been my good fortune to meet many of the best and recognized spiritual leaders, both in America and Europe, but never did I meet a person who reflected, to my mind, such a true spirit of Christ as does Mrs. Eddy. Her face fairly glows with divine Love. She lives in a plain but comfortable home that is filled with love and truth. In this sacred place does she do her great work that is fast filling the world with the true knowledge of the true God and of the real man, who reflects only the good and perfect.

SEVERIN E. SIMONSEN.

In the *New London* (Conn.) *Daily Globe*.

The Unity of Christianity and Judaism.

THE beginning of the twentieth century is signalized by a great discovery. It is not the perception of any single mind, but a truth that is dawning upon the consciousness of all enlightened minds; namely, that the principles of Christianity and the principles of Judaism are not antagonistic. They are in their essence identical and sympathetic. Ideal Christianity and ideal Judaism are one. The error arose from confounding principles with personality. "The Jews killed Jesus, our Redeemer." This slogan was sufficient to kindle and keep alive the deepest prejudices and most intense hatred of an age of ignorance and superstition. And one utterance of the mob at Jerusalem has unfortunately confirmed and intensified the antagonism.

What has Judaism contributed to the treasures of the world's thought and life? The question may be answered categorically: (1) Monotheism; (2) Divine Fatherhood; (3) Human Brotherhood; (4) The Ten Commandments, embodying a perfect system of ethics. This catalogue shows at a glance the impossibility of any real antagonism between the Hebraic and Christian systems of thought and standards of life when rightly understood. Now that the theological mist is rising, and the smoke of controversy is clearing away, the Messianic principle (which is simply love revealed and manifested) is beginning to be recognized as something distinct from ritualism on the one side and from the theological formulations on the other. Hence, many of the Jews are beginning to say, with Rabbi Kaufman Kohler of New York City: "The beautiful tales about the things that happened around the lake of Galilee show that there was a spiritual daybreak in that dark corner of Judea of which official Judaism had failed to take sufficient cognizance." Words and acts of sympathy and comity between churches and synagogues are becoming com-

Digitized by Google

mon. A Presbyterian minister, writing on the subject, says: "I have often spoken against the anti-Jewish spirit. We are more indebted to them than to any other race. Jesus said, 'Salvation is of the Jews.'" A Christian publishing house is bringing out at vast expense a Jewish encyclopedia, which will not only have a great historic value, but will serve as a bond of mutual respect between the Jew and the Christian.

This *entente cordiale* between religious and social forces, which have heretofore been divided and more or less antagonistic, is most timely. In fact, it is fast becoming an absolute necessity for the preservation of our social fabric. The problems of life have become so complex and the adjustment of the social order so difficult under modern conditions that there is but one hope for a favorable solution; namely, through a combination of the best men and women, irrespective of race or creed, working in sympathy and harmony for the uplifting of mankind. Such a combination or coalition is now in a more or less conscious process of formation. And the basis of the alliance is a recognition of the Golden Rule as the only basis of a true civilization. This is to be the rallying cry hereafter of the advocates of "liberty, equality, and fraternity."

THEODORE F. SEWARD.

In the *Arena*.

Christian Scientists will use Mechanics Hall.

CHRISTIAN SCIENTISTS have decided to make a change this year in the place in which to have their big annual meetings. They have had Tremont Temple each June for two or three years past for the Wednesday evening experience meeting of their Communion week, and it has been crowded from platform to roof, and on the Sunday of Communion week the number of services in the church at Falmouth and Norway Streets has been increased year by year from two to four or five, in order to accommodate the number of people who wished to attend, all Sunday services being exactly alike.

This year Mechanics Hall has been engaged, and the probability is that all meetings intended for the main body of the followers of this faith will take place there. This plan, if followed as outlined, will be a departure, for the Sunday services for the annual Communion until the present have been held always in the Mother Church, which is the only Christian Science church edifice in the Boston district, and is the central church of the whole denomination. The use of Mechanics Hall would do away with the need of duplicating the Sunday service, and is held to be the natural outcome of the crowds of last year, for the reason that if the increase in attendance in the coming June should be proportional to that of the last few years, it would be impossible to give the service in the church times enough between nine o'clock in the morning and nine o'clock in the evening to accommodate all who would present themselves. The difficulty comes in allowing for the time required in getting people into and out of the church between services. Some little time is required to clear the auditorium when the twelve hundred people it accommodates are obliged to leave by the two side entrances in order not to become confused with another twelve hundred waiting to be admitted at the main entrances.

The annual Communion this year comes on Sunday, June 15. The annual meeting of the church takes place on Wednesday, June 18, in the daytime; while on the evening of the same day there will be the regular mid-week experience meeting.—*Boston Evening Transcript.*

If thou couldst in vision see
Thyself, the man God meant,
Thou never more couldst be
The man thou art—content.

Anon.

The Lectures.

At Binghamton, N. Y.

Carol Norton, C.S.D., of New York, member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass., lectured on "Christian Science is Applied Christianity" at Stone Opera House last evening [May 6]. Assemblyman James T. Rogers introduced Mr. Norton and spoke in part as follows:—

Ladies and Gentlemen:—It seems to be the frequent custom to have the public exponents of this school introduced by unbelievers, a fact which in itself commends its followers as being liberal and fair-minded to those who differ from them, a quality dear to all true Americans who appreciate in the broadest sense the blood-bought liberties of thought and speech and conscience, for which our forefathers fought and died.

The time is not far remote when differences in religious belief were productive of bitterness and discord and acrimonious strife. Those days are rapidly vanishing, however, and we are coming to realize with Tennyson that

through the ages one increasing purpose runs,
And the thoughts of men are widened with the process of the suns.

To-day as never before, the spirit of toleration is spreading its sweet influence over the hearts of men, and generous judgment is being more freely accorded to those with whom we do not agree.

As the high board fences of dogmatic differences which once separated the various religious denominations are being superseded by those of lighter and more sightly style where love and broader humanity abound, men are discovering that the sunlight of God's Truth is shining not on any one sect alone, but more or less upon them all, and that all are watered by the same crystal stream whose fountainhead is the fatherhood of God and the brotherhood of man.

In that spirit of charity and fraternity, we are gathered here to-night to hear expounded the doctrines of Christian Science. Whether we approve or disagree, we can at least respect the followers of this faith for their manifest sincerity, and admire so much of their teaching as tends to make mankind better, happier, and more righteous.

"What is Truth?" asked Pilate of the Great Teacher. That is the question of all the ages, and until the end of time, men will be searching for the answer. Probably not until the corruptible shall have put on incorruption, and the mortal shall have put on immortality will Truth be revealed in all its fulness. But meanwhile, our finite minds have come to realize that Truth is eternal, and that full and free discussion can harm it not, but will only serve to sift out ignorance and error.

That there is something of that Truth in the message we shall hear to-night all will agree. Whether it be all Truth, or only partly so, we shall doubtless differ, and that is not for me to discuss here.

But whatever our individual views may be, as a fellow-searcher after infinite Truth we will lend an attentive ear and give a cordial welcome to Carol Norton, C.S.D., of New York, whom it is now my pleasant privilege to present to you, and who will address us upon the subject, "Christian Science is Applied Christianity."

Binghamton (N. Y.) *Republican.*

At Greenville, Mich.

On Monday evening, May 5, Mr. Edward A. Kimball, C.S.D., of Chicago, addressed a large and attentive audience at Phelps' Opera House, representing the cultured and thoughtful citizens of our city. Visiting Scientists from the neighboring city of Grand Rapids and the towns of Lakeview and Shiloh were also present.

The speaker was introduced by Rev. A. B. Curtis of the

Digitized by Google

Congregational Church, in a very able and impressive manner. His remarks were in part as follows:—

Ladies and Gentlemen:—The world is a great deal more ready to listen to truth than it is to act upon it. This, however, is an old fault of the race and need not delay us here. The world is also much more ready to point out and emphasize its dislikes than its well-likes. This, too, is an old fault and has been often pointed out. But if I scold you over and over again in the same terms that others have used before, it is because you yourselves commit over and over again the same sins.

Let me mention a few. I place first the sin of blindness. The eyes of the world are holden that they see not the truth. They seem to be searching for something visible, something material. They want what they can vouch for in an ancient tradition or a mouldy manuscript.

Then there is the sin that kills by criticism. We see all the evil in a new way or a new movement at a glance. Being very faulty ourselves, we see only the faults of others. These grow from splinters to beams and then they get so tightly wedged into our own eyes that neither argument nor good fellowship can extract them.

Christian Science, I believe, is a form of life. If you regard it as foolishness and if I look upon it as a stumbling-block, it will still go on in spite of us, and I am sure that I am warranted in saying that Christian Science will go on saving men and women from sin, and vulgarity, and ignorance, sending light where there was darkness and faith where there was unbelief, and health where there was disease.

I take pleasure in introducing to you the speaker of the evening, Mr. Edward A. Kimball of Chicago, who will now address you.—*Correspondence.*

At Ottawa, Can.

On Sunday afternoon, April 20, Mr. Carol Norton, C.S.D., of New York, delivered a lecture entitled, "Christian Science is Applied Christianity," in the Russell Theatre before a large and representative gathering. Mr. Norton was introduced by Mayor Cook of Ottawa, and received marked attention throughout his able address. In the audience were noticed a number of Senators and Members of Parliament.

Mayor Cook, in opening the meeting, said that he had been considerably criticised by some of his friends because he had consented to preside at a lecture under the auspices of the Christian Scientists of Ottawa. A few evenings previously he had occupied the chair at a lecture delivered by a Methodist clergyman in which the Christian Science doctrine had been severely attacked. He felt he would be considered as a somewhat narrow-gauge individual if he declined to hear both sides of the question; and therefore it was that he had readily accepted the invitation of the Ottawa delegation, representing First Church of Christ, Scientist, to preside at the gathering. He had very great pleasure in introducing Mr. Norton to the large assembly.

Correspondence.

At Idaho Springs, Col.

On Friday evening, April 25, a lecture on Christian Science was delivered by Mr. Edward A. Kimball, C.S.D., member of the Board of Lectureship of the Mother Church of Christian Science, Boston.

Mr. Kimball was introduced by Mr. J. W. B. Smith in the following words:—

Ladies and Gentlemen:—I have devoted a great deal more attention to the political institutions of my country than to all the religious institutions of the world; and yet, one who is thoroughly taught the history of our country cannot fail to be impressed that there is a divinity that rules individuals and nations.

Youth may scoff, embittered old age may curse God and die, material science may span the globe with monsters of living steel, flash intelligence upon the wings of the lightning to the uttermost corners of the earth, survey the universe and solve its hidden secrets; and yet there will remain mysteries in heaven of which your philosophers have never dreamed.

Notwithstanding the remarkable age in which we live, notwithstanding the pace at which we travel, one coming among us possessed of ideas will command a hearing. Mahomet, Luther, Calvin, and John Knox were men possessed of religious ideas, and despite the centuries the echo of their voices may yet be heard.

We have with us on this occasion one who represents an idea in Christian life. Let us listen with patience; for this idea may be the touchstone to dissolve the dross of human life, evolve the pure gold of a true Christian character, thereby hastening the universal brotherhood of man and the undivided fatherhood of God.

I take pleasure in introducing to you Mr. Edward A. Kimball of Chicago.—*Idaho Springs* (Col.) *Siftings.*

For Students of the Bible Lessons.

To provide for those who have copies only of the 226th. or later editions of Science and Health, references are here given which will enable them to study the Bible lessons. These references are not to be read by Readers in the services. Readers should continue to use in Sunday services the references as now given in the *Quarterly.* When the change is made in the *Quarterly,* references will be published from both the revised and earlier editions, so that the convenience of all will be provided for.

Clocks of Past Ages.

The word clock, derived from the French *gloche,* German *glocke,* signifies bell, and up to the fourteenth century it was only used to designate a bell which was struck at certain periods of time indicated by the hour-glass.

Sundials or gnomons were the first instruments used in measuring time, and there is but little doubt that the long granite pillars which we call obelisks were used by the Egyptians if not as actual sundial hands, at least for some astronomical observations of the movement of the sun.

Clepsydras or water clocks and sand clocks came next in order. The flow of sand through a small orifice is an accurate method of measuring time, for the exit of the

Digitized by Google

sand is always regular; but water is influenced by the laws of hydrostatics; when the vase is full the water runs out faster than when it is nearly empty.

Candle clocks, or tapers on which were colored bands indicating how much was consumed in a certain time, were also used, and their invention is attributed to Alfred the Great; but this method is even more susceptible of error than the previous ones.

In most large cities a public record of the flight of time seems to have been kept by some method or other. In 1286 St. Paul's in London paid a salary to an orologiaro, who kept a record of time; and in 1371 we find one employed at Westminster palace to attend to the clock. The first portable clocks are attributed to a German named De Souable, and are supposed to have been made in 1300; but it is not till 1480 that we find mention of a clock made so that "he might carry it with him to every place whither he might go."—*Jewelers' Review.*

The common problem, yours, mine, every one's,
Is—not to fancy what were fair in life,
What may be, then how to make it fair
Provided it could be—but finding first
Up to our means: A very different thing.

ROBERT BROWNING.

Notices.

Board of Education.

Those called to the June class have been duly notified. Those not called receive no notice.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Reports from Branch Churches.

Reports from Branch Churches to be made at the Annual Meeting of the Mother Church, to be held June 18, 1902, must be typewritten and be sent to the Clerk of the Mother Church in time to reach him on or before June 14, 1902.

No report should occupy more than three minutes in reading.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

Applications for Membership.

The correct form of application reads, "I hereby make application for membership, and subscribe to the Tenets and the By-Laws of the Church," instead of "I gratefully accept the invitation of the Mother Church named above." Applications for membership with the Mother Church which contain *any form of invitation* should not be used.

Applications for membership with the Mother Church to be acted upon June, 1902, must be in the hands of the Clerk on or before May 20, 1902.

It is desired that those who purpose to unite at that time send their applications in as soon as possible, as that will facilitate the Clerk's work.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Quarterly Subscriptions.

Will subscribers to the *Christian Science Quarterly* take note of the label on the cover of the last number received. If this reads June '02, it means that you have received the last number for which you have paid, and your subscription should be RENEWED AT ONCE. If this is done it will insure the prompt delivery of the *Quarterly* for July, August, and September.

New Edition of the Manual.

The Church Manual of The First Church of Christ, Scientist in Boston, Mass., contains the By-laws of the Mother Church, also a list of members. One copy, $1.50; six copies to one address, $7.00; twelve copies to one address, $12.00.

Send all orders to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Amendments to Church By-laws.

THE following amendments to Church By-laws have been made:—

Article I., Section 2. The President, and the First and Second Readers shall be elected, subject to the approval of the Pastor Emeritus, by the Board of Directors, on Monday preceding the annual meeting of the Church. Each of their terms of office is one year; and the same person is eligible for election but once in three years.

Article I., Section 3. From October, 1901, the term of office for the editors and the publisher of the Christian Science Publishing Society, the clerk and the treasurer of this Church, and the manager of the general Publication Committees, in Boston, is one year each, dating from the time of election to the office. Incumbents who have served one year or more can be re-elected, or new officers elected, at the annual meeting held for this purpose, by a unanimous vote of the Christian Science Board of Directors and the consent of the Pastor Emeritus given in her own handwriting.

Article XX., Sect. 1. A student of the books of Mary Baker G. Eddy, who is qualified for practice, shall not take lessons of another student, but is eligible for examination by the Christian Science Board of Education.

Article XXIV., Sect. 1. If a Reader in the Mother Church be found at any time inadequate or unworthy, he or she shall be removed from office by a majority vote of the Board of Directors, and consent of the Pastor Emeritus, and the vacancy supplied.

Article XXXI., Sects. 1, 2, 3. There shall be a Board of Education, under the auspices of Mary Baker G. Eddy, President of the Massachusetts Metaphysical College, consisting of three members, a president, vice-president, and teacher of Christian Science. Obstetrics is not Science, and will not be taught.

The vice-president and teacher shall be elected annually by the Christian Science Board of Directors, subject to the approval of the Pastor Emeritus.

The President is not to be consulted by students on the question of applying for admission to this College; nor in future, on their course or conduct. The students can confer with their teacher on subjects essential to their progress.

Railroad Rates.

ARRANGEMENTS have been made with the New England Passenger Association (railroads in the New England States) as well as railroads comprising the Trunk Line Association, for reduced rates to the Communion service and Annual Meeting June 15–18, and application has been made to all other roads through their respective associations; due notice of which will be announced as soon as we are advised of their action.

In the mean time the Field would do well to keep in touch with their local railroad agents as to what the rate and arrangements will be.

Some Fragments of History.

IN the last number of the *Sentinel* we republished some data relating to the writings, etc., of Dr. Quimby, showing that the charges to the effect that the Rev. Mary Baker Eddy had, in some sort of a way, borrowed her ideas from his writings or teachings, had been met and refuted many years ago. Yet notwithstanding these repeated refutations there is now and then an assertion from the pulpit and elsewhere that these charges had never been answered by Mrs. Eddy or by any for her. With the hope of further enlightening those who thus claim, we herewith republish some additional facts. In "Christian Science History," alluded to in our last week's article, we republished from *The Christian Science Journal* a letter from one of Mrs. Eddy's students, which we again republish as follows:—

"It might be interesting for you to know that Mr. A. J. Swartz of Chicago, went to see the late Dr. P. P. Quimby's son, and procured his father's writings for the purpose of having them published in order to show the world that your ideas were borrowed from Quimby. After having examined them, to their utter disappointment, it was found there was nothing that would compare in any way to Science and Health; and he, Swartz, concluded that it would aid you too much to publish them, so they were returned to the owner.

"Mrs. Swartz saw and read these MSS. and she gave me this information. MARY H. PHILBRICK.

"Austin, Ill., May 18, 1892."

In the *Journal of Christian Science* of October 6, 1883, there was published a part of the record of a case in the United States Circuit Court for the District of Massachusetts, held in Boston, which had a very decided bearing upon the question under consideration. This matter was also republished in "Christian Science History." We shall not here republish it in full, but will refer to it sufficiently to show the interested reader—or all who desire to know the truth—that Mrs. Eddy's authorship of the Christian Science text-book was decided by a court of high standing in our country.

"This decision was based upon a proceeding instituted by Mrs. Eddy against one Edward J. Arens, to restrain him from publishing a pamphlet printed and issued by him, which, for the most part, contained matter pirated from the works of Mrs. Eddy. Some time later, the said Arens having published another pamphlet differing a little from the first one, the bill was amended to include this second piracy. Arens, in his answer, alleged that the copyrighted works of Mrs. Eddy were not original with her, but had been copied by her, or by her direction, from manuscript originally composed by Dr. P. P. Quimby.

"Testimony was taken on the part of Mrs. Eddy, the defendant Arens, being present in person and by counsel. The time for taking testimony on the part of the defendant Arens, having nearly expired, he gave notice, through his counsel, that he should not put in any testimony, and a stipulation for a judgment and decree in favor of Mrs. Eddy was drawn up and signed by his counsel. [NOTE.—Mrs. Eddy in her 'Miscellaneous Writings,' page 381, referring to the failure on the part of defendant Arens' counsel to introduce proof in support of his answer, says: 'Mrs. Eddy requested her lawyer to inquire of defendant's counsel, why he did not present evidence to support his claim that Dr. Quimby was the author of her writings. Accordingly, her counsel asked the defendant's counsel this question, and he replied, in substance, "There is no evidence to present."'—ED.]

In this case a final decree was entered wherein it was recited that the defendant "had infringed the complainant's copyrights and upon the exclusive rights of the complainant under the same, etc.; and "it is further ordered, adjudged,

Digitized by Google

and decreed, that a perpetual injunction be issued against the defendant according to the prayer of the bill," etc.

It is enough to say that the question of the originality of Mrs. Eddy's book having been raised and the allegation made that she was not entitled to the protection she sought under her copyright because the book was not her own but the work of Dr. Quimby, had it been possible for the defendant in this suit to have sustained his allegation with evidence that evidence would have been produced; the more so as this was the only defence set up in the case. The reason such evidence was not produced was given by the defendant's counsel: there was none to be had.

In addition to the above we republish from "Christian Science History" the following:—

"Mrs. Eddy further says of Dr. Quimby:—

" 'He was neither a scholar nor a metaphysician. I never heard him say that matter was not as real as Mind, or that electricity was not as potential or remedial, or allude to God as the Divine Principle of all healing. He certainly had advanced views of his own, but they commingled error with truth, and were not Science. On his rare humanity and sympathy one could rite a sonnet.'

"In the same article Mrs. Eddy says that Dr. Quimby was a magnetic practitioner. She asked him how manipulation could benefit the sick. He answered kindly and squarely, in substance, 'Because it conveys electricity to them.' That was the sum of what he taught her of his medical profession."

Mrs. Eddy in her "Miscellaneous Writings," page 379, further says:—

"It was after Mr. Quimby's death that I discovered, in 1866, the momentous facts relating to Mind and its superiority over matter, and named my discovery Christian Science. Yet, there remained the difficulty of adjusting in the scale of Science a metaphysical *practice,* and settling the question, What shall be the outward sign of such a practice: if a Divine Principle alone heals, what is the human modus for demonstrating this,—in short, how can sinful mortals prove that a Divine Principle heals the sick, as well as governs the universe, time, space, immortality, man?" She adds "But an unlooked-for, imperative, call for help, impelled me to begin this stupendous work at once, and teach the first student in Christian Science. Even as when an accident called fatal to life, had driven me to discover the Science of Life, I again, in faith, turned to Divine help,—and commenced teaching."

The results of that first teaching have spread over the world, and are too well known to require recapitulation here.

Mr. Edward H. Hammond of Baltimore, Md., obtained a written statement signed by Mr. George Quimby, son of Dr. P. P. Quimby, saying that at that date (1883) he had in his possession all his father's manuscripts.

I republish from *The Christian Science Journal* of November, 1886, the following attested statement in reference to Dr. Quimby's method of healing the sick:—

"I was treated by Dr. P. P. Quimby, in Portland, for neuralgia in the head. Mrs. Eddy was also a patient of his. I first met her there, and it was in the summer of 1862. His mode of treating the sick was to immerse his hands in water and manipulate their heads. My father, W. P. Morgan, offered him one thousand dollars to explain his method of treating disease; to which the doctor replied: *'I cannot; I do not understand it myself.'* I never knew of his attempting to *teach* any one. His method was entirely different from Mrs. Eddy's system of Christian Science.

"(Witness) MRS. E. A. THOMPSON.

"We concur in affirming the known truth of the above statement.

"MRS. A. D. MORGAN.
"W. P. MORGAN, A.M.
"MRS. A. R. RUTTEN.

"Minneapolis, Minnesota, September, 1886."

Many more are ready to bear testimony to the facts as above stated.

To the foregoing I am glad to add the following from the pen of Mrs. Eddy:—

"In 1861, when I first visited Dr. Quimby of Portland, Me., his scribblings were descriptions of his patients; and comprised the manuscripts that, in 1887, I advertised I would pay for having published. Before his decease, in January, 1866, he had tried to get them published and failed. The quotations contained in the article above—purporting to be Dr. Quimby's own words—were written while I was his patient in Portland and holding long conversations with him on my views of mental therapeutics. Some words in these quotations certainly read like words that I said to him, and, at his request to correct his copy, had added thereto. In his conversations with me, and in his scribblings, the word Science was not used at all, till one day I declared to him that, back of his magnetic treatment and manipulation of patients, there was a Science, and it was the science of Mind, that had nothing to do with matter, electricity, or physics. After this I noticed he used that word, as well as other terms which I employed, which seemed at first new to him. He even acknowledged this himself, and startled me by saying, what I cannot forget—it was this: 'I see now what you mean, I see that I am John, and that you are Jesus.' At that date I was a staunch orthodox, and my theological belief was offended by his saying, and I entered a demurrer that rebuked him. But afterwards I concluded that he only referred to the *coming* anew of Truth, which we both desired; for in some respects he was quite a seer, and understood what I said better than some others did—and, for one so unlearned, he was a remarkable man. Had his remark related to my personality, I should still think it was profane. At first my case improved wonderfully under his treatment, but relapsed. I was gradually emerging from *materia medica,* dogma, and creeds and drifting whither I knew not; this mental struggle might have caused my illness. The fallacy of *materia medica,* its lack of science, and the want of divinity in scholastic theology, had already dawned on me. My idealism, however, limped, for then it lacked Science. But the divine Love will accomplish what all the powers of earth combined can never prevent being accomplished—the advent of divine healing and its Divine Science.

"MARY BAKER G. EDDY.

"Concord, N. H., 1899."

In a letter to the editor of *The Christian Science Journal* April 25, 1899, Mrs. Eddy writes:—

"When I advertised in 1887 that I would pay for publishing P. P. Quimby's manuscripts, said manuscripts were withheld from the public. Since then they have been handled and compiled by those who have had opportunity to read my books, which may account for his so-called book being published. What I have read of this nondescript, I regret to say, is disappointing and misguiding,—a conglomeration of meaningless, mortal notions, half mesmerism and half nonsense."

It is not yet explained how Mrs. Eddy could have "developed" from the Quimby source "a system of thought radically different from that source."

These frank statements of Mrs. Eddy's bear the unmistakable impress of genuineness, and together with all the other indisputable facts which have been arrayed and repeatedly placed before the public, make a history which it were well for those who feel called upon to discourse upon the question to take cognizance of. It will not redound to the credit of any one to continue the "vain repetition" that the claimants of "borrowed ideas" have never been answered.

Careless writing kills many a good thought. Few publications care for contributions that are "jotted down in haste."—*Topeka Daily Herald.*

Among the Churches.

Annual Meeting at Peterboro, Ont.

The annual meeting of First Church of Christ, Scientist, Peterboro, Ont., was held in the church edifice, April 25. Following is an extract from the report of the clerk which was submitted at that time:—

A year ago there were two churches in the Field struggling for existence. The first great victory for Truth was the uniting of the First and Second Churches, which are now working harmoniously together, God working with us.

The Sabbath School is increasing in numbers and interest. It has bought an organ for the church, the children working faithfully to make up the necessary amount to pay for it.

In the past two months a board of trustees has been appointed and all arrangements made to purchase the church we now occupy.

As a proof that God is with us, and that our religion is the religion of our Lord and Master, I have noted a few cases of healing.

First is a case of deafness given up by *materia medica*. The doctor claimed there was a hole in the drum, caused by a running from the ear. After two weeks' treatment the doctor pronounced it healed, and hearing restored. Second: A case of extreme insanity overcome. Third: A case of rupture of six years' standing perfectly healed. Fourth: Growth on the face of an old man, which he feared was cancer. He was also suffering from a falling palate which had been down in his throat for years. He stated to his family that the palate came up into its place during a treatment, and the false growth dried up and dropped off. Fifth: A case of heart disease. Sixth: A severe case of inflammatory rheumatism. Seventh: A very notable case of St. Vitus's dance; and, as has been reported in our meetings, cases of acute inflammation of the bowels, catarrh, cramp of years' standing, etc., all of which have been healed by the Truth as it is taught in the Bible and our text-book, Science and Health, which should inspire us, each and all, with zeal for the future, and humility and love to God, Christ, and our beloved Leader for giving us this key to the Scriptures which is making religion a joy and the Bible a lamp to our feet and a light to our path.

P. P.

The Work at Jennings, La.

Three years ago this spring the work was started in Jennings, La., by one family of five, who came from the north perfect strangers to life in the far south, but deeply intent upon living the Truth, that had become the all of life to them. The first morning in their new home, when the Bible was opened, the first words that appeared were "God be merciful unto us, and bless us, and cause His face to shine upon us; that thy way may be known upon earth, thy saving health among all nations." Each member of the family was deeply impressed by the words, and something of what it might mean to testify to that "saving health" dawned upon the consciousness even of the children.

As the days, months, and years have passed since then, many opportunities have been given, to bear testimony even in facing the claim of the last enemy; but in proportion to their courage has strength been given.

Sunday services were started the first Sunday in the family, also the Wednesday night meetings, and all were as faithfully conducted in every particular as though a large congregation had been present. After many months others became interested, some of whom from their first coming added much strength and courage to the workers.

The First Christian Science Society of Jennings was organized in August, 1901, with a membership of sixteen. In March, 1902, a lecture was given through invitation of said Society by Dr. Silas J. Sawyer, C.S.D., of Milwaukee, Wis., from which much fruit is expected. A class was also taught about this time by a loyal teacher; since which the Sunday services have been held in the Odd Fellows Hall in place of the private residence of the First Reader. A more desirable place still is anticipated for the near future. We feel that even this degree of progress has only been made attainable by faithful adherence to Truth's direction, and loving loyalty to the dear one who has made it possible for us to catch a glimpse of what may be attained unto here and now. We will not attempt to express our gratitude in words. Obedience alone can do that.

M. B. T., Jennings, La.

Corner-stone Laid at Milwaukee, Wis.

Having been much interested and encouraged by reading in the *Journal* and *Sentinel* of the progress of the Cause. and the accounts of the building of church edifices throughout the Field, we feel that others may be equally interested in hearing of the work being done in the same line, by First Church of Christ, Scientist, in Milwaukee, Wis.

With the first thought of building a Christian Science church home, there came to our hearts a renewed sense of gratitude, reverent love, and sincere appreciation of the Mother's great work, that had enabled us to undertake this demonstration. All sincere workers in Christian Science, as they grow in understanding, must apprehend in ever-increasing measure the wonderful work of Mary Baker G. Eddy, which is daily becoming more truly known through "good works." The work of Christian Science was started in Milwaukee, about eighteen years ago, with the establishment of the Wisconsin Metaphysical Institute.

The present result has not been reached without sacrifice and many struggles, but throughout all there has been the utmost harmony in our midst, and we have truly realized that the ability to give the thought expression (as in our church building) is the result wholly of spiritual growth, as the aim has been to serve God and uplift humanity. We do know that work prompted by Love ever opens up greater and greater possibilities by which we are enabled to help lift the weary and burdened ones around us.

Our church home is the first Christian Science Church building to be erected in this city, and ever since its inception our people have stood as one, recalling often that in the unity of thought and purpose alone would come our strength and the ability to make the demonstration.

The financial part of this demonstration has meant much to us. Mortal sense would say we have none among us able to give large sums, but Love so far has enabled us to carry forward the work of building without interruption, and we trust to this one and only Source of supply to carry us through to the end. The corner-stone of the church was laid in February, 1902, and we hope to occupy our own church home in the near future.—J. J. R., *Clerk*.

The Work at Appleton, Wis.

Every *Sentinel* brings us news from the Field of the rapid growth of Christian Science. Perhaps the readers of our publications would be pleased to hear from Appleton, Wis.

Our growth as a church has been slow but steady. Our greatest drawback has been our inability to procure suitable rooms for holding services. We could rent a hall for Sunday service, but could not have it for the Wednesday meeting, so we decided to wait until we could secure a suitable place. A short time ago one of the finest halls in the city was offered to us and we accepted it promptly. It will seat three hundred people comfortably, and is located in the centre of the business part, adjacent to the two principal hotels, and on the lines of the local and interurban railways.

Our reading room is at the hall and is open every day.

Sunday, April 20, we had our first service in the new

Digitized by Google

hall, and such love and harmony was manifested that a case of impersonal healing was reported as a result. Of late quite a number have declared that they have received a spiritual uplifting while attending services.

Our Wednesday evening meetings are well attended, and the usual time allowed for testimonials is well occupied.

We as a church feel very much elated over our demonstration. Although our expenses are increased and more work in store for us, with united hearts and hands we feel equal to the emergency, and know that our growth depends upon our obedience to God. With grateful hearts for the good received, and thanking our dear Leader, also the Publishing Society, we press onward and upward.

MINNIE AGNES LAMB, *Clerk.*

Church Purchased at St. Paul, Minn.

The Goodyear Rubber Company, through its agent, James Suydam, has sold to the Second Church of Christ, Scientist, the Christian Science denomination, the church property at the corner of Holly Avenue and St. Albans Street, measuring one hundred and twenty feet on Holly Avenue by eighty on St. Albans Street, including the frame church building thereon. The building was originally the Oxford M. E. Church, and was secured by the Goodyear Rubber Company under foreclosure. The consideration was thirty-five hundred dollars. The Christian Scientists have thus come into possession of their first church building in this city. This church was organized with twenty members last September and added eighteen members at the December communion. During this time, while occupying this church building, negotiations were entered into to secure the property, and the sale is the result. Extensive repairs have been made in beautifying the interior, and the Christian Scientists have a commodious and pretty place of worship which will seat between three hundred and fifty and four hundred. A reading room is to be opened in the front room of the church, where Christian Science literature will be for sale and at the disposal of those who wish to inform themselves on the subject.—*St. Paul* (Minn.) *Dispatch.*

Report of Reading Room Work at Portland, Ore.

A report of the reading room work maintained by First Church of Christ, Scientist, Portland, Ore., may be of interest. Three large rooms, in a business block, were secured in April, 1901, attractively furnished, and opened to the public from 10 A.M. to 5 P.M. each day, and from 7.30 to 9 P.M. each evening, excepting Sunday and Wednesday evening.

From April 16, 1901, to April 1, 1902, sales of literature amounted to $1,045.78. One hundred and twenty copies of Science and Health were sold. There have been about fifteen hundred copies of the *Sentinel* distributed and about five hundred copies of the *Journal, Sentinel,* and "Christian Science History" sent on the transports to Manila.

In connection with the church work a circulating library is maintained in which there are at present seven copies of "Science and Health with Key to the Scriptures" and one copy of "Miscellaneous Writings" in constant circulation. These books may be obtained by visitors and inquirers upon application at the close of the Wednesday evening service. It is in the spirit of deepest gratitude that this report is submitted.—MABEL MARCIA BULL, *Clerk.*

Services at Home for Aged Persons.

At the Home for Aged Persons in this city yesterday [Sunday, April 27], an afternoon service was held under the auspices of First Church of Christ, Scientist, of Malden, Mass.

It being a repetition of the regular Sunday morning service of this church, the desks were occupied as usual by Arthur H. Pope, First Reader, and Mrs. Carrie A. Harrington, Second Reader.

There was a full attendance of the inmates of the Home, and many visitors were present. The audience gave careful attention throughout the service, and at its close expressed grateful appreciation. The solo, "Plains of Peace," was rendered by Miss Rose Hawke.—*The Evening Mail.*

Report of Reading Room at Logansport, Ind.

The second annual meeting of the Reading Room Association of Logansport, Ind., was held March 19, 1902.

As our sales of literature doubled that of the first year, we have gladly noticed the growth and wish to send our report to the Field.

The amount of the sales of literature during the year was $285.52. Subscriptions to the Publishing Society amounted to $127.50. There were forty-three copies of Science and Health sold this year. The number sold the first year was sixteen.

Since the building of our chapel, the first Christian Science home in the state, the demand for literature has greatly increased.

We send many expressions of gratitude for the revised edition of Science and Health.

AMELIA D. HEPPE, *Librarian.*

Reading Room at Detroit, Mich.

The reading room of First Church of Christ, Scientist, Detroit, Mich., has been removed from the Chamber of Commerce Building, where it was located for nearly three years, to the Majestic Building, only a block distant. The new rooms are spacious and command a beautiful view of the Detroit River, the prospect extending from Lake St. Clair to where the river flows into Lake Erie. The Scientists have reason to congratulate themselves upon this move, and will gladly welcome visitors from other cities, as well as enquirers in our own to a quiet resting-place where the refreshing words of Truth will aid many seekers to find healing and blessing on their way onward.

F. M. HUBBARD, *Clerk.*

Rev. Mr. Simonsen.

The *Saturday Chronicle,* a sprightly and interesting weekly published in New Haven, contains the following biographical sketch of the Rev. Severin E. Simonsen:—

Rev. Severin E. Simonsen, Bachelor of Christian Science, was born near Milwaukee, Wis. He graduated from the College and Theological Seminary at Evanston, Ill., and after fifteen months' travel and study abroad he returned to this country and for twenty-four years carried on his work as a Methodist minister. About fourteen years ago his health was gone, and the doctors had given him up. He was greatly disheartened, and it was then that he first came in contact with Christian Science, by which he says he was completely cured. For several years he remained in the Methodist Church, till at last he decided that he must leave that denomination and become a Christian Scientist. This meant the giving up of the very best pastorate the Norwegian Methodists had in this country or any other. On November 28, 1900, he handed in his resignation. Mr. Simonsen says that he has never regretted this step, and although with a large family to support, he has prospered in every way since he united with the Christian Scientists. Mr. Simonsen came to New Haven last February as First Reader at First Church of Christ, Scientist. His oldest son is a student at the Boardman Manual Training School, and a contributor to the American Scientific Monthly; one of his articles has been copied into a London magazine. Rev. Mr. Simonsen is a practising healer, and much of his time is spent in that work.

The Mother Love.

BY FRANCES HASTINGS JEWETT.

"MOTHER!" It is a sacred name, conveying a thought of infinite tenderness to the human heart; but from the world comes a voice, not always kindly, not always courteous in its tones, pressing home this question, "Why do the followers of Christian Science, give to its Discoverer, Founder, and Leader, the title of "Mother"?

Up from my childhood, one of many pictures, rises with undying sweetness, bearing testimony in my heart as to the meaning of a mother's love. I had been kept very close to my mother's side, being a suffering little child; indeed, the doctors had pronounced me so frail that, in their opinion, it was highly improbable I should ever live to reach womanhood, but the dear mother thought differently, and it was her love that triumphed. I was one of several brothers and sisters, all older and stronger than myself. They were taught at home, by a governess, and the time came when it was my father's wish that I should join them and begin my lessons.

Those first days in a schoolroom seemed to me as days of banishment into a far country, the very atmosphere of which repelled and terrified me, and one of them stands out most vividly, as being full of weariness and pain. I was being initiated into the multiplication table. Even to this time I have a decided aversion to working in figures, and I could not learn,—could not understand. The teacher thought I was stupid and sullen. She labored, I stood dazed, while the meaningless things beat about my throbbing head, and the tears dried up, as they fell upon my burning cheeks.

A poor little trouble enough to look back at now, but to the child of that day and hour it might have been a foretaste of the fiery orthodox hell, into which we children were occasionally given mental peeps, considered wholesome and necessary for our growth in grace according to the doctrine of the old Covenanters, handed down to us from our father's side of the family.

In the midst of my torture, came the opening of a door, the soft rustle of a dress. It was my mother. Oh! I can always see the sweet face as it looked at that moment from the doorway, the great, tender, shining eyes lighting straight on me, with clear, comprehending glance, and the next moment I was hiding in the folds of her dress, as she stood beside me, softly pressing her hand to my cheek, and from this dear refuge I heard the gentle, courteous voice saying to our governess, "I think she is tired; may I take her out to have a piece of bread and butter? Then, after a run in the sun, and the fresh air, she will come back to you brighter, and be able to say her lesson." And she carried me off for a glimpse of heaven. That piece of bread and butter, that run in the sun, the air cooling my face and joyfully lifting my hair, as I raced round and round, stretching my half paralyzed limbs, like some little caged creature set free! But most of all, I think of my mother's face as she watched, with its look of ineffable love, and she was right, too, about the lesson. I did learn it when I went back.

I lived to see that mother pass away, after years of pain and torture, from which the physicians could give no relief. I, too, had become a woman, in a strange land, having journeyed far from the Southern Cross of Australia under which I was born. The cross hung low in the skies—so it always seemed to my child eyes. The great stars that formed it, like tender beckoning lights, bending between earth and heaven, were prophetic and symbolic of all the world's story. But since those days, I had learned the bitterness of trying to live without God, wandering through the parched wilderness of agnosticism, starving as I journeyed toward its ever-vanishing mirage.

I had traveled far down the pathway of disease; that mournful way, worn hollow and slippery by the feet of the world's millions, crowded with the images of their despair, swept by the bitter waters of their tears, and I was drawn along it shrinking, shuddering at every step, rebelling against God and man, or rather against the God who, I had been taught, marked out this way to heaven, until forced to my knees I cried out continually, "God, if there be a God, give me the light!"

Then the door opened, and I found again in the world a mother's love. Christian Science lifted me up, and out past the dread portal of "the way to dusty death" set me in a large, clean place, swept by the sunlit air of God, and whereas I was sick, I found myself well.

And who has given to the world an opportunity to gain an insight into this "unspeakable gift" of God? Christian Science, has always been, but we knew it not, until to this age, through a woman's purity it shone, through a woman's travail, self-sacrifice, it was borne home to us. Then may we not call that woman Mother? She has *proved* her right to the name from all those who have been benefited by, and who follow the teachings of, Christian Science. She has made possible for us a new birth on earth, so that we can say in deed and in truth with Paul, "I was free born." Who could truthfully declare so before? fleeing as we were from the myriad ghastly armies of sin, disease, and death, which, alas, we firmly believed would overtake and finally conquer us, flee we ever so frantically, fight we never so bravely?

To each and all comes the trumpet call through Christian Science, faint at first, and far, it may sound to human ears, but always clear, and in the certain tones of one speaking with authority, a message of great joy. That the teachings of Jesus of Nazareth are practical here, to-day, in their entirety; that the armies we thought to be real and invincible, are but shadows; that we can rise and conquer them, for they are not ordained of God, and He is fighting on our side.

The voice cries on, that a glorious light has broken in upon our night, saying, "See, this is the way! Come, I will lead you!" And lo, a great multitude, which no man could number, of all nations, and kindreds, and peoples, and tongues, are beginning to arise and follow that light.

I love the one who opened the door, the one who leads the children gently on step by step, out of the valley of the shadow, toward that land of green pastures and still waters, the Christ-world, wherein we may learn to rest, and, drinking deeply of those waters, never thirst again.

If I rejoice at the message, I welcome the messenger. If I appreciate my God, I must appreciate the one who showed Him to me.

So in my heart, as with my lips, I call Mary Baker Eddy, Mother, grateful for the privilege of so doing, and earnestly desiring that I may be found worthy to be a daughter to her who has revealed to the world its greatest science, the Science of Christianity.

Gratitude.

BY ELIZABETH C. BURCHARD.

My heart is full of gratitude for the knowledge of Love that Christian Science brings to us. In the *Sentinel* of February 6, is this sentence: "I have to work alone, yet I know I am not alone, for God is my ever-present help."

These words came in the *Sentinel* to my daughter, who was alone in a western state. Her husband was in the east, and there was no one in the village who trusted in God for physical healing. The younger boy, over two years of age, was stricken with an attack of acute vomiting. This was on Friday. The error held out against her realizations of Truth, and on Sunday, with telegraphic communication suspended, her fears were magnified, and

Digitized by Google

the dear little fellow's condition almost tempted her to use remedies. In a lull of the work, the new *Sentinel* was taken up, and the sentence quoted was the friendly hand of hope and cheer. With renewed courage, and although struggling against her own physical ills, she clung to God, and Love answered. The boy fell into a quiet, restful sleep, and in the morning he was all right.

Each week the *Sentinel* comes like a loving friend, with cheer and word of progress that tells us that "He that keepeth Israel shall neither slumber nor sleep." Reading the *Sentinel* of March 6, so full of good thoughts and helpful illustrations, I said I must testify of the benefits received.

Daily I thank God for the Love manifested in Jesus Christ, His son; for the Love manifested by our text-book, "Science and Health with Key to the Scriptures;" for our Leader's faith, hope, courage, purity; for all the steps of progress in the establishment of *The Christian Science Journal,* the *Sentinel,* and *Quarterly.* Every sentiment of gratitude to our Mother, to the workers in the Field and in the Publishing House, or to the Lesson Committee, uttered by any writer in our publications I heartily endorse, and rejoice that they were expressed. Love has so united us that we begin to know that God *is* Good, and His mercy endureth forever.

Divine Love Leads.

BY DELIA HORN.

It has been proven to me many times since coming into Science that divine Love leads. Yesterday my brother was suffering greatly. He had just had a tooth extracted without the aid of Science, and he was walking the floor in pain. I thought perhaps I could get him to read something, and the first *Sentinel* I picked up I opened to a testimony of a man who had a painful swelling in his jaw and who read a verse in the Bible that mastered his trouble: "The Lord shall take the yoke off thy jaw." Brother was treated and received almost immediate relief.

That same evening I called on a lady who had been improving very rapidly under Science treatment. She had been suffering from a sore foot that the doctors had operated on. They were about to perform a second operation, when she tried Science. The swelling went down, the sore healed, the pain left, and she was able to walk in less than a week. When I visited her I found her under a sense of discouragement as the foot seemed to be very painful again. I told her it was not a bad sign. Error was trying not to give up. I opened a *Journal* and read the poem containing the following lines:—

The stormy night is dark before the dawn,
Dismal and overcast. . . .
The lie is loudest ere the Truth's revealed;
The night is nearly past.

Sowing the Seed.

BY H. W. W.

Recently I was in the Santa Fé passenger station in Topeka, Kan., and observed a man with crutches go to the box where Christian Science literature is kept and take out the last tract in the box and sit down and read it with manifest interest. He did not take his eyes off the tract until he had read it entirely through.

The quiet work done in putting our literature in public places cannot be estimated. I recall a remark made by myself last summer to a lady who spoke of the wonderful healing of my eyes. I said, "Yes; but the spiritual blessing is so much to be desired that we lose sight of the physical healing." She spoke quickly and said, "But we do want the physical healing." Then I did not know how to speak the Word with power to bring the light, but it has since come to me as never before from Luke, 10 : 17–20, and to my sense it covers the case exactly.

Testimonies of Healing.

The Truth does not come to all in a sudden sun-burst of illumination, as it came to Paul on that memorable trip to Damascus. In my own experience I came only in response to the summons, "Compel them to come in."

Mrs. Eddy says, "Spirit is our last resort; but it should have been our first and only resort, not the last" (Science and Health with Key to the Scriptures, p. 427). Shakespeare, the master singer of mortals, makes Wolsey, when shorn of his office and dignities by Henry VIII., say,—

Had I but served my God with half the zeal
I served my king, he would not in mine age
Have left me naked to mine enemies.

To understand how to serve God seems to have been the problem of the ages.

I was reared in the Catholic faith, and have distinct recollections of the dear little French priest who taught me my catechism, and that while he was earnestly striving to implant in my childish heart a wholesome fear of God, incidentally planted some of the first seeds of doubt and distrust. I was unable to accept some of the teachings, and at an early age the doctrine was rejected. About this time, going out into life, I entered on paths of sense pleasures, and for a time led an unthinking life of agnosticism; so when the storms of disease broke over me I found the material king whom I had been serving had indeed left me naked to my enemies.

With the hope that "springs eternal," a most vigorous pursuit of health was begun. I shall not dwell on the period of blackness and despair that followed; of the trials, the heartaches, the failures; of positions abandoned, of narrow circumstances; of hopes built up on temporary improvement; of how these hopes were dashed to earth again. Suffice it to say, there came a day that found me the most abject bankrupt in health and finance, on my way to a Christian Scientist to take a Christian Science treatment. I reached out for this treatment in Christian Science guided by the same impulse that impels the sinking seaman to clutch at the passing straw.

To begin to tell the work that was accomplished in me, mentally, morally, and physically, during the few following days would be entirely impossible in a brief article; so I shall simply illustrate with a detail.

For three years previous, I may safely say, I had not slept an entire night without the aid of sedatives; chloral, morphine, opium; and for the last year they had been taken in powerful and increasing doses and then the sleep obtained was a mere mockery.

A treatment was received. Now those who have felt the tyranny of insomnia, who have heard their town clock peal out the midnight hour; have heard it strike its one, its two, and sometimes its three and four, will appreciate it when I say I retired that night and slept calmly, sweetly, peacefully; sleep, such as I had not known since boyhood.

I arose next morning refreshed, rejuvenated,—a new creature. That day another treatment was received and as I returned from the Scientist's house my sense of life had changed and I began to see that there were more things in heaven and earth than had been dreamed of in my philosophy. I thought I had never seen the sun shine quite so brightly, had never seen the sky look quite so blue nor the grass so green. And with the surcease from physical pain and mental anguish came a sweet harmony that seemed to be filling the world with a glorious melody. In fact it seemed as Longfellow has said,—

I had moved a little nearer
To the Master of all music,
To the Master of all singing,

and turning to my companion in the surrey I said, "This is the first glimpse of God I have ever caught;" and it was.

Digitized by Google

These two treatments in Christian Science, these two silent denials of error's power, these two silent affirmations of the supremacy of Good, had done more to reveal God to me than all the sermons I had ever heard, than all the literature I had ever read.

And can sufferers, such as I, raised from weary days and wracking nights of invalidism, be grateful enough to Mary Baker Eddy, that grandest of women, who has abolished idolatry and reared the standard of metaphysical liberty? Or can we in any way repay the debt of this age for Science and Health with its splendid wealth of spiritual literature, teaching how to overcome sin, sickness, and eventually death?

While the benevolent healing Truth of Christian Science will never be confounded with the doctrine of iconoclasm, yet incidentally it is proving the mightiest image-breaker of the ages. And as we look back over a few years of application to this teaching we find the way strewn with shattered housel.old gods and idols; material theories, *materia medica,* false pleasures and the thousand phantoms that make life a nightmare and a mockery.

EDGAR MCLEOD, Omaha, Neb.

About twelve years ago when the grip was prevalent, I contracted the disease early in the fall of 1891, and it remained with me from that time until March, 1892. The doctors advised me to go South, after having tried all kinds of medicine without any help. The disease had then settled in one of my lungs, the doctors said, and I was coughing night and day.

I started for the southern part of Georgia and stayed there nearly two months. I came back somewhat better, but not cured. The trouble kept coming back every winter and it resulted in asthma, bronchitis, and catarrh. I also suffered from dyspepsia. Nearly every doctor I consulted prescribed *spiritus frumenti* in connection with other drugs. The whiskey became very agreeable to me and I discarded everything else and used it exclusively.

In the mean time I was getting worse both physically and financially, in fact getting nearer to destruction all the time. I began to see the condition I was in and commenced to realize that I could not live this way much longer. Finally, about a year ago, when visiting in Chicago, one day I met an old companion who has been a Christian Scientist for a few years. I told him my condition and asked him as a favor if he would loan me his Science and Health, as I had heard it was a remedy for the blues, etc. I was very despondent and cast down. My friend said he would loan me the book if I would come out to his church on the north side the next day (Sunday) and get it. I did so, and attended the Sunday evening service. My friend met me there and gave me the book.

I took the first car for my hotel and at once commenced to read. I kept on reading until I fell asleep. I started in again the next morning, and I think I read about fifty pages. That night I had a good night's sleep and ate a hearty breakfast the next morning, something very unusual for me. That same day I felt like a new man. The appetite for strong drinks left me gradually. I was also a great user of tobacco, especially cigars, and in order to destroy that desire I had to go to a healer. After taking two treatments I lost the desire for tobacco entirely. Furthermore I am very happy to say that my bronchitis, asthma, catarrh, and dyspepsia have disappeared entirely, my physical condition is splendid, and I thank God and Christian Science for it.—L. S. WENSOLE, La Crosse, Wis.

Having many times received encouragement and helpful thoughts from the testimonials in both the *Journal* and *Sentinel,* I desire to send my testimony in grateful acknowledgment of what Christian Science has done for me.

When a schoolgirl I was quite a hard student, and as I had never been very strong physically, I thought it necessary to bend every energy and exercise much will power to enable me to gratify my ambition as a student. After several years of intense strain I found myself at the age of seventeen a complete physical wreck. No words could describe the suffering of the next few years. Those who have passed through a similar experience know the physical and mental anguish which attend a general breaking down of the entire system. I was unable to read, and too ill to do anything for my own pleasure. My chief thought was one of inward rebellion toward the God who I thought had rewarded my best efforts by taking away all that made life worth living.

Both the allopathic and homœopathic schools of medicine were tried in vain, and drugs of every description taken. Finally, in desperation, simply because everything else had failed, I turned to Christian Science as a last resort. For three successive years from May until October, I was on a couch unable to move, and it was in this condition that my healer found me when I began treatment, nearly three years ago.

My healing was gradual but sure. One by one, the old troubles which had held me in bondage so long were overcome, beautifully and naturally. Dyspepsia in its most violent forms, also severe headaches which lasted a week at a time, are now things of the past. I had also worn dark blue glasses for a number of years to shield my eyes from the light, but even with their aid my eyes caused me much suffering. The glasses were laid aside at the first treatment and have never been needed since.

The physical healing has indeed been great, but far greater yet the spiritual uplifting. My whole conception of life has changed. I was naturally of a despondent temperament, and years of sickness had greatly increased it. Now I find peace and happiness where I formerly found depression and discontent, as I know that all true knowledge and happiness are in and of Mind.

For this great blessing which has come into my life I give God the glory. To the dear Mother who has been to us the way-shower, and my healer to whom Truth led me, I give everlasting thanks.

RUTHALIE WINSTON, Norfolk, Va.

I am very grateful indeed for Christian Science, and I would like to tell others something of what it has done for me.

For some years I had suffered very much with my eyes, and although I had had the best advice and everything had been done that could be done, they seemed to get worse. The pain was intense whenever I used them, and I had constant headaches.

I had long known of Christian Science but did not believe there was any truth in it. About fourteen months ago I was persuaded to try it, with the result that my eyes were healed, and I could use them for any length of time without the least inconvenience. I was very thankful. Then, as I had proved that Christian Science was indeed true, I only wanted to go on studying to gain a better understanding of God, Good, as all-powerful and ever-present.

Since then I have had many opportunities of proving the power of Good over evil.—I. H., Edinburgh, Scotland.

Therefore, let us be patient, patient; and let God our Father teach His own lesson in His own way. Let us try to learn it well and quickly; but do not let us fancy He will ring the school-bell and send us to play before our lesson is learned.—CHARLES KINGSLEY.

Real knowledge, like everything else of the highest value, is not to be obtained easily. It must be worked for, studied for, thought for; and, more than all, it must be prayed for.

THOMAS ARNOLD.

Religious Items.

The Universalist Leader says:—

"Of the marvelous change in the theological temper of the age we can show no better evidence than to quote the following from *The Sunday School Times*:—

"'God is better and more lovable than ever the words in the Bible declare. For the Bible and its words are human, with human limitations, while God is infinite, and therefore is beyond the power of human words to describe and define even though they may suggest so much. Yet the many and explicit statements in the Bible as to God's love and mercy are so unmistakable that there would not seem to be cause for doubt over a matter that has been troubling a Pennsylvania Bible class. The teacher writes: "Are we to understand that they were forgiven through Stephen's intercession? Some [of the class] contended that Scripture clearly states that no murderer shall enter into heaven, therefore they could not be forgiven. Again, the case was cited of Christ's prayer for his enemies when he was on the cross: "Father, forgive them, for they know not what they do." Was Christ's prayer of no avail?'

"As to the question whether the particular prayer of Stephen or of Jesus was answered, the editor has no personal knowledge or means of knowing beyond the Bible record. Yet he is sure that we have good grounds for hope in behalf of those for whom Jesus prayed as not knowing what they did,—such as Roman soldiers under orders. But as to the other point suggested in the Bible class, that is a different matter. 'Some contended that Scripture clearly states that no murderer shall enter into heaven, therefore they [the murderers] could not be forgiven.' Where, in the Bible, is there any such declaration? Is it in the figurative description in the book of Revelation, of the new Jerusalem, with its streets of gold and its gates of pearl? Among those who are spoken of as outside of that city are liars, and murderers, and dogs. Yet is it said, there or elsewhere, that *no* murderer shall enter into heaven? Elsewhere it is said in the Bible that whoever hateth his brother is a murderer. In view of this we should be careful to recoil from unloving and untruthful and impure thoughts and ways. But even those of us who are no better of heart than such sinners can trust God as the loving and forgiving God."

Henry McFarland, the well-known newspaper correspondent, says in *The Congregationalist and Christian World*:—

"If every Christian man would live as he prays there would be no need of meetings, or general efforts for the conversion of men. If Christ's witnesses would only witness a good confession in all honesty and simplicity, and with the consequent peace and joy and power, everybody else would want what they had. Human nature is just the same at all times and in all places under like conditions. Under the changing fashions of thought and of costume men are the same, essentially, everywhere and in every century. Rich and poor, ignorant and learned, high and low, they all have hearts and their hearts are all hungry, more or less consciously, for the living God. They may try to satisfy their hearts in other ways, they may seem to be doing so, but they will all tell you that they are not satisfied unless they have the only satisfaction.

"Now most of them will not look for God either in His Word, or in any other revelation of Himself, but they do look for Him, more or less eagerly and more or less doubtfully, in the lives of the men who say they are His representatives."

Canon Henson's point of view has found unexpected support from the Rev. E. Winchester Donald, rector of Trinity Church, Boston, who holds the same opinions as to the validity of the ministerial orders of non-Episcopal churches. In a recent sermon he said:—

"Neither Episcopacy nor Presbyterianism ever saved a soul—but Christ manifesting his power and the grace of his sacrament through his Episcopacy and Presbyterianism, as the differing channels along which his love and mercy run to meet our human needs.

"Now and then one hears the antiquated assertion that only ministers who have received Episcopal ordination are competent to administer the Lord's Supper. The answer is that millions of souls have been refreshed and strengthened by that holy feast ministered to them by men on whose heads no biskop ever laid his hands. . . .

"If any one Church had the exclusive power of conveying through it sacramental grace, we may be sure that all souls who desire the fullest measure of Christ's grace would be found in that Church and no other. It must be so. The history of more than three hundred years has proved it."

The Literary Digest.

Now, when the taking away of some ancient fable or apparently proved historical fact or belief established by what was once considered credible testimony has no other effect upon us than to reduce our faith and hope, to put out the light of joy in our hearts, to leave our minds dull and the outlook for us obscure, then we may be sure that we have omitted in our acquisition of spiritual treasures some of the most valuable elements. In some of the most ancient psalms, hymns, and prophecies there is a joyousness, a confidence, and an eagerness of forelooking to which many advanced thinkers are strangers. And yet the triumphant note of these ancient thinkers marks an experience gained independently of most of the Scriptures, long before the New Testament was written. It is a sorry result of our modern literalism, if, losing what the higher criticism takes away, we are left in darkness. Those lusty, cheerful prophets who thousands of years ago rejoiced in the light and the coming day seem to have had natural sources of inspiration of which we would do well to avail ourselves.

The Christian Register.

This passage [Acts, 11:18] affords a beautiful illustration of the true Christian temper. These circumcised Hebrew Christians had all the pride of caste and of opinion that we associate with hereditary privilege, but when they heard that the Gentiles had entered into the experience of faith, they suffered their thoughts and convictions to be broadened to the compass of God's revelation. They caught the point. They did not say, "We see that a Christian Jew can consort with a Gentile," but they said, "Then hath God also to the Gentiles granted repentance unto life." And they saw that they could not refuse to receive what God received. The doctrine of human brotherhood was born in their thoughts. We cannot read this description without reflecting how many chapters in the history of the Christian Church would be changed if Christians had always had the openness of mind to fresh truth and the willingness to be controlled by it, that we see in these first Christians.

The Watchman.

Do we need a new revelation of Jesus Christ? Yes, yes, in the fuller manifestation of him, in the more loving, courageous, and consecrated lives of his followers. A new baptism of the Holy Spirit? Verily, we do need it; and then our pulpits will be clothed with power, and our preachers will have tongues of fire, and every change will be a change for the better advancement and enlargement of the kingdom of our adorable Lord.—DR. THEO. L. CUYLER.

After comprehending the love of Christ we may be filled in every other faculty with all the fulness of God. Knowledge may grow from more to more, beauty bloom, melody flow, and God may work in us to will, because, we being in His likeness in essential being, all His attributes may be added to the limit of our capacity. No one can be filled in other faculties with all the fulness of God till he has been made perfect in love.—BISHOP H. W. WARREN.

It is significant that our English words, "health," "whole," and "holy" have the same root and are fundamentally allied in meaning. A holy man is a whole man, a healthful man, body, mind, and soul full-orbed and dedicated to God and His truth and His work. This is twentieth century religion and it is *first* century religion, apostolic to the core. It is ultimate religion, for it is the doctrine of the divinely perfect man of Nazareth.

The Congregationalist and Christian World.

The report of the London *Congregational Union* says: "The one cry that drowns all others in regard to the demand from the Church of Christ is that it shall prove itself equal to the evangelization of the perishing multitudes who are unaffected by our ordinary ministrations."

The Christian Register says: "By a common impulse the religious papers of the country are turning their attention to the meaning and nature of preaching. After drifting for several years, the churches are beginning to take soundings, and consult the chart of human nature."

Not until recently have the Japanese bookstores been willing to carry the Bible in stock for fear of offending their Buddhist patrons. Now, however, Bibles are so eagerly sought that they are kept on sale in all the prominent bookstores in Japan.

Kindness has converted more sinners than either zeal, eloquence, or learning.

F. W. FABER.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Judge Grosscup has issued a temporary injunction against the six great packing-houses that together control sixty per cent of the meat business of the United States. According to the terms of the injunction the companies are forbidden to have any combination or understanding with one another when they bid for live cattle at the stock-yards; to push prices up or down so as to influence the supply of cattle at the yards; to fix by agreement the price at which they will sell dressed meats; to curtail their shipments of meat to special markets through a common understanding; to continue their credit agreements, by which they blacklist dealers who do not pay bills when due, if thereby they interfere with the natural course of trade; to receive freight rebates on their shipments of dressed meats from the railroad companies.

The firms against which the temporary injunction stands are Armour & Co., Swift & Co., The Cudahy Packing Company, Nelson Morris & Co., The Schwarzschild & Sulberger Company, and The Hammond Packing Company.

The packers sent out copies of the injunction to their agents, which number about three thousand, also letters stating that if the agents violated the injunction they would be held personally responsible.

The statue of Marshal de Rochambeau, commander-in-chief of the French forces in America during the Revolution, was unveiled at Washington, May 24. President Roosevelt extended a cordial greeting to the French visitors, the Count and Countess de Rochambeau, who with others of their countrymen had come to the United States to dedicate the monument which had been given by the French Government as an evidence of the kindly feeling which exists between the two nations.

M. Cambon, the French ambassador at Washington, delivered an eloquent address expressing his gratitude for the honor conferred upon his country. He was followed by General Horace Porter, the United States ambassador to France, who paid a glowing tribute to Rochambeau and his country. Senator Lodge of Massachusetts was the orator of the day.

Lord Pauncefote, the British ambassador to the United States, passed away at Washington, May 24. He was an eminent jurist and able statesman, and had represented his country at Washington in a satisfactory manner for fourteen years. He was the dean of the diplomatic corps. That place will now be taken by the German ambassador whose appointment dates from November 20, 1897.

May 20, Secretary Hay informed the diplomatic representatives of the United States that the military occupation of Cuba by the United States had ceased, and that an independent government, republican in form, had been inaugurated. The representatives were instructed to convey this information to the different governments to which they were accredited.

May 22, Senator Hoar of Massachusetts spoke for two hours and a half in the Senate against the Government's policy in the Philippines. Some considered it the greatest speech he ever made in the Senate. All the Senators, without regard to their views on the question, paid him unusual attention.

May 21, the Senate passed a resolution declaring that the Senate and the United States views with satisfaction and expresses its congratulation at the appearance of the Cuban republic among the nations of the world. A copy of the resolution was transmitted to President Palma.

The Presbyterians celebrated the centennial of the Presbyterian Home Mission Board in New York City, May 20. President Roosevelt delivered an address in which he gave his first public utterance on the new republic of Cuba.

A beautiful monument to the soldiers of the Spanish War was dedicated at Arlington, Va., last week. Its erection was the first national undertaking of the Colonial Dames.

President Roosevelt will deliver an address at Pittsburg, Pa., on July 4, which it is believed will be one of the most important speeches he has yet made.

Foreign.

At 12 o'clock, noon, on Tuesday, May 20, Tomas Estrada Palma, the first president of the Cuban republic, took up his task of government. The ceremony which transferred the government of the island from the United States to the Cuban republic was brief and simple. General Wood read the documentary transfer prepared by the War Department, pledging the new Government to proclaim immediately the constitution and the Platt amendment, and to undertake all obligations assumed by the United States, with respect to Cuba, by the treaty of Paris. President Palma replied in an appropriate manner, accepting the trust which was conferred upon him. The Cuban flag was raised in place of the Stars and Stripes, and the transfer was complete.

Pending the conclusion of a postal convention between Cuba and the United States, articles mailed in Cuba for the United States and articles mailed in the United States for Cuba will continue to be subject to the postage rates, conditions, and classification applicable to the domestic mails of the United States. This also applies to money orders between the United States and Cuba.

The area of Cuba is about 47,000 square miles. The total population in 1900 was 1,572,797.

At last reports Mt. Pelee was still active. For six hours on May 21 Port de France was literally bombarded. The air was filled with stones, hot mud, and ashes. The loss of life was not great, but the eruption was far worse than that of May 8, when St. Pierre was destroyed.

There was also another great eruption of the Soufriere volcano on the island of St. Vincent, on May 18, and the inhabitants of Kingstown were terrified. The inhabitants of the surrounding villages had fled to Kingstown, as it was the farthest town from the Soufriere.

The French Government has transmitted, through Ambassador Cambon, a letter expressing the thanks of that Government for the sympathy evinced by the President and the Congress and the nation of the United States toward the sufferers from the catastrophe in Martinique.

The British minister to Cuba was the first envoy to present his credentials. If President Palma at once recognizes the British minister he will be the dean of the diplomatic corps at the Cuban capital.

King Christian of Denmark has assented to the extension for one year of the time allowed for the ratification of the treaty for the sale of the Danish West Indies to the United States.

The Guatemala congress has practically doubled the tax on imports by making it payable in gold. The additional revenue is to be devoted to the payment of interest on the foreign debt.

King Alfonso issued his first proclamation, May 18. He asks of all Spaniards to give him their confidence and he promises in return to consecrate his life to his country.

Industrial and Commercial.

A steel manufacturer at Mechlenberg, Germany, claims to have produced a steel which gives double the resisting power of that manufactured by the Harvey and Krupp methods and the cost is fifty per cent less. It is stated that wedges of the new steel split ordinary steel like so much wood.

Owing to oppressive railroad rates the millers of Minneapolis have decided to transport their milling products in shallow barges to New Orleans where they will be at once loaded into seagoing vessels bound for the leading ports of the world.

The Atchison, Topeka, and Santa Fé owns upwards of eight thousand miles of railroad extending through and touching the most productive traffic centers of twelve states and territories.

Owing to the increased cost of living, the John Roebling's Sons Company, of Trenton, N. J., has voluntarily increased the wages of its four thousand employes ten per cent.

The railroads operating between Buffalo and Chicago have decided to unite with the eastern trunk lines in abolishing second class fares.

General.

By a vote of ten to nine the Board of Aldermen of Albany, N. Y., declined Andrew Carnegie's proffer of a $150,000 library building provided the city guaranteed an annual expenditure of ten thousand dollars for its maintenance.

The Presbyterian General Assembly met in New York City last week. The report of the committee on the proposed revision of certain portions of the Westminster Confession, was adopted with only two dissenting votes.

J. Pierpont Morgan is said to have presented to King Edward a large tapestry, for which he paid $500,000. It will be used for decorative effect in the Abbey at the coronation service.

The subscription price of the *Northern Light*, a small weekly paper published at Bettles, Alaska, is twenty-five dollars a year. Single copies sell for fifty cents.

The Mexican War Veterans' Association met at Fort Worth, Tex., May 20. A cordial message was received from President Roosevelt.

The thirty-sixth annual encampment of the Illinois G. A. R. was held at Rock Island, beginning May 20.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

The Lectures.

At Canton, O.

An audience of six hundred people heard Edward A. Kimball, C.S.D., of Chicago, deliver a lecture on Christian Science at the Grand Opera House yesterday afternoon [May 11]. Many were present from Pittsburgh, Salem, Alliance, Massillon, and vicinity. As a preface, Warren E. Russell of Massillon, a member of First Church of Christ, Scientist, of Canton, spoke as follows:—

"*Friends:*—We have with us to-day Rabbi Max Wertheimer, Ph.D., C.S.B., of Dayton, Ohio. Rabbi Wertheimer is said to be the first rabbi of orthodox Judaism, since the time of Jesus Christ, to become converted to Christianity and to take open and public stand in reference to his change of belief. To better introduce the lecturer I now present to you with much pleasure Rabbi Wertheimer of Dayton."

The Rabbi spoke as follows: "Every nation on the globe has a divine purpose, an historic mission to fulfil, in the providential plan of earthly management. Just as soon as this purpose is accomplished, the nation has done its part, it is either set aside, and left in peace, or it is succeeded by a mightier one unfolding a still higher and clearer view. Thus, the Greek stood for art and philosophy; the Egyptian for invention and architecture; the Jew for monotheism; the Roman for jurisprudence and discipline; modern Europe for culture and music; America for liberty. This gigantic country of ours in God's inscrutable wisdom, has been divinely set apart to become the stage for the enacting of the greatest and most epoch-making drama of all the preceding centuries; the political and religious rights of man, woman, and child. But, after all, what is political and religious freedom, with slavery to sin, disease, and the woes of hell? The Bible indeed saith: 'Righteousness exalteth a nation,' but, what is righteousness? Right speaking, right doing, right living. But, understand, that there never can be any right speaking, or right doing, or right living without right thinking.

"Yes, but what is right thinking? How do you know you are thinking aright? The religious world to-day is confused with a babel of sects and contradicting theories. Atheism, agnosticism, and scepticism have their pet fads and hobbies; they are huckstered about our streets; the very air is full of such thought. Each and all want to be right and safe guides. Above the bewildering din of chaotic errors and the stormy uproar of tumultuous waves of thought there is heard amidst this dismal raging Christ's voice: 'Peace, be still,' 'I am the way, the truth, and the life,' 'Heaven and earth shall pass away, but my words shall not pass away.' Jesus Christ to-day is the way-shower to right thinking, not a human synod, nor academy, nor seminary, nor convention of worldly-minded men. It is this Christ knowledge, or Christian Science, that Spiritual Stone, which the Pharisean teachers of all ages have rejected, which is about to become the chief corner-stone of a regenerated race. Christian Science teaches how to be free indeed—'Where the Spirit of the Lord is, there is liberty.' And liberty, bereft of the tyranny of disease, we want. All religions of the past did, and most of the present do, teach that man should be good; but no religion, except Christian Science, has ever uncovered the mystery of evil and its subtle, secret operations. Just think of that! Mrs. Mary Baker G. Eddy, who has founded the Christian Science movement, has, through God's help, revealed this thing, and no one else has. Mind you, a thousand probabilities do not make one truth. We do not want 'perhaps' or 'may be,' we want facts. Hospitals are full of sick people; asylums full of demented ones; homes full of invalids; almost everywhere, suffering, anguish, misery, pangs, and skeletons in the closet. We are impatient and tired of mere phrases and words. When we are hungry we do not desire brilliant speeches and tinselled theories; we want bread. When we are thirsty we do not care for dogmatic nonsense and man-made creeds; we want water. The Bread of Life and the Water of Salvation alone will satisfy. In a calm, impartial, and unprejudiced way, let us thoughtfully inquire what is the remedy and how is it to be secured? The creeds tumble, the barriers break, the clouds drift, the morning dawns! What we need is a light-bearer; such an one is with us to-day. For the last sixteen years he has helped to pioneer and to champion the cause of Christian Science, the Science of right thinking; he speaks from conviction and experience, and hence with authority; for he is a living witness to the Truth he proclaims: he has been snatched from the almost certain jaws of death. Give him your unstinted attention. And now I have the pleasure of introducing to you this light-bearer, my esteemed friend and teacher, who will discourse on 'The Cause and Scientific Cure of Disease,' Mr. Edward A. Kimball, C.S.D., of Chicago."—*Correspondence.*

At New Bedford, Mass.

Carol Norton, C.S.D., of New York City, lectured in the Y. M. C. A. Hall, Tuesday evening, May 13, under the auspices of Second Church of Christ, Scientist, on the subject, "Christian Science is Applied Christianity," before an attentive audience of seven hundred, the hall's seating capacity, representing people of various denominations.

The lecturer was introduced by Lemuel T. Willcox, a leading attorney, in part as follows:—

We are here this evening by invitation of Second Church of Christ, Scientist. We are guests, and are bound in accepting the hospitality of our hosts to listen to the address of their speaker in a spirit of sympathetic appreciation, and not of invidious criticism.

This is the first meeting of the Church of Christian Science that I have ever attended, and so I am not familiar with either its faith or its methods. In the medical profession I can count many friendships as dear as those of my own profession. It would be ungrateful indeed in me to conceal the profound obligations I am under to certain of its members. But there is no lack of compliment or respect for that profession in stating that the doctor who can bring into the sick-room of his patient nothing better than medicine, is seriously unfitted for the discharge of its most important duties. The first duty in the sick-room relates

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

rather to the character of the physician than to the health of the patient.

The best lawyer is the man who has the finest moral sense, and so is the best doctor. That doctor serves a better end who has behind his medicine something better than medicine; and without the better thing he will invariably fail. It is confidence in the healer that largely effects the healing. It is the moral sense and not medicine that in the sick-room makes the face of the true physician a benefaction, it is moral sense that makes his voice a benediction, and moral sense that makes his presence an inspiration. The work which goes on in the doctor's heart is the work that goes on in the patient's body.

Without confidence in the man, there can be no confidence in his medicine, and without confidence in both there can be no benediction, no benefaction, and no inspiration.

It is with extreme pleasure that I introduce to you the distinguished speaker, Mr. Carol Norton of New York City, and I wish to extend to him in advance your cordial welcome to our city by greeting him heartily with the right hand of good fellowship.—*Correspondence.*

At Scranton, Pa.

Mr. Carol Norton last night [May 8] addressed a crowded house in the Lyceum on the subject: "Christian Science is Applied Christianity." The lecture was followed with close attention by the large audience. Mr. Norton, who comes from New York, is a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, and although this is not his first visit to this city, the fact that he attracted such large numbers last night is proof that his efforts are highly appreciated. The lecturer was briefly introduced by Mr. McKee, First Reader of First Church of Christ, Scientist, Scranton.

Scranton (Pa.) *Republican.*

In introducing the lecturer Mr. McKee said in part:—

Friends:—On behalf of First Church of Christ, Scientist, I bid you a most hearty welcome. You are invited here to consider for a moment what the greatest thing in the world has done and can yet do toward easing all the sorrows and all the sicknesses of mankind. We wanted you to know that the Truth which has healed us in Christian Science can come also to every one of you with all its wealth of joy and peace.

In order to offset general misconceptions of Christian Science and correct them, our beloved Leader, the Rev. Mary Baker G. Eddy, has instituted and established the Christian Science Board of Lectureship of the Mother Church, of Boston, Mass. This Board is composed of persons she deems worthy and exemplary Christians, and in every way qualified to speak with authority on the great subject of Christian Science, and I now have the pleasure of introducing to you Mr. Carol Norton, C.S.D., of New York City, a member of this Board.—*Correspondence.*

At Detroit, Mich.

On Sunday afternoon, May 4, a large audience assembled in the church edifice on Alexandrine Avenue, West, to listen to a lecture by Mr. Kimball, his third in Detroit. The lecturer was introduced by Mrs. Knott, who said:—

Ladies and Gentlemen:—On behalf of First Church of Christ, Scientist, I bid you welcome to the lecture to be given by Mr. Kimball. He will tell you this afternoon something of what Christian Science work is, as distinguished from the many false opinions about it; he will also speak to you of the Discoverer and Founder of this Science and, perhaps, enable you to see why she is held in such reverence by the thousands who have been lifted out of sorrow and suffering through this blessed revelation.

A few weeks ago a gentleman from another city, who is a member of the dramatic profession, called at our reading room and said that not long before a friend had asked him why he spoke of Mrs. Eddy so frequently, and especially why he called her "Mother." He replied in touching tones and told of a life uplifted and ennobled by this Truth, and said, "I call her mother because I do not know of any name so dear; if I did, I would use it in speaking of her. I have heard men curse their fellow-men and blaspheme God, but I never heard a man blaspheme his mother, and so it is fit that we should speak of Mrs. Eddy by this endearing and sacred name."

The revelation of Truth which has come to the world through Christian Science is foretold in the Bible in the most unmistakable terms; for it is said therein that an era will dawn upon the world when pain, sin, sorrow, and death will disappear, and God will be known and recognized as dwelling forever with His people. The prophets in all ages have pointed to this period, and the poets have sung of it, but Christian Science is demonstrating its presence and harmony with us to-day.

It gives me much pleasure to introduce to you Mr. Edward A. Kimball, C.S.D., member of the Christian Science Board of Lectureship, of the Mother Church, Boston.

Correspondence.

At Waterbury, Conn.

Whatever may be said of some other cities, there seems to be no lack of interest in Christian Science in Waterbury. The audience that greeted Carol Norton last evening [May 15], almost filled Leavenworth Hall.

Mr. Norton is a speaker of unusual ability and shows an extended knowledge, not only of the doctrines and practices of Christian Science, but of those of other churches and of Biblical and religious history. His lecture was remarkable for the tolerant spirit in which he treated the adverse criticisms made for several years by those who are hostile to the teachings of this church.

He was introduced by the Rev. S. E. Simonsen of First Church of Christ, Scientist, New Haven, who became famous some time ago when he left the Methodist Church in New York and joined the Christian Scientists. Among the interesting remarks that he made were the following:—

"I want to compliment you, and myself as well, that we live in a progressive age, an age in which men dare to investigate things without fear, an age in which men are seeking to advance on almost all lines. But have you ever noticed that there is one line in which men seem to be very slow to advance? It is the religious line.

"When it comes to religion they seem to be satisfied with that which their great-grandfathers believed in. There seems to have been a determined effort on the part of man to clog the wheels of progress when it comes to the question of progressive Christianity."

Mr. Simonsen also spoke interestingly of his leaving the Methodist Episcopal Church, in which he had preached for more than twenty-five years, and joining the Christian Scientists.—*Waterbury* (Conn.) *Republican.*

Lectures at Other Places.

At Emporia, Kan.—Edward A. Kimball, March 18.
At Pocatello, Ida.—William G. Ewing, March 18.
At San Antonio, Tex.—Edward A. Kimball, March 27.
At Ouray, Col.—Edward A. Kimball, April 10.
At Elgin, Ill.—Edward A. Kimball, May 2.
At Akron, O.—Edward A. Kimball, May 12.
At Lorain, O.—Edward A. Kimball, May 13.

All the strength and force of man comes from his faith in things unseen. Strong convictions precede great actions. Clear, deep, living convictions rule the world.

Selected Articles.

Christian Science and Bible Study.

New York, April 10, 1902.

H. Gerald Chapin, Esq., *The American Lawyer.*

Dear Sir:—I have read with much interest an article in the March number of your valued periodical, entitled, "The Bible in the Lawyer's Library." The author, Joseph Hansell Merrill, Esq., has paid a novel tribute to the Bible and has pointed out, what is patent to all observers, that the study of the Bible is advancing rapidly in our day.

For this reason I was surprised to find what seemed to be a slighting reference to Christian Scientists in this article, when, as a matter of fact, no movement with which I am familiar, is doing more to make earnest students of the Bible than Christian Science itself. I read, on page 104 of your periodical, towards the bottom of the second column, the warning of Isaiah concerning "familiar spirits" and "wizards," followed by the words: "Was it with prophetic eye he saw us struggling with Christian Scientists, Spiritualists, *et id omne genus?*"

It is literally true that every Christian Scientist, man, woman, and child, becomes in some measure a Bible student, the adults generally becoming daily students, reading the Sunday Bible lessons on week days, and often repeating this morning and evening. It is the universal testimony of Christian Scientists that the Bible becomes a new book to them after they have received some understanding of Christian Science teaching and practice. The Christian Science text-book, by Mary Baker G. Eddy, is entitled, "Science and Health with Key to the Scriptures." As this title indicates, the book forms a commentary upon the Scriptures and acts as a spiritual interpretation thereof. No sermons, as the term is generally understood, are preached in the Christian Science churches; the Bible and the text-book are the only preachers and correlative passages from the two comprise the sermon.

When it is remembered that there were six hundred and sixty-three organized Christian Science churches and societies here and abroad, on January 1, 1902, showing an increase of eighty-one churches during the past year; and that the same Bible lesson is conscientiously studied and read in them all every Sunday; and when it is known that there are Christian Science reading rooms in most of the larger cities, and in many of the smaller ones, where the Bible is constantly being read free of charge, it becomes evident that Christian Science is contributing a very great share towards the spreading of Bible study.

Furthermore, if the grouping of Christian Scientists with Spiritualists is intended to convey the impression that they are similar in faith, this impression is erroneous. A whole chapter in the Christian Science text-book is devoted to an explanation of the distinction. That there may be no question in regard to this distinction, allow me to quote from page 71 (Rev. Ed.).

"In proportion as the Science of Mind is understood, Spiritualism will be found mainly erroneous, having no scientific basis or origin in Principle, and having no proof nor power outside of human testimony and belief. It is clearly the offspring of the physical senses, instead of Science."

It is my impression that the author of the article in question and the members of the legal profession in general, would find much interest in following up their study of the Bible with an investigation into the spiritual interpretation taught by Christian Science. They would find all through the Scriptures the record of two kinds of law—the law of God, or Spirit, and the law of matter according to the human, mortal or carnal mind. They would then be able to read with greater understanding such texts as the following:—

"For the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death. . . . Because the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be" (Romans, 8 : 2, 7).

"But if ye be led of the Spirit, ye are not under the law. . . . But the fruit of the Spirit is love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance: against such there is no law" (Galatians, 5 : 18, 22, 23).

The members of the legal profession should understand in a measure how Jesus, his disciples and apostles, the early Christians and the modern Christian Scientists are able to break the so-called laws of sin and sickness through the understanding of "the law of God, the law of Good, interpreting and demonstrating the Principle and rule of universal harmony," as Christian Science is defined by Mrs. Eddy. (Rudimental Divine Science, p. 7.)

Such law-breaking can never require the professional services of any lawyer, but should rather elicit his praise and act as an example. Thanking you for your courtesy, I remain,

Yours truly,

W. D. McCRACKAN.

In *The American Lawyer.*

Christian Science cannot produce Evil.

Editor of *The Union.*

A recent edition of your paper, *The Union,* contained an article entitled, "Reversible Christian Science." The discussion, of which the article purported to be a report, aimed to prove the theory that if Christian Science can cure disease, it can also cause disease.

This theory finds no support in Scripture and none in the teachings and practice of Christian Science. The theory is false that the same power by which good is accomplished may be reversed and used for evil purposes. This belief is a part of the prevailing materialism which declares that God—the supreme power that created and governs the universe—is both positive and negative, good and evil. If prayer to God avails in the healing of sickness, why may not prayer to God be employed by the evil-minded to cause sickness? Or, to speak definitely, if prayer heals the drunkard, why may not prayer be employed to create drunkards? This is the problem which perplexes our good friend, and he declares that nothing can convince him to the contrary; that the power which can heal can be also used to make sick. He admits that Christian Science does heal, but is afraid that evil may come of it. Is he not similarly afraid that the prayers and sermons that are offered in our churches may be reversed by some one hearing them, and made a power for evil?

Our critic evidently does not understand that Christian Science is based upon the Bible, and that the works of healing are not through the power of the human mind, but through the power of God. A prayer reversed would no longer be a prayer. Does this critic affirm that God hears the prayers of the unrighteous, and answers them? Scripture declares that only the pure in heart can see God. And that God is "of purer eyes than to behold evil."

The fact is that our critic, however honest he may be in his motives, is laboring under a misapprehension of this entire subject. He does not understand what he is saying, his subject hangs in gloominess and his fears are the children of his imagination and darkness. What he thinks he is speaking against nowhere exists. Christian Science is not what he thinks it is, hence he has not touched Christian Science but is only dealing with his own erroneous thoughts. Any one who could utter the following sentence is not sufficiently informed and is self-evidently incompetent to speak intelligently on Christian Science: "Indeed, up to this moment, I have not even heard of the existence of such a phenomenon as a male Christian Science healer."

It is interesting, in this connection, to note that those

Digitized by Google

who misunderstood the works of Jesus, mistrusted them, and instead of seeing therein the power of God, tried to undo his good works by declaring that they were done by the power of Beelzebub. See Luke, eleventh chapter.

Christian Science repudiates the theory that God is a divided or dual power and that evil can be done through the power of God. "Every kingdom divided against itself is brought to desolation." The Christian Scientist knows that his success in healing sickness and sin depends upon his ability to reflect divine Love, for God is Love, the only power. This power is always good. The evil-minded cannot employ it to do evil, to injure, or avenge enemies, as our critic alleges. When our thoughts and motives are employed to do evil we cease to be Christians. To do evil is to be occupied with the imaginations of the human heart, and has no relation to God's work as presented in Christian Science. CHARLES D. REYNOLDS.

Things not Seen.

WE republish from *The Constitution* of Atlanta, Ga., the following extract from a sermon recently preached by Rev. Dr. W. W. Landrum at the First Baptist Church in that city. The text was 2 Corinthians, 4 : 18: "While we look not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal." He said in part:—

"Men of spiritual vision are not visionary men. Spirituality is practicality. When 'we look not at the things which are seen, but at the things which are not seen,' we are philosophical as well as religious. Our senses are deceptive. The eye especially makes great mistakes. Things are not what they seem; nature is not what it seems; men are not what they seem. You no longer believe the testimony of your eye when it tells you that the heavenly bodies are but lamps of various sizes hung up in the heavens, or that the earth is flat and stationary and the center of our solar system. In all this the eye deceives; in a thousand minor matters it is busy with its delusions. The mind's eye is reason. Reason is better than sight; it collects evidence and corrects the mistakes of sight. Reason is spiritual sight; reason builds evidences on which faith, which is simply confidence in God, or right reason leaning on God, can rest satisfied and secure.

"As in nature, so in human nature, wise men look at 'the things which are not seen.' We are not materialists; we believe in a region of invisible and eternal principles; we stand squarely against those who live a material life; we oppose, as contrary to common sense, all those whose ideas of wealth, beauty, grandeur, dignity, pleasure, are material and 'of the earth, earthy.'

"Let me talk to the most thorough-going materialist here to-day. My friend, in what do you believe? Suppose you answer, 'Money; I believe in money.' Very well; money, as a servant, as a means to an end, is good and desirable; but for what? Simply because it may bring happiness. Then, to be correct, you should say, 'I believe in happiness.' But remember, happiness is not material; happiness is a matter, not of the flesh, but of the spirit; happiness is invisible; it belongs to the 'things that are not seen.' Real, indeed, it is as real as rocks or gold, but you cannot try it in a crucible or weigh it in scales, or use it as a circulating medium. What do you believe in? 'Credit,' you may reply. Yes, the whole world believes in credit. True, you cannot see credit, but no civilized trade or industry can exist without it.

"The city of Jacksonville burned to the ground. Fortunes, slowly built up, melted in the fierceness of the flames. Scarcely had the ashes of the conflagration cooled before men without a dollar were beginning to sell goods and put up new stores. Credit was at work. What is that invisible power which gives mastery over values in times of misfortune? It is not a matter of eyesight: it is something you cannot touch or taste or smell or hear. It is clearly that real quality of the human spirit we call character. So it comes to pass that you should not say, 'I believe in credit,' but 'I believe in character,' for it is on character that credit is founded and without character credit would be impossible.

"We look, then, at the 'things which are not seen,' because we are on the hunt for character. We are assured of the practical value of character. It is a real thing in man and in God. We contend that a man who carries Christly character wherever he goes; who is right in the invisible realm of reason and conscience; who faces disappointments, reverses, losses, bereavement, and death itself with sunny hope, does a real service to the community. The spirit of such a man is high above all shadows; the appearances of the world of matter influence him but little, for he walks in conscious fellowship with the real and the eternal. The one supreme truth with such a man is that 'God is Love.' This is the secret of the universe. Creation which you see is the outcome of this fact; the whole order of things is grounded in it; the harmony of the universe is its realization. Love and you live in the spirit; live in the spirit and you put yourself in accord with the eternal harmonies; you fall in line with the eternal order; you enter a realm of eternal peace."

President Roosevelt on the Bible.

As all of you know, there are certain truths which are so very true that we call them truisms, and yet I think we often half forget them in practice. Every thinking man, when he thinks, realizes what a very large number of people tend to forget that the teachings of the Bible are so interwoven and entwined with our whole civic and social life that it would be literally—I do not mean figuratively, I mean literally—impossible for us to figure to ourselves what that life would be if these teachings were removed. We would lose almost all the standards by which we now judge both public and private morals; all the standards toward which we, with more or less of resolution, strive to raise ourselves. Almost every man who has by his lifework added to the sum of human achievement of which the race is proud, of which our people are proud—almost every such man has based his lifework largely upon the teachings of the Bible. Sometimes it has been done unconsciously, more often consciously; and among the very greatest men a disproportionately large number have been diligent and close students of the Bible at first hand.

Sometimes, in rightly putting the stress that we do upon intelligence, we forget the fact that there is something that counts more. It is a good thing to be clever, to be able and smart; but it is a better thing to have the qualities that find their expression in the Decalogue and the Golden Rule. It is a good and necessary thing to be intelligent; it is a better thing to be straight and decent and fearless. You may look through the Bible from cover to cover and nowhere will you find a line that can be construed into an apology for the man of brains who sins against the light. On the contrary, in the Bible, taking that as a guide, you will find that because much has been given to you, much will be expected from you; and a heavier condemnation is to be visited upon the able man who goes wrong than upon his weaker brother who cannot do the harm that the other does, because it is not in him to do it.

The immense moral influence of the Bible, though, of course, infinitely the most important, is not the only power it has for good. In addition, there is the unceasing influence it exerts on the side of good taste, of good literature, of proper sense of proportion, of simple and straightforward writing and thinking. The Bible does not teach us to

Digitized by Google

shirk difficulties, but to overcome them. That is a lesson that each one of us who has children is bound in honor to teach these children if he or she expects to see them become fitted to play the part of men and women in our world. Extract from an article in the *Liberia,* Washington, D. C.

Man may Think himself to Death.

THOUSANDS of people actually think themselves to death every day by allowing their minds to dwell on morbid subjects.

As a rule the thought that kills relates to something the individual dreads more than anything else in the world. There is the germ of fatal thought in ninety-nine persons in every hundred, and the exception is only proof against the thought disease by having been inoculated with the lymph of profound optimism or philosophy.

The idea that one has some incipient disease in one's system, the thought of financial ruin, that one is getting on in life without improving prospects—any of them, or a thousand similar thoughts, may carry a healthy man to a premature grave. A melancholy thought that fixes itself upon one's mind needs as much "doctoring" as physical disease; it needs to be eradicated from the mind, or it will have just the same result as a neglected disease would have. The thought-disease sometimes cures itself after running its course; so does smallpox. But who would settle down to suffer from smallpox and chance recovery, as thousands of foolish persons settle down to let the thought-disease which has attacked them, do its worst?

Every melancholy thought, every morbid notion, and every nagging worry should be resisted to the utmost, and the patient should be physicked by cheerful thoughts, of which there is a store in every one's possession, bright companions—cheaper than drugs, and pleasanter.

There have occurred scores of dozens of cases where healthy persons have thought themselves into having tumors and cancers—cases which admit of no doubt whatever that the diseases resulted from constant morbid fear. There might possibly be fewer cases of cancer if some great doctors could assure the world that it is not a hereditary disease; but morbid-minded persons, on hearing that there is cancer in their families, generally do the very worst thing they can do under the circumstances—they conceive an awful dread that they will be afflicted with it. They dwell upon the fear constantly; and every trifling ailment which troubles them is at first mistaken for the premonitory symptoms of cancer. The morbid condition of mind produces a morbid condition of body, and if the disease does happen to be in the system it receives every encouragement to develop.

The Grand Rapids (Mich.) *Herald.*

Be sincere with yourself, whatever the temptation. Say nothing to others that you do not think, and play no tricks with your own mind. Of all the evil spirits abroad in the world insincerity is the most dangerous.—J. A. FROUDE.

Notices.

Reports from Branch Churches.

Reports from Branch Churches to be made at the Annual Meeting of the Mother Church, to be held June 18, 1902, must be typewritten and be sent to the Clerk of the Mother Church in time to reach him on or before June 14, 1902.

Those who prepare reports are requested to condense them as much as possible. Owing to the great number of reports to be read at the Annual Meeting it will be necessary to limit reports to *two* minutes instead of three minutes as previously announced.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

A Card.

I HEREBY correct a mistake in a By-law of the Mother Church published in Vol. 4, No. 38, of the *Christian Science Sentinel*. Said By-law, on the election of Readers in this Church, has been amended to read:—

"Every third year the Mother Church shall elect new Readers."

The effect of this By-law has been earnestly and conscientiously considered. Its intent is to enlarge the capacity and increase the interest in this large Church—by conferring its duties and honors on a larger proportion of its members.

MARY BAKER EDDY.

Pleasant View, Concord, N. H., May 23, 1902.

By-law.

A MEMBER of the Mother Church shall not endorse or countersign an application for membership therewith, until after the blank has been properly filled out by an applicant. Any member who violates this By-law shall be disciplined and subject to being excommunicated.

Historical Evidences of Healing.

IN *The Christian Science Journal* for February, 1894, we published extracts from standard historical works relative to healing disease through prayer by the early Christians. We have also published in the *Journal*, as well as the *Sentinel*, extracts from the writings of the early Christian Fathers, Clement, Justin Martyr, Irenæus, Tertullian, Origen, and Lactantius. These extracts show that the sick were healed and the dead raised by the early Christians, and corroborate the statement of the Christian Science text-book, "Science and Health with Key to the Scriptures," that the healing taught by Jesus and his disciples continued until the third century of the Christian era. The writings of these early Fathers are as well authenticated, historically speaking, as are other standard historical works, and indeed, in the theological world their authenticity is unquestioned.

These writings constitute a library of themselves and, as published by the Christian Literature Company of New York, constitute eight volumes. The title-page of each volume is as follows: "The Ante-Nicene Fathers. Translations of The Writings of the Fathers down to A.D. 325. The Rev. Alexander Roberts, D.D., and James Donaldson, LL.D., Editors. American reprint of the Edinburgh Edition. Revised and chronologically arranged, with brief prefaces and occasional notes, by A. Cleveland Coxe, D.D"

These writings are accepted as an essential part of the history of early Christianity by such well-known historians as Gibbon, the author of "The Decline and Fall of the Roman Empire," and Rawlinson, author of "The Historical Evidences of the Truth of the Scriptures," as well as other historians. From Gibbon we quote the following:—

"The supernatural gifts, which even in this life were ascribed to the Christians above the rest of mankind, must have conduced to their own comfort, and very frequently to the conviction of infidels. . . . The divine inspiration . . . is described as a favor very liberally bestowed on all ranks of the faithful, on women as on elders, on boys as well as upon bishops. . . . The expulsion of the dæmons from the bodies of those unhappy persons whom they were permitted to torment, was considered as a signal though ordinary triumph of religion, and is repeatedly alleged by the ancient apologists, as the most convincing evidence of the truth of Christianity. . . . But the miraculous cure of diseases of the most inveterate or even preternatural kind, can no longer occasion any surprise, when we recollect, that in the days of Irenæus, about the end of the second century, the resurrection of the dead was very far from being esteemed an uncommon event; that the miracle was frequently performed on necessary occasions, by great fasting and the joint supplication of the church of the place, and that the persons thus restored had lived afterwards among them many years. At such a period, when faith could boast of so many wonderful victories over death, it seems difficult to account for the scepticism of those philosophers, who still rejected and derided the doctrine of the resurrection" (pp. 401, 402, Vol. I.).

Gibbon's remarks upon this subject are interesting from the Christian Science standpoint. Of course he could speak only from the best understanding he had of the subject. He brings out many striking analogies between the history of the early Christians and the experiences of Christian Scientists to-day.

We quote also briefly from "The Historical Evidences of the Truth of the Scriptures," by George Rawlinson, A.M., long a Fellow and tutor of Exeter College, England, and a writer of ability and distinction. He says:—

"Further, we must not forget that the early converts had a second ground of belief, besides and beyond their conviction of the honesty and trustworthiness of those who came forward to preach the Gospel, declaring themselves witnesses of the mighty works which Christ had wrought, and pre-eminently of the resurrection. The preachers persuaded, not merely by their evident truthfulness and sincerity, but by the miraculous power which they wielded. There is good evidence that the ability to work miracles was not confined to the apostolic age. The bishops and others who pressed to see Ignatius on his way to martyrdom, expected that he would communicate to them some spiritual gift. Papias related various miracles as having happened in his own lifetime—among others that a dead man had been restored to life. Justin Martyr declares very simply that in his day both men and women were found who possessed miraculous powers. Quadratus, the Apologist, is mentioned by a writer of the second century as exercising them. Irenæus speaks of miracles as still common in Gaul when he wrote, which was nearly at the close of the second century. Tertullian, Theophilus, and Minucius Felix, authors of about the same period, are witnesses to the continuance to their day of at least one class of miracles. . . . But the possession of miraculous powers by those who spread the Gospel abroad in the first ages, would alone and by itself prove the divinity of the Christian Religion. God would not have given supernatural aid to persons engaged in propagating a lie, nor have assisted them to palm a deceit upon the world in his name. If there be then good evidence of this fact—if it be plain from the ecclesiastical writers that miracles were common in the Christian Church for above two centuries—we have herein an argument of an historical character, which is of no small weight and importance, additional to that arising from the mere confirmation by early uninspired writers of the Sacred Narrative."

The following remarks by Mr. Rawlinson have also much significance to Christian Scientists:—

"When faith is a matter of life and death, men do not lightly take up with the first creed which happens to hit their fancy; nor do they place themselves openly in the ranks of a persecuted sect, unless they have well weighed the

Digitized by Google

claims of the religion which it professes, and convinced themselves of its being the truth."

This authentic historical evidence is a sufficient refutation of the oft-repeated assertion that "miracles" ceased with the Apostles. Every argument and suggestion so ably made by Mr. Rawlinson, has as much weight in its relation to the possibility of "miracles" now as in the connection in which they were made. Only the unreasonable conception that God gives and withholds His gifts at certain times and for certain reasons, would defeat his argument as applied to the present. We have only to consider that divine Truth is ever-present and ever-active to refute any suggestion that God is partial in His methods or extends special favors to a particular people or age. In the light of Divine Science, we *know* that He is unchanging in His methods.

In addition to the publication in the *Journal* of extracts from the writings of the early Fathers, these extracts were republished in the pamphlet entitled, "Healing through Christian Science," which for some time has been published and circulated by The Christian Science Publishing Society. This should be consulted in connection with this article. Thus will be answered the inquiries which often come to us upon this subject.

The Republic of Cuba.

MAY 20, 1902, witnessed the accession of Cuba to the sisterhood of republics. The United States of America redeemed its pledge made to the Cubans and to the world, and gave to Cuba that liberty for which her inhabitants have struggled for many long and bitter years, yea, even through generations.

Say the dispatches:—

"In the historic room in the palace of Spain's governor-general, in which the departing Spaniards relinquished control of the island on January 1, 1899, the representatives of the United States government surrendered the trust then assumed, and Tomas Estrada Palma, first President of the Cuban Republic, took up his task of government.

"The transfer was the occasion of an outburst of popular enthusiasm without precedent in the history of the island. The downfall of Spain and the coming of the Americans were causes for public rejoicings, but those were moderated by a fear that the change, while it might work for Cuba's good, was only a change of masters.

"With the arrival of President Palma and the preparations for departure made by American officials, Cubans and Spaniards for the first time since the American occupation began, were convinced that the Americans really intended to go away and take their flag with them. Then apprehension vanished, the high regard of gratitude took its place, and feelings of patriotism and national pride found fullest expression."

The transfer of the government i thus announced:—

"Formal greetings over, General Wood read the documents of transfer prepared by the War Department. The first formally recited the organization of the Cuban government and the fact that Cuba's constitution went into effect at noon on May 20, and continued:—

"Thereupon and at that time the occupation of Cuba by the United States and the military government of the island will cease and determine, and the government and control of the island will be transferred to the President and Congress so elected, to be held and exercised by them under the constitution so promulgated.

" 'Such transfer will be upon the understanding and condition that the new government does thereby and by the acceptance thereof, pursuant to the provisions of the said appendix to the constitution, assume and undertake all of the obligations assumed by the United States with respect to Cuba by the treaty between the United States of America and her majesty, the Queen Regent of Spain, signed at Paris on September 10, 1898.' "

Immediately after the transfer had been completed, President Palma sent the following grateful cablegram to President Roosevelt:—

Havana, May 20, 1902.

Theodore Roosevelt, President, Washington.

The government of the island having been just transferred, I, as chief magistrate of the republic, faithfully interpreting the sentiments of the whole people of Cuba, have the honor to send you and the American people testimony of our profound gratitude and the assurance of an enduring friendship, with wishes and prayers to the Almighty for the welfare and prosperity of the United States.

T. ESTRADA PALMA.

Next in importance to the freedom and independence thus finally achieved by the people of Cuba, is the honorable part performed by our government in this memorable transaction. There was here exhibited an act of brotherly love, in the national sense, that sets a fine example for the other nations of the earth. The world never before witnessed such an event. One great and powerful nation goes to the rescue of a small and weak neighboring nation, reclaims it from the iron grasp of an oppressive master, and in due time places it on an independent national footing.

The incident, from first to last, is an epoch-making one. It should set the world to thinking along higher and more unselfish, national lines. It should be seized upon as a precedent for better national conduct and more enlightened methods in international affairs. The Christian nations, especially, should take serious note and fall in line.

May all the commercial privileges which are justly due the new Republic be accorded it by our great Republic. May the latter prove herself to be a benefactor in the full sense of the term.

Among the Churches.

Opening of Church Services at Norfolk, Va.

The new First Church of Christ, Scientist, was opened to the public for the first time on Sunday [May 4]. The church, which is the old edifice of the Second Presbyterian congregation, had been thoroughly cleaned and a number of alterations made. The auditorium has not been materially changed, with the exception of the rostrum, where two reading desks have replaced the single lectern which formerly stood there.

The opening of the new church was a source of gratification to the Christian Scientists of this city, marking, as it did, a most important step in the progress of their religious belief in this city. The first Christian Science service held in Norfolk was five years ago, when the meeting was held in the Public Library Building, and the congregation consisted of five persons. To-day the church has about forty members, and a congregation of about two hundred persons who are interested in the work of the denomination.

The services on Sunday, both morning and evening, were largely attended, many of the congregation attending a Christian Science service for the first time in their lives. There was a novelty in the service for these people. The two Readers seated on the rostrum was the first thing to attract attention, it being unusual to ordinary church-goers, to say the least.

The church had been beautifully decorated for the occasion with palms, ferns, pines, and cut and potted flowers, almost completely hiding the chancel. Miss Way, the First Reader, made an address of welcome.

Mr. Batts, the Second Reader, read a historical review of the growth of the Christian Science movement hereabouts, and the facts it contained were highly interesting.

The sermon consisted of passages read alternately from the Bible and the Christian Science text-book, by the two Readers.

Digitized by Google

The musical features of the programmes of the day were unusually attractive, the church having been fortunate in securing for the occasion Miss Clara Ella Bond, the leading soprano of Christ Episcopal Church and Ohef Sholom synagogue, this city, and Miss Mabelle L. Bond, the contralto soloist of First Church of Christ, Scientist, New York City.

The morning and evening services were practically the same, and at each letters and telegrams from prominent Christian Scientists were read, one being from the church at Montreal, Canada; one from Concord, N. H. (Mrs. Eddy's home), and one from Mrs. Stetson, First Reader of First Church of Christ, Scientist, New York City.

The rear of the church has been changed considerably. In the rear of the auditorium is a beautiful reading room, which has been handsomely fitted up, where can be found all the Christian Science literature, for inquirers. The reading room is free to all, and an entrance has been made from Boush Street so that it is easy of access.

Virginian-Pilot.

The First Reader's address was as follows:—

Beloved Brethren and Friends:—With deep and tender love on behalf of this First Church of Christ, Scientist, I bid you welcome. The Scriptures tell us to "Rejoice with them that do rejoice," and for this purpose we are assembled here. Some are here from other cities who have the keen and abiding satisfaction of worshiping the one omnipotent God, as Christian Science teaches, under their own vine and fig-tree; others come from other denominations who do not yet know what we are doing. We are glad for *all* to hear and see what we are doing and for all to learn also that our work is of God.

This church home is a manifestation of God's love to His trusting children. It represents the establishment, in this city, of the Science of Christ, or Scientific Christianity, as based on the teachings of Jesus and the Prophets with "signs following."

Divine Science, the Comforter which leadeth into *all* Truth, in this age of gross materialism is again fulfilling the words of Isaiah, "To appoint unto them that mourn in Zion, to give unto them beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness; that they might be called trees of righteousness, the planting of the Lord, that He might be glorified."

The Church of Christ, Scientist, is not a menace to any other church, nor to anything but to sin, sorrow, and discord. It has a message of love, peace, joy, and good-will to all who love Good—God. Its mission is to bring the earnest of Spirit to the churches and to the world. To purify thought, until mankind sees that God, divine Love, is an ever-present help.

It is not a new religion that we are presenting to the world, but the pure and simple Christ teachings of the Nazarene.

> Where'er he went affliction fled,
> The sick were healed, the hungry fed.

So in this age, as the spiritual, Christly, scientific teachings of Christian Science are understood, lived, and demonstrated, we see as never before the import of our blessed Master's glorious example. We see why the healing of the sick and reclaiming of the sinner followed his profound preaching. It was to give *proof* of his Christly nature by practice as well as precept; hence his commands to his disciples in Matthew, 10, "As ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils." And in John, 14, "He that believeth on me, the works that I do shall he do also."

Through the spiritual perception of the teachings of the Bible, our beloved Leader, Mary Baker Eddy, has been able to give us a Key which, when read earnestly and honestly, will awaken thought to higher and purer conceptions of life, of God, and of man's relation to Him; thereby destroying the false sense which has been and is bringing sin, sickness, and death. It teaches us how to love, how to be better neighbors; and that the Golden Rule, "Therefore, all things whatsoever ye would that men should do to you, do ye even so to them," is the *only* one whereby we can learn to be honest, just, merciful, and meek. The way is strait and narrow which leadeth to perfection, but we know we shall reach it if we persistently turn away from our fears, jealousy, false pride, and all evil thinking, to our divine Principle, Life, Love, and Truth, as our ever-sustaining Guide.

We are all indeed grateful to our Mother in Israel, the Discoverer and Founder of Christian Science, who has stood so bravely the persecutions, prejudices, and resentments of the world. We too can reach the higher heights, rejoice with her, and at last be worthy to be called Christian Scientists.

My heart also reaches out to all the dear ones who have so willingly sacrificed self, time, and money as to make it possible to-day to worship in this church. If you continue to be faithful, the blessings will continue to increase many fold until you can say, through demonstration, in the words of our text-book, "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494).

The Second Reader's address was as follows:—

Beloved Brethren and Friends:—Upon this happy occasion, the most important event which has yet occurred in connection with the Christian Science movement in Norfolk, it becomes my privilege to review the history of our local church. While such review must needs be brief and wanting in detail, giving at best but a faint idea of the vastness of the work already accomplished, yet the results, which I will show you, of five years of labor, silently testify to the power of God demonstrated, and are indicative of what may reasonably be expected in the future.

The first Christian Science service with which Norfolk was blessed, was held Sunday, January 5, 1897. This service was held in a small room in the Public Library Building, with a congregation of five persons. These limited quarters, however, soon proved insufficient, and in the following May an adjoining room was secured. These two rooms thereafter, until February, 1898, served the various purposes of the Scientists, when, because of the increase in the attendance upon the services, they were compelled to seek still more extensive accommodations. During the said month of February another room adjoining was procured, and an arch cut through the partition, thus making of two large rooms a commodious and comfortable hall, which was tastefully decorated and arranged to meet the demand. Here the work continued to grow, many battles being fought and won. The congregation, which numbered five at the first service held, had grown sufficiently, within a little more than a year, to occupy a hall capable of accommodating about one hundred people.

During the following April the church was organized. The congregations steadily increased in number, the sick and sinful continued to be healed, and the church continued its sturdy growth. Without entering into further detail, let me say that within a remarkably short period our hall was well filled at the Sunday morning services and Wednesday evening meetings, and it soon became apparent that it, too, would quickly be outgrown.

The time came, therefore, when the still further enlargement of our borders was necessary. When the subject of larger quarters was upon every tongue, and our hall was becoming more and more uncomfortable for want of room, and no other hall in the city, adapted to our purposes, could be procured, we were informed, through one of our members, that the congregation of the Second Presbyterian Church desired to sell to us their edifice, which is the one

Digitized by Google

we open to you to-day as the home of First Church of Christ, Scientist.

Without following, step by step, the preliminary arrangements for the purchase of this property, allow me to say that while it seemed quite an undertaking for so small a church as we still were, there appeared to be no alternative, so that, within less than five years from the time the first service was held, with an attendance of five, a contract for the purchase of this valuable and attractive property was entered into. The building fund was then started with a donation by the Sunday School of fifty dollars, and by the first of January, 1902, sufficient funds had been raised to enable us to fulfil our engagement. A few days later, this edifice, together with the lot upon which it stands, and the organ, church furniture, etc., was transferred to the trustees of this church.

Since its acquisition by us we have erected in the rear a two-story brick building, the lower floor of which is to serve as a public reading room, and the upper floor as a study for the Readers and a reception room.

Viewed merely as the history of the material organization, this brief review presents nothing marvelous or out of the ordinary, perhaps; but when we look, through Christian Science, beyond the finite human sense, and catch, for an instant, the spiritual sense of God, of Christ, of man, of the universe, we begin to understand that the "things which are seen are temporal," and the "things which are not seen are eternal," so that our present organization, or the church which we now behold, is but the sign, or outward manifestation, of the yet unseen spiritual Church, and only foreshadows the great universal, triumphant Church of Christ. This is the Church that the Founder of Christian Science defines as "The Structure of Truth and Love; whatever rests upon and proceeds from divine Principle" (Science and Health, p. 583).

Beholding, then, the church from a spiritual view-point, and considering that Christian Science is, perhaps, the most talked of—certainly the most scoffed at because the least understood—of all religious systems, the result of a little more than five years of endeavor to establish, in a material age, a Church which heals disease upon the basis of Spirit, represents much labor.

At the same time, however, we find ample cause for rejoicing, because of the evidence, once more presented to the world, of God's ability to furnish a table in the wilderness, and also of His willingness to prosper them who strive to serve Him. Again we hear the words of the Prophet: "Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room to receive it."

Let us rejoice therefore! let us sing glad praises to His holy name! But in the mean time let us not forget to be grateful to our Leader, our Mother, that pure, great, and good woman, the Rev. Mary Baker Eddy, the Discoverer and Founder of Christian Science, whose loving heart beats alone for God and humanity, for you and for me. Let us not forget that it is through the wisdom of the Leader, through the love of the Mother, through the purity of the woman, that we have gained this exalted spiritual sense of God, which lifts from our shoulders the burdens of sin and sorrow and pain, and fills our hearts with the sunshine of His glorious Truth.

Work in Lansing, Mich.

April 21, 1897, a Christian Scientist made her first visit to Lansing in the interests of Christian Science, at the solicitation of one who had received marvelous healing. No one at that time was engaged in active work here. The Scientist came from a neighboring town two days in each week, until November 21 of the same year when the interest had increased to such an extent that a society was formed and services opened. February, 1899, the Scientist took up her residence in Lansing, devoting her whole time to the work. The following October two fellow-students came from Detroit to assist in the work, remaining until a year from the next May.

In January, 1899, a church was organized with fifteen charter members; we now have thirty-nine members with more to join us in June. The average attendance at the services has been between seventy-five and eighty. Our Sunday School numbers twenty-two. We have had three lectures, and are soon to have another.

Lansing is an institutional city, as well as the capital. Science and Health, "Retrospection and Introspection," and "Unity of Good" have been placed in the State Library. The Sunday School has presented Science and Health to the Michigan Agricultural College, and to the State Industrial School, also the *Journal* and *Sentinel*. Two copies of Science and Health are in the city library, which I understand are in constant demand.

A reading room was opened in June, 1901. It is now located in the finest business block in the city, and is doing excellent work. Over two hundred dollars worth of literature has been sold.

The work has had a steady and healthful growth from the first, Science and Health being the foundation, fully one hundred and fifty copies have been sold. There are now in the Field fourteen students, representing seven Associations, all good co-workers. A great sense of harmony exists in our church, which we are endeavoring to keep inviolate.

Services are held in the Matinee Musical Rooms, which are comfortable and pleasant. The work has not been all sunshine, neither have we rested on the mountain-top for long at a time. I well remember when fifteen constituted a big audience, and many times when there were but "two or three gathered together" at our Wednesday night meeting.

I feel sure that I but voice the feelings of the entire church when I express most loving gratitude to the dear Mother (words are inadequate) for all that she has given us. I am more and more impressed with the wonderful purity of our literature; nothing in the world to-day approximates it.—Mrs. Kate Holbrook Pierce.

Railroad Rates.

For the Communion Season arrangements have been made with railroads as follows: viz.,—

In the New England States round trip tickets to Boston at reduced rates will be on sale, good, going, June 14 to 18 inclusive; good returning June 15 to 19 inclusive.

Rates from New York to Boston and return via rail, $6.00; via Sound Lines, $5.00.

From points outside of New England (except Canada; west of Lake Michigan, Chicago, Peoria, and St. Louis; and Texas), one fare, plus $1.00, for the round trip; from Canada one fare for the round trip; from points in Texas a fare and third on certificate plan. Western lines; *i.e.*, West of Lake Michigan, Chicago, Peoria, and St. Louis have not completed arrangements, but it is confidently expected that they will make arrangements similar to Trunk Lines and Central Passenger Committee Lines.

Consult your local agents before getting ready to start and learn the best arrangements to be made.

True Giving is in Sharing.

Not what we give, but what we share—
For the gift without the giver is bare;
Who gives himself with his alms feeds three,—
Himself, his hungering neighbor, and me.

Lowell.

Three Penitents.

BY H. A. L.

ONE tarried by the gateway
To listen for the call;
One stood within the portal
To chide a faith so small;

Another, standing at the chancel,
Bowed low his head to pray:
"I thank Thee, oh, my Father,
I'm not so weak as they."

The gates of Heaven swung open—
Two entered with the throng
And marveled that their brother
Remained on earth so long.

Examination.

BY CORDIE F. HILLMAN.

IT was recently remarked that Christian Scientists should pray daily to have sin uncovered in their thoughts, that it may be detected and cast out. In the Manual of the Mother Church, Christian Scientists are taught to pray each day, "Thy kingdom come, let the reign of Truth and Love be established in me, rule me, and rule out of me all sin."

The daily examination of thought is like a search-light turned upon consciousness, revealing to our astonished gaze many an error we were unaware of, many that we do not recognize to be such, until we pray most humbly and earnestly to have the Light shine into every corner and pierce every disguise; to show each thought as it actually is, that we may not be deceived by evil masking good.

As we realize that Christian Science is the Truth, infinite and eternal, how faithful should we be, who bear the name Christian Scientist, that our motives, words, and deeds answer the test of Love.

Our Leader says in "Miscellaneous Writings," page 312, "Oh, may the love that is talked, be *felt!* and so *lived,* that when weighed in the scales of God we be not found wanting."

Do we, as her children, feel and live the love we talk? Do we make Principle first, and personality last? Do we really demonstrate in our deeds the Love divine, that "seeketh not her own, but another's good"? How easily we talk and how beautifully our words sound, as we speak of love that "suffereth long and is kind; that envieth not; is not puffed up; not easily provoked; that beareth all things, hopeth all things; that never faileth." Examining the thoughts back of the words, searching the heart's deepest recesses, do we find that we really mean what we say? Do we prove it in our acts, or do we go on as selfish as before, forgetting the needs of our neighbors, who are hungering and thirsting for *proofs* that our sweet sounding words are from honest hearts?

Every Christian Scientist is closely watched. The public places them in the scales; their words on one side, their deeds on the other. Do they balance? Are they equal in weight? God help us to be found not wanting. To be loyal to our Leader's teachings, we must be found helping one another, working from Principle, meek, generous, long-suffering, and kind.

How pure! how grand! are the demands of Science! To reach the summit, we must be honest; daily, hourly searching the heart and testing the motives; asking ourselves, "Is it right? Is it good?" We are told to "watch and pray to be delivered from all evil," and our Leader says to "Work—work—work."

Daily examining myself in this way I find much to be ashamed of in work poorly done, or left undone; yet find, also, the earnest desire to do better work, to be more watchful, honest, and faithful.

My heart is full of gratitude to God for this priceless gift, Christian Science, that teaches us to be honest, pure, and loving; that demands right living and practical reliance on the power of God to destroy every claim of evil that would try to hold His children in bondage.

"And thine ears shall hear a word behind thee, saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left."

Sin's Destruction.

BY HERBERT W. BECK.

THE healing garment of Christian Science is complete. It covers every human need with its warmth of Love. It is that which the nations weep for, and, thanks to the presentation, they are finding it. Christian Science warms and brings into new life the chilled heart of humanity.

So many think that this spiritual Science is some new quack system, appealing only to the outward expression of the physical senses. This healing of the body becomes such a seeming paramount work in Christian Science only for the reason that the world itself places such a premium upon the health of that body. Upon the opening of the flower of understanding, we find, however, that the true health is the health of spirituality. This is found by the destruction of sin, of which disease is only a part.

According to common teaching the diseased one is to be pitied and sympathized with in his unnatural condition, the attempt being to make him comfortable therein, while the sinner is condemned and perhaps down-trodden. Through Christian Science practice both of these extremes are brought together upon a common ground for destruction. The time is fast approaching when the sick shall see that they are not following the Master's example of being what the name implies—master "of beast, fowl, reptile, and fish,—himself subordinate alone to his Maker" (Science and Health with Key to the Scriptures by Mary Baker G. Eddy, p. 518, Rev. Ed.). Upon the other hand, the sinner will see that sin is the unreality of being. This lifts him out of the Slough of Despond to walk in the way of uprightness.

Mortals delight to tell of sickness experienced, and endeavor to make the telling a tale of adventures. Not so as to sin, however, for the foolish, transparent reason that mortal mind ever wishes to wear a cloak of righteousness and claim to be well accustomed to the wearing.

Christian Science by healing the body alone will never lead to the understanding of heaven, but it will and does, through the destruction of sin, make that beautiful idealism a possible fact. Seeing, then, that our Science is capable of bringing about this long-wished-for event, the world should know that sin is thus destroyed and purity found filling its place.

It is true that sin finds a welcome home with the sinner, and sickness fills the place of the tyrant through the fear within which it is wrapped, but both are powerless before the march of the Christ, "the only begotten of the Father."

Sin alone stands between us and the Father, and the weary must know that Christian Science offers a passage through what was before the seemingly impenetrable. Jesus of Nazareth demonstrated his way thus, and he did not invite or mock us to the impossible when he said, "Follow me."

Science is destroying sin in all its multiform phases, and there is not a Christian Scientist who has not and is not being freed daily from this "blighting east wind." Mortals have not attained absolute purity, and much bathing within the river of Life must yet be done before the taints wash away and they "be whiter than snow."

Digitized by Google

Let us not, therefore, keep to ourselves the golden fruit of sins destroyed, but together with the thanking in our closets of prayer, hand it to others, showing them that the river Jordan is a better type for purification than the rivers of Damascus. "Go wash in Jordan seven times, . . . and thou shalt be clean."

Christian Science and the Sunday School.

BY B. L. W.

It is the desire on the part of most parents to protect and bring up their children in the way they should go. This responsibility is approached in many ways and with varied results. Nearly all feel helpless in the contact with the characteristics which are manifested in a family of children.

Any system of government or religion which is found practical in the home should be able to affect the circumference of human affairs, and to me Christian Science reveals a basis for action and great blessings in store. Science and Health says, "The time for thinkers has come," and the influence of the Sunday School is making thinkers of the children. Our children have been attending the Christian Science Sunday School a short time and a great change is noticeable. At school and at play the thought influences their motives and acts, and each has been benefited physically.

When we hear them recite the Mother's verse for the little children upon retiring, we can realize the protection of divine Love.

I will give an instance which occurred recently when father and mother could render no assistance.

We had occasion to send our little daughter upon an errand one evening, and it was rather dark and part of the way through a cross-town street not well lighted.

A man came running up behind her and as she turned to see who was coming, he picked her up, held her fast to prevent resistance or outcry, and started to carry her away. She brought Science into play immediately, realizing the evil as impersonal, declaring that God was her protection and that error could not hold Truth. The declaration brought relief. The man quickly dropped her and hastened away in an opposite direction.

She did not show any signs of fear, went about her business, returned over the same route, and calmly told her mother that she had had a great demonstration. She said, "This is proof to me of God's protection." She is only eight years of age and in time past was considered a nervous child.

We have known of Christian Science about one year and her understanding is the result of Sunday School teaching. While this occurrence is not given in detail, parents will understand the fear usually aroused in the old condition of thought.

Indeed it is an "old way" and rightfully named. We are certainly thankful for Science, for to a great extent old things have passed away and life appears in a new light. We have found Christian Science regenerating, uplifting, and educational; its influence has been healing; new ideals worth striving to attain have been created, and we rejoice that our understanding is the "seed within itself, bearing fruit after its kind."

Love is being unfolded to us through Science and Health, and relying upon the infinite Mind we take hold of earth's problems, no longer fearfully dependent on material means, blind faith, or submissive to the "purposes of Fate."

My Offering.

BY L. H.

Dear God, how can I serve Thee best?
What shall my offering be?
To have no will but Thine alone,
And love for all, and Thee.

Testimonies of Healing.

About twenty-two years ago, when riding on horseback, the horse fell with me, breaking my left leg between the knee and ankle, and also twisting the ankle out of joint. The ankle was not put back into its place, but left to heal as it was, causing severe pain at times. I suffered greatly. Sometimes I wondered if there really were a God. I thought it strange that God, if He existed, could let any one suffer as I did.

I consulted several physicians and tried many different kinds of liniment. I also took electrical applications, but all to no purpose, as I received only temporary relief, if indeed I received any relief at all.

About a year ago I suffered worse than ever before, sometimes being able to sleep but very little at night. I was then about to give up in despair. I quit the physicians, their liniments, and God. I really had given up in despair, when God in His mercy by means of Christian Science proved Himself to be an ever-present help in time of trouble and affliction.

At that time Mr. B. and I worked in the same shop, and Mr. B., seeing the terrible misery that I was in, told me one evening that if I would go to see his wife she would tell me of something that would help me out of my troubles.

I had tried so many different things that I could hardly believe this would do me any good, but nevertheless I resolved to try Christian Science, so I went to see Mrs. B. She told me that God does heal the sick, and she related to me the Bible story of Job. I listened and tried to grasp the thoughts which I understood she wished to impress upon my mind. I also purchased a copy of "Science and Health with Key to the Scriptures" and studied it, and in about two weeks time God in His mercy effected such a cure that I was brought back to Him. I, who have denied my loving Saviour, can now, like the doubting disciple of old, accept him as "my Saviour and my God."

The ankle, which for about twenty-one years was very nearly as stiff as if there were no joint at all, became as supple as the other. It is now about a year since I was cured and I am still well.

I desire to express my gratitude to Almighty God for what has been done for me through Christian Science, to Mrs. Eddy who, by searching the Scriptures, has found that balm of Gilead by which suffering humanity may be saved from spiritual and corporeal deformities and led in the path of righteousness, and to Mrs. B. who showed and told me of these blessed truths.

J. Perry Johnson, Kewanee, Ill.

I shall try to give my experience and some of the lessons gained from that experience since my attention was first called to Christian Science nearly eight years ago. I attended a meeting in Topeka, Kan., held on Friday evening. It was my first meeting and I was surprised to see that the people were good, intelligent-looking people. After the meeting was over I was so interested that I wanted to talk to some one, so I asked to be introduced to the leader of the meeting, and after asking him a few questions, he seeing my astonishment and doubt at his replies, said, "Why! you do not know anything about Christian Science, do you?" This sentence was a blessing to me, for it caused me to realize that fact, and I immediately "became as a little child," willing to be told and to learn. This lesson of meekness was an important one, for I now see that meekness is a very necessary step in the gaining of an understanding of Christian Science, and as I look back over past experiences I see that I had to learn this lesson over again many times.

After the birth of our little daughter, at which I witnessed a good demonstration of Christian Science, I purchased "Science and Health with Key to the Scriptures,"

Digitized by Google

feeling by this time that the book was well worth owning. I had been a user of tobacco since a little boy, and had become a heavy cigarette smoker and also chewed tobacco. I would sometimes smoke a cigarette or two while reading a few pages of Science and Health. It had not yet occurred to me that the use of tobacco was not in accord with Science. But as I continued to read and smoke I became more interested in the book and my cigarette would go out until there would be a pile of burnt matches and a partly smoked cigarette where I sat reading. I gradually left off the tobacco habit and also the liquor habit.

My path has not been strewn with flowers in Science, and at times I have been very much discouraged and have complained of my lot, thinking that any one who was trying as hard as I was ought to be better supplied. It seemed a great struggle to have scarcely income enough to exist on, and so when I would resist a temptation to sin and succeed in doing a good deed, I would be looking for some great reward and thinking more about the reward than anything else. Then at times I would become so self-condemned and downcast that I felt that there was nothing for me but trials and cross-bearing, and that there was nothing to live for. But among the many good things that have helped me is this sentence from "Science and Health with Key to the Scriptures," p. 8, "We ought to examine ourselves, and learn what is the affection and purpose of the heart; for this alone can show us what we honestly are." These and imilar words from my teacher set my thought to work in the right direction and caused me to see the mistake I was making in looking too much for the material reward instead of the reward of being able to love mankind more and to love God or Good truly from no selfish motive, for the true reward is to be able to love without ever thinking of self. But if we are constantly looking for some material reward for doing good, are we not doing good from a selfish purpose instead of doing good because it is right? The realization of this has brought to me a sense of happiness and an ability to love that I have never known before, and as I have ceased to seek Christ for the loaves and fishes only, I have been more successful. I think I can truly say that I am learning to serve God more through pure love of Good than through fear of punishment or the hope of some material gain.

EDGAR A. SCOTT, Kansas City, Kan.

When at Pleasant View last June, Mrs. Eddy said to the Christian Scientists: "I think you will all agree with me that you have heard sufficient from me in my message," little did I then realize what this "Message" meant to me and my work. After returning home, and making this a daily study, it gradually unfolded to me.

A man, whose wife had been helped through treatment five years before, was a gambler and intemperate, and each Saturday evening when he received his wages would drink and gamble until he had little or nothing left for his family. Well do I remember how, one cold winter night, his wife, three small children, and all their belongings were set out in the street, because the rent had not been paid.

Several times he was treated, but would never acknowledge that the desire for liquor was destroyed. Times without number, his wife came to me weeping and hopeless, and no one can know, who has not had this experience, how one feels, who knows the power of Truth, yet in a case like this fails to demonstrate it. When I had carefully studied that part of the message beginning on page 19, I felt that I now realized the nothingness of sin sufficiently to meet this case, sent for the man, and in one treatment he was healed, and knew that he no longer desired liquor or the company of gamblers. He has been satisfied with his home and family ever since.

When I think of what we have received through this message and the revised edition of Science and Health, I can say with all my heart, "Blessed be the Lord, who, through his chosen messenger, daily loadeth us with benefits."—MARY D. RICE, Denver, Col.

I have for some time wanted to send a few words of thanks for the "helps by the way" that come through our literature. I have so much to be thankful for that words cannot express my deep feeling. I will tell of a demonstration that may help some one as it helped me. My baby was taken with erysipelas. I seemed unable to treat the child, so I told my husband he must treat him, but he refused, on the ground of being out and at work all day, so I had to undertake it. For two days the baby did not walk, and had a high fever. But by the third day he was perfectly healed. I was very thankful, for this experience taught me that I could help others, even if not entirely free myself.

I have four boys. Three of them have never tasted drugs, and the oldest was healed in Christian Science after all material means had failed. Truth has met their every need.

I have been freed from terror of thunder and lightning. A storm used to make me miserable. Christian Science is the greatest blessing that could have come into my life. I do not know where I would have been to-day without it. It found me in a seemingly helpless state of mind and body. We live fifty miles from any Christian Scientist. I feel thankful to God for giving us our Leader, who has done so much for mankind. We can never thank her enough for her labor of love.—CARRIE H. MERRITT, Duck Creek, N. C.

I was a great sufferer from asthma, also from a most frightful skin disease on my face and other parts of my body. My face was so bad that I could not bear to have a stranger see me, it seemed so humiliating to me, and the suffering at times was almost unbearable. For over two years I have been free from both troubles. Recently I had two attacks of the asthma. The last was so severe that I telegraphed for help, which I received so quickly that in about an hour I could lie down and go to sleep.

The thought of neglected duty, has presented itself to me very often, the last day or two, and this morning, while reading the late *Journal,* the three testimonies of the healing of asthma seemed to come before me so plainly that I make this attempt, hoping it may help some one.

The help that Christian Science has been to me in seeming sorrows and troubles, is beyond words to express. That I may be a more worthy recipient of its benefits, is my constant prayer.—MRS. IDA TRYON, Nora Springs, Ia.

Last June I had ten upper teeth drawn. I never had such fine work done before. Words cannot express my gratitude to Christian Science for destroying the fear I had of dentistry. There was no pain that night from lacerated gums. The dentist, at my request, used no medicine. No teeth were broken in extracting although the gums had grown over nearly all of them.

Our little boy was healed of a high fever in one afternoon with no return whatever. A case of cholera infantum was completely healed and the baby grew fat and hearty.

Our children depend on reading our Leader's books and the Christian Science Hymnal for their healing. I often think of our Master's love for little children when I see their perfect faith and trust in divine Love that supplies our every need. I cannot express my love and gratitude to our dear Mother for giving us this beautiful Truth.

H. N. W., Royal, Neb.

Religious Items.

Cunningham Geikie, D.D., says in *The Examiner*:—

"Nothing causes more anxiety to doubtful minds, interested in the great matters of the soul, than to form a clear idea of what is meant when they are told that 'faith' is everything and that they are safe if only they believe. 'What am I to believe?' is the difficulty.

"The mere acceptance of the lessons of Christ's life and teachings as presented by the Evangelists is not, as in his day, what, in ours, is meant by 'faith;' that sacred word having long passed beyond meaning simple trust in God as revealed to us by our Lord, and having come to mean our assent to a string of theological propositions laboriously invented by the subtlest intellects of successive generations, and expressed by them in abstract metaphysical terms, which are quite beyond the intelligent comprehension of ordinary men, if, indeed, they were more than a babble of dark sayings even to their creators.

"'Faith' has, as a result of this change, for ages been popularly understood as an assent to orthodox doctrine, so that the acceptance of a Creed now constitutes a Christian, in ordinary usage, and no longer the Gospel conception of one's 'discipleship' being known by 'its fruits.'

"But most certainly that is not the idea of the Evangelists. In them, 'to believe,' is to trust in Christ's words as the Great Teacher, and to give one's heart to him as 'the Great Exemplar,' by that sincerest proof of loving adoration—the imitating him in spirit and in truth. There is no need, therefore, to be troubled as to what believing in him means. It is simply that complete surrender of ourselves to him which makes him the Way, the Truth, and the Life in us, so that *we* do not so much live, as *he* lives in us. As he was one with the Father in doing always the things that please Him, so, he tells us, we may be, adding that it is required of us to strive to be thus one in him, and through him, one also with Him who sent him."

Comparing modern civilization to Pharaoh in its attitude toward the Jew, Dr. E. G. Hirsch lectured in Temple Israel recently on the subject of "Four Ways Out of the Difficulty," the difficulty indicated being that in which contemporary Israel finds itself with the mail-clad hosts of the world—Pharaoh—"hot with fury and wild with passion," camping upon its trail, and the Red Sea, or annihilation, heaving ominously before.

"The four ways of escape proposed by the followers of Moses in the historic crisis between Egypt and the Land of Promise were still," said Dr. Hirsch, "upon the lips of the Jews. Some there are who whimper, 'Let us throw ourselves into the sea and end this misery.' Others cry out, 'Let us return humbly to bondage—a grave is a grave, no matter where.' Again, stauncher hearts than these demand that we shall turn and rend the harassing foe—battling with him as he battles with others.

"But those among us of wisdom, those who remember, those who trust in the justice of Almighty God, call to our brethren, 'Stand fast. Wait. Be silent. Be true to yourselves.' And the Red Sea will once more be split asunder; a pathway will be given to our feet. The enemy will be destroyed by his own eagerness."

John Lindsay Withrow, of the Park Street Church, Boston, recently said: "Every great epochal movement of Christianity from that day [the establishment of the church at Antioch] until now has encountered criticism and contumely and contempt. Learn of the Waldensian, the Puritan, and the Methodist beginnings, and this will be seen to have occurred. The Salvation Army was the last to meet with such mistreatment, simply because it was the last to appear. Whoever will live godly in this world 'shall suffer persecution.' The devil hates a religious disturbance. At once he sets the dogs of defamation on any and all who are aroused to any exceptional earnestness. But to all defamers these Antioch Christians gave the conclusive reply of beginning Christian charities, providing for the poor, even before the necessity had come upon them. Only let us be faithful and fruitful and no difference what the disputer says derogatory of us, our character will suffer nothing."

IGNORANCE AND FAITH.—When the Apostle Paul seeks to account for the peculiar favor God has manifested to him in putting him into the ministry, though he had been a "blasphemer, and a persecutor, and injurious," he says, "I obtained mercy, because I did it ignorantly in unbelief," that is, without having faith.

With Paul faith is a faculty of insight of vision, and a man who lacks faith is deprived of a medium or an organ of knowledge, just as if he lacked sight or hearing. That exactly reverses the thought of the world regarding faith. Constantly we hear faith identified with ignorance and credulity. The assumption is that the man of faith has substituted a blind credence for investigation, comparisons and inference, and divested himself of some of the means of attaining the truth. Paul says no. The possession of faith does not preclude the exercise of reason; it assists it by opening in the soul a new organ of knowledge.

Faith does not make human life meaner and poorer by disparaging or superseding the inherent powers of human nature; it makes life richer by adding to them a new and divine faculty of perception susceptibility. Without faith, no matter what other powers he may possess, a man is doomed to ignorance. Through faith he achieves knowledge.—*The Watchman.*

God does overrule the wickedness of the wicked for the furthering of His own gracious purposes and the triumph of His people, otherwise life would be intolerable. He does assure us that all things are working together for the good of those who love Him, and that the decree concerning Christ's kingdom will certainly be established. But this, while it comforts and encourages those for whose assurance it was spoken, means the overthrow and ruin of those who will not love God, and who refuse to submit to the sovereignty of Jesus Christ. God does make a difference between light and darkness, between holiness and sin, between those who love and serve Him and those who defy Him. Optimism is well enough if it is interpreted to mean that God will have His way in the end, and that all who trust in Him will be eternally safe and blessed.

The Examiner.

No one reaches the moral and spiritual heights suddenly—by a few strenuous or brilliant efforts—but by the daily doing of little things; seemingly little, yet of the utmost importance when gauged by the standards of the spirit. As life in the sense of existence is made of days, hours, and minutes, so on the spiritual side it becomes rich, sweet, noble only by the discharge of daily duties in the spirit of love, of good will, of a desire to serve others in the numberless ways that life at home, in society, and in the community makes possible to him whose heart is enkindled by that spirit which animated Jesus, who was the servant of all and in this regard the living expression of the Divine character.

The Universalist Leader.

Rev. G. Campbell Morgan says in *The Congregationalist and Christian World:* "The Christ life dominant in man will not only express itself in perfect harmony with the life of Jesus of Nazareth; it will also enter into his consciousness. With the coming of that life there will come the enlightening of the intelligence toward God, and the consequent enkindling of the emotions along the line of perfect harmony with the movements of the heart of God, and the creation therefore of a new moral sense in accord with the holiness of God. Every man has an outlook upon life and an experience of life which is largely the result thereof."

The Christian Register says: "We no longer say 'The voice of the people is the voice of God,' because we know that the highest truth is often revealed to persons who are raised above the common level and have a message which is not always understood by the people. And yet, if the message of a solitary person be true, the people always advance toward an understanding of it, and in the end receive it. It appears, therefore, that the voice of the people always tends to be the voice of God."

The Herald and Presbyter thus expresses itself: "He who devotes himself to criticism of others, finding fault with them for what they do, instead of himself doing better, is in almost as abject condition as the one who complains that nothing important is occurring, and, at the same time, does nothing important himself."

The Congregationalist says: "Christianity in these days must prove itself of supreme importance or surrender its claim to be regarded as of any importance."

Men grow surprisingly lovable as soon as we begin to love them, startlingly interesting as soon as we begin to be interested in them.—DR. PARKHURST.

He who charges his failure to bad environment is not worthy of success.

DR. F. M. HARLAN.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid, one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

(THE CHRISTIAN SCIENCE WEEKLY.)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Memorial Day was observed at Washington, D. C., more generally than ever before. The announcement that President Roosevelt would deliver the oration at the National cemetery at Arlington, where the principal exercises were held, brought a vast throng of people. A touching feature of the exercises was the strewing of flowers over the graves of the Confederate soldiers. After the invocation and the rendition of several pieces by the Marine Band and a choir, Lincoln's address at Gettysburg was read. The President's address followed.

One hundred and fifty additional clerks will be employed in the Chicago postoffice after July 1. The total clerical force will then be 1,791. Twelve hundred and forty-six of the clerks now employed will receive an increase of one hundred dollars a year in their salaries. Ten new sub-stations will be added, making two hundred in all.

Two American naval vessels have been equipped with French wireless telegraph instruments. If the experiment is satisfactory it is probable that the system will be installed at Washington and Annapolis in competition with various other wireless telegraph systems.

Herbert G. Squiers, the first minister of the United States to Cuba, was formally received by the Cuban government May 27. Mr. Squiers was the first foreign minister to be recognized and will be the dean of the diplomatic corps at Havana.

The Postmaster-General has announced that a portrait of Martha Washington will appear on the new eight-cent stamps. This is the first time the picture of a woman has ever been used on United States stamps.

It is expected that the McKinley postal card will be on sale about July 1.

Foreign.

President Palma's first message to the Cuban Senate was delivered May 28. The president stated that the republic of Cuba had been officially recognized by the United States, Great Britain, France, Mexico, Guatemala, Nicaragua, Santo Domingo, Ecuador, and Paraguay. He said they must cultivate cordial relations with all nations and that they must take especial care that the relations between Cuba and the United States be most friendly.

Concerning the gratitude that is justly due to the United States, he said, "In this moment, when we feel our right as an independent nation, it is impossible to suppress our gratitude to the United States. To recognize this debt of gratitude to the great nation is an act which exalts us and which makes us worthy of the consideration and respect of the other nations of the world."

The salary of the president of Cuba has been placed at $25,000 a year, and of members of Congress at $3,600.

It is possible that the standing of the British embassy at Washington will be increased in the list of diplomatic assignments. Washington is seventh in the list of British embassies in respect to salary. The first in the rank is the embassy at Paris, this is followed by Berlin, Constantinople, Vienna, St. Petersburg, and Rome in the order named. It has been suggested that Sir F. C. Lascelles, the British ambassador to Germany, is the best diplomat to succeed Lord Pauncefote, but he could hardly be expected to relinquish his salary of $45,000 in Berlin for the salary of $32,000 paid to the British ambassador at Washington.

At one o'clock on the afternoon of June 1, 1902, the War Office at London received the following official cablegram from Lord Kitchener, dated at Pretoria, Saturday, May 31, 11:15 P.M.: "A document containing terms of surrender was signed here this evening at half past ten o'clock by all the Boer representatives, as well as by Lord Milner and myself." The information was received with great enthusiasm and there was much rejoicing that the war, which had continued for nearly two years and eight months, was ended. The war has cost England about $850,000,000 and 23,000 lives.

The official celebration of the anniversary of King Edward's birth, which occurred November 9, 1841, took place May 30. The king has decreed that his birthday shall be celebrated May 30 in London and in the home stations, as it is a more suitable time for a military display. Foreign stations, however, will celebrate it November 9.

The seventh international Red Cross conference was opened at St. Petersburg May 29. Miss Clara Barton was accorded a flattering reception. The Spanish delegates were particularly cordial to Miss Barton, in recognition of her work among the Spanish prisoners in Cuba.

Through the thoughtfulness of President Palma of Cuba, the wreck of the Maine was decorated with American and Cuban flags, garlands of roses, and wreaths on May 30. Memorial services were held in several of the American churches.

Denmark has practically concluded arrangements with the Marconi company for the establishment of a wireless telegraph system between Iceland and Copenhagen.

Word is received from London that William Fife and George L. Watson have collaborated on the plans for a new challenger for the America's cup.

Industrial and Commercial.

The *Age of Steel* says that a steamship using oil for fuel recently made a voyage from Borneo to Great Britain, a distance of eleven thousand miles, in splendid time, and at a reduced cost of handling. Three firemen did the work of twenty with less discomfort and more efficiency. This has practically demonstrated the utility of fluid fuel, and now three oil depots are to be erected at Dover in the English Channel. Like facilities are to be strung along the sea lines of other coasts where ocean travel has its established highways. It takes but three hours for a liner to load up fifteen hundred tons of oil fuel, and this and other economies will count in its favor for marine purposes. A steamship recently loaded 157,871 cases, each case containing ten gallons of refined petroleum, for Japan. The value of the cargo was estimated at $146,000. The United States is building up a splendid foreign trade in this line.

The New York and Cuba Mail Steamship Company (the Ward Line) is preparing to carry freight from New York to Puget Sound in eighteen days. It will be shipped from New York by steamer, carried across the Isthmus of Tehauntepec in Mexico by railway, and from there to Puget Sound by steamer. The route is 1,300 miles less than the Panama route, and the cost is forty per cent less than the cost of all-rail shipments across the continent.

A novel engineering feat was witnessed at New Brunswick, N. J., recently, when the moving of a great steel bridge interrupted traffic only seventeen minutes. The bridge has six spans, is double-tracked, nine hundred feet long, and weighs eight thousand tons. The bridge was moved fifteen feet.

General.

The seventh Atlanta Conference for the study of the negro problems met at Atlanta, Ga., May 27. Reports from fifty cities and towns in various States were made in regard to negro artisans. In twenty-six of these localities negro artisans were gaining ground; in eight they were holding their own, but in some others they were losing ground. They are strongest in the building trades. According to the report of the Patent Office to the Paris Exposition 112 patents were known to be issued to negroes from 1896 to 1900.

John W. Foster, of Washington, D. C., former Secretary of State, was elected president of the eighth annual conference on international arbitration, which opened at Lake Mohonk, N. Y., May 28, 1902. He said that Lord Pauncefote had done more than any other man of his day in the promotion of peace and good-will between the two great English-speaking nations of the globe.

The Chinese minister, Wu Ting Fang, delivered the commencement oration at the Georgia Military College at Milledgeville, last week. He said that the chief difference between the college education in America and China was that here the most importance was given to mental training, and in China moral improvement was made of first importance.

A bronze statue of the late President McKinley was unveiled at Muskegon, Mich., May 30. On the same date the Philadelphia postoffice employes unveiled a bronze bust and pedestal erected to President McKinley. Charles Emory Smith delivered the oration. The bust and pedestal cost $2,100.

Although the diameter of the earth has been roughly known for many years it has lately been accurately ascertained after thirty years' labor and at a cost of five hundred thousand dollars. It is 7,926 miles at the equator, and 7,899 from pole to pole.

The Massachusetts House has defeated a bill for a constitutional amendment to permit a referendum to the people of the State on matters pending before the General Court when twenty-five thousand voters petitioned for the same.

Chicago's population this year, according to the city directory census, will approximate 2,149,000. In 1901 the city directory estimate was 2,080,000, a gain of about 70,000 over the previous year.

Fourteen thousand emigrants from Norway came to the United States in 1901. It is estimated that fully thirty thousand will come this year.

Rear Admiral Schley was the Memorial Day orator at Bangor, Me.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Christian Science and Suggestive Therapeutics.

Editor of *Sun-Telegram.*

Your issue of March 29 has an article entitled, "Hypno-Suggestion the Future's Cure," which I ask the privilege of answering from the standpoint of Christian Science. The main purpose of the article is the exploitation of suggestive therapeutics. Its allusions to Christian Science are contained in the following excerpt:—

"So-called Christian Science, at once anti-Christian in its pantheism, and unscientific in its technic, has seized upon suggestion as a means to achieve its seemingly wonderful yet perfectly understood cures. It were idle to deny that Christian Science procedures relieve the sick. . . . Both Christian Science healer and Psychotherapist seek to alleviate or remove pain by impressing the mind of the sufferer —the one with the idea that it actually does not exist; the other, that the subliminal mind will so regulate the outflow of nerve energy to the affected organ or tissue as to induce a nervous diversion, naturally accompanied with deadened perception of the pain or entire insensibility to it. The principle that 'belief in pain explains pain' is daily exploited by Christian Science doctors, whose claim to credit for the 'healing of incurable organic diseases' argues either dementia or a deliberate intention to bait gudgeons."

Truly, these are formidable assertions. Considering the reluctant admissions of the efficiency of Christian Science methods, it is noticeable that none of the allegations against Christian Science are supported by a single fact or argument. Assertions, however arrogantly made and however equipped with high-sounding phrases, prove nothing at all. To assert that white is black does not make it so.

1. Pantheism is the philosophical error which makes God and the physical universe identical. Christian Science declares God to be Spirit, and that the realities of all being are spiritual, and that the real man is spiritual, in the image and likeness of God. The phenomena cognized by the physical senses belong to a category of their own, "the things seen" referred to by Paul: "For God is not the author of confusion, but of peace." It is plain that the assertion that Christian Science is pantheistic is made by one who is grossly ignorant on that point. "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, is the authoritative text-book of Christian Science. On page 129 occur these words: "Animal Magnetism, Atheism, Spiritualism, Theosophy, Agnosticism, Pantheism, and Infidelity are antagonistic to true Science, and fatal to the demonstration thereof." By the way, the Animal Magnetism above spoken of, is now masquerading under the new names of Hypno-suggestion, Psychotherapy, etc. With the far-seeing prescience which characterizes her as a religious seer and leader, Mrs. Eddy warned against the evils of hypnotism upon various pages of her book nearly thirty years ago.

2. The assertion that Christian Science is "anti-Christian" is unsupported by a single Scriptural citation. The assertion that it is "unscientific in its technic" is wholly unexplained and unproven. True religion and true science are not antagonistic, but are wholly harmonious with each other. If Christianity be true, it is in absolute harmony with true science. As far as space permits, I shall try to show that Christian Science is both Christian and Scientific.

3. Christian Scientists do not claim "the healing of incurable organic diseases." If a disease be "incurable" it cannot be cured, of course. But who says that certain diseases are incurable? It is the drug doctor or hypnotic doctor who fails to cure them by his methods. Does science teach that any disease is necessarily incurable? No. Does the Bible teach it? No. On the contrary, the Bible describes God as He "who healeth all thy diseases." When drug doctors or hypnotists assert that any diseases are incurable, they merely confess that their methods are powerless and unscientific. "The Lord is nigh unto all them that call upon him, to all that call upon him in truth." Note the emphasis upon the word "all" by its double occurrence; and note the significant qualification that God must be called upon "in truth." Note also, in this connection, that Christ declared, "I am the way, the truth, and the life." Note also, the promise, "Ye shall know the truth, and the truth shall make you free." Did Christ heal the sick by the use of drugs or hypnotism, in performing his works to prove the truth of his teachings? Never. Drugs and hypnotism are not the Christ-method of healing the sick. "But the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned." "It is the spirit that quickeneth; the flesh profiteth nothing."

4. What, then, is the Christ-method of healing the sick which the adherents of Christian Science understand to have been re-discovered, and which they are patiently seeking to learn and apply for the benefit of humanity, thus seeking to obey Christ's command to love our fellow-men? Is it something which will escape the revilings of established religious sects and of selfish business and social interests? "Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake."

What is the Christ-method of healing the sick? The Scriptural narratives show that it is wholly spiritual, using no material agencies or aids whatever. Because in one instance Jesus rubbed some clay moistened with spittle upon the blind man's eyes, it is puerile to say that the clay-and-spittle had any medicinal virtues. If so, why did he not use it when he restored sight to the blind in other cases, and why have not the drug doctors used it in the last nineteen hundred years?

Did Christ ever make remotest allusion to a "subliminal mind" regulating "the outflow of nerve energy"? Did he use will power or suggestion? Or did Christ heal the sick because of some power in his own personality, or which he might delegate to a favored few because of his personality? There is not one word in the Scriptures to warrant such an assumption. On the contrary, Christ promised to all mankind, "He that believeth on me, the works that I do shall he do also." Again he said, "If ye abide in me, and my words abide in you, ye shall ask what ye will, and

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

it shall be done unto you." "And these signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." The Christ-method knows nothing about "incurable diseases" in either the narratives or promises, or commands in respect to healing the sick, contained in the Scriptures. "And Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of sickness and all manner of disease among the people." Because drug doctors and hypnotists find that leprosy is incurable by their methods, have they the right to say that the Christ-method neither has cured lepers, nor can cure them? And this question applies to all diseases.

Christian Scientists understand that when Christ said, "He that believeth on me," his words plainly mean that in order to so believe, we must accept, understand, live by and apply his teachings, and that this is prerequisite to all healing of sickness by the Christ-method. We must search out, understand, and apply Christ's teachings in all things. He gave those teachings to mankind for all to understand and apply. The Scriptures teach us that if we seek, we shall find, and that if we ask, we shall receive. But they also teach us that we must not ask amiss; that we must ask for what is right, and ask for it in the right way. We must bring ourselves to search out the eternal truths which govern the distribution of God's beneficence. Why not, when we must even search out the laws governing electrical phenomena to avail ourselves of their benefits?

There is no better evidence of anything in history than of the healing of the sick by Jesus and by his followers for nearly three hundred years after Calvary. Church and State were then united under the Roman Emperor, Constantine, and the decadence of the Christ-method of healing began. And to-day the historical veracity of the Scriptural narratives is made impregnable against the assaults of materialism, whether in the form of open infidelity, or in the specious guise of pretended drug or hypnotic learning, by the proofs furnished in Christian Science cures in rapidly accumulating thousands upon thousands of cases.

Drug-compounders, drug-venders, drug-doctors cannot gainsay these proofs, and their arrogant efforts to minimize them become more and more ridiculous as time goes on. Hypnotists may seek to eliminate God from their theories, and to attribute Christian Science cures to the power of suggestion of one human mind over another, but their claims have already been proven false; for they can neither explain nor duplicate a very large class of the cures wrought by the Christ-method both now and in the days of the Galilean. Churchmen who have become fossilized in man-made creeds which they make the mistake of supposing to be Christianity instead of mere churchcraft, will have to learn that their attempts to disparage the Christ-method must inevitably encourage materialistic tendencies.

5. What is Hypno-Suggestion as a curative agent? In its last analysis it is atheistic, because it excludes a Spiritual Superior from all its premises; and materialistic and anti-spiritual and anti-religious, because it hypothecates man as a mere animal with a mind which is, through a supposed long period of evolution, a mere growth of mental and moral traits and faculties, having their primal genesis in nerves and brain. As a theory it remains unproven, and, in numerous points and aspects, wholly enigmatic: as a practical system it remains a comparative failure. Hypnosis (which is merely the Greek word for sleep) is not a logical factor, only a non-essential and frequently absent circumstance, in suggestive therapeutics. Ponderous Greek and Latin derivatives ("words of learned length and thundering sound," as Goldsmith calls them), such as "telepathic correspondencies," "subliminal mind," "objective and subjective consciousness," etc., are all devices of pedantry; and their significance and explanation can be found in the occurrences of every-day life which have been observed of all men from time immemorial.

No one denies that one human mind may frequently exercise a powerful control over another human mind. Will power, courage, hope, fear, desires, passions, and emotions, in all their phases, are constantly observed to be affecting individuals and multitudes. Such phenomena need no Latinity to define or explain them. But the power of one human mind over another, for curative purposes, from its very nature and circumstance, must act within a very limited circle; whereas the Christ-method is infinite in its scope and logically infallible in its results, its only limitations being imposed by human ignorance.

Suggestion is liable to gross abuses from sinister motives, as well as frequent miscarriages from ignorance. For it has no inherent ethics; and can be employed by those who acknowledge neither God nor a moral code, as successfully as by the best of men. "Doth a fountain send forth, at the same place, sweet waters and bitter?" If suggestive therapeutics effect a cure, it has brought no uplifting and purifying spiritual experiences to either operator or patient, and can afford us no vivifying glimpse of God or man's immortality. The Christ-method elevates all who come within the sphere of its beneficent influences. It proves to us God and man's immortality. But suggestive therapeutics is a desert from whose spiritual barrenness springs up not a single flower of faith, or hope, or joy, to lend its priceless fragrance to human lives.

"Jesus saith unto him, Thomas, because thou hast seen me, thou hast believed: blessed are they that have not seen, and yet have believed."

Thanking you for your courtesy in publishing these remarks, I am, Yours sincerely,

CLARENCE A. BUSKIRK.

In *The Richmond* (Ind.) *Sun-Telegram*.

A Christian Scientist answers Rev. Dr. Utter.

To *The Republican*.

Referring to Christian Science, the Rev. David Utter declares, "Mrs. Eddy reads out of the Bible, or reads into it, a whole new system of healing. New, however, in the main because it is old, so old as to be discredited and forgotten."

If, according to this statement, the Bible contains a method of healing which has been discredited and forgotten, we would ask, has not Mrs. Eddy accomplished a very desirable thing for the human race by discovering and reviving such a system? If, as he declares, "The system of healing which she and her followers believe and practise really belongs to the Christianity of the second, third, and fourth centuries," we would ask why should it not still be extant? If Christianity was sufficient to heal sickness as well as sin in the second, third, and fourth centuries, why should it not heal to-day? Is it not because the church has lost some essential element of Christianity? Having lost the spiritual sense of God's word and the consequent ability to heal the sick, naturally significance corresponding with our ignorance has been read into the Holy Scriptures until the Bible, to mortals, has been changed in its meaning, and the science which it contains and by which the sick were formerly healed, has become buried. Now that it has been discovered and resurrected by Mrs. Eddy, it must wait for acceptance until individuals become prepared to endorse it. The difficulty is that we are slow to note new meanings because we are slow to give up the traditions of the elders which have been read into the Bible for us. Should Christianity be less efficacious to-day than it was ages ago? Should not God be a present help in time of trouble in this age as well as in former times?

We are inclined to believe the difficulty lies in the seeming war between religion and science. There is a demand on the part of thinking people for a philosophical or scientific explanation of prayer and its results, something which will harmonize religion with science. The facts and phenomena

Digitized by Google

of modern science and some of the popular religions are at variance and this tends to foster scepticism and incredulity. Prayer and its results, according to general observation, do not equal the results of applied science. Hence there is a tendency on the part of thinking men to grow sceptical in regard to the ordinary methods of seeking divine aid, a tendency to believe that the divine power is not available through prayer but must come solely through material laws. Christian Science, searching beyond the veil of matter and its laws, reveals the spiritual Science of being, and associates God directly with all visible phenomena and the every-day affairs of life.

This Science, supplanting the testimony of the physical senses with spiritual understanding, shows that God, directly, not indirectly, governs and controls the entire universe. It gives to the world a religion which is also a Science. Thus, undemonstrable religions as well as those so-called sciences which do not recognize God as the only Life, Substance, and Intelligence, are both set aside, and the gap between religion and science is bridged. Thinking men have at last found a religion which is scientific, which appeals to reason, and therefore satisfies.

Investigators of this Science must not lose sight of the fact that healing the sick is not a primary but a secondary work of Christian Science, a necessary consequence of mental improvement and spiritual growth.

The understanding of Christian Science, destroying the fear of disease, and bringing its students into a conscious realization of the divine power and presence, makes sickness an impossibility. It is as impossible for one to be thoroughly and sufficiently imbued with the consciousness of the omnipotence and omnipresence of God, and at the same time be afflicted, as for darkness to remain in the presence of light; for spiritual understanding and goodness can no more dwell with sickness than light can dwell with darkness. ALFRED FARLOW.

Christian Science Claims.

To the Editor of *The Morning News*.

Sir:—In Saturday's issue of your paper there appears an editorial commenting upon the coroner's finding and the statements of the practitioners, as given in the press, of the reported death of a boy while under Christian Science treatment in Philadelphia.

In all fairness, let us ask, Would there have been this discussion and insinuation of cruelty and neglect if the child had died of diphtheretic croup while under the care of a physician? Do not children die under the care of even the most expert physicians? And is it cruel, neglectful, or unlawful when physicians have done the best they could to save their patient? An honest admission on the part of a Christian Scientist that there was not sufficient understanding of God's power to save the child from what even the physician who was called admitted to be a fatal disease, should command respect instead of censure.

Only yesterday the writer was informed of a poor, suffering girl who has spent months in a hospital and has been under the care of no less than eight experienced physicians who have confessed that they could not help her. Are they to be censured and charged with cruelty and neglect for their best efforts?

The writer has before him an authenticated article containing the statements of several parents whose children have been healed by Christian Science of hip disease, dislocated hip, brain and spinal fever, softening of the brain, lung trouble, bone scrofula, carious and ulcerated jaw-bone, all of these cases admitted by the attending physicians to be hopeless as they saw them. The parents are willing to make affidavits to these cures. Has the work of Christian Scientists been cruel or neglectful in these cases?

NORMAN E. JOHN.

In *The Morning News*, Wilmington, Del.

The Lectures.

At New York, N. Y.

The semi-annual free lecture of Fourth Church of Christ, Scientist, New York City, was given in the church auditorium on Friday evening, May 16, by Carol Norton, C.S.D., of the Christian Science Board of Lectureship, of the Mother Church, Boston. The lecture, entitled, "Christian Science is Applied Christianity," received very close attention from a representative West Side audience.

W. D. McCrackan, Christian Science Publication Committee for the State of New York, introduced the lecturer and spoke, in part, as follows:—

"The world is full of people who need help. Most of them are suffering from mental, moral, or physical troubles of one kind or another. Some are involved in the meshes of business or professional difficulties. Others are merely disappointed because they have been seeking the solution of social, economic, and political problems along material lines. Some have been led into unprofitable thinking by philosophical speculations or false so-called sciences. Others have been led astray by the desire to be great in their own name. Some are enslaved by bad habits. Others are appalled at the possibilities of evil which have been uncovered to them in their human experiences. Many are suffering from diseases of various sorts, chronic or acute; organic or inorganic; and all men long to be freed from the fears, doubts, and anxieties which beset their path and breed sin, sickness, and death.

"Is there any helping hand for those who have stumbled, and is there any ray of light for those who are wandering about in the dark? All who are searching for health and happiness, for harmony and help, must sooner or later find themselves face to face with this Science of Being, this Christian Science, which is preaching a new, and yet ever old, Gospel to a waiting and hungering world. One by one the needy ones take this mental medicine and become well; one by one they learn something of its boundless bliss and become happy; one by one they find this priceless pearl and become rich. Their sins and sicknesses drop from them and their disappointments are revealed as beliefs of the past. Is it any wonder that Christian Science is growing; that eighty-one new Christian Science Churches and societies were added during the last year to the number already in existence, making a grand total of six hundred and sixty-three at the beginning of this year?

"The editor of a great weekly said to me the other day, 'I find no difficulty in disproving the teachings of Christian Science to my own entire satisfaction, but I cannot explain the Christian Scientists themselves.' When John the Baptist asked for proof of Jesus' Messiahship, the latter entered into no argument, but called attention to his works. Christian Science is the Science which explains how these works were accomplished, and the individual Christian can only prove himself worthy to follow in the steps of the Master by obeying the commands of Christ to heal the sick as well as to save the sinner.

"My experience leads me to the conclusion that there is no subject in which the general public is more deeply interested than in Christian Science. This is shown by the full churches, by the great audiences which gather to hear the lectures on the subject, delivered in various parts of the country, as well as by the demand for correct and authoritative literature on the subject; and it is noteworthy that, while that which misrepresents Christian Science is ephemeral and without life, the Christian Science text-book itself, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, th. book which describ s what Christian Science really is, is ..ow in its two hundred and fortieth thousand. Christian Science means mental, moral, and physical freedom."—*Correspondence.*

At Taunton, Mass.

Over a thousand people thronged the Taunton Theatre Sunday, May 18, to listen to the address on Christian Science by Carol Norton, C.S.D. He was introduced by Rev. Thomas Edward Potterton of the Universalist Church, who spoke substantially as follows:—

Ladies and Gentlemen:—By the courteous invitation of the First Reader of First Church of Christ, Scientist, representing the members of the church, I am privileged to welcome the strangers within our gates, and especially to greet in fraternity and friendship the lecturer. He comes to us from the great metropolis, a city of towering commercialism and marvelous materialism, to utter his deep and abiding convictions upon spiritual things. It is well that we should think soberly upon these matters of large moment.

The tendency of the present time is a desire and search for the truth, the realization being keen that without truth we cannot enter into the noble liberty and enduring freedom of sons and daughters of God.

Hard creeds and cruel dogmas have lost their hold; and there has come the dawn of a new day, with its light and vision. We know now that Truth only has power, and good is the eternal.

We are living in an analytical age. Everything is microscopically examined and thoroughly tested. The question of the hour is "What is it good for?"

We are to listen this afternoon to the answer of Christian Science. I may not know the tenets of that faith as you would have me, but most strenuously do I believe in the eternal supremacy of Truth, the irresistible power of good, and the contagiousness of health.

Whatever may be our belief there is a testing principle, that can be applied to a doctrine or a church professing a doctrine: "By their fruits ye shall know them."

The world wants results. Theology is not popular; do-ology is winning. In our desire for fruits, let us not forget that preparation must precede. True thinking is a condition of noble service and of that conscious activity which is a mighty factor in bringing in the kingdom.

With the strongest cordiality I greet the lecturer, and with the utmost pleasure I present to you Carol Norton, C.S.D., who will address us upon "Christian Science is Applied Christianity."—*Taunton Gazette.*

At Manhattan, Kan.

The lecture given at Wareham's Opera House, April 27, under the auspices of First Church of Christ, Scientist, of Manhattan, Kan., by Edward A. Kimball, C.S.D., of Chicago, a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston, Mass., was listened to with great interest by a large audience.

Robert J. Brock, a prominent lawyer of this city and our county attorney, introduced the speaker. The following were Mr. Brock's remarks:—

"From the dawn of creation down to the present time there has been a constant war of ideas and differences of opinion; discussions have been the spirit of the times, and no topic has been so prolific of discussion as religion. We are gathered here this afternoon to listen to a discussion of a new phase of that question—Christian Science.

"The question is perhaps new to most of us—it is to me, and doubtless like many of you I would be classed as an unbeliever, but we are fortunate this afternoon in having with us one who has given many years of thought and study to this question and will give us, so far as he is able in the short time allotted, the result of his years of study and investigation.

"I now have the pleasure of introducing Mr. Edward A. Kimball of Chicago."—*Manhattan Mercury.*

At Anderson Ind.

On Sunday, May 18, at the Grand Opera House, Edward A. Kimball, C.S.D., of Chicago, spoke to a splendid audience on the subject of Christian Science. There were about fifteen hundred people present, and they gave the closest attention for nearly two hours to his earnest, thoughtful, and forceful presentation of the subject.

First Church of Christ, Scientist, of Anderson, is small in numbers, but it has a public lecture once a year (this is the fourth in succession). At the first lecture not more than two hundred people were present, but the numbers have increased with each succeeding meeting until the gratifying result of last Sunday was reached.

Mr. Kimball was introduced by Rabbi Max Wertheimer, Ph.D., C.S.B., of Dayton, O., in part as follows:—

"One thing has never yet been patented by any human agency, factory, monopoly, or dynasty, and that is the scientific cure of all disease, misery, sin, and death. Of course, there are all sorts of counterfeits claiming to heal, thousands of remedies, but no cure. Now, wherever there are material counterfeits, there must be somewhere the genuine article of which they are the counterfeit. Where is the genuine article which no human invention or ingenuity can successfully parallel? Jesus Christ gave it to the world. He said: 'Come unto me, all ye that labor and are heavy laden, and I will give you rest.' 'I am the way, the truth, and the life.' The Scripture says: 'He came unto his own, and his own received him not. But as many as received him, to them gave he power to become the sons of God.' If you receive the correct message and real mission of Christ, and live it, you, too, shall be given divine power to overcome earthly, discordant conditions."

Correspondence.

At Cincinnati, O.

Saturday night, May 17, a large and appreciative audience greeted Edward A. Kimball, C.S.D., when he appeared to deliver his lecture on the general subject of Christian Science. Mr. Kimball was introduced by Major J. L. Foley, a prominent insurance manager, as follows:—

"It gives me great pleasure to welcome you here to-night on behalf of First Church of Christ, Scientist, of Cincinnati. You are invited here this evening to listen to the truth concerning Christian Science, the great truth that came to the world pleading for recognition in a still, small voice more than a third of a century ago. To-day it is listened to and being considered in the most profound and thoughtful manner by the nations of the earth. Christian Science has bravely borne criticism from pulpit and press; legislators have vainly attempted to control and prevent its expansion and demonstration; and to-day humanity finds under the wings of Truth and Love, refuge from sin and suffering. This great Truth came to the world through the agency of a woman, Mary Baker G. Eddy, and this but adds to its glory and makes it deserving of the greater consideration.

"To-night we have with us an accredited member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, of Boston; and I now have the honor to introduce Mr. Edward A. Kimball, C.S.D., of Chicago, a living representative, a lively example, of what Christian Science has done and is still doing for the public."

Correspondence.

At Champaign, Ill.

A notably representative audience of Champaign people gathered in Illinois Hall, Monday evening, May 19, to listen to the first formal address given before a general meeting in Champaign on Christian Science. The hall was well filled at the hour announced for the beginning of the address, but the arrivals even then did not cease, and it

Digitized by Google

was nearly half past eight before the late comers were fairly settled. By this time Col. J. S. Wolfe had declared himself in charge of the situation for the moment, had recalled the fact that nearly two thousand years ago the science of the Christ had claimed the attention of civilization, and that, while interest had flagged at brief intervals since then, the theme still claimed the interest and attention of civilization; for the teachings of Christ from the very beginning had taken a mighty hold upon mankind; that it is in the nature of man to believe vaguely, but think deeply and act decisively, and in this age of scientific research man is seeking to understand, through science, many things heretofore accepted, as it were on trust. "Let us hear; let us learn, if we can," said the colonel, and then turning, introduced Mr. Edward A. Kimball, C.S.D., of Chicago, whose services had been secured by the Christian Science Society of this city for an address on Christian Science.

Champaign Gazette.

At Council Bluffs, Ia.

On April 29, 1902, Edward A. Kimball of Chicago, delivered a lecture on "The Beneficial Results of Christian Science," to a large audience at the Opera House. He was introduced by Hon. Spencer Smith in a few well-chosen remarks. His address was listened to attentively, and general appreciation was expressed by persons to whom Christian Science had heretofore been unexplained. The public is waking from its slumber, and is welcoming the sunlight of the Truth. The lectures are of the greatest benefit to the cause, and Scientists are grateful for their help and influence.—*Correspondence.*

Notices.

Communion Services.

The Communion services of the Mother Church will be held in Mechanics Hall, Huntington Avenue, June 15, 1902, at 10 A.M. and 3 P.M.

The usual Wednesday evening testimony meeting will be held in the same hall at 7.30.

Annual Meeting.

The annual meeting of the Mother Church will be held in Mechanics Hall, Huntington Avenue, Wednesday, June 18, at 2 P.M.

Members of the Church will be admitted to this meeting only on presentation of a card of membership at the door of the hall.

The cards of membership can be obtained in the vestry of the Church on and after Wednesday, June 11.

Meeting of Normal Graduates.

There will be a meeting of the normal graduates of the college classes of 1899, 1900, 1901, and 1902, in Boston, Monday, June 16, 1902.

It is desirable that all, who conveniently can, be present, but attendance is not compulsory.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Reports from Branch Churches.

Reports from Branch Churches to be made at the Annual Meeting of the Mother Church, to be held June 18, 1902, must be typewritten and be sent to the Clerk of the Mother Church in time to reach him on or before June 14, 1902.

Those who prepare reports are requested to condense them as much as possible. Owing to the great number of reports to be read at the Annual Meeting it will be necessary to limit reports to two minutes instead of three minutes as previously announced.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Lectures Abroad.

THE Hon. William G. Ewing has been delivering lectures in London and Manchester, England; in Edinburgh, Scotland; and in other places in Europe.

Our reports indicate that Judge Ewing's lectures are arousing much interest in the subject of Christian Science wherever he appears, and many are learning of it who heretofore have had incorrect or distorted views. The English press are treating the lectures with fairness and even kindly consideration.

That immeasurable good will result from the Judge's tour abroad, is an assured fact. All Christian Scientists and friends of our great Cause on this side the water rejoice with their brethren of foreign shores in their good fortune.

IN LONDON.

From London we receive the following report:—

"Judge Ewing lectured in the Queen's Hall, London, on Tuesday, May 6, to a deeply attentive audience of over two thousand people. The lecturer was introduced by Major the Hon. William C. Rowley, one of the Board of Management of this church. Deep gratitude is felt and expressed by the members of this church, both for the lecture itself, and especially to our dear Leader, whose loving provision for its needs is always gratefully appreciated by her church in London. I enclose the chairman's introduction and the reports of the lecture from *The Times,* and *The Daily Telegraph,* the two leading London papers. C. V. SPILLER.
"Clerk of First Church of Christ, Scientist, London, Eng."

Major the Hon. W. C. Rowley, introduced the lecturer as follows:—

"*Ladies and Gentlemen:*—It is my pleasing duty to-day, to introduce our lecturer on Christian Science. Judge Ewing was formerly a distinguished member of the American Bench, from which he was nearly obliged to retire seventeen years ago, owing to an affliction that eminent medical advisers declared incurable. He was lifted out of this by the healing power of Christian Science, and was enabled to remain on the bench and to continue working at his profession for many years with entire immunity from physical disability. Becoming, however, wearied with politics and worldliness in general, and having studied Christian Science thoroughly, he saw the benefits it was conferring on mankind; he then gave up his profession and devoted himself to the work in which we now find him.

"Judge Ewing is a member of the Christian Science Board of Lectureship of the Mother Church in Boston, America, and during the last two years has traveled fifty thousand miles a year to enable him to fulfil his lecturing engagements.

"Allow me to introduce to you our lecturer, Judge William G. Ewing."

The London Times contains the following account of the lecture:—

"A lecture on Christian Science was delivered by the Hon. William G. Ewing, late Judge of the Superior Court, Illinois, at Queen's Hall, on Tuesday afternoon. After a short introduction by Major the Hon. W. C. Rowley, who said that Judge Ewing was a distinguished member of the American Bar and Bench, the Judge said that the general impression of the people who have not investigated Christian Science was that its sole purpose was physical cure, and that it was something for to-day only, and not for the future. The truth was that physical healing was but an incident of Christian Science. It was true that Christian Scientists insisted that it gave peace for pain, health for disease, and life for death to man; and yet neither one of these, nor all of them combined, was Christian Science. They were the results only, but Christian Science was a religion pure and simple. Christian Scientists were simply trying to live the life Jesus lived. His mission was not only to preach the Gospel, but to heal the sick. The declaration of Jesus to his disciples, 'The works that I do ye shall do also,' was made to the people of this day as certainly as to the apostles and the people among whom they wrought, and Christian Scientists had demonstrated that they had been included in this declaration of the Master by accomplishing many of the marvelous works that Jesus did. The chief opposition Christian Science had to combat was the prejudice inherited from past generations. Many people held the opinion that Christian Science was so far beyond the limits of belief that it was of no use to give their attention to the matter. Christian Science had been practised for about thirty-three years; in a very weak manner at first, but with increasing energy later. Within twenty-five years, in the United States alone, about a million, including both sexes and all ages, in every variety and condition of climate, had been treated by Christian Science methods, and cured of all manner of diseases, covering the whole range of mortal afflictions, and some twenty per cent of these had been given up by material science as hopeless. There had been failures, it was true; but the percentage of these had been much smaller than that of failures under material methods. It was strange that one of the objections urged against Christian Science was that it was the product of a woman, when it was evident that that fact inevitably carried with it two conclusions—one being that it was absolutely honest, and the other being that it was absolutely pure. This should be remembered in a country that had been ruled over by a woman for sixty years, who had given to it a prosperity and a power for good that the world had never before known."

The Daily Telegraph thus referred to the lecture:—

"It was a somewhat surprising evidence of the general interest taken in Christian Science that Queen's Hall, Langham Place, should have been occupied yesterday afternoon by a very large audience to hear an address on the subject. The lecturer was the Hon. William G. Ewing, formerly a judge of the Superior Court, Illinois, who, as the chairman (Major the Hon. W. C. Rowley) stated, owes his health to Christian Science, and has during the past few years traveled fifty thousand miles in advocating it. Mr. Ewing, while asserting that Christian Science was a religion of which the cures that had been effected by its aid were only a small part, acknowledged that in the public eye they took great prominence, and he therefore asked for a fair consideration of its victories over disease by the same standards as those which are applied to the treatment by material methods by physicians. He conceded that the practice of Christian Science had not been an unbroken success; there had even been some fatalities, but, as compared with the statistics for ordinary medicine, these failures were so few that in the case of drugs they would hardly have been reckoned at all. In the whole life of Christian Science the aggregate fatalities under its practice in twelve of the United States, during a period of thirty years, were not equal to the deaths occurring under material medicine in any one week in the last two years in the cities of Chicago and Greater New York. Over a million cures, he claimed, had been effected, covering the whole range of mortal afflictions.

In Manchester.

Judge Ewing also lectured in Manchester, England, May 8, to a large audience. A correspondent—a Christian Scientist who was present—thus interestingly writes of this occasion:—

"This evening in Manchester at Memorial Hall, Judge Ewing delivered another lecture to an audience that filled the place to overflowing,—a very large representative audience, and this from a community that less than five years ago had probably never heard of Christian Science. The lecture was a triumph and a feast.

"Most Americans are surprised, and no doubt many of our countrymen will be, to know that within a radius of thirty miles from Manchester there is a population of nearly eight million."

The *Manchester Courier* gave the following account of the lecture:—

"The Memorial Hall, Manchester, was filled last night with a select audience who had assembled to hear from the Hon. William G. Ewing, an ex-Judge of the Superior Court of Illinois, U.S.A., an exposition of the faith of the Christian Scientists. This body have already a place of meeting in Manchester, and a considerable following. The Earl of Dunmore presided, and, with his daughter, the Lady Victoria Murray, is an ardent believer and expounder of the faith, as they believe it has been delivered to the Rev. Mary Baker Eddy of New Hampshire, U.S.A., with its power to heal those who believe.

"Lord Dunmore said he was no stranger to a Manchester audience, and his daughter had been intimately connected with the work of Christian Science in the city for some time. The lecturer was, he said, a member of the Board of Lectureship of the Mother Church of Christian Science at Boston, U.S.A. The teachings of Christian Science were in perfect harmony with the teachings of Christ. Though the religious world was slow to accept any new departure from its old established position, still they were sure that the sun had set upon the day when bigotry, intolerance, and superstition could bar the way to religious progress. Christian Scientists believed and taught the theology of nineteen hundred years ago. They also believed that the word of their Master was the truth, and that the truth was within the reach of all, so that those who could arrive at the understanding of that theology could frame and regulate their lives so as to live up to it. It was the theology of Christ that healed the sick, and not his personality.

"The Hon. W. G. Ewing then gave a long and discursive address, in the course of which he said the growth of Christian Science in Manchester had been rapid and most satisfactory. He then proceeded to show that Christian Science was not antagonistic to the religion of Jesus Christ, but was the same religion. It was not a sort of intangible, untouchable, inexplicable something that no one could explain, nor was it a sort of patent medicine that had never been patented. They said that in God they lived, and moved, and had their being,—that is, had life, health, and immortality, yet they immediately went out to their doctor, or druggist, or some fresh climate for their health. He then showed how all Christian churches had advanced in their conception of Christianity, and pleaded that there was no reason why we to-day should be bound by the dogmas of our forefathers. He showed how their faith embraced all the essentials of the old churches, and then referred to the revelation which they held had been vouchsafed to the Rev. Mary Baker Eddy, which she had incorporated in her work on the subject. That work, after the most careful study, he declared was founded entirely on the Bible. Her claim, which they supported, was that she had discovered the means whereby suffering, crying, cringing men of earth to-day might invoke the healing power and love of God for their emancipation from suffering, sorrow, and sickness, just as it was invoked nineteen hundred years ago. Christ's commission was to preach the Gospel by healing the sick, and Christian Scientists believed his promise that signs would follow their preaching. In conclusion, he claimed that they had demonstrated the efficiency of metaphysical healing, and, therefore, the truth of Christian Science."

The *Daily Dispatch*, the *Manchester Guardian*, and the *North Express*, also contained fair reports of the meeting and of the lecture.

At Edinburgh.

May 10, Judge Ewing lectured at Edinburgh, Scotland, to a large audience. The following account was published in *The Scotsman* of that city:—

"Under the auspices of First Church of Christ, Scientist, Edinburgh, a lecture on Christian Science was delivered on Saturday afternoon in the Music Hall, Edinburgh, by the Hon. William G. Ewing, formerly Judge of the Superior Court, Illinois, U.S.A. The audience numbered about fifteen hundred persons, of whom quite eighty per cent were ladies. A few clergymen were present. Mr. T. P. Laird occupied the chair, and introduced the lecturer, who, he said, having been healed of a disease through Christian Science, and being convinced of the absolute truth of its teachings, resolved to retire from the bench and devote himself to the spread of the new-old healing gospel. It had already brought health and happiness and peace to many a home. It had done so to not a few in Scotland, and after that lecture, which was for the purpose of removing misunderstanding and misconceptions, he believed it would do so still more in the future.

"Mr. Ewing said that being a Scotsman by descent, and coming from a country to which Scotland had given so much, it afforded him great pleasure to have an opportunity of speaking in Scotland on a subject which was very near to his heart. He was not there for the purpose of proselytizing—for the purpose of making Christian Scientists out of his audience. That they would have to do for themselves if it was ever to be accomplished, and they would have to do it in the same way as they had made themselves great musicians, or great artists, or great painters,—by the most persistent and earnest study and absolute devotion to the work. No one could say that he knew what Christian Science was till he could say he was master of the Holy Scriptures. All that was good in his religion as in theirs came and must come from the only source,—God's revelation of Himself to men. Nor was he there for the purpose of picking out the weaknesses or the foibles of the older churches. He could not talk intelligibly on this subject to any one who did not believe in God and in the Bible as the revelation of God, in the Ten Commandments, and in the great Commandment of them all, 'Love God with all thy heart, and thy neighbor as thyself.' Nothing could be wider of the truth than the idea that Christian Science was antagonistic to the religion of Jesus Christ, and that it was something for the ills of the body only and not for the immortal soul. The healing was but an incident of Christian Science, but as the works which Jesus did were the absolute proof and demonstration of his divinity, and the only argument he ever used to establish his divinity, so the works that Christian Science did were the demonstration of the divinity of Christian Science. He had no quarrel with the old churches; he believed that every one of them had brought good into the world; it was through their work that the field was open to the religion in which he had found comfort and health and help. But the believers in the manifold phases of the Christian religion were united in one thing—to prevent any new thought of God from gaining acceptance among thinking men. The lecturer went on to elaborate at great length the argument that as the attitude of men towards the many secular and mental problems of life was vastly different now from that taken by their forefathers, so there was no reason why the present generation should be bound to take from its predecessors the concept of God they had formed under the lesser light in which they lived.

Digitized by Google

In all the essentials of belief the Christian Scientists were in absolute harmony with the Christian churches. Should they not then be friends, standing side by side, shoulder to shoulder, one army in the service of the one living God? Christian Science was discovered, or rediscovered, or found, or uncovered by Mrs. Mary Eddy, a native of the State of New Hampshire. She did not invent it. All that she claimed was that she had discovered a means whereby cringing, crying men of to-day might successfully appeal to the love and healing power of God as the crying, aching men of nineteen hundred years ago did appeal to it and were made whole. Christian Science offered to the world no new Bible and no mythical or mystical or forced construction of the old. It enthroned no new divinity, proclaimed no new God, but the one only living and true God whom all our fathers worshiped. The basic principle of Christian Science was the declaration of an insistence upon God's infinite power, goodness, and love. All that Christian Scientists claimed was that they were trying to live the life that Jesus lived, and to follow the example that he set. They believed that the promises of his religion were meant to be absolutely kept. They believed that he sent his disciples out into the world to preach the gospel and heal the sick—the one just as much as the other. Christian Scientists did not claim to be clothed with the power of God to heal the sick. All that they claimed regarding the healing power of their religion was what was claimed nineteen hundred years ago. 'The power is not in me, but in the Father who worketh through me.' If the power that healed the sick was the power of God, would it not come to them as a horrible shock to think that He did not manifest that power now as He did in the days of old? The lecturer concluded a lecture of about an hour and a half's duration by declaring that by thousands upon thousands of absolute cures covering the whole range of mortal disease Christian Scientists had absolutely demonstrated the power of metaphysical healing, and therefore and thereby and therein the absolute truth of Christian Science.

"The chairman, in a sentence, thanked Mr. Ewing for his lecture."

Our Edinburgh correspondent thus writes:—

"The lecture was much appreciated and enjoyed, and it will serve to call attention to and remove many misconceptions regarding Christian Science."

Referring to the lecture at Manchester, one of the leading Scientists there writes of it, "It has been a great time of rejoicing here and we are all very grateful for the tremendous success of everything."

Accompanying the letter is an interesting sketch of the establishment and progress of the work there, which, we regret to say, our space will not permit us to publish in this issue, but we shall publish it at an early day.

Among the Churches.

Christian Science Chapel to be Erected at Albany, N. Y.

Christian Science has received a new impetus here during the past few months, and, as a result, the first building of that denomination in this city is about to be erected in the West End, at the corner of Madison Avenue and Quail Street. It will have a depth of about sixty-five feet, with seating capacity of three hundred, and will be built of wood in Colonial style. There will be two studies, one on either side of the platform, a choir and belfry. The interior decorations will be simple. The only effort toward what might be termed ornamentation will be the gilded lettering of texts taken from the Bible, and from "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. The interior of the chapel will be vaulted. The idea of the Scientists is to have the edifice as simple and chaste as possible. Work on the building will be begun next week and pushed with all possible speed to completion. It is expected that services will be held in the new chapel on the first Sunday in August. The cost of the building will be between five and six thousand dollars.

This chapel is only the beginning; it is but the promise, so to speak, of the church proper, which will in time spring from it.

The Christian Scientists have had their ups and downs in this city, as they have elsewhere, when this Science was introduced. The keen edge of public sarcasm and ridicule is rapidly being dulled, and the more enlightened people are beginning to see and acknowledge the true Christianity as revealed in the writings of Mrs. Eddy, Discoverer and Founder of Christian Science. This old-new faith includes among its followers many of the most cultured and intelligent men and women in the world. Among them, members of all the professions are represented; also many of the nobility in foreign countries.

This movement was first introduced in this city in 1887, and the church was incorporated in 1889. The society took up its quarters about three years ago in the Appleton Building, where it is now located.

Recently the society has shown very marked growth and progress. The Sunday School also shows an increased membership of nearly one hundred per cent. "Taking these facts into consideration," said one of the members of the congregation, "is it any wonder that we feel glad, and are reaching out in our scope, to enlarge our borders, by providing a chapel where the weary and heavy laden may find rest and peace."

Daily Press-Knickerbocker and Albany Morning Express, April 23, 1902.

Organization at Goshen, Ind.

Three years ago a few earnest students of Christian Science in Goshen, Ind., were holding services regularly in the home of one of the number, with an average attendance of twelve. The order of service as prescribed in the Manual was followed. In June, 1900, a class student was sent to us, and we procured a hall for holding services and provided a comfortably furnished reading room. Much interest in the work was manifested by the members of the small association, all the expenses were promptly met, and the little band was enabled to give this community a lecture at the Opera House by Judge Ewing on April 8, 1901.

The association was organized into a church November 11, 1901. We have recently leased a larger hall for our church services and made improvements in the reading room. The work is slowly but surely growing, and we look with confidence to Him who is our constant supply.

We appreciate the blessings we enjoy in this new-old Truth for which we owe so much to Mrs. Eddy, and for the light and health given us in the words of her beautiful prayer-hymn, "Shepherd, show me how to go."

MRS. CARRIE BROWN, *Clerk.*

Corner-stone Laid at Hoopeston, Ill.

The laying of the corner-stone of the new First Church of Christ, Scientist, now in course of erection on their lot, corner Washington and Third Streets in this city, occurred Tuesday afternoon [May 6]. The services and ceremonies attending the placing of the stone in position were to have been held in the open air at three o'clock, but the rain which was falling quite heavily at that hour prevented, and a part of the services were held in the old Friend's Church in which the congregation has been holding services since their rooms in the First National Bank Block were destroyed by fire. The services were opened at 4 P.M. by the reading of selections from the Bible and Mrs. Mary Baker G. Eddy's "Science and Health with Key to the Scriptures," by Miss Stella F. Sabin, First Reader, and Mrs. C. H. Catherwood, Second Reader. At the close of the services

Digitized by Google

in the church, those in attendance, repaired to the new building, where the remainder of the programme was carried out. After the stone had been lowered into place, in the hollow made for the purpose of receiving them, were placed copper boxes containing the following articles:—

The Holy Bible; a copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, with complete set of that author's writings; a manuscript history of First Church of Christ, Scientist, in Hoopeston, by Miss Stella F. Sabin; a list of the present members and officers of the church; copies of *The Christian Science Journal, Christian Science Sentinel,* and other Christian Science publications; copies of *The Hoopeston Herald,* the *Daily Chronicle,* and the *News.*

The exercises closed with the reading of an address, giving a brief history of the church in Hoopeston, by Miss Stella F. Sabin, First Reader. The corner-stone used was brought from Concord, N. H., the home of Mrs. Eddy, the Founder of the Christian Science Church.

The rain during the afternoon kept many away who expected to attend the exercises.—*The Hoopeston Herald.*

Science and Health in Boulder, Col., Public Library.

On Easter Sunday we had seventeen children present at our Sunday School. They all came with happy faces, bringing their Easter offerings, for the purpose of purchasing a Science and Health for the Boulder Public Reading Room and Library. There has been a great need for one there.

They appointed a committee from their number to see that the book was placed in the library. The enclosed letters will explain the result.

Yours in Truth and Love,
MRS. SARAH M. VAN CAMP.

Boulder, Col., March 31, 1902.

Mrs. Savory, Librarian.

Dear Madam:—You will please accept "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, as an Easter offering to the Boulder Public Reading Room and Library from our Christian Science Sunday School class. Yours in Love.

EDA WYNKOOP, STACY DORN,
DELLA GITHENS, CHAUNCEY PARSONS.

Boulder, Col., March 31, 1902.

To the Class Committee.

I am sure the readers in the Library will feel grateful for your Easter offering, and in their name I thank you very much. CLARA H. SAVORY, *Librarian.*

Reading Room at Joplin, Mo.

The members of First Church of Christ, Scientist, have fitted up two large rooms in the Latour Building at the corner of Eighth and Main Streets which will be used as reading rooms. Literature, touching on all phases of the doctrine, is at the disposal of any one who may become interested, and some member of the church will remain there to receive visitors every day except Sunday.

"Our teachings are greatly misunderstood," said a prominent Christian Scientist to a *Globe* reporter, "and we take this opportunity of enlightening the public in general. Any number of unfortunate occurrences of late years have been charged directly to our doctrines. These reading and reception rooms will be maintained for the purpose of enlightenment."—*The Joplin Daily Globe.*

Let us be content to do little, if God sets us at little tasks. It is but pride and self-will which says, "Give me something huge to fight—and I should enjoy that—but why make me sweep the dust?"—CHARLES KINGSLEY.

Wednesday Evening Meeting at Chicago.

AT the Wednesday evening meeting [April 2], at the Second Church of Christ, Scientist, of Chicago, the leader read a greeting sent by the directors of the church to Mrs. Eddy on the Easter anniversary of the dedication of the church; recalling to her the loving message she had sent to the church the year before, and thanking her for the lately published revision of our text-book.

In his usual felicitous manner, the leader set forth the object of the Wednesday evening meetings. The world was seeking the way out from its condition of woe. Christian Science showed that way—the Way, the Truth, the Life. These meetings afforded an opportunity for those who had found it, to point it out to those who were seeking such a way, and help them to walk in it.

A gentleman testified that his wife had seemed doomed to years of invalidism—which the medical fraternity had finally pronounced to be helpless and hopeless. He had year after year, returned from business to his home vainly longing to see some change in her condition; but it never came until she was healed in Christian Science. Then all was changed. Joy and peace took the place of misery and contention, of murmuring and despair. The whole atmosphere of the home changed.

As for himself, he discovered that his belief held by many men in business that intoxicating liquors daily were required to stimulate and invigorate them, was a delusion; that an irritable, disagreeable manner of conducting business was not, as he had supposed, an aid, but a hindrance. These habits slipped away from him; became odious and obnoxious to him. An increase of prosperity had come to him as a consequence. Many blessings unlooked for, unsolicited, had befallen him and his family as a result of the study and practice of the Science.

Another gentleman said that he was not led into Science through a desire for physical healing. He had early revolted from the teachings and rearing of strict Methodist parents. For twenty years he had read scarcely a chapter in the Bible nor entered a church. He had repudiated the doctrines which were to him only absurdities, and a God whom he could not even respect. Yet he had always been deeply conscious of an unsatisfied longing for spiritual truth and of aspirations for a higher and better mode of life. An acquaintance had asked him to return a copy of Science and Health to its owner, and out of curiosity he opened it on his journey, at the chapter on "Prayer." It fully satisfied his belief as to what prayer should be. He read for three hours, convinced that at last he had found the religion he had long been vaguely seeking.

He bought a copy of the text-book and other writings of Mrs. Eddy, and in a few days decided that the light of Truth and Love had beamed upon him. He shortly lost all desire for the use of tobacco, in which for twenty-five years he had habitually indulged, in every form. Though not what is usually called a drunkard, he had been in the habit of drinking. He did not abandon the habit, the habit abandoned him.

Merely for the sake of passing away the time, he had played cards, often for money. Now he would rather saw wood. Instead of looking around for pastime of this sort, during his intervals of leisure, he found in the Bible and the Christian Science text-book all that he required.

On his journeys he was never unoccupied, never lonesome. He had gone through three stages in his acquirement of the Science. First he thought it was the Truth. Then he thought he knew it was the Truth. Now he knew that he knew it was the Truth.

A lady said she had spent a girlhood and young womanhood of illness and despair. Reared in an orthodox church, she had never been able to find in any creed or any practice, the slightest fulfilment of the promises of help and healing set forth in the Bible and approved by Jesus Christ.

Digitized by Google

At length, with great reluctance and little expectancy, she was persuaded to appeal to the only Source of light and comfort. She was literally healed of "all manner of diseases," for some of which *materia medica* claimed to find a remedy and others for which no material remedy had ever been discovered. Her existence, once a curse and a burden to others, was now a blessing to herself and a comfort to others. Peace, harmony, joy, health, and an uplifting of her whole being, a widening of her horizon in every direction, had convinced her and all who knew her that Christian Science fulfilled to the letter its every promised word of relief and comfort.

A lady declared that for five years she had been in bondage to rheumatism, often compelled to remain in the house, sometimes chained to her bed. Nothing but Christian Science had ever freed her from her cruel master, and that had emancipated her wholly. She had become almost unconscious of her freedom. Not even a twinge recalled her slavery. Only her constant thankfulness reminded her of the perpetual blessing that had been poured out upon her.

A lady said that a little girl asked her what she thought was the best of the blessings that Christian Science brought. She replied that there were so many it was hard to say. "Well; I think," said the little girl, "that overcoming hate with love is the best." The lady then went on to testify to an experience of her own which showed how potent in Christian Science is the power of love. She told how Love had overcome an unaccountable and malicious dislike that a woman of another family had entertained for her since girlhood. This woman was the only member of the family who disliked her, and she herself was the only member of her own family whom the woman disliked. The woman habitually maligned her, imputed evil motives, distorted every action. The speaker said she handled the claim to the best of her ability but discovered no abatement of the malicious feeling. Only her own resentment of such treatment seemed to be affected. The woman made her acceptance of Christian Science only fresh occasion for speaking evil of her. But at length unexpectedly the lady got a letter from her, saying that she was then in Chicago, sick, abandoned, and forlorn. She had alienated all her friends and turned for help to the one she had always disliked, for some reason that she knew not. She could hardly believe that the lady would heed her request to come to her, but she hoped she would. Of course she lost no time in visiting her. At first she saw little change. She seemed to retain her old manner of speaking of and to her. She told the lady she did not know why she had sent for her, and that she had better go away; that she would be trying her absurd Christian Science experiments on her. The lady disclaiming any purpose of doing so against her will, then told her of the work she had done in Christian Science, and that it was that which had led the old woman, who was now eighty years of age, unconsciously to seek her out and ask her aid. A change gradually came over the sour, disappointed, friendless woman. She listened with increasing eagerness and interest, and before she passed out of mortal existence gave convincing proofs, not only of conciliation, but of love and affection that had displaced the hatred she formerly felt.

The meeting was more than usually interesting. The testimonies were clear, positive, convincing, given with great earnestness and fluency, and with scarcely a noticeable instant of silence or hesitation between them.—E. G. H.

Jesus Christ never lets any man really go after him and be disappointed with the result. He keeps his grace for daily revelation according to the daily need. He giveth more grace—he giveth grace upon grace. He will not tempt you with a bribe, but he will feed you with an eternal satisfaction.—JOSEPH PARKER.

The Real Man.

BY CAROLINE WASHBURN ROCKWOOD.

OUT of all mists,
Into all Light;
Out of all wrong,
Into the Right;
Out of things false,
Into the true;
Out of death's clutch,
Into Life new.

Turning from doubt;
Steadfast in hope;
Radiant with joy;
Mighty in scope;
Upright and strong;
Selfless and wise,
Must the real man,
Triumphant, rise.

As Wise Followers.

BY HERBERT S. FULLER.

MUCH is said in the public prints, from the pulpits, and in direct conversation with Christian Scientists, to the effect that those who are trying to live this new-old religion of healing and happiness are "followers of Mrs. Eddy," and the statement often takes the form of a scornful accusation instead of a plain statement of fact, carrying with it the thought that to be thus designated was something not desirable, but rather to be avoided.

In this day there are few in the ranks of Science who would not willingly bear whatever opprobrium such a statement might seem to cast upon them, for publicly and privately the loyal Scientist is proud to be characterized as a "follower of Mrs. Eddy." Those who have accepted Christian Science and have tried to demonstrate it, willingly admit that they are "followers of Mrs. Eddy," although forced to admit that they are following a long way behind their Leader.

Willingly do they accept such a characterization, because they have proven,—often through bitter experience,—that it is safe to follow Mrs. Eddy because her greater spiritual insight makes it possible for her to discern the shoals and dark places, and give timely warning to those who are following her leadership, thus saving them from experiences which she had to pass through in order that the warning she gave might be based on actual experience. A wise guide and counsellor she has proven every time, and it is only when we shut our eyes to her warnings and strike out on a path of our own that we suffer. Thus we have proven that it is the part of wisdom to follow her; and so to be called "followers of Mrs. Eddy," simply means to the Scientist that he is on the right road, and that a wise guide is leading.

If the words, "followers of Mrs. Eddy" are used to indicate an opinion that it is her personality that is being followed by Christian Scientists, those holding that opinion have only to turn to Mrs. Eddy's own words to prove the fallacy of their statement. In her annual message to the Mother Church in 1901, a message that was full of good things, she said to every Christian Scientist just how they should follow her, in these words: "Finally, brethren; wait patiently on God . . . and follow your Leader only so far as she follows Christ." Is not that a meek and humble injunction not to follow her as a personality, but to follow her only so far as she walked in Christ's footsteps? Could one ask for greater humility than this? Surely this could not be termed an attempt to exalt her personality.

Digitized by Google

In thus speaking to her children of the church she used words in close relationship to what Paul said and meant in the first verse of the eleventh chapter of First Epistle to the Corinthians: "Be ye followers of me, even as I also am of Christ."

Following a guide who only desires to be followed so far as she does good, would seem to be a safe thing to do, and Christian Scientists find that it is safe for them to be "followers of Mrs. Eddy."

Freedom.

BY J. E.

IN Science and Health, page 89, we read, "Mind is not necessarily dependent upon educational processes. It possesses of itself all beauty and poetry, and the power of expressing them."

We read in the Bible that it was asked concerning Jesus, "How knoweth this man letters, having never learned?" We are constantly seeing people who can do some one thing naturally and well. They realize, partially, their freedom in this one direction. To one, perhaps, it is music which seems "divinely natural;" to another poetry; to one mathematics are clear and the answers to problems come without study. All this helps in proving that *Mind* does possess all this beauty and power, and one person catches a glimpse of it, and expresses it in one way without study, and another reflects it in another way.

We are to learn that this freedom of which *one* feels a slight sense in one direction, we are each one to feel in every direction, not, perhaps, by study in that particular line of thought, but by the illumination which the divine Mind gives, by which our minds shall take such leaps as the child taught by Science takes to-day, leaping over the so-called science of medicine into the one great, simple, all-comprehending and error-destroying thought that *"Mind is all."*

Emerson compares us to a banished king who, on resumption of power, "should buy his territories inch by inch instead of vaulting at once into his throne."

But be the way slow or fast, we shall at last all realize the liberty of the sons of God.

Our Tonic.

BY M. E. McA.

THIS thought was given me by a dear friend in Christian Science, and thinking it very helpful I wish to share it with all students of our Bible lessons.

A daily study of these lessons serves as a tonic. We get thoughts of Life, health, and strength, and how to apply them in our daily lives. How much greater benefit we receive from our Bible lessons than from any material tonic we ever tried. The latter lulls us to sleep, while the former awakens us by giving us a true understanding of what constitutes health.

Possibly we do not realize at the time the impersonal help we received, but unconsciously we do get help and can help others by a careful study of our lessons daily. I find it most helpful to study our Bible lessons from the references given in the *Sentinel* for the revised edition of Science and Health. The thought may suggest itself, that we do not have time to study these lessons daily, but if most of us compare ourselves now, to our condition before we had any understanding of Christian Science, we find we used to take time to be sick, and to lie down to rest, even if we were not sick, for fear we would be. We should feel stimulated with the only stimulus, divine Mind, and know that we do have time.

I am thankful to our Lesson Committee and to our Publishing Society for the *Journal* and *Sentinel* and all Christian Science literature. I am also grateful to our dear Mother who has made it possible for us to have these helps.

Testimonies of Healing.

I came to know of Christian Science in the following manner. In the autumn of 1899 an acquaintance told me that an American lady, passing through Stuttgart, had given her an extraordinary book about healing by Christian Science, and asked me if I would like to read it. Taking it home, I read part of it; but, though somewhat impressed, I did not find it very interesting, and returned it. This book was "Science and Health with Key to the Scriptures."

I had been a great sufferer for many years. From childhood I was subject to sick-headaches, indigestion, and debility, and these evils had been aggravated by long residence in a hot climate, where malarial fever left me with liver and kidney disease. The numerous physicians, who were consulted in different countries, agreed that there was no hope of a complete cure, and condemned me to a life of invalidism.

After my return to Europe in 1892 I was found to be suffering from gall-stones, and was sent to Karlsbad four times, but without permanent benefit; the dreadful attacks always returned after a few months. Circumstances made it necessary that I should continue my teaching, and my condition was truly wretched. It was a constant struggle to keep up some appearance of health, and to perform my duties conscientiously while suffering tortures, and I looked longingly for the end of this life as a release.

The winter 1899–1900 was a hard one for me, and the thought of what I had read in Science and Health often returned, until a great wish to know more made itself felt, and I borrowed the book again. This time I read it carefully. Then a hard struggle took place between my old beliefs and the Science taught by Mrs. Eddy. Though I had long ceased to find any satisfaction in the theory of the atonement as preached in the old theology, yet, having been taught that belief in it was essential to salvation, it cost me a hard fight to accept the whole of Christian Science.

The disturbance was physical too, and I spent a very bad three months, sometimes quite discouraged, but always impelled to go on reading. By the end of that time, however, I knew that the book contained the Truth, and showed the only way to real physical and moral healing.

The next question was where to find a healer. From some numbers of the *Christian Science Sentinel*, lent me by the same lady, I learned that there were healers in America, but that seemed a long way off. One day, however, in a number of the *Sentinel* I found a short article on Christian Science work in Germany, in which the names of those engaged in the work in Berlin, Dresden, and Hannover were mentioned. The next step was to find out the addresses of those named. At the chief police station I found Postal Directories of Berlin and Dresden, and resolved to go to the former town, as the nearer to Stuttgart.

My conviction of the certainty of finding healing in Christian Science was so strong that I was determined, if I did not find what I wanted in Berlin, to go on to Hannover, and if I did not find it there, eventually to go to America. On arriving in Berlin, I found that it would not be necessary to go farther. My first interview with my kind healer confirmed all my hopes. The treatment began, and, although for the first fortnight considerable chemicalization took place, and I suffered a good deal, by the end of the third week I was completely healed of all my maladies, and great weakness in the action of the heart, which had not been mentioned to the healer disappeared with the rest.

But this bodily healing, wonderful as it was, formed only a part of the great benefit I found; all through those three weeks I was daily learning more of the beautiful truths of Christian Science, and entering on a new and higher understanding of Life as God; so that when I returned home all things seemed new, and the depression that had spread so deep a gloom over my existence was gone, and in its

Digitized by Google

place there was the bright hope of pressing forward to gain the crown of life, a right understanding of God and His creation. Since then I have had good health, and have been able to do much more work than formerly; and, best of all, I have been privileged to carry the good tidings to others, and also to help some physically.

C. F. H., Stuttgart, Germany.

I was brought up in the Methodist faith. My father was a class-leader for many years. My parents honestly strove to teach their children to look to God in prayer for help every day. When very small, my mother talked earnestly with me, and at one time I remember she said, "Don't simply *say* your prayers, but pray from your heart."

At another time, when going to be away from home over night, father said, calling me by name, "If you don't say any other prayer, pray the Lord's Prayer every day." I cannot remember when I did not pray to God as my heavenly father. I am truly grateful for this early teaching.

The thought of eternal punishment was a great problem to me. I could not understand why God could everlastingly punish some of His children and yet be "Our Father." I was told not to question God's ways and means, so I tried to be reconciled.

In after years I devoted much time to Christian Endeavor work, hoping to find how to live the most useful life; also to find a solution to that ever-recurring problem.

Once when going to my home from B., I met a friend who was at that time attending a divinity school in the city. She, with others whom we met upon entering the train, was supplying pulpits in small villages along the route. During conversation which followed, eternal punishment was discussed. I was all attention, and asked many questions. One said he was convinced there was probation beyond the grave, an opportunity to accept God. I was glad to hear this from a Baptist, as what I had been told by others of that denomination, had been as unrelenting as my own denominational belief at that time. I knew by the force of his remark, that his had been a severe experience that led to this conviction. I then had a ray of hope for those I loved who did not confess God.

But when the test came, about one year before I came to Christian Science for healing, a dear one passing away without trust in God, my ray of hope became a doubt. I was plunged into deepest despair, and yet I could not lose faith in God. I prayed often and earnestly, but no light came. It seems hardly necessary to add that this condition of mind, together with family trouble, which for more than ten years had caused me much worry, was not conducive to a state of health.

In the fall of 1896, I turned with fear and trembling to a practitioner in Christian Science and asked her if she thought I could be helped a little. The gloom lifted as she talked with me. I knew light would come.

Some months later I heard the Communion Hymn by Rev. Mary Baker G. Eddy sung. The second verse was a revelation. I grasped at the hope it gave me and fed on it for months.

Our loving Father-Mother God does care for *all*. It is not the will of God that any should be lost.

It is a great sense of rest, when one *knows* that each individual is working out his or her problem with God, either on this plane of thought, or on another.

I have learned that hell is not a place, but a wrong condition of thought which must be forever lost, as the light of Truth, in Christian Science, dawns upon our understanding, and reveals the real man, God's child made in His own image and likeness.

I am indeed grateful to her through whose realization this blessing is made possible. I thank God for a Scientific Christianity as revealed to us through our text-book, Science and Health, by Mary Baker G. Eddy.

Mary E. Burrows, Boston, Mass.

For four years, my mother suffered from frequent attacks of appendicitis and was confined to her bed most of the time. At the time of the last attack our family physician told her that he had done all that was in his power, and as a last resort he would perform an operation. He added, "I cannot promise that you will be a well woman." My mother would not give her consent to this, and told the physician she would trust in God to heal her.

About two weeks passed, when a dear friend told us of Christian Science. She said her daughter had been healed of a disease pronounced by the physicians incurable, and she asked my mother to try it. My mother began treatment at once. After the first treatment she ate anything that the rest of the family ate, and never suffered any bad effects, whereas under the doctor's care, she was allowed to eat only light food, such as oat-meal crackers, etc. She continued treatment about two months, when she was entirely healed, not alone from appendicitis, but also from rheumatism and asthma. All the medicine bottles which were stored away in the closet, were thrown in the ash-box.

We are very thankful to the dear Scientist, who has worked so patiently with us. Mother has brought up a family of thirteen children, all of whom are interested in Christian Science, with the exception of one, and we all know that some day he also will know the Truth and the Truth will make him free.

After mother was healed, she sent an order for six copies of Science and Health for her children. They all began the study and they know that God is a very present help in trouble, and have had excellent demonstrations.

My mother could neither read nor speak the English language before coming into Science, but through her earnest desire to know the Truth, she can to-day read all the Science literature, and also speaks the English language. In September, 1901, mother and I had the privilege of class instruction, from a loyal teacher of Christian Science, which has done us hundreds of dollars worth of good.

We certainly have many things to be grateful for, and we hope to show our love and appreciation of Mrs. Eddy, by being loyal and obedient.

Miss Amanda M. Kunz, Milwaukee, Wis.

In infancy and childhood I was very delicate. The doctors always said that I would not grow to womanhood. When, notwithstanding this prediction, I was fully grown, my health was in no way improved. As fast as I thought I was healed of one trouble, another would appear. I was finally sent to Colorado for tubercular consumption. After some years the doctors declared that the climate had healed my lungs. But, as according to their belief, disease has power to move about, the disease had simply gone from the lungs to the digestive organs, and, "the last state of that man was worse than the first."

Finally, after the thought of suicide had several times presented itself, I turned to Christian Science, and, although my healing was slow, I soon found life worth living, and for ten years I have been an unusually healthy woman.

People frequently say to me, "It is easy to see nothing was ever the matter with you." I cannot understand how any one lives without this blessed Truth, which is health, wealth, and happiness combined.—M. L. H., Denver, Col.

I feel as though I must not wait any longer to send in my testimony of gratefulness for the great good I receive from this blessed Truth. Every day I have proof of the power of Love to cast out error. There are no other Scientists near, and I do not have the privilege of attending church services, but with Science and Health, the Bible, and all the periodicals, I am trying to press toward the mark for the prize of the high calling of God in Christ Jesus.

E. C., Grouse, Ida.

Religious Items.

Rev. James A. Blaisdel says in *The Congregationalist and Christian World*:—

"The Church has been preaching truly the genuine message, but, as the years have gone by, it has become clear that the original simplicity has been involved in a cloak of confusing conceptions. It is simply fact to say that before the conflicting methods and results of disputing doctors the lay mind has come to stand in hopeless bewilderment, a bewilderment only increased by the lapse of years. It is not simply that there have been vast differences in the teaching of honest and able scholars as to historic facts, nor that these varying views have failed to find conclusive settlement in the type of life produced in those holding them, nor that it is around these varying doctrines that the most un-Christly and repulsive *rabies theologorum* has gathered, nor is it the spectacle of a multitude of denominations equally positive in their divergences, nor that the modern scholarship is disturbing ancient landmarks; but finally, it is the very fact that a kind of historical seminar, in which distinct advantage is with the expert scholar, has been made the strange highway into the kingdom of righteousness.

"In the midst of this bewilderment a new cry has arisen as the real essence and simplicity of Christianity. 'What would Jesus do in my place?' A great revival has swept the world both within and without the Church.

"It is true, indeed, that this is not a new message. It has been the saving remnant in Christian preaching always and everywhere, and some saintly souls in every age have given it its true emphasis. For centuries it has fought to have its true primacy over the prevalent dogma and the abstruse intellect. To-day it is coming unto its own, and the world can never again be what it was."

Joseph Parker, D.D., of the City Temple, London, says in *The Homiletic Review*:—

"I hold that no man is abreast with the times except the man who lives in close communion with God and in continual association with the spirit of Jesus Christ. To my mind the Bible is the newest of all books. We have done infinite mischief in closeting a good many things within the four corners of dictionaries and antiquities. For example, we suppose that the Scribes and Pharisees lived some hundreds of years ago, whereas they are among us to-day, still the enemies of Christianity, and still tempting the heart to hostility toward all the deepest meanings of the cross. My constant conviction is that Jesus Christ is just as much among us at this moment as he was in the days of his flesh. To Christ I go for the deepest and truest interpretations of human spirituality, motive, and immediate relationship to God. We have put even God Himself far away from our daily thinking. We have set Him high in the heavens, and have given Him all the throne He can occupy, provided it is far enough away from this disciplinary state of schooling. We must alter all this if we would put ourselves as preachers in the right relations to the burning questions of our times. The Bible must not be regarded as an old book, but a new book. Bethlehem is not a term in Eastern geography: it ought to express the place which Christ occupies in our hearts as child, and boy, and man, and Saviour."

There are Christians who shrink back from a deep and full spiritual life as though there was something in it to be feared. They desire to be religious, but not very spiritual. They would have a little grace, but prefer not to "be filled with the Spirit." They think the fulness of the blessing of the Gospel would render them unearthly, unnatural, abnormal, impractical. They fear that they would lose touch with the world if they should be filled with all the fulness of God. Moreover, they might make blunders and fail to act in all cases consistently. Hence they do not seek to be filled with grace. But this hesitancy is folly. Grace is good, and the more one has the better.

One who is filled with all the fulness of God is filled to overflowing with love. God is love. When He enters in, love enters. Love is good. The more of it the better. It creates a warm, sweet feeling in the heart, and produces good fruit without. Love is not mere ecstasy. Love is not merely feeling, it is life. The love of God is the highest and best life. One who is filled to overflowing with it will love God. His love will manifest itself in service—cheerful, willing, self-sacrificing service. He will love the brethren. He will love his neighbor, whether he be a lovely character or not. He will love his enemies. He will love those who have wronged him. This is the love that forgives injuries and refuses to take vengeance.

The Christian Advocate.

Rev. W. Arter Wright says in *The Christian Advocate:* "Average Christian experience is dull to spiritual impression. Many Christians have a blank expression when the question of divine assurance is mentioned. We have now, as always, sufficient prominence given to our ritualistic beauties, our ethical teachings, our reasoned doctrines, our explanation of Biblical manners, customs, and history. These are very well; but, pray, of what good are they if they stand alone? What our age needs is a sense of the living God, now present in the world and with men by the operation of the Holy Spirit. We are not in distressing need of any doctrine about God, as a mere intellectual conception. We need not theory, but life; not material or intellectual formula, but power. A large proportion of "acceptable" members in our churches cannot respond to any of the tests of the spiritual life—either in their emotions, or their deeds, or their testimony. They are respectful hearers of the Gospel, but when we talk of an experience we speak to them in an unknown tongue."

Faith, we must remember, is of character, and character is by works. We cannot recognize New Testament faith in the visionary spirit and theory of one who only dreams his spiritual dreams, and finds not God in the great realm of morals, and knows not of his love by his own active sympathies. The altar stairs that slope up to God are not ethereal visions, but they are the more solid masonry of holy deeds. The theory of religion is carried over into the temper and drift of the soul, and faith appears on the fair arena as an angel of loveliness and power. By serving, it lives and greatens. By obeying the divine laws it finds the Law-Maker, and at the summit of earth's greatness it sees a Heavenly Land, with fairer skies and nobler joys. Hence we may reasonably look for the best forms of faith among the active doers of the divine will.

The Universalist Leader.

Many Christians get so involved in the discussion of theological problems or doctrinal questions or in meditation on deep spiritual subjects that they never get down to solid earth in a practical exhibition of the real goodness of religion. They go about with their heads in the skies and their feet barely touching the earth. But that was not Paul's way. The more profound his spiritual meditations the more certain he was to come down squarely on his feet in a practical and personal application of his religion. In the first epistle to the Corinthians he passes directly from a meditation on death to "the collection for the saints."

If your deepest spiritual thoughts do not lead you to some practical application to yourself or for others, you may be sure there is something defective about it.

The Watchman.

J. H. W. Stuckenberg, D.D., LL.D., says in *The Homiletic Review:* —

"Are we not in danger of losing the life of the Gospel by excessive analysis or dissection? We cannot dissect the living body and retain its life; does not the same principle apply to the great system of Christian teaching? Fragmentary truth makes Christians and churches partial, fragmentary.

"The marvelous effect we behold in Christianity has its undoubted source in the Gospel of Jesus Christ. This means the Gospel as a whole, not any particular part severed from the rest and treated as if it stood alone. It is this dissecting process, abstracting a part here or there and treating it as if it were to be judged by itself, which creates most difficulty."

The New Testament cannot be mastered by despising it and ignoring it. The grace of God does not put a premium on indolence. To do the will of God you must know it, and to know it you must search for it as you search for gold. The lazy steward that hid his lord's money in a napkin had much to say for himself compared with some who foolishly think that their sincerity will save them. No wonder that many professed Christians are weak and asleep, when they are willingly ignorant of the very beginnings of the doctrine of Christ.—*The Examiner.*

There is much talk about ideals, but what the world wants is something practical and real. One cannot have too high a conception of duty and of accomplishment, provided he is striving constantly to attain the mark which he sets before him; but to be always talking about something that is unattainable, or to which no steady and fixed effort is directed, amounts to nothing in the eyes of a utilitarian age, and brings no suitable compensation to the individual or to the community.—*Presbyterian.*

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each, twelve copies to one address, sixty cents, twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States, Canada, or Mexico.

No subscription received for less than twelve months.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

THE MOTHER'S EVENING PRAYER. A Poem by MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. For soprano or tenor, C sharp to A; for lower voices, B flat to F. Price, $1.00 per copy, $9.00 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1.50; six copies to one address, $7; twelve copies to one address, $12.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9; per half dozen, $5. Half Morocco, per copy, prepaid, $1.40 each; per dozen, $12; per half dozen, $6.50. Full Morocco, $2.50 each. Levant, $3.50 each.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

Pamphlets.

LEGAL ASPECTS OF CHRISTIAN SCIENCE. 72 pp.
SCRIPTURAL REFERENCES SUSTAINING THE DOCTRINES OF CHRISTIAN SCIENCE. 63 pp.
MR. KIMBALL'S LECTURE. 33 pp.
HEARINGS ON PROPOSED MEDICAL BILLS. 23 pp.
ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By Edward A. Kimball. 24 pp.
THE BUSWELL TRIAL. 24 pp.
THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.
HEALING THROUGH CHRISTIAN SCIENCE. By Septimus J. Hanna.

One copy or more, each, 6 cents; 12 copies to one address, 60 cts. Twenty-five copies to one address $1.15; 50 copies to one address, $2.25.

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The National Farmers' Congress will be held at Macon, Ga., beginning October 7. Most of the topics to be discussed are of a national and international character. Following are the thirteen subjects on the programme:—

1. Inter-oceanic canal.
2. National irrigation.
3. Reciprocity: How it may affect agricultural interests.
4. Effect of present insular possessions on the agriculture of the United States.
5. Preservation of forest and fruit trees and reforestation.
6. Injurious insect pests and fungi.
7. What part of a man's farm does he sell when he sells the crop?
8. The postal reforms particularly affecting the farmer.
9. Mutual relations of Northern and Southern farmers.
10. Dairy interests of the United States as related to the markets of the world.
11. Farm products in the markets of the world.
12. The labor problem from the farmer's standpoint.
13. How we can best build up our merchant marine.

Argument has been begun before the Spanish Treaty Claims Commission in sixteen typical cases of claims for damages against the United States, on account of injury done to the property of American citizens by Cuban insurgents. These claims aggregate $25,000,000 and under agreement were selected as the basis of argument on all the claims arising from damages alleged to have been done by Cuban revolutionary forces. The claims were against the United States in accordance with a provision of the Spanish-American treaty of peace, that claims of American citizens against Spain shall be paid by this Government.

Secretary Root has sent to the House Committee on Military Affairs the draft of a bill appropriating $100,000 for medals for officers, soldiers, and others who served in the Spanish war, the Chinese relief expedition, the Philippine insurrection, and other campaigns that may be undertaken in the future. This will put the soldiers on an equality with the sailors, who are to be provided medals under existing law.

The Government receipts for the month of May were $49,509,449.43, and expenditures $38,746,797.85, leaving a surplus of $10,762,651.58. The receipts for the eleven months of the present fiscal year were $513,727,719.22, and the total expenditures for the same period $437,371,797.62, leaving a surplus of $76,355,921.60.

Secretary Hay and the Danish minister have signed a protocol extending for twelve months the time allowed for exchange of ratifications of the Danish West Indian treaty.

On June 2, Congress extended a vote of thanks to Hon. John Hay for his address on the occasion of the McKinley memorial services last February.

The Senate passed the Philippine government bill June 3, by a vote of 48 to 30.

Foreign.

On the afternoon of June 2, the full terms of agreement between the British and the Boers which ended the war in South Africa were read in the House of Commons by A. J. Balfour. The terms of peace are as follows:

The burgher forces lay down their arms and hand over all the rifles, guns, and munitions of war in their possession or under their control.

All prisoners are to be brought back as soon as possible to South Africa, without loss of liberty or property. No action to be taken against prisoners, except where they were guilty of breaches of the rules of war.

Dutch is to be taught in the schools, if desired by the parents, and used in the courts, if necessary.

Rifles are allowed for protection.

Military occupation is to be withdrawn as soon as possible, and self-government substituted.

There is to be no tax on the Transvaal to pay the cost of the war.

The sum of $15,000,000 is to be provided for restocking the Boer farms.

Rebels are liable to trial, according to the law of the colony to which they belong. The rank and file will be disfranchised for life. The death penalty will not be inflicted.

One hundred and seventy-two Cuban estates with a total acreage of 1,482,801 are held by American individuals and corporations, of which 330,846 acres are cane producing and the annual capacity is estimated at 830,445 tons. American owners have war claims against the United States amounting in the aggregate to $41,385,803.

The Hon. Michael H. Herbert will succeed Lord Pauncefote as British ambassador to the United States. Mr. Herbert is now secretary of the embassy at Paris, and is regarded as one of the most accomplished diplomats in King Edward's service. He was the legation secretary at Washington in 1892 and 1893.

It is reported that President Kruger has declined the facilities offered by Great Britain for his return to South Africa, but has accepted Queen Wilhelmina's proffer of a Dutch vessel to convey him to South Africa when he decides to return.

In accordance with orders given by King Edward, special thanksgiving services for the restoration of peace in South Africa were held at all the military centers, Sunday, June 8.

It has been announced in London that Oxford University will confer the honorary degree of doctor of civil law on Joseph H. Choate, the United States ambassador to Great Britain.

The total number of Boer prisoners in South Africa and elsewhere is 25,565. Seven hundred and eighty-three of these are under sixteen and 1,025 are over sixty years of age.

Lord Kitchener has been created a viscount by King Edward. He has also been promoted to be a general. The King has requested Parliament to grant him $250,000.

On the feast of the Trinity, June 15, the Russian Government will promulgate the ukase remitting arrears of taxes due from the peasants to the amount of $12,500,000.

The grant of $15,000,000 which is provided for restocking the Boer farms is equal to about $500 to each farmer in the two colonies.

Lord Kitchener reports that the disarmament of the Boers is proceeding satisfactorily, and good spirit is displayed everywhere.

Industrial and Commercial.

A charter has been granted to the Star Oil Company of Texas which has a capital stock of $10,000,000. All the holdings and interests of ten oil companies in Texas have been merged in this company. This amalgamated company has a pipe line eighteen miles long, running from its several oil wells to Port Arthur. It is one of the most powerful corporations operating in the Texas oil fields.

All the job printers in Chicago will have their wages raised simultaneously. Typographical Union No. 16, to which the men belong, has always been averse to a strike and have succeeded in getting the raise in wages without one. Over eighteen hundred men will be benefited by the raise.

If satisfactory transportation rates can be obtained by rail between Memphis, Tenn., and Beaumont, Tex., the Memphis Street Railway, Light and Power Companies, and the Equitable Gas Light Company will substitute oil for coal in the generation of power.

The Insular Railway Company has been incorporated in New Jersey. The company will have a capital of $2,500,000, and was organized for the purpose of building and operating railroads in Cuba.

A new direct steamship service is to be inaugurated between New York and northern Spanish ports, to be known as the Larrinaga Steamship Line.

General.

The University of New York has conferred the degree of Master of Letters upon Miss Helen Miller Gould. Dr. George Alexander said as he presented Miss Gould with the degree that it was conferred because of her personal service in the cause of education. For three years Miss Gould was a member of the Advisory board of the University.

The twenty-seven Boer refuges in Denver have sent an appeal to the British ambassador at Washington asking that arrangements be made for their return to South Africa, and promising to be law-abiding citizens. They speak for the ninety Boers who are in Colorado.

Mrs. Sarah B. Hunt of Baltimore, Md., has sailed for London to attend the crowning of King Edward. When a girl of eighteen, Mrs. Hunt attended the coronation of Queen Victoria as the guest in London of George Peabody, the great philanthropist.

Justice Chester of Albany, N. Y., has granted an injunction restraining certain beef packing companies of the west from carrying on business in the State in violation of the provisions of the Donnelly anti-trust law.

June 4, the Missouri State University conferred the degree of Doctor of Laws on Samuel L. Clemens (Mark Twain). A similar degree was conferred upon Secretary James Wilson of the Department of Agriculture.

The South Carolina Interstate and West-Indian Exposition, which has been in progress at Charleston since December 1 last, closed June 1. The exposition was not a financial success.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

Facts about Mrs. Eddy.

To the Editor.

Among other things, as reported in your paper, Dr. John Madden declares that Christian Science originated in a highly emotional, uneducated woman. Those who know of the wonderful career of the Rev. Mary Baker G. Eddy, and who know her unparalleled mental equilibrium, are led to ask, From whence has this gentleman derived his information? Mrs. Eddy in her childhood wrote verses which would have done credit to a woman of mature years. Very early in life there was a demand for her literary productions. When about eighteen years of age she wrote for the *Belknap Gazette,* published in New Hampshire, and later for the *New Hampshire Patriot.* After an academic course she graduated under Prof. Dyer H. Sanborn, the celebrated author of the "Sanborn's Grammar." Later she wrote for leading magazines of the south, and upon her return to the north, after the death of her beloved husband, Colonel Glover, she was offered an annual salary of three thousand dollars by the Rev. Albert Case, editor of the *Odd Fellows' Magazine,* published by the United States lodge. Other leading magazines, both north and south, have allowed her to name her salary and never objected to paying it. If all the poems which she wrote in early years, and which have appeared in public print, were collected, they would fill a good-sized volume. Mrs. Eddy has lectured in large crowded halls at Portland and Waterville, Me; Boston and Lynn, Mass.; Concord, N. H.; Providence, R. I.; New York City; Washington, D. C., and Chicago. In 1846 the Rev. Richard Rust, D.D., at that time principal of the Methodist Conference Seminary in Northfield, N. H., called upon Mrs. Eddy to supply the place of his principal female teacher during her absence for a few weeks. Among other pleasing memories of that occasion Mrs. Eddy recalls entering a class-room one day and finding upon the black-board a kind compliment to Mrs. Glover written by the Professor.

Such a record could scarcely have been made by an uneducated woman. When we consider how extensively Mrs. Eddy has written during the past thirty-five years, and note that she has been ever highly progressive, we must concede that she has acquired in those years literary ability and celebrity. No one can deny that the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, is a wonderful literary production. In this work she has handled a most difficult subject in a marvelous manner. The rumors afloat charging the Leader of the Christian Science movement with being incompetent have been started by the enemies of Christian Science, and for the purpose of belittling the Science itself. No one who is in the slightest degree acquainted with the wonderful wisdom and stability which characterizes the Discoverer of Christian Science, would dare make the assertion that she could be swayed by aught except the Truth. No one but an individual richly endowed with the grace of God could have pioneered the great Christian Science movement, and have carried it to its present successful heights.

Whatever may be said as to the coherency of Science and Health, perhaps a million people have been healed and reformed through the faith which it inculcates. If this work is incoherent, then the Bible is incoherent.

I desire to state in unmistakable terms that the Christian Scientists are quite as ready to defend their teaching from a Scriptural standpoint as are the adherents of other religions.

This man's charge that "deluded thousands go to their graves" depending upon Christian Science, cannot be borne out by facts. Even though some of the Christian Scientists may die, they are not guilty of a worse crime than people of other denominations, for it is quite common in this world for people to die, and since the majority of the Christian Scientists are recruits from the graveyards, there is very little of which to complain if some of them die.

It cannot be denied that a very large per cent of those who have passed away under Christian Science have already been pronounced incurable by the practitioners of the popular schools of medicine. Neither can it be denied that hundreds of thousands are alive and well to-day who have formerly belonged to the long line of pronounced incurables.

Furthermore, the Christianity of Jesus Christ promises relief to the sick, and if Dr. Madden cannot present to the world a Christianity which heals more effectually than Christian Science, it might be well for him to restrain his tongue and his pen. Does he purpose to take away the little faith that is still extant in the world? Does he purpose to take God out of human affairs and to plead that there is no efficacy in prayer?

Our critic asks the question, "Is there anything more pathetic than to witness the victim of tuberculosis, of Bright's disease, of valvular heart disease, clinging while the last spark of life glows but feebly, to the delusion set forth in that marvelous mass of incoherent rubbish?" This Science which our friend has been pleased to name incoherent rubbish is the understanding that the omnipotent and omnipresent God can, does, heal disease. Shame on the man who belittles the Scriptural promise that "God is an ever-present help in trouble," and who would declare null and void the declaration of the Psalmist, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling."

I would especially call our critic's attention to the fact that there are people in the world to-day who were once afflicted with "tuberculosis, Bright's disease, valvular heart trouble," so pronounced by reputable physicians, and who are now well by reason of the power of God as taught in our text-book by Mrs. Eddy, and applied in demonstrating Christian Science.

ALFRED FARLOW.

In the *Free Press,* Milwaukee, Wis.

Origin and Growth of Christian Science.

EARLY in the last quarter of the nineteenth century, press, pulpit, and layman became conscious of a new factor in religious thought and life, but few expected that before the close of the century they would see a large and flourish-

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

ing denomination of earnest Christian people grow from what seemed such an intangible beginning; but the growth of Christian Science has been as rapid as its history has been simple, and its achievement as great as its purpose is noble.

In the year 1866 a woman born and reared in the religious atmosphere of New England, when seemingly helpless and almost hopeless, turned in her extremity to God and was healed, as thousands throughout all ages have been healed and saved when they have trusted God. This fervent, religious woman, knowing that God is no respecter of persons, entered upon the task of searching out His immutable law, by which she was healed and by which she knew that all mankind might be healed. The fruit of her consecrated labor was given to the world in 1875 in her book, "Science and Health with Key to the Scriptures." This book is the text-book of Christian Science, and its author, Mary Baker G. Eddy, is the recognized leader of the most remarkable religious movement of modern times—a religion founded upon the sacred revelation of Scripture, and which insistently and persistently declares that Jesus the Christ revealed the Father to all men for all time. Under the wise leadership of this wonderful woman, who but thirty-five years ago stood alone as the one Christian Scientist in all the world, the denomination has prospered and has grown to such proportions as to compel the attention of the civilized world and command the respect of unprejudiced thinkers.

Mrs. Eddy, whose history cannot be separated from the history of Christian Science, was born in Bow, N. H., a little hamlet situated in the beautiful valley of the Merrimac, and but a few miles from her present home on the outskirts of Concord. She is of English and Scotch ancestry, and was the youngest child of Mark and Abigail Baker. As a child she was thoughtful and studious, and of a deeply religious nature. Of her early studies she says in "Retrospection and Introspection:" "At ten years of age I was as familiar with Lindley Murray's grammar as with the Westminster Catechism; and the latter I had to repeat every Sunday. My favorite studies were Natural Philosophy, Logic, and Moral Science. From my brother Albert I received lessons in the ancient tongues, Hebrew, Greek, and Latin." At the age of twelve years she was admitted to membership in the Congregational Church, and continued in fellowship with that denomination until she established her own church.

Her book, Science and Health, was written while she was a resident of Lynn, Mass., and her earliest proofs of the adaptability of her system of healing to the needs of mankind were shown in that city. Later she removed to Boston and remained there until 1889, when she returned to her native state and took up her residence almost within sight of her birthplace. Her home, just out of Concord, is appropriately named Pleasant View, and is one of the most beautiful spots in New England. It has on several occasions been thrown open to her followers, most notably in June, 1901, when she personally welcomed about three thousand visitors. The house is large, but not larger or more pretentious than thousands of modest New England homes which bespeak moderate means and comfort rather than wealth.

Mrs. Eddy's daily life is extremely simple, although one of great industry. As the active leader of a movement which has engaged the attention of probably a million people, it may well be conceded that she is one of the busiest women in the world. The statement so frequently made that her followers worship her is a misrepresentation of the attitude of Christian Scientists toward her. Christian Scientists are constantly reminded, through daily benefits received from Christian Science, that they are deeply indebted to her for the consecration of her life to their service, and for her wise counsel and self-sacrificing example, and they would be less than human if they failed in gratitude to her, but to worship her would be abhorrent to them and to her, and contrary to the teachings of Christian Science.

The denomination founded by this New England woman presents the marvel of the age. It has in its short history enlisted the enthusiastic adherence of men and women of high mental, moral, and spiritual attainment—editors, ministers, doctors, lawyers, college professors, teachers, bankers, merchants, clerks, laborers, farmers—in fact, people of every walk in life and every condition of thought. It has healed the sick, reclaimed the sinner, brought peace to the troubled, happiness to the miserable, and hope to the despairing; but, like every reform, it has been denounced from the pulpit and platform, ridiculed and misrepresented by its enemies, and forsaken by a few who found its moral and spiritual requirements beyond their capacity. But notwithstanding all this, the movement is to-day firmly established as a force successfully working for good morals, good citizenship, and a greater spirituality. Its mission in human affairs is to stem the tide of materialism, to lessen, and in time overthrow, selfishness, brutality, and greed, and to usher in the realization of the brotherhood of man.

In 1867 Mrs. Eddy established the first school for teaching Christian Science. In 1876, with six students, she organized the first Christian Scientist Association. In 1879 she organized the first church of the denomination. In 1881 she opened the Massachusetts Metaphysical College, chartered by the State of Massachusetts. In 1883 she established *The Christian Science Journal*, the first denominational periodical, and became its editor.

The Church organized in 1879, with twenty-six members, has become the Mother Church of the denomination, and has a present membership of 22,127.

The Massachusetts Metaphysical College has graduated about four thousand students, who in turn have become teachers of many thousands more. Its last class, graduated in June, 1901, included students from twenty-five states and territories and five foreign countries.

The Christian Science Journal has been supplemented by the *Christian Science Sentinel*, a weekly paper, and the *Christian Science Quarterly*, which contains the Sunday lesson sermons used in all the churches of the denomination.

The number of organized churches and societies holding regular Sunday services and Wednesday evening meetings increased from one in 1879 to 415 in June, 1900, and to 661 in October, 1901. The increase in the number of churches and societies in the seventeen months preceding October, 1901, was about fifty-four per cent. Greater New York has eight Christian Science churches, Chicago five, Philadelphia, four, and Buffalo four. Quite recently the doctrines of Christian Science have secured a firm foothold in England, Scotland, and Germany, and the present indications are that the growth of the denomination in those conservative countries will be as rapid as in the United States and Canada. The directory of practitioners, published in a recent issue of *The Christian Science Journal*, includes the names of persons in Mexico, Australia, the Bahamas, China, France, Hawaii, Italy, the Philippine Islands, and Switzerland.

The last few years have been an era of church building during which many beautiful and costly buildings have been erected, notably the Mother Church in Boston, costing about $240,000; Second Church of Christ, Scientist, of New York, costing almost half a million; First, Second, and Third Churches of Christ, Scientist, in Chicago, costing in the aggregate nearly four hundred thousand dollars, besides many in the smaller cities, and many more in course of construction, including the First Church of Christ, Scientist, of New York, which will cost about seven hundred thousand dollars, and First Church of Christ, Scientist, of Denver, with a seating capacity of twenty-three hundred. An unwritten law of the denomination is that a church shall not be dedicated until paid for, and the relentless and harassing burden of the church mortgage is unknown.

Not the least interesting of the church buildings erected by Christian Scientists is the church edifice at Schofield,

Digitized by Google

Wis., built and owned by a society composed of children, the oldest not over sixteen years of age.

The growth of the denomination has not been due to any effort on the part of Christian Scientists to proselyte from or misrepresent other denominations, but is due to the fact that the practical application of the teachings of Christian Science has proved beyond contention to thinking people who have investigated the subject that salvation is possible and within the reach of all who faithfully and earnestly strive for it. It is not the purpose of Christian Scientists to interfere with those who are satisfied with their religious beliefs, nor do they seek to force their views upon those who do not agree with them.

It may reasonably be asked why this denomination has grown so rapidly, and an equally reasonable answer would be that in all ages humanity has been crying out for some certain demonstrable system by which it might be relieved from pain and suffering, and find health and peace and happiness, and, above all, that it might know God, whom to know aright is life eternal. Those who have turned to God through Christian Science gratefully testify that they have found health, peace, and happiness and a demonstrable knowledge of God and His Son, Jesus Christ, applicable to all their needs, and never failing when honestly applied.

The "American Encyclopedic Dictionary" says, "The foundational truths of Christian Science are the reality and allness of God, the unreality and nothingness of matter, the spirituality of man and the universe, the omnipotence of good, the impotence of evil. The demonstrative actuality of Christian Science essentially distinguishes it from all other religions of the age."

The "National Cyclopedia of American Biography" says of Christian Science: "Many peopie of the thinking class are turning to this science and adopting it, because in it they find a solid foundation, a sure abiding peace, the verification of the promises of Jesus, and a demonstrable Christ-[illegible]ity."

ARCHIBALD McLELLAN.

In *The Chicago Record-Herald.*

May 6, 1902.

Being the Impressions of an Unbeliever at the Hon. William G. Ewing's Lecture on Christian Science.

THE date is graven on the tablets of my memory by reason of certain happenings, among others, of painless surgery under the superadded terrors of anæsthetics. It had reached me that Christian Scientists taught that pain was illusion, a thing that to the Believer was not. The notion at all times struck me as humorous. It occurred to me as I passed the Queen's Hall that at that hour Judge Ewing, the foremost exponent of that diverting creed, was about to deliver his lecture inviting the consideration of Unbelievers of the views he held. In my then mood the thought came to me with the saving grace of comic relief. I suffered myself to be swept away by the current that set towards the main doors. Those gifted beings who can read between the lines may be tempted to deduce that I joined the stream with intent to scoff. Frankly, I did.

A great meeting, undoubtedly, if only by sheer force of numbers. There was hardly a vacant seat on the floor of the vast hall. Its walls were outlined by a dim row of faces, tier behind tier, all turned towards the empty platform. Faces, faces, on every hand. It made you feel rather dazed, more especially if you were simultaneously enjoying the after-effects of an anæsthetic. A great meeting surely, yet not, on better acquaintance of the constituents, a meeting one has learnt to associate with a gathering of cranks and faddists. The glow of beauty, the glitter of wealth, the stir of youth, the energy of ripe manhood, the furrowed brow of old age and deep thought made up this vast assemblage. A critical and educated congregation if ever there was one, awaiting the wisdom of a great preacher. The air of intentness that reigned impressed me. There was none of that uneasiness, that air of unrest that usually betrays a great concourse. There was none of that ripple of hacking coughs and uneasy giggling that commonly stirs its restless surface, more especially when that for which it waits keeps it waiting. The hush, the expectancy, the stillness of that upturned sea of faces was impressive. It was as if the vast audience was held under the spell of a great peace.

Whether it was so or not, I do not know. I only aspire to hold the impression of the moment.

Then two men, every-day men, in the garb of the market-place, stepped quickly across the platform and took their prepared seats. An anti-climax of the most grotesque. What went ye out for to see, ye thousand straining, upturned faces? Surely, men of such guise throng the streets? One of the two rises to speak. His words to introduce the speaker are commonplace, conventional, banal. The speaker rises. He begins his lecture, haltingly, feebly, without power. What went ye out for to see, ye foolish thousands? A reed shaken by the wind? A slight man, of nervous jerk and gesture, with none of the expected graces of oratory. It is only by reason of this magnetic hush that he obtains a hearing. The spell must, perforce it must, soon be broken.

What is this? A new sound breaks the stillness. A ripple of laughter here, a splash of human gaiety there. It is utterly unexpected, almost incongruous. The ever monotonous voice flows on. Words, words, words! But words that touch you nearly. Words you have only breathed in the silence of your chamber this man utters from the naked platform, unafraid. Is there harmony in jarring creeds? Is peace the last outcome of strife? How does this man know these secret things? And the voice gathering volume and weight with every pregnant word rings in your ears as of one who has a message to deliver, and that right urgently. "Power fell upon him and bright tongues of flame." An orator by the grace of God at last.

A ray of sudden sunlight pierces the upper windows of the dim hall. Its shaft, by some strange chance, strikes full the speaker's face. You see a face, illumined in soft radiance, the face of a man who has suffered much and after great tribulation has found peace. A face of infinite tenderness and of infinite knowledge. Gone are the wooden gestures, gone is the halting speech. This man is a speaker, silver-tongued, because he has a message to deliver, and himself believes that his message is true. Pain and darkness is of evil; hope and gladness is of good. Glad tidings of great joy, though the one thing needed be Faith. In a peroration of ringing, resonant beauty the voice dies away. As with upturned face and outspread arms he stands in the halo of flooding sunlight you realize the real beauty of the unwonted spectacle. It is the beauty of holiness that passes all understanding.

I believe now that the speaker believed he had a message to deliver and that his message was true. It may be true; it may be false. But he believed in it with his whole heart and soul—or he is the most marvelous and magnetic actor that has ever faced the public gaze.

This is an admittedly impressionist sketch, and therefore utterly without value. It is only the daub of one who aspires "to paint the Thing as he sees it to the God of Things as they are," of one who went to jeer, but who found that the jeer died upon his lips.—*The Onlooker*, London, Eng.

Let us then be ever kind,
Knowing not what grief or care
May be wearing other hearts,
That we might some sorrow spare,
Let no thought or deed of ours
E'er an extra burden add;
Let us try our very best
To be making others glad.

MARTHA SHEPARD LIPPINCOTT.

The Lectures.

At Edinburgh, Scotland.

THE following account of the lecture at Edinburgh, was received too late for publication in our last issue.

A lecture was delivered in Edinburgh by the Hon. William G. Ewing, on Saturday, May 10. A very good summary of the lecture was published on May 12 in the *Scotsman,* our principal daily paper.

As this was the first lecture on Christian Science ever delivered in Scotland, the occasion was one of the deepest interest, not only to the members of First Church of Christ, Scientist, but also to all others throughout the country who are beginning to know something of Christian Science. There is a pretty widespread belief that it is not easy for any new movement to make headway in Scotland, and especially is this belief held with regard to the capital city; but the event proved how many there are, here as elsewhere, who wish to understand what Christian Science is.

The Music Hall was engaged for the lecture, and those who were not Scientists seemed much surprised to see the crowds of people who began to assemble fully half an hour before the lecture was timed to begin. It is estimated that about one thousand people were present, and they listened with the closest attention to the lecture, which lasted for about an hour and a quarter.

People came from many parts of Scotland to hear Judge Ewing, from as far north as Ross-shire, and as far south as Berwick-on-Tweed; while Newcastle, Durham, and other places in the north of England also sent contingents. The Edinburgh Scientists were also very grateful for the support given them by their fellow-workers who were present from London, Hull, and Manchester. They are glad to have this opportunity of expressing their deep thankfulness to God, for all His continual blessings; to Mrs. Eddy, through whom a fuller, closer, knowledge of God has been brought to them; to the lecturer, God's messenger of love to their country; and to all those whose loving co-operation ministered to the harmony and success of the occasion. Many of the visitors remained over Sunday, and the little church at 18 Duke Street was taxed to the uttermost to hold the numbers who flocked to the services.

Correspondence.

At Chillicothe, Ill.

Tuesday evening [May 20] Mr. Edward A. Kimball of Chicago delivered a lecture in Kelly's Hall on the beneficial effects of Christian Science. A fair-sized, intelligent audience greeted Mr. Kimball here for the third time. He was introduced by Mr. M. W. Kahn, First Reader of the local church, in the following very fitting words:—

Friends:—Why should I, who was born and raised a Jew and taught to discredit and reject the teachings of the New Testament, stand before this audience for the purpose of introducing a gentleman who advocates the religion of Jesus Christ? And why am I now in full accord with these teachings?

Why should I, who in late years was well known to be an outspoken agnostic, be in anywise instrumental in encouraging a religious movement that only a few years ago I strongly antagonized?

It is because I have felt the touch of its healing power; it is because this new dispensation named Christian Science, has been proven to me to be a real, palpable religion; practicable in its work, efficacious in its demonstrations, scientific in its results. It is because I have indubitable evidence that the earnest study of its literature and the application of its principles heal the sick and reform the sinner.

The gentleman whom we have with us this evening is no stranger to a Chillicothe audience, this being his third lecture here. He comes to us duly accredited by the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass.

His subject is, "The Beneficial Effects of Christian Science."

I now have the pleasure of introducing to you Mr. Edward A. Kimball of Chicago.

The Chillicothe Enquirer.

At Washington, D. C.

The lecture on Christian Science, delivered by Mr. Carol Norton of New York, yesterday afternoon [May 25] at the Columbia Theatre drew a large and representative audience. A number of government officials and visitors from other cities were present. The first and second floors of the theatre were entirely filled. Mr. Norton spoke for over an hour, and received the closest attention throughout. He was introduced by Mr. Hermann S. Hering, C.S.B., of Baltimore, who said in part:—

The lecture this afternoon is held under the joint auspices of First and Second Churches of Christ, Scientist, of this city, and is given for the purpose of presenting in a public manner a comprehensive yet concise statement of what the teachings of Christian Science are, as well as its rise and most wonderful progress from the time of its discovery about a third of a century ago. Owing to the popular misconceptions about Christian Science and to the many teachings and practices that claim to be Christian Science, but are not, the Rev. Mary Baker Eddy, the Discoverer and Founder of Christian Science and Leader of the denomination, established a Board of Lectureship, composed of men and women who were thoroughly familiar with the subject and who could speak with authority and thus afford the public the opportunity of differentiation between the true and the false. On behalf of the two local churches I invite you therefore to give your liberal and impartial attention to the presentation of the teachings of this remarkable religious and reformatory movement.

I now have the pleasure of presenting Mr. Carol Norton, the lecturer of the afternoon, who will speak on the subject of "Christian Science is Applied Christianity."

The Washington Post.

At Erie, Pa.

The Park Opera House was well filled yesterday afternoon [May 11] to hear the address on Christian Science by Mr. Carol Norton, who has given the subject close study. Mr. Norton was introduced by Postmaster Sobel, and his introductory remarks were well received. Among other things Mr. Sobel said: "I was especially requested to come here to-day and preside at this meeting. It may seem curious to some, first, that a Hebrew should be requested to officiate at such a function; second, that he could consent to such an unusual request. But this age we are living in is not the fifteenth, seventeenth, or eighteenth century. It is the beginning of the twentieth, where enlightenment goes hand in hand with the intellectual progress belonging to the epoch. We are now more liberal in our views than we were wont to be. We want to investigate and find out the truths for ourselves. We are satisfied there is much good in Christian Science. We would find out its truth and profit by it."—*The Erie* (Pa.) *Herald.*

At Evanston, Ill.

Carol Norton of New York spoke at the Christian Science Church last evening [May 30] to a fine audience. His subject was "Christian Science is Applied Christianity." He was introduced by Archibald McLellan, who said: "The members of First Church of Christ, Scientist, of Evanston, have requested me to say a few words of welcome to their friends who have accepted their invitation to listen to an

Digitized by Google

address by a gentleman authorized to speak for the Christian Science denomination. Your presence is appreciated because it bespeaks your interest in what we believe to be the most important subject engaging serious thought. No greater question can be asked than what is the relation of God to man and man to God. Christian Scientists believe that much light has been thrown upon this question by the writings of Mrs. Eddy. Firm in that conviction, they have invited you to this lecture that you may learn something more of the Principle of Christian Science, that erroneous impressions may be removed, that prejudices may be eliminated, and that you may know that Christian Science is indeed a message of hope. The gentleman who is to address you is one well qualified by education, by intellectual capacity, by close study of Christian Science, and by large experience in its practice. I have the pleasure of introducing a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, Carol Norton of New York City."—*The Evanston Index.*

Kind words produce their own image in men's souls; and a beautiful image it is. They soothe and quiet and comfort the hearer. They shame him out of his sour, morose, unkind feelings. We have not yet begun to use kind words in such abundance as they ought to be used.—PASCAL.

Notices.

First Members' Meeting.

The Annual Meeting of the First Members of the Mother Church will be held in the church Saturday morning, June 14, 1902, at nine o'clock.

Communion Service.

The Communion services of the Mother Church will be held in Mechanics Hall, Huntington Avenue, June 15, 1902, at 10 A.M. and 3 P.M.

The usual Wednesday evening testimony meeting will be held in the same hall at 7.30.

Annual Meeting.

The Annual Meeting of the Mother Church will be held in Mechanics Hall, Huntington Avenue, Wednesday, June 18, at 2 P.M.

Members of he Church will be admitted to this meeting only on presentation of a card of membership at the door of the hall.

The cards of membership can be obtai ed in the vestry of the Church on and after Wednesday, June 11.

Meeting of Normal Graduates.

There will be a meeting of the normal graduates of the college classes of 1889, 1900, 1901, and 1902, in Boston, Monday, June 16, 1902, at 9 o'clock A.M., in the auditorium of the Mother Church.

It is desirable that all, who conveniently can, be present, but attendance is not compulsory.

CHRISTIAN SCIENCE BOARD OF EDUCATION.

Reports from Branch Churches.

Reports from Branch Churches to be made at the Annual Meeting of the Mother Church, to be held June 18, 1902, must be typewritten and be sent to the Clerk of the Mother Church in time to reach him on or before June 14, 1902.

Those who prepare reports are requested to condense them as much as possible. Owing to the great number of reports to be read at the Annual Meeting it will be necessary to limit reports to two minutes instead of three minutes as previously announced.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid	$4.00
Twelve or more to one address, each	3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

To those who Approve and Countersign Applications.

Those who approve and countersign applications for membership with the Mother Church will assist the Clerk and also avoid disappointment to applicants if they will hold until after the semi-annual meeting, the applications which have been sent to them by applicants for their signature at a date too late to reach the Clerk before May 20, and notify them that their applications were too late to be entered.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Judge Ewing's Lectures.

THE following cablegrams have been received by our Leader and Mother from Great Britain relative to Judge Ewing's lectures delivered there last month:—

London, England, May 6, 1902.
Rev. Mrs. Eddy, Pleasant View, Concord, N. H.
Grateful thanks to you from London Church for sending Judge Ewing. Lecture grand demonstration. Hall full. Over two thousand present. Press representatives surprised and interested. MILLER.

Manchester, England, May 9, 1902.
Rev. Mrs. Eddy, Pleasant View, Concord, N. H.
Manchester lecture immense success. Thousand people present and many turned away for lack of room. Our grateful thanks for sending Judge. VICTORIA MURRAY.

MRS. EDDY'S REPLY.
Victoria Murray, Manchester, England.
Thanks, I rejoice. You are reaping what you have sown.
MARY BAKER EDDY.

Edinburgh, Scotland, May 10, 1902.
Rev. Mrs. Eddy, Pleasant View, Concord, N. H.
Beautiful lecture. Large and appreciative audience. All so grateful to you for sending Judge Ewing.
EDINBURGH CHURCH.

MRS. EDDY'S REPLY.
Lady Ramsay, Edinburgh, Scotland.
I thank God. May His blessing rest on your dear church. Judge Ewing is His servant. M. B. EDDY.

Hornsea, England, May 19, 1902.
Rev. Mary Baker Eddy, Concord, N. H.
Hull lecture great success. Accept our grateful thanks for sending Judge Ewing. HAWORTH-BOOTH, Rolston.

A Pathetic Incident.

A FEW weeks since the Associated Press sent out the following dispatch:—

"Omaha, Nebraska, May 10, 1902.

"Locked in a casket that is wrapped securely in a large American flag, and protected by half a dozen bolted doors in Judge Eller's residence, the lifeless body of young Donald Eller, who died while under Christian Science treatment, was this morning, for the second time within twenty-four hours, protected from inspection by the coroner's jury. Coroner Brailey, accompanied by the sheriff and deputies and the county attorney, appeared to view the body by force. Judge Eller said:—

"'If you accomplish your purpose, it will be necessary for you to break through four locked doors and then into the sacred chamber of death. You will find the American flag wrapped around that coffin so securely that you will have trouble removing it, and the casket is locked. You will have to burst that open. I have placed that flag there as an emblem of liberty. If it does not stand for liberty of the citizens, it does not stand for liberty anywhere. In the name of God and the rights of man, I warn you away.'

"The officers decided to let the matter rest for the time being. The body will be buried to-morrow. The coroner says he will take possession of the remains as the funeral procession leaves the house."

It seems that notwithstanding Judge Eller's refusal and warning, during his temporary absence, the coroner and a doctor entered his house by force and held an autopsy on the remains of his son. The circumstances of the case aroused much feeling in Omaha and throughout Nebraska and the West. As usual there was great exaggeration and misstatement of the facts.

Mr. Edgar McLeod, a Christian Scientist of Omaha and member of the Publication Committee for that section, writes the following calm and authentic account of the matter, which we are glad to publish:—

"To the Editor of the *Sentinel*.

"In consideration of many enquiries concerning the Eller case, together with Associated Press clippings of a sensational and misleading nature which have been received from large centers as well as remote points, we have thought perhaps it might not be amiss to give the readers of the *Sentinel* a little *resume* of the facts.

"Our local press has been very fair in its published accounts of this incident, but the Associated Press dispatches seem in many instances to have been garbled and, in some, absolutely false.

"Judging from Associated Press clippings furnished, the bulk of adverse criticism was built on three false statements: 1st, that the boy was refused a doctor; 2nd, that he suffered great agony throughout; 3rd, that no attempt was made to allay his suffering. These statements are absolutely foundationless.

"His father asked him if he wanted a doctor, saying, 'If you do, you shall have the best in Omaha.' The boy said he did not want a doctor, and as he was fifteen years old and well developed in mind and body, his father judged him to be entirely capable of making his selection of treatment.

"There was pain at short intervals during the first few days, but after the fifth day scarcely any pain.

"There never was a hint at neglect. He was given the most tender and considerate care throughout; a trained nurse employed and Christian Science treatment given daily.

"There was a steady gain up to, and in fact he was convalescing on, the day when the doctor, sent by the authorities, invaded the sanctity of their home, and all persons closely in touch with the case feel certain that the anxiety and agitation aroused thereby were the cause of his relapse.

"'Clothed in a little brief authority,' a few men have undertaken to cross the threshold of the home and prescribe the method by which its sick shall be treated. Well knowing that everything in the power of his family was being done for the comfort and recovery of the boy, the forced autopsy, followed by what proved to be not an investigation but a persecution, was a clear proof that it was not so much a solicitude for the boy which actuated their original move of forcing medical attention, as an attempt to rule out the Christian Science healing.

"This last step, while a sore trial, calling for sweet patience from his family, was the incident which quickened the community and turned the tide of public opinion in favor of Judge Eller and his family, exemplifying Norfolk's sagacious advice to Buckingham:—

> Heat not a furnace for your foe so hot
> That it do singe yourself.

As a proof of this, on the last day of the proceedings the coroner said, he would give five hundred dollars to be clear of the affair.

"In a half column of short interviews with prominent lawyers and judges published by one of our leading dailies, there was an agreement of expression condemning the

Digitized by Google

measures resorted to in holding the inquest, as most cruel, unjustifiable, and unwarranted by the law. In a column editorial the *Omaha World-Herald* denounced the forced autopsy and subsequent inquest as brutal and unwarranted.

"The sweet calm and repose with which Judge Eller and his family have met the storm of hatred and persecution has won not only for them, but for our Cause here in Omaha, many warm friends, and impressed us anew with our revered Leader's sweet words of promise, Science and Health, page 571, "Clad in the panoply of Love, human hatred cannot reach you."

"Yours in Truth,

"EDGAR MCLEOD,

"Iler Grand Hotel."

The unhappy incident brought forth much newspaper comment, the following exceptionally able and earnest editorial from the *Central Farmer* of Omaha being a fair reflex of the public sentiment of that section:—

"A DOCTOR'S WAR.

"Omaha has been all torn up the past week over the death of a boy. It is supposed that the disease was appendicitis, resulting in peritonitis, but that is not what worried some people till they became frantic. It was because the boy was not 'treated' as these people thought he ought to be treated.

"Judge J. W. Eller is a man of more than ordinary ability and has occupied a position of honor and distinction at the Omaha bar. He has committed the unpardonable crime of doing his own thinking and is a Christian Scientist. He believes with his whole soul that he is right in his beliefs. His family believe with him. Death comes to all families, and Judge Eller has lost a wife and now a son since their adoption of the Christian Scientist beliefs, and Omaha is in spasms. Many other mothers and sons have died, but their deaths have created no comment. The public is educated to the belief that if certain schools of medical thought are consulted in case of sickness, the patient will recover if recovery is possible, and if death results, no blame attaches to any one. But if some other method of treatment is used aside from that adopted by the profession, if recovery occurs, they say the person was not much sick anyhow, and if death occurs, they roar and rant and assert that if their methods had been followed, the patient would have recovered. Perhaps so, and perhaps not. In this case, Judge Eller has been mercilessly persecuted for opinion's sake. He did what he considered best. If he made a mistake, the loss of a son is punishment enough without hounding him with the maledictions of a thoughtless rabble led by designing men whose motive is to deter other men from thinking and divert the 'medicine business' to their own offices.

"The press of the city at first was with the rabble and the doctors. It applauded the coroner in his act of brutality in entering the house against the protests of the family and in the absence of the father, and cutting open the body and conducting a post-mortem examination. The brutal act was done in the absence of any suspicion of foul play, but solely to appease the clamor of the medical fraternity. It was declared that an inquest would be held, and then it was that Judge Eller rose again to the full stature of a man. He placed the body of his boy in the casket and locked it. Then he wrapped it about with the American flag, and locked all the doors of his home—his castle. The coroner, the sheriff, the county attorney (by his deputy), and a coroner's jury appeared. Judge Eller opened an up-stairs window and asked what was wanted. They replied, demanding to enter and view the body. Then Judge Eller spoke as follows:—

"'If you attempt to accomplish your purpose, gentlemen,' he said, 'you will find it necessary to break through three or four locked doors. You will find it necessary to break into that sacred chamber of the dead. You will find the American flag wrapped about that casket so securely that you will have difficulty in removing it. And when you have done all this you will find the casket that holds the body of my son closed and locked. You will have to break that lock before you can reach his body.'

"The judge continued in tones that were at once passionate, agonized, and pleading, 'Gentlemen, I have secured that casket in the folds of the American flag. I have placed it there as the symbol of liberty—as the symbol of a citizen's rights. If it does not stand for the rights of the citizen it is not the flag of liberty anywhere on earth. Let me implore you to take this matter home to yourselves, each and every one of you. Consider it in the light of your own firesides and of your own families. Think, I pray you, before you go further. If then you conclude it is your duty to break into my home, to inflict further misery upon me and upon my family, to desecrate that sacred chamber of the dead, you will proceed not only against my wishes, but in defiance of every law of God and man. For enter this house of mine, my sacred castle, with my consent, you never shall.'

"There was a silence for a moment, a silence so intense that it was painful. Then the sheriff spoke.

"'Well,' he said, 'if you take that position, Mr. Eller, I guess we will have to place you under arrest. You cannot resist the coroner in the performance of his duty.'

"'I am resisting nothing,' replied Judge Eller. 'I am here peacefully in my own house. But arrest me if you will. I am not afraid of jails. They have no terrors for me. In defence of the sacred rights of the American citizen I would proudly yield up my life, if need be.'

"Then Judge Eller closed the window, took his seat in a rocking chair while his daughters gathered about him and wiped his dripping brow as he sat and watched the officers of the law in consultation below.

"After consultation the officials withdrew, not caring to break locks and tear the flag to accommodate the doctors.

"As noted above, the city press at first was with the doctors, but has recovered somewhat its equilibrium, and on last Sunday the *World-Herald* had the following noble utterance on the subject:—

"'MAJESTIC PATHOS.

"'The powers conferred upon a coroner are broad, and yet even broad powers must be exercised with intelligence. The coroner of Douglas County did not entertain the slightest notion that the Eller boy came to his death through foul play. He knew that this boy, during his illness, had been treated by the representative of a peculiar doctrine, but he did not even know that had the lad been treated by the usual scientific methods his life might have been spared. Indeed, the autopsy seems to have revealed that even the doctors would have failed.'

"But all this is neither here nor there. There was a time when the authorities might have done something in a practical way. That was when it was first reported that a boy of tender years lay without the generally recognized medical attention.

"But when the coroner and his doctor visited that little home and held an autopsy in the absence of the parent, refusing to await the father's return, they were guilty of an act of brutality which, for the good name of this city, it is to be hoped will never be repeated.

"There are not many of us who are capable of sympathizing with the doctrines of Mr. Eller, the Scientist; but there are thousands of us who can sympathize with the grief of Mr. Eller, the father. There are not many of us who would care to encourage the peculiar form of treatment to which Mr. Eller is devoted; but there are not many who will endorse the persecution of any man, because of his opinions and his belief, however peculiar those opinions and that belief may appear to some of us.

"It will occur to a great many fair-minded men that this unhappy father, in the parlance of the street, has not been

Digitized by Google

given 'a fair shake.' All the interest which all of Mr. Eller's critics may have in the 'cause of humanity' and in the interest of 'science;' all the boasted love and affection they may have for their 'fellow-beings,' outside of themselves and their immediate family circle—all these combined would not equal the love of this stricken parent for his child. And all the indignation which these people manifest because of the unhappy result of a foolish experiment is incomparable with the enormity of this father's grief.

"However much one might disagree with certain doctrines, there is something superb about a little handful of men and women standing up in the face of a great and overwhelming public prejudice and upholding that which they believe to be the truth.

"When this grief-stricken father wrapped the casket containing his precious dead within the folds of the American flag, and, knowing that he had committed no crime, defied the authorities, even the most thoroughly law-abiding among us could not avoid recognizing the majestic pathos of the situation."

Under the head of "Liberty," the editor of the *Gage County Democrat* thus graphically wrote:—

"Among the things guaranteed by the laws of our land, are the right to such religious beliefs as the individual may prefer; also the theory that the home is one's castle, and that it shall not be invaded except upon due process of law.

"However, in these strenuous times, when outrages are applauded, and bigotry denounces the right to worship according to the dictates of one's own conscience, little regard is paid the laws or usage of the land.

"Last week a young man, son of Judge J. W. Eller, died in Omaha. He was a Christian Scientist. He was asked by his father if he desired a medicine doctor, and said he did not. He died.

"The society for the regulation of everybody's business was shocked to think that a man should be permitted to die without the aid of a doctor. The coroner empaneled a jury and proceeded to Eller's residence to hold an inquest. Judge Eller refused them admittance.

"The officer had no warrant from a court. Eller had not been charged with the murder of his son. There was no complaint of neglect, except that the young man, in the full possession of his faculties, had declined to accept medical treatment, or to submit to the surgeon's knife, preferring to place his trust in God, and live or die by his religious belief.

"But the officers were not to be thwarted in their designs.

"Mr. Eller left his home for a short time, and the coroner and a doctor improved his absence by entering his home against the protests of the family, breaking through the door to the room where the body lay, when refused the key. The doctor cut into the body to discover the cause of death.

"His conclusion was that the young man came to his death from peritonitis, due to appendicitis, and as appendicitis has a cause, he thought that if the case had been taken in time, the boy might have been saved.

"This is one of the most dastardly outrages ever perpetrated upon the rights of the living and the person of the dead, and all to gratify a morbid curiosity, stimulated by a fanatical irreligious sentiment.

"The liberties guaranteed by the Constitution are being abridged."

The case, as a whole, is a history-making one. Volumes, almost, might be written upon it. We, however, shall leave it where the able and fair-minded non-Scientist editors have left it. We add only that the Bar of Omaha were a unit in saying that Judge Eller's position was right in law. His home is his castle. He had a right to defend it against all intruders. There was nothing about the case in question to warrant a forcible entry for the purpose of making an autopsy. All liberty-loving people must admire Judge Eller's brave stand for his own religious convictions and those of his son.

Among the Churches.

Opening Services at Rochester, N. Y.

On Sunday, May 4, 1902, First Church of Christ, Scientist, of Rochester, N. Y., held its opening services in its new church, corner of Alexander and Cobb Streets.

In addition to the Lesson-Sermon for the day addresses were made by Miss Sarah A. Pine, First Reader; Mr. B. C. Harned, Second Reader, and Rev. Arthur R. Vosburgh, member of Board of Lectureship.

The service was repeated in the afternoon and evening, the house being filled at every service. In the evening the sermon was omitted and letters of congratulation and good cheer from many parts of the United States and Canada were read. The day was a joyous celebration of our transition from "tent to tabernacle."

Our church was acquired, improved, and furnished at an expense of about seventeen thousand dollars.

The address of the First Reader, Miss Sarah A. Pine, was in part as follows:—

Dear Brethren:—It is with grateful hearts that we open our service in this house to-day.

We extend a cordial welcome to our beloved brethren, friends, and neighbors, who join us in gratitude to God for the demonstration which opens this church edifice,—the first in this beautiful city to be devoted to the worship of God as taught in Christian Science. Here, in quiet and peace, we may listen to the truths set forth by its Pastor,—the Bible and "Science and Health with Key to the Scriptures." May we ever heed the truths taught therein, each day learning more love, charitableness, and forgiveness. May these walls ever echo harmony, joy, and peace. May the unity of past years grow more and more perfect, and the One Mind become more and yet more apparent. May this blessed Truth lead each and all of us into closer communion with God and His Christ, into a more loving and appreciative understanding of our Leader and Mother, who discovered and gave us the Key which unlocks the Scriptures and reveals to us the great truth of spiritual Being, explaining the teachings of Jesus and calling us to higher and holier living, that we may be followers of him and do the works which he commanded. May the spirit of the Lord God be upon us, anointing us to preach good tidings unto the meek. May he send us to bind up the broken-hearted; to proclaim liberty to the captives, and the opening of the prison to them that are bound.

As we gain even a little understanding of the Science of Christianity, we are enabled to heal the sick and cast evils out of ourselves and others thus rising to higher thought and holier purpose.

Mortals have asked, What is Truth? This question passed down the ages not fully answered, until Christ, the Messiah, put forth the answer in parables and in the words which made the hearts of his disciples burn within them. The question was answered and mortal man had only to lay hold upon this Truth and its fulfilment, to lose his sense of error, and gain the understanding promised by Jesus; but like the Israelites of old, he turned aside from the true path,—wandered from the Christ-Truth, the gospel of Love, into the labyrinth of selfish and sordid beliefs. Losing sight of the mission of the Christ, he came to worship Jesus as a personality, instead of beholding his dual nature, and recognizing the impersonal Christ. Lost in the maze of unbelief, he preached that the day of miracles,—marvels to human belief,—was past, instead of realizing that the invisible Christ is the same yesterday, to-day, and forever.

In such a chaotic state of religious thought many were led to doubt the validity of the Scriptures. At this period the time was ripe for a re-awakening to the true spiritual understanding of Christ's words and works. About the year 1866 Mary Baker G. Eddy, a woman of broad educa-

Digitized by Google

tion and great spirituality, when seemingly on her death-bed, was instantaneously healed. Desiring to learn how she was healed in order that she might heal others, she retired with her Bible, seeking the revelation of the Science of Christianity. For three years she sought prayerfully, and it was given her. She has placed it before the world in her book, "Science and Health with Key to the Scriptures." Through this understanding the sick are healed, the sinner is reformed, and harmony is restored. Again are echoed the words, "Glory to God in the highest, and on earth peace, good will toward men." "Come unto me [Christ, Truth], all ye that labor and are heavy laden, and I will give you rest."

Is it a wonder that we accept these teachings and hold tenaciously to them when they have freed us from sickness and sin; led us into closer communion with God; awakened in us a deeper and holier love for the Christ; made us more charitable and forgiving toward our fellow-man; given us dominion over evil; and through self-abnegation and a more righteous living, they have given us the sweet assurance of rest and peace? Do we not know that this must be the true explanation of the teachings of the Christ? If the fruit is good, must not the tree be good? Can we turn away from that Truth to which every high and holy thought responds amen? We cannot. "And I, if I be lifted up from the earth, will draw all men unto me," said Jesus. Unveil the Christ, show him to be what he truly *is*, the idea of Love, and he will draw all men unto him. Being drawn to the Christ who overcame sin, sickness, and death, can we fear anything except to disobey him?

We look admiringly at the change which has been made in this old but well-built edifice. We are thankful for the harmony our demonstration has brought out. It is the result of thought, aye, a deep religious thought. We have realized with the Psalmist that "Except the Lord build the house, they labor in vain that build it."

This is but a temporary building, in which we may worship until our thought has expanded into a larger and better expression,—a more perfect symbol of the true church. As we have worked for this demonstration, we have remembered that of old, God required His people to bring as their offering, the firstlings of their flock. They were to be without spot or blemish. So have we given of the first-fruits. Our purest and best offering has been given to this Cause,—the Cause of the Lord of Hosts, and it has been poured into the lap of the Great Giver, willingly, cheerfully, yea, with hearts overflowing with gratitude. We must ever remember that the true Church is a house not made with hands, eternal in the heavens. This is the Church for which we are all seeking. By the light which illumines the sacred Word through our text-book, "Science and Health with Key to the Scriptures," we are able to understand the plan of salvation set forth by the Messiah, who declared himself to be the Resurrection and the Life. We realize that this plan is the essence of forgiveness, blotting out as a thick cloud our transgressions and as a cloud our sins, which proves the plan to be born of Truth and Love. A Truth, unchangeable, the same before all time, and now, and forevermore. A Love, whose hallowing influence, like a pebble-born wave, shall widen and broaden until it reaches earth's remotest bound, purifying, ennobling, and spiritualizing the thought of all mankind.

Following is an extract from the address of the Second Reader, Mr. B. C. Harned:—

While for a number of years this society has held its place as a separate and distinct organization among the churches of our city, its local habitation has been such as somewhat to seclude us and in a measure circumscribe our work and so limit our usefulness. And now we cross the threshold into a new experience.

With this beautifully arranged and thoroughly equipped house of worship, we to-day take our place along with our sister churches prepared to offer to all such accommodations and privileges as will enable them to participate in our various services with pleasure as well as profit. This church by no means represents the full strength of Christian Science in this city. We have a sister church known as Second Church of Christ, Scientist, an energetic, flourishing society, now holding services in Powers Building, but looking forward to a church home of its own in the very near future, as it already has a building fund equal to what ours was when this property was purchased.

In 1887 Miss Pine quietly and without ostentation took up her work of healing the sick who came to her, which resulted in the establishment of meetings at her house, 25 Elm Street, where those who had been healed were instructed in the Truth that had helped them. The average attendance was less than a dozen persons.

The numbers, however, increased so rapidly that more room soon became necessary and Miss Pine removed to Cumberland Street, where her spacious parlors were soon overcrowded, the attendance reaching about sixty.

In 1890 the meetings were held in Odd Fellows Building, North Clinton Street. Still the work grew, and in 1891 the rooms over 15 East Avenue were taken, a reading room and dispensary established, classes instructed in Christian Science, week day and Sunday services held, and Sunday School for children conducted.

Twice during the occupancy of this was the assembly room enlarged to accommodate the growing congregations.

In April, 1894, the Society was organized into a church and incorporated under the laws of the state of New York.

In 1897, having again outgrown our accommodations, we secured beautiful rooms in the Triangle Building which in turn had to be abandoned after two prosperous years on account of the growth of the congregations.

The next move was in 1899, and placed us in a large hall in the Cox Building, where we have prosecuted our work for the past three years.

Early last year it became evident that the time had arrived for our church to be making preparations for a permanent home. This property was purchased, plans made, and the work of reconstruction begun in December last, and carried to such a stage of completion as enables us to-day to throw open the doors of this edifice to the public.

To our friends and neighbors who from time to time have manifested such a kindly interest in this enterprise, and to the faithful, self-sacrificing students and friends who by their substantial munificence have made its completion possible, I on behalf of the church committee tender most grateful acknowledgments. And to you who have accepted our invitation to this opening service, we extend a most cordial welcome, assuring you that at all times when this house shall be open for public worship, we will greet you with true brotherliness, irrespective of class or condition; thus endeavoring. to exemplify the teachings of him who said, "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

Rev. Arthur R. Vosburgh spoke as follows:—

The opening of this church marks an epoch in the work of Christian Science in Rochester, and will call renewed attention to Christian Science as one of the rising movements of the day. Simply as indications of what has already been achieved, it will be of interest to note that there are now six hundred and eighty-three churches holding public services and advertised in *The Christian Science Journal*. Of these churches it would be a conservative estimate to say that not less than one hundred own their own church buildings; these—according to the needs of their communities—ranging in value from one or two thousand dollars to several hundred thousand dollars each.

Now it is evident that a work that is establishing itself on such permanent foundations is not merely a fad or a passing enthusiasm. One who in the most casual way

Digitized by Google

investigates this movement is impressed by the moral earnestness, the enthusiasm, and the devotion that inspire it, and will ask what is to be its future and what is its mission for the world.

Time would fail, and this occasion does not call for entering into any sufficient statement of even one of the different lines of thought involved in an explanation of Christian Science. But in the associations that cluster around this time and this event, it is fitting that we note this, that Christian Science stands for all the ideals of Christianity. The heritage of Truth left by the Founder of Christianity and brought down to us by generations of saints of the Christian Church, in Christian Science loses not one of the elements that have made men more reverent and righteous before God and more kindly toward their fellow-man.

Every new movement having any religious significance has been denounced as heresy. Not a Christian denomination exists but has had its early baptism of opposition and persecution. The heralds of a wider freedom have always met the earnest and often conscientious resistance of those who could not see that the new did not come to destroy but to fulfil the ideals of the old. Another generation comes and sees what the spiritual pioneer has accomplished, and then it comes to pass that "the heretics of yesterday are the saints of to-day."

The word orthodoxy has been overridden and abused, and has been pressed into unworthy and unloving service. And this has been because it has been measured by the loveless enforcement of a creed rather than by the standard of a Christly life. Jesus has given us one only standard of orthodoxy,—that of Christian living: "By their fruits ye shall know them." The only test to which Christian Science can be put to answer the question whether its work be Christian or un-Christian, whether it be orthodoxy or heresy, is in the effect it has on the character and lives of its adherents.

And yet there are certain great lines of Truth that run through the teachings of Jesus and that the experience of the centuries has proven vital to his church; truths that stand out bold and clear, and that must not in any smallest wise be sacrificed or compromised. These vital, fundamental elements of Christian truth may be summed up in these four things: (1) A belief and understanding of God as a Being on whom we are dependent and to whom we are morally responsible. (2) A belief in the Bible as the revelation of God's word. (3) A belief in Jesus as the "one Mediator"—the one Wayshower—"between God and men." (4) The necessity of a radical conversion—a repenting from all evil and receiving and living the Christ life. These great truths are such an inherent, essential part of the teachings of Christian Science that all Christian Scientists are renewedly and increasingly emphasizing them in thought and life.

Not many years ago it was quite the usual thing to characterize Christian Science as the work of evil. To-day the Christian critic who has given it enough investigation to make his opinion valid will acknowledge it as having much of good, and as being in very large measure Christian in its spirit and in its ideals. A few years more and those who have the open vision that is always given to the sincere and true will gladly recognize that Christian Science comes with a heaven-bestowed mission, and that its relation to Christendom has been truly stated by Mrs. Eddy: "As the ages advance in spirituality, Christian Science will be seen to depart from the trend of other Christian denominations in no wise except by increase of spirituality" (Miscellaneous Writings, p. 21). As Christian Science is understood it will be hailed with hope and joy; and to the woman, to whose selfless love and tireless effort we owe its message of Life, the world will bring its guerdon of gratitude and praise. Among the names of those whose work for the coming of the Master's kingdom has wrought to bring men nearer to God and to their fellow-men, none will be more tenderly hallowed in lofty esteem and loving regard than that of Mary Baker Eddy, the Discoverer and Founder of Christian Science.

Annual Meeting at Binghamton, N. Y.

The annual meeting of Second Church of Christ, Scientist, Binghamton, N. Y., was held May 8. The reports of officers gave evidence of prosperity, both spiritually and financially. Our membership has more than doubled since our organization in 1900. Our congregations are steadily increasing.

Since December, 1901, we have furnished two rooms, where we hold our Sunday and Wednesday evening services. Our reading room is open every day from 2 to 4 P.M.—MRS. LIZZIE C. BARNES.

Church Notes for June.

THE following churches appeared for the first time in the June *Journal*:—

First Church of Christ, Scientist, Chenoa, Illinois.
First Church of Christ, Scientist, Fredonia, Pa.
First Church of Christ, Scientist, Middleburg, Neb.
Second Church of Christ, Scientist, St. Louis, Mo.
Third Church of Christ, Scientist, Brooklyn, N. Y.

New churches which were formerly advertised as Societies holding regular services.

First Church of Christ, Scientist, Oklahoma City, O. T.
First Church of Christ, Scientist, Pipestone, Minn.

Regular services were announced for the first time at,—

Bloomfield, Nebraska; Eugene, Oregon; Janesville, Michigan; Johnstown, New York; Stanton, Nebraska; Victoria, British Columbia; Wellsboro, Pennsylvania.

Notice of the uniting of churches has been received in the case of

First and Second Churches of Christ, Scientist, in Baltimore, Maryland.

Notice to Visiting Scientists.

IT is suggested to all those visiting Boston for the Communion Service or Annual Meeting, having taken advantage of the reduced rates made by the various railroads for these occasions, that they read their tickets carefully and familiarize themselves with the conditions of the contracts on their tickets and abide thereby.

There will be various forms of tickets sold, and some certificates issued requiring vise by Special Agent, who may be found at Mechanics Building, Sunday, June 15, from 9 A.M. to 6 P.M., and on Wednesday, June 18, from 1 P.M. to 6 P.M., and on Monday, June 16, and Tuesday, June 17, at the church edifice, corner Norway and Falmouth Streets, from 10 A.M. until 5 P.M. each day.

Those tickets and certificates which are good for extension of time, should be deposited on or before Saturday, June 21; and upon payment of fifty cents the return limit will be extended to July 31; if ticket reads by the Boston & Albany Railroad, it should be deposited at City Ticket Office, 366 Washington Street, Boston. If by Boston & Maine Railroad, at City Ticket Office, 322 Washington Street, Boston, or if by New York, New Haven & Hartford Railroad, at City Ticket Office, 3 Old State House, Boston (Washington and State Streets).

Tickets from New York City having an order for return ticket, must be exchanged for such return ticket at *ticket office, Terminal Station,* foot of Summer Street, *and will not be exchanged at any other ticket office or Station.*

Passengers holding these orders for return tickets to New York City, should present themselves at Terminal Station at least half an hour before starting time of the train they expect to take.

Criticism vs. Praise.

BY W. E. B.

A CAREFUL consideration of human criticism and praise yields much food for thought. Our text-book, "Science and Health with Key to the Scriptures," clearly shows us that the way to escape all the ills of mortality is to become conscious of Truth, and it also teaches that before this goal is reached, we have much work to do in overcoming all that is unlike Christ. One of the most helpful agencies to this end is criticism. It matters little whether it is just or unjust. In either event it enables us to throw the search-light of Truth in the direction indicated. If unjust, no harm has been done, but on the contrary we are provided with an opportunity for demonstration. If the criticism is merited, then should we look upon it as a most helpful friend who has called attention to an error in our problem and thus given us an opportunity to correct it.

Suppose one were a sculptor who had devoted much thought and time to his image in stone and had at last apparently finished his work. He is now ready to send his creation to be judged as to its merit. At this point a friend calls his attention to a bit of marble that needs chipping off to make the work symmetrical, and the grateful sculptor hastens to knock off the marring particle, realizing that his friend has rendered him an invaluable service. So if we are really in earnest in the work of bringing out the perfect man, we shall welcome and even desire criticism at all times in place of its opposite called praise.

Mortal mind likes to listen to smooth sayings, and if it cannot get others to praise its actions it cultivates self-praise. This attitude of thought which craves and seeks praise or commendation loses sight of one of the most important points in acquiring an understanding of Truth. In this connection, Jesus said, "I can of mine own self do nothing." A realization of the truth of this statement will eradicate the longing for praise and will create an earnest desire to direct praise where it rightfully belongs,—to God. Science and Health teaches explicitly that at best we are only reflections of Truth; that we of ourselves cannot create or originate anything. Hence we are not entitled to praise and we should not receive it when offered. Praise puffeth up, creates self-satisfaction, and blinds us to a knowledge of the true and only cause—infinite Mind, while criticism, if we are in earnest, awakens us, improves our mental condition, clears the vision, and promotes growth.

In fitting conclusion let us listen to what our Leader says in "Miscellaneous Writings," p. 356: "The second stage of mental development is humility. This virtue triumphs over the flesh; it is the genius of Christian Science. One can never go up, until one has gone down in his own esteem. Humility is lens and prism to the understanding of Mind-healing; it must be had to understand our Text-book; it is indispensable to personal growth."

Independence.

BY CATHARINE VERRALL.

WHEN I first heard of Christian Science I had gained what I thought was independence. I was earning enough to support myself, I was trusted, and had work that I liked, and yet I never felt poorer or more dependent in my life. I could not understand why I should be so discontented, so hungry, and dissatisfied. Now I know that dependence on materiality always brings with it a sense of insecurity. Whether we depend on our own work or on the work of another, our prop will surely fail us. It is only when we gain a foothold on the rock, Truth, and resolve to keep our place that we can stand firmly and securely, knowing that in Truth none desire our place because all have their own place and are satisfied with it.

Our work is to destroy the sense of self and to bring our will into accord with the will of God. If each one is doing his own work faithfully, he will not only be happy and useful himself, but he will encourage others to do their work, knowing that he could not do it for them. The desire to do another's work is not love but self-conceit. If we truly love our neighbor we shall labor to awaken in him the consciousness of power which God has given to all His children, and encourage him to use the gifts that God has given to all impartially.

The question is often asked, In what way is Mrs. Eddy better than other good people? what has she done that others have not done? She has done this: she has lived so closely to God and has obeyed His voice so implicitly that she has heard His voice more clearly than others and therefore understands Him better. She says, as Jesus said, and is proving as Jesus proved, that the healing of sickness as well as of sin, still follows those who believe, that is understand, the teaching of the Master. She asks none to believe anything because she says it, but because she loves her fellow-men, she asks them to prove for themselves that evil can be overcome through the understanding that God never made it, for all that He made is perfect.

Obedience.

BY CHARLES FELLOWS MEEK.

EXPERIENCE has proven to me many times that blessings are always derived from obedience to divine Principle.

The Truth revealed through our beloved Leader, Mrs. Eddy, has so greatly blessed the whole human family, that eternity can reveal only a part of the infinite blessings bestowed upon those who are obedient to what God voices through her.

Who would for one moment doubt or question the science of mathematics? Can any one doubt this Science of Christ that is rescuing thousands from sin, disease, and despair? Ignorance may doubt, but nothing else can, as Truth when understood, needs not belief to demonstrate its unchanging Science.

When suffering from a so-called incurable disease, I realized that, if healed, the healing must come through obedience to divine Principle. Many times I tried to realize these words, "Become conscious for a single moment that Life and Intelligence are purely spiritual,—neither in nor of matter,—and the body will then utter no complaints" (Science and Health, p. 14). The wonderful healing I have experienced has come through knowing how to be obedient and then being obedient in as great a degree as possible.

The demand to turn forever from all sensuality to the eternal harmony of Mind, meant better health every step of the way toward possessing this Mind that finds only pleasure in spiritual purity.

The Song of Hiawatha.

BY H. B. K.

A FEW days ago I was telling some little children the story of "Hiawatha." After hearing of his love for the birds and how he talked with the squirrels and rabbits and called them his brothers, one little girl said: "But why do not the birds come to *me?* Why do they fly away? I love them; I would not hurt them." I answered, "Because they do not know you are good and gentle; if they knew you they would not be afraid."

This brought to me a very clear realization that as we come to know God as omnipresent Love, no fear or doubt can separate us from Him, for we shall feel perfectly safe in the consciousness of His presence.

Testimonies of Healing.

We live at an elevation of nine thousand feet above sea-level in South Park, Col., on a hay ranch. We have a family of six children. For the past thirteen years, I have demonstrated Christian Science to the best of my ability, meeting the ills that attend life with ordinary success in some cases, and in some cases with extraordinary success, and teaching my children by example as well as precept, the Truth as taught in Christian Science.

Clarence, my oldest child, has been a zealous student, and has accepted and made a practical demonstration of Christian Science. Two years ago last August he was repairing a fence, when, seeing a thunderstorm fast approaching, he thought to take his tools to the barn and do some repairing there, and so be sheltered from the rain. Just before reaching the barn he was struck by lightning. A younger brother, who was in the barn, was shocked by the same bolt, but on recovering consciousness started at once to look for Clarence. He found him lying prone on his back, the eyes wide open, and apparently lifeless. He hastened as fast as his condition would allow to the house and exclaimed: "Oh, mother! lightning has killed our Clarence." "No, not killed," I said. "There is no death in God. Truth can save him!" My husband and I ran to Clarence. We found every sign that usually attends death. We all knelt and declared that God is Life and God is all, and that there is no other power. After a lapse of fifteen minutes he gasped for breath. We then carried him to the house. With his first consciousness came the words: "Mamma, treat!" Little by little respiration became natural but his sense of hearing was entirely gone. Though I was shocked almost beyond measure, I never so clearly and truly realized the Truth.

We found that the bolt of lightning had struck his head, passed down his back and breast, meeting at his waist, then passing down the back of right leg and the front of the left leg, thence into the ground. On each side of him the ground had many holes as though it had been fired into by bullets. His hat had only a little of the rim left, the crown being entirely blown to pieces as by an explosive. The top of the leather boot on the right foot was torn entirely off, and the left boot was filled with small holes like a pepper box. His flannel underwear was scorched throughout and jaggedly torn in many places.

I sent for help and two Scientists spent the night with us. One of them treated him for two weeks, and after that I treated him. His sense of hearing was manifested after four days, and steadily improved. The burns on his chest and back healed quickly; those on his legs, which in places were some three inches wide and deeply burned, healed in a short time.

The demonstration was a wonderful proof of the power of Christian Science to meet every claim and to enable us to know that God's power is a present help in every time of trouble.

While the healing was not instantaneous and it required a great deal of work to make the complete demonstration, he says he can now truly say every seeming effect of the stroke has vanished under the power of Truth. We have since had many wonderful manifestations of the power of Truth over error, and we thank God for the blessings we receive daily through Christian Science and for our dear Mother in Israel who through Science and Health gave to us this blessed Truth.

MRS. ALICE M. HUBBARD, Fairplay, Col.

Fourteen years ago my heart awoke to gratitude to God and the dear Mother at the same time. After a patient and persistent effort of three months' duration, to procure a copy of Science and Health (during which time I had visited every bookstore, and many of the second-hand bookstores in the city of St. Paul), and had failed to find it, I at last remembered that the stranger who told me I might be healed, had mentioned a name, and McVicker's Theatre Building in Chicago as being in some way connected with the work. I sent there for information regarding a book called Health and Science, and the return mail brought me the book, and in it I at once found sure promise of deliverance from valvular heart disease, with all the accompaniments, such as extreme nervousness, weakness, dyspepsia, and insomnia. I had suffered from these all my life, finding no permanent relief, even, in material remedies, and no hope of cure at any time. Only those who have been held in such bondage and have been liberated by the same means, can know the eager joy of the first perusal of that wonderful book.

Half a day's reading convinced me that I had found the way to holiness and health. I read on, thinking only of the spiritual enlightenment, content to wait until I should be led to some person who would heal me; but old things had passed away, and all things had become new. I was completely healed before I had met a Scientist, or one who knew anything about Christian Science, and before I had read a line of any other Christian Science literature except one leaf of a tract; so it is absolutely certain that the healing was entirely impersonal, as was also the teaching, which enabled me to begin at once demonstrating the power of Truth to destroy all forms of error.

While at that time Science and Health seemed enough to command unceasing thanks to our dear Leader, I learned to appreciate the value of all the other evidences of her watchful care and love for her children, in the priceless gifts of her other works, and the *Journal* and *Sentinel* coming into our homes as they do each month and week, with a presence like that of dear helpful friends. In return for all these blessings let us "watch and pray."

E. J. W., North Yakima, Wash.

It seems difficult to express in mere written words my gratitude for Christian Science. The fact is, Christian Science has done everything for my husband and myself. The understanding of God and the Science of Being gained from the study of the Bible and the Christian Science textbook, "Science and Health with Key to the Scriptures," has brought out harmony in our home where before there seemed to be nothing but discord.

Before learning about Christian Science, nearly five years ago, I had been for twenty years a sufferer from chronic sick headaches. These have been entirely overcome through the understanding that sickness is not of God and is consequently unreal.

About three years ago I fell and partially dislocated my ankle. I was alone at the time, and for a little while the pain seemed intense. I immediately began to meet the suggestions of error with the denial of their reality and the affirmation of the allness of God. In a few minutes I was able to walk home and in a few days was perfectly well, having in the mean time performed all my household duties with practically no inconvenience. I had a somewhat similar experience once before when a believer in the law that matter has sensation and can be swollen or inflamed. Then I had to sit for two weeks with my foot in a plaster cast and for several months afterward I suffered more or less if I was on my feet for any length of time.

I love Christian Science because it is practical and teaches a religion for every day. There is not a moment of the day but we can use it and be benefited. My heart is filled with gratitude to our dear Leader and beloved Mother, Mary Baker G. Eddy, who has revealed to the world this Truth that makes us free. Christian Science is truly a panacea for all our ills, a blessing to all mankind.

MRS. E. C. McD., Chicago, Ill.

Religious Items.

The Church Standard quotes the following from Rev. Robert Edward Bartlett in the Bampton Lectures: "Prayer, almsgiving, outward observances, all must have their root in love or they will become cold and dead and meaningless. And yet, on the other hand, we may not let our religion evaporate into a sentiment, a perfume; we must serve God not in the oldness of the letter, not as a matter of routine, of law, of respectability, of social position, but in newness of the spirit, with the new energy, the new enthusiasm, the new hope with which Christ inspires his servants. Not less but more obedience, not less but more self-sacrifice, is demanded of those who are not under the law, but under grace. And we upon whom 'the ends of the world are come,' are ever tempted to think that we are wiser and more enlightened, more free from superstitions than men of past generations, and to despise the simple faith of earlier days—let us see to it that with our wider knowledge, our more unfettered thought, there be not less of holiness, of simplicity, of purity, of faithful obedience to duty and to conscience, than there was in the life of those who knew nothing of our eager questionings, of our intellectual restlessness, but who knew Christ, and the power of his resurrection."

According to *The Church Standard*, the *London Spectator* quotes Mr. Balfour, in a speech on Church extension at Glasgow, as saying:

"The defiant disbeliever is becoming rare, while the unbeliever who distrusts, but does not say or even feel the impulse to say, 'Lord. . . . help thou mine unbelief, is daily adding himself to a great host. And it is equally certain that if any of these tendencies prevail, conduct which is now so exalted will have lost its base. . . . The Altruists forget that if Christ was only a great philosopher, if he was capable of radical error as to the destiny of man, and had no right to give an order, we are all thrown back on our own thoughts as absolute guides of conduct. . . .

"That the convinced Christian must be an altruist we cordially admit, but without the religion of Christianity, without the doctrines at its base, altruism has no foothold in a world in which intelligent sense of self-interest is the master-key to success. In truth, faith without works is a barren tree, while works without faith is a branch cut off and stuck in the ground. It can have no continuance. There is, however, no real possibility of conflict between the two—each demands the other."

Never before the present day was there a period when the interest in religious questions was more widespread or presented a more interesting aspect. To judge from the superficial statements frequently made in the newspapers or on the platform, and sometimes, alas, in the pulpit, we might infer that religion was losing its grip upon the world, and that Christianity was rapidly becoming obsolete, and was already well merged into the evening twilight of its day. . . .

Religion is the question of this age; it is pre-eminently the question of all ages; it is the one clearly at the front of the present intellectual movement—commanding and comprehensive, compelling and irresistible. It is the question which has the eternal ages of history behind it and is now discussed as never before, investigated with finer brains, wider acquirements, and in a more reverent spirit, than at any previous time in the history of men. And herein is the encouragement we have to "hold fast the profession of our faith without wavering," cleaving to the divine verities, and to the revelation of God who is our Father and the Father of our Lord Jesus Christ.

The Universalist Leader.

The soul has a very real topography. There are lofty states of love, like mountains lifting their peaks in solemn grandeur to the skies. There are less elevated states of neighborly love, like hills crowned with golden sunlight. There are peaceful, quiet states, like beautiful, far-reaching landscapes sleeping under the bending heavens. There are happy, joyous states, like rippling, flowing streams. And there are orderly states in touch with nature, that are like fruitful valleys.

Is it not true that we often come down from the coronation of David, to find the valley of our natural mind swarming with unheavenly things? In this valley we see encamped in battle array miserable fears, doubts, anxieties, bad tempers, peevishness, insincerity, our shams, our unkind criticism of others, our pride of intelligence, our love of ruling over others—all these and a great deal more! Is it difficult for us to recognize the Philistines in ourselves now that we know the abominable things for which they stand? Did you ever have any spiritual experience that is pictured by these Philistines spreading themselves in the valley?

New-Church Messenger.

Spirituality, as related to the Christian religion, is a frame of mind and a condition of heart. Wherever it exists there are truths, impulses, purposes, and emotions, and these agree. Truth is the reasonable basis of the choice; love of the truth is that which prompts to the conduct which the acknowledged obligation requires, and the emotions are such as naturally arise from a hearty acceptance of the truths of God—the soul, immortality, and righteousness—which unify the whole moral nature and keep the deepest thoughts on the things which are not seen. Sentimentality perceives chiefly with the imagination the meaning of the letter of truth; it pictures the benefits of accepting it, but the sensibilities only are affected; no purpose is formed, no deep emotions are stirred, no permanent controlling impulse arises.—*The Christian Advocate.*

SPIRITUAL NEEDS.—What we need is, first, a conviction of the immanence of God; second, a conviction of our own heredity from God; and, third, a conviction of the power of rightness. These three things belong to the new theology.

It is these three great principles that we must learn to feel, to put into our daily thoughts: that God is here, that we are His children, that there is a common destiny before us, and that whoever allies himself to righteousness is sure of a conquest over evil,—not in an hour nor in a day. At the end he who stands with God stands strong and sure. This theology does not try by prayer to win God to stand for us: it teaches us to stand with God.

The Christian Register.

The Watchman has this paragraph: "*The Congregationalist* says that it does not know of a professor of Old Testament literature now teaching in any theological seminary of the Presbyterian Church who claims that the story of Adam and Eve in the first two chapters of Genesis is literal history. A writer in the *Independent*, on the other hand, says that, excluding Union Seminary, which is no longer regarded as Presbyterian, all the seminaries of the denomination teach that the first two chapters of Genesis are literal history. Our Pedobaptist friends should get together on their facts."

They forget that God is dishonored when He confesses Himself incapable of redeeming the souls of men whose Father He has proclaimed Himself to be. In assuming fatherhood He has assumed the duties of a father, and to destroy children because He can do nothing with them—to give up hope for them—is an idea I cannot connect with the Almighty Being who revealed Himself in Jesus Christ. If one soul perishes forever, it is a failure: evil has won the day.

STOPFORD BROOKE.

If men insist on forsaking the Golden Rule for the golden calf, if they plead the preoccupation of business as an excuse for the neglect of civic duties, if they quarantine their religion in the Sundays of the calendar and the pews and aisles of their churches, then the fiery footed avengers of wilful blindness and neglect will visit them, and anarchy will forever hold its high carnival.

REV. FRANK G. TYRRELL.

Most of our energies in recent years have been given to trying to save the church. Let us forget the church for a while and try to save men. The church that saves the lives of men will be saved by the men it saves. Church organizations are the unexpected results of their founders. Jesus did not try to found a church. He came to set the captive free.—REV. L. M. POWERS.

James P. Thoms, LL.D., says in *The Standard:* "The sower is not responsible for the harvest, but for fidelity in sowing. The soil is itself accountable for its reception of the seed."

Dr. Fairbairn has said: "I utterly deny that God's action can be correctly described as miraculous; it is natural. . . . To identify God with the supernatural is to undeify Him."

Alexander McLaren says in *The Homiletic Review:* "Remember, the virtue that comes out victorious in the crisis must have been nourished and cultivated in the humdrum moments."

A soul occupied with great ideas best performs small duties. The divinest views of life penetrate most clearly into the meanest emergencies.—JAMES MARTINEAU.

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only.*

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each $3.18
Two to Twelve books to one address, each, prepaid . . 3.00
Twelve or more books to one address, each, prepaid . . 2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India paper, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . . 2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 oc half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Secretary Hay has received a cablegram from Minister Conger at Pekin to the effect that an agreement has practically been reached for the pro-rata reduction of the claims of the Powers against China, arising out of the Boxer outrages of 1900.

The amount of the indemnity agreed upon with China was 450,000,000 taels. Some months ago Secretary Hay was informed that certain European powers proposed to insist upon the payment of their claims in full, notwithstanding the fact that the total would amount to $343,000,000 which was $33,000,000 more than China had agreed to pay. He then proposed a pro rata reduction of the claims in order that they might be kept within the limit. The result achieved is considered a most important diplomatic victory.

In March the Spanish Claims Commission decided that the claims of the families of the Maine victims were merged into the national claim against Spain, and could not be regarded as claims of individuals. A bill is now pending in the House which provides relief for the families of the Maine victims. Secretary Moody has addressed a letter to the House in which he recommends that in case Congress decides to recognize the claims of families, the relief be afforded in the shape of a direct appropriation which course would do away with the expense of litigation to the claimants. The secretary cited a number of precedents for such action.

The centennial of the founding of the military academy at West Point was celebrated last week. On Wednesday, President Roosevelt and his party were present and took part in the affairs of the day. Addresses were made by the President and Secretary of War Root. Gen. Horace Porter, Ambassador to France, was the orator of the day.

The Corliss Pacific cable bill was defeated in the House last week by a vote of 116 to 77. Mr. Richardson of Alabama argued that in view of the possibilities of wireless telegraphy, it would be unwise for the Government to expend $15,000,000 to $20,000,000 for a sub-marine cable which might be valueless in a few years.

President Roosevelt is expecting to make an extended western trip this fall. He will visit the Illinois State Fair and will go to Indiana and Iowa, and probably Minnesota and the Dakotas. In the southwest he will visit San Antonio and probably Albuquerque.

It is stated that the United States is about to join Canada in a movement to stop the killing of fish with dynamite, outside as well as within the three-mile limit, along the shores of Maine, New Brunswick, and Nova Scotia.

Whitelaw Reid, the special ambassador of the United States to the coronation of King Edward, was received in audience by his Majesty at Buckingham Palace on the afternoon of June 11.

There are on file in the Pension Office 370,037 claims for pensions by persons who served in the Civil War, and 33,532 claims on account of the war with Spain.

The river and harbor bill has been signed by the President. The bill makes a total appropriation of about $65,000,000 in direct appropriations and for authorized work.

President Roosevelt is most anxious to have Congress enact an irrigation bill before it goes home for recess.

June 13, President Roosevelt sent a special message to Congress urging reciprocity for Cuba.

Foreign.

Emperor William is considering the plan of sending Prince Frederich Wilhelm, Crown Prince of Germany, to the United States to participate in the ceremonies in connection with the unveiling of the statue of Frederick the Great, which he proposes to donate to this Government. The Prince is twenty years of age, and is said to be a tactful and worthy representative of his father.

June 10, the Cambridge University at Cambridge, England, conferred the degree of doctor of laws on Whitelaw Reid, the special ambassador of the United States to the coronation of King Edward.

On the same date the honorary degree of doctor of music was conferred upon Prof. Horatio W. Parker of Yale University.

It has been suggested in Paris that, in order to commemorate the sympathy shown by President Roosevelt and the United States in the recent Martinique catastrophe, a street of Paris should be named Rue du President Roosevelt, a plate being affixed at each end of the street recording the facts.

At a meeting of citizens held in London last week it was decided that the national coronation gift to King Edward shall take the form of a fund to assist their majesties' hospital fund. A national subscription for this purpose has been opened throughout the empire.

From January 1 to June 1, 724,000 tons of sugar were manufactured in Cuba. Two hundred and thirty-eight thousand tons of this were shipped from the island and the remainder is being held to await the result of the movement to secure reciprocity.

An official statement has just been issued by the Mexican Government showing that on May 1 of the present year that country had 9,075 miles of completed railroad and over two thousand under construction.

It is reported that Victor Emanuel, King of Italy, has bought 150,000 acres of the best coal land in West Virginia. The land is situated in the Pocahontas district, and the price paid was about $8,000,000.

The Costa Rican Congress is favorably considering a constitutional amendment granting all the privileges which the United States requested in the matter of constructing an isthmian canal.

Shipping aggregating 10,823,860 tons passed through the Suez Canal in 1901. The receipts for transit dues for the first time exceeded $20,000,000.

The British government will appoint a small royal commission and institute a general inquiry into the South African war.

A correspondent of the London *Times* says that Cape Town has resolved to present Lord Kitchener with a sword of honor.

Another cable will be laid from Germany to the United States by the German Atlantic Cable Company.

Ambassador and Mrs. Choate entertained King Edward and Queen Alexandra at dinner June 11.

King Oscar of Sweden has written a volume of poems in French and will publish them in Paris.

Industrial and Commercial.

James J. Hill, president of the Great Northern Railroad, has expressed himself in favor of deepening the Mississippi River from St. Louis to the Gulf, thereby making a seaport of St. Louis. Mr. Hill believes that the demands on the railroads east of Chicago, will increase more rapidly than the facilities for handling the traffic, and the converting of St. Louis into a seaport is the best means of furnishing the middle west with adequate transportation facilities. It would also solve rate problems connected with exporting flour and other products of the northwest.

Plans are being made for the construction of a subway in Chicago which will extend to all parts of the city. An expenditure of between $40,000,000 and $50,000,000 is contemplated by the projectors, who plan to turn the subway over to the city at the end of fifteen years for a sum to be agreed upon. It is estimated that it will take three and one-half years to construct and put into operation the subway in the down-town business district.

The Pennsylvania Railroad Company has agreed to pay the city of New York $2,650,200 for the right to carry its tracks through a tunnel under the North River and across the city. This is $1,000,000 more than the original estimate, and is the largest sum ever paid by any corporation for street franchises.

Over ninety per cent of the hard coal mined in the world is produced in the United States. The total output in 1901 was 58,819,626 tons, which was worth about $110,580,896.

A new double-track trolley line is to be constructed between Baltimore and Washington. The road will be thirty-one miles long.

General.

The State of Mississippi has decided to set apart a room in the new State capitol, just being completed, as a Mississippi hall of fame. A circular letter has been sent to all the editors of the State asking them to open their columns to a popular vote to determine what Mississippians are entitled to the honor of having their portraits placed in this hall. The selections will be determined by the newspaper vote.

The directors of the St. Louis Fair have entered into an agreement with Secretary Shaw not to operate the fair on Sunday at any time. This action was necessary in order to comply with the federal act appropriating $5,000,000 for the exposition.

Concord, N. H., will observe old home day this year on Thursday, August 21.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

From our Contributors.

Is Christian Science Christian?

BY MARTIN SINDALL.

Minister Seventh Day Baptist Church, Berlin, N. Y.

THE above subject was discussed at the Methodist Episcopal Church last night (May 4) by the pastor. He and the writer are good friends, and have thus far worked in harmony. But if he believes the statements which he produced in his attempted exposition of Christian Science last night, he and I must take issue on that point. In conversation with him a few days before he spoke on the subject, I advised him to study the teachings of Christian Science more thoroughly before he attempted to present his views.

After his address I could not help but feel that he would have been wise had he followed his brother minister's advice. I purposely withhold his name, not wishing to parade his ignorance of the great and helpful truths of Christian Science beyond the length and breadth of Berlin, N. Y.

Why so large a number of the Methodist clergy are so harsh in their judgments, and so free in the use of invectives against Christian Science is a mystery; unless, perchance, they are fearful lest the rapid growth, the apparent good works, and the eagerness with which many good and wise people drink in the truths of Christian Science, will undermine Methodism. Do the Bishops of the M. E. Church live up to the following admonitions which appear in the charge given to them when they are about to enter the important duties of their office? "Be to the flock of Christ a shepherd, not a wolf; feed them, devour them not. Hold up the weak, *heal the sick,* bind up the broken, bring again the outcast, seek the lost." Before we criticise those who are trying to do all possible to alleviate the sufferings of humanity, let us study the "platform" on which we stand. It may be we shall find a *healing plank* in it! If so, stand upon it, do not step over it. And may God bless you!

In the address last evening there were so many misstatements of Christian Science beliefs that I could not help but think, "It is hard for thee to kick against the pricks." Saul was sincere in his persecutions, verily believing he did God service. But when the light dawned upon his zealous mind, he stopped kicking, and went to pulling. Saul of darkness, superstition, and persecution, became Paul the Christian, the lover of light, truth, life, and love. "Go and do thou likewise."

Our Methodist brother read 1 Timothy, 4, and used as a text the first verse. He said Christian Scientists were seeking to overthrow Christianity and to undermine the Bible. All who know even a little concerning this new-old religion will say that exactly the opposite is the truth. Can any one who believes in the teachings of Jesus Christ be said to be overthrowing Christianity? Are people who exalt the pure life of Jesus Christ, the truths of God's word, the blessed trinity, Life, Truth, Love, overthrowing Christianity? It would seem that even sinners must cry out, "No, no, no!" "By their fruits ye shall know them," said he who knew. In Science and Health, page 387, we read, "The history of Christianity furnishes sublime proofs of the supporting influence and protecting power bestowed on man by his heavenly Father, omnipotent Mind, who gives him faith and understanding whereby to defend himself, not only from temptation, but from bodily suffering." If Christianity furnishes such proofs, and Christian Scientists are seeking to overthrow it, would they be liable to speak of its proofs (work) in such commendable terms? Page 97, we read, "Christianity is again demonstrating the Life that is Truth, and the Truth that is Life, by the apostolic work of casting out error and healing the sick." And what about undermining the Bible? Just notice a few of the wise methods the Christian Scientists are using in undermining the Bible: They read it in all their services, study it *daily* in their homes, follow the truths of the Bible in spirit and in truth. At their reading rooms they handle and sell as many, if not more, Bibles than any other society. A prominent writer (not a Scientist) said, "Their sale of Bibles is simply enormous." Surely, if they go on in this way, will it not be wise to appoint committees to protect God's word that Truth may endure? Mr. —— said, "This doctrine is subversive of all that is godly." Later on he admitted that Scientists doubtless do some good. Can a thing be good and evil at the same time? A house divided against itself will fall. He said, "Mrs. Eddy's writings are noted for their scant use of Christ's teachings." All who have read Science and Health and other writings by Mrs. Eddy will smile at the above statement. She could not quote *all* his sayings. You may find them mainly in the four gospels. Read them and Christian Science literature together, and you will find Jesus quoted many times, directly and indirectly. The constitution of the United States has no quotation from our Saviour, but it is beautiful and effectual nevertheless. His *spirit* pervades it. This is true of Christian Science.

The pastor said, "Science and Health is a subtle medical disquisition." Because this wonderful book makes Truth (which is not guesswork) the standard remedy for all the ills that flesh is heir to, and gives us a better conception of our heavenly Father, and brings greater joy to our lives, it is therefore "a subtle disquisition."

There are five or six other statements to which I must reply. He said,

1. "They teach there is no need of repentance." Speaking of true seekers Mrs. Eddy says, Science and Health, page 364: "Do they show their regard for Truth, or Christ, by their *genuine repentance,* by their broken hearts, expressed through meekness and human affection, . . . then it may be said of them . . . they indeed 'love much,' because much is forgiven."

2. "They do not believe in Faith." Science and Health, page 368: "When we come to have more faith in the Truth of being than we have in error, . . . more faith in God than in man, then no material conditions can prevent us from healing the sick and destroying error through Truth." Page 297: "Faith is higher and more spiritual than belief."

3. "They do not believe in prayer." In "Christian Healing" by Mrs. Eddy, page 14: "The Lord's Prayer, understood in its spiritual sense, and given its spiritual version, can never be repeated too often for the benefit of all who, having ears, hear and understand." "No and Yes," page 48: "The silent intercession and unvoiced imploring, is an

Copyright, 1902, by Mary Baker G. Eddy.

Digitized by Google

honest and potent prayer to heal and save." Science and Health, page 9: "Consistent prayer is the desire to do right. Prayer means that we desire to, and will, walk in the light." Church Manual: "It shall be the duty of every member of this church to pray each day: 'Thy kingdom come;' let the reign of Truth and Love be established in me, rule me, and rule out of me all sin."

4. "They do away with the atonement." Science and Health, page 20: "Jesus bore our infirmities . . . and through his stripes [the rejection of error] we are healed." Page 23: "The atonement requires constant self-immolation on the sinner's part." "No and Yes," page 42: "The sacrifice of our blessed Lord is undeniable, and it was a million times greater than the brief agony on the cross."

5. "They do not believe in the Holy Spirit." Speaking of the ascension, Mrs. Eddy, on page 46 of Science and Health, says: "His students then received the Holy Ghost." Page 29: "The Holy Ghost, or divine Spirit, overshadowed the pure sense of the Virgin-mother with the full recognition that Being is Spirit." On page 332, she speaks of Him as "the Comforter, leading into all Truth."

6. "They do not believe in marriage." The chapter on "Marriage" in the Christian Science text-book is one of the most beautiful of all the book. On page 56 we read: "Marriage is the legal and moral provision for generation among human kind. Until the spiritual creation is discerned, . . . marriage will continue, subject to such moral regulations as will secure increasing virtue."

In closing he said two strange—and I may say uncharitable—things. "We have only to have a little common sense to know that in a sense all Christian Scientists are hypocrites!" "Shun it! It ought to be burned!" In "No and Yes," page 50, I find these words: "History repeats itself. The Pharisees of old warned the people to beware of Jesus, and called him a pestilent fellow." Jesus said, "For which of these works do ye stone me?" And then my brother minister exclaimed, "There is nothing in it." Then why preach against it? I am reminded of the minister who preached in a town where there was considerable infidelity. He said in one of his sermons, "I can prove to any man's satisfaction that the man who says there is no God is a fool." He met an infidel the next day, who accosted him, saying he had been lecturing against Christianity and its God for fifteen years, and that there is nothing in it. The minister replied, "You say there is nothing in the idea that there is a God? and nothing in Christianity?" "That is what I said," replied the infidel. "And you have been lecturing for fifteen years against it?" "Yes." "Well, can you imagine a bigger fool than a man who will spend fifteen years of his life lecturing against nothing?"

Negative and Positive.

BY R. P. VERRALL.

NEGATIVE and positive are to be found side by side in every branch of the tree of knowledge of good and evil, and this tree, by contrast with the Tree of Life, may be termed its negative.

Evil is the negative of Good, death of Life, sickness of health, and matter of Mind. Although we deny the reality of evil there is a seeming false claim to the existence of it which we are learning to disprove through Christian Science.

Heretofore the devil or mortal mind seems to have employed us to perpetuate and build up his false kingdom through our credulity in the evidence of the physical senses. We now through the help of Christian Science are learning to reverse this operation and compel the devil, or mortal mind, to destroy its own deceptions, and thus destroy itself.

Our highest aim as Christian Scientists is to understand God, and to demonstrate the divine Principle. Let us see how we are helped to accomplish this.

When error says, "You are suffering pain," or "in great sorrow," or "Your business is failing," we immediately look for some means of rising superior to these conditions, and ultimately the search leads to Christian Science. This demonstrates the ever-presence of a positive law, that in turn negatives every conceivable form of human discord.

Thus mortal mind in its attempt to deceive has turned the tables on itself and afforded us an opportunity to witness the healing power of Truth and Love. Again, if you are tempted by error to yield to some form of sin, if you resist the temptation you will gain the substance of Good, and avoid the penalty for accepting the counterfeit.

When Jesus was tempted in the wilderness, he proved his superiority to all material and worldly inducements, and this made his future demonstrations of divine power possible. The angels of God came and ministered to him after he had rejected the subtle suggestions of impersonal evil.

When we see a negative we may be sure that the positive is at hand also, and a quick mental denial of the negative condition will reveal the presence of the positive. For instance, one feels a violent dislike or repulsion for a fellow-creature, who has some personal mannerism that is disagreeable. If this is quickly overcome by an understanding that in reality the image of God alone should appear to us, the false sense will disappear as a cloud, and the true character of the person will appear.

This transaction has benefited both parties and injured neither. "Agree with thine adversary quickly, whiles thou art in the way with him;" was the advice of Jesus. It might seem that this process of denials might become tiresome and tedious, but it is not so, for the same problem never presents itself again when once mastered scientifically, and variety of work prevents monotony.

Eventually there will be no belief in error left, and long before then, the habit of denying error will have become so natural, that it will no longer be a task.

The greatest joy in life comes from handling the serpents of mortal mind. Moral courage and understanding turn the serpent into a rod of strength, as in the case of Moses before Pharaoh.

We should never deplore the seeming presence of discord, but always promptly deny its existence, on the ground that God alone is all in all. This demonstrates the unreality of evil and proves that there is nothing to be feared from it, when it is seen as nothing and the seeming vacuum is already filled with divine harmony.

This negative and positive, evil and good, are not both realities, but the denial of the former reveals the latter; let us, therefore, take our dominion by demonstrating the positive Truth of Christian Science and thereby revealing the kingdom of heaven within us.

June.

BY C. LOTHROP HIGGINS.

JUNE, thou month of roses and fragrance sweet,
When nature's offerings on every side we greet,
O'er hill and dale, the wild flowers scattered free,
The violet blue and the lovely fleur-de-lis.

The song birds sing as only they can sing
Their joyous notes, sweet messengers of Spring,
The brook doth babble a refrain so low
One can hear its laughter rippling down below.

The balmy air, like zephyrs sighing low,
Softly whispers as through the woods we go;
The trees, too, bend their leafy boughs and say,
"Rest here awhile in our shade and enjoy the day."

So we wander by the meadows and through the wood
Looking ever upward, knowing all is good.
Our grateful thought rises on wings of praise
For our many blessings these bright June days.

A Wednesday Evening Meeting at Camden, Me.

AT First Church of Christ, Scientist, Camden, Me., the following interesting testimonies were given Wednesday evening, April 2.

A lady testified that she was in need of help and opened to this passage in "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. "The good you do and embody gives you the only power obtainable." Evil which had seemed to manifest itself was quickly overcome, bringing great happiness.

The next speaker told of her little granddaughter dropping a flatiron on her foot. The little one had only a slipper on. At first she began to cry and then she commenced to declare the Truth with her grandmother. In a few minutes she went across the way to her home. In half an hour her grandmother telephoned to see how she was getting along, and found her busy playing. She is always very happy after a demonstration and manifests it by singing.

Another spoke of having a great deal to meet, but through the power of divine Love she is able to keep herself well, agreeable, and happy.

The next to testify said that not a day passed but she had some proof of the power of God through Christian Science. Some plans which she had made did not come out as she wished, and she seemed worried. The thought came, "Why do I not silence this by Christian Science?" The error was met and she felt more joy and peace than if things had gone as she wished to have them.

The next speaker told of overcoming fear. The fire-gong sounded and, seeing the people rush past, she found the fire was in the second house from hers. The thought came to her, "There shall no evil befall thy dwelling." All fear left her, and while the others were gone to the fire she sat quietly reading Science and Health. It is needless to say that her home was not harmed.

Another spoke of her little grandson having the croup. She was unable to reach a healer, so was obliged to take the case herself. He slept quietly all night and awoke the next morning well with the exception of a little cold which soon left. This proved to her that God is all-powerful and ever-present.

A lady told of loaning a *Sentinel* to a friend a year ago. Since then he was taken very ill, and was healed by reading the *Sentinel*.

The next speaker testified as follows: "I have great reason to thank God and our beloved Leader for the Truth which she has presented to us. The power of God was fully proven to me a few weeks ago in the healing of fever and appendicitis. I appreciated this peaceful healing more because four years ago I had the same trouble and under the care of two physicians suffered everything; taking eight kinds of medicine, having hot flannels, sand bags, and a great many other applications on my side to relieve the pain; taking nothing to eat or drink for five weeks but milk mixed with lime water. This time my side was swollen but I suffered not one bit of pain and ate everything I wanted. I am truly grateful for this healing.

A gentleman said, "Surely one cannot doubt it is our Father's good pleasure to give us the Kingdom of health and happiness."—E. L. U., Camden, Me.

Some with Jesus are delighted
While he speaks of joys to come,
Thinking that to them is plighted
After death a happy home:
But the cross, when he declares it,
"None but he who takes and bears it
Can my true disciple be;"
Few, how few, to this agree.

German.

The Lectures.

At Calais, Me.

From the point of view, it was an able, eloquent, and instructive lecture which Carol Norton delivered in St. Croix Hall, Tuesday evening [June 3] on the subject, "Christian Science is Applied Christianity." The speaker was gracefully introduced by Judge C. B. Rounds to an audience that numbered about four hundred. The closest attention was rendered the speaker to the close of his address.—*Calais Weekly Times.*

The introduction by Judge Rounds was in part as follows:—

Ladies and Gentlemen:—This is an age in which everything is brought to the test of common sense and reason, we may call it a questioning age. It is so in government. It is an age of questioning in Science. The revolutionary spirit is no less apparent, perhaps more apparent, in questions of religion than in any other department of human thought, as it ought to be. The old religions, the old doctrines and dogmas, are brought up for investigation, resulting in the announcement of new and the revision of old creeds. And while these creeds and dogmas are being dealt out for the spiritual growth of the members of the various churches, the world is still asking the question, over and over again, what have you done by word or act through the centuries for the upbuilding of humanity and the moral and spiritual elevation of the race? In proportion as these duties have been performed, the right to exist as a vital force in the world is established. Time will permit no drones in that hive.

And now a new organization, a new society of Christians, presents itself for public favor. It claims to adopt all that is good and sound in the creeds and doctrines of the older churches and to base its acts and found its faith upon the practice and teachings of Christ and the early Christians, *healing the sick in mind and body.* If it possesses this power, we cannot overestimate its importance, and it should receive the most careful consideration of all. It has for a generation been struggling into existence. Within a few years it has made great headway. Large numbers have followed it in the country and in the great cities. They are fast gaining ground in England, Germany, and other European nations. They not only claim these large and increasing numbers, but that their adherents are made up largely of thoughtful and intelligent men and women, and that their doctrines give a higher and nobler standard to religion. An abler speaker upon this platform, a few years ago, said, "I distrust all societies, all organizations, all religions that do not have as their foundation principles the building up and bettering of the human family." This society feels that it is able to meet this test and to show to the world that it has a right to exist, and give to the world a better religion than any that has existed since the apostolic age, and that their old faith and living principles answer the demands of humanity.

Such are the claims of this new organization that now asks a hearing. A few years ago, a gentleman born in this county, reared in our neighboring city and well known to many of you, went to another section of the country and became converted to this new faith. Lately he has been appointed as one of the lecturers at large of this denomination. He comes with the benediction of his people from all parts of the country. He comes to proclaim and unfold to you the old doctrines of this new religion. He comes to tell the story to you, not demanding that you follow him, not demanding that you must do this or that, but to proclaim that these doctrines are reasonable, that they are just, that they are right. He asks only that you listen carefully to the claims of this society, the doctrines which they maintain, and then determine your own duty, your own course.

I now have the pleasure of introducing to you Mr. Carol Norton, formerly of Eastport, now of New York, who will address you upon the subject, "Christian Science is Applied Christianity."—*Correspondence.*"

At Lansing, Mich.

Silas J. Sawyer, C.S.D., of Milwaukee, Wis., delivered a lecture Friday evening, May 23, in the Church of Our Father, under the auspices of First Church of Christ, Scientist, of Lansing. The audience, which was a representative one, containing people of various denominations, listened with profound interest throughout the evening. Dr. Sawyer was introduced by the Rev. Lemuel B. Bissell, pastor of the Franklin Avenue Presbyterian Church, who spoke as follows:—

"As concerning this sect, we know that everywhere it is spoken against." Such was the reception accorded to Paul on his first entering Rome, some thirty-five years after Christ's ascension, and after thirty-five years of Christian activity and missionary enterprise throughout the Roman Empire.

Such also is the reception that is accorded to a Christian Science lecturer to-day on entering any community in the land, now some thirty-five years after Mrs. Mary Baker G. Eddy, as the only Christian Scientist in the world, opened a school for Christian Science in 1867.

I feel my unfitness to stand here to-night, for at least two reasons: First, I myself, along with a million others, have been rolling it around under my tongue as a kind of sweet morsel, that this movement was neither Christian nor Science; and, second, the denomination I represent has in its highest judicatory refused to recognize this faith as in any sense a church of Jesus Christ.

But I remember how that less than forty years ago, I, as a Presbyterian boy, was prohibited from ever stepping into a Methodist Church; and I am also very well aware to-day that in the history of the Christian Church, Calvinism, predestination, and infant damnation have been very bitterly assailed, as being pretty nearly destitute of anything that could be called Christian.

"Taste and see that the Lord is good," is a favorite text of mine. There is nothing like experience to justify the ways of God to man. And it is very evident that it is a something which Christian Scientists have experienced that makes them hold to the good Lord over all, and experience which seems to be proof against all the assaults of the enemy.

Confessing my very general experience of the teachings of this faith under whose auspices we are gathered to-night, I am glad to present to a Lansing audience one who is eminently qualified to set forth that faith in its fulness. Many shades of belief are represented in this audience, but we have learned to pay respectful attention to a speaker, even while we do our own thinking; and I can assure you that not the least interested listener to-night will be myself, as for the first time I hear a lecturer on Christian Science.

I now present to you for your instruction S. J. Sawyer, C.S.D., of Milwaukee, a member of the Board of Lectureship of the Mother Church of Christ, Scientist, Boston, Mass., who will speak on "Sonship in Christian Science."

Correspondence.

At Peoria, Ill.

First Church of Christ, Scientist, gave another free lecture on Christian Science last Thursday evening [May 22], at the Opera House. The lecture was attended by a large and appreciative audience. Mr. Edward A. Kimball of Chicago, was the speaker. The lecture lasted nearly two hours, and received close attention.

Rev. T. B. T. Fisher of the Universalist Church, made the introduction in the following remarks:—

Ladies and Gentlemen:—It is my privilege to introduce to you the speaker of the evening, and I am glad to do this, because of my regard for many of the Christian Science faith, and as a representative of those not of that faith.

Through some years of experience, I have found the Christian Scientists, as a rule, excellent neighbors and friends, manifesting the gentler graces in part at least, the fruit by which their tree of faith must be judged. I am glad to stand here to-night to acknowledge sincerely our debt of gratitude to them for the new impetus and inspiration and ideals that they have helped to put into our modern religious life. We owe them much in this respect.

Professor Munsterberg, in his recent valuable work, "American Traits," points out that our civilization moves forward by the alternating waves of materialism and idealism, each moving to an extreme and re-acting, landing us at last in the middle ground, but always a little higher up and further on. Progress, therefore, is not in materialism alone. Idealism is an indispensable element. We rejoice, therefore, in the wave of idealism now taking shape and gaining momentum in human thought, showing us spiritual laws and forces, bearing us on to new wisdom, power, righteousness, peace, and health,—giving us new life.

One of the earliest and most potent factors in stimulating this idealistic movement was Christian Science.

We cannot adopt their entire theory, but such principles as we can accept we find to be corrective of materialistic excess. They prove to be, indeed, Christianity in its simplest and broadest interpretation.

In this attitude of high personal regard and grateful acknowledgment, I would present to you, as the speaker of the evening, one of the members of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., Mr. Edward A. Kimball.—*Peoria Herald-Transcript.*

At Chicago, Ill.

An audience that crowded the Auditorium listened last evening [May 29] to an exposition of the principles of Christian Science by Carol Norton, member of the Board of Lectureship of The First Church of Christ, Scientist, of Boston. The address was considered a masterly one for its insistence on the logical characteristics of the belief and for its expressions of calm confidence in the future of the church.—*The Record-Herald.*

Mr. Norton, who lectured under the auspices of First, Second, Third, and Fourth Churches of Christ, Scientist, of Chicago, and the Christian Science Society of West Pullman, was introduced by Mr. John H. Cameron, First Reader of First Church, as follows:—

Ladies and Gentlemen:—Christian Science is greatly misunderstood; many people have a wrong conception of it, and there is small wonder, therefore, that it is frequently misrepresented. This fact is well known to Christian Scientists; but instead of engendering a spirit of strife or bitterness, this knowledge simply creates a desire to enlighten,—to make clear to all the world what this is which promises so much for humanity.

That the human race seeks relief from that relentless enemy named evil which has [illegible]d it through all the centuries, is plain; for has it not drugged itself with everything in the vegetable, animal, and mineral kingdom to heal its increasing diseases, and vainly petitioned an unresponsive God for escape from the intolerable conditions in which it is fairly mired?

But now comes Christian Science, bearing the promise that a right understanding of God and His relation to man will release the sufferer; that a knowledge of the laws of God and of their application to human needs will heal the sick and destroy sin; and offering as proof of this the fact that every disease known to physicians has been healed by Christian Science.

Digitized by Google

To make all this clearer to you is the purpose of this lecture, and I now have the pleasure of introducing to you the lecturer of the evening, who is a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston,—the Mother Church, Carol Norton, C.S.D., of New York City.—*Correspondence.*

At New York, N. Y.

Second Church of Christ, Scientist, of New York, gave its semi-annual public lec ure on Friday evening, May 23. The church was well filled by an appreciative audience, who listened with close attention to the lecturer, Carol Norton, C.S.D. The subject of the lecture was: "Christian Science is Applied Christianity."

Mr. Norton was introduced by Mr. William D. Baldwin, President of the Board of Trustees, in the following remarks:—

Ladies and Gentlemen:—It is my privilege and pleasant duty to extend to you, on behalf of Second Church of Christ, Scientist, a most cordial welcome. That the old religious beliefs of the past are to-day being superseded by more progressive thought will hardly be denied. The teachings of Christian Science as found in our text-book, "Science and Health with Key to the Scriptures" written by the Rev. Mary Baker Eddy, have revealed to the world a higher sense of Love and Truth than mortals have known since the time of Jesus Christ. This revelation has brought with it a knowledge of God, an understanding of what Truth really is, and has enabled thousands to demonstrate that man, made in the image and likeness of God as the Bible declares he was made, has power over sin, sickness, and death. This power of Truth as demonstrated in the healing of sin and sickness, bringing happiness and comfort, accounts for the devotion of so many thousands of people to Christian Science. They believe what the Scriptures say is true: that the spiritual law is greater than the material law; that an understanding of the spiritual law frees one from the law of inharmony and discord. To attain this end means the study of and devotion to one Principle, which is unerring and unchanging. In all walks of life, under all conditions and circumstances, Christian Science, properly understood and its teachings lived up to, means better health, better morals, happier men, women, and children, and gives one strength to meet and overcome all the ills that flesh is heir to.

The First Church of Christ, Scientist, of Boston, the Mother Church, has provided for us a Board of Lectureship, one of whose members I now have great pleasure in presenting to you, Carol Norton, C.S.D.—*Correspondence.*

Lectures at Other Places.

At Joliet, Ill.—Edward A. Kimball, May 9.
At Newark, O.—Edward A. Kimball, May 15.
At Eureka, Cal.—F. J. Fluno, May 18.
At Fortuna, Cal.—F. J. Fluno, May 18.
At Burlington, Ia.—Edward A. Kimball, May 23.

Carry your Wealth with You.

This greatest riches—in fact, all the wealth that is of real value—must centre in yourself. You must be rich within, not outside of yourself; rich in the things that financial panics, fluctuations of trade, accidents by flood or fire, dishonesty of business associates, or errors of judgment, cannot rob you of. Your greatest investment must be self-investment: investment in health, in courage, in kindliness, in nobility of manhood or womanhood.

Whoever you come in contact with should be conscious of your wealth; its influence should radiate from every pore; it should look out of your eyes; it should exhale fragance in your speech; it should manifest itself in your deeds; it should shed warmth, light, and comfort within its radius; it should enrich your whole community. Real riches should be like the wealth of the rose, which flings out its beauty and fragrance to every passer-by. There is no stinting of its favors, no reserve of selfishness; all it has, it gives. This is true wealth. O. S. MARDEN.

In *Success.*

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Digitized by Google

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Message.

THE annual Message of our beloved Leader, the Rev. Mary Baker Eddy, to The First Church of Christ, Scientist, in Boston, Mass., is, in the broadest sense, an historical deliverance. It is historical as well in its relation to the current history of the world as in its connection with the Christian Science movement.

That a woman who is regarded as a Christian idealist—and justly so—should exhibit such a grasp of international affairs as would do high credit to the best statesmanship of the age; that the Founder of a religious movement whose very watchword is Divine Love; that a woman of a deeply poetical nature and a proficient writer of verse from her childhood; and that so close a student of the Bible as she has been for half a century, should possess also the ability to analyze, from the standpoint of practical statesmanship, the affairs of state which are challenging the earnest attention of the world's greatest minds, is among the wonders of Mrs. Eddy's character and career. She thus illustrates the possibility of combining keen intellectual perception with exalted spiritual discernment, or a happy coincidence of the ideal and the practical. The Message, will in this respect, bear close study, as it will also in its spiritual aspect.

There is running through the Message a vein of deep and serious admonition to Christian Scientists. If it be studied deeply and sincerely by us until we come to comprehend its import to each, and comprehending, act accordingly, we shall thereby best show our appreciation of our Leader's love and labor for us and for the world, as well as most effectively aid her in building up the Cause.

We trust her words will take the firm root that they should. Only by reciprocal love and the activity which flows therefrom can we prove our worth as disciples, our loyalty as children, our fidelity as the inheritors of a mighty trust. We could write much of this great Message, but why? It speaks for itself. It will do its divinely appointed work so far as it is understood and adopted, and Heaven will bless the issue.

Communion Service of the Mother Church.

Two magnificent audiences, numbering upwards of five thousand persons each, participated in the annual communion service of the Mother Church, Sunday, June 15, 1902. As announced in the *Sentinel,* the services were held in Mechanics Building on Huntington Avenue.

Last year four services were necessary to accommodate all who desired to attend the annual communion, and the attendance would have been much larger if the day on which the service would be held could have been announced earlier. Thus it was readily apparent this year that owing to the rapidly increasing interest in Christian Science throughout the world, and the consequent desire on the part of added thousands to attend the annual communion of the Mother Church, it would be impossible to have a sufficient number of services in the church edifice to accommodate all who would come to Boston for this occasion. Hence the arrangement to hold the services in Mechanics Building.

During the past year there have been added to the Mother Church 2,784 new members, making the total present membership 24, 415.

The visiting Scientists came from all parts of the United States and Canada, Australia, the Bahama Islands, England, and Germany. Hundreds of these visitors came to the Mother Church for the first time, and, judging from the happy, beaming faces that were seen on every hand, not one of them regretted the time or expense necessary to the enjoyment of the occasion.

The first service was held at 10 A.M. and the second at 3 P.M., the second service being in every respect a repetition of the first.

The singing of hymn 150 of the Christian Science Hymnal by the congregation was followed by the reading of the ninety-first Psalm by the First Reader. Then came the usual silent prayer followed by the audible repetition of the Lord's Prayer with the spiritual interpretation as given in the Christian Science text-book, "Science and Health with Key to the Scriptures." The Communion Hymn, No. 178, by the Rev. Mary Baker G. Eddy, was then sung by the congregation. After giving the necessary notices the First Reader read the Church Tenets. Following a solo, "Here, O my Lord, I'd see Thee face to face," by Miss Elsa Marshall, the message of the Rev. Mary Baker G. Eddy to the church was read by Prof. Richard Wood Cone. The reading of the message occupied an hour and ten minutes, and was most effectively done.

By way of introducing Professor Cone, the First Reader said: "We always hope and expect, up to the very last moment, that our beloved Mother and Leader will be personally present on these communion occasions. We cannot repress a feeling of disappointment when it finally becomes known that she is not to be with us. But whether physically present or absent we know that she is with us in spirit, that she never forgets or forsakes us. She is with us to-day in the spirit of one of the grandest and most inspiring messages that ever fell from human lips or that was ever penned by human hand,—a divine message coming through human instrumentality. Our brother Prof. Richard Wood Cone has been happily selected to read this message. It is now my pleasure to introduce him to you."

After the reading of our Leader's message there was presented to the congregation a fitting acknowledgment of this grand and helpful message. In response to a request for all who approved of the acknowledgment to express their assent by rising, the congregation arose *en masse.* Thus by their actions they sought to show the gratitude and appreciation which they could only partially express in words. The message was telegraphed to Mrs. Eddy and was as follows:—

TELEGRAM FROM THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, TO REV. MARY BAKER EDDY, PASTOR EMERITUS:—

At this time when Christian Scientists assemble to commemorate by their annual communion service the divine life and mission of our Lord, we turn to you in grateful acknowledgment of your inspired message of counsel, admonition, and good cheer.

For more than thirty years, your voice and pen have proclaimed that God, who "hath done all things well," has ordained for man, no law but the law of life and holiness.

You have been pleading with a stricken race for the recognition of the Christian Salvation which saves from the pangs of disease as well as the "stain of sin."

During these years, your constant plea has been the voice of righteousness, to this day and generation, entreating for a higher and more genuine morality; for the obliteration of sin; for the daily life in imitation of Christ; for a better

Digitized by Google

citizenship, the tranquillity of nations, and the reign of Christ on earth.

Your ministry has been to preach Christ's theology which promises to destroy all the works of the Devil, including sickness and sin.

Because of this gospel and your faithful ministry, many who once were dying, have been restored to life and usefulness. Others who were held in the bonds of obdurate evil have felt "the calm of sin forgiven," and those who were in the dismal tombs of misery have heard the Saviour's call, "Come forth."

Having long been side by side with you in this Christian endeavor, we know that in behalf of a suffering people your life has been an interminable sacrifice, and that along its highway you have planted with your own hand the flowers of philanthropy and good deeds, of charity, uncompromising honesty, and fidelity to trust.

Because your consistent daily life has been for us an example of lofty purpose, of unfailing love, and of humble, chastened obedience to God, we desire to thus make known our profound appreciation, and to manifest to you our reasonable gratitude and thanksgiving.

After the reading of the above grateful acknowledgment, the First Reader said: "The time has come in our order of service when we should bow our heads and hearts by kneeling in deep and sacred communion with our all-loving, all-present, and all-powerful Father-Mother God."

Then on bended knee the grateful recipients of unnumbered blessings which have come to them through Christian Science, communed with God, the Giver of every good and perfect gift.

The Communion Doxology as prepared by the Rev. Mary Baker G. Eddy was sung to the tune of Old Hundred.

The meeting closed as usual with the reading of the Scientific Statement of Being and the correlative passages from 1 John, 3 : 1–3, and the benediction, "Now unto him that is able to keep you from falling, and to present you faultless before the presence of his glory with exceeding joy, to the only wise God our Saviour, be glory and majesty, dominion and power, both now and ever, Amen."

The following Boston papers published good accounts of the meetings: *Herald, Globe, Post, Journal, Transcript, Record,* and *Traveler.* The *Herald* published our Leader's message in full and other papers published extracts from it. Space will not permit us to republish the accounts given by all the papers. The following is taken from the *Boston Herald*:—

A religious gathering rarely equalled anywhere, in point of numbers and sustained interest throughout, was the annual communion service yesterday in Mechanics Hall of the members of The First Church of Christ, Scientist, the Mother Church of Christian Science. Under this somewhat modest title is included, however, all the Christian Scientists of the world who are openly and professedly such. The annual message of Mrs. Eddy, the pastor emeritus, was read. In that message it was announced that the church membership now numbered 24,415, of which number 2,784 were admitted during the past year.

Not all of these were at the communion necessarily; but a great many were. The large hall had been packed with all the chairs and benches available, on which five thousand people could sit. Every one of these chairs was taken long before the service began. So far the count is fairly exact. It was estimated that all of a thousand more stood throughout the service, both in the morning and afternoon. The storm had not delayed many who had intended to come, evidently, and it was therefore probable that all of one third of the members of the church were present, allowing even for a generous attendance of the general public who were not of the faith.

The service was "congregational" in the sense that all had [illegible] the choruses. Judge Septimus J. Hanna, the First Reader of the Mother Church, led the meeting, assisted by Mrs. Eldora O. Gragg. The singing was led by Miss Elsa Marshall, and Prof. Albert F. Conant provided the piano accompaniment. Prof. Richard Wood Cone read the message from Mrs. Eddy, the central feature of the meeting.

The incidents of the programme were: Scripture reading by Judge Hanna; silent prayer; communion hymn, "Saw ye my Saviour?" reading the Church Tenets; solo by Miss Elsa Marshall, "Here, O my Lord, I'd see Thee face to face," and collection; reading of message; communion and communion doxology, and the reading of the Scientific Statement of Being, a presentation of the basis of Christian Science doctrine.

The service at 3 P.M. was an exact repetition of the morning service, the device being obviously designed to afford all Christian Scientists in town, numbering about twelve thousand, at the annual gathering, to participate in its privileges. Annual meetings of the church have been held in Mechanics Hall before, but this is the first communion service demanding the spacious areas of the hall for the comfortable participation of those desiring its benefits. This fact was urged as a remarkable testimony to the growth of Christian Science, in the numerical strength of its followers.

Judge Hanna called attention to what was doctrinally the chief reason for the meeting, saying:—

"The time has come in our order of service when we should bow our heads and hearts by kneeling in deep and sacred communion with our all-loving, all-present, and all-powerful Father and Mother God."

The communion service, a simple ceremony of silent communion by all Scientists present, followed by the recitation in unison of the Lord's Prayer, was an impressive moment indeed, an entirely adequate expression of religious belief, by a large assemblage.

The account published in the *Journal* was in part as follows:—

Communion Sunday was observed by the Christian Scientists yesterday by memorable services in Mechanics Hall. It is estimated that between eleven and twelve thousand people attended the morning and afternoon meetings, both of which were exactly alike. The hall will seat five thousand, and every chair was occupied when the morning service opened at ten o'clock. Probably one thousand persons were standing.

The message from the Pastor Emeritus of the church, Rev. Mary Baker G. Eddy, was the great feature of the day. It was read by Richard Wood Cone, and one hour and ten minutes was occupied in the delivery. Every sentence was listened to with almost breathless attention by the great congregation.

It was also a fact that it would be difficult to find anywhere a finer looking, a more cultured, or more thoroughly earnest assemblage of men and women than that which filled the Mechanics Hall yesterday.

In her message Mrs. Eddy made the statement that there were at the present time 24,415 members of The First Church of Christ, Scientist. During the past year 2,784 new members have been received.

Mrs. Eddy's message plainly showed that this remarkable woman has a knowledge of public affairs and of religious matters that is very extensive. This was commented on freely by those who heard the document read.

The great hall wherein the services were held was finely decorated with the national colors. Red, white, and blue streamers were festooned from the lofty ceiling. Banners were hung upon the walls. Along the front of the platform were gorgeous bunches of peonies in pots, crimson being the dominating color, although there were other tints. Palms and bay-trees made a very effective background.

A large sounding board stood directly in the rear of the two reading desks, and in front of it the several speakers

Digitized by Google

stood. This was very effective, and every word that was spoken could be heard easily in the extreme rear of the hall.

Those who occupied seats on the platform were Judge Septimus J. Hanna, First Reader of the Mother Church; Mrs. Eldora O. Gragg, Second Reader, and Richard Wood Cone, who read the message.

First in order of service was the singing of a hymn:—

Now is the time approaching,
By prophets long foretold;
When all shall dwell together,
One shepherd and one fold.

Scripture reading, the ninety-first Psalm, by the First Reader, Judge Hanna, followed. Then there was an interval of silent prayer, followed by the audible repetition of the Lord's Prayer, with its spiritual interpretation as given in the Christian Science text-book. The Communion Hymn was sung, and the various notices of meetings of the week and announcements regarding train arrangements for the many visitors from a distance. The church tenets were also read and a collection was taken. Miss Elsa Marshall, soloist at the Boston church, sang, and then the message was read.

Mr. Cone, to whom was entrusted this duty, has an excellent and far-reaching voice, and it was perfectly easy to hear all he said. He read slowly and carefully.

Mrs. Eddy, at the very close of her message, suggested that the yearly pilgrimages to her home in Concord, N. H., be discontinued. They were pleasant occasions, and she enjoyed them, she said, but she feared that the purpose of them might be misconstrued by those who might think that they were a part of the regular observances of the communion season.

Meeting of the First Members.

THE annual meeting of the First Members of the Mother Church was held in the church edifice, Saturday morning, June 14, at nine o'clock. The following message was sent to the Rev. Mary Baker G. Eddy:—

Message from the First Members to the Rev. Mary Baker Eddy, Pastor Emeritus, June 14, 1902.

Beloved Leader, Teacher, and Mother:—Our hearts are full of gratitude to God, and of rejoicing with you, because of the auspicious outlook that is before the Christian Science movement in this morning of the new century. We congratulate you upon the world-wide expansion; upon its effect in destroying race and national antipathies, and in developing true brotherliness. We rejoice in these results which approve your wise leadership, and we are happy because of the love which is everywhere springing up in recognition of your service to mankind. We congratulate you that in the courts of law and legislative halls, your righteous Cause has been vindicated and upheld.

We thank you for your unwavering faith in the Gospel of your Master, Jesus Christ, and for your fidelity to his teachings, whereby Christian healing has been again brought to light.

We are deeply grateful for the unwearied toil which you must have given to the last revision of our text-book, "Science and Health with Key to the Scriptures," which makes the book more than ever an interpreter of the Bible for all seekers after God.

We see the need for more tender compassion whereby to realize the mission of the Church of Christ, namely, the mental, moral, and physical redemption of mankind. With this in thought we can say, "Mother," with a tenderer note, and a wise filial affection.

Hon. George S. Boutwell at Tufts.

HON. GEORGE S. BOUTWELL, Ex-Governor of Massachusetts, Ex-United States Senator, and Ex-Secretary of the United States Treasury, delivered a notable address at the recent anniversary exercises of Tufts College, April 22, 1902.

In opening Mr. Boutwell said:—

"It is a singular fortune that has come to you and to me. In my youth I gave my official sanction, and without much thought of the future, to the charter of Tufts College, that was to be set on these heights, overlooking the city of Boston and the many cities that are held in her gentle embrace, and now, after a full half century, I have come to witness your prosperity, to congratulate you upon it, to receive your gracious honors, and to enjoy with you the prospect that opens before us.

"A like fortune has not come to any other person or to any other institution. It may be viewed as a noticeable event in personal and public history, and I so regard it.

"Your invitation to me to join in the exercises of this anniversary and the circumstances which suggested the invitation have led me to attempt a review of the events that have marked, and in some respects have made illustrious, the half century now closing.

"To you it has been a period of organization, of growth, of foundations so laid in liberty under law, and so freed from the influence of a hierarchy in matters of religion and from the domination of the state in all matters of thought and of teaching, as to justify the opinion that the college will advance with the advancing fortunes of the country and of the world."

In his review of the history of the recent past Mr. Boutwell thus significantly referred to some of the forces that are marking the present:—

"In these fifty years the labor organizations have become formidable forces in social and political life, the theories of Darwin have changed opinions and disturbed beliefs as to the origin of man, and a new religion or a new form of Christianity under the lead of a woman, claims a following of one million in the United States, and fellowship of many thousands in other parts of the world. These movements, whether they are vagaries or realities are of a nature to endure, and they may not be passed without observation."

In so far as Mr. Boutwell intimates that Christian Science may be among the "vagaries," we may be pardoned for the passing remark that a careful inquiry into the great practical work that Christian Science is doing, will convince him, as it will all other large-minded persons, that Christian Science cannot justly, even by hint or insinuation, be classed among the vagaries of these times.

Mr. Boutwell thus happily illustrated the growth or evolution into larger views and more liberal outlook:—

"Some of the text-books on astronomy of the first third of the last century contained this observation in substance: On a clear night five thousand stars may be seen in the heavens. The vision of the naked eye has not been enlarged, but the scope of the human eye has been extended immensely, and the testimony of the astronomer, Mr. Simon Newcomb, whom I have consulted, must be of interest to all of us.

"My two questions were these: How many stars might have been seen or marked in 1850 with the best instruments then in use, if the entire sphere of the heavens could have been surveyed? and how many could have been seen or marked in 1900 with the aid of the instruments then in use? To the first question he replied: 'From thirty to fifty million might have been visible with the best instruments in 1850, and from one hundred and twenty to two hundred million can now be photographed.' But he adds: 'This is only a rude guess, much like trying to estimate the grains of sand on a sea beach.'

"Thus through photography there has come an immense enlargement of our horizon, and we have passed out from the narrow view which prevailed at the opening of the nineteenth century that the starry host and the unwearied sun were created for the embellishment of the earth on which we dwell. Every enlargement of our knowledge of space renders any conception of the infinity of space more and more difficult."

Bible Class of Advanced Thought.

THE Bible class of Judge Stockbridge, at the Associate Reformed Church, will to-day listen to the views of one of the leading Christian Scientists in local circles. This class is composed of from fifty to seventy members, as the attendance varies, and since January 1 has each Sunday heard some prominent advocate of a sect assertedly founded upon the life and teachings of the Christ. These gentlemen have, in turn, explained the tenets of belief and pleaded the cause of each individual's faith.

Here is an exceptionally liberal method of studying Christianity in all its various trends and sections, the sole exceptions being made in the case of Orthodox and Reformed Judaism, which eliminate the story of the Christ, and are founded exclusively upon the books forming the Old Testament. The idea embodied in the course of this Bible class is one that should develop unusual proficiency in religious matters, and, while not evangelical in character, must, nevertheless, strengthen the student's religious convictions if research and knowledge are promoters of Christian faith.

There is a reminder here of the first sermon preached by the disciple to the Gentiles—Paul of Tarsus—who, upon reaching Athens, which had reached the most advanced state of intellectual development then upon the globe, found upon the Areopagus or Hill of Mars an altar dedicated to the unknown god. Here the intellectual men of Athens assembled to hear those who wished to preach or instruct. Here Paul found his most attentive audience and dedicated the altar to the unknown god to the true and living Divinity whom he served.

The spirit of tolerance shown in Athens and the lecture room of the Associate Reformed Church is the same. It does not destroy faith, but roots it more soundly. It cannot be said that such a course should be suggested for those of a weak faith, for it might prove unsettling; but to the strong and able this liberal study of each man's opinion as a representative of sincere worshipers of the same God is a step in accord with modern Christianity, in which it is gradually becoming understood that sincerity, faith, and similitude of the Christ life outweigh familiarity with dogma and intolerance of another's belief.

Baltimore Sunday Herald, June 8, 1902.

Following are the introductory remarks of Judge Henry Stockbridge before his Bible class on the occasion referred to.

We reach this morning the concluding topic of the present course. Few, if any, of the movements in the religious thought of the last half century in our country is better worth our study, and none, unless it be the Salvation Army, has shown a numerical growth in any measure approaching it. The growth of Christian Science has been phenomenal in another respect. The Salvation Army has gone out and sought to draw in the most degraded element of the community, the social outcasts; Christian Science, on the other hand, has found its ranks swelled from among the most educated classes in our land. It has been the fate of Christian Science, as it has been of so many other religious movements at their inception, to encounter persecution, sneers, and ridicule; but it has also been its fate to be too often misconceived or misunderstood. Derision of any religious movement is bad enough, but an opposition founded on ignorance is worse, for the reason that it also injures those who would attempt to criticise out of their ignorance.

I do not expect that all here this morning, even if we fully fathom the doctrine and teachings of Christian Science, will be disposed to accept it, but I do feel that by a larger and more accurate knowledge of the principles for which it stands, and of the good it is doing and attempting to do, we shall all gain for ourselves in Christian charity.

We are exceptionally fortunate in having with us one who from long experience and diligent study can tell us of Christian Science, not merely as to what its principles are, but can state them with as much authority as any one in this city, Mr. Hermann S. Hering of First Church of Christ, Scientist, of Baltimore.

Among the Churches.

Report of Progress in Manchester, Eng.

Eighteen months ago two members of First Church of Christ, Scientist, London, came to Manchester to undertake some urgent cases which the medical fraternity had given up. The demand for the healing increased so rapidly that the workers were unable to leave, and after a few months, over a hundred cases had been healed.

Meetings were held in their apartments, the first attendance numbering five, but before a month had elapsed it increased to thirty. This growth necessitated larger quarters, and also showed the workers that there was a great demand for the establishment of Christian Science in the city. It was therefore evident they must make their home in Manchester while such work required them.

At this period great opposition to Christian Science was met on every hand and no place for meetings could be procured. Therefore a time came when the Christian Scientists had no place to meet in. At last a room at the top of a large warehouse was procured, and meetings were held there for nine months. In October, 1901, a reading room and a room for the services was opened at 24 Dover Street, the residence of the Readers, in one of the most central and desirable positions in the town. The room in which services are held has a seating capacity of about eighty and it was believed it would accommodate them for some time to come, but on occasions it has been overflowing.

The reading room which has now been open only seven months has sold Christian Science literature to the value of £93. The work that this reading room is accomplishing is not confined to Manchester, for it has become a great center for the north of England, and applications for literature and healing are received almost daily from different cities and towns of the north.

"Science and Health with Key to the Scriptures" and *The Christian Science Journal* have been placed by the students in several of the free libraries.

It is interesting to note that this time last year the Readers were the only practitioners in Manchester, but now there are several earnest workers who have given up all to carry this gospel of healing to others, and they are doing many wonderful works. Though the cause has progressed so rapidly, it has not yet been organized into a church, but this will be accomplished in a very short time. It is evident that before long our present quarters will prove too small, and therefore the Christian Scientists are looking forward to building their own little church, for which a site has already been chosen and a building fund opened.—V. M.

New Quarters at Kingston, Ont.

The opening of the new Christian Science Hall, corner of Princess and Sydenham Streets, took place yesterday [Sunday, May 11]. Services were held both morning and evening, and were largely attended. First Reader, T. J. Kinnear, C.S.B., delivered an address of welcome. "The Holy City," was sung as a duet, both morning and evening, by Norman Fraser and Earl Jenkins, and in the evening R. McClymont contributed a solo. The fine new hall was beautifully decorated with flowers whose perfume spread throughout the building. The two new pulpit desks are models of neatness, and are the gift of a city friend of the church. In connection with the hall are several large rooms, used as reading rooms, vestry, etc. The Scientists feel very proud of their new home.—*Kingston Daily Whig.*

Selected Articles.

"Many Things ye cannot Bear Now."

FROM *The Church Standard* we republish the following extract from a paper entitled, "The Development of Divine Truth; or, the Gospel for To-day," by Rev. A. R. Keiffer, D.D., of Bradford, Pa.

Under the guidance of the spirit of truth there are successive revelations, as the race becomes prepared for them, for every age and for every man. They never come too soon; they never come too late. The spirit makes no mistakes, does not try to impart a truth before there is a readiness for it—step by step—according to present need and capacity. In his guidance the withheld completions of truth are wisely withheld. Even liberty enslaves those who are not fit for it. We get more truth when we are able to bear more. Only we are never to be satisfied with what we have and consider it complete. . . . As F. D. Maurice says, "God will not have us be satisfied with our advanced knowledge or great discoveries, but will always be showing us, through His spirit, things that are coming, giving us an apprehension of truths that we have not yet reached, though they be truths which are the same yesterday, to-day, and forever."

Why, just think for how many centuries men have been studying the spoken words of Christ, and yet they are newer, and deeper, and diviner to-day, than ever before. Therefore, if he has nothing new to say to you and to me, it is because we are not listening, not because he is not speaking.

He speaks the truth as we are able to bear it, that is, understand, appreciate, use it. If we are content to live on the revelation of yesterday, we miss the revelation of to-day. Fresh food for our minds and hearts is ready for us when we are ready for it. He taught us to pray "give us this day our daily bread." Fresh bread for each fresh day is ours for the asking and taking. If any prefer the hard crusts or stale bread left over from former days, so be it. Christianity has never failed to meet the new demands born of new circumstances; Christianity has never been found irreconcilable with the new discoveries of every age; and we find the key to this in the fact under consideration, that Christ offered this Gospel at the beginning, not as finished and complete but as the germinal prophecy of all needed truth to be afterward given by His Spirit, as they would become ready to receive it.

The new is not true unless it is the development of the old. The old is not worth preserving, except as the root of the new flower. When fixity and freedom, or stability and progress are not joined together in proper proportion there is trouble. Churches and individuals become dangerously conservative or dangerously radical. A conservative mill-pond whose waters are stagnant, kills more people with the typhus it breeds than the radical river kills, when it rushes in a flood over its proper bounds. When St. Paul says, "The letter killeth, but the spirit giveth life," he refers not to the Old Testament alone. It is true of all words. To know words we must know when, where, and under what circumstances, and by whom they were spoken.

Christian Science Expounded.

To the Editor of the *American*.

In your esteemed paper for May 3 you have an article under the heading, "A Heathen's View of Us." In this article you point out that there are both curious and superstitious things in America as well as in China. This is no doubt true, but when you undertake to classify Christian Scientists under this head we most strenuously object. For there is nothing curious about Christian Scientists except that they are, as God has said his people would be, "a peculiar people." They firmly believe in and adhere to their teachings that there is but one God, one Power, one Life and Truth, and that man is the image and likeness of God, and is not a slave to sin, sickness, and death; but he is as the Bible teaches us, the child of God, with dominion over all.

Christian Science is anything but a superstition, or a religion based on ignorance and abnormal religious feeling and fear. In fact, it is the only system of religion that fearlessly, honestly, and successfully has grappled with this arch-fiend—superstition—which has for so many thousand years held mankind in its merciless grip of fear, sin, and sickness and death. It is the religion of to-day that has taken hold, and with success rent in twain the veil of superstition and again brought out the true nature and character of God, and man as His image and likeness,—perfect, unfallen, free, and subject only to God.

Christian Science compels all faithful followers to put aside forevermore all superstition and be wise; to know God as all in all, and man as living, moving, and having his being in spirit not matter. In fact, it is a most natural and practical religion, when once understood and demonstrated, for by it you become the master of all forms of evil.

When you say that the Christian Scientists teach that if one person puts his mind on another that the deception of the evil spirit regarding the presence of disease will be circumvented, you say that which is not true. This is not Christian Science.

Christian Science teaches that sin, sickness, and death are destroyed by divine Mind only, and not by the so-called power of the human will or mind.

You may not appreciate the Rev. Mary Baker G. Eddy, Discoverer and Founder of Christian Science, and her work, but some of us do, because we have through her teachings been snatched, as it were, from the jaws of death and given back our life, health, and strength. Through her teachings, too, man stands forth on the everlasting rock of Truth, holding the scepter of power over evil. Christian Scientists have all the more confidence in her judgment and wise counsel, because of her long years of deep experience and ripe knowledge. That she has been the recipient of the blessings that God has promised all who will faithfully and truly serve and honor Him is true. But how does she use her means?

She has given much of her income away for years, and steadfastly refuses to accept a dollar for the invaluable services that she constantly renders to the cause of Christian Science, which in turn blesses the whole world.

The statement that she has put herself up as the high priestess of this doctrine is not true, for she has done nothing of the kind. She, as well as her numerous followers, are fully satisfied to let our just and loving heavenly Father, who alone knows the value of her life and work, continue to honor her as He sees fit.

Thanking you for your courtesy, I am yours respectfully,

SEVERIN E. SIMONSEN.

In the *Waterbury* (Conn.) *American*.

Communion Service at Concord, N. H.

THE semi-annual communion and reception of members was fittingly observed yesterday (June 8) by First Church, of Christ, Scientist. Christian Science Hall was crowded with the local members and their visiting friends. The floral decorations were profuse and beautifully arranged.

The subject of the discourse was "Sacrament," and as is customary in all Christian Science Churches, consisted of readings from the Bible and from the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.

At this service the tenets of the Mother Church in Bos-

Digitized by Google

ton, which were written by Mrs. Eddy, are read, the last of which is so in keeping with the character of the day that it fitted beautifully into the sacred occasion. It is as follows:—

"We solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus, to love one another, and to be meek, merciful, just, and *pure.*"

Visitors were present from London, England; the Bahama Islands; Denver, Col.; New York City, and elsewhere. Ten new members were received into the church.

The Concord Monitor.

Order for Concord Granite.

MR. S. S. BEMAN, a leading architect of Chicago, was in town yesterday and placed a seventy-thousand dollar order for granite with one of the local granite companies, to be used in the construction of a beautiful library building in the west, for which he is architect. He and his wife are devoted Christian Scientists; both spoke enthusiastically of the beauty and charm of Concord and our little Christian Science Hall. Mr. Beman designed the plans for the three Christian Science churches that have been built in Chicago, each having a seating capacity of about fifteen hundred.

The Daily Patriot, June 7, 1902.

The editorial columns of the same issue of the *Patriot* contained the following:—

Elsewhere in the columns of this paper may be found a news item telling of the placing of an order for seventy thousand dollars worth of granite with a local firm for the erection of a building in the far west.

The order comes from one who is a Christian Scientist and who in the past has used many thousand dollars worth of the product of the Concord quarries for the construction of costly Christian Science edifices.

There is much in this news that should be of interest and profit to our people. It leaves money with us, it develops our industries, it gives employment to the many who are worthy, and by and through these things aids trade and contributes in a material way to the success of all.

The hope is that Mr. Beman may come and come again and at each time bring increased orders. There is a double value in things of this kind, because every cent of the money that comes remains right here in Concord, save what is invested in machinery for the development of the work.

Unquestionably the placing of the order here is due to the fact that Mrs. Eddy makes her home with us, and the thousands and thousands and hundreds of thousands who love her because of the good she has done and is still doing, and because of the happiness the acceptance of her discoveries has brought to them, are pleased to come to the city where she makes her home, to secure such material as is possible for the churches which they dedicate to God and to Christian Science.

A faithful minister in a small country parish, returning from prayer-meeting one night was asked by his wife, who was not able to go with him, how many were out; he promptly answered, "One hundred." His wife knowing that was an impossibility, as the parish was small, asked how that was, and he replied, "The sexton was there, and he was nothing, and I was there and I was nothing, and God was there and He was one; one and two ciphers make one hundred."

How true that is! Even a string of ciphers encircling the globe count as nothing, but if you put a one before it the value is incalculable. So it is with us. If we allow ourselves to be a detached cipher, we are nothing, but if we attach ourselves to God, the One, then we become of some value to our God, ourselves, our family, and the community in which we are placed.—W. A. L., Portland, Ore.

Testimonies of Healing.

Seven years ago last fall I heard the "still small voice" calling me to Truth. I was taking care of my father, in his last illness. Every material support was being taken away from me, and I did not know there was any other. I stood where man's extremity is God's opportunity. In the dark hours of the night, I seemed to hear a voice say, "It is Christian Science that you need." I heard it several times.

Two weeks after my father passed on, I wended my way to a Christian Scientist's house to borrow a book that would give me some knowledge of Christian Science. I did not know the name of our text-book, nor had I ever read a word of Christian Science.

The Scientist gave me a cordial welcome, and was glad to loan me the book. She asked me if I wanted treatment, for to sense I was a physical wreck. I said, "No." Were there any questions I wished to ask? My reply was also, "No." It was a spiritual longing to be satisfied.

The thought of being healed never entered my mind. How eagerly I walked back to my sister's home to commence reading this book. How well I can remember the peace that stole over me, as I read the first line of the preface in Science and Health. When I finished the paragraph, I said to my sister, "I have found the Truth." After reading several pages I said, "If this is the Truth, I do not need my glasses." I took them off, and have never had them on since. The next day I threw away all the drugs I had, which was at least a market basket full. My sister was amazed. I told her it was Christian Science or death. I did not care to live, and was tired of doctoring.

I can see now why the demonstration came so quickly. In two weeks I was entirely healed of all my physical ailments, which were five in number, by reading Science and Health. My friends could not understand the transformation.

It did not take me long to become identified with the church here, and to send my mite to the building fund of the Mother Church.

I never knew what peace, harmony, and happiness were, until I came into Christian Science. In one year I was self-supporting. That means much to me, as I was always looked upon as an invalid, not able to do anything, and was not fitted to meet the world. All I am and all I have I owe to Christian Science.

A little more than a year ago I went through class with one of our Leader's loyal students, and I feel as if I had been born again.

My heart overflows with gratitude and love to our dear Mother in Israel, Mary Baker G. Eddy, for giving to the world this blessed truth that makes man free.

MARY M. MYERS, Jamestown, N. Y.

It is with pleasure that I give my testimonial, for I deem it but just to acknowledge the good I have received from Christian Science. About fifteen years ago I said many times that if any one could cure me of a rupture I would give him a hundred dollars. The rupture was caused by a fall when a child. When I was twenty years of age it became quite serious and troublesome, and I was obliged to wear a truss all the time.

Four years ago, while at work, I jumped off from a machine about four feet high, which caused more trouble. The physicians finally concluded that an operation was my only hope, although my wife begged them not to take me to the hospital, and I resisted with all the strength I possessed. In the mean time the doctors had gone to get the operating room in readiness for me.

In this extreme moment, which proved to be God's opportunity, my wife remembered Christian Science, having had Christian Science treatment at the birth of our youngest child. She immediately sent for a Scientist, who arrived

Digitized by Google

on the scene just after the ambulance had arrived to take me to the hospital. The Scientist took in the situation at once, and realized that divine Intelligence alone would govern, assuring me that I should remain at home if I preferred Christian Science treatment.

We were in a tumult of fear, the three children all crying, and pandemonium seemed to reign, until Truth spoke the "peace, be still." The Scientist assured us that all things were possible with God, and that everything would very soon be adjusted harmoniously. The ambulance was sent back with the officers, who were disappointed and impatient at having to give way to the Scientist. Soon after the doctor returned in an outraged state of mind, and predicted dire results if the operation were not performed at once. My wife, now quite calm, told him that we had determined to depend upon God for help. The doctor replied, "That is all good enough, but that will not cure a rupture." He added, "I know what you have been doing; you have called one of those Christian Scientists. I want to see her and explain to her the great responsibility she has taken upon herself in delaying this operation." After arguing and threatening for nearly an hour with the Scientist the doctor withdrew, allowing us again to settle into peace and quiet, after which the Scientist also went home. This experience took place on Saturday evening. Tuesday I was well enough to go down town, where different friends met me with surprise, as they had been informed that I was at the hospital.

It is now four years since Christian Science healed the rupture and I have never been troubled with anything of that kind since. The present help in time of need healed me, and saved me from the surgeon's knife, for which I thank God every day. I am also very grateful to our beloved Leader, Mary B. G. Eddy, and her faithful followers, through whom the divine power which heals the sick was revealed to us. Since being healed my wife and I have been members of First Church of Christ, Scientist, of this city, and about a year ago, I am pleased to say, we had the privilege of uniting with the Mother Church at Boston. We are both striving to live and learn more of this blessed Truth which makes free.—JOHN ROBINSON, Sheboygan, Wis.

I went from my home in Maine to a western state to study medicine with a physician who was called very successful. Circumstances had made me feel that I was a useless member of society, and I had no interest in life except the desire to be of use to others. I had been a church member and worker for ten years, but each year I grew more and more unsatisfied with my work, as I could see so little result. The Bible grew so hard for me to understand that I closed it and laid it away for weeks at a time. Yet I was searching for something I could really believe; I hoped for many things but I really believed very few, so I read orthodoxy and heterodoxy, Spiritualism and theosophy, Emerson and Darwin, etc. I found good people in every belief and I fearlessly investigated everything that came my way. I was all ready to attend a Christian Science service when asked to do so by my cousin whom I was to visit a few weeks before beginning my study of medicine.

Heartsick, sad, weary of living, starving for spiritual food, the service fed me with the Bread of Life. Tears filled my eyes when I heard the spiritual interpretation of "Give us this day our daily bread," and a prayer of gratitude went up to God that I had been led to that place. During the week I read Judge Ewing's lecture, believing and seemingly understanding every word, and began to read Science and Health. By the next Sunday I was sure Christian Science was that for which I had traveled so far.

When I finished reading Science and Health, several diseases which I had had for years, and always expected to have, had vanished, among them corns and bunions, which had been very troublesome to me in days before, but have never troubled me since.

Of course there have been battles with error. We learn the wisdom of Mother's words, "The song of Christian Science is work—work—work—watch and pray," but Truth is ever victorious, and I can say that the past two years have been the happiest of my life and I believe the most useful. I made a long visit with my relatives and Scientists, and came back to my home to study with and work for the Great Physician.

I attribute my quick acceptance of Christian Science and healing to my lack of prejudice. Mrs. Eddy says on page x. of the preface to Science and Health, "The unbiased Christian thought is soonest touched by Truth, and convinced of it."

I send my testimony in the hope that it may help some other unsatisfied heart to investigate this Science without prejudice and find, as I did, health and the "peace which passeth understanding."—B. M., Liberty, Me.

For some time I have felt that as an acknowledgment of my gratitude to God for the manifestation of His healing power in our home, also in this vicinity, I should contribute a little from this field that may be encouraging to those seeking the Truth.

I shall ask space for only one case, which is that of a babe a little over a year old. On May 24, 1901, I was sent for by the parents of the child, who thought their loved one was passing away. Several who had seen the babe before Christian Science was appealed to said it could not live. Then all material aid was set aside and Christian Science resorted to, as there seemed to be no other chance of help. On arriving at the home I found the child in a very critical condition. Its face was so much swollen that both eyes were closed tight and could not be opened, and the babe was lying motionless.

I saw the necessity of implicit confidence in God to do the work. Upon returning to the house again a few hours after having given the first treatment I found that the child could move one eyelid. Next day both eyes were open, and the swelling was much reduced. In four days the child was perfectly healed.

I feel that all who have grasped in a degree, the light and understanding of God's allness, as revealed in "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, owe to her endless gratitude for what she has done in bringing the light of Christian Science to the world, and enabling us to follow in our dear Master's footsteps.

CHARLOTTE CRESWELL, Orangeville, Ont.

For sixteen years I was never without headache. Indigestion made it impossible for me to eat anything but the simplest food without suffering, though I took medicine every day. I also was a constant sufferer from a so-called incurable trouble which at any moment might confine me to my bed. Specialists were appealed to with discouraging results. Finally the decision was arrived at that a most serious operation was necessary, which it was hoped might give me a moderate degree of freedom from suffering.

The great fear and horror I had of such an operation, made me willing to try Christian Science treatment, which had cured one whom I knew. The relief from pain after the first treatment, I shall never forget. I fully expected the pain to return, but it never has. The terrible conditions which the doctors were sure existed, have all disappeared, and I am free indeed. I cannot express my gratitude for the understanding of the Principle which heals all our diseases. Whenever some error has been overcome by my understanding of Truth I feel as though something very precious had been born to my consciousness.

To our dear Mother, who has made it possible for me to realize such happiness. I hope to express my gratitude by helping others to know the Truth.

LOUISE K. DENNISON, Brooklyn, N. Y.

Religious Items.

The *Congregationalist* prints portions of a paper on "The Outlook for Christian Unity," by Rev. Edwin B. Lewis, rector of St. Paul's Church, New Haven, read before the conference of Congregational Churches of Connecticut, in which he says:—

"Our Christian world is outgrowing some of the ills and limitations of fierce denominational activity. . . . The appeal to some great and simple truth of the gospel stirs men more than the appeal to denominational pride. . . . The clergy have been trained in divinity schools which are largely training men to work and teach in a world which no longer exists. All other professional schools, except those of theology, have fitted themselves to the demands of the new time. . . . It becomes us to preach the great saving and moral truths of the Gospel which we hold in common, rather than to emphasize the points upon which we differ. This may seem to be almost unfaithful to our denomination, but you will find that the denomination which preaches the Gospel of Christ best and lives it best will have the largest place in the regard of the people. There need be no fear for the fortunes of a religious body in which the Gospel is truly preached and lived. . . . The hope for unity lies in a Church large and comprehensive enough to include all who accept and serve the Lord Jesus Christ as he is revealed in Holy Scripture. The denomination which cannot fill out that conception of the Church will not last. The Church which is trying to fill it out is working towards unity. . . . Religion and civilization require that the moral and religious forces of the country act together. Influences are at work, silent, by many not observed, but effective. And the cause is the cause of one Master and our common Saviour."

The Rev. Charles Stelzle has an article in *The Outlook* on "The Workingman's Church." Following are some excerpts from the replies of the three hundred labor leaders to whom he "wrote some months ago with regard to the attractiveness of a Church managed exclusively by and for workingmen:"—

"The man who can get up a creed or a society which will take the selfishness out of the hearts of men would be a world-beater. . . . Jesus said it all, 'Love one another,' and men have gone on hating each other ever since." "The Gospel should not be preached for the benefit of classes. It should be expounded fearlessly to both Dives and Lazarus. It might create an impression in the minds of some that there are two Gods—one for the rich and another for the poor man." "The Church does not touch the life of the world to-day." "Pleasure excursions to the clouds must be given up, and the energy thus expended should be directed to solving the tremendous problems that the Nineteenth Century has bequeathed to us." "Workingmen feel that they have had to fight their own way to any improvement in their moral, mental, and physical conditions, absolutely unaided by the Church and sometimes in spite of it."

Rev. Dr. D. W. C. Huntington, says in *The Christian Advocate:* "Students generally among us have been led to distinguish more particularly than ever before between the essential and the non-essential in Christian teaching. They understand that the fact of inspiration is of greater importance than its mode. Whether Moses wrote all the Pentateuch; whether there were two Isaiahs or only one; whether the inspired writers incorporated historical and genealogical material which they found at hand, may be interesting subjects of investigation to Biblical critics; but, however decided, they in no way determine whether God has revealed Himself to man, or man can be saved through Jesus Christ. This criticism has, however, produced a modified view of inspiration. This was needed. Strictly speaking, God inspired men, not books. In the words of your lamented Haygood, 'Why should any lover of the Bible contend one moment for a verbal and mechanical inspiration? Had that been necessary in order to give man saving truth, God would, we cannot doubt, have used "holy men" as mere pen-points. In that case, however, holy men would not have been necessary. One man would have done as well as another, if he wrote a good hand.' "

Hostility and partiality are frequently related to each other in serious ways, and in serious matters. Many a mental quarrel results from onesidedness of view. Honest and good men clash because they see things only partially. The cure for this is not in scolding, or exhortation, but in illumination. . . . It was a partial view of Christ which Saul had, till he met his Lord on his way to Damascus. Then his hostility to Christ ended and his zealous heart was filled with a spirit of honor, service, and devotion possibly never exceeded. What is needed, very often, is a correction of view to end all hostility. A converted vision of the Christ will many times issue in a converted life. But the true vision of Christ is not always possible to the minds of men till a change in the spirit of the man is wrought. To love Christ—is a condition of seeing him truly—as certainly as seeing him is a reason for loving him. Blessed are the pure in heart, for they shall see God.—*The Examiner.*

Robert E. Speer has an article in *The Congregationalist and Christian World* on "Why Fewer Candidates for the Ministry?" in which occurs this paragraph: "A good deal of responsibility for the falling off in number of candidates for the ministry rests upon the ministry. The ministry does not urge the matter. Where the fire of a divine passion burns in a man he will kindle a like fire in others. This is what keeps the number of foreign missionaries from decreasing. The minister who believes that his calling is the greatest and most divine on earth will seek to lead young men into it with care, but yet with unceasing concern. Hundreds are doing this to-day, and hundreds are not doing it. It is more because ministers feel the disadvantages of the ministry than because the young men feel them, that there are now fewer candidates for the ministry."

Dr. Lyman Abbott says in *The Outlook* in a sermon on "A Call to Battle:" "Is not Christ the one that redeems the world and destroys sin and brings us into the Kingdom of God?. Yes. But how? How? By fighting the battle for a coward folk that will not fight for themselves? by doing work for an idle folk that will not work for themselves? . . . Our Christ does redeem the world, but it is Christ in humanity. His death is not in lieu of our death, nor his life in lieu of our life. He cannot die in our place or live in our place. . . . Christ is not my substitute to live and to die in my stead; he is the type of humanity, and I am to die and live with him. . . . It is Christ *in* us who is the hope of our glory."

The spiritual worth of any experience is not at all determined by what it appears from the outside. It is the resultant spiritual life which is developed or strengthened by the event, that measures its spiritual import. All the affairs of our outer lives are followed by a certain effect upon spiritual character and life, which is a sort of spiritual residuum of the natural events of life, and which measures their spiritual value. . . . It is a spiritual residuum of character—that is, of receptivity of divine life—that determines how valuable they are really, when judged from their spiritual standpoint.

New-Church Messenger.

J. H. W. Stuckenberg, D.D., LL.D., says in *The Homiletic Review:* "God as Father of all and the brotherhood of man must be emphasized in the arrangements of God's house and in the relations of capital and labor. The best friends of the Church must, in love, expose its grievous errors and mistakes, in order to bring about the remedy [for the alienation of the workingman]. Those seem to be in the right who believe the Church needs a deeper and broader reformation than that of the sixteenth century."

The man who goes before a congregation with a theory which he attempts to prove will speak to the indifferent. The man who stands before his people the glad embodiment of a profound conviction; the confident messenger of something he knows to be true, will need no clap-trap to keep his hearers awake. The man who has only a "guess" or a "hope" or even a "think so," has no place in the modern pulpit.

The Universalist Leader.

The Christian Register says: "There are signs in many of our religious exchanges of a reaction from the old-fashioned positive statements concerning the nature of the future life and the terms of admission to heaven. One result of this change of view will be an increased interest in the kingdom of God which Jesus and his disciples strove to establish, here and now, upon the earth."

"The presence of the Holy Spirit might yet be useful in Church councils, and were His presence truly invoked much of the sharpness and bitterness of doctrinal discussion would be allayed," says the *Christian Advocate.*

President Tucker, of Dartmouth College, is quoted as saying: "The estrangement, if not alienation, of the labor population of the Christian nations is chargeable in no slight degree to the unfaith of the Church."

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only.*

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each $3.18
Two to Twelve books to one address, each, prepaid . . 3.00
Twelve or more books to one address, each, prepaid . . 2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India paper, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75
Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth) each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,
Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid . . 2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9 00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Published by The Christian Science Publishing Society,

95 Falmouth Street, Boston, Mass.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REV. MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical healing as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States, Canada, or Mexico. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons, which are read at the Sunday Services throughout the year in all the Christian Science Churches.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Orders have been issued by the Navy Department to fit all ships of the North Atlantic station, now undergoing repairs, with spars for receiving wireless telegraph messages. This is part of the preparation for the war practice to take place in the West Indies next winter by the combined North Atlantic, South Atlantic, and European squadrons. Before installing the wireless apparatus on each ship Admiral Bradford will conduct experiments at Washington and Annapolis, and between these two points, to determine the relative merits of four wireless telegraph systems—one English, one French, and two German.

Postmaster-General Payne is urging the passage of a bill providing for the adoption of some form of postal currency. He thinks that postal checks should be provided which would be more easily obtained and cheaper than the present money order. The extension of the rural free delivery requires a cheap, convenient, and safe method for transmitting small amounts through the mails. Postal checks would be available in those sections not heretofore covered by the money order offices or the banks of the country.

In response to the Senate resolution calling for information as to the cost of the war in the Philippines, Secretary Root says the total expenditure up to date (June 19) is $170,326,586. The expense of the war is really less than this, he states, as the cost of large and valuable properties which still remain on hand in the Philippines for use, is included in the above amount.

The scope of the new fiscal agencies at Hong Kong and Manila granted to the International Banking Corporation and the Guarantee Trust Company, both of New York, has been widened so as to include all of China and both the civil and military governments of the Philippines.

President Roosevelt intends to inaugurate in the navy the same principle he has in the army, that notwithstanding the long service of the officer, the man that is best fitted for the position shall have the place. This means that young men may be promoted over older ones.

By a vote of 42 to 34 the Senate adopted the Spooner substitute for the Hepburn Nicaragua canal bill. The Spooner substitute authorizes the President to build an isthmian canal, preferably on the Panama route; but if not there, on the Nicaraguan route.

A bill has been introduced in the United States Senate appropriating $10,000,000 for the purchase of 2,000,000 acres of land for a national forest reserve in Virginia, North Carolina, South Carolina, Alabama, and Tennessee.

The State Department has received from the German Government a formal invitation for Major-General Corbin, Major-General Young, and Brigadier-General Wood to attend the fall manœuvres of the German army.

The United States commission has made English the official language of the courts, custom service, and court of appeals at Manila.

Foreign.

For ten years the Graham Insurance Company of London refused to pay the income tax on foreign dividends not transferred to England, and contested payment from court to court. The sum demanded by the Government at the end of last year was nearly $260,000. The House of Lords has finally decided in favor of the company. Other companies are examining their books and the Government may be compelled to repay much of the income tax collected from these companies.

The International Sleeping Car Company of Russia has arranged with the Chinese Eastern Railway to run a through car from Moscow to Pekin once a week, thus enabling passengers to make the trip from London to Pekin in twenty days.

In the Transvaal a total of 11,225 men surrendered and 10,813 rifles were given up, and in the Orange River colony 5,395 men surrendered and 5,280 rifles were turned in. The figures for Cape Colony have not been fully received.

It was stated in the House of Commons last week that more than $10,000,000 would be required to meet loyalist claims arising out of the war in Cape Colony and Natal. This will be provided from the Transvaal funds.

Canada has reduced the duty on coffee imported from Mexico from ten cents a sack to one cent. The Canadian government is showing a desire to promote direct trade with Mexico.

June 17, Lord Kitchener announced that he had "handed over the South African constabulary to the civil authorities, as the necessity for military operations had ceased."

Queen Alexandra will provide a "tea" for ten thousand female domestic servants in celebration of the coronation. Each servant will also be presented with a medal.

The Spanish consul general at Havana has received instructions from Madrid to recognize the Republic of Cuba.

Senor de Ojeda, will succeed the Duke d'Arcos as Spanish minister to the United States.

The House of Commons has voted $250,000 to Lord Kitchener for his services in South Africa.

It has been announced that Lord Kitchener sailed from Pretoria for England June 23.

Industrial and Commercial.

The census office has recently issued an interesting bulletin on the silk industry, which shows that a satisfactory rate of growth has been made. The productive capacity of plants has been increased and manufacturers have been enabled to turn out a superior quality of goods. Nearly all descriptions of weaves known to the trade are now manufactured in this country. In the use of raw material the United States is second only to France.

In 1860 the silk goods made in the United States were only thirteen per cent of the entire consumption. This has steadily increased until in 1900 eighty per cent of the silk consumed was made at home. During the census year 8,970,933 yards of velvets and plushes were manufactured.

The capital invested in railroads throughout the world is estimated at $32,661,636,000, of which no less than $18,170,114,000 has been invested in 162,225 miles of European railroads, which have an average capital of $119,593 per mile, while the average of 263,356 miles in the other parts of the world is $55,034 per mile.

The *Journal of Commerce* says that during the month of May new companies having a capitalization of $248,000,000, were authorized to do business. Compared with the month of April this was a decrease of $16,000,000. As usual New Jersey heads the list with $121,050,000.

General.

Walker Vrooman, founder of Ruskin College in England, has announced that he will build a model village near Kansas City, Mo., at his own expense. Special attention will be given to the welfare of the children. There will be play-grounds of all kinds. There will be factories in the model village which will produce articles which will be sold in the twenty-five co-operative stores which Mr. Vrooman will open in Kansas City within a few weeks.

Maude & Carrew, two Englishmen who have cattle ranches in Texas, have a contract to supply the British Government in South Africa with young breeding cattle. About 680 head have been shipped from Pensacola, Fla., and if this shipment is satisfactory a regular line of steamers will be put on and the movement is expected to continue until 50,000 head have been sent to South Africa.

The Boston Elevated Railway Company covers one hundred square miles of territory. It operates over 3,300 cars on more than 400 miles of track. It employs between eight and nine thousand men and carries annually 300,000,000 passengers. Its eight electric power stations generate 65,000 horse power. Its annual pay roll amounts to nearly $6,000,000 and it pays nearly $1,500,000 in taxes.

The eighty-sixth annual report of the American Bible Society, which has just been issued, shows that the total receipts for the year 1901-2 was $433,173. During the year the society issued 1,723,000 volumes, of which a little more than one-third were distributed in the United States. The remainder went to foreign countries.

The Negro Industrial and Agricultural Society is leading a movement to test the validity of the new constitution of Virginia, which virtually disfranchises the negroes. A fund has been raised for the purpose, and several persons of national reputation will be employed in the case.

The Augustinian College of St. Thomas of Villanora in Philadelphia, has conferred the honorary degree of doctor of jurisprudence on ex-President Grover Cleveland. This was the first time the degree has been conferred in the United States.

Miss Helen M. Gould gave $40,000 to Mt. Holyoke College at Northampton, Mass., for the purpose of endowing a chair of Biblical literature in memory of her mother, Helen Day Gould.

Grand Rapids, Mich., recently shipped twenty car loads of furniture to Cape Town. The furniture is intended for new emigrants to South Africa.

CHRISTIAN SCIENCE SENTINEL

"What I Say Unto You, I Say Unto All, *WATCH.*" *Jesus.*

Selected Articles.

A Trial in Switzerland.

WE are indebted to W. D. McCrackan, C.S.B., for the following interesting account of a trial of two Christian Scientists in a court in Switzerland. Mr. McCrackan writes that he made the translation from two newspaper accounts and from the brief of the defendants.

On May 2, 1902, Mr. R. Kilchsperger and Mrs. Pauline H. Koch, Christian Scientists, appeared in the First Circuit Court of Zurich, Switzerland, to appeal against a fine which had been imposed upon them for violating an old medical law on the Statute Books of that Canton,—the "Canton" in the Swiss political organization corresponding to the State in our own. This medical law dates from 1854 and is one of the most drastic which can be imagined. It reads:

"Nobody is allowed to follow the vocation of physician, druggist, veterinary surgeon, or midwife, or to in any way occupy himself with the healing of disease in man or beast, or with child-birth, or with the preparation and sale of medicines without having obtained legal authority to do so."

The *Neue Zurcher Zeitung* for May 4 contained a long account of the proceedings. A number of witnesses were cited to appear, and the following is some of the sworn testimony which they gave:—

"*Witness B.* had suffered severely for eighteen years from a disease of the nerves. The doctors could not help her. 'I received the instruction that Spirit must control the body. When we hold to the law of God, then He is with us and leads us. For a year and a half I have had no more cramps. It was a long time since I could take medicine. My former physician said I must help myself. Formerly every outbreak of anger aroused the nerves of my stomach. When man lives in every way well and right he attains harmony. In my former condition eating was a source of pain. Now I am healed.'" . . .

"*Witness G.* was for two years a private nurse. In that capacity she nursed an English lady at Hotel Quellenhof in Ragaz. She had a disease of the liver. She had travelled all over Switzerland and was declared incurable by the doctors at Ragaz. 'I remained in correspondence with her after her departure. She told me by letter that she was healed through Christian Science, and gave me the address of Mrs. Koch. I turned to the latter first in other matters and received good advice from her. Then I brought my one-year-old child to her, sick of infant cholera. She instructed me and my husband that sickness came from error. We both had faith in God. Our child is well. God has done it. Mrs. Koch taught us that we need not fear sickness. In case of medical treatment, it is also often the belief in the physician and in the medicine which heals. All things are possible with God. When my husband had inflammation of the lungs Mrs. Koch again instructed me. In four days he was well.'" . . .

"*Witness G. No. 3,* narrates that a relative of hers was healed through Christian Science of a disease of seven years' standing. 'On account of lameness I could not walk upstairs for two years. I was treated for a long time by physicians without result. I thought I would try Christian Science,—I could not lose anything by it. Mr. Kilchsperger did not force his help upon me. I had to ask him several times to come. Mr. Kilchsperger has the purest conception of the Holy Scriptures and pursues the noblest aims. When the mind is awakened it becomes stronger and able to resist more. After eight months I could again walk upstairs. I hoped and believed as much as I was capable of. Mr. Kilchsperger came every week several times.'" . . .

"Both the accused and the witnesses made throughout an impression of sincerity."

The *Zurcherische Freitagszeitung* for May 9, likewise gave an account of this hearing, and stated in part:—

"The accused did not deny that they concerned themselves with the healing of the sick and received payment from them for their services; they denied, however, that their treatment had anything to do with medical treatment; it consisted altogether in instruction concerning God, the Truth, and the meaning of the Holy Scriptures. According to their conviction, the right understanding of God and of the Truth, has also, as a consequence, the liberation from physical ills. . . . Medicines are not used in any form, nor are dietary or other recommendations given.

"The accused appealed, therefore, to the liberty of faith, of conscience, and of instruction guaranteed by the Federal and Cantonal Constitutions, which liberty cannot be set aside in this special case, because this new teaching has, as an accompanying effect, the healing of those who are instructed in it, and makes the employment of physicians unnecessary."

The defence said:—

The Zurich medical law dates from the year 1854,—a time when metaphysical methods of healing were still unknown and no practice, except medical practice in its narrower sense, was used. The heading of Paragraph I., "Medical Persons and their Profession," shows clearly that this law was passed for the regulation of medical practice. In a State where freedom of occupation exists and the people determine the laws, a law like the above-mentioned is passed for the protection of the people, but not for the monopolization, in favor of a special practice, of the healing work in cases of sickness. The purpose of this law could be no other than to prevent abuses or mistakes in the application of medicines. It could not have been the purpose of the law-makers to prohibit the progressive and better methods of a succeeding century. Such progress over medical healing is found in the metaphysical healing practice of Christian Science. By its means numerous cases of sickness have already been healed here in Zurich in a few weeks or months after they had been for years under medical treatment without results. There is no possibility of danger connected with this method, for its medicine is the understanding of the truth concerning God and His creation, and consists solely in the oral, written, or mental instruction of the sick. Material means are without exception excluded from this treatment, because they are opposed to Spiritual healing.

This method of healing does not, therefore, properly come under the control of the Board of Health, because it has nothing to do with medicine, nor was it to be expected that we should receive permission from the authorities to practise a method of healing, as yet unknown, before proof had been given that the same was accompanied by the results which were claimed for it. This proof can to-day be furnished by a sufficient number of witnesses.

We never doubted that the practice of Christian healing would be permitted in Canton Zurich, as it is in all other countries; and that from the very beginning we did not make any mystery of our activity is shown by the fact that, upon our arrival in Zurich, we had ourselves entered at the Bureau of Control as Christian Healers, or at least announced ourselves as such. In spite of this the District Attorney has imposed a fine upon us, which to-day forms the subject of our present plea before the Hon. Circuit Court.

At this point we permit ourselves to remark that, if it is a punishable offence to furnish a way of healing to the sick, after regular medical practice has proved itself powerless to restore health, then it must be equally punishable for the sick to look for healing anywhere but to a licensed physician, even if health could be offered by a next-door neighbor.

Out of respect for an out-lived law, which has never taken account of progress, the sufferer is forced to remain sick, until death takes pity upon him. Health is the highest earthly good, and no law can be so stretched or construed as to make it impossible for the sick to seek help where they can find it. For this reason, it cannot be looked upon as a punishable action to give to those who seek, such help as will restore them to health. The aforesaid medical law, therefore, cannot apply to us, because we do not work with medicines or instruments, but with better methods than those which were comprised by that law; and furthermore, we do not offer our services to any one, but wait until they are asked for.

Furthermore, we stand under the positive protection of the Federal Constitution of May 29, 1874, of which Article 50 reads: "The free exercise of religious acts is guaranteed within the bounds of morality and public order." No Christian Court will deny that Christ, on whose teachings our State Church is built, came to show the world in what way God should be served. He was the greatest servant of God of all times. He was "the way, the truth, and the life." He is our Way-shower. His example is our guide and his constant injunction was "Follow me." His religious acts consisted in teaching the truth and in healing the sick. The latter was the result of his understanding of the former. No one will doubt that his activity was in accord with the laws, with morality, and public order, and to-day also would so accord. His disciples and followers he commanded to "preach the Gospel—heal the sick." Furthermore, he said: "These signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

It is provable that the Christian Church during three hundred years after Christ understood how to fulfil the command of Christ concerning the healing of the sick. All this proves that the healing of the sick should properly be a function of the Christian Church, that is to say, a part of the Christian doctrine. The understanding of this was obsolete for more than fifteen hundred years, but in modern times has been re-discovered by an American woman, Mrs. Mary Baker Eddy. This understanding is no secret, no hocus pocus, no spiritism; it is not the monopoly of a few, but must become the common property of all the followers of Christ. It rests, as has already been said, solely upon the instruction of the sick concerning the truth of divine power heretofore imperfectly understood. Many thousands have already been healed of every kind of disease through the mere reading of Mrs. Eddy's works. Should a book which heals the sick be burned and its possessor fined because it makes the employment of physicians unnecessary? So long as the healing which Jesus and his apostles taught was not understood or remained forgotten, legal provisions concerning the application of medicines were fully justified, and the prescription of such means had necessarily to be left to professional physicians, because danger was so frequently connected with the use of them. But now that Christian healing is once more understood and practised, those medical laws which were suited to former conditions should not be allowed to hinder progress and suppress better methods. Christian healing should find protection under the laws dealing with freedom of faith, and its free use should be fully authorized. This protection we have, as a matter of fact, under the aforesaid Article 50 of the Federal Constitution; for there is no higher "religious act" than the teaching of the truth and the love of God which heals the sick and cleanses man from sin. This is what Christian Scientists to-day strive to do up to their highest understanding. They seek to live in accordance with the example of Christ and to fulfil his commands; and that the fulfilling of the commands of Christ and the demands of the Christian religion should be looked upon as illegal in the Canton of Zurich is not consistent with the unexampled increase in church building which has taken place in recent times in and around Zurich. We repeat here once more emphatically that the healing factor in Christian Science is the better understanding of the power of God. This understanding, when it enters into the consciousness of the sick person, heals him from his sickness. It is the instruction in the Truth which works this result. The personality of the Christian Scientist has nothing to do with the healing. Christ himself made no claims to personal healing power, but always ascribed his works to the power of God, which is ever-present, and always heals when it is understood. The function of the Christian Scientist is to give instruction in matters appertaining to faith. Concerning the legality of this function, Article 63 of the Constitution of the Federal State of Zurich expresses itself clearly. The same says: "Freedom of faith, of cult, and of instruction is guaranteed." This article gives us permission to teach in open assembly, in our own house, or at the bedside of the sick; and if the healing of the sick, whose recovery was formerly hopeless, results from this instruction, surely there can be no cause for police punishment, especially so long as we lend our services only to those who ask for them. As a matter of fact, up to this time no requests for healing have come to us except from those who had been declared incurable by the regular physicians or from those who knew the results of Christian Science from their own experience or from that of their friends. Therefore, if, as is easily proven, we have a just cause, it is incomprehensible that it should be made a reproach to us that we allow ourselves to be paid for our services. Christ himself said, "The laborer is worthy of his hire." We are like all other men, dependent upon our earnings for supplying our needs. It is not possible to make commerce of the power of God, and we do not do this. It is as free and without price as pure air and the light of the sun. An invalid, incapable of going out into the open and of enjoying the light of the sun, has to be taken out by a servant, and he pays him for his services. In the same way the Christian Scientist should receive payment for the time and labor which he has spent in order to bring the patient into the light of divine Truth which can heal his sickness. He receives the power of God gratuitously.

Christian Science is the highest attainment of the nineteenth century. Its influence will be felt in the course of the twentieth century over the whole earth. To-day hardly a small town can be found in the United States where it is not represented. It counts there to-day already from one and

Digitized by Google

a half to two per cent of the population among its adherents, and these come from all ranks of the people. Among lawyers and judges, as well as from the medical and theological professions, it has gained some of its strongest supporters. It is likewise represented in thirty-four towns of Canada; in the City of Mexico; in fourteen towns of Great Britain and Ireland; in seven cities of Germany; in Paris; in two cities of Italy; in two cities of Switzerland; in four cities of Australia; in Pekin, China, and on several Asiatic islands. There are at present in all these countries taken together between five and ten thousand persons actively practising Christian Science, and all these stand under the discipline of the Mother Church in Boston, which has about twenty-four thousand members.

The physical healing is not the final aim of Christian Science, but it is the result of the spiritual uplifting of the consciousness of the sick person. Sins and passions are healed in the same way as physical ills. Man becomes better, morally, for the understanding of God, as taught in Christian Science, brings man to God. Christian Science must not be merely understood, but lived. Its teachings must fill our whole consciousness. Our manner of thinking and speaking gradually become such that the sick are unconsciously helped by their intercourse with us. With the growth and spread of the knowledge of God, the atmosphere filled with sin, sickness, and death becomes purified and the divine prophecies are fulfilled. The whole work of Christian Science is God's work.

There is a great misunderstanding in the accusation of the District Attorney that *we pretend* to make a person well through prayer, for God gives us health and every good thing before we ask for it, and our unsupplied want is a result, not of God's unwillingness to give, but of man's lack of understanding as to where the good is to be found and how it is to be sought. God is our healer in all cases when we understand His work. As the Psalmist says: it is the Lord who forgiveth all our iniquities and healeth all our diseases. The fact that the instruction of the sick concerning the power of God brings him health without medical assistance, cannot be made a cause of accusation of violating the laws of the police.

Relying upon this explanation concerning our work, we declare ourselves not guilty of violating the laws.

Since the receipt of the above, word comes over the wire from Switzerland that the Supreme Court of Canton Zurich has rendered a unanimous decision which virtually places Christian Science upon a legal and authorized footing there.

The Ethics of Christian Science.

Discussed by an Unbeliever who does, however, believe in the Ethics of Justice.

First Church of Christ, Scientist, of New Haven, is congratulating itself on the acceptance of a call extended to the Rev. Mr. Simonsen of Brooklyn, who has already commenced his new duties as First Reader of the little band of believers of this faith who have their meeting place on the second floor of the building at 156 Orange Street.

Mr. Simonsen is making arrangements to bring his wife and seven children to this city immediately, and it was during a few minutes' respite in house hunting that I met and talked with this new comer to the city, at the request of one of the members of his flock. Mr. Simonsen's name will suggest to those who keep in close touch with current events along all lines, the great sensation in the Methodist denomination of the country which his coming out for Christian Science created more than a year ago.

Through the press, and Dr. Buckley, editor of the *Christian Advocate,* one version at least of the story was pretty thoroughly circulated.

I listened to Mr. Simonsen's calm, unimpassioned statement of how, after being educated for a Methodist minister and preaching the gospel of this denomination for many years, he was finally compelled, for the faith that was in him, to forsake all he had achieved in reputation and prosperity and begin life all over again and this from an entirely new doctrinal standpoint.

Among many things related by Mr. Simonsen, he told of his early lack of sympathy with the beliefs of Christian Science, and that at the start no more hopeless subject to have worked upon could have existed than he.

Fifteen years ago last summer he was taken very ill of a complication of ailments and several physicians had apparently exhausted their skill in treating him without avail.

A friend called one day and being somewhat interested in Christian Science suggested as a last hope that the sick man try it, saying, "It cannot hurt you and may possibly help."

Having given up all hope of help through the accepted medical channels, the minister finally consented to see a Christian Scientist, and in seventeen treatments was made well again. Even then, he could not accept the theology of this new old faith—as its followers claim it to be—nor bring his mind to surrender all the beliefs and plans of a lifetime and come out for Christian Science.

As the years passed he read, studied, and thought on the subject, attended classes, and became able to heal the sick; but never during those years of uncertainty, he maintains, did he ever try to impress his growing belief on the members of his flock or discuss it deeply with any of them. His healing powers were confined to his own family and a few outside his congregation.

Some of his children have never tasted medicine.

The climax came a year ago last summer, when one of his children had a disease which refused to yield to his treatment and he was forced either to go to a physician or a healer. He chose the latter, who on hearing his errand, asked him the following searching questions: "Why do you, a Christian minister, come to me for healing? Do you carry out the divine command, 'Heal the sick'? or if not, why does not the church to which you belong practise the healing taught in the New Testament?" and last of all "Do you expect to get the benefit of Christian Science healing for your child, when you are not willing to acknowledge what it has done for you and yours?" These were hard questions to answer and they stirred up a fresh struggle in the heart of this minister on whose face is stamped honesty of purpose, and whose voice it speaks.

It meant a great deal to this man established for years over a prosperous Brooklyn church, domiciled in a beautiful parsonage home, with a large family to take thought for. This was the human, the material side of the question, and who shall condemn, if it weighed heavily on his mind in making his final decision.

Once more he read the Science literature, searching for light, for Truth, determined he would either find it or surrender it and be at peace one way or the other. He was finally enabled to say, "The Lord will take care of my family if I honestly believe my path leads this way," and at last the full fledged decision was made to face the ridicule of the world, uproot himself from his comfortable position, and announce himself as a firm believer in the tenets of Christian Science.

This he did at the quarterly conference in the fall of 1900, and while the members were surprised and naturally sorry, they still believed in their brother and stood loyally by him, those of his church urging him to remain with them, even though he believed as he did. The minister replied, "When you hear what the world says, you will not want me." But even this did not daunt some of his staunch friends, who shook their heads, firm as was Peter of old, in their belief in their own unchangeableness.

Knowing very well that he could not be a good Methodist minister on one side and a Christian Scientist on the other,

Digitized by Google

Mr. Simonsen asked for his release, and on the last Sunday of the last year of the nineteenth century he preached his farewell sermon to the congregation he had served faithfully for so many years.

Some of his parishioners attested to their continued friendship and esteem by presenting him with a handsome parting gift. But the incident was not yet closed, for at the next meeting of the conference, the question of returning Mr. Simonsen's credentials, which he had placed in their hands according to custom, was brought up and the motion was made, discussed, and passed that they be returned. This action was accompanied by complimentary remarks on the pastor's work among them. Soon after the vote had been taken, Dr. Buckley arrived, and learning what had transpired took the floor and said they had no right to give Mr. Simonsen these credentials, for he was not going to minister to a Christian people, or words to that effect.

The debate became spirited, the editor firm in his own belief, no doubt, that he was acting in the interests of the Christian religion, refusing to be convinced, and finally getting the motion rescinded and another one before the meeting. His stronger personality and persistency combined finally triumphed, and the broad-minded, tolerant action of the meeting was supplanted by one inspired more by human prejudice than the true essence of the Christian religion. "And did the Lord provide, Mr. Simonsen?" inquired the attentive listener. "Yes," answered the man who had surrendered much for his faith's sake. "Neither my family nor myself have wanted for the comforts of life since we left our beautiful parsonage home, with its elegant furnishings and betook ourselves to hired apartments, where we did not know where the next dollar was coming from." "And you have never regretted it?" "Not for an instant. Had I the same path to travel again, I should make the same choice and my wife is in full sympathy with me." "And in what manner, if I may inquire, did the Lord provide, Mr. Simonsen." The pleasant smile which is easily won played over the new First Reader's face as he made reply: "I have been healing the sick in Brooklyn the past year and have been remarkably successful in my work." He then gave several illustrations in support of his statement, so calmly, firmly, truthfully related, that it fairly staggers one's unbelief. It is one thing to read of these things in print, together with the ironical comments that usually accompany them. It is another to hear them from the lips of educated, honest men and women, who say, "I know these things are true, because I have seen them or I have experienced them," and such opportunities have come to me a possible dozen times. Therefore, it seems worse than foolish to treat the belief with contempt and say, "Because I do not understand it, it is not so." That method strikes at the very foundation of all progress in science, art, and religion.

If we tolerated nothing but what we could fully understand, even in the natural world, we should have to surrender many wonderful modern inventions.

The wireless telegraphy, the telephone, the trolley, the thousand and one wonders of modern times could only be explained as miracles to our ancestors of a hundred years age, could they revisit the earth. Who shall say, "I know it is not so because I cannot understand it," that divine Power has ceased to act in a definite and (to us) material way, but to the Christian Scientist in the natural way, through the spirit which they claim should dominate and control the body.

That men like Mr. Simonsen, after long thought and study, are finally impelled to accept this doctrine, which is certainly a beautiful one ethically, if not practical scientifically, must needs "give us pause" before the whole subject is characterized as a "fad," and its followers as "cranks."

RHEA.

In *The Evening Leader,* New Haven, Conn.

Testimonies given at St. Joseph, Mo.

Second Church of Christ, Scientist, of St. Joseph, Mo., has been organized less than two years. It has an enrollment of seventy-six members and maintains a reading room in the heart of the city, where all Christian Science publications are kept on sale and many Sentinels, Journals, and much other Christian Science literature is distributed free. All the services of the church and Sunday School are well attended and a constantly increasing interest is manifested. Many exceedingly interesting testimonies are given at the Wednesday evening meetings. Some of the more recent are as follows:—

A lady related that her little daughter recently had what seemed a very curious and extensive hard callous growth upon one of her hands, covering a large part of the palm and extending part way around the hand. After a few Christian Science treatments, the callous loosened and came off.

The same little daughter, during the absence of her mother from home recently, sustained a slight fracture of a shoulder, from a fall. When the mother on her return took up the child, she cried out from pain. Treatment was begun at once, at the little one's request, and there was no more pain and a speedy and complete recovery ensued. A physician who had been called by the father (who is not a Scientist) before the mother's return, is the authority for the statement that the shoulder was fractured.

A teacher in the city schools (two of the teachers belong to this church and others attend frequently) stated that she had, for a long time, suffered from seriously defective eyesight, of which she was completely healed by Christian Science. Some months ago, while on a visit to the family of a cousin at Kansas City, she found him nearly blind from difficulties of long standing. He was wearing two pairs of glasses in order to see at all and paying heavy fees to oculists, with only the most discouraging results. She added her entreaties to those of the afflicted man's wife, that he give Christian Science a trial. For a long time he refused to try Christian Science, characterizing it as a fake. The speaker read a letter recently received from the wife, joyfully relating that the husband had finally been prevailed upon to try Science treatment. He was completely healed and taking the greatest comfort in being able to read even to a late hour at night, entirely without glasses; something that had been impossible to him for a long time.

The next speaker was a member of the church, past sixty-five years of age, who was healed of total blindness by Christian Science some years ago. Oculists had declared that he was permanently and incurably blind. One feature of his affliction was that his eyes were so sensitive to the light that he was compelled to shut himself in a dark room. He often testifies to the wonderful benefits of Christian Science, and on this occasion related the particulars of two cases of instantaneous healing. One was a painful and seemingly serious accidental injury to a finger, and the other was a child who was instantly healed of a severe fever.

A middle-aged gentleman stated that he was not a member of the church and had been studying Christian Science for but a few months, but related how, at his club a few evenings before, he was suddenly stricken with an ailment manifesting itself in severe and benumbing pains that rendered him almost unable to move. Those about him, seeing that he was suffering greatly, insisted upon giving him physical assistance and upon calling a doctor; but he asked them to let him alone, stating that he had help that would suffice, and a few minutes of earnest realization of the presence and allness of Good completely overcame the illness.

A lady related the details of the case of a young man, a resident of this city, formerly of high standing and well-connected, who had fallen so low through the habitual use of opium that he could no longer be of any real service to his employers, nor be trusted with any money, but was

Digitized by Google

simply kept in a nominal employment and his necessary expenses looked after. He became at length so nearly a wreck, mentally and physically, that he was taken to the hospital and the attending physicians told his friends that he could by no means recover, and that he could not live beyond a few weeks. At this juncture a near friend secured Christian Science treatment for him, and in a very short time he was so far recovered as to leave the hospital and return to work.

The mother of the lady last referred to is a very large, elderly woman, weighing over two hundred pounds. She is not a Christian Scientist, but has witnessed so many evidences of the power of this Truth, through the demonstrations of her daughters, that she never resorts to doctors or drugs for physical healing and has great respect for Christian Science.

One evening some time ago, the family circle had been discussing Christian Science and the mother remarked that what she most valued in it was the teaching of the continual all-presence and sustaining power of God. A minute or so afterward, on stepping out at a rear door, she stepped off into an open cellar-way and fell head foremost, nine feet down, between the stone walls, striking with her right arm upon the edge of the stone steps at the bottom. The family, noting what had happened, were momentarily benumbed with horror at what seemed a surely fatal accident, but were at once re-assured by hearing her call out, "I am not hurt, I am coming up;" and she rose and came up the steps. It was discovered that the arm was shattered by the fall, but no medical or surgical assistance was sought. She tripped upon something at the top of the stairway on the second floor of the dwelling two or three weeks afterward, and fell and rolled down the long stairway to the first floor, but the injured arm was but slightly hurt, and was soon completely well. Considering the age and weight of the lady in question the demonstration over this double fall seems most striking. She says that she felt no fear when falling, and seemed to be consciously withheld from injury.—J. W. G.

Signficant.

THERE is something very significant in the fact that when a person dies under Christian Science treatment a great ado is made about it, whereas thousands die under medical treatment and not a word is said. It is treated as the most matter-of-fact thing in the world.

Does not this indicate that death in the one case is an extraordinary event, while in the other it is very common? And does this not lead to the fair conclusion that the extraordinary event tells a story of greater healing efficacy than the very common event? In the former case, death is not expected, while in the latter it is. This would seem to be the public estimate of the question.

Notices.

New Edition of Science and Health.

"Science and Health with Key to the Scriptures," printed from new plates, with lines numbered, and with important revisions by the author, is now ready for distribution. There is no change in prices.

Science and Health in Levant binding will hereafter be printed on heavy, Oxford India paper, making a book about an inch thick. The size of page will be the same as that in the cloth binding.

Science and Health bound in sheep will hereafter have gilt edges and be printed on the same paper as that used in the cloth binding and have the same sized pages.

The former styles of sheep and Levant binding will be discontinued.

Science and Health in a New Binding.

"Science and Health with Key to the Scriptures" can now be furnished bound in leather, stiff bevelled boards, gilt edges. The above is printed on the same paper as the regular cloth bound, and makes a beautiful volume for libraries and for Readers in churches.

Price single copy prepaid $4.00
Twelve or more to one address, each 3.75

Communion Message, June, 1902.

The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Price 50 cents per copy; $4.50 per dozen copies, prepaid.

Our Leader's Message.

The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid. Address all orders to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.

Photographs.

A series of photographs were taken on the day of the Communion Service showing a large body of Christian Scientists entering Mechanics Hall. These photographs can only be obtained direct from the photographer, Elmer Chickering, 21 West Street, Boston, size 13x16.

Mr. Chickering's prices are as follows:—

Where the pictures are packed for express, the price will be $1.00 apiece for the pictures, and 25 cents for packing, making $1.25.

In lots of six where they can be packed all in one bundle, the price will be $1.00 apiece, and no charge for packing.

In lots of twelve, the price will be 85 cents apiece, and no charge for packing where they are shipped in one bundle.

In lots of twenty-five, the price will be 75 cents apiece, and no charge for packing, where shipped in one bundle.

The above prices are based on finishing from one, two, or three different negatives.

The Revelation of Christianus

And twenty other Poems, by the EARL OF DUNMORE. Dedicated by special permission to the Rev. Mary Baker Eddy.

Sixty-two pages. Bound in white ribbed cloth, gilt top, lettered in gold on back and sides. Pages red ruled and red initials. One copy, $1.25; six copies to one address, $6.50; twelve copies to one address, $12.00.

Remittances.

Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago or other western cities. We shall esteem it a great favor if our co-workers throughout the Field will comply with this request.

We ask that no money remittances whatever be made to the Editor or Editorial Department.

Clerk of the Mother Church.

Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.B., Clerk, 30 Norway Street, Boston, Mass.

Church Treasurer.

Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Editorial Department.

THE following have been elected Editors of *The Christian Science Journal*, and *Christian Science Sentinel*:—

Editor in Chief, ARCHIBALD MCLELLAN.

Second Editor, JOHN BUCKLEY WILLIS.

Assistant Editor, MISS MARY E. SPEAKMAN.

Mr. McLellan is temporarily absent from Boston, but will soon occupy his new position.

THE permanence and virility of great movements has always been indicated, not only by their ideals, but, as well, by their progressiveness, their address and responsiveness to new demands and conditions, and their ability to create and utilize the means for an ever-growing activity and expression.

To the adequate leadership of a great enterprise, difficulties come but to stimulate to more thoughtful planning, more persistent endeavor. Men and means are thus found for every exaction and exigency, and enthusiasm leads the way to greater achievement.

Christian Science has strikingly illustrated all this in its brief history. Its adherence to Principle has been no less marked than its ready adaptation to new conditions and needs. Without the sacrifice or modification of a single essential teaching, its text-book has been repeatedly revised by the author so that in phraseology and an advancing order of thought its expression has grown to be ever more clear and convincing. A kindred adjustment to the situation has distinguished the conduct and history of the entire movement, which, from the beginning, has been marked by these prime characteristics of a truly reforming thought; namely, vitality and flexibility.

When, in the far-seeing wisdom of our Leader, it seemed best to supplant the personal address with the Lesson-Sermon, the response was ready and loyal; and yet there were those who did not immediately perceive the far reaching significance of the step. To-day the divine guidance of our Leader's thought is universally recognized, and the consequent escape from unnumbered dangers is thankfully conceded.

It is through much experience, therefore, that we have come to anticipate an enlargement of opportunity and increased blessing for the Cause in every advanced step we may be called upon to take.

The provision for the editorship of our publications has been so adequate and so satisfying to the entire Church, that these faithful burden-bearers were practically consigned thereby to a perpetual service. So appreciated and beloved are they by all, that those who follow them may not hope to launch their best endeavor save on the kindly consideration of their readers, but in this they rest their confidence.

The call to a larger freedom and usefulness which comes to the "good and faithful servant" is but the reward of merit in which all rejoice; and those who come after will always be quickened and encouraged in their effort to measure up to the high standard set before them, by the remembrance of the humility, the fidelity, the earnestness, and the unfailing love of those whose example they would emulate. W.

The New Readers.

THE long period and the highly satisfactory nature of the service rendered the Mother Church by its late Readers, Judge Septimus J. Hanna and Mrs. Eldora O. Gragg, has given them a large and abiding place in the tender affection of all the people. They have been the channel of an inspiring ministry, and the good they have done will flow on forever.

To succeed them is to accept a sacred trust which could not have been committed to more worthy hands than those of Prof. Hermann S. Hering and Mrs. Ella E. Williams. They have been tried and not found wanting; and the peculiar fitness of their selection appears to all. For many years Mrs. Williams has been identified with the work in Chelsea, and her faithfulness and efficiency has given her high rank as a leader and practitioner. Mr. Hering brings to his office the dignity and repose of a liberal culture, and the gentleness and consecration of a great true heart.

Reference is made elsewhere to his history prior to his identification with the Cause of Christian Science. Soon after resigning his position in Johns Hopkins University, he was called to the Second Readership of the Second Church of Christ, Scientist, Baltimore, but feeling that the interests of the Cause would be subserved by the union of the First and Second Churches, he ignored all personal considerations, and contributed to the demonstration of this happy result. He has rendered a splendid service as a member of the Publication Committee, and in all his work has disclosed an unselfishness, large mindedness, and availability which give promise of the greatest usefulness to the Cause in the years to come.

Board of Lectureship.

SEPTIMUS J. HANNA, C.S.D., has been appointed upon the Board of Lectureship and his field will be announced later. The other lecturers are:—

EASTERN SECTION.

Rev. Irving C. Tomlinson, C.S.B.

Rev. Wm. P. McKenzie, C.S.B.

MIDDLE SECTION.

Rev. Arthur R. Vosburgh, C.S.B.

SOUTHERN SECTION.

Mrs. Sue Harper Mims, C.S.D.

WESTERN SECTION.

Edward A. Kimball, C.S.D.

Mrs. Annie M. Knott, C.S.D.

Silas J. Sawyer, C.S.D.

PACIFIC COAST SECTION.

F. J. Fluno, M.D., C.S.D.

GREAT BRITAIN.

William N. Miller, K.C., C.S.B.

UNITED STATES AND CANADA.

Carol Norton, C.S.D.

LECTURER AT LARGE.

Hon. William G. Ewing.

The Annual Meeting.

THE Annual Meeting of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., held in the great auditorium known as Mechanics Hall on Huntington Avenue, was the most largely attended Annual Meeting ever held. It is impossible to estimate the exact number present but it is sufficient to say that the great hall was crowded to its utmost capacity.

The numbers present were not of course so great as the attendance upon the two communion services, as it was confined to actual church membership; but it was a remarkable gathering in numbers as well as from every other point of view.

Digitized by Google

All sections of this country as well as many European points were represented.

Promptly at two o'clock of June 18, the meeting was called to order by John B. Willis, C.S.B., the retiring President, who announced hymn number 183 of the Christian Science Hymnal which was sung by the entire assemblage. After the reading of a Scriptural selection (part of the sixtieth chapter of Isaiah) and also the first page of the preface to "Science and Health with Key to the Scriptures," and the usual silent prayer, Mr. Johnson, Clerk of the Mother Church, read the announcement of officers elected for the ensuing year, as follows: *President,* John W. Reeder, C.S.B.; *Clerk,* William B. Johnson, C.S.B.; *Treasurer,* Stephen A. Chase, C.S.B.; *First Reader,* Hermann S. Hering, C.S.B.; *Second Reader,* Ella E. Williams, C.S.B.

Previous to the announcement of the officers Miss Elsa Marshall beautifully sang as a solo, "The Daystar of Faith." Mr. Willis then appropriately introduced the new president of the Mother Church, John W. Reeder. Mr. Reeder in a few well-chosen remarks accepted the trust conferred upon him. Mr. Johnson then submitted the following annual report:—

Report of Clerk.

Beloved Brethren and Sisters of The First Church of Christ, Scientist,—members of a Church built on the "Rock," namely, obedience to Christ's commands; obedience, not in part only, but fully,—the proofs whereof are the signs which Jesus, our Master, promised should follow those who believe on him, "Whosoever heareth and doeth these sayings of mine."

Through the ever-watchful care and the wise counsel of our beloved Teacher and Leader, the Reverend Mary Baker Eddy, our church has been guarded and guided safely and has greatly prospered.

By her life, labors, and example, she has marked out the path for this church to follow; and it may be said of her that she has made the way easier for us, since it is not so difficult for one to walk in a path as it is for one to discover it. For this she is justly entitled to all the homage that is bestowed upon her by her followers.

In this report of the progress of our church only facts in figures can be given; the real history can never be written with the pen, but it is recorded in the hearts of thousands upon thousands who have been brought from darkness into light, from sickness into perfect health, and from the death of trespasses and sins into the understanding of "life eternal." Each and all give thanks to God for the revelation of Christian Science, and for its Discoverer and Founder and its highest living exemplar,—our beloved Mother.

By your labors you have added to our church, since we last convened in annual convention in June, 1900, 6,419, which makes the total membership 24,278. It may interest you to know that nearly two thirds of the membership of the branch churches is made up of those who have come from churches of other denominations.

In the Mother Church there are on file 1,083 letters which have been received from those who were formerly members of Evangelical churches. Many of these express tender regrets at parting with faithful members, and give loving testimony to their high Christian character.

The admission in November, 1901, made the total membership 22,139. Those who have passed away from our membership during the past year number 2.32 per thousand, which is 17.38 per thousand less than the death rate in the city of Boston in the year 1901.

Since we last met in annual meeting the number of branch churches has increased from 416 to 521, a gain of 105. Reports from 511 churches show a gain of 7,692 in membership. The total membership of the churches heard from is 28,732.

In two years the increase in the number of associations which hold Christian Science services regularly, is fifty-nine, making the entire number 184.

Our church has moved steadily onward and is rapidly multiplying its branches. In these the world-weary have found rest and peace, and have been liberated from sickness and sin through their understanding of the Holy Scriptures as interpreted by the Christian Science textbook, "Science and Health with Key to the Scriptures."

It has also experienced in some degree the fulfilment of Jesus' words: "If they have persecuted me, they will also persecute you;" also St. Paul's prediction, "Yea, and all that will live godly in Christ Jesus shall suffer persecution." But this persecution has served to unite us more firmly to each other, and has caused us to follow more closely the example of our Leader in returning good for evil; and has impelled us to work more earnestly for the benefit of our fellow-men. It has also served to proclaim more widely the very gospel that persecution is intended to destroy, thus verifying the words of the Psalmist, "Surely the wrath of man shall praise thee."

How applicable to this dear church is the hymn-verse slightly changed:—

On the Rock of ages founded,
What can shake her sure repose?
With salvation's walls surrounded,
She can *pity* all her foes.

Note.—The seeming discrepancy between the total membership given in the Message of our Leader, and that given in the report of the Clerk, arises from the fact that the number of those who have passed away and those who have been dismissed, had not been given to Mrs. Eddy, and she was not aware thereof.

Mr. Chase also submitted his annual report as treasurer, showing a balance on hand June 1, 1902, of $33,756.29.

Two Million Dollars Pledged.

At this point, Edward A. Kimball, C.S.D., offered the following motion:—

Recognizing the necessity for providing an auditorium for the Mother Church that will seat four or five thousand persons, and acting in behalf of ourselves and the Christian Scientists of the world, we agree to contribute any portion of $2,000,000 that may be necessary for this purpose.

In support of the motion, he said, in part: "Our denomination is palpably outgrowing the institutional end thereof. We need to keep pace with our own growth and progress. The necessity here indicated is beyond cavil; beyond resistance in your thought."

Judge Ewing, in seconding the motion, said:—

"As we have the best church in the world, and as we have the best expression of the religion of Jesus Christ, let us have the best material symbol of both of these, and in the best city in the world.

"This world is not a very large world, after all; you can walk across it if you start early. I have learned another thing—the people of all these countries dotted all over the earth are still your brothers and mine; all the children of one common father. The only difference in the world between England, Scotland, Ireland, and America is the Atlantic Ocean.

"Now I am sure that I have but expressed the universal voice of Christian Scientists, that there should be something done, and done immediately, to make reasonable accommodation for the regular business of the Christian Science Church, and I believe really, with my faint knowledge of arithmetic and the relationship of figures, that a church of twenty-four thousand members should have a seating capacity of more than nine hundred, if they are all to get in."

The motion was carried unanimously.

Greeting to Mrs. Eddy.

The following greeting was sent by the church to the Rev. Mary Baker Eddy:—

"Ten thousand Christian Scientists from throughout the world, who are convened in annual business meeting in Boston, send their message to you whom we recognize as logically the natural and indispensable leader of our religious denomination and its activity.

"When Christ, our divine Saviour, was in the fulfilment of his mission, he knew that the people did not understand him and told them so. He prophetically declared that there was to be some further and subsequent appearing or coming which should enlighten the race and complete the works of Christian salvation. Before his ascension he left this all-sufficient legacy to mankind: 'Ye shall know the Truth, and the Truth shall make you free.'

"For nineteen centuries Christendom has sent forth one long supplication to God, asking for the revelation of this promised knowledge, in the hope that, when revealed, it would deliver mortals from their dire distresses. We believe that this delivering Truth is being revealed now; that it is answering every need of humanity, and promises to abolish its sin and agony.

"Truth always comes by way of revelation, and through some man, woman, or child. We are confident that Christian Science, or Christian knowledge, is revealed knowledge, and that it has come to the world through you. It does not pretend to be new truth, but rather a new interpretation of the eternal Truth which Christ taught and demonstrated.

"The existence and activity of more than one hundred different Christian sects to-day, some of which have been, and still are, in bitter antagonism toward each other, constitute *prima facie* evidence that the world does not understand aright the universal Christianity of the universal Christ.

"Contrary to the common belief in many man-made creeds, and to the antipathies of sectarian contention, we believe that there is the Science of Christianity for all men to know alike, and that this demonstrable science has been fully set forth in the teaching of Science and Health which has been given to the world through you.

"This teaching has led us to understand that God, who is the one supreme, individual consciousness, or mind, includes nothing but the consciousness of infinite good, and that he has neither instituted nor sanctioned sin, sickness, or death; which, instead of existing by divine procurement are monstrosities of the carnal mind.

"We understand that God, in His essential Being, by law and intention is the natural healer of the sick as the Scriptures declare. We believe that Jesus Christ came to do the will of God, to fulfil law, to save that which was lost, 'to abolish the law of sin and death' and 'destroy the works of the devil,' and we believe the Scriptural record which affirms that he accomplished this by reforming sinners and healing the sick.

"Christian Science removes the ministry of Jesus from the realm of impenetrable mystery and brings it within the range of law—of natural and orderly procedure and availability. It repudiates the assumption that his work was unnatural or in contravention of law, and asserts that it was done in manifestation of a natural and changeless God, according to divinely natural laws, according to an eternal underlying principle and a rational and accurate rule scientifically operative.

"This Science which will solve the mystery of evil, rejects the assumption that evil is either an eternal entity or a personal devil, and declares it to be a finite abnormity or evil sense of being which inflicts suffering on sinful mortals, but which will in the course of time and spiritual growth be mastered and lawfully abolished.

"As followers of Christ, we are striving to do what Jesus commanded all Christians to do and said they could do if they understood his sayings. As his followers, we recognize that Christian Science is the basis for civil, political, social, and commercial ethics, and establishes by proof the fact that honesty is the best policy, because it is the only true and successful policy, and we are therefore striving to live according to the highest ethical and moral standard; to obey the Commandments and the Sermon on the Mount; to pray without ceasing, and to love one another.

"The utility which inheres in such a religion and its practice is being manifested in the healing of the sick, the cancellation of temptation and therefore its penalty, and in the re-establishment of man's natural dominion over evil.

"In consequence of this, which appeals to the godly affections of men, our church and denominational growth is rapid and stable. Since the last report in 1900, one hundred and five new churches or congregations have been added, and those previously established have had large accessions to their membership. In recognition of the necessity for providing an audience room in the Mother Church which will seat four or five thousand persons, we have agreed to contribute any portion of $2,000,000 that may be needed for that purpose.

"The instinctive gratitude which not only impels the Christian to turn in loving thankfulness to our heavenly Father, but induces him to glory in every good deed and thought on the part of every man—this would be scant indeed if it did not continually move us to utter our gratitude to you and declare the depth of our affection and esteem.

"To you who are standing in the fore-front of the effort, for righteous reform, we modestly renew the hope and desire that we may worthily follow with you in the way of salvation through Christ."

Hymn number 163 of the Hymnal was then sung.

Reports from the Field.

Following this motion, interesting reports of progress were read from many places, showing the prosperity of the cause and increase of numbers in the respective localities. Prof. Richard Wood Cone read the reports from the following places: Concord, N. H.; Helena, Mont.; Grand Rapids, Mich.; Sharon, Penn.; Ithaca, N. Y.; Brooklyn, N. Y., Second Church; Toledo, O.; New York City, First Church.

Rev. Irving C. Tomlinson of Concord, N. H., read the reports from the following places: Albany, N. Y.; New Haven, Conn.; Duluth, Minn.; First, Second, Third, and Fourth Churches of Chicago.

The following were read by Rev. William P. McKenzie of Cambridge, Mass.: Evanston, Ill.; St. Johnsbury, Vt.; Philadelphia, Penn., Third Church; London, England; Edinburgh, Scotland; Portland, Ore.; Berlin, Germany; Atlanta, Ga.; Washington, D. C., First and Second Churches; New York City, Second Church; Springfield, Ill.

John Carroll Lathrop of New York City read the following: Denver, Col.; Nassau, Bahama Islands; Charleston, S. C.; Columbus, Ohio; Kalamazoo, Mich.; Brooklyn, N. Y., First Church; New York City, Third Church; Minneapolis, Minn.; St. John, N. B.; Ottumwa, Iowa.

In addition to the above, telegrams were read from Fort Worth, Tex., and the church at Manila, Philippine Islands.

The report from First Church of Christ, Scientist, Charleston, S. C. contained an item of especial interest. In certain newspaper articles published in that city it was denied among other things that Colonel George W. Glover, the beloved husband of the Rev. Mary Baker G. Eddy, was a member of St. Andrew's Lodge, No. 10, a Masonic lodge. In order to satisfy themselves as to the untruth of this statement the local Scientists instituted a search, with the result that they found St. Andrew's Lodge, No. 10, was defunct, th its records had been sent to Columbia, S. C., the state capital, for safe keeping during the Civil War, where they had been burned at the time of General Sherman's raid. Notwithstanding the apparently discouraging

Digitized by Google

outlook, the search was continued and at last a list of the members of St. Andrew's Lodge, No. 10, for 1844, was found in an out of the way place, which record contained the name of Colonel George W. Glover as a master mason in good standing, and that he had died in September of that year.

Owing to lack of time it was impossible to read all the reports that had been sent to the clerk. In addition to those that were read, excellent reports of the progress of the work were received from the following churches: Ottawa, Can.; Grand Forks, N. D.; Buffalo, N. Y., First and Second Churches; Winnipeg, Man., Second Church; Pasadena, Cal.; San Francisco, Cal.; Los Angeles, Cal., First and Second Churches; San Jose, Cal.; Pittsburg, Penn.; Cotuit, Mass.; Lynn, Mass.; New Bedford, Mass.; Oklahoma City, O. T.; Sheboygan, Wis.; Milwaukee, Wis., First and Third Churches; Norfolk, Va.; Cincinnati, O., First and Third Churches; Omaha, Neb.; Bridgeport, Conn.; Peoria, Ill.; Bloomington, Ill.; La Grange, Ill.; Lockport, N. Y., Second Church; Rochester, N. Y.; Syracuse, N. Y.; New London, Conn.; Indianapolis, Ind.; St. Louis, Mo., First and Second Churches; St. Joseph, Mo.; Kansas City, Mo.; Orange, N. J.; Leavenworth, Kan.; Toronto, Can., Second Church; New Orleans, La.; Montgomery, Ala.; Burlington, Ia.; Cleveland, O., Second Church; Lansing, Mich.; Marshalltown, Ia.; Forth Worth, Tex.; Worcester, Mass.; Atchison, Kan.; Reading, Mass.; Plymouth, Wis.; Binghamton, N. Y.; Towanda, Penn.; St. Joseph, Mo., Second Church; Janesville, Wis.; Lewiston, Idaho; Buffalo, N. Y., Fourth Church; Rockland, Me.; Schenectady, N. Y.; Toronto, Can., First Church; San Antonio, Tex.; Houston, Tex., and Wilmette, Ill.

The meeting was closed by the entire congregation joining in the Doxology.

FROM THE BOSTON JOURNAL.

The *Boston Journal* thus speaks of the proposition to raise any part of two million dollars for the extension of the Mother Church:—

Assembled in the largest church business meeting ever held in Boston—perhaps the largest ever held in the United States—the members of The First Church of Christ, Scientist, Boston, the Mother Church of the denomination, voted yesterday afternoon to raise any part of two million dollars that might be needed to build in this city a church edifice capable of seating between four and five thousand persons. This astonishing motion was passed both with unanimity and assurance. It was not even talked over, beyond two brief explanations why the building was needed. Learning that a big church was required, the money to provide it was pledged with the readiness and dispatch of an ordinary mortal passing out a nickel for carfare.

The Wednesday Evening Meeting.

MECHANICS HALL was crowded to its full capacity at the Wednesday evening meeting under the auspices of the Mother Church, June 18. The meeting was opened by Judge Hanna who, after speaking of the series of wonderfully interesting and helpful meetings beginning with the Communion services, and giving words of welcome and appreciation to the visiting Scientists for the interest manifested in attending these meetings,—some of them coming across the continent for that purpose,—referred, as among important events which had transpired, to the change in the Readership of the Mother Church. He said in part:

"I know that I express the real sentiment of every loyal heart present when I say that the successors to the Readership will have, throughout their entire term of service, the hearty, loyal, and loving support of every Christian Scientist.

"It may not be amiss for me to say that in laying down the sacred trust reposed in me several years since, I do so with a heart filled with thankfulness and gratitude that I should ever have been deemed worthy of it."

In appropriate words he then introduced, as the presiding officer of the meeting, his successor, Hermann S. Hering, C.S.B., who he said had come from the neighboring city of Baltimore, where for a number of years he was one of the faculty of Johns Hopkins University; that for upwards of eight years he had been a Christian Scientist, and that three years ago he retired from his position and labor as an electrical engineer to give his whole time to Christian Science work.

Mr. Hering then spoke as follows:—

"*Dear Friends:*—Human words are utterly inadequate to express my feelings at the great honor and enlarged sphere of usefulness to our dear Cause which has been bestowed upon me.

"In accepting this sacred office I desire most heartily to thank our Board of Directors, and especially our beloved Pastor Emeritus, Leader and Mother, for their confidence.

"In absolute obedience lies the hope of our Cause, and I know that I am supported by the truth contained in our Mother's statement, 'Divine Love always has met, and always will meet, every human need.'"

Mr. Hering then took charge of the meeting, opening it by announcing the singing of hymn 183 of the Hymnal, which was sung almost as with one voice by the great assemblage. He read from Scripture the following: Matthew, 10 : 1, 5–8; and Luke, 10 : 1–3, 5, 8, 9, 17–20; also from the revised edition of Science and Health on pages 138, line 17 to 139, line 2. After the usual silent prayer hymn 163 of the Hymnal was sung in the same spontaneous way as 183. The meeting was then opened to testimonies, and a number of interesting ones were given. The Boston daily papers gave good accounts of the meeting and of the testimonies given. From the *Boston Globe* we extract the following relating to the testimonies:—

Frank H. Leonard of Brooklyn said: "I believe nothing in Christian Science so interests the general public as the healing of so-called organic disease. A few years ago I was suffering from valvular heart trouble, and some of the best physicians here in your city said at one time there was so much water around my heart that I would die within twenty-four hours. I then took Christian Science treatment and in sixty days was cured. The doctor who had been my family physician for years declared that a miracle had been performed, for, he said, I had a new heart and one to be proud of. I am proud of it and thankful to Christian Science for it."

George B. Wickersham said he was cured of consumption through reading the Christian Science text-book. He said: "We know it is the truth which our blessed Master taught."

Adam H. Dickey of Kansas City told of the healing of a resident of that city as follows: "He was past sixty-nine years of age and supposed his case hopeless. He was suffering from chronic asthma and a complication of diseases, and was not expected to live through the winter. He had Christian Science treatment and in less than two weeks he was in perfect health. Chronic indigestion, which was one of his troubles, had disappeared and he could eat anything he wished. The front teeth on his lower jaw, which had been loose, became as firm as they ever had been. One of his legs, which had been stiff ever since it had received a gunshot wound when he was a boy, became as supple as before the accident, and incidentally his appetite for tobacco left him. He had long been unable to do any work, but since his healing he has been an employe of the Kansas City park department and has been able to perform service which keeps him up all night as a watchman."

David S. Robb of London, Ont., said he had been healed

Digitized by Google

of cataract through Christian Science after eight doctors had pronounced his case incurable.

Clarence Eaton of Minneapolis told of healing in a case of insanity.

E. C. Johnson of Roxbury related another triumph of Christian Science over insanity in that section of the city. He said: "The physicians said this young woman had suicidal insanity. Her hair could not be done up because she would try to swallow the hairpins. No strings could be used in her shoes, because she tried to hang herself with them. She tried to starve herself to death, and food was forced upon her by means of a tube. She was given Christian Science treatment, and in a week and a half was eating normally. In three weeks she was entirely healed. Physicians who pronounced her insane when she was placed in the asylum said she was perfectly sane when she came out, though they could not account for it."

Mrs. Virginia Davis of Spokane, Wash., told of the healing of a man of her acquaintance who had lost the use of both hands and both arms. The loss of one arm had come from a tree falling on him after he was grown up, while the other was disabled by a bullet severing a cord in his arm when he was a boy. She said the demonstrator did not know the causes of his condition until after he was cured. The third day after the first treatment the use of both hands and arms was restored, and he then said that he had not been able to open his left hand before for forty-six years.

George H. Kinter spoke of the progress of Christian Science work in the Philippine Islands. E. M. Buswell of Beatrice, Neb., spoke of cases of healing.

A man who said he had practised medicine said: "I have seen consumption, organic heart disease, cancer, and many other diseases which I have diagnosed as a physician, cured through Christian Science. I am a reformed man to-day because of reading the Christian Science text-book."

Another man said he had been made well through Christian Science after being sick twenty-two years.

One of the last speakers said he had suffered from a triple trouble of "Bright's disease, floating kidneys, and dropsy." A few treatments of Christian Science had cured him, and to-day he said he was able to eat three square meals, with an occasional lunch.

The meeting closed with the singing of the Christian Science Doxology.

The New First Reader.

Hermann S. Hering, who has been chosen First Reader of The First Church of Christ, Scientist, is the youngest son of the late Dr. Constantine Hering of Philadelphia, the founder of Homœopathy in this country.

After graduating from the University of Pennsylvania, Mr. Hering took special courses in London and became professor of mechanics and electrical engineering in the Philadelphia Manual Training School. He held that position five years, and then was associate in electrical engineering at Johns Hopkins University for eight years.

He became interested in Christian Science about eight years ago, and in 1899 gave up his profession and since then has devoted himself entirely to Christian Science work. He was Second Reader of the Second Church in Baltimore for five years.

To love God; to rejoice in His world; to see and feel its beauty; to let the heart open in gratitude as naturally as the flowers blossom; to stand ready to serve in even the humblest way, seeking no reward except such as flows out of serving our fellows in the spirit of Christ; to rise above petty annoyances and be calm; to trust God amid the hardest trials, and to find life sweet amid the deepest sorrows; to have faith in the power of love to conquer even enmity, sin, and death, is to have the spirit of Easter, is to be "risen with Christ."—Rev. Rodney F. Johonnot, D.D.

From Our Contributors.

Denial.

BY JESSE B. TWISS.

Reality is that which is true, has substance, is governed by undeviating Principle.

Unreality is the reverse of these and is illusion.

Look at a boy working a problem in mathematics. So far as his work is correct it is truth, therefore is real, therefore is the substance of mathematics because it expresses perfectly the enduring and eternal principles of mathematics so far as they apply to that problem.

But another boy working the same problem makes an error. We may point out that error, tell the boy that is not right, not true, for the principle of mathematics has been violated, the substance has been hidden and no reality remains, for all his subsequent figures are but a false expression, a lie.

This boy may say, "Don't talk to me about errors not being real, I know they are very real and ever-present; we cannot deny their reality; I do not like them, they destroy all pleasure in school work. If I deny their reality I feel that I am uttering a lie, they are to me very real indeed, they are a necessary result of every attempt I make to solve a problem, and I see no use in trying to get rid of them."

What attainment in mathematics will this boy make if he clings persistently to this sense of the reality of errors? will not his figures forever express lies and little or nothing of the truth of mathematics?

The first boy takes no stock in the reality of errors, neither does he let them creep into his work unchallenged. He knows their nothingness; *i.e.*, that they are nothing but lies which truth (an accurate application of true principles) will destroy, and he is keenly alive to the slightest appearance of an error, proving every step of his work as fast as he takes it, and if by any chance an error does creep in he quickly detects it, denies it; that is, he practically denies that it has any place in his work, any reality in his thought, and wipes it off his slate before it spoils the perfect solution of his problem.

The second boy allows the seeming reality and necessity of error to spoil his problem and all his life work. The first boy crowns his work with success because he counts error just what it is: a false expression, a lie, to be destroyed by the truth of mathematics before the solution of his problem is endangered or his work as a mathematician is injured.

The Christian Science students to-day are learning that the method adopted by the first boy, to shut out error in mathematics, is equally effective when applied to sin and sickness, for sin and sickness are errors of mortal thought, unlike God, therefore not right, not true, not real, and are to be cast out as a false expression, a lie, that would cheat us out of our birthright and bind us in chains of slavery, suffering, and degradation. We are learning that just as the truth of mathematics detects and destroys the lie of mathematics, so the Truth of Being as taught in "Science and Health with Key to the Scriptures," is the most effective remedy for the false statements of mortal belief that would bind us to beds of pain or lives of sin.

So we may test every thought that comes to us, "Bring every thought," as Paul says, "into subjection to Christ," and if each thought that comes is good, pure, like God, reflecting His image and likeness, such thought we should cling to and make it the spring and motive of our action. If unlike God, unlike Love, as all impurity, malice, hate, lust, all sinful thought, all sick thoughts are and must be, we may deny their reality—their rightness—that they are any real part of our thought.

Just as we deny the right of error in mathematics to abide and govern there, so must we deny the right of impure

Digitized by Google

thoughts, sick thoughts, any thoughts that are unlike God to abide with us and govern us; and just as in mathematics the detection of error and denial thereof must be followed by erasure and correction, so in the Science of Being our detection of error, sin, sickness, and the denial thereof must be followed by determined effort to erase and correct in our thought and life all that is unlike God.

"Deny thyself, take up the cross, and follow me," means more than the sacrifice of some petty pleasure expressed in money, time, or talent; but, fully understood, brings material man face to face with himself and all his grossness all his belief of power apart from God, all his belief of sin and sickness having power to bind man in chains of slavery, and bids him deny these errors, and so be freed from these fetters and become a man indeed and in reality.

Thus denial of self, error, becomes the key-note to success in Christian endeavor as well as in mathematics, to-day as well as in the days of Jesus; for only thus does God stand out to human apprehension as omnipotent and "All in all." But with it, and the understanding of omnipotent Truth as taught in Christian Science, we may all find it literally true that, "with God all things are possible," and by this same denial and understanding, mountains of sin, of sickness, of difficulty, are removed, and "Whatsoever ye ask" is done unto you, and, in the less familiar words of Christ, "*Nothing* shall be impossible unto you."

The Gulf Stream.

BY J. E. FELLERS.

PERHAPS the most interesting and wonderful phenomenon in the physical world is the Gulf Stream. Christian Science in the moral world offers a counterpart.

Professor Maury says, "The Gulf Stream has never failed in time of droughts, nor in time of flood has it ever overflowed. In all the world there is no other such majestic flow of waters." The volume of this ocean stream is a thousand times greater than any river on the earth. It has its origin in the Gulf of Mexico, and flows widening in a northeast direction to the southern shores of Newfoundland.

But for the warmth of this great river the shores of that icy island would be uninhabited. From Newfoundland the Gulf Stream flows on across the ocean touching the British Isles, Norway, Iceland, Spitzbergen, and Nova-Zembla.

Man has never known when this stream began or where it ends. He has never known how many homes have been made possible and how many flowers have been made to bloom in cold, bleak countries, by the influence brought from the far away by this wonderful river.

The Gulf Stream is a beautiful deep blue, with its boundaries distinctly marked against the light green of the surrounding sea through which it passes in its course. As it flows on it abounds with seaweed and moss torn from coral rocks underneath the surface, indicating that it is deep and strong and powerful. It brings to northern coasts six thousand miles away, waters heated by a tropical sun.

In the far north a bank of fog rising like a huge wall of error, which seems to say to the Gulf Stream "thus far and no farther," often marks the edge of this mighty river, and ships beaten by wind and storm, shivering and ready to give up the struggle, seek refuge in these waters in which icy fetters melt like false beliefs and disappear forever. By slipping over the line that divides this marvelous river from the cold waters of the sea, the voyager loses winter and finds the summer, even as the sufferer loses sickness and finds health by slipping out of old beliefs into the realities of being as taught in Christian Science.

As the Gulf Stream flows on through the waters of the sea holding within itself the warm, regenerating influence of the equatorial sun, and blessing those who come in contact with it, so Christian Science moves on through the world giving health and happiness to the sick and suffering, yet remaining distinct from the religious and medical systems of the day.

As the voyager on the sea finds the comfort, rest, and peace in the Gulf Stream which the surrounding waters could not supply, so the physical and mental sufferer struggling in the ocean of humanity finds the health and happiness in Christian Science, which he could find nowhere else.

"Rejoice Always."

BY LILLIAN K. BUTTERFIELD.

THE Scriptures admonish us over and over again, to "rejoice always," and as Scientists we have found the practical value of a joyful spirit. We have found that as we overcome our own errors of doubt and anxiety, we are able to rejoice; not simply to rejoice over the destruction of one particular error, but to have a joyful heart, a spirit of thankfulness. David says, "Enter into his gates with thanksgiving, and into his courts with praise." These are the gates of heaven and the courts of the Holy City, the abiding-place of God, and it is only as we have the spirit of praise and thanksgiving that we are able to enter. In proportion as we rejoice and give thanks are the gates opened, the heavenly kingdom revealed to us. The courts become our home and we are at rest in infinite Love.

Isaiah says, "With joy shall we draw water out of the wells of salvation." How blind and perverse have we been, our eyes closed to the beauties that were ours for the taking. What joy! what a beautiful thought! No more anxious days; no more weary nights, but beautiful joyful days; restful, peaceful nights, and why? Because we are beginning to understand God aright, to know that we are His children; that He careth for us; that the unsearchable riches of God are ours; beginning to know that we cannot be separated from Him; beginning to realize the fulness of joy in His presence. With joy are we drawing water from the wells of salvation, with thanksgiving entering His gates, and with praise His courts.

Growth.

BY E. L. CURRY.

LATELY I have been discouraged by the thought that my growth in Science was very slow, and I sometimes wondered if I grew at all. I was recently helped by this thought. When a child I never worried about the growth of my body. I felt sure that although I could not see daily a rapid growth, yet I was growing slowly and naturally, and some day I would find myself full-grown.

So it is in Science. We may not seem to ourselves to be growing very rapidly, but if we look back a few months, or years, we shall see that things which then seemed dark to us, and which we could not comprehend, are now clearly understood, and we know that we have made some progress on our heavenward journey. If we will only go on day by day taking up our cross, conquering the claims of error one by one, and living up to our highest understanding of Truth, we shall grow.

Let us, then, try to go on climbing, ever knowing that although the way may seem steep and dark, Truth must at last prevail over error, and if we struggle on we shall have our reward, for we read, "When the smoke of battle clears away, you will discern the good you have done, and receive according to your deserving" (Science and Health with Key to the Scriptures by Mary Baker G. Eddy, p. 22). The climbing may be hard, and often we may seem to be getting along very slowly, but every effort will have its recompense, and at last we shall emerge out of the darkness of this mortal dream, and awake in His likeness.

Testimonies of Healing.

It is one of the greatest pleasures to testify to the healing effects of Christian Science, for whether the healing is mental or physical, there is always an uplifting, such as was never before realized, and one cannot help speaking of it.

The Christian Scientists whom I first met, saw at once how antagonistic I was toward the Bible, and knowing that I not only wanted but needed this Truth, told me of the practical, every-day thinking and overcoming of wrong thoughts, and added that if I would try this new way, I would soon see the benefit. I remember the days following, —every little while I would say, "I am going to be good," and really, one does not know what good means until it is reduced to practice as taught in Christian Science. The best way to illustrate this, as in my case, would be to speak of a garden overgrown with noxious weeds. One by one as I saw them, in the expression of hate, or malice, or envy, I pulled them up, and cast them away, supplanting them with as much sunlight of love as I could. This was a grand work, and sometimes I had to use all my strength to uproot and supplant. It seemed that every weed I had ever sown sprang up to show its presence and reality. After this first weeding, I saw clearly it was all mental healing I needed, and that done, the physical responded. Ever since, whenever any symptoms of physical distress have appeared I have looked for weeds, even weeds with beautiful flowers, for the subtlety of evil is often covered by seeming beauty and prettiness, and just as soon as they were seen and uprooted, all ailments disappeared.

After proving the power of Good, different passages from the Bible were recalled, and I began to understand the spiritual meaning of Jesus' words and deeds, and saw that in a little degree I was beginning to do as he commanded; I asked to know more clearly, "What is God? How shall I pray?" and when I found a nearness to Him, that I never before dreamed of, I felt as if I had been born again, and experienced that peace which passeth understanding. The wonderful words of life given and explained by our Leader in Science and Health, are priceless jewels, and only our practical sincerity can express our gratitude for them.

EVA M. HECTOR, New York, N. Y.

It was through healing that I became interested in Christian Science, but blessings far greater than health came to me when the healer kindly led me out of darkness and broke the dream of unrealities. Life had a new outlook. Only those who have wandered from church to church, seeking that which has never been found, can understand my peace and joy when I first went to a Christian Science service. I can never forget the happiness and rest that I found among those dear Scientists. It was a comfort to me when my boys enjoyed the privilege of attending a Christian Science Sunday School. They now love its teachings and have had many beautiful demonstrations.

We moved away from our old home to a small town in Tennessee. I was alone, seemingly, in Science. It was a quiet place to study Science and Health, and I worked as never before. A few became interested in the Truth and they bought the book and are sowing the seed. Many good demonstrations have been made there.

A friend wrote me a letter asking for treatment for an elderly lady who lived near her. She wrote me, "She has quite a complication of diseases. She has the physician come to see her every other day, as she has what she calls 'a nervous shake.' She takes medicine nearly all the time, and as she says she gets no relief."

The letter was received Saturday morning. Two treatments were given before six o'clock, the time for the chill. She wrote me Sunday morning and I give a copy of her letter.

"January 19, 1902.

"*Dear Mrs. W.*:—I have just been to see Mrs. T., and she is so much better that I am just delighted.

"She did not have that chill last night, but had a very good night's rest. She got up this morning and helped with breakfast, washed the dishes, made her bed, and swept. She had not done any sweeping for a year, and for a long time she had not done any kind of work.

"She said to tell you she had been sick fifteen years. The doctor was to come Saturday evening, but she sent him word not to come until she sent for him.

"She is interested and has been reading since I took those Sentinels. Mr. T. is reading them too. She wonders now why I did not tell her of the Science. I had wanted to tell her for a long time, but I felt she would not have any faith.

"This morning she said that two or three times after I had been there, Mr. T. would say, 'I believe N. wanted to tell something,' So she now sees how it was that thought came to him.

"Is it not wonderful how the Truth draws people together. She wants me now to visit her because I can talk with her on the subject in which she is much interested.

"Your friend,

"N."

Mrs. T. had treatment for two weeks longer for old standing troubles.

Her daughter wrote me that her mother was doing all her work and rested well at night. She had been over to see her which she had not done before for three years. She said she was very proud and thankful for her mother's cure.

I wish to acknowledge with grateful thanks the pleasure and benefits received from the *Sentinel* as it comes to our home every week. As soon as read we send them to friends.

MRS. N. M. W., West Nashville, Tenn.

After reading the *Sentinel* not long ago, and as I thought how helpful it was to me, I seemed to hear something say, "You have been fed; have'nt you something for us?" There was much that I might write, but how could I tell which blessing to speak of?

First I will say I am most grateful for the revised Science and Health and our *Sentinel* and *Journal*.

In the fall of 1900, my son was coming home on his wheel at dusk, riding very rapidly; the wheel struck some obstruction, and he was thrown to the pavement, striking on his head. I was at home alone at the time. In a few minutes my son came in and told me of the accident. We had dinner, and went to the Wednesday evening meeting, though his face did not look very well. The next day he went to work as usual. The second day we found the scalp puffed up on top of the head a little, but this did not last long. There was no pain except for a few minutes after the fall, and no discoloration, though the skin was off near one eye. No time was lost from work, and no bad results remained.

We have other proofs as good as this of the practicality of Christian Science. Science and Health has taught me to be thankful, and to overcome hatred, deceit, envy, sorrow, and their effects.—MRS. F. W., Omaha, Neb.

One step in the school of forbearance is the lesson of keeping silent under provocation. Many of the painful quarrels and much of the bitterness of what we call so often "incompatibility of temper" would never be known, if we would learn to keep silent when others wrong us.

J. R. MILLER, D.D.

As we must spend time in cultivating our earthly friendships if we are to have their blessings, so we must spend time in cultivating the companionship of Christ.

HENRY DRUMMOND.

Religious Items.

There is a very real sense in which we may speak of "The Descent of Man," and also of "The Ascent of Man." The former takes place every time a man yields to his passions and appetites in spite of the Spirit's remonstrance sounding in his ears. The latter takes place when the ethical, rational element triumphs over the lustful, brutish element.

We have been accustomed to regard the fall of man as an historical event of long ago, a terrible disaster which befell the first human pair, an entailed woe upon all their posterity. But we must remember that the fall is an actual occurrence in the life of every human soul that becomes truly self-conscious. When he "comes to himself" as a moral being, it is discovered that he has slipped, fallen, and injured himself. It matters not whether the fall has been brought about through hereditary weakness, unfortunate environment, or personal waywardness, he must face the fact that he is down, and that he has fallen down. He realizes that the animal part of his nature is in the ascendant and is stifling the spiritual part. Then comes the appeal and the decision, to determine whether he will remain down, or arise and stand; whether the lower nature will be gratified at the expense of the higher, or the higher hold dominion over the lower; whether he will be content with his "Descent" or struggle for an "Ascent."

The Watchman.

According to *The Christian Register*, ex-Secretary Long said at the recent Unitarian Anniversaries: "As one looks at the development of the Christian theology, the Christian system, for centuries and centuries it seems to have been a steady sort of piling on, incrustation, augmentation, integumentation, accretion, excrescences, until it had utterly outgrown its original simplicity; and the great work of the last hundred years—certainly the great work of the last fifty years—has been in stripping off all this and getting back . . . to the simplicity of Jesus Christ and the religion which he taught. . . . It may not be the proper thing to say; but if we could drop theological dispute for ten years, forget all the forms, and wake up then and take up the Christian teaching, the example and the religion of Jesus Christ, the world would accept it as the highest and the truest manifestation of human truth and of human hope."

Best of all, the witness of upright lives says more persuasively than any lips can say, "Be like me." Goodness is attractive. Because the Church in Jerusalem chose Barnabas, who "was a good man," as its messenger to the inquirers at Antioch, "much people was added unto the Lord." What would have happened if they had chosen a man of many gifts, but after all not genuine? They did not make that mistake. The record says that Barnabas was filled with the Holy Ghost, and that he was a man of faith, but first of all it says that he "was a good man." The result was that he was a good witness for the new faith. His kind of Christianity was contagious—and it always will be.

The Congregationalist and Christian World.

The stand taken by our Presbyterian brothers in softening their creed means a deliverance from pessimism. "This," says a prominent member of that body, "means that we are henceforth to be permitted to believe in the unlimited goodness of God, and in the salvation of humanity as a whole. I believe there is not one dark spot in the universe that will not sooner or later come out white.—dark human souls are surely no exceptions. I cannot believe in a good God, and see otherwise." It is a red letter day for religion when there is no longer left a Church declaration of belief in the wreckage of creation, and the final failure of universal good will.—*The Christian Register.*

Rev. G. H. Ashworth says in *The Universalist Leader:* "We are now in the midst of a religious reformation, one that the coming centuries will look upon much as we look upon the reformation of the sixteenth century. And the result of this theological revolution, brought about as it has been by spiritual evolution, will be a readjustment of the essentials of Christianity,—a readjustment that will eliminate all the objectionable elements of Christianity and justify our spelling Christianity with a capital C. Believing that we have been mistaken as to what Christianity is, we would naturally expect their conclusions to be wrong as to what constitutes a Christian."

Truth cannot change; if it does, it cannot be *Divine* truth; therefore the creed of a Church which is inspired by the Spirit of Truth, is, and must be, the Faith "once for all delivered to the saints."

While, however, the Faith itself thus continues unchanged, there may be progress in the human apprehension of the Faith. But the progress must always be *in* the Faith, not away from it; not in addition to or subtractions from the Old Faith, but simply in a clearer understanding of the central truth of the incarnation.—BISHOP SATTERLEE.

On the occasion of the Baptist Anniversaries at St. Paul, Dr. Henson, as reported in *The Watchman*, said: "The devil shut up religion to the meeting-houses. He turns it into a cold storage warehouse, where religion is kept on ice. The early Church had not a meeting-house. We have them to burn, and I have sometimes thought that was the best use to which some of them could be put, for then, at least, the people would see a light where they had never seen one before, and get a glow for once."

The Philadelphia letter in *The Church Standard*, speaking about the graduates (ladies) of the Church Training and Deaconess House, makes this comment: "The faculty is much pleased by the proficiency of the students as shown in the recent final examinations. Some of the questions on theology were answered so well as to indicate that woman's intuitional endowment may especially serve her in the apprehension and in the imparting of dogmatic truth."

J. W. Weddell, D.D., says in *The Standard:* "Some one has said we need not look afar across lands and seas for our Holy Land. Our Holy Land, if we will make it such, is right around us. The struggle of a valiant soul against the odds that lie about makes all ground holy ground. 'Fight the good fight of faith, lay hold on eternal life.' Do it right where you are and the ground whereon you stand is holy ground."

Alexander McLaren, D.D., says in *The Homiletic Review:* "The elevation determines the vision, and the clearer and the closer, and the deeper our habitual fellowship with God in Christ, the more lofty will our conceptions be of what we ought to be. The reason for inconsistent lives is imperfect communion, and the higher we go on the mount of vision the clearer will our vision be."

Rev. Marion F. Ham says in *The Christian Register:* "Like Nicodemus, if the most of us seek the light at all, we are careful to seek it under cover of darkness. Intellectual dishonesty is the spiritual cancer of this age. To-day its roots run far into the vitals of the Church. The only question is how long the patient's vitality can withstand its deadly result."

The testimony of those who come in touch with heathenism leads to the admission that human nature the world over is much the same, and human thinking on the great essentials of life as earnest and as searching in heathendom as in Christendom. One is the search of intellect in the dark, the other the progress of the enlightened mind.

The Standard.

The modern Church is in need of a larger measure of the Holy Ghost, a deeper consecration to God, and fuller spiritual life. The Church may break down by her own weight if she is not very spiritual. It is easy to see tendencies in the modern Church to become a political institution or a social club, or a commercial agency. Nothing can save it but divine grace.—*The Christian Advocate.*

The Church has not yet reached up to the full doctrine of Christ, but the day is rapidly coming when the test of Church membership shall be whether a man loves his fellowman.—REV. RAINSFORD.

The Congregationalist says: "To proclaim Christ's invitation with good words is much, but to be ourselves Christ's invitation by a life of constant cheerfulness is at once the noblest and the commonest of all earth's opportunities."

One of the purposes of the fifth petition of the Lord's Prayer is to remove the possibility of there being such a thing in a Christian Congregation as two Christians too unchristian to speak to each other.

Philadelphia Lutheran.

The Watchman has this paragraph: "Prof. Goldwin Smith makes a center shot when he speaks of the 'vacuum in the region of religious belief which music, flowers, art, and pageantry are required to fill.'"

Dr. Charles H. Parkhurst says: "The best doctrine is that which does most to make men Godlike, and the best denomination is the one that will graduate the finest saints and the most of them."

LITERATURE FOR DISTRIBUTION.

SUPPLEMENTS TO THE SENTINEL.

Christian Science: The Religion of Jesus Christ. By the Hon. William G. Ewing of Chicago, Ill.

Christian Science: Its Worth and Work. By Rev. Arthur R. Vosburgh of Rochester, N. Y.

Christian Science: Its Promises and their Fulfilment. By Edward A. Kimball of Chicago, Ill.

Christian Science: Is it Christian? By Mrs. Sue Harper Mims of Atlanta, Ga.

Christian Science: Its Work and Scope. By Carol Norton of New York City.

Christian Science: The True Idealism. By Annie M. Knott of Detroit, Mich.

Christian Science: The Christianity of Christ. By Rev. Irving C. Tomlinson. This supplement is printed in German *only*.

PRICE:—Single copies two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

PAMPHLETS.

Pamphlets may now be procured singly at what was formerly the wholesale price. The intention is to enable those who wish to disseminate the teachings of Christian Science by the distribution of literature, to do a wider work.

PRICE:—One copy or more, six cents each; twelve copies to one address, sixty cents; twenty-five copies to one address, $1.15; fifty copies to one address, $2.25. Orders for pamphlets may be assorted as desired.

For list of pamphlets see next page.

TRACTS.

Expressions Concerning Christian Science. Rich Blessing. Beauty of Christian Science. Theory *vs.* Realization.

PRICE:—One hundred, fifty cents; two hundred, seventy-five cents; five hundred, $1.25; one thousand, $2.00.

REPRINTS FROM THE JOURNAL AND SENTINEL.

The True Law. Healing the Sick. The Brotherhood of Man. The Real and the Unreal. Service and Stipend. The True Orthodoxy. There is Rest and Peace on Earth. Resigned to the Will of God. Lessons from a Workshop. To Business Men.

PRICE:—Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.50.

Address all orders for above literature to The Christian Science Publishing Society, 95 Falmouth Street, Boston, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 700 pp.
THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth binding, each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full sheep, stiff covers, gilt edges, same paper and size of page as cloth edition, each prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, Oxford India paper, convenient for pocket, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India paper, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth) each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½x6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS. An illustrated poem,

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5 00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pp. Price by mail, 26 cents; per doz., prepaid, $2.50.

MESSAGE TO THE MOTHER CHURCH. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Price, 26 cents; per dozen, $2.50 prepaid.

OUR LEADER'S MESSAGE. The annual message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Price, 50 cents; per dozen, $4.50, prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pp. Paper covers. Price by mail, 21 cents; $2.00 per doz., prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

Joseph Armstrong, 95 Falmouth Street, Boston, Mass.
